Detailed infectious diseases across organ systems. The biological characteristics and pathologic mechanisms of infectious diseases caused by bacteria, viruses, fungi and parasites are explored in a case-based learning. Student-driven learning objectives for each case (to include microbiology, anatomy, physiology, pharmacology, technology and clinical LO's each case) help groups connect scientific information across disciplines.

Credit Hours: 3

Prerequisites: Instructor's consent

Recommended: MICROB 2800 or MICROB 3200, MPP 3202, and PTH_AS 2201

MICROB 4300: Bacterial Pathogenesis

(cross-leveled with MICROB 7404). This team taught course covers the biology and virulence mechanisms of bacterial pathogens, with emphasis on those causing human and zoonotic diseases. Topics covered include bacterial structure, genetics, physiology, and metabolism; antibiotic resistance; host-pathogen interactions; microbiomes and emerging pathogens.

Credit Hours: 2

Prerequisites: MICROB 3200 or equivalent. Consent from Course Director is required to insure academic readiness

MICROB 4303: Fundamental Virology

Classification of viruses, life cycles, genome organization and expression, host-virus interactions, oncogenes and cellular transformation, viral pathogenesis, viral gene therapy approaches, strategies for anti viral therapy.

Credit Hours: 2

Prerequisites: undergraduates require instructor's consent. This course will include evaluation of current literature and require paper presentations

MICROB 4304: Immunology

This is a comprehensive team-taught, basic immunology course covering cells and organs of the immune system, lymphocyte development, innate immunity, antibody production, antibody-antigen presentation, CD4+ and CD8+ T lymphocyte responses, cytokines, autoimmunity and immunodeficiency among other immunologically relevant topics. Completion of a biochemistry, genetics, or molecular biology course would be helpful.

Credit Hours: 2

Recommended: MICROB 3200 or BIOCHM 4270

MICROB 4305H: Honors Bacterial Pathogenesis

This team taught course covers the biology and virulence mechanisms of bacterial pathogens, with emphasis on those causing human and zoonotic diseases. Topics covered include bacterial structure, genetics, physiology, and metabolism; antibiotic resistance; host-pathogen interactions; microbiomes and emerging pathogens.

Credit Hours: 2

Prerequisites: MICROB 3200 or equivalent; Honors eligibility required. Consent from Course Director required to insure academic readiness

MICROB 6291: ABS Microbiology Mechanism of Disease

ABS Microbiology Mechanism of Disease

Credit Hour: 5-10

MICROB 6293: ABS Microbiology Research

ABS Microbiology Research

Credit Hour: 5-10

MICROB 6295: ABS Microbiology Research and Review

ABS Microbiology Research and Review

Credit Hour: 5-10

MICROB 7101: Structure and Synthesis of Macro Molecules

This multiple-instructor course is designed to provide students with a detailed understanding of the structure, function, and biophysical properties of bio-molecules. Principles and techniques of molecular biology related to the study of recombinant DNA and genetic analysis, protein structure, function and basic immunological principles will be covered. Admission is dependent on approval by course director.

Credit Hours: 2

Prerequisites: consent required

MICROB 7303: Fundamental Virology

Classification of viruses, life cycles, genome organization and expression, host-virus interactions, oncogenes and cellular transformation, viral pathogenesis, viral gene therapy approaches, strategies for anti viral therapy.

Credit Hours: 2

Prerequisites: Undergraduates require instructor's consent. This course will include evaluation of current literature and require paper presentations

MICROB 7304: Immunology

Covers innate immunity, antibodies, antigens, MHC, antigen presentation, lymphocyte development, antigen specific receptors, lymphocyte activation and differentiation, immune effector mechanisms, hypersensitivities, tolerance, autoimmunity, immunodeficiencies.

Credit Hours: 2

Recommended: MICROB 3200 or BIOCHM 4270 or BIOCHM 4272 or instructor's consent

MICROB 7404: Foundations in Bacteriology and Pathogenesis

This team taught course covers the biology and virulence mechanisms of bacterial pathogens, with emphasis on those causing human and zoonotic disease. Topics covered include bacterial structure, genetics, physiology, and metabolism; antibiotic resistance; host-pathogen interactions; microbiomes and emerging pathogens.

Credit Hours: 3

MICROB 8050: Graduate Student Survival Skills

This course is an introduction to inform new graduate students about the Microbiology program and provide them with the knowledge to access resources and information needed for a successful transition into their course work and research. The course will also focus on guidelines

in selecting mentors and their relationships, time management, good notebook practices, presentation and posters, comprehensive exams, and computer skills needed. Graded on S/U basis only.

Credit Hour: 1

MICROB 9001: Topics in Microbiology

Current topics, highly specialized topics taught infrequently, or courses taught by visiting professors.

Credit Hour: 1-99

Prerequisites: instructor's consent

MICROB 9085: Problems in Microbiology

Students assigned individual problems in microbiology for library or lab investigation. Graded on A-F basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

MICROB 9087: Seminar in Microbiology

Presentation and critical discussion of student and staff research, current literature, and guest lectures on subjects in various areas of microbiology. Graded on A-F basis only.

Credit Hour: 1

MICROB 9090: Research in Microbiology

Original investigations in various areas of microbiology related to bacteria, fungi, rickettsia, viruses, and animal parasites, or immunology relating to antigens and antibodies of infectious and noninfectious nature designed for graduate thesis research. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

MICROB 9403: Advanced Medical Microbiology

Similar to MICROB 4300 but treats medical microbiology and immunology in a more advanced manner. Methods of preparation and instruction stressed. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: instructor's consent

MICROB 9407: Advanced Immunology

Literature based lectures and discussions covering current issues in molecular and cellular immunology. Topics include innate immunity; lymphocyte development; inflammation; tolerance, infection, and autoimmunity; mucosal immunity; asthma and allergy and tumor immunology.

Credit Hours: 4

Prerequisites: MICROB 4304 or MICROB 7304, or instructor's consent

MICROB 9411: Responsible Conduct of Research

Ethical, legal and sociological ramifications of research including data management, authorship, human and animal use, conflict of interest and misconduct. Round table discussions and interactive forums. Grading based on participation in discussions and assignments. Graded on S/U basis only.

Credit Hour: 1

MICROB 9430: Molecular Biology I

(same as BIOCHM 9430). Detailed examination of current fundamental concepts of molecular genetics of bacteria, bacteriophages and yeast. Experimental approaches to analysis of the physical structures of genomic nucleic acids, the biochemistry and genetics of mutations, replications, gene transfer and gene expression will be examined in depth from reports in the current literature.

Credit Hours: 4**Prerequisites:** Biochemistry, genetics

MICROB 9432: Molecular Biology II

(same as BIOCHM 9432 and BIO_SC 9432). Detailed experimental analysis of eukaryotic cellular and molecular biology relevant to cellular and viral gene expression, post-transcriptional and post-translational modifications and genome replication. Models for developmental genetic analysis and genetic determinants controlling developmental processes utilizing the current literature will be examined.

Credit Hours: 4**Prerequisites:** MICROB 9430

MICROB 9449: Infection and Immunity

Writing, discussion, literature driven course, covering topics that focus on the interface between infectious diseases, cancer and the immune system. May be repeated for credit. Graded A-F basis only.

Credit Hours: 4**Prerequisites:** 2nd year Graduate student with bacteriology, virology, microbial pathogenesis and immunology background only. 1st year graduate students require instructor approval

Military Science Courses**MIL_SC 1100: Foundations of Officership**

Introduces students to issues and competencies that are central to a commissioned officer's responsibilities. Establish framework for understanding officership, leadership, and Army values followed and "life skills" such as physical fitness and time management.

Credit Hour: 1

MIL_SC 1110: Introductory Military Science Laboratory I

Field application of skills taught in MIL_SC 1100, to include leadership, land navigation, tactical skills and basic soldier skills.

Credit Hour: 1**Recommended:** MIL_SC 1100

MIL_SC 1120: Basic Leadership

Establishes foundation of basic leadership fundamentals such as problem solving, communication, briefings and effective writing, goal setting, techniques for improving listening and speaking skills and an introduction to counseling.

Credit Hour: 1

MIL_SC 1130: Introductory Military Science Laboratory II

Field application of skills taught in MIL_SC 1120, to include leadership, land navigation, tactical skills and basic soldier skills.

Credit Hour: 1**Recommended:** MIL_SC 1120

MIL_SC 2200: Individual Leadership Studies

Students identify successful leadership characteristics through observation of others and self through experimental learning exercises. Students record observed traits (good and bad) in a dimensional leadership journal and discuss observations in small group settings.

Credit Hours: 2

MIL_SC 2210: Intermediate Military Science Laboratory I

Progressively more challenging leadership scenarios presented in a field and classroom environment. Students practice basic military skills such as squad-level offensive and defensive operations. First aid topics and drill and ceremony are also taught.

Credit Hour: 1**Recommended:** MIL_SC 2200

MIL_SC 2220: Leadership and Teamwork

Study examines how to build successful teams, various methods for influencing action, effective communication in selling and achieving goals, the importance of timing the decision, creativity in the problem solving process, and obtaining team buy-in through immediate feedback.

Credit Hours: 2

MIL_SC 2230: Intermediate Military Science Laboratory II

Progressively more challenging leadership scenarios presented in a field and classroom environment. Students practice basic military skills such as platoon-level offensive and defensive operations. Practical application of night land navigation.

Credit Hour: 1**Recommended:** MIL_SC 2220

MIL_SC 3160: Death by a Thousand Cuts: Counterinsurgency/Insurgency the American Experience

This course explores the problem of insurgency and counterinsurgency in terms of what we can learn from these conflicts. It examines counterinsurgency theory and practice, the Philippine Insurrection, Banana Wars, Vietnam War, Afghanistan, and Iraq.

Credit Hours: 3

MIL_SC 3161: The American Experience in Vietnam

This course was developed to provide students the opportunity to examine the American experience in the Vietnam War, to search for meanings in this experience, and to arrive at their own conclusions concerning the impact of the war upon the nation. Moreover, it challenges the students to think critically about war and the use of military power to settle differences between nations. May be repeated for credit.

Credit Hours: 3

MIL_SC 3162: Counterinsurgency in Asia

This course explores the problem of insurgency and counterinsurgency in Asia in terms of what we can learn from these conflicts. The course examines the insurgency in the Philippine Insurrection 1899-1902, the

Vietnam War, the Soviet-Afghan War, in Thailand, Sri Lanka and Malayan Emergency. May be repeated for credit.

Credit Hours: 3

MIL_SC 3163: U.S. Military History in the Western Tradition

Analysis of United States military history from the Colonial period to the present, (1609-2012). It is a comprehensive look into the evolution of warfare in America, military traditions and heritage, and technology. This course analyzes the following: American Revolution, War of 1812, Mexican American War, Civil War, Indian Wars, Spanish American War, World War I, Inter War Period, World War II, Korean War, Vietnam War, Gulf War, Afghanistan and Iraq. All cadets are required to take this course for commissioning. May be repeated for credit.

Credit Hours: 3

MIL_SC 3164: Nation Building through a Barrel of a Gun

(same as POL_SC 3164). This course was developed to provide students the opportunity to examine the dilemmas of military intervention, nation-building/peacekeeping operations and exit strategies. This course is designed to challenge students to think critically and arrive at their own conclusions about the use of military power to settle differences between nations, and use of military forces to conduct nation building.

Credit Hours: 3

MIL_SC 3165: "Chasing Ghost", The History of Irregular Warfare

(same as POL_SC 3165). This course explores the history of Irregular Warfare from the guerrilla perspective. The course examines the works of Mao Tse-Tung, Che Guevara, T.E. Lawrence and several other Guerrilla Leaders. You will analyze the evolution of Irregular Warfare through history and understand the complexities associated with the difficulties of countering and defeating Irregular Warfare. Graded on A-F basis only.

Credit Hours: 3

MIL_SC 3230: Leadership and Problem Solving

Students conduct self-assessment of leadership style, develop personal fitness regimen, and learn to plan and conduct individual/small unit tactical training while testing reasoning and problem-solving techniques. Students receive direct feedback on leadership abilities.

Credit Hours: 3

MIL_SC 3240: Leadership and Ethics

Examines the role communications, values, and ethics play in effective leadership. Topics include ethical decision-making, considerations of others, spirituality in the military, and survey Army leadership doctrine. Emphasis on improving oral and written communication ability.

Credit Hours: 3

Recommended: MIL_SC 3230

MIL_SC 3250: Leadership and Management

Develops student proficiency in planning and executing complex operations, functioning as a member of a staff, and mentoring subordinates. Students explore training management, methods of effective staff collaboration, and developmental counseling techniques.

Credit Hours: 3

Recommended: MIL_SC 3240

MIL_SC 3260: Officership

Study includes case study analysis of military law and practical exercises on establishing an ethical command climate, service as an officer; capstone exercise. Leadership lab Students must complete a semester long Senior Leadership Project that requires them to plan, organize, collaborate, analyze, and demonstrate their leadership skills.

Credit Hours: 3

Recommended: MIL_SC 3250

MIL_SC 3270: Advanced Transition to Lieutenant I

Independent research, analysis and monthly discussion on related military topics. Personal, academic and professional goals and objectives, development and maintenance of an officer evaluation report support form.

Credit Hours: 3

Prerequisites: MIL_SC 1100, MIL_SC 2200, MIL_SC 3230, and MIL_SC 3250

Recommended: department head permission

MIL_SC 3280: Advanced Transition to Lieutenant II

Independent research, analysis and monthly discussion on related military topics. Personal academic and professional goals and objectives, development and maintenance of an officer evaluation report support form.

Credit Hours: 3

Prerequisites: MIL_SC 1100, MIL_SC 2200, MIL_SC 3230, and MIL_SC 3250

Recommended: department head permission

MU Informatics Institute Courses

INFOINST 7001: Topics in Informatics

This course provides the overview to the informatics foundations as well as introduces topics regarding the current informatics-driven areas of science. Graded on A-F basis only.

Credit Hours: 3

INFOINST 7002: Introduction to Informatics

This course provides an overview to informatics foundations in addition to introducing topics regarding the current informatics-driven areas of science. Topics to include: recent trends in informatics; database management and Big Data analytics; data visualization, bioinformatics, health informatics, geoinformatics, nursing informatics, social informatics, and legal informatics. Graded on A-F only.

Credit Hours: 3

Prerequisites: Instructor's consent

INFOINST 7010: Computational Methods in Bioinformatics

(same as CMP_SC 7010). Fundamental concepts and basic computational techniques for mainstream bioinformatics problems. Emphasis placed on computational aspect of bioinformatics including formulation of a biological problem, design of algorithms, confidence assessment of software development. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4050 and STAT 4710

INFOINST 7430: Introduction to Health Informatics

(same as HMI 7430). Introduction to the use of clinical information systems in healthcare. Topics include clinical data, standards, electronic medical records, computerized provider order entry, decision support, telemedicine, and consumer applications. Graded on A-F basis only

Credit Hours: 3

Prerequisites: departmental consent required

INFOINST 7600: Introduction to Data Science and Analytics

An introductory course in data science and analytics. The objective of the course is to give students a broad overview of the various aspects of data analytics such as accessing, cleansing, modeling, visualizing, and interpreting data. Students will perform hands-on learning of data analytic topics, using technologies such as Python, R, and open source analytic tools. Two Big Data cyberinfrastructure platforms will be introduced through case studies, allowing students to perform data analytical learning modules on modern cloud infrastructure and other relevant technologies. Graded on A-F basis only.

Credit Hours: 3

Recommended: Basic programming experience and Basic database experience

INFOINST 8001: Topics in Informatics

Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department. Graded A-F basis only.

Credit Hours: 3

INFOINST 8005: Applications of Bioinformatics Tools in Biological Research

This service course is designed for bioinformatics non-major students from life sciences, biological sciences, plant sciences, animal sciences, biochemistry, medicine fields and others. This course will provide an introduction to the current state of the art topics in bioinformatics and the computational tools available to the research community for application to biological research questions. Students will learn how to effectively utilize the tools and software packages to analyze data and visualize the results. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Instructor's consent

Recommended: Graduate students are expected to have basic knowledge in algorithms, databases, and molecular biology

INFOINST 8010: Problem Solving in Bioinformatics

(same as CMP_SC 8110). The course covers a variety of bioinformatics research topics such as biological sequence comparison, protein structure prediction, protein and gene function prediction, and inference and modeling of biological networks. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010

INFOINST 8085: Problems in Informatics

Independent, directed study on a topic in the area of informatics. Some sections may be graded A-F or S/U.

Credit Hour: 1-6

Prerequisites: Instructor's consent required

INFOINST 8087: Seminar in Informatics

Students attend and/or present at informatics seminars approved by the institute. Graded on S/U basis only.

Credit Hour: 0.5-1

Prerequisites: instructor's consent required

INFOINST 8088: Lab Rotations in Informatics

This course is designed to train students in both computational/informatics and life science/hospital laboratories to foster critical research collaborations in biomedical informatics. Students are expected to write reports with their advisors and the mentor of the rotation. Graded on S/U basis only.

Credit Hour: 1-3

INFOINST 8090: Dissertation (pre-candidacy) Research in Informatics

Research leading to dissertation before comprehensive examination. Graded on S/U basis only.

Credit Hour: 1-99

INFOINST 8150: Integrative Methods in Bioinformatics

(same as CMP_SC 8150), Introduces the most popular experimental methods from the point of view of the information sources that can be used. Students will use data obtained directly from biological experiments and learn how to suggest new experiments to improve results. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010

INFOINST 8180: Machine Learning Methods for Biomedical Informatics

(same as CMP_SC 8180). Teaches statistical machine learning methods and applications in biomedical informatics. Covers theories of advanced statistical machine learning methods and how to develop machine learning methods to solve biomedical problems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 7050 and INFOINST 7010 or CMP_SC 7010 or INFOINST 7005

INFOINST 8190: Computational Systems Biology

(same as CMP_SC 8390). This course covers current theories and methods in the modeling and analysis of high-throughput experiments such as microarrays, proteomics, and metabolomics. Topics include the inference of causal relations from experimental data and reverse engineering of cellular systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010; INFOINST 8010

INFOINST 8210: Structural Bioinformatics of Proteins, Complexes, System

(same as CMP_SC 8120). Main course objective is to provide an introduction to the state-of-the-art methods in structural bioinformatics. The course will cover the methods that are applied to a wide range of biomolecular objects from protein domains and small proteins to large biological systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010

Recommended: CMP_SC 4050 or CMP_SC 7050

INFOINST 8310: Computational Genomics

(same as CMP_SC 8130). This course introduces computational concepts and methods of genomics to students. The course covers genome structure, database, sequencing, assembly, annotation, gene and RNA finding, motif and repeats identification, single nucleotide polymorphism, and epigenomics. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010

INFOINST 8350: Integrative Methods in Bioinformatics

Course objective is to introduce the most popular experimental methods from the point of view of the information sources that can be used in. Students will learn to use data obtained directly from biological experiments and how to suggest new experiments to improve results. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010

INFOINST 8390: Computational Systems Biology

This course covers current theories and methods in the modeling and analysis of high-throughput experiments such as microarrays, proteomics, and metabolomics. Topics include the inference of casual relations from experimental data and reverse engineering of cellular systems. Graded A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010; INFOINST 8010 or instructors consent

INFOINST 8450: Precision Medicine Informatics

(same as PTH_AS 7450). This course will introduce students with the theoretical and practical aspects of precision medicine informatics. Topics include: complex diseases, computational genomics/proteomics, informatics of molecular interactions and biological pathways, somatic mutations, signal transduction and cancer, biomarker discovery, machine learning and data mining for PMI, networks methods for PMI, knowledge representation and reasoning for PMI. The course will consist of a set of didactic lectures, computational assignments, in-class demonstrations of PMI methods and discussions of recent publications.

Credit Hours: 3

Prerequisites: INFOINST 8005 with C or better or INFOINST 7010 with C or better or instructor's consent

INFOINST 8610: Statistical and Mathematical Foundations for Data Analytics

An intermediate statistics class designed to build the mathematical foundation for students dealing with Big Data phenomena. Topics include discussions of probability, data sampling, data summarization, sampling distributions, statistical inference, statistical pattern analysis, hypothesis testing, regression, and nonparametric inference over multidimensional data collections. Students will engage in Big Data projects using various publicly available data sets and leveraging modern Data Science tools, techniques, and cyberinfrastructure. Graded on A-F basis only.

Credit Hours: 3

Recommended: Basic understanding of mathematical principles of vectors and matrices, and Basic course in probability and statistics

INFOINST 8620: Database and Analytics

Covers the Fundamental concepts of current database systems and query methods with emphasis on relational model and non-relational techniques in Big Data environments. Topics include entity-relationship model, relational algebra, indexing, query optimization, normal forms, tuning, security, NoSQL, and data analytics skills in both relational and non-relational environments. Project work involves modern relational DBMS systems and NoSQL environments. Graded on A-F basis only.

Credit Hours: 3

Recommended: Basic understanding of mathematical principles of vectors and matrices, and Basic course in probability and statistics

INFOINST 8630: Data Mining and Information Retrieval

The course introduces the main concepts and techniques of data mining and information retrieval. It covers a variety of data mining topics and methods to extract hidden and predictive patterns from large data collections. Furthermore, theory and techniques for the modeling, indexing, and retrieval of relational, nonrelational, textbased and multimedia databases is covered. Topics include introduction to data mining process, mining frequent patterns, and pattern analysis, as well as different information retrieval models and evaluation, query languages and operations, and indexing/searching methods. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7600 and INFOINST 8620

Recommended: Basic understanding of mathematical principles of vectors and matrices; Basic course in probability and statistics; Basic course in databases and data analytics

INFOINST 8640: Big Data Security

This course provides an overview of state-of-the-art topics in Big Data Security, looking at data collection (smartphones, sensors, the Web), data storage and processing (scalable relational databases, Hadoop, Spark, etc.), extracting structured data from unstructured data, systems issues (exploiting multicore, security). Securing sensitive data, personal data and behavioral data while ensuring a respect for privacy will be a focus point in the course Graded on A-F only.

Credit Hours: 3

Prerequisites: INFOINST 7600 and INFOINST 8620

INFOINST 8650: Big Data Visualization

Covers the Fundamental concepts of current visualization concepts and technologies. Unlike many data visualization courses, this one focuses

on principles of visualization design and the grammar of graphics. These principles are then implemented in popular contemporary visualization technologies. Students will develop an advanced knowledge of the appropriate selection, modeling, and evaluation of data visualizations. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7600 and INFOINST 8620

Recommended: Basic understanding of mathematical principles of vectors and matrices; Basic course in probability and statistics; Basic course in databases and data analytics

INFOINST 8660: Data and Information Ethics

Introduces the ethics related to Big Data in industry, business, academia, and research settings. Students will learn the social, ethical, legal and policy issues that underpin the big data phenomenon. Discussions and case studies will help guard against the repetition of known mistakes and inadequate preparation. The course content will follow the guidelines to be developed by the Council for Big Data, Ethics, and Society. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: INFOINST 7600 and INFOINST 8650

INFOINST 8810: Research Methods in Informatics

(same as HMI 8810). Research Methods in Health and Bioinformatics is a writing intensive course that provides students with an understanding of research proposal development, literature searching, research synthesis, research designs, evaluation methods, and ethics. Graded A-F basis only.

Credit Hours: 3

Prerequisites: Second semester or later in PhD program or instructor's consent

INFOINST 8860: Content Management in Biomedical Informatics

(same as CMP_SC 8160). This course introduces theory and techniques for content extraction, indexing, and retrieval of biomedical media databases. Topics include biomedical media databases, feature extraction methods, advanced database indexing structures, query methods, and result visualization. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 7380 and INFOINST 7010

INFOINST 8870: Knowledge Representation in Biology and Medicine

(same as HMI 8870) The main topics presented in the course are: logic systems, knowledge representation methods, production systems and representation of statistical and uncertain knowledge. Graded A-F basis only.

Credit Hours: 3

Prerequisites: HMI 7430 and HMI 7440

INFOINST 8880: Machine Learning Methods for Biomedical Informatics

(same as CMP_SC 8180) This course teaches statistical machine learning methods and their applications in biomedical informatics. The course covers theories of advanced statistical machine learning methods and teaches how to develop machine learning methods to solve biomedical problems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 7050 and INFOINST 7010 or CMP_SC 7010 or INFOINST 7005

INFOINST 9090: Dissertation (post-candidacy) Research in Informatics

Research leading to Ph.D. dissertation after comprehensive examination. Graded on S/U basis only.

Credit Hour: 1-99

Music-Applied Music Courses

MUS_APMS 1435: Studio Instruction for Majors

Acceptable as a secondary applied subject on B.S. in music education and B.M. degrees. Materials varies according to educational purpose. May be repeated for credit.

Credit Hour: 1

Prerequisites: instructor's consent

MUS_APMS 2455: Studio Instruction

Credit accepted toward all undergraduate music and music education degrees. May be repeated for credit.

Credit Hour: 1-5

Prerequisites: instructor's consent

MUS_APMS 3455: Studio Instruction

Accepted as upperclass credit only in Music Education, music theory, history, or composition. May be repeated for credit.

Credit Hour: 1-3

Prerequisites: 8 hours and 4 semesters of MUS_APMS 2455 or equivalent; audition by committee, and instructor's consent

MUS_APMS 3970: Junior Recital

Preparation and presentation of Junior Recital. Appropriate applied music course to be taken concurrently. May be repeated for credit. Each recital must be approved by a committee at least two weeks before the recital.

Credit Hour: 1

MUS_APMS 4455: Studio Instruction

For B.M. degrees in performance. Study of pedagogy in studio class. May be repeated for credit.

Credit Hour: 1-5

Prerequisites: 8 hours and 4 semesters of MUS_APMS 2455; audition; instructor's consent

MUS_APMS 4970: Senior Recital

Preparation and presentation of Senior Recital. Appropriate applied music course to be taken concurrently. May be repeated for credit. Each recital must be approved by a committee at least two weeks before the recital.

Credit Hour: 1

MUS_APMS 7435: Studio Instruction

For music teachers needing instruction in secondary instruments or voice. Maybe repeated for credit.

Credit Hour: 1

MUS_APMS 7455: Studio Instruction

For graduate credit on M.A., M.Ed., and Ph.D. degrees. Study of pedagogy in studio class. May be repeated for credit.

Credit Hour: 1-5

Prerequisites: audition; instructor's consent

MUS_APMS 8455: Studio Instruction

Required for graduate credit as major applied study on M.M. degree. Acceptable for graduate credit on M.A., M.Ed., Ed.D., and Ph.D. degrees. Maybe repeated for credit.

Credit Hour: 1-5

Prerequisites: audition by committee and instructor's consent

MUS_APMS 8970: Graduate Recital

Preparation and presentation of Graduate Recital. Appropriate applied music course to be taken concurrently. May be repeated for credit. Each recital must be approved by a committee at least two weeks before the recital.

Credit Hour: 1

Music-Courses for Non-Majors Courses

MUSIC_NM 1005: Topics in Music-Humanities

Organized study of selected topics. Subjects vary from semester to semester. May be repeated once for additional credit with departmental consent.

Credit Hour: 1-3

MUSIC_NM 1029: Music Travel Course

Study tour designed to broaden perspective of persons interested in music. Stresses relationship of music to art and ideas in a variety of social and cultural contexts. Participant bears cost of course.

Credit Hour: 1-4

Prerequisites: instructor's consent

MUSIC_NM 1085: Problems in Music

Independent investigation leading to a paper project. Sections are: Music Theory, Music Composition, Music History, Music Performance/Pedagogy. May be repeated for credit.

Credit Hour: 1-99

Prerequisites: instructor's consent

MUSIC_NM 1211: Fundamentals of Music I

Introduction to rhythmic, melodic, harmonic, and structural elements of music. Designed for non-music majors. No credit for music majors or minors.

Credit Hours: 2

MUSIC_NM 1212: Fundamentals of Music II

Continuation of MUSIC_NM 1211. No credit for music majors or minors.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUSIC_NM 1211 or instructor's consent

MUSIC_NM 1300: Experiencing Music Through Concert Attendance

Development of music listening skills through concert attendance, reading and class attendance.

Credit Hour: 1

MUSIC_NM 1310: Masterpieces of Western Music

Introduction to the Western fine-art tradition through the study of representative masterworks, emphasis on developing listening skills; directed to non-majors.

Credit Hours: 3

MUSIC_NM 1311: Jazz, Pop, and Rock

Historical introduction to jazz (to approximately 1970) and the American popular song, including rock and roll (to approximately 1980); directed to non-majors.

Credit Hours: 3

MUSIC_NM 1312: History of Jazz

Historical survey of American jazz from its origin to the present. No credit for students who have taken MUSIC_NM 1311.

Credit Hours: 2

MUSIC_NM 1313: Introduction to World Music

Introduction to the musical traditions of selected non-Western societies; emphasis on developing listening skills; directed to non-majors, but music majors may enroll.

Credit Hours: 3

MUSIC_NM 1314: Orchestral Masterpieces

In-depth study of selected symphonic works of masters from Joseph Haydn to Aaron Copland. Students develop critical listening skills to identify orchestral instruments and perceive the structure and character of selected orchestral works. Directed to non-music majors. Graded on A-F basis only.

Credit Hours: 3

MUSIC_NM 1315: Musical Profile-Bach

Systematic study of the music of J.S. Bach directed to the general student. Graded on A-F basis only.

Credit Hour: 1

MUSIC_NM 1316: Music Profile--Wolfgang A. Mozart

A systematic introduction to the music of Wolfgang Amadeus Mozart. Graded on A-F basis only.

Credit Hour: 1

MUSIC_NM 1317: Musical Profile-Beethoven

Systematic study of the music of Ludwig van Beethoven directed to the general student. Graded on A-F basis only.

Credit Hour: 1

MUSIC_NM 1318: Music Profile--Claude Debussy

A systematic introduction to the music of Claude Debussy. Graded on A/-F basis only.

Credit Hour: 1

MUSIC_NM 1319: Music Profile--Igor Stravinsky

A systematic introduction to the music of Igor Stravinsky. Graded on A-F basis only.

Credit Hour: 1

MUSIC_NM 1320: Musical Profile-Copland

Systematic study of the music of Aaron Copland directed to the general student. Graded on A-F basis only.

Credit Hour: 1

MUSIC_NM 1330: Introduction to African-American Music

Introduction to the history and scholarship of African American music from eighteenth through twentieth centuries. Focus on African legacies and retentions, slave culture, the black church, minstrelsy, folk traditions, spirituals, ragtime, blues, jazz, soul, R&B, and hip hop.

Credit Hours: 3

MUSIC_NM 1335: Introduction to Soul and Country

(same as BL_STU 1335). Examination of musical cultures signified by "soul" and "country". Study of the evolution and aesthetics of these genres and how they deal with concepts like identity, class, race, and ethnicity; gender and sexuality; politics and patriotism.

Credit Hours: 3

MUSIC_NM 1340: Music of Love and Death

Exploration of musical expression surrounding love and death in specific works of diverse styles and sociological contexts. Students will learn to listen to and appreciate music with informed ears and minds, develop strong perceptual skills, and cultivate a musical vocabulary.

Credit Hours: 3

MUSIC_NM 1341: Drama Through Western Music

Introduction to the musical culture of the theater through the ages by examining specific works of diverse styles and sociological contexts. Students learn to listen to and appreciate music with informed ears and minds, develop perceptual skills, and cultivate musical vocabulary.

Credit Hours: 3

MUSIC_NM 1445: Studio Instruction

Acceptable for non-majors and majors requiring a half-hour lesson with instructor's consent. May be repeated for credit.

Credit Hour: 1

MUSIC_NM 1608: Beginning Piano Class

For non-music majors only.

Credit Hour: 1

MUSIC_NM 1609: Intermediate Piano Class

For non-music majors only. Continuation of MUSIC_NM 1608.

Credit Hour: 1

MUSIC_NM 1612: Elementary Folk Guitar Class

Teaching correct hand position, strum patterns, and chords needed for accompaniment of popular and folk songs.

Credit Hour: 1

MUSIC_NM 1615: Beginning Classical Guitar Class

Beginning Classical Guitar Class

Credit Hour: 1

MUSIC_NM 1617: Beginning Drumset

Fundamentals of the drumset, including an historical survey and biographical sketch of several performers. Also can be used as a pedagogical outline for future music teachers.

Credit Hour: 1

MUSIC_NM 1618: Basic Music Skills

Development of music reading and performance skills, including study of pitch, rhythm, notation, structure and interpretation of music. Emphasis on performance. No credit for music majors or minors or students who have completed MUSIC_NM 1211 or MUSIC_NM 1212.

Credit Hours: 2

MUSIC_NM 1651: Voice Class I

Fundamentals of singing: posture, breath support, control, vocalization, concepts of tone quality, placement and resonance. Literature selected for students with no previous vocal training. Adapted to needs of drama and other interdisciplinary students.

Credit Hour: 1

MUSIC_NM 1652: Voice Class II

Continuation of MUSIC_NM 1651.

Credit Hour: 1

Prerequisites: MUSIC_NM 1651

MUSIC_NM 2306: Perceiving Musical Traditions and Styles

An introduction to music from the late Baroque to the present day, including fine art, folk, and popular music. Designed to serve as a foundation for developing knowledge and skills of musical perception that will eventually lead to thoughtful written commentary on musical performances. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: open only to Journalism majors with sophomore standing or higher

MUSIC_NM 2306H: Perceiving Musical Traditions and Styles - Honors

An introduction to music from the late Baroque to the present day, including fine art, folk, and popular music. Designed to serve as a foundation for developing knowledge and skills of musical perception that will eventually lead to thoughtful written commentary on musical performances. Graded on A/F basis only.

Credit Hours: 3

Prerequisites: open only to Journalism majors with sophomore standing or higher. Honors eligibility required

MUSIC_NM 2445: Studio Instruction for Non-Majors

Acceptable for non-majors only. May be repeated for credit.

Credit Hour: 1-2

Prerequisites: audition by examining committee and instructor's consent

MUSIC_NM 4445: Studio Instruction for Non-Majors

Acceptable for non-majors only. May be repeated for credit.

Credit Hour: 1-2

Prerequisites: audition by examining committee and instructor's consent

MUSIC_NM 7029: Travel Seminar

Selected topics for directed study in music undertaken in context of the tour. Emphasis on subjects with cross-disciplinary implications. Participant bears cost of course.

Credit Hour: 1-4

Prerequisites: instructor's consent

MUSIC_NM 7445: Studio Instruction for Non-Majors

Acceptable for graduate s credit for non-majors only. May be repeated for credit.

Credit Hour: 1-2

Prerequisites: instructor's consent

Music-Ensemble Courses Courses

MUS_ENS 1841: Instrumental Ensemble

Provides experience in instrumental performance and repertory. Open to all MU students by audition. May be repeated for credit. Enrollment in Marching Band is limited to a maximum of five semesters. Sections are: Philharmonic Orchestra, Chamber Orchestra, Symphonic Band, Wind Ensemble, Concert Band, Varsity Band, Studio Jazz Ensemble, Jazz Lab Band, Marching Band. Some sections may be graded on an S/U or A-F basis only.

Credit Hour: 0-1

Prerequisites: Audition

MUS_ENS 1842: Choral Ensemble

Provides experience in choral performance and repertory. Open to all MU students. May be repeated for credit. Sections are: University Singers, Chamber Singers, Choral Union, Vocal Jazz Ensemble, Concert Chorale, Men's Chorus, Women's Chorus. Some sections may be graded on an S/U or A-F basis only.

Credit Hour: 0-1

Prerequisites: audition required for all but Choral Union

MUS_ENS 1846: Chamber Music

Preparation and performance of chamber music. May be repeated for credit. Sections are: String Ensemble, Woodwind Ensemble, Brass Ensemble, Percussion Ensemble. Jazz Combo. Some sections may be graded on an S/U or A-F basis only.

Credit Hour: 0-1

Prerequisites: audition and instructor's consent

MUS_ENS 1865: Opera Workshop

Study, preparation and performance of selected operatic or musical theatre work in staged or concert versions. Open to all MU students by audition. Credit arranged; may be repeated for credit. Some sections may be graded on an S/U or A-F basis only.

Credit Hour: 0-1

Prerequisites: audition and instructor's consent

MUS_ENS 2843: Piano Ensemble

Study, preparation, and performance of ensemble literature for piano. May be repeated for credit.

Credit Hour: 1

Prerequisites: instructor's consent

MUS_ENS 4866: Musical Theatre Performance

(same as THEATR 4460). A practical study for the actor of theatrical songs through character analysis, lyric interpretation, and movement. A performance course.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_ENS 8841: Instrumental Ensemble

Research, preparation and performance of instrumental compositions. May be repeated for credit. Sections and credit hours are: Philharmonic Orchestra, Chamber Orchestra, Symphonic Band, Wind Ensemble, Concert Band, Studio Jazz Ensemble, Jazz Lab Band, Marching Band. Some sections may be graded on an S/U or A-F basis only.

Credit Hour: 0-1

Prerequisites: audition and instructor's consent

MUS_ENS 8842: Choral Ensemble

Research, preparation and performance of choral compositions. May be repeated for credit. Sections are: University Singers, Chamber Singers, Choral Union, Vocal Jazz Ensemble, Concert Choral, Men's Chorus, Women's Chorus. Some sections may be graded on an S/U or A-F basis only.

Credit Hour: 0-1

Prerequisites: audition and instructor's consent

MUS_ENS 8843: Advanced Piano Ensemble

Study, preparation and performance of standard piano literature for four hands. May be repeated for credit.

Credit Hour: 1

Prerequisites: instructor's consent

MUS_ENS 8846: Advanced Chamber Ensemble

Study, preparation and performance of chamber music. May be repeated for credit. Sections are: String Ensemble, Woodwind Ensemble, Brass Ensemble, Percussion Ensemble, Jazz Combo. Some sections may be graded on an S/U or A-F basis only.

Credit Hour: 0-1

Prerequisites: audition and instructor's consent

MUS_ENS 8865: Advanced Opera Workshop

Study, preparation and performance of selected operatic or musical theatre works in staged or concert versions. Credit arranged; may be repeated for credit. Some sections may be graded on an S/U or A-F basis only.

Credit Hour: 0-2

Prerequisites: audition and instructor's consent

Music-General Courses

MUS_GENL 1091: Recital Attendance for Undergraduate Music Majors

Required attendance of eleven music events from the Music Department listing. 0 credit, and may be repeated until the total degree requirement is satisfactorily met. No tuition charged. Graded on S/U basis only.

Credit Hours: 0

Prerequisites: Undergraduate music or music education majors only

MUS_GENL 3005: Topics in Music-Humanities

Organized study of selected topics in music. Subjects and credit variable. May be repeated for additional credit with departmental consent.

Credit Hour: 1-99

Prerequisites: junior standing in Music and instructor's consent

MUS_GENL 3005H: Topics in Music-Humanities - Honors

Organized study of selected topics in music. Subjects and credit variable. May be repeated for additional credit with departmental consent.

Credit Hour: 1-99

Prerequisites: junior standing in Music and instructor's consent. Honors eligibility required

MUS_GENL 3085: Problems in Music

Independent investigation leading to a paper or project. May be repeated for credit. Sections are: Music Theory, Music Composition, Music History, Music Performance/Pedagogy.

Credit Hour: 1-99

Prerequisites: instructor's consent

MUS_GENL 4005: Topics in Music-Humanities

Organized study of selected topics in music. Subjects and credit variable. May be repeated for additional credit with departmental consent.

Credit Hour: 1-99

Prerequisites: junior standing in Music and instructor's consent

MUS_GENL 4005H: Topics in Music-Humanities - Honors

Organized study of selected topics in music. Subjects and credit variable. May be repeated for additional credit with departmental consent.

Credit Hour: 1-99

Prerequisites: junior standing in Music and instructor's consent. Honors eligibility required

MUS_GENL 4029: Music Travel Course

(cross-leveled with MUS_GENL 7029). Experience designed to broaden music students' perspectives on music in different social and/or cultural context(s). Participant bears cost of the course.

Credit Hour: 1-3

Prerequisites: instructor's consent

MUS_GENL 4510: Career Development for Musicians

Examination of professional opportunities available in the Creative Economy; development of a framework for career planning, professional portfolio, and personal business plan.

Credit Hours: 2

Prerequisites: sophomore standing and instructor's consent

MUS_GENL 4512: Principles of Entrepreneurship for Musicians

Provisions of a solid foundation of the core principles of entrepreneurial practice: creation of new ventures, the decisions leading to their development, and the factors that lead to their success. Students identify a career objective and develop a framework for achieving it.

Credit Hour: 1

Prerequisites: MUS_GENL 4510; sophomore standing or instructor's consent

MUS_GENL 4514: Arts Marketing for Musicians

Exploration of marketing the arts in the 21st Century. Students formulate a marketing plan for a project or career goal, including establishing a competitive advantage, identifying target markets, formulating marketing strategy, and measuring outcomes.

Credit Hour: 1

Prerequisites: MUS_GENL 4510; Sophomore standing or instructor's consent

MUS_GENL 4516: Grant Writing for Musicians

(cross-leveled with MUS_GENL 7516). Exploration of the nuts and bolts of grant writing, including resources for freelance performers and teachers, and alternative fundraising strategies for individual venture ideas. Students identify a grant opportunity and draft a funding proposal for a real or imagined project.

Credit Hour: 1

Prerequisites: MUS_GENL 4510; sophomore standing or instructor's consent

MUS_GENL 4518: Music Industry Survey

In-depth survey of the commercial Music industry world, with emphasis on career opportunities within the recording, performing, music retail, and music management sectors.

Credit Hour: 1

Prerequisites: MUS_GENL 4510, sophomore standing, or instructor's consent

MUS_GENL 4520: Non-Profit Management in the Arts

Introduction to management strategy and its application within the not-for-profit arts sector.

Credit Hour: 1

Prerequisites: MUS_GENL 4510, sophomore standing or instructor's consent

MUS_GENL 4522: Community Engagement in the Arts

Introduction to community-based arts and their relationship to personal branding in the non-profit arts sector.

Credit Hour: 1

Prerequisites: MUS_GENL 4510, sophomore standing, or instructor's consent

MUS_GENL 4530: Entrepreneurship, Leadership and Advocacy in the Arts

Seminar investigating advocacy methods, the application of leadership within non-profit arts organizations, arts policy and implications for artists in the 21st century. Writing and research-based work is a heavy component.

Credit Hours: 2

Prerequisites: MUS_GENL 4510, sophomore standing, or instructor's consent

MUS_GENL 4540: Music Entrepreneurship Practicum

(cross-leveled with MUS_GENL 7540). Students either A) design and execute an entrepreneurial music leadership project in the community, or B) complete an internship (and accompanying report) with an approved partner organization, supervised by the instructor.

Credit Hour: 1-2

Prerequisites: MUS_GENL 4510, sophomore standing or instructor's consent

MUS_GENL 4550: Movement and Wellness for Musicians

(cross-leveled with MUS_GENL 7550). Students will actively engage with various somatic practices with the goal of holistically improving musical performance.

Credit Hour: 1

Prerequisites: Instructor's consent

MUS_GENL 7005: Topics in Music

Organized study of selected topics in music. Subjects and credit variable. May be repeated with departmental consent.

Credit Hour: 1-99

Prerequisites: departmental consent

MUS_GENL 7029: Music Travel Course

(cross-leveled with MUS_GENL 4029). Experience designed to broaden music students' perspectives on music in different social and/or cultural context(s). Participant bears cost of the course.

Credit Hour: 1-3

Prerequisites: instructor's consent

MUS_GENL 7510: Career Development for Musicians

Examination of professional opportunities available in the Creative Economy; development of a framework for career planning, professional portfolio, and personal business plan.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_GENL 7512: Principles of Entrepreneurship for Musicians

Provision of a solid foundation of the core principles of entrepreneurial practice: creation of new ventures, the decisions leading to their development, and the factors that lead to their success. Students identify a career objective and develop a framework for achieving it.

Credit Hour: 1

Prerequisites: MUS_GENL 7510 and instructor's consent

MUS_GENL 7514: Arts Marketing for Musicians

Exploration of marketing the arts in the 21st Century. Students formulate a marketing plan for a project or career goal, including establishing a competitive advantage, identifying target markets, formulating marketing strategy, and measuring outcomes.

Credit Hour: 1

Prerequisites: MUS_GENL 7510 and instructor's consent

MUS_GENL 7516: Grant Writing for Musicians

(cross-leveled with MUS_GENL 4516). Explorations of the nuts and bolts of grant writing, including resources for freelance performers and teachers, and alternative fundraising strategies for individual venture ideas. Students identify a grant opportunity and draft a funding proposal for a real or imagined project.

Credit Hour: 1

Prerequisites: MUS_GENL 7510; instructor's consent

MUS_GENL 7518: Music Industry Survey

In-depth survey of the commercial music industry world, with emphasis on career opportunities within the recording, performing, music retail, and music management sectors.

Credit Hour: 1

Prerequisites: MUS_GENL 7510 or instructor's consent

MUS_GENL 7520: Non-Profit Management in the Arts

Introduction to management strategy and its application within the not-for-profit arts sector.

Credit Hour: 1

Prerequisites: MUS_GENL 7510 or instructor's consent

MUS_GENL 7522: Community Engagement in the Arts

Introduction to community-based arts and their relationship to personal branding in the non-profit arts sector.

Credit Hour: 1

Prerequisites: MUS_GENL 7510 or instructor's consent

MUS_GENL 7530: Entrepreneurship, Leadership and Advocacy in the Arts

Seminar investigating advocacy methods, the application of leadership within non-profit arts organizations, arts policy and implications for artists in the 21st century. Writing and research-based work is a heavy component.

Credit Hours: 2

Prerequisites: MUS_GENL 7510 or instructor's consent

MUS_GENL 7540: Music Entrepreneurship Practicum

(cross-leveled with MUS_GENL 4540). Students either A) design and execute an entrepreneurial music leadership project in the community, or B) complete an internship (and accompanying report) with an approved partner organization, supervised by the instructor.

Credit Hour: 1-2

Prerequisites: MUS_GENL 7510 or instructor's consent

MUS_GENL 7550: Movement and Wellness for Musicians

(cross-leveled with MUS_GENL 4550). Students will actively engage with various somatic practices with the goal of holistically improving musical performance.

Credit Hour: 1

Prerequisites: Instructor's consent

MUS_GENL 8085: Problems in Music

Independent investigation leading to a paper or project. May be repeated for credit. Sections are: Music Theory, Music Composition, Music History, Music Performance/Pedagogy.

Credit Hour: 1-99

Prerequisites: instructor's consent

MUS_GENL 8090: Research in Music

Thesis course. May be repeated for additional credit. Sections are: Music Theory, Music Composition, Music History. Performance/Pedagogy. Graded on S/U basis only.

Credit Hour: 1-99

Music-Instrumental And Vocal Repertory Courses

MUS_I_VR 3753: Piano Literature I

Survey of keyboard music from ca. 1600 to ca. 1800.

Credit Hours: 2

Prerequisites: junior standing and instructor's consent

MUS_I_VR 3754: Piano Literature II

Survey of keyboard music from Beethoven's time to the present.

Credit Hours: 2

Prerequisites: MUS_I_VR 3753 or instructor's consent

MUS_I_VR 4767: Vocal Literature I

Introduction to and study of song literature with emphasis on style and interpretation.

Credit Hours: 2

Prerequisites: junior standing or instructor's consent

MUS_I_VR 4768: Vocal Literature II

Continuation of MUS_I_VR 4767.

Credit Hours: 2

Prerequisites: MUS_I_VR 4767 or instructor's consent

MUS_I_VR 4776: Orchestral Excerpts

Study and preparation of selected excerpts from the standard audition repertoire, culminating in a mock audition. May be repeated for credit.

Credit Hour: 1

Prerequisites: Instructor's consent required

MUS_I_VR 4780: Classical Guitar Repertory I

Survey of guitar repertory and history from 1400 to present.

Credit Hour: 1

Prerequisites: instructor's consent

MUS_I_VR 4781: Classical Guitar Repertory II

Continued study of guitar repertory from 1400 to present, with emphasis on organological development of the guitar and performance practice.

Credit Hour: 1

Prerequisites: MUS_I_VR 4780; instructor's consent

MUS_I_VR 7767: Advanced Vocal Literature I

Study of specific aspects of vocal repertory. Individual projects in research, analysis and performance.

Credit Hours: 3

Prerequisites: MUS_I_VR 7455 or instructor's consent

MUS_I_VR 7768: Advanced Vocal Literature II

Continuation of MUS_I_VR 7767.

Credit Hours: 3

Prerequisites: MUS_I_VR 7767 or instructor's consent

MUS_I_VR 7776: Orchestral Excerpts

Study and preparation of selected excerpts from the standard audition repertoire, culminating in a mock audition. May be repeated for credit.

Credit Hour: 1

Prerequisites: instructor's consent required

MUS_I_VR 7780: Graduate Classical Guitar Repertory I

Survey of guitar repertory and history from 1400 to present.

Credit Hour: 1

Prerequisites: instructor's consent required

MUS_I_VR 7781: Graduate Classical Guitar Repertory II

Continued study of guitar repertory from 1400 to present, with emphasis on organological development of the guitar and performance practice.

Credit Hour: 1

Prerequisites: MUS_I_VR 7780. Instructor's consent required

MUS_I_VR 8753: Piano Repertory I

Study of specific aspects of Baroque and Classical keyboard music. Individual projects in research, analysis and performance.

Credit Hours: 2

Prerequisites: MUS_I_VR 7455 or instructor's consent

MUS_I_VR 8754: Piano Repertory II

Study of specific aspects of nineteenth- and twentieth century piano music. Individual projects in research, analysis and performance.

Credit Hours: 2

Prerequisites: MUS_I_VR 8753 or instructor's consent

MUS_I_VR 8765: Choral Repertory

Survey of choral works from selected periods with an emphasis on various aspects of choral performance. May be repeated once for additional credit.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_I_VR 8770: Band Repertory

To survey band and wind ensemble repertoire with emphasis on various aspects of performance practice in order to prepare the student for a career which includes conducting advanced high school and college bands and wind ensembles.

Credit Hours: 3

MUS_I_VR 8773: String Instrument Repertory I

Credit Hour: 1

Prerequisites: MUS_I_VR 7455 or instructor's consent

MUS_I_VR 8774: String Instrument Repertory II

Continuation of MUS_I_VR 8773.

Credit Hour: 1

Prerequisites: MUS_I_VR 8773

MUS_I_VR 8775: Orchestral Repertory

A survey of orchestral repertory, emphasizing various aspects of performance practice. Appropriate for graduate music conducting majors who wish to pursue a career which includes conducting orchestras at the advanced high school, college, and professional levels. May be repeated.

Credit Hours: 2

Prerequisites: Conducting experience at the high school or college level and instructor's consent

Music-Instrumental And Vocal Techniques Courses

MUS_I_VT 1610: Group Piano for Music Majors I

Beginning piano for music majors and concentrations only.

Credit Hour: 1

Prerequisites: instructor's consent

MUS_I_VT 1611: Group Piano for Music Majors II

Continuation of MUS_I_VT 1610.

Credit Hour: 1

Prerequisites: MUS_I_VT 1610 with a minimum grade of C- or instructor's consent

MUS_I_VT 1620: Jazz Piano Class

Beginning piano technique and study of common jazz piano voicings for accompaniment and solo performance.

Credit Hour: 1

Prerequisites: MUSIC_NM 1211 or MUS_THRY 1220; instructor's consent required

MUS_I_VT 2610: Group Piano for Music Majors III

Continuation of MUS_I_VT 1611.

Credit Hour: 1

Prerequisites: MUS_I_VT 1611 with a minimum grade of C- or instructor's consent

MUS_I_VT 2611: Group Piano for Music Majors IV

Continuation of MUS_I_VT 2610.

Credit Hour: 1

Prerequisites: MUS_I_VT 2610 with a minimum grade of C- or instructor's consent

MUS_I_VT 2631: Basic Conducting and Score Reading

To develop the basic psychomotor and score reading skills prerequisite to the art of conducting.

Credit Hours: 2

Prerequisites: grade of C- or better in MUS_THRY 2220

MUS_I_VT 2632: Rehearsal Clinic: String Orchestra Conducting

To develop musical and interpersonal skills requisite for successful rehearsal leadership, emphasizing strategies effective for rehearsal of string ensembles.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_I_VT 2631 and either MUS_I_VT 2640 or MUS_I_VT 2641; or instructor's consent

MUS_I_VT 2633: Rehearsal Clinic: Choral Conducting I

To develop musical and interpersonal skills requisite for successful leadership of a choral ensemble, emphasizing rehearsal strategies and repertoire.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_I_VT 2631 or instructor's consent

MUS_I_VT 2634: Rehearsal Clinic: Band Conducting I

To develop musical and interpersonal skills requisite for successful rehearsal leadership, emphasizing strategies effective for rehearsal of wind and percussion ensembles.

Credit Hour: 1

Prerequisites: Grade of C- or better in MUS_I_VT 2631 or instructor's consent

MUS_I_VT 2637: Woodwinds I

Class instruction in clarinet and saxophone; playing and methods/materials for teaching. Taught on a laboratory basis. Meets twice weekly.

Credit Hour: 1

Prerequisites: major in Music or Music Education

MUS_I_VT 2638: Woodwinds II

Class instruction in flute and double reeds; playing and methods/materials for teaching. Taught on a laboratory basis. Meets twice weekly.

Credit Hour: 1

Prerequisites: major in Music or Music Education

MUS_I_VT 2640: Strings I

Class instruction in violin and viola; playing and methods and materials for teaching. Taught on a laboratory basis. Meets twice weekly.

Credit Hour: 1

Prerequisites: major in Music or Music Education

MUS_I_VT 2641: Strings II

Class instruction in violoncello and string bass; playing and methods and materials for teaching. Taught on a laboratory basis. Meets twice weekly.

Credit Hour: 1

Prerequisites: major in Music or Music Education

MUS_I_VT 2645: Brass I

Class instruction in trumpet and horn; playing and methods/materials for teaching. Taught on a laboratory basis. Meets twice weekly.

Credit Hour: 1

Prerequisites: major in Music or Music Education

MUS_I_VT 2646: Brass II

Class instruction in trombone, euphonium, and tuba; playing and methods/materials for teaching. Taught on a laboratory basis. Meets twice weekly.

Credit Hour: 1

Prerequisites: major in Music or Music Education

MUS_I_VT 2648: Percussion

Class instruction in percussion instruments; playing and methods and materials for teaching. Taught on a laboratory basis. Meets twice weekly.

Credit Hour: 1

Prerequisites: major in Music Education

MUS_I_VT 2649: Percussion II

Extension of MUS_I_VT 2648. Topics include marching percussion, drumset, Latin accessory instruments, and percussion ensemble literature.

Credit Hour: 1

Prerequisites: MUS_I_VT 2648 or instructor's consent

MUS_I_VT 2661: Keyboard Skills for Piano Majors I

Study of sightreading, harmonization, transposition, figured bass realization, and duet skills.

Credit Hours: 2

Prerequisites: grade of C- or better in MUS_THRY 1221 and MUS_THRY 1231; instructor's consent

MUS_I_VT 2662: Keyboard Skills for Piano Majors II

Study of score reading, duet performance, and collaborative experiences with voice and instruments.

Credit Hours: 2

Prerequisites: grade of C- or better in MUS_I_VT 2661; instructor's consent

MUS_I_VT 3640: Undergraduate Seminar in Vocal Techniques

Discusses accepted techniques of singing, practical application to posture, breath support, tone placement, musicianship, diction, interpretation, stage deportment. Recognizing and solving specific vocal problems. May be repeated once for credit.

Credit Hour: 1

Prerequisites: instructor's consent

MUS_I_VT 3642: Seminar in String Techniques

In-depth study of publications, philosophies, repertory, grading, specific problems for the string player. May be repeated once for credit.

Credit Hour: 1

Prerequisites: MUS_I_VT 2640 and MUS_I_VT 2641, or instructor's consent

MUS_I_VT 3643: Symposium in Instrumental Music

Study of procedures, techniques and literature for variable combinations of wind, string, and percussion classes and the administration of instrumental music programs.

Credit Hours: 2

Prerequisites: junior standing in Music or Music Education or instructor's consent

MUS_I_VT 3644: Jazz Methods and Materials

Training and supervised practice in conducting Jazz Ensembles; study of administration, methods, and materials pertinent to teaching Jazz, Rock, and Commercial Music in high school and college.

Credit Hour: 1

Prerequisites: junior standing or instructor's consent

MUS_I_VT 3646: Marching Band Techniques

Study of techniques and procedures used in the development of field and street marching.

Credit Hours: 2

Prerequisites: junior standing in Music or Music Education

MUS_I_VT 3670: Diction in Singing: Italian

Study of the correct principles and application of Italian diction in singing the solo vocal, operatic and choral literature; the International phonetic alphabet; spoken language drill, study and recitation of representative literature.

Credit Hour: 1

Prerequisites: sophomore standing

MUS_I_VT 3671: Diction in Singing: German

Study of the correct principles and application of German diction in singing the solo vocal, operatic and choral literature; the International Phonetic Alphabet spoken language drill, study and recitation of representative literature.

Credit Hour: 1

Prerequisites: sophomore standing

MUS_I_VT 3672: Diction in Singing: French

Study of the correct principles and application of French diction in singing the solo vocal, operatic, and choral literature; the International Phonetic Alphabet spoken language drill, study and recitation of representative literature. Prerequisites: sophomore standing

Credit Hour: 1

MUS_I_VT 3673: Diction in Singing: English

Study of the correct principles and application of English diction in singing the solo vocal, operatic and choral literature; the International phonetic alphabet; spoken language drill, study and recitation of representative literature.

Credit Hour: 1

Prerequisites: Sophomore standing

MUS_I_VT 4640: Introduction to Improvisation

(cross-leveled with MUS_I_VT 7640). Introduction to contemporary improvisation, aimed at classically trained musicians. No improvisational experience necessary.

Credit Hours: 2

Prerequisites: Consent of instructor

MUS_I_VT 4645: Jazz Improvisation

Creation of a melodic vocabulary for jazz improvisation through study and application of jazz chord-scale theory, solo transcription, and careful listening to the vanguard of jazz.

Credit Hours: 2

Prerequisites: MUSIC_NM 1211 or MUS_THRY 1220, instructor's consent

MUS_I_VT 4661: Piano Pedagogy Survey I

Study of approaches for teaching young beginning and intermediate student; survey of materials and resources.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_I_VT 4662: Piano Pedagogy Survey II

Study of approaches for teaching older, more advanced and class piano students; survey of materials and resources.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_I_VT 4663: Piano Pedagogy Laboratory

Supervised instruction in private and class piano . May be repeated once for additional credit.

Credit Hour: 1

Prerequisites: MUS_I_VT 4661 and MUS_I_VT 4662

MUS_I_VT 4680: Classical Guitar Pedagogy

Basic anatomical and physiological aspects of guitar performance, setting technical and musical goals for students, repertoire development in relation to age, level, and musical style. Career goals (building a private studio, lesson planning, organizational skills) are addressed.

Credit Hour: 1

Prerequisites: Audition required and instructor's consent

MUS_I_VT 7640: Introduction to Improvisation

(cross-leveled with MUS_I_VT 4640). Introduction to contemporary improvisation, aimed at classically trained musicians. No improvisational experience necessary.

Credit Hours: 2

Prerequisites: Consent of instructor

MUS_I_VT 7645: Graduate Jazz Improvisation

Creation of a melodic vocabulary for jazz improvisation through study and application of jazz chord-scale theory, solo transcription, and careful listening to the vanguard of jazz.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_I_VT 7680: Graduate Classical Guitar Pedagogy

Basic anatomical and physiological aspects of guitar performance, setting technical and musical goals for students, repertoire development in relation to age, level and musical style. Career goals (building a private studio, lesson planning, organizational skills) are addressed.

Credit Hour: 1

Prerequisites: Audition and approval of instructor

MUS_I_VT 8646: Jazz Pedagogy I

Study of historical and current trends in jazz education and pedagogy, including administration and curriculum, through assigned readings, supervised teaching, classroom discussion, survey of materials, and formation of an annotated bibliography. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent required

MUS_I_VT 8647: Jazz Pedagogy II

Continuation of MUS_I_VT 8646; formulation of an extensive philosophy of jazz education. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MUS_I_VT 8646 and instructor's consent

MUS_I_VT 8671: Principles of Singing I

Credit Hours: 2

Prerequisites: instructor's consent

MUS_I_VT 8673: Advanced Choral Conducting

Advanced conducting techniques in the interpretation of choral literature; score analysis. May be repeated for additional credit.

Credit Hours: 2

Prerequisites: MUS_I_VT 2633 or instructor's consent

MUS_I_VT 8674: Advanced Instrumental Conducting

Advanced conducting techniques in the interpretation of band and orchestral literature; score analysis. May be repeated for additional credit.

Credit Hours: 2

Prerequisites: MUS_I_VT 2634 or instructor's consent

MUS_I_VT 8681: Advanced Piano Pedagogy I

A survey of materials and techniques of instruction for teaching the young beginner and the intermediate piano student.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_I_VT 8682: Advanced Piano Pedagogy II

A survey of materials and techniques of instruction for teaching class piano, the older beginner, and the advanced student.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_I_VT 8683: Piano Pedagogy Internship

Supervised teaching of individual and group lessons. May be repeated once for credit.

Credit Hour: 1

Prerequisites: MUS_I_VT 8681 and MUS_I_VT 8682 and instructor's consent

MUS_I_VT 8684: Group Piano Pedagogy

Preparation of graduate students to teach group piano to both college level music majors and adult beginners.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_I_VT 8686: Choral Techniques

Study of techniques for developing choral singing and musical interpretation.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_I_VT 8689: Band Techniques

To develop individual conducting techniques as well as instrumental ensemble techniques. Emphasis is placed on the learning process to give the student a perspective to improve the techniques of others.

Credit Hours: 3

Prerequisites: instructor's consent

Music-Music Education Courses

MUS_EDUC 1100: Orientation: Music Education

This course familiarizes and orients students with MU resources, Music Education degree expectations and career options. Graded on S/U basis only.

Credit Hour: 1

MUS_EDUC 4140: Teaching Music I

Study of skills, knowledge, and philosophical foundations necessary to teach general music to children in grades preK - 5, including methods, philosophies, and teacher and learner behaviors.

Credit Hours: 3

Prerequisites: junior standing; music education major or instructor's consent

MUS_EDUC 4141: Teaching Music I Field Experience

This field experience supports the MUS_EDUC 4140 course. Field experience expectations are delineated in the course syllabus. Graded on a S/U basis only.

Credit Hour: 1

Prerequisites: junior standing; music education major or instructor's consent

MUS_EDUC 4142: Teaching Music II

Study of a broad repertoire of music literature and instructional materials, including critical evaluation and analysis for use in the general music classroom.

Credit Hours: 2

Prerequisites: MUS_EDUC 4140

MUS_EDUC 4143: Teaching Music II Field Experience

This field experience supports the MUS_EDUC 4142 course. Field experience expectations are delineated in the course syllabus. Graded on a S/U basis only.

Credit Hour: 1

Prerequisites: MUS_EDUC 4141

MUS_EDUC 4144: Teaching Music III

A study of various strategies for the successful teaching of middle and high school music programs.

Credit Hours: 3

Prerequisites: MUS_EDUC 4142

MUS_EDUC 4145: Teaching Music III Field Experience

This field experience supports the MUS_EDUC 4144 course. Field experience expectations are delineated in the course syllabus. Graded on a S/U basis only.

Credit Hour: 1

Prerequisites: MUS_EDUC 4143

MUS_EDUC 8140: Advanced Techniques in Music Education-General

A review and evaluation of teaching/learning strategies in general music instruction.

Credit Hour: 2-5

Prerequisites: Music methods or instructor's consent

MUS_EDUC 8141: Advanced Techniques in Music Education-Early Childhood

A review and evaluation of teaching/learning strategies in early childhood music instruction.

Credit Hour: 2-5

Prerequisites: Music methods or instructor's consent

MUS_EDUC 8142: Curriculum Materials in Music Education-General

A development of critical abilities in evaluation and selection of music education materials for general music.

Credit Hour: 2-5

Prerequisites: instructor's consent

MUS_EDUC 8143: Curriculum Materials in Music Education-Vocal

A development of critical abilities in evaluation and selection of music education materials for secondary vocal music.

Credit Hour: 2-5

Prerequisites: instructor's consent

MUS_EDUC 8144: Techniques in Instrumental Music Teaching

A practical study of the organization and instruction of class teaching, with demonstrations by instructor and class.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_EDUC 8145: Teaching Vocal Music

Studies in voice development techniques and the organization of choral programs.

Credit Hours: 3

MUS_EDUC 8150: Foundations of Music Education

A study of the history, philosophy and rationale of music education.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_EDUC 8151: Measurement and Research in Music Education

Introduction to measurement and research strategies and techniques employed by music educators to assess music achievement, aptitude, perception, performance, cognition, and affective development. Emphasis on reading with understanding and applying research to pedagogical practice. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Graduate standing in music education

MUS_EDUC 8152: Psychology of Music Instruction and Performance

Introduction to the study of psychological factors, theories and research related to the musical development and performance of children, adolescents, and adults, with implications and applications for music education programs and instruction. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Graduate standing in music education

MUS_EDUC 8160: Current Issues in Music Education

This course is designed to stimulate thinking about current issues related to the field of music education and the influences of these issues on approaches to music teaching and learning.

Credit Hour: 1-3

Prerequisites: Graduate standing in music education

MUS_EDUC 8163: Administration and Supervision of Music Programs

A study of the organization, management, and supervision of music programs.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_EDUC 8170: Doctoral Seminar in Music Education

Emphasis on knowledge, strategies, and skills necessary for doctoral students to be prepared to make contributions to the profession as successful college teachers, researchers, master teachers in K-12 schools, and arts administrators. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: Admission to doctoral study in music education

Music-Music History And Literature Courses

MUS_H_LI 1322: Introduction to Music in the United States

Historical overview of American folk, popular, and fine-art music; emphasis on listening skills.

Credit Hours: 2

MUS_H_LI 2307: History of Western Music I

Historical survey of selected European practices up to 1700 following a consideration of the major fine-art traditions of the world.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_H_LI 1322

MUS_H_LI 2308: History of Western Music II

Historical survey of Western fine-art music from approximately 1700 to the present.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_H_LI 2307

MUS_H_LI 4311: Historical Studies in Art Song

Historical survey of works for solo voice and instruments.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4312: Historical Studies in Choral Music

Historical survey of works featuring choral ensembles.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4313: Historical Studies in Opera

Historical survey of opera.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4314: Historical Studies in Large Ensemble Music

Historical survey of works for large instrumental ensembles.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4315: Historical Studies in Chamber Music

Historical survey of works for small ensembles, instrumental and vocal.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4316: Historical Studies in Keyboard Music

Historical survey of works for solo keyboard instruments.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4317: Historical Studies in Jazz and Popular Music

Historical survey of works from the realm of American jazz and popular music.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4318: Studies in World Music

Advanced systematic study of musical activities in selected world cultures, with the emphasis on developing listening skills and understanding the role of music in a culture.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2307 and MUS_H_LI 2308

MUS_H_LI 4320: Historical Studies in African-American Music

Exploration of history and current scholarship in African-American music from the eighteenth to twenty-first centuries. Genres include folk music, religious music, blues, ragtime, jazz, musical theater, art music, R&B, funk, soul, disco, house, hip-hop and rap.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and Instructor's consent

MUS_H_LI 4330: Music of the Postmodern Era

(cross-leveled with MUS_H_LI 7330). Systematic study of fine-art musical practice from approximately 1945 to the present.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308

MUS_H_LI 4335: Music of the Middle Ages and the Renaissance

Systematic study of European musical practice before 1600.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4336: Music in the Baroque Era

Systematic study of European musical practice from approximately 1600 to 1750.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4337: Music of the Classic Era

Systematic study of European musical practice from approximately 1750 to 1800.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4338: Music of the Romantic Era

Systematic study of European musical practice from approximately 1800 to 1900.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4339: Music of the Modern Era

Systematic study of fine-art musical practice from approximately 1900 to the present.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and/or instructor's consent

MUS_H_LI 4340: Focal Composers

Systematic study of the works of landmark composers: J.S. Bach, Mozart, Beethoven, Verdi/Wagner, Debussy, or Stravinsky, studied in rotation. Repeatable for up to 6 hours or credit.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4341: Advanced Studies in American Music

(cross-leveled with MUS_H_LI 7341). Systematic study of the diverse streams of musical practice in the United States from the colonial time to the present.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4342: Contemporary Issues in Musicology

Systematic study of single musicological problem of contemporary relevance.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4350: Introduction to Ethnomusicology

Study of theories, historical development, research methodologies, and practice of ethnomusicology, in an interdisciplinary approach. Topics include ethnographic research, oral and literate sources, transcription and analysis, critical analysis, and interpretative techniques.

Credit Hours: 3

Prerequisites: grade of C-or better in MUS_H_LI 2308; instructor's consent

MUS_H_LI 4352: Historical Studies in African Music

(same as BL_STU 4352) Ethnomusicological introduction to the music and culture of countries and ethnic groups in Africa. Traditional and contemporary popular styles are explored, and influences of Islamic invasions, missionary arrivals, colonial conquests, neo-colonial trends, and globalization.

Credit Hours: 3

Prerequisites: grade of C-or better in MUS_H_LI 2308; instructor's consent

MUS_H_LI 4376: American Musicals

(same as THEATR 4720). Historical survey of the development of the 20th-Century American Musical in Theatre and Film.

Credit Hours: 3

MUS_H_LI 4397: Honors in Music History I

Special readings, directed research for graduation with Honors in music history.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 2307 and MUS_H_LI 2308

MUS_H_LI 4398: Honors in Music History II

Continuation of MUS_H_LI 4397 leading to Honors thesis in music history.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_H_LI 4397

MUS_H_LI 4399: Graduate History Review

Review of history for graduate students. Does not fulfill graduate degree requirements. Graded on S/U basis only.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_H_LI 7307: Graduate Review of Music History I

Survey of the history of Western music from ca. 600 A.D. to ca. 1750. Special readings; individual projects.

Credit Hours: 2

MUS_H_LI 7308: Graduate Review of Music History II

Survey of the history of Western music from ca. 1750 to the present. Special readings; individual projects.

Credit Hours: 2

MUS_H_LI 7311: Historical Studies in Art Song

Advanced historical survey of works for solo voice and instruments.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7312: Historical Studies in Choral Music

Advanced historical survey of works featuring choral ensembles.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7313: Historical Studies in Opera

Advanced historical survey of opera.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7314: Historical Studies in Large Ensemble Music

Advanced historical survey of works for large instrumental ensembles.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7315: Historical Studies in Chamber Music

Advanced historical survey of works for small ensembles, instrumental and vocal.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7316: Historical Studies in Keyboard Music

Advanced historical survey of works for solo keyboard instruments.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7317: Historical Studies in Jazz and Popular Music

Advanced historical survey of works from the realm of American jazz and popular music.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7318: Studies in World Music

Advanced systematic study of musical activities in selected world cultures, with emphasis on developing listening skills and understanding the role of music in a culture.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7320: Historical Studies in African-American Music

Exploration of history and current scholarship in African-American music from the eighteenth to the twenty-first centuries. Genres include folk music, religious music, blues, ragtime, jazz, musical theater, art music, R&B, funk, soul, disco, house, hip-hop and rap.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7330: Music of the PostModern Era

(cross-leveled with MUS_H_LI 4330). Systematic study of fine-art musical practice from approximately 1945 to the present.

Credit Hours: 3

Prerequisites: Instructor's consent

MUS_H_LI 7335: Music of the Middle Ages and the Renaissance

Advanced systematic study of European musical practice before 1600.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7336: Music in the Baroque Era

Advanced systematic study of European musical practice from approximately 1600 to 1750.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7337: Music of the Classic Era

Advanced systematic study of European musical practice from approximately 1750 to 1800.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7338: Music of the Romantic Era

Advanced systematic study of European musical practice from approximately 1800 to 1900.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7339: Music of the Modern Era

Advanced systematic study of fine-art musical practice from approximately 1900 to the present.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7341: Advanced Studies in American Music

(cross-leveled with MUS_H_LI 4341). Advanced systematic study of the diverse streams of musical practice in the United States from the colonial time to the present.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7342: Contemporary Issues in Musicology

Advanced systematic study of single musicological problem of contemporary relevance.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7350: Introduction to Ethnomusicology

Study of theories, historical development, research methodologies, and practice of ethnomusicology, in an interdisciplinary approach. Topics

include ethnographic research, oral and literate sources, transcription and analysis, critical analysis, and interpretative techniques.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 7352: Historical Studies in African Music

Ethnomusicological introduction to the music and culture of countries and ethnic groups in Africa. Traditional and contemporary popular styles are explored, and influences of Islamic invasions, missionary arrivals, colonial conquests, neo-colonial trends, and globalization.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_H_LI 8313: Introduction to Graduate Study

Introduction to library procedures, basic sources of information in music and techniques for research.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_H_LI 8314: Introduction to Graduate Studies in Music II

The application of basic music bibliography, research techniques, and conventions of music scholarship.

Credit Hour: 1

Prerequisites: MUS_H_LI 8313 or instructor's consent

MUS_H_LI 8340: Focal Composers

Advanced systematic study of the works of landmark composers: J.S. Bach, Mozart, Beethoven, Verdi/Wagner, Debussy, or Stravinsky, studied in rotation. Repeatable for up to 6 hours or credit.

Credit Hours: 3

Prerequisites: instructor's consent

Music-Music Theory Courses

MUS_THRY 1210: Introduction to Computer Technology and Music

Introduces Finale, music engraving and playback software, and introduces sequencing and other software applications that may impact students while they are in school and as professional musicians.

Credit Hours: 2

MUS_THRY 1213: Introduction to Music Theory

Introduction to music notation and to rhythmic, melodic, harmonic, and structural elements of music. Emphasis on written skills, but ear training, sight singing, and keyboard components included as well. Graded on A/F basis only.

Credit Hours: 2

Prerequisites: consent required. Placement by exam

MUS_THRY 1220: Syntax, Structure and Style of Music I

Review of fundamentals. Study of rhythm, melody, harmonic, structure and stylistic characteristics of various periods. Application through original composition projects. Prerequisites: none for Music majors; others: instructor's consent.

Credit Hours: 2

MUS_THRY 1221: Syntax, Structure and Style of Music II

Continuation of MUS_THRY 1220. Study of smaller forms and introduction to chromatic harmony.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 1220 or instructor's consent

MUS_THRY 1230: Aural Training and Sight Singing I

Development of aural and sight singing skills.

Credit Hours: 2

Prerequisites: MUS_THRY 1220 or concurrent enrollment

MUS_THRY 1231: Aural Training and Sight Singing II

Continuation of MUS_THRY 1230.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 1230 and MUS_THRY 1221 or MUS_THRY 1221 concurrently

MUS_THRY 2215: Composition I

Fundamentals of composition and writing in small forms.

Credit Hours: 2

Prerequisites: grade of B- or better in MUS_THRY 1220, MUS_THRY 1221, MUS_THRY 1230, MUS_THRY 1231, and instructor's consent

MUS_THRY 2216: Composition II

Continuation of MUS_THRY 2215.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 2215

MUS_THRY 2220: Syntax, Structure and Style of Music III

Chromatic harmony, variation techniques and contrapuntal genres. Study of traditional forms in instrumental, vocal and choral compositions. Applications through original composition projects.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 1221

MUS_THRY 2221: Syntax, Structure and Style of Music IV

Continued study of chromatic harmony and compositions in larger forms. Application through original composition projects.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 2220

MUS_THRY 2230: Aural Training and Sight Singing III

Continuation of MUS_THRY 1231. Further development of aural and sight singing skills with an emphasis on chromatic harmony and decorative pitches. Introduction of structural perception.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 1231 and MUS_THRY 2220 or MUS_THRY 2220 concurrently

MUS_THRY 2231: Aural Training and Sight Singing IV

Continuation MUS_THRY 2230.

Credit Hours: 2

Prerequisites or Corequisites: MUS_THRY 2221

Prerequisites: Grade of C- or better in MUS_THRY 2230

MUS_THRY 3215: Composition III

Further development of creative writing in traditional forms.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 2216

MUS_THRY 3216: Composition IV

Continuation of MUS_THRY 3215.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 3215

MUS_THRY 4210: Jazz Harmony and Arranging I

(cross-leveled with MUS_THRY 7210). Study of basic melodic and harmonic materials commonly used in jazz. Application through arranging projects for small jazz groups.

Credit Hours: 2

Prerequisites: MUSIC_NM 1211 or MUS_THRY 1220; instructor's consent required

MUS_THRY 4211: Jazz Harmony and Arranging II

(cross-leveled with MUS_THRY 7211). Continuation of MUS_THRY 4210. Study of advanced melodic and harmonic materials commonly used in jazz. Application through arranging projects for small and large jazz groups.

Credit Hours: 2

Prerequisites: MUS_THRY 4210; instructor's consent

MUS_THRY 4212: Jazz Theory I

Comprehensive study of the grammar and syntax of jazz harmony.

Credit Hour: 1

Prerequisites: Grade of C- or better in MUSIC_NM 1211 or MUS_THRY 1220

MUS_THRY 4215: Composition V

Writing of works in larger forms for a solo instrument or chamber ensemble.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 3216

MUS_THRY 4216: Composition VI

Continuation of MUS_THRY 4215. May be repeated for additional credit.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 4215

MUS_THRY 4220: 20th Century Composition Techniques

(cross-leveled with MUS_THRY 7220). The study and application of analytical procedures to 20th century music literature. Special readings; individual projects.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 2221 or instructor's consent

MUS_THRY 4221: Analysis of Music

An analytical study of rhythmic, melodic, harmonic and structural aspects of 18th-, 19th- and 20th-century music.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 2221 or equivalent

MUS_THRY 4222: Computer Technology and Music

The introduction of music software for educational and professional use. Music notation software will be learned. Sequencing software will be studied in depth. Hands-on experience with Macintosh computers, multi-timbral synthesizers and various CD-ROMS.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 4220 or instructor's consent

MUS_THRY 4223: Eighteenth-Century Counterpoint

(cross-leveled with MUS_THRY 7223). Study of contrapuntal procedures and representative works of the eighteenth century. Emphasis on compositions and style of Johann Sebastian Bach. Original composition projects: canon, invention, and fugue. Prerequisites: Grade of C- or better in MUS_THRY 2221 or instructor's consent

Credit Hours: 3

MUS_THRY 4225: Sixteenth-Century Counterpoint

(cross-leveled with MUS_THRY 7225). Analysis of contrapuntal procedures and representative compositions of 16th century. Emphasis on styles of Palestrina, Lassus and Victoria. Stylistic writing in two, three or more voices.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4227: Orchestration

(cross-leveled with MUS_THRY 7227). Study of orchestral instruments and the process of scoring for various orchestral combinations.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4229: Band Arranging

Transcription, scoring of solo and ensemble literature for band instrument combinations of varying sizes up to and including concert band.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4230: Choral Arranging

Transcription and arrangement of music suitable for performance by various vocal ensembles.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4231: Schenkerian Analysis

Techniques of musical analysis developed by Heinrich Schenker.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4232: Rhythmic Analysis of Tonal Music

Introduction to rhythmic analysis, including context of current thinking, basic concepts, various approaches, selected topics, performance issues, and particular problems.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4233: Acoustics of Music

(cross-leveled with MUS_THRY 7233). The study of tuning systems and the properties, production and reception of musical sound.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 4241: Advanced Schenkerian Analysis

(cross-leveled with MUS_THRY 7241). Continuation of MUS_THRY 4231, with a focus on the analysis of complete works, including larger forms.

Credit Hours: 3

Prerequisites: Grade of C-minus or better in MUS_THRY 4231, or equivalent at another institution

MUS_THRY 4245: Introduction to Electronic Music

Techniques used in the creation of music with tape recorders, voltage-controlled synthesizers and electronics.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 4220 or instructor's consent

MUS_THRY 4247: Introduction to Digital Synthesis

Introduction to the techniques of digital synthesis, including the study of programming, and Musical Instrument Digital Interfacing.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 4250: Analysis of Musical Styles

Analytical study of specific rhythmic, melodic, harmonic, and structural factors which constitute the stylistic practices of a specific period or MUS_THRY 4221 or equivalent. May be repeated for credit with departmental consent.

Credit Hours: 2

MUS_THRY 4252: Keyboard Harmony and Score Reading

Study of idiomatic chord progressions and harmonization strategies at the keyboard, including figured bass, score reading, and score playing. Skills are reinforced by analysis, both at sight and prepared.

Credit Hours: 3

Prerequisites: Grade of C- or better in MUS_THRY 2221; instructor's consent

MUS_THRY 4267: Advanced Orchestration I

(cross-leveled with MUS_THRY 7267). Transcription for full orchestra of large works from different style periods. Scoring of original works for orchestra. Seminar, private lessons.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 4227

MUS_THRY 4268: Advanced Orchestration II

(cross-leveled with MUS_THRY 7268). Survey of original works for orchestra.

Credit Hours: 2

MUS_THRY 4271: Pedagogy of Music Theory I

Techniques and materials for teaching basic music theory courses for high schools and colleges.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4272: Pedagogy of Music Theory II

Techniques and materials for advanced college courses in music theory.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 4271

MUS_THRY 4284: Contemporary Analytical Techniques

Study and application of various analytical systems for 20th century compositions. Analysis of music employing contemporary theories.

Credit Hours: 2

Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4299: Graduate Theory Review

Review of music theory for graduate students in music. Does not fulfill graduate degree requirements. Graded on S/U basis only.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 7210: Advanced Jazz Harmony and Arranging I

(cross-leveled with MUS_THRY 4210). Study of basic melodic and harmonic materials commonly used in jazz. Application through arranging projects for small jazz groups.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 7211: Advanced Jazz Harmony and Arranging II

(cross-leveled with MUS_THRY 4211). Continuation of MUS_THRY 7210. Study of advanced melodic and harmonic materials commonly used in jazz. Application through arranging projects for small and large groups.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 7215: Composition I

Fundamentals of Composition: Writing in small forms. For non-composition graduate students in music.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 7216: Composition II

Continuation of MUS_THRY 7215.

Credit Hours: 2

Prerequisites: MUS_THRY 7215

MUS_THRY 7220: 20th Century Composition Techniques

(cross-leveled with MUS_THRY 4220). Graduate review in the study and application of analytical procedures to 20th century music literature. Special readings; individual projects.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 7221: Analysis of Music

Graduate review in the analytical study of rhythmic, melodic, harmonic and structural aspects of 18th-, 19th- and 20th-century music.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 7222: Computer Technology and Music

Graduate-level introduction of music software for educational and professional use. Music notation software will be learned. Sequencing software will be studied in depth. Hands-on experience with Macintosh computers, multi-timbral synthesizers and various CD-ROMS.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 7223: Eighteenth-Century Counterpoint

(cross-leveled with MUS_THRY 4223). Advanced study of contrapuntal procedures and representative works of the eighteenth century. Emphasis on compositions and style of Johann Sebastian Bach. Original composition projects: canon, invention, and fugue. Prerequisites: instructor's consent

Credit Hours: 3

MUS_THRY 7225: Sixteenth-Century Counterpoint

(cross-leveled with MUS_THRY 4225). Advanced analysis of contrapuntal procedures and representative compositions of 16th century. Emphasis on styles of Palestrina, Lassus and Victoria. Stylistic writing in two, three or more voices.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_THRY 7227: Advanced Orchestration

(cross-leveled with MUS_THRY 4227). Study of orchestral instruments and the process of scoring for various orchestral combinations.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 7229: Band Arranging

Advanced transcription, scoring of solo and ensemble literature for band instrument combinations of varying sizes up to and including concert band.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 7230: Choral Arranging

Advanced transcription and arrangement of music suitable for performance by various vocal ensembles.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 7231: Schenkerian Analysis

Advanced techniques of musical analysis developed by Heinrich Schenker.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_THRY 7232: Rhythmic Analysis of Tonal Music

Advanced study of rhythmic analysis, including context of current thinking, basic concepts, various approaches, selected topics, performance issues, and particular problems.

Credit Hours: 3

Prerequisites: instructor's consent

MUS_THRY 7233: Acoustics of Music

(cross-leveled with MUS_THRY 4233). Advanced study of tuning systems and the properties, production and reception of musical sound.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 7241: Advanced Schenkerian Analysis

(cross-leveled with MUS_THRY 4241). Continuation of MUS_THRY 7231, with a focus on the analysis of complete works, including larger forms.

Credit Hours: 3

Prerequisites: Grade of C-minus or better in MUS_THRY 4231 or MUS_THRY 7231, or equivalent at another institution

MUS_THRY 7245: Introduction to Electronic Music

Advanced techniques used in the creation of music with tape recorders, voltage-controlled synthesizers and electronics.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 7247: Introduction to Digital Synthesis

Graduate-level introduction to the techniques of digital synthesis, including the study of programming, and Musical Instrument Digital Interfacing.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 7250: Analysis of Musical Styles

Advanced analytical study of specific rhythmic, melodic, harmonic, and structural factors which constitute the stylistic practices of a specific period or composer. May be repeated for credit with departmental consent.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 7252: Keyboard Harmony and Score Reading

Study of idiomatic chord progressions and harmonization strategies at the keyboard, including figured bass, score reading, and score playing. Skills are reinforced by analysis, both at sight and prepared.

Credit Hours: 3

Prerequisites: demonstrable keyboard proficiency at level of Bach invention; instructor's consent

MUS_THRY 7267: Advanced Orchestration I

(cross-leveled with MUS_THRY 4267). Advanced transcription for full orchestra of large works from different style periods. Scoring of original works for orchestra. Seminar, private lessons.

Credit Hours: 2

Prerequisites: MUS_THRY 7227 or instructor's consent

MUS_THRY 7268: Advanced Orchestration II

(cross-leveled with MUS_THRY 4268). Survey of original works for orchestra.

Credit Hours: 2

MUS_THRY 7271: Pedagogy of Music Theory I

Advanced techniques and materials for teaching basic music theory courses for high schools and colleges.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 7272: Pedagogy of Music Theory II

Advance techniques and materials for advanced college courses in music theory.

Credit Hours: 2

Prerequisites: MUS_THRY 7271

MUS_THRY 7284: Contemporary Analytical Techniques

Advanced study and application of various analytical systems for 20th century compositions. Analysis of music employing contemporary theories.

Credit Hours: 2

Prerequisites: instructor's consent

MUS_THRY 8215: Composition VII

Intensive work in larger forms. Seminar, private lessons. May be repeated for credit with departmental consent.

Credit Hours: 2

Prerequisites: instructor's consent

Natural Resources Courses

NAT_R 1040: Conservation Studies

A one-week field experience in natural resource management issues—soil and water conservation, air pollution, fish and wildlife habitat requirements, importance of forest ecosystems. Limited to high school students who have completed their junior year and taken the PSAT or equivalent. Graded on S/U basis only.

Credit Hour: 1

NAT_R 1060: Ecology and Conservation of Living Resources

Introduction to the principles of resource and conservation describing the foundation of the variety of living resources and conservation practices used to protect and maintain these resources.

Credit Hours: 3

NAT_R 1070: Ecology and Renewable Resource Management

Introduction to ecological principles and their relationship to resource use and management.

Credit Hours: 3

Prerequisites: restricted to Natural Resources majors

NAT_R 2002: Topics in Natural Resources - Biological/Physical/Mathematical

Organized study of selected topics. Subjects and credit may vary from semester to semester.

Credit Hour: 1-99

NAT_R 2004: Topics in Natural Resources - Social Science

Organized study of selected topics. Subjects and credit may vary from semester to semester.

Credit Hour: 1-99

NAT_R 2080: Outdoor Recreation Consortium

Outdoor Recreation Consortium is a collaborative course taught by MU, North Carolina State University, Penn State University, East Carolina University, Texas A&M University and Western Illinois University. The course uses Great Smoky Mountains National Park as a case study for understanding the relationship between ecosystem management, natural resource management, tourism, and outdoor recreation. This course is based around a one week trip to the Smokies. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: NAT_R 1070 or P_R_TR 2111 or ENV_SC 1100 and permission of instructor

NAT_R 2160: Issues in Natural Resources and the Environment

This course provides an introduction to ecological and environmental challenges in natural resource management in our rapidly changing world. Topical discussions will provide students with informed perspectives of several contemporary issues that affect the sustainability of our natural resources.

Credit Hours: 3

Recommended: This course is recommended as an introductory course for non-science majors

NAT_R 3001: Topics in Natural Resources

Organized study of selected topics. Subjects may vary from semester to semester.

Credit Hour: 1-99

NAT_R 3110: Natural Resource Biometrics

Sampling methods and analysis as applied to a variety of natural resources, including fisheries, range, recreation, forests, water and wildlife.

Credit Hours: 3

Recommended: a course in Statistics

NAT_R 3220: Public Relations for Natural Resource Managers

Introduction to the practical nature of public relations for those entering natural resources careers, emphasis on communication with target audiences through news media, publications and exhibits.

Credit Hours: 3

NAT_R 3290: Hydrologic Measurement Techniques

Students will be introduced to field methods and tools used by water resource and environmental science professionals. Students will sample and measure hydrologic and environmental variables, learn about data storage systems, and access and analyze data. Course may be repeated for credit. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: MATH 1100 or permission of instructor

NAT_R 4000: Problems in Natural Resources

Problems in Natural Resources

Credit Hour: 1-99

NAT_R 4001: Topics in Natural Resources

Organized study of selected topics. Subjects may vary from semester to semester.

Credit Hour: 1-99

NAT_R 4320: Hydrologic and Water Quality Modeling

(same as ENV_SC 4320). Introduction to models for simulating hydrologic and water quality processes. Emphasis is placed on watersheds to provide experience with the use of simulation models for natural resource decision making.

Credit Hours: 3

Prerequisites: ENV_SC 1100 or SOIL 2100

NAT_R 4325: Introduction to Geographic Information Systems

The course will cover basic theoretical and technical issues in GIS, discuss processing geographic information for research and application, emphasis on the nature of spatial information, data models, input, manipulation and storage, and spatial analytic techniques.

Credit Hours: 3

Prerequisites: NAT_R 1070 or GEOG 2840; NAT_R 1080 and NAT_R 1090; instructor's consent

NAT_R 4353: Natural Resource Policy/Administration

Principles of policy formation and analysis; relationship of organizational goals to structure, planning and budgeting. Historical background of present natural resource policies; examines current policy issues.

Credit Hours: 3

Prerequisites: senior standing or instructor's consent

NAT_R 4365: GIS Applications

Introduces logical thinking and techniques in applying GIS to practical problems. Covers general GIS functionalities, Arc View Spatial Analyst including georeference, terrain analysis, hydrological analysis, grid, and remote sensing image processing.

Credit Hours: 3

Prerequisites: GEOG 3040, NAT_R 1080 and NAT_R 1090, or instructor's consent

NAT_R 4385: Landscape Ecology and GIS Analysis I

(same as GEOG 4810). Examination of the landscape-scale approach to biodiversity, ecosystem dynamics, and habitat management. Particular emphasis on the use of Geographic Information Systems to analyze the spatial dimension of ecological patterns and processes.

Credit Hours: 3

Prerequisites: GEOG 3040, or instructor's consent

NAT_R 4940: Natural Resources Internship

Supervised professional experience with an approved public or private organization. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1-12

Prerequisites: School of Natural Resources majors only, instructor's consent

NAT_R 4970: Resource Practicum in Natural Resources

Multidisciplinary planning of a natural resource management program.

Credit Hours: 3

Prerequisites: School of Natural Resources majors only; senior standing or instructor's consent

NAT_R 7001: Topics in Natural Resources

Organized study of selected topics. Subjects may vary from semester to semester.

Credit Hour: 1-99

NAT_R 7320: Hydrologic and Water Quality Modeling

(same as ENV_SC 7320). Introduction to models for simulating hydrologic and water quality processes. Emphasis is placed on Missouri watersheds to provide experience with the use of simulation models for natural resource decision making.

Credit Hours: 3

Prerequisites: NAT_R 1080 and NAT_R 1090 and SOIL 2100 or equivalent

NAT_R 7325: Introduction to Geographic Information Systems

The course will cover basic theoretical and technical issues in GIS, discuss processing geographic information for research and application, emphasis on the nature of spatial information, data models, input, manipulation and storage, and spatial analytic techniques.

Credit Hours: 3

Prerequisites: NAT_R 1070 or GEOG 2840; NAT_R 1080 and NAT_R 1090; instructor's consent

NAT_R 7353: Natural Resource Policy/Administration

Principles of policy formation and analysis; relationship of organizational goals to structure, planning and budgeting. Historical background of present natural resource policies; examines current policy issues.

Credit Hours: 3

Prerequisites: instructor's consent

NAT_R 7365: GIS Applications

Introduces logical thinking and techniques in applying GIS to practical problems. Cover general GIS functionalities, Arc View Spatial Analyst including georeference, terrain analysis, hydrological analysis, grid, and remote sensing image processing.

Credit Hours: 3

Prerequisites: GEOG 3040, NAT_R 1080 and NAT_R 1090, or instructor's consent

NAT_R 7385: Landscape Ecology and GIS Analysis I

(same as GEOG 7810). Examination of the landscape-scale approach to biodiversity, ecosystem dynamics, and habitat management. Particular emphasis on the use of Geographic Information Systems to analyze the spatial dimension of ecological patterns and processes.

Credit Hours: 3

Prerequisites: GEOG 3040, or instructor's consent

NAT_R 8001: Topics in Natural Resources

Organized study of selected topics. Subjects may vary from semester to semester.

Credit Hour: 1-99

NAT_R 8050: Masters Non-Thesis Research in Natural Resources

Research credits associated with a non-thesis M.S. project. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1-10

Prerequisites: restricted to Masters students in the School of Natural Resources

NAT_R 8090: Master Thesis Research in Natural Resources

Research credits leading to M.Sc. thesis. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1-10

Prerequisites: Restricted to Masters students in the School of Natural Resources

NAT_R 8290: Hydrologic Measurement and Synthesis

Students are introduced to methods fundamental to measuring hydrologic processes, and assessing physical data, including field measurement, and data logging and acquisition information systems. Students will gain experience analyzing and synthesizing hydrologic data using tools commonly used by water resource professionals. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: MATH 1100, STAT 2530, PHYSICS 1210. If deficient in prerequisite courses, or unsure of qualification, contact instructor for consent

NAT_R 8395: Landscape Ecology and GIS Analysis II

(same as GEOG 8815). Provide students with principles and applications of landscape ecology and firm understandings of spatial analysis techniques using GIS. Discuss metrics for spatial pattern and models for landscape-scale dynamics.

Credit Hours: 3

Prerequisites: NAT_R 4365; FOREST 4320 or equivalent; basic statistics; instructor's consent

Recommended: GEOG 4810 or GEOG 7810

NAT_R 8416: Applied Research Methodology

Interrelated roles or logic, observation experiment in scientific method, research components, ethical aspects, scientific publication and communication, and research direction.

Credit Hours: 2

Prerequisites: instructor's consent

NAT_R 8448: Society and Ecosystems Research Seminar

(same as AG_EC 8448 and RU_SOC 8448). This seminar, capstone for the Graduate Certificate Program in Society and Ecosystems, exposes students to interdisciplinary research on interactions between social, economic and ecological systems.

Credit Hours: 3

NAT_R 9001: Topics in Natural Resources

Organized study of selected topics. Subjects and topics may vary from semester to semester. Graded on S/U basis only.

Credit Hour: 1-10

Prerequisites: instructor's consent. Restricted to School of Natural Resources Graduate Students

NAT_R 9087: Graduate Seminar in Natural Resources

Graduate seminar in Natural Resources. May be repeated for credit. Graded on S/U basis only. Prerequisites: restricted to PhD students in the School of Natural Resources

Credit Hour: 1-10

NAT_R 9090: Dissertation Research in Natural Resources

Research leading to a dissertation and Ph.D. in the School of Natural Resources. Graded on S/U basis only.

Credit Hour: 1-10

Prerequisites: Restricted to PhD students in the School of Natural Resources

NAT_R 9490: Ecohydrology: Contemporary Topics

A series of discussions centered on primary literature within disciplines relevant to the participants. All Natural Resources disciplines are encouraged to participate (e.g., ecology, wildlife, fisheries, recreation/tourism, hydrology, atmospheric sciences, soils, etc.) with emphasis on interdisciplinary research (i.e. integrated natural, social and/or physical scientific research). May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1

Naval Science Courses**NAVY 1100: Introduction to Naval Science**

This course serves as an introduction to the organization of the Naval Service, the varied career opportunities available, the long held customs and traditions of the service, and the duties of a Junior Officer.

Credit Hours: 3

NAVY 1200: Seapower and Maritime Affairs

Seminars examine the application of seapower as an instrument of foreign policy by the major nations of the world. Emphasis placed on role of the Navy.

Credit Hours: 3

NAVY 2110: Naval Ship Systems I

Ship construction, stability and damage control, basic thermodynamics, the steam cycle and engineering plant, including introduction to gas turbine, diesel and nuclear powered systems.

Credit Hours: 3

NAVY 2130: Evolution of Warfare

Evolution of strategy, tactics, weapons and leadership from earliest beginning through the Vietnam period. Development of military policy, the impact of warfare on the political, social and economic structure of nations.

Credit Hours: 3

NAVY 2210: Naval Ship Systems II

Naval weapons systems, their employment and control, including the basic fire control problem, with emphasis on new systems.

Credit Hours: 3

NAVY 3120: Marine Navigation

Theoretical and practical application of the principles of marine navigation. Includes fundamentals of dead reckoning, piloting, tides and current, celestial navigation, electronic navigation.

Credit Hours: 3

NAVY 3130: Amphibious Warfare

History and development of amphibious warfare, principles of amphibious warfare techniques; their application in selected examples from modern.

Credit Hours: 3

NAVY 3140: Leadership and Management

This course will provide a basic understanding of the interrelationship between authority, responsibility and accountability within a task oriented organization. Students will learn to apply leadership and management skills to prioritize competing demands and to attain mission objectives; the importance of planning and follow-up; and develop a basic understanding of communication and counseling as it pertains to personnel management.

Credit Hours: 3

Prerequisites: sophomore standing or by consent of Professor of Naval Science

NAVY 3220: Naval Operations

Principles and concepts of naval operations: rules of the road, command and control in naval operations, communications, ASW warfare, international maritime law, and practical solution of relative motion problems.

Credit Hours: 3

Prerequisites: NAVY 3120

NAVY 4940: Leadership and Ethics

(same as PEA_ST 4940). The curriculum provides a foundation in leadership, ethical decision making, the Law of Armed Conflict and the military justice system. Course explores ethical theories and helps students to build an ethical framework for decision making. Topic areas include: Kant, Utilitarianism, Stoicism, Constitutional Paradigm, Uniform Code of Military Justice and Law of Armed Conflict. Designed as a capstone course for juniors and seniors enrolled in NROTC it is open to all MU students.

Credit Hours: 3

Prerequisites: junior standing required

Neurology Courses

NEUROL 6003: Neurology Clerkship

Students see patients with neurological disorders in the outpatient clinics, in hospital settings, and on consultation services.

Credit Hours: 4

NEUROL 6013: Rural Neurology Clerkship

Rural Neurology Clerkship

Credit Hours: 4

NEUROL 6023: Springfield Neurology Clerkship

Students see patients with neurological disorders in the outpatient clinics, in hospital settings, and on consultation services.

Credit Hours: 4

Prerequisites: successful completion of the first two years of medical school

NEUROL 6103: Remediation Neurology Clerkship

Enrolled students are those who received an unsatisfactory grade in a Child Health Clerkship at any Mizzou Med location or site. This course gives the student an opportunity to rectify their deficiency.

Credit Hours: 4

Prerequisites: NEUROL 6003 Neurology Clerkship, received unsatisfactory grade

NEUROL 6301: ABS Neurology Mech of Disease

ABS Neurology Mech of Disease

Credit Hour: 5-10

NEUROL 6303: ABS Neurology Research

ABS Neurology Research

Credit Hours: 5

NEUROL 6305: ABS Neurology Research and Review

ABS Neurology Research and Review

Credit Hours: 5

NEUROL 6755: Adult Neurology - Rural

Adult Neurology - Rural

Credit Hours: 5

NEUROL 6756: Neurology - Rural

Rural Neurology general elective.

Credit Hours: 5

Prerequisites: NEUROL 6003. Restricted to fourth year medical students

NEUROL 6829: PEDIATRIC NEUROLOGY

Pediatric Neurology

Credit Hours: 5

NEUROL 6845: Neurology

Neurology

Credit Hours: 5

NEUROL 6850: Advanced Neurology

Advanced Neurology

Credit Hours: 5

NEUROL 6918: Epilepsy and Clinical Neurophysiology

The medical student will work as part of the ambulatory and inpatient epilepsy team. One week will be spent in the outpatient unit and one inpatient. The inpatient rotation will consist of rounding on epilepsy patients and being an integral part of patient care. A significant portion of the inpatient week will be spent in the Epilepsy Monitoring Unit. During the outpatient rotation, the student will rotate with one of two epileptologists and participate in their care.

Credit Hours: 2

Prerequisites: successful completion of the first two years of medical school

NEUROL 6921: Neurology Outpatient Experience

The student will work as part of the ambulatory neurology team. During the outpatient rotation, the student will have an opportunity to participate in the care of patients with physicians specializing in the following: Epilepsy, Movement Disorders, Neuromuscular Disorders, Dementia and Behavioral Neurology, Multiple Sclerosis, Sleep Disorders, and Vascular Neurology.

Credit Hours: 2

Prerequisites: successful completion of the first two years of medical school

NEUROL 6922: Neurology/Stroke Inpatient Experience

The student will work as part of the inpatient neurology team. During the rotation, the student will have an opportunity to participate in the care of patients on the general and stroke inpatient services. Students may elect to spend one week on each service or both weeks on either. Opportunities may be available to students in the following areas: Intensive/Critical Care Unit and Neuro-Interventional procedures.

Credit Hours: 2

Prerequisites: successful completion of the first two years of medical school

NEUROL 6923: Neuromuscular Disorders

One week will be spent in the outpatient unit and one inpatient. The inpatient experience will consist of rounding on neuromuscular patients and being an integral part of patient care. A significant portion of the experience will be spent in Electromyography (EMG). During the outpatient experience, the student will rotate with one of three neuromuscular specialists and participate in patient care, and participate in MDA clinic.

Credit Hours: 2

Prerequisites: successful completion of the first two years of medical school

Nuclear Engineering Courses**NU_ENG 2201: Topics in Nuclear Engineering**

Current and new developments in nuclear engineering.

Credit Hours: 3

Prerequisites: sophomore standing; PHYSCS 1210 and PHYSCS 1220 and MATH 1100 or MATH 1120 or instructor's consent

NU_ENG 2303: Harnessing the Atoms in Everyday Life: Fulfill M Curie's Dream

Introduction to applications of nuclear science and technology, utilizing web-based learning scenarios.

Credit Hours: 3

NU_ENG 4001: Topics in Nuclear Engineering

Current and new developments in nuclear engineering. May be repeated for credit.

Credit Hour: 2-5

Prerequisites: instructor's consent

NU_ENG 4302: Safe Handling of Radioisotopes

Introduction of methods and procedures for safe handling of radioisotopes in the research laboratory. Intensive lecture and laboratory training sessions designed for persons planning to use radioisotopes at the University.

Credit Hour: 1

Prerequisites: instructor's consent

NU_ENG 4303: Radiation Safety

(same as RA_SCI 4303) Types and origins of radiation; radiation detection and measurement; radiation interactions; shielding; dose calculations; federal, state and local regulations; and procedures for safe

uses of radiation. Laboratory experiments in radiation measurements and protection.

Credit Hours: 3

Prerequisites: college physics, calculus based

NU_ENG 4305: Survey of Nuclear Engineering

Introductory topics in nuclear engineering. Atomic and nuclear physics; nuclear reactor principles under steady-state and transient conditions; heat removal; shielding; instrumentation; power generation; fusion.

Credit Hours: 3

Prerequisites: concurrent with MATH 4100

NU_ENG 4306: Advanced Engineering Math

(same as CH_ENG 4306; cross-leveled with NU_ENG 7306). Applies ordinary and partial differential equations to engineering problems; Fourier's series; determinants and matrices; Laplace transforms; analog computer techniques.

Credit Hours: 3

Prerequisites: MATH 4100

NU_ENG 4315: Energy Systems and Resources

(same as ECE 4020). Analysis of present energy usage in Missouri, USA and the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies.

Credit Hours: 3

Prerequisites: ENGINR 2300 or equivalent

NU_ENG 4319: Physics and Chemistry of Materials

(same as PHYSCS 4190, BIOL_EN 4480 and CHEM 4490).

Undergraduate/graduate level course offered every winter semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid term and one final exam. Graduate students will submit a term paper.

Credit Hours: 3

Prerequisites: PHYSCS 2760 and CHEM 1320 or equivalent and instructor's consent

NU_ENG 4320: Natural Resources and Nuclear Energy

Not for engineering students. Lecture, demonstration; describes physical environment, energy, power plants, nuclear reactors; radioactivity, its biological effects; health physics measures, rad-waste disposal; nuclear safeguards, nuclear explosives, societal implications.

Credit Hours: 3

Prerequisites: high school algebra

NU_ENG 4328: Introductory Radiation Biology

(same as BIO_SC 4328, RADIOL 4328, and V_M_S 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

Credit Hours: 3

Prerequisites: junior standing, Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

NU_ENG 4330: Science and Technology of Terrorism and Counter Terrorism

(same as PEA_ST 4330). Terrorism has been a familiar tool of political conflict, and it has assumed greater importance during the past twenty years. This subject has been treated by political scientists in various forms, but the scientific and technological aspects of different forms of terrorism cannot be found in a single place. It is important for persons who propose counter measures to understand the basics of different types of terrorism such as for instance the nature of chemical agents, their properties such as toxicity, etc. in order to build better defense systems.

Credit Hours: 3

NU_ENG 4331: Nonproliferation Issues for Weapons of Mass Destruction

Nonproliferation and impact on technology and world events.

Credit Hours: 3

Prerequisites: junior/senior standing or instructor's consent. May be repeated for credit

NU_ENG 4341: Nuclear Chemical Engineering

Principles and processes of importance in the field of nuclear technology.

Credit Hours: 3

NU_ENG 4346: Introduction to Nuclear Reactor Engineering I

(same as ECE 4030). Engineering principles of nuclear power systems, primarily for the production of electrical energy.

Credit Hours: 3

Prerequisites: ENGINR 1200, ENGINR 2300 or equivalent

NU_ENG 4349: Nuclear Engineering Materials

Properties of materials for reactor components; radiation damage and corrosion; metallurgy of reactor materials.

Credit Hours: 3

Prerequisites: upper division or graduate standing in Physical Sciences or Engineering, or instructor's consent

NU_ENG 4350: Nuclear Forensic Analysis

Principles/applications of nuclear techniques in solution of bioenvironmental problems. Uses of nuclear methods in studies of water/air pollution, biology, medicine, pesticides, geochemistry, ecological transport. Lectures, laboratory.

Credit Hours: 3

Prerequisites: senior standing or instructor's consent

NU_ENG 4353: Introduction to Fusion

Basic plasma physics, principles of thermonuclear fusion, plasma confinement and heating, and devices.

Credit Hours: 3

Prerequisites: senior standing in Engineering or Science or instructor's consent

NU_ENG 4357: Nuclear Heat Transport

Principles of heat transport in nuclear reactors. Brief review of the theory of flow coast down and convective heat transfer. Heat transfer loop experiments on flow coast down, steady state and transient forced convection heat transfer, boiling heat transfer.

Credit Hours: 2

Prerequisites: NU_ENG 4305, NU_ENG 4346 or instructor's consent

NU_ENG 4365: Nuclear Power Engineering

Nuclear reactor heat generation and removal; nuclear reactor coolants; analysis of nuclear reactor power plants.

Credit Hours: 3

Prerequisites: ENGINR 2300

NU_ENG 4369: Principles of Direct Energy Conversion

Principles and utilization of thermoelectric, thermionic, photovoltaic, magnetohydrodynamic generators and fuel cells.

Credit Hours: 3

Prerequisites: ENGINR 2300, MAE 3400, or equivalent

NU_ENG 4375: Introduction to Plasmas

(same as ECE 4550; cross-leveled with NU_ENG 7375, ECE 7550).

Equations of plasma physics, interaction of waves and plasmas; plasma sheaths and oscillations; measurements and applications.

Credit Hours: 3

Prerequisites: ECE 4930 or instructor's consent

NU_ENG 4379: Particulate Systems Engineering

An introduction to natural and engineered particulate systems.

Credit Hours: 3

Prerequisites: CH_ENG 3234 or MAE 4300 or equivalent

NU_ENG 4382: Lasers and Their Applications

(same as ECE 4570; cross-leveled with NU_ENG 7382, ECE 7570).

Introduction to lasers, from both a conceptual viewpoint and from the application of Maxwell's equation, to develop the optical theory for lasers.

Credit Hours: 3

Prerequisites: PHYSICS 2760, and MATH 4110

NU_ENG 4391: Nuclear Radiation Detection

(same as CHEM 4600). Principles and application of radiation detectors and analyzers: ionization, Geiger-Muller, proportional, liquid and solid scintillation, semiconductor, pulse height analyzers, coincidence circuits, data reduction, tracer applications, activation analysis. Lectures, laboratory.

Credit Hours: 3

Prerequisites: senior standing or instructor's consent

NU_ENG 7001: Topics in Nuclear Science and Engineering

Current and new developments in nuclear engineering.

Credit Hour: 2-5

Prerequisites: instructor's consent

NU_ENG 7080: Medical Ethics for Medical Physics

This course will start with an introduction into medical ethics then transitions into research procedures with humans and animals. This course will cover research ethics, professional conduct, authorship, publishing, and plagiarism.

Credit Hour: 1

NU_ENG 7085: Special Problems in Nuclear Science and Engineering

Special Problems in Nuclear Science and Engineering.

Credit Hour: 1-5

NU_ENG 7087: Seminar in Nuclear Science and Engineering

Reviews of investigations and projects of importance in nuclear engineering.

Credit Hour: 1

NU_ENG 7302: Safe Handling of Radioisotopes

Introduction of methods and procedures for safe handling of radioisotopes in the research laboratory. Intensive lecture and laboratory training sessions designed for persons planning to use radioisotopes at the University.

Credit Hour: 1

Prerequisites: instructor's consent

NU_ENG 7303: Radiation Safety

(same as RA_SCI 7303). Types and origins of radiation; radiation detection and measurement; radiation interactions; shielding; dose calculations; federal, state and local regulations; and procedures for safe uses of radiation. Laboratory experiments in radiation measurements and protection.

Credit Hours: 3

Prerequisites: college physics, calculus based

NU_ENG 7305: Survey of Nuclear Engineering

Introductory topics in nuclear engineering. Atomic and nuclear physics; nuclear reactor principles under steady-state and transient conditions; heat removal; shielding; instrumentation; power generation; fusion.

Credit Hours: 3

Prerequisites: concurrent with MATH 4100

NU_ENG 7306: Advanced Engineering Math

(cross-leveled with NU_ENG 7306). Applies ordinary and partial differential equations to engineering problems; Fourier's series; determinants and matrices; Laplace transforms; analog computer techniques.

Credit Hours: 3

Prerequisites: MATH 4100

NU_ENG 7313: Nuclear Science for Engineering for Secondary Science Teachers

This one-week course is for high school science and math teachers, and provides basic of nuclear science concepts and their applications, types

of radiation (including radiation detection and protection), and industrial, medical and nuclear power generation application.

Credit Hours: 3

Prerequisites: instructor's consent; actively engaged in STEM teaching at the secondary level

NU_ENG 7315: Energy Systems and Resources

(same as ECE 7020). Analysis of present energy usage in Missouri, USA and the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies.

Credit Hours: 3

Prerequisites: ENGINR 2300 or equivalent

NU_ENG 7319: Physics and Chemistry of Materials

(same as PHYSCS 7190, BIOL_EN 7480 and CHEM 7490). Undergraduate/graduate level course offered every winter semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures or laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper.

Credit Hours: 3

Prerequisites: PHYSCS 2760 and CHEM 1320 or equivalent and instructor's consent

NU_ENG 7320: Natural Resources and Nuclear Energy

Not for engineering students. Lecture, demonstration; describes physical environment, energy, power plants, nuclear reactors; radioactivity, its biological effects; health physics measures, rad-waste disposal; nuclear safeguards, nuclear explosives, societal implications.

Credit Hours: 3

Prerequisites: high school algebra

NU_ENG 7328: Introductory Radiation Biology

(same as BIO_SC 7328, RADIOL 7328, and V_M_S 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

Credit Hours: 3

Prerequisites: Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

NU_ENG 7330: Science and Technology of Terrorism and Counter Terrorism

Terrorism has been a familiar tool of political conflict, and it has assumed greater importance during the past twenty years. This subject has been treated by political scientists in various forms, but the scientific and technological aspects of different forms of terrorism cannot be found in a single place. It is important for persons who propose counter measures to understand the basics of different types of terrorism such as for instance the nature of chemical agents, their properties such as toxicity, etc. in order to build better defense systems.

Credit Hours: 3

NU_ENG 7331: Nonproliferation Issues for Weapons of Mass Destruction

Nonproliferation and impact on technology and world events.

Credit Hours: 3

Prerequisites: junior or senior standing or instructor's consent

NU_ENG 7335: Nuclear Safeguards Science and Technology
(same as ECE 7335). This course provides an overview of nuclear materials management and safeguards, including physical protection systems, material accounting and control, monitoring, and regulatory issues.

Credit Hours: 3

Prerequisites: NU_ENG 4303 or NU_ENG 7303

NU_ENG 7341: Nuclear Chemical Engineering

Principles and processes of importance in the field of nuclear technology.

Credit Hours: 3

NU_ENG 7346: Introduction to Nuclear Reactor Engineering I

(same as ECE 7030). Engineering principles of nuclear power systems, primarily for the production of electrical energy.

Credit Hours: 3

Prerequisites: ENGINR 1200, ENGINR 2300 or equivalent

NU_ENG 7349: Nuclear Engineering Materials

Properties of materials for reactor components; radiation damage and corrosion; metallurgy of reactor materials.

Credit Hours: 3

Prerequisites: upper division or graduate standing in Physical Sciences or Engineering, or instructor's consent

NU_ENG 7350: Nuclear Forensic Analysis

Principles/applications of nuclear techniques in solution of bioenvironmental problems. Uses of nuclear methods in studies of water/air pollution, biology, medicine, pesticides, geochemistry, ecological transport. Lectures, laboratory.

Credit Hours: 3

Prerequisites: NU_ENG 7303, instructor's consent

NU_ENG 7353: Introduction to Fusion

Basic plasma physics, principles of thermonuclear fusion, plasma confinement and heating, and devices.

Credit Hours: 3

Prerequisites: graduate standing in Engineering or Science or instructor's consent

NU_ENG 7357: Nuclear Heat Transport

Principles of heat transport in nuclear reactors. Brief review of the theory of flow coast down and convective heat transfer. Heat transfer loop experiments on flow coast down, steady state and transient forced convection heat transfer, boiling heat transfer.

Credit Hours: 2

Prerequisites: NU_ENG 4305, NU_ENG 4346 or instructor's consent

NU_ENG 7365: Nuclear Power Engineering

Nuclear reactor heat generation and removal; nuclear reactor coolants; analysis of nuclear reactor power plants.

Credit Hours: 3

Prerequisites: ENGINR 2300

NU_ENG 7369: Principles of Direct Energy Conversion

Principles and utilization of thermoelectric, thermionic, photovoltaic, magnetohydrodynamic generators and fuel cells.

Credit Hours: 3

Prerequisites: ENGINR 2300, MAE 3400, or equivalent

NU_ENG 7375: Introduction to Plasmas

(same as ECE 7550; cross-leveled with NU_ENG 4375, ECE 4550).

Equations of plasma physics, interaction of waves and plasmas; plasma sheaths and oscillations; measurements and applications.

Credit Hours: 3

Prerequisites: ECE 4930 or instructor's consent

NU_ENG 7379: Particulate Systems Engineering

An introduction to natural and engineered particulate systems.

Credit Hours: 3

Prerequisites: CH_ENG 3234 or MAE 4300 or equivalent

NU_ENG 7382: Lasers and Their Applications

(same as ECE 7570; cross-leveled with NU_ENG 4382, ECE 4570). An introductory course in lasers. The course treats the subject from both a conceptual viewpoint and from the application of Maxwell's equations, to develop the optical theory for lasers. The course includes approximately 10 class-room hours of laboratory work with lasers.

Credit Hours: 3

Prerequisites: PHYSICS 2760 and MATH 4100

NU_ENG 7391: Nuclear Radiation Detection

Principles and application of radiation detectors and analyzers: ionization, Geiger-Muller, proportional, liquid and solid scintillation, semiconductor, pulse height analyzers, coincidence circuits, data reduction, tracer applications, activation analysis. Lectures, laboratory.

Credit Hours: 3

NU_ENG 7422: Radiation Shielding

Fundamentals of radiation interactions stressing neutron and gamma radiation transport; ray theory, removal theory, multi-group transport shield design principles.

Credit Hours: 3

Prerequisites: NU_ENG 8409 or instructor's consent

NU_ENG 7470: Fast Reactor Analysis

Analytical methods for designing fast breeder reactor systems. Graded on a S/U basis only.

Credit Hours: 3

Prerequisites: NU_ENG 8412, NU_ENG 8432, NU_ENG 8451 or instructor's consent

NU_ENG 8001: Advanced Topics in Nuclear Science and Engineering

Advanced developments in nuclear engineering.

Credit Hours: 3

Prerequisites: instructor's consent

NU_ENG 8085: Problems in Nuclear Science and Engineering

Supervised investigation in nuclear engineering to be presented in the form of a report.

Credit Hour: 1-6

NU_ENG 8090: Research in Nuclear Science and Engineering

Independent investigation in nuclear engineering to be presented as a thesis. Graded on an S/U basis only.

Credit Hour: 1-99

NU_ENG 8402: Nuclear Fuel Cycle

Covers the nuclear fuel cycle from mine through enrichment, fuel element burn-up reactor physics, chemical reprocessing, waste disposal, with special emphasis on the newer proliferation-resistant fuel cycles.

Credit Hours: 3

Prerequisites: NU_ENG 4346 or NU_ENG 4305 and instructor's consent

NU_ENG 8403: Applied Topics in Medical Physics and Health Physics

Directed observations and experience in scientific aspects of daily operations in nuclear medicine, diagnostic radiology, radiotherapy and health physics.

Credit Hour: 1-6

Prerequisites: departmental consent

NU_ENG 8404: Nuclear Reactor Laboratory I

Application of reactor physics principals to operation of and experiments with the University of Missouri Research Reactor. Neutron activation analysis, instrumentation, reactivity evaluation.

Credit Hours: 3

Prerequisites: NU_ENG 4346 or NU_ENG 8411

NU_ENG 8405: Nuclear Reactor Laboratory II

Advanced experiments to measure diffusion length, Fermi age, material buckling, transfer function, neutron spectrum and other reactor characteristics. Reactor simulation with an analog computer.

Credit Hours: 3

Prerequisites: NU_ENG 8411 or instructor's consent

NU_ENG 8406: Clinical and Research Application in Medical and Health Physics

To give students an understanding of the range of clinical practice and medical research involving the practice and nuclear physics/engineering.

Credit Hour: 1

Prerequisites: NU_ENG 8409 and NU_ENG 4303, college calculus or equivalent and calculus based physics

NU_ENG 8408: State Variable Methods in Automatic Control

(same as CH_ENG 8780, ECE 8780, and MAE 8780). State variables for continuous and discrete-time dynamic control systems; controllability and observability; optimal control of linear systems.

Credit Hours: 3

Prerequisites: CH_ENG 4370, ECE 4310, MAE 4730 or instructor's consent

NU_ENG 8409: Interaction of Radiation with Matter

Theory/applications of radiation interaction processes. Reviews nuclear physics concepts; radioactive decay; sources/ spectra of ionizing radiation; collision mechanisms for charged particles, electromagnetic radiation, neutrons for interaction with matter.

Credit Hours: 3

Prerequisites: Entrance requirements

NU_ENG 8411: Nuclear Reactor Theory I

Nuclear reactions; nuclear fission; introduces neutron transport; diffusion and slowing down of neutrons; steady-state homogeneous and heterogeneous reactor theory.

Credit Hours: 3

Prerequisites: instructor's consent

NU_ENG 8412: Nuclear Reactor Theory II

Linear and non-linear reactor kinetics; perturbation theory; temperature and fission product effects; control rod theory; transport theory.

Credit Hours: 3

Prerequisites: NU_ENG 8411 or NU_ENG 4346

NU_ENG 8421: Advanced Radiation Detection Electronics

Principles of radiation pulse analysis with emphasis on applications. Radiation detection devices; amplifying, shaping and discrimination circuits; nuclear pulse analysis; automated data analysis systems. Lectures and lab.

Credit Hours: 3

Prerequisites: NU_ENG 4346, NU_ENG 4391 or instructor's consent

NU_ENG 8422: Radiation Shielding

Fundamentals of radiation interactions stressing neutron and gamma radiation transport; ray theory, removal theory, multi-group transport shield design principles.

Credit Hours: 3

Prerequisites: NU_ENG 8409 or instructor's consent

NU_ENG 8429: Radiation Dosimetry

Basis and applications of conventional and microscopic radiation dosimetry. Dose concepts and quantities; biological dose-response models; dose measurement principles; photon, charged particle, and neutron dosimetry.

Credit Hours: 3

Prerequisites: NU_ENG 8409

Recommended: NU_ENG 4328

NU_ENG 8432: Nuclear Thermal Hydraulics and Safety

Engineering topics from reactor heat transfer and thermal stresses, fuel cycle analysis, power plant thermodynamics, shielding, and reactor safety analysis.

Credit Hours: 3

Prerequisites: NU_ENG 8411 or NU_ENG 4346, or instructor's consent

NU_ENG 8434: Fracture Mechanics I

(same as MAE 8220). Mechanics of flawed structure. Concepts include Griffith theory, Barenblatt's theory, Irwin analysis, energy analysis of cracked bodies, fracture toughness testing, plane strain, plane stress, transition temperature concepts, subcritical flaw growth.

Credit Hours: 3

Prerequisites: MAE 3200 or instructor's consent

NU_ENG 8435: Physics of Diagnostic Radiology

Principles and applications of X-ray production and interactions. Images production concepts including X-ray film, intensifying screens, grids, fluoroscopy, image intensification and television monitors. Image quality analysis and assessment.

Credit Hours: 3

Prerequisites: NU_ENG 8409 or equivalent or instructor's consent

NU_ENG 8439: Clinical Physics in Radiotherapy

Principles and applications of radiation producing units, exposure and dose measurements, and calibration. External beam physics parameters and application to fixed field and rotational field treatment planning.

Credit Hours: 3

Prerequisites: NU_ENG 8409 or equivalent or instructor's consent

NU_ENG 8444: Fracture and Fatigue Prevention in Engineering Practice

Practical design problems. Introduction to retrofit design, maintenance, product improvement and new design from a fatigue and fracture prevention philosophy. Fail safe and safe life designs are presented.

Credit Hours: 3

Prerequisites: NU_ENG 8434

NU_ENG 8450: Superconductivity and Its Applications

(same as ECE 8020). Phenomenology and theory of superconductivity; cryogenic practice; metallurgy of superconducting elements, alloys and compounds. Applications, present and prospective. Graded on an S/U basis only.

Credit Hours: 3

NU_ENG 8451: Computational Methods of Reactor Analysis

Applies numerical analysis and digital computation to topics from multi-group diffusion theory, transport theory, reactor kinetics, reactor thermal hydraulics, radiation shielding, reactor safety.

Credit Hours: 3

Prerequisites: NU_ENG 8411 and MATH 4300

NU_ENG 8452: Ultrasound and Magnetic Resonance Imaging

The physical principles of MRI and ultrasound including clinical instrumentation, artifacts in images, biological effects and quality control. Images obtained with both techniques will be presented.

Credit Hours: 3

Prerequisites: NU_ENG 4391, NU_ENG 8409, NU_ENG 4306 or equivalent

NU_ENG 8453: Advanced Fusion Theory

Plasma stability theory, charged particle diffusion, slowing down of charged particles, interaction of radiation with matter, direct energy conversion using charged particles, and engineering considerations.

Credit Hours: 3

Prerequisites: NU_ENG 4353 and NU_ENG 4375 or PHYSCS 8450 or instructor's consent

NU_ENG 8454: Clinical Physics of Nuclear Medicine

Physical principles, statistics of radionuclide decay and highlights into the most current instrumentation to utilize in vivo radionuclides for both diagnostic imaging and therapy. Also includes brachy therapy.

Credit Hours: 3

Prerequisites: NU_ENG 4306, NU_ENG 8409 or equivalent

NU_ENG 8455: Growth, Characterization and Appl. of Diamond and Related Materials

This course explores the development of diamond films. Discussion of other wide band-gap materials are covered. Topics include Chemistry of Diamond Growth, Thermodynamics, Nucleation, Methods of Growth, Methods of Impurity Control, Characterization and Modification, Doping, and Applications.

Credit Hours: 3

NU_ENG 8461: Neutron Transport Theory

The Boltzmann equation; general properties and solution; numerical methods of solving the transport equation; neutron thermalization and neutron spectra.

Credit Hours: 3

Prerequisites: NU_ENG 8412; MATH 4940, MATH 4300, or instructor's consent

NU_ENG 8470: Fast Reactor Analysis

Analytical methods for designing fast breeder reactor systems. Graded on a S/U basis only.

Credit Hours: 3

Prerequisites: NU_ENG 8412, NU_ENG 8432, NU_ENG 8451 or instructor's consent

NU_ENG 8471: Radiation Protection

Theory and applications of radiation protection and health physics. Radiation dosimetry methods and calculations, shielding evaluations, equipment surveys and inspection, environmental monitoring, radiation standards and regulations and administration presented.

Credit Hours: 3

Prerequisites: NU_ENG 4303 and NU_ENG 4328

NU_ENG 9090: Research in Nuclear Science and Engineering

Independent investigation in nuclear engineering to be presented as a thesis. Graded on an S/U basis only.

Credit Hour: 1-99

Nuclear Medicine Courses

NUCMED 1000: Orientation to Nuclear Medicine

An overview using a series of short rotations through local nuclear medicine departments and a self-directed review of a current text. Clinical rotations for this course are arranged on an individual basis. Graded on S/U basis only.

Credit Hour: 1

NUCMED 3255: Orientation to Clinical Practice

This course provides an introductory experience to clinical practice. Must be accepted into Nuclear Medicine Program. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Restricted to Nuclear Medicine students, junior standing required

NUCMED 3256: Clinical Nuclear Medicine I

Introductory clinical course for senior level students. Introduces instrumentation, administration, procedures, and laboratory techniques. Includes supervised clinical participation.

Credit Hours: 2

Prerequisites: NUCMED 3263 and restricted to Nuclear Medicine students only

NUCMED 3263: Morphological Correlations in Nuclear Medicine I

Anatomy, physiology, and pathology of the human body as assessed using medicine techniques. The first of two courses that address current clinical applications of nuclear medicine.

Credit Hours: 3

Prerequisites: NU_ENG 4303; restricted to Nuclear Medicine students only

NUCMED 3328: Introductory Radiation Biology

(same as BIO_SC 4328, NU_ENG 4328, V_M_S 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

Credit Hours: 3

Prerequisites: junior standing; Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

NUCMED 4085: Problems in Nuclear Medicine

Supervised investigation in an aspect of nuclear medicine technology, usually culminating in a written report.

Credit Hour: 1-3

NUCMED 4232: Clinical In Vitro

Detailed review of current regulations and procedures governing the use of open sources of radioactivity in a nuclear medicine setting.

Credit Hours: 3

Prerequisites: Restricted to Nuclear Medicine students

NUCMED 4268: Clinical Nuclear Medicine II

Continuation of clinical series taught in conjunction with NUCMED 3256 and NUCMED 4232. Addresses advanced therapeutic and diagnostic procedures, computer applications, and quality assurance procedures.

Credit Hours: 3

Prerequisites: NUCMED 3256. Restricted to Nuclear Medicine students only

NUCMED 4269: Clinical Nuclear Medicine III

Final course in clinical series. Seminar discussion of the areas of professional ethics, current medical-legal considerations, and future nuclear medicine applications.

Credit Hour: 1

Prerequisites: NUCMED 3256. Restricted to Nuclear Medicine students only

NUCMED 4299: Morphological Correlations in Nuclear Medicine II

Anatomy, physiology, and pathology of the human body as assessed using nuclear medicine techniques. The second of two courses that address current clinical applications of nuclear medicine.

Credit Hours: 3

Prerequisites: NUCMED 3263, restricted to Nuclear Medicine students

NUCMED 4327: Nuclear Medicine Instrumentation

Radionuclide imaging systems and the use of computers. Topics include Anger camera systems, emission tomography, ultrasound, nuclear magnetic resonance, and bone absorptionmetry.

Credit Hours: 3

Prerequisites: PHYSCS 1220 and MATH 1400, restricted to Nuclear Medicine students

NUCMED 4329: Radiopharmaceuticals in Nuclear Medicine

Introduces concepts of radiopharmacy, generator systems, labeling of materials, quality control procedures and FDA regulations concerning radiopharmaceuticals.

Credit Hours: 3

Prerequisites: CHEM 1320 and instructor's consent

NUCMED 4330: PET in Nuclear Medicine

Overview of special isotope production techniques for positron emitting agents; instrumentation concerns beyond standard Anger imaging; and image critique and analysis with morphologic correlation. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 1210 and NUCMED 4327 or instructor's consent. Restricted to Nuclear Medicine students only

NUCMED 4940: Clinical In Vivo I

Practical experience in the clinical setting with imaging procedures performed in nuclear medicine.

Credit Hours: 6

Prerequisites: Restricted to Nuclear Medicine students

NUCMED 4941: Clinical In Vivo II

Practical experience in clinical setting with advanced imaging techniques and instrument quality control.

Credit Hours: 7

Prerequisites: NUCMED 4940. Restricted to undergraduate Nuclear Medicine students

NUCMED 7085: Problems in Nuclear Medicine

Supervised investigation in an aspect of nuclear medicine technology, usually culminating in a written report.

Credit Hours: 3

NUCMED 7329: Radiopharmaceuticals in Nuclear Medicine

Introduces concepts of radiopharmacy, generator systems, labeling of materials, quality control procedures and FDA regulations concerning radiopharmaceuticals.

Credit Hours: 3

Prerequisites: CHEM 1320 and instructor's consent

NUCMED 7330: PET in Nuclear Medicine

Overview of special isotope production in techniques for positron emitting agents; instrumentation concerns beyond standard Anger imaging; and image critique and analysis with morphologic correlation. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 1210 and NUCMED 4327 or instructor's consent

Nursing Courses

NURSE 1000: Advisory Seminar for Nursing

Orientation to the undergraduate nursing program, professional role development, and introduction to the professional milieu. Graded on an S/U basis only.

Credit Hour: 1

NURSE 2000: Nursing as a Profession

Introduces the structure of nursing knowledge and explores professional nursing role characteristics from historical, ethical, legal, economic, professional, occupational and social perspectives. Examines nursing as subsystem of the health care system.

Credit Hours: 3

Prerequisites: sophomore standing. Restricted to pre-nursing majors with a GPA of 2.8 or higher

NURSE 2100: Psychosocial and Communication Issues in Nursing

Reviews psychosocial and communication issues. Focuses on improving interpersonal communication skills and learning how to provide therapeutic interventions to people with selected mental health issues. An experiential model emphasizes personal skill development strategies.

Credit Hour: 2-3

Prerequisites: Sophomore Standing. Restricted to pre-nursing majors only

NURSE 2100H: Psychosocial and Communication Issues in Nursing - Honors

Reviews psychosocial and communication issues. Focuses on improving interpersonal communication skills and learning how to provide

therapeutic interventions to people with selected mental health issues. An experiential model emphasizes personal skill development strategies.

Credit Hour: 2-3

Prerequisites: Sophomore Standing. Restricted to pre-nursing majors only. Honors eligibility required

NURSE 3002: Topics in Nursing - Biological, Physical, Mathematical

Specialized topics in nursing not available through regularly offered courses. . Sections may be offered either on S/U or A-F basis.

Credit Hour: 1-4

NURSE 3006: Cultural Expeditions in Nursing

Directed field experiences in varied settings exploring local customs and cultural/ethnic diversities influencing health care delivery. Graded on S/U basis only.

Credit Hours: 3

Prerequisites: Consent of Instructor required

NURSE 3080: Communication and Computer Skills

Introduces RN students to MU and MU Sinclair School of Nursing. Provides education in essential competencies needed for success in the RN-BSN Option including writing skills, computer literacy, library and Internet research.

Credit Hours: 2

Prerequisites: clinical major

NURSE 3100: Pharmacology for Nursing

This course will focus on pharmacological classification and the nurse's role in medication administration and patient education. Medication issues with special populations will be addressed. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PTH_AS 2201 and PTH_AS 2203 and MPP 3202

NURSE 3170: Nursing Skills, Technologies, and Simulation

Provides laboratory experiences for fundamental to complex nursing skills and procedures. Focuses on application of therapeutic interventions and procedure to provide safe, patient-centered care.

Credit Hours: 4

Recommended: NURSE 3270

NURSE 3180: Role Transitions

Explores returning-to-school issues important to adult learners. Links previous basic nursing courses with baccalaureate courses and begins building new knowledge on prior nursing education.

Credit Hours: 3

Prerequisites or Corequisites: NURSE 3080

NURSE 3200: Pathophysiology and Therapeutics

Focuses on commonly occurring alterations in health as a result of pathophysiological deviations. Developmental concepts, diagnostics, and treatment modalities are integrated throughout course content. Recommended: PTH_AS 2201 and PTH_AS 2203 and MMP 3202.

Credit Hours: 4

NURSE 3260: Pathophysiology

Focus is on commonly occurring alterations in health across the life-span. Development concepts, diagnostics, and treatment modalities are integrated throughout course content. May be repeated for credit. Enrollment restricted to students with admission to the accelerated BSN option. Graded on A-F basis only.

Credit Hours: 3

NURSE 3270: Foundations of Nursing: Physical Assessment and the Nursing Process

Provides knowledge and skills in physical assessment and applications of nursing process. Foundational knowledge is applied to individual patients in clinical settings.

Credit Hours: 6

Recommended: NURSE 2000, NURSE 3170, NURSE 3200 or 3260, and NURSE 3100 or NURSE 3300

NURSE 3300: Pharmacology and Nursing Implications

This course will focus on pharmacological classifications and the nurse's role in medication administration and patient education. Medication issues with special populations will be addressed. Graded on a A-F basis only.

Credit Hours: 4

Recommended: PTH_AS 2201 and PTH_AS 2203 and MPP 3202

NURSE 3350: Individual Study

Independent study for qualified students in specific areas of interest in nursing under faculty guidance. Some sections may be graded A-F only or S/U only.

Credit Hour: 0-6

Prerequisites: instructor's consent

NURSE 3470: Mental Health Nursing

This course teaches behavioral, social, interpersonal, and systems dimensions of mental health nursing. Emphasis is on therapeutic use of self in assisting clients throughout the life cycle with mental health deviations.

Credit Hours: 4

Prerequisites: NURSE 3270

NURSE 3670: Nursing of Adults I

Application of nursing process to deliver care for hospitalized adults with health deviations. Evidence, technologies, professional standards and collaboration are used to enhance patient-centered, safe and effective care.

Credit Hours: 6

Prerequisites: NURSE 3170, NURSE 3270, NURSE 3100 or NURSE 3300, and NURSE 3200 or NURSE 3260

NURSE 3750: Nursing of the Childbearing Family

Provides learning experience with childbearing family. Applies nursing process to promote health and well-being for the childbearing family. May be repeated for credit. Enrollment restricted to students with admission to accelerated BSN option. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NURSE 3260 and NURSE 3270

NURSE 3760: Pediatric Nursing

Provides learning experiences with children and their families from newborn to adolescents. Examines health alterations that interfere with self-care in and for children. Enrollment restricted to students with admission to the accelerated BSN option. Prerequisites: NURSE 3260, NURSE 3270, and NURSE 3170

Credit Hours: 3

NURSE 3870: Gerontological Nursing Care

Emphasis on normal aging processes, health promotion, disease prevention, and management of acute and chronic health problems in the older adult.

Credit Hours: 3

Prerequisites: NURSE 3170 and NURSE 3270

NURSE 3900: Introduction to Nursing Science

Introduces nursing as a science from the perspective of knowledge development. Structures nursing knowledge from a selfcare deficit nursing theory perspective. Presents nursing research as a method of knowledge development and validation.

Credit Hours: 3

Prerequisites: STAT 1200 or STAT 1300 or ESC_PS 4170 and Clinical Nursing Major

NURSE 4200: Nursing Ethics and Law

Analyzes clinical nursing situations using ethical principles and decision-making models. Examines the basic doctrines and principles foundational for providing legally sound nursing practice.

Credit Hour: 3-4

Prerequisites or Corequisites: NURSE 3080 or NURSE 3670

Prerequisites: Senior Clinical Major

NURSE 4201: Legal Concepts in Nursing

This course examines fundamental legal guidelines for professional nursing practice using content gleaned from nursing and medicine. The student will analyze and apply legal principles pertaining to nursing practice. Enrollment requires a prerequisite of a medical ethics, healthcare ethics or a bioethics course which is subject to instructor approval. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: PHIL 2440 or PHIL 1150 or HLTH_SCI 4480

NURSE 4270: Nursing of Children

Nursing of children with acute and chronic health and developmental deviations. Self-care and dependent care abilities are emphasized. Content includes health promotion for infants and children. Prerequisites: NURSE 3670

Credit Hours: 5

NURSE 4300: Nursing Issues/Leadership and Management

Examines leadership and organizational theories in relation to resource management and effective delivery of nursing to sets of clients. Analyzes societal/political issues and trends related to nursing and contemporary health care.

Credit Hours: 2

Prerequisites or Corequisites: NURSE 3670 or NURSE 3180

NURSE 4380: Health Assessment and Pathophysiology

Examines biologic basis for selected commonly occurring diseases throughout the life-span. Study and performance of health assessments with application of findings to adults and children.

Credit Hours: 4

Prerequisites: NURSE 4950

NURSE 4400: Nursing Leadership and Management

Examines leadership, management, and organizational theories in relation to resource management and effective delivery of nursing to sets of clients. Analyzes societal and political issues and trends related to nursing and contemporary health care. Graded on A-F basis only.

Credit Hours: 2

Prerequisites or Corequisites: NURSE 3180

Prerequisites: NURSE 3080

NURSE 4470: Nursing of Women and Newborns

Focuses on newborn care, women's reproductive and postreproductive health, and health deviation concerns of women and newborns. Emphasizes development, implementation, and evaluation of nursing systems for families and their members.

Credit Hours: 5

Prerequisites: NURSE 3670

NURSE 4600: Women's Health

A survey of international and domestic women's health issues; considers historical antecedents and specific effects of socio-cultural variables and economic development on women's health in developing and developed nations.

Credit Hours: 3

NURSE 4870: Nursing of Adults II

Application of nursing process to care for adults with acute physiological health deviations. Leadership and management principles are integrated in delivering care for sets of clients.

Credit Hours: 7

Prerequisites: NURSE 3470, NURSE 3750 or 4470, and NURSE 3760 or NURSE 4270

NURSE 4875: Principles of Public Health Nursing: Population-Based Practice

Focuses on population-based concepts of public health nursing and application to practice through completion of a major project. Designed for practicing public health nurses employed in local public health agencies in Missouri. Course may be repeated for credit. Enrollment restricted to those with a RN license and who are employed in Public Health in Missouri. Graded on A-F basis only.

Credit Hours: 4

NURSE 4930: Evidence-Based Nursing Practice

Concepts of evidence-based nursing practice are applied to clinical nursing questions, emphasizing use of research findings in practice settings to generate best nursing practices and optimal patient care outcomes.

Credit Hours: 5

Prerequisites: NURSE 4950

NURSE 4950: Nursing Theory and Research

Addresses nursing research as means of acquiring and refining knowledge. Research utilization to impact nursing addressed. Examines development and utilization of nursing theory, primarily Self-Care Deficit Nursing Theory.

Credit Hours: 3

Prerequisites or Corequisites: NURSE 3080

NURSE 4970: Nursing in Communities

Examines roles and functions of nurses within community with emphasis on application of community/public health concepts and design and implementation of nursing systems of care for individuals, families, and populations.

Credit Hour: 4-5

Prerequisites: NURSE 4270 and NURSE 3470; or NURSE 3760 or NURSE 4930

NURSE 4975: The Capstone Experience

Community project-based course that integrates and applies principles previously learned in the RN-BSN curriculum. Course may be repeated for credit. Restricted to students with a RN license and who are employed in Public Health in Missouri. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: NURSE 4875

NURSE 7001: Special Topics in Nursing

Specialized topics in advanced nursing not available through regularly offered courses.

Credit Hour: 1-3

NURSE 7010: Biostatistical Foundations for Health Researchers

Examines basic concepts of data management, study design, descriptive and inferential biostatistics using analytic software. Emphasizes statistical literacy and critical thinking for health researchers. Graded on A-F basis only.

Credit Hours: 3

NURSE 7085: Problems in Nursing

Guided readings, special study, and/or a practicum in an area of the student's interest or an area which the student needs to strengthen.

Credit Hour: 1-3

Prerequisites: instructor's consent

NURSE 7087: Leadership and Technology Institute

Introduction to knowledge and skills essential to support research and practice doctorates. May be repeated for credit.

Credit Hour: 1

Prerequisites: Admission to DNP or PhD program

NURSE 7100: Theoretical Basis for Advanced Nursing

Analysis, application and evaluation of a variety of nursing and non nursing theories used in advanced nursing practice and research.

Credit Hours: 3

NURSE 7110: Advanced Nursing Role Acquisition

An overview of the advanced nursing practice role and professional issues. Provides foundational knowledge on which other advanced nursing courses will build.

Credit Hours: 3

Prerequisites: Admission to the graduate program or faculty consent

NURSE 7111: Trends and Issues in Nursing

Issues and trends involving professional nursing practice are examined from socioeconomic, organizational, legal and ethical perspectives. Past, present and future roles and practice of nurses are examined.

Credit Hours: 3

NURSE 7120: Advanced Physiology and Pathophysiology

Focus on the normal and altered physiological functioning of body systems. Provides essential knowledge of human health and disease across the lifespan necessary for advanced nursing practice.

Credit Hours: 3

NURSE 7130: Advanced Pharmacology and Pharmacotherapeutics

Advanced practice nurse drug therapy management for health maintenance and treatment of acute episodic and chronic health problems in various populations over the life span.

Credit Hours: 3

Prerequisites: BSN or instructor's consent

NURSE 7140: Advanced Health Assessment and Promotion

Expands history and physical assessment techniques across lifespan. Addresses diagnostic reasoning, differential diagnosis, selection of common diagnostic test, disease risk factors, and health promotion strategies.

Credit Hours: 3.5

Prerequisites: BSN or instructor's consent

NURSE 7150: Research Basis for Advanced Nursing

Examines fundamentals of scientific inquiry. Addresses research design issues. Focuses on interpreting, critiquing, and synthesizing research findings.

Credit Hours: 3

Prerequisites: NURSE 7100

NURSE 7211: Stress Management

Review of contemporary research on the causes, prevention, and treatment of stress. Examination of utility and validity of a variety of stress reduction methods. Development of selected self-management skills.

Credit Hours: 3

NURSE 7212: Legal Parameters of Nursing

This course provides the basic doctrines and principles of the law foundational to legally sound nursing practice. Included among significant topics are tort law, nurse practice act, licensure, effect of contract law.

Credit Hours: 3

NURSE 7310: Advanced Health Assessment for Pediatric Nursing Practice

Comprehensive assessment of children through adolescence including those with significant health and/or developmental deviations using advanced diagnostic reasoning process. Emphasis on health history, cultural diversity, differentiation, interpretation and documentation of findings.

Credit Hours: 3.5

NURSE 7330: Pediatric Pharmacology for Advanced Nursing Practice

Clinical pharmacotherapeutics course that builds on prior pharmacology knowledge. Major focus is pharmacotherapeutics for primary care management of children to age eighteen. Emphasis on clinical critical thinking used to prescribe drugs.

Credit Hours: 3

NURSE 7600: Women's Health

A survey of international and domestic women's health issues; considers historical antecedents and specific effects of socio-cultural variables and economic development on women's health in developing and developed nations.

Credit Hours: 3

NURSE 7750: Physical Function and Older Adults

(Same as F_C_MD 7750, ARCHST 7640, HMI 7750, H_D_FS 7750, P_HLTH 7750, and SOC_WK 7752). This course takes an interdisciplinary approach to understanding and improving the physical function and independence of older adults and explores approaches to alleviate disabling conditions that interfere with physical function and quality of life in old age. Graded A-F only.

Credit Hours: 3

NURSE 7751: Psychosocial Function and Older Adults

(same as ARCHST 7650, F_C_MD 7751, HMI 7751, H_D_FS 7751, P_HLTH 7751 and SOC_WK 7751). This course takes an Interdisciplinary approach to understanding the psychosocial function of older adults and explores approaches to alleviate disabling conditions that interfere with psychosocial function and quality of life in old age. Graded on A-F basis only.

Credit Hours: 3

NURSE 7854: Preparing Nurse Educators

Explores the role of the nurse educator. Emphasis will be on the development, evaluation, differences and implementation of the nurse educator in the functional roles.

Credit Hours: 3

Prerequisites: Admission to the Master Science in Nursing Program or instructor's consent

NURSE 8001: Topics in Advanced Clinical Nursing

Specialized topics in advanced clinical nursing not available through regularly offered courses.

Credit Hours: 3

NURSE 8010: Family Dynamics and Intervention

(same as H_D_FS 8012). Theories of family function and dysfunction; techniques of assessment; models of family intervention. Practicum with selected families.

Credit Hours: 3

Prerequisites: NURSE 7100 (Nursing students)

NURSE 8020: Advanced Statistical Methods in the Health Sciences

Primary topics include a review of hypothesis testing, estimation and confidence intervals, general linear models, multiple logistic regression, and multilevel modeling. There will be an emphasis on application to the health sciences.

Credit Hours: 3

Prerequisites: STAT 7020 or equivalent

NURSE 8030: Interpreting Statistical Evidence in the Health Sciences

Students learn to critically evaluate statistical designs and data analysis methods used in health sciences research and scientific evidence for health care decision making. May be repeated for credit.

Credit Hours: 3

Prerequisites: Graduate level statistics course

NURSE 8085: Problems in Nursing

Guided readings, special study and/or a practicum in an area of the student's interest or in an area which the student needs to strengthen. Selected sections of the course may be offered on A-F or S/U basis only.

Credit Hour: 1-4

Prerequisites: instructor's consent

NURSE 8090: Research in Nursing

Original investigation for presentation as thesis or dissertation. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: graduate statistics, instructor's consent

NURSE 8100: Principles of Epidemiology

Explores key concepts of epidemiology and epidemiologic methods for studying the distribution and determinants of health and disease in populations. Application to public health and population-based practice addressed.

Credit Hours: 3

Prerequisites: NURSE 7150 or faculty consent

NURSE 8110: Concepts for Specialization in Public Health Nursing

Key concepts fundamental to specialization in public health nursing, including core public health functions. Emphasis upon integrating public health science, nursing theory, and methodological/leadership skills.

Credit Hours: 3

Prerequisites or Corequisites: NURSE 7100

NURSE 8120: Community-Based Public Health Interventions

Assessing and Diagnosing health-related needs of at-risk and vulnerable populations. Evaluating outcome-based research. Clinical practice implementing a public health intervention. Prerequisites: NURSE 8100, NURSE 8110, graduate level Statistics course;

Credit Hour: 3-4.5

Prerequisites or Corequisites: NURSE 7150

NURSE 8210: Special Health Care Needs of Children

Perform developmental, neuro developmental, and psychosocial assessments of chronically ill children. Collaborate with families, schools; health care, community, family services to meet child's needs.

Credit Hour: 3.5-5

Prerequisites: NURSE 7100 or instructor's consent

NURSE 8300: Public Health and Sociocultural Issues

Explores concepts of public health with a focus on the advanced practice nurse in population-based/primary care practice; core public health functions will be addressed at three service levels--the aggregate, the family, and the individual.

Credit Hours: 3

Prerequisites: NURSE 7100

NURSE 8310: Health Disparities of Rural and Other Underserved Populations

In-depth examination of rural and other vulnerable populations and their interactions with the health care system including access, utilization, and outcomes. May be repeated for credit.

Credit Hours: 3

Prerequisites: NURSE 7087, NURSE 8300 or faculty consent

NURSE 8400: Adult and Geriatric Primary Care I

Advanced practice nursing clinical diagnosis and management of acute and chronic cardiovascular, respiratory, HEENT, renal, metabolic and musculoskeletal problems in adults, older adults and their families.

Credit Hour: 3.5-5

Prerequisites: NURSE 7120, NURSE 7130, NURSE 7140

NURSE 8410: Adult and Geriatric Primary Care II

Advanced practice nursing clinical diagnosis and management of acute and chronic gastrointestinal, endocrine, hematological, neuropsychological problems and bioterrorism and CAM issues in adults, older adults and their families.

Credit Hour: 3.5-5

Prerequisites: NURSE 8400

NURSE 8420: Newborn Through Adolescence Primary Care

Advanced nursing practice of newborn through adolescence of health maintenance/promotion, clinical diagnosis and management of common childhood illness, behavioral, developmental problems. Advanced knowledge of human growth, development, family dynamics, community resources, collaborative relationships. Integrated clinical practicum.

Credit Hour: 3.5-5

Prerequisites: NURSE 7140 or NURSE 7310

NURSE 8430: Reproductive and Sexual Health Primary Care

Reproductive, sexual issues, adolescence through aging. Design, delivery, evaluation of nursing management of women, reproductive health care of men. Stresses personal health promotion.

Credit Hour: 3.5-5

Prerequisites: NURSE 7140, NURSE 8410 or instructor's consent

NURSE 8500: Primary Health Care Management of Aging I

Health promotion, wellness, concepts of normal aging. Design, delivery, evaluation of primary health care management of aging adults from an advanced practice nursing perspective.

Credit Hours: 3

Prerequisites: NURSE 7130, NURSE 7140, NURSE 8400 or instructor's consent

NURSE 8510: Primary Health Care Management of Aging II

Continuing emphasis on health promotion, wellness, concepts of aging. Primary health care management of complex health care problems in aging adults from advanced practice nursing perspective.

Credit Hours: 3

Prerequisites: NURSE 8410, NURSE 8500, instructor's consent

NURSE 8540: Advanced Diagnostics and Reasoning

Expands upon knowledge of advanced assessment, diagnostic, and procedural skills; utilizes current technology in a cost-effective and patient-centered manner. Clinical increases specialty-specific knowledge. May be repeated for credit.

Credit Hour: 3.5-5

Prerequisites: 4th clinical specialty course

NURSE 8610: Diagnostics and Psychopharmacology for Mental Health Nurses

Emphasis is on the neurobiologic basis and diagnosis of mental health problems and advanced nursing management of psychiatric conditions using pharmaceutical agents.

Credit Hour: 3.5-4

Prerequisites: NURSE 7120, NURSE 7130 and NURSE 7140

NURSE 8620: Brief Individual Psychotherapy for Mental Health Nurses

Develops advanced skills in assessment, treatment, and follow-up evaluation of individuals experiencing acute mental health problems. Emphasizes brief psychotherapy based on frameworks from nursing and other disciplines.

Credit Hour: 3.5-4

Prerequisites: NURSE 8610

NURSE 8640: Group Therapy and Social Skills Training

Application of group and behavioral methods in mental health prevention, promotion, maintenance, and restoration. Designing, implementing, and evaluating mental health promotion groups and social skills training programs.

Credit Hour: 3.5-4

Prerequisites: NURSE 7100 or concurrent

NURSE 8660: Mental Health Nursing Interventions for Families

Application of nursing and family theories in advanced nursing management of families experiencing a variety of problems. Emphasis on designing, implementing, and evaluating advanced nursing interventions for families.

Credit Hour: 3.5-4

Prerequisites: NURSE 8620 or consent of instructor

NURSE 8680: Pediatric Mental Health Assessment and Treatment

Develops advanced skills in psychiatric assessment and follow-up evaluation of children and adolescents experiencing mental health problems. Explores diagnosis, treatment, and management of child and adolescent mental health disorders. Graded on A-F basis only.

Credit Hour: 3.5-4

Prerequisites: NURSE 8610 or faculty consent

NURSE 8710: Clinical Management of Acute and Critical Care Problems

Advanced practice nurse management of selected clinical problems across the lifespan commonly encountered in the acute and/or critical care settings. Patient safety, technology, and product selection addressed. Integrated clinical practicum with selected population and setting. May be repeated for credit.

Credit Hour: 3.5-5

Prerequisites: NURSE 7140

NURSE 8720: Symptom Management in Acute and Chronic Illness

Clinical management of symptoms of acute and chronic illness across the lifespan. Preparation for teaching patient self-management strategies. Integrated clinical practicum with selected population and setting.

Credit Hour: 3.5-5

Prerequisites: NURSE 7140 and NURSE 7150 or faculty consent

NURSE 8800: Leadership and Management in Healthcare Systems

Prepares nurse leaders who facilitate and integrate complex structures and processes in health care systems. Understanding of partnerships, accountability, continuum-defined health care systems, self-managed teams, and value-based organizations.

Credit Hours: 4

Prerequisites: NURSE 7100

NURSE 8810: Management of Patient Care Services

Prepares nurses to effectively manage personnel, clinical operations, and quality improvement initiatives. Emphasizes techniques that facilitate sound nursing management across the care continuum. Multiple dimensions of managing patient care operations are considered.

Credit Hours: 4

Prerequisites: NURSE 7100

NURSE 8820: Health Care Financial Management

Prepares nurses to use the techniques that facilitate financial analysis and decision-making for patient care programs across the healthcare continuum. Focuses on efficient, effective management of resources for delivery of quality healthcare services. Prerequisites: NURSE 7100

Credit Hours: 4

NURSE 8830: Informatics Applications and Innovations in Health Care Systems

This course explores informatics from the perspective of health related fields through technology assessment and evaluation, and research and development in technological innovations. The impact of technology on patient privacy will also be examined. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NURSE 7087 or instructor's consent

NURSE 8840: Nursing Leadership, Innovation, and Entrepreneurship

This course will provide an overview of leadership theories and strategies for managing individuals, groups, or systems within rapidly changing healthcare environments. Innovative and cutting edge phenomena in healthcare will be explored as well as entrepreneurship. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NURSE 7087 or instructors consent

NURSE 8850: Teaching Nursing

Principles and methods of teaching, evaluation, and curriculum construction in undergraduate nursing education.

Credit Hours: 3

Prerequisites: ESC_PS 4100 or equivalent

NURSE 8854: Teaching Strategies in Nursing

Examines principles, issues, techniques, and evaluation methods in teaching nursing. Focuses on the development of a variety of teaching strategies and evaluation methods for didactic and clinical settings.

Credit Hours: 3

Prerequisites: NURSE 7100 and NURSE 7110 or instructor's consent

NURSE 8860: Organizations & Human Resource Management in Nursing

This course will examine various organizational theories, organizational behavior, and the impact of change within organizations. Participants will apply and analyze workforce management principles in regard to employee rights, resources, and responsibilities. May be repeated for credit. Graded on an A-F basis only.

Credit Hours: 3

Prerequisites: NURSE 7087 or instructors consent

NURSE 8864: Curriculum Development in Nursing

Examines theoretical foundations, principles, and issues in curriculum design. Explores systematic evaluation of curriculum at all levels.

Credit Hours: 3

Prerequisites: NURSE 7100 and NURSE 7110 or instructor's consent

NURSE 8890: Clinical/Scholarly Project

Design, implement and evaluate nursing projects derived from theory, including written report with explanation or justification to support the empirical and/or theoretical basis for the project. Graded on a S/U basis only.

Credit Hour: 1-3

Prerequisites: NURSE 7100, NURSE 7150, graduate statistics

NURSE 8900: Research Practicum in Nursing

Selected independent research activities in conjunction with ongoing research programs of faculty. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: NURSE 7150, graduate statistics, instructor's consent

NURSE 8910: Translational Evidence-Based Nursing Practice

Provides essential skills for utilizing research to support practice change: assessing practice based problems, analyzing current evidence, proposing practice changes, and developing plans for implementing evidence-based practice concepts.

Credit Hours: 3

Prerequisites: NURSE 8100 or faculty consent

NURSE 8920: Quality, Safety, and Performance Outcomes

Uses information systems to identify and analyze patient safety and other clinical issues and recommend system-wide actions and measurement plans that result in safe, effective, efficient, equitable, patient-centered outcomes.

Credit Hours: 3

Prerequisites: NURSE 8910

NURSE 8930: Health Program Design and Management

Designing, implementing and evaluating effective health programs. Addresses leadership and organizational change issues.

Credit Hours: 3

Prerequisites: NURSE 8920 or instructor's consent

NURSE 8940: Nursing and Health Policy

Designed to explore and critically evaluate the role of nursing and nurse leaders/scholars in health policy development and the organization and financing of health care in response to the health and social needs of the public.

Credit Hours: 3

NURSE 8950: Teaching Nursing Practicum

Participation in application of principles and methods of teaching, learning, and evaluation to the education of nursing students. Graded on S/U basis only.

Credit Hours: 4

Prerequisites: NURSE 8854 and NURSE 8864

NURSE 8954: Distance-Mediated Teaching Nursing Practicum

Faculty-guided application of distance mediated teaching, learning, and evaluation methods with graduate &/or undergraduate nursing students. Course graded on S/U basis only.

Credit Hours: 4

Prerequisites: NURSE 8854 and NURSE 8864 or equivalents

NURSE 8960: Leadership in Nursing and Healthcare Systems Practicum

Participation in application of principles and methods of leadership, management, and evaluation to facilitate patient care operations in various settings. Graded on an S/U basis only.

Credit Hours: 5

Prerequisites: NURSE 8800, NURSE 8810, NURSE 8820

NURSE 8970: APN Role Transition Course

Focus on refinement of knowledge and skills required for successful transition into an Advanced Practice Nursing career. Corequisites: NURSE 8980

Credit Hour: 1

Prerequisites: NURSE 7100, NURSE 7150, NURSE 7110, and instructor's consent

NURSE 8980: Advanced Clinical Nursing Practicum

Intensive preceptor or faculty-guided clinical experience that synthesizes previous theory and clinical coursework. Refines knowledge and skills required to transition to an autonomous advanced nursing practice role. Graded on S/U basis only.

Credit Hour: 2-7

Prerequisites: NURSE 7110, NURSE 8910 or faculty consent

NURSE 9070: DNP Clinical Residency

Intensive clinical experience. Prepare experts in advanced nursing practice and leadership to effectively evaluate practice problems, translate evidence into practice, monitor outcomes, and implement innovative models of care. May be repeated for credit. Some sections may be graded on either an A-F or S/U basis only.

Credit Hour: 1-5

Prerequisites: NURSE 8930 and NURSE 8450 or NURSE 8610

NURSE 9080: DNP Residency Project

Final synthesis of DNP coursework culminating in an in-depth practice change project or case analysis impacting a rural or other underserved population or critical healthcare system need. May be repeated for credit. Some sections may be offered on an A-F or S/U graded basis only.

Credit Hour: 1-3

Prerequisites or Corequisites: NURSE 8930 and NURSE 9070

NURSE 9087: Leadership and Transformational Role Institute

Synthesis of advanced nursing practice knowledge and leadership skills. Prepares DNP graduate to implement an advanced nursing practice

role that will result in practice and/or policy change at the local, state, or national levels. May be repeated for credit.

Credit Hours: 2

Prerequisites or Corequisites: NURSE 9080 and NURSE 9070

NURSE 9090: Research in Nursing

Original investigation for presentation as thesis or dissertation. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: graduate statistics, instructor's consent

NURSE 9100: State of the Science

The existing body of research literature is the foundation upon which new scientific knowledge is built. This course will guide the student through the purpose and processes of scholarly writing. Students will conduct a systematic review of the scientific literature on a selected focus area in the health sciences. Students will work with course faculty, with input from the student's advisor, to develop and implement strategies to search, evaluate, and synthesize the literature in the selected area. Scholarly writing will be emphasized in this course. Graded on an A-F basis only.

Credit Hours: 3

Prerequisites: Admission to a doctoral program or permission of instructor

NURSE 9110: Conceptual Structure of Nursing

Conceptualization and theoretical analysis of nursing phenomena; critical evaluation of nursing theories.

Credit Hours: 3

Prerequisites: NURSE 7100

NURSE 9120: Philosophical and Theoretical Basis for Research

Based on an understanding of the philosophy of science, critically appraise and adapt conceptual models and theoretical frameworks for use in research.

Credit Hours: 3

Prerequisites: NURSE 7100 or faculty consent

NURSE 9130: Philosophy of Science in Nursing

Overview of foundational concepts of philosophy-history of science; development and evolution of science and philosophical perspectives of nature of science including logical, empiricism, historicism, post-structuralism as related to nursing science/nursing research.

Credit Hours: 3

NURSE 9131: Responsible Conduct of Research in the Health and Social Sciences

(same as H_D_FS 9131) This course examines professional research ethics including the rights of human subjects. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: Instructor's permission required

NURSE 9132: Writing Research Proposals: Skill Building

(same as H_D_FS 9130) This course teaches the components of writing a research proposal for external funding. Graded on S/U basis only.

Credit Hours: 3

Prerequisites: Instructor's permission required

NURSE 9400: Macro Social Theory

(Same as SOC_WK 9400) Building on the foundation laid in Social Work 9100, in depth examination of human development and social environment theories appropriate to scientific examination of social welfare practice with formal organizations, interorganizational combinations, communities and larger political entities. May be repeated for credit.

Credit Hours: 3

Prerequisites: Consent required

NURSE 9410: Advanced Quantitative Methods

(same as H_D_FS 9200). Study of explanatory and predictive quantitative designs in health-related research, including nested, double-blind, time series, casual models, retrospective cohort; secondary database use will be explored.

Credit Hours: 3

Prerequisites: NURSE 9131, Advanced Statistics Course

NURSE 9420: Qualitative Methods

(same as H_D_FS 9420) Examines the following selected qualitative research approaches appropriate for the study of nursing phenomena and the extension or modification of scientific knowledge so as to be relevant to nursing: case study research methods, verbal qualitative approaches, and nonverbal qualitative approaches. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NURSE 7150 and doctoral status (or permission of faculty)

NURSE 9430: Measurement Issues

Examines techniques used to estimate the various types reliability and validity of psychological and biological measures of nursing phenomena as well as the appropriate use of existing measures. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NURSE 7150, NURSE 9420

NURSE 9450: Doctoral Seminar: Social Determinants of Health

Doctoral seminar on defining, measuring and conducting research on social determinants of health. May be repeated for credit.

Credit Hours: 3

Prerequisites: NURSE 9120 and NURSE 9410

NURSE 9460: Health Behavior Change Research

(Same as ESC_PS 9460) Doctoral seminar focusing on theories, measurement, and methods for conducting health behavior change research.

Credit Hours: 3

Prerequisites or Corequisites: NURSE 9410, or faculty consent

Prerequisites: NURSE 9120

NURSE 9470: Technology Evaluation in Health Care Systems Research

(same as HMI 9440). Examines technology applications and evaluation methods used to determine outcomes, efficiencies, effectiveness, satisfaction, and cost of using technology. Prerequisites: 6 credit hours of graduate statistics;

Credit Hours: 3

Prerequisites or Corequisites: NURSE 9410 or faculty consent

NURSE 9510: Advances in Health Care Systems

Guided in-depth exploration, analysis, and evaluation of selected nursing and other current literature in health care systems.

Credit Hours: 3

Prerequisites: NURSE 9110, doctoral standing or instructor's consent

NURSE 9520: Advances in Health Restoration and Support

Guided in-depth exploration, analysis, and evaluation of selected nursing and other current literature in health restoration and support.

Credit Hours: 3

Prerequisites: NURSE 9110, doctoral standing or instructor's consent

NURSE 9530: Advances in Health Promotion and Protection

Guided in-depth exploration, analysis, and evaluation of selected nursing and other current literature in health promotion and protection.

Credit Hours: 3

Prerequisites: NURSE 9110, doctoral standing or instructor's consent

NURSE 9540: Seminar in Nursing

Course content varies. May be repeated to a maximum of six hours.

Credit Hour: 1-99

NURSE 9550: Meta-Analysis Research

(Same as H_D_FS 9550). Examines quantitative synthesis including research questions, search strategies, coding issues, meta-analysis statistical procedures, and interpretation of findings. Emphasizes conceptual understanding and practical methods.

Credit Hours: 3

Prerequisites: 6 credit hours of graduate statistics courses, NURSE 9410 or graduate level quantitative methods course

NURSE 9560: Qualitative Systematic Reviews

(Same as SOC_WK 9560 and H_D_FS 9560) Examine and carry out elements of qualitative systematic reviews: topic/problem identification, data collection, and analysis. Understand how to limit threats to validity and maximize generalizability.

Credit Hours: 3

Prerequisites: NURSE 9420 or equivalent

NURSE 9700: Social Welfare Policy Seminar

(Same as SOC_WK 9700) Critical examination of comparative models of social policy development.; preparation of a professional social work policy analysis in the student's area of interest/specialization that

is suitable for submission to an appropriate referred journal. May be repeated for credit.

Credit Hours: 3

Prerequisites: instructor's consent

NURSE 9710: Advanced Research Practicum

Mentored research experience designed by student, mentor, and program committee based on student's substantive areas of interest and program of research. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites or Corequisites: NURSE 9120; advisor consent

Nutrition Courses

NUTRIT 7020: Monogastric Nutrition

(same as AN_SCI 7312 and NEP 7020; cross-leveled with AN_SCI 4312 and NEP 4020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 3212 and BIOCHM 3630

NUTRIT 7085: Problems in Nutrition

Problems in Nutrition.

Credit Hour: 1-6

NUTRIT 7087: Masters Seminar in Nutrition

Masters Seminar in Nutrition.

Credit Hour: 1

NUTRIT 7150: Readings in Nutrition

Readings in current nutrition research. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: 15 hours work in field and instructor's consent

NUTRIT 7350: Nutrition During the Life Cycle

Nutritional, physiological and environmental influences on the aging process of man from conception through senescence.

Credit Hours: 3

NUTRIT 7390: Medical Dietetics

Medical dietetics.

Credit Hour: 3-12

NUTRIT 7650: Amino Acid and Protein Metabolism

Amino acid and protein metabolism.

Credit Hours: 2

NUTRIT 8060: Comparative Nutrition and Metabolism

Comparative Nutrition and Metabolism..

Credit Hours: 2

NUTRIT 8090: Masters Research in Nutrition

Investigation in any area of experimental nutrition. Thesis required. Graded on a S/U basis only.

Credit Hour: 1-99

NUTRIT 8310: Nutritional Biochemistry of Lipids

(same as NEP 8310 and AN_SCI 8431). Current concepts in the nutritional regulations of lipid metabolism. Emphasis on integrating information and interpreting current research data.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272

NUTRIT 8320: Ruminant Nutrition

(same as AN_SCI 9432). Physiology, chemistry, microbiology, pathology of ruminants. Emphasizes digestion, absorption, metabolism, utilization of nutrients. Lecture, laboratory, assigned readings.

Credit Hours: 3

NUTRIT 8340: Nutrition in Human Health

(same as NEP 8340.) Nutritional aspects of maintaining human health with emphasis on chronic disease prevention. Grades based on classroom participation and four exams.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272; 4000-level nutrition course

NUTRIT 8360: Nutritional Biochemistry of Carbohydrates

(same as BIOCHM 8360 and NEP 8360). Current concepts with in-depth coverage of selected examples of key regulatory steps controlling carbohydrate metabolism; emphasizing molecular mechanisms. Based entirely on research literature and taught in a tutorial format.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272 and 4000-level nutrition course and departmental consent

NUTRIT 8390: Molecular Biology of Mineral Nutrition

(same as BIOCHM 8390 and NEP 8390). Current concepts of metal ion transport, intracellular metal trafficking and metal-dependent regulation of gene expression. Based entirely on research literature and taught in a tutorial format.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272; 4000-level nutrition course

NUTRIT 8400: Bioenergetics

(same as AN_SCI 9441) . Bioenergetics.

Credit Hours: 3

NUTRIT 8438: Nutrient Regulation of Gene Expression

(same as AN_SCI 8438, BIOCHM 8438 and NEP 8438). Current concepts with in-depth coverage of several minerals that illustrate themes in molecular mineral nutrition. Based entirely on research literature and taught in a tutorial format.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272; 4000-level nutrition course

NUTRIT 8500: Investigations in Experimental Nutrition

Written report required.

Credit Hour: 1-6

NUTRIT 9087: Doctorate Seminar in Nutrition

Doctorate seminar in nutrition.

Credit Hour: 1

NUTRIT 9090: Doctorate Research in Nutrition

Investigation in any area of experimental nutrition. Thesis required. Graded on a S/U basis only.

Credit Hour: 1-99

Nutrition and Exercise Physiology Courses

NEP 1001: Topics in Nutritional Sciences

Supervised study in specialized topic of nutritional sciences.

Credit Hour: 1-99

NEP 1034: Introduction to Human Nutrition

Basic nutrition principles, including: nutrient functions, food sources, and needs; healthy eating tools; energy balance and weight management; nutrition and fitness; nutrition through the life cycle; food safety; and consumer topics. No credit if taken after NEP 2340.

Credit Hours: 3

NEP 1034H: Introduction to Human Nutrition - Honors

Basic nutrition principles, including: nutrient functions, food sources, and needs; healthy eating tools; energy balance and weight management; nutrition and fitness; nutrition through the life cycle; food safety; and consumer topics. No credit if taken after NEP 2340.

Credit Hours: 3

Prerequisites: Honors eligibility required

NEP 1310: Food and Cultures of the World

Trans-disciplinary approach to nutrition, considering anthropological, physiological, geographical, socioeconomic and psychological elements in world nutrition. These ideas will be explored in the context of cuisines and cultures that are found in the US, but originate elsewhere.

Credit Hours: 3

NEP 1340: Introduction to Exercise and Fitness

Provides students with practical information about exercise and physical fitness. After taking this class, students will be prepared to be physically active, understand the "Do's and Don'ts" of exercise, and know how to live a healthy way of life. As part of the course, students will assess their current level of activity/fitness, develop a plan for improvement, and put that plan into action.

Credit Hours: 3

NEP 1485: Career Exploration in Exercise Science

Undergraduate course designed to provide an overview of the components important to developing an understanding and appreciation of all aspects of Exercise Science. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: NEP 1340

NEP 1995: Nutritional Food Science

The study of components of food systems and how they are affected by processing, preservation, preparation and by techniques that improve taste, texture, flavor, appearance and nutrient retention. This course is 100% online and includes a virtual lab. Graded on A-F basis only.

Credit Hours: 3

NEP 2001: Topics in Nutritional Sciences

Supervised study in a specialized topic of Nutritional Sciences.

Credit Hour: 1-99

NEP 2085: Problems in Nutritional Sciences

Supervised study in a specialized phase of nutritional sciences.

Credit Hour: 1-99

Prerequisites: consent required

NEP 2222: Landscape of Obesity

The societal, economic, medical, behavioral, and psychological causes and results of the obesity epidemic and potential modes of treatment and prevention. Lecture course. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: sophomore standing required

NEP 2340: Human Nutrition I

Basic concepts of normal nutrition related to physiological/ chemical processes; changing nutrient needs during human life cycle, emphasis on adult; some social/psychological influences on dietary habits.

Credit Hours: 3

Prerequisites: CHEM 2030 or CHEM 2100 or CHEM 2160H or instructor's consent

NEP 2340H: Human Nutrition I - Honors

Basic concepts of normal nutrition related to physiological/chemical processes; changing nutrient needs during human life cycle, emphasis on adult; some social/psychological influences on dietary habits. Includes weekly discussion on controversial issues. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Organic Chemistry, Physiology, or instructor's consent. Honors eligibility required

NEP 2380: Diet Therapy for Health Professionals

Principles underlying normal nutrition and diet for health and disease. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: sophomore standing

NEP 2420: Biology of Healthy Living

(same as PH_THR 2420 and BIOMED 2420). Biology of inactivity as a causal factor in chronic disease.

Credit Hours: 2

NEP 2450: Nutrition Throughout the Life Span

Nutritional requirements, challenges, community nutrition programs, and eating patterns throughout the life span with emphasis on health promotion and disease prevention; Role of beliefs, culture, socio-psychological influences, and economic resources in food selection and nutrition/health status. Lecture/discussion course.

Credit Hours: 3

Prerequisites: NEP 1034 or NEP 2340 or NEP 2380 or equivalent

NEP 2460: Eating Disorders

Definition, etiology, treatment, and research related to eating disorders: anorexia nervosa, bulimia nervosa and binge eating disorder/obesity. Graded on A-F basis only.

Credit Hours: 2

Recommended: NEP 1034 or NEP 2340 or NEP 2380 or NEP 4360

NEP 3001: Topics in Nutritional Science

Instruction in specific subject matter areas in the field of food science and nutrition.

Credit Hour: 1-99

NEP 3085: Problems in Nutritional Sciences

Advanced problems in a selected field of food science and nutrition.

Credit Hour: 1-99

Prerequisites: consent required

NEP 3131: International Nutrition and Exercise Physiology

Immersion into and examination of selected cultures - beliefs, practices, policies and social structures around food, physical activity and health. Graded on A-F basis only.

Credit Hour: 1-6

Prerequisites: instructor's and advisor's consent

NEP 3280: Food Service I: Introduction to Food Service

Organizational structure and relationships; policy making and implementation; budgeting and cost control; menu as a management tool; sanitation and safety; food preparation; and food delivery systems.

Credit Hours: 3

Prerequisites: NEP 1995

NEP 3290: Food Service I: Supervised Practice Experience

A practicum designed to expose the student to concepts of quantity food production, evaluation of products and resources, personnel administration and application of food microbiological principles. 4 hours of supervised practice per week.

Credit Hour: 1

Prerequisites: concurrent enrollment in NEP 3280; open to students enrolled in the Coordinated Program in Dietetics only

NEP 3360: Nutritional Assessment Supervised Practice Experience

Supervised practice to develop skills in screening individuals for nutrition risk; use of dietary, anthropometric, laboratory, clinical and sociocultural criteria to assess nutritional status of individuals, 8 hours of supervised practice per week. Enrollment limited to students who have taken or are concurrently enrolled in NEP 4360; Open to Nutrition and Food majors in the Coordinated Program in Dietetics only.

Credit Hours: 2

Prerequisites: Departmental consent required

NEP 3370: Nutrition Therapy I: Supervised Practice Experience

Practice and application of principles of nutrition care for selected disease states. 12 hours of supervised practice per week.

Credit Hours: 3

Prerequisites: Concurrently enrolled in NEP 4370; Open to students enrolled in the Coordinated Program in Dietetics only

NEP 3390: Teaching and Counseling Techniques in Nutrition

Principles and theories of learning; Resources, methods and techniques for teaching food/nutrition principles and dietary guidelines; Group dynamics and facilitation; Introduction to counseling theories and methods used in nutrition care of individuals. Lecture course.

Credit Hours: 2

Prerequisites: PSYCH 1000 and NEP 2340

NEP 3400: Teaching & Counseling Techniques in Nutr. Supervised Practice Exp

Skill development and practice in counseling individuals for health promotion and disease prevention and the teaching of food and nutrition topics to groups. 4 hours of supervised practice per week.

Credit Hour: 1

Prerequisites: concurrent enrollment in NEP 3390; Open to students enrolled in the Coordinated program in Dietetics only

NEP 3450: Activity Throughout the Lifespan

Course is designed to develop knowledge and understanding of the value of physical activity across the lifespan. The physiology, psychology, and guidelines of exercise, along with the integration of nutrition with physical activity, will be explored from pregnancy through early development and into old age. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 1340

NEP 3590: Community Nutrition Supervised Practice Experience

A practicum which explores and applies the concepts and techniques of nutrition programming in a community setting. 4 hours of supervised practice per week. Enrollment limited to students who have taken NEP 4590. Open to students enrolled in the Coordinated Program in Dietetics only.

Credit Hour: 1

Prerequisites: Departmental consent required

NEP 3800: Prevention and Care of Athletic Injury

Theory, practice in prevention, emergency care, rehabilitation of injuries encountered in vigorous games.

Credit Hours: 3

Prerequisites: PTH_AS 2201. Restricted from Pre-Nutrition and Fitness majors

NEP 3810: Advanced Athletic Training

Advanced study in areas of prevention, evaluation, care, and treatment and rehabilitation of athletic injuries at high school and college level. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 3800 and instructor's consent

NEP 3900: Field Training in Nutritional Sciences

Credit Hour: 1-99

Prerequisites: junior or senior standing and instructor's consent

NEP 4001: Topics in Nutrition and Exercise Physiology

Instruction in specific subject matter areas in the field of nutrition science and exercise physiology.

Credit Hour: 1-3

NEP 4020: Monogastric Nutrition

(same as AN_SCI 4312; cross-leveled with AN_SCI 7312, NEP 7020 and NUTRIT 7020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 3212 and BIOCHM 3630

NEP 4200: Sports Performance and Conditioning

(cross-leveled with NEP 7200). Course utilizes scientific theory and applied instruction to teach procedures, techniques, and modalities used to improve physical sports performance. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Physiology and Anatomy, Kinesiology; junior or senior standing required

NEP 4280: Food Service II: Advanced Food Service Management

Issues related to marketing and financial control in the foodservice sector. Lecture course.

Credit Hour: 1

Prerequisites: NEP 3280, NEP 3290

NEP 4290: Food Serv. II: Adv. Food Service Manage. Supervised Practice Exp

A practicum tailored to apply marketing and budgetary principles in the foodservice industry. 8 hours of supervised practice per week. Enrollment limited to students with concurrent enrollment in NEP 4280. Open to students admitted to the Dietetics program.

Credit Hours: 2

Prerequisites: Departmental consent required

NEP 4330: Human Nutrition II Laboratory

(cross-leveled with NEP 7330). A techniques course in nutrition, usually taken concurrently with NEP 4340.

Credit Hours: 2

Prerequisites: NEP 2340, Biochemistry and instructor's consent

NEP 4340: Human Nutrition II Lecture

(cross-leveled with NEP 7340). Physiological and biochemical aspects of nutrition; functions of methods of measuring nutritional status; various aspects of applied nutrition. Continuation of NEP 2340.

Credit Hours: 3

Prerequisites: NEP 2340 and either BIOCHM 3630, BIOCHM 4270 or BIOCHM 4272. Restricted from pre-Nutrition and Fitness majors

NEP 4360: Nutritional Assessment

(cross-leveled with NEP 7360). Introduction to the nutrition assessment process. The identification of dietary, anthropometric, laboratory, clinical and sociocultural parameters used to assess nutritional status of individuals. Lecture course.

Credit Hours: 3

Prerequisites: PSYCH 1000, NEP 2340. Restricted from Pre-Nutrition and Fitness Majors

NEP 4370: Nutrition Therapy I

(cross-leveled with NEP 7370). In-depth study of physiological/biochemical changes in selected disease states (cardiovascular disease, rehabilitation, diabetes and cancer); development of principles underlying nutrition therapy. Lecture course.

Credit Hours: 3

Prerequisites: NEP 4360

NEP 4380: Nutrition Therapy II

(cross-leveled with NEP 7380). Evaluation, design and monitoring of the nutrition care of complex health disorders such as renal disease, trauma, and multi-system organ failure; emphasis on nutrition support (enteral and parenteral nutrition). Lecture course.

Credit Hours: 2

Prerequisites: NEP 4370

NEP 4381: Nutrition Therapy II: Supervised Practice Experience

Practice in the nutrition care of complex health disorders with emphasis on nutrition support. 16 hours of supervised practice per week. Enrollment limited to students with concurrent enrollment in NEP 4380. Open to students admitted to Dietetics program only.

Credit Hours: 4

Prerequisites: Departmental consent required

NEP 4385: Professional Development I

(cross-leveled with NEP 7385). Course designed to provide career exploration and assessment and prepare students for the final rotations in the coordinated program in dietetics. Graded on A-F basis only. Enrollment limited to students enrolled in the coordinated program in Dietetics.

Credit Hour: 1

Prerequisites: Departmental consent required

NEP 4390: Issues in Dietetic Practice

Lectures and discussions focus on issues and trends in dietetics. Discussions are used to encourage the development of skills and

attitudes which foster life-long professional learning. Lecture/discussion course.

Credit Hour: 1

Prerequisites: NEP 4950 and NEP 4380; or instructor's consent

NEP 4590: Community Nutrition

(cross-leveled with NEP 7590). Public health nutrition and chronic disease prevention, food security, nutrition programs and food access, public policy, sustainable agriculture and food production systems, cultural food practices, needs assessment. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 2340 or NEP 2380. Restricted from Pre-Nutrition and Fitness majors

NEP 4850: Physiology of Exercise

Effects of exercise on the human organism; physiologic capacity and limitation for activity; role of exercise in health and fitness.

Credit Hours: 3

Prerequisites: MPP 3202

Recommended: PTH_AS 2201

NEP 4860: Exercise Prescription

Course investigates theory and methods of testing and prescribing exercise for circulatory fitness, body composition, muscle strength, joint and muscle ranges in motion, and posture. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MPP 3202 or MPP 3333 and MPP 3337, PTH_AS 2201 and NEP 4850 or concurrent. Restricted from Pre-Nutrition and Fitness majors

NEP 4940: Internship in Nutritional Science and Exercise Physiology

Combines study, observation and employment in an area of exercise physiology and/or nutrition. Written reports, faculty evaluation .

Credit Hour: 1-6

Prerequisites: instructor's consent required

NEP 4950: Capstone: Research in Nutritional Sciences

Introduction to research, including the types of basic, clinical, and outcomes-based research. Defining research problems related to nutrition and exercise sciences, developing hypotheses, reviewing scientific literature, writing research protocols, analyzing data. Lecture course.

Credit Hours: 2

Prerequisites: NEP 2340 and either STAT 2500 or ESC_PS 4170 and senior standing. Restricted from Pre-Nutrition and Fitness majors

NEP 4951: Nutrition Research Communication

Analyze and interpret data; present results of a research study in manuscript and seminar presentation formats. Emphasis on effective communication of nutrition research to scientific and lay audiences. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: NEP 4950 or instructor's consent

NEP 4960: Readings in Nutritional Sciences

Credit Hour: 1-99

Prerequisites: 8 hours of course work in field of subject and instructor's consent

NEP 4970: Nutrition Capstone: Sports Nutrition

Integration of research literature with knowledge from previous coursework, emphasis on sports nutrition research, nutrient requirements of athletes, critical evaluation of ergogenic aids. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: NEP 2340, and either MPP 3202 or BIO_SC 3700, and either STAT 1200, STAT 1300, STAT 1400 or ESC_PS 4170; Senior Standing, open to Nutrition and Fitness majors only

NEP 4975: Practice of Dietetics Supervised Practice Experience

Supervised practice in providing quality nutrition services in clinical, community, management and specialty settings. 40 hours of supervised practice per week.

Credit Hours: 10

Prerequisites: NEP 3590, NEP 4280, NEP 4290, NEP 4380, NEP 4381, and NEP 4590; Open to students admitted to the Dietetics Program only

NEP 7001: Topics in Nutritional Science and Exercise Physiology

Instruction in specific subject matter areas in the field of food science and nutrition.

Credit Hour: 1-99

NEP 7020: Monogastric Nutrition

(same as AN_SCI 7312 and NUTRIT 7020; cross-leveled with NEP 4020 and AN_SCI 4312). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 3212 and BIOCHM 3630

NEP 7085: Problems in Nutritional Sciences and Exercise Physiology

Advanced problems in a selected field of food science and nutrition.

Credit Hour: 1-99

NEP 7150: Readings in Nutritional Sciences and Exercise Physiology

In this course students will have the opportunity to read the literature in the area of nutrition and exercise physiology, allowing them to get more indepth knowledge in a specific area or areas.

Credit Hour: 1-99

Prerequisites: 15 hours course work in field of subject and instructor's consent

NEP 7200: Sports Performance and Conditioning

(cross-leveled with NEP 4200). Course utilizes scientific theory and applied instruction to teach procedures, techniques, and modalities used to improve physical sports performance. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Physiology and Anatomy, Kinesiology; junior/senior standing

NEP 7330: Human Nutrition II Laboratory

(cross-leveled with NEP 4330). A techniques course in nutrition, usually taken concurrently with NEP 4340.

Credit Hours: 2

Prerequisites: NEP 2340, Biochemistry and instructor's consent

NEP 7340: Human Nutrition II Lecture

(cross-leveled with NEP 4340). Physiological and biochemical aspects of nutrition; functions of methods of measuring nutritional status; various aspects of applied nutrition. Continuation of NEP 2340.

Credit Hours: 3

Prerequisites: NEP 2340, Biochemistry or instructor's consent

NEP 7360: Nutritional Assessment

(cross-leveled with NEP 4360). Introduction to the nutrition assessment process. The identification of dietary, anthropometric, laboratory, clinical and sociocultural parameters used to assess nutritional status of individuals. Lecture course.

Credit Hours: 3

Prerequisites: PSYCH 1000, NEP 2340

NEP 7370: Nutritional Therapy I

(cross-leveled with NEP 4370). In-depth study of physiological/biochemical changes in selected disease states (cardiovascular disease, rehabilitation, diabetes and cancer); development of principles underlying nutrition therapy. Lecture course.

Credit Hours: 3

Prerequisites: NEP 4360

NEP 7380: Nutrition Therapy II

(cross-leveled with NEP 4380). Evaluation, design and monitoring of the nutrition care of complex health disorders such as renal disease, trauma, and multi-system organ failure; emphasis on nutrition support (enteral and parenteral nutrition). Lecture course.

Credit Hours: 2

Prerequisites: NEP 4370

NEP 7385: Professional Development I

(cross-leveled with NEP 4385). Course designed to provide career exploration and assessment and prepare students for the final rotations in the coordinated program in dietetics.

Credit Hour: 1

Corequisites: Concurrent enrollment in NEP 7380, NEP 7381

NEP 7440: The Science and Art of Nutrition

The science of nutrition including nutrients and other active food compounds; their action, interaction, and balance in relation to human health and disease; and the processes by which they are digested, absorbed, and utilized. Emphasis on nutrient/dietary recommendations, including changing nutrient needs throughout human life span. Covers food/nutrition-related regulations and policies. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CHEM 2030 or equivalent and MPP 3202

NEP 7480: Evaluation of Food and Nutrition Research Evidence for the Consumer

Scientific evidence interpretation/critique techniques and approaches, including research literature searches, research designs and methodology, assessment of statistical validity. Evaluation of food/nutrition and health information sources and publication hierarchy. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 7440

NEP 7500: Research in Nutritional Sciences and Exercise Physiology

Original investigations, usually in connection with one of the research projects of Agricultural Experiment Station. Written report required.

Credit Hour: 1-99

NEP 7590: Community Nutrition

(cross-leveled with NEP 4590). Public health nutrition and chronic disease prevention, food security, nutrition programs and food access, public policy, sustainable agriculture and food production systems, cultural food practices, needs assessment. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Nutrition course or instructor's consent

NEP 7840: Cardiovascular Health and Fitness

Physiology underlying best methods for obtaining and maintaining cardiovascular health and fitness. Includes exercise and weight control, plasma lipids, energy metabolism, cardiovascular dynamics, and recent research findings.

Credit Hours: 3

NEP 7950: Research in Dietetics

(cross-leveled with NEP 4950). Introduction to research, including the relationship of basic, clinical, and outcomes-based research to dietetics practice. Defining research problems in a dietetics practice setting, developing hypotheses, reviewing scientific literature, writing research protocols, analyzing data. Lecture course.

Credit Hours: 2

Prerequisites: statistics course

NEP 7970: Sports Nutrition

(cross-leveled with NEP 4970). Integration of research literature with knowledge from previous coursework, emphasis on sports nutrition research, nutrient requirements of athletes, critical evaluation of ergogenic aids. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Statistics, NEP 2340, Physiology; instructor's consent. Not open to Pre-Nutrition and Fitness students

NEP 8001: Topics in Nutritional Sciences and Exercise Physiology

Instruction in specific subject matter areas in the field of nutrition science and exercise physiology. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3

NEP 8030: Etiology of Obesity

This course is designed to provide an understanding of the cause and implications of human obesity. General topic areas covered will include: methodologies of obesity research, physiology of obesity, behavioral and environmental factors influencing obesity, obesity and disease, therapeutic approaches to obesity, and emerging topics in obesity. The structure of this course will be mixture of lectures and interactive discussions/reviews of primary research articles in these areas. Students will be expected to present and critically evaluate research papers relevant to the field of obesity.

Credit Hours: 3

Prerequisites: NEP 7340

NEP 8085: Problems in Nutritional Sciences and Exercise Physiology

Individual studies include a minor research problems.

Credit Hour: 1-99

NEP 8087: Masters Seminar in Nutritional Sciences and Exercise Physiology

Seminar features expert presentations of current research and issue-based applications that represent the breadth of nutritional sciences and/or exercise physiology. Graded on S/U basis only.

Credit Hour: 1

NEP 8090: Masters Research in Nutritional Sciences and Exercise Physiology

Original investigation of advanced nature, leading to thesis. Graded on a S/U basis only.

Credit Hour: 1-99

NEP 8095: Internship in Exercise Physiology

The internship experience will take place in professionally supervised settings, and allow students to complement their academic work with employment-related experiences. Organizations, companies and business that offer internships can be selected to match with student interests. This experience will offer the student meaningful learning opportunities that will complement their career goals.

Credit Hours: 4

Prerequisites: must be accepted into the Exercise Physiology graduate program, 3.0 GPA or higher, completed 50% of the coursework at the masters level

NEP 8310: Nutritional Biochemistry of Lipids

(same as AN_SCI 8431 and NUTRIT 8310). Current concepts in the nutritional regulation of lipid metabolism. Emphasis on integrating information and interpreting current research data.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272

NEP 8340: Nutrition in Human Health

(same as NUTRIT 8340). Nutritional aspects of maintaining human health with emphasis on micronutrients, basis for dietary recommendations, and nutrition public health initiatives. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272; 4000-level nutrition course; graduate standing or current enrollment in the Masters in Dietetics Program

NEP 8360: Nutritional Biochemistry I

(same as NUTRIT 8360 and BIOCHM 8360). Provides a critical understanding of current developments in lipid metabolism in animals and humans, particularly as it relates to nutrition and health.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272; at least one 4000 level nutrition course

NEP 8390: Molecular Biology of Mineral Nutrition

(same as NUTRIT 8390 and BIOCHM 8390). Current concepts of metal ion transport, intracellular metal trafficking and metal-dependent regulation of gene expression. Based entirely on research literature and taught in a tutorial format.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272; 4000-level nutrition course

NEP 8438: Nutrient Regulation of Gene Expression

(same as AN_SCI 8438, BIOCHM 8438 and NUTRIT 8438). Current concepts with in-depth coverage of several minerals that illustrate themes in molecular mineral nutrition. Based entirely on research literature and taught in a tutorial format.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272; 4000-level nutrition course

NEP 8850: Advanced Exercise Physiology

Lectures, laboratory experiences, and readings in current literature to provide reasonable depth in selected areas of physiology as applied to activity and health.

Credit Hours: 3

Prerequisites: NEP 4850 and Chemistry

NEP 8860: Exercise Endocrinology

The nervous system and the endocrine system integrate to regulate the functions of the body. These systems are tightly linked and frequently one system cannot be considered without consideration of the other system. This course integrates endocrine physiology and the impact that exercise has on the endocrine response. This class will focus on the glands producing hormones, the target organs, mechanisms and how both acute and chronic exercise impacts hormone action. This is an advanced exercise physiology course designed for graduate students in Exercise Physiology or the life sciences and will consist of lectures, readings and discussion. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 8850, V_BSCI 8420 or graduate standing in the Life Sciences

NEP 8870: Exercise Metabolism

Review of major metabolic pathways and the effect of exercise upon them. Special topics include indirect calorimetry, EPOC, anaerobic threshold; weight control, ergogenic aids, and exercise nutrition.

Credit Hours: 3

Prerequisites: NEP 4850 and Chemistry

NEP 9087: Doctorate Seminar in Nutritional Sciences and Exercise Physiology

Seminar features expert presentations of current research and issue-based topics that represent the breadth of nutritional sciences and exercise physiology. Graded on S/U basis only.

Credit Hour: 1

NEP 9090: Doctorate Research in Nutritional Sciences and Exercise Physiology

Original investigation of advanced nature, leading to a dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Obstetrics And Gynecology Courses

OB_GYN 6004: Obstetrics/Gynecology Clerkship

Students rotate on the obstetric service, the gynecology service and the gynecologic oncology service, seeing a broad range of patients in both inpatient and outpatient settings. In addition, they attend lectures and interactive case presentations.

Credit Hours: 8

OB_GYN 6014: Rural Obstetrics/Gynecology Clerkship

Rural Obstetrics/Gynecology Clerkship

Credit Hours: 8

OB_GYN 6024: Springfield Obstetrics and Gynecology Clerkship

Students rotate on the obstetric service, the gynecology service and the gynecologic oncology service, seeing a broad range of patients in both inpatient and outpatient settings. In addition, they attend lectures and interactive case presentations.

Credit Hours: 8

Prerequisites: successful completion of the first two years of medical school

OB_GYN 6104: Remediation OB/GYN Clerkship

Enrolled students are those who received an unsatisfactory grade in a OB/GYN Clerkship at any Mizzou Med location or site. This course gives the student an opportunity to rectify their deficiency.

Credit Hours: 8

Prerequisites: OB_GYN 6004 Clerkship, received unsatisfactory grade

OB_GYN 6311: ABS OB/Gynecology Mechanism of Disease

ABS OB/Gynecology Mechanism of Disease

Credit Hour: 5-10

OB_GYN 6313: ABS OB/Gynecology Research

ABS OB/Gynecology Research

Credit Hours: 5

OB_GYN 6315: ABS OB/Gynecology Research and Review

ABS OB/Gynecology Research and Review

Credit Hour: 5-10

OB_GYN 6563: OB/GYN Clinical Reproductive Endocrinology

OB_GYN 6765: OB/GYN - Rural

OB/GYN - Rural

Credit Hours: 5**OB_GYN 6766: Gynecology Rural Elective**

Students will build upon their gynecologic examinations skills and their knowledge of both the common and more unusual gynecologic conditions that they obtain during other clerkships.

Credit Hours: 5**Prerequisites:** OB_GYN 6004, SURGRY 6006**OB_GYN 6865: Maternal-Fetal Medicine Selective**

Goals/Objectives: To expose the student to high-risk obstetrical experiences in the Maternal Fetal Medicine division. All obstetrical selectives are done at Women's and Children's Hospital.

Credit Hours: 5**Prerequisites:** Ob-Gyn Clerkship**OB_GYN 6866: Obstetrical**

Goals/Objectives: To provide the student with additional obstetrical experience in the Labor and delivery suite. All obstetrical electives are done at the Missouri Ob/Gyn Associates Clinic and Women's and Children's Hospital. Evaluations: The student will be graded on their ward performance. An evaluation for this rotation will be completed by the appropriate faculty and resident physicians. Notes: While on this rotation students will have exposure to various faculty members, residents, and fellow medical students. Students will participate in the evaluation of patients on labor and delivery including those presenting for evaluation of first trimester problems and labor evaluations. Some participation in operative procedures and labor management is expected. Students will have exposure to antenatal testing and ultrasonography including the interpretation of ultrasounds and limited participation in genetic counseling and invasive ante-partum diagnostic procedures is expected. Night call will be required and can be worked into the core rotation's student call schedule. Teaching will be on an ongoing bases with Dr. Floyd keeping daily routine with the students expected to participate in management decisions.

Credit Hours: 5**Prerequisites:** Ob-Gyn Clerkship. Core reading for this rotation will include Obstetrics, Normal and Problem Pregnancies, latest edition, edited by Gabbe, Niebyl and Simpson**OB_GYN 6867: Obstetrical/Gynecological Outpatient**

Obstetrical/Gynecological Outpatient

Credit Hours: 5**OB_GYN 6868: Urogynecology Selective**

The 4th year medical student will work as part of a team providing hands-on clinical services in an inpatient, outpatient, and consultative setting. Students will participate in daily morning report, weekly didactic sessions, weekly surgical procedures and Friday afternoon seminars. Students will learn using a variety of evidence-based resources and direct faculty interaction. Successful completion of one of the core Obstetrics and Gynecology Clerkship courses: OB_GYN 6004 or OB_GYN 6014, and/or OB_GYN 6104.

Credit Hours: 5**Prerequisites:** Successful completion of the first two years of medical school**OB_GYN 6930: Obstetrics/Gynecology Outpatient Two-Week Elective**

The 3rd or 4th year medical student will work as part of a team providing hands-on clinical services in an outpatient setting. Students will participate in daily clinic evaluations of patients. Students will learn using a variety of evidence-based resources and direct faculty teaching. Students will also participate in weekly teaching didactics within the OB/GYN department such as Grand Rounds.

Credit Hours: 2**Prerequisites:** Successful completion of the first two years of medical school**OB_GYN 6960: Gynecologic/Oncology Surgery**

Goals/Objectives: To provide the student with additional surgical and gynecological clinical experience. All gynecologic surgical electives are performed at Ellis Fischel Cancer Center and the University Hospital. Evaluations: An evaluation for this rotation will be completed by the elective chairmen and appropriate resident physicians. The students will be graded on their clinic, ward, and operating room performance. Notes: While on this rotation, students will have exposure to faculty members, three residents, and other fellow medical students. They will have the opportunity to assist in gynecologic oncology surgical cases, attend tumor clinics where they will encounter various procedures such as colposcopies, cryotherapy, and cervical and endometrial biopsies. A copy of a representative weekly schedule is available from the department student coordinator. In addition, students will be required to make two ten minute presentations with audio-visual aids on assigned topics. The students will not take night call, but are expected to attend patient rounds on weekdays and weekends with the residents. The department also holds conferences on Tuesdays and Thursdays which are to be attended. Core reading for this rotation will include Clinical Gynecologic Oncology by DiSaia and Creasman."

Credit Hours: 5**Prerequisites:** Ob-Gyn Clerkship**OB_GYN 6964: Obstetrics/Gynecology Offsite Advanced Selective**

Obstetrics/Gynecology Offsite Advanced Selective

Credit Hours: 5**Occupational Therapy Courses****OC_THR 1000: Introduction to Occupational Therapy**

Introductory course to provide students information about the occupational therapy profession. Registered therapists lecture on clinical aspects. Students participate in discussions on program requirements, placement, and trends in the profession.

Credit Hour: 1**OC_THR 2001: Topics in Occupational Therapy**

Organized study of selective topics in occupational therapy. Particular topics and credit hours may vary from semester to semester. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: freshman or sophomore standing; instructor's consent

OC_THR 2085: Problems in Occupational Therapy

Independent investigation leading to the completion of a project or paper.

Credit Hour: 1-99

Prerequisites: freshman or sophomore standing; instructor's consent

OC_THR 4001: Topics in Occupational Therapy

Organized study of selective topics in occupational therapy. Particular topics and credit hours may vary from semester to semester. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: junior standing; instructor's consent

OC_THR 4060: Professional Issues

Introduction to the structures of the profession including professional association, philosophical and ethical perspectives and preparation for client contact. Includes experiential instruction in infection control.

Credit Hour: 1

Prerequisites: acceptance into the occupational therapy program.

Graded on A-F basis only

OC_THR 4085: Problems in Occupational Therapy

Independent investigation leading to the completion of a project or paper. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: Instructor's consent

Recommended: Junior standing

OC_THR 4220: Clinical Kinesiology

(same as PH_THR 4250). This course for occupational therapy students examines the musculoskeletal system with special emphasis in body movements and the application of laws and biomechanical principles that govern movement in order to select and perform effective occupation-based treatment. Graded on A-F basis only.

Credit Hours: 3

Recommended: Acceptance into the occupational therapy program

OC_THR 4240: Applied Neurophysiology for Allied Health Students

(same as C_S_D 4430 and PH_THR 4240). Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system. Graded on A-F basis only.

Credit Hours: 3

OC_THR 4270: Clinical Pathophysiology

(same as PH_THR 4270). Interdisciplinary and case-based examination of the pathophysiology, prevention and general health management of disease/injury across the lifespan encountered in occupational and physical therapy practice. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: successful completion of prior professional coursework

OC_THR 4310: Foundations of Occupational Therapy

History, contemporary practice, conceptual foundations, professional organizations and official documents of the OT profession are presented. Activity analysis, adaptation, and assistive technology are introduced in the context of promoting health and occupational participation. Graded on A-F only basis.

Credit Hours: 4

Prerequisites: PTH_AS 4222 with a grade of "C" or better

Recommended: Admission to the Occupational Therapy professional program required

OC_THR 4350: Rehabilitation Practice

Analysis of major disability areas from an occupational perspective. Administration and interpretation of assessments and application of treatment theories and approaches for deficits in movement, sensation, cognition and perception. Graded on A-F basis only.

Credit Hours: 4

Recommended: Must be admitted to the Occupational Therapy Professional Program

OC_THR 4390: Lifespan Assessment

(cross-leveled with OC_THR 7390). Basic evaluation skills in occupational therapy practice across the lifespan are introduced. This course provides an introduction of the essentials of occupational therapy evaluation: interviewing, screening, assessment, and report writing in general contexts across the lifespan. Enrollees will also receive an introduction to basic clinical reasoning skills required for instrument selection, interpretation of findings, and application to treatment planning. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: Restricted to Occupational Therapy students only

OC_THR 4420: Lifespan Occupations I

Overview of typical development from infancy through adolescence from an occupational perspective. Emphasis on the impact of personal and contextual factors on occupational development in children and adolescents. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Admission to Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (C or better for Undergraduates)

OC_THR 4422: Fieldwork I - Children

Development of clinical observation skills via on-site observation of children with typical and atypical development. Opportunities to gather and organize data, plan and implement activities, and develop therapeutic relationships with children and their care providers. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: Admission to Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (C or better for undergraduates)

OC_THR 4450: Pediatric Practice

Lecture and laboratory course designed which addresses Occupational Therapypediatric frames of reference and theories. Common conditions

seen in Occupational Therapy practice as well as interventions such as feeding, positioning, facilitation of movement and sensory strategies are also addressed. Graded on A-F basis only.

Credit Hours: 4

Recommended: Admission to the Occupational Therapy professional program

OC_THR 4520: Fundamentals of Occupational Therapy

This course will provide an overview of disability across the lifespan, including personal and professional interactions. Professional values, ethics and advocacy are also emphasized. Graded on A-F basis only.

Credit Hours: 4

Recommended: Restricted to students currently enrolled in the Occupational Therapy Program

OC_THR 4620: Lifespan Occupations II

Overview of biopsychosocial development and the aging process from young adulthood through older adulthood from an occupational perspective. Emphasis on the impact of client and contextual factors on occupational development and loss of occupations throughout the adult lifespan. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Admission to the Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (C or better for undergraduate; B or better for graduate)

OC_THR 4622: Fieldwork I Older Adults

Development of evaluation and intervention skills via on-site interaction with older adults in a residential facility. Opportunities to gather data, plan/implement activities, document client performance, and develop therapeutic relationships with older adults and care providers. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: Admission to the Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (C or better for undergraduate; B or better for graduate)

OC_THR 4650: Lifespan Interventions

This course provides a foundational overview of common treatment theories and frames of reference that guide intervention planning across the lifespan. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: OC_THR 4310 and OC_THR 4520. Restricted to students who are currently enrolled in the Occupational Therapy Program

OC_THR 4670: Hand and Upper Extremity Intervention

To gain entry level skills needed to evaluate and treat common upper extremity conditions, including acute injuries and cumulative trauma disorders. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: PTH_AS 4222 or PTH_AS 7222, OC_THR 4220 or OC_THR 7220, OC_THR 4390 or OC_THR 7390

OC_THR 4750: Cognition Across the Lifespan

This course introduces students to theoretical models, assessment, and treatment in cognitive rehabilitation. Graded on A-F basis only.

Credit Hours: 2

Recommended: Restricted to Occupational Therapy Majors

OC_THR 4770: Community-Based Practice

Focus on role of occupational therapy in prevention, health and wellness. Program development and evaluation completed through community needs assessment and completion of health promotion project. Graded on A-F only basis.

Credit Hours: 3

Prerequisites: acceptance into major and completion of program year 1

OC_THR 4920: Clinical Documentation

Development of observation and assessment skills related to effective documentation of occupational therapy services. Emphasizes exposure to various clinical settings, and third party payers, and legislative policies impacting documentation. Graded on A-F basis only.

Credit Hours: 2

Recommended: Restricted to students admitted to the professional program

OC_THR 4943: Fieldwork: Clinical

Clinical experience in occupational therapy settings. Emphasis on classroom to clinical transition. Exposure to the occupational therapy process; assessment, planning, implementation. Emphasis on professional communication and observational skills. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: completion of 1st semester in major in professional curriculum; junior standing

OC_THR 4960: Readings in Occupational Therapy

Directed readings of the literature and research in occupational therapy. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: junior standing, instructor's consent

OC_THR 4970: Research Methods

This course will use writing to explore basic concepts in research design and analysis. Graded on A-F basis only.

Credit Hours: 3

Recommended: Restricted to Occupational Therapy Majors

OC_THR 7000: Research Project

Supervised experience in scientific investigation. In this course students will develop hypotheses, establish protocols/procedures, collect/analyze data, and interpret results.

Credit Hours: 2

OC_THR 7001: Topics in Occupational Therapy

Organized study of selected topics in occupational therapy. Particular topics and credit hours may vary from semester to semester. Repeatable upon consent of department. Course may be offered on S/U or A-F basis.

Credit Hour: 1-99

OC_THR 7005: Research Project-Mentor Hours

Hours spent working with research mentor on research proposal. Emphasis on understanding project, designing project and collecting data for project. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1

Corequisites: OC_THR 7000

OC_THR 7060: Professional Issues

Introduction to the structures of the profession including professional associations, philosophical and ethical perspectives, the meaning of occupation and preparation for client contact. Includes experiential instruction in surface anatomy and infection control. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: Acceptance into the occupational therapy program

OC_THR 7085: Problems in Occupational Therapy

Independent investigation leading to the completion of a project or paper. Repeatable upon consent of department. May be offered on S/U or A-F basis.

Credit Hour: 1-99

OC_THR 7220: Clinical Kinesiology

(same as PH_THR 7250). This course for occupational therapy students examines the musculoskeletal system with special emphasis in body movement and the application of laws and biomechanical principles that govern movement in order to select and perform effective occupation-based treatment. Acceptance into the occupational therapy program. Graded on A-F basis only.

Credit Hours: 3

OC_THR 7240: Applied Neurophysiology for the Allied Health Student

(same as PH_THR 7240). Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system. Graded on A-F basis only

Credit Hours: 3

OC_THR 7270: Clinical Pathophysiology

(same as PH_THR 7270). Interdisciplinary and case-based examination of the pathophysiology, prevention and general health management of disease/injury across the lifespan encountered in occupational and physical therapy practice. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Admission to the Occupational Therapy Professional Program required

OC_THR 7310: Foundations of Occupational Therapy

History, contemporary practice, conceptual foundations, professional organizations and official documents of the OT profession are presented. Activity analysis, adaptation, and assistive technology are introduced in the context of promoting health and occupational participation. Graded on A-F only basis.

Credit Hours: 4

Prerequisites: PTH_AS 4222 with a grade of "C" or better. Admission to the Occupational Therapy professional program required

OC_THR 7350: Rehabilitation Practice

Analysis of major disability areas from an occupational perspective. Administration and interpretation of assessments and application of treatment theories and approached for deficits in movement, sensation, cognition, and perception. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: Admission to the Occupational Therapy professional program

OC_THR 7390: Lifespan Assessment

(cross-leveled with OC_THR 4390). Basic evaluation skills in occupational therapy practice across the lifespan are introduced. This course provides an introduction of the essentials of occupational therapy evaluation: interviewing, screening, assessment, and report writing in general contexts across the lifespan. Enrollees will also receive an introduction to basic clinical reasoning skills required for instrument selection, interpretation of findings, and application to treatment planning. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: Restricted to occupational therapy students only

OC_THR 7420: Lifespan Occupations I

Overview of typical development from infancy through adolescence from an occupational perspective. Emphasis on the impact of personal and contextual factors on occupational development in children and adolescents. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Admission to Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (B or better for graduate students)

OC_THR 7422: Fieldwork I - Children

Development of clinical observation skills via on-site observation of children with typical and atypical development. Opportunities to gather and organize data, plan and implement activities, and develop therapeutic relationships with children and their care providers. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: Admission to Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (C or better for undergrad; B or better for graduates)

OC_THR 7450: Pediatric Practice

Lecture and laboratory course designed which addresses Occupational Therapy pediatric frames of reference and theories. Common conditions seen in Occupational Therapy practice as well as interventions such as

feeding, positioning, facilitation of movement and sensory strategies are also addressed. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: Admission to the Occupational Therapy professional program required

OC_THR 7510: Professional Perspectives

The course will provide an understanding of personal and professional communication through experiential activities and team learning. The focus will be on the formation of professional and therapeutic relationships and development of leadership skills. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: Admission to the Occupational Therapy Professional Program required

OC_THR 7520: Fundamentals of Occupational Therapy

This course will provide an overview of disability across the lifespan, including personal and professional interactions. Professional values, ethics and advocacy are also emphasized. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: Restricted to students who are currently enrolled in to the Occupational Therapy program

OC_THR 7590: Disability In Context

Community experiences are provided for observation, interview, assessment, and relational skills with persons experiencing disabilities throughout the lifespan. Professional and therapeutic relationships encompassing holism are discussed. Seminar weekly. Graded on A-F basis only.

Credit Hours: 2

OC_THR 7620: Lifespan Occupations II

Overview of biopsychosocial development and the aging process from young adulthood through older adulthood from an occupational perspective. Emphasis on the impact of client and contextual factors on occupational development and loss of occupations throughout the adult lifespan. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Admission to the Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (C or better for undergraduate; B or better for graduate)

OC_THR 7622: Fieldwork I Older Adults

Development of evaluation and intervention skills via on-site interaction with older adults in a residential facility. Opportunities to gather data, plan/implement activities, document client performance, and develop therapeutic relationships with older adults and care providers. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: Admission to the Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (C or better for undergraduate; B or better for graduate)

OC_THR 7650: Lifespan Interventions

This course provides a foundational overview of common treatment theories and frames of reference that guide intervention planning across the lifespan. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: OC_THR 4310 or OC_THR 7310 and OC_THR 4520 or OC_THR 7520. Restricted to students who are currently enrolled in the Occupational Therapy Program

OC_THR 7670: Hand and Upper Extremity Intervention

To gain entry level skills needed to evaluate and treat common upper extremity conditions, including acute injuries and cumulative trauma disorders. Graded on A-F basis only .

Credit Hours: 2

Prerequisites: PTH_AS 4222 or PTH_AS 7222, OC_THR 4220 or OC_THR 7220, OC_THR 4390 or OC_THR 7390

OC_THR 7750: Cognition Across the Lifespan

This course introduces students to theoretical models, assessment, and treatment in cognitive rehabilitation. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: restricted to Occupational Therapy Majors

OC_THR 7770: Community-Based Practice

Focus on role of occupational therapy in prevention, health and wellness. Program development and evaluation completed through community needs assessment and completion of health promotion project. Graded on A-F only basis.

Credit Hours: 3

Prerequisites: Admission to the Occupational Therapy Professional Program

OC_THR 7920: Fieldwork I Application of Clinical Skills

Application of clinical reasoning. Integration of theory into clinical practice. Emphasis on treatment planning and implementation, outcome based intervention and professional communication. Includes lecture, seminar, and field experience. Graded on S/U basis only.

Credit Hours: 2

OC_THR 7921: Clinical Documentation

Development of observation and assessment skills related to effective documentation of occupational therapy services. Emphasizes exposure to various clinical settings, third party payers, and legislative policies impacting documentation. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Admission to the professional program

OC_THR 7960: Readings in Occupational Therapy

Directed readings and critical evaluation of the literature and research in occupational therapy. Repeatable upon consent of department. May be offered on A-F or S/U basis.

Credit Hour: 1-99

OC_THR 7970: Research Methods

This course will use writing to explore basic concepts in research design and analysis. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Occupational Therapy Majors

OC_THR 7983: Fieldwork Level II-A

Advanced practicum in various community settings such as the school system, hospitals, rehabilitation centers and residential facilities. Emphasis on hands-on experiences and translation of theory into practice. Graded on S/U basis only.

Credit Hour: 3-9

OC_THR 7993: Fieldwork Level II-B

Advanced practicum in rehabilitation and various community settings for application of more specialized practice in community based settings. Emphasis on critical analysis of human occupation, clinical reasoning, synthesis, and evidence based practice. Graded on S/U basis only.

Credit Hour: 3-9

OC_THR 8000: Field Work 1 - Psychosocial Occupational Therapy Practice

Fieldwork experience in a setting focused on psychosocial aspects of occupational therapy, students to experience intervention in individual and group psychosocial treatments. Course may be repeated. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: Restricted to Occupational Therapy students only

Corequisites: OC_THR 8003

OC_THR 8002: Leadership, Management and Policy

Management perspectives and organizational structure of occupational therapy services programs and the profession. Includes inter- and intra departmental relationships, management and supervision, standards, regulations, and ethical guidelines are emphasized.

Credit Hour: 2-3

OC_THR 8003: Psychosocial Aspects of Occupational Therapy

This graduate course will examine the practice of occupational therapy in treating emotional and mental illnesses and related psychosocial dysfunction in the context of a variety of mental health treatment settings. The course will cover advanced frames of reference, treatment strategies, assessments, service delivery, program planning and group facilitation. In conjunction with didactic content students will actively explore these areas through hands on and practical learning experiences such as planning and leading groups, selecting and administering assessments, and developing a service delivery plan. The student will be required to complete an assigned field experience and write a reflection paper to insight and new perspectives on mental illness.

Credit Hours: 3

Prerequisites: Restricted to Occupational Therapy students only

OC_THR 8005: Advanced Adult Strategies

Analysis of major disability areas from an occupational perspective, focusing on advanced rehabilitative practice techniques. Facilitates

critical thinking and clinical reasoning skills utilizing a student-centered model.

Credit Hours: 3

OC_THR 8006: Advanced Pediatric Strategies

Explore topics related to occupational therapy pediatric practice in medical and educational settings and advanced topics such as assistive technology, working with special populations and evidence based practice. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: OC_THR 4420 or OC_THR 7420 and OC_THR 4450 or OC_THR 7450; Restricted to students in the Department of Occupational Therapy

OC_THR 8087: Problem-Based Cases

Synthesizes occupational therapy approaches to clinical scenarios across the lifespan and practice domains. Integrates clinical reasoning, patient values and evidence-based decision making into the occupational therapy process. Problem-based methodology emphasizes small group learning, problem solving, self/peer evaluation, and self-directed learning.

Credit Hours: 4

OC_THR 8090: Synthesis Project

Write up scholarly manuscript for publication based on research conducted with research mentor. Emphasis on writing: introduction, literature review, analysis and interpretation of findings, and implication for field. Presentation and dissemination of acquired information through poster session and manuscript. Graded on A-F basis only.

Credit Hours: 2

OC_THR 8095: Synthesis Project - Mentor Hours

Hours spent working with research mentor. Emphasis on data collection and analysis to complete synthesis project. Must be taken in conjunction with Synthesis Project course.

Credit Hour: 1

Corequisites: OC_THR 8090. Graded on S/U basis only

OC_THR 8900: Adult Clinical Practice

This is a clinical course in which the student will engage in the occupational therapy process with an adult client from evaluation through discharge under the direct supervision of a licensed occupational therapist. Seminars will be used for clinical discussion. Course may be repeated. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: OC_THR 4350 and OC_THR 4390 or OC_THR 7390 and OC_THR 4650 or OC_THR 7650; Students must be enrolled in the Department of Occupational Therapy

OC_THR 8950: Pediatric Clinical Practice

Clinical course providing students with opportunities to provide assessment, treatment planning and other aspects of client care in a supervised setting. Course may be repeated. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: OC_THR 4450 and OC_THR 4650 or OC_THR 7650; students must be enrolled in the Department of Occupational Therapy

OC_THR 8999: Occupational Therapy Clinical Practice

This course provides to provide students with opportunities to participate in adult or pediatric clinical Occupational Therapy practice. Students will be assigned a client who is seeking Occupational Therapy services. With supervision students will provide evaluation, and develop treatment goals. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: OC_THR 4390 or OC_THR 7390 and OC_THR 4650 or OC_THR 7650. Restricted to students who are currently enrolled into the Occupational Therapy Program

Ophthalmology

Credit Hours: 5

OPHTH 6936: Introduction to Ophthalmology

Welcome to the Ophthalmology Elective. This curriculum is designed to introduce you to the specialty of ophthalmology, which involves the recognition, diagnosis, and management of diseases of the eye. Students will work in the outpatient setting seeing patients at the University Eye Institute. Students will participate in didactic sessions each week. During this 2 week elective, students will become familiar with the screening eye examination, learn to perform a more comprehensive ocular examination, learn about common ocular abnormalities and treatments, and become familiar with the common ophthalmic instruments.

Credit Hours: 2

Prerequisites: successful completion of the first two years of medical school

Parks, Recreation, and Tourism Courses

P_R_TR 1010: Introduction to Leisure Studies

History of recreation and leisure movement; theories and philosophies of play, recreation and leisure. Developmental stages of leisure services to contemporary status.

Credit Hours: 3

P_R_TR 1011: Academic Planning and Career Orientation in Parks, Recreation and Tourism

Orientation to the field and analysis of career opportunities in leisure services. Academic planning leading to B.S. in parks, recreation and tourism. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: Parks, Recreation and Tourism major

P_R_TR 1080: Introduction to Sport Management

This course will examine the meaning of sport management in terms of its history, scope, principles, issues and future trends. In addition, this course examines the job responsibilities and competencies required of sport managers in a variety of sport organizations. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: P_R_TR 1011

P_R_TR 1081: Sport Facility Design

This course will investigate the functions of management in terms of design, implementation, operating and financing public assembly facilities in order to help sell the sport product. Venues such as public and private arenas, coliseums and stadiums will be studied. Graded on A-F basis only.

Credit Hour: 1

Prerequisites or Corequisites: P_R_TR 1080

Prerequisites: May be restricted to Parks, Recreation, and Tourism majors

Corequisites: P_R_TR 2082, P_R_TR 2083

P_R_TR 1084: Recreational Shooting Sports

This course provides introductory instruction and hands-on shooting with an introduction to shooting range management. Graded on A-F basis only.

Credit Hour: 1

Prerequisites or Corequisites: P_R_TR 1011

Prerequisites: instructor's consent

P_R_TR 1085: The Sports Page

This course is offered to introduce students to Sport Management by discussing the variety of sports, issues, perspectives and people that make the daily sport page worth reading. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: P_R_TR 1080

Corequisites: Instructor consent required if P_R_TR 1080 is taken concurrently

P_R_TR 1091: Research and Descriptive Statistics for Parks, Recreation and Tourism

An introduction to research methods and techniques and descriptive statistics and their application in the field of recreation and park administration. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites or Corequisites: P_R_TR 1011

P_R_TR 2080: Global Sport Environments

This course will provide an overview of organization and management of domestic and international sport, including the Olympic movement and examination of the globalization of U.S. professional sports. The course will also look into facility design and technology used in sports environment. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: P_R_TR 1011

P_R_TR 2082: Domestic and International Sports Environment

This course will provide an overview of organization and management of domestic and international sport, including the Olympic movement and examination of the globalization of U.S. profession sports. Graded on A-F basis only.

Credit Hour: 1

Prerequisites or Corequisites: P_R_TR 1080

Corequisites: P_R_TR 1081, P_R_TR 2083

P_R_TR 2083: Technological Advancement in Sport

This course will teach students how to solve sports technology problems they will face in their future career, plus develop computer aided design and manufacturing skills. They will also gain skills in team work, communication and presentation, IT, research and project management. Graded on A-F basis only.

Credit Hour: 1

Prerequisites or Corequisites: P_R_TR 1080

Corequisites: P_R_TR 1081, P_R_TR 2082

P_R_TR 2101: Topics in Park, Recreation and Tourism

Specialized topic content in parks, recreation and tourism programs, management and/or development. Subject content and credit may vary by semester based on faculty resources and student needs. Offered periodically.

Credit Hour: 1-3

Prerequisites or Corequisites: P_R_TR 1011

P_R_TR 2103: Topics in Park, Recreation and Tourism - Behavioral Science

Specialized topic content in parks, recreation and tourism programs, management and/or development. Subject content and credit may vary by semester based on faculty resources and student needs. Offered periodically.

Credit Hour: 1-3

Prerequisites or Corequisites: P_R_TR 1011

P_R_TR 2104: Topics in Park, Recreation and Tourism - Social Science

Specialized topic content in parks, recreation and tourism programs, management and/or development. Subject content and credit may vary by semester based on faculty resources and student needs. Offered periodically.

Credit Hour: 1-3

Prerequisites or Corequisites: P_R_TR 1011

P_R_TR 2107: Aquatics Science

A scientific perspective on water chemistry, preventive maintenance of aquatic facilities with an emphasis on the newest safety and engineering design information and construction techniques.

Credit Hours: 3

Prerequisites or Corequisites: P_R_TR 1011

P_R_TR 2111: Introduction to Planning and Evaluating Leisure Environments

Presentation of basic planning principles. Evaluation of existing areas and facilities based upon planning guidelines. Consideration of park plans, standards, terminology, map preparation and evaluation.

Credit Hours: 3

Prerequisites or Corequisites: P_R_TR 1011

P_R_TR 2115: Consortium Field Experience

An organized undergraduate experiential learning opportunity.

Credit Hour: 1-3

Prerequisites or Corequisites: P_R_TR 1011

Prerequisites: instructor's consent

P_R_TR 2140: Camp Leadership and Management

Organization and administration of camps; program planning; selection and training of staff; camp site selection and development; health and safety; camp history, standards, trends; practical application of camp craft skills.

Credit Hours: 3

Prerequisites or Corequisites: P_R_TR 1011

Prerequisites: instructor's consent

P_R_TR 2142: Leadership of Social Recreation

Study and practice in techniques of leading social activities suitable for various social settings. Offered periodically.

Credit Hours: 2

Prerequisites or Corequisites: P_R_TR 1011

P_R_TR 2143: Organization and Conduct of Recreation Centers

Problems of operation, management of playgrounds, recreation centers.

Credit Hours: 2

Prerequisites or Corequisites: P_R_TR 1011

P_R_TR 2182: Ethics and Current Issues in Sports

Ethical strategies of sport management will be emphasized in all management decisions and current issues that today's sport business professional faces will be studied. Graded on A-F basis only.

Credit Hour: 1

Prerequisites or Corequisites: P_R_TR 1011

Prerequisites: instructor's consent

P_R_TR 2206: Introduction to Leisure Service Management

An introduction to public recreation in local government.

Credit Hours: 3

Prerequisites: P_R_TR 1010, P_R_TR 1011, P_R_TR 2111 or instructor's consent

P_R_TR 2281: The Business of Sport

This course focuses on the business side of sport management, considering issues of marketing, sponsorship, and sales. Students will also be presented with actual models relevant to working in sales in the competitive sport environment. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: Some sections may require P_R_TR 1011

Prerequisites: some sections may be restricted to Parks, Recreation, and Tourism majors with Sport Management emphasis or instructor consent

P_R_TR 2355: Private and Commercial Recreation Principles and Practice

Considers principles, practices, influences in public/ private leisure services; influence of tourism/travel on public/private recreation services.

Credit Hours: 3

Prerequisites: P_R_TR 1011

P_R_TR 2711: Experience Internship

This course is designed as an independent study for students to gain professional experience. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites or Corequisites: P_R_TR 1011 and P_R_TR 1010

P_R_TR 2750: Methods in Research and Evaluation

An overview of social research methods, including terms, human and scientific inquiry, ethical behavior, literature review, sampling questionnaire construction, types of data collection, statistical analysis, and reporting of results. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: P_R_TR 1011

P_R_TR 3185: Sports Economics and Finance

This course focuses on the economic and financial issues within the sport industry. The class will help students understand basic and complex concepts within economics and finance in a sport context, and to grasp the importance of financial and economic decision making. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: P_R_TR 1011; Restricted to Parks, Recreation, and Tourism majors with Sport Management emphasis or instructor consent

P_R_TR 3185H: Sports Economics and Finance - Honors

This course focuses on the economic and financial issues within the sport industry. The class will help students understand basic and complex concepts within economics and finance in a sport context, and to grasp the importance of financial and economic decision making. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: P_R_TR 1011; Restricted to Parks, Recreation, and Tourism majors with Sport Management emphasis or instructor consent. Honors eligibility required

P_R_TR 3189: Pre-Internship Seminar in Parks, Recreation and Tourism

The course is designed to prepare students for P_R_TR 4940. Emphasis is placed on students' responsibilities prior to enrollment in P_R_TR 4940, selecting internship sites and completing internship requirements.

Credit Hour: 1

Prerequisites: P_R_TR 1011; restricted to Parks, Recreation and Tourism students only

P_R_TR 3210: Personnel Management and Leadership in Leisure Services

Considers theories and practices of leadership and management in leisure services employment. Topic presentation in relationships, attitudes, supervision, motivation and group functioning.

Credit Hours: 3

Prerequisites: P_R_TR 1011; restricted to Parks, Recreation and Tourism majors

P_R_TR 3215: Program Development in Leisure Services

Fundamental principles and techniques of program development; seasonal, year round, specialty areas and total agency program planning.

Credit Hours: 3

Prerequisites: P_R_TR 1011, or instructor's consent; restricted to Parks, Recreation and Tourism majors

P_R_TR 3220: Introduction to Recreation for Individuals with Disabilities

Principles, concepts and historical development of recreation for individuals with disabilities. Explanation of attitudes, issues, practice and barriers related to recreation participation. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: P_R_TR 1011 or departmental consent

P_R_TR 3227: Introduction to Therapeutic Recreation

An investigation of therapeutic recreation service delivery models of the P_R_TR 2111 and disabled in both institutional and community settings. Particular emphasis will be placed on advanced leadership and therapeutic interactional skills and dynamics.

Credit Hours: 3

Prerequisites: P_R_TR 1011

P_R_TR 3230: Introduction to Parks and Outdoor Recreation Services

An overview of parks and outdoor recreation, natural environment, supply-demand-need relationships, interpretative programming, management philosophies/practices will be studied.

Credit Hours: 3

Prerequisites: instructor's consent

Recommended: P_R_TR 1011

P_R_TR 3231: Principles of Interpretive Outdoor Recreation

Interpretive principles and techniques employed to communicate values, natural history and cultural features to the recreation user.

Credit Hours: 3

Prerequisites: instructor's consent

Recommended: P_R_TR 1011

P_R_TR 3282: Governance and Policy in Sport and Leisure

This course serves as a comprehensive study in examining how leisure organizations address fundamental issues of governance and policy. Through careful use of policy and understanding of governance, organizations often form strategies in their attempts to gain an advantage. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: P_R_TR 1011; Restricted to Parks, Recreation, and Tourism majors with Sport Management emphasis or instructor consent

P_R_TR 4208: Administration of Leisure Services

(cross-leveled with P_R_TR 7208). Theoretical foundations of the organization and administration of leisure services in both community and institutional settings. Emphasis on the roles of the administrator.

Credit Hours: 3

Prerequisites: P_R_TR 1011; Restricted to Parks, Recreation and Tourism majors

P_R_TR 4312: Planning Recreation and Leisure Environments

Practical application of basic planning principles and design. Layout and design of various leisure-oriented areas and facilities. Site planning and analysis.

Credit Hours: 3

Prerequisites: P_R_TR 1011

P_R_TR 4315: Senior Seminar in Leisure Services

Presentation of professional principles and issues in leisure services. Seminar study resulting in presentations and discussions.

Credit Hours: 3

Prerequisites: Parks, Recreation and Tourism majors, professional core or instructor's consent

P_R_TR 4327: Operation of Therapeutic Recreation: Procedures and Principles

Theories and principles of leadership and programming as they apply to recreation services for the ill, handicapped, and aged.

Credit Hours: 3

Prerequisites: P_R_TR 1011

P_R_TR 4328: Leisure and Aging

Basic understanding of problems/needs of later maturity in relation to recreation. Characteristics/capabilities of aged, program settings, financial support, planning guidelines emphasized. Objectives: provide fundamentals for recreation planning with aged individuals/groups. Offered periodically.

Credit Hours: 3

Prerequisites: P_R_TR 1011

P_R_TR 4329: Therapeutic Recreation Education/Counseling Techniques

Techniques and models of leisure facilitation for use within a variety of clinical, residential and Institutional models. Theories of positive/negative leisure engagement reviewed.

Credit Hours: 3

Prerequisites: P_R_TR 1011

P_R_TR 4330: Therapeutic Recreation Assessment/Evaluation Procedures

Reviews accepted clinical protocols for determining a client's physical, emotional, social and cognitive levels of functioning. Competencies in administering, scoring and interpreting multiple tools included.

Credit Hours: 3

Prerequisites: P_R_TR 1011

P_R_TR 4331: Administration of Outdoor Recreation - Education Programs

(cross-leveled with P_R_TR 7331). Philosophies, essential principles, methods, techniques, resources, administrative and program practices for outdoor recreation and education. Offered periodically.

Credit Hours: 3

Prerequisites: P_R_TR 1011

P_R_TR 4333: Park Management

Basic principles, practices and problems involved in managing public park systems. Consideration given to local, district, county, state, federal and foreign park systems.

Credit Hours: 3

Prerequisites: P_R_TR 1011; Restricted to Parks, Recreation and Tourism majors

P_R_TR 4340: Advanced Recreation Land Management

(cross-leveled with P_R_TR 7340). Advanced study of problems facing forest recreation managers. Topics include rivers recreation, wilderness management and citizen participation in decision making. Offered periodically.

Credit Hours: 3

Prerequisites: instructor's consent

Recommended: P_R_TR 1011

P_R_TR 4350: Problems in Parks, Recreation and Tourism

Credit Hour: 1-3

Prerequisites: P_R_TR 1011; departmental consent

P_R_TR 4356: Tourism Management

Introduction to the scope and scale of the tourism industry. Focus on the industry components, concepts, structures, relationships, and issues with regard to accommodation, transportation, travel, regional development, political system, and the economic, social and environmental effects of tourism.

Credit Hours: 3

Prerequisites: P_R_TR 1011

P_R_TR 4357: Tourism Planning and Development

Nature and scope of tourism planning at the local, regional, and national levels; economic social, environmental, and policy considerations. Comparative study of initiating, planning and implementing tourism and the organization of community resources for developing and controlling a tourism industry.

Credit Hours: 3

Prerequisites: P_R_TR 1011 and P_R_TR 4356

P_R_TR 4385: Legal Aspects of Sport

This course studies the U. S. legal system, its structure and terminology. Legal aspects of contract law, statutory law, constitutional law, intellectual property, torts, negligence, and risk management in sport will be examined. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: P_R_TR 1011; Restricted to Parks, Recreation, and Tourism majors with Sports Management emphasis or instructor consent

P_R_TR 4940: Parks, Recreation and Tourism Internship

Supervised professional experience with an approved organization. Course entails weekly reports, case studies, agency evaluations and a special project related to the student's curricular emphasis. Graded on A-F basis only.

Credit Hours: 12

Prerequisites: P_R_TR 1011 and P_R_TR 3189, P_R_TR majors only, instructor's consent

P_R_TR 4949: Western Canada Study Abroad

This course provides students an educational opportunity to explore Western Canada. Students analyze natural resource management, customer and visitor relations, community relations, cultural entrepreneurship, and transportation networks with US and Canadian Management methods.

Credit Hours: 3

Prerequisites: P_R_TR 1011; instructor's consent

P_R_TR 4950: Independent Research in Parks, Recreation and Tourism

Independent research project in parks, recreation and tourism. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: P_R_TR 1011; instructor's consent

P_R_TR 7208: Administration of Leisure Services

(cross-leveled with P_R_TR 4208). Theoretical foundations of the organization and administration of leisure services in both community and institutional settings. Emphasis on the roles of the administrator.

Credit Hours: 3

P_R_TR 7312: Planning Recreation and Leisure Environments

Practical application of basic planning principles and design. Layout and design of various leisure-oriented areas and facilities. Site planning and analysis.

Credit Hours: 3

P_R_TR 7328: Leisure and Aging

Basic understanding of problems/needs of later maturity in relation to recreation. Characteristics/capabilities of aged, program settings, financial support, planning guidelines emphasized. Objectives: provide

fundamentals for recreation planning with aged individuals/groups. Offered periodically. .

Credit Hours: 3

P_R_TR 7331: Administration of Outdoor Recreation - Education Programs

(cross-leveled with P_R_TR 4331). Philosophies, essential principles, methods, techniques, resources, administrative and program practices for outdoor recreation and education. Offered periodically.

Credit Hours: 3

P_R_TR 7333: Park Management

Basic principles, practices and problems involved in managing public park systems. Consideration given to local, district, county, state, federal and foreign park systems.

Credit Hours: 3

P_R_TR 7340: Advanced Recreation Land Management

(cross-leveled with P_R_TR 4340). Advanced study of problems facing forest recreation managers. Topics include rivers recreation, wilderness management and citizen participation in decision making. Offered periodically.

Credit Hours: 3

P_R_TR 7355: Private and Commercial Recreation Principles and Practice

Considers principles, practices, influences in public/ private leisure services; influence of tourism/travel on public/private recreation services.

Credit Hours: 3

P_R_TR 7356: Tourism Management

Introduction to the scope and scale of the tourism industry. Focus on the industry components, concepts, structures, relationships, and issues with regard to accommodation, transportation, travel, regional development, political system, and the economic, social and environmental effects of tourism.

Credit Hours: 3

P_R_TR 7357: Tourism Planning and Development

Nature and scope of tourism planning at the local, regional, and national levels; economic social, environmental, and policy considerations. Comparative study of initiating, planning and implementing tourism and the organization of community resources for developing and controlling a tourism industry.

Credit Hours: 3

Prerequisites: P_R_TR 7356

P_R_TR 7960: Guided Reading in Parks, Recreation and Tourism

Selected reading in parks, recreation and tourism identified to fulfill a graduate student's academic needs or specialized interests.

Credit Hour: 1-3

Prerequisites: instructor's consent

P_R_TR 8080: Foundations of Sport

This course focuses on the business side of sport management, primarily considering issues of marketing, sponsorship, and sales. In this, students will not only supplement knowledge of these concepts, but also be presented with actual models relevant to working in sales in the competitive sport environment. Graded on A-F basis only.

Credit Hours: 3

P_R_TR 8085: Problems in Parks, Recreation and Tourism

Independent research on special projects.

Credit Hour: 1-6

Prerequisites: instructor's consent

P_R_TR 8087: Masters Level Graduate Seminar in Parks, Recreation and Tourism

In this course, students and faculty will discuss and critically analyze contemporary issues on social concerns relating to leisure services. Graded on S/U basis only.

Credit Hours: 2

P_R_TR 8088: Sport and Leisure Economics

This course focuses on the business side of sport management, primarily considering issues of marketing, sponsorship, and sales. In this, students will not only supplement knowledge of these concepts, but also be presented with actual models relevant to working in sales in the competitive sport environment. Graded on A-F basis only.

Credit Hours: 3

P_R_TR 8089: Research Project

Individual research on approved project. Involves creativity and scholarly inquiry where product does not adhere to the traditional thesis format. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: Parks, Recreation and Tourism graduate major

P_R_TR 8090: Thesis Research in Parks, Recreation and Tourism

Research leading to thesis in field of parks, recreation and tourism. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: Parks, Recreation and Tourism graduate major

P_R_TR 8400: Constructs of Leisure

Review analysis and implications of fundamental psycho-social determinants of leisure behavior. Application theories of determinants to existing and proposed leisure service systems.

Credit Hours: 3

P_R_TR 8401: Topics in Recreation and Park Administration

Specialized topics in recreation and park administration dynamics. Subjects and credits vary by semester based on available faculty resources and expertise. Course content announced in advance.

Credit Hour: 1-3

Prerequisites: instructor's consent

P_R_TR 8411: Independent Work in Parks, Recreation and Tourism

Independent research or special projects in parks, recreation and tourism.

Credit Hour: 1-3

Prerequisites: instructor's consent

P_R_TR 8420: Leisure, Technology and Human Values

Study of the developmental patterns of leisure services in society with emphasis to the dynamics of technology and leisure on individual and social values.

Credit Hours: 3

P_R_TR 8427: Contemporary Issues in Therapeutic Recreation

The course will include new issues and ideas in the field of therapeutic recreation, such as registration, insurance, liability, licensure, assessment, etc., and how they relate to practitioners and services to clients.

Credit Hours: 3

P_R_TR 8430: Research Methods in Parks, Recreation and Tourism

Analysis of basic research methodology. Review and analysis of research work completed in recreation, park and leisure field.

Credit Hours: 3

P_R_TR 8436: Visitor Behavior and Policy

Course presents issues, concerns and policies dealing with multi-management/planning/operations of outdoor resource based recreation. Such issues as energy, economics, social/ political, pollution and user characteristics will be studied.

Credit Hours: 3

P_R_TR 8440: Philosophical Perspectives of Leisure

Study of the theoretical and philosophical perspective of leisure in society with emphasis on integration and development of the student's personal and professional viewpoint.

Credit Hours: 3

P_R_TR 8450: Administration in Leisure Service Delivery

Review, analysis and synthesis of administrative functions as related to public and private recreation and leisure service enterprises.

Credit Hours: 3

P_R_TR 8460: Financial Operations in Leisure Service Delivery

Review and critical analysis of financial functions, strategies and methodology as related to public and private recreation and leisure service enterprises.

Credit Hours: 3

P_R_TR 8940: Internship in Parks, Recreation and Tourism

Supervised student practice in recreation, park or related settings under qualified instructor.

Credit Hour: 1-6

Prerequisites: Parks, Recreation and Tourism graduate major

Pathology & Anatomical Science Courses

PTH_AS 2000: Basic Pathology

Provides nonmedical students with a general understanding of the essential nature of disease, including mechanisms of its development and cause/effect relationships.

Credit Hours: 2

Prerequisites: 5 hours Biological Science or equivalent and 5 hours Chemistry or PTH_AS 2201

PTH_AS 2201: Human Anatomy Lecture

A systems-based survey of human gross anatomy including structure, function and history. Internet access required: lectures and assignments will be online. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Minimum cumulative MU GPA of 2.5 required

PTH_AS 2203: Human Anatomy Laboratory

A systems-based survey of human gross anatomy. Internet access required: most materials will be online. One on-campus laboratory meeting per week. Graded A-F only.

Credit Hours: 2

Prerequisites or Corequisites: PTH_AS 2201

Prerequisites: Minimum cumulative MU GPA of 2.5

PTH_AS 2600: Cytology Female Genital Tract

A definitive study of normal and abnormal cellular changes occurring within the organ system by means of light microscopy with histologic correlation.

Credit Hours: 10

Prerequisites: instructor's consent

PTH_AS 2610: Respiratory Cytology

A definitive study of the normal and abnormal cellular changes occurring within the system by means of light microscopy, with histologic correlation.

Credit Hours: 4

Prerequisites: instructor's consent

PTH_AS 2615: Cytology of Body Fluids

Normal and abnormal cellular changes within pleural, peritoneal, pericardial and cerebrospinal fluids by means of light microscopy, with histologic correlation.

Credit Hours: 4

Prerequisites: instructor's consent

PTH_AS 2620: Gastrointestinal Cytology

A definitive study of the normal and abnormal cellular changes occurring within the system by means of light microscopy, with histologic correlation.

Credit Hours: 4

Prerequisites: instructor's consent

PTH_AS 2625: Oral Cytology

Studies normal and abnormal cellular changes within the oral cavity and oropharynx by means of light microscopy, with histologic correlation.

Credit Hours: 2

Prerequisites: instructor's consent

PTH_AS 2630: Urinary Cytology

Studies normal and abnormal cellular morphology from kidney, ureter and bladder samples, with histologic correlation.

Credit Hours: 4

Prerequisites: instructor's consent

PTH_AS 2685: Special Problems in Cytology

Relating hematologic morphologic findings in conventional body fluid cytology; also review of techniques used in chromosome cultures and karyotyping, with emphasis on sex-related abnormalities.

Credit Hours: 2

PTH_AS 3400: Fundamentals of Medical Technology I

Emphasizes diseases and basic laboratory methods used in clinical laboratory areas: microbiology, hematology, immunology, virology, tissue typing, blood banking and chemistry.

Credit Hours: 3

PTH_AS 3410: Fundamentals of Medical Technology II

Continuation of PTH_AS 3400.

Credit Hours: 3

PTH_AS 3415: Fundamentals of Medical Technology III

Continuation of PTH_AS 3400 and PTH_AS 3410.

Credit Hours: 3

PTH_AS 3420: Clinical Practicum

Presentation and application of concepts and laboratory method used in areas of immunochemistry, toxicology, mycology, uranalysis and cytogenetics.

Credit Hours: 3

PTH_AS 3425: Hemostasis

Lectures and laboratory exercises in basic theory and techniques of hemostasis including platelet function and disorders, plasma coagulation system, acquired and inherited themostatic disorders.

Credit Hours: 2

Prerequisites: PTH_AS 3400, PTH_AS 3410, PTH_AS 3415

PTH_AS 3430: Clinical Immunology

Antigen-antibody reactions and their role in determining infectious, auto-allergic and inflammatory disease states.

Credit Hours: 3

PTH_AS 3435: Blood Banking

Principles and techniques of transfusion practices related through lectures and experience in the blood bank laboratory.

Credit Hours: 3

PTH_AS 3440: Clinical Hematology

Lectures and laboratory regarding procedures for diagnosing hematologic disorders. Experience in collection of specimens from patients; staining, counting and identifying blood and bone marrow cells.

Credit Hours: 6

PTH_AS 3445: Clinical Microbiology

Diagnostic procedures related to the isolation and identification to infectious microorganisms; bacteria and parasites. Emphasis on human pathogens and their sensitivity patterns with commonly used antibiotics.

Credit Hours: 6

PTH_AS 3450: Clinical Chemistry

Principles of quantitative analysis applied to the measurement of substances in biological fluids. Significance of these findings in the diagnosis and treatment of disease.

Credit Hours: 6

PTH_AS 3455: Principles of Management and Education

Lectures and discussion of management techniques and theories used in supervising laboratory personnel. Analysis of educational objectives and exam questions.

Credit Hour: 1

PTH_AS 3460: Research and Instructional Techniques

Involves library and laboratory research. Includes development of oral and written communications skills.

Credit Hours: 3

PTH_AS 3485: Problems in Medical Technology

Individual supervised work in a area of interest in medical technology.

Credit Hour: 1-3

Prerequisites: instructor's consent

PTH_AS 3500: Cytology of the Female Genital Tract

A definitive study by means of light microscopy of normal and abnormal cellular changes occurring within the female genital tract along with histologic correlation.

Credit Hours: 8

Prerequisites: senior standing and instructor's consent

PTH_AS 3510: Cytology of Respiratory Tract

A definitive study by means of light microscopy of normal and abnormal cellular changes occurring with the respiratory tract along with immunohistologic correlation. Prerequisite: senior standing and instructor's consent.

Credit Hours: 4

PTH_AS 3515: Cytology of Urinary Tract

A definitive study by means of light microscopy of normal and abnormal cellular changes occurring within the urinary tract along with histologic correlation.

Credit Hours: 4

Prerequisites: senior standing and instructor's consent

PTH_AS 3520: Cytology of Gastrointestinal Tract

A definitive study by means of light microscopy of normal and abnormal cellular changes occurring within the gastrointestinal tract along with histologic correlation.

Credit Hours: 5

Prerequisites: senior standing and instructor's consent

PTH_AS 3525: Cytology of Body Fluids

A definitive study of light microscopy of normal and abnormal cellular changes occurring within body fluid along with histologic correlation.

Credit Hours: 4

Prerequisites: senior standing and instructor's consent

PTH_AS 3530: Cytology of Breast

A definitive study by means of light microscopy of normal and abnormal cellular changes occurring within the breast with histologic correlation.

Credit Hours: 2

Prerequisites: senior standing and instructor's consent

PTH_AS 3535: Fine Needle Aspiration Cytology

A definitive study by means of light microscopy of normal and abnormal cellular changes occurring within the fine needle aspirations from various body sites along with histologic correlation.

Credit Hours: 2

Prerequisites: senior standing and instructor's consent

PTH_AS 3540: Special Procedures in Cytology

Study of hematologic findings in body fluid cytology: chromosome cultures and karyotyping. Emphasizing sex-related abnormalities; hormonal evaluation of smears from the female genital tract and their clinical significance.

Credit Hours: 2

Prerequisites: senior standing and instructor's consent

PTH_AS 3545: Clinical Management

Procedures and processes helpful in operating in cytology laboratory, especially at the supervisory level.

Credit Hour: 1

Prerequisites: senior standing and instructor's consent

PTH_AS 3550: Technical Application with Research in Cytotechnology

Research is an area of interest in cytology resulting in a written and oral presentation.

Credit Hours: 2

Prerequisites: senior standing and instructor's consent

PTH_AS 3555: Cytologic Preparation

Independent applications of techniques used to prepare cytologic material.

Credit Hours: 2

Prerequisites: senior standing and instructor's consent

PTH_AS 3560: Practical Cytotechnology

Independent application of techniques used to examine cytology material and manage a cytology laboratory.

Credit Hours: 6

Prerequisites: senior standing and instructor's consent

PTH_AS 3585: Problems in Cytotechnology

Individual supervised work in an area of interest in cytology.

Credit Hour: 1-3

Prerequisites: instructor's consent

PTH_AS 3600: Elementary Histology

Simplified gross and microscopic anatomy of normal organs and tissues commonly found in the routine histopathology laboratory.

Credit Hours: 3

PTH_AS 3610: Basic Histotechnology

Theories and technical application of procedures used in the preparation of tissue sections and slides of microscopic examination; including instrumentation, fixation, dehydration, clearing infiltration, embedding, microtomy, H&E staining and coverslipping.

Credit Hours: 6

PTH_AS 3615: Special Staining Techniques

Principles and procedures for special staining techniques for carbohydrates, connective tissues, blood, fat and lipids, pigments and minerals, bacteria and fungi, nerve, and other special cell stains.

Credit Hours: 6

PTH_AS 3620: Applied Histotechnology

Application of basic histological techniques in the preparation of histologic sections and slides in a clinical setting.

Credit Hours: 9

PTH_AS 3625: Research and Instructional Techniques

Involves library and laboratory search. Includes development of oral and written communications skills.

Credit Hours: 3

Prerequisites: senior students admitted to Histotechnology Curriculum

PTH_AS 3630: Clinical Management

Supervisory techniques and procedures helpful in operating a histopathology laboratory: including laboratory safety, workload recording, and personnel management in a laboratory situation.

Credit Hours: 2

PTH_AS 3635: Basic Disease Processes

Special readings and discussions of basic disease processes of interest to the anatomic pathology laboratory.

Credit Hours: 2

PTH_AS 3680: Advances Histotechnology

Advanced and specialized techniques used in the preparation and processing of muscle, nerve and rectal biopsies; special techniques in cytology; electron microscopy; enzyme and immunohistochemistry; plastic embedding and neuropathologic techniques.

Credit Hours: 6

PTH_AS 3685: Problems in Histotechnology

Individual supervised work in a specialized area of histotechnology.

Credit Hour: 1-3

Prerequisites: instructor's consent

PTH_AS 4200: General Pathology

Basic pathological mechanisms of human disease. Introductory principles of clinical laboratory measurements of altered organ system function studied.

Credit Hours: 5

Prerequisites: PTH_AS 7200, PTH_AS 7220, PTH_AS 7310; and instructor's consent

PTH_AS 4205: General Pathology Laboratory

Gross and microscopic applied study of basic pathological disease mechanisms. Laboratory assessment of these basic disease mechanisms.

Credit Hours: 3

Prerequisites: PTH_AS 7200, PTH_AS 7220, PTH_AS 7310; or the equivalents; and instructor's consent

PTH_AS 4210: Seminar in Pathology and Anatomical Sciences

Presentation and discussion of original investigations and current literature.

Credit Hour: 1

PTH_AS 4220: Forensic Pathology and Death Investigation

Forensic Pathology and Death Investigation.

Credit Hours: 2

PTH_AS 4222: Gross Human Anatomy (The Health Professions)

Gross structure and neuroanatomy of the human body; dissection of extremities, back, head, neck abdomen and thorax.

Credit Hours: 7

Prerequisites: instructor's consent

PTH_AS 4250: Interpretations of Lab Procedures in Primary Health Care

Discussion and analysis of selected laboratory test procedures used in office and clinic settings involved with primary health care.

Credit Hour: 1

Prerequisites: graduate level Physiology course and departmental consent

PTH_AS 6331: ABS Advanced Medical Neurosciences
ABS Advanced Medical Neurosciences

Credit Hour: 5-10

PTH_AS 6333: ABS Pathology/Anatomical Science Research
ABS Pathology/Anatomical Science Research

Credit Hours: 5

PTH_AS 6335: ABS Pathology/Anatomical Science Research and Review
ABS Pathology/Anatomical Science Research and Review

Credit Hours: 5

PTH_AS 6341: ABS Science Anatomical Science Teaching
ABS Science Anatomical Science Teaching

Credit Hours: 5

PTH_AS 6343: ABS Surgical Anatomy
ABS Surgical Anatomy

Credit Hours: 5

PTH_AS 6345: ABS Surgical Anatomy of the Head and Neck
ABS Surgical Anatomy of the Head and Neck

Credit Hours: 5

PTH_AS 6347: ABS Surgical Anatomy of the Back and Limbs
ABS Surgical Anatomy of the Back and Limbs

Credit Hours: 5

PTH_AS 6349: ABS Surgical Anatomy of the Pelvis and Perinium
ABS Surgical Anatomy of the Pelvis and Perinium

Credit Hour: 5-10

PTH_AS 6600: Anatomic Pathology
Anatomic Pathology

Credit Hours: 5

PTH_AS 6602: Clinical Pathology
Clinical Pathology

Credit Hours: 5

PTH_AS 6604: Forensic Pathology
Forensic Pathology

Credit Hours: 5

PTH_AS 6606: Anatomic/Clinical Pathology
Anatomic/Clinical Pathology

Credit Hours: 5

PTH_AS 6608: Anatomy Elective
Anatomy Elective

Credit Hours: 5

PTH_AS 6916: Anatomic Pathology Two-Week

This is a two week rotation. Students will learn how to integrate information and apply previously acquired knowledge and concepts to the assessment and interpretation of surgical pathology, cytopathology, and/or autopsy cases. Students will learn about the procedures necessary to arrive at anatomic pathology diagnoses and the work that goes into specimen processing and examination so as to produce diagnoses.

Credit Hours: 2

Prerequisites: Successful completion of the first two years of medical school

PTH_AS 6917: Clinical Pathology - Laboratory Medicine

Students will learn how to integrate information and apply previously acquired knowledge and concepts to the assessment and interpretation of clinical laboratory tests. Students will learn about the procedures necessary to arrive at clinical pathology diagnoses and the work that goes into specimen processing and examination so as to produce diagnoses.

Credit Hours: 2

Prerequisites: Successful completion of the first two years of medical school

PTH_AS 7020: Forensic Pathology and Death Investigation

Summary of Forensic Death Investigation from beginning to end. Will include some of the current laboratory techniques seen on "CSI" Team taught by experts in the fields including medical examiners, death investigators, forensic anthropologists, police CSI teams, lawyers and others.

Credit Hours: 2

Prerequisites: Basic Biology

PTH_AS 7220: Human Histology and Organology

Detailed study of cytology, histology and microscopic anatomy.

Credit Hours: 4

Prerequisites: 10 hours of Biological Sciences and instructor's consent

PTH_AS 7222: Gross Human Anatomy (The Health Professions)

Gross/human structure through dissection. Graded on A-F basis only.

Credit Hours: 7

Prerequisites: Acceptance into Physical Therapy Programs or instructor's consent

PTH_AS 7230: Mammalian Reproduction

Reproduction in mammals, with emphasis on the neuroendocrine control of the hormones involved in reproductive process: biosyntheses, biologic actions, role.

Credit Hours: 3

Prerequisites: graduate standing in one of Animal, Biologic, Medical, or Veterinary Sciences, instructor's consent

PTH_AS 7300: Advanced Pathology

Demonstration and simulation study of gross, microscopic and clinical laboratory pathology of major human organ systems.

Credit Hours: 5

Prerequisites: PTH_AS 4200 and PTH_AS 4205 or equivalent and instructor's consent

PTH_AS 7320: Autonomic Nervous System

A comprehensive consideration of the autonomic nervous system in man, with emphasis on morphology.

Credit Hours: 2

Prerequisites: PTH_AS 2201, Comparative Anatomy or equivalent, and instructor's consent

PTH_AS 7330: Hematopoietic Organs

Morphological and functional relationships of the blood-forming organs.

Credit Hours: 2

Prerequisites: Basic Histology and instructor's consent

PTH_AS 7350: Advanced Pathology Laboratory

Demonstration and simulation and character of work depend upon needs, qualifications, and of major human organ systems.

Credit Hours: 3

Prerequisites: PTH_AS 4200 and PTH_AS 4205 or equivalent and instructor's consent

PTH_AS 7400: Seminars in Translational Medicine

Students participate in regular seminars and discussion groups with other students interested in clinical and translational sciences. Students, working together with faculty in biomedical sciences and those working in clinical and translational fields, identify seminar topics. Learning objectives and written assignments are arranged on an individual basis. The course is open to all graduate level students and students enrolled in professional schools, for 0-5 credit hours, with instructor's approval. Graded on S/U basis only.

Credit Hour: 0-5

PTH_AS 7450: Precision Medicine Informatics

This course will introduce students with the theoretical and practical aspects of precision medicine informatics. Topics include: complex diseases, computational genomics/proteomics, informatics of molecular interactions and biological pathways, somatic mutations, signal transduction and cancer, biomarker discovery, machine learning and data mining for PMI, networks methods for PMI, knowledge representation and reasoning for PMI. The course will consist of a set of didactic lectures, computational assignments, in-class demonstrations of PMI methods and discussions of recent publications. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 8005 with C or better or INFOINST 7010 with C or better or instructor's consent

PTH_AS 8000: Comparative Pathology

(same as V_P BIO 8430). Biochemical and morphologic lesions related to the mechanism of disease expression in plants and animals.

Credit Hours: 3

PTH_AS 8010: Current Issues in Anatomical Sciences

Survey of the recent literature in integrative anatomy, including functional, evolutionary, developmental and translational anatomy, conducted through readings and discussion. Grade determined by participation and presentation of weekly readings. May be repeated for a maximum of 10 hours. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: instructor's consent

PTH_AS 8090: Advanced Pathology

Open only to properly qualified graduate students, with counsel of faculty. Focus of MS-related research in evolutionary morphology, genomics, neuroscience, pathobiology or laboratory sciences. Graded on S/U basis only.

Credit Hour: 1-99

PTH_AS 8100: Fundamentals of Evolutionary Biology

Principles of modern evolutionary biology. Topics include: phylogeny, paleobiology, developmental processes, genetic and phenotypic variation, form and function, speciation, macroevolution, and molecular mechanisms.

Credit Hours: 3

Prerequisites: instructor's consent

PTH_AS 8150: Fundamentals of Evolutionary Morphology

This course is a survey of the fundamentals of modern evolutionary morphology. Topics will include: patterns of vertebrate evolution, comparative methods, development and ontogeny, constraint, functional morphology, evolutionary innovations, and experimental methods. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent required

PTH_AS 8201: Human Anatomy: Back and Upper Limb

Developmental, gross, and clinical anatomy of the human back and upper limb, including skeletal, muscular, nervous, and vascular tissues. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: instructor's consent required

PTH_AS 8202: Human Anatomy: Thorax and Abdomen

Developmental, gross, and clinical anatomy of the human thorax and abdomen. Graded on an A-F basis only.

Credit Hours: 2

Prerequisites: instructor's consent required

PTH_AS 8203: Human Anatomy: Head, Neck and Neuroanatomy

Developmental, gross and clinical anatomy of the human head, neck and neuroanatomy. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: instructor's consent required

PTH_AS 8204: Human Anatomy: Pelvis and Lower Limb

Developmental, gross and clinical anatomy of the human pelvis and lower limb. Graded A-F basis only.

Credit Hours: 2

Prerequisites: instructor's consent required

PTH_AS 8285: Problems in Pathology and Anatomical Sciences

Regions or systems which may include developmental, microscopic, and gross anatomy.

Credit Hour: 1-99

Prerequisites: instructor's consent

PTH_AS 8290: Research in Pathology and Anatomical Sciences

Research unrelated to thesis work in evolutionary morphology, genomics, neuroscience, pathobiology or laboratory sciences.

Credit Hour: 1-99

Prerequisites: instructor's consent

PTH_AS 8310: Anatomy of the Human Nervous System

A comprehensive consideration of the morphology of the nervous system, emphasizing correlation of structure and function.

Credit Hours: 3

Prerequisites: PTH_AS 2201, Comparative Anatomy or equivalent, and instructor's consent

PTH_AS 8450: Human Anatomy Teaching Practicum

Provides practical experience teaching clinically oriented human anatomy in lecture and laboratory settings. For students pursuing doctoral degrees in Pathobiology. Enrollment is limited to students who have completed PTH_AS 8201, PTH_AS 8202, PTH_AS 8203, and PTH_AS 8204. Graded on S/U basis only. May be repeated for credit.

Credit Hour: 1

Prerequisites: instructor's consent

PTH_AS 8500: Seminar in Translational Neuroscience

Students participate in seminars and discussion groups. Masters students identify seminar topics and present existing data with findings. PhD students identify seminar topics, conduct research and present findings. Learning objective and written assignments are arranged individually. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1-5

PTH_AS 9090: Research in Pathology and Anatomical Sciences

Open only to properly qualified graduate students, with counsel of faculty. Focus of PhD-related research in evolutionary morphology, genomics, neuroscience or pathobiology. Graded on S/U basis only.

Credit Hour: 1-99

PTH_AS 9290: Research in Pathology and Anatomical Sciences

Open only with instructor's consent. Courses with specialized lectures in various topics such as evolutionary morphology, genomics, neuroscience

and pathobiology, depending on faculty expertise and student demand. Graded on S/U basis only.

Credit Hour: 1-99

Peace Studies Courses

PEA_ST 1001: Topics in Peace Studies

Underclass topics. Subjects may vary from semester to semester. May be repeated to 6 hours maximum. Graded on A-F basis only.

Credit Hours: 3

PEA_ST 1003: Topics in Peace Studies - Behavioral Science

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

Credit Hour: 2-3

PEA_ST 1004: Topics in Peace Studies

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

Credit Hour: 2-3

PEA_ST 1005: Topics in Peace Studies - Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

Credit Hour: 2-3

PEA_ST 1050: Introduction to Peace Studies

Interdisciplinary overview including theories on the nature of aggression and war, case studies of contemporary conflicts, consideration of various peace proposals, conditions making war or peace likely.

Credit Hours: 3

Recommended: sophomore standing. Writing intensive not fulfilled unless ENGLSH 1000 or equivalent has already been taken

PEA_ST 1051: International Conflict Resolution and Group Reconciliation

Theories of conflict resolution. We will study achieving peace through techniques and institutions that attempt personal and interactive reconciliation of opposing groups personally. Case studies might include the "Truth and Reconciliation" committees following South African Independence, and similar projects to promote inter-group understanding in Middle East conflicts. The course will then analyze examples of the resolution of major international conflicts and issues, such as the Irish Peace Accords, the Camp David peace process for the Middle East, Strategic Nuclear Arms Limitation, and the Kyoto Protocol.

Credit Hours: 3

PEA_ST 1052: Global Warming, Climate Change, Catastrophic Climate Destabilization

Global warming, climate change and catastrophic climate destabilization as alternate conceptualizations. The greenhouse gas effect; the consequences of climate change for oceans, fresh water ecosystems,

forests, agriculture, biodiversity, public health, social justice and global social stability. Potential solutions will be considered, including sustainable energy sources, efficiency of energy use, divestment from fossil fuels, and putting a price on carbon.

Credit Hours: 3

PEA_ST 1053: Terror, Violence, and Guns

An examination of gun violence focusing on international terrorist groups, state sanctioned violence, militias, gun violence and violence against women. Accounts of recruitment to violent actions and political groups, contrasted to the research on recruitment processes. Alternate public policies for the reduction of violence. Presentation of a diversity of viewpoints and concepts will be emphasized, especially in participatory formats such as panel discussions composed of students, and in formats that involve presentations in various media to the public outside the classroom.

Credit Hours: 3

PEA_ST 1120: Population and Ecology

(same as RU_SOC 1120 and SOCIOL 1120). Changes in the structure and characteristics of population groups and their relationship to both human and non-human aspects of the biophysical environment.

Credit Hours: 3

PEA_ST 1150: The Amish Community

(same as RU_SOC 1150). Examines historical antecedents and contemporary culture and social structure of the Amish. Topics include cultural symbols, life ceremonies, the family, counter cultural pressures, stresses and social change.

Credit Hours: 3

Prerequisites: RU_SOC 1000, SOCIOL 1000, or ANTHRO 1000

PEA_ST 1195: Service Learning in Peace Studies

Students will perform significant and long term community service while exploring issues central to peace studies.

Credit Hour: 1

PEA_ST 1610: Russia in Modern Times

(same as HIST 1610). Survey of Russian History from 1801 to present.

Credit Hours: 3

PEA_ST 2000: Exploration in Social and Economic Justice

(same as SOC_WK 2000). This course explores issues of fairness and equality in economic, political and social systems, and applies social justice principles to major social problems. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGLSH 1000

PEA_ST 2003: Topics in Peace Studies: Behavioral Science

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

Credit Hour: 2-3

Prerequisites: Sophomore standing or instructors consent

PEA_ST 2004: Topics in Peace Studies - Social Sciences

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

Credit Hour: 2-3

Prerequisites: sophomore standing or instructor's consent

PEA_ST 2005: Topics in Peace Studies - Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

Credit Hour: 2-3

Prerequisites: sophomore standing or instructor's consent

PEA_ST 2100: The Vietnam and Iraq Wars: Lessons for the Future

An interdisciplinary analysis of the Vietnam War and the American-led war with Iraq. Course focuses on the reasons that America lost in Vietnam, the reasons it won in Iraq, and the lessons these conflicts provided for America's future. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: sophomore standing

PEA_ST 2110: Perspectives on Peace in the Middle East

This course examines conflict theories, international relation theories and Middle Eastern politics. It is intended as a comprehensive applied study of these theories. The initial weeks will cover the major conflict theories including social learning theory, social identity theory, relative deprivation theory, human needs theory, and rational choice theory. The focus of this course will primarily be on conflicts and peace efforts of the Middle East including but not limited to: the Arab Spring, the Israeli-Palestinian conflict, Jordanian-Palestinian identity issue, peace efforts in the Middle East. Ultimately, students should explore ways to bridge the theories learned and apply them to conflicts, negotiation and peace efforts in the Middle East.

Credit Hours: 3

PEA_ST 2180: Undergraduate Seminar I in Peace Studies

Conflict Resolution in Theory and Practice. Conflicts are studied in the light of the social and behavioral sciences.

Credit Hours: 3

Prerequisites: PEA_ST 1050 or instructor's consent

PEA_ST 2181: Undergraduate Seminar II in Peace Studies

Contemporary International Conflict: A readings and research seminar in which students will address such problems as global conflicts, the Arms Race and disarmament, global development.

Credit Hours: 3

Prerequisites: PEA_ST 1050 or instructor's consent

PEA_ST 2182: Critical Dialogues: Nonviolence in Peace/Democracy Movements

(same as SOCIOL 2182). History and theory of movements for peace, justice, and democracy. Development of violent and nonviolent tactics

and factions in movements; relationship to state authority. Cases such as Gandhi's Independence, American Civil Rights, Arab Spring, and Occupy movements.

Credit Hours: 3

Prerequisites: PEA_ST 1050 or instructor's consent

PEA_ST 2183: Undergraduate Seminar IV in Peace Studies

Images of War and Peace. Study of war and peace in philosophical and religious systems, film, poetry, art, fiction, and the media.

Credit Hours: 3

Prerequisites: PEA_ST 1050 or instructor's consent

PEA_ST 2200: Nuclear Weapons: Environmental, Health and Social Effects

(same as HLTH_SCI 2200 and SOCIOL 2281). Environmental consequences of the nuclear arms race, "regional" nuclear war, and weapons testing for human health, agriculture, and society. Examining "a world without nuclear weapons"; political dialogue on proliferation; Iran, North Korea, and nuclear weapons conventions. Graded on A-F basis only.

Credit Hours: 3

PEA_ST 2201: Topics in Peace Studies-General

Organized study of selected topics in Peace Studies. Subjects and credit hours may vary from semester to semester.

Credit Hour: 2-3

Recommended: sophomore standing

PEA_ST 2220: America in the 1960's

(same as HIST 2220). Examines the political and cultural main currents of the 1960s. Emphasizes the challenges mounted by protest groups and the responses of America's political leadership to the ferment of the period.

Credit Hours: 3

Prerequisites: sophomore standing

PEA_ST 2255: Youth, Islam, and Global Cultures

(same as SOCIOL 2255). Youth subcultures and the social issues and problems faced by youth, focusing on the Islamic world and Muslim immigrants, in the United States and elsewhere. Social and behavioral theories and concepts such as paths to modernization, Orientalism, post-colonialism, population movements, social construction, identity, and recognition will be illustrated.

Credit Hours: 3

PEA_ST 2280: Race, Democracy, and Violence in Cuba and Haiti

(same as SOCIOL 2280). A sociological approach to understand race/ethnicity, identity, citizenship, human rights, violence, and political and economic systems in the Caribbean. Comparisons of the culture, politics, and historical trajectories of Cuba and Haiti using Post-Colonial and Feminist theories. Graded on A-F basis only.

Credit Hours: 3

PEA_ST 2284: Critical Dialogs: Global Environmental Policy Conflicts

(same as SOCIOL 2284). Climate change, water supplies, food, sustainability, industrialization, and chemical, oil, radioactive pollution. Activity of transnational corporations, social harm, and formulation of international policies. Analysis of alternatives using criteria of justice: distribution, recognition, participation, legality.

Credit Hours: 3

PEA_ST 2285: Large Corporations, Economic Crisis, Social Responsibility

(same as SOCIOL 2285). Institutional power of the corporate CEO; ethical regulatory restraint. Historical contexts of economic crisis. Theories of justice, alternative concepts of justice in popular culture. Politics of policy issues in prosecution and criminalization of corporate behavior. Graded on A-F basis only.

Credit Hours: 3

PEA_ST 2286: Technological Futures, National Security, and Civil Liberties

(same as SOCIOL 2286). Contemporary practices and future trends in data collection and mining by the NSA and by businesses. The interplay of government and corporate power, and possibilities of regulation and maintenance of privacy and civil liberties. The development of digital intellectual copyright and its consequences on patterns of dissemination of knowledge.

Credit Hours: 3

PEA_ST 2320: Literature of Spanish Civil War

(same as SPAN 2320). Study of the Spanish Civil War: History, Politics, Literature. May not be included in the area of concentration in Spanish.

Credit Hours: 3

Prerequisites: sophomore standing

PEA_ST 2321: Germany in War and Peace: Division and Unity 1945-89

This course will compare notions of war and peace in East (German Democratic Republic) and West Germany (Federal Republic of Germany), 1945-1989. In particular, there are three main ways to think about war and peace: 1. Dealing with the Nazi past; 2. Dealing with the Cold War present; Negotiating violence and peace within various dissent and peace movements.

Credit Hour: 2-3

PEA_ST 2410: Philosophies of War and Peace

(same as PHIL 2410). Moral issues about the recourse to war by the nation and the individual's obligations to participate. The nature of peace, social and personal. Special attention to the Vietnam War and the nuclear age.

Credit Hours: 3

PEA_ST 2490: Introduction to Native Studies

(Same as ENGLSH 2490) Introduction to the field of Native Studies. Topics include indigenous knowledge, culture change and continuity,

history and misrepresentation, politics and political history, and global indigenous relationships. Graded on A-F basis only.

Credit Hours: 3

PEA_ST 2550: Human Rights, Law, War and Peace

Interdisciplinary exploration of how human rights, law, war and peace are connected through an analysis of various theories and contemporary examples, which may include issues regarding citizenship in the United States today, the regulation of economic markets in the U.S. today, state surveillance, the military industrial complex, the manner in which gender affects the experience of warfare and individuals

Credit Hours: 3

PEA_ST 2600: CAFO: Concentrated Animals, Deep Ecology

Throughout the ages humans have toiled and tilled the land confirming their role as integral providers as well as graceful recipients of nature's bounty. The significant metamorphosis that this gentle and cautious stewardship of the earth has undergone, necessitates close scrutiny. This multi-disciplined humanities course will consider the prose of the human community as it intersects widespread industrialized animal production with its inevitable social, economic and environmental realities. Eco-Feminist readings and the Fine Arts with its theoretical underpinnings associated with a liberal arts aesthetic will invite a wider perspective.

Credit Hours: 3

PEA_ST 2710: Politics and the Military

(same as POL_SC 2710). Comparative study of post-cold war civil-military relations; military as an interest group, change agent, policy instrument and competitor of civilian politicians.

Credit Hours: 3

PEA_ST 2810: Think Global: Fundamentals of Globalization and Digital Technologies

(same as JOURN 3510, T_A_M 2810 and GERMAN 3510). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Sophomore standing or instructor's consent

PEA_ST 3003: Topics in Peace Studies - Behavioral Science

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

Credit Hour: 2-3

Prerequisites: sophomore standing or instructor's consent

PEA_ST 3005: Topics in Peace Studies - Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: sophomore standing

PEA_ST 3005H: Topics in Peace Studies - Humanities - Honors

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: sophomore standing. Honors eligibility required

PEA_ST 3130: Foreigners and Dangerous Women in Greek and Latin Literature

(same as CL_HUM 3000). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed both their own values and prejudices.

Credit Hours: 3

PEA_ST 3140: Art of War and Peace

Exploration of selected visual art pieces and consideration of humanistic concerns during times of war and peace from various perspectives including a peace studies perspective. Viewing and discussing art within varied selected historical and cultural contexts that generated the imagery. Includes visits to studios and galleries. May be repeated for credit.

Credit Hour: 2-3

PEA_ST 3230H: Terrorism and Conflict Resolution - Honors

Religious, ethnic, ideological movements; state and international reactions. Case studies from South America, Europe, Africa, Asia. Identifying problems, possible resolution. Dramatized thru discussions, documentaries, role-playing; short term paper, exams.

Credit Hours: 3

Prerequisites: Honors eligibility required

PEA_ST 3280: Internship in Peace Studies

Students work in a peace-related agency or institution for 1 to 3 credit hours. Repeatable for maximum of 6 hours. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: departmental consent

PEA_ST 3330: Environmental Justice

(same as SOCIOL 3330). Environmental justice refers to the ways in which the "cost and benefits" of modern industrial society are distributed among social groups. This course is concerned with justice, not as an abstract concept, and inequality not in terms of numbers in a bank account. Social justice or inequality are lived, embodied experiences. An individual's likelihood of experiencing environmental harm is related to intersecting gender, race and class formations, among other things. Justice or inequality is not only embodied, it also happens in places--national and regional differences matter. In this course we will look at some of the extensive literature documenting the ways in which communities of color and poor communities are subject to disproportionate environmental risks. In addition, we will focus on gender as an important category in understanding environmental inequality. Graded on A-F basis only.

Credit Hours: 3

PEA_ST 3350: Readings in Peace Studies

Students may receive 1 to 3 credit hours for doing readings and research in a particular area of peace studies. At least one paper will be required. Repeatable for a maximum of 6 hours.

Credit Hour: 1-3

Prerequisites: instructor's consent

PEA_ST 3400: Politics of the Media

(same as SOCIOL 3400). We look at the history and viability of the public sphere in the United States and the integral role of the media to its vitality. We analyze the impact of current trends toward media concentration and debate related issues of bias, censorship, and social control.

Credit Hours: 3

PEA_ST 3401: Global Health

(Same as HLTH_SCI 3400). An introduction to public health in a global context, with an emphasis on understanding how disparities in socioeconomic status, differences in political and national health care systems and the work of international organizations impact health in communities around the world. Graded on A-F basis only.

Credit Hours: 3

PEA_ST 3420: America's Environmental Experience

(same as HIST 3420). Team-taught analysis of American thought and action on physical environment during 19th-20th centuries. Relation between politics, economics, technological change, environmental quality; roles of science, law, regulatory agencies, grassroots action.

Credit Hours: 3

PEA_ST 3440: After the Fact: Holocaust in Contemporary History, Art & Literature

(same as GERMAN 3440). Explores responses to the Holocaust from numerous perspectives. Considers how the Holocaust is remembered, memorialized, and debated in a variety of national contexts. Touches on historical, philosophical, and aesthetic points of view.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

PEA_ST 3490: Native Writing and Representation

(same as ENGLSH 3490). Survey of native writing and representation from the late eighteenth century to the present, encompassing a diverse range of tribes and forms. Material will be drawn from tribes inhabiting the North American continent, but global indigenous relationships will also be addressed. Graded on A-F basis only.

Credit Hours: 3

PEA_ST 3496: Digital Indigenous Studies

(same as GEOG 3496). This course introduces students to Indigenous studies in a digital world. The course begins with study of Indigenous sovereignty and representation, and moves quickly to critical and theoretical readings in new media, tracing both the historical impact of digital technologies (such as GIS) on Native communities, and the ways that both urban and rural Native communities have engaged in

innovative digital projects that expand the way we understand information and storytelling in digital environments. The course materials will cover a wide range of platforms and audio-visual genres, from documentary, community video, and animation productions, to GIS, video games, and social media sites. Students will engage with both scholars and artists working with new media through a program of public lectures, classroom visits, and Skype interviews. All interview will be archived as podcasts from the course website. Students will write weekly short response papers and produce independent audio-visual projects over the course of the semester, with opportunities to revise their work leading up to substantial final projects. The course will also integrate community outreach into the curriculum through online participation of students from the Kiowa Kids, an Indigenous language immersion and storytelling program.

Credit Hours: 3

PEA_ST 3496H: Digital Indigenous Studies - Honors

(same as GEOG 3496H). This course introduces students to Indigenous studies in a digital world. The course begins with study of Indigenous sovereignty and representation, and moves quickly to critical and theoretical readings in new media, tracing both the historical impact of digital technologies (such as GIS) on Native communities, and the ways that both urban and rural Native communities have engaged in innovative digital projects that expand the way we understand information and storytelling in digital environments. The course materials will cover a wide range of platforms and audio-visual genres, from documentary, community video, and animation productions, to GIS, video games, and social media sites. Students will engage with both scholars and artists working with new media through a program of public lectures, classroom visits, and Skype interviews. All interview will be archived as podcasts from the course website. Students will write weekly short response papers and produce independent audio-visual projects over the course of the semester, with opportunities to revise their work leading up to substantial final projects. The course will also integrate community outreach into the curriculum through online participation of students from the Kiowa Kids, an Indigenous language immersion and storytelling program. Prerequisites: Honors eligibility required

Credit Hours: 3

PEA_ST 3520: Collective Behavior

(same as SOCIOL 3520). Analysis of crowd behavior and related phenomena: rumors, disasters, fashions. Social responses to unclear, dangerous or unjust conditions. The dynamics of conflict, consensus and change.

Credit Hours: 3

PEA_ST 3521: Group Decision Making Processes

(same as COMMUN 3571). Procedures and techniques for interpersonal communication and decision making in small groups.

Credit Hours: 3

Prerequisites: sophomore standing

PEA_ST 3522: New Media, Conflict and Control

(same as SOCIOL 3522) This course will explore the increasing role of new media tools in conflict and surveillance. Examples from recent conflicts will illustrate how citizens and regimes use new media to

communicate, report, mobilize, monitor, and/or control. Students will utilize new media as they research instances of democracy and control.

Credit Hours: 3

PEA_ST 3550: War and Democracy in Late 5th c. BCE Athens

(same as CL_HUM 3550). War and Democracy in Late 5th c. B.C.E. Athens explores the discourse on war and peace in Athenian texts and art that survives from the last quarter of the 5th century B.C.E. This was a period of adamant, unrelenting warfare: the Athenians were fighting the Spartans, Sparta's allies, unaligned cities and several of their own subject states.

Credit Hours: 3

Recommended: any 2000 level CL_HUM course

PEA_ST 3600: Criminology

(same as SOCIOL 3600). Sociology of law; constitutional, psychological, sociological theories of criminal behavior; process of criminal justice; treatment of corrections; control of crime.

Credit Hours: 3

PEA_ST 3610: Ireland, 1100s to 1850

(same as HIST 3610). Ireland, from Conquest to Famine: Ireland's history as the first British Colony, from the conquests of the 1100s and 1500s-1600s to the Irish rebellion of 1798 and the Great Famine and mass emigration of 1845-50.

Credit Hours: 3

Prerequisites: sophomore standing

PEA_ST 3611: Ireland, 1850-1923

(same as HIST 3611). Ireland, from Famine to Partition: Irish history from the Great Famine of 1845-50 to the revolutions of 1916-23 that brought partial independence from Britain but partitioned Ireland into two hostile and trouble states.

Credit Hours: 3

PEA_ST 3612: Ireland, 1920-Present

(same as HIST 3612). Ireland, from Partition to the Present: After surveying the conflicts that led to Irish revolution and partition in 1916-23, the course focuses on the development of post partition Ireland and Northern Ireland, and on the violence that has scarred Northern Ireland since the 1960s.

Credit Hours: 3

Recommended: HIST 3610 and/or HIST 3611

PEA_ST 3780: World Political Geography

(same as GEOG 3780). Geographic factors in the development of political boundaries traditions, and societal perspectives. Spatial patterns and geopolitical processes are explored in selected regions of the world.

Credit Hours: 3

Prerequisites: GEOG 1100 or GEOG 1200 or sophomore standing

PEA_ST 3840: Nonviolence in the Modern World

(same as HIST 3840 and S_A_ST 3245). Readings on recent world history, emphasis on Gandhi and nonviolent tradition in America Europe and the Third World.

Credit Hours: 3

Prerequisites: sophomore standing

PEA_ST 3850: Islam and the West

(same as HIST 3850). This course provides a historical intellectual context for the raging debate on Islam and the West. It will discuss how Muslims conceived and reacted variously to the political and cultural challenge the West posed in the nineteenth and twentieth century. It will focus on the discourse on the reception of modernization in Islam. It will highlight the political and cultural energies invested by various Muslim elite communities to distinguish between modernization and Westernization. Islamic fundamentalism, the dominant Islamic expression of our time, will be usefully discussed in the context of this debate and praxis about modernization, authenticity, and Westernization.

Credit Hours: 3

Prerequisites: junior or senior standing

PEA_ST 3870: Social Revolution in Latin America

(same as HIST 3870 and SOCIOL 3870). Twentieth century social revolutions in selected Latin American countries.

Credit Hours: 3

PEA_ST 4003: Topics in Peace Studies - Behavioral Sciences

Upperclass Topics. Subject may vary from semester to semester.

Credit Hours: 3

Prerequisites: junior standing required

PEA_ST 4005: Topics in Peace Studies: Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

Credit Hour: 2-6

Prerequisites: sophomore standing or instructor's consent

PEA_ST 4080: American Foreign Policy from Colonial Times to 1898

(same as HIST 4080).

Credit Hours: 3

PEA_ST 4230: Women, Development and Globalization

(same as SOCIOL 4230 and WGST 4230 and BL_STU 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities.

Credit Hours: 3

Prerequisites: BL_STU 1332 or BL_STU 2200; SOCIOL 2200, WGST 1332 or WGST 2010

PEA_ST 4240: Theory and Practice of Theatre of the Oppressed
(same as THEATR 4240). Theory and practice of Augusto Boal's liberatory interactive theatre process, including application of techniques of specific social issues.

Credit Hours: 3

Prerequisites: instructor's consent

PEA_ST 4260: The Age of Ascendancy: U.S. Foreign Relations, 1945-Present

(same as HIST 4260). Surveys the Cold War in Europe and Asia, the Korean and Vietnam Wars, and Middle East policy.

Credit Hours: 3

Prerequisites: sophomore standing

PEA_ST 4287: Empire: Intellectual History, Literature, and Society

(same as REL_ST 4287; cross-leveled with PEA_ST 7287). Intellectuals and writers passionately debated the wisdom of colonies, free trade, and war as economies became increasingly global over the centuries. The proponents, critics, and interpreters of Empire will offer us rich examples of themes and theories in the culture of specific nations and eras.

Intellectual life will be studied in the context of developments in social inequality, the culture of classes, media of communication, education, identities, transnational governance, and the nation-state. The course will be offered with different national and historical foci under different instructors, and may be repeated for credit with different instructors. Counts as the capstone experience for Peace Studies and is open to majors of other disciplines.

Credit Hours: 3

Prerequisites: junior standing

Recommended: senior standing

PEA_ST 4288: Law and Society: Corporate and White Collar Crime and Malfeasance

(cross-leveled with PEA_ST 7288). Instances of corporate crime and ethical misconduct analyzed through major theories of the sociology of law including critical legal studies, Legal Realism, sociological jurisprudence, collective representation theory, state-corporate crime, rationalization of legal institutions/ critical theory, and post-structuralism. Other topics: Corporate crime in the media and in novels and popular culture, appropriate sentencing, global corporate crime.

Credit Hours: 3

Prerequisites: at least junior standing

Recommended: senior standing, 3.0 or above GPA, interest in graduate school

PEA_ST 4330: Science and Technology of Terrorism and Counterterrorism

(same as NU_ENG 4330). Terrorism has been a familiar tool of political conflict, and it has assumed greater importance during the past twenty years. This subject has been treated by political scientists in various forms, but the scientific and technological aspects of different forms of terrorism cannot be found in a single place. It is important for persons who propose counter measures to understand the basics of different

types of terrorism such as for instance the nature of chemical agents, their properties such as toxicity, etc. in order to build better defense systems.

Credit Hours: 3

Prerequisites: instructor's consent

PEA_ST 4331: Nonproliferation Issues for Weapons of Mass Destruction

(same as NU_ENG 4331). Nonproliferation impact on technology and world events.

Credit Hours: 3

Prerequisites: junior or senior standing required or instructor's consent

PEA_ST 4341: Building Communities from the Grassroots

(Same as RU_SOC 4341). Introduction and application of basic community development concepts, methods and practical skills for involving and empowering local citizens and leaders effectively in community-based efforts regardless of the issue.

Credit Hours: 3

Prerequisites: Instructor's consent required

PEA_ST 4360: Economic Development

(same as ECONOM 4360). The study of less-developed countries including problems of measuring economic growth, analysis of sources of economic growth, causes of changes in economic and social structure, development and trade policies. The consequences of goals and assumptions for development policy are analyzed.

Credit Hours: 3

Prerequisites: ECONOM 3229, ECONOM 3251 or ECONOM 4351

PEA_ST 4410: Politics and War

(same as POL_SC 4410). Why do wars occur? The function of force and uses of a threat of force. Problems of national security strategy and arms control.

Credit Hours: 3

Prerequisites: junior standing required

PEA_ST 4440: Ethical Issues in Communication

(same as COMMUN 4440). Exploration and analysis of ethical dimensions intrinsic to human communication.

Credit Hours: 3

Prerequisites: junior standing or departmental consent

PEA_ST 4480: War Crimes and Genocide

(same as HIST 4480). This course will explore the development of international law, international consciousness, and U.S. Foreign policy on the two distinct but often related issues of war crimes and genocide during the late 19th and throughout the 20th centuries.

Credit Hours: 3

PEA_ST 4510: Western Europe's Foreign Policy

Comparison of foreign policies of the major Western European countries; their roles within the European community. Study of institutions and

functioning of the European community and its potential as an emerging world power.

Credit Hours: 3

Prerequisites: junior standing

PEA_ST 4520: Political Sociology

(same as SOCIOL 4520). Social bases of power and politics, economic and political elites, the political economy of the advanced societies, sources of political conflict and change. MA core course.

Credit Hours: 3

Recommended: SOCIOL 3200, SOCIOL 3510, SOCIOL 3520, or SOCIOL 3700

PEA_ST 4550: Gender and Human Rights in Cross Cultural Perspective

(same as WGST 4550 and SOCIOL 4550). This course focuses on the global discourse on human rights and gender, emphasizing cross-cultural theories. Course includes the meaning of rights, Western and nonwestern perspectives, feminist contributions, important substantive debates, violations, policymaking and activism.

Credit Hours: 3

Prerequisites: WGST 1120 or SOCIOL 2200; senior standing required

(same as PHIL 4600). Contemporary and/or historical theories of justice and the state. Utilitarianism, liberalism, libertarianism, Marxism, Communitarianism and feminism may be among the views covered.

Credit Hours: 3

Prerequisites: sophomore standing and two courses in Philosophy; or instructor's consent

PEA_ST 4810: Case Studies in an Inter/Multicultural World

(same as GERMAN 4810 and T_A_M 4810). This inter-departmental course examines the ways in which people across the globe are affected every day by an unprecedented array of linkages that defy geographic and political boundaries. Also serves as one of the seminars for the certificate in Digital Global Studies. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Sophomore standing; 2.75 GPA or instructor's consent

PEA_ST 4830: Journalism and Conflict

(same as JOURN 4730). Introduction to the basic principles of conflict theory and negotiation, including the sources of conflict, why conflict escalates and what the conditions are for de-escalation, all with a special emphasis on the implications for the working journalist.

Credit Hours: 3

PEA_ST 4940: Leadership and Ethics

(same as NAVY 4940). The curriculum provides a foundation in leadership, ethical decision making, the Law of Armed Conflict and the military justice system. Course explores ethical theories and helps students to build an ethical framework for decision making. Topic areas include: Kant, Utilitarianism, Stoicism, Constitutional Paradigm, Uniform Code of Military Justice and Law of Armed Conflict. Designed as a

capstone course for juniors and seniors enrolled in NROTC it is open to all MU students.

Credit Hours: 3

Prerequisites: junior standing

PEA_ST 4970: Senior Thesis I

Senior essay on a Peace Studies topic requiring major research.

Credit Hours: 3

Prerequisites: PEA_ST 1050, senior standing, and instructor's consent

PEA_ST 4980: Peace Studies Abroad - Social Sciences

A study abroad experience organized by MU and led by MU faculty. Provides students with interdisciplinary study in foreign cultures, career development, and global experience with issues such as war, domestic conflict, sustainable development, human rights, and nonviolent movements for peace and justice. May be repeated for credit.

Credit Hour: 3-6

PEA_ST 7003: Topics in Peace Studies - Behavioral Sciences

Upperclass Topics. Subject may vary from semester to semester.

Credit Hours: 3

PEA_ST 7080: American Foreign Policy from Colonial Times to 1898

(same as HIST 7080).

Credit Hours: 3

PEA_ST 7240: Theory and Practice of Theatre of the Oppressed

(same as THEATR 7240). Theory and practice of Augusto Boal's liberatory interactive theatre process, including application of techniques of specific social issues.

Credit Hours: 3

Prerequisites: instructor's consent

PEA_ST 7260: The Age of Ascendancy: U.S. Foreign Relations, 1945-Present

(same as HIST 7260). Surveys the Cold War in Europe and Asia, the Korean and Vietnam Wars, and Middle East policy.

Credit Hours: 3

PEA_ST 7287: Empire: Intellectual History, Literature, and Society

(same as REL_ST 7287; cross-leveled with PEA_ST 4287). Intellectuals and writers passionately debated the wisdom of colonies, free trade, and war as economies became increasingly global over the centuries. The proponents, critics, and interpreters of Empire will offer us rich examples of themes and theories in the culture of specific nations and eras. Intellectual life will be studied in the context of developments in social inequality, the culture of classes, media of communication, education, identities, transnational governance, and the nation-state. The course will be offered with different national and historical foci under different instructors, and may be repeated for credit with different instructors. Counts as the capstone experience for Peace Studies and is open to majors of other disciplines.

Credit Hours: 3

PEA_ST 7288: Law and Society: Corporate and White Collar Crime and Malfeasance

(cross-leveled with PEA_ST 4288). Instances of corporate crime and ethical misconduct analyzed through major theories of the sociology of law including critical legal studies, Legal Realism, sociological jurisprudence, collective representation theory, state-corporate crime, rationalization of legal institutions/ critical theory, and post-structuralism. Cases to be analyzed might include mortgage lending fraud and malpractice, insider trading, pyramid schemes, the Erie Railroad scandals, and Enron, Worldcom, Tyco, and other instances in the hi tech collapse of 2001. Other topics: Corporate crime in the media and in novels and popular culture, appropriate sentencing, global corporate crime.

Credit Hours: 3

PEA_ST 7520: Political Sociology

(same as SOCIOL 7520). Social bases of power and politics, economic and political elites, the political economy of the advanced societies, sources of political conflict and change. MA core course.

Credit Hours: 3

Prerequisites: SOCIOL 3200, SOCIOL 3510, SOCIOL 3520, or SOCIOL 3700

PEA_ST 7550: Gender and Human Rights in Cross Cultural Perspective

(same as SOCIOL 7750 or WGST 7550). Focuses on the global discourse on human rights and gender, emphasizing cross-cultural theories. Course includes the meaning of human rights, western and nonwestern perspectives, feminist contributions, important substantive debates, violations, policymaking and activism.

Credit Hours: 3

PEA_ST 7640: Ethical Issues in Communication

(same as COMMUN 7640). Exploration and analysis of ethical dimensions intrinsic to human communication.

Credit Hours: 3

PEA_ST 7980: Peace Studies Abroad

A study abroad experience organized by MU and led by MU faculty. Provides students with interdisciplinary study in foreign cultures, career development, and global experience with issues such as war, domestic conflict, sustainable development, human rights, and nonviolent movements for peace and justice. May be repeated for credit.

Credit Hour: 3-6

Personal and Financial Planning Courses

FINPLN 1183: Financial Survival

Examines financial management issues needed to survive the critical college years-credit/credit cards, budgeting/planning, financial aid, loans, common financial mistakes, debt management, setting financial goals, effective use of financial resources. Graded on S/U basis only.

Credit Hour: 1

FINPLN 2083: Financial Planning Careers

This course will provide the student with a broad, general introduction to careers in financial planning. Through readings, introspection, discussions, and guest speakers, the student will develop an understanding of the field.

Credit Hour: 1

FINPLN 2183: Personal and Family Finance

Individual and family finance, with particular emphasis on financial planning, savings, insurance, investments, taxes, use of credit, and financial aspects of housing. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: MATH 1100 with grade of C- or above

FINPLN 2185: Consumer as Entrepreneur

The American economic system and marketplace from both a consumer and an entrepreneurial perspective.

Credit Hours: 3

FINPLN 3282: Financial Counseling

Practical course on client financial counseling. Course emphasizes client money issues including budgeting, credit, debt management, bankruptcy and other issues. Students also will learn counseling strategies and communication skills to motivate clients to change negative behaviors and/or adopt positive behaviors.

Credit Hours: 3

Prerequisites or Corequisites: FINPLN 2183 or instructor's consent

FINPLN 3283: Financial Planning: Computer Applications

Development of expertise in analyzing and understanding family financial case situations. Applications include the use of leading financial planning software, as well as applications with spreadsheets.

Credit Hours: 3

Prerequisites: FINPLN 2183 or equivalent

FINPLN 3285: Financial Planning: Real Estate

Family housing and real estate investments as components of the family's quality of life and asset portfolio.

Credit Hours: 3

Prerequisites: FINPLN 3283; ECONOM 1014 and ECONOM 1015; STAT 1300 or STAT 2500

FINPLN 4000: Problems in Personal Financial Planning

Supervised and independent work.

Credit Hour: 1-99

Prerequisites: instructor's consent

FINPLN 4183: Sales Management

Prepares students to enter financial service occupations dependent upon sales and sales management. Attention given to skill development, evaluation of current and best practices.

Credit Hours: 3

Prerequisites or Corequisites: FINPLN 3283 or instructor's consent

Prerequisites: junior standing; acceptance into professional program; FINPLN 2183

FINPLN 4187: Tax Planning

Principles, current law and practice of income taxation and its impact on personal financial planning for individuals, couples and families in their roles as investors, employees, and business owners. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: FINPLN 2183, FINPLN 3283 or instructor's consent. Not available to Pre-Personal Financial Planning majors

FINPLN 4188: Community Agencies and Volunteerism

Service learning in a non-profit community social support agency. Examines economic role of non-profits and volunteerism. Students engage in service and evaluate experience in seminar. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: FINPLN 4187 or FINPLN 7187 or instructor's consent. Not available to Pre-Personal Financial Planning majors

FINPLN 4189: Financial Planning: Applied Tax Law

This course trains students to become volunteer tax preparers and provides the opportunity to use their skills in a lab setting to prepare personal tax returns for U.S. citizens and resident aliens living in central Missouri. The course also discusses tax law, especially as it applies to clients of the Volunteer Income Tax Assistance site.

Credit Hours: 3

Prerequisites: FINPLN 4187

FINPLN 4318: Topics in Personal Financial Planning

Selected current topics in field of interest.

Credit Hour: 1-99

Prerequisites: vary with topic

FINPLN 4355: Recent Trends in Personal and Financial Planning

For upper-class students who wish additional knowledge and understanding in specific subject matter areas.

Credit Hour: 1-3

Prerequisites: vary with the topic

FINPLN 4380: Assessing the American Dream

A systems perspective examining ways choice and culture shape American levels and standards of living. The impact of trends in personal and family values, technology, the economy, mass media and social movements on household resource management.

Credit Hours: 3

Prerequisites: ENGLSH 1000

Recommended: junior standing

FINPLN 4382: Financial Planning: Risk Management

Analysis of family financial risks and conservation of family assets via risk management, with primary focus on personal lines of insurance.

Credit Hours: 3

Prerequisites: FINPLN 3283; ECONOM 1014 and ECONOM 1015; STAT 1300 or STAT 2500. Not available to Pre-Personal Financial Planning majors

FINPLN 4383: Financial Planning: Investment Management

(cross-leveled with FINPLN 7383). Introduction to investment for family financial planning. Not available to Pre-Personal Financial Planning majors

Credit Hours: 3

Prerequisites or Corequisites: ECONOM 3229

Prerequisites: FINPLN 2183 and 3283; STAT 1300 or STAT 2500

FINPLN 4386: Financial Planning: Employee Benefits and Retirement Planning

Fundamentals of employee benefits and retirement planning. Consideration of options via government, employer, financial markets. Special circumstances of women, part-time, and contingent workers considered.

Credit Hours: 3

Prerequisites: FINPLN 4382, FINPLN 4383. Not available to Pre-Personal Financial Planning majors

FINPLN 4387: Consumer and Household Economics

Economic theory of consumer and household behavior, focusing on rationality, uncertainty, optimal search, heuristics, interactive decisions and considering implications for financial decision making and policy analysis.

Credit Hours: 3

Prerequisites: ECONOM 1014 or equivalent

FINPLN 4388: Effective Consumer Decision-Making

Theory, concepts, principles underlying consumer decision-making, including rationality, uncertainty, optimal search, heuristics, interactive decisions; strategies for their application in the marketplace.

Credit Hours: 3

Prerequisites: ECONOM 1014 and ECONOM 1015

FINPLN 4389: Financial Planning: Capstone

The course emphasizes the use of analytical tools to develop effective financial plans for individuals and households.

Credit Hours: 3

Prerequisites: FINPLN 4187, FINPLN 4382, FINPLN 4383 or instructor's consent. Not available to Pre-Personal Financial Planning majors

FINPLN 4393: Financial Planning: Estate and Gift Planning

Fundamentals, practical problems and solutions in basic estate and gift planning, business succession planning, and taxation issues.

Credit Hours: 3

Prerequisites: FINPLN 4382 and FINPLN 4383 or instructor's consent. Not available to Pre-Personal Financial Planning majors

FINPLN 4418: Topics in Personal Financial Planning

Selected current topics in field of interest.

Credit Hour: 1-99

Prerequisites: instructor's consent

FINPLN 4483: Financial Success

Examines financial management issues needed to survive the critical post-college years - managing educational debt; after-school budgeting; auto, health, and other forms of insurance; retirement planning and other investment issues; setting financial goals; effective use of financial resources. Graded on S/U basis only.

Credit Hour: 1

FINPLN 4992: Readings in Personal Financial Planning

Credit Hour: 1-99

Prerequisites: restricted to Personal Financial Planning Majors only

Recommended: 2-3 hours in Personal Financial Planning

FINPLN 4993: Internship in Personal Financial Planning

Credit Hour: 1-99

Prerequisites: instructor's consent

FINPLN 7000: Problems in Personal Financial Planning

Prerequisites: Restricted to Personal Financial Planning Majors Only.

Credit Hour: 1-99

Prerequisites: 4000-level course in field of problem and instructor's consent

FINPLN 7001: Topics in Household Economics and Finance

Selected current topics in field of interest.

Credit Hour: 1-99

FINPLN 7083: Teaching Personal Finance Literacy

(same as LTC_V 7083). Principles and practices of teaching personal finance with particular emphasis on income, money management, spending and credit, and savings and investing. Graded on A-F basis only.

Credit Hours: 3

FINPLN 7085: Problems in Household Economics and Finance

Supervised independent work related to household economics and finance.

Credit Hour: 1-99

Prerequisites: instructor's consent

FINPLN 7087: Seminar in Household Economics and Finance

Reports and discussion of recent research and practice in household economics and finance.

Credit Hour: 1-4

FINPLN 7183: Fundamentals of Personal Financial Planning

Issues and concepts related to the financial planning process, including determination of financial goals and expectations and analysis and evaluation of personal and family financial data with emphasis on savings, insurance, investments, taxes, credit and financial aspects of housing.

Credit Hours: 3

FINPLN 7187: Financial Planning: Tax Planning

Principles, current law and practice of income taxation and its impact on personal financial planning for individuals, couples and families in their roles as investors, employees, and business owners. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: FINPLN 2183, FINPLN 3283, ACCTCY 2010 or equivalent or instructor's consent

FINPLN 7282: Advanced Financial Counseling

Students will learn client-centered financial counseling. Includes development of interviewing techniques, focus on personality strengths and weaknesses, creation of the sales process, and the role of technology in counseling. Graded on A-F basis only.

Credit Hours: 3

FINPLN 7355: Recent Trends in Personal Financial Planning

For upper-class and graduate students who wish additional knowledge and understanding in specific subject matter areas.

Credit Hour: 1-3

Prerequisites: vary with the topic

FINPLN 7380: Assessing the American Dream

A systems perspective examining ways choice and culture shape American levels and standards of living. The impact of trends in personal and family values, technology the economy, mass media and social movements on household resource management.

Credit Hours: 3

FINPLN 7382: Financial Planning: Risk Management

Analysis of family financial risks and conservation of family assets via risk management, with primary focus on personal lines of insurance.

Credit Hours: 3

Prerequisites: FINPLN 3283; 5-6 hours of Economics; STAT 1300 or STAT 2500

FINPLN 7383: Financial Planning: Investment Management

Management of family financial investments.

Credit Hours: 3

Prerequisites: FINPLN 3283; 5-6 hours of Economics; STAT 1300 or STAT 2500

FINPLN 7386: Financial Planning: Employee Benefits and Retirement Planning

Fundamentals of employee benefits and retirement planning. Consideration of options via government, employer, financial markets. Special circumstances of women, part-time, and contingent workers considered.

Credit Hours: 3

Prerequisites: FINPLN 4382, FINPLN 4383, or instructor's consent

FINPLN 7387: Consumer and Household Economics II

(cross-leveled with FINPLN 7387). Economic theory of consumer and household behavior, focusing on rationality, uncertainty, optimal search, heuristics, interactive decisions and considering implications for financial decision making and policy analysis.

Credit Hours: 3

Prerequisites: ECONOM 4351 or equivalent

FINPLN 7388: Effective Consumer Decision-Making

Theory, concepts, principles underlying consumer decision-making, including rationality, uncertainty, optimal search, heuristics, interactive decisions; strategies for their application in the marketplace.

Credit Hours: 3

Prerequisites: FINPLN 2185; 5-6 hours of Economics

FINPLN 7389: Financial Planning: Capstone

The course emphasizes the use of analytical tools to develop effective financial plans for individuals and households.

Credit Hours: 3

Prerequisites: FINPLN 4187, FINPLN 4382, FINPLN 4383 or instructor's consent. Not available to Pre-Personal Financial Planning majors

FINPLN 7393: Financial Planning: Estate and Gift Planning

Fundamentals, practical problems and solutions in basic estate and gift planning, business succession planning, and taxation issues.

Credit Hours: 3

Prerequisites: FINPLN 4382 and FINPLN 4382

FINPLN 7412: Research Methods in Personal Financial Planning

Introduction to the scope, purpose and methods of research in consumer and family economics, with emphasis on economic survey methods.

Credit Hours: 3

Prerequisites: an introductory statistics course

FINPLN 7583: Personal Financial Issues of Older Adults

(same as H_D_FS 7583). Principles and practice of personal finance relevant to assessing and improving the financial security of older individuals. Topics covered include sources of income, management of cash flow, credit use and abuse, risk exposure, investment management, housing, and financial planning. Financial vulnerabilities of seniors will be explored. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Bachelor or Master's degree in human services, social work, mental health, nursing physical rehabilitation or psychology; Must be enrolled in Graduate Certificate in Geriatric Care Management program

FINPLN 7960: Readings in Household Economics and Finance

Readings in recent research in household economics and finance.

Credit Hour: 1-99

Prerequisites: instructor's consent

FINPLN 7993: Internship in Personal Financial Planning

Internship in Personal Financial Planning.

Credit Hour: 1-99

Prerequisites: instructor's consent; Restricted to Personal Financial Planning Majors Only

FINPLN 8001: Topics in Personal Financial Planning

Selected current topics in field of interest.

Credit Hour: 1-99

FINPLN 8085: Problems in Household Economics and Finance

Supervised independent work related to household economics and finance.

Credit Hour: 1-99

Prerequisites: instructor's consent

FINPLN 8087: Seminar in Household Economics and Finance

Report and discussion of recent research and practice in household economics and finance.

Credit Hour: 1-99

Prerequisites: instructor's consent

FINPLN 8090: Master's Thesis Research in Personal Financial Planning

Independent research leading to thesis or dissertation. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

FINPLN 8183: Military Personal Financial Readiness

Financial planning process applied to military personnel and their families. Focus on service member status; financial readiness; record-keeping; management of cash flow, risk, credit and debt, savings, investments, tax, savings; education planning, retirement and estate planning. Graded on A-F basis only.

Credit Hours: 3

FINPLN 8187: Professional Practices in Financial Planning

Practice management techniques for Financial Planners. Graded on A-F basis only.

Credit Hours: 3

FINPLN 8380: Family Systems

Exploration of the family as a system within the broader context of society.

Credit Hours: 3

FINPLN 8381: Theories and Research in Personal Financial Planning I

Course introduces students to the social science of family finances. Course covers the theories of family functioning, microeconomic theory related to family resource allocation decisions, the family as an economic unit, and the interaction of families and the economy. Graded on A-F basis only.

Credit Hours: 3

FINPLN 8382: Theories and Research in Personal Financial Planning II

Course reviews theories and empirical research in household financial decision-making, drawing from macroeconomic theory, theories of household behavior, lifecycle hypothesis, behavioral economics and finance, theories of behavioral change and psychological theories of family well-being. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: FINPLN 8381

FINPLN 8385: Housing and Real Estate

The study of real estate as a component to household wealth. Graded on A-F basis only.

Credit Hours: 3

FINPLN 8386: International Employee Benefits and Retirement Planning

This course develops the theory and application of international employee benefits and retirement planning. Universal theory will be applied to analyze existing programs in an international context. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: FINPLN 7183 and FINPLN 7383

FINPLN 8389: Financial Planning Case Studies

The analysis and development of appropriate presentations for effective financial plans.

Credit Hours: 3

FINPLN 8393: International Estate and Gift Planning

This course develops the theory and application of end of life planning in an international context. Core estate planning education will prepare students to sit for the CFP exam, while addressing issues prevalent in other countries. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: FINPLN 7183, FINPLN 7383

FINPLN 8450: Applied Research in Household Economics and Planning

Independent research not leading to a thesis. Report required. For students completing Master's in Personal Financial Planning.

Credit Hour: 1-99

Prerequisites: instructor's consent

FINPLN 8483: Family Economics

Multidisciplinary study of research on families as economic units. Examines trends in family income, wealth, labor market participation, household production, distribution of household resources, use of public goods, and underground economy.

Credit Hours: 3

FINPLN 8485: Human Resource Development and Allocation

Economic analysis of conditions, programs and policies related to development and use of human resources, with special reference to impact on families and households.

Credit Hours: 3

Prerequisites: FINPLN 4387 or instructor's consent

FINPLN 8486: Social Policy and the Family Economy

Economic analysis of public programs that directly affect well-being of families: income maintenance, goods transfers, employment, housing, health, transportation, taxes, etc.; consideration of underlying philosophies, policy alternatives.

Credit Hours: 3

Prerequisites: FINPLN 7387 or instructor's consent

FINPLN 8488: Household Financial Decision Making

This course provides a solid foundation for critical thinking and research on household financial decision making. A selective but extensive review of normative and descriptive theories and empirical studies pertinent to household financial decision making is provided. The focus is on developing a critical perspective in students that enables them to identify opportunities to advanced theory toward relevant applications through research on household financial decision making.

Credit Hours: 3

Prerequisites: instructor's consent. A knowledge of intermediate micro economics, introductory statistics, and introductory differential calculus is assumed

FINPLN 8500: Personal Financial Planning Capstone

Independent work on project approved by major advisor and CFP (R) Program Director. For students completing Master's in Personal Financial Planning. May be repeated for credit.

Credit Hour: 1-99

Prerequisites: instructor's consent

FINPLN 8960: Readings in Household Economics and Finance

Readings in recent research in household economics and finance.

Credit Hour: 1-99

Prerequisites: instructor's consent

FINPLN 9001: Topics in Household Economics and Finance

Selected current topics in field of interest.

Credit Hour: 1-99

FINPLN 9085: Problems in Household Economics and Finance

Supervised independent work related to household economics and finance.

Credit Hour: 1-99

Prerequisites: instructor's consent

FINPLN 9087: Seminar in Household Economics and Finance

Report and discussion of recent research and practice in household economics and finance.

Credit Hour: 1-99

Prerequisites: instructor's consent

FINPLN 9090: Doctoral Dissertation Research in Personal Financial Planning

Independent research leading to thesis or dissertation. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

FINPLN 9960: Readings in Household Economics and Finance

Readings in recent research in household economics and finance.

Credit Hour: 1-99

Prerequisites: instructor's consent

Philosophy Courses

PHIL 1000: General Introduction to Philosophy

Introduction to traditional philosophical problems and methods of philosophical enquiry. Consideration given to different philosophical theories on the nature of reality, man, nature and God; knowledge and how it is acquired; values and social issues.

Credit Hours: 3

PHIL 1000H: General Introduction to Philosophy - Honors

Introduction to traditional philosophical problems and methods of philosophical enquiry. Consideration given to different philosophical theories on the nature of reality, man, nature and God; knowledge and how it is acquired; values and social issues.

Credit Hours: 3

Prerequisites: Honors eligibility required

PHIL 1100: Introduction to Ethics

Introduction to different philosophical theories regarding when acts are morally right rather than wrong; when things are good rather than bad; nature of the "good life", nature of ethical reasoning and justification.

Credit Hours: 3

PHIL 1100H: Introduction to Ethics - Honors

Introduction to different philosophical theories regarding when acts are morally right rather than wrong; when things are good rather than bad; nature of the "good life", nature of ethical reasoning and justification.

Credit Hours: 3

Prerequisites: Honors eligibility required

PHIL 1150: Introductory Bioethics

This course approaches moral problems in biomedical and scientific research from a philosophical perspective. First, we'll familiarize ourselves with ethics and political philosophy. Then we'll study the ethical issues that arise in connection with a series of issues, including research involving human and animal subjects, eugenics, the human genome project, cloning and stem cell research. By thinking about these issues, we learn how to think critically about particular moral quandaries, as well as to uncover and examine some of our deepest moral commitments.

Credit Hours: 3

PHIL 1200: Logic and Reasoning

Methods of analyzing and evaluating arguments of all types. Uses both informal and formal techniques. Identifies informal fallacies and introduces elementary symbolic logic.

Credit Hours: 3

PHIL 1200H: Logic and Reasoning-Honors

Methods of analyzing and evaluating arguments of all types. Uses both informal and formal techniques. Identifies informal fallacies and introduces elementary symbolic logic.

Credit Hours: 3

Prerequisites: Honors eligibility required

PHIL 2000: Philosophical Ideas in Literature

Philosophical ideas and issues revolving around human freedom as these ideas and issues are embodied in great literary works from Plato through Dostoyevski to Burgess.

Credit Hours: 3

Prerequisites: sophomore standing

PHIL 2005: Topics in Philosophy-Humanities

Organized study of philosophical issues to which no regular course is devoted. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-3

Prerequisites: sophomore standing

PHIL 2010: The Philosophy of Film

(same as FILM_S 2010). Philosophical problems having to do with film. Topic may include the nature of films, the differences between fiction and documentary film, ethical issues with film and filmmaking.

Credit Hours: 3

PHIL 2100: Philosophy: East and West

(same as S_A_ST 2100). Compares the interpretation and role of philosophical concepts such as experience, reason, permanence, change, immortality, soul, God, etc., in Indian, Chinese and European traditions.

Credit Hours: 3

Prerequisites: sophomore standing

PHIL 2200: Philosophy and Intellectual Revolution

Examines such revolutions as the Copernican, Darwinian, Marxian and Freudian. What are the new views? How is our place in the universe affected? What puzzles arise in replacing old by new views?

Credit Hours: 3

Prerequisites: sophomore standing

PHIL 2300: Philosophy and Human Nature

Philosophical exploration and examination of theories of human nature with reference to relevant developments in such sciences as biology, psychology, and economics.

Credit Hours: 3

Prerequisites: sophomore standing

PHIL 2350: The Meaning of Life

Does life have meaning, or is it essentially meaningless, absurd? This course will examine some of answers philosophers have given to this and related questions.

Credit Hours: 3

PHIL 2400: Ethics and the Professions

Examination of ethical issues confronted by members of different professions such as medicine, law, business, journalism and engineering.

Credit Hours: 3

Prerequisites: sophomore standing

PHIL 2410: Philosophies of War and Peace

(same as PEA_ST 2410). Moral issues about the recourse to war by the nation and the individual's obligations to participate. The nature of peace, social and personal. Special attention to the Vietnam War and the nuclear age.

Credit Hours: 3

Prerequisites: sophomore standing

PHIL 2420: Ethical Issues in Business

Major theories of moral obligation and justice and their application to business practices. Corporate responsibility, government regulation, investment and production, advertisement, the environment, preferential hiring, etc. through case studies, legal opinions and philosophical analysis.

Credit Hours: 3

Prerequisites: sophomore standing

PHIL 2430: Contemporary Moral Issues

Review of the major contemporary ethical theories and their contribution to the resolution of major social issues such as euthanasia, suicide, abortion, capital punishment, violence and war. Emphasis on nature, interests, and rights of persons. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: sophomore standing

PHIL 2440: Medical Ethics

Considers moral issues posed by developments in biological sciences and medical technology. Topics may include: genetic engineering, abortion and euthanasia, distribution of health care.

Credit Hours: 3

PHIL 2500: Philosophy and Gender

(same as WGST 2500). A critical examination of central ideas and themes in feminist philosophical thought. Topics may include: sex, marriage, parenthood, reproduction, body image, pornography, prostitution.

Credit Hours: 3

Prerequisites: sophomore standing

PHIL 2600: Rational Decisions

Principles for making decisions in a rational way. Special attention to principles that use probabilities and utilities. Some discussion of decisions made in conjunction with other people, and decisions made for other people. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: sophomore standing and grade of C or better in MATH 1100 or MATH 1120

PHIL 2700: Elementary Logic

(same as LINGST 2700). Introduces a symbolic language for representing the structure of arguments. Presents precise rules for demonstrating the validity of arguments. Covers natural deduction for sentence and predicate logic. Develops skill in constructing derivations. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: sophomore standing and grade of C or better in MATH 1100 or MATH 1120

PHIL 2820: Introduction to Cognitive Science

(same as PSYCH 2820 and LINGST 2820). Cognitive science is the interdisciplinary study of the mind. After an overview of the foundations of cognitive science as a whole, we will see what particular sectors of it have to say about mental capacities such as vision, language, categorization, and social cognition.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: PSYCH 1000

PHIL 3000: Ancient Western Philosophy

(same as CL_HUM 3025). Philosophical thought on nature, knowledge, the gods, human life and society, from Thales to Augustine. Emphasis on Plato and Aristotle. The relevance of the ancients to contemporary life.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: one course in Philosophy

PHIL 3100: Medieval Philosophy

Major thinkers from St. Augustine through 14th century Ockhamists.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: one course in Philosophy

PHIL 3200: Modern Philosophy

Surveys critical and speculative thinking of modern period from Descartes to Kant in relation to scientific, religious and social movements.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: one course in Philosophy

PHIL 3400: 19th Century Philosophy

A careful and sympathetic study of some of the major thinkers of this period, notably Kierkegaard and Nietzsche.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: one course in Philosophy

PHIL 3500: Existentialism

The nature of human existence, the meaning of life, the relation of the individual to nature, society, and any gods that may be, according to Kierkegaard, Nietzsche, Heidegger, Sartre, de Beauvoir, Camus and others. Students are encouraged to come to grips with the issues in relation to their own lives.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: one course in Philosophy

PHIL 3600: 20th Century Philosophy

The course will be a survey of some of the notable philosophers/thinkers whose contributions have been made in the twentieth century.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: one course in Philosophy

PHIL 3700: Selected Modern Philosophers

Advanced study of a particular philosopher or a number of philosophers from the same school in the modern period. May be taken twice for credit with permission of the department.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: one course in Philosophy

PHIL 3800: Selected Contemporary Philosophers

Advanced study of a particular contemporary philosopher or philosophers. May be taken twice for credit with permission of the department.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: one course in Philosophy

PHIL 4001: Topics in Philosophy-General

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: sophomore standing and two courses in Philosophy, or instructor's consent; departmental consent for repetition

PHIL 4005: Topics in Philosophy-Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: sophomore standing and two courses in Philosophy, or instructor's consent, departmental consent for repetition

PHIL 4100: Philosophy of Language

(same as LINGST 4100). Examination of contemporary views of the relationship between language, minds, and the world.

Credit Hours: 3

Prerequisites: sophomore standing and PHIL 2700

Recommended: one other course in Philosophy

PHIL 4110: Advanced Logic

(same as LINGST 4110; cross-leveled with PHIL 7110). Presents the method of truth trees for sentence and predicate logic. Examines proofs concerning the decidability, soundness, and completeness of formal systems. Emphasizes the theory of formal systems. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: sophomore standing and PHIL 2700

PHIL 4120: Selected Topics in Logic

Elementary set theory. Modal logic, the logic of possibility and necessity.

Credit Hours: 3

Prerequisites: sophomore standing and either PHIL 2700 or PHIL 4110

PHIL 4130: Probability and Induction

This course studies probability, its various interpretations, and its basic principles. It identifies forms of reasoning that establish the probability of a conclusion. The methods of reasoning it treats are at the heart of science and practical affairs.

Credit Hours: 3

Prerequisites: sophomore standing and PHIL 2700

PHIL 4200: Metaphysics

Metaphysics studies what there is and how things are, most generally speaking. Topics may include realism versus nominalism, substance and attribute, facts, modality, identity and causality.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: Previous work in PHIL 1000, PHIL 3000 or PHIL 3200

PHIL 4210: Philosophy of Mind

Considers theories and arguments in contemporary philosophy of mind, focusing on the nature of mental states, their relation to brain states and the plausibility of various materialist theories of the mind.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: two Philosophy courses

PHIL 4220: Philosophy of Religion

Considers basis for and nature of religious beliefs.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: One course in Philosophy

PHIL 4300: Epistemology

An examination of contemporary philosophical theories concerning the nature, sources and limits of knowledge and justified belief.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: Previous work in PHIL 1000, PHIL 3000, PHIL 3200

PHIL 4400: Philosophy of Science

Why believe the scientific world-view? What, if anything, is the scientific method? Are today's theories really superior to past theories? Examines contemporary philosophical answers to such questions.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: two courses in Philosophy

PHIL 4410: Philosophy of History

Readings from classic and contemporary philosophers of history. Problems about nature and limits of historical knowledge; relation between history and other disciplines; the existence, nature, and kinds of historical laws.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: two courses in Philosophy

PHIL 4420: Philosophy of Biology

A survey of philosophical problems arising from consideration of evolutionary theory and the biological sciences. Topics may include reductionism, sociobiology, biological laws, and epistemic problems relating to evolutionary theory.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: two courses in Philosophy

PHIL 4500: Theories of Ethics

Normative and meta-ethical theories. Topics may include the rationality and objectivity of morality, the meaning of moral language, the differences between deontological, utilitarian and virtue theories.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: two courses in Philosophy

PHIL 4600: Political and Social Philosophy

(same as PEA_ST 4600). Contemporary and/or historical theories of justice and the state. Utilitarianism, Liberalism, Libertarianism, Marxism, Communitarianism and Feminism may be among the views covered.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: two courses in Philosophy

PHIL 4610: Philosophy of Law

What is law? Are there pre- or trans-legal rights? Is punishment justifiable? How can judicial decisions be justified? What are the relations between law and morality?

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: one course in Philosophy

PHIL 4620: Marxism

A philosophical examination of (a) the notion of critique as seen in Marx's early and middle writings, and (b) specific topics by such authors as Lenin, Lukacs and Plekhanov.

Credit Hours: 3

Prerequisites: Sophomore standing

Recommended: two courses in Philosophy

PHIL 4700: Aesthetics

Typical components of art; theories of art as representation, form, expression; relation of art to value.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: one course in Philosophy

PHIL 4800: Asian Philosophy

(same as S_A_ST 4800). This course traces the origins of Indian and Chinese philosophical world views. Included are the major ideas in Hindu, Jaina, and Buddhist thought in India, and Taoism and Confucianism in China. Emphasis is placed on the diverse, assimilative, and pragmatic nature of Indian thought and its impact on contemporary Asian philosophy.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: one course in Philosophy

PHIL 4810: Philosophy of India

(same as S_A_ST 4810). General development of Indian philosophy.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: one course in Philosophy

PHIL 4850: Special Readings in Philosophy

Special Readings in Philosophy.

Credit Hour: 1-3

Prerequisites: junior standing

PHIL 4950: Senior Seminar in Philosophy

A capstone course required of and only open to senior Philosophy majors. Course content will vary, depending on the professor teaching the course.

Credit Hours: 3

Prerequisites: senior Philosophy major

PHIL 4998: Honors I in Philosophy

Special work for Honors candidates.

Credit Hours: 3

Prerequisites: junior standing

PHIL 4999: Honors II in Philosophy

Special work for Honors candidates.

Credit Hours: 3

Prerequisites: junior standing

PHIL 7001: Topics in Philosophy-General

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: instructor's consent, departmental consent for repetition

PHIL 7005: Topics in Philosophy-Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: instructor's consent, departmental consent for repetition

PHIL 7100: Philosophy of Language

(same as LINGST 7100). Examination of contemporary views of the relationship between language, minds, and the world.

Credit Hours: 3

Prerequisites: PHIL 2700 or instructor's consent

Recommended: Some work in PHIL 1000, PHIL 3000 or PHIL 3200

PHIL 7110: Advanced Logic

(same as LINGST 7110; cross-leveled with PHIL 4110, LINGST 4110). Presents the method of truth trees for sentence and predicate logic. Examines proofs concerning the decidability, soundness, and completeness of formal systems. Emphasizes the theory of formal systems.

Credit Hours: 3

PHIL 7120: Selected Topics in Logic

Elementary set theory. Modal logic, the logic of possibility and necessity.

Credit Hours: 3

Prerequisites: PHIL 2700 or PHIL 7110

PHIL 7130: Probability and Induction

This course studies probability, its various interpretations, and its basic principles. It identifies forms of reasoning that establish the probability of a conclusion. The methods of reasoning it treats are at the heart of science and practical affairs. Prerequisites: PHIL 2700

Credit Hours: 3

PHIL 7200: Metaphysics

Metaphysics studies what there is and how things are, most generally speaking. Topics may include realism versus nominalism, substance and attribute, facts, modality, identity and causality.

Credit Hours: 3

Recommended: Previous work in PHIL 1000, PHIL 3000 or PHIL 3200

PHIL 7210: Philosophy of Mind

Considers theories and arguments in contemporary philosophy of mind, focusing on the nature of mental states, their relation to brain states and the plausibility of various materialist theories of the mind.

Credit Hours: 3

PHIL 7220: Philosophy of Religion

Considers basis for and nature of religious beliefs. Philosophical approaches to religion, cultural implications of religion, psychoanalysis and religion, mysticism and myth.

Credit Hours: 3

PHIL 7300: Epistemology

An examination of contemporary philosophical theories concerning the nature, sources and limits of knowledge and justified belief.

Credit Hours: 3

Recommended: Previous work in PHIL 1000, PHIL 3000, or PHIL 3200

PHIL 7400: Philosophy of Science

Why believe the scientific world-view? What, if anything, is the scientific method? Are today's theories really superior to the past theories? Examines contemporary philosophical answers to such questions.

Credit Hours: 3

PHIL 7410: Philosophy of History

Readings from classic and contemporary philosophers of history. Problems about nature and limits of historical knowledge; relation between history and other disciplines; the existence, nature, and kinds of historical laws.

Credit Hours: 3

PHIL 7420: Philosophy of Biology

A survey of philosophical problems arising from consideration of evolutionary theory and the biological sciences. Topics may include reductionism, sociobiology, biological laws, and epistemic problems relating to evolutionary theory.

Credit Hours: 3

PHIL 7500: Theories of Ethics

Normative and meta-ethical theories. Topics may include the rationality and objectivity of morality, the meaning of moral language, the differences between deontological, utilitarian and virtue theories.

Credit Hours: 3

Prerequisites: one course in Philosophy

PHIL 7600: Political and Social Philosophy

(same as PEA_ST 4600). Contemporary and/or historical theories of justice and the state. Utilitarianism, Liberalism, Libertarianism, Marxism, Communitarianism and Feminism may be among the views covered.

Credit Hours: 3

PHIL 7610: Philosophy of Law

What is law? Are there pre- or trans-legal rights? Is punishment justifiable? How can judicial decisions be justified? What are the relations between law and morality?

Credit Hours: 3

PHIL 7620: Marxism

A philosophical examination of (a) the notion of critique as seen in Marx's early and middle writings, and (b) specific topics by such authors as Lenin, Lukacs and Plekhanov.

Credit Hours: 3

PHIL 7700: Aesthetics

Typical components of art; theories of art as representation, form, expression; relation of art to value.

Credit Hours: 3

PHIL 7800: Asian Philosophy

(same as S_A_ST 4800). This course traces the origins of Indian and Chinese philosophical world views. Included are the major ideas in Hindu, Jaina, and Buddhist thought in India, and Taoism and Confucianism in China. Emphasis is placed on the diverse, assimilative, and pragmatic nature of Indian thought and its impact on contemporary Asian philosophy.

Credit Hours: 3

PHIL 7810: Philosophy of India

(same as S_A_ST 4810). General development of Indian philosophy.

Credit Hours: 3

PHIL 7850: Special Readings in Philosophy

Special Readings in Philosophy.

Credit Hour: 1-3

PHIL 8090: Research in Philosophy

Research not leading to thesis. Graded S/U only.

Credit Hour: 1-99

PHIL 8100: Protoseminar in Philosophy

Introduction to graduate level work in philosophy. Required of all students entering the program, in the first year. An intensive workshop focused on skills rather than any particular philosophical content.

Credit Hours: 3**Prerequisites:** restricted to first year graduate students

PHIL 8210: Teaching of Philosophy I

Seminar meetings on course design, teaching methods, the evaluation of teaching, grading, instructor obligations, and teaching aids. Some individualized instruction, including help preparing for and assessing the effectiveness of practice teaching.

Credit Hour: 1**Prerequisites:** graduate philosophy students

PHIL 8220: Teaching of Philosophy II

A sequel to PHIL 8210. Includes a re-examination of end of semester tasks such as the composition and grading of finals and the assignment of course grades.

Credit Hour: 1**Prerequisites:** PHIL 8210; graduate philosophy student

PHIL 8300: Dissertation Seminar

The course will address writing and time management for Ph.D. students writing a dissertation. Also discussed will be preparation for the academic job market in philosophy, especially the development of an application dossier. Graded on S/U basis only.

Credit Hour: 1**Prerequisites:** Philosophy Ph.D. student

PHIL 8510: Metaphysics: A Survey

A graduate-level survey of central issues in metaphysics. May be repeated up to 6 hours of credit.

Credit Hours: 3

PHIL 8520: Philosophy of Mind: A Survey

A graduate-level survey of central issues in the philosophy of mind.

Credit Hours: 3

PHIL 8530: Epistemology: A Survey

A graduate-level survey of central issues in epistemology.

Credit Hours: 3

PHIL 8540: Philosophy of Language: A Survey

A graduate-level survey of central issues in philosophy of language.

Credit Hours: 3

PHIL 9001: Topics in Philosophy

Organized study of selected topics. Need departmental consent for repetition.

Credit Hour: 1-99**Prerequisites:** instructor's consent

PHIL 9040: Indian Philosophy

Reality, levels of being, status of the world, nature of knowledge in Indian philosophy in relations in Advaita Vendanta system of Samkara.

Credit Hours: 3**Prerequisites:** graduate Philosophy student

PHIL 9050: Plato

Advanced studies in Plato; emphasis on recent scholarship.

Credit Hours: 3**Prerequisites:** graduate Philosophy student

PHIL 9060: Aristotle

Advanced studies in Aristotle; emphasis on recent scholarship.

Credit Hours: 3**Prerequisites:** graduate Philosophy student

PHIL 9070: Medieval Thinkers

Selected works of one or more: Augustine, Avicenna, Anselm, Maimonides, Aquinas, Scotus, Ockham. Not a survey.

Credit Hours: 3**Prerequisites:** graduate Philosophy student

PHIL 9090: Research in Philosophy

Work toward preparation of thesis or dissertation. Graded on a S/U basis only.

Credit Hour: 1-99**Prerequisites:** graduate Philosophy students

PHIL 9110: The Rationalists

Interpretation and evaluation of major works of Descartes, Leibniz, and/or Spinoza in relation to their historical context and current philosophical problems.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9120: The Empiricists

Epistemological and metaphysical doctrines of Locke, Berkeley and Hume.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9130: Kant

Critique of Pure Reason: historical context, meaning and cohesion of its claims, critical assessment of them.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9210: Hegel

Phenomenology of Spirit: historical context, meaning and cohesion of its claims, critical assessment of them.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9220: Marxism

Basic works of Marx and his successors.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9230: Whitehead

Process and Reality and other works. Contributions to metaphysics, theology, epistemology, and philosophy of science.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9240: Russell and Wittgenstein

Each initially defends, but then rejects logical atomism. Metaphysical and epistemological themes of such intellectual phases and shifts of one or both philosophers.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9250: Heidegger

Being and Time: historical context, meaning and cohesion of its claims, critical assessment of them.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9260: Existentialism

Being and Nothingness and other philosophy and literary works.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9270: Phenomenology

Selected works of Husserl and other phenomenological thinkers. Implications for epistemology, science, metaphysics, ethics, and other philosophical topics.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9280: Recent Anglo-American Philosophy

Topics on which current philosophers of the Anglo-American or Analytic tradition are concentrating.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9290: Recent Continental Philosophy

Topics on which current philosophers on the European continent are concentrating.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9310: Applied Ethics

Methods for applying normative ethical theories to personal and social moral problems, illustrated by application of consequentialist, deontological and virtue-centered theories to such problems as euthanasia, capital punishment, pornography, world hunger, war and environmentalism.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9320: Social and Political Philosophy

Topics of current interest in social and political philosophy. generally one of the following: social contract theory, utilitarianism, voting procedures, or convention.

Credit Hours: 3

Prerequisites: PHIL 4600 or instructor's consent and graduate Philosophy student

PHIL 9330: Aesthetics

Theories of art and beauty, the aesthetic experience, the physical work of art, the role of the artist; art and other human concerns.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9340: Topics in the History of Ethics

Advanced study of the ethical views of major historical figures ancient and/or modern.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9350: History of Eastern Ethics

Historical survey of major eastern ethical theories. Explores broad range of ethical theories developed in Asia: Hindu and Buddhist in India; Taoism and Confucianism in China; and Zen in Japan.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9510: Decision Theory

Principles for making rational decisions, including principles of expected utility theory, game theory, and social choice theory. A survey of basic ideas and an introduction to selected research topics.

Credit Hours: 3

Prerequisites: PHIL 4110; graduate Philosophy student

PHIL 9520: Ethical Theory

Contemporary theories of the right and the good. Metaethical topics such as moral language, reasoning, and justification.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9610: Metaphysics

Theories of the categories and structures of reality, e.g., appearance and reality, causality, space and time, God, Nature, the human being.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9710: Philosophy of Mind and Psychology

Survey of important recent work in contemporary philosophy of mind and psychology. Graduate seminar.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9720: Foundations of Cognitive Science

Examination of philosophical questions arising in cognitive science concerning, for instance, the nature of computation and representation, inter-disciplinary relations, the nature of cognitive scientific explanation, and its relation to folk psychological explanation.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9820: Epistemology

Knowledge and opinion, the types, sources, and extent of knowledge, according to a variety of views.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9830: Philosophy of Science

Examines central issues in general philosophy of science concerning the scientific method and the role in it of observation, the nature of rational theory-choice, progress, and the status of theories postulating unobservables.

Credit Hours: 3

Prerequisites: graduate Philosophy student

PHIL 9840: Philosophy of Language

Topics of current interest in the philosophy of language.

Credit Hours: 3

Prerequisites: Graduate Philosophy student

PHIL 9850: Philosophy of Biology

Philosophical problems relating to the life sciences, with attention given especially to explanation and reductionism in biology.

Credit Hours: 3

PHIL 9887: Seminar in Logic

Topics of current interest in logic. Generally one of the following: inductive logic, set theory, conditionals, epistemic logic, or formal semantics.

Credit Hours: 3

Prerequisites: PHIL 4110 graduate Philosophy student

PHIL 9901: Seminar in Philosophy

Special topics. May be repeated for credit.

Credit Hours: 3

Prerequisites: graduate Philosophy student

Physical Medicine And Rehabilitation Courses

PM_REH 6351: ABS Physical Medicine/Rehab. Mechanism of Disease

ABS Physical Medicine/Rehab. Mechanism of Disease

Credit Hour: 5-10

PM_REH 6353: ABS Physical Medicine/Rehab. Research

ABS Physical Medicine/Rehab. Research

Credit Hour: 5-10

PM_REH 6355: ABS Physical Medicine/Rehab. Research and Review

ABS Physical Medicine/Rehab. Research and Review

Credit Hour: 5-10

PM_REH 6615: Physical Medicine and Rehabilitation

Physical Medicine and Rehabilitation

Credit Hours: 5

PM_REH 6915: Rehabilitation of Musculoskeletal and Neurologic Diseases

The rotating student will be an integral part of the inpatient team, serving in an active role on the floor and participating in the evaluation and treatment of clinic patients. Daily morning rounds will be completed with the inpatient teams and will be followed by scheduled didactic sessions with various faculty throughout the week. Outpatient rotations will be included as a fundamental clinical experience and will encompass the breadth of PM&R to the best that can be accomplished in this short block. In-depth examinations of the neurologic and musculoskeletal systems will be performed.

Credit Hours: 2

Prerequisites: Successful completion of the first two years of medical school

Physical Therapy Courses

PH_THR 1000: Introduction to Physical Therapy

Acquaints students with the physical therapy profession including the required educational preparation, practice settings, sample interventions, current issues, trends and research. Graded on S/U basis only.

Credit Hour: 1

PH_THR 2420: Biology of Healthy Living

(same as BIOMED 2420 and NEP 2420). Biology of inactivity as a casual factor in chronic disease.

Credit Hours: 2

PH_THR 2500: Musculoskeletal Anatomy and Injury

Study of human musculoskeletal anatomy, movement, common injury and physical therapy management. Graded on an A-F basis only.

Credit Hours: 3

Recommended: biology

PH_THR 3022: Principles of Physical Therapy

History of physical therapy: the profession; basic skills: first aid, infection control, vital signs; medical terminology. Graded on S/U basis only.

Credit Hour: 1

PH_THR 4085: Problems in Physical Therapy

Independent study, based upon educational goals, leading to completion of a project or paper. Specific objectives and time line developed with the supervision of a faculty member.

Credit Hour: 1-3

Prerequisites: instructor's consent

PH_THR 4120: Clinical Education IA

(cross-leveled with PH_THR 7120). An introduction to clinical education in Physical Therapy: includes development of foundational clinical skills and behaviors as well as experience in the PhysZou clinical setting. Graded on S/U basis only.

Credit Hour: 1

PH_THR 4150: Clinical Education IB

(cross-leveled with PH_THR 7150). Continuation of Clinical Education IA with further emphasis on current events in Physical Therapy as well as the professional attributes of communication, teamwork and problem solving. Required experience in PhysZou clinical setting. Graded on S/U basis only.

Credit Hour: 1

PH_THR 4240: Applied Neurophysiology for Allied Health Students

(same as OC_THR 4240). Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.

Credit Hours: 3

PH_THR 4250: Human Kinesiology

(same as HTH_PR 4250). Study of principles of physical laws, biomechanics and anatomic structure relative to human movement.

Applications through analysis of daily functional performance, exercise, and sport.

Credit Hours: 3

Prerequisites: PTH_AS 2201

PH_THR 4270: Clinical Pathophysiology

(same as OC_THR 4270) Interdisciplinary and case-based examination of the pathophysiology, prevention and general health management of disease/injury across the lifespan encountered in occupational and physical therapy practice. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: successful completion of prior professional coursework

PH_THR 4330: Physical Agents

Biophysics, theory and technique concerning the use of physical agents as adjuncts to exercise programs. Includes thermal, electrical, light, hydrotherapy and mechanical agents.

Credit Hours: 3

PH_THR 4420: Foundations of Therapeutic Exercise

Physiological basis of exercise throughout the lifespan with emphasis on the musculoskeletal, neuromuscular, cardiovascular/pulmonary and integumentary systems and the effects of injury and disease on these systems.

Credit Hours: 3

PH_THR 4480: Medical Testing in Rehabilitation

Diagnostic tests used by disciplines within and outside of physical therapy. Studies include laboratory, nuclear medicine, radiologic, and motion analysis. Emphasis placed on interpretation of results as they apply to physical therapy examination and intervention.

Credit Hours: 3

Prerequisites: Restricted to students accepted into professional major

PH_THR 4510: Evidence-Based Practice

Clinical research design and methods overview. Critical review of current and historically important professional literature. Effective writing related to clinically applicable research using computer and library resources. Identification of research questions.

Credit Hours: 3

Prerequisites: departmental consent

PH_THR 4520: Applied Therapeutic Exercise

Application of therapeutic exercise with an emphasis on evidenced-based exercise prescription, modes and techniques of exercise typically seen in rehabilitation.

Credit Hours: 3

PH_THR 4560: Movement Theory and Application

Human sensorimotor development; motor learning; motor control theories; developmental and practical application to exercise; proprioceptive neuromuscular facilitation.

Credit Hours: 2

PH_THR 4570: Bridging the Clinical-Research Gap

This class focuses on theories of clinical decision making and Evidence-based Practice, their applications to the clinical setting and dissemination of such information to colleagues in professional forums. Graded on A-F basis only.

Credit Hours: 3

PH_THR 4620: Introduction to Orthopedic Physical Therapy with Laboratory

Physical therapy diagnosis, management, and prevention of disorders of the musculoskeletal system; basics of orthopedic manual therapy. Includes laboratory.

Credit Hours: 3

PH_THR 4680: Orthopedic Physical Therapy

Physical therapy diagnosis, management, and prevention of disorders of the musculoskeletal system; continuation of orthopedic manual therapy emphasizing the axial skeleton; traction; massage; taping; sport-specific injury rehabilitation; orthotics.

Credit Hours: 3

Prerequisites: PH_THR 4620

PH_THR 4730: Pediatric Physical Therapy

Physical therapy evaluation and treatment of children with movement dysfunction. Emphasis on therapeutic exercise.

Credit Hours: 4

PH_THR 4770: Rehabilitation of the Neurologically Impaired Adult

Physical Therapy evaluation and treatment of adults who have incurred neurological deficits; emphasis on the restorative care of individuals following spinal cord injury, stroke, and traumatic head injury.

Credit Hours: 4

PH_THR 4790: Pharmacology in Rehabilitation

Principles of pharmacology including pharmacokinetics, pharmacodynamics, and toxicology of common drugs encountered in rehabilitation. Emphasis on pharmacology related to the musculoskeletal, neuromuscular, cardiovascular/pulmonary and integumentary systems across the lifespan.

Credit Hours: 2

Prerequisites: Restricted to students accepted into a professional major

PH_THR 4960: Special Readings in Physical Therapy

Independent readings selected in consultation with supervising faculty member. Identified educational goals and activities; discussion, annotated bibliography or report.

Credit Hour: 1-3

Prerequisites: instructor's consent

PH_THR 4965: Directed Readings in Physical Therapy

Selected readings on specific topics.

Credit Hour: 1-99

Prerequisites: instructor's consent

PH_THR 4980: Clinical Evaluation and Procedures with Laboratory

Principles and procedures of basic evaluation methods and documentation: muscle strength, range of motion, muscle balance, posture, neurologic tests. Includes laboratory.

Credit Hours: 3

PH_THR 4981: Clinical Kinesiology with Laboratory

Advanced Kinesiology addressing functional mobility; specifics of normal human gait; pathokinetics of gait. Assistive devices; wheelchairs; orthoses and prostheses. Includes laboratory.

Credit Hours: 3

PH_THR 7120: Clinical Education IA

(cross-leveled with PH_THR 4120). An introduction to clinical education in Physical Therapy; includes development of foundational clinical skills and behaviors as well as experience in PhysZou clinical setting. Graded on S/U basis only.

Credit Hour: 1

PH_THR 7150: Clinical Education IB

(cross-leveled with PH_THR 4150). Continuation of Clinical Education IA with further emphasis on current events in Physical Therapy as well as the professional attributes of communication, teamwork and problem solving. Required experience in PhysZou clinical setting. Graded on S/U basis only.

Credit Hour: 1

PH_THR 7240: Applied Neurophysiology for Allied Health Students

(same as OC_THR 4240 or OC_THR 7240). Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.

Credit Hours: 3

PH_THR 7250: Human Kinesiology

(same as HTH_PR 4250, OC_THR 4220 or OC_THR 7220). Study of principles of physical laws, biomechanics and anatomic structure relative to human movement. Applications through analysis of daily functional performance, exercise, and sport.

Credit Hours: 3

Prerequisites: Human Anatomy

PH_THR 7270: Clinical Pathophysiology

(same as OC_THR 4270 or OC_THR 7270) Interdisciplinary and case-based examination of the pathophysiology, prevention and general health management of disease/injury across the lifespan encountered in occupational and physical therapy practice.

Credit Hours: 3

PH_THR 7330: Physical Agents

Biophysics, theory and technique concerning the use of physical agents as adjuncts to exercise programs. Includes thermal, electrical, light, hydrotherapy and mechanical agents.

Credit Hours: 3

PH_THR 7420: Foundations of Therapeutic Exercise

Physiologic basis of exercise throughout the lifespan with emphasis on the musculoskeletal, neuromuscular, cardiovascular/ pulmonary and integumentary systems and the effects of injury and disease on these systems.

Credit Hours: 3

PH_THR 7480: Medical Testing in Rehabilitation

Diagnostic test used by disciplines within and outside of physical therapy. Studies include laboratory, nuclear medicine, radiologic, and motion analysis. Emphasis placed on interpretation of results as they apply to physical therapy examination and intervention.

Credit Hours: 3

Prerequisites: Restricted to students accepted into professional major

PH_THR 7510: Evidence-Based Practice

Clinical research design and methods overview. Critical review of current and historically important professional literature. Effective writing related to clinically applicable research using computer and library resources. Identification of research questions.

Credit Hours: 3

Prerequisites: departmental consent

PH_THR 7520: Applied Therapeutic Exercise

Application of therapeutic exercise with an emphasis on evidenced-based exercise prescription, modes and techniques of exercise typically seen in rehabilitation.

Credit Hours: 3

PH_THR 7570: Bridging the Clinical-Research Gap

This class focuses on theories of clinical decision making and Evidence-based Practice, their applications to the clinical setting and dissemination of such information to colleagues in professional forums. Graded on A-F basis only.

Credit Hours: 3

PH_THR 7620: Introduction to Orthopedic Physical Therapy with Laboratory

Physical therapy diagnosis, management, and prevention of disorders of the musculoskeletal system; basics of orthopedic manual therapy. Includes laboratory.

Credit Hours: 3

PH_THR 7680: Orthopedic Physical Therapy

Physical therapy diagnosis, management, and prevention of disorders of the musculoskeletal system; continuation of orthopedic manual therapy emphasizing the axial skeleton; traction; massage; taping; sport-specific injury rehabilitation; orthotics.

Credit Hours: 3

Prerequisites: PH_THR 4620

PH_THR 7730: Pediatric Physical Therapy

Physical therapy evaluation and treatment of children with movement dysfunction. Emphasis on therapeutic exercise.

Credit Hours: 4

PH_THR 7770: Rehabilitation of the Neurologically Impaired Adult

Physical Therapy evaluation and treatment of adults who have incurred neurological deficits; emphasis on the restorative care of individuals following spinal cord injury, stroke, and traumatic head injury.

Credit Hours: 4

PH_THR 7780: Differential Diagnosis in Physical Therapy

Evidence-based clinical decision making emphasizing health screenings and system review to determine physical therapy diagnosis/need for referral to other health care professionals.

Credit Hours: 3

Prerequisites: Restricted to students accepted into the professional major

PH_THR 7790: Pharmacology in Rehabilitation

Principles of pharmacology including pharmacokinetics, pharmacodynamics, and toxicology of common drugs encountered in rehabilitation. Emphasis on pharmacology related to the musculoskeletal, neuromuscular, cardiovascular/ pulmonary and integumentary systems across the lifespan.

Credit Hours: 2

Prerequisites: Restricted to students accepted into professional major

PH_THR 7890: Case Management I

Evaluation and team approach to physical therapy management in adult medical and surgical conditions: cardiopulmonary, rheumatic, oncologic, integumentary or wound care, including major burn injury. Psychosocial and ethical issues incorporated. Problem based; laboratory.

Credit Hours: 5

PH_THR 7940: Clinical Education II

Full time, supervised clinical experience addressing application of basic skills in patient evaluation and treatment, documentation and professional behaviors. Graded on S/U basis only.

Credit Hours: 5

PH_THR 7945: Clinical Education III

Continuation of supervised clinical education. (Capstone course). Graded on S/U basis only.

Credit Hours: 7

Prerequisites: Successful completion of PH_THR 7940

PH_THR 7960: Special Readings in Physical Therapy

Independent readings selected in consultation with supervising faculty member. Identified educational goals and activities; discussion, annotated bibliography or report.

Credit Hour: 1-3

Prerequisites: instructor's consent

PH_THR 7965: Directed Readings in Physical Therapy

Selected readings on specific topics.

Credit Hour: 1-99

Prerequisites: instructor's consent

PH_THR 7980: Clinical Evaluation and Procedures with Laboratory

Principles and procedures of basic evaluation methods and documentation: muscle strength, range of motion, muscle balance, posture, neurologic tests. Includes laboratory.

Credit Hours: 3

PH_THR 7981: Clinical Kinesiology with Laboratory

Advanced Kinesiology addressing functional mobility; specifics of normal human gait; pathokinetics of gait. Assistive devices; wheelchairs; orthoses and prostheses. Includes laboratory.

Credit Hours: 3

PH_THR 8000: Health Policy for Physical Therapy

This course is designed for physical therapy students and will provide an introduction to health policy along with an overview of the health care system in the United States, including its structures, financing mechanisms, and outcomes. Lecture/reflective writing/written exams. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Successful completion of prior coursework

PH_THR 8001: Topics in Physical Therapy

Organized study of selected topics in physical therapy, health and wellness, prevention of disease and disability, and the rehabilitation sciences. Specific content may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: instructor's consent

PH_THR 8080: Special Skills in Physical Therapy

This course will offer a menu of options to students to develop additional knowledge about specific skills in the physical therapy profession. Students may choose topics of interest in addition to the mandatory sessions to meet a minimum of 800 minutes of contact. Graded on S/U basis only. Prerequisites: successful completion of prior professional coursework.

Credit Hour: 1

PH_THR 8085: Problems in Physical Therapy

Independent study and development of a clinical or research paper, poster or workshop suitable for presentation in a symposium or conference. Specific plan individually developed with advisor. Journal reviews.

Credit Hour: 1-3

PH_THR 8087: Seminar in Physical Therapy

Presentation and critical discussion of research activities, summaries of clinical and research experience.

Credit Hours: 3

Prerequisites: departmental consent

PH_THR 8130: Professional Issues in the 21st Century

The physical therapist as health care professional, administrator, and educator; legal, ethical, and political issues. Service delivery management; delegation of care; rural vs. urban health care needs.

Credit Hours: 3

PH_THR 8390: Case Management II with Laboratory

Complex orthopedic problems in persons of all ages; supervision, reimbursement, ethical/legal situations; community programs for injury prevention; work capacity evaluation/work hardening; consultation. Problem-based format; laboratory.

Credit Hours: 5

Prerequisites: PH_THR 7890

PH_THR 8690: Case Management III with Laboratory

Traditional and contemporary theories of physical therapy in advanced rehabilitation of children and adults with neurologic disorders; education/employment, ethical/legal issues; patient/client advocacy. Problem based format; laboratory.

Credit Hours: 5

Prerequisites: PH_THR 8390

PH_THR 8945: Clinical Education IV

A continuation of supervised clinical education with supervision from a licensed physical therapist that has at least one year of experience. This course is a continuation of 7945 with advancing expectations of student physical therapist performance. Graded on S/U basis only.

Credit Hours: 7

Prerequisites: Successful completion of PH_THR 7945

PH_THR 8950: Clinical Education V

Full time supervised clinical education with supervision from a licensed physical therapist that has at least one year of experience. This course is a continuation of 8945 with advancing expectations of student physical therapist performance. Graded on S/U basis only.

Credit Hours: 6

Prerequisites: Successful completion of PH_THR 8945

Physics Courses

PHYSICS 1002: Topics in Physics and Astronomy

Study of selected topics in physics and astronomy. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-3

PHYSICS 1050: Concepts in Cosmology

Introduction to fundamental concepts of modern cosmology. Topics include Olbers' paradox, Hubble expansion, Big Bang, and the Cosmic Microwave Background Radiation.

Credit Hours: 3

PHYSICS 1100: Science and Inventions

This course covers the history of some of the most important inventions in science and their impact on past civilizations, current advances in science

and inventions, funding and policies, and critical advances in technology required for future generations.

Credit Hour: 1

PHYSICS 1150: Concepts in Physics

Introduction to fundamental concepts of physics for non-science majors. Concepts include the conservation of energy, the second law of thermodynamics, and the special theory of relativity. Students learn to reason and apply these concepts through writing assignments.

Credit Hours: 3

PHYSICS 1210: College Physics I

This introductory college physics course uses algebra and trigonometry in developing some of the fundamental concepts of classical physics. Topics covered are vectors, kinematics, dynamics, gravity, momentum, energy, rotational kinematics, rotational dynamics, fluids, simple harmonic motion, waves and sound, and thermodynamics. Three lectures, one discussion, one lab weekly. Students may receive credit for PHYSICS 1210 or PHYSICS 2750, but not both.

Credit Hours: 4

Prerequisites: MATH 1100

PHYSICS 1220: College Physics II

This introductory second semester college physics course uses algebra and trigonometry in developing some of the fundamental concepts of classical physics. Topics covered include electricity and magnetism, optics and modern physics. Three lectures, one discussion, one lab weekly. Students may receive credit for PHYSICS 1220 or PHYSICS 2760, but not both.

Credit Hours: 4

Prerequisites: grade of C- or better in PHYSICS 1210

PHYSICS 2002: Topics in Physics and Astronomy- Physical Science

Study of selected topics in physics and astronomy. Subjects and earnable credit may vary from semester to semester. Course may be repeated for credit.

Credit Hour: 1-3

Prerequisites: MATH 1100

PHYSICS 2002H: Topics in Physics and Astronomy- Physical Science - Honors

Study of selected topics in physics and astronomy. Subjects and earnable credit may vary from semester to semester. Course may be repeated for credit.

Credit Hour: 1-3

Prerequisites: MATH 1100; Honors eligibility required

PHYSICS 2100: Thinking Physics

This course investigates motion and force and the relationship between them. Problem-solving skills will be emphasized in addition to hands-on inquiry and deep conceptual understanding. This course is intended to help prepare students for College Physics I or University Physics I. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 1100

PHYSICS 2200: Life and the Universe

This course explores the connection between our everyday existence and the underlying physics' processes. Students will look at processes - essential to life - ranging from the very small (atomic level) to the very large (universe), and the many length scales in between (cellular level and human being level) as well as make connections between the laws of physics and the numbers that go into them and the prerequisites for the existence of life.

Credit Hours: 3

PHYSICS 2330: Exploring the Principles of Physics

A hands-on course covering topics in Electricity, Magnetism, Forces, Motion and Energy. Pedagogy reflects styles used in K-12 classrooms; emphasis on inquiry, concept development, quantitative applications and technology. Enrollment limited to Elementary and Early Childhood Education majors who have completed MATH 1100 or higher.

Credit Hours: 4

Prerequisites: instructor's consent required

PHYSICS 2400: The Physics Around Us

This course will address the basic physics principles behind commonly accepted technology. Examples include microwave ovens, rockets and LED lights. The course will be taught using hands-on activities combined with lecture and discussion. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 1100

PHYSICS 2500: The Beautiful Invisible: Exploring Physics, Fiction, and Reality

This course explores the conceptual structure of modern physics from a humanistic perspective. Rather than describing the natural world "as it is", physical science weaves some key observations in a convincing and memorable narrative. It is not within its power to explain reality, but it can make it understandable, sometimes even predictable. Due to the presence of internal and external constraints, physical theories are akin to myths, i.e., fiction created by many authors over an extended period of time. The mythical character of a theory does not diminish its scientific validity - quite the contrary. Convincing myths are not easily found and better observations demand better myths. The mythical content of the theory is not some extraneous content that we introduce for the sake of popularization, but an essential part of the science itself.

Credit Hours: 3

PHYSICS 2750: University Physics I

First course in calculus-based physics for science and engineering students. Topics covered are vectors, translational and rotational kinematics, translational and rotational dynamics, energy, momentum, gravity, oscillations, waves, fluids and thermodynamics. Three lectures, one discussion, one lab weekly. Students may receive credit for PHYSICS 1210 or PHYSICS 2750, but not both.

Credit Hours: 5

Prerequisites: MATH 1500 or equivalent

Recommended: MATH 1700

PHYSICS 2750H: University Physics I - Honors

First course in calculus-based physics for science and engineering students. Topics covered are vectors, translational and rotational kinematics, translational and rotational dynamics, energy, momentum, gravity, oscillations, waves, fluids and thermodynamics. Three lectures, one discussion, one lab weekly. Students may receive credit for PHYSICS 1210 or PHYSICS 2750, but not both. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: MATH 1500 or equivalent. Honors eligibility required

Recommended: MATH 1700

PHYSICS 2760: University Physics II

Second semester course in calculus-based physics for science and engineering students. Topics covered are electrostatics, circuits, magnetism, electromagnetic phenomena, optics, matter waves and particles and modern physics. Three lectures, one discussion, one lab weekly. Students may receive credit for PHYSICS 1220 or PHYSICS 2760, but not both.

Credit Hours: 5

Prerequisites: MATH 1700 and grade of C- or better in PHYSICS 2750

Recommended: MATH 2300

PHYSICS 2800: Undergraduate Seminar in Physics

Introduction to the Physics Department and presentation of topics of current interest in physics by faculty and students. Intended for physics majors at the freshman or sophomore level only.

Credit Hours: 2

PHYSICS 3002: Topics in Physics and Astronomy - Physical Science

Study of selected topics in physics and astronomy. Subjects and earnable credit may vary from semester to semester. May be repeated 2 for credit.

Credit Hour: 1-3

Prerequisites: PHYSICS 1210 or PHYSICS 2750

PHYSICS 3010: Introduction to Modern Astrophysics

(same as ASTRON 3010). Elements of stellar, and galactic astrophysics. Interpretation of observations and physical conditions of various astronomical objects including stars, gaseous nebulae and, galaxies.

Credit Hours: 3

Prerequisites: PHYSICS 2760

PHYSICS 3100: Teaching Physics

Introduces modeling and inquiry methods of teaching about force, motion, energy, electricity and magnetism. Students learn research-base physics teaching methods, including eliciting prior understanding, facilitating conceptual change, and active learning strategies.

Credit Hours: 3

Prerequisites: PHYSICS 1220 or PHYSICS 2760

PHYSICS 3150: Introduction to Modern Physics

Relativistic kinematics and Lorentz transformations; historical basis for quantum mechanics; atomic structure; physics of solids; nuclear structure and decay.

Credit Hours: 3

Prerequisites: PHYSICS 2760

PHYSICS 3200: Physics of Space Explorations

The course provides an overview of the solar system, spaceflight history, a review of Newtonian physics and law of universal gravitation, the application of these laws to spacecraft launch, entry, and orbit, planetary trajectories, and other special topics. Three focused case studies of actual space missions are addressed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 1100

PHYSICS 4020: Astrophysical Techniques

(same as ASTRON 4020; cross-leveled with PHYSICS 7020). Elements of modern astronomical instruments, observations and analysis, with the emphasis in the optical regime. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSICS 2760

PHYSICS 4050: Electronic Laboratory

(cross-leveled with PHYSICS 7050). Acquaints students with the foundations and techniques of electronics design, with emphasis on data acquisition and processing. Topics: circuits with discrete and integrated circuits, active and passive filters, amplifiers, power supplies, instrumentation and interfacing. Integrated lectures and labs. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: PHYSICS 2760

PHYSICS 4060: Advanced Physics Laboratory I

This upper-level undergraduate laboratory course familiarizes students with the methods and procedures of experimental physics at an advanced level. The course covers principles of magnetism, graphic programming and interface techniques, weak-signal detection, and some modern physics discoveries such as, magneto-optical Kerr effect, digital holography and gamma-ray spectroscopy. Students work on research projects in the areas of condensed matter physics, materials science, modern spectroscopy, superconductivity, and quantum physics.

Credit Hours: 3

Prerequisites: PHYSICS 3150

PHYSICS 4080: Major Themes in Classical Physics

Introduction to classical physics: mechanics, electromagnetism and thermodynamics, emphasizing the unity and the connections between different parts of it.

Credit Hours: 3

Prerequisites: PHYSICS 2760

PHYSICS 4100: Electricity and Magnetism I

Mathematical preliminaries, properties of charge distributions at rest and in motion, the field concept, introduces electromagnetic radiation.

Credit Hours: 3

Prerequisites: PHYSICS 2760

PHYSICS 4102: Topics on Physics and Astronomy-Biological/Physical/Mathematics

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

Credit Hour: 1-3

Prerequisites: PHYSICS 2760 or instructor's consent

PHYSICS 4110: Light and Modern Optics

Interaction of light with matter, spectroscopic techniques, wave optics, interferometry, multilayer films, polarization, non-linear optics, design of optical instruments, matrix methods, waveguides, fiber optics, acousto-optic and photo-elastic modulation. Includes both lectures and laboratory.

Credit Hours: 4

Prerequisites: PHYSICS 2760

PHYSICS 4120: Introduction to Thermodynamics

Development of the concepts of temperature, heat, work, entropy, enthalpy and free energy. Applications to gases, liquids and solids. Statistical methods.

Credit Hours: 3

Prerequisites: PHYSICS 2760

PHYSICS 4130: Electricity and Magnetism II

Application of Maxwell's equations.

Credit Hours: 3

Prerequisites: PHYSICS 4100

PHYSICS 4140: Mechanics

Development of fundamental concepts, principles of mechanics using mathematical methods. Many problems used.

Credit Hours: 3

Prerequisites: PHYSICS 2760

PHYSICS 4180: Solar System Science

(same as GEOL 4180 and ASTRON 4180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.

Credit Hours: 3

Prerequisites: PHYSICS 1220 or PHYSICS 2760 or instructor's consent

PHYSICS 4190: Physics and Chemistry of Materials

(same as NU_ENG 4319, BIOL_EN 4480 and CHEM 4490). This course will cover fundamental and applied aspects relating to the Physics, Chemistry and Biology of materials with special emphasis on Nanoscience and Nanomedicine. Consists of lectures and experiments in Nanoscience.

Credit Hours: 3

Prerequisites: PHYSICS 2760 and CHEM 1320 or equivalent, or instructor's consent

PHYSICS 4230: Scanning and Transmission Electron Microscopy and Microanalysis

(cross-leveled with PHYSICS 7230). This course is designed for senior undergraduate/graduate students. This course covers the basic principles and practical considerations using SEM, TEM, EDS, and EELS in the characterization of materials. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSICS 3150 and instructor's consent

PHYSICS 4250: Stellar Astrophysics

(same as ASTRON 4250). Basic astrophysics of stable and unusual stars, stellar systems. Investigates stellar dimensions, radiation, spectra, energy, evolution, populations; interstellar medium, stellar motions and aggregation.

Credit Hours: 3

Prerequisites: PHYSICS 3150 or instructor's consent

PHYSICS 4310: Physics in Cell and Developmental Biology

(same as BIO_SC 4310). Discusses the role of physical mechanisms in specific cellular and developmental processes and phenomena, in particular those characterizing the embryonic stage of multicellular organisms. Each process and phenomenon is first described in biological terms and then within a physical model, with special emphasis on the interplay between the two descriptions.

Credit Hours: 3

Prerequisites: PHYSICS 2760 and BIO_SC 2300 or instructor's consent

PHYSICS 4350: Galactic Astronomy

(same as ASTRON 4350). Observational properties of normal galaxies and clusters of galaxies, Seyfert and emission-line structure and dynamics of galaxies; interacting galaxies, quasi-stellar objects. Introduction to cosmology.

Credit Hours: 3

Prerequisites: PHYSICS 3010

Recommended: PHYSICS 4140

PHYSICS 4360: Extragalactic Astronomy

This course introduces students to the most basic knowledge of extragalactic astronomy, starting from Milky Way and extending to the most distant universe. Topics covered will include galaxy morphology and classification, groups and clusters of galaxies, active galactic nuclei, and galaxy formation and evolution.

Credit Hours: 3

Prerequisites: PHYSICS 2760

PHYSICS 4390: Problems in Physics

Problems in Physics

Credit Hour: 1-99

PHYSICS 4400: The Physics of Electronic Devices

(cross-leveled with PHYSICS 7400). This course is designed for graduate and undergraduate students of Physics and Electrical Engineering who have an interest in learning the basic physical idea underlying the operation of electronic devices. The course consists of lectures, handout

lecture notes, problem sets, two mid-term and one final exam. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 3150 or equivalent

PHYSCS 4410: Analysis of Biological Macromolecules and Biomaterials

This interdisciplinary, team-taught course introduces basic concepts and experimental techniques for studying bio-macromolecules and biomaterials. A Problem Based Learn/Writing Intensive approach uses four modules: Proteins, membranes, cellular interactions and biomaterials.

Credit Hours: 3

Prerequisites: PHYSCS 2760

PHYSCS 4420: Introduction to Biomedical Imaging

This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray, CT, PET, SPECT, ultrasound, MRI, and optical imaging, as well as recent developments in biomedical imaging.

Credit Hours: 3

Prerequisites: PHYSCS 2760

PHYSCS 4450: Introduction to Cosmology

Develops the physical concepts necessary for understanding the major recent discoveries in cosmology, such as the acceleration of the universe and dark energy. No prior knowledge of general relativity is assumed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 3150 or equivalent

PHYSCS 4460: Interstellar Medium

(same as ASTRON 4460). The course discusses observational properties and physical and chemical processes occurring in the interstellar medium. Topics include interstellar diffuse and molecular clouds, HII regions, dust grains, interstellar chemistry, star formation, supernova remnants, and interstellar shock waves.

Credit Hours: 3

Prerequisites: PHYSCS 2760

PHYSCS 4500: Computational Biological Physics

Provides a practical introduction (hands-on approach) to the study of the structure and function of biomolecular systems by employing computational methods and theoretical concepts familiar from the physical sciences.

Credit Hours: 3

Prerequisites: PHYSCS 2760 or instructor's consent

PHYSCS 4510: Single Molecule Biophysics

(same as BIOCHM 4510; Cross-leveled with PHYSCS 7510). The course provides an overview of the biophysics of enzymes, nucleic acids and the cytoskeleton. Topics covered will include diffusion, molecular motors, polymerization and the cytoskeleton and the polymer properties of nucleic acids and microtubules

Credit Hours: 3

Prerequisites: PHYSCS 2760

PHYSCS 4520: Introduction to Biophysics

This course introduces the study of biological systems from the perspective of a physicist. Students will learn how to relate the structure of a particular system and its constituents to its function. The treatment of molecular and cellular phenomena will be based on physical principles quantified through the necessary analytical tools. Prominent biophysical methods and their fundamental operating principles will also be discussed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 1220 or PHYSCS 2760 or instructor's consent

PHYSCS 4550: Cosmochemistry

(same as ASTRON 4550). Cosmic dust, stardust, spectra, energy, interstellar medium, meteorites, astromineralogy.

Credit Hours: 3

Prerequisites: PHYSCS 1220 or PHYSCS 2760 or instructor's consent required

PHYSCS 4600: Semiconductor Optics

It is an introductory-level course in the field of optical processes in semiconductors (both inorganic and organic) and solid-state optoelectronics, designed both for graduate and undergraduate students of Physics, Chemistry and Electrical Engineering. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 3150

PHYSCS 4620: Introduction to Materials Science

This course on the science and technology of materials explores the interrelationship between processing, structure, properties (electrical, optical, magnetic), and performance. Observable properties of materials will be used to explore and understand the consequences of atomic- and molecular-level events. Structure-property correlations, including electronic, thermal, and mechanical properties, will be presented for different classes of materials including nanoscale materials. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 3150

PHYSCS 4650: Modern Condensed Matter Physics

Introduces the basic concepts and gives an overview of the latest developments of modern condensed-matter physics as the forefront of (nano) science and technology. Combines lectures and computational laboratory, where students use and develop interactive computer simulations. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 3150 or instructor's consent

PHYSCS 4700: Introduction to Methods in Mathematical Physics

Introduces mathematical methods and theories of physics. Topics usually covered are complex analysis, partial differential equations, integral equations and tensor analysis.

Credit Hours: 3

Prerequisites: MATH 4100

PHYSCS 4800: Introduction to Quantum Mechanics I

Foundations of wave mechanics; wave packets; Schrodinger equation and I-D problems; operators and eigenfunctions, spherically symmetric systems.

Credit Hours: 3

Prerequisites: PHYSCS 3150 and MATH 4100

PHYSCS 4810: Introduction to Quantum Mechanics II

Review of quantum mechanics and units, forms of radiation, radiation detectors, spacetime symmetries, internal symmetries, nuclear structure and form factors, low-energy nuclear models, recent developments.

Credit Hours: 3

Prerequisites: PHYSCS 4800 or equivalent

PHYSCS 4850: Computational Methods in Physics

Use of modern computational techniques in solving a wide variety of problems in solid state, nuclear, quantum and statistical physics.

Credit Hours: 3

Prerequisites: PHYSCS 4800 or instructor's consent

PHYSCS 4885: Problem-Based Learning in Physics Using Case Studies

Using case studies from frontiers of physics research, students in this course will develop skills on leadership, team-work, communication, deductive reasoning, writing and oral presentation skills. A combined Problem-Based Learning/ Writing Intensive approach will be used.

Credit Hours: 3

Prerequisites: PHYSCS 3150

PHYSCS 4950: Undergraduate Research in Physics

Special studies for advanced undergraduate students in physics covering subjects not included in courses regularly offered. Departmental consent for repetition.

Credit Hour: 1-3

Prerequisites: instructor's consent

PHYSCS 4960: Senior Thesis in Physics

Special studies for senior undergraduate students in physics. The course requires an oral or poster presentations, or faculty-guided writing of a senior thesis involving independent research.

Credit Hours: 3

Prerequisites: instructor's consent and 3 units of PHYSCS 4950. Departmental consent required for repetition

PHYSCS 4985: Issues in Modern Physics and Engineering

Students are expected to write a major paper on a selected topic from modern physics or engineering. The paper will review the current state of the experimental and theoretical research on the topic at a level appropriate to their peers.

Credit Hours: 3

Prerequisites: PHYSCS 3150

PHYSCS 7020: Astrophysical Techniques

(same as ASTRON 7020; cross-leveled with PHYSCS 4020). Elements of modern astronomical instruments, observations and analysis, with the emphasis in the optical regime. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 2760

PHYSCS 7050: Electronic Laboratory

(cross-leveled with PHYSCS 4050). Acquaints students with the foundations and techniques of electronics design, with emphasis on data acquisition and processing. Topics: circuits with discrete and integrated circuits, active and passive filters, amplifiers, power supplies, instrumentation and interfacing. Integrated lectures and labs. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: PHYSCS 2760

PHYSCS 7085: Problems in Physics

Laboratory work involving study of literature of special experiments in physics. Introduces research methods.

Credit Hour: 1-99

PHYSCS 7087: Seminar in Physics

Topics of current interest selected for discussion. May be elected repeatedly. S/U Graded only.

Credit Hour: 1

Prerequisites: PHYSCS 8150

PHYSCS 7110: Light and Modern Optics

Interaction of light with matter, spectroscopic techniques, wave optics, interferometry, multilayer films, polarization, non-linear optics, design of optical instruments, matrix methods, waveguides, fiber optics, acousto-optic and photo-elastic modulation. Includes both lectures and laboratory.

Credit Hours: 4

Prerequisites: PHYSCS 2760

PHYSCS 7180: Solar System Science

(same as GEOL 7180 and ASTRON 7180; cross-leveled with GEOL 4180 and ASTRON 4180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.

Credit Hours: 3

Prerequisites: PHYSCS 1220 or PHYSCS 2760 or instructor's consent

PHYSCS 7190: Physics and Chemistry of Materials

(same as NU_ENG 7319, BIOL_EN 7480 and CHEM 7490). This course will cover fundamental and applied aspects relating to the Physics, Chemistry and Biology of materials with special emphasis on Nanoscience and Nanomedicine. Consists of lectures and experiments in Nanoscience.

Credit Hours: 3

Prerequisites: PHYSCS 2760 and CHEM 1320 or equivalent and instructor's consent

PHYSICS 7201: Topics in Physics

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester

Credit Hour: 1-3

Prerequisites: Instructor's consent required

PHYSICS 7230: Scanning and Transmission Electron Microscopy and Microanalysis

(cross-leveled with PHYSICS 4230). This course is designed for senior undergraduate/graduate students. This course covers the basic principles and practical considerations using SEM, TEM, EDS, and EELS in the characterization of materials. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSICS 3150 and instructor's consent

PHYSICS 7301: Topics in Astronomy and Astrophysics

Selected topics from solar system, stellar, galactic and extragalactic astronomy, and astrophysics. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

PHYSICS 7310: Physics in Cell and Developmental Biology

(same as BIO_SC 7310 and MPP 7300). Discusses the role of physical mechanisms in specific cellular and developmental processes and phenomena, in particular those characterizing the embryonic stage of multicellular organisms. Each process and phenomenon is first described in biological terms and then within a physical model, with special emphasis on the interplay between the two descriptions.

Credit Hours: 3

Prerequisites: PHYSICS 1220 or PHYSICS 2760 and BIO_SC 2300 or instructor's consent

PHYSICS 7360: Extragalactic Astronomy

(same as ASTRON 7360). This course introduces students to the most basic knowledge of extragalactic astronomy, starting from Milky Way and extending to the most distant universe. Topics covered will include galaxy morphology and classification, groups and clusters of galaxies, active galactic nuclei, and galaxy formation and evolution.

Credit Hours: 3

Prerequisites: PHYSICS 2760

PHYSICS 7400: Physics of Electronic Devices

(cross-leveled with PHYSICS 4400). This course is designed for graduate students of Physics and Electrical Engineering who have an interest in learning the basic physical idea underlying the operation of electronic devices. The course consists of lectures, handout lecture notes, problem sets, two mid-term and one final exam.

Credit Hours: 3

Prerequisites: PHYSICS 3150 or equivalent

PHYSICS 7410: Analysis of Biological Macromolecules and Biomaterials

This interdisciplinary, team-taught course introduces basic concepts and experimental techniques for studying bio-macromolecules and biomaterials. A Problem Based Learn/Writing Intensive approach

uses four modules: proteins, membranes, cellular interactions and biomaterials.

Credit Hours: 3

Prerequisites: PHYSICS 2760

PHYSICS 7420: Introduction to Biomedical Imaging

(same as BIOL_EN 7420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasound, MRI, and optical imaging, as well as recent developments in biomedical imaging.

Credit Hours: 3

Prerequisites: PHYSICS 2760

PHYSICS 7450: Introduction to Cosmology

Develops the physical concepts necessary for understanding the major recent discoveries in cosmology, such as the acceleration of the universe and dark energy. No prior knowledge of general relativity is assumed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSICS 3150 or equivalent or instructor's consent

PHYSICS 7500: Computational Biological Physics

Provides a practical introduction (hands-on approach) to the study of the structure and function of biomolecular systems by employing computational methods and theoretical concepts familiar from the physical sciences.

Credit Hours: 3

Prerequisites: PHYSICS 1220 or PHYSICS 2760 or instructor's consent

PHYSICS 7510: Single Molecule Biophysics

(same as BIOCHM 7510; cross-leveled with PHYSICS 4510). The course provides an overview of the biophysics of enzymes, nucleic acids and the cytoskeleton. Topics covered will include diffusion, molecular motors, polymerization of the cytoskeleton and the polymer properties of nucleic acids and microtubules

Credit Hours: 3

Prerequisites: PHYSICS 2760

PHYSICS 7550: Cosmochemistry

(same as ASTRON 7550). Chemistry of cosmic dust and molecules.

Credit Hours: 3

Prerequisites: PHYSICS 2760 or PHYSICS 1220; instructor's consent

PHYSICS 7600: Semiconductor Optics

It is an introductory-level course in the field of optical processes in semiconductors (both inorganic and organic) and solid-state optoelectronics, designed both for graduate and undergraduate students of Physics, Chemistry and Electrical Engineering.

Credit Hours: 3

Prerequisites: PHYSICS 3150 or instructor's consent

PHYSICS 7650: Modern Condensed Matter Physics

Introduces the basic concepts and gives an overview of the latest developments of modern condensed matter physics as the forefront of

(nano) science and technology. Combines lectures and computational laboratory, where students use and develop interactive computer simulations. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 3150 or instructor's consent

PHYSCS 7750: Interstellar Medium

The course discusses observational properties and physical and chemical processes occurring in the interstellar medium. Topics include interstellar diffuse and molecular clouds, HII regions, dust grains, interstellar chemistry, star formation, supernova remnants, and interstellar shock waves.

Credit Hours: 3

Prerequisites: PHYSCS 1220

PHYSCS 7850: Computational Methods in Physics

Use of modern computational techniques in solving a wide variety of problems in solid state, nuclear, quantum and statistical physics.

Credit Hours: 3

Prerequisites: PHYSCS 4800 or instructor's consent

PHYSCS 8040: Study of Techniques of Teaching College Physics

Objectives, methods and problems related to teaching college physics. Some credit in this course is required for all students teaching physics. May repeat for 3 hours maximum.

Credit Hour: 1-3

PHYSCS 8090: Research in Physics

Graduate research. Graded on S/U Basis only.

Credit Hour: 1-99

PHYSCS 8101: Topics of Physics and Astronomy

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-3

Prerequisites: instructor's consent. Departmental consent for repetition

PHYSCS 8110: Physics for High School Teachers I

This is a physics course designed primarily for high school teachers. Topics include motion, forces, Newton's Laws, electricity, k and magnetism. The course uses research based pedagogical methods utilizing inquiry, modeling, and hands-on techniques. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: instructor's consent

PHYSCS 8120: Physics for High School Teachers II

This is a physics course designed primarily for high school teachers. Topics include applications of Newton's laws, energy, waves, optics, heat, and astronomy. The course uses research based pedagogical methods utilizing inquiry modeling, and hands-on techniques. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: instructor's consent

PHYSCS 8130: Physics for High School Teachers 3

This is a physics course designed primarily for high school teachers. Topics include modern physics and history of science. The course uses research based pedagogical methods utilizing inquiry, modeling, and hands-on techniques. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: instructor's consent

PHYSCS 8150: Condensed Matter Physics I

Crystal structure, reciprocal lattice, phonons, neutron and x-ray scattering, free electron theory of metals, Fermi surfaces, energy bands, static properties of solids, semiconductors, devices, and quantum structures, optical properties, excitons, introduction to magnetism and superconductivity.

Credit Hours: 3

Prerequisites: PHYSCS 4800 or equivalent

PHYSCS 8160: Condensed Matter Physics II

The basic Hamiltonian, Phonons, theory of the electron gas, second quantization, Hartree and Hartree-Fock approximation, local-density method, tight-binding theory, electron-electron interaction and screening, Fermi liquid theory, transport properties, impurities, Green's function's, Localization, Quantum Hall effect, magnetism, superconductivity.

Credit Hours: 3

Prerequisites: PHYSCS 8150

PHYSCS 8301: Topics in Astronomy and Astrophysics

(same as ASTRON 8301). Selected topics from solar system, stellar, galactic and extragalactic astronomy and astrophysics. May be repeated to a maximum of six hours.

Credit Hours: 3

Prerequisites: instructor's consent

PHYSCS 8310: College Science Teaching

(same as ASTRON 8310, BIO_SC 8724 and LTC 8724). Study of learner characteristics, teaching strategies, and research findings related to teaching science at the post-secondary level.

Credit Hours: 3

PHYSCS 8350: Science Outreach: Public Understanding of Science

(same as BIO_SC 8725 and AN_SCI 8725) This course is aimed at promoting public understanding and appreciation of science. The students will develop presentations that increase awareness of the impact of science on many aspects of our daily lives.

Credit Hour: 1-2

PHYSCS 8400: Low Energy Neutron Scattering

Theory, application of low energy neutron scattering to investigation of structure and dynamics of aggregate matter including lattice vibrations, ordered spin systems, spin waves, diffusive motions in liquids; experimental techniques discussed.

Credit Hours: 3

Prerequisites: PHYSCS 8150

PHYSCS 8410: Concepts in Nanoscale Materials: Interdisciplinary Science

This interdisciplinary course covers basic concepts in nanoscale materials, their characterization, and how and why they differ from conventional bulk materials. The course focuses on neutron scattering methods and uses lectures, problem-based modules, and writing assignments.

Credit Hours: 3

Prerequisites: PHYSCS 3150 and instructor's consent

PHYSCS 8420: X-ray and Neutron Scattering Methods for Studying Surfaces/Interfaces of Nanocrystalline Materials

This course develops the conceptual foundation of neutron and x-ray scattering methods for probing the structure of epitaxial films, nanomaterials and their buried interfaces. A particular emphasis is given to the use of intense synchrotron x-ray radiation. Course graded on A-F basis only.

Credit Hours: 3

PHYSCS 8450: Plasma Physics

Single particle motion, plasma kinetic theory, magnetohydrodynamics and other fluid theories, waves in unmagnetized and magnetized plasmas, transport phenomena, instabilities, controlled fusion.

Credit Hours: 3

Prerequisites: instructor's consent

PHYSCS 8550: Stellar Structure and Evolution

(same as ASTRON 8550). Reviews of atomic and molecular spectra. Investigates quantum radiation law, emission and absorption processes, radiation transfer theory, continuous and discrete line spectra of stars, stellar composition.

Credit Hours: 3

Prerequisites: PHYSCS 4250, PHYSCS 4800, or instructor's consent

PHYSCS 8560: Quantitative X-Ray Microanalysis and Advanced Imaging

This course covers the theory and methodology to quantitatively analyze materials using both energy-dispersive (EDS) and wavelength-dispersive (WDS) spectrometry. Other topics include chemical mapping and data extraction using image processing and analysis techniques.

Credit Hours: 3

Prerequisites: PHYSCS 7230

PHYSCS 8610: Classical Mechanics

The interplay of dynamics and symmetry, Hamilton's principle and Noether's theorem, Lagrangian, Hamiltonian, Hamilton-Jacobi theories of mechanics in special relativity. Rigid body motion, small oscillation, canonical transformations and fields as continuous mechanical systems.

Credit Hours: 3

Prerequisites: PHYSCS 4140 or equivalent

PHYSCS 8620: Electrodynamics I

Electrostatic potential and fields, boundary-value problems in electrostatics, methods of images, Green's functions, multipole

expansion, dielectrics, magnetostatics, magnetic materials, Maxwell's equations, time-varying fields.

Credit Hours: 3

Prerequisites: PHYSCS 8610 or instructor's consent

PHYSCS 8640: Electrodynamics II

Electromagnetic wave propagation, reflection, refraction, wave guides, cavities antennas and diffraction, tensors, special relativity, the Lorentz group, dynamics of relativistic particles and fields radiation by moving charges, retardation, bremsstrahlung. Additional topics may include magnetohydrodynamics and plasma physics.

Credit Hours: 3

Prerequisites: PHYSCS 8620 or instructor's consent

PHYSCS 8660: Methods in Mathematical Physics

Concentrates on mathematical techniques used in modern physics. Infinite series, functions of a complex variable, differential equations, Fourier series and integral, etc.

Credit Hours: 3

Prerequisites: PHYSCS 4700 or instructor's consent

PHYSCS 8680: Thermodynamics and Statistical Mechanics

Thermodynamics as applied in physics, chemistry; laws of distribution; statistical methods of study matter, radiation.

Credit Hours: 3

Prerequisites: PHYSCS 8710 or concurrently

PHYSCS 8700: Non-Equilibrium Statistical Mechanics

This course provides an introduction to the theoretical and mathematical description of classical stochastic systems with examples from biophysics and condensed matter physics.

Credit Hours: 3

Prerequisites: PHYSCS 8680 or consent of instructor

PHYSCS 8710: Quantum Mechanics I

Non-relativistic quantum theory in Hilbert space. States and self-adjoint observables, unitary time evolution in various pictures, the path-integral, identical particles, Fock space, angular momentum and some perturbation theory.

Credit Hours: 3

Prerequisites: PHYSCS 8610

PHYSCS 8720: Quantum Mechanics II

More perturbation theory, variational methods, semi-classical methods and application to radiation theory, linear response theory and rudiments of relativistic quantum mechanics including the Klein-Gordan equation and the Dirac equation.

Credit Hours: 3

Prerequisites: PHYSCS 8710

PHYSCS 8730: Quantum Mechanics III

Properties of many-particle systems at low temperature. General Formalism for Fermi and Bose systems, theory of superconductivity and superfluidity, introduction to quantum spin model--Diagramatic

formulation of quantum electrodynamics. Scattering of electrons and positions, introduction to radioactive corrections. Graded on S/U basis only.

Credit Hours: 3

Prerequisites: PHYSCS 8720

PHYSCS 8801: Topics in Solid State Theory

Selected topics in solid-state theory, including various elementary excitations in solids and their interactions. May be elected more than once.

Credit Hours: 3

Prerequisites: instructor's consent

PHYSCS 8820: Relativity and Gravitation

Special and general theories of relativity. Discussion of accelerated observers and the principles of equivalence. Einstein's gravitational field equations, black holes, gravitational waves and cosmology.

Credit Hours: 3

Prerequisites: PHYSCS 8610, PHYSCS 8620

PHYSCS 9090: Research in Physics

Research leading to Ph.D. dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: PhD candidacy has been established

Plant Science Courses

PLNT_S 1002: Topics In Plant Science - Biological/Physical/Mathematics

Initial offering of a course(s) in a specific subject matter area. Offered when proposed by a faculty member in that area of expertise.

Credit Hour: 1-4

PLNT_S 1010: Plant Science Orientation

Introduction to perspectives, comprehensiveness, and current issues in the plant sciences. Involves independent learning, faculty interviews, and oral and written communication about agronomy, horticulture, entomology, and plant pathology.

Credit Hour: 1

PLNT_S 1020: World Food and You

(same as F_S 1020). Basic scientific principles involved in production agriculture, food processing, marketing and consumption. Evaluation and understanding of current agriculture issues that affect human foods and required nutrients.

Credit Hours: 3

PLNT_S 1120: Career Development

Introductory course for students planning a career in plant sciences. Includes an overview of each emphasis area, as well as development of professional skills required for a successful career. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: Plant Science majors only

PLNT_S 1125: People, Plants and the Environment

Exploration of the science and niche relationships that exist between people, plants, animals, and the environment. Emphasis placed on urban vs. rural culture, the impact on production agriculture and the world food supply.

Credit Hours: 3

Prerequisites: restricted to freshmen and sophomores

PLNT_S 2002: Topics in Plant Science - Biological/Physical/Mathematics

Initial offering of a course(s) in a specific subject matter area. Offered when proposed by a faculty member in that area of expertise.

Credit Hour: 1-4

PLNT_S 2075: Environmental Horticulture

Investigate interrelationships between plants and the environment. Special emphasis placed on improving homeowners' environmental stewardship and their knowledge of sustainable practices. Graded on A-F basis only.

Credit Hours: 3

PLNT_S 2100: Introduction to Soils

(same as SOIL 2100). Introduction to soil sciences with emphasis placed on physical, biological, and chemical properties and application to land use, plant growth and environmental problems.

Credit Hours: 3

Recommended: 3 hrs of Chemistry

PLNT_S 2110: Plants and their Cultivation

Principles of plant growth with emphasis on anatomy, physiology, and response to environmental factors. Production and protection of economically important crop and horticulture species.

Credit Hours: 3

PLNT_S 2125: Plant Structure and Function

Introduction to plant anatomy;physiology; how plant structures and processes are involved in growth/development. Labs explore photosynthesis, mineral nutrition, water relations, growth, and hormonal regulation.

Credit Hours: 3

Prerequisites: BIO_SC 1200 and CHEM 1100 or CHEM 1320

PLNT_S 2150: Plants for Interior Design

Identification, culture and uses of plants adaptable to or capable of becoming acclimated to interior environments.

Credit Hours: 2

PLNT_S 2195: Grapes and Wines of the World

(same as F_S 2195). Explores the world of wine through study of viticultural principles and practices, wine styles, classifying wine, the winemaking process and New World and Old World wine regions. Learn wine tasting skills and experience wines from around the world. World

wine consumption, social and physical health benefits of moderate wine consumption.

Credit Hours: 3

PLNT_S 2210: Ornamental Woody Plants

Identification and evaluation of trees and shrubs for landscape use.

Credit Hours: 3

Prerequisites: BIO_SC 1200 or instructor's consent

PLNT_S 2215: Ornamental Herbaceous Plants

Annuals, biennials, perennials, ground covers, and bulbs; their identification, nomenclature classification, culture and use.

Credit Hours: 3

Prerequisites: BIO_SC 1010 or BIO_SC 1500 or BIO_SC 1200

PLNT_S 2220: Introduction to Floral Design

Introduction to the basics of floral design with special emphasis on design mechanics, flower processing, care and handling. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Some sections of this course may be restricted to Plant Science Majors Only and/or students with 75 credit hours or less

PLNT_S 2221: Everyday Floral Design

Intermediate floral design course expanding skills from introductory floral design with emphasis on the elements and principles of design. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PLNT_S 2220

PLNT_S 2240: Landscape Graphic Communication

Landscape design is a blend of art and science. This course is designed to help students expand their artistic skills, including graphic communications. Topics included to achieve this goal are drawing mediums and techniques, coloring mediums and techniques, symbol usage, and elevation drawings. Graded on A-F basis only.

Credit Hours: 2

Recommended: ART_DRAW 1050

PLNT_S 2250: Landscape Site Analysis

In order to effectively design what a site can become a landscape designer must first be able to accurately see what it is. This course presents a detailed look at obtaining, calculating, and manipulating a site's topography and features while offering a glimpse into the methods and means required for implementation of the final landscape design. Graded on A-F basis only.

Credit Hours: 2

Recommended: MATH 1100 or equivalent

PLNT_S 2254: Landscape Design

An introduction into the processes, principles, and practices of landscape design, this course begins with site analysis and moves through the drawing and presentation of your landscape concepts.

Credit Hours: 3

Prerequisites: Completion of 30 hours

PLNT_S 2710: Insects in the Environment

Ways in which insects are adapted for life in particular environments, basics of morphology, taxonomy; how important insect pests affect food and crop production, and principles of control.

Credit Hours: 3

PLNT_S 3002: Topics in Plant Science - Biological/Physical/Mathematics

Initial offering of a course(s) in a specific subject matter area. Offered when proposed by a faculty member in that area of expertise.

Credit Hour: 1-4

PLNT_S 3110: Horticultural Drainage and Irrigation Systems

This course is designed to provide practical knowledge of drainage and irrigation systems for golf courses, sports fields, lawns, landscapes, greenhouses, nurseries and vineyards. Graded on A-F basis only.

Credit Hours: 2

PLNT_S 3130: Undergraduate Seminar in Plant Science

Discussion of assigned or selected topics in Plant Science, including participation in a panel debate and individual seminar oral presentations.

Credit Hour: 1

Prerequisites: Completion of 60 credit hours

PLNT_S 3210: Principles of Weed Science

Introduction to principles of weed growth, reproduction, and impact on human activities. Discussion of weed control techniques and technology, weed identification, and developing weed management strategies.

Credit Hours: 4

Prerequisites: PLNT_S 2110 or BIO_SC 1200

PLNT_S 3213: Genetics of Agricultural Plants and Animals

(same as AN_SCI 3213). Concepts of molecular, transmission, and population and quantitative genetics. Emphasis given to breeding and biotechnological applications in plant and animal agriculture. Prerequisites: MATH 1100 and one of the following: BIO_SC 1100 (or F_W 1100) or BIO_SC 1200 or BIO_SC 1500.

Credit Hours: 3

PLNT_S 3220: Special Occasion Floral Design

Advanced floral design course with emphasis in silk décor, sympathy design and public ceremony design. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PLNT_S 2220 and PLNT_S 2221 with grade of B or above in both

PLNT_S 3221: Wedding Floral Design

Advanced floral design course with emphasis in wedding floral design and personal pieces design. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PLNT_S 2220 and PLNT_S 2221 with grade of B or above in both

PLNT_S 3222: Retail Floral Management

Course focusing on all areas of retail floral management: business finance, marketing, products and services, employee management, and customer service. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PLNT_S 2220 and PLNT_S 2221

PLNT_S 3225: Plant Breeding and Genetics

Mendelian genetic principles and related genetic developments applicable in plant breeding. Discussion of established and new plant breeding procedures applicable to cultivar development.

Credit Hours: 3

Prerequisites: PLNT_S 2110 or equivalent

PLNT_S 3230: Plant Propagation

Principles and practices of propagation of horticultural plants. Prerequisites: One of the following: PLNT_S 2075, BIO_SC 1200, or BIO_SC 1500 or Instructor's consent.

Credit Hours: 3

PLNT_S 3240: Principles of Viticulture I

(same as F_S 3240). Grapevine growth, development, selection, propagation, training systems, pruning, and harvesting; vineyard site selection, design, and development. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: F_S 1010 and F_S 2195 or PLNT_S 2195; or PLNT_S 2100; or PLNT_S 2110; or PLNT_S 2125

PLNT_S 3250: Green Industry Bidding

Principles of interpreting drawings, estimating labor, equipment, materials and other costs and recordkeeping for preparation of competitive green industry bids. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Plant Science major and completion of 30 credit hours

PLNT_S 3252: Arboriculture and Pruning

Concepts for establishment and management of urban trees. Emphasis on planting, fertilization, pruning, disease, hazard assessment and components of a municipal trees ordinance.

Credit Hour: 1

Prerequisites: PLNT_S 2210 or instructor's consent

PLNT_S 3254: Landscape AutoCAD

AutoCAD is the most widely utilized computer aided drafting software program in the professional landscape design industry. This course will teach students how to utilize AutoCAD to transform their landscape design skills into a digital format and investigate the benefits of utilizing technology as a design tool. We will also explore other industry utilized software, and their functionality, with focus on landscape design and presentation. Additional software will include, but not be limited to, AutoDesk Revit; Adobe Photoshop; and Sketchup. Graded on A-F basis only.

Credit Hours: 3

Recommended: PLNT_S 2250 and PLNT_S 2254

PLNT_S 3260: Greenhouse Management

Greenhouse design, environmental control and equipment. Practices associated with plant nutrition management, greenhouse pest control, postproduction handling and marketing of greenhouse crops, and greenhouse management are also covered.

Credit Hours: 4

Prerequisites: PLNT_S 2075 or instructor's consent

PLNT_S 3270: Forage Crops

An introduction to principle forage crops, including identification, anatomy, physiology, and growth characteristics. Pasture production and management, grazing systems, and forage preservation and utilization will also be covered.

Credit Hours: 3

Prerequisites: PLNT_S 2125 or AN_SCI 3232 or instructor's consent

PLNT_S 3275: Grain Crops

Lecture and discussion covering production and utilization, plus growth and development of a wide range of grain crops, including Missouri crops. Problem solving tasks include agronomics, economics and environmental factors.

Credit Hours: 3

Prerequisites: PLNT_S 2110 or PLNT_S 2125

PLNT_S 3355: Introductory Turfgrass Management

Characteristics of turf materials, principles of establishment and maintenance.

Credit Hours: 3

Prerequisites: PLNT_S 2100 or instructor's consent

PLNT_S 3385: Problems in Plant Science

Not accepted as a substitute for any regularly scheduled course. Problems arranged with individual faculty member in specific matter area.

Credit Hour: 1-4

Prerequisites: consent required

PLNT_S 3500: Forest Pathology

Provides basic understanding of biotic and abiotic agents which cause forest diseases, and current approaches to disease control.

Credit Hours: 3

Recommended: 5 hours Biological Sciences or equivalent

PLNT_S 3510: Biology of Fungi

(same as BIO_SC 3510). The diverse roles of fungi in the biosphere will be explored by considering fungi we eat, fungi which destroy our food, fungi in folklore and fungi as global nutrient recyclers.

Credit Hours: 3

Prerequisites: BIO_SC 1200 or BIO_SC 1500 or equivalent

PLNT_S 3710: Introductory Entomology

(same as BIO_SC 3710). Emphasizes the role insects play in the scheme of life. Topics include insect structure, development, diversity,

ecology, communication and behavior, and management. Prerequisites: Completion of 60 credit hours and one of the following: BIO_SC 1100 (or F_W 1100) or BIO_SC 1200, or BIO_SC 1500.

Credit Hours: 3

PLNT_S 3715: Insect Diversity

(same as BIO_SC 3715). Laboratory exercises emphasizing external insect anatomy, classification, and identification (to family level). Preparation of an insect collection is required.

Credit Hours: 2

Prerequisites or Corequisites: PLNT_S 3710 (or BIO_SC 3710)

PLNT_S 4002: Topics in Plant Science - Biological/Physical/Mathematics

Initial offering of a course(s) in a specific subject matter area. Offered when proposed by a faculty member in that area of expertise.

Credit Hour: 1-4

PLNT_S 4313: Soil Fertility and Plant Nutrition

(same as SOIL 4313). Explanation of principles of delivery of plant nutrients to plants, discussion of the role of each essential nutrient in crop plants and introduction to the management of soil amendments.

Credit Hours: 3

Prerequisites: SOIL 2100 or instructor's consent

PLNT_S 4314: Soil Fertility and Plant Nutrition Laboratory

(same as SOIL 4314). The application of elementary analytical procedures to the evaluation of the nutrient status of soils and crop plants.

Credit Hours: 2

Prerequisites or Corequisites: SOIL 4313

PLNT_S 4315: Crop Physiology

Basic course on crop growth and development. Emphasis is on physiological processes and morphology of crop plants, and their application to crop breeding and management decisions.

Credit Hours: 3

Prerequisites: PLNT_S 2125 or equivalent

PLNT_S 4320: Molecular Plant Physiology

(same as BIO_SC 4320; cross-leveled with PLNT_S 7320). Modern physiology of higher plants using common cultivated plants as examples. Prerequisites: CHEM 1320 or CHEM 1330 and one of the following: BIO_SC 1500 or BIO_SC 1200.

Credit Hours: 3

PLNT_S 4325: Field Crop Breeding

(cross-leveled with PLNT_S 7325). Will introduce students to the application of genetics and the plant sciences to the breeding and improvement of self-pollinated field crops. Classical, current and innovative plant breeding techniques will be addressed.

Credit Hours: 3

Prerequisites: PLNT_S 2110 or PLNT_S 2125, and PLNT_S 3213 (or equivalent), and PLNT_S 3225 (or equivalent)

PLNT_S 4330: Plant Breeding Theory

Designed to provide a logical application of genetic concepts to mating and selection theory in general improvement of cross pollinated crops.

Credit Hours: 3

Prerequisites: PLNT_S 3225 or equivalent

PLNT_S 4340: Principles of Viticulture II

(same as F_S 4340). Environmental and biological factors influencing vine physiology and winegrape quality. Irrigation, canopy management, pest and disease control, budgets and current trends in viticulture. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: F_S 3240 or PLNT_S 3240

PLNT_S 4350: Nursery Crop Production and Management

Operations, methods used by wholesale, retail, landscape nurseries. Field problems, observational trips.

Credit Hours: 4

Recommended: PLNT_S 3230 and PLNT_S 3235

PLNT_S 4355: Advanced Turfgrass Management

(cross-leveled with PLNT_S 7355). Provides turfgrass majors a more informative and applicable look at mathematics of turfgrass management, application techniques, cultural practices, and soil/water relationships applicable to careers in golf course and sports turf management, lawn care, and professional grounds maintenance.

Credit Hours: 3

Prerequisites: PLNT_S 3355 or instructor's consent

PLNT_S 4360: Precision Agriculture Science and Technology

(same as AG_S_M 4360, SOIL 4360; cross-leveled with PLNT_S 7360, AG_S_M 7360, SOIL 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

Credit Hours: 3

Prerequisites: PLNT_S 2100 or SOIL 2100, or PLNT_S 2110, or instructor's consent

PLNT_S 4365: Greenhouse Crops Production

Production management decision and commercial culture of the major floriculture crops.

Credit Hours: 4

Prerequisites: PLNT_S 3260 or instructor's consent

PLNT_S 4385: Problems in Plant Science

Special problem in plant pathology designed for the minor program in Plant Pathology. Problems arranged on an individual student basis.

Credit Hours: 3

PLNT_S 4400: Plant Anatomy

(same as BIO_SC 4400). Comparative structure, growth of meristems; development, structure of important cell types, tissues systems; comparative anatomy of stem, root, leaf. Emphasizes anatomy of gymnosperms, angiosperms. Includes lab. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: BIO_SC 1200 or equivalent

PLNT_S 4500: Biology and Pathogenesis of Plant-Associated Microbes

(cross-leveled with PLNT_S 7500). Diagnosis of diseases of plants caused by fungi, nematodes, viruses and bacteria Environmental and genetic factors leading to disease development and strategies for disease management, including biotechnology.

Credit Hours: 4

Prerequisites: 5 hours from the following courses - BIO_SC 1010, BIO_SC 1020, BIO_SC 1030, BIO_SC 1100, BIO_SC 1200 or BIO_SC 1500; and completion of 60 credit hours

PLNT_S 4520: Environmental Microbiology

Fundamental knowledge of selected microbial processes that are important in agriculture, environmental detoxification, and microbial biotechnology. Emphasis is on molecular, genetic and physiological aspects of nitrogen metabolism, bioconversions, antibiosis and biocontrol.

Credit Hours: 3

PLNT_S 4550: Plant Biotechnology

(cross-leveled with PLNT_S 7550). Principles of gene expression, metabolic pathway analysis and data mining, plant tissue culture and transformation, transgene integration and expression analysis, plant epigenome, emerging transgenic technologies, etc.

Credit Hours: 4

Prerequisites: BIO_SC 2960 or equivalent; BIO_SC 2200 or equivalent; BIO_SCI 2300 or equivalent; PLNT_S 2125

PLNT_S 4710: Systematic Entomology

(cross-leveled with PLNT_S 7710). Taxonomy of insects: emphasizes biology and classification of orders and suborders in lecture, and major families in lab. Insect collection required. Prerequisites: PLNT_S 3715 and one of the following: BIO_SC 1100 or BIO_SC 1500.

Credit Hours: 5

PLNT_S 4720: Aquatic Entomology

Identification, life histories, ecology of aquatic insects. Grading is based on lecture, lab, and a collection. For students of wildlife, fisheries management, aquatic biology, advanced entomology.

Credit Hours: 3

Prerequisites: PLNT_S 3710 or PLNT_S 3715 or equivalent, or instructor's consent

PLNT_S 4730: Insect Pest Management for Plant Protection

(cross-leveled with PLNT_S 7730). History and concepts of Integrated Pest Management of insect pests, emphasizing complementary use of biological control, plant resistance, environmental manipulations, genetic manipulations, and selective use of insecticides.

Credit Hours: 3

Prerequisites: PLNT_S 3710 or instructor's consent

PLNT_S 4940: Internship in Plant Science

Combines study, observation, and employment with an industry or government agency in area of agronomy or horticulture. Written and oral reports and faculty evaluation.

Credit Hours: 3

Prerequisites: Completion of 75 hours including two courses in department and instructor's consent

PLNT_S 4950: Undergraduate Research in Plant Science

Capstone experience consisting of investigations in Plant Science in support of an undergraduate thesis or special project portfolio.

Credit Hour: 1-3

Prerequisites: Completion of 75 credit hours and Plant Science Majors only

PLNT_S 4965: Special Readings in Plant Pathology

Independent readings and discussions of topics in entomology selected in consultation with supervising faculty member. Paper required.

Credit Hour: 1-99

PLNT_S 4970: Readings in Molecular Ecology of Herbivory

(cross-leveled with PLNT_S 7970). The application of molecular biology tools to the rich history of chemical, physiological, population, and multi-trophic ecology studies on plant herbivore interactions has made for an exciting, fast-paced field at the forefront of ecology, 'functional biology' and 'systems biology'. Graded on S/U basis only.

Credit Hour: 1

PLNT_S 4975: Advanced Landscape Design

(cross-leveled with PLNT_S 7975). Development of project presentation techniques by analysis of the social, cultural, historical and ecological aspects of landscape design.

Credit Hours: 4

Prerequisites: PLNT_S 2254 or instructor's consent

PLNT_S 7001: Topics

Initial offering of a course(s) in a specific subject matter area. Offered when proposed by a faculty member in that area of expertise.

Credit Hour: 1-4

PLNT_S 7085: Problems

Advanced studies not expected to terminate in thesis. Problems arranged with individual faculty member in specific matter area.

Credit Hour: 1-3

Prerequisites: instructor's consent

PLNT_S 7087: Seminar

In-depth development of advanced aspects of plant, insect, or microbial sciences through reviews of results of research in progress and current scientific publications. Graded on S/U basis only.

Credit Hour: 1

PLNT_S 7090: Nonthesis Research

Original investigation not leading to preparation of thesis.

Credit Hour: 1-9

PLNT_S 7313: Soil Fertility and Plant Nutrition

(same as SOIL 7313). Explanation of principles of delivery of plant nutrients to plants, discussion of the role of each essential nutrient in crop plants and introduction to the management of soil amendments.

Credit Hours: 3

Prerequisites: SOIL 2110 or instructor's consent

PLNT_S 7314: Soil Fertility and Plant Nutrition Laboratory

(same as SOIL 7314). The application of elementary analytical procedures to the evaluation of the nutrient status of soils and crop plants.

Credit Hours: 2

Prerequisites: concurrent enrollment or previous completion of SOIL 4313 SOIL 7313

PLNT_S 7315: Crop Physiology

Basic course on crop growth and development. Emphasis is on physiological processes and morphology of crop plants, and their application to crop breeding and management decisions.

Credit Hours: 3

Prerequisites: PLNT_S 2125 or equivalent

PLNT_S 7320: Molecular Plant Physiology

(same as BIO_SC 7320; cross-leveled with PLNT_S 4320). Modern physiology of higher plants using common cultivated plants as examples. May be taken with or without laboratory.

Credit Hours: 3

Prerequisites: BIO_SC 1500 or BIO_SC 1200 and five hours of chemistry

PLNT_S 7325: Field Crop Breeding

(cross-leveled with PLNT_S 4325). Will introduce students to the application of genetics and the plant sciences to the breeding and improvement of self-pollinated field crops. Classical, current and innovative plant breeding techniques will be addressed.

Credit Hours: 3

Prerequisites: PLNT_S 2110 or PLNT_S 2125, and PLNT_S 3213 (or equivalent), and PLNT_S 3225 (or equivalent)

PLNT_S 7330: Plant Breeding Theory

Designed to provide a logical application of genetic concepts to mating and selection theory in general improvement of cross pollinated crops.

Credit Hours: 3

Prerequisites: PLNT_S 3225 or equivalent

PLNT_S 7350: Readings

Individual study of assigned topics.

Credit Hour: 1-3

Prerequisites: instructor's consent

PLNT_S 7355: Advanced Turfgrass Management

(cross-leveled with PLNT_S 4355). Provides turfgrass majors a more informative and applicable look at mathematics of turfgrass management, application techniques, cultural practices, and soil/water relationships applicable to careers in golf course and sports turf management, lawn care, and professional grounds maintenance. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PLNT_S 3355 or instructor's consent

PLNT_S 7360: Precision Agriculture Science and Technology

(same as AG_S_M 7360 and SOIL 7360; cross-leveled with PLNT_S 4360, AG_S_M 4360, SOIL 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

Credit Hours: 3

Prerequisites: SOIL 2100, PLNT_S 2110 or instructor's consent

PLNT_S 7365: Greenhouse Crops Production

Production management decision and commercial culture of the major floriculture crops.

Credit Hours: 4

Prerequisites: PLNT_S 3260 or instructor's consent

PLNT_S 7370: Small Fruit and Vegetable Production

Emphasizes production, management and marketing practices for small fruit and vegetable crops.

Credit Hours: 3

Prerequisites: PLNT_S 2100, PLNT_S 3230, and PLNT_S 3235

PLNT_S 7400: Plant Anatomy

(same as BIO_SC 7400). Comparative structure, growth of meristems; development, structure of important cell types, tissue systems; comparative anatomy of stem, root, leaf. Emphasized anatomy of gymnosperms, angiosperms. Includes lab. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: BIO_SC 1200 or equivalent

PLNT_S 7500: Biology and Pathogenesis of Plant-Associated Microbes

Diagnosis of disease of plants caused by fungi, nematodes, viruses and bacteria. Environmental and genetic factors leading to disease development and strategies for disease management, including biotechnology.

Credit Hours: 4

Prerequisites: 5 hours BIO_SC

PLNT_S 7550: Plant Biotechnology

(cross-leveled with PLNT_S 4550). Principles of gene expression, metabolic pathway analysis and data mining, plant tissue culture and transformation, transgene integration and expression analysis, plant epigenome, emerging transgenic technologies, etc.

Credit Hours: 4

Prerequisites: BIO_SC 2960 or equivalent; BIO_SC 2200 or equivalent; BIO_SCI 2300 or equivalent; PLNT_S 2125

PLNT_S 7710: Systematic Entomology

Taxonomy of insects: emphasizes biology and classification of orders and suborders in lecture, and major families in lab. Insect collection required.

Credit Hours: 5

Prerequisites: PLNT_S 3710 and PLNT_S 3715 or 10 hours Biological Sciences

PLNT_S 7720: Aquatic Entomology

Identification, life histories, ecology of aquatic insects. Grading is based on lecture, lab, and a collection. For students of wildlife, fisheries management, aquatic biology, advanced entomology.

Credit Hours: 3

Prerequisites: PLNT_S 3710, PLNT_S 3715 or equivalent or instructor's consent

PLNT_S 7730: Insect Pest Management for Plant Protection

(cross-leveled with PLNT_S 4730). History and concepts of Integrated Pest Management for insects pests, emphasizing complementary use of biological control, plant resistance, environmental manipulations, genetic manipulations, and selective use of insecticides.

Credit Hours: 3

Prerequisites: PLNT_S 3710 or instructor's consent

PLNT_S 7820: Principles of Insect Physiology

Major concepts of insect physiology emphasizing functions of organ-systems sensory physiology hormones in development, nutrition.

Credit Hours: 4

Prerequisites: PLNT_S 3710, PLNT_S 3715 and PLNT_S 7810 or equivalent

PLNT_S 7965: Readings in Plant Stress Biology

Independent readings and discussion of recent research publications. Topics selected in consultation with supervisory faculty member.

Credit Hour: 1-9

Prerequisites: instructor's consent

PLNT_S 7970: Readings in Molecular Ecology of Herbivory

(cross-leveled with PLNT_S 4970). The application of molecular biology tools to the rich history of chemical, physiological, population, and multi-trophic ecology studies on plant herbivore interactions has made for an exciting, fast-paced field at the forefront of ecology, 'functional biology' and 'systems biology'. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: Instructor's consent

PLNT_S 7975: Advanced Landscape Design

(cross-leveled with PLNT_S 4975). Development of project presentation techniques by analysis of the social, cultural, historical and ecological aspects of landscape design.

Credit Hours: 4

Prerequisites: PLNT_S 2254, instructor's consent

PLNT_S 8001: Topics

Instruction in specific subject matter areas in plant, insect or microbial sciences.

Credit Hour: 1-4

Prerequisites: instructor's consent

PLNT_S 8010: Professionalism and Ethics

Ethical issues in the conduct of scientific research including data integrity, plagiarism, and intellectual property. Scientific writing, lab management, peer review and other professional skills for the life sciences. Graded on A-F basis only.

Credit Hours: 2

PLNT_S 8090: Thesis Research

Original investigations in plant, insect or microbial science in support of thesis for master's candidates. Graded on S/U basis only.

Credit Hour: 1-10

PLNT_S 8330: Molecular Breeding

Development of Molecular Breeding, Evolution of Transgenics, Transformation and Gene Transfer Methods, Transgenics in the Food Supply Genetics and Marker Technology, Genotyping Methods for Marker Assisted Selection (MAS), and Emerging Transgenic and Genotyping Technologies. Graded on A-F basis only. Prerequisites: PLNT_S 3225

Credit Hours: 3

PLNT_S 8362: Introduction to Plant Metabolism

(same as BIO_SC 8362 and BIOCHM 8362). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant metabolism. Graded on A-F basis only.

Credit Hours: 2

PLNT_S 8365: Introduction to Molecular Cell Biology

(same as BIOCHM 8365 and BIO_SC 8365). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis on plant biology. This course examines the basic concepts and techniques used to understand molecular cell biology. Graded on A-F basis only.

Credit Hours: 2

PLNT_S 8410: Advanced Weed Science

Discussion of herbicide physiology and fate in the environment, current development in weed science theory and methodology, and application of analytical procedures in weed research.

Credit Hours: 3

Prerequisites: PLNT_S 3210

PLNT_S 8420: Herbicide Mode of Action and Symptomology

Designed for graduate students to gain an understanding of the in-depth processes by which herbicides interrupt normal plant growth and development at a tissue, cellular, and enzymatic level while learning to diagnose visual symptoms associated with herbicide injury. Course maybe repeated for credit. Graded on A-F basis.

Credit Hours: 2

Prerequisites: PLNT_S 3210; instructor's consent

PLNT_S 8505: Introduction to Plant Stress Biology

(same as BIO_SC 8505) This course is part of a series that aims to provide a solid conceptual foundation to interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant stress biology. Graded on A-F basis only.

Credit Hours: 2

PLNT_S 8530: Research with Plant Stress Agents

Students will learn key research strategies for abiotic and biotic plant stress agents. Students will complete two focused hands-on projects. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PLNT_S 7500 and PLNT_S 7510 or PLNT_S 7315, or PLNT_S 7320, or equivalent

PLNT_S 8650: Ecological and Evolutionary Genomics

(same as BIO_SC 8650). This course is designed to give a background in evolution and then explore an exciting new field: Ecological and evolutionary genomics. We will study genes that affect fitness and how whole genomes evolve. Graded on A-F basis only.

Credit Hours: 2

PLNT_S 8720: Insect Behavior

An examination of the breadth of behaviors found in insects, such as orientation mechanisms, communication, dispersal and migration, defensive mechanisms, lost location, feeding strategies, pollination, courtship and reproduction, and social behavior.

Credit Hours: 3

Prerequisites: PLNT_S 3710 and PLNT_S 3715 or 10 hours of Biological Sciences

PLNT_S 9001: Topics

Instruction in specific subject matter areas in plant, insect or microbial sciences.

Credit Hour: 1-4

Prerequisites: instructor's consent

PLNT_S 9087: Seminar in Plant Science

In-depth development of advanced aspects of plant, insect and microbial sciences through reviews of results of research in progress and current scientific publications. Graded on A-F or S/U basis dependent on section.

Credit Hour: 1

PLNT_S 9090: Dissertation Research

Original investigations in plant, insect or microbial science in support of dissertation for doctoral candidates. Graded on a S/U basis only.

Credit Hour: 1-10

PLNT_S 9310: Ecology of Grazing Lands Systems

Students travel to grazing lands ecosystems to learn: the components and function of grazing lands; research techniques in soil-plant-animal research; forage-livestock ecology; and the role of forages in conservation practices, wildlife habitat, and sustainable agriculture.

Credit Hours: 3

Prerequisites: instructor's consent

PLNT_S 9415: Advanced Plant Physiology

Advanced course in the physiology of plant growth and development. Discussion of current and classical studies in plant physiology with emphasis on responses to environmental variation.

Credit Hour: 1-3

Prerequisites: PLNT_S 4315 or PLNT_S 4320 or equivalent. Instructor's consent required

PLNT_S 9440: Applied Quantitative and Statistical Genetics

Estimation of genetic effects using means and variances, diallel analysis, environmental stability responses, index selection, and gain from selection.

Credit Hours: 3

Prerequisites: PLNT_S 4330, STAT 4510, STAT 4530, AN_SCI 9423, or equivalent

PLNT_S 9540: Genetics of Plant-Microorganism Interaction

Molecular and general genetics of the interactions between plants and pathogenic or symbiotic microorganisms.

Credit Hours: 3

Prerequisites: PLNT_S 7500 and PLNT_S 7510, one course each in Biochemistry and Genetics

PLNT_S 9810: Insect Ecology

Ecological aspects of insect populations and communities including population dynamics, predator-prey interactions, competition, diversity and stability. Quantitative methods are emphasized.

Credit Hours: 3

Prerequisites: PLNT_S 3710 and PLNT_S 3715, STAT 1400 and BIO_SC 3650 or instructor's consent

Political Science Courses**POL_SC 1004: Topics in Political Science - Social Science**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-3

POL_SC 1100: American Government

Topics covered include Constitution, federalism, civil liberties, political attitudes, interest groups, political parties, nominations, elections, and

campaigns, voting behavior, Congress, Presidency, bureaucracy, and judiciary. Meets state law requirement.

Credit Hours: 3

POL_SC 1100H: American Government - Honors

Topics covered include Constitution, federalism, civil liberties, political attitudes, interest groups, political parties, nominations, elections, and campaigns, voting behavior, Congress, Presidency, bureaucracy, and judiciary. Meets state law requirement.

Credit Hours: 3

Prerequisites: Honors eligibility required

POL_SC 1400: International Relations

Contemporary international affairs including family of nations, control of national foreign policies, competition and cooperation in legal, political, economic, social fields.

Credit Hours: 3

POL_SC 1400H: International Relations - Honors

Contemporary international affairs including family of nations, control of national foreign policies, competition and cooperation in legal, political, economic, social fields.

Credit Hours: 3

Prerequisites: Honors eligibility required

POL_SC 2004: Topics in Political Science - Social Science

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-3

POL_SC 2100: State Government

Government and politics at the state level, with emphasis on Missouri. Meets state law constitutional requirement.

Credit Hours: 3

POL_SC 2200: The Judicial Process

Analysis of roles played by American judges and courts in democratic policy formation.

Credit Hours: 3

POL_SC 2445: American Constitutional Democracy

(same as HIST 2445) This course offers an introduction to American consitutional democracy. On the one hand, this course will strive to set the development of America's constitutional democracy into its historical context and to explain it in relation to larger social, political, military, and economic events. A second emphasis is on the nature and character of the American democratic system. Graded on A-F basis only.

Credit Hours: 3

POL_SC 2450: The Intellectual World of the American Founders

This course demonstrates that truly understanding the American constitutional and democratic traditions begins with acknowledging and studying how, in framing the Constitution and in imagining the new nation, the Founders drew on the work and cobbled together the ideas

of thinkers from multiple eras and continents and, moreover, thinkers of vastly different political ideologies and disciplinary expertise.

Credit Hours: 3

Prerequisites: POL_SC 1100

POL_SC 2450H: The Intellectual World of the American Founders - Honors

This course demonstrates that truly understanding the American constitutional and democratic traditions begins with acknowledging and studying how, in framing the Constitution and in imagining the new nation, the Founders drew on the work and cobbled together the ideas of thinkers from multiple eras and continents and, moreover, thinkers of vastly different political ideologies and disciplinary expertise.

Credit Hours: 3

Prerequisites: POL_SC 1100; Honors eligibility required

POL_SC 2455: Constitutional Debates

While we will make reference to the work of canonical political thinkers from the Western tradition during the semester--and while we will also, at times, take a broadly philosophical approach to describing certain of the Founders' theses on governance--this is not a course in "high theory." Instead, our examination of the process of drafting and ratifying the United States Constitution will be more pragmatic in nature, focusing on the practical problems and questions concerning national governance that shaped the final design of the Constitution. At the same time, this description of the class as one that addresses the Constitution in terms of the practical problems that the Founders saw it solving drastically understates the complexity and contentiousness of the subject matter that we will be examining. Specifically, the readings for the course will allow us to identify the ways in which, and reasons for which, the Founders disagreed not only on how to solve the problems of governance that the nation faced in 1787 but, moreover, on what these problems actually were. With regard to this task of understanding the principles underlying the heated debates that arose during the drafting and ratification process, it should be noted that this is not a class in Framers-worship. While we will discuss why the Federalists ultimately "won the day," we will also devote significant attention to how the Anti-Federalists both profoundly influenced how we understand constitutional democracy in the United States and provided an intellectual lineage that still informs contemporary political debate. We will, that is, give each side their due. In addition, we will conclude the semester by considering the Constitution's post-ratification history, looking at a handful of Supreme Court decisions and constitutional amendments in order to think about some of the questions that the 1787 Constitution left un-answered and some of the problems that it left un-solved.

Credit Hours: 3

Prerequisites: POL_SC 1100

POL_SC 2455H: Constitutional Debates - Honors

While we will make reference to the work of canonical political thinkers from the Western tradition during the semester--and while we will also, at times, take a broadly philosophical approach to describing certain of the Founders' theses on governance--this is not a course in "high theory". Instead, our examination of the process of drafting and ratifying the United States Constitution will be more pragmatic in nature, focusing on the practical problems and questions concerning national governance that shaped the final design of the Constitution. At the same time, this description of the class as one that addresses the

Constitution in terms of the practical problems that the Founders saw it solving drastically understates the complexity and contentiousness of the subject matter that we will be examining. Specifically, the readings for the course will allow us to identify the ways in which, and reasons for which, the Founders disagreed not only on how to solve the problems of governance that the nation faced in 1787 but, moreover, on what these problems actually were. With regard to this task of understanding the principles underlying the heated debates that arose during the drafting and ratification process, it should be noted that this is not a class in Framer-worship. While we will discuss why the Federalists ultimately "won the day," we will also devote significant attention to how the Anti-Federalists both profoundly influenced how we understand constitutional democracy in the United States and provided an intellectual lineage that still informs contemporary political debate. We will, that is, give each side their due. In addition, we will conclude the semester by considering the Constitution's post-ratification history, looking at a handful of Supreme Court decisions and constitutional amendments in order to think about some of the questions that the 1787 Constitution left un-answered and some of the problems that it left un-solved.

Credit Hours: 3

Prerequisites: Honors eligibility required; POL_SC 1100

POL_SC 2600: Canadian Politics and Government

Introductory survey of Canada, including constitutional development, governmental institutions, political participation, and Canadians' political attitudes and behaviors.

Credit Hours: 3

Prerequisites: sophomore standing

POL_SC 2700: Comparative Political Systems

Analysis of major political systems selected from Europe, Asia, Africa, and Latin America, emphasizing basic concepts of comparative political study.

Credit Hours: 3

Prerequisites: POL_SC 1100

POL_SC 2700H: Comparative Political Systems - Honors

Analysis of major political systems selected from Europe, Asia, Africa, and Latin America, emphasizing basic concepts of comparative political study.

Credit Hours: 3

Prerequisites: POL_SC 1100. Honors eligibility required

POL_SC 2710: Politics and the Military

Comparative study of post-cold war civil-military relations; military as an interest group, change agent, policy instrument and competitor of civilian politicians.

Credit Hours: 3

POL_SC 2720: European Democracies

This course provides an introduction to the institutions and issues in contemporary European political systems. It covers domestic institutions and policies as well as the developments of the European Union.

Credit Hours: 3

Prerequisites: sophomore standing

POL_SC 2800: Liberty, Justice and the Common Good

Selected great political theorists and their contemporary relevance. How to think critically about political ideas and ideologies.

Credit Hours: 3

Prerequisites: sophomore standing

POL_SC 2860: American Political Thought

Examines major themes that shaped three centuries of American political thought, including slavery, religion, and the tension between unity and difference. Readings are drawn from primary sources (Jefferson, Adams, Mason, Tocqueville, Calhoun, Lincoln, Stowe, Baldwin) as well as contemporary analytic commentary on those sources (Bercovitch, Hartz, Wolin, Guinier, Morrison).

Credit Hours: 3

Prerequisites: sophomore standing

POL_SC 3000: Introduction to Political Research

This course is an introduction to the systematic analysis of political phenomenon. It examines the meaning of "explanation" and "causal reasoning." and research strategies designed to make valid causal inferences. The course overview experimental design, measurement, hypothesis formulation and testing, and the display of information, using substantive examples from two or more fields of political science for illustrative purposes. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Sophomore standing; C- or higher in STAT 1200, STAT 1300, STAT 1400, STAT 2200, or STAT 2500 or C- or higher in MATH 1300, MATH 1400, or MATH 1500

POL_SC 3164: Nation Building through a Barrel of a Gun

(same as MIL_SC 3164). This course was developed to provide students the opportunity to examine the dilemmas of military intervention, nation-building/peacekeeping operations and exit strategies. This course is designed to challenge students to think critically and arrive at their own conclusions about the use of military power to settle differences between nations, and use of military forces to conduct nation building.

Credit Hours: 3

POL_SC 3165: "Chasing Ghost", The History of Irregular Warfare

(same as MIL_SC 3165). This course explores the history of irregular warfare from the guerrilla perspective. The course examines the works of Mau Tse-Tung, Che Guevara, T.E. Lawrence and several other guerrilla leaders. You will analyze the evolution of irregular warfare through history and understand the complexities associated with the difficulties of countering and defeating irregular warfare. Graded on A-F basis only.

Credit Hours: 3

POL_SC 4000: Introductory Statistics for Political Science

Basic course in applied statistics and inference using extensive examples from voting behavior, congressional behavior, international relations and public policy. Topics included nonparametric measures, probability, and rudimentary hypothesis testing; computer applications with political data using SAS. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: MATH 1100 or MATH 1120 or equivalent, concurrent enrollment in POL_SC 4010

POL_SC 4004: Topics in Political Science - Social Science

Organized study of selected topics. Subjects and earnable credit vary from semester to semester.

Credit Hour: 1-99

POL_SC 4010: Computing Methods

Develops computer-based skills with political science data. SAS, and other packages used in mainframe and PC environments. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: concurrent enrollment in POL_SC 4000

POL_SC 4030: Formal Political Analysis

Introductory course in formal mathematical models of political behavior and political institutions. Topics includes electoral rules, agenda control, measures of power, collective action, constitutions.

Credit Hours: 3

Prerequisites: MATH 1100 or MATH 1120 or equivalent

POL_SC 4100: Political Parties and Election Campaigns

Development, organization, functions, activities of major and minor political parties; principles and procedures of managing campaigns; campaign finance; election administration.

Credit Hours: 3

Prerequisites: POL_SC 3000

POL_SC 4110: Political Behavior

Economic, psychological, and social dimensions of political behavior; participation, leadership and elites; political attitudes; voting behavior and decision-making processes.

Credit Hours: 3

Prerequisites: POL_SC 3000

POL_SC 4120: Politics and the Media

The role and importance of mass media in the political process, primarily the U. S. Constitutional protections of the press, politics of media control, political news and advertising, effects of information on election campaigns, political institutions, and policymaking.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

POL_SC 4130: African-American Politics

(same as BL_STU 4130). Surveys political participation of African-Americans in American politics. Analyzes their public lives in the context of elections, behavior of political organizations, social movements, parties, and level of government.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

POL_SC 4140: Congress and Legislative Policy

Study of national and state legislative systems and legislative policy making, with emphasis on Congress.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

POL_SC 4150: The American Presidency

Evolution of the presidency; particular emphasis on constitutional and political roles played by chief executive in shaping public policy.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

POL_SC 4160: Interest Groups

Development, organization, functions, activities, internal politics of special interest groups such as business, labor, agricultural and public interest groups; lobbying and techniques for influencing public policy in the American political system.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

POL_SC 4170: Politics of the American South

This course focuses on the politics of the American South in the latter part of the 20th century and the early years of the current millennium. For undergraduate credit only.

Credit Hours: 3

Prerequisites: POL_SC 1100, junior standing or instructor's consent

POL_SC 4180: Politics and Hollywood

This course examines the impact of entertainment media on politicians, the public, and politics in the United States. We will examine the worlds of film, television, and celebrity involvement in politics.

Credit Hours: 3

Prerequisites: POL_SC 1100

POL_SC 4200: The American Constitution

Leading American constitutional principles as they have evolved through important decisions of the United States Supreme Court.

Credit Hours: 3

Prerequisites: POL_SC 1100; junior standing

POL_SC 4210: Constitutional Rights

Survey of Supreme Court cases involving the Constitution's protections for life, liberty, and property and guarantee of equal protection of the law.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

POL_SC 4220: The United States Supreme Court

Role of Supreme Court in American system of government; particular attention given to reading biographies and writings of the Justices.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

POL_SC 4230: Constitution and Civil Liberties

Civil liberties in the American constitutional context emphasizing freedom of expression (religion, speech, press, assembly), rights of accused and right to privacy.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

POL_SC 4310: Comparative State Politics

Analyzes similarities and differences of state politics and the ways in which such politics are shaped by political and socioeconomic environments of the states.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

POL_SC 4320: Public Policy

Introduction to the study of public policy in the United States. Analyzes public policy choices at the national, state and local level and the variety of forces which serve to shape policy decisions.

Credit Hours: 3

Prerequisites: POL_SC 1100, and junior standing

POL_SC 4370: The Administrative State, Public Policy and Constitutional Democracy

Off in the quiet corners of the policy process, public servants distribute public benefits, write rules that have the force of law, adjudicate conflicts and selectively enforce the law. Frequently the government delegates these tasks to non-profit organizations. These public and quasi- public administrative organizations play, therefore, a critical role in the politics of who gets what, when and how - the essential question of public policy. Administrative organizations in the United States play this powerful role, however, within a constitutional democracy. This course focuses on policymaking through the administrative state and the relationship between the administrative state, democracy and the U.S. Constitution.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

POL_SC 4380: Politics of Criminal Justice

Course explores the political motivations for and the substantive consequences of state and federal criminal justice policy in the United States.

Credit Hours: 3

Prerequisites: junior or senior standing

POL_SC 4400: Theories of International Relations

Surveys Theories of International Relations. Analyzes conceptions of decision-making, foreign policy behavior and international society. Prerequisites: junior standing

Credit Hours: 3

POL_SC 4410: Politics and War

(same as PEA_ST 4410). Why do wars occur? The functions of force and uses of a threat of force. Problems of national security strategy and arms control.

Credit Hours: 3

Prerequisites: junior standing

POL_SC 4411: Genocide, Terrorism and Civil War

This course explores the conditions that lead to the initiation, escalation and termination of civil wars as well as the causes and targets of terrorism and the effects of genocide.

Credit Hours: 3

POL_SC 4412: Strategy and Warfare

Examines strategic theory, traditional forms of warfare (on land, sea, and in the air), as well as irregular warfare and terrorism. Additional topics include weapons of mass destruction, deterrence, and technology.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

POL_SC 4415: Peacekeeping and Intervention

This course will survey the causes and consequences of peacekeeping and intervention as well as assess the conditions that lead to successful and failed missions.

Credit Hours: 3

Prerequisites: junior standing

POL_SC 4420: Politics of International Economic Relations

Study of reciprocal interaction between global politics and economics. Includes politics of north/south relations, multinational non-state actors, arms transfers and dependency.

Credit Hours: 3

Prerequisites: junior standing

POL_SC 4430: Global Human Rights

Human rights violations are widespread. The majority of of the world's citizenry lives with inadequate civil and political and economic, social, and cultural rights, often with dire consequences on economic and human security. What caused this situation? And, moreover, what can be done to fix it? This course focuses on the social scientific study of human rights. We will focus on scientific explanations of the rise of the human rights movement, political and economic explanations for human rights conditions, and the effects of advocacy efforts concerning human rights. After this class, you will have not only an understanding of the major players and factors influencing human rights, but a base understanding of the social scientific processes which govern human rights conditions and improvements. As such, this class is not a history class or a class on current events. Though current and historical events will be discussed, your grade will not depend on your rote memorization of these events. Instead, the focus will be on understanding the underlying interests of important actors towards human rights, the arenas in which these actors interact, and the rules which govern their interactions. This focus on the basic principles will provide you with a rich practical knowledge of human rights. At the conclusion of the course, you will be able to actively engage with the global human rights community.

Credit Hours: 3

Prerequisites: POL_SC 1100

POL_SC 4440: International Organization

Forms and functions of governmental (United Nations, European Union, NATO) and nongovernmental international organizations.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

POL_SC 4500: The European Union in the Global System

Provides an understanding of the European Union from the perspective of international relations and comparative politics. Topics covered pertain to the institutions, politics and policies of the European Union and its member states.

Credit Hours: 3

Prerequisites: POL_SC 1100 and POL_SC 1400 and junior standing

POL_SC 4540: American Foreign Policies

Bases, formulation, evaluation of current American foreign policies.

Credit Hours: 3

Prerequisites: junior standing

POL_SC 4600: Latin American Politics

Development, present status of political institutions in South America; emphasizes current political problems.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

POL_SC 4605: Latin American Politics through Film

This course provides an introduction to Latin American politics using the medium of film to illustrate the complexities of political development, regime change, revolutionary movements, and problems facing new democracies such as crime, poverty, drugs, and democratic stability.

Credit Hours: 3

POL_SC 4610: European Political Systems

Comparison of political cultures, institutions, and processes of Britain, France, West Germany, and selected smaller countries in Western Europe.

Credit Hours: 3

Prerequisites: junior standing

POL_SC 4630: The Politics of Modern Europe

The course is an introduction to the politics of modern Europe. Europe provides an ideal setting to explore the central concepts and debates of comparative politics in industrialized countries. The course introduces the wide variety of political institutions, political economics and cultures existing in contemporary Europe and probes the question how such discrepancies might affect political outcomes and the possibility to coordinate EU policy. Several central topics in comparative politics, including political parties, elections, the welfare state, civil society and corruption will be introduced with application to modern European democracies. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: POL_SC 1100, Junior Standing (or instructor's consent)

POL_SC 4640: African Politics

(same as BL_STU 4640). A general comparative course focusing on post-independent Africa. Theories and concepts related to decolonization, nationalism, democratization, and ethnicity; also

institutional forms and organizations: political parties, parliaments, and executives.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

POL_SC 4660: Canada in North America

This course focuses on the role of Canada in North America. The main topic areas include the evolution of Canada as a political system; political structures and processes; regionalism and social movements; political, economic and social connections with North America; and the future of Canada in North America.

Credit Hours: 3

Prerequisites: POL_SC 2600

POL_SC 4670: The Political System of the European Union

This course examines the politics, political actors, and institutions of the European Union from a comparative perspective. It questions whether we can view the EU as a federal democratic system similar to the U.S.

Credit Hours: 3

Prerequisites: POL_SC 1100 and Junior or Senior standing or consent of instructor

POL_SC 4680: Chinese Politics and Foreign Policy

This course is intended to introduce you to the history and analysis of Chinese politics and foreign policy since 1949. The course has two main goals. The first is that during the semester, you should learn the key historical events in Chinese political development and foreign policy. Second, you will examine these events and developments in light of major theories in comparative politics and international relations.

Credit Hours: 3

Prerequisites: POL_SC 1100 and POL_SC 1400 or Instructor's permission

POL_SC 4710: Terrorism: Religious, Ethnic and Ideological Politics

Terrorism as political violence extending beyond the acts themselves. Examines major modern movements, e.g. Northern Ireland, Basques (Spain), Germany, Algeria, Arab-Israeli, Iran, India, Sri Lanka, Peru, Argentina, Uruguay.

Credit Hours: 3

Prerequisites: junior standing

POL_SC 4720: Politics of Development

(same as BL_STU 4720). Comparative, interdisciplinary analysis of the politics of developing countries in Asia, Africa, and Latin America. Special attention given to the problems of political and socioeconomic development.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

POL_SC 4730: Women and Politics

(same as WGST 4730). This course examines women's political participation and public policies towards women in countries around the world.

Credit Hours: 3

Prerequisites: POL_SC 1100; junior standing

POL_SC 4740: Comparative Political Culture

Review of the many divergent conceptions of political culture and examination of the dynamics and consequences for the performance of political systems and the behavior of their citizenry. Comparison of particular cultures of selected regions including East Asia, Europe and the Middle East, Latin America, and North America.

Credit Hours: 3

Prerequisites: junior standing

POL_SC 4750: Power and Money

This course provides an introduction to comparative political economy by focusing on the following questions. How and why do governments promote economic prosperity? Does democracy make people richer or poorer? Is it true that "money is power"? Can poor countries enjoy a stable democracy?

Credit Hours: 3

Prerequisites: junior standing

POL_SC 4760: Comparative Political Parties

This course will explore political parties and party systems in democracies around the world. The course will focus on differences in the number, size, ideology, polarization, and functions of political parties.

Credit Hours: 3

Prerequisites: POL_SC 2700 and Junior standing or consent of instructor

POL_SC 4770: Comparative Political Behavior

Explores research questions related to cross-national differences and similarities in public opinion formation, political culture and values, voting behavior, and other forms of political participation. Violent forms of political participation are also considered. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Junior Standing and POL_SC 1100

POL_SC 4780: Dictatorship and Democracy

Why did the Arab Spring happen? Will China survive or collapse? Did North Korea's new dictator Kim Jong Un really execute his old girlfriend? Throughout history, the majority of the world's regimes have been dictatorships rather than democracies. This course is an introduction to the causes and character of contemporary authoritarian and democratic regimes: how and why they are created, why they survive, why people resist dictatorship or don't, and why regimes survive or fall. We will use academic articles, news stories, and films to study dictatorship and democracy. You will come away from this course with an understanding of the major theoretical debates about dictatorship and democracy, and how these debates apply to important countries and issues in the world today.

Credit Hours: 3

Prerequisites: POL_SC 1100

POL_SC 4800: Classical Political Theory

(same as CL_HUM 4800). Great Greek, Roman, and Medieval political theorists on the relation of psychology, ethics, politics, and the best form of government.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

POL_SC 4810: Modern Political Theory

Great political theorists from Machiavelli through Marx on the nation state, capitalism, liberalism, conservatism, and Marxism.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

POL_SC 4820: Contemporary Political Theory

Great contemporary thinkers on Western vs. Eastern Marxism, existentialism, critical theory, political theologies, postmodernism, feminism, environmentalist ideologies, biological approaches to politics.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

POL_SC 4830: Democracy in America (and Elsewhere)

This course focuses on the dynamics of democracy. We will explore various topics in the history, development, and practice of democracy through an examination of the writings of Alexis de Tocqueville, one of the most insightful and prescient observers of American political culture.

Credit Hours: 3

Prerequisites: POL_SC 1100 and Junior standing

POL_SC 4840: Developing Dynamics of Democracy

This course examines developments in the theory and practice of democracy from the ancient Greeks to the present. Beginning with the origins of democracy in the Hellenic city states, we consider the transformation of democratic concepts in the classical liberal period, review the development of democratic institutions in the United States and Europe, examine the emergence of supra-national democratic institutions such as the European Union, and assess the future of democratization in the 21st century.

Credit Hours: 3

Prerequisites: POL_SC 1100

POL_SC 4850: Scots and the Making of America

This class is on the influence of the Scottish Enlightenment on the founding of the United States. The Scottish Enlightenment refers to uniquely Scottish advances in social, political, scientific and literary thought that transpired in the 18th and early 19th centuries. This line of thought, especially in its social and political dimensions, was especially influential in shaping the founding of the United States.

Credit Hours: 3

Prerequisites: POL_SC 1100

POL_SC 4850H: Scots and the Making of America - Honors

This class is on the influence of the Scottish Enlightenment on the founding of the United States. The Scottish Enlightenment refers to uniquely Scottish advances in social, political, scientific and literary thought that transpired in the 18th and early 19th centuries. This line of thought, especially in its social and political dimensions, was especially influential in shaping the founding of the United States.

Credit Hours: 3

Prerequisites: POL_SC 1100, Honors eligibility required

POL_SC 4890: Contemporary Political Analysis

This course introduces public choice writings. Public choice applies economic methods to the study of politics. Topics covered include the appropriate size of the state, how individuals organize to achieve shared goals and how voters chose in elections.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

POL_SC 4900: Beltway History and Politics: American Constitutional Democracy in Theory and Practice

(same as HIST 4900). This course is an experiential overview of American political history for students on the Kinder Forum's Washington program, showing how American constitutional democracy was developed and implemented right here on the Potomac, as much as possible in the actual places where the events occurred. Emphasis will be placed on interplay between constitutional theory and actual political experience over time, and the tensions and institutional changes that emerged as Americans and their government coped with cataclysmic social changes, unparalleled economic development, and fearsome international challenges.

Credit Hours: 3

Prerequisites: This course is limited to students participating in the Kinder Scholars Washington D.C. Internship program

POL_SC 4940: Political Science Internship

Work experience in a public or private organization that is relevant to the political science major coordinated by a faculty member.

Credit Hour: 3-6

Prerequisites: junior standing with a 3.0 GPA; or senior standing with 2.67 GPA. Must be in good standing

POL_SC 4985: Problems in Political Science

Independent investigation to meet needs of the individual student.

Credit Hour: 1-99

Prerequisites: instructor's consent

POL_SC 4986: Special Readings in Political Science

Independent readings selected in consultation with supervisory faculty member.

Credit Hour: 1-99

Prerequisites: instructor's consent

POL_SC 4995: Political Science Capstone

Readings and discussions in selected areas of political science (comparative, American, international affairs, public administration/policy or theory). Subject depends on instructor.

Credit Hours: 3

Prerequisites: political science major, senior standing

POL_SC 4996: Political Science Capstone, Honors

Special readings, reports in the several fields of political science. For political science Honors students.

Credit Hour: 1-6

Prerequisites: senior standing. Honors eligibility required

POL_SC 7000: Introductory Statistics for Political Science

Basic course in applied statistics and inference using extensive examples from voting behavior, congressional behavior, international relations and public policy. Topics included nonparametric measures, probability, and rudimentary hypothesis testing; computer applications with political data using SAS.

Credit Hours: 3

Prerequisites: MATH 1100 or MATH 1120 or equivalent

Corequisites: POL_SC 4010

POL_SC 7010: Computing Methods

Develops computer-based skills with political science data. SAS, and other packages used in mainframe and PC environments. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: concurrent enrollment in POL_SC 4000

POL_SC 7085: Problems in Political Science

Individual study in one of the fields of Political Science.

Credit Hour: 1-99

Prerequisites: instructor's consent

POL_SC 8085: Master Research in Political Science

Independent research not leading to a thesis. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

POL_SC 8090: Masters Research in Political Science

Independent research leading to thesis. Graded on S/U basis only.

Credit Hour: 1-99

POL_SC 9000: Scope and Methods

Examines the major fields in the discipline, assumptions underlying empirical social science and theoretical issues in the study of politics. Primarily for doctoral candidates in political science.

Credit Hours: 3

POL_SC 9030: Linear Models in Politics

Linear and non-linear multivariate estimation techniques with applications to political science research.

Credit Hours: 3

POL_SC 9040: Advanced Political Methodology

Analytic strategies and statistical models applicable to social science research. Emphasis on modeling political phenomena. Topics vary, include linear and nonlinear models, multidimensional scaling.

Credit Hours: 3

POL_SC 9050: Introduction to Formal Political Theory

Formal and mathematical models of political institutions and behavior. Topics may include social choice, game theory, spatial models, coalition formation.

Credit Hours: 3

POL_SC 9070: Qualitative Research Methods in Political Science

Seminar on research design for qualitative research in political science. Topics include case-study, archival, multi-method, and field research and other qualitative methods.

Credit Hours: 3

POL_SC 9085: Problems in Political Science

For graduate students with necessary prerequisite courses. Topics in one of the fields of political science for individual study.

Credit Hour: 1-99

POL_SC 9090: Ph D Research in Political Science

Independent research leading to thesis. Graded on a S/U basis only.

Credit Hour: 1-99

POL_SC 9100: American Political Behavior

Critical examination of literature on political behavior in the United States. Topics include voting and elections, public opinion, parties and interest groups, political psychology, communication, elites, and collective action.

Credit Hours: 3

POL_SC 9120: Voting and Elections

Research seminar on political participation, voter choice, campaigns, and elections, primarily in the United States. Covers theories, approaches and research on electoral behavior.

Credit Hours: 3

POL_SC 9140: American Political Institutions

Critical examination of literature on political institutions in the United States. Topics include Congress, the Presidency, courts, the bureaucracy, political organizations, federalism, and institutional dynamics.

Credit Hours: 3

POL_SC 9145: American State Politics

Research seminar on state government and politics in the U.S. Topics include state culture, mass politics, elections, state executives, legislatures, courts, and public policy.

Credit Hours: 3

POL_SC 9150: Political Parties

Research seminar on the organization and activities of political parties, primarily in the United States. Attention to historical development, nature of party change, functions, elites, membership, political finance, and policy formulation.

Credit Hours: 3

POL_SC 9160: Interest Groups

Research seminar on nonpartisan organizations seeking to influence the public policy agenda. Includes problems of collective action, mobilization and organization of interest groups, strategies and tactics, lobbying, political movements, theories and research.

Credit Hours: 3

POL_SC 9170: Legislative Institutions

Research seminar on the U.S. Congress and legislative institutions generally. Topics include the legislative process, policy change, committees, political parties, leadership, representation, and relations with other branches of government.

Credit Hours: 3

POL_SC 9175: Evolution of American Legislatures, 1619 to the Present

Examination of the organizational evolution of American legislatures from the colonial era to the present.

Credit Hours: 3

POL_SC 9190: Research in American Politics

Directed research into one or more specific aspects of American Politics, behavior, and institutions.

Credit Hours: 3

POL_SC 9210: Civil Rights and Civil Liberties

Research seminar on the U.S. Constitution, civil liberties, and civil rights. Topics include the First Amendment and freedom of expression and of belief, due process, the rights of the accused, privacy, equal protection, and constitutional interpretation. Graded on A-F basis only.

Credit Hours: 3

POL_SC 9220: Constitutional Law: Institutions and Powers

Research seminar on powers and constraints on government found in the U.S. Constitution. Topics include separation of powers, federalism, legislative and presidential power, the commerce clause, taxing and spending.

Credit Hours: 3

POL_SC 9230: Public Law

Research seminar on the judicial process in the United States.

Credit Hours: 3

POL_SC 9240: Racial and Ethnic Politics

Theories, institutional processes, and behaviors pertaining to social defined racial and ethnic groups. Topics include social dominance, representation, mobilization, public opinion, and the influence of racial and ethnic factors on the American political process.

Credit Hours: 3

POL_SC 9300: Federalism and Intergovernmental Relations

Analyzes relationships among American governmental units emphasizing national-state relations and metropolitan area problems.

Credit Hours: 3

POL_SC 9310: Public Policy

Covers the basic theory, approaches, problems and issues relating to the scope, development and implementation of public policy.

Credit Hours: 3

POL_SC 9320: Administrative Politics

Critical examination of literature relating to selected topics in public bureaucracies.

Credit Hours: 3

POL_SC 9330: Research in Policy and Administration

Contemporary research in public policy, bureaucratic politics, public management and administration.

Credit Hours: 3

POL_SC 9350: Public Policy, Processes and Strategies

Provides an overview of the history, function, size, scope, development, and management of the nonprofit sector. Historical, political, economic, and social perspectives are used to examine the meaning of voluntarism, charity, philanthropy, and the nonprofit sector. Graded on A-F basis.

Credit Hours: 3

POL_SC 9390: Administration and Public Policy

Directed research in Public Administration or Public Policy. Inquire as to the emphasis for any given semester.

Credit Hours: 3

POL_SC 9400: Introduction to International Relations

Analysis, evaluation of some basic theories which attempt to explain international affairs.

Credit Hours: 3

POL_SC 9420: Quantitative Approaches in International Relations

Research seminar emphasizing quantitative analysis of large data sets on international politics, especially international conflict. Topics include conflict escalation, correlates of war, deterrence, alliance behavior and the democratic peace.

Credit Hours: 3

POL_SC 9430: International Political Economy

Theories of political economy and current problems such as North-South relations, international trade, monetary relations, aid regimes, and international divisions of labor.

Credit Hours: 3

POL_SC 9440: Foreign Policy Analysis

Research seminar assessing foreign policy decisions and outcomes with particular attention given to decision-making. Both theoretical and empirical methods for testing foreign policy are considered. Approaches include domestic politics, bureaucratic, and psychological models.

Credit Hours: 3

POL_SC 9450: International Conflict

This is an advanced seminar in international conflict. The range of material that might be included is vast, so an effort will be made to balance overall coverage with the need to look in more depth at some especially salient areas in the literature. The seminar unfolds in five parts.

Credit Hours: 3

POL_SC 9460: Coercive Diplomacy

Research seminar on how nations apply political and economic sanctions on other nations in order to compel or entice changes in foreign policy and/or government behavior. How threats (short of conflict) and incentives govern international relations.

Credit Hours: 3

POL_SC 9470: Theories of Civil War

Seminar on why groups may engage in violence against the state or other opposition groups. Topics include causes of civil wars, terrorism as a strategy of violence and possible solutions including third party security, partition, intervention, power sharing and treaty design. Graded on A-F basis only.

Credit Hours: 3

POL_SC 9480: Human Security

Seminar on cross-national civil, political, economic, social, and cultural rights. The determinants of human security issues and the efficacy and dynamics of efforts from intergovernmental organizations, foreign aid, peacekeeping, interventions, and treaties on human rights.

Credit Hours: 3

POL_SC 9490: Selected Themes in International Relations

Intensive study of foreign policy formulation and implementation; special emphasis on American foreign policies.

Credit Hours: 3

POL_SC 9600: Introduction to Comparative Politics

Study of theories and approaches to comparative politics in Europe, Asia and/or Latin America.

Credit Hours: 3

POL_SC 9610: Latin American Politics

Research seminar on politics and government in Central and South America. Topics include modernization and dependency theories, civil-military relations, economics adjustment, democratic transitions, and area and country studies.

Credit Hours: 3

POL_SC 9620: Politics of Industrial Societies

Comparative analysis of public policy in Western democracies. Emphasis on economic policy and related policy areas. Comparisons of Western European countries with United States, Japan, Russia when appropriate.

Credit Hours: 3**Prerequisites:** graduate standing

POL_SC 9640: East Asian Politics

Intensive study of selected topics in the internal and external politics of China, Japan and Korea.

Credit Hours: 3

POL_SC 9645: China and Political Science Research

This is a graduate-level seminar on Chinese politics and foreign policy since 1949 covering the key historical events in Chinese political development and foreign policy. These events and developments will be examined in light of major theories in and methodological approaches adopted by the subfields of comparative politics and international relations, with the goal of exploring the strengths and weaknesses of alternative perspectives. At the end of the course, students should be familiar with the key debates and questions in the study of Chinese politics and foreign policy, and have a better sense of how to research questions on these topics. The course is also intended to encourage a dialogue between the study of China and the broader fields of comparative politics and international relations. Thus by the end of the course, students should have a sense not only for how the study of Chinese politics and foreign policy applies broader CP/IR theories to explain key patterns and events in China, but also gain insight into the question of what China as a case (or cases) can contribute back to major theories and debates in these fields.

Credit Hours: 3

Prerequisites: POL_SC 9600

POL_SC 9650: African Politics

Research seminar on comparative African politics. Theory and research on sub-Saharan post-independence governance on the African continent.

Credit Hours: 3

POL_SC 9670: European Transitions

Research seminar comparing post-communist transitions with those from previous European transformations along economic, political, and social lines. The course focuses on testing theories and on comparing transitional experiences in search of generalizable results.

Credit Hours: 3

POL_SC 9680: Politics of Development

Research seminar on the politics of development in the developing world. Examines the relationship between political and economic change in Africa, Asia and Latin America, as well as global patterns.

Credit Hours: 3

POL_SC 9690: Democracy and Dictatorship

Research seminar on comparative politics of authoritarian and democratic regimes. Topics include characteristics and durability of authoritarianism, political institutions under autocracy, tactics of rule, state-society relations, transition and breakdown of regimes.

Credit Hours: 3

POL_SC 9700: Democratization

Research seminar on the third wave of democratization. Classical and contemporary conceptions of democracy, measurement, theories, trends, and influences on democratization across the globe.

Credit Hours: 3

POL_SC 9710: Comparative Political Economy

Interdisciplinary, comparative analysis of political aspects of political economy, rural development, and related issues.

Credit Hours: 3

POL_SC 9720: Comparative Political Institutions

Research seminar on comparative political institutions. Debates in comparative politics on the influence of rules and institutions on political decisions in developed democracies. Topics include political parties, legislatures, governments, and electoral rules.

Credit Hours: 3

POL_SC 9760: Comparative Political Parties

This course will analyze cross-national differences in the size and nature of party systems in established democracies. Graded on A-F basis only.

Credit Hours: 3

POL_SC 9790: Seminar in Comparative Politics

Comparative study of selected aspects of political systems. Variable content. May be repeated for credit.

Credit Hours: 3

POL_SC 9901: Topics in Political Science

Organized study of selected topics. Subjects and earnable credit vary from semester to semester.

Credit Hour: 1-99

POL_SC 9910: Leadership in Civic Education

Intensive workshop for Missouri secondary social studies teachers. Includes instructional materials on U.S. and Missouri governments, lectures by leading scholars, breakout sessions, and interactions with government practitioners.

Credit Hours: 3

POL_SC 9970: Independent Readings for Ph.D. Comprehensive Examinations

Graded on S/U basis only.

Credit Hour: 1-9

Portuguese Courses

PORT 1100: Elementary Portuguese I

Elementary Portuguese I is designed to give students an overview of the grammar and syntax of Portuguese. Emphasis is on oral and listening skills with some reading and writing.

Credit Hours: 6

PORT 1200: Elementary Portuguese II

Elementary Portuguese II is designed to give students an overview of the grammar and syntax of Portuguese. Emphasis is on oral and listening skills with some reading and writing.

Credit Hours: 6

Prerequisites: grade of C- or better in PORT 1100 or its equivalent

PORT 2001: Topics in Portuguese-General

Organized study of selected topics. Subject may vary from semester to semester. May be repeated with consent of instructor.

Credit Hour: 1-3

PORT 2005: Topics in Portuguese-Humanities/Fine Arts

Organized study of selected topics. Subject may vary from semester to semester. May be repeated with consent of instructor.

Credit Hour: 1-3

PORT 2160: Intermediate Portuguese

Review of grammar through Brazilian culture. Designed for students who have taken either PORT 1200 or PORT 4070 and wish to continue studying the language.

Credit Hours: 3

Prerequisites: Grade of C- or better in PORT 1200 or equivalent

PORT 2310: Brazilian Civilization

Survey of Brazilian history, arts and culture. Open to any student interested. No knowledge of Portuguese required.

Credit Hours: 3

Prerequisites: sophomore standing

PORT 3001: Topics in Portuguese-General

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hour: 1-3

Prerequisites: sophomore standing

PORT 3005: Topics in Portuguese-Humanities/Fine Arts

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hour: 1-3

Prerequisites: sophomore standing

PORT 3160: Advanced Portuguese Composition and Conversation

Development of more sophisticated skills of written and oral expression.

Credit Hours: 3

Prerequisites: Grade of C- or better in PORT 2160

PORT 3260: Cinema for Portuguese Conversation

This course is for intermediate and advanced students of Portuguese and uses film as the basis for teaching vocabulary, strengthening oral and written skills, and presenting Brazilian culture. Graded on A-F basis only,

Credit Hours: 3

Prerequisites: grade of C- or better in PORT 2160 or equivalent

PORT 3420: Survey of Brazilian Literature

Masterpieces of Brazilian literature in translation from its origins to present.

Credit Hours: 3

Prerequisites: sophomore standing

PORT 3875: Brazilian Cinema

(same as FILM_S 3875). An introduction to Brazilian cinema, culture and society through the study of contemporary cinematic productions. Topics include: Hollywood perceptions of Brazil; re-definitions of national identity and history, representations of race and gender.

Credit Hours: 3

Prerequisites: ENGLISH 1000

PORT 3885: Twenty-First Century South American Cinema

(same as FILM_S 3885, SPAN 3885). Broad overview of the major national cinemas of the 21st century in South America. Approximately 14 feature films screened from Argentina, Brazil, Chile and other nations of the region. Instructor provides a thematic framework for films within the context of film theory, Latin American cinematic history and cultural studies. Course taught in English. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGLISH 1000 or ENGLISH 1000H

PORT 4070: Intensive Beginning Portuguese

Designed for rapid acquisition of a reading knowledge of Portuguese. Cannot be taken to fulfill undergraduate language requirement.

Credit Hours: 3

Prerequisites: instructor's consent

PORT 4960: Special Readings in Portuguese

Independent study through readings, conferences, reports.

Credit Hour: 1-3

Prerequisites: departmental consent

Psychiatry Courses

PSCHTY 6005: Psychiatry Clerkship

Students see patients with psychiatric disorders in the outpatient clinics, in hospital settings and on consultation services.

Credit Hours: 6

PSCHTY 6015: Rural Psychiatry Clerkship

Rural Psychiatry Clerkship

Credit Hours: 6

PSCHTY 6025: Springfield Psychiatry Clerkship

Students see patients with psychiatric disorders in the outpatient clinics, in hospital settings and on consultation services.

Credit Hours: 8

Prerequisites: successful completion of the first two years of medical school

PSCHTY 6105: Remediation Psychiatry Clerkship

Enrolled students are those who received an unsatisfactory grade in a Psychiatry Clerkship at any Mizzou Med location or site. This course gives the student an opportunity to rectify their deficiency.

Credit Hours: 6

Prerequisites: PSCHTY 6005 Psychiatry Clerkship, received unsatisfactory grade

PSCHTY 6363: ABS Psychiatry Research

ABS Psychiatry Research

Credit Hour: 5-10

PSCHTY 6365: ABS Psychiatry Research and Review

ABS Psychiatry Research and Review

Credit Hour: 5-10

PSCHTY 6367: ABS Psychopharmacology

ABS Psychopharmacology

Credit Hour: 5-10

PSCHTY 6630: Narrative Med and the Meaningful Life

The 4th year medical student will attend didactics and participate in discussions. They will complete suggested readings (short stories, poems and essays), assessments and writing assignments/projects. May be repeated for credit.

Credit Hours: 5

Prerequisites: 4th year medical student, all core clerkships

PSCHTY 6730: Adult Outpatient Psychology - Rural

Adult Outpatient Psychology - Rural

Credit Hours: 3

PSCHTY 6731: Psychiatry Rural Elective

The 4th year medical student will participate in the evaluation of adult psychiatric patients and child psychiatric patients in a clinical setting.

Credit Hours: 5

Prerequisites: PSCHTY 6005; restricted to 4th year medical students

PSCHTY 6835: Psychiatry Outpatient Clinic

Psychiatry Outpatient Clinic

Credit Hours: 5

PSCHTY 6836: Psychiatry Adult Inpatient Service

Psychiatry Adult Inpatient Service

Credit Hours: 5

PSCHTY 6837: Psychosomatic Medicine

Psychosomatic Medicine

Credit Hours: 5

PSCHTY 6838: Forensic Psychiatry

Forensic Psychiatry

Credit Hours: 5

PSCHTY 6839: Child/Adolescent Psychiatry

Child/Adolescent Psychiatry

Credit Hours: 5

PSCHTY 6840: Geriatric Psychiatry

Geriatric Psychiatry

Credit Hours: 5

Psychology Courses

PSYCH 1000: General Psychology

Survey of theories, principles, and methods in the study of human behavior.

Credit Hours: 3

PSYCH 1000H: General Psychology - Honors

Survey of theories, principles, and methods in the study of human behavior.

Credit Hours: 3

Prerequisites: Honors eligibility required

PSYCH 1001: Topics in Psychology - General

Organized study of selected topics in psychology. Particular topics and earnable credit may vary by semester. This course may not be used toward behavioral science distribution credit. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: PSYCH 1000

PSYCH 1003: Topics in Psychology - Behavioral Science

Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: PSYCH 1000 and instructor's consent

PSYCH 1003H: Topics in Psychology - Honors - Behavioral Science

Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department.

Credit Hour: 1-3

Prerequisites: Honors eligibility required. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 1020: Applied Psychology

Surveys wide range of applications of psychology. Topics include social issues (prejudice and violence), applications to fields such as business and law, applications for personal improvement (improving memory), and others (sports, health, environment).

Credit Hours: 3

Prerequisites: PSYCH 1000

PSYCH 1030: Orientation to the Psychology Major

This course is intended to help students choose the best major for themselves and to provide information on careers available to psychology majors.

Credit Hour: 1

PSYCH 2001: Topics in Psychology-General

Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course may not be used toward behavioral science distribution credit. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: May be restricted to Undergraduate Psychology Majors during Early Registration

Recommended: PSYCH 1000

PSYCH 2003: Topics in Psychology-Behavioral Science

Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration

Recommended: PSYCH 1000

PSYCH 2110: Learning, Memory, and Cognition

Students will gain an understanding of the fundamental principles of learning, memory and cognition, and will be able to recognize important historical figures and their contributions. Students will also learn how the principles can be applied to their everyday lives.

Credit Hours: 3

Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration

Recommended: PSYCH 1000

PSYCH 2210: Mind, Brain, and Behavior

Introduction to the structures and processes of the mind and the nervous system, including the psychobiology of eating, sleeping, emotion, stress and learning. No credit if taken after PSYCH 4210. Recommended: PSYCH 1000

Credit Hours: 3

Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 2220: Drugs and Behavior

Basic principles of drug action on the nervous system; the effects of important psychoactive drugs; drug use and society.

Credit Hours: 3

Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration

Recommended: PSYCH 1000

PSYCH 2310: Social Psychology

An introduction to how people's thoughts, feelings and behaviors are influenced by the actual or imagined thoughts, feelings and behaviors of others.

Credit Hours: 3

Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration

Recommended: PSYCH 1000

PSYCH 2320: Introduction to Personality

Personality is the scientific study of individual differences (e.g., traits, motives, abilities). This course reviews historical theoretical perspectives as well as current research. Students will have an opportunity to learn about on their own motives and traits. Prerequisites This course may be restricted to Undergraduate Psychology Majors during Early Registration.

Credit Hours: 3

Recommended: PSYCH 1000

PSYCH 2330: Consumer Psychology

This course surveys how and why we engage in consumer activities and how we are affected by them. We will survey many areas of psychology as they apply to influencing consumer purchase decisions. We will also survey research examining the consequences of our consumption behavior.

Credit Hours: 3

Prerequisites: This course may be restricted to undergraduate psychology majors

Recommended: PSYCH 1000

PSYCH 2410: Developmental Psychology

Origins and development of child behavior, emphasizing basic physical, cognitive, affective and social processes, and theory and research rather than application or guidance. Cannot receive credit for more than one of the following: PSYCH 2410, H_D_FS 2420 or H_D_FS 3420 or ESC_PS 2500.

Credit Hours: 3

Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration

Recommended: PSYCH 1000

PSYCH 2410H: Developmental Psychology - Honors

Origins and development of child behavior, emphasizing basic physical, cognitive, affective and social processes, and theory and research rather than application or guidance. Cannot receive credit for more than one of the following: PSYCH 2410, H_D_FS 2420 or H_D_FS 3420 or ESC_PS 2500.

Credit Hours: 3

Prerequisites: Honors eligibility required. This course may be restricted to Undergraduate Psychology Majors during Early Registration
Recommended: PSYCH 1000

PSYCH 2510: Survey of Abnormal Psychology

Basic survey of maladaptive human behavior and experience, including personality disorders, alcohol and drug abuse, anxiety and mood disorders, sexual dysfunctions, and thought disorders.

Credit Hours: 3

Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration

Recommended: PSYCH 1000

PSYCH 2810: Human Sexuality

Survey of research on sexual behavior including sex norms, gender identity, sexual dysfunctions, sexual deviation, homosexuality, and legal aspects of sexual behavior. Attendance at small group discussions may be required at the option of the instructor.

Credit Hours: 3

Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration

Recommended: PSYCH 1000

PSYCH 2820: Introduction to Cognitive Science

(same as LINGST 2820 and PHIL 2820). Cognitive science is the interdisciplinary study of the mind. After an overview of the foundations of cognitive science as a whole, we will see what particular sectors of it have to say about mental capacities such as vision, language, categorization, and social cognition.

Credit Hours: 3

Prerequisites: sophomore standing required. May be restricted to Undergraduate Psychology Majors during Early Registration

Recommended: PSYCH 1000

PSYCH 2830: Human-Companion Animal Interaction

Exploration of historical and theoretical bases of human-companion animal interaction (HAI), the nature issues, and clinical applications of HAI. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: May be restricted to Undergraduate Psychology Majors during Early Registration

Recommended: PSYCH 1000

PSYCH 2940: Internship in Psychology

Work experience in an organization that is relevant to the psychology major.

Credit Hour: 3-6

Prerequisites: must be in good standing and have completed 9 credit hours in psychology; instructor's consent. Intended for students with freshman or sophomore standing

Recommended: PSYCH 1000

PSYCH 2950: Special Problems in Psychology

Research apprenticeship with a faculty member, assisting a faculty member in the development and execution of research. May be repeated to 6 hours maximum.

Credit Hour: 1-99

Prerequisites: instructor's consent

Recommended: PSYCH 1000

PSYCH 3001: Topics in Psychology-General

Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course may not be used toward behavioral science distribution credit. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: PSYCH 1000

PSYCH 3003: Topics in Psychology-Behavioral Science

Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3003H: Topics in Psychology-Behavioral Science

Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration. Honors eligibility required

PSYCH 3010: Research Methods in Psychology I

Introduction to scientific reasoning, assessing validity and reliability in research, and basic research methods.

Credit Hours: 3

Prerequisites or Corequisites: concurrent enrollment in STAT 1200 or a grade of C or better in STAT 1200 (or its equivalent)

Prerequisites: PSYCH 1000. This course is restricted to psychology majors with sophomore standing and above

PSYCH 3010H: Research Methods in Psychology I- Honors

Introduction to scientific reasoning, assessing validity and reliability in research, and basic research methods.

Credit Hours: 3

Prerequisites or Corequisites: Concurrent enrollment in STAT 1200 or a grade of C or better in STAT 1200 (or its equivalent)

Prerequisites: PSYCH 1000; Honors eligibility required. This course is restricted to psychology majors with sophomore standing and above

PSYCH 3020: Research Methods in Psychology II

Continuation of PSYCH 3010 and required for all further labs in psychology.

Credit Hours: 3

Prerequisites: MATH 1100 with a grade of C- or better or exemption, and PSYCH 1000, and a grade of C or better in PSYCH 3010 and

STAT 1200 or exemption. This course is restricted to junior and senior psychology majors

PSYCH 3020H: Research Methods in Psychology II - Honors

Continuation of PSYCH 3010 and required for all further labs in psychology.

Credit Hours: 3

Prerequisites: grade of C or better in PSYCH 3010 and STAT 1200 (or its equivalent). Honors eligibility required. This course is restricted to junior and senior Psychology majors

PSYCH 3110: Theories of Learning

Discusses classical issues and theories in learning and conditioning, and considers them in contemporary form.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3130: Decisions, Values and Choice

Survey of factors influencing choices and decisions. Topics include cause and effect decisions, values and ethical considerations, outcome likelihood, biases and heuristics, concept formation, self-control and impulsiveness, and social factors.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3140: Cognitive Psychology

A survey of psychological theory and research on human cognition.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3150: Human Memory

Surveys research on human memory, including basic laboratory studies with normal subjects as well as research on amnesia and other memory impairments, life-span memory development, and the cognitive neuroscience of memory.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3160: Perception and Thought

Covers research on various aspects of mental life: language, problem-solving, decision-making, sensory perception.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3310: Intergroup Relations

Provides an overview of the social psychological literature on stereotyping, prejudice, discrimination, and intergroup relations. Students learn theoretical frameworks and research findings regarding the development and maintenance of intergroup conflict.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3350: Positive Psychology

This course introduces students to the science of positive psychology, including its origin and the historical imbalances it addresses within the broader field of psychology. A wide variety of topics are covered, including happiness, materialism, purpose, flow, courage, humility, positive emotions, curiosity, mindfulness, savoring, gratitude, forgiveness, personal strengths, resilience, and compassion. Psychology majors cannot receive credit for both PSYCH 3350 and ESC_PS 4200.

Credit Hours: 3

Prerequisites: PSYCH 1000, This course may be restricted to Undergraduate Psychology Majors during early registration

PSYCH 3360: Automatic Social Judgments

In this course we will survey the area of social psychology dealing with automatic social judgments, including an introduction to the topic, review of techniques used to measure automatic social judgments, and discussion of applications of automatic social judgment research. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Psychology majors through early registration

PSYCH 3370: The Science of Mindfulness

To gain breadth and depth in understanding the empirical research on mindfulness and contemplative practices. To do well in the course, students must master the substantive content, psychological methodology, APA-style writing, peer-review, and presentation skills. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PSYCH 1000 and a grade of C or better in PSYCH 3010. This course may be restricted to psychology majors through early registration

PSYCH 3410: Infancy

Overview of theory and research on the development of infants and toddlers, with an emphasis on major research methods that are currently in use. Topics include infant perception, sociality, motor development, early communication, language development and attachment.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3420: Cognitive Development in Childhood

Theories and research on cognitive development in childhood.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3430: Social Development in Childhood

Overview of children's social and emotional development (infancy-adolescence), includes changes in social domains, impact of social

functioning on subsequent development, and influence of interpersonal contexts (e.g., family, peers, community) on children's development.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3510: Introduction to Clinical Psychology

Comprehensive survey of the field's historical roots, research methods, concepts of abnormality, assessment and intervention methods; also specialties that constitute clinical psychology.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3820: Environmental Psychology

Survey of the effects of human behavior on the natural environment. Examines strategies for modifying behavior to preserve the environment.

Credit Hours: 3

Prerequisites: PSYCH 1000

PSYCH 3830: Health Psychology

A hands-on approach to the study of health psychology including research on a topic of current relevance to the field.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3860: Law and Psychological Science

This survey course examines the interactions of law and psychology across the justice system. Emphasis is placed on how psychological research does (and does not) inform important legal issues. Requirements may include an in-class team debate of relevant controversy in law.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3870: Sleep and Sleep Disorders

This course provides a critical review of the current research on both normal sleep and sleep disorders.

Credit Hours: 3

PSYCH 3880: African-American Psychology

(Same as BL_STU 3100 and ESC_PS 3100). The research, theories and paradigms developed to understand the attitudes, behaviors and psychosocial realities of African-Americans are discussed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PSYCH 1000

PSYCH 4001: Topics in Psychology-General

Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course may not be used toward behavioral science distribution credit. Repeatable upon consent of

department. Enrollment limited to students who have completed PSYCH 1000.

Credit Hour: 1-99

Prerequisites: instructor's consent

PSYCH 4003: Topics in Psychology-Behavioral Science

Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4110: Perception

Data and contemporary theories of perception in all of the senses, with emphasis on visual and auditory perception.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4210: Physiological Psychology

An introduction to neuroscience with an overview of the relation between the brain and behavior. Topics include intercellular communication, drugs and reward, emotions and stress psychoimmunology, psychopathology, nervous system development and repair, perception, cognition, learning and memory.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4220: Animal Learning and Behavior

Survey of animal behavior and learning abilities, including topics such as learning, habitat selection, foraging, problem solving, mating, communication, conditioning and memory.

Credit Hours: 3

Prerequisites: PSYCH 1000 plus 8 hours of Psychology (exclusive of PSYCH 2950) or Biology. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4240: Cognitive Neuroscience

The neural basis of human information processing in memory, attention, perception, imagery, movement, and language.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

Recommended: PSYCH 2210 and PSYCH 4210

PSYCH 4340: Attitude Change

Theories, methods, and experimental findings in attitude change research.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4350: Stereotypes and Prejudice

This course provides an overview of theory and research on stereotypes, prejudice, and discrimination from a social-psychological perspective. Course material comes primarily from textbook and supplementary readings, in addition to videos related to these topics.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4420: Personality Development

This course covers the topic of temperament and personality development through the lifespan with particular focus on infancy, childhood, and adolescence. Coverage includes classic and contemporary theories and classic and contemporary research.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4430: Literature and Human Lifespan

In this course we will examine the processes of human development as they are reflected in the specific literary and cinematic texts. "Adult" literary and cinematic materials will be supplemented with notable examples of adolescent and children's stories, so that the works (like their subjects) will mirror the life span. This course will also provide an overview of prominent developmental theories/research, which have been devoted to understanding the life span. This course is designed to stimulate active reflection and debate about the impact of literature on human development.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4440: Sex Differences

This course covers the evolution of sex differences and hormonal and environmental influences on their expressions in nonhuman species. These insights are used to understand human sex differences in mate choices, emotions, development, brain and cognition, and in modern societies.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4520: Behavior Genetics

(cross-leveled with PSYCH 7520). The study of genetic influences on behavioral traits such as mood, personality, intelligence, mental health, or activity level.

Credit Hours: 3

Prerequisites: PSYCH 1000; Grade of C or better in PSYCH 3010 and STAT 1200 or higher. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4530: Research in Psychopathology

Intensive survey and evaluation of the psychological literature on abnormal behavior, emphasizes experimental and explanatory approaches.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4540: Emotional Disorders in Childhood and Adolescence

Surveys disturbed behavioral development during childhood and adolescence, emphasizing factors that produce deviation from normal developmental patterns.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

Recommended: PSYCH 2410

PSYCH 4560: Schizophrenia

This course will examine one of the most severe, debilitating, and complex mental disorders. We will review the major symptoms and clinical features of schizophrenia, explore possible causes of Psychology disorder, and critically assess treatments for the disorder.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4570: Pediatric Neuropsychology

Introduction to the field of pediatric neuropsychology and the study of individuals with early brain dysfunction. Common central nervous system disorders of childhood (e.g. autism, ADHD, epilepsy) will be discussed.

Credit Hours: 3

Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration

Recommended: PSYCH 1000, PSYCH 2210 or PSYCH 4240

PSYCH 4580: Externalizing Spectrum Disorders

The purpose of this course is to provide an overview of the symptoms, etiology, and treatment of psychiatric disorders that fall within the externalizing spectrum, including Attention-Deficit Hyperactivity Disorder, Oppositional Defiant Disorder, Conduct Disorder, Alcohol and other Substance Use Disorders, and Antisocial Personality Disorder. This course will attempt to provide an overview of key issues and topics related to the classification of psychiatric disorders and how research in this area has led to current conceptualizations of the externalizing spectrum. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4590: Autism Mentor Program

The Autism Mentor Program and its accompanying course are designed to educate and train student mentors to be of assistance to their peers on the autism spectrum. The student will have an opportunity to participate in class and interact weekly with their mentee in a practical learning environment. Graded on A-F basis only.

Credit Hour: 1-2

Prerequisites: PSYCH 1000

PSYCH 4815: Cross-Cultural Psychology

This course aims to explore relationships between cultural variables and human behavior, and to look at recent attempts by cross-cultural psychologists to devise theories that reflect the cultural, social and developmental perspectives on behavior.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course is restricted to juniors and seniors

PSYCH 4815H: Cross-Cultural Psychology - Honors

The Cross-cultural Psychology course aims to explore relationships between cultural variables and human behavior, and to look at recent attempts by cross-cultural psychologists to devise theories that reflect the cultural, social and developmental perspectives on behavior.

Credit Hours: 3

Prerequisites: PSYCH 1000; Honors eligibility required. Restricted to sophomores and above

PSYCH 4825: Psychology at the Movies

In this course we watch and discuss films from multiple psychological perspectives. Connections are made between cinematic content and contemporary psychological research on culture and diversity. Race, Gender, Disability, Class, and LGBT issues in movies are explored.

Credit Hours: 3

Prerequisites: PSYCH 1000. Restricted to juniors and seniors

PSYCH 4830: Psychology of Women

(same as WGST 4830). Overview of current theories and research relating to the psychology of women. Topics include gender stereotyping, psychological sex differences, achievement motivation in women, and women and mental health.

Credit Hours: 3

Prerequisites: PSYCH 1000

PSYCH 4840: The History of Psychology

Historical foundations of contemporary psychology.

Credit Hours: 3

Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4940: Internship in Psychology

Work experience in an organization that is relevant to the psychology major. Enrollment limited to students who are in good standing and have completed 9 credit hours in psychology. Intended for students with junior or senior standing.

Credit Hour: 3-6

Prerequisites: Instructor's consent required

PSYCH 4950: Special Problems in Psychology

Independent investigation leading to a project or paper. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: instructor's consent

PSYCH 4960: Special Readings in Psychology

Independent readings selected in consultation with supervisory faculty member. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: instructor's consent

PSYCH 4970: Psychological Measurement Capstone

Survey of theories and methods of psychological test construction, focusing on measures of intelligence and personality. Lab component involves experimental training in test construction and test evaluation.

Credit Hours: 3

Prerequisites: grade of C or better in PSYCH 3020. This course is restricted to psychology majors with senior standing

PSYCH 4971: Developmental Psychology Capstone

Introduces students to developmental research methods through relevant readings and by students conducting original research. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.

Credit Hours: 3

Prerequisites: Instructor's consent required

PSYCH 4972: Animal Learning Capstone

Survey of principles of animal behavior and animal learning and cognition. The course includes laboratory projects on research in animal behavior and animal learning. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.

Credit Hours: 3

Prerequisites: Instructor's consent required

PSYCH 4973: Human Cognition Capstone

Students review, evaluate and conduct research on various aspects of human cognition. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.

Credit Hours: 3

Prerequisites: Instructor's consent required

PSYCH 4974: The Human Senses Capstone

Psychophysical data, sense organs, psychological attributes, and theories of vision, hearing, and the vestibular (motion) senses. Elementary aspects of psychophysics.

Credit Hours: 3

Prerequisites: grade of C better in PSYCH 3020. This course is restricted to psychology majors with senior standing

PSYCH 4975: Social/Personality Capstone

Experimental methods course emphasizing research in social psychology. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.

Credit Hours: 3

Prerequisites: Instructor's consent required

PSYCH 4976: Independent Research Capstone I

Individual thesis on a topic selected with a faculty advisor. Student projects are carried out over the course of two semesters (with PSYCH 4977) and presented as posters in a spring conference. Weekly class discussions of student progress. For students who plan to pursue a PhD in Psychology or Neuroscience. Enrollment limited to psychology majors with senior standing who have taken PSYCH 3020.

Credit Hours: 3

Prerequisites: Instructor's consent required

PSYCH 4976H: Honors Research Capstone I

Individual thesis on a topic selected with a faculty advisor. Student projects are carried out over the course of two semesters (with PSYCH 4977H) and presented as posters in a spring conference. Weekly class discussions of student progress. For students who plan to pursue a PhD in Psychology or Neuroscience. Enrollment limited to psychology majors with senior standing, honors eligibility, a cumulative GPA of 3.5, who have taken PSYCH 3020.

Credit Hours: 3

Prerequisites: Instructor's consent required

PSYCH 4977: Independent Research Capstone II

Continuation of PSYCH 4976. Completion of research project, presentation of poster in a spring conference. Weekly class discussions of student progress. Enrollment limited to psychology majors with senior standing who have completed PSYCH 4976.

Credit Hours: 3

Prerequisites: Instructor's consent required

PSYCH 4977H: Honors Research Capstone II

Continuation of PSYCH 4976H. Completion of research project, presentation of poster in a spring conference. Weekly class discussions of student progress. Enrollment limited to psychology majors with senior standing, honors eligibility, a cumulative GPA of 3.5, who have completed PSYCH 4976H.

Credit Hours: 3

Prerequisites: Instructor's consent required

PSYCH 4978: Clinical Psychology Capstone

Students work at assigned agencies to gain "real-world" experience in the practice of psychology and attend regularly scheduled class meetings in order to integrate their academic knowledge with their practical experience. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.

Credit Hours: 3

Prerequisites: Departmental consent required

PSYCH 4979: Judgement and Decision Making Capstone

This course examines the psychology of human judgement and decision-making. We will discuss major theories, methods and basic experimental findings and identify how those findings are being used to develop public policy or in applied settings.

Credit Hours: 3

Prerequisites: grade of C or better in PSYCH 2030; This course is restricted to psychology majors with senior standing

PSYCH 4980: Human Relationships Capstone

Students design a study, collect data, and describe their research on some aspect of human relationships. Emphasis on survey research techniques. Enrollment limited to psychology majors with senior standing, a grade of C or better in PSYCH 3020, PSYCH 2810 or two social/personality courses.

Credit Hours: 3

Prerequisites: Departmental consent required

PSYCH 4981: Advanced Developmental Psychology Capstone I

Students propose a study to be conducted with preschool children. The course teaches skills needed to develop research questions, develop a coding system, and write a research proposal that reviews past literature in a way that makes the case for the importance of the project. Graded on A-F basis only. Enrollment limited to psychology majors with senior standing and a grade of C or better in PSYCH 3020.

Credit Hours: 3

Prerequisites: Departmental consent required

PSYCH 4982: Advanced Developmental Psychology II

Students conduct a research project involving observations of preschool children. The course teaches skills needed to collect data, analyze data, and write a research report. These skills provide excellent preparation for graduate school in psychology or a related field. Graded on A-F basis only. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.

Credit Hours: 3

Prerequisites: Departmental consent required

PSYCH 4983: Consumer Psychology Capstone

This course examines numerous social and psychological issues related to the area of consumer psychology. The course begins by examining how media exposure influences consumption, prejudice in marketing and advertising, and the question of whether children should be targets of marketing strategies. The second section examines how consumption can be influenced by unconscious and automatic factors. The third section examines unhealthy forms of consumption and consumption's relationship to well being. The fourth section focuses on ethical and social responsibility issues like consumption's impact on the environment and the voluntary simplicity movement. The last section of the course is devoted to student presentations of term papers. Graded on A-F basis only. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.

Credit Hours: 3

Prerequisites: Instructor's consent required

PSYCH 7001: Topics in Psychology - General

Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. Graduate credit will be earned through additional reading and assignments.

Credit Hour: 1-99

Prerequisites: instructor's consent; departmental consent for repetition

PSYCH 7003: Topics in Psychology - Behavioral Science

Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. Graduate credit will be earned through additional reading and assignments.

Credit Hour: 1-99

Prerequisites: instructor's consent; departmental consent for repetition

PSYCH 7085: Problems in Psychology

Advanced studies to meet needs of individual student. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

PSYCH 7110: Perception

(cross-leveled with PSYCH 4110). Data and contemporary theories of perception in all of the senses, with emphasis on visual and auditory perception.

Credit Hours: 3

PSYCH 7210: Physiological Psychology

An introduction to neuroscience giving an overview of the relation between the brain and behavior. Topics include intercellular communication, drugs and reward, emotions and stress psychoimmunology, psychopathology, nervous system development and repair, perception, cognition, learning and memory.

Credit Hours: 3

Prerequisites: PSYCH 1000

PSYCH 7340: Attitude Change

Theories, methods, and experimental findings in attitude change research.

Credit Hours: 3

Prerequisites: PSYCH 1000

PSYCH 7420: Personality Development

This course covers the topic of temperament and personality development through the lifespan with particular focus on infancy, childhood, and adolescence. Coverage includes classic and contemporary theories and classic and contemporary research.

Credit Hours: 3

Prerequisites: PSYCH 1000

PSYCH 7520: Behavior Genetics

(cross-leveled with PSYCH 4520). The study of genetic influences on behavioral traits such as mood, personality, intelligence, mental health, or activity level.

Credit Hours: 3

Prerequisites: departmental consent required

PSYCH 7530: Research in Psychopathology

Intensive survey and evaluation of the psychological literature on abnormal behavior, emphasizes experimental and explanatory approaches.

Credit Hours: 3

Prerequisites: PSYCH 1000

PSYCH 7550: Introduction to Clinical Psychology

Comprehensive survey of the field's historical roots, research methods, concepts of abnormality, assessment and intervention methods; also specialties that constitute clinical psychology.

Credit Hours: 3

Prerequisites: PSYCH 1000

PSYCH 7560: Schizophrenia

Examines symptoms, possible causes, and treatments of schizophrenia. Goals include understanding psychopathology by examining one disorder and reviewing cutting edge psychology and clinical science research being used to understand schizophrenia.

Credit Hours: 3

Prerequisites: PSYCH 1000

PSYCH 7810: Industrial/Organizational Psychology

Survey of basic and applied personnel and organizational psychology. Focus on the human relations field, job satisfaction, leadership, group dynamics and formal organizational structures within the realm of industry.

Credit Hours: 3

Prerequisites: PSYCH 3010

PSYCH 7815: Cross-Cultural Psychology

This course aims to explore relationships between cultural variables and human behavior, and to look at recent attempts by cross-cultural psychologists to devise theories that reflect the cultural, social and developmental perspectives on behavior.

Credit Hours: 3

Prerequisites: PSYCH 1000 and departmental consent

PSYCH 7830: Psychology of Women

Overview of current theories and research relating to the psychology of women. Topics include gender stereotyping, psychological sex differences, achievement motivation in women, and women and mental health.

Credit Hours: 3

Prerequisites: PSYCH 1000

PSYCH 7840: The History of Psychology

Historical foundations of contemporary psychology.

Credit Hours: 3

Prerequisites: PSYCH 1000

PSYCH 8001: Topics in Psychology-General

Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester.

Credit Hour: 1-99

Prerequisites: instructor's consent, departmental consent for repetition

PSYCH 8050: Research in Psychology - Non-Thesis

Research in psychology not leading to thesis. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

PSYCH 8085: Problems in Psychology

Advanced studies to meet needs of individual student. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

PSYCH 8090: Research in Psychology - Thesis

Research in psychology leading to thesis. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

PSYCH 8110: Cognitive Psychology

Focuses on basic research on human perception, memory, attention, language, and thought.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 8210: Functional Neuroscience

Basic techniques, data and theory in the neurosciences applied to the study of psychopathology, psychopharmacology, neural development, brain damage, memory and other areas of "behavior."

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 8310: Survey of Social Psychology

Survey of historical and contemporary theory and research in affiliation, attribution, social comparison, attitude change and group dynamics.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 8410: Psychology of Development

Principles, theories, research in normal human development.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 8420: Cognitive Development

(same as H D FS 8420). An introduction to central theories and issues in the study of cognitive development in infancy and childhood. Emphasis is on major theoretical frameworks for studying cognitive development, and topics such as perception, memory, language, categorization, and reasoning.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 8430: Temperament and Personality Development

(same as H_D_FS 8430). Intended for graduate students in psychology and related fields. This course is a survey of theory and research in the area of temperament and personality development, with emphasis on child development.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 8440: Social and Emotional Development

(same as H_D_FS 8440). There are two major objectives for this course. The first is a "content" objective and involves familiarizing students with theory and research regarding social, emotional, and personality development in childhood and adolescence and also regarding the relationships in which such development takes place. The second objective is a "process" objective and involves enhancing students skills at interpreting empirical research, identifying gaps in the literature, and identifying research strategies for addressing those gaps.

Credit Hours: 3

PSYCH 8510: Developmental Psychopathology

Etiology, diagnosis, and treatment of disordered behavior from infancy through adolescence. Emphasizes contrasting theories and research issues.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 8520: Adult Psychopathology

Problems of etiology, diagnosis, treatment in psychopathology. Considers theory, research, case histories.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 8530: Experimental Psychopathology

Critical examination of current theories, with special emphasis on empirical studies in psychopathology including such topics as alcoholism, enuresis, sexual deviancy, drug addiction, mental retardation.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 8610: Motivation

Survey of historical and contemporary theories and models of human motivation. Major emphasis on different levels of motivational analysis.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 8620: Personality Psychology

Graduate-level introduction to the field of personality psychology, including readings and discussion of both classic and contemporary works.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 8710: General Linear Models in Psychology I

Principles of interval estimation and hypothesis testing, scalar and matrix forms of simple and multiple regression with continuous and categorical predictors, regression diagnostics.

Credit Hours: 4

Prerequisites: undergraduate course in statistics; concurrent enrollment in PSYCH 8730; instructor's consent

PSYCH 8720: General Linear Models in Psychology II

Complex analysis of variance; experimental design.

Credit Hours: 4

Prerequisites: PSYCH 8710 or equivalent, concurrent enrollment in PSYCH 8730; instructor's consent

PSYCH 8730: Statistical Software Packages

Computer implementation of data management and statistical analysis. Covers elementary computer operations, data entry and quality control, and computer implementation of statistical models covered in PSYCH 8710 and PSYCH 8720.

Credit Hour: 1

Prerequisites: instructor's consent

PSYCH 8910: Responsible Conduct of Research

This course exposes students to important concepts in the responsible conduct of research. Graded on A-F basis only.

Credit Hour: 1

PSYCH 8920: Social and Behavioral Sciences in Public Health

(same as P_HLTH 8920). This course will take both a theoretical and a practical approach to understanding health-related behavior and the field of public health. Students will gain an understanding of theory and empirical research in the social and behavioral sciences, as well as developing practical skills in critically evaluating research and in applying scientific evidence to address real world health concerns.

Credit Hours: 3

PSYCH 9001: Topics in Psychology-General

Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester.

Credit Hour: 1-99

Prerequisites: instructor's consent, departmental consent for repetition

PSYCH 9050: Research in Psychology - Non-Dissertation

Research in Psychology not leading to dissertation. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

PSYCH 9085: Problems in Psychology

Advanced studies to meet needs of individual student. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent. Departmental consent for repetition

PSYCH 9090: Research in Psychology - Dissertation

Research in Psychology leading to dissertation. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

PSYCH 9110: Studies in Experimental Psychology

Critical consideration of selected research in neuroscience and cognitive psychology.

Credit Hours: 3

Prerequisites: PSYCH 4972 or PSYCH 4973; departmental consent for repetition; instructor's consent

PSYCH 9120: Studies in Physiological Psychology

Weekly seminars given by local and regional cognitive psychologists and cognitive neuroscientists. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: PSYCH 7210, departmental consent for repetition, and instructor's consent

PSYCH 9150: Human Learning and Memory

Current theory and research in the area of human learning and memory will be investigated. A major component of the course will involve the critical review of existing literature in this area.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9210: Psychopharmacology

Basic principles of drug action on the nervous system, the theory and clinical use of the various psychotherapeutic drugs, drug abuse and its treatment.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9220: Clinical Neuropsychology Seminar

In this course students will analyze published cases in the neuropsychology literature. By studying how behavioral and mental processes break down, the supposition is that one can infer how intact processes must have been constructed, and how a brain supports them.

Credit Hours: 3

Prerequisites: Instructor's consent

PSYCH 9230: Seminar on fMRI

Fundamentals of MRI and its application to brain imaging, including experimental design, analysis and contemporary issues. During the lab component, students will use FSL and other software to analyze fMRI data and will design and implement their own fMRI experiments.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9240: Advanced Neural Systems

The course provides in-depth coverage of the neurophysiology, neuroanatomy, and function of the brain. Course lectures and discussions cover the brain and its systems in a "bottom-up" sequence starting with basic sensory pathways and concluding with higher cognitive functions. The course also includes hands-on laboratory sessions, which include dissection component. Graded on A-F basis only.

Credit Hours: 3

PSYCH 9310: Theories of Social Psychology

Intensive review of classic and contemporary concepts and theories of social psychology; emphasizes readings from primary sources. PhD candidates only. Required for all PhD candidates in social psychology.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9320: Social Psychology Methodology

Advanced study of experimental methods in social psychological research.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9330: Field Research Methods

Advanced course in research methods and designs commonly used in field settings; theoretical, ethical, and pragmatic issues that arise in field settings are considered; emphasis is on learning and skill acquisition through a series of hands-on assignments.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9350: Studies in Social Psychology

Critical coverage of selected research and theory in social psychology.

Credit Hour: 1-99

Prerequisites: instructor's consent, departmental consent for repetition

PSYCH 9360: Seminar in Social Psychology

Intensive review of concepts and theories of social psychology; emphasizes readings from primary sources. Ph.D. candidates only. Required for all Ph.D. candidates in social psychology program. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: instructor's consent

PSYCH 9365: Positive Psychology

This seminar will discuss and critique modern research in positive psychology. Each chapter of the textbook provides overviews of positive psychology research topics at various levels of analysis, while providing suggestions for further research. Graded on A-F basis only.

Credit Hours: 3

PSYCH 9440: Studies in Developmental Psychology

Covers contemporary research and professional topics in developmental psychology. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

PSYCH 9460: Studies in Evolution and Behavior

Reading and discussion of classic and contemporary works in evolution.

Credit Hour: 1

Prerequisites: instructor's consent

PSYCH 9510: Studies in Clinical Psychology

Contemporary research and theory for advanced graduate students in clinical psychology. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent, departmental consent for repetition

PSYCH 9515: Orientations in Psychotherapy

The introductory psychotherapy course for students in the clinical psychology doctoral program. The focus of the course is on development of knowledge and skills in the following four areas: (1) Theory and practice of contemporary (brief) psychotherapy; (2) Basic interviewing skills; (3) Psychotherapy research and empirically supported treatments; and (4) The role and impact of managed care in contemporary psychotherapy.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9520: Psychometrics

Introduction to concepts and issues essential to psychological assessment including psychometrics, test construction, controversies in psychological testing, behavioral assessment, and structured interviewing.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9525: Orientations to Clinical Assessment

Topics include psychometric principles, intelligence testing, objective and projective personality testing and behavioral assessment.

Credit Hours: 3

Prerequisites: PSYCH 9520 and instructor's consent

PSYCH 9530: Clinical Child Assessment

Introduction to clinical instruments, techniques and problems in the psychological assessment of children.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9540: Ethical and Professional Issues II

Legal issues, state and national codes, ethical decision-making, dangerousness, ethical clinical treatment issues, mandated reporting, and ethics in specialized clinical settings. This course is the second in a sequence for clinical psychology doctoral students.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9545: Clinical Practicum

Intensive supervised training in use and interpretation of psychological techniques and in psychotherapy. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent and professional liability insurance

PSYCH 9550: Clinical Intervention with Children

Introduction to theory, research and practice in the area of behavior change with children and adolescents.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9560: Family and Group Process

Theory, intervention, and research in the areas of family and group dynamics. Emphasis on family therapy approaches.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9570: Assessment and Treatment of Sexual Problems

Background information for and methods and techniques of dealing with a variety of sexual problems that clients bring to therapists. Sexual dysfunction, homosexuality, sexual aberrations and sex crimes covered.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9575: Clinical Research Methods

Focus on research design with emphasis on active critique of methodological challenges (e.g., subject selection, control groups, multimodal measures, and treatment issues), includes lecture and active review or research.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9580: Seminar in Clinical Psychology

Critical coverage of selected research and theory in clinical psychology.

Credit Hours: 3

Prerequisites: instructor's consent, departmental consent for repetition

PSYCH 9585: Introduction to Alcohol Studies

Intensive seminar on alcohol research primarily intended for alcohol research training fellows. Covers a range of topics of interest to psychologist, including pharmacology, research methods, genetics, diagnosis, expectancies, and treatment.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9590: Clinical Pediatric Neuropsychology

The goal of this course is to provide an in-depth introduction to the field of clinical pediatric neuropsychology. Particular emphasis will be placed on how we can increase our understanding of development through the study of individuals with early brain dysfunction.

Credit Hours: 3

Prerequisites: instructor's consent

PSYCH 9710: Multivariate Statistics in Psychology

Multivariate statistical methods, including multivariate analysis of variance, discriminant analysis, principal component analysis, and elements of matrix algebra, as applied to problems in psychology.

Credit Hours: 3

Prerequisites: PSYCH 8710 and PSYCH 8720; instructor's consent

PSYCH 9715: Multilevel Modeling

Introduction to random coefficient multilevel modeling of clustered data. Topics include two- and three-level models, estimation techniques, computing options, model fitting issues, advanced model applications, and growth modeling.

Credit Hours: 3

Prerequisites: instructor's consent, a graduate course in regression analysis

PSYCH 9720: Latent Variable Models in Statistical Analysis

Covers Matrix Algebra fundamentals, Factor Rotation, Communality Estimation techniques, High Order and Dynamic Factor Models, Path Analysis, Use of computer programs.

Credit Hours: 3

Prerequisites: instructor's consent and PSYCH 8720

PSYCH 9725: The Literature Review

Focuses on methods for gathering, summarizing, integrating and interpreting research on a particular research issue. Topics include searching the literature, evaluating research quality and synthesizing statistical results across separate studies.

Credit Hours: 3

Prerequisites: PSYCH 8710 and instructor's consent

PSYCH 9735: Psychological Process Models

Examines mathematical and statistical models of cognition and perception. Emphasis on modeling basics such as estimation, hypothesis testing, and assessment of fit.

Credit Hours: 3

Prerequisites: PSYCH 8710 and PSYCH 8720 or instructor's consent

PSYCH 9740: Statistical Consulting for Psychologists

Provision of statistical consulting to individuals working with psychological data. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: graduate standing in Psychological Sciences and instructor's consent

PSYCH 9750: Advanced Structural Equation Modeling

Growth Mixture Models, Dynamic Factor models, and nonlinear structural models.

Credit Hours: 3

Prerequisites: PSYCH 8710 or departmental consent

PSYCH 9755: Quantitative Psychology Seminar

Quantitative Psychology Topics Seminar. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: departmental consent required

PSYCH 9760: Categorical Data Analysis

This course will provide an applied introduction to the most important methods for analyzing categorical data. Topics include; logistic regression modeling Poisson regression modeling, multinomial sampling, and classic analysis of contingency tables.

Credit Hours: 3

Prerequisites: PSYCH 8710 and PSYCH 8720; instructor's consent

PSYCH 9765: Cluster Analysis and Network Analysis

The course covers traditional and modern clustering techniques (hierarchical, partitioning, and mixture modeling), both from an algorithmic and modeling perspective. Several types of data types are explored, including traditional two-mode data sets and network structures.

Credit Hours: 3

Prerequisites: instructor's consent required

PSYCH 9780: Item Response Theory I

Introduction to item response theory, including classical test theory, popular item response models, model estimation, software considerations, and application. Graded on A-F basis only.

Credit Hours: 3

Corequisites: PSYCH 8710

PSYCH 9910: Teaching of Psychology Practicum

Focuses on development and enhancement of teaching skills for graduate students in psychology who are primary instructors of undergraduate psychology courses. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

PSYCH 9920: Advanced History of Psychology

Advanced course in history of psychology designed to show how general philosophical models of mind and behavior have been linked to doctrines of mental health and pathology and to theories of social behavior.

Credit Hours: 3

Prerequisites: instructor's consent

Public Affairs Courses

PUB_AF 4001: Topics in Public Affairs

Selected topics in public affairs.

Credit Hours: 3

PUB_AF 7001: Topics in Public Affairs

Select current topics in public affairs. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: consent required

PUB_AF 7330: Scientific and Technological Aspects Terrorism and Counter Terrorism

(same as NU_ENG 7330). Terrorism has been a familiar tool of political conflict, and it has assumed greater importance during the past twenty years. This subject has been treated by political scientists in various forms, but the scientific and technological aspects of different forms of terrorism cannot be found in a single place. It is important for persons who propose counter measures to understand the basics of different types of terrorism such as for instance the nature of chemical agents, their properties such as toxicity, etc. in order to build better defense systems.

Credit Hours: 3

PUB_AF 7357: Health Economics for Public Affairs

(same as ECONOM 7357). This course analyzes the economics of health care in the United States with particular attention to the role of government. It examines the demand for health care and the structure and consequences of public and private health insurance; the supply of health care, including professional training, licensure, speculation and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine, as well as an examination of recent proposals and initiatives for health care reform.

Credit Hours: 3

Prerequisites: PUB_AF 8190 or equivalent

PUB_AF 7367: Law and Economics for Public Affairs

(same as ECONOM 7367). This course is a survey of economic analysis of American legal institutions. Students will apply basic microeconomic, game theoretic and statistical concepts to the study of property, contracts, torts, the legal process, crime and the judiciary.

Credit Hours: 3

Prerequisites: ECONOM 4351 or ECONOM 3251 and STAT 2500, or equivalent

PUB_AF 8001: Topics in Public Affairs

Select current topics in public affairs.

Credit Hours: 3

Prerequisites: instructor's consent

PUB_AF 8085: Problems in Public Affairs

Intensive study of an area of public affairs related to the student's special interest.

Credit Hour: 1-99

PUB_AF 8150: Collaborative Governance

Political, economic, and social context of government and public service; examines theories and models of collaborative governance and implications for policy-making, public management, and public service delivery. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8160: Organizational Dynamics and Leadership

Focuses on understanding human action in administrative situations and on developing personal capacities for effective action in varied and difficult organizational situations. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8170: Public Policy Processes and Strategies

Processes through which public demands are generated, converted into public policy, and implemented. Examines the intersection of politics, policy, and management as well as the diverse strategies and tools of public action. Graded on A-F basis.

Credit Hours: 3

PUB_AF 8171: Environmental Policy

This course is an introduction to U.S. environmental policy, focusing on important political institutions and political actors. The course provides a survey of the primary laws, regulations, and policies that compromise pollution control and natural resource management policy.

Credit Hours: 3

PUB_AF 8172: Health Policy

(same as P_HLTH 8300). This seminar will examine the health care system in the United States, including government funded programs, regulation of costs, and policies promoting health behaviors. The course will examine historical development, recent trends, and methods of health policy analysis.

Credit Hours: 3

PUB_AF 8173: Education Governance, Finance and Policy

The course centers on public policy processes as applied to governance, finance and policy in public education. The administrative, political and economic dimensions of policy reform are emphasized. A special focus is placed on developing tools for analyzing and critiquing policy rational, design and implementation.

Credit Hours: 3

PUB_AF 8174: Social Policy

This seminar will examine the nature and extent of poverty in the U.S., its causes and consequences, and the antipoverty effects of existing and proposed government programs and policies.

Credit Hours: 3

PUB_AF 8175: Early Childhood Policy

This course provides an understanding of early childhood development issues and their impact on policy formation. Will study different family situations in the US and other countries (e.g. maternal employment and job policies, divorce, child abuse and neglect) that may be a concern for child policy makers and analysis. In addition we are going to examine the effects of different early childhood programs in the US and other countries around the world. Also, US federal regulations that have an impact on child policy, such as the National Health Policy and Welfare reform will be examined. Will use both qualitative and quantitative criteria to analyze these policies. This course is applied in focus, so by the end of the semester students should be able to understand policy analysis and the trade-offs of implementing policy choices, as well as being able to develop analytical skills for early childhood and family policies in their work. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8177: Energy Economics

The course examines economic theory and empirical analyses of global energy supply and demand. It examines the role of non-renewable and renewable energy in the economy and trends in energy production and consumption. Graded on A-F basis only.

Credit Hours: 3

Recommended: Principles of Economics, Instructor's permission

PUB_AF 8178: Sustainable Energy Policy

This course examines the concept of sustainability as it applies to energy production and consumption, and explores policy options for achieving sustainable energy use.

Credit Hours: 3

Prerequisites: PUB_AF 8177

Recommended: Principles of Economics, Instructor's permission

PUB_AF 8180: Research Methods and Inquiry in Public Affairs I

Introduction to research methods for graduate students in public affairs. Topics include measurement, quantitative description, problem definition, the policy research process, and basic analytical tools commonly applied in public affairs. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8181: Research Methods and Inquiry in Public Affairs II

Advanced topics and applications in research methods for public affairs. Topics include: multivariate analysis and other advanced quantitative techniques; evaluation of policy research products.

Credit Hours: 3

Prerequisites: PUB_AF 8180 or permission of instructor

PUB_AF 8185: Research Methods and Inquiry in Public Affairs - Mid Career

Applications in research methods for graduate students in public affairs mid-career program. Topics include: measurement; quantitative description; problem definition; the policy research processes; basic analytical tools commonly applied in public affairs; multivariate analysis and other advanced quantitative techniques; evaluation of policy research products. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

PUB_AF 8190: Economic Analysis for Public Affairs

Application of tools of economic analysis to understand and interpret the behavior of government, consumers and producers. Sources of economic inefficiency, including market failures and limitations, and policy solutions. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8195: Economic Analysis for Public Policy - Mid Career

Application of tools of economic analysis to understand and interpret the behavior of government, consumers and producers. Sources of economic inefficiency, including market failures and limitations, and policy solutions.

Credit Hours: 3

Prerequisites: instructor's consent

PUB_AF 8210: Ethics, Democracy and the Public Service

Uses the concepts of ethics and democracy to explore the role of public service in American society in the context of globalization. Integrates learning from the MPA core curriculum and the specializations into a comprehensive view of the contemporary, multi-sectored public service. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8211: MPA Capstone (Applied Project)

Application of concepts and methods of public affairs to actual policy or management problems. Diagnosis of problem or decision situation, collection of relevant data, development of alternative solutions, recommendations of proposed course of action.

Credit Hours: 3

PUB_AF 8280: Public Affairs Internship

Gives students an opportunity to gain experience in government operations by providing supervised work with an agency at the local, state, or federal level of government or in nonprofit agencies. Graded on A-F basis.

Credit Hours: 3

PUB_AF 8282: Practicum in Public Affairs

Supervised field experience in an approved community, public agency, or nonprofit organizations. Opportunity for observation and participation under the guidance of a qualified advisor. Formal study of advanced theories and techniques is integrated into the student's experience. Graded on A-F basis only.

Credit Hour: 3-6

Prerequisites: advanced standing and instructor's consent required

PUB_AF 8310: E-Democracy in Theory and Practice

Examines the theory and practice of electronic democracy. Uses case studies to assess how information and communication technology affects public involvement in public decisions. Major topics include the methods and tools used in current e-democracy projects as well as the philosophical, practical and institutional issues faced. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8320: Spatial Analysis for Public Affairs

Examines theoretical and empirical issues related to the spatial analysis of economic activity and local public issues. Major topics include the role of the public sector, the economics of public services, social accounting matrices, input-output analysis, econometric models of regional economies, and geographic information systems. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8330: Informatics and Governance

Provides students with a non-technical introduction to the design, implementation and management of information systems for local and regional governance. Surveys key issues for information professionals, including policy planning, design, procurement, staffing, applications and public access and participation. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8340: Regional and Economic Development Policy

Presents an overview of historical perspectives and current practice in regional development policy. Explores various rationales for regional collaboration. Topics include global and political context of development policy, theories of regional growth and development, regional

governance, distribution of benefits and sustainable development. Graded on A-F basis only

Credit Hours: 3

PUB_AF 8350: Regional Development Issues and Analysis

(same as AG_EC 8350). Examines theories of regional growth and development and methods for analysis with applications to current policy issues. Topics include firm location, new economic geography and agglomeration theory, clusters, human capital, migration, social capital, tax and development incentives, and sustainable regional development. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECONOM 7351 or PUB_AF 8190 or equivalent

PUB_AF 8410: Public Policy Workshop

Application of policy analysis tools and methods onto a specific policy topic or problem. Topics vary depending upon interests of the instructor. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PUB_AF 8420 and PUB_AF 8430

PUB_AF 8420: Public Program Evaluation

Covers implementation and outcome evaluation models, research design strategies, and data collection methods used to assess the effectiveness of public programs and means of their improvement. Graded on A/F basis only.

Credit Hours: 3

Prerequisites: PUB_AF 8181 or equivalent

PUB_AF 8430: Public Policy Analysis

Uses economic logic and statistical techniques to design, analyze and evaluate public policy. Applies social choice theory, cost/benefit analysis, forecasting, regression analysis, trend analysis, time series methods, and other analytic techniques to policy decision. Graded on A-F basis.

Credit Hours: 3

Prerequisites: PUB_AF 8181 and PUB_AF 8190 or equivalent, or permission of instructor

PUB_AF 8510: Public Budgeting and Taxation

Intensive study of the institutions, processes, politics, and social and economic impact of public taxation and expenditures.

Credit Hours: 3

PUB_AF 8520: Human Resources Management and Development in Public and Nonprofit Sector

Examines the political, economic, and legal context of the personnel function, as well as the technical aspects of the personnel administrator's job. Stresses the dynamics of bureaucratic organizations. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8530: Strategic Management of Public Service**Organizations: People, Information and Money**

Presents the rationale for strategic planning, and techniques and processes to develop and implement strategic planning in the public sector. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8540: Local Government Management

Organization and division of service responsibility within local governments. Problems of managing delivery of services with special emphasis upon program implementation, productivity, planning, responsiveness. Graded on A-F basis.

Credit Hours: 3

PUB_AF 8610: Group Dynamics and Conflict Resolution

Focuses on the study of group psychology in the context of communities and organizations. It provides a specific examination of the emergence and resolution of conflict. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8620: Organizational Analysis and Change

Investigates processes and methodologies of organizational diagnosis, intervention strategies, and the role of a change agent. Graded on A-F basis.

Credit Hours: 3

PUB_AF 8630: Organizational Change in a Community and Global Context

Examines changing organizations in their task environments, which include communities and the global economy. The phenomenon of ambiguous boundaries between public and private as well as nonprofit sectors will be investigated as these profound changes impact organizational behavior. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8710: The Nonprofit and Voluntary Sector

Provides an overview of the history, function, size, scope, development, and management of the nonprofit sector. Historical, political, economic, and social perspectives are used to examine the meaning of voluntarism, charity, philanthropy, and the nonprofit sector. Graded on A-F basis.

Credit Hours: 3

PUB_AF 8720: Budgeting and Financial Management in the Nonprofit Sector

Nature and environment of public and nonprofit financial administration. Principles of accountability for management of public and nonprofit funds; management and investment of cash balances; special problems related to long- and short-term debt. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8830: Grant Writing I

Provides students with knowledge regarding the process of seeking grant funding. Students will work in small groups to complete a letter proposal.

They will experience the peer review process both as applicant and reviewer. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8831: Grant Writing II

Provides students with knowledge regarding the process of seeking grant funding. Students will work in small groups to complete a full-blown state or federal grant proposal. They will experience the peer review process both as applicant and reviewer. The course will cover a variety of funding sources and a range of funding types to provide students with an information base for preparing future grant applications.

Credit Hours: 3

Prerequisites: PUB_AF 8830

PUB_AF 8832: Sponsor Relationships

Provides students with knowledge of the landscape and culture of grant seeking with an emphasis on understanding how private and public sector sponsors are in many ways, significantly different enterprises. Students will gain an understanding of the pivotal role relationships play in grant seeking and gain an appreciation of the particularities and rigors of both public and private grant seeking.

Credit Hours: 3

Prerequisites: Proposed Grant Writing 2 course

PUB_AF 8833: Grant Award Management

Provides students with knowledge regarding the process and policies entailed in managing grant awards. Course content includes federal OMB circulars, basic human resource issues, project management strategies, reporting obligations, and project close-out.

Credit Hours: 3

Prerequisites: Proposed Grant Writing 2 course

PUB_AF 8850: Policies and Institutions of the European Union

Policies and Institutions of the European Union

Credit Hours: 3

PUB_AF 8860: International Comparative Rural Policy

(same as AG_EC 8860). Compares the rural policy objectives and implementation strategies of various countries, and assesses these policies in terms of economic, social, environmental outcomes and their implications for international relations. Includes 2-weeks of study Abroad. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

PUB_AF 8864: Administrative Law

(same as LAW 5310). Principles, factors and statutory provisions which govern availability of relief (both judicial and administrative) to persons or entities aggrieved by the actions or inactions of governmental officials or agencies. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 9000: Directed Individual Study

Supervised readings and research in area of doctoral specialization. Student must submit formal written proposal to doctoral supervising faculty member prior to registration. May be repeated up to 6 hours.

Credit Hours: 3

Prerequisites: PhD standing or permission of instructor

PUB_AF 9090: Dissertation

Independent research for Ph.D. dissertation. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: PhD standing or permission of instructor

PUB_AF 9150: Governance and Public Affairs

Examines theories of governance, the role of the state and other social institutions. Other topics include administrative reform, the new public management, and the emergence of the multi-sector public service. International comparative dimensions emphasized. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PUB_AF 8150, PhD standing or permission of professor

PUB_AF 9160: Organization Studies in Public Affairs

Examines theories of public and nonprofit organizations, including classical and contemporary perspectives in organization science; individual and group behavior; leadership, power and influence; organization design and structure; and organizational culture. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PhD standing or permission of instructor

PUB_AF 9170: Policy Theory

This seminar examines theories on the policy process, institutions, and delegation of power that influence public policy. Topics covered may include agenda setting, policy design, implementation, legislative decision-making, state political institutions, and federalism. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PhD standing or permission of instructor

PUB_AF 9171: Political Economy of Public Affairs

Course focuses on formal theories of public decision-making, collective choice and strategic interaction of public actors in the policy process using tools such as welfare economics, social choice, game theory, logic of collective action, public choice, and principal agent models. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PhD standing or instructor's consent

PUB_AF 9180: Advanced Research Methods for Public Affairs I

Focuses on multiple regression analysis, the implications and treatment of serial correlation, heteroskedasticity, multicollinearity, specification error, and measurement error. Students estimate models, use diagnostic information, and interpret and present findings for public affairs. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PUB_AF 8180 or equivalent, PhD standing or permission of instructor

PUB_AF 9181: Advanced Research Methods for Public Affairs II

The seminar examines statistical modeling tools for limited dependent variables and complex data situations, such as time-series cross-sectional data, clustered observations, and multilevel data. Other topics include simultaneous equation models and instrument variable in public affairs. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PUB_AF 9180 or equivalent, PhD standing or permission of instructor

PUB_AF 9182: Logics of Inquiry in Public Affairs

This course examines the philosophical foundations of social inquiry public affairs. Topics include investigation of epistemological and methodological issues in development and use of social research, and exploration of the theoretical underpinnings of multiple paradigms in public affairs. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PhD standing or permission of instructor

PUB_AF 9183: Public Affairs Research and Professional Development Seminar

Research and professional development through participation in research seminars, colloquia, academic conferences, lectures, and professional workshops. Students required to register every spring semester in residence. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: PhD standing or permission of instructor

PUB_AF 9185: Supervised Research

Research experience directed by major professor designed to prepare doctoral students for independent scholarship in area of doctoral specialization.

Credit Hours: 3

Prerequisites: PUB_AF 8150, PhD standing or permission of instructor

PUB_AF 9446: Advanced Empirical Methods

(same as ECONOM 9446). Empirical and modeling techniques for evaluation of microeconomic policy questions. Graded A-F only.

Credit Hours: 3

Prerequisites: Instructors consent or PUB_AF 8181, PUB_AF 9180, and PUB_AF 9181

PUB_AF 9447: Topics in Microeconomic Policy Analysis

(same as ECONOM 9447). Applies the methods and techniques of microeconomics and to specific timely policy questions. Taught by applied-microeconomics faculty and focuses on current topics in labor economics, public economics, the economics of education, health economics, and other applied areas of microeconomics. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Instructor's consent

Recommended: PUB_AF 8181, PUB_AF 9180 and PUB_AF 9181

Public Health Courses

P_HLTH 7001: Topics in Public Health

Selected topics of interest related to Public Health.

Credit Hours: 3

P_HLTH 7085: Problems in Public Health

Guided readings, intensive study of an area in Public Health related to special interest of student or an area in which the student needs to strengthen. May be repeated for credit.

Credit Hour: 1-99

Prerequisites: instructor's consent

P_HLTH 7150: Principles of Public Health

This course provides an overview of public health, including concentration areas of public health systems, epidemiology, social and behavioral determinants of health, environmental health, and public health policy. Case studies from local, state, national and international public health issues are incorporated into each segment, culminating in a discussion of the future of public health.

Credit Hours: 3

P_HLTH 7160: Interdisciplinary Perspectives in Global Health

This course is designed for those interested in health issues from a global perspective. It explores contemporary issues, problems, and controversies in global health through an interdisciplinary perspective. This course will follow a lecture and case study discussion format. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Department consent required

P_HLTH 7750: Physical Function and Older Adults

(same as F_C_MD 7750, ARCHST 7640, HMI 7750, H_D_FS 7750, NURSE 7750, and SOC_WK 7752). This course takes an interdisciplinary approach to understanding and improving the physical function and independence of older adults and explores approaches to alleviate disabling conditions that interfere with physical function and quality of life in old age. Graded on A-F basis only.

Credit Hours: 3

P_HLTH 7751: Psychosocial Function and Older Adults

(same as ARCHST 7650, F_C_MD 7751, HMI 7751, H_D_FS 7751, NURSE 7751, P_HLTH, 7751 and SOC_WK 7751). This course takes an Interdisciplinary approach to understanding the psychosocial function of older adults and explores approaches to alleviate disabling conditions that interfere with psychosocial function and quality of life in old age. Graded on A-F basis only.

Credit Hours: 3

P_HLTH 7800: Public Health Campaign Successes and Failures

Explains public health campaigns from assessing needs to planning and implementing interventions, as well as taking lessons learned from previous public health campaigns to create strategies that increase the

likelihood of success and reduce the chance of failure. Graded on A-F basis only.

Credit Hours: 3

P_HLTH 7850: Mental Health Policy

This course is an introductory survey of the principles and practice of mental health policy, beginning with its early history and continuing to the present day. Topics will include the nature of mental illness, its incidence and prevalence, mental health stigma, policy concerns related to mental health finance, the process of policy making, involvement of mental health care consumers in the policy process, and mental health in health policy reform. The needs of special populations including the homeless, persons in the criminal justice system, ethnic/minority groups, persons living in rural areas and veterans will be examined as well as needs specific to children and the elderly. Students are also expected to understand mental health policy considerations related to current health care reform and ethical issues in the practice of mental health policy. Graded on A-F basis only.

Credit Hours: 3

P_HLTH 7952: Research Methods in Public Health

This course is designed to introduce students to the process of research as a sequence of events, systematically organized to further knowledge. A scientific and conceptual stance to knowledge development is emphasized, along with the importance of the empirical approach in establishing relationships between theories, concepts, and behavior phenomena. May be repeated for credit.

Credit Hours: 3

P_HLTH 8001: Topics in Public Health

Selected topics of interest related to Public Health.

Credit Hour: 1-3

P_HLTH 8085: Problems in Public Health

Guided readings, intensive study of an area in Public Health related to special interest of student or an area in which the student needs to strengthen.

Credit Hour: 1-99

Prerequisites: instructor's consent. May be repeated for credit

P_HLTH 8090: Masters Thesis Research

Leads to preparation of masters thesis. May only be repeated for credit for six hours. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: P_HLTH 8980. Instructor's consent required

P_HLTH 8120: Applied Epidemiology in Community Assessment

The purpose of this course is to enable students to gain skills and abilities in assessing population groups and determining their priority public health problems. Students will consider a variety of strategies for empowering and mobilizing populations in collaborative public health efforts. Communication skills are key to the community assessment and intervention process, particularly in translating epidemiological data to lay audiences, and advocating for action. Students will be challenged to

communicate public health issues effectively both on-line and in writing. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: P_HLTH 7952

Prerequisites: P_HLTH 8420, Graduate level Statistics (STAT 7020 or STAT 7410)

P_HLTH 8150: Human Health and the Environment

This graduate level course will address threats to public health related to environmental factors including biological, physical and chemical factors. Subjects will include environmental contamination and remediation, zoonotic disease food and water quality. This course will include recorded lectures with optional synchronous participation. Lectures will be recorded live and students will have the option to virtually attend live lecture, but this will not be required. Lecture recordings are archived for students to view at their convenience. Graded on A-F basis only.

Credit Hours: 3

P_HLTH 8250: Equity and Disparities in Health

(same as SOC_WK 8250). This course is designed to provide students with knowledge about the distribution, causes, and consequences of health inequalities. The course will examine how multiple predictors such as socioeconomic status, behavioral risk factors, and cultural factors such as perceived discrimination and acculturation, gender and marriage, stigma, and health care inequalities are related with racial/ethnic, socioeconomic, and gender disparities in health. This course will also discuss implications that may contribute substantively toward the elimination of health inequalities.

Credit Hours: 3

P_HLTH 8251: Immigrant Health

Public health professions have considerable interest in understanding the unique health concerns of immigrants, in order to prevent disease, promote health, and prolong life in this specific population and in the population as a whole. This course will be based on readings in the peer-reviewed literature, discussion in a seminar format, community visits and observations/interviews, and guest speakers on topics of importance when considering issues of public health particular to immigrant communities. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

P_HLTH 8260: Emergency Preparedness

An overview of current national guidance and basic assessment of the current health care system level of readiness focusing on the critical role of the health care system for community, regional, state, and nationally based emergency preparedness efforts. Graded on A-F basis only.

Credit Hours: 3

P_HLTH 8270: Storytelling in Public Health and Public Policy

Storytelling for public health and public policy offers students an opportunity to become familiar with the literature and theoretical frameworks underlying the use of narrative and digital storytelling in public health and policy advocacy and public health interventions focused on behavior change. Students will review case studies of effective

narrative communication and practice elements of effective storytelling in a variety of print and digital platforms. Graded on A-F basis only.

Credit Hours: 3

P_HLTH 8280: Biosafety and Laboratory Issues in Public Health

This course is designed to provide current worldwide guidance on laboratory issues & bio-safety with respect to conducting field epidemiology. This integration has recently been given media exposure with recent outbreaks of infectious disease, food-borne illnesses in the food supply, & also recently in Hollywood filmography (see Contagion, 2011 & Outbreak, 1995). While bio-safety, epidemiology, & laboratory medicine are disciplines that are closely interrelated, they are not always optimally connected on functional & organizational levels. This course will provide an overview of the field of biological safety (shorthand to 'bio-safety') & its application to epidemiology & laboratory medicine for the control biological hazards for students at all levels who are interested in the epidemiology of microbial diseases. Students will review biological hazards associated with occupational laboratory acquired infections, & examine select case studies to identify critical bio-safety lapses & outbreak scenarios of food borne illness using epidemiological tools. The course will teach participants how to perform a comprehensive qualitative risk assessment for the use bio-hazards in the laboratory & learn how to employ the control strategies to appropriately manage these risks for field epidemiology. This course will also convey the laboratory perspective of public health investigations to field epidemiologists in order to improve collaboration between these disciplines & to enhance the quality of field investigations as well as day-to-day interaction. Course concepts can be applied to the control of bio-hazards during the review of proposed research involving bio-hazards, along with emphasizing protective measures when addressing incidents involving bio-hazards, such as emergency spills or bio-terrorism related events. In addition, coverage of the Select Agent Program & the additional security practices entailed with research will be covered. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Departmental consent

P_HLTH 8300: Health Care in the United States

(same as PUB_AF 8172). Overview of financing, structure, and outcomes in the U.S. health care system. Contemporary health care issues, policy, and politics will be addressed. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

P_HLTH 8400: Clinical Veterinary Regulatory Medicine and Public Health

(same as V_M_S 8400). The goal of this course is to familiarize the student with clinical aspects of veterinary public health/regulatory medicine. Must be enrolled in MPH (veterinary public health concentration) or DVM curriculum.

Credit Hours: 2

P_HLTH 8420: Principles of Epidemiology

This course is intended to provide a general introduction to the course epidemiological concepts and methods as grounded in the essential services of public health. The focus of the course is on developing critical thinking skills and providing a foundation in applied epidemiologic competencies. May be repeated for credit. Graded on A-F only.

Credit Hours: 3

Prerequisites: graduate level statistics; instructor's consent

P_HLTH 8620: Emerging Zoonoses Diseases

This course will enhance student understanding of epidemiology and ecology as it relates to emerging and established zoonotic diseases. Risk factors for the emergence of and mechanisms for control and prevention of zoonotic diseases will be discussed. Course will involve individual and group assignments, use of discussion board, and several blackboard collaborate sessions. Blackboard collaborate sessions (time is TBA) will be held throughout the semester as an introduction to course modules and for help sessions. Students must have audio capability (microphone and speakers) for the course. Built in microphones and speakers work nicely, an inexpensive headset helps screen out background noise. If your computer does not have a build in microphone, an inexpensive one can be purchased at an electronics/computer store. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: P_HLTH 8420 or V_PBio 8455 and P_HLTH 8150

P_HLTH 8920: Social and Behavioral Sciences in Public Health

(same as PSYCH 8920). This course will take both a theoretical and a practical approach to understanding health-related behavior and the field of public health. Students will gain an understanding of theory and empirical research in the social and behavioral sciences, as well as developing practical skills in critically evaluating research and in applying scientific evidence to address real world health concerns.

Credit Hours: 3

P_HLTH 8921: Assessment of Population Health and Field Epidemiology

Assessment in public health including outbreak investigation, surveillance, infectious disease, and environmental epidemiology. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Graduate level statistics, basic graduate level epidemiology. Instructor's consent required

P_HLTH 8953: Evaluating Global Public Health Programs

This course is designed to prepare students to evaluate global public health programs, preferably in developing countries. Students will identify a global public health issue, find one or more global health intervention or prevention programs, evaluate the programs using principles of evaluation research methods, and suggest implications for global public health promotion. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: P_HLTH 7952 or P_HLTH 8420

P_HLTH 8970: Public Health Capstone

As an integrating experience, the Public Health Capstone will allow students to articulate and share what they have learned in coursework and to supplement previous learning by exploring areas of knowledge the students identify as most relevant to their readiness for professional practice. It will enable students to test theoretical knowledge against real life practical experiences, and to integrate and refine basic and advanced

concepts, values, and methods acquired during the professional education.

Credit Hours: 3

P_HLTH 8971: Veterinary Public Health Capstone

This capstone experience provides a unique set of opportunities and responsibilities. It is generally scheduled after completion of at least 2 semesters of the MPH curriculum and is designed to serve as a capstone experience integrating previous coursework and experiences. Exceptions to the requirement of completion of 2 semesters of MPH coursework will be granted for students who have completed or concurrent degree. Examples of relevant preparatory coursework will include epidemiology and veterinary public health. As an integrating experience, the capstone will require students to apply knowledge in an independent manner, integrate knowledge into cohesive production, and communication the results of this experience.

Credit Hour: 1-99

Prerequisites: completion of at least 2 semester of MPH curriculum

P_HLTH 8980: Public Health Internship

The field experience, or internship, is an opportunity for the student to test many of the theories, concepts, and information about public health learned during the first year and translate them into practice. Using the internship site as the "organizational laboratory," the student begins to develop the necessary professional skill sets for becoming a successful public health professional. The current knowledge, skills, abilities, and experiences will continue to develop and grow as each student becomes a life-long learner and practitioner of public health. Graded on S/U basis only.

Credit Hour: 1-99

Radiologic Sciences Courses

RA_SCI 1000: Introduction to Radiography

Overview of radiography through small group discussions and onsite visitations in radiology departments. Graded on S/U basis only.

Credit Hour: 1

RA_SCI 3110: Radiography Procedures I

This course is an introduction to basic radiographic positioning and procedures. Specific radiographic procedures of the chest, upper extremity, shoulder girdle, pelvis and lower extremity are taught.

Credit Hours: 2

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3120: Fundamentals of Radiography

Orientation to radiology department, ethics, psychodynamics of patient care, medical legal considerations and radiation safety procedures.

Credit Hours: 3

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3130: Basic Radiographic Skills

Radiographic film processing techniques, intensifying screens and sensitometry will be discussed. The x-ray tube, x-ray production and some of the factors which affect the quantity and quality of the x-ray beam as well as the x-ray image will also be introduced.

Credit Hours: 2

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3140: Principles in Radiographic Exposure I

Theory and principles of X-ray technique; correlation of factors with application.

Credit Hours: 3

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3150: Radiologic Pharmacology

Pharmacological principles, biopharmaceutics, pharmacokinetics, pharmacodynamics, drug classifications, drug names, administration routes, and infection prevention and control will be covered. Attention will be given to contrast agents relative to radiographic imaging. Ethical and legal implications will be explored.

Credit Hours: 3

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3160: Radiologic Physics

Fundamental physics of electricity and radiant energy; principles of generation of electromagnetic radiation and applicable equipment; and principles of digital image capture, display and storage.

Credit Hours: 3

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3170: Imaging Modalities

The study of radiographic and fluoroscopic equipment with attention to automatic exposure devices, image intensification, and imaging detectors. Consideration will be given to equipment in such modalities as computed tomography, magnetic resonance imaging, ultrasound, nuclear medicine and radiation therapy.

Credit Hours: 2

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3180: Radiography Procedures II

Instruction in radiographic procedures of the upper and lower gastrointestinal system, urinary system, bony thorax, vertebral column, and cranium.

Credit Hours: 2

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3190: Radiography Procedures III

Instructions in advanced radiographic imaging techniques with emphasis in trauma radiography, vascular studies and other specialty radiographic procedures.

Credit Hours: 3

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3460: Cardiovascular and Pulmonary Diagnostic Applications I

(same as CDS 3460). Problem-based study of cardiopulmonary anatomy and physiology using current imaging methods. Emphasis given to assessment of the acutely distressed cardiac or pulmonary subject, emergency pulmonary support and vascular access techniques.

Credit Hours: 3

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program

RA_SCI 3941: Clinical Education I

First in a five-part series focusing on the application and evaluation of radiography in the clinical setting. Supervised clinical experience emphasizing radiographic procedures of the chest, abdomen, and extremities.

Credit Hours: 3

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3942: Clinical Education II

Second in a five-part series focusing on the application and evaluation of radiography in the clinical setting. Supervised clinical experience emphasizing the development of technical skills and procedural knowledge of routine radiographic procedures,

Credit Hours: 3

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 4085: Problems in Medical Imaging

Supervise investigation in an aspect of medical imaging science usually culminating in a written report.

Credit Hour: 1-3

Prerequisites: instructor's consent

RA_SCI 4110: Sectional Anatomy

(same as DMU 4312). A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques.

Credit Hours: 3

Prerequisites: instructor's consent

RA_SCI 4140: Magnetic Resonance Imaging: Physics and Procedures

(cross-leveled with RA_SCI 7140). Magnetic Resonance imaging fundamentals, applications, instrumentation, physical principles. Basic imaging concepts including positioning, scanning protocols, contrast

imaging, anatomy review, and pathological considerations. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: Acceptance into Radiologic Sciences

RA_SCI 4150: Computed Tomography: Physics and Procedures

(cross-leveled with RA_SCI 7150). Computed tomography imaging fundamentals, applications, instrumentation, physical principles. Applied concepts regarding patient care and CT imaging procedures. Graded on an A-F basis only.

Credit Hours: 5

Prerequisites: Acceptance into Radiologic Sciences

RA_SCI 4303: Radiation Safety

(same as NU_ENG 4303). Types and origins of radiation; radiation detection and measurement; radiation interactions; shielding; dose calculations; federal, state and local regulations; and procedures for safe uses of radiation. Laboratory experiments in radiation measurements and protection.

Credit Hours: 3

RA_SCI 4440: Organization and Administration

(same as RS_THR 4440 and CDS 4440). Examines design and operation of allied health service departments and educational programs, including facilities, personnel procedures, record systems, ethics, medical-legal aspects, interdepartmental relations and curriculum development.

Credit Hours: 3

RA_SCI 4943: Clinical Education III

Third in a five-part series focusing on the application and evaluation of radiography in the clinical setting. Supervised clinical experience emphasizing the transition to self-directed practice of routine radiographic procedures and the development of technical skills and procedural knowledge of more advanced radiographic procedures.

Credit Hours: 3

Prerequisites: Acceptance into Radiologic Science, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 4944: Clinical Education IV

Fourth in a five-part series focusing on the application and evaluation of radiography in the clinical setting. Supervised clinical experience emphasizing self-directed clinical practice and the development of technical skills and procedural knowledge of more advanced radiographic procedures and modalities.

Credit Hours: 3

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 4945: Clinical Education V

Final clinical course. Supervised clinical experience emphasizing self-directed performance of complex radiographic procedures, continued competency in routine diagnostic radiography and the investigation of advanced modalities, while transitioning to reflective, critical, and strategic professional practice.

Credit Hours: 3

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Sciences students only

RA_SCI 4946: Advanced Medical Imaging Externship

(cross-leveled with RA_SCI 7946). Supervised clinical experience in a medical imaging specialty with emphasis on patient care and technical practice.

Credit Hours: 3

Prerequisites: Instructor's consent required. Certification in a primary area of imaging. An affiliation agreement between the University of Missouri Radiologic Sciences Program and the clinical facility. Satisfactory completion of all Clinical Screening Requirements

RA_SCI 4947: Radiography Overview

A comprehensive overview of all aspects of diagnostic radiology with emphasis on procedures, technique, radiation protection, positioning, radiographic anatomy and patient care.

Credit Hours: 3

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program

RA_SCI 4980: Imaging Pathology

Etiology and processes of disease. Emphasis on pathology of body systems and the manifestation of pathology through imaging.

Credit Hours: 3

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program

RA_SCI 7110: Sectional Anatomy

(cross-leveled with RA_SCI 4110). A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Instructor consent

RA_SCI 7140: Magnetic Resonance Imaging: Physics and Procedures

(cross-leveled with RA_SCI 4140). Magnetic Resonance imaging fundamentals, applications, instrumentation, physical principles. Basic imaging concepts including positioning, scanning protocols, contrast imaging, anatomy review, and pathological considerations. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: Instructor consent

RA_SCI 7150: Computed Tomography: Physics and Procedures

(cross-leveled with RA_SCI 4150). Computed tomography (CT) imaging fundamentals, applications, instrumentation, physical principles. Applied concepts regarding patient care and CT imaging procedures. Graded on an A-F basis only.

Credit Hours: 5

Prerequisites: Instructor's consent required

RA_SCI 7303: Radiation Safety

(same as NU_ENG 7303). Types and origins of radiation; radiation detection and measurement; radiation interactions; shielding; dose calculations; federal, state and local regulations; and procedures for safe uses of radiation. Laboratory experiments in radiation measurements and protection.

Credit Hours: 3

RA_SCI 7946: Advanced Medical Imaging Externship

(cross-leveled with RA_SCI 4946). Supervised clinical experience in a medical imaging specialty with emphasis on patient care and technical practice.

Credit Hours: 3

Prerequisites: Instructor's consent required. Certification in a primary area of imaging. An affiliation agreement between the University of Missouri Radiologic Sciences Program and the clinical facility. Satisfactory completion of all Clinical Screening Requirements

Radiology Courses

RADIOL 4328: Introductory Radiation Biology

(same as BIO_SC 4328, NU_ENG 4328, V_M_S 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

Credit Hours: 3

Prerequisites: junior standing Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

RADIOL 6371: ABS Radiology Mechanism of Disease

ABS Radiology Mechanism of Disease

Credit Hour: 5-10

RADIOL 6373: ABS Radiology Research

ABS Radiology Research

Credit Hour: 5-10

RADIOL 6375: ABS Radiology Research and Review

ABS Radiology Research and Review

Credit Hour: 5-10

RADIOL 6645: Radiology

Goals/Objectives: General survey of all subspecialties of radiology. Evaluations: Written evaluations performed by both faculty and residents.

Credit Hours: 5

RADIOL 6650: Advanced Radiology

Advanced Radiology

Credit Hours: 5

RADIOL 6745: Radiology - Rural

Radiology - Rural

Credit Hours: 5

RADIOL 6931: Introduction to Radiology

This two week elective will provide students with exposure to chest and body imaging (1 week per area). They will participate in 2-3 didactic sessions focused on the basics of radiology and imaging that is important to all fields of medicine, as well as video lectures one day a week along with the upperclassmen that are doing their 4 week elective at that time. Videos present a case based learning plan involving common emergent situations that may be encountered during their clinical training.

Credit Hours: 2

Prerequisites: successful completion of the first two years of medical school

RADIOL 7328: Introductory Radiation Biology

(same as BIO_SC 7328, NU_ENG 7328, V_M_S 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

Credit Hours: 3

Prerequisites: Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

RADIOL 8085: Problems in Radiology

Supervised investigation in an aspect of radiological science usually culminating in a written report.

Credit Hour: 1-3

RADIOL 8090: Problems in Radiology

Supervised investigation in an aspect of radiological science usually culminating in a written report.

Credit Hour: 1-3

Religious Studies Courses

REL_ST 1100: Introduction to Religion

Engages students in reflection on the religious questions that human existence poses, and introduces them to conceptual tools for understanding and evaluating answers which have emerged in human history.

Credit Hours: 3

Prerequisites: Sections are restricted to Freshmen and Sophomores only or Juniors and Seniors only

REL_ST 1100H: Introduction to Religion - Honors

Engages students in reflection on the religious questions that human existence poses, and introduces them to conceptual tools for understanding and evaluating answers which have emerged in human history.

Credit Hours: 3

Prerequisites: Sections are restricted to Freshman and Sophomores only and Juniors and Seniors only. Honors eligibility required

REL_ST 1500: Religion and Culture

The study of religion as expressed in art, literature, music, dance, drama, architecture.

Credit Hours: 3

Prerequisites: Restricted to Freshmen and Sophomores only

REL_ST 1820: Asian Humanities

(same as AR_H_A 1230, HIST 1820, and S_A_ST 1152). This course is an introduction to the literature and visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.

Credit Hours: 3

REL_ST 1820H: Asian Humanities - Honors

(same as AR_H_A 1230, HIST 1820, and S_A_ST 1152). This course is an introduction to the literature and visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.

Credit Hours: 3

Prerequisites: Honors eligibility required

REL_ST 2001: Topics in Religious Studies-General

Organized study of selected topics which vary by semester and are announced at time of registration.

Credit Hours: 3

REL_ST 2005: Topics in Religious Studies-Humanities

Organized study of selected topics which vary by semester and are announced at time of registration.

Credit Hour: 1-3

REL_ST 2100: Indigenous Religions

(same as ANTHRO 2100). Explores the central aspects of religious life in indigenous communities. Focusing on specific groups, it considers individual and group identity, the meaning of the sacred, and the impact of foreign domination.

Credit Hours: 3

REL_ST 2100H: Indigenous Religions - Honors

(same as ANTHRO 2100H). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.

Credit Hours: 3

Prerequisites: Honors eligibility required

REL_ST 2110: Religions of the World

This course introduces students to a variety of religious traditions through the study of their myths, rituals, beliefs, and practices, and explores approaches to the academic study of religion.

Credit Hours: 3

REL_ST 2110H: Religions of the World - Honors

Explores the differing ways in which Asian and Western religions interpret life and reality. Includes study of Hinduism, Buddhism, Chinese and Japanese religions, Judaism, Christianity, and Islam.

Credit Hours: 3

Prerequisites: Honors eligibility required

REL_ST 2220: Death and Dying in the Western World

Drawing on theoretical perspectives and evidence from both religious and American studies, this course examines death and dying in America by focusing on psycho-social, cultural, and historical themes. Through course readings, lectures, and audio-visual media shifting attitudes towards the dead, as well as the treatment and management of the corpse will be examined. In addition to our text book, which will provide an intellectual framework for thinking about death and dying, this course is organized chronologically around case studies or key events. For example, we will examine the Civil War, a war that resulted in the terrible destruction of thousands of bodies along with new methods for burying and preserving the dead. We will also take a look at psycho-social and cultural attitudes towards death from the perspective of American war vets. We conclude this course by taking a close look at living and dying on death row, the death penalty, and the role of the state in putting people to death.

Credit Hour: 1-3

REL_ST 2230: Religion and Popular Culture in the U.S.

Explores intersections of religion and popular culture and methods for analysis.

Credit Hours: 3

REL_ST 2240: Harry Potter, Magic, and Religion

This course explores religious themes in J.K. Rowling's Harry Potter series. Topics include ancient Greek, Roman, Celtic, and Norse mythological themes, the relationship between religion and magic, and reactions to the books among various religious groups.

Credit Hours: 3

REL_ST 2250: Religious Perspectives on Peace and War

This course explores religious justification for war as well as religious perspectives on peacemaking. We engage these issues through the investigation of a variety of religious leaders and traditions, drawing from contemporary and historical examples. Traditions studied can include Jewish, Christians, Buddhist, Hindu, Islamic, and indigenous illustrations.

Credit Hours: 3

REL_ST 2260: Gods, Dwarves, and Dragons: Introduction to Old Norse Mythology

This course is an introduction to the pre-Christian religion and mythology of Northern Europe. Topics covered include Old Norse society, gender roles, and values. Main deities and mythological figures are explored through images and texts. Graded on A-F basis only.

Credit Hours: 2

REL_ST 2270: Religion and Literature

This course explores religious themes such as myth, rituals and rites, sacred power, transcendence, salvation, and pilgrimage in secular literature. Selections in English, include novels and short stories from a variety of cultures and religious traditions.

Credit Hours: 3

REL_ST 2270H: Modern Literature and the Quest for Values - Honors

This course is an interdisciplinary study of the religious and ethical questions, quests, and solutions in the literary works of selected modern writers: Beckett, Eliot, Camus, Kazantzakis, O'Connor, Updike, Wiesel, Percy and Morrison.

Credit Hours: 3

Prerequisites: Honors eligibility required

REL_ST 2280: Biblical Themes in American Literature

This course is a study of the reinterpretation of Hebrew scriptures and New Testament sources in classic American texts. The works of Melville, Faulkner, MacLeish, Baldwin, O'Connor, Updike, Percy, and Morrison create a history of certain American ideas as they transform traditional biblical figures and ideas.

Credit Hours: 3

REL_ST 2280H: Biblical Themes in American Literature - Honors

A study of the sources in the Hebrew Scriptures and the New Testament and their reinterpretation in classic American texts. Such a study, initially textual, results in a history of American ideas. Authors studied include MacLeish, Baldwin, O'Connor, Updike, Percy and Morrison.

Credit Hours: 3

Prerequisites: Honors eligibility required

REL_ST 2310: Religions of China and Japan

Introduction to the religions of East Asia, focusing on both popular beliefs and institutionalized religion. Topics include: Buddhist, Confucian, and Daoist traditions of China; Buddhism and Shinto in Japan; self-cultivation practices; spirit mediumship; ritual; cosmology; religion and society; religion and the state.

Credit Hours: 3

REL_ST 2310H: Religions of China and Japan - Honors

Introduction to the religions of East Asia, focusing on both popular beliefs and institutionalized religion. Topics include: Buddhist, Confucian, and Daoist traditions of China; Buddhism and Shinto in Japan; self-cultivation practices; spirit mediumship; ritual; cosmology; religion and society; religion and the state.

Credit Hours: 3

Prerequisites: Honors eligibility required

REL_ST 2400: Judaism

A comprehensive introduction to Judaism: an overview of Jewish philosophy and theology, rituals and customs. Graded on A-F basis only.

Credit Hours: 3

REL_ST 2410: Essential Stories and Ideas of the Torah

Students will examine major narratives and texts from the Pentateuch section of Hebrew Bible. This class will present such ancient, medieval, and contemporary interpretations that will demonstrate how biblical texts could be construed in more than one way.

Credit Hours: 3

REL_ST 2420: Jewish Ethics

The study and discussion of selected traditional and modern Jewish ethics (e.g., anger, fair speech, gratitude, charity, the animal world) that derive from ancient sources such as the Hebrew Bible, the Talmud, Rabbinic commentaries and contemporary resources.

Credit Hours: 3

REL_ST 2450: The Holocaust and Reflections on Genocide

Examines the nature of genocide as an historical phenomenon using the Holocaust as the primary case study.

Credit Hours: 3

REL_ST 2500: Introduction to the Hebrew Bible and its World

An introduction to the literature of the Hebrew Bible in its Ancient Near Eastern cultural context. Students are exposed to the art, archaeology, literature, and histories of the great civilizations of the ANE and their impact on Israelite history and the formation of the Hebrew Bible. Emphasis is placed on the development and changes in Israelite theology in response to historical circumstances over the centuries that witnessed the Hebrew Bible's composition, compilation, and canonization.

Credit Hours: 3

REL_ST 2500H: Introduction to the Hebrew Bible and its World - Honors

An introduction to the literature of the Hebrew Bible in its Ancient Near Eastern cultural context. Students are exposed to the art, archaeology, literature, and histories of the great civilizations of the ANE and their impact on Israelite history and the formation of the Hebrew Bible. Emphasis is placed on the development and changes in Israelite theology in response to historical circumstances over the centuries that witnessed the Hebrew Bible's composition, compilation, and canonization.

Credit Hours: 3

Prerequisites: Honors eligibility required

REL_ST 2510: Introduction to the New Testament

An introduction to the literature of the New Testament and the methods and principles guiding its interpretation, with particular mention to its structure, thought, and historical setting.

Credit Hours: 3

REL_ST 2510H: Introduction to the New Testament - Honors

An introduction to the literature of the New Testament and the methods and principles guiding its interpretation, with particular mention to its structure, thought, and historical setting.

Credit Hours: 3

Prerequisites: Honors eligibility required

REL_ST 2600: Early Christianity

(same as HIST 2600). History of Christian practices and teachings from Christian origins through the 8th century, including Eastern Orthodoxy, Syrian Christianity, Roman Catholicism. Themes such as interpretation and creation of Scriptures, worship style, central rituals, debates about right teaching (orthodoxy), mysticism and developing lifestyles both in and apart from the world.

Credit Hours: 3

REL_ST 2600H: Early Christianity - Honors

History of Christian practices and teachings from Christian origins through the 8th century, including Eastern Orthodoxy Syrian Christianity, Roman Catholicism. Themes such as interpretation and creation of Scriptures, worship style, central rituals, debates about right teaching (orthodox) mysticism and developing lifestyles both in and apart from the world.

Credit Hours: 3

Prerequisites: Honors eligibility required

REL_ST 2610: Medieval Christianity

(same as HIST 2610). History of Christian practices and teachings from the 5th-15th centuries, including Byzantine and Western Christianity Themes such as the influence of the Islamic world on Christianity, popular and elite formulations of theology and ritual activities.

Credit Hours: 3

REL_ST 2610H: Medieval Christianity - Honors

History of Christian practices and teachings from the 5th-15th centuries, including Byzantine and Western Christianity Themes such as the influence of the Islamic world on Christianity, popular and elite formulations of theology and ritual activities.

Credit Hours: 3

Prerequisites: Honors eligibility required

REL_ST 2620: History of Christianity, 1500-Present

(same as HIST 2620). History of Christian practices and teachings from the 15th - 21st centuries, including global dimensions of Orthodox, Catholic, Protestant and other forms of Christianity. Themes such as right teaching and practice, indigenous-Christian contact, mission and expansion, impact of secular theories, contemporary debates.

Credit Hours: 3

REL_ST 2620H: History of Christianity, 1500-Present - Honors

History of Christian practices and teachings from the 15th - 21st centuries, including global dimensions of Orthodox, Catholic, Protestant and other forms of Christianity. Themes such as right teaching and practice, indigenous-Christian contact, mission and expansion, impact of secular theories, contemporary debates.

Credit Hours: 3

Prerequisites: Honors eligibility required

REL_ST 2630: History of Christian Traditions

(same as HIST 2630). An overview of the origins and development of Christianities from the first century of the Common Era to the present day. Topic will include competing Christian theologies, colonialism, conversion narratives, globalization, religious violence, and heresy. May be repeated for credit.

Credit Hours: 3

REL_ST 2700: Islam

Examines the historical development of Islamic traditions, noting the manner in which various sects & factions understand religion, humanity and God.

Credit Hours: 3

REL_ST 2900: Contemporary Religious Thought

Explores issues within contemporary Christian theology that cut across denominational lines such as: the nature and existence of God; secularization, relativism, and humanism; the authority of the Bible; attitudes toward other religions; the moral integrity of Christianity; and the purpose of human existence.

Credit Hours: 3

REL_ST 2910: Religion and Contemporary Social Issues

Study of the social ethics of Jewish and Christian theologians and movements of the 19th and 20th centuries and an examination of selected social problems in light of these systems.

Credit Hours: 3

REL_ST 2920: Images of Good and Evil

Study of the symbols and myths which explore the nature and power of good and evil. Includes examination of the music, art and literature of both ancient and contemporary religions.

Credit Hours: 3

REL_ST 2930: Religion and Psychological Perspectives

Examines how religion is understood from various psychological perspectives, and how psychological theories reflect religious presuppositions about the nature and purpose of human life.

Credit Hours: 3

REL_ST 2939: Religion and Human Sexuality

Examines attitudes within the Christian tradition toward sexuality, with particular reference to the alternatives of patriarchy and feminism, especially as they consider issues such as the meaning of bodilyness, masturbation, pornography, prostitution, homosexuality and sexual pluralism.

Credit Hours: 3

REL_ST 2950: Directed Readings in Religious Studies

Independent readings selected in consultation with supervisory faculty member. May not be repeated.

Credit Hours: 3

Prerequisites: instructor's consent

REL_ST 3000: History of Religion in America to the Civil War

(same as HIST 3000). Surveys major American religious traditions, patterns, and themes from 1492 to the Civil War, especially the role of religion in American social, cultural, and political developments.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

REL_ST 3000H: History of Religion in America to the Civil War - Honors

Surveys major American religious traditions, patterns, and themes from 1492 to the Civil War, especially the role of religion in American social, cultural, and political developments.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent. Honors eligibility required

REL_ST 3001: Topics in Religious Studies-General

Organized study of selected topics which vary by semester and are announced at time of registration.

Credit Hours: 3

REL_ST 3005: Topics in Religious Studies-Humanities

Organized study of selected topics which vary by semester and are announced at time of registration.

Credit Hours: 3

REL_ST 3042: Sacred Humor: Tricksters, Clowns, and Contraries

This class will explore the notion that humor plays an important role in conveying sacred meaning. To that end, we will need to adopt a fairly common vocabulary regarding the concepts "humor" and "sacred," and will do so while exploring some of the key aspects of the sacred humor discourse, especially the "trickster," "clown," and "contrary" motifs in mythic narrative.

Credit Hours: 3

REL_ST 3100: Religious Literacy for the Public and Professions

This course teaches students to engage and encounter religion in day-to-day life and in the professional workplace. Its primary goal is to examine religious diversity in private and professional contexts from a practical standpoint by examining a variety of case studies.

Credit Hours: 3

REL_ST 3200: Hinduism

(same as S_A_ST 3200). Origin and development of central themes of traditional Hinduism from earliest times to the modern period. Topics include: the Vedic tradition, rituals and practice, varieties of yoga, and meditation, Indian religious thought, and devotional Hinduism.

Credit Hours: 3

REL_ST 3210: History of Religion in Post-Civil War America

(same as HIST 3210). Surveys major American religious traditions, patterns, and themes from 1865 to the present, especially the role of religion in American social, cultural and political developments.

Credit Hours: 3

REL_ST 3210H: History of Religion in Post-Civil War America - Honors

Surveys major American religious traditions, patterns, and themes from 1865 to the present, especially the role of religion in American social, cultural and political developments. Prerequisites: Honors Eligibility Required.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

REL_ST 3220: Tibetan Buddhism

This course explores the Buddhist tradition in Tibet, from its introduction in the 8th century to the present. Topics include the merger of Indian Buddhism with the local Bon religion, the relationship between Tibetan Buddhism and Mahayana Buddhism, the Tibetan Buddhist canon, lamas and tulkus, religion and material culture in Tibet, and the influence of Tibetan Buddhism in Central Asia. Graded on A-F basis only.

Credit Hours: 3

REL_ST 3230: Buddhism and Environmental Ethics

(same as S_A_ST 3230). Global environmental crisis is associated with rapidly expanding human population. Buddhist teachings about the interdependent aspects of existence and interrelatedness of all life may provide critical insights for how humanity can achieve balance and reciprocity with nature.

Credit Hours: 3

REL_ST 3240: Buddhism of South and Southeast Asia

(same as S_A_ST 3240). Examines the origins of Buddhism in India, the narratives of the life of the Buddha, the development of early Buddhist schools, the extension of Buddhism into Central and Southeast Asia, and the current practice of Buddhism in South and Southeast Asia.

Credit Hours: 3

REL_ST 3250: Buddhism in East Asia

This course will trace the transmission of Buddhism from the Indian subcontinent to China, and from there to Korea and Japan. We will examine the historical development of East Asian forms of Buddhism, deal with key issues of Buddhist thought and practice, and look at the role of Buddhism in modern East Asian societies.

Credit Hours: 3

Prerequisites: REL_ST 2110, REL_ST 2300, REL_ST 2310 or REL_ST 3200, or instructor's consent

REL_ST 3260: Hindu Goddesses

This course examines the vast range of Hindu Goddesses and their worship in South Asia. It includes information about goddess origins, mythology, symbolism, and attendant ritual practices. In order to approach this topic, background information about the history of Hinduism, major religious narratives, devotional practices, and iconographic representations of the divine are discussed. The course introduces the approaches of various scholars to Hindu Goddess worship within the context of religion, social relations, and gender roles, and explores ways in which South Asian women experience and negotiate feminine power in contemporary socio-cultural contexts.

Credit Hours: 3

REL_ST 3270: Yoga and Meditation in the Modern World

This course explores the practice of Yoga and meditation, both as an ancient tradition of India and as an example of the globalization of religion. It will examine how the ancient Hindu religious tradition of Yoga was reinvented against the backdrop of India's colonial experience. Then it will look at a variety of emerging and transforming varieties of Hindu inspired yoga and meditation that spread globally in the context of increasing transnational interaction. To better appreciate both the traditional and the modern aspects of yoga and meditation, a secular

meditation practice is included as an instructional and experiential component of this class.

Credit Hours: 4

REL_ST 3280: Chinese Popular Religion

Starting with a consideration of conceptual issues (what is 'popular religion?'), the course will give a survey of the beliefs and practices of Chinese popular religion, including ancestor worship, territorial cults, spirit-mediumism, divination, and popular sects.

Credit Hours: 3

REL_ST 3300: The Prophets

Study of the prophetic writings of the Hebrew Scriptures, with consideration of the origin and nature of Israelite prophecy. Includes the narratives of the period of prophetic activity and study of the classical prophets.

Credit Hours: 3

REL_ST 3310: The Problem of Evil: Theodicy in the Ancient Near East

A comparative study of Ancient Near Eastern reflections on the question of why bad things happen to good people, aka the Problem of Evil. Students read primary texts in translation from Ancient Egypt, Ancient Mesopotamia, and Ancient Israel, including such famous texts as the Dispute between a Man and his Ba, the Babylonian Theodicy, and the book of Job. Students will discover how different beliefs about the origins of the universe, the relationship between humans and the divine, the notion of sin, and the causes of suffering lead to different answers to the age-old question of why the righteous suffer.

Credit Hours: 3

REL_ST 3350: Monsters in Western Religion and Folklore

This course focuses on monsters found in Western cultures and more specifically how monsters are instantiated and put to use in contexts of popular culture. Theoretical and methodological approaches to the material are drawn from both Religious Studies and Folkloristics. Graded on A-F basis only.

Credit Hours: 3

REL_ST 3360: Cults and New Religious Movements

While religious traditions constantly change, and new religions emerge in every historical time period, the new religious movements of the past century (many of which are often referred to negatively as "cults") present a particular challenge to contemporary cultures and societies. We will begin with a theoretical overview of new religious movements (NRMs) and will proceed gradually to discuss in detail the religion of the Peoples Temple and its charismatic leader and founder, Jim Jones. Recommended: An introductory course in any of the following disciplines/area studies: Religious Studies, Psychology, Communication Studies (emphasis on Media and Society/Media Theory); or Sociology.

Credit Hours: 3

Prerequisites: Sophomore standing

REL_ST 3380: Native American Religions

(same as ANTHRO 3380). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts.

Credit Hours: 3

REL_ST 3380H: Native American Religions - Honors

(same as ANTHRO 3380H). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts.

Credit Hours: 3

Prerequisites: Honors eligibility required

REL_ST 3400: The Gospels of Matthew, Mark, and Luke

Examination of the Gospels of Matthew, Mark, and Luke as single works and as literarily related compositions. Interpretation focuses on the literary form of passages and the theological and ethical themes expressed.

Credit Hours: 3

REL_ST 3400H: The Gospels of Matthew, Mark, and Luke - Honors

Examination of the Gospels of Matthew, Mark, and Luke as single works and as literarily related compositions. Interpretation focuses on the literary form of passages and the theological and ethical themes expressed.

Credit Hours: 3

Prerequisites: Honors eligibility required

REL_ST 3410: Cities and Letters of Paul: an Archaeological Investigation

This course combines a close contextual reading of the seven undisputed letters written by the apostle Paul and the three disputed letters of uncertain authorship coupled with an in-depth historical and archaeological investigation of the cities to which they were written. Students will learn about ancient letter writing, how the conventions used differed from modern practice, and how understanding those differences is essential for a more accurate reading of Paul. Likewise, this course will demonstrate that knowing the circumstances in which a letter was written sheds additional light on its contents and therefore investigates the historical and social conditions of Thessalonica, Corinth, Rome, Phillipi, the cities of Galatia, Ephesus, and Colossae in an effort better to understand the purposes for which Paul presumably wrote to the Christian communities in these cities.

Credit Hours: 3

REL_ST 3410H: Cities and Letters of Paul: an Archaeological Investigation - Honors

This course combines a close contextual reading of the seven undisputed letters written by the apostle Paul and the three disputed letters of uncertain authorship coupled with an in-depth historical and archaeological investigation of the cities to which they were written. Students will learn about ancient letter writing, how the conventions used differed from modern practice, and how understanding those differences is essential for a more accurate reading of Paul. Likewise, this course will demonstrate that knowing the circumstances in which a letter was written sheds additional light on its contents and therefore investigates

the historical and social conditions of Thessalonica, Corinth, Rome, Phillipi, the cities of Galatia, Ephesus, and Colossae in an effort better to understand the purposes for which Paul presumably wrote to the Christian communities in these cities.

Credit Hours: 3

Prerequisites: Honors eligibility required

REL_ST 3420: Jesus in Myth, Tradition and History

This course will explore the identity and character of Jesus of Nazareth as depicted in various early Christian canonical and non-canonical sources and, using a variety of scholarly techniques, ascertain what information in those sources can be considered to describe accurately the real, historical Jesus.

Credit Hours: 3

REL_ST 3430H: Revelation and Apocalyptic Literature - Honors

A study of Jewish and Christian apocalyptic literature with an emphasis on the Revelation to St. John.

Credit Hours: 3

Prerequisites: Honors eligibility required

REL_ST 3445: The Body in Western Christianity

This course is a survey of Western Christian Perspectives of the human body ranging from the Early Church Fathers to trends in contemporary American culture.

Credit Hours: 3

REL_ST 3451: Religion in Science Fiction

Investigation of religious themes in science fiction novels, short stories and films. Themes include the nature of the sacred, the limits of human knowledge, understanding and experiencing transcendence, revelation and apocalypse.

Credit Hours: 3

REL_ST 3455: Robots and Religion: Reflection on Self, Soul, and Humanity

This course explores ancient and modern texts about robots, androids, and other artificial and virtual humans in order to analyze cultural and religious notions of what it means to be human. Course readings include ancient Indian, Tibetan, and Chinese robot stories in translation, medieval Jewish legends about golems, as well as contemporary Western science fiction

Credit Hours: 3

REL_ST 3500: Judaism in the Time of Jesus

This course is an introduction to the origin and development of Judaism from the time of the destruction of the first Jerusalem temple (587 BCE) to the Bar Kochba revolt (132-135 CE).

Credit Hours: 3

REL_ST 3530: Rabbinic Judaism: Perspective and Literature

Overview of the Jewish oral tradition during the Rabbinic era. The information covered in this course will focus upon the vast literature

created during the Mishnaic and Talmudic periods and the emerging new styles and directions of Jewish religious thought.

Credit Hours: 3

REL_ST 3540: Jewish-Christian Relations

Explores historical and contemporary relations between Christians and Jews, and the transformations in Christian thought and practice resulting from awareness of Christianity's role in the Holocaust and from post-Holocaust dialogues between Jews and Christians.

Credit Hours: 3

REL_ST 3600: Spirituality

Comparative investigation of selected mystical writings from Western religious traditions; consideration of contemporary psychological, philosophical, and phenomenological interpretations of mystical experience.

Credit Hours: 3

REL_ST 3610: Angry Theologians

This course examines how intense debates and furious prose helped define many of modern Christianity's most widely agreed upon tenets of faith. Through close readings of theological treatises laced with profanity, insults, and outrage, we shall explore how central Christian theological convictions about baptism, the nature of Jesus, gender roles, sin, salvation, and other topics were constructed through argumentation and compromise. Though some theological disputes were settled politely through votes at church councils, even these peaceable compromises often emerged through a spate of insults and red-faced polemic. We shall read and discuss some of the most colorful--and enduringly influential--cases of theology developing through brash confrontation, from the Luther Insult Generator to the fiercely angry articulations of Christian theology in contemporary America. Students will learn to understand the logic and purpose behind these vehement arguments in their historical context and practice evaluating competing claims about complex issues such as the Trinity, the path to salvation, and sin. Graded on A-F basis only.

Credit Hours: 3

REL_ST 3700: Modern Religious Thought

Examination of the theological systems of major Christian thinkers and movements of the 19th and 20th centuries in relation to historic religious traditions and modern cultural challenges. Prerequisites: sophomore standing. and one course in Philosophy, or instructor's consent.

Credit Hours: 3

REL_ST 3710: Reality of God

Will explore the meaning of "the loss of God" (Tillich) and various modern and contemporary attempts to reaffirm the reality of God.

Credit Hours: 3

REL_ST 3740: Religion and Film

Addresses issues of interpretation and analysis in the convergence of religion and film. Addresses three areas under this broad rubric: 1) film representations of established religions; 2) film and the construction of social values; 3) film as contemporary "myth". Treating films as social

texts, we will ask what such representations of ourselves to ourselves suggest about culture in general.

Credit Hours: 3

REL_ST 3750: Women and Religions

(same as WGST 3750). A rediscovery of the wealth of religious activity which women have created and enacted. Investigates women's roles and rituals in large-scale and local religions, including ancient Goddess religions, Hinduism, Buddhism, Judaism, Christianity, Islam, and African, South American, and native American groups.

Credit Hours: 3

Prerequisites: sophomore standing

REL_ST 3760: Geography of the World's Religions

(same as GEOG 3760). Explores the significance of place in the origin, diffusion, distribution and practice of religions, emphasizing imprints of religion on the cultural landscape and connections between culture, politics, economics, and religion.

Credit Hours: 3

Prerequisites: 1000/2000 level Geography course; junior standing or instructor's consent

REL_ST 3800: Religion in America Today

Explores in depth a few selected issues currently shaping or being shaped by religion in the United States. Specific topics will be chosen from events conflicts, developments, or news items within the last five years. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: sophomore standing

REL_ST 3820: Religion and Law in America

This class explores how the U.S. legal system is navigating an increasing diversity of religious traditions. Course examines the place of religious values and the ongoing tension between religion and law in the legal system of the U.S. through a variety of controversial topics.

Credit Hours: 3

REL_ST 3990: Majors Seminar

In this seminar religious studies majors will be encouraged to form a community of inquiry focused on the subject of religion and public life. Graded on S/U basis only.

Credit Hours: 3

Prerequisites: Religious Studies majors in their junior year

REL_ST 4001: Topics in Religious Studies-General

Organized study of selected topics which vary by semester and are announced at time of registration.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

REL_ST 4005: Topics in Religious Studies-General

Organized study of selected topics which vary by semester and are announced at time of registration.

Credit Hours: 3

REL_ST 4100: Advanced Theories and Methods

(cross-leveled with REL_ST 7100). The course investigates the history of the modern academic study of religion, closely exploring influential theories and methods that have shaped scholarly perspective. May include approaches such as structuralism, phenomenology, Durkheimian and Weberian sociology, Marxism, feminism, thick description, psychoanalysis, and others.

Credit Hours: 3

Prerequisites: Restricted to Religious Studies majors and MA students

REL_ST 4110: Religious Myth and Ritual

(cross-leveled with REL_ST 7110). This course will unpack theoretical and methodological issues surrounding the study of embodied religious practice and the nature of religious narrative using myths and rituals from around the world's religious traditions.

Credit Hours: 3

REL_ST 4120: Studies in Ritual

Exploration of particular themes of religious expression in seasonal, calendric and life-cycle rituals and in personal and public ceremonies. Includes comparisons of indigenous communities and modern society.

Credit Hours: 3

REL_ST 4130: Haunting and Healing

This course explores instances, stories, and representations of haunting in the United States. We apply a variety of theoretical and methodological approaches to illuminate the diversity of meanings, functions, and contexts of supernatural beings in American popular and folk cultures.

Credit Hours: 3

REL_ST 4150: Religion, Spirituality, and the Brain

Explores neuropsychology of religion, spirituality, transcendence, and mystical experience. Covers development in neuroscience about how the brain works in a variety of religious and spiritual contexts, including prayer, meditation, and altered states of consciousness.

Credit Hours: 3

Prerequisites: Restricted to juniors and seniors only

REL_ST 4200: Survey of West African and African Diasporic Religions

Explores indigenous African religions and Islam in West Africa, as well as the development of African American Christianity and African diasporic religions in the Americas.

Credit Hours: 3

REL_ST 4210: African-American Religion

(same as BL_STU 4210). Historical and thematic examination of African American religious traditions and practices. Addresses intersections of religious expression with race, identity, culture, and society.

Credit Hours: 3

REL_ST 4280: Archaeology of Religion

(same as ANTHRO 4280). This course examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmological constructs, worldview and ideology in the Americas.

Credit Hours: 3

Prerequisites: ANTHRO 2020 and/or REL_ST 2100

REL_ST 4287: Empire: Intellectual History, Literature, and Society

(same as PEA_ST 4287; cross-leveled with REL_ST 7287). Intellectuals and writers passionately debated the wisdom of colonies, free trade, and war as economies became increasingly global over the centuries. The proponents, critics, and interpreters of Empire will offer us rich examples of themes and theories in the culture of specific nations and eras.

Intellectual life will be studied in the context of developments in social inequality, the culture of classes, media of communication, education, identities, transnational governance, and the nation-state. The course will be offered with different national and historical foci under different instructors, and may be repeated for credit with different instructors. Counts as the capstone experience for Peace Studies and is open to majors of other disciplines.

Credit Hours: 3

Prerequisites: junior standing, senior standing preferred

REL_ST 4300: Religious Narratives of South Asia

(same as S_A_ST 4300). Study of major narratives of India and their interpretation in literature and art. Topics include: Vedic and Epic mythology, stories of Krishna, myths and images of Shiva, and forms of the Goddess.

Credit Hours: 3

REL_ST 4310: The Confucian Tradition: Past and Present

Investigates Confucianism as the dominant religio-philosophical tradition of China and its impact on Korea and Japan. We will study basic Confucian canonical texts, follow its historical development, look at its interactions with other religions, and discuss the continuing relevance of the Confucian tradition in modern East Asia.

Credit Hours: 3

REL_ST 4320: Introduction to Daoism

An introduction to the Daoist religious tradition, beginning with its background in earlier forms of philosophy, ritual, and belief. We will follow the development of the various Daoist schools and movements over the centuries and examine key aspects of their belief and practice, both historical and contemporary.

Credit Hours: 3

REL_ST 4380: Anthropological Theories of Religion

(same as ANTHRO 4380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology, and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today.

Credit Hours: 3

Prerequisites: ANTHRO 2030, ANTHRO 2100 or REL_ST 2100, or instructor's consent

REL_ST 4400: The Catholic Intellectual Tradition

(cross-level with REL_ST 7110). Students will read the great thinkers of the Catholic church such as Augustine, Abelard, Bernard of Clairvaux, Aquinas, Bonaventure, Nicholas of Cusa, Pascal, Newman, Maritain, Rahner, Johnson, Tracy. The theme examined may vary from year to year.

Credit Hours: 3

REL_ST 4410: Major Religious Thinkers

Concentrated study of one or more selected theologians, such as Augustine, Aquinas, Luther, Calvin, Buber, Tillich, and Rahner.

Credit Hours: 3

REL_ST 4418: Religion Reporting and Writing

(same as JOURN 4426). Advanced seminar in religion reporting and writing. Examines the role of religion journalism in faith, public life, and culture.

Credit Hours: 3

Prerequisites: JOURN 4450 professional writing experience and instructor's consent

REL_ST 4500: Greek and Roman Religion

(same as CL_HUM 4500). Survey of religious development among the Greeks and Romans.

Credit Hours: 3

Prerequisites: sophomore standing and CL_HUM 1060, AR_H_A 1110 or HIST 1520

REL_ST 4535: Monastic Worlds

Monastic Worlds is an experiential learning course designed to serve as a Humanities Field School in medieval and early modern studies. It will be taught by faculty from UMKC and UMC through the Intercampus Course Sharing initiative. The class introduces students to humanities research methodology and the religious history and culture of premodern Europe and the contemporary Midwest by using the monastic communities as a focal point to learn about musicology, history, art history, literature, and religion. Following two weeks of online course modules, students will travel to the Benedictine communities of Conception Abbey in Conception, Missouri and Mount Saint Scholastica's in Atchison, Kansas, for additional face-to-face classes and research projects. On-site, students will participate in communal living and attend face-to-face classes on the historical and cultural worlds of medieval and early modern Europe. They will practice ethnography through observation of and participation in communal life of prayer, study, book production, and labor. Students will also have the opportunity to work with the manuscripts and rare books owned by these communities and visit the largest reliquary collection in North America, housed at the nearby Benedictine community of the Sisters of Perpetual Adoration in Clyde, MO. This course has an associated fee. Contact teaching faculty for this year's fee details.

Credit Hours: 3

REL_ST 4550: The Historical Jesus

This course examines theory, method, and conclusions in recent Jesus scholarship. Attention is also paid to the historical and cultural context in which Jesus research becomes prominent.

Credit Hours: 3

REL_ST 4630: Sanskrit I

(same as S_A_ST 4350). This intensive course will cover the essentials of Sanskrit grammar in one semester and prepare students for further readings in Hindu and Buddhist Literature.

Credit Hours: 3

REL_ST 4640: Sanskrit II

(same as S_A_ST 4640). This course is intended as a "sampler" of Sanskrit literature. We will read Sanskrit texts in the original. The objectives of the course are 1) Expanding the students' knowledge of the Sanskrit language, 2) To acquaint the students with a broad range of textual genres in Sanskrit literature, and 3) To acquaint the students with some central ideas of Hindu and Buddhist philosophy.

Credit Hours: 3

REL_ST 4750: Women, Religion and Culture

(same as WGST 4750). An advanced study of the role of women in religion, focusing on the methods of determining the significance of gender in religious life, sacred texts, symbols, rituals and/or beliefs. Traditions studied include Christianity, Islam, contemporary pagan communities, and Native American traditions.

Credit Hours: 3

REL_ST 4960: Directed Readings in Religious Studies

Independent readings selected in consultation with supervisory faculty member. May be repeated up to 6 hrs.

Credit Hour: 1-6

Prerequisites: instructor's consent

REL_ST 4990: Senior Seminar in Religious Studies

A seminar in which Religious Studies majors use methods of understanding and comparing religions by focusing on times and places of significant contact among peoples of different religions.

Credit Hours: 3

REL_ST 7001: Topics in Religious Studies-General

Organized study of selected topics which vary by semester and are announced at time of registration.

Credit Hours: 3

REL_ST 7005: Topics in Religious Studies - General

Organized study of selected topics which vary by semester and are announced at time of registration.

Credit Hours: 3

REL_ST 7100: Advanced Theories and Methods

(cross-leveled with REL_ST 4100). The course investigates the history of the modern academic study of religion, closely exploring influential

theories and methods that have shaped scholarly perspective. May include approaches such as structuralism, phenomenology, Durkheimian and Weberian sociology, Marxism, feminism, thick description, psychoanalysis, and others.

Credit Hours: 3

Prerequisites: Restricted to Religious Studies major or minor or instructor's consent

REL_ST 7110: Religious Myth and Ritual

(cross-leveled with REL_ST 4110). Comparative analysis of religious mythologies and symbolism as well as the ritual systems associated with those mythologies.

Credit Hours: 3

Prerequisites: instructor's consent

REL_ST 7120: Studies in Ritual

Exploration of particular themes of religious expression in seasonal, calendric and life-cycle rituals and in personal and public ceremonies. Includes comparisons of indigenous communities and modern society.

Credit Hours: 3

REL_ST 7150: Religion, Spirituality, and the Brain

Explores neuropsychology of religion, spirituality, transcendence, and mystical experience. Covers development in neuroscience about how the brain works in a variety of religious and spiritual contexts, including prayer, meditation, and altered states of consciousness.

Credit Hours: 3

REL_ST 7280: Archaeology of Religion

(Same as ANTHRO 7280) This course examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmological constructs, worldview and ideology in the Americas.

Credit Hours: 3

Prerequisites: ANTHRO 2020 and/or REL_ST 2100

REL_ST 7287: Empire: Intellectual History, Literature, and Society

(same as PEA_ST 7287; cross-leveled with REL_ST 4287). Intellectuals and writers passionately debated the wisdom of colonies, free trade, and war as economies became increasingly global over the centuries. The proponents, critics, and interpreters of Empire will offer us rich examples of themes and theories in the culture of specific nations and eras.

Intellectual life will be studied in the context of developments in social inequality, the culture of classes, media of communication, education, identities, transnational governance, and the nation-state. The course will be offered with different national and historical foci under different instructors, and may be repeated for credit with different instructors.

Counts as the capstone experience for Peace Studies and is open to majors of other disciplines.

Credit Hours: 3

REL_ST 7380: Anthropological Theory of Religions

(same as ANTHRO 7380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology and

witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today.

Credit Hours: 3

REL_ST 7418: Religion Reporting and Writing

(same as JOURN 7426). Advanced seminar in religion reporting and writing. Examines the role of religion journalism in faith, public life, and culture.

Credit Hours: 3

Prerequisites: JOURN 4450 and instructor's consent

REL_ST 7500: Greek and Roman Religion

Survey of religious development among the Greeks and Romans.

Credit Hours: 3

Prerequisites: sophomore standing and CL_HUM 1060, AR_H_A 1110 or HIST 1520

REL_ST 7510: The Catholic Intellectual Tradition

(cross-leveled with REL_ST 4400). Students will read the great thinkers of the Catholic church such as Augustine, Abelard, Bernard of Clairvaux, Aquinas, Bonaventure, Nicholas of Cusa, Pascal, Newman, Maritain, Rahner, Johnson, Tracy. The theme examined may vary from year to year.

Credit Hours: 3

REL_ST 7520: Major Religious Thinkers

Concentrated study of one or more selected theologians, such as Augustine, Aquinas, Luther, Calvin, Buber, Tillich, and Rahner.

Credit Hours: 3

REL_ST 7630: Sanskrit I

(same as S_A_ST 7630). This intensive course will cover the essentials of Sanskrit grammar in one semester and prepare students for further readings in Hindu and Buddhist literature.

Credit Hours: 3

REL_ST 7640: Sanskrit II

(same as S_A_ST 7640). This course is intended as a "sampler" of Sanskrit literature. We will read Sanskrit texts in the original. The objectives of the course are 1) Expanding the students' knowledge of the Sanskrit language, 2) To acquaint the students with a broad range of textual genres in Sanskrit literature, and 3) To acquaint the students with some central ideas of Hindu and Buddhist philosophy.

Credit Hours: 3

REL_ST 7700: Religious Narratives of South Asia

(same as S_A_ST 4300). Study of major narratives of India and their interpretation in literature and art. Topics include: Vedic and Epic mythology, stories of Krishna, myths and images of Shiva, and forms of the Goddess.

Credit Hours: 3

Prerequisites: REL_ST 2110, REL_ST 3200, or REL_ST 3240, or instructor's consent

REL_ST 7710: The Confucian Tradition: Past and Present

Investigates Confucianism as the dominant religio-philosophical tradition of China and its impact on Korea and Japan. We will study basic Confucian canonical texts, follow its historical development, look at its interactions with other religions, and discuss the continuing relevance of the Confucian tradition in modern East Asia.

Credit Hours: 3

REL_ST 7720: Introduction to Daoism

An introduction to the Daoist religious tradition, beginning with its background in earlier forms of philosophy, ritual, and belief. We will follow the development of the various Daoist schools and movements over the centuries and examine key aspects of their belief and practice, both historical and contemporary.

Credit Hours: 3

REL_ST 7750: Women, Religion and Culture

(same as WGST 7750). An advanced study of the role of women in religion, focusing on the methods of determining the significance of gender in religious life, sacred texts, symbols, rituals and/or beliefs. Traditions studied include Christianity, Islam, contemporary pagan communities, and Native American traditions.

Credit Hours: 3

REL_ST 7800: West African and African Diasporic Religions

Explores traditional African religions and African Islam prior to the slave trade. Also, will examine the Christianity of African American slaves.

Credit Hours: 3

REL_ST 7810: African-American Religion

(same as BL_STU 7810). Examines the organization of major African American Christian denominations, Islam and religious movements. Twentieth century issues will be discussed, including sexism, classism and homophobia in church communities.

Credit Hours: 3

REL_ST 7990: Independent Readings in Religious Studies

Independent readings and research selected in consultation with supervisory faculty.

Credit Hours: 3

REL_ST 8001: Topics in Religious Studies-General

Organized study of selected topics which vary by semester and are announced at time of registration.

Credit Hours: 3

REL_ST 8005: Topics in Religious Studies-Humanities

Organized study of selected topics which vary by semester and are announced at time of registration.

Credit Hours: 3

REL_ST 8010: Proseminar in Method and Theory in the Study of Religion

Proseminar in classic and recent theoretical and methodological perspectives in the academic study of religion. This course is required of all graduate students in Religious Studies.

Credit Hours: 3

REL_ST 8090: Research and Thesis in Religious Studies

Research and writing for master's thesis. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: Instructor's consent

REL_ST 8200: Religious Texts and Interpretation: The Veda

(same as S_A_ST 7200). This course examines the Veda, the foundational scripture of Hinduism. It includes close study of Vedic texts and rituals and the influence, interpretation, and application of the Veda in the later Hinduism.

Credit Hours: 3

REL_ST 8210: Indian Buddhism

This course examines the role of sacred texts in the Theravada and Mayayana Buddhist traditions. The course will emphasize canon formation and ideas about sacred texts in Buddhist traditions.

Credit Hours: 3

REL_ST 8250: Religious Texts and Interpretation: Gospel Literature

The seminar includes comparative study of ancient gospels, and an examination of modern theories about the development of Jesus traditions.

Credit Hours: 3

REL_ST 8400: Religious History: Christian Interpretative Communities

This course compares notions of religious authority in the sixteenth century: the Roman Catholic Church's Scripture and tradition and the Protestant principle of sola scriptura. The focus is the doctrine of the Eucharistic disputes carried on throughout the sixteenth century.

Credit Hours: 3

REL_ST 8430: Religious History: West African Interpretative Communities

In this study of West African religious history, we will examine indigenous African religions, Islam, and Christianity. We will consider the impact of the slave trade, environmental changes, prophetic movements, and changes in the status of women. We will also evaluate theoretical perspectives on the study of Africa, of "traditional religions" and oral traditions.

Credit Hours: 3

REL_ST 8440: Religion, Globalization and Local Cultures

Interdisciplinary, comparative approach to globalization's religious dimensions and productions in a variety of specific sites around the world.

Credit Hours: 3

REL_ST 8500: History of Religion and Everyday Life in America

This graduate seminar will familiarize you with several theoretical and methodological issues involved in the study of religion in everyday life, its historical recovery and interpretation, and its presentation. We will focus on examples of scholarship on U. S. history.

Credit Hours: 3

REL_ST 8600: Comparative Studies in Spirit Possession

This course will investigate four distinct Afro-Latin religious traditions of the Americas, including traditions from Haiti, Cuba, Brazil and Honduras, as well as comparative examples from South Asia, Europe and North Africa. We will read and discuss such issues as 1) spirit possession and narratively; 2) spirit possession as "history"; 3) possession as dramatic performance; 4) the relationship between sacrifice and possession trance. Through careful exploration of their histories and contemporary practice, the class will attempt general comparisons between the religion as well as the critical review of comparative methods employed.

Credit Hours: 3

REL_ST 8700: Seminar in Folklore

(same as ANTHRO 8157 and ENGLSH 8700). Focus on the roots of folklore scholarship and methodology and their evolution in modern approaches to the study of oral, traditional verbal genres and their performance in natural folk groups.

Credit Hours: 3

REL_ST 8710: Comparative Religion: Popular Religion

Popular religion is the lived religion of the common people which takes shape in contact with and distinction from the religion(s) of the elite(s) of a society. This course introduces concepts and theories of popular religion, and investigates its role in various traditions, including Hinduism, Buddhism, Christianity, and Chinese religions.

Credit Hours: 3

Respiratory Therapy Courses

RS_THR 1000: Introduction to Respiratory Therapy

Introductory course to assist students acquiring information about the respiratory therapy profession. Students observe therapists in hospitals and participate in lectures on credentialing, program requirements, placement and future trends in the profession. Graded on S/U basis only.

Credit Hour: 1

RS_THR 3000: Fundamentals of Respiratory Care

Orientation to the profession. Focus on professional attributes of communication, teamwork, licensure and safety.

Credit Hour: 1

Prerequisites: acceptance into respiratory therapy major

RS_THR 3220: Equipment and Techniques

History, organization of respiratory therapy. Theory, application of gas laws. Equipment for invasive and non-invasive pulmonary assessment, therapeutic aerosol and humidity, gas delivery, airway management. Techniques for infection control, lung expansion, bronchial hygiene. Graded on A-F basis only.

Credit Hours: 5

RS_THR 3290: Cardiopulmonary Pharmacology

To provide the student with specific knowledge of the pharmacologic strategies in treating cardiopulmonary disorders. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: restricted to students in the respiratory therapy program

RS_THR 3420: Principles of Mechanical Ventilation

Continuation of RS_THR 3220. Emphasis on the principles of mechanical ventilation, including physiologic and clinical application.

Credit Hours: 3

Prerequisites: RS_THR 3220, RS_THR 3941 and RS_THR 4040

RS_THR 3440: Mechanical Ventilation Lab

Application of mechanical ventilation emphasizing acute care: pressure, volume, and oscillatory ventilation of adults, Pediatrics, and infants. Related graphical, laboratory, and hemodynamic analysis; therapeutic intervention. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: RS_THR 3220, RS_THR 3941, RS_THR 4040

RS_THR 3941: Clinical Practice I

To be taken concurrently with RS_THR 3220 for which it serves as an extension of the laboratory time and an opportunity for structured clinical experience exposures.

Credit Hours: 2

RS_THR 3942: Clinical Practice II

To be taken concurrently with RS_THR 3420, for which it serves as an extension of the laboratory time, and an opportunity for structured clinical experience exposures.

Credit Hours: 4

RS_THR 3943: Clinical Practice III

Continuation of supervised clinical experience from RS_THR 3942. Graded on A-F basis only.

Credit Hours: 2

RS_THR 4020: Perinatal/Neonatal Respiratory Care

Evaluation and management of perinatal/neonatal pulmonary, medical and surgical conditions which require respiratory care. Emphasis on resuscitation, pathophysiology, evaluation, blood gas and x-ray interpretation, treatment and mechanical ventilation.

Credit Hours: 3

Prerequisites: RS_THR 4040; Respiratory Therapy students only

RS_THR 4040: Respiratory Pathophysiology

Clinical pulmonary disease, organized around the gross structural components of the lung, airways, alveoli and pulmonary vasculature. Impact of disease on normal structure function; clinical, roentgenographic, and physiologic manifestations are described.

Credit Hours: 5

RS_THR 4085: Problems in Respiratory Therapy

Independent work on special problems related to cardiopulmonary health. Course not offered for graduate credit. Some sections of the course may be graded on either A-F or S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

RS_THR 4220: Community and Patient Education I

Design and implement materials for educational presentations for a given patient population. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: RS_THR 3943 or instructor's consent

RS_THR 4240: Pulmonary Rehabilitation

Focus is on an interdisciplinary approach to pulmonary rehabilitation and home care of the adult cardiopulmonary patient. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent required

RS_THR 4420: Pediatric Respiratory Care

Evaluation and management of pulmonary, medical and surgical pediatric conditions requiring respiratory care. Emphasis on pediatric resuscitation, pathophysiology, treatment and prevention of respiratory conditions, mechanical ventilation, lab interpretation.

Credit Hours: 3

RS_THR 4440: Organization and Administration

(same as RA_SCI 4440 and CPD 4440). Examines design and operation of allied health service departments and educational programs, including facilities, personnel procedures, record systems, ethics, medical-legal aspects, interdepartmental relations and curriculum development.

Credit Hours: 3

RS_THR 4460: Evidence-Based Medicine in Respiratory Care

This course is intended to facilitate the development of the student's ability to obtain and integrate patient assessment information and key findings and to formulate clinical decisions in respiratory therapy practice as well as use an evidence-based medicine approach to define respiratory clinical practice.

Credit Hours: 3

RS_THR 4620: Pulmonary Function Technologies

This course will provide the student with a specific knowledge of the testing procedures and equipment for pulmonary function technology. The student will learn to interpret pulmonary function tests and perform quality assurance within the pulmonary function laboratory.

Credit Hours: 2

Prerequisites: restricted to Respiratory Therapy students only

RS_THR 4640: Teaching Practicum

Structured and supervised experience identifying student characteristics, methods for teaching, improving assessment, current development and instructional design.

Credit Hours: 3

RS_THR 4660: Advanced Mechanical Ventilation Theory

Exploration of advanced disease management via specific disease processes as well as concepts and modes of mechanical ventilation. Emphasis will be placed on mode selection for various disease and how new modes of mechanical ventilation impact disease management.

Credit Hours: 3

RS_THR 4720: Advanced Pulmonary Function Technology

This course will focus on the respiratory therapist's role in diagnostic testing. Topics include pulmonary function tests, exercise tests, and metabolic studies. In addition the course briefly addresses polysomnography, pulmonary rehabilitation, and home care. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Restricted to Respiratory Therapy students only

RS_THR 4820: Adult Critical Care

This course will focus on the respiratory therapist's role in the adult critical care environment. Topics include airway management, mechanical ventilation, general adult critical care and functioning as a vital member of the critical care team.

Credit Hours: 3

Prerequisites: restricted to Respiratory Therapy students only

RS_THR 4930: Current Issues in Respiratory Care

(cross-leveled with RS_THR 7930). Identification and analysis of current issues in Respiratory Care with practice implications. Emphasis given to identification and evaluation of nontraditional information sources (e.g., social networking, internet). Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CDS 4955 or Instructor consent

RS_THR 4940: Clinical Practice IV

Structured and supervised clinical experience and case conferences regarding bioterrorism response and emergency/disaster planning.

Credit Hours: 5

RS_THR 4956: Research in Respiratory Therapy

Selected research projects guided by a senior staff member.

Credit Hour: 2-6

Prerequisites: CPD 4955

RS_THR 4973: Clinical Practice V

An extension of the supervised practicum begun in RS_THR 4940. Emphasis in adult critical care and special procedures including bronchoscopies, cardiac catheterization and chest tube placement.

Credit Hours: 4

RS_THR 4983: Clinical Practice VI

An extension of the supervised practicum begun in RS_THR 4940. Emphasis in perinatal and pediatric critical care including pediatric pulmonary function testing and airway management.

Credit Hours: 4

RS_THR 4990: Respiratory Therapy Capstone

Integration of literature, knowledge of previous coursework and clinical experience.

Credit Hours: 2

Prerequisites: Respiratory Therapy Majors Only

RS_THR 4993: Clinical Practice VII

An extension of the supervised practicum begun in RS_THR 4940. Emphasis in rehabilitation and home care, inservice education, and management. Students will participate in on-going research projects and community service activities.

Credit Hours: 5

RS_THR 7040: Respiratory Pathophysiology

Clinical pulmonary disease, organized around the gross structural components of the lung, airways, alveoli and pulmonary vasculature. Impact of disease on normal structure/function; clinical, roentgenographic, and physiologic manifestations are described.

Credit Hours: 5

RS_THR 7930: Current Issues in Respiratory Care

(cross-leveled with RS_THR 4930). Identification and analysis of current issues in Respiratory Care with practice implications. Emphasis given to identification and evaluation of nontraditional information sources (e.g., social networking, internet).

Credit Hours: 3

Prerequisites: CDS 4955

Romance Languages Courses

RM_LAN 2001: Undergraduate Topics in Romance Languages-General

Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hour: 1-3

RM_LAN 2200: Introduction to Catalan Language and Culture

This is an introductory course to Catalan language and culture. Previous knowledge of another Romance language might be beneficial. Students will learn basic Catalan expressions, vocabulary and grammatical structures. Furthermore, students will begin to familiarize themselves with elements of Catalan culture.

Credit Hours: 3

Recommended: Some knowledge of a Romance language desirable

RM_LAN 2310: Literature of the African Diaspora

(same as BL_STU 2310). A postcolonial analysis of selected literary texts interpreting the African diaspora in the Americas. Exemplary texts

from the Caribbean (English, French, Spanish), South America and the United States are discussed in comparative perspective. No knowledge of Spanish required.

Credit Hours: 3

Prerequisites: ENGLISH 1000

RM_LAN 2820: Trends in World Cinema

(same as FILM_S 2820 and GERMAN 2820). This course is a historical overview of the major trends in international cinema. It focuses on the intersection of aesthetics, industry, and ideological and social concerns in cinematic production.

Credit Hours: 3

Prerequisites: sophomore standing, ENGLISH 1800 or FILM_S 1800 or instructor's consent

RM_LAN 3200: Catalan Culture and Identity

Students in this course are not expected to have previous exposure to Catalan instruction. If they do, it will enhance their learning experience. Knowledge of another Romance language might be beneficial as well. This is a course focused on Catalan culture and identity. Students will learn about the history of the language, the language policies in Spain and Europe, Catalan literature, cinema, music, and food. Students will read different materials in English for the most part. Course is taught in English.

Credit Hours: 3

Prerequisites: sophomore standing required

RM_LAN 3820: Major Directors

(same as ENGLISH 3820 and FILM_S 3820). Topics (e.g. Hitchcock, Kubrick, Fellini, Allen, Kurosawa, Wilder) announced at time of registration. Only 6 hours may be taken for credit toward major. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800

RM_LAN 4310: Literature of the African Diaspora

A study, in English translation, of writings by authors of African descent in the Americas.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

RM_LAN 4730: Linguistic Theory and Language Acquisition

(same as LINGST 4730). The goal of this class is to study the implications of current linguistic theory for contemporary research on second language acquisition. In particular, the hypothesis that second language acquisition follows some of the same principles as first language acquisition is explored. Course is taught in English.

Credit Hours: 3

Prerequisites: SPAN 4721 or SPAN 7721, FRENCH 4720 or FRENCH 7720, ENGLISH 4600 or ENGLISH 7600 or LINGST 4860 or LINGST 7860

RM_LAN 4940: Service Learning in Romance Languages

(same as SPAN 4940 and FRENCH 4940). Course offers our majors and advanced minors the opportunity to use their language skills in real-life community settings. Does not meet Art and Science general education

requirements. May be repeated once for credit. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: junior or senior standings and departmental consent

RM_LAN 7310: Literature of the African Diaspora

A study, in English translation, of writings by authors of African descent in the Americas.

Credit Hours: 3

RM_LAN 7730: Linguistic Theory and Language Acquisition

(same as LINGST 7730). The goal of this class is to study the implications of current linguistic theory for contemporary research on second language acquisition. In particular, the hypothesis that second language acquisition follows some of the same principles as first language acquisition is explored. Course is taught in English.

Credit Hours: 3

Prerequisites: SPAN 4721 or SPAN 7721, FRENCH 4720 or FRENCH 7720, ENGLISH 4600 or ENGLISH 7600 or LINGST 4860 or LINGST 7860

RM_LAN 8085: Problems in Romance Languages

Credit Hour: 1-99

Prerequisites: instructor's consent

RM_LAN 8087: Seminar in Literature and Languages of the African Diaspora

One of two courses devoted to the theory and practice of African diaspora literary criticism. Beginning with the United States, we address the issues of developing appropriate theoretical models for black literatures in the Americas.

Credit Hours: 3

Rural Sociology Courses

RU_SOC 1000: Rural Sociology

Introduction to basic concepts and principles of sociology with a focus on rural populations and places. The course explores interconnections between rural/urban and local global economies and cultures. Students are exposed to the rich diversity of rural society, social changes underway, and to current social issues. (Students may not earn credit for both RU_SOC 1000 and SOCIOL 1000).

Credit Hours: 3

RU_SOC 1103: Topics in Rural Sociology - Behavioral Science

Organized study of selected topics. Subjects and earnable credit vary from semester to semester. May be repeated.

Credit Hour: 1-3

Recommended: RU_SOC 1000 or SOCIOL 1000

RU_SOC 1104: Topics in Rural Sociology - Social Science

Organized study of selected topics. Subjects and earnable credit vary from semester to semester. May be repeated.

Credit Hour: 1-3

Recommended: RU_SOC 1000 or SOCIOL 1000

RU_SOC 1120: Population and the Environment

(same as SOCIOL 1120 and PEA_ST 1120). Changes in the structure and characteristics of population groups and their relationship to both human and non-human aspects of the biophysical environment.

Credit Hours: 3

RU_SOC 1150: The Amish Community

(same as PEA_ST 1150). Examines historical antecedents and contemporary culture and social structure of the Amish. Topics include cultural symbols, life ceremonies, the family, counter-cultural pressures, stresses, social change.

Credit Hours: 3

Recommended: RU_SOC 1000 SOCIOL 1000 or ANTHRO 1000

RU_SOC 1175: The Health of People in Local Communities

Health is a universal concern of all people. However, the place of residence has a major impact on many things closely related to health including the local cultural such as diets, exercise, occupations, local health services, etc. This is an introduction to these topics.

Credit Hours: 3

Recommended: RU_SOC 1000 or SOCIOL 1000

RU_SOC 2010: Leadership in Today's World

Examination of dynamics of group leadership, especially in local voluntary organizations; study of how leader's behavior is related to success or failure of organization's program.

Credit Hours: 3

Recommended: RU_SOC 1000 or SOCIOL 1000

RU_SOC 2203: Topics in Rural Sociology - Behavioral Science

Organized study of selected topics. Subjects and earnable credit vary from semester to semester. May be repeated.

Credit Hour: 1-3

Recommended: RU_SOC 1000 or SOCIOL 1000

RU_SOC 2204: Topics in Rural Sociology - Social Science

Organized study of selected topics. Subjects and earnable credit vary from semester to semester. May be repeated.

Credit Hour: 1-3

Recommended: RU_SOC 1000 or SOCIOL 1000

RU_SOC 2225: Science, Technology and Society

Overview of the social influences that shape science including how scientific knowledge is contested and legitimated; how social forces (among them mass communication) influence the choice of innovations; and the role social systems and sectors play in the use and benefit of science. Communication intensive-discussion, presentation and essay based.

Credit Hours: 3

Recommended: RU_SOC 1000 or SOCIOL 1000

RU_SOC 2950: Social Research I

(same as SOCIOL 2950). Introduction to principles of methodology; theory and research; survey of basic research designs and perspectives; preparation for understanding and conducting social research. Required for Sociology majors.

Credit Hours: 3

RU_SOC 3085: Problems in Rural Sociology

Credit Hour: 1-99

Prerequisites: instructor's consent

RU_SOC 3100: Recent Theories in Sociology

(same as SOCIOL 3100). Introduction to major theoretical positions and issues in contemporary American sociology. Logical and intellectual structure of major theoretical schools: functionalism, conflict, exchange, symbolic interaction, phenomenological-ethnomethodological theories.

Credit Hours: 3

Recommended: SOCIOL 2200

RU_SOC 3235: Global Perspectives and Realities

Designed for students who have or wish to study, live or work outside of their home country. Presents sociological perspectives on globalization and intercultural communication as well as the steps needed to prepare for a valuable and safe experience abroad.

Credit Hours: 3

RU_SOC 3303: Topics in Rural Sociology - Behavioral Science

Organized study of selected topics. Subjects and earnable credit vary from semester to semester. May be repeated.

Credit Hour: 2-3

Recommended: 6 hours of Rural Sociology or SOCIOL 1000, or junior standing

RU_SOC 3304: Topics in Rural Sociology - Social Science

Organized study of selected topics. Subjects and earnable credit vary from semester to semester. May be repeated.

Credit Hour: 2-3

Recommended: 6 hours Rural Sociology or Sociology, or junior standing

RU_SOC 3325: Sociology of Food and Nutrition

This class explores individual food choices and larger social forces. Topics include: world hunger, food and the environment; food choices and culture, class and personal identity; the effects of social stigmas, advertising trends, and government regulations on body image; new social movements for sustainable food systems.

Credit Hours: 3

Recommended: ENGLSH 1000 and junior or senior standing or instructor's permission

RU_SOC 3940: Practicum in Rural Sociology

Independent research or professional experience under faculty supervision. Projects must be arranged by student and faculty member prior to registration.

Credit Hours: 3

Prerequisites: junior standing, departmental consent

RU_SOC 4120: Social Statistics

(same as SOCIOL 4120; cross-leveled with RU_SOC 7120). Descriptive statistics and bivariate quantitative analysis techniques commonly used by social scientists. Includes coverage of parametric and non-parametric methods. Introduction to computer analysis.

Credit Hours: 3

Recommended: SOCIOL 2950

RU_SOC 4301: Topics in Rural Sociology

Current and new topics not currently offered in applied and/or theoretical areas in Rural Sociology. Graded on A-F basis only.

Credit Hours: 3

Recommended: RU_SOC 1000 or SOCIOL 1000 or equivalent

RU_SOC 4310: Society, Agriculture and Natural Resources

(cross-leveled with RU_SOC 7310). Explore the human dimensions of agriculture and natural resources through an overview of key areas in natural resource social science. Diverse conceptual approaches and empirical research topics related to society-natural resource interactions are included.

Credit Hours: 3

Recommended: junior standing or instructor's consent

RU_SOC 4325: American Community Studies

An introduction to the study of American communities. The course starts with community theories and then focuses on a wide variety of historic and contemporary community studies such as Plainville, Middletown, Sidewalk and others. Seminar format.

Credit Hours: 3

RU_SOC 4335: Social Change and Development

(same as SOCIOL 4335; cross-leveled with SOCIOL 7335, RUR_SOC 7335). Nature of social change and development. Emphasizes sociological theories of social change and development contrasting them with approaches from the disciplines.

Credit Hours: 3

Recommended: RU_SOC 1000 or SOCIOL 1000 and junior standing

RU_SOC 4341: Building Communities from the Grassroots

(same as PEA_ST 4341; cross-leveled with RU_SOC 7341). Introduction and application of basic community development concepts, methods and practical skills for involving and empowering local citizens and leaders effectively in community-based efforts regardless of the issue.

Credit Hours: 3

Recommended: instructor's consent

RU_SOC 4342: Empowering Communities for the Future

(cross-leveled with RU_SOC 7342). Focuses on the professional practice and applications of community-based development including participatory action research, community economic development, organizational development, use of technology, citizen education and integration of practice. Graded on A-F basis only.

Credit Hours: 3

Recommended: instructor's consent

RU_SOC 4343: Creating Capacity for Dynamic Communities

(cross-leveled with RU_SOC 7374). Addresses community and citizen power; large group intervention processes for change; facilitating small group process; community organizing; community sustainability, dealing with poverty and disenfranchisement; community conflict resolution; ethics; and integration into practice. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

RU_SOC 4370: Environmental Sociology

(same as SOCIOL 4370; cross-leveled with SOCIOL 7370, RU_SOC 7370). An interdisciplinary examination of domestic and international environmental issues focusing on social, cultural, and policy dimensions. Perspectives of the social sciences and humanities are included.

Credit Hours: 3

Recommended: junior standing

RU_SOC 7120: Social Statistics

(same as SOCIOL 7120; cross-leveled with RU_SOC 4120). Descriptive statistics and bivariate quantitative analysis techniques commonly used by social scientists. Includes coverage of parametric and non-parametric methods. Introduction to computer analysis.

Credit Hours: 3

Prerequisites: SOCIOL 2950

RU_SOC 7301: Topics in Rural Sociology

Current and new topics not currently offered in applied and/or theoretical areas in Rural Sociology. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: RU_SOC 1000 or SOCIOL 1000 or equivalent, RU_SOC 4301

RU_SOC 7310: Society, Agriculture and Natural Resources

(cross-leveled with RU_SOC 4310). Explore the human dimensions of agriculture and natural resources through an overview of key areas in natural resource social science. Diverse conceptual approaches and empirical research topics related to society-natural resource interactions are included.

Credit Hours: 3

RU_SOC 7325: American Community Studies

(cross-leveled with RU_SOC 4325). An introduction to the study of American communities. The course starts with community theories and then focuses on a wide variety of historic and contemporary community studies such as Plainville, Middletown, Sidewalk and others. Seminar format.

Credit Hours: 3

RU_SOC 7335: Social Change and Development

(same as SOCIOL 7335; cross-leveled with SOCIOL 4335, RU_SOC 4335). Nature of social change and development. Emphasizes

sociological theories of social change and development contrasting them with approaches from other disciplines.

Credit Hours: 3

Prerequisites: RU_SOC 1000 or SOCIOL 1000

RU_SOC 7341: Building Communities from the Grassroots

(cross-leveled with RU_SOC 4341). Introduction and application of basic community development concepts, methods and practical skills for involving and empowering local citizens and leaders effectively in community-based efforts regardless of the issue.

Credit Hours: 3

Prerequisites: instructor's consent

RU_SOC 7342: Empowering Communities for the Future

(cross-leveled with RU_SOC 7342). Focuses on the professional practice and applications of community-based development including participatory action research, community economic development, organizational development, use of technology, citizen education and integration of practice. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

RU_SOC 7343: Creating Capacity for Dynamic Communities

(cross-leveled with RU_SOC 4343). Addresses community and citizen power; large group intervention processes for change; facilitating small group process; community organizing; community sustainability, dealing with poverty and disenfranchisement; community conflict resolution; ethics; and integration into practice. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

RU_SOC 7370: Environmental Sociology

(same as SOCIOL 7370; cross-leveled with SOCIOL 4370, RU_SOC 4370). An interdisciplinary examination of domestic and international environmental issues focusing on social, cultural, and policy dimensions. Perspectives of the social sciences and humanities are included.

Credit Hours: 3

RU_SOC 7445: Seminar on Issues in the Sociology of Agriculture and Natural Resources

Issues in current research in the sociology of agriculture of developing and industrial nations. Links sociological theory with research in agriculture, examining contributions of applied research to sociological knowledge.

Credit Hours: 3

RU_SOC 7446: Community Social Structure

(same as SOCIOL 7446). A comparative study of communities in different nations and in urban and rural areas. A primary focus of the course will be on social change in communities in response to changing economic, political, social, cultural, and ecological factors.

Credit Hours: 3

RU_SOC 8085: Problems in Rural Sociology

Research for student capable of semi-independent work.

Credit Hour: 1-99

Prerequisites: instructor's consent

RU_SOC 8090: Research in Rural Sociology

Research leading to thesis or dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

RU_SOC 8130: Advanced Social Statistics

(same as SOCIOL 8130). Introduction to multivariate analysis for social scientists. Emphasis on non-experimental applications of analysis of variance and correlation-regression. Computer applications emphasized.

Credit Hours: 3

Prerequisites: RU_SOC 4120 or equivalent

RU_SOC 8287: Seminar on Sustainable Development

(same as SOCIOL 8287). An interdisciplinary examination of sustainable development focusing on social, economic, cultural and environmental dimensions of development. International and domestic issues and approaches to sustainable development are included.

Credit Hours: 3

RU_SOC 8430: Program Development and Evaluation

(same as AG_ED_LD 8430). Program development principles, teaching plans and evaluation principles applied to extension program development.

Credit Hours: 3

Prerequisites: instructor's consent

RU_SOC 8435: Political Ecology

Political ecology is an analytical approach to environment and natural resource issues at local, regional and global scales, emphasizing political, economic, cultural, social and historical factors and their relationship to ecological trends and processes. Seminar format. Graded on A-F basis only.

Credit Hours: 3

RU_SOC 8444: Agriculture, Food and Community

Introduces key debates in the sociology of food and agriculture. Includes research on the structure and history of the agriculture system and its impacts on farmers, communities and the natural environment.

Credit Hours: 3

RU_SOC 8447: Seminar on Contemporary Issues in Rural Sociology

Seminar on Contemporary Issues in Rural Sociology

Credit Hour: 1-99

RU_SOC 8448: Society and Ecosystems Research Seminar

(same as AG_EC 8448 and NAT_R 8448). This seminar, capstone for the Graduate Certificate Program in Society and Ecosystems, exposes students to interdisciplinary research on interactions between social, economic and ecological systems.

Credit Hours: 3

RU_SOC 8450: Research in Rural Sociology

Research not expected to terminate in thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent

RU_SOC 8510: Research Methods and Design

(same as AG_ED_LD 8510). A foundations course on quantitative research methodology and design principles for investigating problems in social and behavioral sciences. A focus is on the language of research, purposes, validity threats, and data collection methods. Graded on A-F basis only.

Credit Hours: 3

RU_SOC 8540: Methods of Qualitative Research

(same as AG_ED_LD 8540). Overview of philosophies, approaches toward, design, data collection, analysis and reporting of qualitative research.

Credit Hours: 3

RU_SOC 8610: Economic and Sociological Approaches to Collective Action

(same as AG_EC 8610). This course identifies analytical and methodological tools, including rational choice and social capital, to deal with practical problems of collective action in: agricultural cooperatives, rural community development, political interest groups and other mutuals.

Credit Hours: 3

Prerequisites: AG_EC 8610

RU_SOC 9090: Research in Rural Sociology

Research leading to thesis or dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

RU_SOC 9287: Seminar in Qualitative Methods in Sociology

(same as SOCIOL 9287). Examination of various qualitative methods of research, including problem-formulation, access and interpretation of data, theory-generation, and preparation of research reports.

Credit Hours: 3

Prerequisites: RU_SOC 8510 or instructor's consent

RU_SOC 9437: Synthesis of Theory and Method in Sociology

The purpose of the course is to provide the student with a critical understanding of the basic theoretical paradigms employed in the development of research projects in sociology. The course is designed for graduate students.

Credit Hours: 3

Prerequisites: RU_SOC 4130 and RU_SOC 8510, or instructor's consent

RU_SOC 9480: Community Survey Research

(same as SOCIOL 9987). This course applies social science survey research methods to the unique kinds of problems that arise in the study of whole communities.

Credit Hours: 3

Prerequisites: RU_SOC 8510 or equivalent

RU_SOC 9510: Data Collection, Analysis and Interpretation

(same as AG_ED_LD 9510). A quantitative methods course in measurement, data collection and analysis related to social and behavioral science research. An applied approach is taken on instrumentation and analyzing data using descriptive and inferential statistics. Practical skills in data manipulation using SPSS are developed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AG_ED_LD 8510 or RU_SOC 8510 or instructor's consent

RU_SOC 9837: Seminar in Multivariate Analysis Techniques

(same as SOCIOL 9837). Examination of various qualitative techniques of data analysis.

Credit Hours: 3

Prerequisites: RU_SOC 8510 or instructor's consent

Russian Courses

RUSS 1100: Elementary Russian I

Five hours of classroom instruction, with one hour lab work weekly. For beginners with no prior knowledge of Russian.

Credit Hours: 6

RUSS 1200: Elementary Russian II

Five hours of classroom instruction, with one hour lab work weekly.

Credit Hours: 6

Prerequisites: C- or better in RUSS 1100 or equivalent. or instructor consent

RUSS 2001: Undergraduate Topics in Russian-General

Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hour: 1-3

RUSS 2005: Undergraduate Topics in Russian-Humanities

Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated for credit with departmental consent. No language credit.

Credit Hour: 1-3

RUSS 2100: Classics and Iconoclasts: An Introduction to Russian Literature

Designed to introduce students to some of the major genres, issues, and approaches in the study of Russian literature. Begins with the most classic of Russian authors, the so-called "father of Russian literature" Aleksandr Pushkin, then moves on to two "classics" from the 19th century (Gogol, Chekhov) and two "iconoclasts" from the first part of the 20th (Mayakovsky, Kharms). Covers a range of genres, including poetry, short story, and drama, as well as letters, essays and manifestoes. Course reading list includes secondary essays that both shed light on

specific texts/authors as well as provide models for critical and theoretical approaches to literature, with an emphasis on Russian Formalism. Readings and discussions in English; no knowledge of Russian language or literature required.

Credit Hours: 3

RUSS 2120: Russia: Enigma Wrapped in Mystery

Broad introduction to the study of Russia as a discipline; designed to acquaint the student with a wide range of topics connected to the study of Russia.

Credit Hours: 3

RUSS 2130: Second-Year Russian I

Students will solidify their command of Russian grammar and begin developing their reading skills.

Credit Hours: 4

Prerequisites: RUSS 1200, equivalent, or instructor's consent

RUSS 2160: Second-Year Russian II

Continuation of RUSS 2130.

Credit Hours: 4

Prerequisites: RUSS 2130 or equivalent, or instructor's consent

RUSS 2310: Between Heaven and Earth: Russian Civilization

Survey of Russian culture from the Christianization of the Slavic peoples to late imperial period. No foreign language credit.

Credit Hours: 3

RUSS 2320: The Arts of Survival: Civilization in Soviet Times

Historical, social, and artistic topics. No foreign language credit.

Credit Hours: 3

RUSS 2330: Russia and America as Comparative Civilizations

Analyzes similar developments in the arts, architecture, literature, and film of Russia and America.

Credit Hours: 3

RUSS 2570: The Supreme Measure: Capital Punishment in Russian History and Literature

Highlights historical, ethical, and religious aspects of capital punishment across the span of Russian history. Provides an opportunity to explore a difficult topic using material unknown to most students; a serious course in literary history. Develops critical thinking skills.

Credit Hours: 3

RUSS 2865: The Art of Soviet and Russian Cinema

(same as FILM_S 2865) Topics (e.g. Distorted Picture: Post-War Cinema in the Soviet State, Cinema in the Soviet Times and Beyond, etc.) announced at time of registration. Only 6 hours may be taken towards major.

Credit Hours: 3

RUSS 3001: Topics in Russian-General

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hour: 1-3

Prerequisites: sophomore standing

RUSS 3005: Topics in Russian-Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent. Prerequisites: sophomore standing

Credit Hour: 1-3

RUSS 3130: Intermediate Russian

Normally taken as 5th semester of Russian language sequence.

Credit Hours: 3

Prerequisites: Grade of C- or higher in RUSS 2160 or RUSS 3160 or instructor's consent

RUSS 3160: Intermediate Conversation and Composition

Further develops oral command of Russian as well as listening comprehension and some letter writing skills.

Credit Hours: 3

Prerequisites: Grade of C- or higher in RUSS 2160 or RUSS 3130 or instructor's consent

RUSS 3310: Heroes of Their Times: Individualism in Russian Literature

Examines selected works by the major Russian writers of the first half of the nineteenth century. Reading and lectures in English.

Credit Hours: 3

RUSS 3320: Matters of Life and Death: The Fiction of Tolstoy and Dostoevsky

Analyzes the major works of Tolstoy and Dostoevsky. Readings and lectures in English.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

RUSS 3330: Decline, Fall, and Resurrection in Modern Russian Literature

Analysis of the major trends in Russian literature and related cultural developments from 1890 to 1930. Readings and lectures in English.

Credit Hours: 3

RUSS 3350: The Split Tree of Russian Literature: Contemporary Russian Prose

Analyzes the divided tradition of Russian literature since 1930 in the works of such authors as Nabokov, Pasternak, Bulgakov, and Solzhenitsyn. Readings and lectures in English.

Credit Hours: 3

RUSS 3380: Sinners, Saints, and Madmen: 19th Century Russian Literature

Introduction to foundational periods (Sentimentalism, Romanticism, Realism and its decline), narratives, and authors of 19th century Russian literary tradition. Traces development of the "Russian" short story and novel forms, as well as the all-important "Petersburg" theme.

Credit Hours: 3

Prerequisites: ENGLISH 1000; sophomore standing or instructor's consent

RUSS 3390: True Fictions: Russian Prose since 1900

Survey of Russian prose fiction of the twentieth and early twenty-first century. During this time Russia experienced a series of drastic changes in society and culture, and as often happens the artists responded more rapidly and insightfully than anyone else. This was a time of radical experimentation with the very nature of literature, and we will read and examine some of the fascinating results. Course gives a short history of Russian prose fiction after 1900, offers a theory of analytical reading of imaginative prose, and hones the skills of intelligent writing about evaluative reading. Readings, lecture and discussion in English; no previous knowledge of Russian literature is assumed.

Credit Hours: 3

Prerequisites: sophomore standing, or instructor's consent

RUSS 3630: Russian Classics I

Reading and discussion of selected works by major Russian writers of the nineteenth century. Course conducted in Russian. May be taken before or after RUSS 3640.

Credit Hours: 3

Prerequisites: RUSS 3130 or RUSS 3160 or instructor's consent

RUSS 3640: Russian Classics II

Reading and discussion of selected works by major Russian writers of the twentieth century. Course conducted in Russian. May be taken before or after RUSS 3630.

Credit Hours: 3

Prerequisites: RUSS 3130 or RUSS 3160 or instructor's consent

RUSS 3870: Russian Women and Film

(same as FILM_S 3870 or WGST 3870). Traces image(s) of the Russian woman in 20th-century Russia as constructed in Russian, Soviet and late-Soviet film. Discusses heroines of pre-revolutionary melodrama and "new Soviet man and woman" of the 20s. Considers war-time re-alignment of gender roles in defense of motherland and their subtle revamping in post-war and post-Stalinist period, and the shifting relations between women and men, women and women, and women and the State. Emphasizes cultural-historical and ideological status of women as reflected in onscreen image(s) in Russian film. Designed to serve as an introduction to film studies and to 20th-century Russian culture more generally. Conducted in English (all films have English subtitles).

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

RUSS 3890: Russian and Soviet Cinema

(same as FILM_S 3890). Survey and analysis of selected Soviet films. Emphasis on film-making as a form of art. English or subtitled. Second

screenings by arr. Some films may run over 2 hrs. No foreign language credit.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

RUSS 3895: Service Learning in Russian Studies

Service learning offers students a chance to put into practice what they have learned in theory. Students work as teacher-aids or tutors in foreign language/culture classes at area schools. Does not meet Arts and Science foundation requirements. Graded on S/U basis only.

Credit Hours: 2

Prerequisites: instructor's consent

RUSS 3896: Honors in Russian

Special problems in Slavic literature or linguistics.

Credit Hour: 1-3

Prerequisites: departmental consent of Honors director

RUSS 4001: Topics in Russian-General

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hour: 1-99

Prerequisites: instructor's consent

RUSS 4005: Topics in Russian-Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent. Prerequisites: instructor's consent,

Credit Hour: 1-3

RUSS 4070: Intensive Beginning Russian

Designed to lead quickly to a reading knowledge of Russian. Cannot be taken to fulfill undergraduate language requirement. Intended for graduate students in other departments who plan to conduct research in Russian.

Credit Hours: 3

Prerequisites: instructor's consent required

Recommended: junior standing

RUSS 4160: Advanced Russian Conversation

Advanced syntax, idiomatic constructions, and vocabulary building.

Credit Hours: 3

Prerequisites: RUSS 3130 or RUSS 3160 or instructor's consent

RUSS 4350: Special Readings in Russian

Special Readings in Slavic literature or linguistics.

Credit Hour: 1-3

Prerequisites: instructor's consent

RUSS 4420: Russian Poetry

Survey of readings in Russian poetry from its beginnings to present.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

RUSS 4430: Russian Drama

Selected readings in and discussions of major Russian plays of the nineteenth and twentieth century.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

RUSS 4435: Russian Prose

Explores the development of prose writing in modern Russian letters, paying special attention to native generic designations. Considers dual imagery of realist/naturalist and romantic/fantastic approaches. Studies diverse examples: rasskaz (story), the povest' (tale), the novella, novel essay early 19th c. through 20th c. Considers ways in which literature can itself stand as a philosophical form.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

RUSS 4440: The Russian Novel

Selected readings and seminar discussion of major novelists of the 19th and 20th centuries.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

RUSS 4510: The Art and Life of Pushkin

Gives a conceptual thematic overview of Alexander Pushkin's lyrical poetry, as well as some dramatic work and prose. Special attention paid to the parallel development of his artistic and religious beliefs. Poetry read in Russian; prose and dramatic poems in Russian and English.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

RUSS 4520: Nikolai Gogol

Study of the life and art of Nikolai Gogol. Includes biographical overview, Ukrainian stories, dynamics of folklore, local dialect, and the process of literary creation. Considers St. Petersburg stories, novels, and plays.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

RUSS 4530: Dostoevsky

Introduction to the works of Fyodor Dostoevsky, including selections from both the shorter works and the major novels.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

RUSS 4540: Tolstoy's Fiction and Truth

Provides a conceptual overview and analysis of two masterpieces of Tolstoy's art. Acquaints students with the complex and hidden connections between Tolstoy's artistic methods and religious beliefs.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

RUSS 4550: Nabokov's Russian Fiction

Systematic analysis of Vladimir Nabokov's fiction, both novels and short stories. Emphasis on the artistic properties of prose. Lectures and class discussion in English. Readings in Russian (English translations for undergraduate students).

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

RUSS 4730: Internship in Russian

Supervised introduction to the methodology of the teaching of elementary Russian; conducted in a classroom environment.

Credit Hours: 3

Prerequisites: instructor's consent

RUSS 4820: Blogging the World: The Web in Cultural Context

(same as GERMAN and FRENCH 4820). Innovative interdisciplinary course addresses issues of access to international news and specific cultural context working in cross-disciplinary teams. Students in journalism, foreign language, international studies, political science and various other disciplines track cultural developments and information on no-US Web sites, blogs and digital social networks along with exploring various historical forms of communication that preceded the digital era of the Web. Students analyze the potential and limitations/ effects of blogs and the web in specific contemporary cultural contexts and as part of the broader historical evolution of the web. The course is taught in English. The goal of this course is two-fold; students learn the particulars of web blogging, explore various features of the contemporary social network landscape while focusing on the concept of culture, in particular the cultures of Europe and the US. Questions asked are: what is culture? What is common or popular right now in other cultures? And how do new social networks amplify or alter certain features or culture across national and international contexts?

Credit Hours: 3

Prerequisites: sophomore standing required

RUSS 4896: Honors Thesis in Russian

Intended for Russian majors in their final year of study who have completed the majority of course requirements within the major and are prepared to engage in an independent research project that culminates in a 25-40 page thesis paper. To be considered for honors thesis, the student should be in his/her final year of the major; must have completed at least three courses in literature, one of which must be at the 4000 level. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

Recommended: Russian major; senior standing, have a minimum cumulative GPA to 3.3, and a GPA of 3.5 or above within the major, and completion of an independent reading course the previous semester (e.g. RUSS 3896; RUSS 4350)

RUSS 7085: Problems in Russian and Slavonic Studies

Special problems in Slavic literature or linguistics.

Credit Hour: 1-99

Prerequisites: instructor's consent

RUSS 7087: Seminar in Russian

Course content varies.

Credit Hours: 3

Prerequisites: instructor's consent

RUSS 7105: Topics in 19th Century Russian Literature-General

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: instructor's consent

RUSS 7205: Topics in 20th Century Russian Literature

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: instructor's consent

RUSS 7305: Topics in Slavic Linguistics

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: instructor's consent

RUSS 7310: Russian Literary History

A study of the major works of Russian literature in relation to their representations in literary history.

Credit Hours: 3

RUSS 7350: Special Readings in Russian

Credit Hour: 1-3

Prerequisites: instructor's consent

RUSS 7405: Topics in Slavic Literatures

Credit Hour: 1-99

Prerequisites: instructor's consent

RUSS 7420: Russian Poetry

Survey of readings in Russian poetry from its beginnings to present.

Credit Hours: 3

RUSS 7430: Russian Drama

Selected readings in and discussions of major Russian plays of the nineteenth and twentieth century.

Credit Hours: 3

RUSS 7435: Russian Prose

Explores the development of prose writing in modern Russian letters, paying special attention to native generic designations. Considers dual imagery of realist/naturalist and romantic/fantastic approaches. Studies diverse examples: rasskaz (story), the povest' (tale), the novella, novel essay, early 19th c. through 20th c. Considers ways in which literature can itself stand as a philosophical form.

Credit Hours: 3

RUSS 7440: The Russian Novel

Selected readings and seminar discussion of major novelists of the 19th and 20th centuries.

Credit Hours: 3

RUSS 7520: Nikolai Gogol

Study of the life and art of Nikolai Gogol. Includes biographical overview, Ukrainian stories, dynamics of folklore, local dialect, and the process of literary creation. Considers St. Petersburg stories, novels, and plays.

Credit Hours: 3

RUSS 7530: Dostoevsky

Introduction to the works of Fyodor Dostoevsky, including selections from both the shorter works and the major novels.

Credit Hours: 3

RUSS 7540: Tolstoy's Fiction and Truth

Provides a conceptual overview and analysis of two masterpieces of Tolstoy's art. Acquaints students with the complex and hidden connections between Tolstoy's artistic methods and religious beliefs.

Credit Hours: 3

RUSS 7550: Nabokov's Russian Fiction

Systematic analysis of Vladimir Nabokov's fiction, both novels and short stories. Emphasis on the artistic properties of prose. Lectures and class discussion in English. Readings in Russian.

Credit Hours: 3

RUSS 7730: Internship in Russian

Supervised introduction to the methodology of the teaching of elementary Russian; conducted in a classroom environment.

Credit Hours: 3

RUSS 7820: Blogging the World: The Web in Cultural Context

(same as GERMAN 7820 and FRENCH 7820). Innovative interdisciplinary course addresses issues of access to international news and specific cultural context. Working in cross-disciplinary teams, students in journalism, foreign language, international studies, political science and various other disciplines track cultural developments and information on non-US Web sites, blogs and digital social networks along with exploring various historical forms of communication that preceded the digital era of the Web. Students analyze the potential and limitations/effects of blogs and the web in specific contemporary cultural contexts and as part of the broader historical evolution of the web. The course is taught in English. The goal of this course is two-fold: students learn the particulars of web blogging, explore various features of the contemporary social network landscape while focusing on the concepts of culture, in particular the cultures of Europe and the US. Questions asked are: what is culture? What is common or popular right now in other cultures? And how do new social networks amplify or alter certain features or culture across national and international contexts?

Credit Hours: 3

RUSS 7975: Distorted Picture: Post-War Cinema in a Police State
(same as FILM_S 7975) Considers strategies and stylistic devices employed by East European and Soviet directors to produce artistically worthy films under censorship. Discusses how artists adapted methods, boldness of expression, thematic content, and technical sophistication. Attention paid to production techniques.

Credit Hours: 3

RUSS 8050: Research in Russian
Translations or creative work not leading to thesis.

Credit Hour: 1-99

Prerequisites: instructor's consent

RUSS 8085: Problems in Russian and Slavonic Studies
Special problems in Slavic literature or linguistics.

Credit Hour: 1-99

Prerequisites: instructor's consent

RUSS 8090: Thesis Research in Russian
Independent research leading to a Master's thesis. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: instructor's consent

RUSS 8105: Topics in 19th Century Russian Literature-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: instructor's consent

RUSS 8205: Topics in 20th Century Russian Literature
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: instructor's consent

RUSS 8220: Russian Intellectual History and Critical Theory I
Survey of Russian literary and cultural criticism of the 18th and 19th centuries. Course texts will include representative critical essays as well as selected literary texts. May be taken before or after RUSS 8230.

Credit Hours: 3

RUSS 8230: Russian Intellectual History and Critical Theory II
Survey of Russian literary and cultural criticism of the 20th century. Course texts will include representative critical essays as well as selected literary texts. May be taken before or after RUSS 8220.

Credit Hours: 3

Prerequisites: instructor's consent

RUSS 8305: Topics in Slavic Linguistics
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: instructor's consent

RUSS 8405: Topics in Slavic Literatures
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: instructor's consent

RUSS 8510: The Art and Life of Pushkin
Gives a conceptual thematic overview of Alexander Pushkin's lyrical poetry, as well as some dramatic work and prose. Special attention paid to the parallel development of his artistic and religious beliefs. Poetry read in Russian; prose and dramatic poems in Russian and English.

Credit Hours: 3

RUSS 8560: Old Russian Literature
Considers the genres, periodization, and development of Russian literature from the beginnings of literacy to the end of the Rurikovich dynasty. Emphasis on literary genres and their evolution. Readings in English or in Russian.

Credit Hours: 3

RUSS 8570: Russian Symbolism
Study of the history, aesthetics, and creative works associated with the Symbolist movement in Russian literature and art. Primary emphasis on poetry drama, and prose fiction.

Credit Hours: 3

RUSS 8580: Pasternak
Presents the life-long work of Boris Pasternak in three stages: early, interbellum, and late. Special attention to the evolution of poetics, with close analysis of selected poems. Includes theory of poetic expression. Requires a grasp of the main principles of Western versification (prosody, tropes, metaphor, rhyme, euphony), and history of Russian poetry.

Credit Hours: 3

RUSS 8650: Old Church Slavonic
Designed to familiarize student with the phonological system, inflectional morphology and most important literature of the oldest recorded Slavic language. Comparisons of OCS to modern Slavic languages.

Credit Hours: 3

Science and Agricultural Journalism Courses

SCI_AG_J 1160: Introduction to Science and Agricultural Journalism
Introduction to journalistic writing for print, broadcast, Web. Introduction to writing for public relations. Also includes writing for live Web publication: cafnrcornerpost.com. Provides overview of career opportunities.

Credit Hours: 3

Prerequisites: instructor's consent

SCI_AG_J 2150: Problems in Science and Agricultural Journalism
For undergraduates majoring in science and agricultural journalism. May be repeated.

Credit Hour: 1-6

Prerequisites: instructor's consent

SCI_AG_J 2210: Communicating Science to the Public

For science majors. Introduction to the history, theory and practice of communicating science to the general public. Emphasis on the interplay of science, human values and politics; also, the art and craft of writing and talking to lay audiences. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Consent required

Recommended: ENGLSH 1000 and a declared major in a science or engineering field or instructor's consent

SCI_AG_J 2940: Internships in Science and Agricultural Journalism

May be repeated for credit.

Credit Hour: 1-3

Prerequisites: instructor's consent

SCI_AG_J 3201: Topics in Science and Agricultural Journalism

Instruction in select subject matter areas in the field of communications.

Credit Hour: 1-3

Prerequisites: instructor's consent

SCI_AG_J 3210: Fundamentals of Communications

Instruction in writing about conflicts in agriculture and the environment and their cultural impacts. Emphasis on media literacy, critical thinking, communication and the interplay of science and human values.

Credit Hours: 3

Prerequisites: ENGLSH 1000 and sophomore standing

SCI_AG_J 3240: Communicating on the Web

Learn to make a useful, content-driven web site using web authoring software (this is not a programming class). This course emphasizes informative content and functional design.

Credit Hours: 3

SCI_AG_J 3385: Problems in Science and Agricultural Journalism

Opportunity to apply journalism skills to agricultural subjects; opportunity to integrate communication processes within single medium or across media. Section 1: Corner Post Staff, Section 2: Problems in Science and Agricultural Journalism. May be repeated.

Credit Hour: 1-4

Prerequisites: instructor's consent

SCI_AG_J 4301: Topics in Science and Agricultural Journalism

Instruction in select subject matter areas in the field of communications. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: JOURN 4450 and Junior standing, instructor's consent required

SCI_AG_J 4301H: Topics in Science and Agricultural Journalism-Honors

Instruction in select subject matter areas in the field of communications. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: JOURN 4450 and Junior standing; instructor's consent. Honors Eligibility required

SCI_AG_J 4410: Readings in Science and Agricultural Journalism

An examination of modern journalistic book-length storytelling about science, the food system, environment, natural resources and society. Students will learn about the authors and how they use theory and techniques of storytelling. Students will gain a deeper knowledge about how to pursue such information-gathering and writing, as well as develop their critical-thinking abilities and expertise in the subject matter covered by the books. They will read, analyze and write about the books and the ideas and times that shaped them. Each course will examine a particular subject grouping of books, for example several on farming, or on conservation, or on climate change.

Credit Hour: 1-3

Prerequisites: English 1000

SCI_AG_J 4414: Field Reporting on the Food System and Environment

(Same as JOURN 4414). Field reporting on the social, political, scientific, economic and ethical dimensions of the food system and environment, with emphasis on explanatory story-telling. Includes multi-day field trip. Graded A-F only.

Credit Hours: 3

Prerequisites: instructor's consent

SCI_AG_J 4415: Current Issues in Science Journalism

(Same as JOURN 4415) Focuses on covering the interplay of one or more current issues of concern to journalists, scientists and society. The focus for any given semester may be biotechnology, climate change, energy, food safety, global population growth, wildlife or another issue. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: JOURN 2100 or instructor's consent

SCI_AG_J 4480: Will Write for Food (and Wine)

(same as JOURN 4480) Course focuses on food and wine writing in current U.S. culture. Come ready to create mouthwatering narrative and actively seek publishing your finished work. An emphasis will be placed on class participation and written critiques of peer-reviewed articles in class. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: JOURN 4450 or JOURN 4804. Restricted to Journalism and Science Agricultural Journalism students only

SCI_AG_J 4482: Field Reporting: Wine Country Writing

(same as JOURN 4482). Students will examine wine culture, agricultural issues in the vineyard, wine trends, the historical context of wine and Missouri settlement, and more. Come ready to shape articles into sharp focus and make them fresh with input from fellow student critiques. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: JOURN 2100

SCI_AG_J 4940: Internships in Science and Agricultural Journalism

May be repeated for credit.

Credit Hour: 1-3

Prerequisites: instructor's consent and 60 or more credit hours completed

SCI_AG_J 4970: Agriculture and the Media Senior Seminar Capstone

Provides background, knowledge of trends and experience with agricultural media.

Credit Hours: 3

Prerequisites: instructor's consent

Recommended: Science and Agricultural Journalism seniors take last Spring semester before graduation

SCI_AG_J 7301: Topics in Science and Agricultural Journalism

Selected current topics in science and agricultural journalism. Specific topics to be announced at time of registration. Course graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: Instructor's consent

SCI_AG_J 7414: Field Reporting on the Food System and Environment

(same as JOURN 7414). Field reporting on the social, political, scientific, economic and ethical dimensions of the food system and environment, with emphasis on explanatory story-telling. Includes multi-day field trip. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

Service Learning Courses

SRV_LRN 1090: Independent Study-Service Learning

Students participate in community service activities, attend regular meetings, conduct research, submit four journals, a short bibliography and a research paper on their service in the community

Credit Hour: 1-3

SRV_LRN 1090H: Independent Study-Service Learning - Honors

Students participate in community service activities, attend regular meetings, conduct research, submit four journals, a short bibliography and a research paper on their service in the community.

Credit Hour: 1-3

Prerequisites: Honors eligibility required

SRV_LRN 2021: MU Community Engagement Project

The MU Community Engagement Project offers students the opportunity to engage in academically-based community services; project sections include tutoring and mentoring, public health policy and outreach, international services, and community development.

Credit Hour: 2-3

SRV_LRN 2021H: MU Community Engagement Project - Honors

The MU Community Engagement Project offers students the opportunity to engage in academically-based community services; project sections include tutoring and mentoring, public health policy and outreach, international services, and community development.

Credit Hour: 2-3

Prerequisites: Honors eligibility required

SRV_LRN 3028: Civic Leaders Internship

Students in any major may enroll in 3-6 credit hour internships with state government offices and agencies.

Credit Hour: 3-6

Prerequisites: consent and application required

SRV_LRN 3028H: Civic Leaders Internship - Honors

Students in any major may enroll in 3-6 credit hour internships with state government offices and agencies.

Credit Hour: 3-6

Prerequisites: consent and application required. Honors eligibility required

Social Work Courses

SOC_WK 1101: Topics in Social Work

Special and emerging topics in social work and social welfare. Subject, content and credit varies depending on available faculty and student interest.

Credit Hour: 1-3

Prerequisites: For undergraduate students only

SOC_WK 1110: Introduction to the Social Work Major

Students examine their interest in social work and other human service professions; learn of career possibilities in their interest area; and develop an educational plan to reach their goal.

Credit Hour: 1

Prerequisites: freshman or sophomore standing

SOC_WK 1115: Social Welfare and Social Work

Survey course that examines the history and development of social welfare in the United States and the profession of social work, as well as contemporary issues.

Credit Hours: 3

SOC_WK 1200: Criminal Justice

This course provides an introduction to the history and development of criminal justice in our country and includes policing and law enforcement, and the adjudication and court process as well as the terminology associated with each system. Theories on crime, prison, community corrections and reentry discussions for both juvenile and adult systems will be addressed. Emphasis will be placed on an overview to the major sociological and psychological perspectives on variations from normative individual and group behaviors prevalent in the U.S. society while providing a strengths perspective in which to understand them. Finally,

this course will evaluate the delicate balance between community interest and personal freedom that criminal justice decision-making requires.

Credit Hours: 3

SOC_WK 2000: Exploration in Social and Economic Justice

(same as PEA_ST 2000). This course explores issues of fairness and equality in economic, political and social systems, and applies social justice principles to major social problems. Course may be repeated two times for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGLSH 1000

SOC_WK 2101: Topics in Social Work

Special and emerging topics in social work and social welfare. Subject, content, and credit varies depending on available faculty and student interest.

Credit Hour: 1-3

Prerequisites: departmental consent required

SOC_WK 2220: Human Behavior and the Environment

The first of two required courses providing an introduction to selected theories, multidisciplinary knowledge, and perspectives into human development and behavior. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGLSH 1000 or sophomore standing

SOC_WK 3101: Topics in Social Work

Special and emerging topics in social work and social welfare. Subject, content and credit varies depending on available faculty and student interest. For undergraduate and graduate students.

Credit Hour: 1-3

Prerequisites: departmental consent required

SOC_WK 3310: Comparative Social Policy

A comparative study of social policy aspects in the framework of international development. Policy areas include South Asia, as well as other regions relevant to such study.

Credit Hour: 2-3

Prerequisites: departmental consent required

SOC_WK 3320: Understanding Personality in a Social Context

Introduces students to diverse personality theories and examines background, key concepts, motivation, structure, development dynamics and applications of each theory in a social context. Required of all undergraduate social work majors.

Credit Hours: 3

SOC_WK 3330: Medical Social Problems

Interrelations of biological, psychological, social factors in understanding people with common physical illnesses.

Credit Hours: 2

Prerequisites: junior standing and instructor's consent required

SOC_WK 3340: Dynamics of Interviewing

Analysis of interviewing techniques employed in communication for securing reliable, valid data to modify behavior in accordance with professional objectives.

Credit Hours: 3

Prerequisites: junior standing and departmental consent required

SOC_WK 3350: Problems in Social Work

Research and independent study projects offered on a tutorial basis to undergraduate social work students.

Credit Hour: 1-3

Prerequisites: departmental consent required

SOC_WK 4101: Topics in Social Work

Special and emerging topics in social work and social welfare. Subject, content and credit varies depending on available faculty and student interest. May be repeated for credit.

Credit Hour: 1-6

Prerequisites: departmental consent required

SOC_WK 4300: Women and Health Care

Provides a study of the role of women as health care providers and an analysis of the impact of value systems and the women's movement on the organization and delivery of health services to women.

Credit Hours: 3

SOC_WK 4310: Social Statistics

Descriptive, analytic techniques applied to qualitative and quantitative social data. Math Reasoning Proficiency Course.

Credit Hours: 4

Prerequisites: sophomore standing required

SOC_WK 4320: Rural Human Services

A study of the effect of rural and small community environments on the planning and delivery of social and health services. Emphasis on policy and program analyses relevant to rural issues and concerns.

Credit Hours: 3

Prerequisites: junior standing

SOC_WK 4330: Addiction Treatment and Prevention

Provides knowledge generic to social work and other disciplines involved in substance abuse treatment. Integrated approach to problems of substance abuse and development of self-awareness are emphasized. Didactic and experiential methods employed.

Credit Hours: 3

Prerequisites: junior standing

SOC_WK 4350: Deaf Culture: A Social Work Perspective

An introduction to the deaf community as a linguistic and cultural minority. Examines the complexities of Deaf culture from a historical and contemporary perspective. Addresses cultural identity, communication, education, social services, civil rights and advocacy. Graded on A-F basis only.

Credit Hours: 3

SOC_WK 4360: Working with Minority Youth

(same as BL_STU 4360). Develops awareness and understanding of social/psychological and cognitive realities influencing the behavior of minority youth. Content draws upon theories, research and practice skills relevant to understanding and counseling minority youth.

Credit Hours: 3

Prerequisites: junior standing

SOC_WK 4370: Delinquency, Corrections and Social Treatment

Focuses on problems and causative factors in developing and maintaining delinquent and criminal behavior and attitudes: addressing critical and comparative understanding of social change strategies employed in this field.

Credit Hours: 3

Prerequisites: junior standing

SOC_WK 4380: Social Work Practice With Minorities: African-American Emphasis

(same as BL_STU 4380). Provides students with an appreciation of the African-American experience in the United States on a knowledge and feeling level.

Credit Hours: 3

Prerequisites: junior standing

SOC_WK 4390: Helping Strategies With Children and Adolescents

Theory and practice of work with children and adolescents. Focus on youth in transition, protective services and permanency planning, and special needs populations.

Credit Hours: 3

Prerequisites: junior standing

SOC_WK 4395: Death, Grief and Loss

This course is designed to provide an awareness of the impact of grief and loss whether as a result of a death or major life alteration. The perspective that grief exists in many contexts beyond death will be a focal point of the course. Theory associated with the process of dying, grief and grief resolution will be examined. Additionally, students will explore influencing factors such as life span development, religion, culture and personal responses to loss.

Credit Hours: 3

Prerequisites: junior standing

SOC_WK 4400: Domestic Violence

(same as WGST 4400). This 3-hour course covers history of battered women's movement, violence theories, policy issues, prevention and intervention practice models for working with battered women, their children, and abusers.

Credit Hours: 3

Prerequisites: Junior or Senior standing required

SOC_WK 4410: Law and Social Work Practice

Legal processes relevant to social work practice and court procedures, and study of decisions affecting social work across micro and macro practice.

Credit Hours: 3

Prerequisites: junior standing

SOC_WK 4440: International Social Work Practices and Principles

This course explores issues of fairness and equity in economic, political and social systems, and applies social justice principles to major international social problems. Social Justice is the perspective that in a perfect world, all citizens deserve equal rights, protection, opportunities, obligations and social benefits. Recognizing that the world is not perfect, International Social Work Practice and Principles presents theories and perspectives on how to affect a more just society and world community. Social Work person in environment orientation and strong value system are used as guides in analyzing problems and determining ways of promoting a more just society and global community.

Credit Hours: 3

Prerequisites: Junior Standing required

SOC_WK 4450: Professional Perspectives on Child Welfare Services in the 21st Century

This course examines the development and current state of child welfare services in America with an emphasis on the role of the public child welfare agency in delivery of those services. It is an overview course which addresses the relationship between practice issues in service delivery and administrative policy issues which enable and constrain service delivery activities. The overarching concepts of child safety, family stability, permanency for the child, and well-being of the child as a long-term outcome will be used to examine the five focal service delivery areas in child welfare; family support, preservation and reunification, child protection, foster placement, residential care, and adoptive services. This is a dual level BSW/MSW course and is an elective within the program's curricular structure. The differentiating objectives and assignments for the MSW members of the class are noted in the appropriate areas of the syllabus.

Credit Hours: 3

SOC_WK 4455: Latino/a Immigrants and Receiving Communities

This interdisciplinary course is designed to educate students about the Latino/a immigrants seeking better lives and the communities that receive them. Special attention is given to social justice issues; micro, mezzo, and macro systems will be used to explore content.

Credit Hours: 3

SOC_WK 4480: Helping Strategies with Older Persons

This course is designed to provide knowledge and skill development for work with older adults and their families. It offers an intensive examination of the concepts and skills needed for effective social work practice with these populations. In particular, sociological, psychological, political, and economic factors affecting older adults will be examined as they relate to intervention, programmatic, and policy responses. Special attention will be given to assessment and intervention from macro, mezzo, and micro perspectives. The interrelationship between the aging person, the family, and society is explored since these factors affect all levels of practice. Content in this course related to the social and economic mission of the School of Social Work.

Credit Hours: 3

Prerequisites: Junior standing in Social Work and instructor's consent required

SOC_WK 4710: Social Justice and Social Policy

Based on the concepts of human need and social justice, a historical and analytical approach to social welfare policies and programs. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: junior standing and departmental consent required

SOC_WK 4711: Social Justice and Social Policy II

Advanced course in the analysis of policies and programs relevant to social work and social welfare. Prepares students to understand and conduct policy analysis of public, voluntary, and proprietary human service organizations. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: SOC_WK 4710; Social Work Professional standing

SOC_WK 4720: Variations in Human Behavior

Basic concepts and principles regarding psychological/social dynamics of deviance; implications for social welfare policy and social interventions.

Credit Hours: 3

Prerequisites: junior standing and departmental consent required

SOC_WK 4730: Introduction to Social Work Practice

Introductory, generalist practice theory course promoting student's understanding of professional social work practice as holistic, identifiable, unique configuration of knowledge, values and skills. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Social Work Professional Standing and departmental consent required

SOC_WK 4740: Introduction to Community and Organizational Processes

Introduction to contextual framework of social work practice with particular emphasis on community and organization as social systems. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: Social Work professional standing and departmental consent required

SOC_WK 4750: Interaction Skills Workshop

Generalist practice at individual, group and community levels. Group communication and social influence theories address generic and unique aspects of interaction across systems. Uses laboratory instruction. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Social Work Professional standing and departmental consent required

SOC_WK 4760: Theory and Practice of Social Group Work

Focuses on small group dynamics and models of group work practice suitable in all social work fields. Emphasizes practice theory and skills. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Social Work Professional standing

SOC_WK 4770: Strategies of Direct Practice

Examines social structures, processes, underlying assumptions/concepts of social change, client constellation, organizational arrangements, role relationships by which social workers define professional intervention.

Credit Hours: 3

Prerequisites: SOC_WK 4730 and SOC_WK 4750; third semester professional program standing; departmental consent required

Corequisites: SOC_WK 4971 and SOC_WK 4970

SOC_WK 4951: Research for Social Work Practice

This course introduces social work research and its relevance to practice, emphasizing the School of Social Work's social justice mission. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Social Work Professional standing or consent required

SOC_WK 4952: Research Methods for Social Work

Survey of research methods germane to the development of the knowledge base of social work practice. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Social Work Professional standing or consent required

SOC_WK 4960: Special Readings in Social Work

Extensive readings in selected area or intensive reading in a special field.

Credit Hour: 1-3

Prerequisites: departmental consent required

SOC_WK 4970: Senior Professional Seminar

Integrative professional practice seminar for BSW students, focusing on the principles of generic social work and its application to direct practice in diverse fields, career planning and responsibilities.

Credit Hours: 3

Prerequisites: SOC_WK 2220, SOC_WK 4710, SOC_WK 4730, SOC_WK 4740, SOC_WK 4750, SOC_WK 4760, and SOC_WK 4720; departmental consent required

Corequisites: SOC_WK 4770 and SOC_WK 4970

SOC_WK 4971: Undergraduate Field Practicum

Supervised social work practice in a school-approved agency focusing on development of direct practice skills. Fall semester, three days per week. Graded on S/U basis only.

Credit Hours: 6

Prerequisites: senior standing; SOC_WK 2220, SOC_WK 4710, SOC_WK 4730, SOC_WK 4740, SOC_WK 4750, SOC_WK 4760, and SOC_WK 4720; departmental consent required

Corequisites: SOC_WK 4770 and SOC_WK 4970

SOC_WK 4971H: Undergraduate Field Practicum - Honors

Supervised social work practice in a school-approved agency focusing on development of direct practice skills. Graded on S/U basis only.

Credit Hours: 6

Prerequisites: senior standing; SOC_WK 2220, SOC_WK 4710, SOC_WK 4730, SOC_WK 4740, SOC_WK 4750, SOC_WK 4760, and SOC_WK 4720; consent required

Corequisites: SOC_WK 4770 and SOC_WK 4970. Honors eligibility required

SOC_WK 7000: Professional Social Work Practice

This course introduces the social work profession within a historical and contemporary context, provides an overview of key concepts, standards and regulations, and assists students in examining personal and professional values and ethics related to practice. Graded on an A-F basis only.

Credit Hour: 1

SOC_WK 7001: Topics in Social Work

Special and emerging topics in social work and social welfare. Subject, content, and credit varies depending on available faculty and student interest.

Credit Hour: 1-3

Prerequisites: departmental consent required

SOC_WK 7085: Problems in Social Work

Intensive study of an area of social welfare related to special interest of student.

Credit Hour: 1-6

Prerequisites: departmental consent required

SOC_WK 7220: Advanced Social Work Practice in Integrated Healthcare

The course will introduce students to the essential practice skills needed to effectively address the challenges of integrating services, care, and support for persons with health, mental health, and substance use problems. Graded on A-F basis only.

Credit Hours: 3

SOC_WK 7300: Women and Health Care

Provides a study of the role of women as health care providers and an analysis of the impact of value systems and the women's movement on the organization and delivery of health services to women.

Credit Hours: 3

SOC_WK 7320: Rural Human Services

A study of the effect of rural and small community environments on the planning and delivery of social and health services. Emphasis on policy and program analyses relevant to rural issues and concerns.

Credit Hours: 3

SOC_WK 7330: Addiction Treatment and Prevention

Provides knowledge generic to social work and other disciplines involved in substance abuse treatment. Integrated approach to problems of substance abuse and development of self-awareness are emphasized. Didactic and experiential methods employed.

Credit Hours: 3

SOC_WK 7340: Military Culture

An introduction to the branches of the military and related cultural issues. Examines the historical and contemporary complexities of military service and personal and professional values and ethics related to practice with military personnel, families, and veterans. Graded on A-F basis only.

Credit Hours: 3

SOC_WK 7350: Deaf Culture: A Social Work Perspective

An introduction to the deaf community as a linguistic and cultural minority. Examines the complexities of Deaf culture from a historical and contemporary perspective. Addresses cultural identity, communication, education, social services, civil rights, and advocacy. Graded on A-F basis only

Credit Hours: 3

SOC_WK 7370: Delinquency, Corrections and Social Treatment

Focuses on problems and causative factors in developing and maintaining delinquent and criminal behavior and attitudes: addressing critical and comparative understanding of social change strategies employed in this field.

Credit Hours: 3

SOC_WK 7390: Helping Strategies With Children and Adolescents

Theory and practice of work with children and adolescents. Focus on youth in transition, protective services and permanency planning, and special needs populations.

Credit Hours: 3

SOC_WK 7395: Death, Grief and Loss

This course is designed to provide an awareness of the impact of grief and loss whether as a result of a death or major life alteration. The perspective that grief exists in many contexts beyond death will be a focal point of the course. Theory associated with the process of dying, grief and grief resolution will be examined. Additionally, students will explore influencing factors such as life span development, religion, culture and personal responses to loss.

Credit Hours: 3

SOC_WK 7400: Domestic Violence

(same as WGST 7400; Cross-leveled with SOC_WK 4400). This 3-hour course covers history of battered women's movement, violence theories, policy issues, prevention and intervention practice models for working with battered women, their children, and abusers.

Credit Hours: 3

SOC_WK 7410: Law and Social Work Practice

Legal processes relevant to Social Work Practice and Court procedures and study of decisions affecting social work across concentrations.

Credit Hours: 3

SOC_WK 7430: Community Organization for Social Welfare

The theory and practice of community organization as a social work problem solving method. Approaches emphasized include locality development, social planning and social action.

Credit Hours: 3

Prerequisites: departmental consent required

SOC_WK 7450: Professional Perspectives on Child Welfare Services in the 21st Century

This course examines the development and current state of child welfare services in America with an emphasis on the role of the public child welfare agency in delivery of those services. It is an overview course which addresses the relationship between practice issues in service delivery and administrative policy issues which enable and constrain service delivery activities. The overarching concepts of child safety, family stability, permanency for the child, and well-being of the child as a long term outcome will be used to examine the five focal service delivery areas in child welfare; family support, preservation and reunification, child protection, foster placement, residential care, and adoptive services. This is a dual level BSW/MSW course and is an elective within either program's curricular structure. The differentiating objectives and assignments for the MSW members of the class are noted in the appropriate areas of the syllabus.

Credit Hours: 3

SOC_WK 7460: Advanced Social Group Work

An intensive exposure to the theories and models of social group work practice through cognitive, affective and experiential (laboratory) methods of teaching/learning.

Credit Hours: 3

Prerequisites: departmental consent required

SOC_WK 7470: Organizational Issues in Social Work Practices in Child Welfare

Intensive seminar in meso-level practice in the field of child welfare. Examines communication theory, team building, and interorganizational dynamics as they affect professional practice in child welfare.

Credit Hours: 3

Prerequisites: departmental consent required

SOC_WK 7480: Helping Strategies with Older Persons

Focus on interdisciplinary methods of assessment and intervention strategies designed to optimize healthy functioning for older persons and their families.

Credit Hours: 3

Prerequisites: departmental consent required

SOC_WK 7485: Military Social Work

An introduction to social work practice with military personnel, veterans, and their families. Content draws on theories strategies, and research relevant to effective social work practice with this population. Graded on A-F basis only.

Credit Hours: 3

SOC_WK 7490: Family Treatment

Comparative study of theories and methods required for work with problems of family functioning. Both conjoint and subsystem approaches to family treatment are examined.

Credit Hours: 3

Prerequisites: departmental consent required

SOC_WK 7710: Social Policy and Service Delivery in Social Work

Covers historic and contemporary issues in social welfare policy. Focuses on relationships among social problems, public policies, private actions, poverty, racism, sexism and social work practice/values. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: restricted to graduate Social Work majors

SOC_WK 7720: Foundations of Human Behavior

Substantive sources from behavioral sciences used in social work toward understanding the biosocial processes and constraints of human development.

Credit Hours: 3

Prerequisites: restricted to graduate Social Work majors

SOC_WK 7730: Social Work Skills

Introduces theory and application of strengths-based generalist practice. Develops knowledge, values, and techniques of professional social work practice at micro, mezzo, and macro levels, emphasizing assessment and interaction skills.

Credit Hours: 3

Prerequisites: graduate standing in social work; Foundation level course

SOC_WK 7740: Large Group Theory

Examination of social environment in which social work is practiced with particular emphasis on development of analytic framework for understanding formal organizations and communities.

Credit Hour: 2-3

Prerequisites: graduate standing in Social Work

SOC_WK 7750: Advanced Interaction Skills Workshop

Advanced class in social processes and interaction skills basic to generalist social work practice. Learning in cognitive, behavioral and affective domains: including group dynamics, communication and social influence theory.

Credit Hours: 3

Prerequisites: graduate standing in social work; departmental consent required

SOC_WK 7751: Psychosocial Function and Older Adults

(same as ARCHST 7650, F_C_MD 7751, H_D_FS 7751, NURSE 7751, P_HLTH 7751 and HMI 7751). This course takes an Interdisciplinary approach to understanding the psychosocial function of older adults and explores approaches to alleviate disabling conditions that interfere with psychosocial function and quality of life in old age. Graded on A-F basis only.

Credit Hours: 3

SOC_WK 7752: Physical Function and Older Adults

(Same as F_C_MD 7750, ARCHST 7640, HMI 7750, H_D_FS 7750, NURSE 7750, and P_HLTH 7750. This course takes an interdisciplinary approach to understanding and improving the physical function and independence of older adults and explores approaches to alleviate

disabling conditions that interfere with physical function and quality of life in old age. Graded A-F basis only.

Credit Hours: 3

SOC_WK 7760: Social Justice Seminar

Provides integrative learning experience in social work practice in foundation level social work practice focusing on social and economic justice experiences in field practicum.

Credit Hours: 2

Prerequisites: restricted to graduate Social Work majors

Corequisites: SOC_WK 7971

SOC_WK 7770: Strategies of Clinical Social Work Intervention

Strategies of social treatment with individuals and small groups applicable to practice in public and private social agency settings.

Credit Hours: 3

Prerequisites: graduate standing in social work; departmental consent required

SOC_WK 7780: Fundamentals of Social Work Administration

Basic managerial skills which social workers need for supervision, planning, staff development and administrative positions in social agencies; focus on individual management functions and skills associated with them.

Credit Hours: 3

Prerequisites: restricted to graduate Social Work majors

SOC_WK 7790: Practicum in Cultural Diversity I

A practicum conducted on a workshop with content focused on racial, cultural and gender dynamics in social work practice. Graded on a S/U basis only.

Credit Hour: 1

Prerequisites: departmental consent required

SOC_WK 7791: Practicum in Cultural Diversity II

Continuation of SOC_WK 7790. A practicum conducted as a workshop with content focused on racial, cultural and gender dynamics in social work practice. Graded on a S/U basis only.

Credit Hour: 1

Prerequisites: departmental consent required

SOC_WK 7820: DSM V and Psychopathology: A Social Work Perspective

Examines psychopathology of human behavior within social work context, prevailing diagnostic models (Diagnostic and Statistical Manual of Mental Disorders V), and historically oppressive categorizations.

Credit Hours: 3

Prerequisites: Graduate standing in Social Work

SOC_WK 7920: Advanced Foundations of Human Behavior for Administrators

Examination of relevant theoretical and behavioral foundations in order that students can acquire the knowledge to function as a social work administrator.

Credit Hours: 3

Prerequisites: graduate Social Work majors

SOC_WK 7952: Research Methods in Social Work

Examines research methodology and design as applied to the study of social work techniques and problems. Emphasizes differential uses of scientific observation and techniques for developing knowledge and improving practice.

Credit Hours: 3

Prerequisites: Graduate Social Work Majors

SOC_WK 7971: Graduate Field Practicum I

Supervised social work practice in a school-approved agency providing a full range of interventive experiences. Graded on S/U basis only. Prerequisites; admission to MSW program; SOC_WK 7710, SOC_WK 7720, SOC_WK 7730, SOC_WK 7740, SOC_WK 7760. Departmental Consent Required.

Credit Hour: 3-6

SOC_WK 7981: Professional Development Workshop

Field practicum under intensive faculty instruction for eight weeks prepares the student for entry into the accelerated graduate degree program.

Credit Hours: 8

Prerequisites: BSW degree and dean's consent

SOC_WK 8001: Topics in Social Work

Special and emerging topics in social work and social welfare. Subject, content, and credit varies depending on available faculty and student interest. May be repeated for credit

Credit Hour: 1-3

Prerequisites: instructor's consent required

SOC_WK 8030: Client Case Management, Networking, and Advocacy

Examines the key role of clinical case management across all social work client populations. Models of case management for and techniques applicable to those populations will be developed for effective practice. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: SOC_WK 7770; instructor's consent for non-MSW students

SOC_WK 8040: Narrative Approaches to Social Work Practice

This class will enable students to gain knowledge of theory and basic practice skills grounded in narrative therapy. The use of narratives with vulnerable and oppressed populations and creative strategies to evoke narratives are highlighted in this course. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: SOC_WK 7770; departmental consent required

SOC_WK 8050: Resiliency and Solution-Focused Practice

Focuses on brief therapy approaches to dealing with clinical problems in a time-efficient, clinically effective method. Various approaches to

solution-oriented work based in resiliency theory are presented. Stresses client empowerment across the lifespan.

Credit Hours: 3

Prerequisites: Social Work [SOC_WK] 7770; graduate level Social Work Majors only. Graded on A/F basis only

SOC_WK 8060: Trauma Practice and Crisis Intervention

Focuses on clinical techniques for social work with trauma survivors. Addressing effects of disasters, personal violence and war are included. Resiliency in survivors is presented as basis for interventions.

Credit Hours: 3

Prerequisites: SOC_WK 7770; graduate level Social Work majors only

SOC_WK 8070: Cognitive Behavioral Practice

Focuses on the theory, concepts, and techniques of cognitive behavioral therapies, with a particular emphasis on clinical intervention methods that may be used by the social worker to address specific client needs. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: SOC_WK 7770. Restricted to graduate Social Work majors

SOC_WK 8090: Master's Research in Social Work

Independently conducted research that includes concept development, data collection, statistical analysis and social policy implications prepared in a format suitable for publication. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: departmental consent required

SOC_WK 8100: Mental Health Policies and Programs

Focus is on knowledge of the content, context, history and current trends in mental health policymaking at federal and state levels, and skill building in policy analysis. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: departmental consent required

SOC_WK 8200: Family and Child Welfare Policies and Programs

Graduate seminar on policies and programs relevant to social work practice in the family and child welfare field, including policies on aging.

Credit Hours: 3

Prerequisites: departmental consent required

SOC_WK 8210: Disability Rights Advocacy

Highlights historical views of disabilities in relationship to contemporary policies, programs and services. This cross-disability focus examines the shift in focus from cure, care, and treatment to participation, capabilities, adapting environments, and building community. Graded on A-F basis only.

Credit Hours: 3

SOC_WK 8220: Integrated Health Policy and Services

The course focuses on the role of social workers as social policy practitioners within an Integrated Behavioral Health environment. Strategies to influence policies and promote change in the interest of

service consumer, agency, and society will be presented. Graded on A-F basis only.

Credit Hours: 3

SOC_WK 8240: Social Policy for Older Adults

Course highlights social policies that impact older adults, and teaches policy analysis skills. By utilizing a comparative model, students will broaden their knowledge and understanding of aging, policy, and the world. Graded on A-F basis only.

Credit Hours: 3

SOC_WK 8250: Equity and Disparities in Health

(same as P_HLTH 8250). This course is designed to provide students with knowledge about the distribution, causes, and consequences of health inequalities. The course will examine how multiple predictors such as socioeconomic status, behavioral risk factors, and cultural factors such as perceived discrimination and acculturation, gender and marriage, stigma, and health care inequalities are related with racial/ethnic, socioeconomic, and gender disparities in health. This course will also discuss implications that may contribute substantively toward the elimination of health inequalities. Graded on AF basis only.

Credit Hours: 3

Prerequisites: SOC_WK 7710, SOC_WK 7720, SOC_WK 7730, SOC_WK 7740 and SOC_WK 7760; Instructor's consent required

SOC_WK 8300: Advanced Social Policy for Planning and Administration

Focus on integration of cognitive and skill components of policy development, analysis and change with special emphasis on utility by social work administrators and planners.

Credit Hours: 3

Prerequisites: SOC_WK 7920; departmental consent required

SOC_WK 8350: Management of a Social Agency

Basic resource management and control techniques common to social agencies with emphasis on personnel management, information and data management, and fiscal management.

Credit Hours: 3

Prerequisites: restricted to Graduate Social Work majors

SOC_WK 8952: Evaluative Research in Clinical Social Work Practice

Develop ability to systematically evaluate effectiveness of interventive strategies designed to produce positive change in clients' environment and/or cognitive, affective and behavioral functioning.

Credit Hours: 3

Prerequisites: SOC_WK 7952. Restricted to graduate Social Work majors

SOC_WK 8953: Evaluative Research in Social Work Planning and Administration

Develop ability to design and implement appropriate evaluative research methods and strategies employed in social and human service program planning and management.

Credit Hours: 3

Prerequisites: SOC_WK 7952. Restricted to graduate Social Work majors

SOC_WK 8955: Independent Study in Social Work

Intensive investigation of phenomena germane to area of concentration carried out with guidance of faculty. May include data collection; leads to a written report in publishable format.

Credit Hour: 1-6

Prerequisites: departmental consent required

SOC_WK 8970: Professional Practice Seminar I

Provides integrative learning experience in social work practice in an area of beginning specialization in autonomous social work practice.

Credit Hours: 3

Prerequisites: restricted to graduate Social Work majors

Corequisites: SOC_WK 8971

SOC_WK 8971: Graduate Field Practicum II

Field instruction tailored to concentration interests, developing depth in clinical skills in direct service or in planning and administration. Graded on S/U basis only.

Credit Hour: 1-13

Prerequisites: Restricted to graduate Social Work majors. Completion of all required graduate coursework except SOC_WK 8970

Corequisites: SOC_WK 8970

SOC_WK 8990: Topics in Advanced Social Welfare

Topics in Advanced Social Welfare.

Credit Hours: 3

Prerequisites: Instructor's consent required

SOC_WK 9001: Topics in Social Work

Special and emerging topics in social work and social welfare. Subject, content, and credit varies depending on available faculty and student interest. May be repeated for credit.

Credit Hour: 1-3

Prerequisites: departmental consent required

SOC_WK 9090: Research in Social Work

Research in Social Work. Graded on S/U basis only.

Credit Hour: 1-12

SOC_WK 9100: Knowledge Building I

Advanced systemic review of theories requisite for study and implementation of practice and policy centered research in social welfare and development; emphasis placed on critical analysis of theories needed for research and study of integrated social development.

Credit Hours: 3

Prerequisites: departmental consent required

SOC_WK 9200: Knowledge Building IIA

Building on the foundation laid in SOC_WK 9100, in depth examination of human development and social environment theories appropriate to

scientific examination of social welfare practice with individuals, families, formed and natural groups.

Credit Hours: 3

Prerequisites: departmental consent required

SOC_WK 9300: Research Methodology and Design Seminar

Review of historical development of social welfare and social work research with emphasis on critical analysis of seminal studies; examination of "state-of-the-art" social welfare and development initiatives, designs and methodology.

Credit Hours: 3

Prerequisites: departmental consent required

SOC_WK 9350: Advanced Quantitative and Qualitative Methods in Social Research

The course provides an in-depth understanding of the use of both quantitative and qualitative methods. The curriculum emphasizes an integration of quantitative and qualitative approaches, methods, and data analysis. Computer application sessions are included. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: SOC_WK 9300 or permission of instructor

SOC_WK 9400: Macro Social Theory

(Same as NURSE 9400). Building on the foundation laid in SOC_WK 9100, in depth examination of human development and social environment theories appropriate to scientific examination of social welfare practice with formal organizations, interorganizational combinations, communities and larger political entities.

Credit Hours: 3

Prerequisites: departmental consent required

SOC_WK 9500: Pro Seminar I

Joint student-faculty exercise in intellectual discovery focusing on current and emerging issues in the field of social work and social development; emphasis on integration of multi-disciplinary perspectives. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: departmental consent required

SOC_WK 9560: Qualitative Systematic Reviews

(Same as NURSE 9560 and H_D_FS 9560) Examine and carry out elements of qualitative systematic reviews: topic/problem identification, data collection, and analysis. Understand how to limit threats to validity and maximize generalizability.

Credit Hours: 3

Prerequisites: NURSE 9420 or equivalent

SOC_WK 9600: Professional Seminar II

This second seminar focuses on topics related to long term professional success for doctoral students. The seminar covers topics on conference presentations, peer-reviewed publications, external funding, and academic job search process. Graded on S/U basis only.

Credit Hour: 1

SOC_WK 9650: Pedagogical Methods in Social Work and Applied Professional Programs

An in depth examination of the pedagogical issues, policies, and principles associated with teaching social work in higher education. Topics include the history and philosophy of social work education, instructional models and methods, assessing educational outcomes, and instructional improvement methods. Issues specific to social work include the need to differentiate teaching methods relative to direct practice, human services administration, community organization, policy practice, and program evaluation. Particular focus will be directed toward online education and its role in the 21st century. Graded on S/U basis only.

Credit Hour: 1

SOC_WK 9700: Social Welfare Policy Seminar

(Same as NURSE 9700). Critical examination of comparative models of social policy development; preparation of a professional social work policy analysis in the student's area of interest/specialization that is suitable for submission to an appropriate referred journal.

Credit Hours: 3

Prerequisites: departmental consent required

SOC_WK 9800: Research Application I

Research practicum for Social Work doctoral students.

Credit Hours: 3

Prerequisites: departmental consent required

SOC_WK 9850: Research Application II

Research Practicum. In most cases it will be a second research practicum but may also be a continuation of the research conducted in SOC_WK 9800. Prerequisites: departmental consent required

Credit Hours: 3

SOC_WK 9890: Dissertation Seminar

This course will assist doctoral students in planning and writing the dissertation.

Credit Hours: 3

Prerequisites: departmental consent required

SOC_WK 9900: Doctoral Dissertation Research in Social Work

Independently conducted research that includes concept development, data collection, statistical analysis and social policy implications prepared in a format suitable for publication. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: departmental consent required

Sociology Courses

SOCIOL 1000: Introduction to Sociology

Nature of organization and activities of human groupings-family, community, crowd, social class, etc.; structure, function of institutions; social influences shaping personality, behavior, social change. No credit for both SOCIOL 1000 and RU_SOC 1000.

Credit Hour: 1-3

SOCIOL 1000H: Introduction to Sociology Honors

Nature of organization and activities of human groupings-family, community, crowd, social class, etc.; structure, function of institutions; social influences shaping personality, behavior, social change. No credit for both SOCIOL 1000 and RU_SOC 1000.

Credit Hours: 3

Prerequisites: Honors eligibility required

SOCIOL 1120: Population and Ecology

(same as RU_SOC 1120 and PEA_ST 1120). Changes in the structure and characteristics of population groups and their relationship to both human and non-human aspects of the biophysical environment.

Credit Hours: 3

SOCIOL 1360: The Female Experience: Body, Identity, Culture

(same as WGST 1360). Study of the experience of being female in American culture. Course will focus on development of women's identities through such topics as: sexuality, reproduction, self-image, rape and health care.

Credit Hours: 3

SOCIOL 1650: Social Deviance

Survey of approaches to the study of behaviors commonly regarded as deviant such as crime, sexual abuse, substance abuse, mental illness, etc.

Credit Hours: 3

SOCIOL 2103: Topics in Sociology-Behavioral Science

Organized study of selected topics. Particular topics may vary from semester to semester. Departmental consent for repetition.

Credit Hour: 1-3

SOCIOL 2182: Critical Dialogues: Nonviolence in Peace/Democracy Movements

(same as Peace Studies PEA_ST 2182). History and theory of nonviolent action. Study of such cases as Gandhi's Independence, American Civil Rights and Polish Solidarity movements.

Credit Hours: 3

Prerequisites: PEA_ST 1050 or instructor's consent

SOCIOL 2200: Social Inequalities

(same as BL_STU 2200). Survey of inequalities based upon criteria such as race, ethnicity, sex, age, religion and social class in contemporary societies. Focus on dynamics by which privilege and inequalities are structured.

Credit Hours: 3

SOCIOL 2210: The Black Americans

(same as BL_STU 2210). Analysis of history of blacks in the United States. Assessment of contemporary black community in terms of its institutions, styles of life, patterns of work and intergroup relations.

Credit Hours: 3

SOCIOL 2230: Social Perspectives on Aging

Survey of basic knowledge in social gerontology, aging and old age in American society. Analysis of changes as individuals age, differences among old people, social problems of the aged.

Credit Hours: 3

Prerequisites: SOCIOL 1000 or equivalent

SOCIOL 2255: Youth, Islam, and Global Cultures

(same as PEA_ST 2255). Youth subcultures and the social issues and problems faced by youth, focusing on the Islamic world and Muslim immigrants, in the United States and elsewhere. Social and behavioral theories and concepts such as paths to modernization, Orientalism, post-colonialism, population movements, social construction, identity, and recognition will be illustrated.

Credit Hours: 3

SOCIOL 2280: Race, Democracy, and Violence in Cuba and Haiti

(same as PEA_ST 2280). A sociological approach to understand race/ethnicity, identity, citizenship, human rights, violence, and political and economic systems in the Caribbean. Comparisons of the culture, politics, and historical trajectories of Cuba and Haiti using Post-Colonial and Feminist theories. Graded on A-F basis only.

Credit Hours: 3

SOCIOL 2281: Nuclear Weapons: Environmental, Health and Social Effects

(same as HLTH_SCI 2200 and PEA_ST 2200). Environmental consequences of the nuclear arms race, "regional" nuclear war, and weapons testing for human health, agriculture, and society. Examining "a world without nuclear weapons"; political dialogue on proliferation; Iran, North Korea, and nuclear weapons conventions. Graded on A-F basis only.

Credit Hours: 3

SOCIOL 2284: Critical Dialogs: Global Environmental Policy Conflicts

(same as PEA_ST 2284). Climate change, water supplies, food, sustainability, industrialization, and chemical, oil, radioactive pollution. Activity of transnational corporations, social harm, and formulation of international policies. Analysis of alternatives using criteria of justice: distribution, recognition, participation, legality.

Credit Hours: 3

SOCIOL 2285: Large Corporations, Economic Crisis, Social Responsibility

(same as PEA_ST 2285). Institutional power of the corporate CEO; ethical regulatory restraint. Historical contexts of economic crisis. Theories of justice, alternative concepts of justice in popular culture. Politics of policy issues in prosecution and criminalization of corporate behavior. Graded on A-F basis only.

Credit Hours: 3

SOCIOL 2286: Technological Futures, National Security, and Civil Liberties

(same as PEA_ST 2286). Contemporary practices and future trends in data collection and mining by the NSA and by businesses. The interplay of government and corporate power, and possibilities of regulation and maintenance of privacy and civil liberties. The development of digital intellectual copyright and its consequences on patterns of dissemination of knowledge.

Credit Hours: 3

SOCIOL 2300: Self and Society

Analysis of the self in modern society. Topics covered include social interaction, social perception, language and learning, the sociology of emotions and the social construction of identity.

Credit Hours: 3

SOCIOL 2310: Culture and Mass Media

Sociological study of modern folk, local, popular and mass cultural production and consumption; mass media, diffusion, change, differentiation.

Credit Hours: 3

SOCIOL 2950: Social Research I

(same as RU_SOC 2950). Introduction to principles of methodology; theory and research; survey of basic research designs and perspectives; preparation for understanding and conducting social research.

Credit Hours: 3

Prerequisites: Required for Sociology majors

SOCIOL 3000: Urban Sociology

Urbanism as a world phenomenon; ecological, demographic characteristics of cities; organization of urban society including status systems, occupational structure, formal and informal associations, racial and cultural relations, forms of communication, housing, city planning.

Credit Hours: 3

SOCIOL 3010: Social Problems

Trends in modern societies: urbanization, occupational structure, technological change, etc. as these have produced alienation and legitimacy problems. Political, economic, health, welfare, military, justice institutions may be considered. Counter movements and policy issues.

Credit Hours: 3

SOCIOL 3100: Recent Theories in Sociology

(same as RU_SOC 3100). Introduction to major theoretical positions and issues in contemporary American sociology. Logical and intellectual structure of major theoretical schools: functionalism, conflict, exchange, symbolic interaction, phenomenological-ethnomethodological theories.

Credit Hours: 3

Prerequisites: Sociology majors only. Non-sociology majors may petition the instructor to add the course

SOCIOL 3200: Class, Status, and Power

Study of the structure of wealth, poverty, prestige, and power. Concepts of social justice in political, economic and legal issues and policies. Provides student engagement in research.

Credit Hours: 3

SOCIOL 3210: Sociology of Globalization

Globalization's origin and dynamics; the social and political effects of globalization: countervailing forces to economic globalization, in particular reassertions of "traditional" identities, labor movements, new social movements, and the global democracy movement.

Credit Hours: 3

SOCIOL 3230: Education and Social Inequalities

Examination of the ways in which inequalities are constructed, reproduced, maintained or transformed by and within educational institutions. Particular attention will be given to inequalities based on gender, race, and social class.

Credit Hours: 3

SOCIOL 3255: Youth in Today's World

Study of what factors influence the development of youth in today's society. Examined are types of behavior such as mating, deviance and the role of schools, parents, TV and friendship groups.

Credit Hours: 3

SOCIOL 3300: Queer Theories/Identities

(same as WGST 3300). Analysis of gay, lesbian, bisexual, transgender (GLBT) and queer identities in culture and society with an emphasis on the contributions of queer theory and other GLBT standpoint theories to sociology and the study of society.

Credit Hours: 3

Prerequisites: SOCIOL 2200 or instructor's consent

SOCIOL 3310: Social Psychology

Survey of theories and research concerned with the ways in which individuals construct social situations and are affected by them. Topics covered include self-identities, social influence, personal relationships, prejudice and discrimination.

Credit Hours: 3

SOCIOL 3320: Sociology of Gender

(same as WGST 3320). Study of the ways in which femininities and masculinities are constructed in American society with particular attention to gender ideologies and the gendered nature of the social structure.

Credit Hours: 3

SOCIOL 3330: Environmental Justice

(same as PEA_ST 3330). Environmental justice refers to the ways in which the "cost and benefits" of modern industrial society are distributed among social groups. This course is concerned with justice, not as an abstract concept, and inequality not in terms of numbers in a bank account. Social justice or inequality are lived, embodied experiences. An individual's likelihood of experiencing environmental harm is

related to intersecting gender, race and class formations, among other things. Justice or inequality is not only embodied, it also happens in places--national and regional differences matter. In this course we will look at some of the extensive literature documenting the ways in which communities of color and poor communities are subject to disproportionate environmental risks. In addition, we will focus on gender as an important category in understanding environmental inequality.

Credit Hours: 3

SOCIOL 3400: Politics of the Media

(same as PEA_ST 3400). In this course we study critical thinking skills and use them to compare and contrast U.S. media coverage of current issues with media in other parts of the world. Graded on A-F basis only.

Credit Hours: 3

SOCIOL 3420: The Family

Families, kin and households as interacting groups; roles, socialization, problems, structural change; family in relation to other social institutions; historical, cultural and class variations.

Credit Hours: 3

SOCIOL 3430: The Sociology of Sport

The role of sport in modern society. Includes violence in sport; politics and economics of sport; male, female, and racial inequalities; and international comparisons of sport structures.

Credit Hours: 3

SOCIOL 3440: Sociology of Health

A survey of sociological thinking and research on health, health problems, health occupations and health services. How these are shaped by the society. Problems faced by individuals and the system. Potential solutions to problems.

Credit Hours: 3

SOCIOL 3450: The Sociology of Religion

Sociology of religious experience, action, organization, movements and social change; contemporary trends, including mainline and new religions, civil religion, secularization.

Credit Hours: 3

SOCIOL 3460: Technology and Society

In the last few decades science and technology have permeated our lives as never before. This has led to wide ranging intellectual debates and social movements in and around the issue of relationship between science, technology, and society. This course, which is organized on a lecture-seminar format, will critically investigate different aspects of the relationship between science, technology, and society. Graded on A-F basis only.

Credit Hours: 3

SOCIOL 3510: Public Opinion and Communication

Nature of public opinion; processes of opinion formation; special publics, pressure groups; effects of communication through personal contacts and mass media; propaganda, censorship; opinion surveying.

Credit Hours: 3

SOCIOL 3520: Collective Behavior

(same as PEA_ST 3520). Analysis of crowd behavior and related phenomena: rumors, disasters, fashions. Social responses to unclear, dangerous or unjust conditions. The dynamics of conflict, consensus and change.

Credit Hours: 3

SOCIOL 3522: New Media, Conflict and Control

(same as PEA_ST 3522). This course will explore the increasing role of new media tools in conflict and surveillance. Examples from recent conflicts will illustrate how citizens and regimes use new media to communicate, report, mobilize, monitor, and/or control. Students will utilize new media as they research instances of democracy and control.

Credit Hours: 3

SOCIOL 3600: Criminology

(same as PEA_ST 3600). Sociology of law; constitutional, psychological, sociological theories of criminal behavior; process of criminal justice; treatment of corrections; control of crime.

Credit Hours: 3

SOCIOL 3700: Organizations and Institutions

Social organization of modern societies with focus on complex organizations (corporations, bureaucracies) within institutional arrangements (economy, polity, education, religion); organizational structure; interorganizational networks; interrelations of institutional sectors.

Credit Hours: 3

SOCIOL 3710: The Sociology of Work

Analysis of occupational, professional aspects of American society. Division of labor; occupational mobility; work and the self; collegueship and informal organizations of work.

Credit Hours: 3

Prerequisites: SOCIOL 1000 or SOCIOL 1650

SOCIOL 4100: Expert Systems

Introduction to the use of expert system shells, designed for graduate students from any department. Students create prototype expert systems under close supervision by faculty experts.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

SOCIOL 4104: Topics in Sociology-Social Science

Organized study of selected topics. Particular topics may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hours: 3

SOCIOL 4110: Feminist Research and Criticism

(same as WGST 4110). Examination of both feminist critiques of traditional social research and recent, feminist-oriented research that attempts to answer these criticisms.

Credit Hours: 3

Prerequisites: SOCIOL 2950

SOCIOL 4120: Social Statistics

(same as RU_SOC 4120). Descriptive statistics and bivariate quantitative analysis techniques commonly used by social scientists. Includes coverage of parametric and non-parametric methods. Introduction to computer analysis.

Credit Hours: 3

Prerequisites: SOCIOL 2950 or graduate standing

SOCIOL 4200: Social Inequalities

Examination of theories and research concerned with inequalities based on social class, gender, and race-ethnicity. M.A. core course for sociology students.

Credit Hours: 3

Prerequisites: graduate standing or instructor's consent

SOCIOL 4210: Aging and the Life Course

Course will take a life course perspective on the sociological aspects of aging in contemporary American society. Begins with birth, then childhood, adolescence, emergent adulthood, middle life, old age, and death. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Junior standing or above

Recommended: At least three credits in Sociology prior to enrollment is preferred

SOCIOL 4220: Race and Ethnic Relations

The experience of racial and ethnic minorities; inequality, assimilation, ethnic and racial conflict, accommodation.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

SOCIOL 4230: Women, Development, and Globalization

(same as BL_STU 4230 and WGST 4230 and PEA_ST 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities.

Credit Hours: 3

Prerequisites: BL_STU 1332, BL_STU 2200; SOCIOL 2200; WGST 1332 or WGST 2010

SOCIOL 4235: Social Perspectives on Gender and Emotion

(same as BL_STU 4235, WGST 4235; cross-leveled with BL_STU 7235, SOCIOL 7235, WGST 7235). Examines theories of affect and emotions, the social contexts and the implications for human development and behavior, with special emphasis on sex, gender, race, class and culture. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: WGST 1332 or WGST 1360; SOCIOL 1360 or SOCIOL 2300; BL_STU 1332 or BL_STU 2200; junior standing

SOCIOL 4300: Death and Dying

Death and dying explored from demographic, sociological and social psychological perspectives. Topics: trends and differentials; definitions of death; dying as a social process; funerals and survivors; cultural solutions to problems of death.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

SOCIOL 4310: Advanced Social Psychology

(cross-leveled with SOCIOL 7310). Major theoretical fields and their application to human problems. M.A. core course.

Credit Hours: 3

Prerequisites: SOCIOL 3310 or graduate standing

SOCIOL 4315: Social Demography

(same as RU_SOC 4315). General demographic theories; age, sex, and ethnic composition of population; fertility, mortality and migration as components of population change; social, economic and political implications of demographic trends.

Credit Hours: 3

Prerequisites: SOCIOL 1000 or RU_SOC 1000 and junior standing

SOCIOL 4320: Culture, Identity and Interaction

Examines the interplay between culture, identity, and interaction as these intersect with issues of social inequality, social control, social change, and the everyday production of subjectivities.

Credit Hours: 3

Prerequisites: SOCIOL 3310 graduate standing or instructor's consent

SOCIOL 4335: Social Change and Development

(same as RU_SOC 4335). Nature of social change and development. Emphasizes sociological theories of social change and development contrasting them with approaches from the disciplines.

Credit Hours: 3

Prerequisites: RU_SOC 1000 or SOCIOL 1000 and junior standing

SOCIOL 4370: Environment and Society

(same as RU_SOC 4370). An interdisciplinary examination of domestic and international environmental issues focusing on social, cultural, and policy dimensions. Perspectives of the social sciences and humanities are included.

Credit Hours: 3

Prerequisites: junior, senior or graduate standing

SOCIOL 4400: Sociology of Health Systems

Analyzes organization of U.S. health system and systems in the developed and developing world. Special attention to reform movements, universality, effectiveness, quality, and efficiency.

Credit Hours: 3

Prerequisites: SOCIOL 2950, SOCIOL 3440, and SOCIOL 3100 or graduate standing

SOCIOL 4410: Sociology of Education

(cross-leveled with ED_LPA 7458 and SOCIOL 7410). Contexts, structures and processes of schooling; effects on class, race, ethnicity and gender; social change, educational policy, and organizational dynamics; higher education and the economy.

Credit Hours: 3

Prerequisites: SOCIOL 1000 or equivalent

SOCIOL 4500: Sociology of Social Policy

Sociological theories and methodologies focused on social policy; policy as process; contextual and critical policy analyses; assessing policy effects and consequences.

Credit Hours: 3

Prerequisites: senior standing

SOCIOL 4510: Social Movements and Conflicts

Survey of approaches and research on social movements and social change. Historical and contemporary social movements in the U.S.; collective protest and violence; political revolutions. MA core course.

Credit Hours: 3

Prerequisites: SOCIOL 3520, SOCIOL 3700, or SOCIOL 3320 or graduate standing

SOCIOL 4520: Political Sociology

(same as PEA_ST 4520). Social bases of power and politics, economic and political elites, the political economy of the advanced societies, sources of political conflict and change.

Credit Hours: 3

Prerequisites: SOCIOL 3200, SOCIOL 3510, SOCIOL 3520, or SOCIOL 3700

SOCIOL 4530: Social Organization of the Industrial Societies

The organizational and interorganizational structure of modern capitalist and socialist societies, including examination of alternative models such as technocracy, bureaucratic society, state capitalism, state socialism, organized capitalism.

Credit Hours: 3

Prerequisites: SOCIOL 3700 or SOCIOL 3710

SOCIOL 4550: Gender and Human Rights in Cross Cultural Perspective

(same as WGST 4550 and PEA_ST 4550). This course focuses on the global discourse on human rights and gender, emphasizing cross-cultural theories. Course includes the meaning of rights, Western and non-western perspectives, feminist contributions, important substantive debates, violations, policymaking and activism.

Credit Hours: 3

Prerequisites: WGST 1120 or SOCIOL 2200; senior standing required

SOCIOL 4600: Contemporary Corrections

Development of concepts of punishment, treatment. Contemporary penal and correctional institutions; problems of custody, classification, education, industry and treatment program; probation, parole.

Credit Hours: 3

Prerequisites: SOCIOL 2200 and SOCIOL 3600

SOCIOL 4610: Society and Social Control

The concept of social control is analyzed from both micro and macro theoretical perspectives. Focus is on patterns of social domination.

Credit Hours: 3

Prerequisites: SOCIOL 3700 or SOCIOL 3710

SOCIOL 4620: Drugs and Society

Course will examine the social, political, and economic aspects of legal and illegal drug use in American society. Issues include: theories of drug use, the social correlates of drug use, the war on drugs and policy alternatives, and the rise of the pharmaceuticals industry. Graded on A/F basis only

Credit Hours: 3

SOCIOL 4630: Sociology of Mental Health

Course examines the social aspects of mental health and illness. Topics include: stress and mental health, medicalization of behavior, stigma and labeling, mental health care systems, social correlates of mental health (such as gender, childhood, work status, and social support).

Credit Hours: 3

Prerequisites: 1000 level sociology course or 1000 level Psychology course

SOCIOL 4700: Social Organization

Survey of approaches to the analysis of social organization emphasizing complex organizations, division of labor, social inequality, politics and the state, social change. MA core course.

Credit Hours: 3

Prerequisites: SOCIOL 3700 or SOCIOL 3710 or graduate standing or instructor's consent

SOCIOL 4940: Internship in Sociology

Professional experience under faculty supervision. Project must be arranged by student and faculty member prior to registration.

Credit Hour: 1-9

Prerequisites: junior standing and instructor's consent

SOCIOL 4942: Service Learning in Sociology

Students participate in a variety of research-oriented, community service projects which illuminate and reinforce concepts introduced in various sociology courses. Repeatable twice for credit. Does not meet Arts and Science general education requirements.

Credit Hours: 3

Prerequisites: instructor's consent

SOCIOL 4960: Special Readings in Sociology

Extensive reading in selected area or special field.

Credit Hour: 1-99

Prerequisites: 12 hours Sociology and departmental consent

SOCIOL 4970: Senior Seminar

Integrates perspectives, methods, substantive foci of undergraduate courses. Analysis of sociology as a discipline and profession. Discussion of opportunities for graduate study, employment.

Credit Hours: 3

Prerequisites: SOCIOL 2950 and SOCIOL 3100 and senior sociology major

SOCIOL 4995: Honors in Sociology

Intensive work in a selected field within sociology, including readings and research. Repeatable up to 6 hours with departmental consent.

Credit Hours: 3

Prerequisites: for honors candidates; SOCIOL 2950 and SOCIOL 3100

SOCIOL 7004: Topics in Sociology-Social Science

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated with departmental consent.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent

SOCIOL 7085: Problems in Sociology

Directed research not leading to thesis or dissertation.

Credit Hour: 1-99

Prerequisites: 12 hours Sociology and departmental consent

SOCIOL 7100: Expert Systems

Introduction to the use of expert system shells, designed for graduate students from any department. Students create prototype expert systems under close supervision by faculty experts.

Credit Hours: 3

Prerequisites: departmental consent

SOCIOL 7110: Feminist Research and Criticism

(same as WGST 7110). Examination of both feminist critiques of traditional social research and recent, feminist-oriented research that attempts to answer these criticisms.

Credit Hours: 3

SOCIOL 7120: Social Statistics

(same as RU_SOC 7120). Descriptive statistics and bivariate quantitative analysis techniques commonly used by social scientists. Includes coverage of parametric and non-parametric methods. Introduction to computer analysis.

Credit Hours: 3

Prerequisites: SOCIOL 2950

SOCIOL 7200: Social Inequalities

Examination of theories and research concerned with inequalities based on social class, gender, and race-ethnicity. M.A. core course for sociology students.

Credit Hours: 3

SOCIOL 7210: Sociology of Aging

Sociological research and theories of aging and old age; historical, demographic, comparative, social psychological and structural topics are studied in depth.

Credit Hours: 3

Prerequisites: 6 hours of Sociology

SOCIOL 7220: Race and Ethnic Relations

The experience of racial and ethnic minorities; inequality, assimilation, ethnic and racial conflict, accommodation.

Credit Hours: 3

Prerequisites: SOCIOL 1000 or equivalent

SOCIOL 7230: Women, Development and Globalization

(same as WGST 7230 and BI_STU 7230; cross-leveled with WGST 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities.

Credit Hours: 3

SOCIOL 7235: Social Perspectives on Gender and Emotion

(same as WGST 7235, BL_STU 7235; cross-leveled with WGST 4235, SOCIOL 4235, BL_STU 4235). Examines theories of affect and emotions, the social contexts and the implications for human development and behavior, with special emphasis on sex, gender, race, class and culture. Graded on A-F basis only.

Credit Hours: 3

SOCIOL 7287: Seminar in Comparative Social Institutions

Analysis of selected social institutions such as agriculture, family, economy, education, health care, law, polity, religion. Inter-institutional and international comparisons.

Credit Hours: 3

Prerequisites: SOCIOL 4700 or instructor's consent

SOCIOL 7300: Death and Dying

Death and dying explored from demographic, sociological and social psychological perspectives. Topics: trends and differentials; definitions of death; dying as a social process; funerals and survivors; cultural solutions to problems of death.

Credit Hours: 3

Prerequisites: instructor's consent

SOCIOL 7310: Advanced Social Psychology

(cross-leveled with SOCIOL 4310). Major theoretical fields and their application to human problems.

Credit Hours: 3

Prerequisites: SOCIOL 3310

SOCIOL 7315: Social Demography

(same as RU_SOC 7315). General demographic theories; age, sex, and ethnic composition of population; fertility, mortality and migration

as components of population change; social, economic and political implications of demographic trends.

Credit Hours: 3

Prerequisites: SOCIOL 1000 or RU_SOC 1000

SOCIOL 7320: Culture, Identity and Interaction

Examines the interplay between culture, identity, and interaction as these intersect with issues of social inequality, social control, social change, and the everyday production of subjectives.

Credit Hours: 3

Prerequisites: SOCIOL 3310

SOCIOL 7335: Social Change and Development

(same as RU_SOC 7335). Nature of social change and development. Emphasizes sociological theories of social change and development contrasting them with approaches from the disciplines.

Credit Hours: 3

Prerequisites: RU_SOC 1000 or SOCIOL 1000

SOCIOL 7340: Self, Language, and Social Life

Examines the interplay between self, language, and social life. Particular attention is paid to how the everyday construction of inner lives relates to diverse social worlds. The effects of situational and institutional conditions as they shape identity and social interactions are important considerations.

Credit Hours: 3

SOCIOL 7370: Environment and Society

(same as RU_SOC 7370). An interdisciplinary examination of domestic and international environmental issues focusing on social, cultural, and policy dimensions. Perspectives of the social sciences and humanities are included.

Credit Hours: 3

SOCIOL 7387: Seminar in Sociology of Work

Recent developments in the sociological study of occupations and professions. Surveys alternative theoretical perspectives and methodological approaches. Deals with rationalization, professionalization, alienation, class consciousness, self management.

Credit Hours: 3

SOCIOL 7400: Medical Sociology

Covers on the social organization of medical systems, health and illness, the patient experience and healthcare workers in the United States.

Credit Hours: 3

SOCIOL 7410: Sociology of Education

(same as ED_LPA 7458; cross-leveled with SOCIOL 4410). Contexts, structures and processes of schooling; effects on class, race, ethnicity and gender; social change, educational policy, and organizational dynamics; higher education and the economy.

Credit Hours: 3

SOCIOL 7446: Community Social Structure

(same as RU_SOC 7446). A comparative study of communities in different nations and in urban and rural areas. A primary focus of the course will be on social change in communities, in response to changing economic, political, social, cultural, and ecological factors.

Credit Hours: 3

SOCIOL 7487: Seminar in Sociology of Organizations

Recent developments in the sociological analysis of complex organizations, including corporations, public bureaucracies, educational organizations, religious organizations, etc. Surveys alternative theoretical perspectives and methodological approaches.

Credit Hours: 3

SOCIOL 7500: Sociology of Social Policy

Sociological theories and methodologies focused on social policy; policy as process; contextual and critical policy analyses; assessing policy effects and consequences.

Credit Hours: 3

SOCIOL 7510: Social Movements and Conflicts

Survey of approaches and research on social movements and social change. Historical and contemporary social movements in the U.S.; collective protest and violence; political revolutions.

Credit Hours: 3

SOCIOL 7520: Political Sociology

(same as PEA_ST 7520). Social bases of power and politics, economic and political elites, the political economy of the advanced societies, sources of political conflict and change.

Credit Hours: 3

SOCIOL 7530: Social Organization of the Industrial Societies

The organizational and interorganizational structure of modern capitalist and socialist societies, including examination of alternative models such as technocracy, bureaucratic society, state capitalism, state socialism, organized capitalism.

Credit Hours: 3

Prerequisites: SOCIOL 3700 or SOCIOL 3710

SOCIOL 7550: Gender and Human Rights in Cross Cultural Perspective

(same as PEA_ST 7550 and WGST 7550). Focuses on the global discourse on human rights and gender, emphasizing cross-cultural theories. Course includes the meaning of human rights, western and non-western perspectives, feminist contributions, important substantive debates, violations, policymaking and activism.

Credit Hours: 3

SOCIOL 7587: Seminar in Culture and Mass Media

Sociological examination of culture and mass media, including institutional character, production and distribution, audience effects, relation of social structures. Current research, theories, methods.

Credit Hours: 3

SOCIOL 7600: Contemporary Corrections

Development of concepts of punishment, treatment. Contemporary penal and correctional institutions; problems of custody, classification, education, industry and treatment program; probation, parole.

Credit Hours: 3

Prerequisites: SOCIOL 2200 and SOCIOL 3600

SOCIOL 7610: Society and Social Control

The concept of social control is analyzed from both micro and macro theoretical perspectives. Focus is on patterns of social domination.

Credit Hours: 3

Prerequisites: SOCIOL 3700 or SOCIOL 3710

SOCIOL 7687: Seminar in Family Sociology

Research and theory on family structure and family life; in-depth study of a selection of topics and issues.

Credit Hours: 3

Prerequisites: SOCIOL 4210 or instructor's consent

SOCIOL 7700: Social Organization

Survey of approaches to the analysis of social organization emphasizing complex organizations, division of labor, social inequality, politics and the state, social change. MA core course.

Credit Hours: 3

Prerequisites: SOCIOL 3700 or SOCIOL 3710 or instructor's consent

SOCIOL 7960: Special Readings in Sociology for the Graduate Level

Extensive reading in selected area or special field. Graded on A-F basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

SOCIOL 8086: Teaching Sociology

This graduate seminar will cover current issues in higher education, building a teaching portfolio, the daily work of teaching, and work/life balance in academia. Graded on A-F basis only.

Credit Hours: 3

SOCIOL 8087: Critical Race Theory

Critical examination of key sociological theories of race, racialization, and racism in contemporary society.

Credit Hours: 3

SOCIOL 8100: Theoretical Thinking in Sociology

Close analysis of the texts of classical and contemporary social theory. Key concepts will be elaborated in the context of intellectual history, and will be applied to deepening the theoretical significance of an empirical research question on the student's emerging agenda. Required for all entering graduate students in Sociology.

Credit Hours: 3

SOCIOL 8110: Research in Sociology

Research not expected to terminate in thesis or dissertation.

Credit Hour: 1-6

Prerequisites: instructor's consent

SOCIOL 8120: The Logic of Social Research

Meta-theoretical and conceptual issues at the core of design decision making, questionnaire construction, qualitative field techniques, interviewing, scaling, panel analysis, computer applications to qualitative data; experimental, survey and case study designs, ethics. Required for Ph.D. students.

Credit Hours: 3

SOCIOL 8130: Advanced Social Statistics

(same as RU_SOC 8130). Introduction to multivariate analysis for social scientists. Emphasis on non-experimental applications of analysis of variance and correlation-regression. Computer applications emphasized.

Credit Hours: 3

Prerequisites: SOCIOL 7120 or equivalent

SOCIOL 8140: Seminar in Population Health

Graduate Seminar on the social distribution of morbidity and mortality. Covers major theoretical perspectives and the state of empirical evidence regarding several individuals and contextual explanations of health disparities. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor permission

SOCIOL 8150: Graduate Seminar in Urban Sociology

In this course we will survey the field of urban sociology. Urban sociology is the study of human social relations in cities and urbanized communities. We will consider urbanization in its preindustrial, industrial, and postindustrial forms in the U.S. and elsewhere. Graded on A-F basis only.

Credit Hours: 3

SOCIOL 8187: Seminar on Interview Theory and Technique

The seminar has three goals: First is the consideration of literature dealing with recent theoretical formulations of the interview. This will provide a basis, second, for critically examining a number of popular interview guidebooks. The third goal is to offer the opportunity to put theory and technique into practice by analyzing selected interview material.

Credit Hours: 3

Prerequisites: doctoral standing

SOCIOL 8250: Media and Power in Comparative Perspective Seminar

This course traces the historical development of U.S. and selected international media systems. We analyze and debate the relationship of differing media systems to political power, popular culture, and the facilitation or inhibition of democratic practices. Students do comparative analyses of international media institutions and related analyses of media content.

Credit Hours: 3

Prerequisites: undergraduate seniors may enroll with instructor's consent

SOCIOL 8277: Race, Ethnicity, and Transnational Inequalities

(same as BL_STU 8277). This graduate seminar examines the global contest of our radicalized modern world system. How do people develop and give meaning to race/ethnicity in different regions? Focus on the construction of bodies Creole identities, gender, sexualities, citizenships and immigration. Graded on A-F basis only.

Credit Hours: 3

SOCIOL 8287: Seminar on Sustainable Development

(same as RU_SOC 8287). An interdisciplinary examination of sustainable development focusing on social, economic, cultural and environmental dimensions of development. International and domestic issues and approaches to sustainable development are included.

Credit Hours: 3

SOCIOL 8387: Seminar on Narrative and Identity

Credit Hours: 3

Prerequisites: graduate standing required; instructor's consent required

SOCIOL 8425: Social Processes of Information/Knowledge Utilization

(same as RU_SOC 8425). Factors conditioning communication and diffusion of ideas and practices; exercise of personal influence; role of change agents and agencies in the process of change.

Credit Hours: 3

SOCIOL 8435: Graduate Seminar in Medicine, Technology, and Globalization

In the last two hundred years medicine and technology have transformed our day-to-day living as never before. They have permeated our social and personal imagination, our epistemological bearing, disciplinary practices, and not to forget national and global agendas. A key aspect of such transformations, which we are going to investigate in this course, has been the intertwining of medicine and technology in a variety of ways, resulting in wide ranging impact - from the emergence of medical gaze, transformation of healthcare practices, to present day transnationalization and globalization of medical practices. This course would utilize recent theoretical developments to interrogate different interrelated facets of medicine, technology, and globalization. Graded on A-F basis only.

Credit Hours: 3

SOCIOL 8687: Seminar in Criminology and Deviant Behavior

Survey of empirical research and sociological theory in criminology and deviant behavior. May be repeated once with instructor's consent.

Credit Hours: 3

Prerequisites: SOCIOL 3600

SOCIOL 8987: Seminar on the Sociology of Health and Sickness

Topical seminar dealing with one of three subject areas: (1) Health problems, disease, illness, sickness; (2) Occupations, and Organizations

in the health field, or (3) Comparative Health Care Systems. Course may be repeated for different topics.

Credit Hours: 3

SOCIOL 9090: Research

Advanced work leading to thesis or dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: consent of major advisor

SOCIOL 9187: Seminar in Sociological Theory I

Traces development of sociological theory from the "generation of 1890" through the 1940s, including the work of Durkheim, Weber, Parsons and others.

Credit Hours: 3

Prerequisites: SOCIOL 8100 or equivalent

SOCIOL 9287: Seminar in Qualitative Methods in Sociology

(same as RU_SOC 9287). Examination of various qualitative methods of research, including problem-formulation, access and interpretation of data, theory-generation, and preparation of research reports.

Credit Hours: 3

Prerequisites: SOCIOL 8120 and instructor's consent

SOCIOL 9288: Ethnographic Fieldwork

History of sociological ethnography, the analysis of key ethnographic texts, forms of ethnographic fieldwork, and recent debates related to representational practices. Applications to participant observation, field interviewing, and strategies of discourse analysis in various social settings.

Credit Hours: 3

Prerequisites: SOCIOL 9287, instructor's consent

SOCIOL 9300: Social Interaction Research

Seminar on research methods in social interaction. Prerequisites: PSYCH 8310 or instructor's consent

Credit Hours: 3

SOCIOL 9350: Graduate Seminar in Environmental Discourses

This seminar explores human cultural interactions with nature: how we understand ourselves in relation to space, how we interact with and learn about nature, and how we use nature. Readings will include exemplary texts from sociology, geography and anthropology, science studies and cultural studies. Graduate Standing required.

Credit Hours: 3

SOCIOL 9387: Seminar in Social Gerontology

Analysis of selected topics in the sociological study of age; critical issues; research literature and methodologies; development of theory.

Credit Hour: 2-3

Prerequisites: SOCIOL 4210 or instructor's consent

SOCIOL 9487: Seminar in Sociological Theory II

Theoretical developments in sociology in Europe and United States since 1950. Recent formulations, controversies.

Credit Hours: 3

Prerequisites: SOCIOL 8100 or equivalent

SOCIOL 9500: Seminar in State and Economy

Analysis of public policy and economic change in contemporary political-economic systems; growth of welfare state, capitalist planning, state socialist economics.

Credit Hours: 3

SOCIOL 9525: Culture, Difference, and Inequality

This course is an examination of exemplary, interdisciplinary texts employing a variety of cultural approaches to understanding difference and inequality. In this seminar, we will think about what is gained from various cultural approaches to difference and inequality, how such approaches can be achieved methodologically, and how students can apply such approaches to their own research. The main focus of the course is on cultural studies and poststructural feminist studies, but readings will also be included from intersectionality studies, affect studies, critical race studies and cultural sociology.

Credit Hours: 3

Prerequisites: restricted to Sociology graduate students or instructor permission

SOCIOL 9587: Topical Seminar in Contemporary Sociological Theory

Critical evaluation of selected points of view in current sociological theory. May be repeated with departmental consent.

Credit Hours: 3

Prerequisites: SOCIOL 8100 or equivalent

SOCIOL 9687: Topical Seminar in Historical Sociology

Methodological approaches to sociological explanation of historical phenomena; related sociological theories of historical development, including Weberian, Marxist and other perspectives applied to a topical historical problem.

Credit Hours: 3

Prerequisites: SOCIOL 8100 or equivalent

SOCIOL 9777: Graduate Seminar in Body and Society

The course is organized around three major themes - body as a site of personal and political experience; the social body, emphasizing the relationship between society, culture, and individuals; and the body as a site and instrument of politics. Readings assigned for the course are aimed at critical engagement with the "body: within and across these themes. Graded on A-F basis only.

Credit Hours: 3

SOCIOL 9837: Seminar in Multivariate Analysis Techniques

(same as RU_SOC 9837). Examination of various qualitative techniques of data analysis.

Credit Hours: 3

Prerequisites: SOCIOL 8120 or instructor's consent

SOCIOL 9887: Seminar in Sociology of Gender

Analysis of recent research in which gender is a major focus. This research is chosen to exemplify a variety of theoretical perspectives, research strategies, and substantive topics.

Credit Hours: 3

SOCIOL 9920: Independent Readings in Preparation f/ Comprehensive Examinations

Independent readings for PhD comprehensives. Open only to PhD candidates who have passed qualifying examinations.

Credit Hour: 1-6

Prerequisites: consent of major advisor

SOCIOL 9987: Seminar in Sociological Reasoning and Research Development

Systematic development of sociological research integrating theory, method, and contributions to knowledge. Formulations of sociological problems, conceptual frameworks, research programs analytical strategies.

Credit Hours: 3

Prerequisites: SOCIOL 8120 or equivalent; departmental consent; doctoral standing

Soil Science Courses

SOIL 2100: Introduction to Soils

(same as PLNT_S 2100). Introduction to soil sciences with emphasis placed on physical, biological, and chemical properties and application to land use, plant growth and environmental problems.

Credit Hours: 3

Recommended: 3 hours of Chemistry

SOIL 2106: Soil Science Laboratory

Laboratory application of fundamental soil science concepts.

Credit Hours: 2

Prerequisites: concurrent enrollment in SOIL 2100

SOIL 3001: Topics in Soil Science

Organized study of selected topics in soil science.

Credit Hour: 1-99

SOIL 3085: Problems in Soil Science

Special individualized research projects or readings in soil science.

Credit Hour: 1-99

SOIL 3290: Soils and the Environment

(same as ENV_SC 3290). Addresses the role of soils and soil properties on environmental pollution and management. Emphasis will be placed on carbon, nitrogen, phosphorus, and sulfur transformations and transport in natural and disturbed ecosystems and soil management practices and technology to prevent or remediate environmental pollution.

Credit Hours: 3

Prerequisites: SOIL 2100, ENGLSH 1000 or instructor's consent

SOIL 4001: Topics in Soil Science

Organized study of selected topics in soil science.

Credit Hour: 1-99

SOIL 4085: Problems in Soil Science

Special individualized non-thesis research projects or readings in soil science.

Credit Hour: 1-99

SOIL 4305: Environmental Soil Physics

(same as ENV_SC 4305). Study of soil physical properties and processes important in solving environmental problems. Topics include soil solids, water content and energy, and transport of water, solutes, gas and heat.

Credit Hours: 3

Prerequisites: SOIL 2100

SOIL 4306: Environmental Soil Physics Laboratory

(same as ENV_SC 4306). Introduction to the methodology and equipment for measurement of soil physical properties and processes.

Credit Hours: 2

Prerequisites or Corequisites: SOIL 4305

SOIL 4308: Soil Conservation

Conservation of soil with respect to topsoil, soil productivity, and fertility.

Credit Hours: 3

Prerequisites: SOIL 2100

Recommended: AG_S_M 4420

SOIL 4312: Environmental Soil Microbiology

(same as ENV_SC 4312). Microbiology/ecology of life in the soil ecosystem. Emphasis is placed on the role of microbes in nutrient cycling, microbial pesticide/xenobiotic transformation bioremediation, etc.

Credit Hours: 3

Prerequisites: general microbiology, SOIL 2100, or instructor's consent

SOIL 4313: Soil Fertility and Plant Nutrition

(same as PLNT_S 4313). Explanation of principles of delivery of plant nutrients to plants, discussion of the role of each essential nutrient in crop plants and introduction to the management of soil amendments.

Credit Hours: 3

Prerequisites: SOIL 2100 or instructor's consent

SOIL 4314: Soil Fertility and Plant Nutrition Laboratory

(same as PLNT_S 4314). The application of elementary analytical procedures to the evaluation of the nutrient status of soils and crop plants.

Credit Hours: 2

Prerequisites or Corequisites: SOIL 4313

SOIL 4318: Environmental Soil Chemistry

(same as ENV_SC 4318 and GEOL 4318). Study of chemical constituents and processes occurring in soils. Topics include soil

minerals, and weathering processes, organic matter, solution chemistry, oxidation-reduction reactions and adsorption processes.

Credit Hours: 3

Prerequisites: SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330; junior standing or instructor's consent

SOIL 4320: Genesis of Soil Landscapes

The co-evolution of soil landscapes. The role of water in the accumulation of parent materials and development of soil horizons. Factors and processes of soil genesis. Distribution of soil in their natural settings.

Credit Hours: 4

Recommended: introductory soil science or introductory geology course

SOIL 4360: Precision Agriculture Science and Technology

(same as AG_S_M 4360, PLNT_S 4360; cross-leveled with SOIL 7360, AG_S_M 7360, PLNT_S 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

Credit Hours: 3

Prerequisites: PLNT_S 2100 or SOIL 2100, or PLNT_S 2110, or instructor's consent

SOIL 4940: Soil Science Internship

Supervised professional experience with an approved public or private organization. Course may be repeated for credit. Graded on S/U basis only.

Credit Hour: 1-12

Prerequisites: Soil and Atmospheric Sciences majors only, instructor's consent

SOIL 4950: Undergraduate Research in Soil Science

Research apprenticeship with a faculty mentor. Students are expected to develop initial concept for the research, design experiments, collect data, and analyze data with faculty input, oversight, and guidance.

Credit Hour: 1-4

Prerequisites: SOIL 2100 and SOIL 2106, STAT 2530, and 9 hours of Soil Science with at least 3 hours above the 3000-level, and instructor's consent

SOIL 7001: Topics in Soil Science

Organized study of selected topics in soil science. Intended for graduate students.

Credit Hour: 1-99

SOIL 7085: Problems in Soil Science

Special individualized non-thesis research projects or readings in soil science.

Credit Hour: 1-99

Prerequisites: graduate standing

SOIL 7305: Environmental Soil Physics

(same as ENV_SC 7305). Study of soil physical properties and processes important in solving environmental problems. Topics include soil solids, water content and energy, and transport of water, solutes, gas and heat.

Credit Hours: 3

Prerequisites: SOIL 2100, PHYSCS 1210 or equivalent

SOIL 7306: Environmental Soil Physics Laboratory

(same as ENV_SC 7306). Introduction to the methodology and equipment for measurement of soil physical properties and properties and processes.

Credit Hours: 2

Prerequisites or Corequisites: SOIL 4305

SOIL 7308: Soil Conservation

Conservation of soil with respect to topsoil, soil productivity, and fertility.

Credit Hours: 3

Prerequisites: SOIL 2100

Recommended: AG_S_M 4420

SOIL 7312: Environmental Soil Microbiology

(same as ENV_SC 7312). Microbiology/ecology of life in the soil ecosystem. Emphasis is placed on the role of microbes in nutrient cycling, microbial pesticide/xenobiotic transformations bioremediation, etc.

Credit Hours: 3

Prerequisites: general microbiology, SOIL 2100, or instructor's consent

SOIL 7313: Soil Fertility and Plant Nutrition

(same as PLNT_S 7313). Explanation of principles of delivery of plant nutrients to plants, discussion of the role of each essential nutrient in crop plants and introduction to the management of soil amendments.

Credit Hours: 3

Prerequisites: SOIL 2100 or instructor's consent

SOIL 7314: Soil Fertility and Plant Nutrition Laboratory

(same as PLNT_S 7314). The application of elementary analytical procedures to the evaluation of the nutrient status of soils and crop plants.

Credit Hours: 2

Prerequisites or Corequisites: SOIL 7313

SOIL 7318: Environmental Soil Chemistry

(same as GEOL 7318 and ENV_SC 7318). Study of chemical constituents and processes occurring in soils. Topics include soil minerals, and weathering processes, organic matter, solution chemistry, oxidation-reduction reactions and adsorption processes.

Credit Hours: 3

Prerequisites: SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330; junior standing or instructor's consent

SOIL 7320: Genesis of Soil Landscape

The co-evolution of soil landscapes. The role of water in the accumulation of parent materials and development of soil horizons. Factors and processes of soil genesis. Distribution of soil in their natural settings.

Credit Hours: 4

Prerequisites: introductory soil science or introductory geology or permission of instructor

SOIL 7360: Precision Agriculture Science and Technology

(same as AG_S_M 7360 and PLNT_S 7360; cross-leveled with SOIL 4360, AG_S_M 4360, PLNT_S 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

Credit Hours: 3

Prerequisites: SOIL 2100, PLNT_S 2110 or instructor's consent

SOIL 8001: Topics in Soil Science

Organized study of selected topics in soil science. Intended for graduate students.

Credit Hour: 1-99

SOIL 8085: Problems in Soil Science

Special individualized non-thesis research projects or readings in soil science.

Credit Hour: 1-99

SOIL 8090: Masters Research in Soil Science

Original investigations in soil science for presentation in a thesis. Graded on S/U basis only.

Credit Hour: 1-10

SOIL 8400: Solute Transport in the Vadose Zone

(same as ENV_SC 8400). Transport of water and solutes in geomeidia with emphasis on development of the equations of flow. Evaluation of analytical and numeral solutions to equations describing transport phenomena.

Credit Hours: 3

Prerequisites: ENV_SC 7305 or SOIL 7305

SOIL 8450: Nonthesis Research in Soil Science

Research not expected to terminate in dissertation.

Credit Hour: 1-9

SOIL 8500: Chemistry of the Vadose Zone

(same as ENV_SC 8500). Chemical reactions occurring in geomeidia with emphasis on understanding molecular scale processes occurring at the solid-water interface, aqueous geochemistry, and soil organic matter.

Credit Hours: 3

Prerequisites: SOIL 7318 or GEOL 7300 or instructor's consent

SOIL 9001: Topics in Soil Science

Organized study of selected topics in soil science. Intended for graduate students.

Credit Hour: 1-99

SOIL 9085: Problems in Soil Science

Special individualized non-thesis research projects or readings in soil science.

Credit Hour: 1-99

SOIL 9087: Seminar in Soil Science

In-depth development of advanced aspects of soil science through reviews of results of research in progress and current scientific publications.

Credit Hour: 1

SOIL 9090: Doctoral Research in Soil Science

Original investigations in soil science for presentation in a dissertation. Graded on S/U basis only.

Credit Hour: 1-10

SOIL 9407: Advanced Environmental Soil Physics

(same as ENV_SC 9407). Transport of mass and energy through soil with emphasis on development of the equations of flow. Evaluation of analytical and numerical solutions to differential equations describing transport phenomena.

Credit Hours: 3

Prerequisites: SOIL 7305, MATH 4100 or MATH 7100, or equivalent

SOIL 9414: Advanced Soil Fertility

History and application of concepts of fertility and plant nutrition.

Credit Hours: 3

Prerequisites: SOIL 7313 and PLNT_S 7315 or equivalent, 14 hours of college chemistry and five hours of calculus

SOIL 9418: Advanced Environmental Soil Chemistry

(same as ENV_SC 9418). Linking molecular-scale solution-phase and surface reactions with macroscopic chemical processes. Fundamentals of aqueous surface and colloid chemistry will be discussed.

Credit Hours: 3

Prerequisites: SOIL 7318 or GEOL 7300, and CHEM 3300

SOIL 9422: Pedology

Three one-hour lectures. Detailed study of processes of soil horizonization and current topics in soil genesis including quantitative assessment of spatial and temporal variability and application of GIS in landuse planning.

Credit Hours: 3

Prerequisites: SOIL 7320, one statistics course beyond ANOVA

South Asia Studies Courses

S_A_ST 1004: Topics in South Asian Studies - Social Science

Special topics.

Credit Hours: 3

S_A_ST 1100: Elementary Hindi I

Oral-aural and structural approach. Devanagari script.

Credit Hours: 5

S_A_ST 1152: Asian Humanities

(same as REL_ST 1820, HIST 1820 and AR_H_A 1230). This course is an introduction to the literature and visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.

Credit Hours: 3

S_A_ST 1200: Elementary Hindi II

Continuation of S_A_ST 1100. Spoken and written Hindi.

Credit Hours: 5

Prerequisites: grade of C or better in S_A_ST 1100

S_A_ST 1860: History of Ancient India

(same as HIST 1860). This course surveys the history of South Asian history. The course begins with the Indus Valley Civilization (fl. 2600-1900B.C.) and ends with an analysis of Islamic impact on Indic culture around 1200-1350. Emphasis will be placed on cultural and social history, religion, arts and literature, and the sources used for the study of permodern civilizations. Students will develop a basic knowledge and vocabulary necessary to pursue additional South Asian courses.

Credit Hours: 3

S_A_ST 1861: History of Modern India

(same as HIST 1861). This course surveys the history of the South Asian subcontinent from the early seventeenth through the twentieth century. Emphasis will be placed on cultural and social history, religion, arts and literature, imperialism and colonialism, and the sources used for the study of modern civilizations. Students will develop a basic knowledge and vocabulary necessary to pursue additional South Asian courses.

Credit Hours: 3

S_A_ST 1862: History of India: 1000-1750

(Same as HIST 1862) This course surveys the history of the South Asian subcontinent from the eleventh through mid-eighteenth centuries. Emphasis will be placed on cultural and social history, religion, arts and literature, and the sources used to study civilization. Students will develop a basic knowledge and vocabulary necessary to pursue additional South Asian courses.

Credit Hours: 3

S_A_ST 2005: Topics in South Asian Studies-Humanities

Special Topics. May be repeated for credit.

Credit Hours: 3

S_A_ST 2100: Philosophy: East and West

(same as PHIL 2100). Compares the interpretation and role of philosophical concepts such as experience, reason permanence, change, immortality, soul, God, etc., in Indian, Chinese and European traditions.

Credit Hours: 3

Prerequisites: sophomore standing

S_A_ST 2110: Elementary Hindi III

Continuation of S_A_ST 1200. Prerequisites: S_A_ST 1100 or S_A_ST 1200

Credit Hours: 3

S_A_ST 2270: Geography of Asia

(same as GEOG 2270). An introductory survey of the geography of Asia from India through Southeast Asia to China and Japan, emphasizing factors contributing to cultural similarities and variations, conflicts of interest, and current development.

Credit Hours: 3

Prerequisites: sophomore standing or one Introductory Geography course

S_A_ST 2800: Women in Indian History

(same as HIST 2800). This course examines the role of women in Indian (South Asian) history, focusing on women in British India from the eighteenth century up to the Partition of 1947. While previous knowledge of South Asian history may be beneficial, it is not required for this course.

Credit Hours: 3

S_A_ST 3130: Advanced Hindi Readings I

Directed readings in the literature of the student's area of concentration, and advanced conversation.

Credit Hours: 4

Prerequisites: instructor's consent

S_A_ST 3160: Advanced Hindi Readings II in South Asian Studies

Continuation of S_A_ST 3160.

Credit Hours: 4

Prerequisites: instructor's consent

S_A_ST 3200: Hinduism

(same as REL_ST 3200). Origin and development of central themes of traditional Hinduism from earliest times to the modern period. Topics include: the Vedic tradition, rituals and practice, varieties of yoga and meditation, Indian religious thought and devotional Hinduism.

Credit Hours: 3

S_A_ST 3230: Buddhism and Environmental Ethics

(same as REL_ST 3230). Global environmental crisis is associated with rapidly expanding human population. Buddhist teachings about the interdependent aspects of existence and interrelatedness of all life may provide critical insights for how humanity can achieve balance and reciprocity with nature.

Credit Hours: 3

S_A_ST 3240: Buddhism of South and Southeast Asia

(same as REL_ST 3240). Examines the origins of Buddhism in India, the narratives of the life of the Buddha, the development of early Buddhist

schools, the extension of Buddhism into Central and Southeast Asia, and the current practice of Buddhism in south and Southeast Asia.

Credit Hours: 3

S_A_ST 3245: Nonviolence in the Modern World

(same as PEA_ST 3840). Readings on recent world history, emphasis on Ghandi and nonviolent tradition in America, Europe and the Third World.

Credit Hours: 3

S_A_ST 3260: Southeast Asia

(same as GEOG 3260). Physical, cultural, historical and regional geography of Southeast Asia, with an introduction to East Asian geography. Emphasizes the problems of tradition and development.

Credit Hours: 3

Prerequisites: GEOG 2270 or junior standing

S_A_ST 3280: Geography of South Asia

(same as GEOG 3280). Topical and regional analysis of India, Pakistan, Sri Lanka. Historical development of distinctive cultural regions. Relations with neighboring areas. Impact of Westernization on economic activities, settlements, population.

Credit Hours: 3

Prerequisites: junior standing

S_A_ST 3490: Indian Cinema

(same as AR_H_A 3790, ANTHRO 3490 and FILM_S 3490). Indian Cinema provides an overview of the key genres and themes of Indian film, including Bollywood, art cinema/parallel cinema, Indian regional cinemas, and diasporan cinema. The course combines film studies, anthropological, historical, and visual culture analyses to provide a holistic view of Indian culture and society through cinema.

Credit Hours: 3

Prerequisites: Sophomore standing or higher

S_A_ST 4004: Topics in South Asian Studies - Social Science

Special topics.

Credit Hours: 3

S_A_ST 4300: Religious Narratives of South Asia

(same as REL_ST 4300). Study of major narratives of India and their interpretation in literature and art. Topics include: Vedic and Epic mythology, stories of Krishna, myths and images of Shiva, and forms of the Goddess.

Credit Hours: 3

S_A_ST 4620: Politics in India and South Asia

(same as POL_SC 4620). Contemporary political and governmental patterns of India, Pakistan, Sri Lanka, Nepal, and Bangladesh.

Credit Hours: 3

S_A_ST 4630: Sanskrit I

(same as REL_ST 4630). This intensive course will cover the essentials of Sanskrit grammar in one semester and prepare students for further readings in Hindu and Buddhist Literature.

Credit Hours: 3

S_A_ST 4640: Sanskrit II

(same as REL_ST 4640). This course is intended as a "sampler" of Sanskrit literature. We will read Sanskrit texts in the original. The objectives of the course are 1) Expanding the students' knowledge of the Sanskrit language, 2) To acquaint the students with a broad range of textual genres in Sanskrit literature, and 3) To acquaint the students with some central ideas of Hindu and Buddhist philosophy.

Credit Hours: 3

S_A_ST 4790: Culture and Society in South Asia

(same as ANTHRO 4790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include caste, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian diaspora.

Credit Hours: 3

Recommended: junior standing

S_A_ST 4800: Asian Philosophy

(same as PHIL 4800). This course traces the origins of Indian and Chinese philosophical world views. Included are the major ideas in Hindu, Jaina, and Buddhist thought in India, and Taoism and Confucianism in China. Emphasis is placed on the diverse, assimilative, and pragmatic nature of Indian thought and its impact on contemporary Asian philosophy.

Credit Hours: 3

Prerequisites: sophomore standing and one course in Philosophy; or instructor's consent

S_A_ST 4810: Philosophy of India

(same as PHIL 4810). General development of Indian Philosophy.

Credit Hours: 3

Prerequisites: sophomore standing and one course in Philosophy; or instructor's consent

S_A_ST 4820: Contemporary Indian Philosophy

(same as PHIL 4820). Indian philosophical traditions as represented in backgrounds of Gandhi, Tagore, Tagore, Tagore, and philosophical systems of Radharkrishnan, Aurobindo, etc.

Credit Hours: 3

Prerequisites: junior standing

S_A_ST 4850: Traversing the Muslim World

(same as HIST 4850). The traveler's tale formed an important part of the medieval world's system of knowledge. The writing intensive discussion-based course examines a wide array of the most influential travelers in Muslim lands such as Ibn Fadlan, Ibn Buttuta, Benjamin of Tudela and Marco Polo.

Credit Hours: 3

S_A_ST 4860: Colonial Masculinity/Colonial Frontier

(same as HIST 4860). This writing intensive discussion-based course examines how the Indian Army acted as a colonial army in the British Empire, including Africa, the Boxer Rebellion, and the World Wars. Focus is on the role of the Indian Army, impact of the Sepoy Mutiny and martial race ideology.

Credit Hours: 3

S_A_ST 7004: Topics in South Asian Studies

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: instructor's consent

S_A_ST 7200: Religious Texts and Interpretation: The Veda

(same as REL_ST 8200). This course examines the Veda, the foundational scripture of Hinduism. It includes close study of Vedic texts and rituals and the influence, interpretation, and application of the Veda in the later Hinduism.

Credit Hours: 3

S_A_ST 7350: Special Readings in South Asian Studies Languages

Individual advanced study of desired South Asian language.

Credit Hour: 1-6

Prerequisites: instructor's consent

S_A_ST 7630: Sanskrit I

(same as REL_ST 7630). This course is intended as a "sampler" of Sanskrit literature. We will read Sanskrit texts in the original. The objectives of the course are 1) Expanding the students' knowledge of the Sanskrit language, 2) To acquaint the students with a broad range of textual genres in Sanskrit literature, and 3) To acquaint the students with some central ideas of Hindu and Buddhist philosophy.

Credit Hours: 3

S_A_ST 7640: Sanskrit II

(same as REL_ST 7640). This course is intended as a "sampler" of Sanskrit literature. We will read Sanskrit texts in the original. The objectives of the course are 1) Expanding the students' knowledge of the Sanskrit language, 2) To acquaint the students with a broad range of textual genres in Sanskrit literature, and 3) To acquaint the students with some central ideas of Hindu and Buddhist philosophy.

Credit Hours: 3

S_A_ST 7700: Religious Narratives of South Asia

(same as REL_ST 7700). Study of major narratives of India and their interpretation in literature and art. Topics include: Vedic and Epic mythology, stories of Krishna, myths and images of Shiva, and forms of the Goddess.

Credit Hours: 3

S_A_ST 7790: Cultures and Society in South Asia

(same as ANTHRO 7790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent.

Major topics include cast, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian diaspora.

Credit Hours: 3

S_A_ST 8085: Problems in South Asian Studies

(same as HIST 8085).

Credit Hours: 3

Prerequisites: instructor's consent

S_A_ST 9040: Indian Philosophy

Reality, levels of being, status of the world, nature of knowledge in Indian philosophy in relation to the Advaita Vedanta system of Samkara.

Credit Hours: 3

Spanish Courses

SPAN 1100: Elementary Spanish I

An introductory course for students who wish to begin their study of Spanish. It teaches the four skills - listening, speaking, reading, and writing. The class meets four days a week and one day in the lab. Classtime is used to practice the structures and vocabulary.

Credit Hours: 4

SPAN 1100H: Elementary Spanish I - Honors

This designated honors section of Elementary Spanish will challenge students to explore more deeply the currently existing thematic units of the SPAN 1100 curriculum. Students will participate in group discussions, creative projects, independent study and use of authentic written and aural material from primary sources. Honors Spanish 1100 will integrate cultural events outside the classroom such as movies, guest lectures, art exhibits, seminars or concerts as available. Once a semester, Honors Spanish 1100 will meet with Honors SPAN 1200H and SPAN 2100H as a cohort group for further intellectual exchange and enrichment. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: Honors eligibility required

SPAN 1200: Elementary Spanish II

The second course of the beginning sequence in the continuation of SPAN 1100. It places equal emphasis on the four skills; listening, speaking, reading, and writing. Students who have prior knowledge of Spanish are encouraged to take this course. NO credit for both SPAN 1200 and SPAN 1250.

Credit Hours: 4

Prerequisites: Grade of C or better in SPAN 1100 or equivalent

SPAN 1200H: Elementary Spanish II - Honors

This course, designed for students who have taken SPAN 1100 or an equivalent course and enrolled in the Honors College, offers an introduction to the Spanish language and the many cultures it encompasses. Your course work will allow you to develop all four language skills: reading, speaking, listening and writing along with the cultural background necessary to help you to communicate effectively in Spanish. With the honors designation section, the course will allow

students to access greater challenges in the existing thematic units in the curriculum through group discussion, creative projects and authentic situations. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: grade of C or better in SPAN 1100; Honors eligibility required

SPAN 1250: Accelerated Beginning Spanish

Course is designed for students who have taken more than two years of High School Spanish. It offers a reinforcement of the beginning concepts of the Spanish language and the many cultures it encompasses. Course allows students to further develop all language skills. NO credit for both SPAN 1200 and SPAN 1250.

Credit Hours: 5

SPAN 2001: Undergraduate Topics in Spanish-General

Organized study of selected topics. Subjects may vary from semester to semester. May be repeated with departmental consent.

Credit Hour: 1-3

Prerequisites: SPAN 1200 with a grade of C or better

SPAN 2005: Undergraduate Topics in Spanish-Humanities/Fine Arts

Organized study of selected topics. Subjects may vary from semester to semester. May be repeated with departmental consent.

Credit Hour: 1-3

Prerequisites: SPAN 1200 with a grade of C or better

SPAN 2005H: Undergraduate Topics in Spanish-Humanities/Fine Arts - Honors

Organized study of selected topics. Subjects may vary from semester to semester. May be repeated with departmental consent.

Credit Hour: 1-3

Prerequisites: SPAN 1200 with a grade of C or better. Honors eligibility required

SPAN 2100: Elementary Spanish III

A multi-skill course following SPAN 1200, centering on cultural/ literary readings, and including a grammar review, practice in the spoken language, as well as some practice in written expression.

Credit Hours: 4

Prerequisites: grade of C or better in SPAN 1200 or SPAN 1250, or their equivalent courses

SPAN 2100H: Elementary Spanish III - Honors

A multi-skill course following SPAN 1200, centering on cultural/literary readings, and including a grammar review, practice in the spoken language, as well as some practice in written expression. The course seeks to improve student's fluency in Spanish and to expose them to the many cultures it encompasses. This course will integrate cultural events outside the classroom as well such as movies, guest lectures, art exhibits, seminars or concerts as available. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: grade of C or better in SPAN 1200 or SPAN 1250, or their equivalent courses. Honors eligibility required

SPAN 2160: Intermediate Spanish Composition and Conversation

First course following required elementary sequence. Designed specifically to correct any remaining weaknesses in gross writing skills and to develop further conversational ability with equal emphasis on both of these aspects. Classwork involves written compositions and oral presentations.

Credit Hours: 3

Prerequisites: SPAN 2100 or equivalent

SPAN 2160H: Intermediate Spanish Composition and Conversation - Honors

First course following required elementary sequence. Designed specifically to correct any remaining weaknesses in gross writing skills and to develop further conversational ability with equal emphasis on both of these aspects. Classwork involves written compositions and oral presentations.

Credit Hours: 3

Prerequisites: SPAN 2100 or equivalent. Honors eligibility required

SPAN 2310: Spanish Civilization

Survey of Spanish history, arts and culture. Open to any student interested. No knowledge of Spanish required. May not be included in area of concentration in Spanish.

Credit Hours: 3

SPAN 2320: Literature of Spanish Civil War

(same as PEA_ST 2320). Study of the Spanish Civil War: History, Politics, Literature. May not be included in the area of concentration in Spanish.

Credit Hours: 3

Prerequisites: sophomore standing

SPAN 2330: Latin American Civilization

Survey of Latin American history, arts and culture. Open to any student interested. No knowledge of Spanish required. May not be included in area of concentration in Spanish.

Credit Hours: 3

SPAN 2340: Hispanic Minority Literature

This course studies the literature of Hispanic minorities in the United States: Chicanos (Mexican American), Mainland Puerto Ricans, and Cuban exile writers. It explores the question of minority versus majority literatures and the creation of a Hispanic minority discourse. No knowledge of Spanish required.

Credit Hours: 3

Prerequisites: ENGLISH 1000

SPAN 3001: Topics in Spanish-General

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hour: 1-3

Prerequisites: sophomore standing

SPAN 3004: Topics in Spanish-Social Science

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hour: 1-3

Prerequisites: sophomore standing

SPAN 3005: Topics in Spanish-Humanities/Fine Arts

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hour: 1-3

Prerequisites: sophomore standing

SPAN 3150: Advanced Spanish Conversation

Course puts into practice the linguistic skills learned at intermediate levels. It develops and increases the capacity for comprehension and oral expression in the language. Focus is on practice of certain syntactic structures and idiomatic expressions, and on acquisition of new vocabulary.

Credit Hours: 3

Prerequisites: SPAN 2160 or equivalent

SPAN 3150H: Advanced Spanish Conversation

Course puts into practice the linguistic skills learned at intermediate levels. It develops and increases the capacity for comprehension and oral expression in the language. Focus is on practice of certain syntactic structures and idiomatic expressions, and on acquisition of new vocabulary.

Credit Hours: 3

Prerequisites: SPAN 2160 or equivalent. Honors Eligibility required

SPAN 3160: Advanced Spanish Composition

Course emphasizes writing at an advanced level, with a certain degree of sophistication about varied subjects and using different techniques of composition. Classwork consists mainly of the discussion of both the ideas and techniques used in different textual forms.

Credit Hours: 3

Prerequisites: SPAN 2160 or equivalent

SPAN 3170: Conversational Spanish Practice

Study Abroad Conversational Spanish course for students who have already completed SPAN 3150, but want more practice. Does not count for majors/minors. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: SPAN 3150 and instructor's consent

SPAN 3280: Commercial Spanish

Business terminology and forms. Translate and compose business letters and documents for advertising and promotion, trade and commerce, imports and exports, money and banking.

Credit Hours: 3

Prerequisites: SPAN 2160 or equivalent

SPAN 3400: Mexican Culture and Civilization

Study of Mexican culture and civilization through field trips, excursions and selected readings in Mexican history and literature. No knowledge of Spanish required. Open only to participants in UMC's study programs in Mexico.

Credit Hour: 2-3

Prerequisites: sophomore standing or instructor's consent

SPAN 3420: Introduction to Hispanic Literature I

Selected prose fiction and nonfiction prose of Spain and Spanish America.

Credit Hours: 3

Prerequisites: SPAN 3160 or equivalent

SPAN 3430: Introduction to Hispanic Literature II

Selected plays and poetry of Spain and Spanish America.

Credit Hours: 3

Prerequisites: SPAN 3160 or equivalent

SPAN 3430H: Introduction to Hispanic Literature II - Honors

Selected plays and poetry of Spain and Spanish America.

Credit Hours: 3

Prerequisites: SPAN 3160 or equivalent. Honors eligibility required

SPAN 3710: Survey of Minority and Creole Languages of the U.S. and the Caribbean

(same as FRENCH 3710 and LINGST 3710). Analysis of the state of the minority languages of the U.S. and the Creole languages of the Caribbean with particular attention to the social status of these languages and speakers' attitudes toward them in the context of ethnic, culture and national identity (taught in Eng.).

Credit Hours: 3

Prerequisites: sophomore standing

SPAN 3721: Spanish Phonetics

(same as LINGST 3721). Introductory course to the study of Spanish phonological, phonetic and spelling systems, practice of pronunciation, phonetic transcriptions, and introduction to the variation of Spanish pronunciation in the Hispanic world. The course is conducted in Spanish.

Credit Hours: 3

Prerequisites: SPAN 2160 or equivalent

SPAN 3885: Twenty-First Century South American Cinema

(same as FILM_S 3885, PORT 3885). Broad overview of the major national cinemas of the 21st century in South America. Approximately 14 feature films screened from Argentina, Brazil, Chile and other nations of the region. Instructor provides a thematic framework for films within the context of film theory, Latin American cinematic history and cultural studies. Course taught in English. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGLISH 1000 or ENGLISH 1000H

SPAN 4070: Intensive Beginning Spanish

Designed for rapid acquisition of a reading knowledge of Spanish. Cannot be taken to fulfill undergraduate language requirement.

Credit Hours: 3

Prerequisites: instructor's consent

SPAN 4120: Foreign Language Teaching Methodology

(same as FRENCH 4120). Theory and techniques of current foreign language methodology and their application in the classroom. Presentation of instructional projects, classroom observations, and strategies for classroom management. May not be used towards Arts and Science major.

Credit Hours: 3

Prerequisites: departmental consent

SPAN 4130: Stylistics

Advanced composition class. Discussion of complex grammatical structures necessary for formal writing. Examination of stylistic devices and structures beyond sentence level, in order to learn to organize discourse level production.

Credit Hours: 3

Recommended: SPAN 3420 and SPAN 3430

SPAN 4410: Spanish Medieval Literature

The principal periods, schools, and genres of Spanish medieval literature are surveyed through representative masterworks. Lectures and periodic student reports help relate works read to the rest of contemporary Spanish and European literature.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4420: Golden Age Poetry

Poetry of the principal Spanish poets of the 16th and 17th centuries and of literary criticism devoted to it. Special emphasis is placed on the works of Garcilaso de la Vega, Fray Luis de Leon, among others. Short papers and explications are generally required.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4421: Renaissance and Golden Age Prose

Representative prose works from various genres are read as well as literary criticism devoted to them. Among the authors studied are Fernando de Rojas, Jorje Montemayor, Miguel de Cervantes, Francisco de Quevedo, and Maria de Zayas.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4422: Spanish Theatre in the Golden Age

Dramatists to be studied include Lope de Vega, Calderon, Ruiz de Alarcon, Tirso de Molina, Guillen de Castro, Velez de Guevara, and some of Cervantes' theatre.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4423: Don Quijote

In this course students read the two parts of Don Quijote in the original Spanish. Analysis and class discussion highlight elements of literary interest. Neo-positivist methodology, factual background, formalist considerations and psychoanalytic approaches are used in this course.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4441: Twentieth-Century Spanish Novel

(cross-leveled with SPAN 7441). Reading and critical analysis of representative novels written in Spain from early century to the post-Franco period. The objectives of the course are to develop critical skills in dealing with these fictional works and to understand the major trends of the contemporary Spanish novel.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4442: Advanced Contemporary Culture of Spain

(cross-leveled with SPAN 7442). Study of Spanish culture and civilization through field trips, excursions, and selected readings in history, literature, and contemporary print media.

Credit Hours: 3

Prerequisites: SPAN 3150, SPAN 3160, SPAN 3721 or equivalent. Open only to participants in the UMC's summer study in Spain

SPAN 4450: Hispanic Literature of Resistance

A study of the literature of commitment in the Hispanic world: literature in its historical and political contexts that makes a conscious effort to change social conditions.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4460: Advanced Contemporary Culture of Spanish America

(cross-leveled with SPAN 7460). A study of Spanish-American culture and civilization through selected readings in history and literature, and the use of visual media. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: SPAN 3150 and SPAN 3160

SPAN 4461: Advanced Spanish Civilization

(cross-leveled with SPAN 7461). A survey of Spanish culture and Spanish history from the Middle Ages to the present with special emphasis on contemporary culture. Students will be provided with knowledge of chronology, geography and contemporary issues from readings of journals, novels and Internet news.

Credit Hours: 3

Prerequisites: SPAN 3150 and SPAN 3160

SPAN 4470: Survey of Spanish American Literature I

This is an introductory course in Spanish American literature. The reading material in prose and verse is studied in chronological order from the early 16th to the early 20th century. Readings include selections from 22 major Spanish American authors.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4471: Survey of Spanish American Literature II

Survey of contemporary Latin American literature from approximately 1910 to the present. Close analysis and reading of representative major texts of Latin American literature. Students read complete selections and short excerpts from a standard anthology, and three complete novels.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4480: Mexican Literature

Analysis of selected poetry, prose, and drama of contemporary Mexico. Course examines the writings of major and minor figures from several critical perspectives. Works by Agustin, Aviles, Fabila, Carballido, Castellanos, Fuentes, Paz, and others are read.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4490: Hispanic Oral Traditions

This course proposes to examine the Hispanic Oral Tradition through a study of romances and related genres, the corrido, decima and folktale.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4520: Modernista and Contemporary Poetry

Careful study and analysis of selected poems by major figures in Hispanic poetry. The period covered includes the modernist movement to the present. Particular attention is given to the following figures: Ruben Dario, Octavio Paz, Pablo Neruda, and Nicolas Guillen.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4530: The Spanish American Theatre

Intended as an overview of a vital genre in contemporary Spanish American studies, this survey introduces dramatists whose works are the focus of increasing attention from international specialists. The works of Emilio Carballido, Egon Wolff, Griselda Gambaro and Osvald Dragun, among others are discussed.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4540: Afro-Hispanic Literature

A study of prose, poetry, and drama, in Spanish, written by authors of African descent in the Americas.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4550: Nobel Laureates in Spanish American Literature

Analyzes the creative expression of five Nobel laureates from Spanish America. Selected works of Gabriela Mistral, Pablo Neruda, Miguel Angel Asturias, Octavio Paz and Gabriel Garcia Marquez are read in relation to contemporary theory.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4711: History of the Spanish Language

(same as LINGST 4711). Diachronic analysis of phonological, morphological, and syntactical systems of Spanish, from Vulgar Latin to contemporary dialects.

Credit Hours: 3

Prerequisites: Completion with a passing grade of any Linguistics course at the 3000 level or above or instructor's consent

Recommended: SPAN 3420 and SPAN 3430

SPAN 4721: Structure of Modern Spanish

(same as LINGST 4721). Synchronic analysis of phonology, morphology and syntax of spoken Spanish dialects.

Credit Hours: 3

Prerequisites: four 3000-level courses in Spanish

SPAN 4722: Spanish Across the Continents

(same as LINGST 4722). This course focuses on the effects of migratory movements on language change, considering the Spanish spoken in Latin America, Puerto Rico, Spain and the USA. The class sharpens awareness and recognition of the linguistic diversity of the Spanish-speaking regions of the world. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: four 3000-level courses in Spanish

SPAN 4723: Language and Society: Spanish in the U.S.

(same as LINGST 4723). This class surveys linguistic and social issues pertaining to Spanish in the U.S. (past, present and future). Topics include bilingualism, code switching (a.k.a. Spanglish), first language attrition, linguistic identity, and the role of Spanish in education, services and media. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: four 3000-level courses in Spanish

SPAN 4940: Service Learning in Spanish

(same as RM_LAN 4940). Course offers our majors and advanced minors the opportunity to use their language skills in real-life community settings. Does not meet Art and Science general education requirements. May be repeated once for credit. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: junior or senior standing and departmental consent

SPAN 4960: Special Readings in Spanish

Independent study through readings, conferences, reports.

Credit Hour: 1-3

Prerequisites: SPAN 3420 and SPAN 3430 and departmental consent

SPAN 4980: Special Themes in Spanish

Subject varies according to instructor. May be repeated for credit.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4993: The Capstone Experience in Spanish

This course is required of all majors. Topics vary but all courses synthesize and review essential components of the major: speaking,

writing, reading in Spanish, and the ability to think critically and analytically.

Credit Hours: 3

SPAN 7004: Topics in Spanish-Social Science

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hour: 1-99

SPAN 7120: Foreign Language Teaching Methodology

(same as FRENCH 7120). Theory and techniques of current foreign language methodology and their application in the classroom. Presentation of instructional projects, classroom observations, and strategies for classroom management. May not be used towards Arts and Science major.

Credit Hours: 3

SPAN 7130: Stylistics

Advanced composition class. Discussion of complex grammatical structures necessary for formal writing. Examination of stylistic devices and structures beyond sentence level, in order to learn to organize discourse level production.

Credit Hours: 3

Prerequisites: SPAN 3160

Recommended: SPAN 3420 and SPAN 3430

SPAN 7410: Spanish Medieval Literature

The principal periods, schools, and genres of Spanish medieval literature are surveyed through representative masterworks. Lectures and periodic student reports help relate works read to the rest of contemporary Spanish and European literature.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7420: Golden Age Poetry

Poetry of the principal Spanish poets of the 16th and 17th centuries and of literary criticism devoted to it. Special emphasis is placed on the works of Garcilaso de la Vega, Fray Luis de Leon, among others. Short papers and explications are generally required.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7421: Renaissance and Golden Age Prose

Representative prose works from various genres are read as well as literary criticism devoted to them. Among the authors studied are Fernando de Rojas, Jorje Montemayor, Miguel de Cervantes, Francisco de Quevedo, and Maria de Zayas.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7422: Spanish Theatre in the Golden Age

Dramatists to be studied include Lope de Vega, Calderon, Ruiz de Alarcon, Tirso de Molina, Guillen de Castro, Velez de Guevara, and some of Cervantes' theatre.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7423: Don Quijote

In this course students read the two parts of Don Quijote in the original Spanish. Analysis and class discussion highlight elements of literary interest. Neo-positivist methodology, factual background, formalist considerations and psychoanalytic approaches are used in this course.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7441: Twentieth-Century Spanish Novel

(cross-leveled with SPAN 4441). Reading and critical analysis of representative novels written in Spain from early century to the post-Franco period. The objectives of the course are to develop critical skills in dealing with these fictional works and to understand the major trends of the contemporary Spanish novel.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7442: Advanced Contemporary Culture of Spain

(cross-leveled with SPAN 4442). Study of Spanish culture and civilization through field trips, excursions, and selected readings in history, literature, and contemporary print media.

Credit Hours: 3

Prerequisites: SPAN 3150, SPAN 3160, SPAN 3721 or equivalent.

Open only to participants in the UMC's summer study in Spain

SPAN 7450: Hispanic Literature of Resistance

A study of the literature of commitment in the Hispanic world: literature in its historical and political contexts that makes a conscious effort to change social conditions.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7460: Advanced Contemporary Culture of Spanish America

(cross-leveled with SPAN 4460). A study of Spanish-American culture and civilization through selected readings in history and literature, and the use of visual media. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: SPAN 3150 and SPAN 3160

SPAN 7461: Advanced Spanish Civilization

(cross-leveled with SPAN 4461). A survey of Spanish culture and Spanish history from the Middle Ages to the present with special emphasis on contemporary culture. Students will be provided with knowledge of chronology, geography and contemporary issues from readings of journals, novels and Internet news.

Credit Hours: 3

Prerequisites: SPAN 3150 and SPAN 3160

SPAN 7470: Survey of Spanish American Literature I

This is a course in Spanish American literature. The reading material in prose and verse is studied in chronological order from the early 16th to the early 20th century. Readings include selections from 22 major Spanish American authors.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7471: Survey of Spanish American Literature II

Survey of contemporary Latin American literature from approximately 1910 to the present. Close analysis and reading of representative major texts of Latin American literature. Students read complete selections and short excerpts from a standard anthology, and three complete novels.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7480: Mexican Literature

Analysis of selected poetry, prose, and drama of contemporary Mexico. Course examines the writings of major and minor figures from several critical perspectives. Works by Agustin, Aviles, Fabila, Carballido, Castellanos, Fuentes, Paz, and others are read.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7490: Hispanic Oral Traditions

This course proposes to examine the Hispanic Oral Tradition through a study of romances and related genres, the corrido, decima and folktales.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7520: Modernista and Contemporary Poetry

Careful study and analysis of selected poems by major figures in Hispanic poetry. The period covered includes the modernist movement to the present. Particular attention is given to the following figures: Ruben Dario, Octavio Paz, Pablo Neruda, and Nicolas Guillen.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7530: The Spanish American Theatre

Intended as an overview of a vital genre in contemporary Spanish American studies, this survey introduces dramatists whose works are the focus of increasing attention from international specialists. The works of Emilio Carballido, Egon Wolff, Griselda Gambaro and Osvald Dragun, among others are discussed.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7540: Afro-Hispanic Literature

A study of prose, poetry, and drama, in Spanish, written by authors of African descent in the Americas.

Credit Hours: 3

Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7550: Nobel Laureates in Spanish American Literature

Analyzes the creative expression of five Nobel laureates from Spanish America. Selected works of Gabriela Mistral, Pablo Neruda, Miguel Angel Asturias, Octavio Paz and Gabriel Garcia Marquez are read in relation to contemporary theory.

Credit Hours: 3

SPAN 7711: History of the Spanish Language

(same as LINGST 7711). Diachronic analysis of phonology, morphology, and syntax from Vulgar Latin to modern period.

Credit Hours: 3

Prerequisites: Completion with a passing grade of any Linguistics course at the 3000 level or above or instructor's consent

SPAN 7721: Structure of Modern Spanish

(same as LINGST 7721). Synchronic analysis of phonology, morphology and syntax of spoken Spanish dialects.

Credit Hours: 3

Prerequisites: four 3000-level courses in Spanish

SPAN 7722: Spanish Across the Continents

(same as LINGST 4722). This course focuses on the effects of migratory movements on language change, considering the Spanish spoken in Latin America, Puerto Rico, Spain and the USA. The class sharpens awareness and recognition of the linguistic diversity of the Spanish-speaking regions of the world. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: four 3000-level courses in Spanish

SPAN 7723: Language and Society: Spanish in the US

This class surveys linguistic and social issues pertaining to Spanish in the US (past, present and future). Topics include bilingualism, code switching (a.k.a. Spanglish), first language attrition, linguistic identity, and the role of Spanish in education, services and media. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: four 3000-level courses in Spanish

SPAN 7960: Special Readings in Spanish

Independent study through readings, conferences, reports.

Credit Hour: 1-3

Prerequisites: departmental consent

SPAN 7980: Special Themes in Spanish

Subject varies according to instructor.

Credit Hours: 3

SPAN 7993: The Capstone Experience in Spanish

Topics vary but all courses synthesize and review essential components of the major: speaking, writing, reading in Spanish, and the ability to think critically and analytically.

Credit Hours: 3

SPAN 8080: Readings in Spanish

Independent readings in preparation for MA or MALT comprehensive examination in Spanish. Graded on A-F basis only.

Credit Hour: 1-99

SPAN 8085: Problems in Spanish

Problems in Spanish.

Credit Hour: 1-99

SPAN 8087: Seminar in Spanish

Subject varies according to instructor.

Credit Hour: 2-3

SPAN 8090: Research in Spanish

Leads to preparation of MA or MALT thesis. Graded on S/U basis only.

Credit Hour: 1-99

SPAN 8120: Bilingualism and Language Contact

(same as FRENCH 8120 and LINGST 8120). Global analysis of the study of Bilingualism from a combined sociocultural, sociolinguistic and psycholinguistic perspective based on current research and examination of various phenomena of language contact (taught in English).

Credit Hours: 3

SPAN 8412: Studies in Spanish Literature of the Medieval Period

Studies in Spanish Literature of the Medieval Period.

Credit Hours: 3

Recommended: SPAN 8460

SPAN 8415: Studies in Spanish Literature of the Renaissance

Studies in Spanish Literature of the Renaissance

Credit Hours: 3

Studies in Latin American Literature

Credit Hours: 3

SPAN 8460: Old Spanish--Phonology, Morphology and Syntax

Credit Hours: 3

Prerequisites: knowledge of Latin, to be demonstrated by passing departmental written examination or by completing LATIN 7110 with grade of B or better

SPAN 9080: Readings in Spanish

Independent readings in preparation for Ph.D. comprehensive examination in Spanish.

Credit Hour: 3-6

SPAN 9090: Research in Spanish

Leads to preparation of PhD dissertation in Spanish. Graded on S/U basis only.

Credit Hour: 1-99

Special Education Courses

SPC_ED 4020: Inquiry into Learning II

Inquiring into Learning II addresses topics in the foundations of pedagogy including classroom management and behavior management, and evidence-based practices for students with special needs. Graded on A-F basis only.

Credit Hours: 3

Recommended: Admittance to Phase II

SPC_ED 4300: Introduction to Special Education

Introductory overview of the field of special education; historical developments, characteristics of special populations, and compliance with state and federal regulations.

Credit Hours: 3

SPC_ED 4310: Behavioral Management for Exceptional Students

Study of classroom management and applied behavior analysis strategies. Focus on teacher as decision-maker in the design, implementation, evaluation of individual and group management programs.

Credit Hours: 3

Prerequisites: SPC_ED 4300

SPC_ED 4320: Assessment and Evaluation in Special Education

Procedures and instruments used in the assessment of individual with disabilities, including standardized and non-standardized measures of intellectual ability, academic achievement, oral language, social/emotional behaviors, career/vocational needs.

Credit Hours: 3

Prerequisites: SPC_ED 4300

SPC_ED 4325: Language Development of Exceptional Students

Study of language and communication issues and disorders in special education; normal and atypical language development; language assessment and intervention models and programs.

Credit Hours: 3

Prerequisites: SPC_ED 4300

SPC_ED 4330: Collaboration and Consultation in Special Education

Study of communication, problem-solving, collaboration strategies. Application of strategies to work with exceptional students, their families, other professional members of interdisciplinary, interagency teams.

Credit Hours: 3

Prerequisites: SPC_ED 4300

SPC_ED 4370: Literacy in Special Education

Addresses specific literacy needs of students who are at-risk or have special needs with a focus on assessment and instruction in general education classrooms.

Credit Hours: 3

Prerequisites or Corequisites: SPC_ED 4300

SPC_ED 4371: Literacy in Special Education II

Advanced study in literacy methods and research for students with disabilities. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: SPC_ED 4370 or SPC_ED 7370

SPC_ED 4375: Cross Categorical Special Education

Study of characteristics of students with cross categorical disabilities and other pertinent issues including inclusion, assessment, and evaluation practices.

Credit Hours: 3

Recommended: Admittance to Phase II

SPC_ED 4380: Methods in Cross-Categorical Special Education

(cross-leveled with SPC_ED 7380). This course is designed to provide students with research-based instructional and behavior management methods for use with student with cross-categorical disabilities.

Credit Hour: 3-4

Prerequisites: SPC_ED 4375 and SPC_ED 4940

Recommended: Admittance to Phase II

SPC_ED 4390: Methods in Vocational Education for the Disabled and Disadvantaged

(same as LTC_V 4770). Study of legislation, interagency cooperation, curriculum, transition, evaluation/grading role of support personnel. For educators, counselors and administrators working in vocational settings with special needs students and students with disabilities.

Credit Hour: 2-3

Prerequisites: SPC_ED 4300

SPC_ED 4401: Topics in Special Education

In-depth study of certain developments, findings, trends and issues in one or more areas of special education.

Credit Hours: 3

SPC_ED 4940: Cross-Categorical Special Education: Practicum I

Involvement in meaningful field-based activities that extend and/or apply content information from SPC_ED 4375.

Credit Hour: 1-4

Prerequisites or Corequisites: SPC_ED 4375

Recommended: Admittance to Phase II

SPC_ED 4941: Practicum in Cross-Categorical II

(cross-leveled with SPC_ED 7941). The purpose of this course is to provide students with experience in applying the content of Special Education 4380 (i.e. assessment and intervention strategies for use with students with cross categorical disabilities). This course may be repeated for credit.

Credit Hour: 2-3

Prerequisites or Corequisites: SPC_ED 4380

Prerequisites: SPC_ED 4375 and SPC_ED 4940

SPC_ED 4972: Capstone Seminar and Portfolio in Special Education

Students in final student teaching internship will meet weekly to examine and compare their internship experiences. Analysis, synthesis, evaluation and problem solving are the focus of the examination of various aspects of pedagogy and experience. Additionally, students will develop and submit for scoring their State mandated certification portfolio.

Credit Hour: 1

Prerequisites: LTC 4971

Recommended: Enrollment in final semester of student teaching internship

SPC_ED 4981: Internship I

(cross-leveled with SPC_ED 7981). This field experience provides preservice interns a semester-long public school experience where they simultaneously engage in a unique combination of observation and teaching. Through observation, conferencing, reading, discussion, demonstration, and participation, the preservice intern will synthesize the course concepts of the Senior Year On-Site Program (SYOSP). Graded on A-F basis only.

Credit Hours: 4

Prerequisites: ED_LPA 4060 or ED_LPA 7060

Recommended: Admittance to Phase II

SPC_ED 7020: Foundation of Teacher Prep II

Inquiring into Learning II addresses topics in the foundations of pedagogy including classroom management and behavior management, and evidence-based practices for students with special needs. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Progression into Phase II

SPC_ED 7300: Introduction to Special Education

Introductory overview of the field of special education; historical developments, characteristics of special populations, and compliance with state and federal regulations.

Credit Hours: 3

SPC_ED 7310: Behavioral Management for Exceptional Students

Study of classroom management and applied behavior analysis strategies. Focus on teacher as decision-maker in the design, implementation, evaluation of individual and group management programs.

Credit Hours: 3

Prerequisites: SPC_ED 4300

SPC_ED 7320: Assessment and Evaluation in Special Education

Procedures and instruments used in the assessment of individual with disabilities, including standardized and non-standardized measures of intellectual ability, academic achievement, oral language, social/emotional behaviors, career/vocational needs.

Credit Hours: 3

Prerequisites: SPC_ED 4300

SPC_ED 7325: Language Development of Exceptional Students

Study of language and communication issues and disorders in special education; normal and atypical language development; language assessment and intervention models and programs.

Credit Hours: 3

Prerequisites: SPC_ED 4300

SPC_ED 7330: Collaboration and Consultation in Special Education

Study of communication, problem-solving, collaboration strategies. Application of strategies to work with exceptional students, their families, other professional members of interdisciplinary, interagency teams.

Credit Hours: 3

Prerequisites: SPC_ED 4300

SPC_ED 7370: Literacy in Special Education

Addresses specific literacy needs of students who are at-risk or have special needs with a focus on assessment and instruction in general education classrooms.

Credit Hours: 3

Prerequisites or Corequisites: SPC_ED 4300

SPC_ED 7371: Literacy in Special Education II

Advanced study in literacy methods and research for students with disabilities. Graded A-F only.

Credit Hours: 3

Prerequisites: SPC_ED 4370 or SPC_ED 7370

SPC_ED 7375: Cross Categorical Special Education

Study of characteristics of students with cross categorical disabilities and other pertinent issues including inclusion, assessment, and evaluation practices.

Credit Hours: 3

Prerequisites: professional standing in Phase II

SPC_ED 7380: Methods in Cross-Categorical Special Education

This course is designed to provide students with research-based instructional and behavior management methods for use with student with cross-categorical disabilities.

Credit Hours: 4

Prerequisites: professional standing in Phase II, SPC_ED 4375, SPC_ED 4940

SPC_ED 7390: Methods in Vocational Education for the Disabled & Disadvantaged

(same as LTC_V 7770). Study of legislation, interagency cooperation, curriculum, transition, evaluation/grading role of support personnel. For educators, counselors and administrators working in vocational settings with special needs students and students with disabilities.

Credit Hour: 2-3

Prerequisites: SPC_ED 4300

SPC_ED 7401: Topics in Special Education

In-depth study of certain developments, findings, trends and issues in one or more areas of special education.

Credit Hours: 3

SPC_ED 7940: Cross-Categorical Special Education: Practicum I

Involvement in meaningful field-based activities that extend and/or apply content information from Special Education 4375.

Credit Hours: 3

Prerequisites or Corequisites: SPC_ED 4375, professional standing in Phase II

SPC_ED 7941: Practicum in Cross-Categorical II

(cross-leveled with SPC_ED 4941). The purpose of this course is to provide students with experience in applying the content of Special Education 4380 (i.e. assessment and intervention strategies for use with students with cross categorical disabilities). This course may be repeated for credit.

Credit Hour: 2-3

Prerequisites or Corequisites: SPC_ED 4380

Prerequisites: SPC_ED 4375 and SPC_ED 4940

SPC_ED 7981: Internship I

(cross-leveled with SPC_ED 4981). This field experience provides preservice interns a semester-long public school experience where they simultaneously engage in a unique combination of observation and teaching. Through observation, conferencing, reading, discussion, demonstration, and participation, the preservice intern will synthesize the course concepts of the Senior Year On-Site Program (SYOSP). Graded on A-F basis only.

Credit Hours: 4

Prerequisites: ED_LPA 4060 or ED_LPA 7060, Admittance to the College of Education, Admittance into Phase II

SPC_ED 8085: Problems in Special Education

Credit Hour: 1-99

Prerequisites: instructor's consent

SPC_ED 8090: Masters Thesis Research Hours

Restricted to students enrolled in the graduate program. Graded S/U only.

Credit Hours: 3

SPC_ED 8210: Using Assessment to Guide Instruction

This course is designed to present information on the evaluation of individual student skills and the effects of instruction on those skills. Graded on A-F basis only.

Credit Hours: 3

SPC_ED 8220: School-Wide Positive Behavior Support

Overview of theory, research, and methods related to establishing a system of positive behavior support in schools. Graded on A-F basis only.

Credit Hours: 3

SPC_ED 8287: Professional Seminar in Special Education

Designed to provide overview of Special Education, COE program requirements, and general graduate student expectations. Students STRONGLY encouraged to take course first semester in graduate program. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: acceptance into a master's degree program

SPC_ED 8300: Students with Behavioral Disorders

Study of characteristics of students with behavioral disorders as they relate to best practices for assessment, instruction, and intervention.

Credit Hours: 4

Prerequisites: SPC_ED 4300 and instructor's consent

SPC_ED 8310: Students With Learning Disabilities

Study of characteristics of students with learning disabilities as they relate to best practices for assessment, instruction, and intervention.

Credit Hours: 4

Prerequisites: SPC_ED 4300 and instructor's consent

SPC_ED 8340: Advanced Studies in Developmental Disabilities

Current theories and practices and their historic roots through examination of empirical and descriptive literature.

Credit Hours: 3

Prerequisites: admission to graduate study and instructor's consent

SPC_ED 8345: Trends and Issues in Special Education

A study of the historical developments and related trends, issues and problems associated with the education of exceptional students.

Credit Hours: 3

Prerequisites: admission to graduate study and instructor's consent

SPC_ED 8350: Research with Exceptional Children

Explores significant, historical, and current research in special education. Emphasizes the application of research, methodology, and findings relative to problems facing the practitioner.

Credit Hours: 3

Prerequisites: instructor's consent

SPC_ED 8353: Advanced Studies: Single Subject Design

The course is for advanced graduate students in special education, k psychology, related fields and includes behavioral measurement, single subject research designs, data analysis methods, critical analysis and evaluation of single subject research and research proposal. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

SPC_ED 8355: Grant Writing

Preparation of research, demonstration, training, or other grant proposals meeting the criteria for competitive funding by a federal agency; review and evaluation of proposals.

Credit Hours: 3

Prerequisites: admission to graduate study and instructor's consent

SPC_ED 8360: Special Education Administration

Principles, protective safeguards, and general practices associated with the organization and administration of special education; legal foundations for special education; selection, training, and supervision of personnel.

Credit Hours: 3

Prerequisites: instructor's consent

SPC_ED 8365: Research Design in Special Education

Overview of professional writing and intermediate research applications with a focus on knowledge and skills needed for higher level doctoral work in statistics and research design.

Credit Hours: 3

Prerequisites: ESC_PS 4170 or equivalent, SPC_ED 8350 or equivalent, and instructor's consent

SPC_ED 8370: Foundations I: History, Law and Policy in Special Education

The changing concept of disability will be viewed from the perspectives of history, legal issues, and policy traced from early Greek and European periods through contemporary times.

Credit Hours: 3

Prerequisites: instructor's consent

SPC_ED 8375: Foundations II: Pedagogical Theories in Special Education

A study of theories of teaching as they apply to special education with emphases on empirically based practices, historical trends, current theories, and the relationship between theories of learning and teaching.

Credit Hours: 3

Prerequisites: instructor's consent

SPC_ED 8380: Nature and Needs of Gifted and Talented Students

A conceptual and empirical examination for educational personnel of student identification procedures, special populations, programming issues, research topics and teacher competencies.

Credit Hours: 3

Prerequisites: instructor's consent

SPC_ED 8387: Seminar in Special Education

Credit Hour: 1-3

Prerequisites: instructor's consent

SPC_ED 8391: Curriculum Methods for Gifted and Talented Students

A theoretical examination for educational personnel of specific instructional approaches including structure of intellect, enrichment triad, empirical research, and creative problem solving.

Credit Hours: 3

Prerequisites: SPC_ED 8380 or instructor's consent

SPC_ED 8400: Affective Development of Gifted Students

Psychosocial development of gifted students; theories, and practices in affective development; strategies to develop positive self-concept, successful coping strategies, and effective peer relationships by gifted students.

Credit Hours: 3

Prerequisites: SPC_ED 8380 or instructor's consent

SPC_ED 8405: Assessment and Evaluation in Gifted Education

Seminar focuses on practices for identifying students for gifted education programs, evaluation models applicable to school programs and strategies for grading and evaluation of gifted students.

Credit Hours: 3

Prerequisites: SPC_ED 8380 or instructor's consent

SPC_ED 8406: Differentiating Instruction: Reaching Gifted, Typical and Struggling Learners

Explores various instructional approaches to help meet the learning needs of a range of learners from gifted through struggling and at-risk students. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Introduction to Special Education; instructor's consent

SPC_ED 8440: Advanced Behavior Management: Applied Behavior Analysis

This course will provide graduate students with advanced theory and knowledge in behavior management. Emphasis will be placed on understanding and using the principles of applied behavior analysis.

Credit Hours: 3

Prerequisites: SPC_ED 4310 and instructor's consent

SPC_ED 8455: Advanced Studies in Behavioral Disorders

Contemporary issues a historical perspective; theoretical perspectives or models which guide research, policy, and intervention approaches.

Credit Hours: 3

Prerequisites: admission to graduate study and instructor's consent

SPC_ED 8470: Advanced Literacy in Special Education

Study of literacy assessment and instruction methods specific to special education; formal and informal assessment; language and instructional strategies to improve literacy for students with disabilities.

Credit Hours: 3

Prerequisites: SPC_ED 4300

SPC_ED 8475: Advanced Studies in Learning Disabilities

Major current issues, trends, and controversies in learning disabilities; theories, research, and practices in learning disabilities.

Credit Hours: 3

Prerequisites: admission to graduate study and instructor's consent

SPC_ED 8485: Introduction and Methods of Early Intervention

This course will enhance individual knowledge and skills necessary to design, implement, and evaluate research-based strategies and practices in home and center-based programs for infants and toddlers with disabilities, consistent with the philosophical and legal requirements of IDEA Part C.

Credit Hours: 3

SPC_ED 8490: Assessment in Early Childhood Special Education

Procedures and instruments used in assessment of children with special needs, including screening, diagnosis, interpretation of diagnostic findings, and application to instructional plans.

Credit Hours: 3

Prerequisites: SPC_ED 8375

SPC_ED 8495: Introduction and Methods of Early Childhood Special Education

This course will enhance individual knowledge and skills necessary to design, implement, and evaluate research-based strategies and practices in community or public school integrated programs for preschools with disabilities, consistent with the philosophical and legal requirements of IDEA Part B Section 619.

Credit Hour: 2-3

SPC_ED 8505: Advanced Studies in Early Childhood Special Education

Origins, theoretical perspectives, issues, scope and efficacy of the field of early childhood special education.

Credit Hours: 3

Prerequisites: instructor's consent

SPC_ED 8520: Meeting the Needs of all Learners

The purpose of this course is to provide information on current research and methodology on teaching students who are struggling or who have disabilities. Open only to teaching fellows. Graded on A-F basis only.

Credit Hours: 3

SPC_ED 8601: Introduction to Autism

This course provides an introduction of children youth with autism spectrum disorders. Topics include: historical and theoretical foundations, diagnostic and assessment approaches, and characteristics. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Introduction to Special Education; instructor's consent

SPC_ED 8602: Methods of Instruction for Students with Autism

Overview of interventions for individuals with autism spectrum disorders and strategies needed for teaching. Best practices and promising practices will be presented. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: SPC_ED 8601, instructor's consent required

SPC_ED 8603: Social Competency for Students with Autism

Course provides a framework for addressing social competence deficits experienced by students with autism. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: SPC_ED 8601, instructor's consent required

SPC_ED 8604: High Functioning Students with Autism

The course is designed to increase understanding and ability to support individuals on the Autism Spectrum who have average to above average intelligence. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

SPC_ED 8605: Young Children with Autism

Current research on characteristics, diagnosis, and intervention for very young children with autism. Strategies for support children and their families. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

SPC_ED 8606: Assessment in Autism, Special Education

This course covers procedures and instruments used in assessment of school-aged children with autism, including screening, diagnosis, interpretation of assessment findings, and application to instructional plans. Graded on A-F only.

Credit Hours: 3

Prerequisites: SPC_ED 7300

Corequisites: SPC_ED 8601

SPC_ED 8940: Practicum: Students with Behavioral Disorders

Graduate field experience in educational setting for students with behavioral disorders. Application of competencies from Special Education 8300.

Credit Hours: 3

Prerequisites: instructor's consent

SPC_ED 8941: Practicum: Students with Learning Disabilities

Graduate field experience in educational setting for students with learning disabilities. Application of competencies from SPC_ED 8310.

Credit Hours: 3

Prerequisites: instructor's consent

SPC_ED 8942: Practicum: Students with Developmental Disabilities

Graduate field experience in educational setting for students with mental retardation. Application of knowledge and skills from SPC_ED 8320.

Credit Hours: 3

Prerequisites: instructor's consent

SPC_ED 8943: Practicum in Special Education

Provides graduate practicum experience relevant to the education of exceptional students.

Credit Hour: 1-10

Prerequisites: SPC_ED 4300 and instructor's consent

SPC_ED 8944: Practicum I: Cross-Categorical Special Education

Graduate field-based experience focused on observation and participation in programming for students with mild-moderate disabilities.

Credit Hours: 3

Prerequisites: instructor's and/or advisor's consent

SPC_ED 8945: Practicum II: Cross-Categorical Special Education

Advanced graduate field experience. Demonstration of required competencies with mild-moderate disabilities.

Credit Hour: 3-8

Prerequisites: SPC_ED 8944 and instructor and/or advisor's consent

SPC_ED 8946: Practicum: Gifted Education

Provides graduate field experience in the area of gifted education.

Credit Hours: 3

Prerequisites: instructor or advisor's consent

SPC_ED 8947: Practicum: Early Childhood Special Education

Graduate field experience in an approved setting for young children with special needs. May be repeated.

Credit Hour: 1-10

Prerequisites: instructor's consent

SPC_ED 9090: Research in Special Education

Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

SPC_ED 9387: Professional Seminar in Special Education

Designed to provide overview of Special Education, COE program requirements, and general graduate student expectations. Students STRONGLY encouraged to take course first semester in graduate program. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: acceptance into a master's degree program

SPC_ED 9940: Internship: College Teaching in Special Education

Individually guided and supervised college teaching experiences. Competency based activities using portfolio assessment methods. May be taken more than once. Graded on S/U basis only.

Credit Hours: 3

Prerequisites: instructor's consent

SPC_ED 9941: Internship: Special Education Research

Individually guided research internship with doctoral advisor and/or faculty mentor(s). Opportunity to develop research competencies either on individual or collaborative projects. May be taken more than once. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

SPC_ED 9942: Internship: Professional Practice in Special Education

Individually guided internship in the public schools and/or agencies serving students with special needs or exceptionalities. Focus on professional practices, administrative practices, and/or evaluation practices. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

Statistics Courses

STAT 1200: Introductory Statistical Reasoning

Statistical concepts for critically evaluation quantitative information. Descriptive statistics, probability, estimation, hypothesis testing, correlation and regression. Students may not receive credit if they have received or are concurrently receiving credit for a higher numbered course offered by the Statistics Department. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: grade of C- or better in MATH 1100 or MATH 1120 or MATH 1160 or MATH 1180 or exemption from College Algebra by examination

STAT 1300: Elementary Statistics

Collection, presentation of data; averages; dispersion; introduction to statistical inference, correlation and regression. Students may not receive credit if they have received or are concurrently receiving credit for another course offered by the Statistics Department. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: grade in C - or higher in MATH 1100 or MATH 1120 or MATH 1160 or MATH 1180 or exemption from college algebra by examination

STAT 1300H: Elementary Statistics - Honors

Collection, presentation of data; averages; dispersion; introduction to statistical inference, correlation and regression. Students may not receive credit if they have received or are concurrently receiving credit for another course offered by the Statistics Department. Math Reasoning Proficiency course.

Credit Hours: 3

Prerequisites: grade of C-or higher in MATH 1100 or MATH 1120 or MATH 1160 or MATH 1180 or exemption from college algebra by examination. Honors eligibility required

STAT 1400: Elementary Statistics for Life Sciences

Designed for students studying agriculture and other life sciences. Descriptive statistics, probability, estimation, hypothesis testing, correlation and regression. Students may not receive credit if they have received or are concurrently receiving credit for another course offered by the Statistics Department. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: grade in C- or higher in MATH 1100 or MATH 1120 or MATH 1160 or MATH 1180 or exemption from college algebra by examination

STAT 2200: Introductory Statistical Methods

Designed to upgrade the curriculum of STAT 1200 or STAT 1300 or STAT 1400 to the level of STAT 2500. Students may not receive credit for STAT 2200 if they have completed a course from the Department of Statistics numbered 2500 or higher. Math Reasoning Proficiency Course.

Credit Hour: 1

Prerequisites: grade in C- or higher in STAT 1200 or STAT 1300 or STAT 1400

STAT 2500: Introduction to Probability and Statistics I

Designed primarily for students in College of Business. Descriptive statistics, probability, random variables, sampling distributions, estimation, confidence intervals, hypothesis tests. Math Reasoning Proficiency course.

Credit Hours: 3

Prerequisites: grade of C- or better in MATH 1300 or MATH 1400 or MATH 1500

STAT 2530: Statistical Methods in Natural Resources

Statistical methods, with emphasis on applications to natural resources and including computer exercises. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: a college-level computing course and a grade in the C range or better in MATH 1100, MATH 1120, MATH 1160, or MATH 1180

STAT 3500: Introduction to Probability and Statistics II

Continuation of STAT 2500. Coverage of additional topics including: Regression; model building; ANOVA; nonparametric methods; use of a statistical computer package.

Credit Hours: 3

Prerequisites: grade in the C - or higher in STAT 2200 or STAT 2500 or STAT 2530, or STAT 4710 or concurrent enrollment in STAT 2200

STAT 4002: Topics in Statistics-Biological/Physical/Mathematics

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Repeatable with departmental consent.

Credit Hour: 1-99

Prerequisites: Consent of instructor required

STAT 4050: Connecting Statistics to Middle and Secondary Schools

Primarily for middle and secondary mathematics education majors. Uses standards-based curricular materials to demonstrate connections between college-level statistics and content taught in middle and secondary schools. No credit toward a graduate degree in statistics.

Credit Hours: 3

Prerequisites: an introductory course in statistics or MATH 2320 or instructor's consent

STAT 4085: Problems in Statistics for Undergraduates

Independent investigations. Reports on approved topics.

Credit Hour: 1-3

Prerequisites: instructor's consent

STAT 4110: Statistical Software and Data Analysis

Programming with major statistical packages emphasizing data management techniques and statistical analysis for regression, analysis of variance, categorical data, descriptive statistics, non-parametric analyses, and other selected topics.

Credit Hours: 3

Prerequisites: STAT 3500 or STAT 7070 or STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760

STAT 4150: Applied Categorical Data Analysis

The study of statistical models and methods used in analyzing categorical data. The use of computing is emphasized and calculus is not required. No credit for students who have previously completed STAT 4830. No credit toward a graduate degree in statistics.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, or STAT 4760 or STAT 7760 or instructor's consent

STAT 4210: Applied Nonparametric Methods

Statistical methods when the functional form of the population is unknown. Applications emphasized. Comparisons with parametric procedures. Goodness-of-fit, chi-square, comparison of several populations, measures of correlation.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, STAT 4760 or STAT 7760, or instructor's consent

STAT 4310: Sampling Techniques

Theory of probability sampling designs. Unrestricted random sampling. Stratified sampling. Cluster sampling. Multistage or subsampling. Ratio estimates. Regression estimates. Double sampling.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, STAT 4760 or STAT 7760, or instructor's consent

STAT 4410: Biostatistics and Clinical Trials

(cross-leveled with STAT 7410). Study of statistical techniques for the design and analysis of clinical trials, laboratory studies and epidemiology. Topics include randomization, power and sample size calculation, sequential monitoring, carcinogenicity bioassay and case-cohort designs.

Prerequisites: any of the following: STAT 3500, STAT 7070, STAT 4710, STAT 7710, STAT 4760, STAT 7760, or instructor's consent.

Credit Hours: 3

STAT 4420: Applied Survival Analysis

Parametric models; Kaplan-Meier estimator; nonparametric estimation of survival and cumulative hazard functions; log-rank test; Cox model; Stratified Cox model; additive hazards model partial likelihood; regression diagnostics; multivariate survival data.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760 or instructor's consent

STAT 4430: Applied Longitudinal Data Analysis

Repeated measurements; event history studies; linear and nonlinear mixed effects models; growth models; marginal mean and rate models; pattern-mixture models; selection models; non-informative and informative drop-out; joint analysis of longitudinal and survival data.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, or STAT 4760 or STAT 7760 or instructor's consent

STAT 4450: Applied Statistical Methods for Bioinformatics

Random variables; Point estimation; Multiple t-test; Likelihood principle; Analysis of variance; Probabilistic methods for sequence modeling; Gene expression analysis; Protein structure prediction; Genome analysis; Hierarchical clustering and Gene classification.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, STAT 4760 or STAT 7760, or instructor's consent

STAT 4510: Applied Statistical Models I

Introduction to applied linear models including regression (simple and multiple, subset selection, estimation and testing) and analysis of variance (fixed and random effects, multifactor models, contrasts, multiple testing). No credit toward a graduate degree in statistics.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, STAT 4760 or STAT 7760

STAT 4530: Analysis of Variance

Study of analysis of variance and related modeling techniques for cases with fixed, random, and mixed effects. Exposure to designs other than completely randomized designs including factorial arrangements, repeated measures, nested, and unequal sample size designs.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, STAT 4760 or STAT 7760, or instructor's consent

STAT 4540: Experimental Design

Examination and analysis of modern statistical techniques applicable to experimentation in social, physical or biological sciences.

Credit Hours: 3

Prerequisites: STAT 3500 or STAT 4510 or STAT 7510 or STAT 4530 or STAT 7530

STAT 4560: Applied Multivariate Data Analysis

Testing mean vectors; Discriminant analysis; Principal components; Factor analysis; Cluster analysis; Structural equation modeling; Graphics.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070 STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760 or instructor's consent. No credit towards a graduate degree in statistics

STAT 4580: Introduction to Statistical Methods for Customized Pricing

(cross-leveled with STAT 7580). Introduction to basic concepts of and statistical methods used in customized pricing. Focuses on applying statistical methods to real customized pricing problems. Students will gain an understanding of customized pricing and some hands on experience with SAS Enterprise Miner.

Credit Hours: 3

Prerequisites: STAT 3500 or STAT 4510 or STAT 7510 or instructor's consent

STAT 4610: Applied Spatial Statistics

Introduction to spatial random processes, spatial point patterns, kriging, simultaneous and conditional autoregression, and spatial data analysis.

Credit Hours: 3

Prerequisites: STAT 4510 or instructor's consent

Recommended: basic knowledge of calculus and matrices

STAT 4640: Introduction to Bayesian Data Analysis

Bayes formulas, choices of prior, empirical Bayesian methods, hierarchical Bayesian methods, statistical computation, Bayesian estimation, model selection, predictive analysis, applications, Bayesian software.

Credit Hours: 3

Prerequisites: STAT 3500 or STAT 4510 or STAT 7510 or instructor's consent

STAT 4710: Introduction to Mathematical Statistics

(same as MATH 4315). Introduction to theory of probability and statistics using concepts and methods of calculus. No credit for Math 4315.

Credit Hours: 3

Prerequisites: MATH 2300

STAT 4750: Introduction to Probability Theory

(same as MATH 4320). Probability spaces; random variables and their distributions; repeated trials; probability limit theorems.

Credit Hours: 3

Prerequisites: MATH 2300

STAT 4760: Statistical Inference

(same as MATH 4520). Sampling; point estimation; sampling distribution; tests of hypotheses; regression and linear hypotheses.

Credit Hours: 3

Prerequisites: STAT 4750 or STAT 7750

STAT 4810: Nonparametric Methods

A first course in Non-parametric statistical methods based on ranks. Both theory and application are emphasized. Two-sample problems. K-sample problems. Tests for independence. Contingency tables. Goodness-of-fit tests.

Credit Hours: 3

Prerequisites: STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760 or instructor's consent

STAT 4830: Categorical Data Analysis

Discrete distributions, frequency data, multinomial data, chi-square and likelihood ratio tests, logistic regression, log linear models, rates, relative risks, random effects, case studies.

Credit Hours: 3

Prerequisites: STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760 or instructor's consent

STAT 4850: Introduction to Stochastic Processes

Study of random processes selected from: Markov chains, birth and death processes, random walks, Poisson processes, renewal theory, Brownian motion, Gaussian processes, white noise, spectral analysis, applications such as queuing theory, sequential tests.

Credit Hours: 3

Prerequisites: STAT 4750 or STAT 7750 or instructor's consent

STAT 4870: Time Series Analysis

A study of univariate and multivariate time series models and techniques for their analyses. Emphasis is on methodology rather than theory. Examples are drawn from a variety of areas including business, economics and soil science.

Credit Hours: 3

Prerequisites: STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760

STAT 4970: Senior Seminar

A capstone course required of and open only to senior statistics majors. Students will participate in statistical consulting, attend colloquia, and review articles in professional journals. Writing of reports will be emphasized.

Credit Hours: 3

Prerequisites: senior statistics major and 12 completed hours of statistics courses or instructor's consent

STAT 4999: Departmental Honors in Statistics

Special work for Honors candidates in statistics. May be repeated for credit.

Credit Hour: 1-3

STAT 7002: Topics in Statistics-Biological/Physical/Mathematics

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Repeatable with departmental consent.

Credit Hour: 1-99

Prerequisites: instructor's consent

STAT 7020: Statistical Methods in the Health Sciences

Basic inference methods, both parametric and non-parametric, appropriate for answering questions arising in health sciences research. Computer exercises involving data from real experiments from health science area.

Credit Hours: 3

Prerequisites: MATH 1100 or MATH 1120 and instructor's consent

STAT 7050: Connecting Statistics to Middle and Secondary Schools

Primarily for middle and secondary mathematics education majors. Uses standards-based curricular materials to demonstrate connections between college-level statistics and content taught in middle and secondary schools. No credit toward a graduate degree in statistics.

Credit Hours: 3

Prerequisites: an introductory course in statistics or MATH 2320 or instructor's consent

STAT 7070: Statistical Methods for Research

Designed for graduate students who have no previous training in statistics. Topics include descriptive statistics, probability distributions, estimation, hypothesis testing, regression, and ANOVA. No credit toward a degree in statistics.

Credit Hours: 3

Prerequisites: either MATH 1100 or MATH 1120

STAT 7085: Problems in Statistics for Non-majors

Approved reading and study, independent investigations, and reports on approved topics.

Credit Hour: 1-99

Prerequisites: instructor's consent

STAT 7110: Statistical Software and Data Analysis

Programming with major statistical packages emphasizing data management techniques and statistical analysis for regression, analysis of variance, categorical data, descriptive statistics, non-parametric analyses, and other selected topics.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, STAT 4760 or STAT 7760, or instructor's consent

STAT 7150: Applied Categorical Data Analysis

The study of statistical models and methods used in analyzing categorical data. The use of computing is emphasized and calculus is not required. No credit for students who have previously completed STAT 4830. No credit toward a graduate degree in statistics.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, or STAT 4760 or STAT 7760 or instructor's consent

STAT 7210: Applied Nonparametric Methods

Statistical methods when the functional form of the population is unknown. Applications emphasized. Comparisons with parametric procedures. Goodness-of-fit, chi-square, comparison of several populations, measures of correlation.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, STAT 4760 or STAT 7760, or instructor's consent

STAT 7310: Sampling Techniques

Theory of probability sampling designs. Unrestricted random sampling. Stratified sampling. Cluster sampling. Multistage or subsampling. Ratio estimates. Regression estimates. Double sampling.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, STAT 4760 or STAT 7760, or instructor's consent

STAT 7410: Biostatistics and Clinical Trials

(cross-leveled with STAT 4410). Study of statistical techniques for the design and analysis of clinical trials, laboratory studies and epidemiology. Topics include randomization, power and sample size calculation, sequential monitoring, carcinogenicity bioassay and case-cohort designs. Prerequisites: any of the following: STAT 3500, STAT 7070, STAT 4710, STAT 7710, STAT 4760, STAT 7760, or instructor's consent.

Credit Hours: 3

STAT 7420: Applied Survival Analysis

Parametric models; Kaplan-Meier estimator; nonparametric estimation of survival and cumulative hazard functions; log-rank test; Cox model; Stratified Cox model; additive hazards model partial likelihood; regression diagnostics; multivariate survival data.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760 or instructor's consent

STAT 7430: Applied Longitudinal Data Analysis

Repeated measurements; event history studies; linear and nonlinear mixed effects models; growth models; marginal mean and rate models; pattern-mixture models; selection models; non-informative and informative drop-out; joint analysis of longitudinal and survival data.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, or STAT 4760 or STAT 7760 or instructor's consent

STAT 7450: Applied Statistical Methods for Bioinformatics

Random variables; Point estimation; Multiple t-test; Likelihood principle; Analysis of variance; Probabilistic methods for sequence modeling; Gene expression analysis; Protein structure prediction; Genome analysis; Hierarchical clustering and Gene classification.

Credit Hours: 3

Prerequisites: STAT 3500, 7070, STAT 4710 or STAT 7710, STAT 4760 or STAT 7760, or instructor's consent

STAT 7510: Applied Statistical Models I

Introduction to applied linear models including regression (simple and multiple, subset selection, estimation and testing) and analysis of variance (fixed and random effects, multifactor models, contrasts, multiple testing). No credit toward a graduate degree in statistics.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, STAT 4760 or STAT 7760, or instructor's consent

STAT 7530: Analysis of Variance

Study of analysis of variance and related modeling techniques for cases with fixed, random, and mixed effects. Exposure to designs other than completely randomized designs including factorial arrangements, repeated measures, nested, and unequal sample size designs.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, STAT 4760 or STAT 7760, or instructor's consent

STAT 7540: Experimental Design

Examination and analysis of modern statistical techniques applicable to experimentation in social, physical or biological sciences.

Credit Hours: 3

Prerequisites: STAT 3500 or STAT 4510 or STAT 7510 or STAT 4530 or STAT 7530 or instructor's consent

STAT 7560: Applied Multivariate Data Analysis

Testing mean vectors; discriminant analysis; principal components; factor analysis; cluster analysis; structural equation modeling; graphics.

Credit Hours: 3

Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760. No credit toward a graduate degree in statistics

STAT 7580: Introduction to Statistical Methods for Customized Pricing

(cross-leveled with STAT 4580). Introduction to basic concepts of and statistical methods used in customized pricing. Focuses on applying statistical methods to real customized pricing problems. Students will gain an understanding of customized pricing and some hands on experience with SAS Enterprise minor.

Credit Hours: 3

Prerequisites: STAT 3500 or STAT 4510 or STAT 7510 or instructor's consent

STAT 7610: Applied Spatial Statistics

Introduction to spatial random processes, spatial point patterns, kriging, simultaneous and conditional autoregression, and spatial data analysis.

Credit Hours: 3

Prerequisites: STAT 4510 or STAT 7510 or instructor's consent

Recommended: Basic knowledge of calculus and matrices

STAT 7640: Introduction to Bayesian Data Analysis

Bayes formulas, choices of prior, empirical Bayesian methods, hierarchical Bayesian methods, statistical computation, Bayesian estimation, model selection, predictive analysis, applications, Bayesian software.

Credit Hours: 3

Prerequisites: STAT 3500 or STAT 4510 or STAT 7510 or instructor's consent

STAT 7710: Introduction to Mathematical Statistics

(same as MATH 7315). Introduction to theory of probability and statistics using concepts and methods of calculus.

Credit Hours: 3

Prerequisites: MATH 2300 or instructor's consent. No credit MATH 7315

STAT 7750: Introduction to Probability Theory

(same as MATH 7320). Probability spaces; random variables and their distributions; repeated trials; probability limit theorems.

Credit Hours: 3

Prerequisites: MATH 2300 or instructor's consent

STAT 7760: Statistical Inference

(same as MATH 7520). Sampling; point estimation; sampling distribution; tests of hypotheses; regression and linear hypotheses.

Credit Hours: 3

Prerequisites: STAT 4750 or STAT 7750 or instructor's consent

STAT 7810: Nonparametric Methods

A first course in Non-parametric statistical methods based on ranks. Both theory and application are emphasized. Two-sample problems. K-sample problems. Tests for independence. Contingency tables. Goodness-of-fit tests.

Credit Hours: 3

Prerequisites: STAT 4710 or STAT 7710 or instructor's consent

STAT 7830: Categorical Data Analysis

Discrete distributions, frequency data, multinomial data, chi-square and likelihood ratio tests, logistic regression, log linear models, rates, relative risks, random effects, case studies.

Credit Hours: 3

Prerequisites: STAT 4710 or STAT 7710 or instructor's consent

STAT 7850: Introduction to Stochastic Processes

Study of random processes selected from: Markov chains, birth and death processes, random walks, Poisson processes, renewal theory, Brownian motion, Gaussian processes, white noise, spectral analysis, applications such as queuing theory, sequential tests.

Credit Hours: 3

Prerequisites: STAT 4750 or STAT 7750 or instructor's consent

STAT 7870: Time Series Analysis

A study of univariate and multivariate time series models and techniques for their analyses. Emphasis is on methodology rather than theory. Examples are drawn from a variety of areas including business, economics and soil science.

Credit Hours: 3

Prerequisites: STAT 7710 or STAT 7760 or instructor's consent

STAT 8085: Problems in Statistics for Majors - Masters

Approved reading and study, independent investigations, and reports on approved topics.

Credit Hour: 1-99

Prerequisites: instructor's consent

STAT 8090: Master's Thesis Research in Statistics

Graded on a S/U basis only.

Credit Hour: 1-99

STAT 8100: Special Topics in Statistics

Credit Hour: 1-99

Prerequisites: instructor's consent

STAT 8220: Applied Statistical Models II

Advanced applied linear models including mixed linear mixed models (fixed and random effects, variance components, correlated errors, split-plot designs, repeated measures, heterogeneous variance), generalized linear models (logistic and Poisson regression), nonlinear regression. No credit toward a graduate degree in statistics.

Credit Hours: 3

Prerequisites: STAT 4510 or STAT 7510 or instructor's consent

STAT 8310: Data Analysis I

Applications of linear models including regression (simple and multiple, subset selection, regression diagnostics), analysis of variance (fixed, random and mixed effects, contrasts, multiple comparisons) and analysis of covariance; alternative nonparametric methods.

Credit Hours: 3

Prerequisites: STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760 or instructor's consent

STAT 8320: Data Analysis II

Advanced applications including analysis of designs (e.g. repeated measures, hierarchical models, missing data), multivariate analysis (Hotelling's T², MANOVA, discriminant analysis, principal components, factor analysis), nonlinear regression, generalized linear models, categorical data analysis.

Credit Hours: 3

Prerequisites: STAT 8310 or instructor's consent

STAT 8330: Data Analysis III

An introduction to data analysis techniques associated with supervised and unsupervised statistical learning. Resampling methods, model selection, regularization, generalized additive models, trees, support vector machines, clustering, nonlinear dimension reduction.

Credit Hours: 3

Prerequisites: STAT 8320

STAT 8370: Statistical Consulting

Participation in statistical consulting under faculty supervision. Formulation of statistical problems. Planning of surveys and experiments. Statistical computing. Data analysis. Interpretation of results in statistical practice.

Credit Hours: 3

Prerequisites: STAT 4760 or STAT 7760 and STAT 8320 or instructor's consent

STAT 8410: Statistical Theory of Bioinformatics

Study of statistical theory and methods underpinning bioinformatics. Topics include statistical theory used in biotechnologies such as gene sequencing, gene alignments, microarrays, phylogenetic trees, evolutionary models, proteomics and imaging.

Credit Hours: 3

Prerequisites: STAT 4760 or STAT 7760

STAT 8640: Bayesian Analysis I

Bayes' theorem, subjective probability, non-informative priors, conjugate prior, asymptotic properties, model selection, computation, hierarchical models, hypothesis testing, inference, predication, applications.

Credit Hours: 3

Prerequisites: STAT 4760 or STAT 7760 and MATH 4140 or MATH 7140 or instructor's consent

STAT 8710: Intermediate Mathematical Statistics I

Sample spaces, probability and conditional probability, independence, random variables, expectation, distribution theory, sampling distributions, laws of large numbers and asymptotic theory, order statistics.

Credit Hours: 3

Prerequisites: STAT 4760 or STAT 7760 or instructor's consent

STAT 8720: Intermediate Mathematical Statistics II

Further development of estimation theory, including sufficiency, minimum variance principles and Bayesian estimation. Tests of hypotheses, including uniformly most powerful and likelihood ratio tests.

Credit Hours: 3

Prerequisites: STAT 8710 or instructor's consent

STAT 9085: Problems in Statistics for Majors - PhD

Approved reading and study, independent investigations, and reports on approved topics.

Credit Hour: 1-99

Prerequisites: instructor's consent

STAT 9090: Doctoral Dissertation Research in Statistics

Graded on a S/U basis only.

Credit Hour: 1-99

STAT 9100: Recent Developments in Statistics

The content of the course which varies from semester to semester, will be the study of some statistical theories or methodologies which are currently under development, such as bootstrapping, missing data, non-parametric regression, statistical computing, etc.

Credit Hours: 3

Prerequisites: STAT 4760 or STAT 7760 and instructor's consent

STAT 9250: Statistical Computation and Simulation

Random number generation, acceptance/rejection methods; Monte Carlo; Laplace approximation; the EM algorithm; importance sampling; Markov chain Monte Carlo; Metropolis-Hasting algorithm; Gibbs sampling, marginal likelihood.

Credit Hours: 3

Prerequisites: STAT 4760 or STAT 7760 or instructor's consent

STAT 9310: Theory of Linear Models

Theory of multiple regression and analysis of variance including matrix representation of linear models, estimation, testing hypotheses, model building, contrasts, multiple comparisons and fixed and random effects.

Credit Hours: 3

Prerequisites: STAT 4760 or STAT 7760 and MATH 4140 or MATH 7140, and instructor's consent

STAT 9320: Advanced Linear Models

Advanced topics in the theory and application of linear models. Specific content varies with instructor.

Credit Hours: 3

Prerequisites: STAT 9310 or instructor's consent

STAT 9370: Multivariate Analysis

Distribution of sample correlation coefficients. Derivation of generalized T-squared and Wishart distributions. Distribution of certain characteristic roots, vectors. Test of hypotheses about covariance matrices and mean vectors. Discriminant analysis.

Credit Hours: 3

Prerequisites: STAT 4760 or STAT 7760 and MATH 4140 or MATH 7140 or instructor's consent

STAT 9410: Survival Analysis

Statistical failure models, Kaplan-Meier estimator, Log-rank test, Cox's regression model, Multivariate failure time data analysis, Counting process approaches.

Credit Hours: 3

Prerequisites: STAT 4760 or STAT 7760 or instructor's consent

STAT 9510: Theory of Nonparametric Statistics

Estimation, hypothesis testing, confidence intervals, etc., when functional form of the population distribution is unknown.

Credit Hours: 3

Prerequisites: STAT 4760 or STAT 7760 or instructor's consent

STAT 9530: Data Mining and Machine Learning Methods

Approaches to estimating unspecified relationships and findings unexpected patterns in high dimensional data. Computationally intensive methods including splines, classifications, tree-based and bagging methods, support vector machines.

Credit Hours: 3

Prerequisites: STAT 4110 or STAT 7110, STAT 4760 or STAT 7760 and STAT 8320 or instructor's consent

STAT 9640: Bayesian Analysis II

Likelihood principle, decision theory, asymptotic properties, advanced topics in Bayesian analysis at the instructor's discretion.

Credit Hours: 3

Prerequisites: STAT 8640 and STAT 9710 or instructor's consent

STAT 9710: Advanced Mathematical Statistics I

Advanced study of mathematical statistics appropriate for PhD students in statistics. Elements of probability theory, principles of data reduction,

point and interval estimation, methods of finding estimators and their properties, hypothesis testing, methods of finding test functions and their properties. Decision theoretic, classical and Bayesian perspectives.

Credit Hours: 3

Prerequisites: STAT 8720 or instructor's consent

STAT 9720: Advanced Mathematical Statistics II

Continuation of STAT 9710. Topics include distribution theory and convergence, laws of large numbers, central limit theorems, efficiency, large sample theory, and elements of advanced probability.

Credit Hours: 3

Prerequisites: STAT 9710 or instructor's consent

STAT 9810: Advanced Probability

(same as MATH 8480). Measure theoretic probability theory.

Characteristic functions; conditional probability and expectation; sums of independent random variables including strong law of large numbers and central limit problem.

Credit Hours: 3

Prerequisites: STAT 4750 STAT 7750 or MATH 4700 or MATH 7700 or instructor's consent

STAT 9820: Stochastic Processes

(same as MATH 8680). Markov processes, martingales, orthogonal sequences, processes with independent and orthogonal increments, stationarity, linear prediction.

Credit Hours: 3

Prerequisites: STAT 9810 or instructor's consent

Student Success Center Courses

SSC 1020: University Freshmen Seminar

(same as INTDSC 1020). To maximize student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by collegiate life. Attainment of an appropriate balance between personal freedom and social responsibility underlies all seminar activities.

Credit Hour: 1

Prerequisites: Restricted to first time college student. No credit for students who have earned credit for AFNR 1115, INTDSC 1001, IS_LT 1110, ED_LPA 3100 or an equivalent first-year orientation course at another institution. Credit restrictions that apply to orientation classes apply to this course. Students are not allowed to be enrolled in SSC 1020 and SSC 1150 in the same semester

SSC 1020H: University Freshmen Seminar - Honors

(same as INTDSC 1020). To maximize student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by collegiate life. Attainment of an appropriate balance between personal freedom and social responsibility underlies all seminar activities.

Credit Hour: 1

Prerequisites: Restricted to first time college student. No credit for students who have earned credit for AFNR 1115, INTDSC 1001, IS_LT 1110, ED_LPA 3100 or an equivalent first-year orientation course at another institution. Credit restrictions that apply to orientation classes

apply to this course. Students are not allowed to be enrolled in SSC 1020 and SSC 1150 in the same semester. Honors eligibility required

SSC 1150: College Success Seminar

This course is designed to create a positive new student experience by connecting students with the Mizzou campus community and the academic resources essential to their success. Students' strengths will be assessed and used to assist each student in the development and implementation of an individualized and strategic approach to successfully navigating their way through collegiate life. Individual course sections may be restricted to specific majors or groups.

Credit Hours: 2

Prerequisites: Freshmen or sophomore standing required

SSC 1151: Academic Success Seminar

Academic recovery strategies will be explored and implemented throughout the course. Students will learn to assess their academic situations, develop a plan of action, apply new strategies for success, and activate their success plan throughout all aspects of their collegiate career. Campus academic resources will be identified to meet students' specific needs. Each student will create an individual plan of action in order to recover academically and stay on the path toward success and graduation. Individual course sections may be restricted to specific majors or groups.

Credit Hours: 2

SSC 1155: Mindfulness and Academic Recovery

This class includes instruction in mindfulness practices with a special emphasis on how these skills can positively help manage stress associated with work, school, family, relationships, finances and health concerns. The class is practically oriented and teaches breathing strategies, body awareness practices, mindful communication skills, and a variety of positive psychology practices designed to change the way we use our thoughts and emotions for greater personal and academic success. Graded on an A-F basis only.

Credit Hour: 1

Prerequisites: Instructor consent required

SSC 1500: Disney Internship

Internship: Experiential learning as a "cast member" of the Walt Disney World College Program. Students work for a semester at the Walt Disney World resort and have the option of taking Disney Classes. Graded on S/U basis only.

Credit Hours: 0

Prerequisites: instructor's consent; departmental signature

SSC 2100: Career Explorations

Contribution of career development theory to choice of career and/or major. Exploration of personal and social determinants of career choice. Class consists of lecture, laboratory experiences, and use of facilities at the Career Planning and Placement Center.

Credit Hour: 1-3

SSC 2150: Tutoring University Students: Theory & Practice

An introduction to tutoring university students. Provides a pedagogical foundation for tutoring college students in content areas. Topics include

but are not limited to diversity, the tutoring relationship, plagiarism, learning strategies, and best practices. Students will observe tutorials during the first part of the course and will conduct their own tutorials later in the semester. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Instructor's consent

SSC 3100: Advanced Disney Internship

Advanced Internship: Experiential learning opportunity with the Walt Disney World College Program. Students work for a semester at the Walt Disney World resort and have the option of taking Disney classes. This is a second internship that is more field-specific and carries with it more responsibilities. Graded on S/U basis only.

Credit Hours: 0

Prerequisites: instructor's consent, departmental signature

Surgery Courses

SURGRY 6006: Surgery Clerkship

Emphasis is placed on the diagnosis and treatment of disorders requiring surgical intervention. Each student has a faculty mentor-advisor, attends faculty discussion sessions that cover objectives in the required textbooks and takes call under the supervision of surgical residents. Students are assigned patients from all surgical specialties, participate in preoperative examinations and evaluations, assist during surgical procedures and follow the postoperative management process.

Credit Hours: 8

SURGRY 6016: Rural Surgery Clerkship

Rural Surgery Clerkship

Credit Hours: 8

SURGRY 6026: Springfield Surgery Clerkship

Emphasis is placed on the diagnosis and treatment of disorders requiring surgical intervention. Students are assigned patients from all surgical specialties, participate in preoperative examinations and evaluations, assist during surgical procedures and follow the postoperative management process.

Credit Hours: 8

Prerequisites: successful completion of the first two years of medical school

SURGRY 6106: Remediation Surgery Clerkship

Enrolled students are those who received an unsatisfactory grade in a Surgery Clerkship at any Mizzou Med location or site. This course gives the student an opportunity to rectify their deficiency.

Credit Hours: 8

Prerequisites: SURGRY 6006 Surgery Clerkship, received unsatisfactory grade

SURGRY 6383: ABS Surgery Research

ABS Surgery Research

Credit Hour: 5-10

SURGRY 6385: ABS Surgery Research and Review

ABS Surgery Research and Review

Credit Hours: 5

SURGRY 6655: Surgical Off-Site Elective

Surgical Off-Site Elective

Credit Hours: 5

SURGRY 6658: Burn Unit

Burn Unit

Credit Hours: 5

SURGRY 6661: Surgery Research Elective

Surgery Research Elective

Credit Hours: 5

SURGRY 6671: Oncology Multidisciplinary

Oncology Multidisciplinary

Credit Hours: 5

SURGRY 6672: Neuro-Oncology/Radiosurgery

Neuro-Oncology/Radiosurgery

Credit Hours: 5

SURGRY 6686: Neurosurgery B

Neurosurgery B

Credit Hours: 5

SURGRY 6687: Advanced Neurosurgery

Advanced Neurosurgery

Credit Hours: 5

SURGRY 6688: Orthopaedic Surgery Reserach Elective

Student will identify interest in surgical clinical research and other topical areas of orthopaedic surgery. The research will define concepts relevant to the practice of orthopaedic surgery. The student will engage in self-directed learning and evaluation of new information.

Credit Hours: 5

Prerequisites: SURGRY 6006; level M4

SURGRY 6759: General Surgery Externship - Rural

General Surgery Externship - Rural

Credit Hours: 5

SURGRY 6770: Surgery Rural Elective

The 4th year surgery student will function as a surgical extern and be integrated into the pre-operative, operative, and post-operative care of surgical patients. The student will function as surgical extern with close supervision and one-on-one instruction.

Credit Hours: 5

Prerequisites: SURGRY 6002 and SURGRY 6006

SURGRY 6774: Otolaryngology - Rural

Otolaryngology - Rural

Credit Hours: 3

SURGRY 6780: Urology - Rural

Urology - Rural

Credit Hours: 5

SURGRY 6781: Orthopaedic Surgery A - Rural

Orthopaedic Surgery A - Rural

Credit Hours: 5

SURGRY 6860: EMERGENCY MEDICINE

EMERGENCY MEDICINE

Credit Hours: 5

SURGRY 6926: Ambulatory Otolaryngology

The student will recognize all subspecialty areas included on this rotation: facial trauma, otology/neurotology, head and neck surgical oncology, facial plastic surgery, sinus surgery, pediatric ENT, laryngology and allergy. The student will be exposed to a broad spectrum of patients (adult and pediatric) in both procedural and clinical settings. Students will demonstrate improved technical skills during the 2 week rotation.

Credit Hours: 2

Prerequisites: successful completion of the first two years of medical school

SURGRY 6955: Ambulatory ENT/Urology

Goals/Objectives: This elective will offer students an exposure to ambulatory care in urology and otolaryngology. Students will see a broad range of patients and numerous outpatient procedures. Students will have close supervision during this experience. Both services have a combined outpatient population of 24,000 visits per year. Students will be exposed to numerous situations they would face in a primary care office. Clinic is offered five days per week by each service. Observation in the O.R. is available and attendance at teaching conferences is required. There will be a written exam given at the completion of the 2 weeks of ENT.

Credit Hours: 5

SURGRY 6957: Cardiothoracic Surgery

Cardiothoracic Surgery

Credit Hours: 5

SURGRY 6958: Surgical off-Site Selective

Surgical off-Site Selective

Credit Hours: 5

SURGRY 6959: General Surgery Externship

Goals/Objectives: 1. Provide the student with ability to function as a first year general surgery house officer with close supervision and one-on-one instruction. 2. Become familiar with pre-operative, operative, and

post-operative care of general surgical patients. 3. Become familiar with the graded responsibility structure necessary to ethically conduct post-graduate surgical residency training. 4. Develop bedside patient care skills. 5. Develop reading and clinical research skills necessary for contemporary surgical care.

Credit Hours: 5

SURGRY 6971: Surgical Critical Care

The Surgical Critical Care student will acquire a broad exposure to assessment and management of critically ill and injured patients. The student will participate in daily rounds and patient care with the Surgical Critical Care service. Students will become an active member of the multidisciplinary ICU team and remain under the close supervision of Acute Care Surgery Faculty and Residents. Participation with the members of the multidisciplinary critical care team creates an excellent practical learning environment, while didactic conferences/case presentations compliment the experience.

Credit Hours: 5

Prerequisites: Surgery Clerkship

SURGRY 6972: Surgical Oncology

Surgical Oncology

Credit Hours: 5

SURGRY 6973: Head and Neck Surgical Oncology

Head and Neck Surgical Oncology

Credit Hours: 5

SURGRY 6974: Otolaryngology

Goals/Objectives: The Otolaryngology student rotation offers learning through participation in daily care of patients, case discussion in conferences, and didactic conferences. All subspecialty areas are included on this rotation, including facial trauma, otology, neurotology, head and neck surgical oncology, facial reconstruction, sinus surgery, pediatric ENT and allergy. Significant outpatient experience is provided and the extent of operating room participation to the student's needs and preferences. The student sees a full spectrum of patients (adult and pediatric) at the University and the VA. The student sees and learns about a variety of outpatient problems during the outpatient segment of this rotation. A wide variety of surgical procedures are observed in the operating room. The residents and faculty encourage an individually tailored learning experience for the student. Supplemental texts and other teaching aids are encouraged. Clinical research projects are available for interested and committed students.

Credit Hours: 5

Prerequisites: Surgery Clerkship

SURGRY 6975: Pediatric Surgery

Goals/Objectives: To gain a working knowledge of a) diagnosis, b) preoperative care, c) surgery, and d) postoperative care of the 1) congenital 2) traumatic 3) oncologic and 4) common surgical conditions affecting infants and children. This rotation is designed for the student planning a career that includes the care of infants and children.

CURRICULUM: Attendance on daily rounds and participation in pediatric surgery clinic are mandatory. The student should also be present in radiology for all inpatient and outpatient contrast studies on surgical

patients and consults. Operating room exposure can be individualized; the student is expected to be present, but not necessarily scrubbed, for the key portion of each case. Pediatric Surgical texts can be found in the Medical Library under RD 137, in the Pediatric or Surgery libraries, in the bookstore. Rowe - Essentials of Pediatric Surgery, Holder - Pediatric Surgery, Welch - Pediatric Surgery (4th ed.), Coran - Surgery of the Neonate.

Credit Hours: 5

Prerequisites: Surgery Clerkship

SURGRY 6976: Plastic Surgery

Goals/Objectives: The plastic surgery student rotation is considered "hands on" experience for the student rotating in the division of plastic surgery. This is a busy rotation with good opportunity for clinical exposure. The patient population includes all subspecialty areas of plastic surgery including hand and microsurgery, head and neck cancer surgery, congenital deformities, burns, facial trauma, and major reconstruction, as well as cosmetic surgery. On this rotation, the student is expected to have an in-depth opportunity to learn, practice, and hone surgical suturing techniques and to first or second assist on many major surgical procedures. The graphic specialty of plastic surgery is best appreciated by participation and observation and there will be ample opportunity for this. In addition to the ward and major operating room duties, the student will obtain ambulatory patient care exposure by participating in the clinics, in the evaluation of new patients, and the after care of surgery patients. In addition, a significant percentage of the surgery is done as an outpatient and the student should have the opportunity to gain appreciation of the nuances of surgery done in the ambulatory environment. Incumbent to these considerations are exposure and appreciation of cost containment in plastic surgical procedures.

Credit Hours: 5

SURGRY 6977: Acute Care Surgery

Students will participate in patient care, gather pertinent patient data, and develop plans of care for the patients on the surgery service. Case presentations will be given to the surgical team each day. Night and weekend call should be expected.

Credit Hours: 5

Prerequisites: Surgery and Internal Medicine Clerkship

SURGRY 6979: Vascular Surgery

Vascular Surgery

Credit Hours: 5

SURGRY 6980: Urology

The goal of the rotation is to provide a comprehensive urologic experience for those students who may be interested in Urology as a career as well as those students who simply want a more in-depth experience before pursuing another specialty. At the conclusion of the rotation, the student will be able to competently manage common urologic conditions such as hematuria, incontinence, and erectile dysfunction and recognize those patients who need referral to a specialist. To accomplish this, emphasis is placed on the management of both outpatients and inpatients. Active participation in the operating room is expected and the student will assist in a wide variety of urologic procedures. Students will also participate in outpatient procedures such as cystoscopy and vasectomy. Basically, the student will function as an

extern on the University Urologic Service with appropriate patient care responsibilities.

Credit Hours: 5

SURGRY 6981: Orthopaedic Surgery Sub-Internship

Goals/Objectives: Rotation for students actively interested (more aggressive) students in orthopaedics as a career. Emphasis will be placed on surgical indications, operative technique and post-operative care of orthopaedic patients. The student will be assigned by Ortho faculty to two different orthopaedic teams (sports medicine, foot and ankle, total joint, general, pediatrics, trauma, and hand) for two weeks at a time. Each student would be given an extensive reading schedule, a list of topics to be covered, given a written or oral examination including both services emphasized at the end of block. Brief oral presentation, to the residency or service on which they are working, on orthopaedic subject of choice pertaining to Ortho service/residency assigned. **CURRICULUM:** The student will spend two weeks on two different university teams during this rotation. The student will be expected to participate in all aspects of the orthopaedics services they are assigned. This will include outpatient clinics, elective and emergent OR time, routine day-to-day care of patients on the orthopaedic service, and consultations. The student will take four nights of call with the Ortho residents assigned to service. The student will be evaluated by the attending and residents on the two services to which they have been assigned.

Credit Hours: 5

Prerequisites: Surgery Clerkship

SURGRY 6982: Introduction to Orthopaedic Surgery

Goals/Objectives: Rotations for students interested in a career in primary care. The student will learn physical diagnosis and outpatient as well as surgical treatment of common orthopedic conditions. Each student will be given a list of topics that will be covered, a reading list to which the student would be obligated to read and given a short written and/or oral examination of the musculoskeletal system emphasized. Brief oral presentation, to the residency or service on which they are working, on an orthopedic subject of choice pertaining to Ortho service/residency assigned. The student will be assigned for the four weeks by Ortho Faculty to a preceptor from one of the following areas: sports medicine, foot and ankle, total joint, general, pediatrics, trauma or hand. **CURRICULUM:** The student on this rotation will be expected to learn to diagnose and manage commonly seen orthopedic conditions in the assigned orthopedic area. The student will participate in outpatient clinics, OR cases, rounds and conferences. The student will take two call nights with the Ortho Resident assigned to service. Basic techniques of splinting and cast application will be learned by sessions with the orthopedic cast technician.

Credit Hours: 5

Prerequisites: Surgery Clerkship

SURGRY 6983: Advanced Orthopaedic Surgery

Advanced Orthopaedic Surgery

Credit Hours: 5

SURGRY 6985: Neurosurgery A

Goals/Objectives: This course will provide the conscientious student an opportunity to acquire the following: 1. The ability to perform comprehensive neurological evaluation of the patient including both

history taking and physical examination. This will entail a review of basic neuroanatomy and neurophysiology and a correlation of that information with the requirements of clinical medicine. 2. A basic understanding of neurosurgical diseases and their evaluation and management.

Of particular importance will be the emphasis placed upon the initial evaluation of patients with central and peripheral nervous system trauma and neoplasms, cerebrovascular disease, congenital diseases of the nervous system, pain problems, diseases of the spine and lumbar discs. **CURRICULUM:** In order to direct the objectives of this course, students will be exposed to the following: 1. Individualized teaching sessions with the faculty. 2. Combined conferences with neurology, neuroradiology and neuropathology. 3. Outpatient clinics at the UMHSC and EFCC (Ellis Fischel). 4. The inpatient services of neurosurgery at UMHSC. 5. The operating room at UMHSC. **Evaluations:** The progress of the student will be evaluated through personal interaction with the faculty and residents and through an oral examination at the end of the course.

Credit Hours: 5

Prerequisites: Surgery Clerkship

SURGRY 6986: Bariatric Surgery

Bariatric Surgery

Credit Hours: 5

SURGRY 6988: Critical Care Neurosurgery

Goals/Objectives: The student will gain experience with the clinical evaluation of patients with critical care neurosurgical problems such as head trauma, subarachnoid hemorrhage, and spinal cord injury. The student will perform neurologic assessments, evaluate laboratory data and participate in the decision making on patients with these disorders. **CURRICULUM:** 1. Daily inpatient rounds in the MNICU, SICU and CCU on the neurosurgical patients. 2. Individualized teaching with faculty. 3. Conferences: Neurosurgery Grand Rounds, Neuro-radiology, Neuro-pathology, Neuroscience. **Evaluations:** By interactions with faculty and residents and oral examination at the end of the rotation.

Credit Hours: 5

Prerequisites: Surgery Clerkship

SURGRY 6989: Pediatric Neurosurgery

Goals/Objectives: To provide interested students the opportunity to acquire exposure and knowledge in the field of pediatric neurosurgery. This elective will allow the student to learn about clinical entities such as craniofacial anomalies, hydrocephalus, neuroendoscopy, congenital and central nervous system anomalies, and trauma of the CNS. The student becomes part of a team and closely interacts with the attending physician, neurosurgery residents, and clinical nurse specialist. **CURRICULUM:** 1. Daily inpatient rounds. 2. Individualized teaching with faculty. 3. Clinics: Chiari and Pediatric Neurosurgery. 4. Conferences: Neurosurgery Grand Rounds, Neuro-radiology, Neuro-pathology, Neuroscience. **Prerequisites:** Surgery Clerkship

Credit Hours: 5

Textile And Apparel Management Courses

T_A_M 1200: Basic Concepts of Apparel Design and Production

Introduction to design techniques, coordination of fabric with design, selection of support materials, and basic understanding of garment assembly operations.

Credit Hours: 3

T_A_M 1300: Softgoods Retailing

Surveys merchandising and retailing principles with specific applications to the softgoods industry.

Credit Hours: 3

T_A_M 2100: Presentation Techniques for Merchandising

This class explores Adobe Creative Suite (Photoshop, Illustrator, and InDesign) as a tool for presentation techniques within the field of fashion merchandising.

Credit Hour: 1-3

T_A_M 2120: Professional Seminar

Exploration of issues in professional activity/success including: evaluating opportunities, oral and written communication for presenting oneself, the articulation of professional/private life, and professional ethics.

Credit Hour: 1

T_A_M 2200: Science of Textiles

Fundamental concepts of textiles. Chemical composition, molecular arrangement, and physical structure of natural and manufactured fibers. Yarn and fabric manufacturing and various finishing techniques. Impacts of such characteristics and techniques on function, performance, and quality. Graded on A-F basis only.

Credit Hours: 3

T_A_M 2280: Apparel Production

Introduction to sewn products industry applications in which students assemble sample garments and products on industrial equipment. Order of operations is emphasized and industry specific software is introduced.

Credit Hours: 4

Prerequisites or Corequisites: T_A_M 1200 and T_A_M 2200

T_A_M 2300: Retail Finance and Merchandise Control

Emphasizes assortment and financial planning utilizing computer applications in the retail environment. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: T_A_M 1300 or MRKTNG 3000, MATH 1100

Recommended: computer familiarity

T_A_M 2380: Integrated Apparel Design and Production I

A beginning apparel product development course integrating pattern-making, apparel assembly decision-making and materials selection. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: T_A_M 2280 or instructor's consent

T_A_M 2400: Global Consumers

This course uses consumer behavior and cultural frameworks, integrated with critical and creative thinking processes to develop global perspective that is sensitive to diverse consumers' needs and preferences for

products and services in the global marketplace. Graded on A-F basis only.

Credit Hours: 3

T_A_M 2480: Apparel and Textile Presentation Techniques

Apparel and textile presentation processes. Introduction to a range of traditional and innovative presentation techniques using various media. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: T_A_M 2380

T_A_M 2500: Social Appearance in Time and Space

An investigation of the motives and meanings that individuals negotiate through the use of dress in presenting themselves as players in complex social contexts. The emphasis is on cross-cultural, historical, and contemporary settings.

Credit Hours: 3

Prerequisites: ENGLSH 1000

T_A_M 2520: History of Western Dress

Surveys the history of Western dress from prehistory through the 18th Century.

Credit Hours: 3

Prerequisites: ENGLSH 1000

T_A_M 2580: Digital Textile and Apparel Applications

Use of computer aided design technology to create designs for textiles and apparel. Includes portfolio development. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: T_A_M 2480 or instructor's consent

T_A_M 2810: Think Global: Fundamentals of Globalization and Digital Technologies

(same as GERMAN 3510, PEA_ST 2810, and JOURN 3510). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

Credit Hours: 3

T_A_M 2810H: Think Global: Fundamentals of Globalization and Digital Technologies - Honors

(same as GERMAN 3510H and JOURN 3510H). This interdepartmental course serves as the introductory seminar for students pursuing the Certificate of Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives.

Credit Hours: 3

Prerequisites: Honors eligibility required. Restricted to non-Journalism students. Journalism students should enroll in Journalism sides of this course

T_A_M 3001: Recent Trends in Textiles and Apparel Management

For upper-class students who wish additional knowledge and understanding in specific subject matter areas.

Credit Hour: 1-3

T_A_M 3110: Textiles and Apparel in the Global Economy

Economic, social, and political dimensions of the textile complex and trade in a global economy; implications for production, distribution, and consumption of products.

Credit Hours: 3

Recommended: 6 hours of economics

T_A_M 3200: Softgoods Quality Evaluation

Examination and evaluation of fabric and apparel structures with emphasis on principles of advanced textile performance and quality analysis. Includes end-use characteristics; price/quality relationships; textile and apparel product standards and specifications; and standard test methods to evaluate comfort, performance, and function of sewn products. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: T_A_M 2200

T_A_M 3210: Computer Aided Design

Use of computer aided design technology to create designs for textiles and apparel.

Credit Hours: 3

T_A_M 3300: Retail and Merchandising Analysis

This course provides an opportunity to apply the concepts of merchandise planning, financial control, and promotions to real life buying situations. It will employ Problem Based Learning, approach that will allow students to learn through engagement in real problems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: T_A_M 2300

T_A_M 3380: Integrated Apparel Design and Production II

An intermediate apparel product development course integrating pattern-making, apparel assembly decision-making and materials selection. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: T_A_M 2380

T_A_M 3480: Technical Design

Technical product development for the global sewn products industry. Graded on A-F only basis.

Credit Hours: 3

Prerequisites or Corequisites: T_A_M 3380 and T_A_M 3281

Prerequisites: T_A_M 3480

T_A_M 3520: 19th and 20th Century Western Dress

A study of nineteenth and twentieth century Western dress as influenced by time, place, and culture. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGLSH 1000. Restricted to Textile and Apparel Management majors only

T_A_M 3700: MultiChannel Retailing in the Digital World

Overview of various channels of retail distribution including catalogs, e-commerce, and broadcast formats. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: junior standing

T_A_M 3800: Fundamentals of Entrepreneurship

This course covers the fundamental principles, practices, and procedures of entrepreneurship in a step-by-step approach, and generates a final business plan. It delves into identifying viable target market through research, appealing to and securing customers, selecting a location, recruiting and retailing great employees and determining how much stock to carry and how to sell it. This course is designed for those who want to consider starting their own retail businesses, but not limited to those who want to reassess the direction of their existing businesses, or to those who want to build tangible as well as intangible entrepreneurial skill sets for their corporate careers. Graded on A-F basis only.

Credit Hours: 3

T_A_M 4001: Topics in Textiles and Apparel Management

Selected current topics in field of interest.

Credit Hour: 1-99

T_A_M 4085: Problems in Textiles and Apparel Management

Selected current problems in field of interest.

Credit Hour: 1-99

Prerequisites: instructor's consent

T_A_M 4087: Seminar in Textiles and Apparel Management

Reports and discussion of recent work in area of concentration.

Credit Hour: 1-4

T_A_M 4100: Electronic Commerce Applications

Integration of theory, design, management, and application processes used in Electronic Commerce.

Credit Hours: 3

T_A_M 4110: Global Sourcing

Global sourcing refers to how and where manufactured goods or components will be procured. In today's global softgoods industry, sourcing has become a major competitive strategy for both manufacturers and retailers. Graded on A-F basis only.

Credit Hours: 3

Recommended: junior standing

T_A_M 4130: Supply Chain Management

This course examines how the supply chain management can be used to gain a competitive advantage in the softgoods industry.

Credit Hours: 3

Recommended: junior standing

T_A_M 4300: Softgoods Brand Management and Promotion

Management of branded product lines produced by textile and apparel firms; strategic implications of the development of brand equity toward increasing customer loyalty.

Credit Hours: 3

Prerequisites: junior standing

T_A_M 4400: The Clothing/Textile Consumer: Research and Analysis

Examines the effects of economic, social and marketing factors on the clothing consumption process. Legislative and quality issues related to clothing and textiles are also discussed.

Credit Hours: 3

Prerequisites: 3 hours of merchandising or marketing or microeconomics; 3 hours in statistics

T_A_M 4480: Creativity and Problem Solving

Exploration of the creative process and sources of inspiration. Emphasis on research, design development for a variety of markets. Graded on A-F basis only. Prerequisites or Corequisites: T_A_M 3380.

Credit Hours: 3

T_A_M 4549: International Experiential Learning in Textiles and Apparel

International experience of textile and apparel management, including visitation of foreign industries, government agencies, and cultural/historical sites. Destination may vary. Course may be repeated up to 3 times. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent; Minimum GPA of 2.5

T_A_M 4810: Case Studies in an Inter/Multicultural World

(same as GERMAN 4810, PEA_ST 4810). This inter-departmental course examines the ways in which people across the globe are affected every day by an unprecedented array of linkages that defy geographic and political boundaries. Also serves as one of the seminars for the certificate in Digital Global Studies. Graded on A-F basis only.

Credit Hours: 3

T_A_M 4949: Field Training in Textiles and Apparel Management

Practical aspects of internship experience coordinated with the university curriculum. Available for various areas of emphasis.

Credit Hour: 1-99

Prerequisites: 2.5 GPA, T_A_M 2120, instructor's consent, and necessary prerequisite for area of emphasis

T_A_M 4960: Readings in Textiles and Apparel Management

Selected current readings in field of interest.

Credit Hour: 1-99

Prerequisites: instructor's consent

T_A_M 4980: Apparel Production Management

Integration of consumer, trend and aesthetic research to develop and produce a competitive apparel product line using a multifunctional team approach. Graded on A-F basis only.

Credit Hours: 4

Prerequisites or Corequisites: T_A_M 3480 or T_A_M 4480

T_A_M 4990: Retail Marketing and Merchandising

Analytical management techniques appropriate for evaluation of retailing productivity. Emphasis on the use of these techniques and others in the development of a comprehensive retail marketing strategy.

Credit Hours: 3

Prerequisites: T_A_M 2300, ACCTCY 2036, MRKTNG 3000

T_A_M 4998: Experiential Learning in Textiles and Apparel

This course is designed to provide students with hands-on-experiences in the softgood industry. The purpose is to link classroom learning to business cultural centers, museums, workshops, and /or service learning opportunities achieved through experiential study. Additional field study fees might be applicable, depending on experience. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: instructor's consent and minimum GPA of 2.5

T_A_M 7001: Topics in Clothing and Textiles

Selected current topics in field of interest.

Credit Hour: 1-99

T_A_M 7085: Problems in Clothing and Textiles

Selected current readings in field of interest.

Credit Hour: 1-99

Prerequisites: 3000-level course in field of problems and instructor's consent

T_A_M 7087: Seminar in Clothing and Textiles

Reports and discussion of recent work in area of concentration.

Credit Hour: 1-99

T_A_M 7110: Global Sourcing

Global sourcing refers to how and where manufactured goods or components will be procured. In today's global softgoods industry, sourcing has become a major competitive strategy for both manufacturers and retailers.

Credit Hours: 3

Prerequisites: T_A_M 3110 or T_A_M 9100

T_A_M 7140: Web-Based Marketing Research

This project-oriented course will focus on principles of marketing research applicable to textile/apparel online environments. Students will learn how to develop, utilize, and analyze web-based research.

Credit Hours: 3

Prerequisites: 3 hours of statistics

T_A_M 7300: Branding

Management of branding product lines produced by textile and apparel firms; strategic implications of the development of brand equity toward increasing customer loyalty.

Credit Hours: 3

T_A_M 7960: Readings in Clothing and Textiles

Readings in recent research material in textiles and/or clothing.

Credit Hour: 1-99

Prerequisites: 20 hours in Textile and Apparel Management, and instructor's consent

T_A_M 7980: Softgoods Product Development

Integration of consumer, trend and aesthetic research to develop and produce a competitive apparel product line using a multi-functional team approach.

Credit Hours: 3

Prerequisites or Corequisites: T_A_M 3480 or T_A_M 4480

T_A_M 7990: Retail Marketing and Merchandising

Analytical management techniques appropriate for evaluation of retailing productivity. Emphasis on the use of these techniques and others in the development of a comprehensive retail marketing strategy.

Credit Hours: 3

Prerequisites: T_A_M 2300, ACCTCY 2036, MRKTNG 3000

T_A_M 7999: International Experiential Learning in Textiles and Apparel

Investigation of the complex interaction of manufacturing, marketing, and merchandising in the apparel industry, achieved through instructional and experiential study. Includes international or domestic study trip. Graded on A-F basis only.

Credit Hour: 1-9

T_A_M 8000: Readings in Textiles and Apparel Management

Readings in recent research material in textiles and/or clothing.

Credit Hour: 1-99

Prerequisites: 20 hours in Textile and Apparel Management, and instructor's consent

T_A_M 8001: Topics in Clothing and Textiles

Selected current topics in field of interest.

Credit Hour: 1-99

T_A_M 8085: Problems in Textiles and Apparel Management

Selected current readings in field of interest.

Credit Hour: 1-99

Prerequisites: 4000-level course in field of problem and instructor's consent

T_A_M 8087: Seminar in Clothing and Textiles

Reports and discussion of recent work in area of concentration.

Credit Hour: 1-99

T_A_M 8090: Research in Clothing and Textiles

Independent research leading to a thesis. Report required. Graded on S/U basis only.

Credit Hour: 1-99

T_A_M 8130: Supply Chain Management in the Global Softgoods Industry

This course examines supply chain management strategies to gain a competitive advantages in the global softgoods industry.

Credit Hours: 3

T_A_M 8190: Survey of Research in Textile and Apparel Management

A survey of current research in textiles and apparel management. Underlying theory, research design and empirical techniques will be analyzed and critiqued.

Credit Hour: 1-6

Prerequisites: hours in Statistics and 3 hours in Research Methods

T_A_M 8410: Applied Research Procedures and Analyses in Textiles and Apparel

Investigation of applied research techniques and analyses used in the field of Textile and Apparel Management.

Credit Hours: 3

Prerequisites: 3 credits of merchandising, marketing, or microeconomics; 3 credits in computer science and 3 credits in statistics

T_A_M 8500: Qualitative Social Research Methods

Focus is on the philosophical differences inherent in an interpretivist versus a positivist approach to social research, the strategies and methods of qualitative research, and qualitative research design and criticism. May be repeated twice.

Credit Hours: 3

T_A_M 8510: Perspectives of 19th and 20th Century Dress

A study of nineteenth and twentieth century western dress as influenced by time, place, and culture.

Credit Hours: 3

T_A_M 8600: Sustainable Softgoods: Global Policies and Practices

This course examines sustainability in the soft goods industry in the context of cultural, economic, environmental, social, and technological policies and procedures of soft goods industries. Includes ethics, government policies international labor standards, environmental regulations, company priorities, consumer responsibilities, economic impact, and worker rights. The importance of establishing leadership for social change will be incorporated. Graded on A-F basis only.

Credit Hours: 3

T_A_M 8960: Readings in Clothing and Textiles

Readings in recent research material in textiles and/or clothing.

Credit Hour: 1-99

Prerequisites: graduate standing, 20 hours in Textile and Apparel Management, and instructor's consent

T_A_M 9001: Topics in Clothing and Textiles

Selected current topics in field of interest.

Credit Hour: 1-99

T_A_M 9085: Problems in Textiles and Apparel Management

Selected current readings in field of interest.

Credit Hour: 1-99

Prerequisites: 4000-level course in field of problem and instructor's consent

T_A_M 9087: Seminar in Clothing and Textiles

Reports and discussion of recent work in area of concentration.

Credit Hour: 1-99

T_A_M 9090: Research in Textiles and Apparel Management

Independent research leading to dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

T_A_M 9190: Theory Development and Evaluation in Textile and Apparel Research

This class examines and analyzes extant theories in textiles and apparel research in systemic manner to be able to construct new theories. Graded on A-F basis only.

Credit Hours: 3

T_A_M 9500: Cloth and the Human Experience

Examines the social context of dress and other intimate manifestations of daily life using culture as the level of analysis.

Credit Hours: 3

T_A_M 9510: Textile History Seminar

Investigation of research in textile and costume history with emphasis on developing questions, methods of analysis and interpretation appropriate for data sources used.

Credit Hours: 3

T_A_M 9960: Readings in Clothing and Textiles

Readings in recent research material in textiles and/or clothing.

Credit Hour: 1-99

Prerequisites: 20 hours in Textile and Apparel Management, and instructor's consent

Theatre Courses

THEATR 1005: Topics in Theatre - Humanities/Fine Arts

Organized study of selected topics. Subject and credit may vary from semester to semester. May be repeated with departmental consent.

Credit Hour: 1-99

THEATR 1100: The Theatre in Society

Examines the form and meaning of theatre in civilizations of the West from the ancient Greeks to modern times.

Credit Hours: 3

Recommended: Freshman or Sophomore standing

THEATR 1200: Voice and Articulation

Techniques for improving speaking voice; theories underlying techniques. Attention to student's articulation, pronunciation, voice quality, general expressiveness.

Credit Hours: 2

THEATR 1250: World Theatre Workshop

(same as BL_STU 1250). Provides a diverse ensemble of student performers, writers, and technicians with an intensive immersion in the process of theatrical production through the public presentation of dramatic literature that focuses on global issues of ethnicity and culture.

Credit Hours: 2

THEATR 1320: Beginning Scenic Construction

This course examines, through theory and practice, the art and science of technical theatre. Students explore the methods, equipment, and materials used in executing scenery, properties, and lighting designs for the stage, and participate in the backstage operation of a theatrical production.

Credit Hours: 3

THEATR 1340: Beginning Costume Construction

This course examines, through theory and practice, the art and science of costume technology in the theatre. Students explore the methods, equipment, and materials used in executing costume designs for the stage, and participate in the backstage operation of a theatrical production.

Credit Hours: 3

THEATR 1360: Stage Makeup

Character analysis, facial anatomy, color for stage and television makeup. Practice in application.

Credit Hour: 1

THEATR 1400: Acting for Non-Majors

Basic theory and practice of acting for the non theatre major.

Credit Hours: 3

THEATR 1420: Stage Movement for the Actor

Basic work in the techniques that comprise movement training for the actor.

Credit Hours: 2

THEATR 1720: African-American Theatre History

(same as BL_STU 1720). A historical and critical analysis of the evolution of African American cultural performance in the American theatre and entertainment industry.

Credit Hours: 3

THEATR 2005: Topics in Theatre - Humanities

Organized study of selected topics. Subject and credit may vary from semester to semester. May be repeated with department consent.

Credit Hours: 3**Prerequisites:** instructor's consent

THEATR 2150: African-American Cinema

(same as BL_STU 2150). Study of the impact of cinema and the entertainment industry on the social perceptions of African-Americans and on African-American culture.

Credit Hours: 3

THEATR 2200: Introduction to Performance Studies

This course focuses on the writing of adaptations for the stage through performance. Students develop skills in critical reading, writing, listening, speaking and analysis of performance as they study oral and literary texts, autobiography and narratives.

Credit Hours: 3

THEATR 2300: Production Workshop I

Work backstage in support of university theatre productions. Scenery, lighting, costumes, properties or other responsibilities. May be repeated. Graded on a S/U basis only.

Credit Hour: 1**Prerequisites:** instructor's consent

THEATR 2330: Stage Management

Study of the role of the theatre stage manager. Practice in becoming effective in planning and stage managing theatre productions. Graded on A/F basis only.

Credit Hours: 3

THEATR 2360: Stagecraft

Fundamentals of properties and scenic construction stressing terminology and practical production experience.

Credit Hours: 3**Prerequisites:** THEATR 1320

THEATR 2410: Performance Workshop

Credit for performance in University Theatre Production. Must audition and be cast to receive credit. May be repeated. Graded on S/U basis only.

Credit Hour: 1

THEATR 2510: Introduction to Theatre Design

Design principles and elements as they relate to theatre performance. Use of drawing and creative 3-dimensional exercises to develop design concepts.

Credit Hours: 3**Recommended:** to students interested in directing, playwriting, and design for the theatre

THEATR 2710: Introduction to Theatre History

Survey of major periods emphasizing the produced play in its historical context.

Credit Hours: 3

THEATR 2800: Principles of Script Analysis

Methodologies of script analysis for theatrical purposes. Extensive writing will be required.

Credit Hours: 3**Prerequisites:** ENGLSH 1000

THEATR 2810: Script Analysis for Theatre Majors

Advanced methodologies of script analysis. Critical analysis of scripts for theatre, film, and performance, including the analysis of plots, characters, themes, and language. Students in this class view performances and read scripts, then analyze the connections between the scripts and performances through extensive writing exercises.

Credit Hours: 3**Prerequisites:** ENGLSH 1000**Recommended:** Intended for Theatre Majors

THEATR 2920: Beginning Playwriting

(same as ENGLSH 2560). Study and practice of playwriting fundamentals; emphasizes the one-act play.

Credit Hours: 3

THEATR 3005: Topics in Theatre - Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated with departmental consent.

Credit Hour: 1-99**Prerequisites:** instructor's consent**Recommended:** Junior Standing

THEATR 3005H: Topics in Theatre - Honors - Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated with departmental consent.

Credit Hour: 1-99**Prerequisites:** Instructor's consent and honors eligibility**Recommended:** Junior standing

THEATR 3100: Summer Repertory Theatre

Participation in production of Summer Repertory Theatre. May be repeated.

Credit Hour: 1-99**Prerequisites:** instructor's consent

THEATR 3200: Performance of Literature

(same as ENGLSH 3570 and COMMUN 3570). Analysis and oral interpretation of literary works. Graded on A-F basis only.

Credit Hours: 3**Recommended:** sophomore standing

THEATR 3230: Vocal Performance Technique

This course develops the ability to use the voice as a creative and expressive instrument through a comprehensive study of speech and voice dynamics which include the exploration of proper breathing, relaxation, tonal placement, and non-regional articulation.

Credit Hours: 3

THEATR 3300: Production Workshop II

Credit earned in a technical project in support of a University Theatre production. Scenery, costumes, properties, or other responsibilities. May be repeated to total of 3 hours. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: instructor's consent

THEATR 3310: Costume Crafts

To develop the skills and techniques needed in executing costume crafts, including millinery, corsetry, painting and dyeing, and embellishment.

Credit Hours: 3

THEATR 3320: Theatrical Patternmaking

Patternmaking for the theatre. Basic knowledge of sewing required.

Credit Hours: 3

Prerequisites: THEATR 1340 or T_A_M 1200

THEATR 3330: Advanced Costume Construction

Learn advanced techniques in theatrical costuming through lecture, demonstration and practical application.

Credit Hours: 3

Prerequisites: THEATR 1340 and instructor's consent

THEATR 3340: Scene Painting

Studio practice in techniques of painting scenery for the Theatre.

Credit Hours: 2

Prerequisites: instructor's consent

THEATR 3420: Acting I

Basic theory, practice of acting, stage movement.

Credit Hours: 3

THEATR 3430: Acting II

Script analysis, character and role development in modern and contemporary non-realistic theatrical forms. Rehearsal and presentation of scenes, based on contemporary dramatic and performance theory.

Credit Hours: 3

Recommended: THEATR 2800

THEATR 3530: Computer Graphics in Theatre Design

The use of graphics and CAD software to create theatre designs. The course will progress from 2D CAD drafting to 3D image rendering.

Credit Hours: 3

THEATR 3540: Advanced Stage Makeup

Advanced practical experience in stage makeup techniques. Projects might include: mask making, ventilation, advanced character applications. Practice in application. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: THEATR 1360 and instructor's consent

THEATR 3550: Sound Design

Beginning sound design for the theatre. Units include basics of researching, recording, and augmenting sound for the use in a theatrical production.

Credit Hours: 3

Prerequisites: THEATR 1320 and instructor's consent

THEATR 3560: Scene Design

Theory/practice of scenic design for the theatre with emphasis on the evolutionary process of design from concept to reality.

Credit Hours: 3

Prerequisites: THEATR 2510

Recommended: THEATR 3530

THEATR 3600: Theatrical Directing

Theory and practice of play directing, script selection, casting, play analysis, rehearsal and performance.

Credit Hours: 3

Prerequisites: THEATR 2800 and instructor's consent

THEATR 3700: World Dramatic Literature

(same as ENGLISH 3170). Survey of world drama from Greeks to present, focusing on structure, theory and performance.

Credit Hours: 3

Recommended: THEATR 2710 and THEATR 2800

THEATR 3750: New American Theatre

Survey of drama of the most recent decade as it documents contemporary mores and amplifies cultural themes.

Credit Hours: 3

THEATR 3770: The Theatre Experience: From Page to Stage and Screen

Stimulates critical thinking about theatrical performance, its relationship to the society of which it is a part, and its past and present significance as an art form, a cultural resource, a social institution, and a commercial enterprise.

Credit Hours: 3

Prerequisites: Journalism Majors only

THEATR 3920: Intermediate Playwriting

(same as ENGLISH 3560). Intermediate study of the writing process as applied to theatre, leading to the creation of a full-length play to be considered for production.

Credit Hours: 3

Prerequisites: THEATR 2920 or ENGLISH 2560

THEATR 3930: Screenwriting for Television and Film

(same as FILM_S 3930). Fundamentals of storytelling utilizing tools and structure used by television and film.

Credit Hours: 3

Prerequisites: ENGLSH 1000

THEATR 4005: Topics in Theatre - Humanities

Organized study of selected topics. Topic and credit may vary semester to semester. May be repeated with department consent.

Credit Hour: 1-99

Prerequisites: instructor's consent

THEATR 4220: Acting III

(cross-leveled with THEATR 7220). Period acting styles. Special projects in interpretation, rehearsal, creation of roles.

Credit Hours: 3

Prerequisites: THEATR 3420 or THEATR 3430

Recommended: THEATR 2800

THEATR 4240: Theory and Practice of Theatre of the Oppressed

(same as PEA_ST 4240). Theory and practice of Augusto Boal's liberatory interactive theatre process, including application of techniques of specific social issues.

Credit Hours: 3

Prerequisites: instructor's consent

THEATR 4280: Digital Media and Performance

(cross-leveled with THEATR 7280). This course introduces students to the history and practice of the combination of live actors and digital media within the context of theatre and performance. Students learn about developments in the history of this topic as well as significant individuals, groups of artists, and theorists who have contributed to the field. Theories of performance are utilized as a way to understand subjects such as the development of computers and the Internet, the impact of technology and social media on society, virtual reality, telematics, robotics, and video games. Students create their own performances that combine live performances with digital media elements, and learn basic approaches to using computer software that is employed in creating these types of performances.

Credit Hours: 3

THEATR 4460: Musical Theatre Performance

A practical study for the actor of theatrical songs through character analysis, lyric interpretation and movement. A performance course.

Credit Hours: 3

Prerequisites: instructor's consent

THEATR 4530: Stage Lighting Design

Theory and practice of lighting for theatre production.

Credit Hours: 3

THEATR 4570: Theatrical Costume Design

Basic practice in costume rendering using charcoal, crayon, ink, watercolor and other media. Costume history, both theatrical and general, will be surveyed. Basic problems of theatre design will be considered.

Credit Hours: 3

Prerequisites: THEATR 1320 or THEATR 1340

THEATR 4600: Advanced Directing

(cross-leveled with THEATR 7600). Advanced principles of theatrical directing; emphasizes stylistic variations. May be repeated once.

Credit Hours: 3

Prerequisites: THEATR 3600 and instructor's consent

THEATR 4650: Introduction to Dramaturgy

The course focuses on the practice of dramaturgy and the various functions currently performed by the artist/scholar identified as "dramaturg" including research, dramatic criticism/interpretation, new play development, marketing and educational outreach, and textual adaptation.

Credit Hours: 3

THEATR 4700: Studies in Theatre History

Advanced survey of major periods, movements. Repeatable to a maximum of 6 hours with instructor's consent.

Credit Hours: 3

Recommended: Senior standing

THEATR 4720: American Musicals

(same as MUS_H_LI 4376). Historical survey of the development of the 20th-Century American Musical in Theatre and Film.

Credit Hours: 3

THEATR 4730: Theatre Architecture

Examines the renovation of existing buildings into workable theatre spaces. Includes history of theatre architecture.

Credit Hours: 3

Prerequisites: instructor's consent

THEATR 4800: Studies in Dramatic Theory

Analysis of history, meaning and function of selected concepts of contemporary dramatic and performance theory.

Credit Hours: 3

Recommended: senior standing

THEATR 4820: Studies in Dramatic Literature

Advanced survey of major movements, periods, writers. Repeatable to a maximum of 6 hours with instructor's consent.

Credit Hours: 3

Recommended: Senior standing

THEATR 4830: Studies in Dramatic Criticism

Survey of methods of criticism of scripts and performances.

Credit Hours: 3

Recommended: senior standing

THEATR 4920: Advanced Playwriting: Problems

(same as ENGLISH 4560; cross-leveled with THEATR 7920 and ENGLISH 7560). Advanced study of the writing process as applied to theatre, including theory and practice of special playwriting problems and techniques.

Credit Hours: 3

Prerequisites: THEATR 3920 or ENGLISH 3560

THEATR 4930: Adaptation of Literature for the Stage

(same as ENGLISH 4570; cross-leveled with THEATR 7930 and ENGLISH 7570). This upper-division course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for the stage.

Credit Hours: 3

THEATR 4935: Adaptation of Literature for Film

(same as FILM_S 4935 and ENGLISH 4935; cross-leveled with THEATR 7935, ENGLISH 7580 and FILM_S 7935). This upper-division course will explore adaptation principles and practices with a variety of forms for literature that were not originally written for film.

Credit Hours: 3

THEATR 4940: Internship in Theatre

Internship: Experimental learning as an actor, designer, technician, publicist/manager, or dramaturg with an approved theatre company. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: departmental consent

Recommended: junior or senior standing

THEATR 4960: Directed Readings in Theatre

Independent reading, reports.

Credit Hour: 1-3

Prerequisites: instructor's consent

THEATR 4990: Capstone in Theatre

Theatre experiences and knowledge gained by students are connected through compilation of resume and portfolio. Student will meet with faculty jury to discuss his/her body of theatrical work. Required for senior theatre students. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: instructor's consent

THEATR 7005: Topics

Organized study of selected topics. Topic and credit may vary semester to semester. May be repeated with department consent.

Credit Hour: 1-99

Prerequisites: instructor's consent

THEATR 7220: Acting III

(cross-leveled with THEATR 7220). Period acting styles. Special projects in interpretation, rehearsal, creation of roles.

Credit Hours: 3

Prerequisites: THEATR 2800 and THEATR 3420 or THEATR 3430

THEATR 7240: Theory and Practice of Theatre of the Oppressed

(same as PEA_ST 7240). Theory and practice of Augusto Boal's liberatory interactive theatre process, including application of techniques of specific social issues.

Credit Hours: 3

Prerequisites: instructor's consent

THEATR 7280: Digital Media and Performance

(cross-leveled with THEATR 4280). This course introduces students to the history and practice of the combination of live actors and digital media within the context of theatre and performance. Students learn about developments in the history of this topic as well as significant individuals, groups of artists, and theorists who have contributed to the field. Theories of performance are utilized as a way to understand subjects such as the development of computers and the Internet, the impact of technology and social media on society, virtual reality, telematics, robotics, and video games. Students create their own performances that combine live performances with digital media elements, and learn basic approaches to using computer software that is employed in creating these types of performances.

Credit Hours: 3

THEATR 7530: Stage Lighting Design

Theory and practice of lighting for theatre production.

Credit Hours: 3

Prerequisites: instructor's consent

THEATR 7600: Advanced Directing

(cross-leveled with THEATR 4600). Advanced principles of theatrical directing; emphasizes stylistic variations. May be repeated once.

Credit Hours: 3

Prerequisites: THEATR 3600 and instructor's consent

THEATR 7700: Studies in Theatre History

Advanced survey of major periods, movements. Repeatable to a maximum of 6 hours with instructor's consent.

Credit Hours: 3

THEATR 7710: History of American Theatre I

Examination of theatrical literature and production from the beginnings to World War One.

Credit Hours: 3

Prerequisites: instructor's consent

THEATR 7720: History of the American Theatre II

Examination of theatrical literature and production from World War One to the present.

Credit Hours: 3

Prerequisites: instructor's consent

THEATR 7730: Theatre Architecture

Examines the renovation of existing buildings into workable theatre spaces. Includes history of theatre architecture.

Credit Hours: 3

Prerequisites: instructor's consent

THEATR 7800: Studies in Dramatic Theory

Analysis of history, meaning and function of selected concepts of contemporary dramatic and performance theory.

Credit Hours: 3

THEATR 7820: Studies in Dramatic Literature

Advanced survey of major movements, periods, writers. Repeatable to a maximum of 6 hours with instructor's consent.

Credit Hours: 3

THEATR 7830: Studies in Dramatic Criticism

Survey of methods of criticism of scripts and performances.

Credit Hours: 3

THEATR 7920: Advanced Playwriting: Problems

(same as ENGLSH 7560; cross-leveled with THEATR 4920 and ENGLSH 4560). Advanced study of the writing process as applied to theatre, including theory and practice of special playwriting problems and techniques.

Credit Hours: 3

Prerequisites: THEATR 3920 or ENGLSH 3560

THEATR 7930: Adaptation of Literature for the Stage

(same as ENGLSH 7570; cross-leveled with THEATR 4930). Explores adaptation principles and practices with a variety of forms of literature that were not originally written for the stage.

Credit Hours: 3

Prerequisites: instructor's consent

THEATR 7935: Adaptation of Literature for Film

(same as ENGLSH 7580 and FILM_S 7935; cross-leveled with THEATR 4935, FILM_S 4935 and ENGLSH 4935). This upper-division course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for film.

Credit Hours: 3

THEATR 7950: Introduction to Dramaturgy

This course focuses on the practice of dramaturgy and the various functions currently performed by the artist/scholar identified as "dramaturg" including research, dramatic criticism/interpretation, new play development, marketing and educational outreach, and textual adaptation. Graded on A-F basis only.

Credit Hours: 3

THEATR 7960: Directed Readings in Theatre

Independent reading, reports.

Credit Hour: 1-3

Prerequisites: instructor's consent

THEATR 8005: Topics in Theatre

Organized study of selected topics. Topic and credit may vary from semester to semester. May be repeated with department consent.

Credit Hour: 1-99

Prerequisites: instructor's consent

THEATR 8090: Research in Theatre

Independent research of advanced nature leading to report. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

THEATR 8100: Theatre Scholarship

History, goals, and techniques of academic writing in theatre including research, types of studies, primary materials, interpretation, writing techniques, and publication.

Credit Hours: 3

THEATR 8385: Problems in Theatre

Individual study/project not leading to thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent

THEATR 8720: Backgrounds of Modern Theatre Practice

Survey of modern performance theory, aesthetics and practice. Emphasis on European theatre since 1875. May be repeated or credit.

Credit Hours: 3

THEATR 8787: Seminar in Theatre History

Selected problems in theatre history. May be repeated.

Credit Hours: 3

THEATR 8820: Graduate Seminar in Dramatic Literature

This is a course that explores the influence of major playwrights and playwriting in society--specific playwrights and their works are determined by the course professor.

Credit Hours: 3

THEATR 8887: Seminar in Dramatic Theory and Criticism

Selected topics in dramatic theory and criticism. May be repeated.

Credit Hours: 3

THEATR 8960: Directed Readings in Theatre

Independent reading, reports.

Credit Hour: 1-3

Prerequisites: instructor's consent

THEATR 8987: Graduate Seminar in Playwriting

(same as ENGLSH 8560). Seminar in theory, practice, and pedagogy of playwriting, students prepare a mid-term in playwriting theory, a full-

length play, a research paper, and a syllabus and lesson plans for an undergraduate playwriting course.

Credit Hours: 3

THEATR 9090: Research in Theatre

Research leading to thesis or dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

Veterinary Biomedical Science Courses

V_BSCI 5011: Veterinary Anatomy

In-depth study of the structure of the horse, ox, sheep, goat, pig and avian species. (Instructional periods 3 and 4).

Credit Hours: 3

V_BSCI 5012: Veterinary Anatomy with Laboratory

Continuation of V_BSCI 5011. In-depth study of the structure of the horse, ox, sheep, goat, pig and avian species. (Instructional periods 3 and 4).

Credit Hours: 3

V_BSCI 5020: Developmental Anatomy

Provides a comprehensive and rational interpretation of the intricate mechanisms of normal development to better understanding the complex anatomy of the adult. A substantial portion will be dedicated to commonly encountered congenital abnormalities for each major organ system.

Credit Hours: 0.5

Prerequisites: 1st year Veterinary students

V_BSCI 5021: Developmental Anatomy

Provides a comprehensive and rational interpretation of the intricate mechanisms of normal development to better understanding the complex anatomy of the adult. A substantial portion will be dedicated to commonly encountered congenital abnormalities for each major organ system.

Credit Hours: 0.5

Prerequisites: 1st year Veterinary students

V_BSCI 5051: Veterinary Gastrointestinal

Continuation of V_BSCI 5504. Physiology of the gastrointestinal tract, exocrine pancreas and liver. Lecture and lab designed to emphasize principles important to the practice of veterinary medicine.

Credit Hours: 2

V_BSCI 5052: Veterinary Endocrinology and Reproductive Physiology

Continuation of Veterinary Biomedical Science 5051. Comparative endocrinology and reproductive biology.

Credit Hours: 2

V_BSCI 5100: Veterinary Neuroscience

A laboratory and lecture-based course emphasizing the applied anatomy and physiology of the nervous system of domestic animals.

Credit Hours: 2

Prerequisites: first year Veterinary students

V_BSCI 5500: Veterinary Anatomy with Laboratory

Correlative study of the anatomy of domestic and laboratory animals in which the developmental and gross anatomy are integrated. A segment is devoted to neuroanatomy. Dissection includes the dog, cat and common laboratory animals. (Instructional periods 1 and 2).

Credit Hours: 4

V_BSCI 5502: Veterinary Microscopic Anatomy with Laboratory

A study of microscopic anatomy including cytology, histology of basic tissues and microscopic anatomy of cardiovascular, urinary, respiratory systems and the special senses and integument. (Instructional periods 1 and 2).

Credit Hours: 3

V_BSCI 5503: Veterinary Microscopic Anatomy

Particular attention to digestive systems, endocrine organs and reproductive systems. (Instructional period 3).

Credit Hours: 2

V_BSCI 5504: Veterinary Physiology

This course is designed to provide an opportunity and motivation for the student to acquire an understanding of the physiological principles on which rational therapy in medical practice is based. Topics include: Cellular Neurophysiology, Muscle, Cardiovascular, Renal and Respiratory Physiology. The course also encourages the student to apply these principles in solving problems so that it becomes habitual for him or her to think in terms of "mechanisms of action" as he or she approaches a problem in disturbed physiology.

Credit Hours: 5

V_BSCI 5506: Veterinary Molecular and Cellular Biology

(same as V_BSCI 7333) A comprehensive course overviewing molecular and biochemical issues of cell function especially as related to medicine and the underlying molecular causes of disease.

Credit Hours: 4

V_BSCI 5507: Veterinary Pharmacology with Laboratory

General principles of pharmacy, pharmacokinetics, and pharmacodynamics, with emphasis on drugs affecting the central and autonomic nervous system, cardiovascular and hematologic systems.

Credit Hours: 3

V_BSCI 5508: Veterinary Pharmacology

Continuation of V_PBIO 5507. Antiseptics, autocooids, hemostatics and anticoagulants, fluid and electrolytes, reproductive, endocrine, and gastrointestinal drugs.

Credit Hours: 2

V_BSCI 5509: Veterinary Toxicology

(Same as V_BSCI 8509) Local and various systemic clinical responses of domestic animals to foreign chemicals including metals, pesticides,

water-and food-borne agents, biotoxins, industrial and plant toxins. The principles, mechanism(s) of action, diagnosis, prevention and treatment of chemical intoxications are also presented.

Credit Hours: 3

V_BSCI 7010: Life Sciences Research: Models and Methods

(same as BIOMED 7010). A review of basic laboratory animal and non-animal research models and procedures commonly used in the life sciences area in academia and drug/chemical industry. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Biology or Cell Biology

V_BSCI 7085: Problems in Veterinary Biomedical Science

Assignment of special problems or topics for training in research.

Credit Hour: 1-99

V_BSCI 7302: Cytology, Histology, and Organology of Domestic Animals I

Detailed study of the structure and function of the cell, basic tissues (epithelium, connective tissue, muscle, nervous tissue) and several organ systems (cardiovascular, lymphatic, integument, digestive, visual, auditory) of domestic mammals and birds.

Credit Hours: 3

Prerequisites: background in biological sciences, instructor's consent

V_BSCI 7303: Cytology, Histology and Organology of Domestic Animals II

Detailed study of the liver, gallbladder, and pancreas, urinary system, respiratory system, endocrine glands, female reproductive system, placenta, male reproductive system, and integument (hoof and claw) of domestic mammals and birds.

Credit Hours: 2

Prerequisites: V_BSCI 7303 and instructor's consent

V_BSCI 7307: Embryology and Development of Domestic Animals

Developmental anatomy of domestic animals. Special written report and/or review required.

Credit Hours: 2

Prerequisites: background in biological science and departmental consent

V_BSCI 7333: Veterinary Cell Biology

(same as V_BSCI 5506). Course material stresses cell biology as related to animal health and medical issues. A comprehensive course overviewing molecular and biochemical issues of cell function especially as related to medicine and the underlying molecular causes of disease.

Credit Hours: 4

Prerequisites: instructor's consent

V_BSCI 7510: Equine Clinical Anatomy: Forelimbs

(cross-leveled with BIOCHM 4510). Basic foundation in selected aspects of equine clinical anatomy for veterinary technicians, pre-veterinary

students, and other students wishing to enhance their understanding of anatomical structures of the horse's forelimbs.

Credit Hour: 1

Prerequisites: A bachelor's degree in a biological science or veterinary technology, or DVM degree, or instructor's consent

V_BSCI 8010: Comparative Anatomy of Cardiovascular System

The systemic and pulmonary circulation. The heart and vessels in detail. One midterm exam and final paper. Laboratory included.

Credit Hour: 1

V_BSCI 8085: Problems in Veterinary Biomedical Science

Selected problems and/or topics for advanced study in special areas to meet needs of individual students.

Credit Hour: 1-99

V_BSCI 8090: Research in Veterinary Biomedical Science

Open to graduate students with requisite preparation. Research expected to be presented as a thesis. Graded on a S/U basis only.

Credit Hour: 1-99

V_BSCI 8100: Veterinary Neuroscience

A laboratory and lecture based course emphasizing the applied anatomy and physiology of the nervous system of domestic animals.

Credit Hours: 2

Prerequisites: Restricted to first year veterinary students or graduate students

V_BSCI 8200: Multidisciplinary Approaches to Biomedical Sciences

The goal of this course is to aid the student in developing a multidisciplinary philosophy to problem solving in biomedical research. Methods used in molecular, biochemical, cellular, tissue, organ, and whole animal studies will be emphasized.

Credit Hours: 2

Prerequisites: instructor's consent

V_BSCI 8409: Advanced Microscopic Anatomy

Advanced study of selected topics in vertebrate microscopic anatomy. Special report required.

Credit Hour: 1-99

Prerequisites: departmental consent

V_BSCI 8410: Seminar in Veterinary Biomedical Science

Presentation and discussion of investigations and topics in veterinary anatomy-physiology or related fields, by qualified students, instructors, and guests.

Credit Hour: 1

Prerequisites: departmental consent

V_BSCI 8420: Veterinary Physiology

This course is designed to provide an opportunity and motivation for the student to acquire an understanding of the physiological principles on which rational therapy in medical practice is based. Topics include: Cellular Neurophysiology, Muscle, Cardiovascular, Renal and Respiratory

Physiology. The course also encourages the student to apply these principles in solving problems so that it becomes habitual for him or her to think in terms of "mechanisms of action" as he or she approaches a problem in disturbed physiology.

Credit Hours: 5

Prerequisites: BIOCHM 4270 and BIOCHM 4272

V_BSCI 8421: Veterinary Physiology

Continuation of V_BSCI 8420. Physiology of the gastrointestinal tract, exocrine pancreas, liver, endocrine system and reproduction.

Credit Hours: 4

V_BSCI 8450: Research in Veterinary Biomedical Science

Credit Hour: 1-99

Prerequisites: Open to graduate students with requisite preparation. Research expected to be presented thesis

V_BSCI 8509: Veterinary Toxicology

(Same as V_BSCI 5509) Local and various systemic clinical responses of domestic animals to foreign chemicals including metals, pesticides, water-and food-borne agents, biotoxins, industrial and plant toxins. The principles, mechanism(s) of action, diagnosis, prevention and treatment of chemical intoxications are also presented. Graded A-F only.

Credit Hours: 3

V_BSCI 9090: Research in Veterinary Biomedical Sciences

Research in Veterinary Biomedical Sciences. Graded on S/U basis only.

Credit Hour: 1-99

V_BSCI 9425: Microvascular Circulatory Function

An in-depth study of microcirculatory structure and function in various tissues with emphasis on recent developments in the understanding of the mechanisms involved in nutrient supply, edema formation, lymphatic function and fluid balance.

Credit Hours: 3

Prerequisites: V_BSCI 8420 and V_BSCI 8422 or Mammalian Physiology or equivalent

V_BSCI 9431: Control of Energy Metabolism

(same as MPP 9431). This advanced elective is in a lecture/discussion format using primary literature to explore how cells organize and regulate metabolism to meet energy demands.

Credit Hour: 1-3

Prerequisites: instructor's consent

V_BSCI 9435: Skeletal Muscle

(same as MPP 9435). Skeletal muscle structure, contraction, mechanics, metabolism, adaption. Graded on A-F basis only.

Credit Hours: 3

V_BSCI 9467: Neural Control of the Circulation

(same as MPP 9437). Course objectives include developing a general understanding of CNS mechanisms in the regulation of the cardiovascular system, including autonomic, neurohumoral and body fluid homeostatic

mechanisms, gaining knowledge of the major advances and topics in the field and becoming familiar with some of the methods used to study CNS cardiovascular regulation. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

Veterinary Medicine - Interdisciplinary Courses

VMED_I 5120: Full-Time Enrollment

Full-Time Enrollment

Credit Hour: 16-99

VMED_I 5190: Full-Time Enrollment

Full-Time Enrollment

Credit Hour: 16-99

Veterinary Medicine And Surgery Courses

V_M_S 6001: Topics in Veterinary Medicine

Current topics, infrequently-taught courses, or new courses not yet designated by a permanent course number. Some sections may be graded A-F only or S/U only. Course instructor consent prior to enrollment is required.

Credit Hour: 0.5-6

Prerequisites: Restricted to Veterinary Medicine students

V_M_S 6005: Clinical Skills

A hands -on laboratory class to provide experience with handling and examining Horses, Cattle, Small ruminants and Camelid species, Cats and Dogs for veterinary students.

Credit Hours: 0.5

Prerequisites: first year veterinary students. Graded on S/U basis only

V_M_S 6006: Clinical Skills

A hands -on laboratory class to provide experience with handling and examining Horses, Cattle, Small ruminants and Camelid species, Cats and Dogs for veterinary students. Graded on S/U basis only.

Credit Hours: 0.5

Prerequisites: first year veterinary students

V_M_S 6010: Evaluated Veterinary Preceptorship

This required co-op style course provides the student with practical exposure and experience in nonacademic veterinary medicine. Duration of 2-6 weeks. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: VM-3 standing

V_M_S 6020: Veterinary Radiology with Laboratory

Introduces through lectures and demonstrations the principles of radiographic examination and interpretation of disease processes of domestic animals. Instructional period 8.

Credit Hours: 2

V_M_S 6030: Veterinary Anesthesiology with Laboratory

Basic principles of anesthesiology for any species of domestic and exotic animals. Instructional period 9.

Credit Hours: 2

V_M_S 6040: Companion Animal Medicine with Laboratory

Covers basic principles of veterinary internal medicine and selected subdisciplines. Instructional period 9.

Credit Hours: 4

V_M_S 6050: Small Animal Medicine

Didactic presentations regarding pathophysiology, diagnosis and therapeutic management of organ system diseases in small animals.

Credit Hours: 2.5

V_M_S 6060: Small Animal Surgery with Laboratory

Basic principles including suture materials, suture patterns, operative techniques, wound healing, and body system approach to soft tissue surgery conditions.

Credit Hours: 2

V_M_S 6071: Small Animal Surgery

Continuation of V_M_S 6060 lectures, focusing primarily on orthopedics.

Credit Hours: 2

V_M_S 6072: Optional Surgery and Anesthesia Laboratory

Designed to teach entry-level surgical and anesthesia skills using models, live animals, and cadavers. This laboratory is offered as a substitute to V_M_S 6073 for students who wish to gain anesthesia and surgical experience with live tissues. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: V_M_S 6060

V_M_S 6073: Fundamental Surgery Laboratory

Designed to teach entry-level surgical skills using models and cadavers. Canine cadavers will be substituted for pigs in the first two celiotomy laboratories. Students will not anesthetize pigs but will observe clinical anesthesia by following one clinical case from start to finish. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: complete V_M_S 6060

V_M_S 6081: Food Animal Medicine and Surgery

Covers the important diseases of cattle, goats, sheep, camelids, and swine recognition, management and prevention of diseases are stressed.

Credit Hours: 2.5

V_M_S 6082: Food Animal Medicine and Surgery

Continuation of V_M_S 6081. Covers the important diseases of cattle, goats, sheep, camelids, and swine recognition, management and prevention of diseases are stressed.

Credit Hours: 2

V_M_S 6090: Small Animal Emergency and Critical Care with Laboratory

Basic principles of emergency and critical care of companion animals, and body system approach to emergency and critical care.

Credit Hour: 1

V_M_S 6110: Theriogenology

Reproductive function, estrous cycle manipulation, and breeding of individual domestic animals and herds. Pathogenesis, diagnosis and management (medical and surgical) of common reproductive disorders.

Credit Hours: 3

V_M_S 6120: Veterinary Ophthalmology

Covers examination, diagnostic procedures and treatment of important eye diseases of domestic animals.

Credit Hour: 1

V_M_S 6130: Fundamentals of Veterinary Business Management

To realistically present to the second-year veterinary student a basic explanation of the essential need for strong base of knowledge pertaining to business and management in order to be successful in the veterinary profession.

Credit Hour: 1

V_M_S 6140: Nutrition with Laboratory

Nutrition of companion and food producing animals and nutritional principles important to veterinary medicine. Subjects presented include feeding of animals for maintenance of healthy conditions during all life stages, evaluation of foods and supplements, and methods of diet formulation and evaluation.

Credit Hour: 1.5

V_M_S 6151: Equine Medicine and Surgery

Covers the fundamentals of diseases of the equine species. Case Management approaches are utilized to provide examples of disease conditions.

Credit Hours: 2

V_M_S 6152: Equine Medicine and Surgery

Continuation of V_M_S 6151. Covers the fundamentals of diseases of the equine species. Case Management approaches are utilized to provide examples of disease conditions.

Credit Hour: 1.5

V_M_S 6400: Food Animal Medicine and Surgery I

Clinical Rotation. Technical, diagnostic and therapeutic procedures common to the practice of large animal medicine and surgery. Experience in the operation of a large animal hospital and farm outpatient practice.

Credit Hours: 6

V_M_S 6411: Small Animal Internal Medicine

Clinical rotation in small animal internal medicine for veterinary degree students. Students will obtain history and conduct physical examination of client-owned dogs and cats. After reviewing findings with faculty, they will

perform diagnostic tests and carry out treatments. Graded on A-F basis only. May be repeated for credit.

Credit Hour: 1-99

Prerequisites: the entire pre-clinical curriculum of the CVM must be completed before taking this course; that is, students must have successfully completed the DVM curriculum through instruction period 12. Restricted to students in years 3 and 4 of the DVM curriculum

V_M_S 6412: Small Animal Community Practice

Clinical rotation in small animal general medicine and surgery for veterinary degree students. Students will obtain history and conduct physical examination of client-owned dogs and cats. After reviewing findings with faculty, they will perform diagnostic tests and carry out treatments. The entire course may not be repeated for credit but smaller sections may with approval.

Credit Hour: 1-99

Prerequisites: the entire pre-clinical curriculum of the CVM must be completed before taking this course; students must have successfully completed the DVM curriculum through instructional period 12. Restricted to students in years 3 and 4 of the DVM curriculum

V_M_S 6420: Equine Medicine and Surgery I

Clinical rotation. Technical, diagnostic and therapeutic procedures common to equine practice. Emphasis on fundamental principles.

Credit Hours: 6

V_M_S 6430: Small Animal Surgery I

Diagnostic procedures and surgical techniques applicable to companion animal surgery. Practical experience in the operation of a small animal surgical practice. Six times per year.

Credit Hours: 6

V_M_S 6432: Small Animal Soft Tissue Surgery

Clinical rotation. Diagnostic procedures and surgical techniques applicable to companion animal soft tissue surgery. Practical experience in the operation of a small animal soft tissue surgical practice.

Credit Hours: 2

Prerequisites: completion of Vet Med years 1 and 2 and specifically V_M_S 6072 or V_M_S 6073

V_M_S 6434: Small Animal Orthopedic Surgery

Clinical rotation. Diagnostic procedures and surgical techniques applicable to companion animal orthopedic surgery. Practical experience in the operation of a small animal orthopedic surgical practice. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: completion of Veterinary Medicine years 1 and 2

V_M_S 6436: Veterinary Neurology/Neurosurgery

Clinical rotation. A hands-on applied clinical rotation to provide experience in examination and diagnosis of domestic animals with neurologic disease.

Credit Hours: 2

Prerequisites: completion of preclinical curriculum of Veterinary Medicine years 1 and 2. Restricted to VM3 and VM4 students

V_M_S 6441: Clinical Radiology I

Clinical rotation. Fundamentals of radiology: indications for use, techniques, pathophysiologic alterations, interpretation of results, patient aftercare, protective measures against radiation hazards.

Credit Hours: 3

V_M_S 6442: Clinical Anesthesiology I

Clinical rotation. Fundamentals of anesthesiology: indications for use techniques, pathophysiologic alterations, and interpretations of results, patient aftercare.

Credit Hours: 3

V_M_S 6450: Theriogenology I

Clinical rotation. Practical experience in reproductive techniques, obstetrics, breeding soundness and herd reproductive problems.

Credit Hours: 2

V_M_S 6460: Clinical Ophthalmology I

Clinical rotation. Practical application in problem solving and medical and surgical management of eye conditions of domestic animals.

Credit Hours: 2

V_M_S 6480: Cardiology

Cardiology

Credit Hours: 2

V_M_S 6490: Small Animal Specialty Medicine I

Clinical rotation in small animal oncology. Taught in the clinical setting using animals presented to the VMTH for evaluation and treatment of oncologic diseases.

Credit Hours: 2

V_M_S 6700: Food Animal Medicine and Surgery II Elective

Additional food animal experience located off-site or on-site under special circumstances.

Credit Hour: 2-6

Prerequisites: V_M_S 6400. Consent required

V_M_S 6710: Small Animal Medicine II Elective

Clinical rotation offered to VM3 and VM4 students. Opportunity for concentrated study and experience in medical areas. Enrollment subject to approval of course coordinator.

Credit Hour: 2-6

Prerequisites: The entire pre-clinical curriculum of the CVM must be completed before taking this course

V_M_S 6711: Small Animal Internal Medicine Elective Clinical or Research Rotation

Clinical rotation in SAIM to focus on either clinical diagnostics and therapy, or research relevant to clinically important issues of pet animals.

Credit Hours: 2

Prerequisites: Veterinary curriculum up until the clinical rotations; must be VM3 or VM4 students

V_M_S 6712: Private Practice Small Animal Internal Medicine Elective

Clinical rotation. Improve critical thinking skills in disease diagnosis and management for internal medicine of dogs and cats. Clinical rotation off-site at Associated Veterinary Specialists. Teaching by cases seen by AVS clinician on duty. Student participation determined by supervising clinician.

Credit Hours: 2

Prerequisites: All required VM1 and VM2 courses. VM3 or VM4 standing required

V_M_S 6713: Shelter Medicine Elective at the Humane Society of Missouri

Comprehensive shelter medicine rotation at Humane Society of Missouri.

Credit Hour: 2-6

Prerequisites: Restricted to VM3 and VM4 students

V_M_S 6720: Equine Medicine and Surgery II Elective

Clinical rotation. Continuation of V_M_S 6420. Open to VM3 and VM4 students, subject to approval of course coordinator. Opportunity for concentration in specific area of interest.

Credit Hour: 2-6

V_M_S 6730: Small Animal Surgery II Elective

Opportunity for concentration study and advanced surgical experience.

Credit Hour: 3-6

Prerequisites: V_M_S 6430 or equivalent

V_M_S 6732: Small Animal Soft Tissue Surgery II Elective

Clinical rotation. Opportunity for concentrated study and advanced soft tissue surgical experience.

Credit Hours: 2

Prerequisites: V_M_S 6432 and completion of year VM1 and VM2

V_M_S 6734: Small Animal Orthopedic Surgery II Elective

Clinical rotation. Opportunity for concentrated study and advanced orthopedic surgical experience.

Credit Hours: 2

Prerequisites: completion of VM years 1 and 2

V_M_S 6736: Veterinary Neurology/ Neurosurgery-Elective

A hands-on applied clinical rotation to provide experience in examination and diagnosis of domestic animals with neurologic disease.

Credit Hours: 2

Prerequisites: completion of preclinical curriculum of Veterinary Medicine years 1 and 2. Restricted to VM3 and VM4 students

V_M_S 6741: Clinical Radiology II Elective

Clinical rotation. Continuation of V_M_S 6441.

Credit Hour: 1-99

V_M_S 6742: Clinical Anesthesiology II Elective

Clinical rotation. Continuations of V_M_S 6442. This course will focus on anesthetizing and monitoring the more challenging anesthetic cases during rotation. Required projects include a review paper on a relevant topic of choice, a written case report and assistance in research activities.

Credit Hour: 1-99

V_M_S 6743: Radiology - Special Imaging Elective

Introduction to special imaging modalities including ultrasound, computed tomography, magnetic resonance and nuclear scintigraphy with emphasis towards small animal patients. A major part of the course will be devoted to recognition and interpretation of abdominal ultrasound. Graded on A-F basis only. Prerequisites: V_M_S 6020; VM III and VM IV

Credit Hour: 2-3

V_M_S 6750: Theriogenology II Elective

Continuation of V_M_S 6450. Opportunity for concentrated study and experience. An elective, subject to approval of course coordinator and faculty member(s) who supervise student's work.

Credit Hour: 1-99

V_M_S 6751: External Food Animal Service and Theriogenology Teaching Program

Additional options for off-site clinical training in Theriogenology and Food Supply Veterinary Medicine beyond the core curriculum.

Credit Hour: 1-99

Prerequisites: V_M_S 6081, V_M_S 6082, V_M_S 6110, and VM3 or VM4 students

V_M_S 6760: Small Animal Nutrition

Clinical rotation designed to allow students to gain hands-on experience with canine and feline nutrition.

Credit Hours: 2

Prerequisites: V_M_S 6140. Restricted to VM3 or VM4

V_M_S 6770: Herd Health Management and Nutrition II Elective

Concentrated study/experience in feed lot, dairy, cow/calf swine herd agribusiness enterprises applicable to veterinary practice.

Credit Hour: 2-6

Prerequisites: V_M_S 6400 and VM-4 status

V_M_S 6800: Clinical Ophthalmology II Elective

Clinical rotation offered to VM 3 and VM 4 students. Opportunity for concentrated study and experience. Subject to approval of course coordinator and faculty member(s) who supervise student's work.

Credit Hour: 1-99

V_M_S 6810: Cardiology II Elective

Cardiology course consists of a three-week clinical rotation in the small animal clinic. Duties include primary care receiving and patient care with clinical case work-up. Additional responsibilities include attendance at clinical rounds and participating in related clinical activities.

Credit Hour: 1-99

V_M_S 6820: Small Animal Emergency and Critical Care

Clinical rotation offered to VM 3 and VM 4 students. Opportunity for concentrated study and experience in small animal emergency and critical care.

Credit Hour: 1-99

V_M_S 6821: Small Animal Emergency Critical Care Elective

Clinical rotation providing focused experience in care management and issues pertinent to small animal emergency and critical care. Graded on A-F basis only. May be repeated for credit.

Credit Hours: 2

Prerequisites: Restricted to levels VM 3 or VM 4

V_M_S 6830: Food Animal Production Medicine

Clinical rotation will focus primarily on beef, dairy, and swine with emphasis on preventive medicine by looking at the herd incorporating spreadsheet and the date base application analysis. The course participants will visit various operations and write reports to the producer, which will enhance their farms.

Credit Hour: 1-99

V_M_S 6850: Clinical Oncology

Clinical rotation in small animal oncology. Taught in the clinical setting using animals presented to the VMTH for evaluation and treatment of oncologic diseases.

Credit Hour: 1-99

V_M_S 6920: Equine Techniques Elective

This course provides an opportunity for equine oriented veterinary students wishing to enhance their understanding of the clinical techniques used in equine veterinary medicine and gain hands on practical experience in selected clinical techniques. It is offered as a 2 credit, 2 week elective clinical rotation.

Credit Hours: 2

V_M_S 6986: Advanced Clinical Neurology and Neurosurgery

This is a supplement to neurology taught in the small animal course to improve preparedness for clinical practice. Topics include neurolocalization techniques, electrodiagnostic and CT/MR interpretation, wider exposure to differential diagnosis, and neurosurgical principals.

Credit Hour: 1

Prerequisites: Passing grade in V_M_S 6040

V_M_S 6987: Problem-Based Learning Clinic Preparation

This course is designed to prepare the VM 3 student about to enter clinics for a systematic approach to a clinical case. Emphasis will be placed on developing focused problem and differential lists, and logical choices of diagnostic tests. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: VM 3 level

V_M_S 6988: Small Animal Clinical Nutrition

Application of nutritional principles to prevention and management of common diseases of dogs and cats. Including review of nutrients, commercial and home diets, and basic pathophysiology of nutritional aspects of disorders seen in companion animal practice.

Credit Hour: 1

V_M_S 6989: Advanced Oncology of Animals

Expanded discussion of veterinary oncology topics not covered in the oncology section V_M_S 6050. Important for veterinary students who intend to enter private or academic practice and manage oncology cases, specific tumor types, diagnostic tools, and treatment modalities.

Credit Hour: 1

V_M_S 6990: Zoological Medicine

Interested students of Zoological Medicine would significantly broaden their understanding of this discipline and increase the likelihood they could enter zoological veterinary practice or a zoological veterinary medical residency. Graded on A-F basis only

Credit Hours: 2

V_M_S 6991: Advanced Equine Lameness with Laboratory

Learn to recognized forelimb and hind limb lameness through diagnostic techniques for localization of lameness. Gain practical experience in limb support for sever musculoskeletal injuries. One surgical laboratory using equine cadaver limbs to illustrate and practice common distal limb surgeries.

Credit Hour: 1

V_M_S 6992: Small Animal Endoscopy

Small Animal Endoscopy

Credit Hour: 1

V_M_S 6993: Advanced Veterinary Anesthesia

Advanced Veterinary Anesthesia

Credit Hour: 1

V_M_S 6994: Advanced Techniques in Small Animal Surgery with Laboratory

Course designed for students who want exposure to small animal surgical techniques above and beyond the experience gained from the basic surgical training in V_M_S.

Credit Hour: 1

Prerequisites: V_M_S 6072; limited enrollment

V_M_S 6995: Clinical Cardiology

Students will utilize a combination of lectures, hands on laboratories, and problem based clinical correlates covering cardiovascular physical examination, radiographic and electrocardiographic interpretation, and the pathophysiology and management of congenital and acquired cardiac diseases.

Credit Hour: 1

V_M_S 6996: Advanced Dermatology

This is a lecture course that will supplement and expand upon the canine and feline dermatology principles covered in the general pathology and small animal medicine courses. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: V_M_S 6050

V_M_S 6997: Food Animal Diagnostic Exercises

Discussion based course designed to integrate and review didactic coursework to increase knowledge of livestock diseases. A list of appropriate differential diagnoses will be generated for each problem.

Credit Hour: 1

V_M_S 6998: Small Animal Behavioral Medicine

Small Animal Behavioral Medicine

Credit Hour: 1

V_M_S 6999: Food Animal Surgery Laboratory

Routine food animal surgical procedures laboratory.

Credit Hour: 1

V_M_S 7301: Topics in Veterinary Medicine and Surgery

Organized study of select topics.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent

V_M_S 7303: Advanced Topics in Veterinary Anesthesia

(same as V_M_S 6993).

Credit Hour: 1

V_M_S 7304: Advanced Equine Surgery

The purpose of the course is to aid in the preparation of the resident for Board certification in the American College of Veterinary Surgeons.

Credit Hours: 2

Prerequisites: a DVM or equivalent degree, acceptance to the graduate school, acceptance to the residency program, and instructor approval

V_M_S 7320: Fundamentals of Small Animal Emergency and Critical Care

(cross-leveled with BIOMED 4320). This course will provide students with the knowledge and skills to assist in a small animal medical emergency and critical care facility.

Credit Hours: 3

Prerequisites: a bachelor's degree in biological science or veterinary technology, or DVM degree, or instructor's consent

V_M_S 7328: Introductory Radiation Biology

(same as RADIOL,NU_ENG, and BIO_SC 7328).

Credit Hours: 3

Prerequisites: junior standing Sciences/Engineering; one course in biological sciences and physics/chemistry; or instructor's consent

V_M_S 7351: Advanced Surgical Techniques

Special application to large, small animals.

Credit Hour: 1-99

Prerequisites: D.V.M

V_M_S 7355: Advanced Techniques in Radiology

Special application to domestic animals.

Credit Hour: 1-99

Prerequisites: D.V.M

V_M_S 7370: Orthopaedic Biomechanics

(same as BIOL_EN 7370). Engineering sciences will be leverage to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGINR 1200, BIOL_EN 3170; departmental consent

V_M_S 7385: Problems in Veterinary Medicine and Surgery

Studies in specific areas of veterinary medicine and surgery.

Credit Hour: 1-99

V_M_S 7510: Equine Clinical Anatomy: Forelimbs

Basic Foundation in selected aspects of equine clinical anatomy for veterinary technicians, pre-veterinary students, and other students wishing to enhance their understanding of anatomical structure of the horse's forelimbs.

Credit Hour: 1

Prerequisites: A bachelor's degree in a biological science or veterinary technology, or DVM degree, or instructor's consent

V_M_S 8021: Neurology Journal Review

Weekly journal review and seminar on current topics in veterinary neurology, related clinical disciplines and basic neurosciences. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: DVM degree

V_M_S 8022: Internal Medicine Clinicopathologic Conference

Advanced discussion of small animal medicine cases with an emphasis on pathophysiology and clinicopathologic findings. Graded on S/U basis only.

Credit Hour: 1

V_M_S 8023: Internal Medicine Journal Review

Resident led review of the current veterinary internal medicine literature. Graded on S/U basis only.

Credit Hour: 1

V_M_S 8024: Medicine-Surgery-Pathology Conference

This is a case-based course in which clinical and pathological findings of interesting cases from the VMTH are presented by those who treated and interpreted the case. Dogs, cats, cows, horses, and small ruminants are

included with occasional non-traditional species. Graded on S/U basis only.

Credit Hour: 1

V_M_S 8025: Equine Medicine Journal Review

Aid Residents in preparing for board certification in ACVIM and ACVS. Articles pertaining to current equine veterinary literature are reviewed on a weekly basis. Participants select, distribute articles to group prior to meeting, then present short review with a discussion following. Graded on S/U basis only.

Credit Hour: 1

V_M_S 8026: Surgery Journal Review

Resident led review of the current veterinary surgical peer-reviewed literature. Graded on S/U basis only.

Credit Hour: 1

V_M_S 8027: Food Animal Medicine Journal Review

Critical review of the scientific literature with a focus on ACVIM board preparation. May also be used as a forum for information exchanged relevant to ACVIM board preparation. Graded on S/U basis only.

Credit Hour: 1

V_M_S 8028: Cardiovascular Medicine Journal Review

Resident led review of the current veterinary cardiovascular medicine literature. Graded on S/U basis only.

Credit Hour: 1

V_M_S 8029: Emergency and Critical Care Journal Review

This course will concentrate on review of emergency and critical care literature. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: DVM degree

V_M_S 8030: Seminars in Vet. Med. & Surgery: Ophthalmology Pathology Seminar

Review of clinical cases presented in two formats: histopathology slides and kodachrome slides. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: DVM degree or equivalent and acceptance into an ophthalmology residency program

V_M_S 8031: Sem. in Vet. Med & Surgery: Ophthalmology Seminar & Journal Review

Weekly journal review and seminar on current topics in veterinary ophthalmology, review of pertinent literature in human ophthalmology, and review of ophthalmic texts. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: DVM or equivalent degree and acceptance into the ophthalmology residency program

V_M_S 8032: Seminars in Veterinary Anesthesiology

A journal review will focus on advances in veterinary anesthesiology, pharmacology, and physiology. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: DVM and graduate school enrollment or instructor's consent

V_M_S 8033: Seminars in Clinical Sciences-Equine Surgery Journal Review

Journal review will focus on advances in equine surgery and will consist of a review of recent manuscripts pertaining to equine surgery in current journals and review of pertinent book chapters. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: DVM degree and instructor's consent

V_M_S 8034: Seminars in Veterinary Radiology

This journal review will focus on advances in veterinary radiology, ultrasound and alternate imaging. Current and past literature will be reviewed weekly and will be chosen by the class coordinator. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: DVM and graduate school enrollment or instructor's consent

V_M_S 8035: Current Topics in Veterinary Clinical Nutrition

Review and critical analysis of recently published articles in veterinary nutrition and discussion of aspects relevant to clinical application and management of veterinary patients. Can be repeated for a total of six credit hours. Graded on a S/U basis only.

Credit Hour: 1

Prerequisites: Restricted to Graduate Veterinary Medicine majors or instructor's consent

V_M_S 8036: Advanced Physiology of the Dog and Cat

To understand advanced medical physiology: cell physiology, muscle function, cardiac and circulatory physiology, renal function, distribution of fluid in the body, functions of red and white blood cells, mechanisms of hemostasis, resistance to infection and pulmonary physiology. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Instructor's consent

V_M_S 8040: Advanced Small Animal Clinical Nutrition

Advanced study of veterinary clinical nutrition in the dog and cat. Includes review of applied biochemistry, nutrients, and feeding principles along with pathophysiology and nutritional management of common diseases. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Introductory Veterinary Nutrition

V_M_S 8041: Current Topics in Dairy Production Medicine

The course will focus on the presentation, evaluation and discussion of contemporary scientific peer-reviewed literature published in indexed journal related to current concepts on dairy production medicine. Participating students will be aimed to critically review current research publication with special emphasis on study design, hypothesis and

objectives. Through the analysis of results and discussion, concepts of dairy production medicine will be imparted. Graded on A-F basis only.

Credit Hours: 2

V_M_S 8090: Research in Veterinary Medicine and Surgery (Thesis)

Thesis research. Graded on a S/U basis only.

Credit Hour: 1-99

V_M_S 8400: Clinical Veterinary Regulatory Medicine and Public Health

(same as P_HLTH 8400). The goal of this course is to familiarize the student with clinical aspects of veterinary public health/regulatory medicine.

Credit Hours: 2

Prerequisites: Must be enrolled in MPH (veterinary public health concentration) or DVM curriculum

V_M_S 8401: Topics in Veterinary Clinical Sciences

Current topics, infrequently-taught courses, or new courses not yet designated by a permanent course number. Some sections may be graded A-F only or S/U only.

Credit Hour: 1-3

V_M_S 8402: Seminar in Veterinary Clinical Sciences

Graduate seminars and conferences with a focus on current literature within a specialty area. Graded on S/U basis only.

Credit Hour: 1

V_M_S 8405: Comparative Respiratory Pathophysiology

A consideration of clinical pathophysiology of the respiratory system relative to diseases of the thorax and clinical anesthesiology.

Credit Hour: 1

V_M_S 8406: Topics in Veterinary Medicine and Surgery

Current topics, infrequently taught courses, or new courses not yet designated by a permanent course number.

Credit Hour: 1-99

Prerequisites: must be a DVM or be enrolled in the Veterinary curriculum; instructor's consent

V_M_S 8410: Veterinary Medicine and Surgery Research Seminar

Current research in veterinary medicine and surgery. Literature reviews and presentation or original graduate student research. Graded on S/U basis only.

Credit Hour: 1

V_M_S 8411: Clinical Veterinary Endocrinology

A 2-hour course for post-DMV graduate students. It will focus on clinically relevant physiology, pathophysiology, and diagnostic evaluation of hormone systems.

Credit Hours: 2

V_M_S 8413: Equine Internal Medicine

The purpose of the course is to aid in the preparation of the Resident for board certification in the American College of Veterinary Internal Medicine-LAIM. Current concepts in the pathophysiology, diagnosis and management of medical disorders of horses.

Credit Hours: 2

Prerequisites: DVM degree or equivalent

V_M_S 8415: Advanced Veterinary Neurology

Basic neuroscience as it relates to clinical neurology and the pathophysiology of diseases of the brain, spinal cord, peripheral nerve and muscle in domestic animals. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: DVM degree

V_M_S 8416: Advanced Veterinary Internal Medicine: Cardiovascular Medicine

Pathologic, pathophysiologic, hemodynamic and pharmacological mechanisms of important to the diagnosis, assessment, management and research of cardiovascular diseases of animals.

Credit Hours: 3

V_M_S 8417: Advanced Veterinary Internal Medicine - Clinical Oncology

Provides graduate students in the clinical and basic sciences alike with a working knowledge of the biological mechanisms of cancer development and progression and the related approaches to cancer prevention and therapy. It is assumed that students will have a strong background in biology as a foundation for discussion.

Credit Hours: 2

Prerequisites: DVM or equivalent degree recommended

V_M_S 8418: Advanced Veterinary Internal Medicine: Food Animal Medicine

Current concepts in the pathophysiology, diagnosis and management of medical disorders, diseases of the limbs, and infectious diseases of cattle and food producing animals.

Credit Hours: 2

V_M_S 8419: Advanced Topics in Cancer Biology and Clinical Oncology

This course will provide students with a knowledge base in cancer cell biology that may be applied to the practice of clinical oncology. Monthly clinically-oriented seminars by invited speakers will be preceded by a weekly in-depth review of the basic science related to the seminar topic.

Credit Hours: 2

Recommended: MD or DVM

V_M_S 8421: Advanced Veterinary Surgery: Small Animal Surgery

Current concepts in the pathophysiology, diagnosis and management of surgical disease of the dog and the cat. Includes laboratories of advanced surgical techniques.

Credit Hour: 2-4

V_M_S 8423: Comparative Arthrology

Lectures and discussion covering anatomy, physiology, biomechanics, pathophysiology, and clinical aspects of mammalian diarthrodial joints.

Credit Hours: 3

V_M_S 8425: Advanced Veterinary Surgery: Equine Surgery

Current concepts in the pathophysiology, diagnosis and management of surgical disorders of the horse. Taught yearly as sections A, B, C. Repeatable to a maximum of 10 credit hours (individual sections may be taken once).

Credit Hour: 2-4

V_M_S 8426: Advanced Veterinary Surgery - Ophthalmic Surgery

Surgery labs consisting of 2-4 hours of surgical instruction per week. Graded on A-F basis only.

Credit Hour: 2-4

Prerequisites: DVM or equivalent degree and acceptance into the ophthalmology residency program

V_M_S 8431: Research Methods and Data Analysis

A consideration of research methods, data analysis, and practical approaches to analyzing data sets derived from veterinary and biomedical studies.

Credit Hours: 2

V_M_S 8432: Applied Statistics and Informatics

Educate students in the practical application of statistics and information research tools. Students will learn about application of statistical modeling to biomedical research. They will be trained to use statistical software programs and then use those skills to analyze data sets. Additionally, students will learn about the use of informatics systems for researching scientific questions, data searching, and data dissemination. At the end of the course successful students should be able to develop and perform statistical analyses appropriate for most basic research study designs. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: DVM or equivalent degree and enrollment in a veterinary residency program unless an exception is approved by the course coordinator

Recommended: Successful completion of a general statistics course is highly recommended prior to taking this course

V_M_S 8435: Veterinary Clinical Sciences: Clinical Immunology

Advanced concepts in veterinary immunology and immunopathology.

Credit Hours: 2

V_M_S 8436: Veterinary Clinical Sciences: Clinical Pharmacology

Advanced concepts in veterinary clinical pharmacology, pharmacokinetics, and anesthesiology.

Credit Hour: 1

V_M_S 8437: Advanced Topics in Veterinary Medicine (Nuclear Medicine)

An in-depth review of veterinary nuclear medicine. Includes the physics of nuclear medicine, common imaging techniques, common radiopharmaceuticals, radiopharmaceutical kinetic evaluation and some common physiological applications.

Credit Hour: 1

V_M_S 8439: Advanced Veterinary Ultrasonography

Advanced concepts in veterinary ultrasonography; including ultrasound and Doppler physics, instrumentation, examination methodology, and interpretation of studies.

Credit Hour: 2-3

V_M_S 8440: Adv Veterinary Clinical Sciences: Advanced Clinical Ophthalmology

Case-based discussion course. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: DVM or equivalent degree and acceptance into the ophthalmology residency program

V_M_S 8445: Veterinary Critical Care and Emergency Medicine

Advanced study of veterinary critical care and emergency medicine and surgery focusing on current research and literature as well as clinical application.

Credit Hour: 2-3

V_M_S 8450: Research in Veterinary Medicine and Surgery (non-thesis)

Non-Thesis research.

Credit Hour: 1-99

V_M_S 8485: Problems in Veterinary Clinical Sciences

Supervised individuals studies arranged with a faculty member and approved by the advisory committee. Some sections may be graded A-F only or S/U only.

Credit Hour: 1-3

V_M_S 8487: Nuclear Medicine

Principles of radiation detection instrumentation, monitoring radiological safety and diagnostic procedures used on veterinary nuclear medicine.

Credit Hours: 3

Prerequisites: one year College Physics, D.V.M. degree, and departmental consent

V_M_S 8488: Radiation Therapy

Intermediate level course to review basic and advanced concepts in radiation biology, radiation physics, and clinical application of ionizing radiation for the treatment of cancer Teletherapy, brachytherapy and radiation oncology are covered.

Credit Hours: 3

Prerequisites: A basic course in radiation physics/dosimetry, radiation biology and medical oncology. One year college physics, DVM degree and departmental consent

V_M_S 8489: Veterinary Radiographic Physics

In depth review of the fundamental principles of radiographic physics, with an emphasis on preparation for the American college of Veterinary Radiology board examination. Graded on an S/U basis only.

Credit Hour: 1

Prerequisites: DVM and graduate school enrollment or instructor's consent

V_M_S 9090: Research in Veterinary Medicine and Surgery

PhD Dissertation research. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

Veterinary Pathobiology Courses

V_PBio 5511: Veterinary Immunology

(same as V_PBio 8451). Basic immunology techniques. Topics include innate and adaptive immunity, development of the immune system, induction and expression of the immune response, structure and function of antibodies, antigen-antibody reactions, the major histocompatibility complex, aspects of immunology in disease.

Credit Hour: 1.5

V_PBio 5512: Veterinary Immunology

(same as V_PBio 8451). Continuation of V_PBio 5511.

Credit Hour: 1.5

V_PBio 5552: Veterinary Bacteriology with Laboratory

Classification and properties of pathogenic bacteria and fungi of animals; relationship to public health; considers pathogenesis, immunology of infection. Instructional period 5.

Credit Hours: 3

Prerequisites: enrollment in the College of Veterinary Medicine

V_PBio 5553: Veterinary Bacteriology II

Continuation of V_PBio 5552. Instructional period 6.

Credit Hours: 2.5

V_PBio 5554: Veterinary Virology

(same as V_PBio 8454). Classification and properties of viruses. Considers the etiologic, pathologic and immunologic aspects of viral diseases of animals. Instructional periods 6 and 7.

Credit Hours: 2.5

Prerequisites: enrollment in the College of Veterinary Medicine

V_PBio 5555: Epidemiology and Biostatistics with Laboratory

(same as V_PBio 8455). This course introduces students to methods of determining the influence of disease on populations and how this information is applied to individual animals. Biostatistics and evidence based medicine are also discussed in this course. The knowledge gained in this course is applied to reading professional literature during the course. Instructional period 4.

Credit Hours: 2

V_PBio 5557: Veterinary Parasitology with Laboratory

(same as V_PBio 8457). Parasites and parasitic diseases of ruminants, horses, swine, dogs, cats, poultry and other animals. Includes classification, morphology, and bionomics of protozoa, helminths, and arthropods. Instructional period 6.

Credit Hours: 3

V_PBio 5558: Veterinary Public Health

(same as V_PBio 8458). In this course students are introduced to the wide range of veterinary involvement in maintaining and assuring human health, nationally and globally. Topics discussed include: agencies such as USDA, FDA, CDC, food safety and meat inspection, veterinary responsibility in identifying diseases, legal issues of drug use, and zoonotic diseases. Instructional period 7.

Credit Hours: 2

V_PBio 5575: Veterinary Pathology with Laboratory

General Pathology. Tissue reactions to various disease agents in domestic animals. Instructional period 5.

Credit Hours: 3

V_PBio 5576: Veterinary Systemic and Special Pathology with Laboratories

Special and systemic pathology. Tissue reactions to disease in special systems in domestic animals. Instructional period 6.

Credit Hours: 3

V_PBio 5577: Veterinary Systemic and Special Pathology II with

Follows the general pathology and continues the systemic pathology taught in V_PBio 5576. The course, consisting of daily lectures and weekly laboratories, covers disease, mainly in domestic animals, of the following systems or organs: cardiovascular, respiratory, lymphoid, cutaneous, mammary, ophthalmic, and otic. Instructional period 7.

Credit Hours: 3

V_PBio 5578: Veterinary Clinical Pathology with Laboratory

Physiologic basis, interpretation and clinical application of laboratory assays in hematology, chemistry, cytology, and urinalysis, utilization of laboratory methods to define pathological states and to diagnose disorders of domestic animals. Instructional period 8.

Credit Hours: 3

Prerequisites: enrollment in College of Veterinary Medicine

V_PBio 5579: Veterinary Genomics

Study of genomes, an organism's entire set of the genetic information. Used for detection of pathogen genomes, and markers for mutation causing inherited disease. Instructional period 5.

Credit Hour: 1

V_PBio 5580: Introduction to Veterinary Informatics with Laboratory

Introduces concepts of veterinary informatics and development of core informatics competencies necessary for successful veterinary practice. The knowledge and skills in this course address topics such as data

retrieval, information evaluation, medical records, practice management, communication skills and telemedicine. Instructional period 5.

Credit Hour: 1

V_PBIO 5601: Animals in Emergencies & Basic Emergency Response Training for Vet Students

This course will enable veterinary and graduate students to understand their role in society during disasters and credential as responders. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: Students must be enrolled in the College of Veterinary Medicine and pursuing a DVM degree or be a student pursuing an MPH degree. Instructor consent required for non-veterinary graduate students seeking MPH degrees

V_PBIO 5991: Introduction to Avian Medicine

Introduction to Avian Medicine

Credit Hour: 1

V_PBIO 5995: Foundations in Veterinary Research and Discovery

This course will introduce veterinary students to concepts of research including hypothesis development, experimental design, data interpretation, grantsmanship, responsible conduct of research, biomedical research careers and presentation and publication methods.

Credit Hours: 2

V_PBIO 6010: Laboratory Animal Medicine

Principles of Veterinary Medicine applied to laboratory animals as pets and in research. Husbandry, handling and clinical techniques, diseases, and use as disease models are discussed. Instructional period 8.

Credit Hour: 1.5

V_PBIO 6647: Diagnostic Pathology and Special Species Medicine

Application of laboratory techniques used to diagnose disease by macroscopic, microscopic, biochemical, microbiologic, and toxicologic findings. Case method of teaching. Domestic avian species and laboratory animals included. Six times yearly.

Credit Hours: 8

V_PBIO 6676: Laboratory Animal Medicine and Management Elective

Elective offered 3rd- and 4th-year students, subject to approval of course coordinator and supervising faculty. Concentrated study/experience in laboratory animal disease(s)/colony management. Available to veterinarians as a continuing education program.

Credit Hour: 2-6

V_PBIO 6678: Epidemiology and Community Health

Elective covering advanced aspects of epidemiology and community health. Emphasizes problem solving and is designed to meet needs of the individual student. Instructional period arranged.

Credit Hour: 2-6

Prerequisites: V_PBIO 5558 or instructor's consent

V_PBIO 6679: Diagnostic Pathology and Special Species Medicine

Third- and fourth-year students. Elective. Approval of coordinator and supervisory staff. Continuation of V_PBIO 6647 with more depth. Available to D.V.M.'s as part of continuing education program.

Credit Hour: 2-6

V_PBIO 6684: Research Techniques in Veterinary Pathobiology

Research Techniques in Veterinary Pathobiology

Credit Hour: 1-6

V_PBIO 7100: Veterinary Clinical Chemistry

(cross-leveled with BIOMED 4100). This course is designed to hone the skills of the practicing veterinary technician, veterinary student, or veterinarian and assumes some basic knowledge of normal serum chemistry and urinalysis results. The review of normal will be minimal and emphasis will be placed on clinical serum chemistry and urinalysis findings associated with diseases. The graduate level course will include discussion of ancillary tests and more extensive case interpretations.

Credit Hours: 3

Prerequisites: A BS or BSA in veterinary technology or DVM

V_PBIO 7110: Veterinary Cytology

(cross-leveled with BIOMED 4110). This course of Veterinary Cytology is designed to hone the skills of the practicing Veterinary Technician, Veterinary Student, or Veterinarian and assumes some basic knowledge of microscope usage and normal hematology. The review of normal cells will be minimal and emphasis will be placed on findings associated with inflammatory and neoplastic diseases. The graduate level course will include discussion of ancillary tests, special stains and treatment alternatives. The focus will be on canine and feline diseases but some common equine and bovine disease.

Credit Hours: 2

Prerequisites: DVM or equivalent degree or instructor's consent

V_PBIO 7120: Principles of Toxicology

(cross-leveled with BIOMED 4120). This course will provide an introduction to the general principles of toxicology, including the history and scope of the field; risk assessment and management; mechanisms of toxicology; the disposition of toxicants; non-target organ-directed toxicity; toxic responses of specific target organs; and various toxicological application, such as environmental toxicology.

Credit Hours: 3

Prerequisites: BS in Biology, Biochemistry, or equivalent, or permission of instructor

V_PBIO 7210: Animal Issues in Disasters

(cross-leveled BIOMED 4210). Animal Issues in Disasters describes the various aspects of responding to disasters that involve animals. Government involvement, legal requirements, effects on the human-animal bond, preparation for disasters of different kinds, and impacts on animal-related businesses will be discussed.

Credit Hour: 1

Prerequisites: a bachelor's degree in a biological science or veterinary technology, or DVM degree, or instructor's consent

V_PBIO 8090: Thesis Research in Veterinary Pathobiology

Open to graduate students with requisite preparation. Research on specific animal diseases, prevention and treatment. Graded on a S/U basis only.

Credit Hour: 1-99

V_PBIO 8401: Topics in Veterinary Pathobiology

Courses with lectures in various topics in veterinary pathobiology will be given on a trial basis, depending on faculty expertise and student demand. Credit hours are usually 1 or 3. Specialized topics will be covered.

Credit Hour: 1-99

Prerequisites: instructor's consent

V_PBIO 8410: Seminar in Veterinary Pathobiology

Discussion of current research methods in veterinary pathobiology.

Credit Hour: 1

V_PBIO 8411: Seminar in Histopathology

Discussion of current research and/or case studies in pathology of diseases of domestic animals, laboratory animals and avian species. Team taught.

Credit Hour: 1

V_PBIO 8421: Advanced Epidemiology

(same as F_C_MD 8421).

Credit Hours: 3

V_PBIO 8430: Comparative Pathology

(same as PTH_AS 8000). Biochemical and morphologic lesions related to the mechanism of disease expression in plants and animals.

Credit Hours: 3

V_PBIO 8431: Research Methods and Data Analysis

Specific assignments on diagnostic methods including surgical pathology, necropsies, toxicology.

Credit Hour: 2-4

Prerequisites: departmental consent

V_PBIO 8432: Advanced Histopathology

Advanced microscopic study of pathological tissues.

Credit Hours: 5

Prerequisites: departmental consent

V_PBIO 8433: Veterinary Oncology

History and molecular biology of neoplasia; laboratory for discussion of practical aspects of diagnosis.

Credit Hours: 2

V_PBIO 8434: Advanced Clinical Pathology

Lecture/tutorial teaching; pathogenesis of clinical laboratory abnormalities in the common domesticated species. Emphasis is placed on

mechanisms of disease and pathophysiology of the changes seen in each organ system.

Credit Hours: 3

Prerequisites: departmental consent

V_PBIO 8435: Advanced Microscopy in Veterinary Clinical Pathology

Recognition and pathogenesis of abnormalities found via microscopic analysis of blood smears or cytology.

Credit Hour: 1

Prerequisites: V_PBIO 5578 and departmental consent; DVM or current enrollment in veterinary curriculum

V_PBIO 8436: Pathogenic Mechanisms in Veterinary Pathobiology

This course will include disease mechanisms, described at the cellular and molecular level, which result in tissue morphologic (gross and microscopic) and clinical abnormalities. Examples of discussion topics include soluble mediators of inflammatory processes, host-agent interactions, and host defense mechanisms.

Credit Hours: 3

Prerequisites: instructor's consent

V_PBIO 8437: Pathology of Laboratory Animals

Gross and microscopic study of spontaneous and naturally occurring diseases in laboratory animals.

Credit Hours: 4

Prerequisites: departmental consent

V_PBIO 8438: Primatology

Disease and pathology of primates.

Credit Hours: 3

V_PBIO 8441: Topics in Veterinary Pathobiology

Subjects appropriate to veterinary pathobiology and/or epidemiology, taught on a one-time basis or infrequently. May include highly specialized topics. Specific course must be approved by departmental faculty.

Credit Hour: 1-3

V_PBIO 8442: Advanced Veterinary Pathogenic Bacteriology

Study of pathogenic bacteria causing animal disease. Pathogenic mechanisms and host-parasite relationships are emphasized. Laboratory procedures for isolation and identification of pathogens are included.

Credit Hours: 3

V_PBIO 8443: Viral Infection and Immunity

Study of virus infection at the level of the intact animal. Includes immunology of domestic animal species.

Credit Hours: 3

Prerequisites: graduate standing and instructor's consent

V_PBIO 8445: Advanced Veterinary Parasitology

Parasitic diseases of domestic and exotic animals and those of public health significance. Prerequisites: one course in general parasitology

Credit Hours: 3

V_PBIO 8446: Advanced Immunology and Immunopathology

Study of the immune system at the level of the intact animal. Includes a discussion of immunity-infectious diseases.

Credit Hours: 3

Prerequisites: MICROB 4304 and instructor's consent

V_PBIO 8447: Oncogenic Animal Viruses

Biology of RNA-and DNA-containing animal tumor viruses and their in vitro and in vivo interactions with host cells.

Credit Hours: 3

V_PBIO 8448: Molecular Methods in Nucleic Acids

The course will focus on the most recent developments in technology related to eukaryotic and prokaryotic molecular biology and as analysis a manipulation of nucleic acids and their application to define structure, function and biosynthesis of macromolecules.

Credit Hours: 3

Prerequisites: instructor's consent

V_PBIO 8450: Non-Thesis Research in Veterinary Pathobiology

Research not expected to terminate in dissertation.

Credit Hour: 1-99

V_PBIO 8451: Introduction to Immunology

(same as V_PBIO 5511 and V_PBIO 5512). Fundamentals of immunology as applied to domestic animals.

Credit Hours: 3

V_PBIO 8452: Cell and Molecular Electron Microscopy

Lecture class that describes the use of electron microscopy (transmission and scanning) in biomedical research. Students receive hands-on experience by completing a laboratory project.

Credit Hours: 4

V_PBIO 8454: Domestic Animal Virology

(cross-leveled with V_PBIO 5554). Classification and properties of viruses. Considers the etiologic, pathologic and immunologic aspects of viral diseases of animals. Instructional periods 6.

Credit Hours: 2.5

V_PBIO 8455: Epidemiology and Biostatistics

(same as V_PBIO 5555).

Credit Hours: 2

V_PBIO 8457: Animal Parasitology

(same as V_PBIO 5557).

Credit Hour: 3-5

V_PBIO 8458: Veterinary Public Health

(same as V_PBIO 5558).

Credit Hours: 2

V_PBIO 8468: Laboratory Animal Biology

Taxonomy, anatomy, physiology, nutrition and behavior of laboratory animals including non-human primates and less common species are covered. Genetics, gnostobiology, housing and production are also presented.

Credit Hours: 4

Prerequisites: instructor's consent

V_PBIO 8552: Veterinary Pathogenic Bacteriology and Mycology I

This course deals with the bacterial pathogens of animals emphasizing the pathogenesis and pathology of the diseases, diagnostic problems, appropriate treatments and prevention measures. Course graded A-F only.

Credit Hours: 3

Prerequisites: instructor's consent

V_PBIO 8553: Veterinary Pathogenic Bacteriology and Mycology II

This course deals with the bacterial pathogens of animals emphasizing the pathogenesis and pathology of the diseases, diagnostic procedures, appropriate treatments and prevention measures. Graded on A-F basis only.

Credit Hours: 2.5

Prerequisites: V_PBIO 5552 or V_PBIO 8552 and instructor's consent

V_PBIO 8601: Animals in Emergencies & Basic Emergency Response Training for Vet Students

This course will enable veterinary and graduate students to understand their role in society during disasters and credential as responders. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: Students must be enrolled in the College of Veterinary Medicine and pursuing a DVM degree or be a student pursuing an MPH degree. Instructor consent required for non-veterinary graduate students seeking MPH degrees

V_PBIO 8641: Introduction to Research Ethics

This course provides students with a brief overview of many of the ethical issues that confront today's scientist. It is important that scientist think about and develop their abilities to make well-reasoned responses to ethical problems.

Credit Hour: 1

V_PBIO 9090: Area Veterinary Pathobiology Dissertation Research

Dissertation Research for PhD students. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: departmental consent

Women's and Gender Studies Courses

WGST 1001: Topics in Women's and Gender Studies-General

Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: sophomore standing

WGST 1003: Topics in Women's and Gender Studies-Behavioral

Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: sophomore standing

WGST 1004: Topics in Women's and Gender Studies-Social Science

Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: sophomore standing

WGST 1005: Topics in Women's and Gender Studies-Humanities

Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: sophomore standing

WGST 1120: Introduction to Women's and Gender Studies

Introduction to the basic issues of Western feminist thought through a study of classical and contemporary sources. Course will consider images, conditions, activities and visions of women as they vary historically and socially.

Credit Hours: 3

WGST 1360: The Female Experience: Body, Identity, and Culture

(same as SOCIOL 1360). Study of the experience of being female in American Culture. Course will focus on development of women's identities through such topics as: sexuality, reproduction, self-image, rape and health care.

Credit Hours: 3

WGST 1500: The Black Woman in America

(same as BL_STU 1500). Review and critique of a variety of materials about Black women from slavery to the social and philosophical impact of the Black woman's struggle on all women.

Credit Hours: 3

Recommended: sophomore standing

WGST 2001: Topics in Women's and Gender Studies-General

Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: sophomore standing and/or WGST 1120

WGST 2003: Topics in Women's and Gender Studies-Behavioral

Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: sophomore standing and/or WGST 1120

WGST 2004: Topics in Women's and Gender Studies-Social Science

Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: sophomore standing and/or WGST 1120

WGST 2005: Topics in Women's and Gender Studies-Humanities

Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: sophomore standing and/or WGST 1120

WGST 2005H: Topics in Women's and Gender Studies-Humanities - Honors

Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours.

Credit Hour: 1-3

Prerequisites: Honors eligibility required

Recommended: sophomore standing and/or WGST 1120

WGST 2010: Gender and Identity: Understanding Intersectionality

Explores historical and contemporary dimensions of social inequality in gender, race, class and sexuality. Uses an interdisciplinary lens and feminist analysis to analyze social, cultural, political and economic experiences of individuals and communities. Prerequisites: WGST 1120

Credit Hours: 3

WGST 2020: Feminist Theory

Introduces central themes and problems in feminist thought, including consciousness-raising, motherhood, class, race, sexuality, nationalism, and transnational feminism.

Credit Hours: 3

Prerequisites: WGST 1120 or sophomore standing

WGST 2030: Gender Perspectives: Colonial Histories, Post-Colonial Challenges

Identifies and interrogates key gender issues in post-colonial countries with an acute awareness of their constructions through western and local knowledge, patriarchy, the nation-state, and globalization. May be repeated for credit with different semester themes.

Credit Hours: 3

Prerequisites: sophomore standing

WGST 2040: Perspectives on Empowerment

Women's Empowerment is a popular catch phrase in culture, politics and research. This course explores the meaning of empowerment, the ways empowerment is practiced in organizations and in the everyday lives of girls and women, and the challenges in empowering girls and women in contemporary society. May be repeated for credit with different semester themes.

Credit Hours: 3

WGST 2050: Gender Perspectives: Issues in Public Health

Addresses issues of gender and public health in the US and abroad. Considers how race, class, gender, sexuality, and geopolitical context may impact health. May focus on specific health issues. May be repeated for credit with different semester themes.

Credit Hours: 3

WGST 2080: Perspectives on Sexual and Gender Diversity

This interdisciplinary, cross-cultural course investigates modern constructions of sexed and gendered bodies, paying particular attention to those systems of gender-based oppression that suppress multiple gender identities and expressions. May be repeated for credit with different semester themes.

Credit Hours: 3

Prerequisites: sophomore standing

WGST 2180: Introduction to Women's Literature

(same as ENGLISH 2180). A study of traditional and non-traditional literature written by women from the perspective of feminist themes-love, power, work, family and other relations. No more than six hours may be taken in the Introduction to Women's Literature series.

Credit Hours: 3

Recommended: ENGLISH 1000

WGST 2186: Introduction to Women's Literature, Beginning to 1603

(same as ENGLISH 2186). See WGST 2180 for course description.

Credit Hours: 3

WGST 2187: Introduction to Women's Literature, 1603 to 1789

(same as ENGLISH 2187). See WGST 2180 for course description.

Credit Hours: 3

WGST 2188: Introduction to Women's Literature, 1789 to 1890

(same as ENGLISH 2188). See WGST 2180 for course description.

Credit Hours: 3

WGST 2189: Introduction to Women's Literature, 1890 to Present

(same as ENGLISH 2189). See WGST 2180 for course description.

Credit Hours: 3

WGST 2200H: British Women Writers - Honors

Study of works by important British women writers. We also consider the development of women's writing and the contribution of women writers to literature and to larger societal debates. May be repeated for credit.

Credit Hours: 3

Prerequisites: honors eligibility required

Recommended: sophomore standing

WGST 2250: Perspectives on Gender, Race, Class and Sexuality in the Americas

Introduction to the formation of identities in the Americas. Some areas covered are immigration, transnational identity, pop culture, literary expression, body image, spirituality, racism/sexism, assimilation, acculturation, and activism. May be repeated for credit with different semester themes.

Credit Hours: 3

WGST 2260: Perspectives on Mass Media: Constructions of Gender, Race and Sexuality

Examines constructions of gender, race, class and sexuality in the US media in the twentieth and twenty first centuries. Emphasis placed on media's coverage and uses of various socially constructed identities. May be repeated for credit with different semester themes.

Credit Hours: 3

WGST 2340: Perspectives on Gender and Popular Culture

Explores issues in popular culture in the 20th and 21st centuries with respect to feminism, gender, sexuality, race, class, and ability. Areas of study may include television, movies, music, advertisements, magazines, fiction, newspapers, the internet, and social media. May be repeated for credit.

Credit Hours: 3

WGST 2370: French and Francophone Women Writers

(same as FRENCH 2370). This course will address issues of race, gender and class in selected works originally written by women of different historical periods and geographical areas. (metropolitan France, French colonies, and territories such as the Caribbean).

Credit Hours: 3

WGST 2400: Social History of U.S. Women

(same as HIST 2400). This course, the social history of US women, offers a general overview of US women, beginning with the colonial period up to the present day.

Credit Hours: 3

WGST 2410: African American Women in History

(same as HIST 2410 and BL_STU 2410). Covers major issues affecting black women since their introduction into English-speaking North America to the present.

Credit Hours: 3

WGST 2500: Philosophy and Gender

(same as PHIL 2500). A critical examination of central ideas and themes in feminist philosophical thought. Topics may include: sex, marriage, parenthood, reproduction, body image, pornography, prostitution.

Credit Hours: 3

Prerequisites: sophomore standing

WGST 2960: Sexual Health Advocacy and Service Learning

Students will critically investigate sexuality and reproductive health within a cultural context including religious, political, social justice, familial, and societal influences. Through assigned readings, reflection, experiential learning, small group activities and discussion, students will increase their awareness of sexual health issues, enhance self awareness, and learn how to effectively educate their peers surrounding issues of sexual health.

Credit Hours: 3

Prerequisites: sophomore standing

WGST 3001: Topics in Women's and Gender Studies-General

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: junior standing and/or WGST 1120

WGST 3003: Topics in Women's and Gender Studies-Behavioral Sciences

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: junior standing and/or WGST 1120

WGST 3004: Topics in Women's and Gender Studies-Social Sciences

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: junior standing and/or WGST 1120

WGST 3005: Topics in Women's and Gender Studies-Humanities

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: junior standing and/or WGST 1120

WGST 3005H: Topics in Women's and Gender Studies-Humanities - Honors

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours.

Credit Hour: 1-3

Prerequisites: honors eligibility required

Recommended: junior standing and/or WGST 1120

WGST 3080: Sexuality and Gender Theory

(same as ENGLISH 3080). Examination of major theoretical approaches and debates in the study of gender and sexuality, with particular attention to the intersection of culture, representation, and identity. May be repeated to 6 hours with departments consent.

Credit Hours: 3

WGST 3150: Themes in Gender and Work

This is an interdisciplinary course on gender and work. The course addresses topics such as contemporary and historical feminist debates about gender and work; problems of gender inequality at the workplace; historical context of contemporary patterns of gender inequality at work; and how gender intersects with race, class, sexuality and other social categories to shape people's work lives.

Credit Hours: 3

WGST 3180: Historical Survey of Women Writers

(same as ENGLISH 3180). A study of writing by women from the Middle Ages to the present.

Credit Hours: 3

WGST 3220: U.S. Women's Political History, 1880-Present

(same as HIST 3220). This course explores American women's engagement with American politics (broadly defined) over the course of the twentieth century. It addresses issues of political identity, organization, ideology, and division.

Credit Hours: 3

Prerequisites: sophomore standing

WGST 3230: Themes in Sexual Politics

Explores transnational politics of sex/sexuality, examines the theoretical, historical, analytical, and socio-cultural context of race, gender and sexuality. Students learn and apply a transdisciplinary approach and analyze shifts in the field of sexuality studies. May be repeated for credit with different themes.

Credit Hours: 3

Prerequisites: WGST 1120

Recommended: sophomore standing

WGST 3240: Nonprofit Work and the Pursuit of Social Justice

This course provides an overview of the work of nonprofit organizations. It will be framed in a social justice paradigm and will explore women's role in nonprofit organizations, why women gravitate to nonprofits, and the implications of their work to achieve social justice.

Credit Hours: 3

Recommended: junior standing

WGST 3260: Themes in Gender, Law and Justice

Course addresses issues related to gender, law and the justice system in the U.S. and /or globally. Topics may include history of women's rights in the U.S.; contemporary issues in law and justice such as incarceration, human trafficking, and gay marriage; and the ways race, class, sexuality

and citizenship shape experiences of justice. May be repeated for credit with different semester themes.

Credit Hours: 3

Recommended: junior standing

WGST 3270: Themes in Masculinities

Explores how male experiences are shaped by gender expectations and social context, with emphasis on psychosocial challenges and privileges associated with negotiating masculine gender role expectations.

Evaluates the psychological impact of gender, especially in American popular culture, on diverse men and their families. Studies how gender interacts with other aspects of identity, such as race, religion, ethnicity, socioeconomic status, sexual orientation and non-conforming gender identity. Course may be repeated for credit. Recommended: WGST 1120 and sophomore standing,

Credit Hours: 3

WGST 3300: Queer Theories/Identities

(same as SOCIOL 3300). Analysis of gay, lesbian, bisexual, transgender (GLBT) and queer identities in culture and society with an emphasis on the contributions of queer theory and other GLBT standpoint theories to sociology and the study of society.

Credit Hours: 3

Prerequisites: SOCIOL 2200 or instructor's consent

WGST 3320: Sociology of Gender

(same as SOCIOL 3320). Study of the ways in which femininities and masculinities are constructed in American society with particular attention to gender ideologies and the gendered nature of the social structure.

Credit Hours: 3

Prerequisites: SOCIOL 1000 or SOCIOL 1360

WGST 3370: Themes in Gender and Religion

Students acquire a basic knowledge and understanding of gender in religious communities including the construction of women's/men's religious identities, their gender relations, societal roles and status. Themes may explore how the organizational structures of religion can be a vehicle of oppression and a place for justice and autonomy; may explore the representation and practices of specific religions; or may address the intersections of gender, class, race, geopolitics, and religion. May be repeated for credit.

Credit Hours: 3

Recommended: junior standing

WGST 3430: Sex Radicals in U. S. History

(same as HIST 3430). Survey of the history of sexuality in the United States.

Credit Hours: 3

Prerequisites: sophomore standing

WGST 3450: Feminist Methodologies

This course is an opportunity to explore the difference that feminism makes in doing research. Students can begin to identify the research tools and strategies suited to questions they want to pursue.

Credit Hours: 3

Prerequisites: sophomore standing

WGST 3480: Themes in Sexuality and Literature

Examines sexuality and representations of sexuality in literature. The specific topic will be announced at the time of registration. May be repeated for credit with different semester themes.

Credit Hours: 3

Prerequisites: sophomore standing

WGST 3560: Themes in Gender and Immigration

Explores current controversies in immigration in various locations. The course will cover a number of topics including nationalism and citizenship, national identity, identity and fluidity, social inequality and others. May be repeated for credit with different semester themes.

Credit Hours: 3

WGST 3570: European Women in the 19th Century

(same as HIST 3570). Examines the history of European women from 1750 to 1900. The course focuses on how industrialization, the French Revolution and nation-formation changed women's role in the family, workplace and the state. Grading: exams, papers and discussions.

Credit Hours: 3

Prerequisites: sophomore standing

WGST 3650: Themes in Feminism

Course may cover historical and contemporary understandings of feminism, feminist movements in the U.S. and globally, and key debates in feminism. The specific topics will be announced at the time of registration. May be repeated for credit with different semester themes.

Credit Hours: 3

Recommended: junior standing

WGST 3670: Themes in Gender and Globalization

Introduces transnational feminist theories, considers the practices and material circumstances related to globalization, and explores how class, gender, place/nation, (dis) ability, sexuality and colonial practices complicate our understanding of globalization. May be repeated for credit with different semester themes.

Credit Hours: 3

Prerequisites: WGST 1120

Recommended: sophomore standing

WGST 3750: Women and Religions

(same as REL_ST 3750). A rediscovery of the wealth of religious activity which women have created and enacted. Investigates women's roles and rituals in large-scale and local religions, including ancient Goddess religions, Hinduism, Buddhism, Judaism, Christianity, Islam, and African, South American, and native American groups.

Credit Hours: 3

Prerequisites: sophomore standing

WGST 3850: Themes in Gender and the Politics of Representation

Examines the gendered politics of representation by analyzing film, literature, popular media, and/or other popular cultural texts. May be repeated for credit with different semester themes.

Credit Hours: 3

WGST 3870: Russian Women and Film

(same as RUSS 3870 and FILM_S 3870) Traces image(s) of the Russian woman in 20th-century Russia as constructed in Russian, Soviet and late-Soviet film. Discusses heroines of pre-revolutionary melodrama and "new Soviet man and woman" of the 20s. Considers war-time re-alignment of gender roles in defense of motherland and their subtle revamping in post-war and post-Stalinist period, and the shifting relations between women and men, women and women, and women and the State. Emphasizes cultural-historical and ideological status of women as reflected in onscreen image(s) in Russian film. Designed to serve as an introduction to film studies and to 20th-century Russian culture more generally. Conducted in English (all films have English subtitles).

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

WGST 3960: Strategies for Effective Peer Education

Course is designed to promote effective presentation skills on a variety of health topics, specifically sexual health. Students will engage in experiential practice and skill building surrounding cultural competency, difficult discourses, discussion facilitation and behavior management.

Credit Hour: 1

Prerequisites: instructor's consent

WGST 4001: Topics in Women's and Gender Studies-General

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: junior standing and/or WGST 1120

WGST 4003: Topics in Women's and Gender Studies-Behavioral Sciences

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: junior standing and/or WGST 1120

WGST 4004: Topics in Women's and Gender Studies-Social Sciences

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: junior standing and/or WGST 1120

WGST 4005: Topics in Women's and Gender Studies-Humanities

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours.

Credit Hour: 1-3

Recommended: junior standing and/or WGST 1120

WGST 4020: Studies in Feminist Thought

(same as BL_STU 4020; cross-leveled with WGST 7020). Examines recent problems and critical debates within feminist theory. May be repeated for credit with different semester themes.

Credit Hours: 3

Prerequisites: WGST 2020

WGST 4110: Feminist Research and Criticism

(same as SOCIOL 4110) Examination of both feminist critique of traditional social research and recent, feminist-oriented research that attempts to answer these criticisms.

Credit Hours: 3

WGST 4120: Women, Art and Society

(same as AR_H_A 4120). Analysis of the careers and works of women artists, and images of women (by female and male artists), in selected eras.

Credit Hours: 3

Prerequisites: instructor's consent

WGST 4180: Major Women Writers

(same as ENGLSH 4180). Study of a limited number (1-3) of significant writers to be read intensively using contemporary feminist critical theory. Repeatable with department's consent maximum of six hours for WGST 4180 and WGST 4480.

Credit Hours: 3

WGST 4181: Themes in Literature by Women

(same as ENGLSH 4181 and BL_STU 4181). Examines works by a number of women writers with particular attention to their sociopolitical context. May repeat to six hours with department's consent.

Credit Hours: 3

Recommended: junior standing

WGST 4186: Major Women Writers, Beginning to 1603

(same as ENGLSH 4186). See WGST 4180 for course description.

Credit Hours: 3

WGST 4187: Major Women Writers, 1603-1789

(same as ENGLSH 4187). See WGST 4180 for course description.

Credit Hours: 3

WGST 4188: Major Women Writers, 1789-1890

(same as ENGLSH 4188). See WGST 4180 for course description.

Credit Hours: 3

WGST 4189: Major Women Writers, 1890-Present

(same as ENGLSH 4189). See WGST 4180 for course description.

Credit Hours: 3

WGST 4230: Women, Development, and Globalization

(same as SOCIOL 4230, BL_STU 4230 and PEA_ST 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities.

Credit Hours: 3

Prerequisites: BL_STU 1332, BL_STU 2200; SOCIOL 2200; WGST 1332 or WGST 2010

WGST 4235: Social Perspectives on Gender and Emotion

(same as BL_STU 4235, SOCIOL 4235; cross-leveled with BL_STU 7235, SOCIOL 7235, WGST 7235). Examines theories of affect and emotions, the social contexts and the implications for human development and behavior, with special emphasis on sex, gender, race, class and culture. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: WGST 1332 or WGST 1360; SOCIOL 1360 or SOCIOL 2300; BL_STU 1332 or BL_STU 2200; junior standing

WGST 4310: Adoption, Child Welfare and the Family, 1850-Present

(same as HIST 4310; cross-leveled with WGST 7310, HIST 7310). This interdisciplinary U.S. history course will address topics such as: changing legal and social meaning of adoption since 1850; historical connections between adoption and poverty, family, gender race, sexuality, class, fertility, identity; and more recent issues such as transnational adoption.

Credit Hours: 3

WGST 4350: Studies in Gender and the Environment

(cross-leveled with WGST 7350). Explores how gendered social relations affect the relationship between human beings, non-human nature, and the environment. Also examines how historically, the human relationship with nature has been governed by a dualism of culture and nature that enables both an ideology of technical control and the objectification of the environment and people. Draws from ecological feminism, the environmental justice movement, feminist science studies, materialist feminism, and feminist dystopian fiction. May be repeated for credit.

Credit Hours: 3

Prerequisites: junior standing

Recommended: WGST 1120

WGST 4370: Anthropology of Gender

(same as ANTHRO 4370). The Anthropology of Gender introduces the student to the variation in the relationships between male and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

Credit Hours: 3

WGST 4400: Contemporary Issues in Domestic Violence

(same as SOC_WK 4400). This 3-hour course covers history of battered women's movement, violence theories, policy issues, prevention and intervention practice models for working with battered women, their children, and abusers. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Junior or Senior standing required

WGST 4420: Studies in Gender, Culture, and Politics

Examines ethical issues, social policies and politics, and cultural practices affecting women in specific national and global contexts. May be repeated for credit with different semester themes.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

WGST 4480: Major African Diaspora Women Writers

(same as BL_STU 4480 and ENGLSH 4480). Study of selected Africana Diaspora women writers, focusing on texts originally in English. Repeatable with department's consent. Maximum of 6 hours for WGST 4180 and WGST 4480.

Credit Hours: 3

WGST 4487: Major African Diaspora Women Writers, 1603 to 1789

(same as BL_STU and ENGLSH 4487). See WGST 4480 for course description.

Credit Hours: 3

WGST 4488: Major African Diaspora Women Writers, 1789 to 1890

(same as BL_STU and ENGLSH 4488). See WGST 4480 for course description.

Credit Hours: 3

WGST 4489: Major African Diaspora Women Writers, 1890 to Present

(same as BL_STU and ENGLSH 4489). See WGST 4480 for course description.

Credit Hours: 3

WGST 4550: Gender and Human Rights in Cross Cultural Perspective

(same as SOCIOL 4550 and PEA_ST 4550). This course focuses on the global discourse on human rights and gender, emphasizing cross-cultural theories. Course includes the meaning of rights, Western and nonwestern perspectives, feminist contributions, important substantive debates, violations, policymaking and activism.

Credit Hours: 3

Prerequisites: WGST 1120 or SOCIOL 2200

Recommended: senior standing required

WGST 4600: Studies in Women and Health

A survey of international and domestic women's health issues; considers historical antecedents and specific effects of socio-cultural variables and economic development on women's health in developing and developed nations. May be repeated for credit with different semester themes.

Credit Hours: 3

WGST 4640: Studies in Gender and Performance

Examines the relationship among gender, race, class, and/or sexuality, and performance. Course materials may include theatre performance, visual art, literacy context, theoretical essays, films, and popular culture. May be repeated for credit with different semester themes.

Credit Hours: 3

Prerequisites: junior standing

WGST 4660: European Women in the 20th Century

(same as HIST 4660). Examines the history of European women from World War I to the present. The course focuses on wars, migration, and the changing nature of family, work and community.

Credit Hours: 3

Prerequisites: junior standing

WGST 4716: Women and the Media

(same as JOURN 4716). Focus on portrayal of women in American mass media. Other goals: historical perspective on women as journalists; exposure to issues usually not covered by mass media; research and writing skills.

Credit Hours: 2

WGST 4730: Women and Politics

(same as Political Science [POL_SC] 4730). This course examines women's political participation and public policies towards women in countries around the world.

Credit Hours: 3

Prerequisites: junior standing

WGST 4750: Women, Religion and Culture

(same as REL_ST 4750). An advanced study of the role of women in religion, focusing on the methods of determining the significance of gender in religious life, sacred texts, symbols, rituals and/or beliefs. Traditions studied include Christianity, Islam, contemporary pagan communities, and Native American traditions.

Credit Hours: 3

Prerequisites: REL_ST 3750 or WGST 3750 or instructor's consent

WGST 4780: Women's Folklore and Feminist Theory

(same as ENGLISH 4780). Examines folklore and artistic expression of women in relations to feminist theory and in multicultural contexts. Includes verbal genres (narrative/song) as well as material genres (quilting/arts).

Credit Hours: 3

Recommended: junior standing

WGST 4873: Women's and Gender Studies Abroad - Behavioral Science

This interdisciplinary study abroad course provides students the opportunity to study women's issues in the globe, to study in a foreign culture and augment their global competencies across the Women's and Gender Studies curriculum and extend a global perspective to their study and/or career development.

Credit Hours: 3

WGST 4874: Women's and Gender Studies Abroad - Social Science

This interdisciplinary study abroad course provides students the opportunity to study women's issues in the globe, to study in a foreign culture and augment their global competencies across the Women's and Gender Studies curriculum and extend a global perspective to their study and/or career development.

Credit Hours: 3

WGST 4875: Women's and Gender Studies Abroad - Humanities

This interdisciplinary study abroad course provides students the opportunity to study women's issues in the globe, to study in a foreign culture and augment their global competencies across the Women's and Gender Studies curriculum and extend a global perspective to their study and/or career development.

Credit Hours: 3

WGST 4875H: Women's and Gender Studies Abroad - Humanities

This interdisciplinary study abroad course provides students the opportunity to study women's issues in the globe, to study in a foreign culture and augment their global competencies across the Women's and Gender Studies curriculum and extend a global perspective to their study and/or career development.

Credit Hours: 3

Prerequisites: Honors eligibility required

WGST 4940: Internship in Women's and Gender Studies

Directed professional experience in appropriate feminist related agency or organization. Graded on S/U basis only.

Credit Hour: 1-12

Prerequisites: junior standing; departmental consent

WGST 4965: Special Readings in Women's and Gender Studies

Independent readings in women's and gender studies for highly qualified and motivated students. Topic selected in consultation with supervisory faculty member. Repeatable up to 6 hours.

Credit Hour: 1-6

Prerequisites: junior standing or WGST 1120

WGST 4990: Capstone: Senior Research Seminar in Women's and Gender Studies

Seminar for senior students earning interdisciplinary B.A. with emphasis in WGST. Students will reflect knowledge and experience gained as WGST majors and explore taking that knowledge and experience out in the "real world".

Credit Hours: 3

Prerequisites: instructor's consent

WGST 7001: Topics in Women's and Gender Studies-General

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable for credit.

Credit Hour: 1-3

WGST 7003: Topics in Women's and Gender Studies-Behavioral Studies

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable for credit.

Credit Hour: 1-3

WGST 7004: Topics in Women's and Gender Studies-Social Science

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable for credit.

Credit Hour: 1-3

WGST 7005: Topics in Women's and Gender Studies-Humanities

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable for credit.

Credit Hour: 1-3

WGST 7020: Studies in Feminist Thought

(same as BL_STU 7020; cross-leveled with WGST 4020). Examines recent problems and critical debates within feminist theory.

Credit Hours: 3

WGST 7110: Feminist Research and Criticism

(same as SOCIOL 7110). Examination of both feminist critique of traditional social research and recent, feminist-oriented research that attempts to answer these criticisms.

Credit Hours: 3

WGST 7120: Women, Art and Society

(same as AR_H_A 7120). Analysis of the careers and works of women artists, and images of women (by female and male artists), in selected eras.

Credit Hours: 3

Prerequisites: instructor's consent

WGST 7180: Major Women Writers

(same as ENGLSH 7180). Study of a limited number (1-3) of significant writers to be read intensively using contemporary feminist critical theory. Repeatable with department's consent maximum of six hours for WGST 7180 and WGST 7480.

Credit Hours: 3

Prerequisites: two courses in British or American Literature

WGST 7181: Themes in Literature by Women

(same as ENGLSH 7181). Examines works by a number of women writers with particular attention to their sociopolitical context. May repeat to six hours with department's consent.

Credit Hours: 3

WGST 7186: Major Women Writers, Beginning to 1603

(same as ENGLSH 7186). See WGST 7180 for course description.

Credit Hours: 3

WGST 7187: Major Women Writers, 1603-1789

(same as ENGLSH 7187). See WGST 7180 for course description.

Credit Hours: 3

WGST 7188: Major Women Writers, 1789-1890

(same as ENGLSH 7188). See WGST 7180 for course description.

Credit Hours: 3

WGST 7189: Major Women Writers, 1890-Present

(same as ENGLSH 7189). See WGST 7180 for course description.

Credit Hours: 3

WGST 7230: Women, Development, and Globalization

(same as SOCIOL 7230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities.

Credit Hours: 3

WGST 7235: Social Perspectives on Gender and Emotion

(same as BL_STU 7235, SOCIOL 7235; cross-leveled with SOCIOL 4235, BL_STU 4235, WGST 4235). Examines theories of affect and emotions, the social contexts and the implications for human development and behavior, with special emphasis on sex, gender, race, class and culture. Graded on A-F basis only.

Credit Hours: 3

WGST 7310: Adoption, Child Welfare and the Family, 1850-present

(same as HIST 7310; cross-leveled with WGST 4310, HIST 4310). This interdisciplinary U.S. history course will address topics such as: changing legal and social meanings of adoption since 1850; historical connections between adoption and poverty, family, gender, race, sexuality, class, fertility, identity; and more recent issues such as transnational adoption.

Credit Hours: 3

WGST 7350: Studies in Gender and the Environment

(cross-leveled with WGST 4350). Explores how gendered social relations affect the relationship between human beings, non-human nature, and the environment. Also examines how historically, the human relationship with nature has been governed by a dualism of culture and nature that enables both an ideology of technical control and the objectification of the environment and people. Draws from ecological feminism, the environmental justice movement, feminist science studies, materialist feminism, and feminist dystopian fiction. May be repeated for credit.

Credit Hours: 3

WGST 7370: Anthropology of Gender

(same as ANTHRO 7370) The Anthropology of Gender Introduces the student to the variation in the relationships between males and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

Credit Hours: 3

WGST 7400: Contemporary Issues in Domestic Violence

(same as SOC_WK 7400; Cross-leveled with WGST 4400). This 3-hour course covers history of battered women's movement, violence theories, policy issues, prevention and intervention practice models for working

with battered women, their children, and abusers. Graded on A-F basis only.

Credit Hours: 3

WGST 7420: Studies in Gender, Culture, and Politics

Examines ethical issues, social policies and politics, and cultural practices affecting women in specific national and global contexts.

Credit Hours: 3

WGST 7480: Major African Diaspora Women Writers

(same as BL_STU 7480 and ENGLSH 7480). Study of selected African Diaspora women writers, focusing on texts originally in English. Repeatable with department's consent. Maximum of 6 hours for WGST 7180 and WGST 7480.

Credit Hours: 3

WGST 7487: Major African Diaspora Women Writers, 1603 to 1789

(same as BL_STU 7487 and ENGLSH 7487). See WGST 7480 for course description.

Credit Hours: 3

WGST 7488: Major African Diaspora Women Writers, 1789 to 1890

(same as BL_STU 7488 and ENGLSH 7488). See WGST 7480 for course description.

Credit Hours: 3

WGST 7489: Major African Diaspora Women Writers, 1890 to Present

(same as BL_STU 7489 and ENGLSH 7489). See WGST 7480 for course description.

Credit Hours: 3

WGST 7550: Gender and Human Rights in Cross Cultural Perspective

(same as SOCIOL 7550 and PEA_ST 7550). Focuses on the global discourse on human rights and gender, emphasizing cross-cultural theories. Course includes the meaning of human rights, western and nonwestern perspectives, feminist contributions, important substantive debates, violations, policymaking and activism.

Credit Hours: 3

WGST 7600: Studies in Women and Health

A survey of international and domestic women's health issues; considers historical antecedents and specific effects of socio-cultural variables and economic development on women's health in developing and developed nations.

Credit Hours: 3

WGST 7640: Studies in Gender and Performance

Examines the relationships among gender, race, class, and/or sexuality, and performance. Course materials may include theatre performance, visual art, literary texts, theoretical essays, films, and popular culture. May be repeated for credit.

Credit Hours: 3

WGST 7660: European Women in the 20th Century

(same as HIST 7660). Examines the history of European women from World War I to the present. The course focuses on wars, migration, and the changing nature of family, work and community.

Credit Hours: 3

WGST 7716: Women and the Media

(same as JOURN 7716). Focus on portrayal of women in American mass media. Other goals: historical perspective on women as journalists; exposure to issues usually not covered by mass media; research and writing skills.

Credit Hours: 2

Prerequisites: instructor's consent

WGST 7750: Women, Religion and Culture

(same as REL_ST 7750). An advanced study of the role of women in religion, focusing on the methods of determining the significance of gender in religious life, sacred texts, symbols, rituals and/or beliefs. Traditions studied include Christianity, Islam, contemporary pagan communities, and Native American traditions.

Credit Hours: 3

WGST 7780: Women's Folklore and Feminist Theory

(same as ENGLSH 7780). Examines folklore and artistic expression of women in relations to feminist theory and in multicultural contexts. Includes verbal genres (narrative/song) as well as material genres (quilting/arts).

Credit Hours: 3

WGST 7873: Women's and Gender Studies Abroad - Behavioral Science

This interdisciplinary study abroad course provides students the opportunity to study women's issues in the globe, to study in a foreign culture and augment their global competencies across the Women's and Gender Studies curriculum and extend a global perspective to their study and/or career development.

Credit Hours: 3

WGST 7874: Women's and Gender Studies Abroad-Social Science

This interdisciplinary study abroad course provides students the opportunity to study women's issues in the globe, to study in a foreign culture and augment their global competencies across the Women's and Gender Studies curriculum and extend a global perspective to their study and/or career development.

Credit Hours: 3

WGST 7875: Women's and Gender Studies Abroad - Humanities

This interdisciplinary study abroad course provides students the opportunity to study women's issues in the globe, to study in a foreign culture and augment their global competencies across the Women's and Gender Studies curriculum and extend a global perspective to their study and/or career development.

Credit Hours: 3

WGST 8001: Topics in Women's and Gender Studies-General

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable.

Credit Hour: 1-3

WGST 8003: Topics in Women's and Gender Studies-Behavioral

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable.

Credit Hour: 1-3

WGST 8004: Topics in Women's and Gender Studies-Social Science

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable.

Credit Hour: 1-3

WGST 8005: Topics in Women's and Gender Studies-Humanities

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable.

Credit Hour: 1-3

WGST 8020: Graduate Feminist Theory

This course will explore the texts and contexts of feminist theories including women of color socialist/Marxist feminism, queer theory, postmodern feminism, and feminist postcolonial theory.

Credit Hours: 3

WGST 8040: Seminar: Problems and Issues in Feminist Scholarship

This course is a broad based exploration of a range of current feminist scholarship, both multidisciplinary and interdisciplinary. Issues of identity and difference, community and change are explored through the complicating lenses of race and sexuality.

Credit Hours: 3

WGST 8060: New Directions in Feminist Theory

Offers an in-depth exploration of a recent direction in feminist theory. Students will learn a specific feminist approach to scholarship. Theory explored will change based on the semester and professor teaching the course.

Credit Hours: 3

WGST 8400: Women Writers of the African Diaspora

Closely studies the works of women writers in the African Diaspora.

Credit Hours: 3

WGST 8405: Readings in Feminist and Gender Studies

Graduate-level exploration of concentrated readings that address gender, sexuality, and/or feminist theory within a specific disciplinary area. May be repeated for credit

Credit Hours: 3

WGST 8410: Africana Theory and Literature Criticism: Black Feminist/Womanist Thought

Modern and contemporary Africana Diaspora criticism and theory including the diverse approaches to literary and cultural studies.

Credit Hours: 3

WGST 8620: Work and Family Seminar

(same as H_D_FS 8620). Interaction of family life and income-producing work with attention to how these interconnections vary by social class, gender, race/ethnicity, and age.

Credit Hours: 3

WGST 8630: Gendered Relations in Families

(same as H_D_FS 8630). From a feminist perspective, the roles of gender in shaping family life experience and of family life experience in shaping gender will be explored. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

WGST 8965: Problems in Women's and Gender Studies

Directed individual study on selected topics for qualified graduate students. Plan of study subject to approval by supervising faculty.

Credit Hour: 1-6

Prerequisites: departmental consent

WGST 9001: Topics in Women's and Gender Studies

Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. May be repeated for credit.

Credit Hour: 1-3

Prerequisites: instructor's consent

WGST 9440: Race, Gender, Ethnicity in Higher Education

(same as ED_LPA 9440). Historical relationships of race, gender, and ethnic issues in United States higher education. Issues include: theory and research of curriculum and teaching, diversity within the academy, and leadership, governance, and policy.

Credit Hours: 3

Accountancy (ACCTCY)

ACCTCY 2010: Introduction to Accounting

Introduction to accounting for non-business majors. Emphasis on introducing students to business operations, as well as preparing and using management information and financial accounting information for business decisions (does not count as either ACCTCY 2036 or ACCTCY 2037).

Credit Hours: 3

ACCTCY 2026: Accounting I

An introduction to the field of accounting, this course covers the fundamentals of financial accounting. Business students at UMC must have advisor's approval. Credit may not be earned for both ACCTCY 2026 and ACCTCY 2036. Course only offered through the Mizzou Online (self paced).

Credit Hours: 3

Prerequisites: Sophomore Standing

ACCTCY 2027: Accounting II

This course covers the fundamentals of managerial accounting and additional topics in financial accounting. Business students at UMC must have advisor's approval. Credit may not be earned for both ACCTCY 2027 and ACCTCY 2037. Course only offered through Mizzou Online (self paced).

Credit Hours: 3

Prerequisites: ACCTCY 2026

ACCTCY 2036: Accounting I

First half of two-part course focusing on the business environment and the use of managerial and financial accounting information for decision making in various business settings. Emphasizes the use of accounting information about a retail company (sole proprietorship) by internal and external users, followed by an introduction to other forms of business and, then, planning for corporate operations.

Credit Hours: 3

Prerequisites: Sophomore standing. May be restricted to lower-level business and lower-level accountancy students during early registration

ACCTCY 2037: Accounting II

Second half of two-part course focusing on the business environment and the use of managerial and financial accounting information for decision making in various business settings. This half emphasizes the use of accounting information about a manufacturing company (corporation) by internal and external users.

Credit Hours: 3

Prerequisites: ACCTCY 2036 or ACCTCY 2136H

ACCTCY 2136H: Honors Accounting I

First part of two-part course focusing on the nature and use of managerial and financial accounting information for decision making in various business settings. Emphasizes use of accounting information by internal and external users.

Credit Hours: 3

Prerequisites: sophomore standing in Accounting or Business, 3.3 or higher GPA. Honors eligibility required

ACCTCY 2137H: Honors Accounting II

Continuation of Accountancy 2136H.

Credit Hours: 3

Prerequisites: C or better ACCTCY 2136H. Honors eligibility required

ACCTCY 2258: Computer-Based Data Systems

Introduces the computer as a tool in the efficient operation of a business. Skills developed in the course include electronic information retrieval,

information analysis using a spreadsheet, what-if analysis macro development, and information presentation. In addition, computer components, data storage, networks, and information technology are discussed.

Credit Hours: 3

Prerequisites: Sophomore standing

ACCTCY 3326: Financial Accounting Theory and Practice I

Institutional structure, conceptual framework, and reporting standards and practices of financial accounting, with special emphasis on accounting for assets.

Credit Hours: 3

Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027. Restricted to Accountancy Majors

ACCTCY 3328: Accounting Information Systems

Introduction to accounting information systems (AIS). General AIS concepts. Transaction processing systems and accounting cycles. Alternative platforms for computerized transaction processing. Database management and data modeling. Control concepts and design.

Credit Hours: 3

Prerequisites: Restricted to Accountancy Majors

ACCTCY 3346: Financial Accounting Theory and Practice II

Continuation of Accountancy 3326, with special emphasis on income recognition and accounting for liabilities and ownership equity.

Credit Hours: 3

Prerequisites: ACCTCY 3326. Restricted to Accountancy Majors

ACCTCY 3347: Cost and Managerial Accounting

Activity based and traditional job order and process cost systems for service, merchandising, and multinational manufacturing companies; Cost accounting techniques and procedures for financial reporting by multinational companies. Strategic focus to management accounting measurement and reporting. Standard costs and variances, capital budgeting.

Credit Hours: 3

Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027. Restricted to Accountancy Majors

ACCTCY 4000: Accountancy Professional Speakers and Symposia

(cross-leveled with ACCTCY 7000). This non-credit course, recommended for all accountancy majors, will provide exposure to issues in the accounting profession through professional speaker series and symposia. Components will include the Dawdy Speaker Series, Orin Ethics Symposium, and Symposia delivered by accounting firms and/or professional accounting organizations. This will be a non-credit, non-billed, no hours course.

Credit Hours: 0

Prerequisites: Accountancy Majors

ACCTCY 4301: Topics in Accounting

Independent investigations, reports on approved topics.

Credit Hour: 1-3

Prerequisites: instructor's consent

ACCTCY 4353: Introduction to Taxation

(cross-leveled with ACCTCY 7353). Introduction to the structure and conceptual foundation of the U.S. federal income tax system for individual taxpayers. Topics include income recognition, deductions, property transactions, trusts, and family wealth planning. This course also introduces students to legal tax research and preparation of individual income tax returns.

Credit Hours: 3

Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027. Restricted to accountancy majors only

ACCTCY 4356: Financial Accounting Concepts

(cross-leveled with ACCTCY 7356). Current issues in the financial reporting of business corporations to external parties.

Credit Hours: 3

Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027 or ACCTCY 7310. Not open to accountancy majors

ACCTCY 4365: Governmental Accounting and Budgeting

(cross-leveled with ACCTCY 7365). Introduction to government and not-for-profit accounting. Concepts and principles of fund accounting, budgeting, auditing, and financial reporting in government and not-for-profit entities.

Credit Hours: 3

Prerequisites: ACCTCY 3326. Restricted to Accountancy Majors

ACCTCY 4384: Auditing Theory and Practice I

(cross-leveled with ACCTCY 7384). Introduction to the auditing profession, assurance function, and generally accepted standards for conducting audits.

Credit Hours: 3

Prerequisites: ACCTCY 3328 and ACCTCY 3346. Restricted to Accountancy Majors

ACCTCY 4940: Professional Accounting Internship

(cross-leveled with ACCTCY 7940). Provides full-time professional accounting work experience of at least eight weeks duration. Graded on S/U basis only.

Credit Hour: 3-6

Prerequisites: Accountancy Majors only and 105 credit hours completed and ACCTCY 3326 and ACCTCY 3328 and ACCTCY 3346 and ACCTCY 3347 and ACCTCY 4353, and GPA of 3.0 or higher

ACCTCY 7000: Accountancy Professional Speakers and Symposia

(cross-leveled with ACCTCY 4000). This non-credit course, recommended for all accountancy majors, will provide exposure to issues in the accounting profession through professional speaker series and symposia. Components will include the Dawdy Speaker Series, Orin Ethics Symposium, and Symposia delivered by accounting firms and/or professional accounting organizations. This will be a non-credit, non-billed, no hours course. Graded on S/U basis only.

Credit Hours: 0

Prerequisites: Accountancy Majors

ACCTCY 7310: Accounting for Managers

Introduction to understanding how accounting information is used to help make informed decisions in various business settings. Includes an introduction to basic financial and management accounting concepts and procedures.

Credit Hours: 3

Prerequisites: MBA or MSPA candidate, or departmental consent

ACCTCY 7353: Introduction to Taxation

(cross-leveled with ACCTCY 4353). Introduction to the structure and conceptual foundation of the U.S. federal income tax system for individual taxpayers. Topics include income recognition, deductions, property transactions, trusts, and family wealth planning. This course also introduces students to legal tax research and preparation of individual income tax returns.

Credit Hours: 3

Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027. Restricted to accountancy majors only

ACCTCY 7356: Financial Accounting Concepts

(cross-leveled with ACCTCY 4356). Current issues in the financial reporting of business corporations to external parties. Not open to accountancy majors.

Credit Hours: 3

Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027 or ACCTCY 7310

ACCTCY 7365: Governmental Accounting and Budgeting

(cross-leveled with ACCTCY 4365). Introduction to government and not-for-profit accounting. Concepts and principles of fund accounting, budgeting, auditing, and financial reporting in government and not-for-profit entities.

Credit Hours: 3

Prerequisites: ACCTCY 3326. Restricted to Accountancy Majors

ACCTCY 7384: Auditing Theory and Practice I

(cross-leveled with ACCTCY 4384). Introduction to the auditing profession, assurance function, and generally accepted standards for conducting audits.

Credit Hours: 3

Prerequisites: ACCTCY 3328 and ACCTCY 3346. Restricted to Accountancy Majors

ACCTCY 7940: Professional Accounting Internship

(cross-leveled with ACCTCY 4940). Provides full-time professional accounting work experience of at least eight weeks duration. Graded on S/U basis only.

Credit Hour: 3-6

Prerequisites: Completion of undergraduate portion of 150 hour program (or equivalent) and consent of Internship Coordinator

ACCTCY 8358: Systems Analysis and Design

Modern information systems analysis and design, focusing on business process modeling.

Credit Hours: 3

Prerequisites: ACCTCY 2258

Recommended: CMP_SC 1001 or CMP_SC 1050

ACCTCY 8363: Multi-Jurisdictional Tax

This course takes a practical approach to exploring multistate and international tax concepts by focusing on tax issues that can arise as a company expands from a single business location into a multinational corporation. Part 1 of this course focuses on the economic, political, and constitutional constraints imposed on state and local taxation, including the due process clause, the commerce clause and state uniformity and equality clauses. Part 2 of the course includes a survey of state and local tax laws, with a particular emphasis on the imposition of sales and use taxes and the allocation and apportionment of state income taxes. Part 3 of the course surveys principals of international taxation, including U.S. taxation of the foreign investments or activities of U.S. taxpayers (outbound) and U.S. taxation of the U.S. activity or investments of foreign taxpayers (inbound).

Credit Hours: 3

Prerequisites: ACCTCY 4353. Restricted to Accountancy Majors

ACCTCY 8373: Taxation of Corporations and Shareholders

Life cycle of a corporation including formations, operations, distributions, and liquidations of corporations.

Credit Hours: 3

Prerequisites: ACCTCY 4353 or ACCTCY 7353. Restricted to Accountancy Majors

ACCTCY 8383: Taxation of Flow-Through Entities

This course covers formations, operations, distributions, and liquidations of partnerships and S-Corporations. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 4353 or ACCTCY 7353. Restricted to Accountancy Majors

ACCTCY 8393: Taxation of Trust, Gifts and Estates

This course covers two main topics. Students are introduced to the construction, operation and income taxation of trusts. After this portion of the course students will learn about the gift tax consequences of completed exchanges. Finally, students will learn the basic rules regarding the estate tax. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 4353 or ACCTCY 7353. Restricted to Accountancy Majors

ACCTCY 8401: Topics in Accounting

Independent investigations, reports on approved topics.

Credit Hour: 1-3

Prerequisites: instructor's consent

ACCTCY 8404: Internal Auditing

This course covers the concepts, practices, and application of internal audit activities. The course will review the entire internal audit process including annual audit and engagement planning, fieldwork, reporting, and management communication. Other topics including internal controls, enterprise risk management, and key behavior skills will be discussed. The Professional Practices Framework and industry best practices will be

incorporated throughout the semester. This course will prepare students for entry-level internal audit positions. Graded A-F only.

Credit Hours: 3

Prerequisites: ACCTCY 4384 or ACCTCY 7384. Restricted to Accountancy Majors

ACCTCY 8408: Advanced Accounting Information Systems

Emerging concepts and technologies in accounting information systems, with an emphasis on E-Business. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 3328. Restricted to Accountancy Majors

ACCTCY 8414: Information Systems Assurance and Control

A combination of control theory, concept application, demonstration of actual practice, and student research to develop an understanding of the concepts and practices used in the design, development or assurance of information systems (IS) controls. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 3328, and ACCTCY 4384 or ACCTCY 7384. Restricted to Accountancy Majors

ACCTCY 8419: International Accounting

Introduction to accounting regulations and practices outside of the U.S., accounting regulations for foreign registrants on the NYSE and NASDAQ, international accounting standards and international management control issues. Review of cultural frameworks; transfer pricing methods and international accounting standards.

Credit Hours: 3

Prerequisites: ACCTCY 3346 and ACCTCY 3347. Restricted to Accountancy Majors

ACCTCY 8423: Tax Research and Planning

Applied tax research using print and electronic data bases; heuristic biases in tax judgments; responsibilities of professional tax practices.

Credit Hours: 3

Prerequisites or Corequisites: ACCTCY 8373

Prerequisites: Restricted to Accountancy Majors

ACCTCY 8424: Fraud Examination

A study of the methods and techniques of fraud examination, particularly with regard to frauds perpetrated by the company against the public. The ethical and professional standards that underlie the accountant's responsibility for fraud detection and prevention are emphasized. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 4384 or ACCTCY 7384. Restricted to Accountancy Majors

ACCTCY 8425: Accounting for Governments and Other NonProfit Entities

Role of accounting information in planning, managing, and controlling nonbusiness organizations; reporting to external parties; concepts of governmental auditing. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 4365 or ACCTCY 7365 or instructor's consent. Restricted to Accountancy Majors

ACCTCY 8428: Data Warehousing and Data Mining

Enterprise-wide view of data and transaction processing. Concepts and techniques of data warehousing and data mining of business-critical data. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 3328 or departmental consent. Restricted to Accountancy Majors

ACCTCY 8433: Mergers and Acquisitions Taxation

This course covers the basic taxation of mergers and acquisitions, both taxable and tax-free acquisitions; issues in merger and acquisition deal making, such as due diligence and understanding contract tax provisions; and an overview of securities regulations with respect to publicly traded companies. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: ACCTCY 8373
Prerequisites: ACCTCY 4353

ACCTCY 8434: Applications of Auditing Concepts

Application of auditing concepts and techniques in various phases of audit engagements. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 4384. Restricted to Accountancy Majors

ACCTCY 8436: Financial Accounting Theory and Practice III

Continuation of ACCTCY 3346. Addresses a series of special financial accounting topics including income taxes, pensions, leases, business combinations, consolidated statements, and foreign currency translation. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 3346. Restricted to Accountancy Majors

ACCTCY 8437: Strategic Cost Analysis

Analysis to support organizational strategy including cost management, performance evaluation, and control of responsibility centers. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 3347, MATH 1320 and STAT 3500, or the equivalent. Restricted to Accountancy Majors

ACCTCY 8438: Forensic Accounting

Coverage of forensic accounting processes and tools used in the detection and prevention of fraud against the company. Topics include skimming, cash larceny, check tampering, billing schemes and others. An emphasis of the course will be upon the use of computer aids. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 3328, ACCTCY 4384 or ACCTCY 7384. Restricted to Accountancy Majors

ACCTCY 8444: Advanced Audit

The Advanced Auditing course helps students develop a better understanding of the audit environment and gives them the opportunity to gain hands-on experience planning for an audit engagement, performing test work, and completing an audit engagement. The course also addresses additional topics not covered in detail in the Audit Theory and Practice I course, including inventory observation, legal liability issues faced by auditors today, the regulatory environment, professional responsibilities of auditors, preparing appropriate documentation for audit engagements, providing required communications to clients, and performing Single Audits. The course is designed to encourage open discussions of cases and current issues and provide learning opportunities for the students. The class meetings and assignments are designed to improve the student's critical thinking skills, communication skills, and team-building skills. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 4384 or ACCTCY 7384. Restricted to Accountancy Majors

ACCTCY 8446: Application of Financial Accounting Pronouncements

Development, content and application of authoritative pronouncements in financial accounting. Problems and case studies. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 8436. Restricted to Accountancy Majors

ACCTCY 8448: Emerging Issues in Accounting Information Systems

Current developments in the implementation of accounting information systems. Topics may vary. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 8408. Restricted to Accountancy Majors

ACCTCY 8450: Accounting and Strategic Business Analysis

Capstone course in the Master of Accountancy program. Emphasis on case analysis to develop critical thinking and analytical skills in the use of accounting reports for broad-based business analysis. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 3346 or equivalent. Restricted to Accountancy Majors

ACCTCY 8453: Taxes and Business Strategies

This class examines the role taxes in business decisions. The analysis involved considers 1) tax consequences of all parties to a transaction, 2) both explicit and implicit taxes, and 3) tax as well as non-tax costs. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Accountancy Majors

ACCTCY 8456: Corporate Governance

Corporate governance has taken on new prominence in light of the accounting scandals of the early 2000's (e.g., Enron) and the new regulatory regime of Sarbanes-Oxley. As a result, corporations, investors, auditors, and others are paying more attention to corporate governance. This course will familiarize students with corporate governance

mechanisms and how they interact with financial reporting. This course should appeal to students pursuing careers in auditing, finance, management, as well as anyone seeking a deeper understanding of relations between financial reporting and corporate governance. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 8436. Restricted to Accountancy Majors

ACCTCY 8463: Partnership Taxation

Formations, operations, distributions, and liquidations of partnerships. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 4353 or 7353

ACCTCY 9090: Research in Accounting

Each student is under direction and guidance of an accountancy professor in writing a dissertation. Periodic seminars discuss research projects. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: doctoral candidacy and instructor's consent

ACCTCY 9401: Doctoral Research Problems in Accounting

Independent investigations, reports on approved topics. Restricted to Doctoral level students only

Credit Hour: 1-3

Prerequisites: instructor's consent and director's consent

ACCTCY 9444: Seminar in Auditing Research

The economic role of auditing; the audit process; audit reports and the consequences of auditing on financial statements; new audit directions and perspectives.

Credit Hours: 3

Prerequisites: doctoral candidacy or instructor's consent

ACCTCY 9455: Seminar in Governmental and Nonprofit Accounting

Critical review of the governmental and nonprofit accounting research literature, with emphasis on auditing issues and research methods.

Credit Hours: 3

Prerequisites: doctoral candidacy or instructor's consent. ACCTCY 4384 or ACCTCY 7384 and ACCTCY 4365 or ACCTCY 7365

ACCTCY 9457: Quantitative Methods in Accounting

Application of mathematics and statistics to managerial and financial accounting problems.

Credit Hours: 3

Prerequisites: ACCTCY 3347, MATH 1300 and MATH 1320 and STAT 3500, or instructor's consent

ACCTCY 9460: Research Methods in Accounting

Application of research methods to the investigation of current accounting issues. A research paper is required.

Credit Hours: 3

Prerequisites: doctoral candidacy or instructor's consent

ACCTCY 9466: Seminar in Financial Accounting Research

Theory of financial accounting and regulated disclosure; empirical tests of financial accounting theory, with emphasis on the nature of the research question addressed, and the method used to address the research question.

Credit Hours: 3

Prerequisites: doctoral candidacy or instructor's consent

ACCTCY 9467: Seminar in Behavioral Accounting Research

Critical review of the Behavioral accounting research literature with emphasis on issues and research methods.

Credit Hours: 3

Prerequisites: doctoral candidacy and instructor's consent

ACCTCY 9468: Seminar in Information Systems Research

Overview of research related to advanced systems and how accounting information is processed, with emphasis on current issues and research methods.

Credit Hours: 3

Prerequisites: doctoral candidacy or instructor's consent

Aerospace Studies (AERO)

AERO 1100: The Foundations of the United States Air Force

Introduces the Air Force and Air Force ROTC. Topics include professional appearance, military customs and courtesies, core values, equal opportunity and treatment, officer opportunities, group leadership problems. Applies communicative skills. Leadership lab.

Credit Hours: 2

AERO 1200: The Foundations of the United States Air Force

Continues the introduction to the Air Force and Air Force ROTC. Topics include Air Force origins, organizations, major commands, installations, sister services (Army and Navy), group leadership problems. Applies communicative skills. Leadership lab.

Credit Hours: 2

AERO 2100: The Evolution of USAF Air and Space Power

A survey course designed to facilitate the transition from Air Force ROTC cadet to Air Force ROTC officer candidate. Explores Air Force heritage, Air Force leaders and Air Power doctrine. Applies communicative skills. Leadership lab.

Credit Hours: 2

AERO 2200: The Evolution of USAF Air and Space Power

Continues the examination of air and space power from the Vietnam era through the present. Topics include the Vietnam War, the Persian Gulf War, and overseas contingency operations. Applies communicative skills. Leadership lab.

Credit Hours: 2

AERO 3100: Air Force Leadership Studies

An integrated leadership and management survey course emphasizing development of the individual as an Air Force leader. Special topics

include situational leadership, principle centered leadership, corrective supervision and counseling. Leadership lab.

Credit Hours: 3

AERO 3200: Air Force Leadership Studies

Air Force leadership principles are examined from the foundation developed in AERO 3100. Ethical decision making, personal core values, and character development are discussed. Military evaluation systems are outlined. Leadership lab.

Credit Hours: 3

AERO 4100: National Security Affairs/Preparation for Active Duty

Examines the national security process, regional studies, Air Force and joint doctrine. Special topics include the military as a profession and civilian control of the military. Continued emphasis on communicative skills. Leadership lab.

Credit Hours: 3

AERO 4200: National Security Affairs/Preparation for Active Duty

Examines civilian control of the military, officership, the military justice system, and current issues affecting military professionalism. Continued refinement of communicative skills. Leadership laboratory.

Credit Hours: 3

Agricultural Economics (AG_EC)

AG_EC 1010: Introduction to Agribusiness Management

Management concepts and techniques. Coordination of business activity, motivation, and decision-making approaches used by industry leaders in global food chain. Unique aspects of managing enterprises in the agriculture-food sector.

Credit Hour: 1

AG_EC 1011: Survey of Global Agribusiness

Economic, social and political forces and trends and the impact on U.S. and global agribusinesses. Global production, consumption trade, and investment patterns in agriculture-food sector. Developing management strategy in changing economic political environment.

Credit Hour: 1

AG_EC 1041: Applied Microeconomics

Introduction to the microeconomic principles and their application to decision-making in agribusinesses. Consumer decision analysis, producer goals and optimization and the market environment where they meet and trade. Applications to current issues. Students who complete AG_EC 1041 may not have credit for ECONOM 1014.

Credit Hours: 3

AG_EC 1042: Applied Macroeconomics

Introduction to macroeconomic principles and their application to agriculture-food sector and natural resource issues. Using macroeconomic principles in decision making and in evaluating national and regional economic problems and issues. Students who complete AG_EC 1042 may not have credit for ECONOM 1015.

Credit Hours: 3

AG_EC 2070: Environmental Economics and Policy

(same as ENV_ST 2070). Examines current environmental and natural resource issues using a systems perspective and key economic concepts. Explores connections between the environment and the economy based on problems at the local, national, and international levels.

Credit Hours: 3

Prerequisites: sophomore standing

Recommended: ENGLSH 1000

AG_EC 2123: Quantitative Applications in Agricultural Economics

Familiarize students with the use of calculus and other quantitative tools in developing and analyzing fundamental economic concepts.

Credit Hours: 3

Prerequisites: AG_EC 1041 or ECONOM 1014 and MATH 1400

AG_EC 2156: Introduction to Environmental Law

Environmental issues from a legal perspective, using current controversies from both the USA and other countries. Major environmental laws dealing with water, air, noise, endangered species, waste disposal, and land use.

Credit Hours: 3

AG_EC 2183: The Agricultural Marketing System

Analysis of marketing systems that transforms agricultural products into food products. Examines functions and institutions in marketing and distributing food from both micro and macro perspectives.

Credit Hours: 3

Prerequisites: AG_EC 1041 or ECONOM 1014

Recommended: AG_EC 1042 or ECONOM 1015

AG_EC 2223: Agricultural Sales

Principles of salesmanship in agricultural input and output markets; buyer motivations; time and territory management; communication models and techniques; planning and executing sales calls; after-sale service.

Credit Hours: 3

Prerequisites: AG_EC 1041 or ECONOM 1014

AG_EC 2225: Statistical Analysis

Elementary statistical inference. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: MATH 1100

AG_EC 2940: Practicum in Agricultural Economics

Off-campus integrated working and learning experience for departmental majors and minors. Application of economic concepts in business or government. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: Instructor's consent

AG_EC 3150: International Agribusiness

This course covers the primary factors that shape the business environment for food and agricultural firms conducting business across borders. The course examines how culture, institutions and public policy affect business operations and business strategies.

Credit Hours: 3

Prerequisites: AG_EC 2183

AG_EC 3224: New Products Marketing

Learning experience to develop skills in marketing new agriculture products. To include market analysis, goals and objectives, action plan, financial evaluation and monitoring and measurement. In small groups, students will develop complete marketing plan for a new product.

Credit Hours: 3

Prerequisites: AG_EC 1041 or ECONOM 1014

AG_EC 3230: Agricultural and Rural Economic Policy

Study and analysis of past and present government policies affecting agriculture and rural economy.

Credit Hours: 3

Prerequisites: AG_EC 1041 or ECONOM 1014 and AG_EC 1042 or ECONOM 1015

AG_EC 3241: Ethical Issues in Agriculture

The study of how economics, philosophy, and science inform on and impact important ethical problems in agriculture, such as the environment, biotechnology, animal welfare, farm structure, the role of agribusiness, development, sustainability, and agriculture-related public policy. Course may be repeated once for credit.

Credit Hours: 3

Prerequisites: AG_EC 1041 or ECONOM 1014 and junior standing

AG_EC 3256: Agribusiness and Biotechnology Law

Legal concepts applicable to agribusiness and biotech firms. To include contracts, torts, product liability, warranties, corporate farming laws, UCC, corporations/partnerships/limited liability companies, labor laws, patent copyrights/trademark laws, international and ethical perspectives.

Credit Hours: 3

AG_EC 3257: Rural and Agricultural Law

Everyday practical legal problems facing rural residents, farmers, agribusiness, and local government. Laws include statutes, common law (cases), customs, and administrative regulations. Topics include corporate/contract farming, right-to-farm, leases, fence laws, estate planning and water rights.

Credit Hours: 3

AG_EC 3260: General Farm Management

Economics and management principles applied to planning and operating farm businesses. Includes enterprise combination, resource acquisition, water management, profit maximizing techniques and annual adjustments to changing conditions.

Credit Hours: 3

Prerequisites: AG_EC 1041 or ECONOM 1014

AG_EC 3270: Conservation and Use of Protected Areas

Evaluation of socioeconomic, cultural and ecological values influencing the development and management of protected areas including parks, forests, wildlife refuges, wilderness and wild/scenic rivers.

Credit Hours: 3

Prerequisites: AG_EC 1041 or ECONOM 1014 and AG_EC 2070

Recommended: Introductory natural resources courses

AG_EC 3271: International Agricultural Development

Examines world food problem; analyzes its causes; economic and noneconomic policy alternatives for modernizing agriculture in less-developed countries.

Credit Hours: 3

Prerequisites: AG_EC 1041 or ECONOM 1014 and AG_EC 1042 or ECONOM 1015

Recommended: junior standing

AG_EC 3272: International Food Trade and Policy

Examines food trade; develops economic analyses of trade impacts on domestic agricultural policies; examines international trade agreements; and interface of trade and environment.

Credit Hours: 3

Prerequisites: AG_EC 1041 or ECONOM 1014 and AG_EC 1042 or ECONOM 1015

AG_EC 3282: Agribusiness Finance

Application of the concepts and methods of finance to the management of agribusiness firms, including cooperatives. Special attention is given to the working capital needs of agribusiness and to the specialized lending institutions in the agricultural economy.

Credit Hours: 3

Prerequisites: AG_EC 1041 or ECONOM 1014 and ACCTCY 2036 or ACCTCY 2026

Recommended: ACCTCY 2037 or ACCTCY 2027

AG_EC 3283: Fundamentals of Entrepreneurship

Introduce students to entrepreneurial way of thinking. Entrepreneurship is a way of thinking about identifying/creating opportunities and transforming those opportunities into new businesses, new institutions, or solutions to problems. Students will participate in the process of formulating and evaluating solutions to problems and identifying and exploiting opportunities.

Credit Hours: 3

Prerequisites: AG_EC 1041 or ECONOM 1014 and ACCTCY 2036 or ACCTCY 2026

AG_EC 3285: Problems in Agricultural Economics

Supervised study in a specialized phase of agricultural economics. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: instructor's consent

AG_EC 3286: Economics of Managerial Decision Making

Introduces tools and concepts from price theory, game theory, industrial organization and organizational economics, and applies them to managerial decision making activities for businesses in the agrifood system and for natural resource and environmental management.

Credit Hours: 3

Prerequisites: AG_EC 2123 and AG_EC 2183

AG_EC 3294: Agricultural Marketing and Procurement

Content of course focuses on marketing issues in the agriculture supply chain. Topics covered include price discovery, basis, futures/options, contracting, logistics, and management decision making.

Credit Hours: 3

Prerequisites: AG_EC 2183

Recommended: AG_EC 2225 or STAT 2500

AG_EC 3295: Real Money: Speculative Trading for Beginners

Familiarize students with the learning components of commodity future/option trading. Students learn through involvement by investing in a commodity pool and trading futures/options. Students apply both fundamental and technical analysis. Students taking this course are required to invest from \$100 to \$300 in \$100 increments.

Credit Hours: 3

Prerequisites: AG_EC 2183

Recommended: AG_EC 3294

AG_EC 3296: In the Money with Options Trading

This online course focuses on learning the basics of trading options market contracts. Students will be investing/contributing members of the University of Missouri Educational Marketing Club. Students will be introduced to principles of price forecasting using technical and fundamental analysis and will study a variety of trading strategies.

Credit Hours: 2

Prerequisites: AG_EC 3295

Recommended: AG_EC 3294

AG_EC 3297: Technical Trading Tactics

Learn the tactics of technical trading through student investment and commodity futures contracts. Technical Trading Tactics will provide students with tools to support trade recommendations based on technical analysis. Each student invests real money as a learning incentive and will complete one trade recommendation during the course.

Credit Hour: 1

Prerequisites: AG_EC 3295

Recommended: AG_EC 3294

AG_EC 3321: Economic History of Agriculture

Emphasizes Europe and U.S. historical interpretation; usefulness in evaluating present and probable future developments in agriculture.

Credit Hours: 3

Prerequisites: AG_EC 1041 or ECONOM 1014

AG_EC 3383: Rural Entrepreneurship II

Rural Entrepreneurship II is designed for students that realize they may need to create their own career or opportunity if they want to

return to their rural community and for students who would like to better understand how to create that option in their career choice set.

Credit Hours: 3

Prerequisites: AG_EC 3283

AG_EC 4110: In-Service Course in Agricultural Economics

(cross-leveled with AG_EC 7110). A. Profit Maximizing Principles B. Farm Planning C. Farm Records and Analysis D. Business Management E. Using Computers in Farm Management Decision Making. Basic principles of farm management. Applications of principles and subject matter in successful classroom presentation primarily for high school teachers. Course is offered in sections A-E as listed, for 2 hours each.

Credit Hour: 2-10

Prerequisites: instructor's consent. Recommended AG_EC 3260

AG_EC 4230: Understanding the Agricultural Policy Process

The goal of this course is to prepare students for a career in agricultural policy and will build the skill set needed in the agricultural policy environment.

Credit Hours: 3

Prerequisites: AG_EC 3230

AG_EC 4251: Agricultural Prices

(cross-leveled with AG_EC 7251). Variations in prices of agricultural products; underlying factors.

Credit Hours: 3

Prerequisites: AG_EC 2123 and AG_EC 2225 or STAT 2500

AG_EC 4295: Agricultural Risk Management

(cross-leveled with AG_EC 7295). This class will examine the range of risks business face and explore ways of characterizing and evaluating those risks.

Credit Hours: 3

Prerequisites: AG_EC 2183 and AG_EC 2225 or STAT 2500

AG_EC 4301: Topics in Agricultural Economics

Current and new topics not currently offered in applied and/or theoretical areas in Agricultural Economics.

Credit Hour: 1-6

AG_EC 4301H: Topics in Agricultural Economics

Current and new topics not currently offered in applied and/or theoretical areas in Agricultural Economics.

Credit Hour: 1-6

Prerequisites: honors eligibility required

AG_EC 4310: Local Economic Analysis

(cross-leveled with AG_EC 7310). Economic based theory, including multipliers and how local economies are affected by external events. Methods for local economic analysis: trends, location quotients, shift-share, and retail analyses.

Credit Hour: 1

Prerequisites: Instructor's consent

AG_EC 4340: Rural Real Estate Appraisal

(cross-leveled with AG_EC 7340). Principles, techniques, practices of rural real estate appraisal. Field trips.

Credit Hours: 3

Recommended: AG_EC 3260

AG_EC 4356: Environmental Law and Policy

Legislative, administrative, and common law dealing with the environment. Introduces the fundamental concepts and classic issues underlying the body of law and policy dealing with the environment. Includes air and water quality, endangered species preservation, land use, and waste disposal.

Credit Hours: 3

Prerequisites: instructor's consent. Recommended AG_EC 3256, senior or graduate standing. For non-law students

AG_EC 4940: Internship Opportunities

Combines study, observation, and employment in a public agency or private firm in marketing, farm management, or credit. Staff supervision and evaluation. Reports required.

Credit Hour: 1-3

Prerequisites: instructor's consent

Recommended: 75 hours completed

AG_EC 4962: Planning the Farm Business

(cross-leveled with AG_EC 7962). Economic analysis and planning of the farm business and its organization. Applications of computerized management techniques to farm business including resource acquisition, tax management, enterprise analysis, and business analysis through farm records and budgets.

Credit Hours: 3

Prerequisites: AG_EC 3260

AG_EC 4971: Agribusiness Management Strategy

(cross-leveled with AG_EC 7971). Analysis of industry forces in agriculture and food sector. Assessing risks and firms' capabilities. Development of firm's competitive strategy, including vertical integration, diversification, international business option, and financial planning and performance measurement.

Credit Hours: 3

Prerequisites: AG_EC 3282 or FINANC 3000 and AG_EC 3286 or MANGMT 3000

AG_EC 4972: Agri-Food Business and Cooperative Management

(cross-leveled with AG_EC 7972). Risk management in the global agrifood chain, including managing the unique uncertainties of biological production processes, global market analysis, and government intervention, of risk management tools and institutions unique to strategic decision making in agribusiness and cooperative firms.

Credit Hours: 3

Prerequisites: AG_EC 4971 and AG_EC 3286 or MANGMT 3000

Recommended: AG_EC 3256

AG_EC 4983: Strategic Entrepreneurship in Agri-Food

Strategic entrepreneurship is the search for opportunities to generate income streams from innovation, development of new markets, and altering the rivalry positions in existing markets.

Credit Hours: 3

Prerequisites: AG_EC 3383 and AG_EC 3282 or FINANC 3000

Recommended: senior standing and AG_EC 3257

AG_EC 4990: Economic Analysis of Policy and Regulation

(cross-leveled with AG_EC 7990). Apply economic concepts and tools to analyze the policy-making process and the implications of policy for individuals, firms, markets and society. Policy topics include, among other things, agricultural support programs, environmental policy, international trade, international development, and agribusiness regulation.

Credit Hours: 3

Prerequisites: AG_EC 4251

Recommended: ECONOM 4351

AG_EC 4995: Economics of Agricultural Production and Distribution

(cross-leveled with AG_EC 7995). Applies economic principles to agricultural production including price theory, linear programming and uncertainty.

Credit Hours: 3

Prerequisites: ECONOM 3251 and AG_EC 2225 or STAT 2500

AG_EC 7110: In-Service Course in Agricultural Economics

(cross-leveled with AG_EC 4110). A. Profit Maximizing Principles B. Farm Planning C. Farm Records and Analysis D. Business Management E. Using Computers in Farm Management Decision Making. Basic principles of farm management. Applications of principles and subject matter in successful classroom presentation primarily for high school teachers. Course is offered in sections A-E as listed, for 2 hours each. Prerequisites:

Credit Hour: 2-10

Prerequisites: instructor's consent. Recommended AG_EC 3260

AG_EC 7251: Agricultural Prices

(cross-leveled with AG_EC 4251). Variations in prices of agricultural products; underlying factors.

Credit Hours: 3

Prerequisites: AG_EC 2123 and AG_EC 2225 or STAT 2500

AG_EC 7295: Agricultural Risk Management

(cross-leveled with AG_EC 4295). This class will examine the range of risks businesses face and explore ways of characterizing and evaluating those risks.

Credit Hours: 3

Prerequisites: AG_EC 2183 and AG_EC 2225 or STAT 2500

AG_EC 7301: Topics in Agricultural Economics

Current and new topics not currently offered in applied and/or theoretical areas in Agricultural Economics.

Credit Hour: 1-6

AG_EC 7310: Local Economics Analysis

(cross-leveled with AG_EC 4310). Economic based theory, including multipliers and how local economies are affected by external events. Methods for local economic analysis: trends, location quotients, shift-share, and retail analyses. On-line course.

Credit Hour: 1

AG_EC 7340: Rural Real Estate Appraisal

(cross-leveled with AG_EC 4340). Principles, techniques, practices of rural real estate appraisal. Field trips.

Credit Hours: 3

Recommended: AG_EC 3260

AG_EC 7356: Environmental Law and Policy

Legislative, administrative, and common law dealing with the environment. Introduces the fundamental concepts and classic issues underlying the body of law and policy dealing with the environment. Includes air and water quality, endangered species preservation, land use, and waste disposal.

Credit Hours: 3

Prerequisites: For non-law students. Recommended AG_EC 2156, AG_EC 3256 or AG_EC 3257

AG_EC 7940: Internship Experiences in Agricultural Economics

Combines study, observation, and employment in a public agency or private firm in marketing, farm management, or credit. Staff supervision and evaluation. Reports required. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: 2.5 GPA; 75 hours of course work and instructor's consent

AG_EC 7962: Planning the Farm Business

(cross-leveled with AG_EC 4962). Economic analysis and planning of the farm business and its organization. Applications of computerized management techniques to farm business including resource acquisition, tax management, enterprise analysis, and business analysis through farm records and budgets.

Credit Hours: 3

Prerequisites: AG_EC 3260

AG_EC 7971: Agribusiness Management Strategy

(cross-leveled with AG_EC 4971). Analysis of industry forces in agriculture and food sector. Assessing risks and firms capabilities. Development of firm's competitive strategy, including vertical integration, diversification, international business option, and financial planning and performance measurement.

Credit Hours: 3

Prerequisites: AG_EC 3282 or FINANC 3000 and AG_EC 3286 or MANGMT 3000

AG_EC 7972: Agri-Food Business and Cooperative Management

(cross-leveled with AG_EC 4972). Risk management in the global agrifood chain, including managing the unique uncertainties of biological production processes, global market analysis, and government

intervention, of risk management tools and institutions unique to strategic decision making in agribusiness and cooperative firms.

Credit Hours: 3

Prerequisites: AG_EC 4971 and AG_EC 3286 or MANGMT 3000

Recommended: AG_EC 3256

AG_EC 7990: Economic Analysis of Policy and Regulation

(cross-leveled with AG_EC 4990). Apply economic concepts and tools to analyze the policy-making process and the implications of policy for individuals, firms, markets and society. Policy topics include, among other things, agricultural support programs, environmental policy, international trade, international development, and agribusiness regulation.

Credit Hours: 3

Prerequisites: AG_EC 4251

Recommended: ECONOM 4351

AG_EC 7995: Economics of Agricultural Production and Distribution

(cross-leveled with Applies economic principles to agricultural production including price theory, linear programming and uncertainty. Prerequisites:

Credit Hours: 3

Prerequisites: ECONOM 3251 and AG_EC 2225 or STAT 2500

AG_EC 8001: Advanced Topics in Economics

Analyzes economic logic problems. Current agricultural economic problems.

Credit Hours: 3

AG_EC 8010: Research Methodology

Students explore the roles of theory and methods in economics research, develop a program of research, and critique published research. Students also study the scientific methods and the research process, including problem definition, research design, data collection and analysis, and generalization.

Credit Hours: 3

AG_EC 8024: Advanced Production Economics

Production function analyses and advanced theory of the firm as applied to agricultural production problems. Concepts of input demand, production supply, quality, time and technology, dynamic analysis and production under uncertainty.

Credit Hours: 3

Prerequisites: MATH 1500, AG_EC 4995; ECONOM 8451; STAT 4510 or ECONOM 8472

AG_EC 8050: Economics of Institutions and Organizations

This course expands upon the fundamental principles of neo-classical economics by relaxing traditional behavioral and informational assumptions and by introducing the importance of transaction costs and institutions for economic analysis.

Credit Hours: 3

AG_EC 8060: Mathematical Modeling for Social Scientist

Introduction to mathematical programming, emphasizing problem formulation and solution interpretation. Computer applications are stressed.

Credit Hours: 3

Prerequisites: STAT 4510

AG_EC 8085: Masters Problems in Agricultural Economics

Supervised study, research in specialized phases of agricultural economics.

Credit Hour: 1-99

AG_EC 8087: Seminar in Agricultural Economics

Lectures, reports on economic problems in agriculture.

Credit Hour: 1

AG_EC 8090: Masters Thesis Research in Agricultural Economics

Independent investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.

Credit Hour: 1-6

AG_EC 8210: Theory of Markets

Development of theories of monopolistic, monopolistic competition; application to agricultural markets. Market structure influence on price, nonprice competition in buying, selling of farm products and inputs.

Credit Hours: 3

Prerequisites: ECONOM 7351

AG_EC 8350: Regional Development Issues and Analysis

(same as PUB_AF 8350). Examines theories of regional growth and development and methods for analysis with applications to current policy issues. Topics include firm location, new economic geography and agglomeration theory, clusters, human capital, migration, social capital, tax and development incentives, and sustainable regional development.

Credit Hours: 3

Prerequisites: ECONOM 7351 or PUB_AF 8190 or equivalent

AG_EC 8410: Natural Resource and Environmental Economics

Contemporary natural resource/environmental problems; natural resource capacity, alternative economic theories, property rights, externalities, market failures, efficient use of exhaustible and renewable resources, and economics of environmental pollution.

Credit Hours: 3

Prerequisites: ECONOM 7351

AG_EC 8430: International Agricultural Development Policy

An analytical review of economic policies directed toward stimulating agricultural development in the world's low income countries.

Credit Hours: 3

Prerequisites: ECONOM 7351 and ECONOM 7353

AG_EC 8448: Society and Ecosystems Research Seminar

(same as RU_SOC 8448 and NAT_R 8448). This seminar, capstone for the Graduate Certificate Program in Society and Ecosystems, exposes

students to interdisciplinary research on interactions between social, economic and ecological systems.

Credit Hours: 3

AG_EC 8450: Masters Non Thesis Research

Independent investigation of advanced nature. Report required.

Credit Hour: 1-6

AG_EC 8520: Economics of Transaction and Contracting

This course focuses on the economic incentives underlying transaction relationships and develops and implements a framework for analyzing contract documents governing various kinds of transactions.

Credit Hours: 3

AG_EC 8610: Economic and Sociological Approaches to Collective Action

(same as RU_SOC 8610). This course identifies analytical and methodological tools, including rational choice and social capital, to deal with practical problems of collective action in: agricultural cooperatives, rural community development, political interest groups and other mutuals.

Credit Hours: 3

Prerequisites: AG_EC 7972

AG_EC 8860: International Comparative Rural Policy

(same as PUB_AF 8860). Compares the rural policy objectives and implementation strategies of various countries, and assesses these policies in terms of economic, social, environmental outcomes and their implications for international relations. Includes 2-weeks of study Abroad. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

AG_EC 9001: Advanced Topics in Economics II

Analyzes economic logic problems. Current agricultural economic problems.

Credit Hours: 3

AG_EC 9040: Advanced Microeconomics Theory and Applications I

First semester course that rigorously examines the microeconomic theory of producer and consumer behavior, combined with applications of the theoretical concepts to empirical economic research on agricultural, business, development, and environmental issues. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECONOM 7351 or instructors consent

AG_EC 9042: Advanced Microeconomics Theory and Applications II

Second semester advanced micro theory covering choice under uncertainty, industry structure, game theory, information econ, and political economy of regulation. Includes applications of micro models to issues in agricultural, natural resource, and development sectors.

Credit Hours: 3

Prerequisites: AG_EC 9040

AG_EC 9085: Doctoral Problems in Agricultural Economics

Supervised study, research in specialized phases of agricultural economics.

Credit Hour: 1-99

Prerequisites: instructor's consent

AG_EC 9090: Doctoral Dissertation Research in Agricultural Economics

Independent investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

AG_EC 9220: Advanced Price Analysis

Applies economic theory and quantitative methods to analyze agricultural price issues. Examines problem formulation, estimation, and model evaluation applied to demand and supply situations.

Credit Hours: 3

Prerequisites: ECONOM 8451 or ECONOM 8472; STAT 4510

AG_EC 9230: Welfare and Consumption Economics

Introduces welfare economic principles; application to problems of resource allocation. Appraises economic policies, programs; consumers' choice; measurement of consumption; living standards; household decisions and markets relation.

Credit Hours: 3

Prerequisites: ECONOM 8451 or instructor's consent

AG_EC 9265: Food, Agricultural and Rural Policy

Application of welfare economics theory to food, agricultural and rural development policy analysis. Historical perspective and economics analysis of contemporary issues in national and international policy and institutions.

Credit Hours: 3

Prerequisites: ECONOM 7351 and AG_EC 9230

AG_EC 9320: Regional Economic Theory and Methods

Theory of spatial economics: Central place theory, spatial labor markets, location theory, social accounting matrices, input-output, computable general equilibrium, geographic information systems and regional econometric models.

Credit Hours: 3

Prerequisites: ECONOM 7351, ECONOM 7353, and matrix algebra

AG_EC 9475: Econometrics I

Emphasis is given to special estimation problems which occur in integrating the theory with various types of economic data.

Credit Hours: 3

AG_EC 9476: Econometrics II

(same as ECONOM 9476).

Credit Hours: 3

AG_EC 9510: Economics of Agribusiness Firm

This course builds on transaction cost-based theories and tools to study the economic underpinnings of intra-firm organization, firm boundaries, and the structure of inter-firm transactions.

Credit Hours: 3

Prerequisites: AG_EC 8050

AG_EC 9520: Economics of Agribusiness Markets

Relationships of neoclassical and new institutional economics to designing organizational strategy and structure. Internal coordination and structure, organizational boundaries, and competitiveness and sustainability of food system organizations.

Credit Hours: 3

Prerequisites: AG_EC 8050

Agricultural Systems Management (AG_S_M)

AG_S_M 1002: Topics in Agricultural Systems Management-Biological/Physical/Math

Current and new technical developments in agricultural systems management.

Credit Hours: 3

Prerequisites: Instructor's consent

Recommended: 6 hours in AG_S_M or instructor's consent

AG_S_M 1020: Introduction to Agricultural Systems Management

Introductory course that acquaints students with the general technical areas of Agricultural Systems Management. A systematic problem-solving approach is applied to problems derived from each of the technical areas within Agricultural Systems Management .

Credit Hours: 3

AG_S_M 1040: Physical Principles for Agricultural Applications

Introductory survey course to help students: formulate problems; understand units/accuracy; learn basic definitions; understand simple machines, power transmission, fluid statics, electricity, heat-flow, and temperature/moisture relationships.

Credit Hours: 3

Prerequisites: MATH 1100

AG_S_M 1120: Agricultural/Industrial Materials and Processes

Structure and properties of manufacturing materials; conditioning and machining materials; assembling processes; finishing processes; automation of manufacturing systems.

Credit Hours: 3

AG_S_M 2002: Topics in Agricultural Systems Management-Biological/Physical/Math

Current and new technical developments in agricultural systems management.

Credit Hours: 3

Prerequisites: Instructor's consent

Recommended: 6 hours in AG_S_M or instructor's consent

AG_S_M 2020: Environmental Ethics in Agriculture

Influence of agricultural technology and production practices on environmental quality. Stewardship concepts. Long-term vs. short-term consequences. Development of a scientifically sound ethic toward agricultural production.

Credit Hours: 3

Prerequisites: ENGLSH 1000

AG_S_M 2220: Agricultural/Industrial Structures

A building science course looking at construction materials, structural component selection, ventilation, moisture control and energy use. Math reasoning proficiency course.

Credit Hours: 3

Prerequisites: MATH 1100

Recommended: AG_S_M 1040

AG_S_M 2320: Internal Combustion Power

Basic internal combustion engine principles, mechanisms, combustion cycles, fuels, fuel injection, electrical systems, engine testing.

Credit Hours: 3

Prerequisites: AG_S_M 1040

AG_S_M 2340: Pesticide Application Equipment

Principles of pesticide application; sprayer hydraulics and spray atomization; calibration, mixing calculations and compatibility of tank mixes; personal and environmental protection; pesticide labels and regulations. Students earn their private applicators license.

Credit Hours: 3

Prerequisites: MATH 1100 or instructor's consent

AG_S_M 2345: Chemical Application Systems

Systems, components and operation practices used in the chemical application industry. Liquid and granular application systems and respective components will be studied along with procedures for minimizing drift, system calibration, recommended maintenance, and off-season storage procedures.

Credit Hour: 2-3

Prerequisites: MATH 1100 or equivalent

AG_S_M 2360: Fluid Power

Basic power hydraulic theory. Hydraulic systems, components and circuits. Math reasoning proficiency course.

Credit Hours: 3

Prerequisites: MATH 1100

AG_S_M 3350: Problems in Agricultural Systems Management

Supervised independent study at the undergraduate level.

Credit Hour: 1-5

Prerequisites: instructor's consent

AG_S_M 4020: Agricultural Safety and Health

Analysis, organization and implementation of agriculture safety and health programs. Physical and economic impact of accidents, standards and liabilities. Role of man in the man-machine system.

Credit Hours: 3

Prerequisites: junior or senior standing or instructor's consent

AG_S_M 4120: Advanced Agricultural/Industrial Materials and Processes

(cross-leveled with AG_S_M 7120). Primarily for students majoring in agricultural education. Applies shop principles to the design and construction of projects.

Credit Hour: 2-3

Prerequisites: instructor's consent

AG_S_M 4140: Electricity: Wiring and Equipment

(cross-leveled with AG_S_M 7140). Home and agricultural electricity; emphasis on proper selection and use of electrical wiring materials and equipment. Basic electrical theory.

Credit Hours: 3

Prerequisites: MATH 1100

AG_S_M 4145: Sensors and Control Systems for Agri-Industries

This course helps one understand sensors including performance, data acquisition systems and selection. In addition, introduction to programmable logic controllers, ladder-rung diagram programming, fluid flow rate, and associated analysis is discussed.

Credit Hours: 2

Prerequisites: AG_S_M 1040 and AG_S_M 4140; junior standing required

AG_S_M 4150: Biorenewable Systems Technology

Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation and logistics, and marketing.

Credit Hours: 3

Prerequisites: MATH 1100, CHEM 1100 and AG_EC 1041

AG_S_M 4220: Material Handling and Conditioning

(cross-leveled with AG_S_M 7220). Principles required for processing and handling food and feed materials; selection of machines; analysis and development of systems for processing and handling grain and bulk material.

Credit Hours: 3

Prerequisites: MATH 1100, AG_S_M 1040 and junior standing

AG_S_M 4225: Preservation of Grain Quality

Principles and management for grain quality preservation. Grain drying and grain storage. Psychrometrics. Fan and airflow. Grain handling methods and system planning. Grain quality measurement and end-use value analysis.

Credit Hours: 2

Prerequisites: MATH 1100 or equivalent

AG_S_M 4320: Agricultural Equipment and Machinery

(cross-leveled with AG_S_M 7320). Operation of agricultural machinery. Selection and management of equipment.

Credit Hours: 3

Prerequisites: AG_S_M 1040

AG_S_M 4330: Principles for Food Processing

(same as F_S 4330; cross-leveled with F_S 7330, AG_S_M 7330). Introduction to basic engineering concepts used to process raw materials. Principle topics include energy and material balance, fluid flow, heat transfer, refrigeration and freezing, and preservation.

Credit Hours: 3

Prerequisites or Corequisites: Instructor's Consent

Prerequisites: MATH 1100, AG_S_M 1040 or PHYSICS 1210

AG_S_M 4350: Problems in Agricultural Systems Management

Supervised independent study at the undergraduate level.

Credit Hour: 1-5

Prerequisites: instructor's consent

AG_S_M 4360: Precision Agriculture Science and Technology

(same as PLNT_S 4360, SOIL 4360; cross-leveled with AG_S_M 7360, PLNT_S 7360, SOIL 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

Credit Hours: 3

Prerequisites: PLNT_S 2100 or SOIL 2100, or PLNT_S 2110, or instructor's consent

AG_S_M 4365: Machinery Management Using Precision Agriculture Technology

Planters, combines, fertilizer application equipment, and sprayer management along with GPS technologies are the focus of the course. One will learn how to manage these tools efficiently and accurately. Valuable precision agriculture management skills emphasized.

Credit Hours: 3

Prerequisites: Junior standing required; Prefer AG_S_M 4360

AG_S_M 4366: Data Management and Analysis Using Precision Agriculture Technology

(cross-leveled with AG_S_M 7366). Course begins with a section on how to minimize errors while collecting spatial datasets. Datasets may include yield data, soil chemical and physical properties with real-time sensors, and soil nutrient data from grids or management zones. The course then continues with a section regarding data analytical techniques such as interpolation. The second half of the course will focus on writing prescriptions based on actual data obtained from industry leader experts. This portion of the course will integrate industry experts as well as hardware/software tools. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AG_S_M 4360 or PLNT_S 4360 or SOIL 4360 and AG_S_M 4365

AG_S_M 4368: Profit Strategies Using Precision Agriculture Technology

(cross-leveled with AG_S_M 7368). Course begins with section on how Precision Agriculture Technology can be used to benefit a farm's financial sustainability. Discussion of various types of farm operations and currently available Precision Agriculture Technology that is already developed and in use will be examined. The course continues by considering cost factors that create barriers for farm operators to adopt Precision Agriculture. The second half of the course will focus on developing a plan to implement various technologies into an existing farm operation and draft a business plan for cost, equipment, and transition the farm into using the following types of technologies, GPS, GIS, VRA, RS, RTK and other types of tracking and monitoring systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AG_S_M 4360 or PLNT_S 4360 or SOIL 4360 and AG_S_M 4365, instructor consent, or equivalent

AG_S_M 4370: In-Service Course Agriculture System Management-Farm Power and Machinery

A. Farm Power and Machinery B. Farm Buildings and Conveniences C. Soil and Water Management D. Rural Electrification and Processing E. Agricultural Construction and Maintenance Basic principles relating to agricultural systems management. Applies principles and subject matter in successful classroom presentation at the high school level.

Credit Hour: 1-8

Prerequisites: 10 credits from Agricultural System Management courses; a B.S. degree in Agriculture or instructor's consent

AG_S_M 4390: Optimization and Management of Food and Agricultural Systems

(same as F_S 4390 and HSP_MGMT 4390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.

Credit Hours: 3

Prerequisites: MATH 1100

AG_S_M 4420: Surface Water Management

(cross-leveled with AG_S_M 7420). Topics include hydrology; soil erosion precautions; elementary surveying; selection and layout of ponds, terraces and water control structures.

Credit Hours: 3

Prerequisites: MATH 1100

AG_S_M 4440: Water Quality and Pollution Control

Applies scientific principles to a variety of water quality problems arising from activities associated with nonpoint pollution, agricultural chemicals, land disposal of wastes, on-site sewage disposal and individual drinking water systems.

Credit Hours: 3

Prerequisites: MATH 1100 and junior standing

AG_S_M 4460: Irrigation and Drainage

Soil, water, plant relationships. Selection and layout of irrigation and drainage systems.

Credit Hours: 3

Prerequisites: AG_S_M 4420 or instructor's consent

AG_S_M 4940: Agricultural Systems Management Internship

Problem course following prior approved internship work experience. Problem selected by internship company representative, faculty problem advisor and student. Supervised by faculty problem advisor and presented in technical report form.

Credit Hour: 2-5

Prerequisites: Instructor's consent

AG_S_M 4970: Agricultural Systems Management - Capstone

Capstone course required of Agricultural Systems Management majors. Team project involving extensive use of the students education, oral presentations and comprehensive written reports are required. Class experiences include but may not be limited to system selection and comparison, replacement and operating cost calculations, life cycle costing, and business feasibility analysis.

Credit Hours: 3

Prerequisites: Senior Standing

AG_S_M 7001: Topics in Agricultural Systems Management

Initial offering of a course in a specific subject matter area related to Agricultural Systems Management. The course is offered when proposed by a faculty member in that area of expertise.

Credit Hours: 3

AG_S_M 7020: Agricultural Safety and Health

Analysis, organization and implementation of agriculture safety and health programs. Physical and economic impacts of accidents, standards and liabilities. Role of man in the man-machine system.

Credit Hours: 3

AG_S_M 7085: Problems in Agricultural Systems Management

Supervised individual study at the graduate level.

Credit Hour: 1-99

AG_S_M 7120: Advanced Agricultural/Industrial Materials and Processes

(cross-leveled with AG_S_M 4120). Primarily for students majoring in agricultural education. Applies shop principles to the design and construction of projects.

Credit Hour: 2-3

Prerequisites: instructor's consent

AG_S_M 7140: Electricity: Wiring and Equipment

(cross-leveled with AG_S_M 4140). Home and agricultural electricity; emphasis on proper selection and use of electrical wiring materials and equipment. Basic electrical theory.

Credit Hours: 3

AG_S_M 7220: Material Handling and Conditioning

(cross-leveled with AG_S_M 4220). Principles required for processing and handling food and feed materials; selection of machines; analysis and development of systems for processing and handling grain and bulk materials.

Credit Hours: 3

Prerequisites: MATH 1100 and AG_S_M 1040

AG_S_M 7320: Agricultural Equipment and Machinery

(cross-leveled with AG_S_M 4320). Operation of agricultural machinery. Selection and management of equipment.

Credit Hours: 3

Prerequisites: AG_S_M 1040

AG_S_M 7330: Principles for Food Processing

(same as F_S 7330; cross-leveled with AG_S_M 4330, F_S 4330). Introduction to basic engineering concepts used to process raw materials. Principle topics include energy and material balance, fluid flow, heat transfer, refrigeration and freezing, and preservation.

Credit Hours: 3

Prerequisites or Corequisites: Instructor's consent

Prerequisites: MATH 1100 and AG_S_M 1040 or PHYSCS 1210

AG_S_M 7340: Agricultural Mechanization Systems

Review of current literature. Case study of mechanization systems. Computer analysis of management alternatives.

Credit Hours: 3

AG_S_M 7360: Precision Agriculture Science and Technology

(same as PLNT_S 7360 and SOIL 7360; cross-leveled with AG_S_M 4360, PLNT_S 7360, SOIL 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

Credit Hours: 3

Prerequisites: SOIL 2100, PLNT_S 2110 or instructor's consent

AG_S_M 7365: Machinery Management Using Precision Agriculture Technology

This course focuses on agricultural equipment that is commonly used in conjunction with GPS technology. Planters, combines, fertilizer application equipment and sprayer application equipment are commonly equipped with GPS equipment to control and record operational parameters. These parameters focus around the equipments geographic location and can be recorded simultaneously with the volume of product applied and weather information (wind, temperature, humidity, etc.). GPS guidance is one of the main technologies to be studied throughout this course. The management of this equipment and the GPS technologies used to control and record this information is the focus of the course.

Credit Hours: 3

Recommended: AG_S_M 7360

AG_S_M 7366: Data Management and Analysis Using Precision Agriculture Technology

(cross-leveled with AG_S_M 4366). Course begins with a section on how to minimize errors while collecting spatial datasets. Datasets may include yield data, soil chemical and physical properties with real-time sensors, and soil nutrient data from grids or management zones. The course then continues with a section regarding data analytical techniques such as interpolation. The second half of the course will focus on writing prescriptions based on actual data obtained from industry leader experts. This portion of the course will integrate industry experts as well as hardware/software tools. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AG_S_M 7360, AG_S_M 7365, instructor consent, or equivalent

AG_S_M 7368: Profit Strategies Using Precision Agriculture Technology

(cross-leveled with AG_S_M 4368). Course begins with section on how Precision Agriculture Technology can be used to benefit a farm's financial sustainability. Discussion of various types of farm operations and currently available Precision Agriculture Technology that is already developed and in use will be examined. The course continues by considering cost factors that create barriers for farm operators to adopt Precision Agriculture. The second half of the course will focus on developing a plan to implement various technologies into an existing farm operation and draft a business plan for cost, equipment, and transition the farm into using the following types of technologies, GPS, GIS, VRA, RS, RTK and other types of tracking and monitoring systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: Instructor Consent

Prerequisites: AG_S_M 4360, AG_S_M 4365 or equivalent

AG_S_M 7370: In-Service Course Agriculture Systems Management-Farm Power and Machinery

A. Farm Power and Machinery B. Farm Buildings and Conveniences C. Soil and Water Management D. Rural Electrification and Processing E. Agricultural Construction and Maintenance Basic principles relating to agricultural systems management. Applies principles and subject matter in successful classroom presentation at the high school level.

Credit Hour: 1-8

Prerequisites: 10 credits from Agricultural Systems Management courses; a B.S. degree in Agriculture or instructor's consent

AG_S_M 7390: Optimization and Management of Food and Agriculture Systems

(same as F_S 7390 and HSP_MGMT 7390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.

Credit Hours: 3

Prerequisites: instructor's consent

AG_S_M 7420: Surface Water Management

(cross-leveled with AG_S_M 4420). Topics include hydrology; soil erosion precautions; elementary surveying; selection and layout of ponds, terraces and water control structures.

Credit Hours: 3

Prerequisites: MATH 1100

AG_S_M 7440: Water Quality and Pollution Control

Applies scientific principles to a variety of water quality problems arising from activities associated with nonpoint pollution, agricultural chemicals, land disposal of wastes, on-site sewage disposal and individual drinking water systems.

Credit Hours: 3

Prerequisites: MATH 1100

AG_S_M 7460: Irrigation and Drainage

Soil, water, plant relationships. Selection and layout of irrigation and drainage systems.

Credit Hours: 3

Prerequisites: AG_S_M 4420 or instructor's consent

AG_S_M 8085: Problems in Agricultural Systems Management

Supervised individual study at the graduate level.

Credit Hours: 3

AG_S_M 8090: Thesis Research in Agricultural Systems Management

Independent investigation to be presented as a thesis. Graded on a S/U basis only.

Credit Hour: 1-99

AG_S_M 8142: Agricultural Energy Efficiency

The study of the efficient use of energy concerning the planning, economics, and finance of efficient technology for livestock, crops, farm buildings including alternative energy resources, and associated environmental systems.

Credit Hours: 3

Prerequisites: AG_S_M 4140 or consent of instructor

AG_S_M 8340: Agricultural Mechanization Systems

Review of current literature. Case study of mechanization systems. Computer analysis of management alternatives.

Credit Hours: 3

AG_S_M 9090: Thesis Research in Agricultural Systems Management

Independent investigation to be presented as a thesis. Graded on a S/U basis only.

Credit Hour: 1-99

Agriculture, Food and Natural Resources (AFNR)

AFNR 1101: Special Topics in Agriculture

Selected topics not offered in other courses.

Credit Hour: 1-3

Prerequisites: instructor's consent

AFNR 1111: Computing and Information Systems I

Provide students with a basic understanding of microcomputer usage, electronic communications, and use of the internet. Topics include operating systems, word processing, database management systems, spreadsheets, electronic mail, online library searches, and the World Wide Web.

Credit Hours: 3

AFNR 1115: Foundations for College Success

An investigation of principles and practices associated with academic success and the interpersonal challenges encountered in collegiate life. Learning preferences, time investment, study skills, degree requirements, and personal development opportunities available in the College and across campus are explored. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: Instructor's consent

AFNR 1120: Computing and Information Technology

Provides students with a basic understanding of computer usage, electronic communications and use of the internet. Topics include understanding of operating systems, word processing, and presentation media.

Credit Hours: 2

Prerequisites: Restricted to freshmen and sophomores

AFNR 2115: College to Career: Strategies for Success

Systematic approach to self-assessment, career research and exploration, goal-setting and implementation of a career development plan. Students will learn specific skills, research knowledge and lifelong career management techniques.

Credit Hour: 1

AFNR 2120: Working with Data Using Excel

Provide students with a basic understanding of computer usage and spreadsheet applications.

Credit Hour: 1

AFNR 2150: Agricultural Travel Course

General travel course designed to broaden the perspective of agricultural students. Cost of course is borne by the student.

Credit Hour: 1-99

Prerequisites: instructor's consent

AFNR 2190: International Agriculture and Natural Resources

This course is designed to provide students with an introduction into the agriculture/natural resources of the host country. Activities may include course work at an international institution, professional and personal development and special projects. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-15

Prerequisites: instructor's consent

AFNR 2191: International Agriculture and Natural Resources - Humanities

This course is designed to provide students with an introduction to valuing and appreciating the culture and philosophy entrenched in the host country's civilization through the examination of its arts, culture, language and history. May be repeated for credit. Selected sections of the course may be offered on A-F or S/U basis only.

Credit Hour: 1-6

Prerequisites: Instructor's consent

AFNR 2192: International Agriculture/Natural Resources-Social Science

This course is designed to provide students with an examination of the social sciences of the host country; including the sociology, psychology, economics, government, and history of the country; including the dynamics of urban and rural communities. May be repeated for credit. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-6

Prerequisites: instructor's consent

AFNR 2215: Introduction to the Theory and Practice of Sustainable Agriculture

This experiential course provides an overview of the theoretical and practical principles of sustainable agriculture by exploring the holistic nature of sustainable agriculture, and analyzing agriculture systems based on their impact on the environment, economy and community.

Credit Hours: 3

AFNR 3115: Lifelong Career Management and Success Strategies

Systematic approach to understanding the importance of effective leadership in the professional world, obtaining transferable skills necessary in the work force, and understanding important aspects that allow one's career to grow over the course of one's professional life. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: junior standing or higher

AFNR 3215: Community Food Systems

Essential concepts in research, implementation and understanding of community food systems and macro-level global trends in food production and distribution will be discussed. Students will examine the social, economic and health implications of conventional and alternative food systems.

Credit Hours: 3

Recommended: AFNR 2215

AFNR 3315: Advanced Practices in Sustainable Agriculture

Course furthers students' understanding of sustainable production systems with an emphasis on stewarding natural resources (soil, water, biodiversity and energy) while maintaining and economically profitable enterprise that provides for a good quality of life.

Credit Hours: 3

Prerequisites: AFNR 2215

Recommended: SOIL 2100

AFNR 4001: Topics in Agriculture-General

Topics in Agriculture-General

Credit Hour: 1-99

AFNR 4972: Capstone Project in Agriculture, Food and Natural Resources

A culminating learning experience focused on student's area of concentration that requires the application of knowledge and skills taught in the undergraduate curriculum. The capstone project comprises independent, original work culminating in a scholarly project, written document, and/or presentation. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: instructor's consent

Recommended: junior or senior standing

AFNR 4993: Internship in Agriculture, Food and Natural Resources

Field-based learning experience combining the study, observation, and employment with a business, organization, or governmental agency. The internship provides opportunities to apply skills, concepts and theories about agriculture, food and natural resources in a practical context. The student intern, internship supervisor, and university coordinator will develop an individualized internship plan. May be repeated for credit. Some sections may be graded on either an A-F or S/U basis only.

Credit Hour: 1-6

Prerequisites: instructor's consent

Recommended: junior or senior standing

AFNR 7190: International Agriculture/Natural Resources

This course is designed to provide students with an introduction into the agriculture/natural resources of the host country. Activities may include course work at an international institution, professional and personal development and special projects. Selected sections of the course may be offered on A-F or S/U basis only.

Credit Hour: 1-9

Prerequisites: advisor and instructor's consent

Anesthesiology (ANESTH)

ANESTH 6203: ABS Anesthesiology Research

ABS Anesthesiology Research

Credit Hour: 5-10

ANESTH 6205: ABS Anesthesiology Research and Review

ABS Anesthesiology Research and Review

Credit Hour: 5-10

ANESTH 6400: Anesthesiology

Goals/Objectives: The goals are providing students with opportunities to: 1. Understand the anesthetic state (e.g. the inability of a person to protect themselves from the environment; concomitant and common depression of other systems of the body other than the nervous system). 2. Learn how to think and react quickly and correctly in times of stress. 3. Develop knowledge and skill at maintaining artificial ventilation and circulation. 4. Develop technical skills (e.g. insertion of endotracheal tubes, intravenous catheters). 5. Understand the rationale behind the choice of an anesthetic agent or technique. 6. Learn the function of an anesthesiologist as a perioperative physician and pain consultant. 7. Learn about the specialty of anesthesiology as a possible future career. Notes: Curriculum: Direct participation in anesthetic evaluation and administration for surgical procedures is combined with close individual supervision. Attendance at weekly teaching conferences is expected. Each student will follow a patient pre, intra, and post operatively and write a case presentation. Interblock: First consideration given to students interested in anesthesia as a career choice; honors considered only with documentation of participation and completion of a research project related to anesthesia. Evaluations: Evaluations are compiled from daily encounter cards completed by anesthesia providers, a written paper that discusses one patient's anesthetic, and a 50 question written examination at the end of the rotation.

Credit Hours: 5

ANESTH 6927: Anesthesiology Two-Week

Through daily participation, students will gain insight into the specialty of anesthesiology and will develop an appreciation for the integration of basic science knowledge (especially anatomy, physiology, and pharmacology) in the clinical care of patients.

Credit Hours: 2

Prerequisites: successful completion of the first two years of medical school

Animal Science (AN_SCI)

AN_SCI 1001: Topics in Animal Science

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. There may be prerequisites enforced depending on the topic.

Credit Hour: 1-4

AN_SCI 1011: Animal Science

Principles of animal science including importance of animal agriculture, genetics, anatomy, physiology and nutrition.

Credit Hours: 3

AN_SCI 1011H: Animal Science - Honors

Principles of animal science including importance of animal agriculture, genetics, anatomy, physiology and nutrition.

Credit Hours: 3

Prerequisites: Honors eligibility required

AN_SCI 1012: Introduction to Captive Wild Animal Management

(same as F_W 1012). General introduction to housing, husbandry, behavior, genetics, nutrition, reproduction, animal health, and disease control of native and exotic species in zoological parks and other animal conservation facilities; emphasizes the role of captive animals in wildlife conservation. Graded on A-F basis only.

Credit Hours: 3

AN_SCI 1013: Biotechnology in Animal Agriculture

Concepts, discoveries, and applications of biotechnology ranging from the discovery of brewing and baking to animal cloning and genetic engineering are covered. Students will acquire a foundation to understand how biotechnology affects agriculture and our everyday lives. Graded on A-F basis only.

Credit Hours: 3

AN_SCI 1065: Animal Science Laboratory Practicum

An introductory course in skill related to the care and management of livestock and poultry plus a section dealing with meats and a section dealing with research methods. Students will be expected to participate in hands-on learning development of fundamental skills and animal husbandry. This class will include one 3 hour lab and 1 hour DIS per week.

Credit Hours: 2

AN_SCI 2001: Topics in Animal Science

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. There may be prerequisites enforced depending on the topic.

Credit Hour: 1-4

AN_SCI 2045: Equine Practicum

Focus on learning hands-on equine skills through the care of horses at the university's equine facility. Experiential learning is emphasized. Skills include: how to identify the general health and well-being of horses, recognize early onset of illness or lameness, understand basic feeding, housing, and daily care, and demonstrate the ability to handle and feed horses in a safe manner. Monthly meetings, scheduled feed shifts, monthly journals, required skill assessments, and attendance at various educational activities are required. Feed shift scheduling is determined around individual availability and no equine or animal experience is required. To enroll, students should contact the instructor for an application. Graded on A-F basis only.

Credit Hour: 1-2

Prerequisites: Instructor consent required

AN_SCI 2085: Problems in Animal Science

Library and laboratory study of assigned problems in animal breeding, nutrition, physiology or production and management. Planning, conduction and reporting to be in consultation with instructor.

Credit Hour: 1-5

Prerequisites: instructor's consent

AN_SCI 2095: Equine Behavior and Training

Students learn the psychology and ethology of equine behavior and how it relates to training. The use and proper fitting of equipment is taught and students learn to teach horses to perform the basic movements needed prior to advancing to specialized training.

Credit Hours: 3

Prerequisites: instructor's consent

AN_SCI 2110: Global Animal Agriculture

Animal Agriculture as influenced globally by political, religious cultural, economic and climatic factors.

Credit Hours: 2

Prerequisites: sophomore standing

AN_SCI 2111: Sophomore Seminar: Societal Issues Facing Animal Agriculture

Course designed to introduce students to key issues facing animal agriculture. Assignments focus on reading current publications associated with issues affecting the animal agriculture industry. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGLISH 1000

AN_SCI 2114: Live Animal and Meat Evaluation

(same as F_S 2114). The composition and quality meat produced from food animals is the driving component of livestock economic value. This course will teach the principles and procedures involved in evaluation, grading, selection, and economic value of meat animals and poultry and the carcasses they produce. This course is an excellent introduction and (or) prerequisite for all livestock production courses and will provide a baseline of information for students interested in livestock or meat judging.

Credit Hours: 3

AN_SCI 2115: Livestock Judging

Comparative judging and evaluation; various classes of farm animals; particular reference to utility. Reference reading; illustrated lectures.

Credit Hours: 3

Prerequisites: AN_SCI 1065

AN_SCI 2131: Dairy Products Evaluation

(same as F_S 2131.) Sensory Evaluation and judging of dairy products.

Credit Hours: 2

AN_SCI 2135: Horse Selection and Evaluation

Techniques of selecting and evaluating horses based on conformation and performance characteristics. Effects of conformation on soundness. Includes learning to organize observations on the relative merits of a group of horses into an oral presentation.

Credit Hours: 2

Recommended: AN_SCI 1065

AN_SCI 2140: Companion Animals

(same as BIOMED 2140). Focus on companion dog, cat, and horse owners concerns re: health zoonoses, legal responsibilities, inbreeding, choice of breeds, behavioral problems and loss of companion animals.

Credit Hours: 3

Recommended: sophomore standing

AN_SCI 2165: Introduction to Ruminant Livestock Production

This is an introductory theory course which provides fundamental understanding of ruminant livestock - beef cattle and dairy cattle, production, management and associate industries. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 1065

AN_SCI 2175: Introduction to Monogastric Production

Introductory course which provides fundamental understanding of hogs, horses and poultry. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 1065

AN_SCI 2195: Equine Facility Management and Marketing

Focuses on learning equine facility management through student care and management of the University's equine facility and breeding herd. Students also learn handling techniques for a wide variety of horses and gain experience in general equine facility maintenance. Students will be responsible for marketing horses sold in the annual MU online horse auction. Graded on A-F basis only.

Credit Hours: 3

Recommended: AN_SCI 2135 and instructor's consent. Cannot be taken at the same time as AN_SCI 2095

AN_SCI 3001: Topics in Animal Science

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. There may be prerequisites enforced depending on the topic.

Credit Hour: 1-4

AN_SCI 3085: Problems in Animal Science

Current problems in animal breeding, nutrition, livestock production and management, meats. Assigned topics. In some cases student may undertake a project by outlining objectives, planning work, keeping records and summarizing results in written report. Some sections may be graded either on S/U or A-F basis only.

Credit Hour: 1-6

Prerequisites: instructor's consent

AN_SCI 3190: Study Abroad: International Meat, Dairy and Enology

(same as F_S 3190). This study abroad course introduces students to the meat, dairy and wine industries in Germany or in New Zealand (destinations are on a rotational basis). Students will visit small, medium and large-scale producers and learn about differences in comparisons to the US industries. May be repeated once for credit.

Credit Hours: 3

Prerequisites: instructor's consent

AN_SCI 3212: Principles of Animal Nutrition

The purpose of this course is to teach students the essential nutrients for animal life and to understand the basic principles of nutrition. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: 1 course in biochemistry or at least 4 hours of chemistry and MATH 1100 or equivalent

AN_SCI 3213: Genetics of Agricultural Plants and Animals

(same as PLNT_S 3213). Concepts of molecular, transmission, and population and quantitative genetics. Special emphasis given to breeding and biotechnological applications in plant and animal agriculture.

Prerequisites: MATH 1100 and one of the following: BIO_SC 1100 (or F_W 1100) or BIO_SC 1200 or BIO_SC 1500.

Credit Hours: 3

AN_SCI 3214: Principles of Meat Science

(same as F_S 3214). Study of the principles involved in the conversion of living animals to meat and by-products; efficient utilization of meat as a food.

Credit Hours: 3

Prerequisites: one course in Biology

AN_SCI 3231: Principles of Dairy Foods Science

(same as F_S 3231). Technology, chemistry and microbiology related to milk and its transformation into fluid milk products, fermented dairy foods and spreads. (2 hours of lecture and two hours of laboratory per week.)

Credit Hours: 3

Prerequisites: One course in Chemistry or Biological Sciences

AN_SCI 3232: Animal Feeds and Feeding

Description of feed ingredients, formulation of diets, and animal feeding management.

Credit Hours: 3

Prerequisites: AN_SCI 3212 and MATH 1100 or equivalent

AN_SCI 3254: Physiology of Domestic Animals

Basic concepts of physiology and anatomy as related to domestic animals.

Credit Hours: 3

Prerequisites: BIO_SC 1010 and BIO_SC 1020 or BIO_SC 1500; CHEM 1310 and CHEM 1320

AN_SCI 3254H: Physiology of Domestic Animals - Honors

Basic concepts of physiology and anatomy as related to domestic animals.

Credit Hours: 3

Prerequisites: BIO_SC 1010 and BIO_SC 1020 or BIO_SC 1500; CHEM 1310 and CHEM 1320; Honors eligibility required

AN_SCI 3255: Physiology of Domestic Animals Laboratory

This laboratory course covers the basic concepts of physiology as related to domestic animals.

Credit Hours: 2

Prerequisites: BIO_SC 1010 and BIO_SC 1020 or BIO_SC 1500; CHEM 1310 and CHEM 1320; AN_SCI 3254 or equivalent

AN_SCI 3275: Meat Animal Evaluation

Meat animal evaluation highlights the relationships and limitations that exist when evaluating market and breeding animals and develops an appreciation for carcass excellence as it relates to production, merchandising and consumption. Some travel time and commitments will be necessary.

Credit Hours: 2

Prerequisites: AN_SCI 2114 and AN_SCI 2115

AN_SCI 4001: Topics in Animal Science

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

Credit Hour: 1-4

Prerequisites: instructor's consent

AN_SCI 4312: Monogastric Nutrition

(same as NEP 4020; cross-leveled with AN_SCI 4312 and NUTRIT 7020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 3212

AN_SCI 4314: Physiology of Reproduction

(cross-leveled with AN_SCI 7314). Principles of animal reproduction with emphasis on endocrine control of reproductive processes.

Credit Hours: 3

Prerequisites or Corequisites: AN_SCI 3254

AN_SCI 4314H: Physiology of Reproduction - Honors

Principles of animal reproduction with emphasis on endocrine control of reproductive processes.

Credit Hours: 3

Prerequisites or Corequisites: AN_SCI 3254

Prerequisites: BIO_SC 1500; Honors eligibility required

AN_SCI 4323: Applied Livestock Genetics

Genetic principles applied to improvement of farm animals. Covers selection, prediction of genetic merit and mating systems. Math Reasoning Proficiency Course.

Credit Hours: 2

Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500 and MATH 1100

AN_SCI 4324: Genomics of Plants and Animals

Analysis of organisms at the level of the complete genome sequence. Covers genome sequencing, assembly and annotation, as well as functional, evolutionary and computational genomics.

Credit Hours: 2

Recommended: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500, MATH 1100, AN_SCI 3213 /PLNT_S 3213 or equivalent

AN_SCI 4332: Ruminant Nutrition

(cross-leveled with AN_SCI 7332). Physiology, chemistry, microbiology and pathology of ruminants. Emphasizes the digestion, absorption, metabolism and utilization of nutrients.

Credit Hours: 3

Prerequisites: AN_SCI 3212

AN_SCI 4344: Processing Muscle Foods

(same as F_S 4344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility.

Credit Hours: 3

Prerequisites: One Chemistry course

AN_SCI 4354: Physiology and Biochemistry of Muscle as Food

(same as F_S 4354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.

Credit Hours: 3

Prerequisites: BIO_SC 1010 or equivalent or AN_SCI 3214 or instructor's consent

AN_SCI 4384: Reproductive Management

Reproductive management of cattle, swine and sheep; estrous synchronization; artificial insemination; embryo development and transfer; assisted reproductive technologies.

Credit Hours: 3

Prerequisites: senior standing and AN_SCI 4314 and instructor's consent

AN_SCI 4387: Equine Breeding Management

Focuses on practical applications of reproductive management techniques and breeding in the horse. Topics include stallion collection and evaluation, artificial insemination, interpreting ultrasound images, teasing, parturition, and foal care. Students will gain hands-on experience in each of these areas.

Credit Hours: 5

Prerequisites: AN_SCI 2175 and AN_SCI 4314; instructor's consent

AN_SCI 4437: Environmental Physiology

Principles of environmental physiology and animal adaptation with emphasis on mechanisms of temperature regulation and related nutritional and metabolic-hormonal functions.

Credit Hours: 3

Prerequisites: AN_SCI 3254

AN_SCI 4910: Senior Seminar in Captive Wild Animal Management
(same as F_W 4910). Investigates key issues in captive wild animal management, focusing on the role of animal caretakers in addressing the issues. Students are required to formulate informed opinions regarding these topics and communicate effectively about the subject matter. Graded A-F only.

Credit Hour: 1
Prerequisites: AN_SCI 1012 or F_W 1012 or instructor's consent; junior or senior standing

AN_SCI 4940: Internship in Animal Science & Technology
Off-campus training to develop technical skills and understanding of an area of animal science. Written reports required. Graded on an S/U basis only.

Credit Hour: 1-12
Prerequisites: instructor's consent

AN_SCI 4950: Undergraduate Research in Animal Science
Individually directed field or laboratory research culminating in a poster or oral presentation for upper-class students under faculty supervision.

Credit Hour: 1-3
Prerequisites: At least sophomore standing or instructor's consent

AN_SCI 4973: Molecular and Cellular Techniques in Animal Science
A directed research project that employs current molecular and cellular technologies. Students will generate experimental data, analyze the data and draft a research report in the format of a scientific paper.

Credit Hours: 4
Prerequisites: an introductory course in biology and a course in organic chemistry, at least junior standing and instructor's consent

AN_SCI 4975: Beef Production and Management
(cross-leveled with AN_SIC 7975). Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle.

Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2165 and AN_SCI 3212 or instructor's consent

AN_SCI 4976: Dairy Production
Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects.

Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2165, AN_SCI 3212, and AN_SCI 3232 or instructor's consent

AN_SCI 4977: Horse Production
(cross-leveled with AN_SCI 7977). Systems of horse production: breeding, feeding and management of horses.

Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent

AN_SCI 4978: Swine Production

Systems of pork production: breeding, feeding, management of commercial and purebred swine.

Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent

AN_SCI 4979: Poultry Production

(cross-leveled with AN_SCI 7979). Principles of housing systems, nutrition, management, business and production of commercial chickens and turkeys.

Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent

AN_SCI 7001: Topics in Animal Science

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

Credit Hour: 1-4
Prerequisites: instructor's consent

AN_SCI 7312: Monogastric Nutrition

(same as NUTRIT 7020 and NEP 7020; cross-leveled with AN_SCI 4312 and NEP 4020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 3212

AN_SCI 7314: Physiology of Reproduction

(cross-leveled with AN_SCI 4314). Principles of animal reproduction with emphasis on endocrine control of reproductive processes.

Credit Hours: 3
Prerequisites: AN_SCI 3254 and BIO_SC 1500 or equivalent; or AN_SCI 3254 as a co-requisite and instructor's consent

AN_SCI 7323: Applied Livestock Genetics

Genetic principles applied to improvement of farm animals. Covers selection, prediction of genetic merit and mating systems.

Credit Hours: 2
Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500 and MATH 1100

AN_SCI 7324: Genomics of Plants and Animals

Analysis of organisms at the level of the complete genome sequence. Covers genome sequencing, assembly and annotation, as well as functional, evolutionary and computational genomics.

Credit Hours: 3
Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500, MATH 1100, AN_SCI 3213 /PLNT_S 3213 or equivalent; and instructor's consent

AN_SCI 7332: Ruminant Nutrition

(cross-leveled with AN_SCI 4332). Physiology, chemistry, microbiology and pathology of ruminants. Emphasizes the digestion, absorption, metabolism and utilization of nutrients.

Credit Hours: 3

Prerequisites: AN_SCI 3212

AN_SCI 7344: Processing Muscle Foods

(same as F_S 7344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility.

Credit Hours: 3

Prerequisites: one Chemistry course

AN_SCI 7354: Physiology and Biochemistry of Muscle as Food

(same as F_S 7354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.

Credit Hours: 3

Prerequisites: BIO_SC 1010 or equivalent or AN_SCI 3214 or instructor's consent

AN_SCI 7384: Reproductive Management

Reproductive management of cattle, swine and sheep; estrous synchronization; artificial insemination; embryo development and transfer; assisted reproductive technologies.

Credit Hours: 3

Prerequisites: AN_SCI 4314 and instructor's consent

AN_SCI 7437: Environmental Physiology

Principles of environmental physiology and animal adaptation with emphasis on mechanisms of temperature regulation and related nutritional and metabolic-hormonal functions.

Credit Hours: 3

Prerequisites: AN_SCI 3254 or equivalent

AN_SCI 7975: Beef Production and Management

(cross-leveled with AN_SCI 4975). Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle.

Credit Hours: 3

Prerequisites: AN_SCI 1065, AN_SCI 2165 and AN_SCI 3212 or instructor's consent

AN_SCI 7976: Dairy Production

Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects.

Credit Hours: 3

Prerequisites: AN_SCI 1065, AN_SCI 2165, AN_SCI 3212 and AN_SCI 3232 or instructor's consent

AN_SCI 7977: Horse Production

(cross-leveled with AN_SCI 4977). Systems of horse production: breeding, feeding and management of horses.

Credit Hours: 3

Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent

AN_SCI 7978: Swine Production

Systems of pork production: breeding, feeding, management of commercial and purebred swine.

Credit Hours: 3

Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent

AN_SCI 7979: Poultry Production

(cross-leveled with AN_SCI 4979). Principles of housing systems, nutrition, management, business and production of commercial chickens and turkeys.

Credit Hours: 3

Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent

AN_SCI 8085: Problems in Animal Science

Advanced independent studies in fields not directly related to thesis or non-thesis degree research program. May be graded on S/U or A-F basis only.

Credit Hour: 1-6

Prerequisites: instructor's consent

AN_SCI 8087: Seminar in Animal Science

Critical consideration of research and other selected subjects in animal breeding, animal nutrition, reproductive physiology, growth and development and livestock production and management.

Credit Hour: 1

AN_SCI 8090: Thesis Research in Animal Science

Investigations in animal breeding, animal nutrition, reproduction physiology, growth and development livestock production and management. Graded on a S/U basis only.

Credit Hour: 1-99

AN_SCI 8413: Reproductive Biology Seminar

Presentation and discussion of selected topics from all phases of reproductive biology. Open to qualified students of graduate standing in the field of Reproductive Biology.

Credit Hour: 1

AN_SCI 8414: Meat Quality

(same as F_S 8414). Discussion of factors affecting meat quality in beef, pork, lamb and poultry. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 3214 or equivalent

AN_SCI 8415: Survey of Epigenetics

This course will introduce graduate students to the basic concepts in epigenetics, including DNA methylation, histone modifications, epigenetic modifiers/transacting factors, non-coding RNAs, genomic imprinting, and dosage compensation. The course is designed to be a combination of lectures, paper discussions, and research talks by invited faculty speakers from across campus.

Credit Hours: 3

Prerequisites: instructor's consent

AN_SCI 8420: Endocrinology

Hormones of pituitary and endocrine glands; special reference to influence on growth, reproduction, milk secretion.

Credit Hours: 3

Prerequisites: AN_SCI 7314 or equivalent

AN_SCI 8424: Meat Investigations

(same as F_S 8424). Discussions of scientific literature and hands-on experimentation with research techniques customarily used in the field of meat science. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: F_S 3214 /AN_SCI 3214 or equivalent; instructor's consent

AN_SCI 8430: Introduction to Bioinformatics Programming

This course provides the basics of programming and database development to students in the life sciences who have little prior programming experience. It covers Unix/Linux, Perl, MySQL, the relational database design process, and common data formats used in genome informatics. Students will learn how programming skills can enhance their ability to analyze large biological datasets, and will gain hands on experience with examples focused on genomics and bioinformatics. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: Instructor's consent

Recommended: Undergraduate or graduate course in Genetics

AN_SCI 8431: Nutritional Biochemistry of Lipids

(Same as NEP 8310 and NUTRIT 8310). Current concepts in the nutritional regulations of lipid metabolism. Emphasis on integrating information and interpreting current research data.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272

AN_SCI 8438: Nutrient Regulation of Gene Expression

(same as NUTRIT 8438, NEP 8438 and BIOCHM 8438). This second semester of the graduate nutritional sciences core curriculum will cover nutritional biochemistry of minerals and on research literature, with an emphasis on in-depth coverage of several minerals that illustrate emerging themes in mineral nutritional biochemistry and nutrient regulation of gene expression. The course will be taught in tutorial format.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272 and 1st semester Graduate Nutrition core curriculum

AN_SCI 8441: Livestock Production and Management Research Methods

Techniques of experimentation, with application to livestock production and management. Exercises in methods of planning, conducting, analyzing, evaluating and reporting research.

Credit Hours: 3

Prerequisites: STAT 4530/STAT 7530 or equivalent or instructor's consent

AN_SCI 8443: Functional Genomics of Mammalian Genomes: Focus on Microarray

The curriculum covers methods for functional genomics. It explores experimental designs, data filtering, ANOVA analysis, power calculations, clustering and classification systems, and functional annotation of genes through lectures, and bioinformatics and regular laboratories. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: BIO_SC 4974 and BIO_SC 4374 or equivalent courses, Anova analysis course (STAT 7530) or equivalent experience in using Anova analysis

AN_SCI 8447: Recent Advances in Environmental and Endocrine Physiology

Seminar. Presentation, discussion, and critical evaluation of current status of selected topics in environmental and endocrine physiology.

Credit Hour: 1

Prerequisites: AN_SCI 3254 or equivalent

AN_SCI 8450: Research in Animal Science

Research in Animal Science

Credit Hour: 1-99

AN_SCI 8472: Amino Acid Metabolism

An in-depth study of amino acid metabolism and their relationship to animal nutrition.

Credit Hours: 2

Prerequisites: BIOCHM 4270 and BIOCHM 4272

AN_SCI 8633: Molecular and Network Evolution

(same as BIO_SC 8633). Evolution of biological macromolecules and networks, including sequence analysis algorithms and theory, phylogenetics, gene duplication, genome evolution, principles of biological networks. Development of computational skills emphasized.

Credit Hours: 3

Prerequisites: Instructor's consent required

AN_SCI 8725: Science Outreach: Public Understanding of Science

(same as BIO_SC 8725, PHYSCS 8350 and LTC 8725). Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.

Credit Hour: 1-2

AN_SCI 9001: Topics in Animal Science

Credit Hour: 1-99

Prerequisites: instructor's consent

AN_SCI 9090: Dissertation Research in Animal Science

Investigations in animal breeding, animal nutrition, livestock production and management. Dissertation required. Graded on a S/U basis only.

Credit Hour: 1-99

AN_SCI 9423: Genetics of Populations

Introduction to quantitative genetics with application to animal and plant breeding.

Credit Hours: 4

Prerequisites: STAT 4530 or STAT 7530

AN_SCI 9432: Ruminant Nutrition

(same as NUTRIT 8320). Physiology, chemistry, microbiology, pathology of ruminants. Emphasizes digestion, absorption, metabolism, utilization of nutrients. Lecture, laboratory, assigned readings.

Credit Hours: 3

Prerequisites: AN_SCI 4332/AN_SCI 7332 or equivalent and BIOCHM 4270

AN_SCI 9433: Gamete and Embryo Development

A classical and molecular approach to spermatogenesis, oogenesis, fertilization and preimplantation development in the domestic species.

Credit Hours: 3

Prerequisites: AN_SCI 4314/AN_SCI 7314 or BIO_SC 4984 or equivalent

AN_SCI 9434: Gonadal Function

(same as BIOMED 9434).

Credit Hours: 3

Prerequisites: AN_SCI 4314, biochemistry or cell biology and AN_SCI 8420

AN_SCI 9435: Placentation

Provide students with current and in-depth information about the mechanisms involved in placental development and how the placenta (and placental products) influence maternal physiology - both locally at the placenta-uterine interface and systemically. All course topics will be covered in a comparative cross-species approach whenever possible. Emphasis will be placed on the most recent literature regarding the interactions taking place between the placenta and maternal system and how these interactions lead to the eventual birth of live young.

Credit Hours: 3

Recommended: It is preferred that students take AN_SCI 9433 prior to this class, but this is not an absolute requirement

AN_SCI 9441: Bioenergetics

(same as NUTRIT 8400). Energetic interactions of animals and their physical and nutritional environments.

Credit Hours: 3

Prerequisites: instructor's consent

AN_SCI 9442: Vitamins and Minerals

Designed to provide students with an understanding of the chemical, metabolic, and functional role of vitamins and minerals in nutrition. While the primary focus will be on animals, comparative aspects to human nutrition will be discussed.

Credit Hours: 4

Prerequisites: AN_SCI 3212, BIOCHM 4270 or equivalent

AN_SCI 9452: Mycotoxins

Designed to provide students with an understanding of the occurrence of mycotoxins, mechanisms of toxicity, analytical methodology, and approaches for ameliorating the toxic effects of mycotoxin in animals.

Credit Hours: 3

Prerequisites: instructor's consent and courses in Nutrition and Biochemistry

Anthropology (ANTHRO)

ANTHRO 1000: General Anthropology

General survey course in fields of anthropological concern: archaeology, cultural anthropology, physical anthropology, linguistics; emphasizes underlying concepts, principles. Examples from peoples of the world.

Credit Hours: 3

ANTHRO 1000H: General Anthropology - Honors

General survey course in fields of anthropological concern: archaeology, cultural anthropology, physical anthropology, linguistics; emphasizes underlying concepts, principles. Examples from peoples of the world.

Credit Hours: 3

Prerequisites: Honors eligibility required

ANTHRO 1001: Topics in Anthropology - General

Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 1002: Topics in Anthropology - Biological/Physical/Mathematics

Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hour: 1-3

ANTHRO 1003: Topics in Anthropology - Behavioral

Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 1004: Topics in Anthropology - Social Science

Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 1005: Topics in Anthropology - Humanities

Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 1060: Human Language

(same as LINGST 1060, C_S_D 1060 and ENGLSH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data with some attention to application of linguistic study to other disciplines.

Credit Hours: 3

ANTHRO 1150: Introduction to Folklore Genres

(same as ENGLSH 1700). Course focus is on genres of folklore in both historic and contemporary contexts, as well as in people's daily lives. Genres include narrative, proverbs, oral poetry and rhyme, riddles, jokes, legends, epics, material culture and intangible expressive culture. Graded on A-F basis only.

Credit Hours: 3

ANTHRO 1200: Significant Discoveries of Archaeology

Detailed consideration of approximately 20 archaeological discoveries and conclusions, from the field and the laboratory, which have been of surpassing importance for an understanding of human origins, behavior, culture and past experiences on earth.

Credit Hours: 3

ANTHRO 1300: Multiculturalism: An Introduction

Examines contemporary multiculturalism (and its origins) globally; introduces key concepts; uses diverse, extended cross-cultural and American examples; and emphasizes complexity of cultures, practicality of issues, and change.

Credit Hours: 3

ANTHRO 1350: Deviance: A Cross-Cultural Perspective

Cross-cultural studies of problem behavior with emphasis on violence, suicide, sexual misconduct, drug use and mental disorder.

Credit Hours: 3

ANTHRO 1500: Monkeys, Apes and Humans

For those with little or no background in anthropology. Surveys the ecology and behavior of major nonhuman primate groups, and how these relate to the evolution of human behavior.

Credit Hours: 3

ANTHRO 2001: Topics in Anthropology-General

Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 2002: Topics in Anthropology-Biological/Physical/Mathematics

Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 2003: Topics in Anthropology - Behavioral

Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 2004: Topics in Anthropology - Social Science

Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 2005: Topics in Anthropology - Humanities

Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hour: 1-3

ANTHRO 2020: Fundamentals of Archaeology with Laboratory

Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. The lab involves hands-on experience with archaeological materials. No credit for both ANTHRO 2020 and ANTHRO 2021.

Credit Hours: 4

ANTHRO 2021: Fundamentals of Archaeology

Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. No credit for both ANTHRO 2020 and ANTHRO 2021.

Credit Hours: 3

ANTHRO 2022: Fundamentals of Archaeology Lab

Involves hands-on experience with archaeological materials. No credit given to students who have taken ANTHRO 2020.

Credit Hour: 1

Prerequisites: must have completed ANTHRO 2021

ANTHRO 2030: Cultural Anthropology

Analysis of human cultures with emphasis on both constant and variable factors at different levels of social complexity; contact between cultures, and cultural influences on individual behavior.

Credit Hours: 3

ANTHRO 2040: Anthropological Linguistics

(same as LINGST 2040). Language in relation to other aspects of human behavior. Introduction to description and analysis of the basic units of language. Emphasis on non-Indo-European and preliterate languages.

Credit Hours: 3

ANTHRO 2050: Introduction to Biological Anthropology with Laboratory

A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. Three hours lecture and two hours lab. No credit for both ANTHRO 2050 and ANTHRO 2051. Math Reasoning Proficiency Course.

Credit Hours: 5

Prerequisites: MATH 1100 or MATH 1160

ANTHRO 2051: Introduction to Biological Anthropology

A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. No credit for both ANTHRO 2050 and ANTHRO 2051.

Credit Hours: 3

ANTHRO 2052: Biological Anthropology Laboratory

Laboratory exercises dealing with human genetics, non-human primates, the human fossil record, and human variation. Credit not given for students who have taken ANTHRO 2050. Math Reasoning Proficiency Course.

Credit Hours: 2

Prerequisites: ANTHRO 2051 (or equivalent) and MATH 1100

ANTHRO 2100: Indigenous Religions

(same as REL_ST 2100). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.

Credit Hours: 3

ANTHRO 2100H: Indigenous Religions - Honors

(same as REL_ST 2100H). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.

Credit Hours: 3

Prerequisites: Honors eligibility required

ANTHRO 2150: Introduction to Folklore Field Research

(same as ENGLSH 2700). Course will focus on the specifics of how to identify, collect, preserve and document folklore within communities.

Credit Hours: 3

Recommended: ENGLSH 1000

ANTHRO 2215: World Archaeology

Major events in cultural evolution such as control of fire, invention of ceramic and metallurgical technologies, colonization of Australia and the Americas, development of agriculture, and emergence of complex sociopolitical organization are described in all regions of the world.

Credit Hours: 3

ANTHRO 2300: Anthropology of War

Anthropological approaches to tribal and modern war; theories of war's origins; relation to ecology, economy, gender, belief systems, politics; transformation of tribal warfare by state expansion; peace.

Credit Hours: 3

ANTHRO 2340: Hunters and Gatherers

Exploration of how different hunter-gatherer groups interact with their physical and social environment. Topics include food acquisition, allocation of labor, reproduction and family life, and deciding where to live and when to move.

Credit Hours: 3

ANTHRO 2500: Primate Anatomy and Evolution

This course will explore why primates (and humans) are built the way they are, how they evolved, and what their anatomy tells us about their biology. We will cover basic primate anatomy and ecology, and then survey the fossil record of primate evolution.

Credit Hours: 3

Recommended: Sophomore standing

ANTHRO 2520: Forensic Anthropology

This course will introduce students to how biological anthropologists apply expertise in human osteology, skeletal variation and plasticity, skeletal pathology, body decomposition, and archaeological recovery of evidence to medicolegal investigations.

Credit Hours: 3

ANTHRO 2530: Human Evolution through Film and Literature

This course will use recent films and novels as starting points to introduce students to concepts in human biology, history and evolution. Topics will range broadly from genetics and mutation to primatology to paleoanthropology and the human fossil record.

Credit Hour: 1-3

ANTHRO 2570: Parents and Offspring

A comparative investigation of the evolution of parental behaviors and family interactions in humans and other primates.

Credit Hours: 3

Recommended: Sophomore standing

ANTHRO 2580: Evolution of Human Sexuality

Biological and cultural aspects of human reproduction are examined from the perspective of evolutionary and ecological theory.

Credit Hours: 3

Recommended: Sophomore standing

ANTHRO 2800: Introduction to Field Methods in Archaeology

Techniques of field research and laboratory analysis through field experience.

Credit Hour: 1-6

Prerequisites: ANTHRO 2020 or ANTHRO 2021 or instructor's consent

ANTHRO 2825: Analyzing Artifacts

A brief introduction to the main methods used to analyze artifacts.

Credit Hours: 3

ANTHRO 2950: Research Skills in Anthropology

Participation in faculty research activities. Course coordinator matches students with participating faculty. Three hours of research activities per week per credit hour. May be repeated to a maximum of nine hours.

Credit Hour: 1-3

Prerequisites: instructor's consent

ANTHRO 3001: Topics in Anthropology - General

Problems, topics, issues, or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 3002: Topics in Anthropology-Biological/Physical/Mathematics

Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 3003: Topics in Anthropology - Behavioral Science

Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 3004: Topics in Anthropology - Social Science

Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 3005: Topics in Anthropology - Humanities

Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 3150: American Folklore

(same as ENGLISH 3700). Regional and ethnic American folklore, with emphasis on analysis of folklore in context. Book reports and two analytical papers based on student field research required.

Credit Hours: 3

ANTHRO 3340: Human Nature

We will investigate the topic of human nature, asking such questions as: What are we like? Why do we behave the way we do? Are we inherently selfish or social? Do we have a unitary "self" or are we made up of many (and sometimes contradictory) selves? Is there a single "human" nature or are there distinct "male" and "female" natures? Does human nature vary across cultures? Insights come from fields ranging from genetics to literature. The concept of "human nature" is fiercely contested and debated both within and between academic disciplines. We will be focusing on the scientific study of human nature, seeking naturalistic explanations by formulating and testing hypotheses. In particular, we will use evolutionary theory to unify explanations from disparate disciplines like biology, psychology, and anthropology. In each class, we will discuss one specific topic like sex or violence and seek to make sense of it from both the proximate level (what triggers the behavior and how does it develop?) and the ultimate level (why and how did our evolutionary history imbue us with the capacity?). Graded on A-F basis only.

Credit Hours: 3

ANTHRO 3340H: Human Nature - Honors

(same as GN_HON 3241H). We will investigate the topic of human nature, asking such questions as: What are we like? Why do we behave the way we do? Are we inherently selfish or social? Do we have a unitary "self" or are we made up of many (and sometimes contradictory) selves? Is there a single "human" nature or are there distinct "male" and "female" natures? Does human nature vary across cultures? Insights come from fields ranging from genetics to literature. The concept of "human nature" is fiercely contested and debated both within and between academic disciplines. We will be focusing on the scientific study of human nature, seeking naturalistic explanations by formulating and testing hypotheses. In particular, we will use evolutionary theory to unify explanations from disparate disciplines like biology, psychology, and anthropology. In each class, we will discuss one specific topic like sex or violence and seek to make sense of it from both the proximate level (what triggers the behavior and how does it develop?) and the ultimate level (why and how did our evolutionary history imbue us with this capacity?). Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Honors eligibility required

ANTHRO 3380: Native American Religions

(same as REL_ST 3380). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts.

Credit Hours: 3

ANTHRO 3380H: Native American Religions - Honors

(same as REL_ST 3380H). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts.

Credit Hours: 3

Prerequisites: Honors eligibility required

ANTHRO 3470: Culture as Communication

(same as COMMUN 3470, LINGST 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction.

Credit Hours: 3

Prerequisites: sophomore standing

ANTHRO 3490: Indian Cinema

(same as AR_H_A 3790, S_A_ST 3490 and FILM_S 3490). Indian Cinema provides an overview of the key genres and themes of Indian film, including Bollywood, art cinema/parallel cinema, Indian regional cinemas, and diasporan cinema. The course combines film studies, anthropological, historical, and visual culture analyses to provide a holistic view of Indian culture and society through cinema.

Credit Hours: 3

Recommended: Sophomore standing or higher

ANTHRO 3540: Human Biology and Life History

A general survey of human biology, focusing on the development of the individual from infancy to adult and the biology of human populations.

Credit Hours: 3

ANTHRO 3560: Plagues and Peoples

Overview of the ecology of human host-pathogen interactions and the influence of human culture on the transmission and spread of infectious diseases through time and in different environments.

Credit Hours: 3

Recommended: sophomore standing

ANTHRO 3600: North American Indian Culture

Comparative study of American Indians north of Mexico, emphasizes eastern United States.

Credit Hours: 3

ANTHRO 3610: Peoples of Canada

This course provides an anthropological approach to the culture and peoples of Canada. The course will include in depth studies of several First Nations People, Quebec, various recent immigrant populations, and the modern popular culture of Canada.

Credit Hours: 3

ANTHRO 3650: Aztec, Maya, and Inca Civilization

Origin of native Americans and development of American civilizations emphasizing Aztecs, Mayas, and Incas; rise of these civilizations known

from archaeology, early European and early native American accounts, and the condition of the descendants today.

Credit Hours: 3

Recommended: sophomore standing

ANTHRO 3660: Peoples of the Andes

Archaeological and linguistic prehistory set the stage for the clash of Iberian and indigenous peoples whose descendants make up the Andean countries. Ethnographic studies provides a basis for their understanding.

Credit Hours: 3

Recommended: sophomore standing

ANTHRO 3680: Plants and People in Native America

Explores the present and past interactions between people and the plant world, covering use of plants as foods, medicines, and in rituals, and reviewing the origin of major food plants.

Credit Hours: 3

Recommended: sophomore standing

ANTHRO 3700: Cultures of Europe

Examines ethnic, linguistic, and folk cultural backgrounds of contemporary Europe and the articulation of local sociocultural units with national society and culture.

Credit Hours: 3

Recommended: sophomore standing

ANTHRO 3780: Cultures of Southeast Asia

Survey of peoples and cultures of Southeast Asia; topics include regional geography and prehistory, European colonialism, economic and social organization, religious practices, changing status of women, urban and rural poverty, and environmental transformations.

Credit Hours: 3

ANTHRO 4001: Topics in Anthropology-General

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4002: Topics in Anthropology - Biological/Physical/Mathematics

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4003: Topics in Anthropology - Behavioral Science

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4004: Topics in Anthropology - Social Science

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4005: Topics in Anthropology - Humanities

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4150: Special Themes in Folklore

(same as ENGLSH 4700; cross-leveled with ANTHRO 7150 and ENGLSH 7700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. May be repeated for a maximum of six hours with department's consent.

Credit Hours: 3

ANTHRO 4160: Themes in African Diaspora Folklore

(same as ENGLSH 4710 and BL_STU 4710; cross-leveled with ENGLSH 7710 and BL_STU 7710). Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. ANTHRO 4150 and ANTHRO 4160 may be repeated for a maximum of six hours with instructor's consent.

Credit Hours: 3

Recommended: junior standing

ANTHRO 4200: Environment and Archaeology

(cross-leveled with ANTHRO 7200). Study of Quaternary environments and cultural systems. Focuses on North American records emphasizing climate and biologic components of regional ecosystems; regional environmental reconstruction.

Credit Hours: 3

Recommended: ANTHRO 2020 or ANTHRO 2021

ANTHRO 4240: History of Archaeology

(cross-leveled with ANTHRO 7240). Growth of archaeology worldwide since AD 1700. Emphases include intellectual and theoretical developments, field and laboratory techniques, and major figures in the history of the discipline.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2021 or instructor's consent

ANTHRO 4280: Archaeology of Religion

(same as REL_ST 4280; cross-leveled with ANTHRO 7280 and REL_ST 7280). Examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmogonical constructs, worldview and ideology in the Americas.

Credit Hours: 3

Recommended: ANTHRO 2020 or REL_ST 2100

ANTHRO 4300: Comparative Social Organization

(cross-leveled with ANTHRO 7300). Cross-cultural comparison, analysis of social structures. Role of kinship, age, sex, locality, economics, religion and other factors in determining relationships between individuals and groups cross-culturally.

Credit Hours: 3

Prerequisites: ANTHRO 2030

ANTHRO 4320: Ecological and Environmental Anthropology

(cross-leveled with ANTHRO 7320). Cultural anthropological approaches to human-environment interaction; cultural adaptations to diverse environments; theoretical developments and current issues; cultural, social, and historical contexts of natural resource use.

Credit Hours: 3

Recommended: junior or senior standing

ANTHRO 4340: Cultural Evolution and Change

(cross-leveled with ANTHRO 7340). Alternative hypotheses about the relationship between culture and evolution are evaluated in light of ethnographic evidence.

Credit Hours: 3

Prerequisites: ANTHRO 2030 or instructor's consent

ANTHRO 4350: Psychological Anthropology

(cross-leveled with ANTHRO 7350). Examines cross-cultural approaches to the study of perception, cognition, and personality; methods for gathering and validating data; examples from non-Western societies.

Credit Hours: 3

ANTHRO 4360: Medical Anthropology

(cross-leveled with ANTHRO 7360). Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. Several non-Western health care systems are studied in detail.

Credit Hours: 3

Recommended: junior or senior standing

ANTHRO 4370: Anthropology of Gender

(same as WGST 4370; cross-leveled with ANTHRO 7370 and WGST 7370). The Anthropology of Gender introduces the student to the variation in the relationships between male and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

Credit Hours: 3

ANTHRO 4380: Anthropological Theories of Religion

(same as REL_ST 4380; cross-leveled with ANTHRO 7380 and REL_ST 7380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology, and witchcraft. The

anthropological explanations examined range from nineteenth century classics to the current approaches of today.

Credit Hours: 3

ANTHRO 4385: Anthropology of Shamanism

(cross-leveled with ANTHRO 7385). Shamans are considered to be intermediates between this world and the spiritual world because they possess the power to communicate with spiritual beings and seek such beings to ask for their help with a variety of tasks such as healing, killing enemies, and weather control. Shamans are also the earliest ritual practitioners. Ancient cave paintings depict men dressed in animal skins, holding objects resembling the rattles used by modern shamans among northern hunting peoples. The cave art also has entopic imagery that is seen in the shaman's mind during his shamanic rituals. In this course we will look at shamanism through time and in many cultures. We will also discuss the early accounts of shamanism by priests, explorers and adventurers, and how anthropology has come to understand and study this phenomenon. Particular topics to be discussed include biological explanations for shamanic trances and visions, mental health concerning shamans, gender issues, and how shamans fit in with societal development and complexity. Graded on A-F basis only.

Credit Hours: 3

ANTHRO 4400: Language and Culture

(same as LINGST 4400; cross-leveled with ANTHRO 7400 and LINGST 7400). Interrelations between language, thought, culture, and society; role of language in cognition; methods and concepts of linguistics in cultural analysis.

Credit Hours: 3

Recommended: ANTHRO 2040 or LINGST 2040

ANTHRO 4412: Gender, Language, and Communication

(same as COMMUN 4412 and LINGST 4412; cross-leveled with COMMUN 7412 and LINGST 7412). Relationship among gender, language, nonverbal communication, and culture.

Credit Hours: 3

Prerequisites: junior standing or departmental consent

ANTHRO 4420: Historical Linguistics

(same as LINGST 4420; cross-leveled with ANTHRO 7420 and LINGST 7420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.

Credit Hours: 3

Recommended: junior or senior standing

ANTHRO 4500: Human Origins

(cross-leveled with ANTHRO 7500). History and theory in the study of human paleontology.

Credit Hours: 5

Prerequisites: ANTHRO 2050 or ANTHRO 2052 or instructor's consent

ANTHRO 4520: Functional Morphology of the Human Skeleton

(cross-leveled with ANTHRO 7520). This course will explore human functional morphology in a broad sense, i.e. will investigate how the

form of various bodily systems influences their function and vice versa. In addition, the course is explicitly evolutionary in perspective; after the basic anatomy and function of a specific bodily region is introduced, we will cover how this functional unit has changed over the course of human evolutionary history. Lastly, we will be using the knowledge gained in lecture and from the text to critically analyze examples of research in human functional morphology. Graded on A-F basis only.

Credit Hours: 3

ANTHRO 4540: Human Biological Variation

(cross-leveled with ANTHRO 7540). Human biological variation both among and within living populations. Evolutionary, genetic, ecological, demographic and especially cultural factors which contribute to biological variation.

Credit Hours: 3

Prerequisites: ANTHRO 2050 or ANTHRO 2051 or BIO_SC 1010

ANTHRO 4580: Evolutionary Medicine

(cross-leveled with ANTHRO 7580). Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class.

Credit Hours: 3

Recommended: lower level course in Biology or Biological Anthropology, junior or senior standing

ANTHRO 4600: Ethnographic Studies of Selected Cultures

(cross-leveled with ANTHRO 7600). Specific content varies with student interest, faculty availability. Will concentrate on peoples and cultures of one area such as East Asia, South Asia, Africa, North America, Mesoamerica, Oceania, Europe. Amplifies ethnographic knowledge gained in lower-level survey courses.

Credit Hours: 3

Recommended: junior standing

ANTHRO 4620: North American Archaeology

(cross-leveled with ANTHRO 7620). Ancient peoples and development of American Indian culture.

Credit Hours: 3

Recommended: ANTHRO 2020 or ANTHRO 2021

ANTHRO 4640: Prehistory of the Greater Southwest

(cross-leveled with ANTHRO 7640). The course will introduce students to the archaeology of aboriginal peoples of the American Southwest and northwestern Mexico. The emphasis will be on prehistoric culture development from the Paleoindians to the arrival of the Spanish. Ethnographic and modern peoples will be discussed as well.

Credit Hours: 3

Recommended: ANTHRO 2020 or ANTHRO 2021

ANTHRO 4650: Prehistory of Mesoamerica

(cross-leveled with ANTHRO 7650). Archaeology and prehistory of Mesoamerica (Mexico and Northern Central America). Emphasis on archaeological evidence for development of human societies from

late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s.

Credit Hours: 3

ANTHRO 4670: Archaeology of South America

(cross-leveled with ANTHRO 7670). Development of culture in South America from the Pleistocene to European contact.

Credit Hours: 3

Recommended: ANTHRO 2020 or ANTHRO 2021

ANTHRO 4680: Cultures and Peoples of the Amazon

(cross-leveled with ANTHRO 7680). Ethnographic survey of indigenous Amazonian cultures.

Credit Hours: 3

Recommended: Junior standing required

ANTHRO 4700: Old World Prehistory

(cross-leveled with ANTHRO 7700). Beginnings of culture in the Old World through the early Iron Age.

Credit Hours: 3

Recommended: ANTHRO 2020 or ANTHRO 2021

ANTHRO 4720: Mesolithic, Neolithic, and Bronze Age Archaeology

(cross-leveled with ANTHRO 7720). Analysis of both hunter-gatherer and food-producing prehistoric sociocultural systems in western Eurasia and adjacent areas from the end of the Pleistocene until the development of iron metallurgy. Includes the symbolic material of these periods.

Credit Hours: 3

Recommended: junior or senior standing

ANTHRO 4740: Celtic and Iron Age Archaeology

(cross-leveled with ANTHRO 7740). Analysis of the pre-and protohistoric sociocultural systems of the Celts and other iron-using tribal cultures of western Eurasia from the inception of an iron based technology until the full historic period. Includes the symbolic material of these cultures.

Credit Hours: 3

Recommended: junior or senior standing

ANTHRO 4770: Asiatic Prehistory

(cross-leveled with ANTHRO 7770). Prehistory and early cultures of Asia excluding the Near East. Emphasis on Northern Asia, China, Japan, South and Southeast Asia and Oceania.

Credit Hours: 3

Recommended: junior or senior standing

ANTHRO 4790: Culture and Society in South Asia

(same as S_A_ST 4790; cross-leveled with ANTHRO 7790 and S_A_ST 7790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include cast, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian diaspora.

Credit Hours: 3

Recommended: junior standing

ANTHRO 4800: Field Methods in Archaeology

(cross-leveled with ANTHRO 7800). Techniques of archaeological excavation; field surveying, recording, care and interpretation of materials.

Credit Hour: 1-8

ANTHRO 4810: Paleoethnobotany

(cross-leveled with ANTHRO 7810). Application of ethnobotanical approaches in archaeology; techniques to recover and interpret floral remains (macroremains, phytoliths, pollen); research questions in ethnobotany; integration of ethnobiological and archaeological data. Critique of original works in the field emphasized.

Credit Hours: 3

Recommended: junior or senior standing

ANTHRO 4820: Zooarchaeology

(cross-leveled with ANTHRO 7820). Survey of specialized techniques for archaeological faunal analysis, including zooarchaeological sampling, taphonomy, study of paleoecology, and recognition of domestication.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2022 or instructor's consent

ANTHRO 4826: Stone Artifact Analysis

(cross-leveled with ANTHRO 7826). Theory, methods, and techniques of studying lithic artifacts and deriving culturally meaningful interpretations. Emphasizes flaked artifacts. Includes physical examination, manufacture and experimentation with stone tools.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2022 or instructor's consent

ANTHRO 4828: Archaeological Analysis of Ceramics

(cross-leveled with ANTHRO 7828). To introduce students to the basic methods and concepts used in the archaeological analysis of pottery. By the end of the semester students will understand the various ways that pottery is created and how archaeologists can use ceramics to gain insights into everything from the organization of craft production to trade to symbolism.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2022

ANTHRO 4830: Ethnographic Methods

(cross-leveled ANTHRO 7830). Relation of problems to techniques; surveys techniques of gathering data; discusses their limitations and potentials.

Credit Hours: 3

Recommended: ANTHRO 2030

ANTHRO 4840: The Comparative Method in Anthropology

(cross-leveled with ANTHRO 7840). Comparative methods provide common ground for uniting bio-cultural anthropologists, archaeologists, and evolutionary biologists together in the investigation of human variation across time and space. It is an exciting time for comparative anthropology with the emergence of a large number of open-access databases covering many realms of biological, cultural, and linguistic variation. This class addresses many research opportunities that

are opened up by these large collaborative efforts. Objectives are to develop research questions of interest to students, compile comparative databases necessary to answer those questions, and learn tools and software relevant for running analyses. Graded on A-F basis only.

Credit Hours: 3

ANTHRO 4850: Practical Phonetics for Fieldwork

(same as LINGST 4850; cross-leveled with ANTHRO 7850 and LINGST 7850). Self-paced course using computer and tape recorded lessons from world's languages. Teaches practical articulatory and transcription phonetics. Weekly meeting with instructor to monitor progress, resolve questions.

Credit Hours: 3

Recommended: junior standing

ANTHRO 4860: Techniques in Linguistic Analysis

(same as LINGST 4860; cross-leveled with ANTHRO 7860 and LINGST 7860). Problems in analyzing data from various languages.

Credit Hours: 3

Recommended: introductory course in Linguistics

ANTHRO 4870: Field Methods in Linguistics

(same as LINGST 4870, ENGLSH 4670; cross-leveled with ANTHRO 7870, LINGST 7870, ENGLSH 7670). Intensive training in collection and analysis of data taken from a native speaker of non-Indo-European language.

Credit Hours: 4

Prerequisites: instructor's consent

Recommended: 9 hours of Linguistics

ANTHRO 4880: Demographic Anthropology

(cross-leveled with ANTHRO 7880). The major topics considered in this course are basic demographic analysis, including life tables, models for population growth and stable population theory; fertility analysis; disease and fertility; disease in human populations; and paleodemography. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: MATH 1100

Recommended: junior or senior standing

ANTHRO 4885: Anthropological Genetics

(cross-leveled with ANTHRO 7885). Population genetics theory and methods applied to human and primate evolution and variation.

Credit Hours: 3

Prerequisites: ANTHRO 2050, or ANTHRO 2051 and ANTHRO 2052, or BIO_SC 1500, or instructor's consent

ANTHRO 4890: Human Skeletal Identification and Analysis

(cross-leveled with ANTHRO 7890). Students interested in archaeology, physical anthropology, and law enforcement will learn human osteological methods of analysis applied to bioarchaeological problems and modern forensic techniques for personal identification.

Credit Hours: 5

Prerequisites: ANTHRO 2050 or ANTHRO 2052 or instructor's consent

ANTHRO 4894: Skeletal Biology

(cross-leveled with ANTHRO 7894). This course is designed to provide students advanced and in-depth training in skeletal biology. Basic bone biology will be studied and advanced methods of skeletal analysis applicable to forensic anthropology and bioarchaeology will be explored.

Credit Hours: 3

Recommended: ANTHRO 4890 or equivalent background in osteology and/ or anatomy

ANTHRO 4940: Internship in Anthropology

(cross-leveled with ANTHRO 7940). Students will work for a semester in a community-based organization (NGO, nonprofit, for profit, or governmental). They will conduct a research study in coordination with that agency. Upon completion of the research study, students will prepare a final report to be given to the agency and turned in for course credit. The course coordinator will help students identify and make contact with interested organization and oversee their progress during the internship. Graded on S/U basis only. Enrollment is limited to Anthropology Majors with Junior Standing or higher with a 3.5 GPA in Anthropology.

Credit Hour: 3-6

Prerequisites: coordinator's consent

ANTHRO 4950: Undergraduate Research in Anthropology

Advanced research approved by and under the direction of a departmental faculty member. Enrollment limited to Juniors and Seniors.

Credit Hour: 2-8

Prerequisites: instructor's consent

ANTHRO 4950H: Honors Research in Anthropology

Individual study and research leading to Honors in Anthropology. In consultation with instructor, student works on Honors Thesis. May be repeated for up to 6 credit hours. Enrollment is limited to Anthropology Majors with Junior Standing or higher, honors eligibility and a 3.5 GPA in Anthropology.

Credit Hours: 3

Prerequisites: instructor's consent

ANTHRO 4960: Undergraduate Readings in Anthropology

Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.

Credit Hour: 1-99

Prerequisites: instructor's consent

ANTHRO 4990: Capstone Seminar in Anthropology

Readings, discussions, and problems in the integration of the subfields of anthropology through theory and examples.

Credit Hours: 3

Prerequisites: Anthropology major and senior standing, or instructor's consent

ANTHRO 7001: Topics in Anthropology-General

Problems, topics, issues, or review of research; experimental development of new contact areas. Specific content varies depending on needs of faculty or students and will be announced in advance.

Credit Hours: 3

ANTHRO 7150: Special Themes in Folklore

(same as ENGLSH 7700; cross-leveled with ANTHRO 4150 and ENGLSH 4700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. May be repeated for a maximum of six hours. Instructor's consent for repetition.

Credit Hours: 3

ANTHRO 7160: Themes in African Diaspora Folklore

(same as ENGLSH 7710 and BL_STU 7710; cross-leveled with ANTHRO 4160, ENGLSH 4710 and BL_STU 4710). Intensive study in a selected area of African Diaspora folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature; or the folklore of a particular group. ENGLSH 7700 and ENGLSH 7710 may be repeated for a maximum of six hours with instructor's consent.

Credit Hours: 3

ANTHRO 7200: Environment and Archaeology

(cross-leveled with ANTHRO 4200). Study of quaternary environments and cultural systems. Focuses on North American records emphasizing climate and biologic components of regional ecosystems; regional environmental reconstruction.

Credit Hours: 3

ANTHRO 7240: History of Archaeology

(cross-leveled with ANTHRO 4240). Growth of archaeology worldwide since AD 1700. Emphasis include intellectual and theoretical developments, field and laboratory techniques, and major figures in the history of the discipline.

Credit Hours: 3

ANTHRO 7280: Archaeology of Religion

(Same as REL_ST 7280; cross-leveled with ANTHRO 4280 and REL_ST 4280) This course examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmological constructs, worldview and ideology in the Americas.

Credit Hours: 3

Prerequisites: ANTHRO 2020 and/or REL_ST 2100

ANTHRO 7300: Comparative Social Organization

(cross-leveled with ANTHRO 4300). Cross-cultural comparison, analysis of social structures. Role of kinship, age, sex, locality, economics, religion and other factors in determining relationships between individuals and groups cross culturally.

Credit Hours: 3

ANTHRO 7320: Ecological and Environmental Anthropology

(cross-leveled with ANTHRO 4320). Cultural anthropological approaches to human-environment interaction; cultural adaptations to diverse environments; theoretical developments and current issues; cultural, social, and historical contexts of natural resource use.

Credit Hours: 3

ANTHRO 7340: Cultural Evolution and Change

(cross-leveled with ANTHRO 4340). Alternative hypotheses about the relationship between culture and evolution are evaluated in light of ethnographic evidence.

Credit Hours: 3

ANTHRO 7350: Psychological Anthropology

Examines cross-cultural approaches to the study of perception, cognition, and personality; methods for gathering and validating data; examples from non-Western societies.

Credit Hours: 3

ANTHRO 7360: Medical Anthropology

(cross-leveled with ANTHRO 4360). Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. Several non-Western health care systems are studied in detail.

Credit Hours: 3

ANTHRO 7370: Anthropology of Gender

(same as WGST 7370; cross-leveled with ANTHRO 4370 and WGST 4370) The Anthropology of Gender Introduces the student to the variation in the relationships between males and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

Credit Hours: 3

ANTHRO 7380: Anthropological Theory of Religions

(same as REL_ST 7380; cross-leveled with ANTHRO 4380 and REL_ST 4380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today.

Credit Hours: 3

ANTHRO 7385: Anthropology of Shamanism

(cross-leveled with ANTHRO 4385). Shamans are considered to be intermediates between this world and the spiritual world because they possess the power to communicate with spiritual beings and seek such beings to ask for their help with a variety of tasks such as healing, killing enemies, and weather control. Shamans are also the earliest ritual practitioners. Ancient cave paintings depict men dressed in animal skins, holding objects resembling the rattles used by modern shamans among northern hunting peoples. The cave art also has entopic imagery that is seen in the shaman's mind during his shamanic rituals. In this course we will look at shamanism through time and in many cultures. We will also discuss the early accounts of shamanism by priests, explorers and adventurers, and how anthropology has come to understand and study this phenomenon. Particular topics to be discussed include biological explanations for shamanic trances and visions, mental health concerning shamans, gender issues, and how shamans fit in with societal development and complexity. Graded on A-F basis only.

Credit Hours: 3

ANTHRO 7400: Language and Culture

(same as LINGST 7400; cross-leveled with ANTHRO 4400 and LINGST 4400). Interrelations between language, thought, culture, and society; role of language in cognition; methods and concepts of linguistics in cultural analysis.

Credit Hours: 3

ANTHRO 7412: Gender, Language, and Communication

(same as COMMUN 7412 and LINGST 7412; cross-leveled with ANTHRO 4412, COMMUN 4412 and LINGST 4412). Relationship among gender, language, nonverbal communication, and culture.

Credit Hours: 3

ANTHRO 7420: Historical Linguistics

(same as LINGST 7420; cross-leveled with ANTHRO 4420 and LINGST 4420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.

Credit Hours: 3

ANTHRO 7500: Human Origins

(cross-leveled with ANTHRO 4500). History and theory in the study of human paleontology.

Credit Hours: 5

ANTHRO 7520: Functional Morphology of the Human Skeleton

(cross-leveled with ANTHRO 4520). This course will explore human functional morphology in a broad sense, i.e. will investigate how the form of various bodily systems influences their function and vice versa. In addition, the course is explicitly evolutionary in perspective; after the basic anatomy and function of a specific bodily region is introduced, we will cover how this functional unit has changed over the course of human evolutionary history. Lastly, we will be using the knowledge gained in lecture and from the text to critically analyze examples of research in human functional morphology. Graded on A-F basis only.

Credit Hours: 3

ANTHRO 7540: Human Biological Variation

(cross-leveled with ANTHRO 4540). Human biological variation both among and within living populations. Evolutionary, genetic, ecological, demographic and especially cultural factors which contribute to biological variation.

Credit Hours: 3

ANTHRO 7580: Evolutionary Medicine

(cross-leveled with ANTHRO 4580). Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class.

Credit Hours: 3

ANTHRO 7600: Ethnographic Studies of Selected Cultures

(cross-leveled with ANTHRO 4600). Specific content varies with student interest, faculty availability. Will concentrate on peoples and cultures of one area such as East Asia, South Asia, Africa, North America, Mesoamerica, Oceania, Europe. Amplifies ethnographic knowledge gained in lower-level survey courses.

Credit Hours: 3

ANTHRO 7620: North American Archaeology

(cross-leveled with ANTHRO 4620). Ancient peoples and development of American Indian culture.

Credit Hours: 3

ANTHRO 7640: Prehistory of the Greater Southwest

(cross-leveled with ANTHRO 4640). The course will introduce students to the archaeology of aboriginal peoples of the American southwest and northwestern Mexico. The emphasis will be on prehistoric culture development from the Paleoindians to the arrival of the Spanish. Ethnographic and modern peoples will be discussed as well.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2021

ANTHRO 7650: Prehistory of Mesoamerica

(cross-leveled with ANTHRO 4650). Covers the archaeology and prehistory of Mesoamerica (Mexico and Northern Central America). Emphasis on archaeological evidence for development of human societies from late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s.

Credit Hours: 3

ANTHRO 7670: Archaeology of South America

(cross-leveled with ANTHRO 4670). Development of culture in South America from the Pleistocene to European contact.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2021 or graduate standing

ANTHRO 7680: Cultures and Peoples of the Amazon

(cross-leveled with ANTHRO 4680). Ethnographic survey of indigenous Amazonian cultures

Credit Hours: 3

ANTHRO 7700: Old World Prehistory

(cross-leveled with ANTHRO 4700). Beginnings of culture in the old world through the early Iron Age.

Credit Hours: 3

ANTHRO 7720: Mesolithic, Neolithic, and Bronze Age Archaeology

(cross-leveled with ANTHRO 4720). Analysis of both hunter-gatherer and food-producing prehistoric sociocultural systems in western Eurasia and adjacent areas from the end of the Pleistocene until the development of iron metallurgy. Includes the symbolic material of these periods.

Credit Hours: 3

ANTHRO 7740: Celtic and Iron Age Archaeology

(cross-leveled with ANTHRO 4740). Analysis of the pre-and protohistoric sociocultural systems of the Celts and other iron-using tribal cultures of western Eurasia from the inception of an iron based technology until the full historic period. Includes the symbolic material of these cultures.

Credit Hours: 3

ANTHRO 7770: Asiatic Prehistory

(cross-leveled with ANTHRO 4770). Survey of the prehistory and early cultures of Asia excluding the Near East. Emphasis on Northern Asia, China, Japan, South and Southeast Asia and Oceania.

Credit Hours: 3

ANTHRO 7790: Cultures and Society in South Asia

(same as S_A_ST 7790; cross-leveled with ANTHRO 4790 and S_A_ST 4790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include cast, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian Diaspora.

Credit Hours: 3

ANTHRO 7800: Field Methods in Archaeology

Techniques of archaeological excavation; field surveying, recording, care and interpretation of materials.

Credit Hour: 1-8

ANTHRO 7810: Paleoethnobotany

(cross-leveled with ANTHRO 4810). Application of ethnobotanical approaches in archaeology; techniques to recover and interpret floral remains (macroremains, phytoliths, pollen); research questions in ethnobotany; integration of ethnobiological and archaeological data. Critique of original works in the field emphasized.

Credit Hours: 3

ANTHRO 7820: Zooarchaeology

(cross-leveled with ANTHRO 4820). Survey of specialized techniques for archaeological/faunal analysis, including zoo archaeological sampling, taphonomy study of paleoecology, and recognition of domestication.

Credit Hours: 3

ANTHRO 7826: Stone Artifact Analysis

(cross-leveled with ANTHRO 4826). Theory, methods, and techniques of studying lithic artifacts and deriving culturally meaningful interpretations. Emphasizes flaked artifacts. Includes physical examination, manufacture and experimentation with stone tools.

Credit Hours: 3

ANTHRO 7828: Archaeological Analysis of Ceramics

(cross-leveled with ANTHRO 4828). To introduce students to the basic methods and concepts used in the archaeological analysis of pottery. By the end of the semester students will understand the various ways that pottery is created and how archaeologists can use ceramics to gain insights into everything from the organization of craft production to trade to symbolism.

Credit Hours: 3

Prerequisites: ANTHRO 2020 and/or ANTHRO 2022

ANTHRO 7830: Ethnographic Methods

(cross-leveled with ANTHRO 4830). Relation of problems to techniques; surveys techniques of gathering data; discusses their limitations and potentials.

Credit Hours: 3

ANTHRO 7840: The Comparative Method in Anthropology

(cross-leveled with ANTHRO 4840). Comparative methods provide common ground for uniting bio-cultural anthropologists, archaeologists, and evolutionary biologists together in the investigation of human variation across time and space. It is an exciting time for comparative anthropology with the emergence of a large number of open-access databases covering many realms of biological, cultural, and linguistic variation. This class addresses many research opportunities that are opened up by these large collaborative efforts. Objectives are to develop research questions of interest to students, compile comparative databases necessary to answer those questions, and learn tools and software relevant for running analyses. Graded on A-F basis only.

Credit Hours: 3

ANTHRO 7850: Practical Phonetics for Fieldwork

(same as LINGST 7850; cross-leveled with ANTHRO 4850 and LINGST 4850). Self-paced course using computer and tape recorded lessons from world's languages. Teaches practical articulatory and transcription phonetics. Weekly meeting with instructor to monitor progress, resolve questions.

Credit Hours: 3

ANTHRO 7860: Techniques in Linguistic Analysis

(same as LINGST 7860; cross-leveled with ANTHRO 4860 and LINGST 4860). Problems in analyzing data from various languages.

Credit Hours: 3

ANTHRO 7870: Field Methods in Linguistics

(same as LINGST 7870 and ENGLSH 7670; cross-leveled with ANTHRO, LINGST 4870 and ENGLSH 4870). Intensive training in collection and analysis of data taken from a native speaker of non-Indo-European language.

Credit Hours: 4

Prerequisites: 6 hours of Linguistics and instructor's consent

ANTHRO 7880: Demographic Anthropology

(cross-leveled with ANTHRO 4880). The major topics considered in this course are basic demographic analysis, including life tables, models for population growth and stable population theory; fertility analysis; disease and fertility; disease in human populations; and paleodemography.

Credit Hours: 3

ANTHRO 7885: Anthropological Genetics

(cross-leveled with ANTHRO 4885). Population genetic theory and methods applied to human and primate evolution and variation.

Credit Hours: 3

Prerequisites: ANTHRO 2050 and ANTHRO 2052 or BIO_SC 1500

ANTHRO 7890: Human Skeletal Identification and Analysis

(cross-leveled with ANTHRO 4890). Students interested in archaeology, physical anthropology, and law enforcement will learn human osteological methods of analysis applied to bioarchaeological problems and modern forensic techniques for personal identification.

Credit Hours: 5

ANTHRO 7894: Skeletal Biology

(cross-leveled with ANTHRO 4894). This course is designed to provide students advanced and in-depth training in skeletal biology. Basic bone biology will be studied and advanced methods of skeletal analysis applicable to forensic anthropology and bioarchaeology will be explored.

Credit Hours: 3

ANTHRO 7940: Internship in Anthropology

Students will work for a semester in a community-based organization (NGO, nonprofit, for profit, or governmental). They will conduct a research study in coordination with that agency. Upon completion of the research study, students will prepare a final report to be given to the agency and turned in for course credit. The course coordinator will help students identify and make contact with interested organization and oversee their progress during the internship. Graded on S/U basis only.

Credit Hour: 3-6

Prerequisites: coordinator's consent

ANTHRO 7950: Introduction to Post-Graduate Anthropology

How to succeed in graduate school and profession, and who is MU Anthropology. Introduces skills for success in graduate school, describes attributes of a professional anthropologist and how to find a job. Handouts and readings supplement discussions. Graded on S/U basis only.

Credit Hour: 1

ANTHRO 7960: Graduate Readings in Anthropology

Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.

Credit Hour: 1-99

Prerequisites: instructor's consent

ANTHRO 7990: Non Thesis Research in Anthropology

Original research not leading to the preparation of a thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent

ANTHRO 8001: Topics in Anthropology-General

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and is announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 8010: History of Anthropology I

Development of anthropological theories, methods, perspectives, major figures and contributions in cultural and linguistic subfields.

Credit Hours: 3

ANTHRO 8020: History of Anthropology II

Development of anthropological theories, methods, perspectives, major figures and contributions in archaeology and biological anthropology.

Credit Hours: 3

ANTHRO 8090: Masters Thesis Research in Anthropology

Advanced work leading to thesis. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: consent of major advisor

ANTHRO 8157: Seminar in Folklore

(same as ENGLSH 8700 and REL_ST 8700). Roots of folklore scholarship and methodology; their evolution in modern approaches to the study of oral, traditional, verbal genres; and their performance in natural folk groups. May repeat to twelve hours with departments consent.

Credit Hours: 3

ANTHRO 8187: Seminar in Ecological Adaptation

Relationships and interactions between humans and their environments, with emphasis on the physical and cultural adaptations to environment. May be repeated to 9 hours maximum.

Credit Hours: 3

ANTHRO 8257: Seminar in Ethnohistory

Introduction to the uses of historical documents and historical methods in anthropological research. May be repeated to 6 hours maximum.

Credit Hours: 3

ANTHRO 8287: Seminar in Theory and Methods in Archaeology

Application of theory and conceptual frameworks to archaeological studies drawn from both Old and New Worlds. May be repeated to 6 hours maximum.

Credit Hours: 3

ANTHRO 8357: Seminar in Psychological Anthropology

Focuses on developments in psychological anthropology, cross-cultural psychology. Special attention on cognition, perception, socialization, personality assessment, psycho-cultural change, psycho-linguistics, psychometrics, within cross-cultural contexts. May be repeated to 6 hours maximum.

Credit Hours: 3

ANTHRO 8387: Seminar in Health Anthropology

We survey the field of health behaviors from an anthropological perspective. We ask, what are health behaviors? and what models have social scientists proposed to account for such actions? May be repeated to 6 hours maximum.

Credit Hours: 3

ANTHRO 8487: Seminar in Anthropological Linguistics

(same as LINGST 8487). Topics: Ethnolinguistics, linguistic prehistory, pidgin and Creole languages, linguistic theories and cultural and cultural analysis. French structural anthropology. May be repeated for 9 hours maximum.

Credit Hours: 3

Prerequisites: instructor's consent

ANTHRO 8587: Seminar in Physical Anthropology

Readings and discussion concerning current problems in human and nonhuman primate evolution, with emphasis on taxonomy, morphology, and behavior. May be repeated to 9 hours maximum.

Credit Hours: 3

ANTHRO 8687: Seminar in Cultural Dynamics

Focuses on geographical, topical, and/or theoretical developments within cultural anthropology. May be repeated to 6 hours maximum.

Credit Hours: 3

ANTHRO 8787: Seminar in Old World Archaeology

Intensive studies in application of anthropological concepts to problems in Old World archaeology and prehistory. May be repeated to 9 hours maximum.

Credit Hours: 3

ANTHRO 8857: Scientific Writing in Anthropology

Students will be taught to construct research papers that reflect logic, organization, and clarity. Topics covered include outline preparation, syntax, punctuation, sentence construction, and correct reference citation.

Credit Hours: 3

ANTHRO 8887: Seminar in Anthropological Methods

Focuses on specific methods/techniques for collecting and analyzing data in archaeological, biological, linguistic, and/or cultural anthropology. May be repeated to 6 hours maximum.

Credit Hours: 3

ANTHRO 8888: Analyzing Anthropological Data I

Provides students with the conceptual and analytic tools necessary to conduct and evaluate the analysis of anthropological data. Examples gleaned from archaeology, bioanthropology, ethnography, and linguistics will provide a broad perspective of the application and utility of the various methods discussed.

Credit Hours: 3

ANTHRO 8889: Analyzing Anthropological Data II

This course introduces a variety of conceptual tools and advanced quantitative methods that anthropologists use to analyze their data. It includes an introduction of common software packages used to manipulate and analyze anthropological data.

Credit Hours: 3

Prerequisites: ANTHRO 8888 or grad-level intro stats or instructor's consent

ANTHRO 8960: Graduate Readings in Anthropology

Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.

Credit Hour: 1-99

Prerequisites: instructor's consent

ANTHRO 8987: Seminar in Formal Anthropological Research Design

Methods of fitting statistical and formal research designs to quantitative and qualitative data discussed and illustrated, with research by participants. May be repeated to 9 hours maximum.

Credit Hours: 3

Prerequisites: introductory course in statistics

ANTHRO 8990: Non Thesis Research in Anthropology

Original research not leading to the preparation of a dissertation.

Credit Hour: 1-99

Prerequisites: consent of major advisor

ANTHRO 9090: Doctoral Dissertation Research in Anthropology

Advanced work leading to dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: consent of major advisor

Arabic (ARABIC)

ARABIC 1100: Elementary Arabic I

For beginners with no prior knowledge of Arabic. An elementary level course designed to facilitate student's acquisition of basic proficiency in communication within culturally significant contexts. Students learn Modern Standard Arabic language skills in an environment integrating interactive video and classroom instruction.

Credit Hours: 6

ARABIC 1200: Elementary Arabic II

This course builds upon the foundation established in ARABIC 1100. Greater emphasis is placed on oral and written expression. Cultural issues are explored in an environment integrating interactive video and classroom instruction.

Credit Hours: 6

Prerequisites: C- or higher in ARABIC 1100, or instructor's permission

ARABIC 2005: Undergraduate Topics in Arabic - Humanities

Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent.

Credit Hour: 1-3

Prerequisites: sophomore standing or instructor's consent

ARABIC 2130: Intermediate Arabic

Builds on students' knowledge of Elementary Arabic by investing in four language skills of listening, speaking, reading, and writing.

Course is culturally oriented and considers various social, political, and religious forces to play in Arab world. Offers a unique blend of modern standards and colloquial Arabic. Enables students to develop listening comprehension, initiate and sustain conversations on daily-life topics, read texts on familiar topics, and write informal essays on topics, and write informal essays on topics connected to daily life.

Credit Hours: 3

Prerequisites: ARABIC 1200 or equivalent

Architectural Studies (ARCHST)

ARCHST 1005: Topics in Architectural Studies - Humanities

Organized study of selected topics in architectural studies. Particular topic and earnable credit may vary by semester. May be repeated for credit up to 6 credit hours.

Credit Hour: 1-99

Prerequisites: instructor's consent

ARCHST 1100: Visual Design

Design study as an introduction to basic design and visual composition with application to creating two- and three-dimensional abstract and /or functional design work. Studio exercises expressed through drawings and abstract models, using various media.

Credit Hours: 3

ARCHST 1200: Architectural Drafting and Working Drawings

Beginning drafting including equipment and materials; lettering; floor plans, sections, elevations; orthographic and axonometric drawings; working drawings; and details.

Credit Hours: 3

ARCHST 1600: Fundamentals of Environmental Design

Survey of the architectural environment emphasizing design fundamentals such as use, aesthetics, stability of structures and human relationships with places and time.

Credit Hours: 3

Prerequisites: ENGLISH 1000

ARCHST 2005: Topics in Architectural Studies - Humanities

Organized study of selected topics in architectural studies. Particular topic and earnable credit may vary by semester. May be repeated for credit up to 6 credit hours.

Credit Hour: 1-99

Prerequisites: instructor's consent

ARCHST 2085: Problems in Architectural Studies

Supervised independent work.

Credit Hours: 3

Prerequisites: instructor's consent

ARCHST 2100: Understanding Architecture and the American City

Analysis of the American city and its architecture.

Credit Hours: 3

ARCHST 2210: Understanding Visualization for Animated Films

Provides a critical overview of design and visualization techniques in animated film making. Emphasizes the role of built environment and spatial design features.

Credit Hours: 3

ARCHST 2220: Introduction to CAD

Introduction to computer-aided drafting and design with AutoCad software. Emphasis will be placed on development of skills and problem solving related to the professions of environmental and interior design.

Credit Hours: 3

Recommended: ARCHST 1200

ARCHST 2230: Design Communication I

Beginning studio course in techniques and conventions of graphic communication as an aid in the design process for interior designers.

Credit Hours: 3

Prerequisites: ARCHST 2811

ARCHST 2310: Building Systems

Integrated building systems: structure, construction, technology, comfort; including voice-data communication, safety, floor, wall, ceiling, mechanical, electrical, and plumbing systems; and project estimating.

Credit Hours: 3

Prerequisites: MATH 1100

ARCHST 2315: Introduction to Building Systems Laboratory

Building system renovations, materials, processes, finishes, and applications testing: furniture design, fabrication, finishing, lighting, concrete and masonry, wood and steel light framing construction, and mock-up fabrication and testing. All equipment training and safety is covered in this introductory course.

Credit Hour: 1

ARCHST 2316: Advanced Building Systems Lab

Advanced exposure to building system renovations, materials, processes, finishes, and applications testing: furniture design, fabrication, finishing, lighting, concrete and masonry, wood and steel light framing construction, and mock-up fabrication and testing. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: ARCHST 2315

ARCHST 2620: People, Places and Design

Understanding human behavior and interaction with environments; the influence of architectural design on built places. Practical application for design.

Credit Hours: 3

ARCHST 2811: Studio I

Application of basic design and composition to built form. Studio exercises in two and three dimensions using various media relating to usable spaces. Formation of design concept, development of form and space, and application in built environment.

Credit Hours: 4

Prerequisites: instructor's consent

ARCHST 3100: Color and Light

The theory, application, and specification of color and light for interior and architectural design. Includes assigned lab exercises for color and light portfolio.

Credit Hours: 3

ARCHST 3182: Studio II

Application of basic design principles to built forms and functional spaces. Identification and manipulation of elements of design, understanding spatial relationships between human body and spatial enclosures related to built forms. Spatial organization and familiarity with role of immediate context.

Credit Hours: 4

Prerequisites: ARCHST 2811

ARCHST 3230: Advanced Design Communication Using BIM

Advanced course in techniques and conventions of computer aided design (CAD) and Building Information Modeling (BIM) for contemporary design process.

Credit Hours: 3

Prerequisites: ARCHST 2230

ARCHST 3371: Design Resource Management

Field experience (5 hours per week) in organization and management of resources used by interior designers, including references, product information, and samples of materials and finishes.

Credit Hour: 1

ARCHST 3600: Environmental Analysis

Discover through analytical methods of primary organizational factors which operate in a building and reveal the preoccupations of designer. Analytical approach investigates design principles by means of dissection.

Credit Hours: 3

Prerequisites: ARCHST 2811

ARCHST 3860: Human Factors Programming

Design Programming for Human Factors using a Case Study.

Credit Hours: 3

Recommended: ARCHST 1600

ARCHST 4001: Topics in Architectural Studies

Selected current topics in field of interest.

Credit Hour: 1-99

ARCHST 4085: Problems in Architectural Studies

Supervised independent work.

Credit Hour: 1-99

Prerequisites: instructor's consent

ARCHST 4230: Computer Graphic Application for Design I

Applications of computer graphics for design and art; includes visualization, animation and creative development. May repeat up to 12 credit hours maximum.

Credit Hours: 3

Recommended: junior standing

ARCHST 4320: Materials, Methods and Products

Inherent qualities of materials used in the design of interior environments. Manufacturing, application, and installation methods. Focus on environmentally sensitive materials.

Credit Hours: 3

Recommended: ARCHST 2310

ARCHST 4323: Sustainable Technologies and Systems

An in-depth study of ecologically-sensitive and energy-efficient strategies used in building and interiors.

Credit Hours: 3

ARCHST 4333: Compliance and Specifications

Application of laws, codes, regulations, standards in specifying for life safety, barrier-free and universal design, lighting, human factors, and contract documents.

Credit Hours: 3

Prerequisites: ARCHST 2220 and ARCHST 2811

ARCHST 4355: Recent Trends in Digital Media I

Recent Trends in Digital Media I

Credit Hour: 1-99

ARCHST 4411: Study Abroad in Architectural History

Discovery of historic architecture through on-site tour of timeless cities and places. May be repeated for credit.

Credit Hour: 1-3

Prerequisites: instructor's consent

ARCHST 4420: History of the Designed Environment after 1750

An in-depth study of the designed environment, including housing, interiors, and furniture of the major historical periods from the Industrial Revolution to today.

Credit Hours: 3

ARCHST 4430: Guiding Design with Historic Preservation

(cross-leveled with ARCHST 7430). Approaches to historic preservation; historic roots of architecture and interiors; regulations and design guidelines governing intervention; assessing significance of historic properties.

Credit Hours: 3

Recommended: American History or Government, or Art History

ARCHST 4435: History of the Designed Environment to 1750

An in-depth study of the designed environment including interiors, architecture, art, and the decorative arts within the major historical periods and cultural context from prehistory to the Industrial Revolution.

Credit Hours: 3

ARCHST 4440: Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution

(cross-leveled with ARCHST 7440). Analysis of historical exemplars of architecture, interiors and furniture design offering strategies for approaching contemporary design problems. Covers design precedents from industrial revolution to contemporary design.

Credit Hours: 3

ARCHST 4550: Visual Presentation for Design

Emphasizes principles and techniques for effective visual design presentation. Focuses on concepts of design, layout, storytelling, critiques, and hands on exercise.

Credit Hours: 3

ARCHST 4555: Recent Trends

Upper-division students seeking additional knowledge in specific subject matter areas including digital media software.

Credit Hour: 1-99

ARCHST 4630: Shaping Human Settlements

Review classic designs and designers, key concepts and enduring issues of community design within the overall framework of environmental design.

Credit Hours: 3

ARCHST 4660: Housing Concepts and Issues

Evaluate housing policies, regulations, codes, programs; global and ecological perspectives of environment and behavior; historic preservation; financial issues; trends and projections.

Credit Hours: 3

ARCHST 4700: Place-Making in Community Design

Ideologies, case studies and participatory methods on place-making in community design. Use processes to design a place-making scheme in actual community project.

Credit Hours: 3

ARCHST 4710: Design Business Practices

Analysis of the basic professional, human, and business skills necessary for the successful design practice.

Credit Hours: 3

Prerequisites: ARCHST 4814 or ARCHST 4824

ARCHST 4760: Healthcare Facilities Design

(cross-leveled with ARCHST 7760). Health care facilities design and planning course provides an in-depth investigation of best practice examples. Design and research methods include evidence-based design, simulation, and space syntax analysis leading to high-performance healthcare design. Graded on A-F basis only.

Credit Hours: 3

Recommended: senior standing

ARCHST 4813: Interiors Studio III

Spatial morphology, organization pattern, construction methods, materials, systems, and processes and integration with total design processes. Space planning and spatial manipulation in response to social, environmental, functional, and aesthetics specific to interiors.

Credit Hours: 4

Prerequisites: ARCHST 3182

ARCHST 4814: Interiors Studio IV

Continuation of ARCHST 4813. Manipulation of form and space responding to programmatic functions and activities, and constraints imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space to multiple-function layered spaces--both vertically and horizontally.

Credit Hours: 4

Prerequisites: ARCHST 4813

ARCHST 4815: Construction Documents and Building Information Modeling Studio

Studio of how materials, systems, and assemblies reinforce and extend intentions of designers. Course teaches strategies and techniques for integration and coordination of the building components and details in construction documents and building information modeling.

Credit Hours: 4

Prerequisites or Corequisites: ARCHST 4814 or ARCHST 4824

ARCHST 4823: Architectural Studio III

Continuation of ARCHST 3182. Spatial morphology, organization pattern, construction methods, materials, systems, and processes and integration with total design process. Space planning and spatial manipulation in response to social, environmental, functional, and aesthetics specifics to architecture.

Credit Hours: 4

Prerequisites: ARCHST 3182

ARCHST 4824: Architectural Studio IV

Continuation of ARCHST 4823. Manipulation of form and space responding to programmatic functions and activities, and constraints imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space to multiple-function layered spaces - both vertically and horizontally.

Credit Hours: 4

Prerequisites: ARCHST 4823

ARCHST 4860: Programming for Thesis Design Studio

Develop written comprehensive program for thesis design studio project. Supervised by student-selected committee -- one departmental thesis advisor and at least one additional faculty member.

Credit Hour: 0-1

Prerequisites: ARCHST 3860 and ARCHST 4814 or ARCHST 4824

ARCHST 4940: Internship in Environmental Design

Field experience in design under professional and educational supervision. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

ARCHST 4960: Readings in Architectural Studio

Readings in recent research materials.

Credit Hour: 1-99

ARCHST 4961: Design Research and Service Design

(cross-leveled with ARCHST 7961). Provides an overview of applied research methods for design and development of products, services and environments. Introduces human-centered approach to design research and Communication of research findings to informed design concepts.

Credit Hours: 3

Recommended: senior standing

ARCHST 4962: Information Visualization and Visual Analytics

(cross-leveled with ARCHST 7962). Foundation for information visualization and deals with external representation and interactive manipulation of information, data or artifacts using digital tools to enhance communication, analytical reasoning and decision-making.

Credit Hours: 3

Recommended: senior standing

ARCHST 4963: Human Factors Research for Design

(cross-leveled with ARCHST 7963). Investigate effect of people's physical psychological, social functions in environments of differing scales. Use research techniques of photo-interviewers, mapping, and user analysis to develop an appropriate program for redesign.

Credit Hours: 3

Recommended: ARCHST 3860

ARCHST 4964: Design Thinking and Creative Process

(cross-leveled with ARCHST 7964). Analysis of how designers think, solve design problems, and engage in the creative process. Includes design methods, design cognition computations, and design protocol studies.

Credit Hours: 3

Recommended: ARCHST 4813 or ARCHST 4823

ARCHST 4990: Thesis Design Studio

Capstone experience on a single comprehensive project. Objective is to enable synthesis of previous course work by addressing a design problem defined in ARCHST 4860.

Credit Hours: 4

Prerequisites: ARCHST 4860, ARCHST 4814 or ARCHST 4824

ARCHST 7001: Topics in Environmental Design

Selected current topics in field of interest.

Credit Hour: 1-99

ARCHST 7085: Problems in Environmental Design

Supervised independent work.

Credit Hour: 1-99

Prerequisites: 3000-level course in field of problem and instructor's consent

ARCHST 7100: Allied Architecture and Urban Design

Overview of the built environment in relation to architecture and allied design. Emphasis on architecture, interior, landscape and urban design studies.

Credit Hours: 3

ARCHST 7230: Computer Graphic Application for Design I

Applications of computer graphics for design and art; includes visualization, animation and creative development. May repeat up to 12 credit hours maximum.

Credit Hours: 3

ARCHST 7232: Graduate Design Communication I

Studio course in techniques and conventions of graphic communication as an aid in the design process of built forms.

Credit Hours: 3

ARCHST 7310: Graduate Building Systems

Integrated building systems; structure construction, technology, comfort; including voice-communications, safety, floor, wall, ceiling, mechanical, electrical, and plumbing systems, project estimating and management.

Credit Hours: 3

Prerequisites: MATH 1100 or MATH 1120

ARCHST 7315: Graduate Systems Laboratory

Experimental learning setting involving building construction systems, renovation, materials and finishes testing and experimentation. Focus on hands-on opportunities investigating building technology properties in detail. Laboratory 3 hrs/week.

Credit Hour: 1-9

ARCHST 7320: Materials, Methods and Products

Inherent qualities of materials used in the design of interior environments. Manufacturing, application, and installation methods. Focus on environmentally sensitive materials.

Credit Hours: 3

Prerequisites: MATH 1100 or MATH 1120

ARCHST 7323: Sustainable Technologies and Systems

An in-depth study of ecologically-sensitive and energy-efficient strategies used in buildings and interiors.

Credit Hours: 3

ARCHST 7325: Energy-Efficient Building Design

This course is a broad study of energy use and energy-efficient strategies for buildings. The course will cover the fundamentals of climate-based design, energy-efficient heating/cooling/daylighting strategies, alternative energy systems applicable to buildings, energy auditing/modeling/verification, applicable building energy codes, and high performance building technologies. Recommended for graduate students with

undergraduate degrees and experience in engineering, architecture, and/or building science.

Credit Hours: 3

ARCHST 7333: Compliance and Specifications

Application of laws, codes, regulations, standards in specifying for life safety, barrier-free and universal design, lighting, human factors, and contract documents.

Credit Hours: 3

Prerequisites: T_A_M 2100 and MATH 1100 or MATH 1120

ARCHST 7355: Recent Trends in Digital Media I

Recent Trends in Digital Media I

Credit Hour: 2-4

ARCHST 7410: History of the Designed Environment to 1750

An in-depth study of the designed environment including housing interiors, and furniture of the major historical periods from prehistory to the Industrial Revolution.

Credit Hours: 3

Prerequisites: AR_H_A 1110 and AR_H_A 1120

ARCHST 7411: Study Abroad in Architectural History

Discovery of historic architecture through on-site tour of timeless cities and places. May be repeated for credit.

Credit Hour: 1-99

Prerequisites: instructor's consent

ARCHST 7420: History of the Designed Environment after 1750

An in-depth study of the designed environment, including housing, interiors, and furniture of the major historical periods from the Industrial Revolution to today.

Credit Hours: 3

Prerequisites: AR_H_A 1110 or AR_H_A 1120

ARCHST 7430: Guiding Design with Historic Preservation

(cross-leveled with ARCHST 4430). Approaches to historic preservation; historic roots of architecture and interiors; regulations and design guidelines governing intervention; assessing significance of historic properties.

Credit Hours: 3

Prerequisites: American History or Government or Art History or instructor's consent

ARCHST 7440: Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution

(cross-leveled with ARCHST 4440). Analysis of historical exemplars of architecture, interiors and furniture design offering strategies for approaching contemporary design problems. Covers design precedents from industrial revolution to contemporary design.

Credit Hours: 3

ARCHST 7550: Visual Presentation for Design

Emphasizes principles and techniques for effective visual design presentation. Focuses on concepts of design, layout storytelling, critiques and hands on exercises.

Credit Hours: 3

ARCHST 7555: Recent Trends in Environmental Design

Upper-division students seeking additional knowledge in specific subject matter areas including digital media software.

Credit Hour: 1-99

ARCHST 7620: Environment and Behavior

Evaluate relationships between human behavior and environmental design. Survey of environment and behavior theoretical foundations examining how these concepts translate into a more responsive theory of design.

Credit Hours: 3

ARCHST 7630: Shaping Human Settlements

Review classic designs and designers, key concepts and enduring issues of community design within the overall framework of environmental design.

Credit Hours: 3

ARCHST 7640: Physical Function and Older Adults

(same as F_C_MD 7750, HMI 7750, H_D_FS 7750, NURSE 7750, P_HLTH 7750, and SOC_WK 7752). This course takes an interdisciplinary approach to understanding and improving the physical function and independence of older adults and explores approaches to alleviate disabling conditions that interfere with physical function and quality of life in old age. Graded on A-F basis only.

Credit Hours: 3

ARCHST 7650: Psychosocial Function and Older Adults

(same as F_C_MD 7751, HMI 7751, H_D_FS 7751, NURSE 7751, P_HLTH 7751 and SOC_WK 7751). This course takes an Interdisciplinary approach to understanding the psychosocial function of older adults and explores approaches to alleviate disabling conditions that interfere with psychosocial function and quality of life in old age. Graded on A-F basis only.

Credit Hours: 3

ARCHST 7660: Housing Concepts and Issues

Evaluate housing policies, regulations, codes, programs; global and ecological perspectives of environment and behavior; historic preservation; financial issues; trends and projections.

Credit Hour: 1-12

ARCHST 7700: Place-Making in Community Design

Ideologies, case studies and participatory methods on place-making in community design. Use processes to design a place-making scheme in actual community project.

Credit Hours: 3

ARCHST 7710: Design Business Practices

Analysis of the basic professional, human, and business skills necessary for the successful design practice. Prerequisites or Corequisites of Studio IV and anticipated graduation during final academic year.

Credit Hours: 3

ARCHST 7760: Healthcare Facilities Design

(cross-leveled with ARCHST 4760). Health care facilities design and planning course provides an in-depth investigation of best practice examples. Design and research methods include evidence-based design, simulation, and space syntax analysis leading to high-performance healthcare design. Graded on A-F basis only.

Credit Hours: 3

ARCHST 7815: Studio V

A continuation of previous studio with emphasis on digital media.

Credit Hours: 4

ARCHST 7840: Graduate Design Studio

Advanced graduate level design experience emphasizing project complexity, design skill refinement, and optional development of thesis project strategies.

Credit Hours: 3

Prerequisites: instructor's consent

ARCHST 7940: Internship in Environmental Design

Field experience in design under professional and educational supervision. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

ARCHST 7960: Readings in Environmental Design

Readings in recent research materials.

Credit Hour: 1-99

ARCHST 7961: Design Research and Service Design

(cross-leveled with ARCHST 4961). Provides an overview of applied research methods for design and development of products, services and environments. Introduces human-centered approach to design research and communication of research findings to inform design concepts.

Credit Hours: 3

ARCHST 7962: Information Visualization and Visual Analytics

(cross-leveled with ARCHST 4962). Foundation for information visualization and deals with external representation and interactive manipulation of information, data or artifacts using digital tools to enhance communication, analytical reasoning and decision-making.

Credit Hours: 3

ARCHST 7963: Human Factors Research for Design

(cross-leveled with ARCHST 4963). Investigate effect of people's physical psychological, social functions in environments of differing scales. Use research techniques of photo-interviewers, mapping, and user analysis to develop an appropriate program for redesign.

Credit Hours: 3

ARCHST 7964: Design Thinking and Creative Process

(cross-leveled with ARCHST 4964). Analysis of how designers think, solve design problems, and engage in the creative process. Includes design methods, design cognition and computations, and design protocol studies.

Credit Hours: 3

ARCHST 8001: Topics in Environmental Design

Selected current topics in field of interest.

Credit Hour: 1-99

ARCHST 8050: Research Methods in Environmental Design

A comparative study of quantitative and qualitative methods in environmental design with emphasis on research results and analyses. Lectures and seminar discussions.

Credit Hours: 3

Prerequisites: 12 hours advanced design

ARCHST 8085: Problems in Environmental Design

Credit Hour: 1-99

Prerequisites: 4000-level course in field of problem and instructor's consent

ARCHST 8090: Master's Research in Environmental Design

Independent research leading to a creative project. Graded on S/U basis only.

Credit Hour: 1-99

ARCHST 8230: Computer Graphic Application for Design II

Creative computer graphic modeling, rendering and animation projects related to the academic background and interests of individual students. May be repeated to 6 hours maximum.

Credit Hours: 3

ARCHST 8233: Graduate Design Communication II

Advanced studio in techniques and conventions of graphic communication as aides in the design process.

Credit Hours: 3

Prerequisites: ARCHST 7232 or advisor's consent

ARCHST 8600: Graduate Environmental Analysis

Analysis of design principles and organizational factors operating in a building by means of dissection. Volumetric disposition, circulation pattern, axes, structural system, materials, purpose, and symbolism.

Credit Hours: 3

ARCHST 8630: Philosophy of Environmental Design Research

Formal environmental design theory concerning historical precedents, current aesthetic trends, and design processes. Assignments investigate philosophical influences, architectonic vocabularies, and communication of idea and artifact. May be repeated up to 12 credit hours.

Credit Hours: 3

ARCHST 8633: Theoretical Perspectives of Design Computing

Key theoretical ideas underlying the relationship between design and computing. Main research topics relevant to current discourse in design computing.

Credit Hours: 3

ARCHST 8650: Theories in Architectural and Interior Design

Architectural and interior design theory is explored as a field of inquiry. Students become familiar with a theoretical framework that is sensitive to the play between the principles of a building (what it is as a design) and the circumstances of a building (what it becomes to be).

Credit Hours: 3

ARCHST 8820: Graduate Digital Design Studio

Graduate level design experience emphasizing project complexity, design skill refinement, and use of digital media for design representation.

Credit Hour: 1-99

ARCHST 8830: Digital Design Studio II

Advanced graduate level design experience emphasizing design, documentation, and representation using digital media. Optional development of graduate thesis project may be scheduled in this studio.

Credit Hours: 4

ARCHST 8840: Graduate Design Studio

Advanced graduate level design experience emphasizing project complexity, design skill refinement, and optional development of thesis project strategies.

Credit Hour: 1-99

Prerequisites: instructor's consent

ARCHST 8850: Seminar in Environmental Design

Reports, discussion of recent work in area of concentration.

Credit Hour: 1-4

ARCHST 8887: Environment and Behavior II

Synthesis of environment and behavior themes in design research and application to professional practice. Research on socio-behavioral phenomena, user groups, places. Emphasis on integrated interactive character of elements.

Credit Hours: 3

ARCHST 8950: Qualitative Research Methods

Explores qualitative research methods as foundation for subsequent study. Focuses on qualitative research of the built environment. Course may be repeated for credit.

Credit Hours: 3

ARCHST 8960: Readings in Environmental Design

Readings in recent research materials.

Credit Hour: 1-99

Prerequisites: ARCHST 4960 or ARCHST 7960

ARCHST 8990: Thesis Project Proposal

The formal opportunity to express the intent and scope of the thesis project.

Credit Hour: 1

Prerequisites: instructor's consent

ARCHST 9001: Topics in Environmental Design

Selected current topics in field of interest.

Credit Hour: 1-99

ARCHST 9085: Problems in Environmental Design

Credit Hour: 1-99

Prerequisites: 4000-level course in field of problem and instructor's consent

ARCHST 9090: Doctoral Research in Environmental Design

Independent research leading to thesis or dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

ARCHST 9555: Recent Trends in Environmental Design

For students seeking additional knowledge and understanding in specific subject matter areas.

Credit Hour: 1-99

ARCHST 9990: Dissertation Proposal

A formal dissertation proposal is written and presented to the dissertation committee for approval.

Credit Hour: 1

Prerequisites: instructor's consent

ARCHST 9995: Pilot Project for Dissertation

Working with advisor, student proposes, conducts, and reports the findings from a pilot study germane to the dissertation topic in preparation for the dissertation research.

Credit Hour: 1-99

Prerequisites: instructor's consent

Art History And Archaeology (AR_H_A)

AR_H_A 1005: Undergraduate Topics in Art History and Archaeology- Humanities

Special studies in Art History and Archaeology.

Credit Hour: 1

AR_H_A 1010: Introduction to Museum of Art and Archaeology, UMC

This course is a brief introduction to the Museum of Art and Archaeology on Francis Quadrangle. Special attention will be given to the history of

the Museum, to its operation and to its collection. Guest lecturers from the from the Museum will provide first hand accounts of their contributions to the day-to-day operations of the Museum and to the academic mission of the University.

Credit Hour: 1

AR_H_A 1020: Giotto and the Arena Chapel

This course is a brief introduction to one of the major monuments of western art, the Area (or Scrovegni) Chapel of Giotto di Bondone. Special attention will be given to stories about him by Renaissance authors.

Credit Hour: 1

AR_H_A 1030: Early Works of Michelangelo

This course is a brief introduction to the life and work of Michelangelo. Special attention will be given to his early works and to stories about him, especially those by Giorgio Vasari in his Lives of the Artist, Florence, 1568.

Credit Hour: 1

AR_H_A 1040: Rembrandt

This course is a brief introduction to the life and work of the seventeenth-century Dutch painter Rembrandt van Rijn. Special attention is give to the appreciation of his art by his contemporaries.

Credit Hour: 1

AR_H_A 1105: Undergraduate Topics in Art History and Archaeology

Special studies in Art History and Archaeology.

Credit Hours: 3

AR_H_A 1110: Ancient and Medieval Art

Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe.

Credit Hours: 3

AR_H_A 1110H: Ancient & Medieval Art - Honors

Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe.

Credit Hours: 3

Prerequisites: Honors eligibility required

AR_H_A 1120: Renaissance through Modern Art

Introductory survey of architecture, sculpture and painting of Europe and America from the Renaissance to Modern times.

Credit Hours: 3

AR_H_A 1120H: Renaissance through Modern Art - Honors

Introductory survey of architecture, sculpture and painting of Europe and America from the Renaissance to Modern times.

Credit Hours: 3

Prerequisites: Honors eligibility required

AR_H_A 1230: Introduction to Asian Arts

(same as HIST 1820, REL_ST 1820, S_A_ST 1152). This course is an introduction to the literature and visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.

Credit Hours: 3

AR_H_A 2005: Topics Art History and Archaeology - Humanities

Study of special topics in Art History and Archaeology.

Credit Hour: 1-3

AR_H_A 2150: The Art of the Book

Introduction to the illustrated book as a locus of artistic style, cultural currency, and visual literacy.

Credit Hours: 3

AR_H_A 2230: Introduction to the Arts of Islam

Architecture, decorative arts and painting of the Muslim world from the seventh to the 19th century. The formation of Islamic art and its relationships with religion, philosophy and symbolism.

Credit Hours: 3

AR_H_A 2410: Ancient Technology

Engineering, architecture, and military technology in the ancient world.

Credit Hours: 3

AR_H_A 2720: African-American Visual Culture

(same as BL_STU 2720) This course introduces students to African-American art history, visual culture, and material culture in the cultural, political, and historical contexts. Specific focuses may include Harlem Renaissance, the Black Arts Movement, and other topics.

Credit Hours: 3

AR_H_A 2830: American Art and Architecture

Architecture, sculpture, painting of America from 17th century to present day.

Credit Hours: 3

AR_H_A 2850: Introduction to Visual Culture

Introduction to the problems of understanding, analyzing, and writing about visual culture.

Credit Hours: 3

AR_H_A 2860: The Lives of Objects

Introduction to the problems of understanding, analyzing and writing about art history and material culture.

Credit Hours: 3

AR_H_A 2940: Archaeological Methods

Methods of excavating various types of sites; recording, preserving their materials.

Credit Hour: 2-6

Prerequisites: instructor's consent

AR_H_A 2960: Special Readings in Art History and Archeology

Independent readings and research selected in consultation with supervisory faculty.

Credit Hour: 1-3

Prerequisites: instructor's consent

AR_H_A 3005: Topics in Art History and Archaeology- Humanities

Selected studies in various facets of art history and archaeology.

Credit Hour: 1-3

AR_H_A 3005H: Topics in Art History and Archaeology- Humanities - Honors

Selected studies in various facets of art history and archaeology. Enrollment limited to students with Honors eligibility.

Credit Hour: 1-3

Prerequisites: instructors consent

AR_H_A 3010: Study Abroad in Art History and Archaeology

Instruction in art history, architecture, or archaeology takes place in a foreign country or countries. Trips are led and taught by University of Missouri faculty.

Credit Hour: 3-6

Prerequisites: departmental consent

Recommended: Sophomore standing or higher

AR_H_A 3120: Art and Gender in Antiquity

Comparative survey of Egypt, Greece, and Rome, focusing on gender construction and cultural perception through material resources.

Credit Hours: 3

AR_H_A 3210: Near Eastern and Egyptian Art and Archaeology

General survey of material culture of the Near East and Egypt from the earliest times to the early Iron Age.

Credit Hours: 3

Recommended: AR_H_A 1110 or equivalent

AR_H_A 3310: Greek Art and Archaeology

General survey of material culture in Greece from earliest times to the Hellenistic period.

Credit Hours: 3

Recommended: AR_H_A 1110 or equivalent

AR_H_A 3410: Roman Art and Archaeology

General survey of material culture in the Roman world from earliest times through the 3rd century.

Credit Hours: 3

Recommended: AR_H_A 1110 or equivalent

AR_H_A 3510: Byzantine and Islamic Art and Archaeology

General survey of the visual world of the Middle Ages in southwest Asia and the east Mediterranean, from late antiquity through the rise of the Ottoman empire.

Credit Hours: 3

Recommended: AR_H_A 1110 or equivalent

AR_H_A 3520: Early Medieval Art and Archaeology

An investigation of the arts of western Europe during the first millennium, when the unifying traditions of Rome were transformed by the diverse cultures of her Northern neighbors.

Credit Hours: 3

Recommended: AR_H_A 1110 or equivalent

AR_H_A 3530: Late Medieval Art

General survey of European art and architecture from the 11th through the 14th centuries.

Credit Hours: 3

Recommended: AR_H_A 1110 or equivalent

AR_H_A 3620: Italian Renaissance Art

General survey of the architecture, painting and sculpture of Italy from the 14th through the 16th century.

Credit Hours: 3

Recommended: AR_H_A 1110 or AR_H_A 1120 or equivalent

AR_H_A 3630: Northern Renaissance Art

General survey of northern European art and architecture from the late 14th through the late 16th century.

Credit Hours: 3

Recommended: AR_H_A 1120 or equivalent

AR_H_A 3640: Baroque Art

General survey of 17th century European architecture, painting and sculpture.

Credit Hours: 3

Recommended: AR_H_A 1120 or equivalent

AR_H_A 3720: Cities in the Western Imagination

Interdisciplinary introduction to the forms, functions, and meanings of cities in Europe and the Americas from ancient to modern times; plans and predictions for the future also considered. Emphasis is placed on cities as fields for imaginative activity on the part of those who have designed, built, used, and interpreted them.

Credit Hours: 3

AR_H_A 3730: Eighteenth Century European Art

General survey of 18th-century European painting, sculpture and architecture.

Credit Hours: 3

Recommended: AR_H_A 1120 or equivalent

AR_H_A 3740: Nineteenth Century European Art

General survey of 19th-century European painting, sculpture and architecture.

Credit Hours: 3

Recommended: AR_H_A 1120 or equivalent

AR_H_A 3750: Modern Art in Europe and America

General survey of international directions in painting, sculpture, and architecture from 1885 to ca. 1940.

Credit Hours: 3

Recommended: AR_H_A 1120 or equivalent

AR_H_A 3760: Contemporary Art

General survey of painting, sculpture, and architecture from the Second World War to the present.

Credit Hours: 3

Recommended: AR_H_A 1120 or equivalent

AR_H_A 3775: The Ancient World on Film

(same as CL_HUM 3775 and FILM_S 3775) This course explores how classical antiquity has been represented in twentieth and twenty-first-century film, with particular emphasis on the ways in which ancient narratives and iconography have been appropriated by filmmakers to address contemporary cultural issues.

Credit Hours: 3

Recommended: Prior 2000 level coursework in Classical Humanities, Art History and Archaeology, or Film Studies

AR_H_A 3780: Architecture in Film

(same as FILM_S 3780) Filmmakers use architecture to convey meaning on symbolic, psychological, and ideological levels. Using architectural history and theory, in conjunction with weekly film screenings from a variety of genres, this course explores how architecture operates within film.

Credit Hours: 3

AR_H_A 3785: Arts and Artists on Film

(same as FILM_S 3785) This course explores representations of art and artists in film, including documentary films, fictionalized films, and films made by artists.

Credit Hours: 3

AR_H_A 3790: Indian Cinema

(same as ANTHRO 3490, S_A_ST 3490 and FILM_S 3490). Indian Cinema provides an overview of the key genres and themes of Indian film, including Bollywood, art cinema/parallel cinema, Indian regional cinemas, and diasporan cinema. The course combines film studies, anthropological, historical, and visual culture analyses to provide a holistic view of Indian culture and society through cinema.

Credit Hours: 3

Recommended: Sophomore standing or higher

AR_H_A 3830: American Art and Culture, 1500-1820

General survey of American visual culture - painting, sculpture, architecture-between 1500 and 1820.

Credit Hours: 3

Recommended: AR_H_A 1120 or equivalent

AR_H_A 3840: American Art and Culture, 1820-1913

General survey of American visual culture - painting, sculpture, architecture, photography - between 1820-1913.

Credit Hours: 3

Recommended: AR_H_A 1120 or AR_H_A 2830 or equivalent

AR_H_A 3850: American Art and Culture, 1913-Present

General survey of American visual culture - painting, sculpture, architecture, photography, advertising, film, new media - between 1913 and the present.

Credit Hours: 3

Recommended: AR_H_A 1120 or AR_H_A 2830 or equivalent

AR_H_A 4005: Topics in Art History and Archaeology-Humanities

Special studies in art history/archaeology; covers subjects not included in regularly offered courses.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 4120: Gender and the Arts

(same as WGST 4120; cross-leveled with WGST 7120, AR_H_A 7120). Exploration of the relationship between the visual arts and constructions of gender and sexuality in selected eras.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4320: Archaeology of the Aegean Bronze Age

(cross-leveled with AR_H_A 7320). Analysis of the material culture of Greek prehistoric civilizations from 3000 to 1000 B.C.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4340: Greek Architecture

(cross-leveled with AR_H_A 7340). Survey of the art of building in the Aegean and Classical world from earliest times to the Hellenistic period.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4350: Greek Pottery

(cross-leveled with AR_H_A 7350). Examination of pottery and vase painting with an emphasis on production, iconography, and social context.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4360: Greek Sculpture

(cross-leveled with AR_H_A 7360). Survey of sculptor's art in Aegean and Classical world from earliest times to Hellenistic period.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4420: Minor Arts of Antiquity

(cross-leveled with AR_H_A 7420). Discussion of selected minor arts and crafts of the Greco-Roman world.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4440: Roman Architecture

(cross-leveled with AR_H_A 7440). The history of Roman architecture, origin and development of forms and techniques, major monuments in Rome and its provinces through the 3rd century after Christ.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4460: Roman Sculpture

(cross-leveled with AR_H_A 7460). The origins and development of sculpture in the Roman Republic and the Roman Empire.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4490: Late Antique Art and Archaeology

(cross-leveled with AR_H_A 7490). Exploration of the material culture of the Mediterranean world from the 3rd century to Iconoclasm.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4510: Byzantine Art and Archaeology

(cross-leveled with AR_H_A 7510). Exploration of the material culture of the east Mediterranean between the 6th and 15th centuries.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4520: Art and Archaeology of Early Medieval Europe

(cross-leveled with AR_H_A 7520). Exploration of the material culture of western Europe from the 5th century to c. 1000.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4530: Romanesque Art and Architecture

(cross-leveled with AR_H_A 7530). Exploration of topics in the art and architecture of Europe from the 10th through the 12th centuries.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4540: Gothic Art and Architecture

(cross-leveled with AR_H_A 7540). Exploration of topics in the art and architecture of the 12th through the 14th century.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4620: Michelangelo and the High Renaissance

(cross-leveled with AR_H_A 7620). Sculpture, architecture, paintings, and drawings of Michelangelo in the context of his times.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4630: The Renaissance Artist

(cross-leveled with AR_H_A 7630). Lectures, readings, discussions and a research paper related to the Renaissance artist. Focus will be on representations of the artist in art and literature from ca. 1300 to ca. 1650.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4640: Renaissance and Baroque Architecture

(cross-leveled with AR_H_A 7640). Problems in European architectural history from the 15th through the 18th century.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4650: Venetian Painting

(cross-leveled with AR_H_A 7650). Survey of Venetian Painting from the 14th through the 18th century.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4660: Art and Ideas in the Northern Renaissance

(cross-leveled with AR_H_A 7660). Discussion of selected topics in painting and sculpture and their artistic and cultural relationships from the 14th through the 16th century in northern Europe.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4670: Baroque Figural Arts

(cross-leveled with AR_H_A 7670). Painting and sculpture of Italy in the 17th century.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4710: The Arts of the Rococo

(cross-leveled with AR_H_A 7710). This course explores European Art from approximately 1710 to 1770, focusing on art associated with two different social sectors: The early modern aristocratic court culture whose artistic predilections had formed the European norm, and the increasingly powerful merchant classes whose newfound wealth enabled new artistic genres and styles to proliferate. Our inquiry begins with an exploration of the rococo as an ornamental style; we examine its origins in Italian garden architecture and subsequent transformation into a decoration for both French palatial interiors and German Churches. We then launch a succession of case studies of important artists, media, and objects in order to assess the varied ways that diverse social identities were deflected through the periods' art and architecture. Students will pursue a research topic on rococo art for their semester project.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4720: Revolution and Romanticism: Art C. 1800

(cross-leveled with AR_H_A 7720). This course examines European art from circa 1780 to 1820, focusing on art made in conjunction with the major events of the French Revolution, its aftermath, and its global repercussions. May be repeated for credit.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4730: Realism Through Post-Impressionism

(cross-leveled with AR_H_A 7730). Styles and issues in nineteenth-century art.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4740: Modern Architecture

(cross-leveled with AR_H_A 7740). Problems in the history of architecture from the late 18th century to the present.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4750: Contemporary World Architecture

(cross-leveled with AR_H_A 7750). This course will study key themes, events, and figures in architectural theory and practice from around the world since the 1960s. As with any course treating such a large body of material, this one will be selective topical rather than comprehensive in nature. The format will include lectures, discussions based on reading, writing, and research assignments, films, and field trips. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4760: Modern Sculpture

(cross-leveled with AR_H_A 7760). Sculpture in Europe and the U.S. ca. 1880 to the present, with special emphasis on changing definitions of the medium.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4780: Advanced Course in Contemporary Art

(cross-leveled with AR_H_A 7780). Topics in European and American painting and sculpture after 1950.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4820: American Material Culture

(cross-leveled with AR_H_A 7820). An exploration of American material culture from a multidisciplinary perspective.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4840: American Architecture

(cross-leveled with AR_H_A 7840). An exploration of architecture and urbanism from the colonial period to the present.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4960: Special Readings in Art History and Archaeology

Independent readings and research selected in consultation with supervisory faculty.

Credit Hour: 1-3

Prerequisites: instructor's consent

AR_H_A 4970: Capstone: Art History and Archaeology

Students will write an expanded, guided research paper. The Capstone student will consult on a regular basis with the professor responsible for the course and will make an oral presentation of the paper in the course. Must be taken in conjunction with a 4000-level Art History and Archaeology course.

Credit Hour: 1

Prerequisites: instructor's consent

AR_H_A 4980: Internship

A one-semester or full summer intensive internship for departmental majors with specific projects and responsibilities to be arranged by the student in cooperation with a faculty member and an appropriate agent of the museum involved. May be taken as an elective only. May be repeated for a maximum of 6 hours credit.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4996: Honors Proseminar I

Research methods, bibliography, use and criticism of source material.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4999: Honors Reading and Research I

Individual research projects in preparation of senior thesis.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7005: Topics in Art History and Archaeology

Special studies in art history or archaeology; covers subjects not included in regularly offered courses.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 7120: Gender and the Arts

(same as WGST 7120; cross-leveled with AR_H_A 4120, WGST 4120). Exploration of the relationship between the visual arts and constructions of gender and sexuality in selected eras.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7130: Museum Studies

Functions and history of museums and interrelations among departments, including those of director, curator, registrar, education, conservation, and marketing. Topics include acquisitions policies; public outreach;

role of architecture; and philosophical and legal issues pertaining to administration of museums.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7170: Historic Preservation

(same as HIST 7450). Survey of the historic preservation movement and techniques by faculty and guest speakers active in the field.

Credit Hour: 3-9

Prerequisites: instructor's consent

AR_H_A 7320: Archaeology of the Aegean Bronze Age

(cross-leveled with AR_H_A 4320). Analysis of the material culture of Greek prehistoric civilizations from 3000 to 1000 B.C.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7340: Greek Architecture

(cross-leveled with AR_H_A 4340). Survey of the art of building in the Aegean and Classical world from earliest times to the Hellenistic period.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7350: Greek Pottery

(cross-leveled with AR_H_A 4350). Examination of pottery and vase painting with an emphasis on production, iconography, and social context.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7360: Greek Sculpture

(cross-leveled with AR_H_A 4360). Survey of sculptor's art in Aegean and Classical world from earliest times to Hellenistic period.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7420: Minor Arts of Antiquity

(cross-leveled with AR_H_A 4420). Discussion of selected minor arts and crafts of the Greco-Roman world.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7440: Roman Architecture

(cross-leveled with AR_H_A 4440). The history of Roman architecture, origin and development of forms and techniques, major monuments in Rome and its provinces through the 3rd century after Christ.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7460: Roman Sculpture

(cross-leveled with AR_H_A 4460). The origins and development of sculpture in the Roman Republic and the Roman Empire.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7490: Late Antique Art and Archaeology

(cross-leveled with AR_H_A 4490). Exploration of the material culture of the Mediterranean world from the 3rd century to Iconoclasm.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7510: Byzantine Art and Archaeology

(cross-leveled with AR_H_A 4510). Exploration of the material culture of the east Mediterranean between the 6th and 15th centuries.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7520: Art and Archaeology of Early Medieval Europe

(cross-leveled with AR_H_A 4520). Exploration of the material culture of western Europe from the 5th century to c. 1000.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7530: Romanesque Art and Architecture

(cross-leveled with AR_H_A 4530). Exploration of topics in the art and architecture of Europe from the 10th through the 12th centuries.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7540: Gothic Art and Architecture

(cross-leveled with AR_H_A 4540). Exploration of topics in the art and architecture of the 12th through the 14th century.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7620: Michelangelo and the High Renaissance

(cross-leveled with AR_H_A 4620). Sculpture, architecture, paintings, and drawings of Michelangelo in the context of his times.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7630: The Renaissance Artist

(cross-leveled with AR_H_A 4630). Lectures, readings, discussions and a research paper related to the Renaissance artist. Focus will be on representations of the artist in art and literature from ca. 1300 to ca. 1650.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7640: Renaissance and Baroque Architecture

(cross-leveled with AR_H_A 4640). Problems in European architectural history from the 15th through the 18th century.

Credit Hours: 3

Prerequisites: departmental consent

AR_H_A 7650: Venetian Painting

(cross-leveled with AR_H_A 4650). Survey of Venetian painting from the 14th through the 18th century.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7660: Art and Ideas in the Northern Renaissance

(cross-leveled with AR_H_A 4660). Discussion of selected topics in painting and sculpture and their artistic and cultural relationships from the 14th through the 16th century in northern Europe.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7670: Baroque Figural Arts

(cross-leveled with AR_H_A 4670). Painting and sculpture of Italy in the 17th century.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7710: The Arts of the Rococo

(cross-leveled with AR_H_A 4710). This course explores European art from 1710 to 1770, beginning with an exploration of the rococo as an ornamental language and then moving to case studies of artists, media, and objects in order to assess how social identities were expressed through design.

Credit Hours: 3

Prerequisites: AR_H_A 8110 and instructor's consent

AR_H_A 7720: Revolution and Romanticism: Art Circa 1800

(cross-leveled with AR_H_A 4720). This course examines European art from circa 1780 to 1820, focusing on art made in conjunction with the major events of the French Revolution, its aftermath, and its global repercussions.

Credit Hours: 3

Prerequisites: AR_H_A 8110 and instructor's consent

AR_H_A 7730: Realism Through Post-Impressionism

(cross-leveled with AR_H_A 4730). Styles and issues in nineteenth-century art.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7740: Modern Architecture

(cross-leveled with AR_H_A 4740). Problems in the history of architecture from the late 18th century to the present.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7750: Contemporary World Architecture

(cross-leveled with AR_H_A 4750). This course will study key themes, events, and figures in architectural theory and practice from around the world since the 1960s. As with any course treating such a large body of material, this one will be selective, topical rather than comprehensive in

nature. The format will include lectures, discussions based on reading, writing, and research assignments, films and field trips. Graded A-F only.

Credit Hours: 3

Prerequisites: AR_H_A 1120 and instructor's consent

AR_H_A 7760: Modern Sculpture

(cross-leveled with AR_H_A 4760). Sculpture in Europe and the U.S. ca. 1880 to the present, with special emphasis on changing definitions of the medium.

Credit Hours: 3

Prerequisites: departmental consent

AR_H_A 7780: Advanced Course in Contemporary Art

(cross-leveled with AR_H_A 4780). Topics in European and American painting and sculpture after 1950.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7820: American Material Culture

(cross-leveled with AR_H_A 4820). An exploration of American material culture from a multidisciplinary perspective.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7840: American Architecture

(cross-leveled with AR_H_A 4840). An exploration of architecture from the colonial period to the present.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7940: Archaeological Methods

(cross-leveled with AR_H_A 4940). Methods of excavating various types of sites; recording, preserving their materials.

Credit Hour: 2-6

Prerequisites: instructor's consent

AR_H_A 7960: Special Readings in Art History or Archaeology

Independent readings and research selected in consultation with supervisory faculty.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 7980: Internship in Art History and Archaeology

A one semester or full summer intensive internship with specific projects and responsibilities to be arranged by the student and the program director.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 8070: Master's Tutorial

Consultation with faculty advisory and preparation of a scholarly essay based on a graduate research paper. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: AR_H_A 8110, and other graduate courses in Art History & Archaeology

AR_H_A 8080: Readings for MA Thesis in Art History and Archaeology

Reading, critical evaluation of literature of special fields of art history and/or archaeology.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8090: Master's Thesis Research and Thesis

Individual research leading to preparation of the M.A. thesis Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8110: Introduction to Graduate Study

Research methods, bibliography, use and criticism of source material. Required of graduate students in Art History and Archaeology who have not had AR_H_A 4996.

Credit Hours: 3

Prerequisites: departmental consent

AR_H_A 8120: Theories and Methodologies in Art History and Archaeology

Literature of art and archaeology in terms of works of leading European and American art historians, archaeologists.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 8130: Museum Studies Seminar

Appropriate means for care and display of artifacts. Topics include: accessioning, cataloging, retrieval of information, and laws and ethics of collecting; the museum environment and its monitoring; condition reports, shipping and storage, and conservation. Field trips.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 8140: Art Theory and Criticism

Theoretical and critical literature of art from earliest times to the present.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 8170: Historic Preservation Seminar

Research techniques to solve research problems and conduct field recording in historic preservation, material culture, historic architecture, and cultural heritage studies.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 8320: Seminar in Greek Art and Archaeology

Special subjects of study assigned for individual research; discussion of reports by seminar members.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8420: Seminar in Roman Art and Archaeology

Special subjects of study assigned for individual research; discussion of reports by seminar members.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8440: Ancient/Medieval Topography

(same as CLASS 8440). Descriptive and historical analysis of a selected city or site. Subject varies.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8490: Seminar in Late Antique Art and Archaeology

Special subjects of study assigned for individual research; discussion of reports by seminar members.

Credit Hours: 3

Prerequisites: AR_H_A 7490 or equivalent

AR_H_A 8520: Seminar in Medieval Art and Archaeology

Specific subjects of study will be assigned to students for presentation in relation to broader questions of the cultural/ historical phenomena of the time, from ca 700 to ca 1400.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8620: Seminar in Renaissance Art

Special subjects of study assigned for Northern or Southern Renaissance for individual research, discussion of reports by seminar members.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 8710: Seminar in 18th Century Art

Special subjects of study in 18th century art assigned for individual research; reports to be presented and discussed by seminar members.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8720: Seminar in 19th Century Art

Special subjects of study in 19th century art assigned for individual research; reports to be presented and discussed by seminar members.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8740: Seminar in Modern Architecture

Special subjects of study assigned for individual research; discussion of reports by seminar members.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8750: Seminar in Modern and Contemporary Art

Special subjects of study assigned for individual research; discussion of reports by seminar members.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8800: Seminar in American Art

Special subjects of study assigned for individual research; discussion of reports by seminar members.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 9080: Readings for PhD Dissertation in Art History and Archaeology

Reading, critical evaluation of literature of special fields of art history and/or archaeology.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 9090: Doctoral Dissertation Research in Art History and Archaeology

Individual research leading to preparation of the Ph.D. dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

Art-Ceramics (ART_CERM)

ART_CERM 2100: Beginning Ceramics

Exploration of ceramic art as an expressive, communicative medium. Study of ceramic design, technique and historic and contemporary models within the context of the creative process. Group critiques, slides, demonstrations. Expendable materials fee.

Credit Hours: 3

ART_CERM 3100: Intermediate Ceramics

Continuation of ART_CERM 2100 with emphasis on wheel throwing and the vessel format. Further exploration of glazing and firing techniques. Group and individual critiques, demonstrations, slide lectures and visiting artists. Expendable materials fee.

Credit Hours: 3

Prerequisites: instructor's consent

ART_CERM 4100: Advanced Ceramics

Continuation of ART_CERM 3100. Includes advanced problems in firing, clay and glaze technology, forming and ornamentation. Payment of expendable materials fee required. May be repeated to 15 hours maximum.

Credit Hours: 3

Prerequisites: instructor's consent

ART_CERM 4110: Ceramics Sculpture

Sculptural forms constructed of slabs, coils and wheel-thrown elements. Payment of expendable materials expense is required. May be repeated to 15 hours maximum.

Credit Hours: 3

ART_CERM 4185: Problems in Ceramics

Problems in Ceramics.

Credit Hour: 1-3

Prerequisites: departmental consent

ART_CERM 7100: Graduate Ceramics

Advanced study of ceramic technology and design concepts with emphasis on directed development of individual work. Payment of expendable materials expense is required. May be repeated to 18 hours maximum.

Credit Hours: 3

Prerequisites: ART_CERM 4100

ART_CERM 7110: Graduate Ceramic Sculpture

Directed development of individual work. Payment of expendable materials expense is required. May be repeated to 18 hours maximum.

Credit Hours: 3

Prerequisites: ART_CERM 4100

ART_CERM 7185: Problems in Ceramics

Graduate level work in ceramics.

Credit Hour: 1-3

Prerequisites: ART_CERM 7100 and ART_CERM 7110 and departmental consent

ART_CERM 8100: Graduate Ceramics II

Continuation of ART_CERM 7100. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_CERM 7100 or equivalent

Art-Drawing (ART_DRAW)

ART_DRAW 1050: Drawing I

An introduction to visual hierarchy, composition, and pictorial space in drawing. Emphasis on linear perspective and the language of light and shadow using black and white media (graphite, charcoal and/or conte crayon). Development of skills and concepts in drawing based on historical models, lectures, demonstrations and critiques. Expendable materials fee required.

Credit Hours: 3

ART_DRAW 2200: Drawing II

An introduction to drawing systems, problem solving and study of the proportions of the human form. Development of skills and concepts in drawing based on historical and contemporary models, lectures, demonstrations and critiques. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050

ART_DRAW 2210: Beginning Color Drawing

Theory and practice in the use of pastel working from stilllife, landscape, and portrait. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050

ART_DRAW 3200: Drawing III

Development of drawing techniques with an emphasis on materials and methods. Emphasis in conceptual and formal skills based on contemporary and historical models. May be repeated to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050

ART_DRAW 3210: Intermediate Color Drawing

Continuation of ART_DRAW 2210 with emphasis on design and organization. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050 and ART_DRAW 2210

ART_DRAW 3220: Anatomical Drawing

Anatomical structure of human figure as it relates to art. Drawing from live model; emphasis on gross anatomy as defined by skeletal and muscular structure. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050

ART_DRAW 3230: Beginning Illustration

An introduction to visual problem solving from initial concept through final execution. Emphasis in drawing and painting skills and exploration of mixed media techniques including drawing from the model. Graded on A-F basis only. Expendable materials fee.

Credit Hours: 3

Prerequisites: ART_DRAW 1050

ART_DRAW 4200: Drawing IV

This course will provide an intensive experience in the development of a portfolio of artwork. Students will explore the connections between their work and contemporary art. May be repeated 3 times. Expendable Materials Fee Required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050, ART_DRAW 2200 and ART_DRAW 3200

ART_DRAW 4210: Advanced Color Drawing

Continuation of ART_DRAW 3210 with emphasis on the expressive properties of color in figural compositions. Repeatable to 15 hours. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050, ART_DRAW 2210 and ART_DRAW 3210

ART_DRAW 4220: Advanced Anatomical Drawing

Continuation of ART_DRAW 3220 with and emphasis on formal analysis of the figure in drawing based on superficial and deep anatomical structure. May be repeated to 15 hour maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050 and ART_DRAW 3220

Recommended: ART_DRAW 2200 and ART_DRAW 3200 before taking this class

ART_DRAW 4230: Advanced Illustration

Further development of conceptual problem solving skills and technical proficiency through self generated assignments. Emphasis is placed on portfolio development by exploring sequential and narrative themes. Topics include contract, copyrights, and the art of freelancing. Students are advised to take the course a minimum of two times. May be repeated to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050

Recommended: ART_DRAW 3230

ART_DRAW 4285: Problems in Drawing

Problems in Drawing.

Credit Hour: 1-3

Prerequisites: departmental consent

ART_DRAW 7200: Graduate Drawing: Studio Practice and Critique

Drawing with emphasis on individual creative expression. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: graduate Art major

ART_DRAW 7210: Graduate Color Drawing

Continuation of ART_DRAW 4210 with emphasis on individual creative expression. Repeatable to 15 hours. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 4210 and instructor's consent

ART_DRAW 7285: Problems in Drawing

Credit Hour: 1-3

Prerequisites: ART_DRAW 7200 and departmental consent

ART_DRAW 8200: Graduate Drawing: Advanced Studio Practice and Critique

Continuation of ART_DRAW 7200. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_DRAW 7200 or equivalent

ART_DRAW 8210: Graduate Color Drawing II

Continuation of ART_DRAW 7210. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_DRAW 7210 or equivalent

ART_DRAW 8270: Graduate Drawing - Theory and Context

Contextualizing artwork in culture, history, and theory, May be repeated to 18 hours for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Graduate Art Majors

ART_DRAW 8285: Problems in Drawing II

Advanced independent studio practice including critical evaluation of student's creative work. Individual study in drawing is to be proposed by the student and approved by the instructor. The student will meet on a regular basis with the instructor to review student progress. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: for students with strong preparation in Art; departmental consent; ART_DRAW 7285

Art-Fibers (ART_FIBR)

ART_FIBR 2300: Beginning Fibers

Exploration of various fiber and media including papermaking, weaving, surface design and sculptural techniques. Expendable materials fee required.

Credit Hours: 3

ART_FIBR 3300: Intermediate Fibers

Continuation of ART_FIBR 2300 with emphasis on utilizing acquired technical processes in loom and off weaving, paper making and surface design and a means of developing visual statements. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_FIBR 2300

ART_FIBR 4300: Advanced Fibers

Exploration of aesthetic concepts, development of personal style and instruction in advanced fiber techniques within medium selected by student. Expendable materials fee required. May repeat to 15 hours maximum.

Credit Hours: 3

Prerequisites: ART_FIBR 3300 or approved equivalents

ART_FIBR 4385: Problems in Fibers

Problems in Fibers.

Credit Hour: 1-3

Prerequisites: departmental consent

ART_FIBR 7300: Graduate Fibers

Advanced technical and aesthetic study in medium of choice with emphasis on development of the individual student's ideas and goals. Expendable materials fee required. May repeat to 15 hours maximum.

Credit Hours: 3

Prerequisites: ART_FIBR 4300

ART_FIBR 7385: Problems in Fibers

Graduate level work in fibers.

Credit Hour: 1-3

Prerequisites: ART_FIBR 7300 and departmental consent

ART_FIBR 8300: Graduate Fibers II

Continuation of ART_FIBR 7300. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_FIBR 7300 or equivalent

Art-General (ART_GNRL)

ART_GNRL 1010: Introduction to Art

Basic practice in drawing, painting, design. Exploratory course for beginners.

Credit Hours: 3

Prerequisites: Restricted to Non-majors only

ART_GNRL 1020: Appreciation of Art

Illustrated discussion with examples from varied historic and contemporary art fields on nature of art, functions, methods of creative expression. One section is writing intensive each semester and the other is NON writing intensive each semester.

Credit Hours: 3

Prerequisites: ENGLISH 1000 may be required on some sections

ART_GNRL 1030: Basic 2-D Design

Basic study of line, shape and texture; their use and control according to the basic variables and the principles of design. Two dimensional exercises employing a variety of tools and materials.

Credit Hours: 3

ART_GNRL 1040: Basic 3-D Design

A foundational course designed to familiarize students with the elements and principles of three-dimensional design as well as some of the materials, tools, processes and techniques used in the creation of sculptural art. Study and development of formal aesthetic ideas, conceptual vocabulary and technical skills is emphasized. Expendable materials fee required.

Credit Hours: 3

ART_GNRL 2000: Color Theory

An investigation of various color systems and their application to art.

Credit Hours: 3

Prerequisites: ART_GNRL 1030

ART_GNRL 2001: Topics in Art

Special studies in studio art; covers subjects not included in regularly offered courses. Topics course are repeatable for up to 6 credits per individual topic.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 2001H: Topics in Art - Honors

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic. Enrollment limited to students with Honors Eligibility.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 2005: Topics in Art - Humanities

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.

Credit Hour: 1-3

Prerequisites: Instructor's consent

ART_GNRL 2005H: Topics in Art - Humanities - Honors

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic. Enrollment limited to students with Honors Eligibility.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 2020: International Summer Study Abroad

A four-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at schedule critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated once for credit.

Credit Hours: 4

ART_GNRL 2030: Context and Culture

The purpose of this course is to give journalism students a framework for engaging with the visual arts, with a focus on the 20th century and today. Our goal is to conduct a foundation for thinking, talking and writing about the visual arts, especially works and movements that might be challenging for the novice to understand.

Credit Hours: 3

ART_GNRL 2030H: Context and Culture - Honors

The purpose of this course is to give journalism students a framework for engaging with the visual arts, with a focus on the 20th century and today. Our goal is to conduct a foundation for thinking, talking and writing about the visual arts, especially works and movements that might be challenging for the novice to understand.

Credit Hours: 3

Prerequisites: Honors eligibility required

ART_GNRL 3001: Topics in Art

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic. Enrollment limited to students with junior standing.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 3001H: Topics in Art - Honors

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic. Enrollment limited to students with Honors Eligibility.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 3005: Topics in Art - Humanities

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.

Credit Hour: 1-3

Prerequisites: Instructor's consent

ART_GNRL 3005H: Topics in Art - Humanities Honors

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic. Enrollment limited to students with Honors Eligibility.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 3020: International Summer Study Abroad

A four-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at scheduled critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated once for credit.

Credit Hours: 4

Prerequisites: instructor's consent

ART_GNRL 3030: Undergraduate Internship in Art

Special learning situations not covered by coursework. Credit standards pre-arranged with dept. Limit on total hours of problems courses applies. Enrollment limited to Art and Art Education majors with Junior Standing.

Credit Hour: 1-3

Prerequisites: departmental consent

ART_GNRL 4001: Topics in Art

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 4001H: Topics in Art - Honors

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic. Enrollment limited to students with Honors Eligibility.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 4005: Topics in Art - Humanities

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.

Credit Hour: 1-3

Prerequisites: Instructor's consent

ART_GNRL 4005H: Topics in Art - Humanities Honors

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic. Enrollment limited to students with Honors Eligibility.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 4030: Video Art and the Moving Image

(same as FILM_S 4030; cross-leveled with ART_GNRL 7030). Video as a fine art form intersection sculpture, performing arts, doc filmmaking, pop culture and the Internet. Theoretical and historical knowledge is integrated with studio practice. Students create video works in Final Cut Pro demonstrating technical ability and aesthetic vision. May be repeated for credit.

Credit Hours: 3

ART_GNRL 4040: 2-D Portfolio Development

This course will provide an intensive experience in the development of a portfolio of personal work outside the traditional media boundaries. Students will explore media relevant to their particular needs and begin to explore the connections between their work and contemporary art and culture through readings, discussions and critiques. Expendable Materials Fee Required. May be repeated t 6 credits. Enrollment limited to students with Junior Standing. Recommended: 3000-level or above course in one of the following media areas: Drawing, Painting or Printmaking.

Credit Hours: 3

Prerequisites: instructor's consent required

ART_GNRL 4050: Performance Art

(cross-leveled with ART_GNRL 7050). This studio art course will survey the practices in Performance Art and its intersections with visual and media-based art, experimental theater, music and dance. Modules will include performance and: the object, the mediatized body, culture and alternative spaces. Graded on A-F basis only.

Credit Hours: 3

ART_GNRL 4975: Senior Seminar in Art

A capstone course for the undergraduate art degree with emphasis on the production of a written statement relating to the students' visual research.

Credit Hours: 3

Prerequisites: senior standing and ENGLISH 1000

ART_GNRL 4976: Design - Senior Seminar

Capstone for undergraduate art students who are interested in graphic design. Emphasis placed on research and writing about the theory and practice of design. All students will participate in a final, formal portfolio review with outside evaluators.

Credit Hours: 3

Prerequisites: senior standing and ENGLISH 1000

ART_GNRL 7000: Graduate Art - Studio Practice and Critique

Art studio practice emphasis on individual creative expression. Course may be repeated for up to 15 credit hours. Expendable materials fee required. Graded on A-F basis only. Prerequisites: Graduate Art Major

Credit Hours: 3

ART_GNRL 7001: Topics in Art

Special studies in studio art at the graduate level; covers subjects not included in regularly offered courses. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

ART_GNRL 7005: Topics in Art - Humanities

Special studies in graduate level studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topics.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 7020: International Summer Study Abroad

A four-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at scheduled critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated for credit.

Credit Hours: 4

ART_GNRL 7030: Video Art and the Moving Image

(cross-leveled with ART_GNRL 4030). Video as a fine art form intersecting sculpture, performing arts, doc filmmaking, pop culture and the Internet. Theoretical and historical knowledge is integrated with studio practice. Students create video works in final Cut Pro demonstrating technical ability and aesthetic vision. May be repeated for credit.

Credit Hours: 3

ART_GNRL 7050: Performance Art

(cross-leveled with ART_GNRL 4050) This studio art course will survey the practices and theory in Performance Art, its trends intersecting with visual and media-based art, experimental theater, music, and dance. Often a non-interpretative performance genre, Performance Art blurs the edges between art and life, performer/s and audience, with the lived experience and the body's relationship to environment and time as a continuous undercurrent. In this course we will look at several areas in which performance is engaged: performance and the object, performance and the mediatized body, performance and language and performance and alternative environments. These will be considered via the spectrum of practice from private ritual to public presentation and the possibilities of solo and collaborative work. Studio and theoretical explorations will be conducted through presentations, performance exercises and projects, readings, discussion and critique. Graded on A-F basis only.

Credit Hours: 3

ART_GNRL 7085: Problems in Art

Individual study in a subject area to be proposed by the student and approved by the instructor. The student will meet periodically on a regular

basis with the instructor to review progress on the work assigned. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: for students with strong preparation in Art; departmental consent

ART_GNRL 8000: Graduate Art - Advanced Studio Practice and Critique

Continuation of ART_GNRL 7000. Art studio practice with emphasis on individual creative expression. Course may be repeated for up to 15 credit hours. Expendable materials fee required. Graded on A-F basis only. Prerequisites: Graduate Art Major

Credit Hours: 3

ART_GNRL 8001: Topics in Art

Special studies in graduate level studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 8005: Topics in Art - Humanities

Special studies in graduate level studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 8020: International Summer Study Abroad

A four week study abroad in studio art with required participation in scheduled excursion to art-related sites. Students create original art for review at schedule critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated once for credit. Graded on A-F basis only.

Credit Hours: 4

ART_GNRL 8070: Graduate Art - Theory and Context

Contextualizing artwork in culture, history, and theory. May be repeated up to 18 hours for credit. Graded on A-F basis only

Credit Hours: 3

Prerequisites: Graduate Art standing

ART_GNRL 8090: MFA Thesis Exhibition Documentation

Preparation of materials deemed necessary to document in a permanent form the thesis exhibition. Credit will be granted upon the satisfactory completion of the document, which will be retained by the Department of Art. Required of all MFA candidates. Graded on S/U basis only.

Credit Hour: 1

ART_GNRL 9010: Graduate Studio Seminar

Practical and philosophical concerns of the visual artist. Mandated for all MFA candidates.

Credit Hour: 1

Art-Graphic Design (ART_GRDN)

ART_GRDN 1400: Beginning Digital Imaging

Class will cover the basic tools used in digital imaging software. A variety of different software may be offered. Course may be repeated for up to 3 hours with the consent of instructor. Graded on S/U basis only.

Credit Hour: 1

ART_GRDN 2400: Advanced Digital Imaging

Class will cover the basic tools used in digital imaging software. A variety of different software may be offered. Course may be repeated for up to 3 hours with the consent of instructor. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: ART_GRDN 1400

ART_GRDN 2410: Graphic Design I

Emphasis on developing a design language and vocabulary. Projects explore visual images in two-dimensional space, each one focusing on a specific set of relationships. Introduction to methodological and research practices for designers. Payment of expendable materials fee is required. Enrollment limited to students who have taken ART_GNRL 1030 and ART_DRAW 1050.

Credit Hours: 3

Prerequisites: Departmental Consent Required

ART_GRDN 2420: Graphic Design II

Introduction to the discipline, function and tradition of typography. Topics include evolution and anatomy of typography, communication, legibility/readability, language sequence and information hierarchy. Course concludes with portfolio review for admission into Graphic Design III. Payment of expendable materials fee is required.

Credit Hours: 3

Prerequisites: ART_GRDN 2410

ART_GRDN 2430: Introduction to Calligraphy

Technical and historical instruction on five calligraphic alphabets. Application of hand lettering to both two and three-dimensional design projects. Emphasis placed on both technical mastery of letters and creative expression in projects.

Credit Hours: 3

Prerequisites: instructor's consent

Recommended: ART_GNRL 1030 and ART_DRAW 1050

ART_GRDN 3410: Graphic Design III

Digital media and motion graphics are explored through the development of interactive presentations and web site design. Students experiment with the computer as a medium for delivery of communication. New, practical and conceptual skills will be discussed in order to develop meaningful, interactive user experiences. Payment of expendable materials fees is required.

Credit Hours: 3

Prerequisites: ART_GRDN 2420

ART_GRDN 3420: Graphic Design IV

Goal directed graphic design problem solving stressing the integration of theory and practical applications while sharpening conceptual, computer, and research skills. Topics include current design theory, advanced typographic study, production methods and design/client interaction. Payment of expendable materials fee is required.

Credit Hours: 3

Prerequisites: ART_GRDN 3410

ART_GRDN 3430: Advanced Calligraphy

Technical and historical instruction to calligraphic alphabets including Uncial, Fraktur, Copperplate and Neuland. Application of hand lettering in two and three-dimensional design projects. Emphasis placed on both mastery of letters and creative exploration in projects.

Credit Hours: 3

Prerequisites: ART_GRDN 2430

ART_GRDN 3440: Packaging Design

This course will look at the discipline of packaging design from a three-dimensional perspective. By gaining an understanding of the materials and processes that relate to packaging, students will develop a selection of packaging solutions for a variety of different clients. Payment of expendable material fee is required. Enrollment limited to student who have successfully completed the graphic design portfolio review.

Credit Hours: 3

Prerequisites: Instructor's consent required

ART_GRDN 3441: The History of Graphic Design

Broad overview of the history of graphic design. Topics will range from the history of printing, the beginnings of the profession, major movements and developments to the practice of design. Also looks at how the history of design and printing apply to today's visual communication.

Credit Hours: 3

Prerequisites: instructor's consent

ART_GRDN 3442: Design for Corporate Identity and Branding

Planning, strategy, and design of the visual components necessary to create a corporate identity. Course will focus on how cohesive design programs function across various mediums and engage specific audiences. Payment of expendable materials fees is required. Enrollment limited to students who have successfully completed the graphic design portfolio review.

Credit Hours: 3

Prerequisites: instructor's consent required

ART_GRDN 3443: Letterpress

This course is about creating conceptual design solutions using the letterpress printing process. Projects are very broad, conceptual and highly individual with the opportunity to explore letterpress printing processes using several different presses and printing techniques. Each project will require a limited edition print run. Repeatable to 9 hours.

Credit Hours: 3

Prerequisites: Instructor's consent

ART_GRDN 4410: Graphic Design V

Directed research, study and critical analysis in graphic design. Emphasis placed on research, writing, problem solving, aesthetic perception, conceptual thinking skills and technical proficiency. Students will focus on portfolio preparation and are advised to take the course a minimum of two times. May be repeated to 15 hours maximum. Payment of expendable materials fee is required.

Credit Hours: 3

Prerequisites: ART_GRDN 3420

ART_GRDN 4485: Problems in Graphic Design

Problems in Graphic Design.

Credit Hour: 1-3

Prerequisites: departmental consent

ART_GRDN 4996: Imprint - Design Practicum

Class operates as professional design studio doing work for university, local and regional clients. Focus on client/designer relationships, contracts and teamwork. Students passing with grade in A range will graduate with departmental honors. May be repeated for credit. Admission based on GPA (3.3 in art courses) and portfolio review. Enrollment limited to students with junior standing or higher.

Credit Hours: 3

Prerequisites: Instructor's consent required

ART_GRDN 7400: Graduate Graphic Design

Graduate level work in graphic design. Emphasis on self-directed research and critical analysis. Students are encouraged to focus on conceptual development of their design work. Instruction is tailored to the student's individual investigations. Repeatable to 15 hours maximum.

Credit Hours: 3

Prerequisites: instructor's consent

ART_GRDN 7485: Problems in Graphic Design

Graduate level work in graphic design.

Credit Hour: 1-3

Prerequisites: ART_GRDN 4410 and departmental consent

ART_GRDN 8400: Graduate Graphic Design II

Continuation of ART_GRDN 7400. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_GRDN 7400 or equivalent

Art-Painting (ART_PNT)

ART_PNT 2500: Beginning Painting

Introduces primary techniques of painting. Emphasis on conceptualization of visual perception (understanding how we see) and the creative processes (understanding how we create). Sections either in oil or acrylic; contact instructor. Expendable material fee required.

Credit Hours: 3

ART_PNT 2510: Beginning Watercolor Painting

Theory, practice of painting in water color from still life, landscape, figure. Expendable materials fee required.

Credit Hours: 3

ART_PNT 3500: Intermediate Painting

Continuation of ART_PNT 2500 with the addition of portrait painting. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PNT 2500

ART_PNT 3510: Intermediate Watercolor Painting

Continuation of ART_PNT 2510. Theory and practice of painting in watercolor. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PNT 2510

ART_PNT 4500: Advanced Painting

Advanced problems in oil and acrylic painting. May be repeated to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PNT 3500

ART_PNT 4510: Advanced Watercolor Painting

(cross-leveled with ART_PNT 7510). Advanced problems in watercolor. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PNT 3510

ART_PNT 4585: Problems in Painting

Problems in Painting. Enrollment limited to students who have taken ART_PNT 4500.

Credit Hour: 1-3

Prerequisites: departmental consent

ART_PNT 7500: Graduate Painting: Studio Practice and Critique

Advanced study. Emphasis on individual creative expression. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: graduate Art major

ART_PNT 7510: Graduate Watercolor Painting

(cross-leveled with ART_PNT 4510). Advanced study in watercolor. Emphasis on individual creative expression. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PNT 4510

ART_PNT 7585: Problems in Painting

Credit Hour: 1-3

Prerequisites: ART_PNT 7500 and departmental consent

ART_PNT 8500: Graduate Painting: Advanced Studio Practice and Critique

Continuation of ART_PNT 7500. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_PNT 7500 or equivalent

ART_PNT 8510: Graduate Watercolor Painting

Continuation of ART_PNT 7510. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_PNT 7510 or equivalent

ART_PNT 8570: Graduate Painting - Theory and Context

Contextualizing artwork in culture, history, and theory. Repeatable to 18 hours for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Graduate Art standing

ART_PNT 8585: Problems in Painting II

Advanced independent studio practice including critical evaluation of student's creative work. Individual study in painting is to be proposed by the student and approved by the instructor. The student will meet on a regular basis with the instructor to review student progress. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: For students with strong preparation in Art; departmental consent; ART_PNT 7585

Art-Photography (ART_PHOT)

ART_PHOT 2600: Beginning Photography

Introduction to photography within an art context; digital workflow including use of camera, software, and digital output methods; and a survey of both contemporary and historical topics related to visual and conceptual concerns. Digital camera with RAW capability and manual aperture + shutter controls required. DSLR recommended. Payment of expendable materials fee required.

Credit Hours: 3

Recommended: ART_GNRL 1030 , ART_GNRL 1040, ART_DRAW 1050

ART_PHOT 3600: Intermediate Photography

Continuation of ART_PHOT 2600 with emphasis utilizing acquired technical process to facilitate use of the camera as a means of developing awareness of immediate environment and the capabilities of Photography as a communicative, documentary, and expressive medium. Payment of expendable material fee is required.

Credit Hours: 3

Prerequisites: ART_PHOT 2600

ART_PHOT 4600: Advanced Photography

Exploration of aesthetic concepts, development of personal vision, and instruction in advanced technical process including fine B&W printing, negative and positive color, large format, zone system, and portfolios and book design to facilitate critical observation and personal expression

through the medium of Photography. Payment of expendable materials fee is required. May repeat to 15 hours maximum.

Credit Hours: 3

Prerequisites: ART_PHOT 2600 and ART_PHOT 3600

ART_PHOT 4685: Problems in Photography

Supervised research in creative photography.

Credit Hour: 1-3

Prerequisites: departmental consent

ART_PHOT 7600: Graduate Photography

Advanced technical study with emphasis on development of the individual student's creative ideas. Payment of expendable materials expense is required. May repeat to 15 hours maximum.

Credit Hours: 3

Prerequisites: ART_PHOT 3600 and consent required

ART_PHOT 7685: Problems in Photography

Supervised research in creative photography.

Credit Hour: 1-3

Prerequisites: ART_PHOT 4410

ART_PHOT 8600: Graduate Photography II

Continuation of ART_PHOT 7600. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_PHOT 7600 or equivalent

Art-Printmaking (ART_PRNT)

ART_PRNT 2700: Beginning Printmaking

Introductory Relief, Intaglio and Lithography techniques in color and black and white including woodcut, linocut reduction, etching; aquatint, dry point, photo mechanics and pronto plate lithography. May be repeated to six hours maximum. Expendable materials fee required.

Credit Hours: 3

ART_PRNT 2730: Serigraphy

Introduces methods, materials, and techniques of printmaking with the silk screen. Payment of expendable materials expense is required. May repeat to 6 hours maximum.

Credit Hours: 3

Prerequisites: ART_GNRL 1030

Recommended: one semester of Drawing

ART_PRNT 3700: Intermediate Printmaking

Continuing work in litho, intaglio, relief or serigraphy. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PRNT 2700

ART_PRNT 4700: Advanced Printmaking

Advanced study in relief, intaglio, lithographic and/or serigraphy printmaking with emphasis on individual creative expression. May be repeatable to 15 hours. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PRNT 3700

ART_PRNT 4785: Problems in Printmaking

Problems in Printmaking.

Credit Hour: 1-3

Prerequisites: departmental consent

ART_PRNT 7700: Graduate Printmaking

Graduate level study in relief, intaglio or lithographic printmaking with emphasis on individual creative expression. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PRNT 4700

ART_PRNT 7785: Problems in Printmaking

Credit Hour: 1-3

Prerequisites: ART_PRNT 7700 and departmental consent

ART_PRNT 8700: Graduate Printmaking II

Continuation of ART_PRNT 7700. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_PRNT 7700 or equivalent

Art-Sculpture (ART_SCUL)

ART_SCUL 2800: Beginning Sculpture

Principles of sculptural organization, figure studies, modeling techniques, simple plaster casting. Payment of expendable materials expense is required.

Credit Hours: 3

ART_SCUL 2810: Experimental Media I

Ordering and structuring materials into compositional forms, using various media, traditional as well as new. Subject matter will vary each semester.

Credit Hours: 3

Prerequisites: instructor's consent

ART_SCUL 2820: Beginning Welding And Casting

This course is intended to foster critical thinking, creative problem solving, and cultural/visual literacy through the introduction of sculptural welding and metal casting techniques. Projects will address the sculptural methods of manipulation, addition, and substitution as well as the principles of three-dimensional design. Students will become conversant with MIG and gas welding as well as centrifugal and ceramic shell casting. The relationship of form and content will be discussed during class critiques. Graded on A-F basis only.

Credit Hours: 3

ART_SCUL 3800: Intermediate Sculpture

Continuation of ART_SCUL 2800. Introduction to carving techniques. Payment of expendable materials expense is required.

Credit Hours: 3

Prerequisites: ART_SCUL 2800

ART_SCUL 3810: Experimental Media II

Continuation of ART_SCUL 2810.

Credit Hours: 3

Prerequisites: ART_SCUL 2810

ART_SCUL 4800: Advanced Sculpture

This course will build skills acquired in ART_SCUL 3800. Includes welding, casting, carving and assemblage with emphasis on the development of a personal visual language. May repeat to 15 hours maximum.

Credit Hours: 3

Prerequisites: ART_SCUL 3800

ART_SCUL 4810: Experimental Media III

Continuation of ART_SCUL 3810. May repeat to 15 hours maximum.

Credit Hours: 3

Prerequisites: ART_SCUL 3810

ART_SCUL 4885: Problems in Sculpture

Problems in Sculpture.

Credit Hour: 1-3

Prerequisites: departmental consent

ART_SCUL 7800: Graduate Sculpture

Payment of expendable materials expense is required. May repeat to 15 hours maximum.

Credit Hours: 3

ART_SCUL 7810: Experimental Media IV

Advanced study of compositional organization at the graduate level. May repeat to 9 hours maximum.

Credit Hours: 3

Prerequisites: ART_SCUL 4810

ART_SCUL 7885: Problems in Sculpture

Credit Hour: 1-3

Prerequisites: ART_SCUL 7800 and departmental consent

ART_SCUL 8800: Graduate Sculpture II

Continuation of ART_SCUL 7800. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_SCUL 7800 or equivalent

Astronomy (ASTRON)

ASTRON 1010: Introduction to Astronomy

Survey of methods of astronomy; description of the solar system, stellar astronomy, structure of the galaxy and the universe. Three hours of lecture and one hour of lab per week (scheduled by the instructor). Satisfies physical science laboratory requirement. Laboratory section: Survey of astronomical methods, instruments, observations and measurement techniques.

Credit Hours: 4

Recommended: MATH 1100 or MATH 1120 or equivalent

ASTRON 1020: Introduction to Laboratory Astronomy

Laboratory supplement to Astronomy 1010. Satisfies physical science laboratory requirement. Survey of astronomical methods, instruments, observations and measurement techniques.

Credit Hours: 2

Recommended: MATH 1100 or MATH 1120

ASTRON 3010: Introduction to Modern Astrophysics

(same as PHYSCS 3010). Elements of stellar, and galactic astrophysics. Interpretation of observations and physical conditions of various astronomical objects including stars, gaseous nebulae and galaxies.

Credit Hours: 3

Prerequisites: PHYSCS 2760

ASTRON 4020: Astrophysical Techniques

(same as PHYSCS 4020; cross-leveled with ASTRON 7020, PHYSCS 7020). Elements of modern astronomical instruments, observations and analysis, with the emphasis in the optical regime. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 2760

ASTRON 4180: Solar System Science

(same as PHYSCS 4180, GEOL 4180; cross-leveled with ASTRON 7180, PHYSCS 7180, GEOL 7180). Investigates physical states, interior structures and comparative geology of solar system bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.

Credit Hours: 3

Prerequisites: PHYSCS 2760 or PHYSCS 1220 or instructor's consent

Recommended: MATH 1700

ASTRON 4250: Stellar Astrophysics

(same as PHYSCS 4250). Basic astrophysics of stable and unusual stars, stellar systems. Investigates stellar dimensions, radiation, spectra, energy, evolution, populations; interstellar medium, stellar motions and aggregation.

Credit Hours: 3

Prerequisites: PHYSCS 3150 or instructor's consent

ASTRON 4350: Galactic Astronomy

(same as PHYSCS 4350). Observational properties of normal galaxies and clusters of galaxies, Seyfert and emission-line structure and dynamics of galaxies; interacting galaxies, quasi-stellar objects. Introduction to cosmology.

Credit Hours: 3

Prerequisites: PHYSCS 3010 or instructor's consent

Recommended: PHYSCS 4140

ASTRON 4360: Extragalactic Astronomy

(same as PHYSCS 4360; cross-leveled with ASTRON 7360). This course introduces students to the most basic knowledge of extragalactic astronomy, starting from Milky Way and extending to the most distant universe. Topics covered will include galaxy morphology and classification, groups and clusters of galaxies, active galactic nuclei, and galaxy formation and evolution.

Credit Hours: 3

Prerequisites: PHYSCS 2760

ASTRON 4460: Interstellar Medium

(same as PHYSCS 4460). The course discusses observational properties and physical and chemical processes occurring in the interstellar medium. Topics include interstellar diffuse and molecular clouds, HII regions, dust grains, interstellar chemistry, star formation, supernova remnants, and interstellar shock waves.

Credit Hours: 3

Prerequisites: PHYSCS 2760

ASTRON 4550: Cosmochemistry

(same as PHYSCS 4550; cross-leveled with ASTRON 7550, PHYSICS 7550). Cosmic dust, stardust, spectra, energy, interstellar medium, meteorites, astromineralogy.

Credit Hours: 3

Prerequisites: PHYSCS 2760 or PHYSCS 1220 or instructor's consent

ASTRON 4950: Undergraduate Research in Astronomy

Special studies in astronomy; covers subjects not included in courses regularly offered.

Credit Hour: 1-99

Prerequisites: instructor's consent

ASTRON 4960: Senior Thesis in Astronomy

Special studies for senior undergraduate students in astronomy. The course requires an oral or poster presentations, or faculty-guided writing of a senior thesis involving independent research. Departmental consent required for repetition. Enrollment limited to students who have completed 3 credit hours of ASTRON 4950 or PHYSCS 4950.

Credit Hours: 3

Prerequisites: instructor's consent

ASTRON 7020: Astrophysical Techniques

(same as PHYSCS 7020; cross-leveled with ASTRON 4020, PHYSICS 4020). Elements of modern astronomical instruments, observations and analysis, with the emphasis in the optical regime. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 2760

ASTRON 7180: Solar System Science

(same as PHYSCS 7180, GEOL 7180; cross-leveled with ASTRON 4180, PHYSICS 4180, GEOL 4180). Investigates physical states, interior

structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.

Credit Hours: 3

Prerequisites: PHYSCS 1220 or PHYSCS 2760 or instructor's consent

ASTRON 7360: Extragalactic Astronomy

(same as PHYSCS 7360; cross-leveled with ASTRON 4360, PHYSICS 4360). This course introduces students to the most basic knowledge of extragalactic astronomy, starting from Milky Way and extending to the most distant universe. Topics covered will include galaxy morphology and classification, groups and clusters of galaxies, active galactic nuclei, and galaxy formation and evolution.

Credit Hours: 3

Prerequisites: PHYSCS 2760

ASTRON 7550: Cosmochemistry

(same as PHYSCS 7550; cross-leveled with ASTRON 4550, PHYSICS 4550). Chemistry of cosmic dust and molecules.

Credit Hours: 3

Prerequisites: PHYSCS 2760 or PHYSCS 1220; instructor's consent

ASTRON 7750: Interstellar Medium

(same as PHYSCS 7750; cross-leveled with ASTRON 4750, PHYSICS 4750). The course discusses observational properties and physical and chemical processes occurring in the interstellar medium. Topics include interstellar diffuse and molecular clouds, HII regions, dust grains, interstellar chemistry, star formation, supernova remnants, and interstellar shock waves.

Credit Hours: 3

Prerequisites: PHYSCS 1220 or PHYSCS 2760

ASTRON 8301: Topics in Astronomy and Astrophysics

(same as PHYSCS 8301). Selected topics from solar system, stellar galactic and extragalactic astronomy and astrophysics. May be repeated to a maximum of 6 hours.

Credit Hours: 3

Prerequisites: instructor's consent

ASTRON 8310: College Science Teaching

(same as PHYSCS 8310, BIO_SC 8724 and LTC 8724). Study of learner characteristics, teaching strategies, and research findings related to teaching science at the post-secondary level.

Credit Hours: 3

ASTRON 8550: Stellar Structure and Evolution

(same as PHYSCS 8550). Reviews of atomic and molecular spectra. Investigates quantum radiation law, emission and absorption processes, radiation transfer theory, continuous and discrete line spectra of stars, stellar composition.

Credit Hours: 3

Prerequisites: ASTRON 4250, PHYSCS 4800, or instructor's consent

Athletic Training (ATHTRN)

ATHTRN 1100: Athletic Training Skills I

Introduction to athletic training skills. Clinical observation hours required. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Restricted to Pre-Athletic Training majors only

ATHTRN 1200: Athletic Training Skills II

Continuation of athletic training skills. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Pre-Athletic Training majors; Completion of ATHTRN 1100 with minimum grade of B-

ATHTRN 2001: Topics in Athletic Training

Organized study of selected topics in Athletic Training. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-15

Prerequisites: Instructor's consent

ATHTRN 2100: Principles and Fundamentals of Athletic Training

Introduces students to the common principles and fundamentals associated with the profession of athletic training. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Pre-Athletic Training majors

ATHTRN 2150: Athletic Training Practicum I

The first in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training majors; ATHTRN 1100, ATHTRN 1200, and ATHTRN 2100

ATHTRN 2250: Athletic Training Practicum II

The second in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 2150 with minimum grade of B-

ATHTRN 2500: Elementary Human Anatomy

Analysis of the structure and function of cells, tissue, and organ systems. Emphasis is placed on the muscular, skeletal, and nervous systems as they relate to human movement. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Pre-Athletic Training majors only

ATHTRN 2550: Examination of Cadaveric Human Anatomy

Study of the human body utilizing cadaver specimens. Special emphasis will be placed upon the skeletal, muscular and nervous systems. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 2500 with a minimum grade of C

ATHTRN 2600: Human Physiology

Investigation into the structure, function, physiology, and biochemistry of the cardiovascular, lymphatic, respiratory, digestive, urinary, endocrine, and reproductive systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training majors only; Completion of ATHTRN 2500 with a minimum grade of C

ATHTRN 3100: Mental Health in Athletic Training

Study of psychosocial strategies, mental health referral policies and clinical application to athletic training. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training majors; PSYCH 1000

ATHTRN 3150: Athletic Training Practicum III

The third in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training majors only; Completion of ATHTRN 2250 with a minimum grade of B-

ATHTRN 3200: Therapeutic Modalities

Study of therapeutic modalities utilized in the treatment and rehabilitation of athletic injuries. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 2250 with a minimum grade of B-

ATHTRN 3250: Athletic Training Practicum IV

The fourth in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 3150 with a minimum grade of B-

ATHTRN 3300: Injury Assessment I

A systematic approach to injury evaluation of the lower extremity and spine. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 2100 with a minimum grade of B- and ATHTRN 2500 with a minimum grade of C

ATHTRN 3400: Injury Assessment II

A systematic approach to injury evaluation of the upper extremity, spine and head. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 3300 with a minimum grade of B-

ATHTRN 3500: Rehabilitation of Athletic Injuries

Study of rehabilitation principles and techniques used to return active individuals to their sport/activity. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 3200 with a minimum grade of B-

ATHTRN 3600: Administration of Athletic Training

Examines the organizational and administrative aspects of Athletic Training. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training majors

ATHTRN 3800: General Medical Conditions

Examination of illness and disease found within the athletic population. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training majors only, Completion of ATHTRN 3150 with a minimum grade of B-

ATHTRN 4150: Athletic Training Practicum V

The fifth in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 3250 with a minimum grade of B-

ATHTRN 4250: Athletic Training Practicum VI

The sixth in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 4150 with a minimum grade of B-

ATHTRN 4500: Nutrition for Athletic Performance and Rehabilitation

Nutritional study examining how nutrition impacts sports performance. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training majors; PH_THR 4420

ATHTRN 4970: Seminar in Athletic Training

Capstone senior athletic training course. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 3250 with a minimum grade of B-

Atmospheric Science (ATM_SC)

ATM_SC 1050: Introductory Meteorology

(same as GEOG 1050). Physical processes of atmosphere in relation to day-to-day changes in weather.

Credit Hours: 3

ATM_SC 2100: Introduction to Atmospheric Science

Physical process of the atmospheric and climate system will be related to day-to-day weather changes. Students will be introduced to the laws

of motion and thermodynamics that govern motions in geophysical fluid. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 1160 or concurrent enrollment in MATH 1500

ATM_SC 2150: Natural Hazards

A survey of natural hazards, including severe thunderstorms, tornadoes, flooding, tropical storms, ocean movements, earthquakes, tsunamis, volcanoes, asteroids, solar weather, managing risk and human impacts. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ATM_SC 1050 or equivalent

ATM_SC 2720: Weather Briefing

Student participation in daily discussions of current weather patterns and forecasts and their applications to weather sensitive activities including aviation, agriculture and industry.

Credit Hour: 1

Prerequisites: ATM_SC 1050

ATM_SC 2792: Weather Communication

Methods of surface and upper air weather observation. How such data are distributed to users in the meteorological community is also addressed.

Credit Hour: 1

Prerequisites: ATM_SC 1050; sophomore standing

ATM_SC 3000: Independent Study in Atmospheric Science

Independent study of a topic dealing with meteorological theory or application of meteorological science to the solution of relevant problem.

Credit Hour: 1-3

Prerequisites: ATM_SC 1050

Recommended: Upper level standing

ATM_SC 3600: Climates of the World

(same as GEOG 3600). A study of the world distribution of climates based on "cause and effect" relationships. Special attention is given to the impacts of climate on humanity.

Credit Hours: 3

Prerequisites: ATM_SC 1050 or equivalent or graduate standing

ATM_SC 4001: Topics in Atmospheric Science

Development of theory and applications for selected topics in atmospheric science.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent

ATM_SC 4110: Broadcast Meteorology I

An introduction to broadcast meteorology including the business of media, use of meteorological data to produce a forecast, and television and radio presentation skills. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: ATM_SC 1110, ATM_SC 2720, or equivalents

Corequisites: ATM_SC 4710. Restricted to Atmospheric Science majors or instructor's consent

ATM_SC 4310: Atmospheric Thermodynamics

(cross-leveled with ATM_SC 7310). Thermodynamics of dry and moist air, atmospheric hydrostatics, convection, and development of the fundamental equations of geophysical fluid dynamics.

Credit Hours: 4

Prerequisites: ATM_SC 1050, MATH 1700 (C or better), and one physics course

ATM_SC 4320: Atmospheric Dynamics

(cross-leveled with ATM_SC 7320). Dynamics and kinematics of atmospheric flow. Manipulation of fundamental equations, numerical modeling of atmosphere.

Credit Hours: 4

Prerequisites: ATM_SC 4310 or ATM_SC 7310

ATM_SC 4350: Mesoscale Meteorology and Dynamics

(cross-leveled with ATM_SC 7350). Survey of mesoscale phenomena, observing systems, analysis techniques, and modeling. Topics include fronts, jet streaks, gravity waves, organized convection, tornadoes, and severe local storm forecasting and structure.

Credit Hours: 3

Prerequisites: ATM_SC 4720 or ATM_SC 7720 and MATH 2300

ATM_SC 4400: Micrometeorology

(cross-leveled with ATM_SC 7400). Study of transport processes in the surface boundary layer. Important applications in pollution will be discussed.

Credit Hours: 3

Prerequisites: ATM_SC 4310 or PHYSICS 2760, MATH 2300

ATM_SC 4500: Advanced Meteorological Observation and Instrumentation

Automated weather observation and instrumentation used in networks of remote automated weather stations. Emphasis on electronic instrumentation, datalogger programming, data collection and data management, generating dynamic reports on the World Wide Web. May be repeated for credit.

Credit Hours: 3

Prerequisites: ATM_SC 1050

ATM_SC 4510: Remote Sensing for Meteorology and Natural Resources

(cross-leveled with ATM_SC 7510). Principles of remote sensing with emphasis on the properties of atmosphere and the earth's surface from airborne and satellite sensors. The techniques for using geosynchronous and orbiting satellite platforms for assessing weather and natural resource features.

Credit Hours: 3

Prerequisites: ATM_SC 1110, MATH 1500, junior standing or instructor's consent

ATM_SC 4520: Environmental Biophysics

(same as GEOG 4520; cross-leveled with ATM_SC 7520, GEOG 7520). Students will learn techniques and principles used to describe the microenvironment of living organisms and use quantitative expressions to estimate missing values, and mass transfer laws to estimate flux of energy, water and gas.

Credit Hours: 3

Prerequisites: College Physics and Calculus I

ATM_SC 4550: Atmospheric Physics

(cross-leveled with ATM_SC 7550). Physics of atmospheric nucleation-condensation, cloud droplet and precipitation formation, associated electrical phenomena, radiation transfer and remote sensing. Recommended: 1 year of college Physics

Credit Hours: 3

Prerequisites: MATH 1700

ATM_SC 4590: Radar Meteorology

(cross-leveled with ATM_SC 7590). Course concerns the theory and application of radar in meteorology. May be repeated for credit.

Credit Hours: 3

Prerequisites: ATM_SC 1110, MATH 1700, PHYSICS 2750

ATM_SC 4650: Long-Range Forecasting

(cross-leveled with ATM_SC 7650). Physical-dynamical principles of long-range forecasting from a month to a year. Empirical and numerical approaches in forecast practice.

Credit Hours: 3

Prerequisites: ATM_SC 4050 or ATM_SC 7050 or ATM_SC 3600

ATM_SC 4710: Synoptic Meteorology I

(cross-leveled with ATM_SC 7710). Meteorological Data. Basic techniques for surface and upper air analysis, using selected examples of weather patterns.

Credit Hours: 4

Prerequisites: ATM_SC 1050, MATH 1700 (C or better)

Recommended: one physics course

ATM_SC 4720: Synoptic Meteorology II

(cross-leveled with ATM_SC 7720). Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research.

Credit Hours: 4

Prerequisites: ATM_SC 4710 or ATM_SC 7710

ATM_SC 4730: Advanced Forecasting Laboratory

Advanced principles of weather forecasting will be addressed via online electronic modules and weekly laboratory exercises. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ATM_SC 4720

ATM_SC 4800: Numerical Methods in Atmospheric Science and Natural Resources

(cross-leveled with ATM_SC 7800). Examines numerical methods used in solving differential equations, filtering data sets, and Fourier decomposition of discrete data sets.

Credit Hours: 3

Prerequisites: senior standing

Recommended: Math through Calculus III

ATM_SC 4949: Internship in Meteorology

Practical professional work experience with professional or scientific meteorologists in off-campus work environment. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: junior standing

Recommended: Math through Calculus III

ATM_SC 4950: Undergraduate Research in Atmospheric Science

Research apprenticeship with a faculty mentor. Students are expected to develop initial concept for the research, design experiments, collect data, and analyze data with faculty input, oversight, and guidance.

Credit Hour: 1-4

Prerequisites: STAT 1400, MATH 1500

Recommended: 10 hours of Atmospheric Science courses

ATM_SC 4990: Daily Analysis and Forecast Interpretation

A Capstone experience. In depth daily analysis and interpretation by students of the current and forecast states of the atmosphere. Discussions of implications to specific weather sensitive activities.

Credit Hours: 3

Prerequisites: senior or graduate Atmospheric Science major

ATM_SC 7001: Topics in Atmospheric Science

Development of theory and applications for selected topics in atmospheric science.

Credit Hour: 1-99

Prerequisites: instructor's consent

ATM_SC 7310: Atmospheric Thermodynamics

(cross-leveled with ATM_SC 4310). Thermodynamics of dry and moist air, atmospheric hydrostatics, convection, and development of the fundamental equations of geophysical fluid dynamics.

Credit Hours: 4

Prerequisites: ATM_SC 1050, MATH 1700 (C or better), and one physics course

ATM_SC 7320: Atmospheric Dynamics

(cross-leveled with ATM_SC 4320). Dynamics and kinematics of atmospheric flow. Manipulation of fundamental equations, numerical modeling of atmosphere.

Credit Hours: 4

Prerequisites: ATM_SC 4310 or ATM_SC 7310

ATM_SC 7350: Mesoscale Meteorology and Dynamics

(cross-leveled with ATM_SC 4350). Survey of mesoscale phenomena, observing systems, analysis techniques, and modeling. Topics include fronts, jet streaks, gravity waves, organized convection, tornadoes, and severe local storm forecasting and structure.

Credit Hours: 3

Prerequisites: ATM_SC 4720 or ATM_SC 7720 and MATH 2300

ATM_SC 7400: Micrometeorology

(cross-leveled with ATM_SC 4400). Study of transport processes in the surface boundary layer. Important applications in pollution will be discussed.

Credit Hours: 3

Prerequisites: ATM_SC 4050 or ATM_SC 7050

ATM_SC 7510: Remote Sensing for Meteorology and Natural Resources

(cross-leveled with ATM_SC 4510). Principles of remote sensing with emphasis on the properties of atmosphere and the earth's surface from airborne and satellite sensors. The techniques for using geosynchronous and orbiting satellite platforms for assessing weather and natural resource features. Graduate student credit is dependent upon completion of additional advanced research assignments. Graded on A-F basis only.

Credit Hours: 3

ATM_SC 7520: Environmental Biophysics

(same as GEOG 7520; cross-leveled with ATM_SC 4520, GEOG 4520). Students will learn techniques and principles used to describe the microenvironment of living organisms and use quantitative expressions to estimate missing values, and mass transfer laws to estimate flux of energy, water, and gas.

Credit Hours: 3

Prerequisites: college physics, calculus I

ATM_SC 7550: Atmospheric Physics

(cross-leveled with ATM_SC 4550). Physics of atmospheric nucleation-condensation, cloud droplet and precipitation formation, associated electrical phenomena, radiation transfer and remote sensing.

Credit Hours: 3

Prerequisites: 1 year of college Physics and MATH 1700

ATM_SC 7590: Radar Meteorology

(cross-leveled with ATM_SC 4590). Course concerns the theory and application of radar in meteorology. Graduate students will be required to conduct an independent research project using radar, in addition to the undergraduate requirements for the class. May be repeated for credit.

Credit Hours: 3

Prerequisites: MATH 1700, PHYSICS 2760

ATM_SC 7650: Long-Range Forecasting

(cross-leveled with ATM_SC 4650). Physical-dynamical principles of long-range forecasting from a month to a year. Empirical and numerical approaches in forecast practice.

Credit Hours: 3

Prerequisites: ATM_SC 4050 or ATM_SC 7050 or ATM_SC 3600

ATM_SC 7710: Synoptic Meteorology I

(cross-leveled with ATM_SC 4710). Meteorological Data. Basic techniques for surface and upper air analysis, using selected examples of weather patterns.

Credit Hours: 4

Prerequisites or Corequisites: one physics course

Prerequisites: ATM_SC 1050, MATH 1700 (C or better)

ATM_SC 7720: Synoptic Meteorology II

(cross-leveled with ATM_SC 4720). Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research.

Credit Hours: 4

Prerequisites: ATM_SC 4710 or ATM_SC 7710

ATM_SC 7800: Numerical Methods in Atmospheric Science and Natural Resources

(cross-leveled with ATM_SC 4800). Examines numerical methods used in solving differential equations, filtering data sets, and Fourier decomposition of discrete data sets.

Credit Hours: 3

Prerequisites: Math through Calculus III

ATM_SC 8001: Topics in Atmospheric Science

Development of the theory with its application for selected topics in atmospheric science.

Credit Hours: 3

ATM_SC 8085: Problems in Atmospheric Science

Independent study by graduate students in atmospheric science.

Credit Hour: 1-99

ATM_SC 8090: Masters Research in Atmospheric Science

Original investigation in atmospheric science in support of a master's thesis. Graded on S/U basis only.

Credit Hour: 1-99

ATM_SC 8400: Atmospheric General Circulation

Comprehensive review of dynamical theories of general circulation with intensive discussion of current problems.

Credit Hours: 3

Prerequisites: ATM_SC 4320 or ATM_SC 7320

ATM_SC 8450: Tropical Meteorology

Study of the synoptic and dynamic character of the atmosphere in the tropical regions, including an examination of the general circulation and tropical storms.

Credit Hours: 3

Prerequisites: ATM_SC 4710 or ATM_SC 7710, ATM_SC 4720 or ATM_SC 7720 and MATH 2300; instructor's consent. Graded on A-F basis only

ATM_SC 8500: Radiation in the Atmosphere

Physics of solar and infrared radiative transfer in the atmosphere, including energy conversion effects, atmospheric optics, and photochemical processes.

Credit Hours: 3

Prerequisites: one year College Physics and MATH 1700

ATM_SC 8550: Nowcasting

Students will learn the science of nowcasting through the study of the various methods used and apply their knowledge in the design of the elements of a nowcast system and practical nowcasting exercises.

Credit Hours: 3

Prerequisites: ATM_SC 8500, instructor's consent

ATM_SC 8600: Advanced Climate Dynamics

Study of global climate; application of large scale atmospheric dynamics; conservation of various forms of energy, climatic evaluation, large scale climatic modification.

Credit Hours: 3

Prerequisites: ATM_SC 4320 or ATM_SC 7320 and ATM_SC 8400 or ATM_SC 3600

ATM_SC 9001: Topics in Atmospheric Science

Development of the theory with its application for selected topics in atmospheric science.

Credit Hour: 1-99

ATM_SC 9085: Problems in Atmospheric Science

Independent study by graduate students in atmospheric science.

Credit Hour: 1-99

ATM_SC 9087: Seminar in Atmospheric Science

Seminar in Atmospheric Science.

Credit Hour: 1-99

ATM_SC 9090: Doctoral Research in Atmospheric Science

Original investigation in atmospheric science in support of a doctoral dissertation. Graded on S/U basis only.

Credit Hour: 1-99

ATM_SC 9300: Introduction to Chaos Theory

Atmospheric predictability and related topics are examined as they relate to governing equations of motion and their non-linear solutions.

Credit Hours: 3

Prerequisites: ATM_SC 4320 or ATM_SC 7320, MATH 4100

ATM_SC 9350: Advanced Dynamic Meteorology

Application of perturbation dynamics, advanced dynamics, and numerical methods to study of atmospheric circulations.

Credit Hours: 3

Prerequisites: ATM_SC 4320 or ATM_SC 7320

ATM_SC 9590: Advanced Applications of Weather Radar

This course will investigate quantitative uses of weather radar data that go beyond standard reflectivity and velocity image interpretation, particularly those that use new techniques such as dual-polarization. Students will develop methods to analyze and display meteorological radar data. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Instructor's consent

Recommended: MATH 1700, PHYSICS 2760, INFOTC 1040 or equivalent, ATM_SC 4590

ATM_SC 9700: Advanced Synoptic Meteorology

Detailed examination of vertical motions, their forcing, and how each is diagnosed (quasigeostrophic theory, the Trenberth approximation, Q-vectors). Current issues in synoptic meteorology and operational forecasting are discussed.

Credit Hours: 3

Prerequisites: ATM_SC 4720 or ATM_SC 7720

ATM_SC 9712: Convection and Lightning

Cumulus convection and cloud physics topics that will facilitate a deeper understanding of cloud electrification and lightning production are studied. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ATM_SC 4710 or ATM_SC 7710, ATM_SC 4720 or ATM_SC 7720, MATH 2300; instructor's consent

ATM_SC 9800: Numerical Weather Prediction

Examination of finite difference and objective analysis techniques, basic physical concepts, and parameterization of physical processes. Experience with a range of models (1-D cloud to operational PE models) stressed.

Credit Hours: 3

Prerequisites: instructor's consent

Biochemistry (BIOCHM)

BIOCHM 1090: Introduction to Biochemistry

Fundamental concepts in biochemistry and molecular biology: structure function relationships, reactivity, thermodynamics, gene expression. Professional skills for biomedical careers. Primarily for freshman and sophomore biochemistry majors. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 1100 or MATH 1160 or MATH 1500; Concurrent enrollment in CHEM 1320

BIOCHM 1094: Introductory Biochemistry Laboratory

Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes, PCR and cloning. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: BIOCHM 1090; Biochemistry majors only

BIOCHM 2110: The Living World: Molecular Scale

Survey of modern biochemistry and biotechnology. Structure and function of DNA, proteins, lipids and carbohydrates. The role of biopolymers in life processes and everyday living is emphasized.

Credit Hours: 3

Prerequisites: for non-Biochemistry majors only

BIOCHM 2112: Biotechnology in Society

Biotechnology in a social context covers three areas: introduction to terminology and concepts, specific biotechnological applications to modern problems, and ethical questions.

Credit Hours: 3

Prerequisites: for non-biochemistry majors only

BIOCHM 2480: Introduction to Macromolecular Structure and Function

The function of biochemical macromolecules is directly related to their structure. The three-dimensional structures of proteins, nucleic acids, polysaccharides and membranes are each explored in the context of their functions and their microenvironments within living organisms. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: C- or higher in BIOCHM 1090; CHEM 2100

Corequisites: CHEM 2110

BIOCHM 2484: Macromolecular Techniques Laboratory

The laboratory experiments include DNA isolation, DNA cloning, PCR, plasmid transformation, protein expression, affinity-tagged chromatography, SDS-polyacrylamide gel electrophoresis, enzyme isolation, enzyme assay, buffer preparation, and Michaelis-Menten kinetics. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: sophomore standing; restricted to Biochemistry majors only

BIOCHM 2484H: Macromolecular Techniques Laboratory - Honors

The laboratory experiments include DNA isolation, DNA cloning, PCR, plasmid transformation, protein expression, affinity-tagged chromatography, SDS-polyacrylamide gel electrophoresis, enzyme isolation, enzyme assay, buffer preparation, and Michaelis-Menten kinetics. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: sophomore standing; Biochemistry majors only. Honors eligibility required

BIOCHM 3630: General Biochemistry

Survey of biochemistry; static/dynamic aspects of carbohydrates, lipids, proteins, nucleic acid. Discussion of metabolic pathways, energy production, and metabolic regulatory mechanism.

Credit Hours: 3

Prerequisites: CHEM 2030 or CHEM 2100

BIOCHM 4001: Topics in Biochemistry

Experimental courses; highly specialized topics taught infrequently or courses taught by visiting professors.

Credit Hour: 1-99

BIOCHM 4120: Medicinal Plant Science

Presentation of core topics, including an overview of plant groups with medicinal properties, botanical nomenclature, important biochemical pathways, exposure to journals, texts, and online databases that facilitate evidence-based research involving medicinal plants. Content of world-wide application. Has an international flavor. The course facilitates students to be independent learners and critical thinkers in this important knowledge area (of value to diverse academic backgrounds). The important role of collaborative inter-disciplinary studies will also be emphasized. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CHEM 1100 or CHEM 1320

Recommended: BIO_SC 1200 or BIO_SC 1500 or BIOCHM 1090

BIOCHM 4270: Biochemistry

(cross-leveled with BIOCHM 7270). First semester of comprehensive biochemistry course: metabolic pathways, amino acids/proteins, carbohydrates, lipids, nucleic acids, kinetics, energy requirements, metabolic regulation in living cells.

Credit Hours: 3

Prerequisites: CHEM 2110

BIOCHM 4272: Biochemistry

(cross-leveled with BIOCHM 7272). Second semester of a comprehensive biochemistry course, including metabolism of carbohydrates, fatty acids, steroids, amino acid synthesis and metabolism, molecular genetics, hormones, photosynthesis and integrated metabolism.

Credit Hours: 3

Prerequisites: C- or higher in BIOCHM 4270

BIOCHM 4300: Physical Chemistry of Biological Systems

To present fundamental principles of physical chemistry in the context of the structure and function of biological macromolecules. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: BIOCHM 4270

BIOCHM 4376: Computer Assisted Sequence Analysis and Molecular Modeling

(cross-leveled with BIOCHM 7376). Employs the use of computer-based interactive molecular graphics and sequence analysis software to analyze the three dimensional structures of macromolecules.

Credit Hours: 3

Prerequisites: CHEM 2110

BIOCHM 4385: Problems in Biochemistry

Credit Hour: 1-3

Prerequisites: departmental consent

BIOCHM 4460: Cancer Biology

(same as BIO_SC 4460). Cancer, cell biology, genetics, biochemistry.

Credit Hours: 3

Prerequisites: BIOCHM 4272, BIO_SC 2300 and BIO_SC 2200

BIOCHM 4510: Single Molecule Biophysics

(same as PHYSICS 4510; cross-leveled with BIOCHM 7510, PHYSICS 7510). The course provides an overview of the biophysics of enzymes, nucleic acids and the cytoskeleton. Topics covered will include diffusion, molecular motors, polymerization and the cytoskeleton and the polymer properties of nucleic acids and microtubules.

Credit Hours: 3

Prerequisites: PHYSICS 2760

BIOCHM 4940: Internship in Biochemistry

Field-based learning experience combining study, observation, and employment with a business, organization, or governmental agency. The internship provides opportunities to apply skills, concepts and theories about biochemistry in a practical context. The student intern, internship supervisor, and university coordinator will develop an individualized internship plan. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: instructor's consent

Recommended: junior standing

BIOCHM 4950: Undergraduate Research in Biochemistry

Individually directed laboratory research for upperclass students under faculty supervision.

Credit Hour: 1-3

Prerequisites: departmental consent

BIOCHM 4964: Industrial Internship with ABC Laboratories

This 5-credit course is a school and field-based learning experience combining the study, observation, and employment with ABC Laboratories in Columbia, MO. The internship provides opportunities to apply skills, concepts and theories about biochemistry and analytical chemistry in a practical context. The purpose of the internship experience is to provide the intern with the opportunity to develop knowledge and skills deemed desirable for a career in the biotechnology industries. During the time indicated in this agreement for the internship experience, the intern is expected to become a productive employee of ABC Laboratories. This course will provide technical instruction on commonly used laboratory skills and instrumentation at the University of Missouri followed by technical instruction on software and instrumentation at ABC Laboratories. After the training period, the interns will have the opportunity to work at ABC Laboratories full time for the summer.

Credit Hours: 5

Prerequisites or Corequisites: BIOCHEM 4272, CHEM 3200

Prerequisites: BIOCHM 1090, BIOCHM 2484, BIOCHM 4270

BIOCHM 4970: Senior Seminar in Biochemistry

Problem-based course on fundamental concepts of biochemistry. Requires written and oral presentations. One of two capstone courses required for biochemistry majors. Graded on A-F basis only.

Credit Hour: 1

Corequisites: BIOCHM 4974

BIOCHM 4974: Biochemistry Laboratory

Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes. One of two capstone courses required for biochemistry majors.

Credit Hours: 5

Prerequisites or Corequisites: BIOCHM 4272

Corequisites: BIOCHM 4970

BIOCHM 4996H: Honors Research in Biochemistry

Laboratory research for upper level honors students in consultation with Biochemistry faculty. Enrollment limited to Honors eligible students.

Credit Hour: 2-3

Prerequisites: departmental consent

BIOCHM 7085: Problems in Biochemistry

Problems in Biochemistry.

Credit Hour: 1-6

Prerequisites: Consent of Director of Graduate Studies required

BIOCHM 7110: Maps in Medicine Summer Institute

Lab/lecture course in which high school teachers gain knowledge of two innovative, inquiry-based programs, Mapping Health and Mapping Cell Fate, that focus on influenza and developmental biology and Missouri science standards for biology and health. Graded on S/U basis only.

Credit Hours: 2

Prerequisites: departmental consent

BIOCHM 7270: Biochemistry

(cross-leveled with BIOCHM 4270). First semester of comprehensive biochemistry course: metabolic pathways, amino acids/proteins, carbohydrates, lipids, nucleic acids, kinetics, energy requirements, metabolic regulation in living cells.

Credit Hours: 3

Prerequisites: CHEM 2110

BIOCHM 7272: Biochemistry

(cross-leveled with BIOCHM 4272). Second semester of a comprehensive biochemistry course, including metabolism of carbohydrates, fatty acids, steroids, amino acid synthesis and metabolism, molecular genetics, hormones, photosynthesis and integrated metabolism.

Credit Hours: 3

Prerequisites: BIOCHM 7270

BIOCHM 7274: Biochemistry Laboratory

Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; radioisotope tracers in metabolism; isolation, purification and kinetics of enzymes.

Credit Hours: 5

Corequisites: concurrent enrollment in BIOCHM 7270

BIOCHM 7376: Computer Assisted Sequence Analysis and Molecular Modeling

(cross-leveled with BIOCHM 4376). This course uses advanced computer graphics and computational techniques to analyze protein and nucleic acid sequences and their three-dimensional structures.

Credit Hours: 2

Prerequisites: CHEM 2110

BIOCHM 7510: Single Molecule Biophysics

(same as PHYSCS 7510; cross-leveled with BIOCHM 4510, PHYSCS 4510). The course provides an overview of the biophysics of enzymes, nucleic acids and the cytoskeleton. Topics covered will include diffusion, molecular motors, polymerization and the cytoskeleton and the polymer properties of nucleic acids and microtubules.

Credit Hours: 3

Prerequisites: PHYSCS 2760

BIOCHM 7978: Cancer Biology

(same as BIO_SC 7978). The course will cover major molecular and cellular aspects of cancer. Students will read original research articles, present overviews and lead class discussions.

Credit Hours: 3

Prerequisites: BIOCHM 4270, BIO_SC 2300 and BIO_SC 4976

BIOCHM 8060: Ethical Conduct of Research

(same as BIO_SC 8060). Discussion of ethical issues in biological research, including the rules and conventions for appropriate research conduct. Graded on S/U basis only.

Credit Hour: 1

BIOCHM 8090: Research in Biochemistry

Research in biochemistry for qualified students, with counsel of faculty. Includes preparation of dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: Consent of Director of Graduate Studies required

BIOCHM 8120: Advanced Medicinal Plant Science

Presentation of core topics in pharmacognosy, including an overview of plant groups with medicinal properties, essentials of botanical nomenclature, Overview of pharmacological activities of plant-sourced products and evidence-based research, phytochemical variation and significance, important biochemical pathways, origins of secondary metabolites, some major groups of phytochemicals, observations on economic and social trends in the use of medicinal plant products in developed and developing countries, overview of modern technology, high throughput screening, bioinformatics. Considerable exposure to key articles in journals, based on internationally accepted text (Trease & Evans), exposure to online databases - all sources of information that facilitate evidence-based research involving medicinal plants. Content of world-wide application. Has considerable international flavor and directly applicable to medicinal flora world-wide. The course facilitates students to be independent learners and critical thinkers in this important knowledge area (of value to diverse academic backgrounds). The important role of collaborative inter-disciplinary studies is also emphasized. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CHEM 1100 or CHEM 1320 or BIOCHM 1090 and BIO_SC 1200 or BIO_SC 1500 or the equivalent of these courses for non-MU students

Recommended: A Freshman level course in the Life Sciences or General Botany will also be advantageous but not essential

BIOCHM 8240: Introduction to Graduate Biochemistry I

Introduction to biochemistry for life science graduate students. Core course for Biochemistry students. Structures and interactions of biological macromolecules including thermodynamics, binding, enzyme action and biological membranes as well as techniques of analysis and structure determination.

Credit Hours: 4

Prerequisites: Undergraduate organic chemistry plus undergraduate biochemistry or molecular biology, their equivalent or permission of instructor

BIOCHM 8260: Macromolecular Systems Integration

To introduce graduate students to biochemistry at the graduate level with particular emphasis on genomics/gene expression and replication; proteomics/cell signaling and metabolism. Course graded on A-F basis only.

Credit Hours: 4

Prerequisites: BIOCHM 8240

BIOCHM 8360: Nutritional Biochemistry of Carbohydrates

(same as NUTRIT 8360 and NEP 8360). Current concepts with in-depth coverage of selected examples of key regulatory steps controlling carbohydrate metabolism; emphasizing molecular mechanisms. Based entirely on research literature and taught in a tutorial format.

Credit Hours: 3

Prerequisites: BIOCHM 7272

BIOCHM 8362: Introduction to Plant Metabolism

(same as PLNT_S 8362 and BIO_SC 8362). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant metabolism. Graded on A-F basis only.

Credit Hours: 2

BIOCHM 8365: Introduction to Molecular Cell Biology

(same as BIO_SC 8365 and PLNT_S 8365). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis on plant biology. This course examines the basic concepts and techniques used to understand molecular cell biology. Graded on A-F basis only.

Credit Hours: 2

BIOCHM 8390: Molecular Biology of Mineral Nutrition

(same as NUTRIT 8390 and NEP 8390). Current concepts of metal ion transport, intracellular metal trafficking and metal-dependent regulation of gene expression. Based entirely on research literature and taught in a tutorial format.

Credit Hours: 3

Prerequisites: BIOCHM 7272 and a 4000-level nutrition course

BIOCHM 8430: Physical Biochemistry

Physical concepts underlying a variety of physical chemical methods as they apply to biochemical research.

Credit Hours: 3

Prerequisites: BIOCHM 7272 and CHEM 3300

BIOCHM 8432: Enzymology and Metabolic Regulation

A basic introduction to the study of enzymes and their role in intermediary metabolism. Topics include enzyme kinetics, mechanisms of enzymatic catalysis and control of metabolic pathways.

Credit Hours: 3

Prerequisites: BIOCHM 7272

BIOCHM 8434: Signaling in Molecular Cell Biology

The objective of this course is to provide important foundations in cellular signaling in the context of biochemistry and cell biology for first and second year graduate students. The course focuses on cell-to-cell communication and intracellular signaling via different classes of cell surface receptors using specific receptor paradigms from human, other animals, plants, yeast and E.coli. Primary literature will be used for in-class discussions and homework assignments to highlight key experiments and introduce students to relevant experimental techniques. Graded on A-F basis only.

Credit Hours: 3

Recommended: BIO_SC 2300, BIOCHM 4270

BIOCHM 8438: Nutrient Regulation of Gene Expression

(same as AN_SCI 8438, NUTRIT 8438, and NEP 8438). Current concepts with in-depth coverage of several minerals that illustrate themes in molecular mineral nutrition. Based entirely on research literature and taught in a tutorial format.

Credit Hours: 3

Prerequisites: BIOCHM 7272 and a 4000-level nutrition course

BIOCHM 8450: Rotation Research

Introductory laboratory research. Graded on A-F basis only. Normally 1 hour per advisor per semester, two-1 hour sections can be taken per semester.

Credit Hour: 1-2

BIOCHM 9001: Topics in Biochemistry

Experimental courses, highly specialized topics taught infrequently or courses taught by visiting professors.

Credit Hour: 1-9

BIOCHM 9085: Problems in Biochemistry

Problems in Biochemistry

Credit Hour: 1-6

BIOCHM 9087: Seminar in Biochemistry

Review of current literature; individual presentation of research or classical science topics.

Credit Hour: 1

BIOCHM 9090: Research in Biochemistry

Research in biochemistry for qualified students, with counsel of faculty. Includes preparation of dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

BIOCHM 9430: Molecular Biology I

(same as MICROB 9430). Detailed examination of current fundamental concepts of molecular genetics of bacteria, bacteriophages and yeast. Experimental approaches to analysis of the physical structures of genomic nucleic acids, the biochemistry and genetics of mutations, replication, gene transfer and gene expression will be examined in depth from reports in the current literature.

Credit Hours: 4

BIOCHM 9432: Molecular Biology II

(same as MICROB and BIO_SC 9432) Detailed experimental analysis of eukaryotic cellular and molecular biology relevant to cellular and viral gene expression, post-transcriptional and post-translational modifications and genome replication. Models for developmental genetic analysis and genetic determinants controlling developmental processes utilizing the current literature will be examined.

Credit Hours: 4

BIOCHM 9462: Hormone Action

A lecture course with weekly assigned readings. Topics will include: a description of selected polypeptide, steroid and other hormones and their biological effects; receptors; second messengers; protein phosphorylation in hormone mediation; growth factors; cellular oncogenes.

Credit Hours: 2

Prerequisites: BIOCHM 7272

BIOCHM 9466: Plant Biochemistry

Emphasizes biochemistry unique to plants; biochemical events plants share with other organisms discussed, compared. Photosynthesis, metabolism, composition, compartmentation, regulation of biochemical events included.

Credit Hours: 3

Prerequisites: BIOCHM 4270

BIOCHM 9468: Molecular Biology of Plant Growth and Development

(same as BIO_SC 9468). Molecular biology of plant hormones, signal transduction, environmental signals.

Credit Hours: 3

BIOCHM 9470: Analytical Biochemistry--Chromatography

Principles, experimental design, capabilities, limitations, and applications of the general field of chromatography of biologically important molecules. Eight (2-hour) lectures, eight (4-hour) labs. Four weeks.

Credit Hours: 2

BIOCHM 9472: Analytical Biochemistry--Mass Spectrometry

Instrumentation, fragmentation mechanisms, interpretation of spectra, combined gas chromatography--mass spectrometry. Eight (2-hour) lectures, eight (4-hour) labs.

Credit Hours: 2

Biological Engineering (BIOL_EN)

BIOL_EN 1000: Introduction to Biological Engineering

For first semester engineering students. Develop appreciation for professional engineering. Students will participate with senior design students to conceptualize a case-study problem.

Credit Hour: 1-2

BIOL_EN 2000: Professional Development in Engineering

A review of professional opportunities, registration, ethics, and societies.

Credit Hour: 1-2

Prerequisites: sophomore standing

BIOL_EN 2080: Introduction to Programming for Engineers

This course teaches how to write scientific programs for analysis of data and simulation of physical phenomena using Matlab. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 1500

BIOL_EN 2180: Engineering Analysis of Bioprocesses

Material and Energy Balances. Integrating principles of physics, chemistry and mathematics to analyze steady state and transient biological/biomedical processes. Graded on A-F basis only.

Credit Hours: 3

Recommended: MATH 1700, CHEM 1320, PHYSCS 2750

BIOL_EN 3001: Topics in Biological Engineering

Current and new technical developments in biological engineering.

Credit Hours: 3

Prerequisites: instructor's consent

BIOL_EN 3050: Environmental Control for Biological Systems

Systems for controlling the physical environments (heat, moisture, light, contaminating organism, chemicals) for plant and animal systems including livestock, aquacultures, crops and agricultural products.

Credit Hours: 3

Prerequisites: ENGINR 2300 and MATH 4100

BIOL_EN 3070: Biological Fluid Mechanics

Basic principles of fluid mechanics applied to transport processes in biological systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 2750 and MATH 1700

BIOL_EN 3075: Introduction to Materials Engineering

Course covers concepts and techniques in materials engineering from an engineering design perspective, materials requirements for design, and fundamentals; intended for undergraduate engineering students. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 2300, ENGINR 1200, ENGINR 2200

Corequisites: One of the following BIOL_EN 3180, CH_ENG 3261, MAE 4231, MAE 4300, or instructor consent

BIOL_EN 3170: Biomaterials

Engineering sciences and design will be leverage for the study and design of biomaterials. Understanding the structure-property relationship between biomaterials and tissue will be addressed for implant design.

Credit Hours: 3

Corequisites: BIOL_EN 2180, ENGINR 2200 or instructor's consent

BIOL_EN 3180: Heat and Mass Transfer in Biological Systems

Principles of heat and mass transfer and their applications in biomedical, bioenvironmental, and bioprocessing engineering.

Credit Hours: 3

Prerequisites or Corequisites: ENGINR 2300 or CH_ENG 3261

Prerequisites: BIOL_EN 2180 or CH_ENG 2225

BIOL_EN 4001: Topics in Biological Engineering

Current and new technical developments in biological engineering.

Credit Hours: 3

Prerequisites: instructor's consent

BIOL_EN 4070: Bioelectricity

(cross-leveled with BIOL_EN 7070). Application of engineering approaches to understand bioelectricity at the cellular level including the equivalent circuit of cell membranes and the electronic design of patch-clamp amplifiers.

Credit Hours: 3

Prerequisites: PHYSCS 2760 and BIOL_EN 3180 or instructor's consent

BIOL_EN 4080: Engineering Computation

(cross-leveled with BIOL_EN 7080). An introduction to numerical methods relevant to biological engineering in the context of scientific computing. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 4100

BIOL_EN 4085: Problems in Biological Engineering

Supervised independent study at the undergraduate level.

Credit Hour: 1-5

Prerequisites: instructor's consent

BIOL_EN 4150: Soil and Water Conservation Engineering

(same as CV_ENG 4710; cross-leveled with BIOL_EN 7150, CV_ENG 7710). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.

Credit Hours: 3

Recommended: BIOL_EN 2180 or CV_ENG 3200 or instructor's consent

BIOL_EN 4160: Food Process Engineering

(cross-leveled with BIOL_EN 7160). Study of transport phenomena and unit operations in food processing systems. Emphasis on fluid flow and heat transfer in food processing, preservation processes, refrigeration, freezing, psychrometrics, and dehydration.

Credit Hours: 3

Prerequisites: BIOL_EN 3180 or instructor's consent

BIOL_EN 4170: Biomaterials Interfaces of Implantable Devices

(cross-leveled with BIOL_EN 7170). Surface structures and properties to improve biocompatibility will be studied. Engineering sciences and design will be leverage in the design of an improved biocompatible surface.

Credit Hours: 3

Prerequisites: BIOL_EN 3170 or instructor's consent

BIOL_EN 4231: Transport Phenomena in Materials Processing

(same as MAE 4231; cross-leveled with BIOL_EN 7231, MAE 7231). Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: MAE 4300 or permission of instructor

Prerequisites: MAE 3200, MAE 3400 (or permission of instructor); and MATH 4100

BIOL_EN 4250: Irrigation and Drainage Engineering

(cross-leveled with BIOL_EN 7250). Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage.

Credit Hours: 3

Prerequisites: CV_ENG 3700 or MAE 3400 or BIOL_EN 2180

BIOL_EN 4260: Food Process Engineering II

(cross-leveled with BIOL_EN 7260). Continuing study of transport phenomena and unit operations in food processing systems. Emphasis on fluid food evaporation concentration food dehydration, contact equilibrium processes and mechanical separation processes.

Credit Hours: 3

Prerequisites: BIOL_EN 4160 or instructor's consent

BIOL_EN 4270: Design of Experiments and Statistical Quality Control for Process Engineers

(same as CH_ENG 4270; cross-leveled with BIOL_EN 7270, CH_ENG 7270). A practical statistical tool box for experimenters including comparison of process means, effects of variables, design and interpretation of factorial experiments, and statistical quality control.

Credit Hours: 3

Prerequisites: experience with Excel or instructor's consent

BIOL_EN 4280: Survey of Bioengineering Techniques

Laboratory techniques to train students in Bioelectricity, Biomechantronics, Bioenvironment, Biomaterials, Biophotonics, Bioprocessing. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: senior standing

BIOL_EN 4310: Feedback Control Systems

(same as ECE 4310; cross-leveled with BIOL_EN 7310, ECE 7310).

System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: MATH 4100 and junior/senior standing. May be repeated for credit

BIOL_EN 4315: Introduction to Bioprocess Engineering

(same as CH_ENG 4315; cross-leveled with BIOL_EN 7315, CH_ENG 7315). This general introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 (for Biological Engineering students) or CH_ENG 2225 (for Chemical Engineering students) or instructor's consent

BIOL_EN 4316: Biomass Refinery Operations

(same as CH_ENG 4316; cross-leveled with BIOL_EN 7316, CH_ENG 7316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.

Credit Hours: 3

Recommended: BIOL_EN 2180 or CH_ENG 2225 (for Chemical Engineering students) or instructor's consent

BIOL_EN 4350: Watershed Modeling Using GIS

(same as CV_ENG 4720; cross-leveled with BIOL_EN 7350, CV_ENG 7720). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP. Procedures for model calibration/sensitivity data analysis.

Credit Hours: 3

Recommended: BIOL_EN 2180 or CV_ENG 3200 or instructor's consent

BIOL_EN 4370: Orthopaedic Biomechanics

(cross-leveled with BIOL_EN 7370, V_M_S 7370). Engineering sciences will be leverage to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGINR 1200, BIOL_EN 3170, instructor's consent required

BIOL_EN 4380: Applied Electronic Instrumentation

(cross-leveled with BIOL_EN 7380). Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning,

computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems.

Credit Hours: 4

Prerequisites: BIOL_EN 2080 and PHYSCS 2760

BIOL_EN 4420: Introduction to Biomedical Imaging

(same as PHYSCS 4420; cross-leveled with BIOL_EN 7420, PHYSCS 7420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasound, MRI and Optical Imaging, as well as recent developments in biomedical imaging.

Credit Hours: 3

Prerequisites: PHYSCS 2760

BIOL_EN 4470: Biomolecular Engineering and Nanobiotechnology

(cross-leveled with BIOL_EN 7470). Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: senior/graduate standing or instructor's consent

BIOL_EN 4480: Physics and Chemistry of Materials

(same as PHYSCS 4190, CHEM 4490, NU_ENG 4319; cross-leveled with BIOL_EN 7480, PHYSIC 7190, CHEM 7490, NU_ENG 7319). Physics and Chemistry of Materials is a 3 credit hours undergraduate/graduate level course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid term and one final exam. Graduate students will submit a term paper.

Credit Hours: 3

Prerequisites: PHYSCS 2760/CHEM 1320 or equivalent/prior approval by instructor

BIOL_EN 4550: Design of Livestock Waste Management Systems

(cross-leveled with BIOL_EN 7550). Development and application of design criteria to the design of agricultural waste management facilities.

Credit Hours: 3

Prerequisites: CHEM 1310 and CV_ENG 3700, MAE 3400 or instructor's consent

BIOL_EN 4570: Fluorescent Imaging

(cross-leveled with BIOL_EN 7570). Principles and applications of fluorescent imaging. The course covers: Image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; molecular and cellular fluorescent imaging.

Credit Hours: 3

Prerequisites: BIO_SC 1500 and BIOL_EN 2180 or instructor's consent

BIOL_EN 4575: Computational Neuroscience

(same as BIO_SC 4580, ECE 4580; cross-leveled with BIOL_EN 7575, BIO_SC 7580, ECE 7580). An interdisciplinary course with a strong foundation in quantitative science for students in biological-behavioral sciences. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: BIO_SC 1010, BIO_SC 1500; MATH 1500

BIOL_EN 4580: Mechanical Systems Engineering

(cross-leveled with BIOL_EN 7580). Fundamentals and applications of prime movers and power transmissions for the design of engineering systems.

Credit Hours: 3

Prerequisites: Thermodynamics course, Fluid Mechanics course

Corequisites: ENGINR 2100 or BIOL_EN 4380 or instructor's consent

BIOL_EN 4670: Photonics and Nanotechnologies in Optical Biosensors

(cross-leveled with BIOL_EN 7670). Latest applications of photonics and nanotechnologies in optical bio-chemical sensors will be reviewed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 2760

BIOL_EN 4770: Biomedical Optics

(cross-leveled with BIOL_EN 7770). Essential concepts and methods for applying optical techniques to biomedical diagnosis and therapy will be covered with major application examples being discussed.

Credit Hours: 3

Prerequisites: PHYSCS 2760 and BIOL_EN 3180; or instructor's consent

BIOL_EN 4870: Molecular and Cell Mechanics

Application of mechanics and engineering principles to biological systems at the cellular and molecular levels. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGINR 2200

BIOL_EN 4940: Engineering Internship

Problem course following prior approved work experience. Problem selected by internship company representative, faculty problem adviser and student. Supervised by faculty problem advisor and presented in engineering report form.

Credit Hour: 2-5

Prerequisites: advisor's consent

BIOL_EN 4980: Biological Engineering Design

Capstone design course for the Biological Engineering major. Design of biological system devices or processes.

Credit Hours: 3

Prerequisites: senior standing or instructor's consent

BIOL_EN 4990: Undergraduate Research in Biological Engineering

Supervised independent study at the undergraduate level.

Credit Hour: 1-5

Prerequisites: instructor's consent

BIOL_EN 4995: Undergraduate Honors Research in Biological Engineering

Open only to honor students in Biological Engineering. Independent investigation in biological engineering to be presented as a thesis.

Credit Hour: 1-5

Prerequisites: advisor's consent

BIOL_EN 7001: Topics in Biological Engineering

Study of advanced developments in biological engineering.

Credit Hour: 1-3

BIOL_EN 7070: Bioelectricity

(cross-leveled with BIOL_EN 4070). Application of engineering approaches to understand bioelectricity at the cellular level including the equivalent circuit of cell membranes and the electronic design of patch-clamp amplifiers. Prerequisites: PHYSCS 2760 and BIOL_EN 3180 or instructor's consent

Credit Hours: 3

BIOL_EN 7080: Engineering Computation

(cross-leveled with BIOL_EN 4080). An introduction to numerical methods relevant to biological engineering in the context of scientific computing.

Credit Hours: 3

Prerequisites: MATH 4100

BIOL_EN 7150: Soil and Water Conservation Engineering

(same as CV_ENG 7710; cross-leveled with BIOL_EN 4150, CV_ENG 4150). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CV_ENG 3200, or instructor's consent

BIOL_EN 7160: Food Process Engineering

(cross-level with BIOL_EN 4160). Study of transport phenomena and unit operations in food processing systems. Emphasis on fluid flow and heat transfer in food processing, preservation processes, refrigeration, freezing, psychometrics, and dehydration.

Credit Hours: 3

Prerequisites: BIOL_EN 3180 or instructor's consent

BIOL_EN 7170: Biomaterials Interfaces of Implantable Devices

(cross-leveled with BIOL_EN 4170). Surface structures and properties to improve biocompatibility will be studied. Engineering sciences and design will be leverage in the design of an improved biocompatible surface.

Credit Hours: 3

Prerequisites: BIOL_EN 3170 or instructor's consent

BIOL_EN 7231: Transport Phenomena in Materials Processing

(same as MAE 7231; cross-leveled with BIOL_EN 4231, MAE 4231). Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MAE 3200, MAE 3400, MAE 4300 or equivalent; and MATH 4100

BIOL_EN 7250: Irrigation and Drainage Engineering

(cross-leveled with BIOL_EN 4250). Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage.

Credit Hours: 3

Prerequisites: CV_ENG 3700 or MAE 3400 or BIOL_EN 2180

BIOL_EN 7260: Food Process Engineering II

(cross-leveled with BIOL_EN 4260). Continuing study of transport phenomena and unit operations in food processing systems. Emphasis on fluid food evaporation concentration food dehydration, contact equilibrium processes and mechanical separation processes.

Credit Hours: 3

Prerequisites: BIOL_EN 7160 or instructor's consent

BIOL_EN 7270: Design of Experiments and Statistical Quality Control for Process Engineers

(same as CH_ENG 7270; cross-leveled with BIOL_EN 4270, CH_ENG 4270). A practical statistical tool box for experimenters including comparison of process means, effects of variables, design and interpretation of factorial experiments, and statistical quality control.

Credit Hours: 3

Prerequisites: experience with Excel or instructor's consent

BIOL_EN 7310: Feedback Control Systems

(same as ECE 7310; cross-leveled with BIOL_EN 4310, ECE 4310). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Graded A-F only. May be repeated for credit.

Credit Hours: 4

Prerequisites: MATH 4100

BIOL_EN 7315: Introduction to Bioprocess Engineering

(same as CH_ENG 7315; cross-leveled with BIOL_EN 4315, CH_ENG 4315). This general introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analysis proceed through the use of mass balances, energy balances, and empirical or theoretical models.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 (for biological engineering students) or CH_ENG 2225 (for chemical engineering students) or instructor's consent

BIOL_EN 7316: Biomass Refinery Operation

(same as CH_ENG 7316; cross-leveled with BIOL_EN 4316, CH_ENG 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CH_ENG 2225 or instructor's consent

BIOL_EN 7350: Watershed Modeling Using GIS

(same as CV_ENG 7720; cross-leveled with BIOL_EN 4350, CV_ENG 4720). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP, Procedures for model calibration/sensitivity data analysis.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor's consent

BIOL_EN 7370: Orthopaedic Biomechanics

(same as V_M_S 7370; cross-leveled with BIOL_EN 4370). Engineering sciences will be leverage to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGINR 1200 and BIOL_EN 3170, instructor's consent required

BIOL_EN 7380: Applied Electronic Instrumentation

(cross-leveled with BIOL_EN 4380). Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning, computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems.

Credit Hours: 4

Prerequisites: BIOL_EN 2080, PHYSCS 2760

BIOL_EN 7420: Introduction to Biomedical Imaging

(same as PHYSCS 7420; cross-leveled with BIOL_EN 4420, PHYSCS 4420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasound, MRI and Optical Imaging, as well as recent developments in biomedical imaging, as well as recent developments in biomedical imaging.

Credit Hours: 3

Prerequisites: PHYSCS 2760

BIOL_EN 7470: Biomolecular Engineering and Nanobiotechnology

(cross-leveled with BIOL_EN 4470). Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.

Credit Hours: 3

BIOL_EN 7480: Physics and Chemistry of Materials

(same as PHYSCS 7190, NU_ENG 7319, CHEM 7490; cross-leveled with BIOL_EN 4480, PHYSCS 4190, NU_ENG 4319, CHEM 7490). Physics and Chemistry of Materials is a 3 credit hours undergraduate/graduate level course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper.

Credit Hours: 3

Prerequisites: PHYSCS 2760 / CHEM 1320 or equivalent/prior approval by instructor

BIOL_EN 7550: Design of Livestock Waste Management Systems
(cross-leveled with BIOL_EN 4550). Development and application of design criteria to the design of agricultural waste management facilities.

Credit Hours: 3

Prerequisites: CHEM 1310 and CV_ENG 3700, MAE 3400 or instructor's consent

BIOL_EN 7570: Fluorescent Imaging

(cross-leveled with BIOL_EN 4570). Principles and applications of fluorescent imaging. The course covers: Image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; molecular and cellular fluorescent imaging. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIO_SC 1500 and BIOL_EN 2180 or instructor's consent

BIOL_EN 7575: Computational Neuroscience

(same as BIO_SC 7580, ECE 7580; cross-leveled with BIOL_EN 4575, BIO_SC 4580, ECE 4580). An interdisciplinary course with a strong foundation in quantitative science for students in biological-behavioral science. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: BIO_SC 1010, BIO_SC 1500; MATH 1500

BIOL_EN 7580: Mechanical Systems Engineering

(cross-leveled with BIOL_ENG 4580). Fundamentals and applications of prime movers and power transmissions for the design of engineering systems.

Credit Hours: 3

Prerequisites: Thermodynamics course, Fluid Mechanics course

Corequisites: ENGINR 2100 or BIOL_EN 7380 or instructor's consent

BIOL_EN 7670: Photonics and Nanotechnologies in Optical Biosensors

(cross-leveled with BIOL_EN 4670). Latest applications of photonics and nanotechnologies in optical biochemical sensors will be reviewed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 2760

BIOL_EN 7770: Biomedical Optics

(cross-leveled with BIOL_EN 4770). Essential concepts and methods for applying optical techniques to biomedical diagnosis and therapy will be covered with major application examples being discussed.

Credit Hours: 3

Prerequisites: PHYSCS 2760 and BIOL_EN 3180; or instructor's consent

BIOL_EN 8000: Scientific Discovery Leading to Life Science Innovations

(same as MPP 8000). The goal of this course is to provide participants with a conceptual and practical understanding of how life science research is conducted in a modern research institution in the US and the pathways involved in translating fundamental discoveries into products and services that affect healthcare. We will cover the transitions from initial discovery concepts to first-in-human studies, clinical trials,

healthcare guidelines and policy to product development. We will provide an introduction to essential disciplines and interactions that enable scientific discoveries to move forward into novel device and drug therapies. Participants will come away with a very complete picture of how medical research happens, including: how it is funded; what is required to make discoveries and record and protect intellectual property that is created; how to advance innovations to clinical practice, how to navigate the regulatory and bioethical environment, and how discoveries reach practitioners and benefit patients. The Course is the first in a three course sequence leading to a Graduate Certificate in Life Science Innovation and Entrepreneurship. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Must be Graduate Standing or receive certificate program director's approval

BIOL_EN 8001: Advanced Topics in Biological Engineering

Study of advanced developments in biological engineering.

Credit Hour: 1-3

BIOL_EN 8085: Problems in Biological Engineering

Supervised individual study at the graduate level.

Credit Hour: 1-99

Prerequisites: departmental consent

BIOL_EN 8087: Seminar in Biological Engineering

Recent investigations in biological engineering and related fields. Discussion of current literature; preparation and presentation of papers.

Credit Hour: 1

BIOL_EN 8088: Advanced Seminar in Biological Engineering

Student presentation and discussion of topical research. May be repeated for credit.

Credit Hour: 1

Prerequisites: BIOL_EN 8087 and BIOL_EN 8402 or instructor's consent

BIOL_EN 8100: Design and Development of Biomedical Innovations

(same as ENGINR 8100). This course takes students through the process of brainstorming and working out a solution to a medical need, and then producing a product. Outputs may include the development of a physical prototype through interactions with the College of Engineering rapid prototype facility. The course is one of a three-course set leading to a Graduate Certificate in Translational Science and Entrepreneurship. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Student must be enrolled in a graduate degree program and enrolled in a sequenced cohort group beginning with MPP 8000/BIOL_EN 8000 then MPP 8100/BIOL_EN 8100 then MANGMT 8200

BIOL_EN 8150: Natural Systems for Wastewater Treatment

Emphasis is on the design, management and biological performance of lagoons, overland flow systems and constructed wetland.

Credit Hours: 3

Prerequisites: CV_ENG 7230 and BIOL_EN 7150 or instructor's consent

BIOL_EN 8170: Sensors and Biosensors

The course covers basic principles of chemical and biological sensors, such as immobilization techniques, transducers (optical, electrical, etc.) and performance factors.

Credit Hours: 3

BIOL_EN 8180: Numerical Methods in Engineering Research

Numerical techniques and case studies in Biological Engineering. Topics include basic numerical methods, mathematical representation of data, matrix algebra, ordinary and partial differential equations.

Credit Hours: 3

Prerequisites: MATH 4100

BIOL_EN 8230: Advanced Ceramic Materials

(same as CH_ENG 8230, MAE 8230). To provide an advanced level understanding between processing, properties, and microstructure of ceramic materials. Topics include crystallography, defect chemistry, transport properties, microstructure, and forming methods. Graded on A-F basis only.

Credit Hours: 3

BIOL_EN 8250: Water Management Theory

Advanced studies in erosion control, irrigation, and drainage. Water resources engineering.

Credit Hours: 3

Prerequisites: MATH 1500, Computer Engineering and Computer Science course, SOIL 4307 or SOIL 7307 and Soil Conservation course

BIOL_EN 8270: Principles and Applications of Fluorescence

Physical foundations of fluorescence, fluorophores, steady-state and lifetime measurements, and instrumentation. Applications in the life science from tissues staining to DNA probes. Graded on A-F basis only.

Credit Hours: 3

BIOL_EN 8280: Advanced Biological Transport Processes

Principles of fluid flow, heat transfer, and mass transfer applied to (a) understanding of how the human body functions (from the cellular up to the system level) and (b) designing biomedical devices. An independent project/case-study of a relevant research topic also required.

Credit Hours: 3

BIOL_EN 8360: Food Extrusion

Engineering principles and applications of single and twin screw food cooking extrusion systems. Modeling, control and optimization of extrusion systems. Dough rheology.

Credit Hours: 2

Prerequisites: BIOL_EN 7260

BIOL_EN 8370: Materials Characterization Techniques

Concepts and techniques in characterizing materials, including bulk and surface analyses. Techniques are presented in terms of use, sample requirements, and the engineering principles. Topics include: contact

angle measurement, XPS, SEM, TEM, STM, AFM, XRD, and thermal analyses.

Credit Hours: 3

Prerequisites: at least one undergraduate course in material science, engineer, or design

BIOL_EN 8380: Modeling and Identification of Engineering Systems

Generalized description of engineering systems, bond graph modeling, system identification techniques, and neural network approaches.

Credit Hours: 3

Prerequisites: MATH 4100

BIOL_EN 8402: Research Methods

(same as F_S 8402). Review of literature; planning research projects; publication procedures.

Credit Hours: 2

BIOL_EN 8470: Ultrasensitive Biodetection

Multiplexing single-molecule, single-cell, nanobiotech analytical techniques to improve disease diagnosis, treatment, and understanding of biophenomena (membrane transport, gene expression, enzyme activities, cell communications). Graded A-F only.

Credit Hours: 3

Prerequisites: Instructor's consent required

BIOL_EN 8570: Microscopic Imaging

Advanced topics in microscopic imaging with focus on applications of molecular and cellular imaging using fluorescent microscopy.

Credit Hours: 3

Prerequisites: BIOL_EN 7570 or instructor's consent

BIOL_EN 8670: Orthopaedic Failure Modes and Effect Analysis

Engineering sciences will be leveraged provide a comprehensive study of failure modes and related effects for orthopaedic devices, orthopaedic tissue repair, and surgical interventions. Clinical case studies will be analyzed to introduce real world problems of orthopaedic failures. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIOL_EN 3170 or ENGINR 1200, BIOL_EN 4370 or BIOL_EN 7370 or instructor consent

Recommended: For department majors

BIOL_EN 8770: Photon Migration and Optical Imaging in Turbid Media

The essential concepts and techniques in optical imaging in turbid media will be covered including both forward problems and inverse reconstruction theories. Graded on A/F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

BIOL_EN 8870: Molecular and Cell Mechanics

Application of mechanics and engineering principles to biological systems at the cellular and molecular levels. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGINR 2200

BIOL_EN 8990: Masters Thesis Research in Biological Engineering

Independent investigation to be presented as a thesis. Graded on S/U basis only.

Credit Hour: 1-99

BIOL_EN 9990: Doctoral Dissertation Research in Biological Engineering

Independent investigation to be presented as a thesis. Graded on S/U basis only.

Credit Hour: 1-99

Biological Sciences (BIO_SC)

BIO_SC 1001: Topics in Biological Science - General

Selected topics not covered in current offerings. May not be used in partial fulfillment of requirements for a biological science in general education. May be graded on A-F or S/U basis.

Credit Hour: 1-3

BIO_SC 1002: Topics in Biological Sciences- Biological/Physical/Mathematics

Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-3

BIO_SC 1010: General Principles and Concepts of Biology

Emphasizes connections and applications to society and the human condition, science literacy, and critical thinking skills. A discussion of general principles and fundamental concepts of living things. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.

Credit Hours: 3

Recommended: MATH 1100

BIO_SC 1020: General Biology Laboratory

Laboratory exercises dealing with representative organisms and methods of modern biological sciences. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.

Credit Hours: 2

Prerequisites: BIO_SC 1010 or BIO_SC 1400 or BIO_SC 1010 concurrently

BIO_SC 1030: General Principles and Concepts of Biology with Laboratory

Survey of general principles and basic concepts of life science, emphasizing applications to society and the human condition. Lectures address science literacy and critical thinking and laboratory exercises use representative organisms to complement lecture topics. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.

Credit Hours: 5

Recommended: MATH 1100 or concurrent enrollment

BIO_SC 1060: Basic Environmental Studies

Considers the ecosystem, energy and biogeochemical cycles and population dynamics; relation of the environment to agriculture and technology, pollution, power and food production; politico-economic considerations; moral and ethical issues. For non-science majors.

Credit Hours: 3

BIO_SC 1100: Introductory Zoology with Laboratory

(same as F_W 1100). Introduces important principles and concepts of zoology. Emphasizes cell biology; evolution; genetics; ecology; structure, function, development of the organism.

Credit Hours: 5

BIO_SC 1200: General Botany with Laboratory

Introduction to study of plants. Emphasis on structure, growth, physiology, genetics and reproduction of plants.

Credit Hours: 5

BIO_SC 1400: Evolution for Everyone

This course will explore the application of evolutionary theory to modern human affairs. We will study the processes involved in evolution and investigate evolutionary interpretations of human social behavior (e.g., psychology, mate choice, economics, religion, and morality). No credit if student has received credit for BIO_SC 2060 or BIO_SC 4600.

Credit Hours: 3

BIO_SC 1500: Introduction to Biological Systems with Laboratory

Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology.

Credit Hour: 3-5

Recommended: MATH 1100 or sufficient ALEKS score

BIO_SC 1500H: Introduction to Biological Systems with Laboratory Honors

Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology.

Credit Hour: 3-5

Prerequisites: MATH 1100 and high school chemistry. Honors eligibility required

BIO_SC 2001: Topics in Biological Sciences - General

Selected topics not covered in current offerings. May not be used in partial fulfillment of requirements for a biological science in general education. May be graded on A-F or S/U basis.

Credit Hour: 1-3

Recommended: One course in Biology

BIO_SC 2002: Topics in Biological Sciences- Biological/Physical/ Mathematics

Selected topics not covered in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-3

Recommended: a course in general biology

BIO_SC 2002H: Topics in Biological Sciences- Biological/Physical/ Mathematics - Honors

Selected topics not covered in regularly offered courses. Recommended: a course in biology

Credit Hour: 1-3

Prerequisites: Honors eligibility required

BIO_SC 2010: Undergraduate Seminar in Biological Sciences

Discussion and critical evaluation of current topics in biological sciences for intermediate-level students. Some sections may be graded on either A-F or S/U basis only.

Credit Hour: 1-3

Prerequisites: sophomore standing

BIO_SC 2020: How the Brain Works

Basic structure and function of the brain; left and right brain studies; gender differences; learning and memory; brain disorders..

Credit Hour: 1

Prerequisites: BIO_SC 1010

BIO_SC 2030: Life of the Cell

This course will help students understand basic concepts of biomolecular structure, cell organization, cell membranes, energy and metabolism, cellular communication, and cell division. This course is intended for non-science majors and may not be used to satisfy requirements for either a major or a minor in biological sciences.

Credit Hours: 3

Prerequisites: BIO_SC 1010

BIO_SC 2060: Community Biology

Principles of population biology, ecology, and evolution, including consideration of human impacts on biological communities and ecosystems.

Credit Hours: 3

Prerequisites: BIO_SC 1010 or equivalent. Not open to biology majors

BIO_SC 2100: Infectious Diseases

An introduction to the basic science of bacterial, viral, protozoan, fungal and helminth infections, including discussions of how illness has influenced or been affected by public policy and culture.

Credit Hours: 3

Prerequisites: BIO_SC 1010. Not open to Biology Majors

BIO_SC 2150: Genetic Diseases

This course will discuss the biological basis for genetic diseases, including inherited diseases and non-inherited diseases such as cancer. The units will include an introduction providing necessary background

information, as section studying the technology used to study genetic diseases and several units discussing specific diseases and their impact on history and society. This course is intended for non-science majors. Cannot be used to satisfy degree requirements for biology major or biology minor.

Credit Hours: 3

Prerequisites: BIO_SC 1010

BIO_SC 2200: General Genetics

Principles of inheritance in plants and animals; structure and use of genetic material, transmission of genetic information, linkage, modification of genetic information, regulation of genetic activity, population genetics.

Credit Hours: 4

Prerequisites: BIO_SC 1500 and CHEM 1320 (or concurrent enrollment)

BIO_SC 2300: Introduction to Cell Biology

Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized.

Credit Hours: 4

Prerequisites: BIO_SC 2200

BIO_SC 2300H: Introduction to Cell Biology- Honors

Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized.

Credit Hours: 4

Prerequisites: BIO_SC 2200. Honors eligibility required

BIO_SC 2600: Ornithology

(same as F_W 2600). Structure, identification, habits, importance of regional birds. Field work, lectures, lab.

Credit Hours: 4

Recommended: 5 hours of Biological Sciences

BIO_SC 2700: Ichthyology

(same as F_W 2700). A broad introduction to the biology and ecology of fishes. Emphasis will be placed on understanding the adaptations fishes exhibit to aspects of their environment. Includes lab.

Credit Hours: 4

Recommended: 8 hours biology or equivalent

BIO_SC 2940: Internship in Biological Science

Work experience in a non-profit, for profit, or governmental organization relevant to the biological sciences. Intended for students doing internships in which independent research is less than 50% of the experience. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: instructor's consent

Recommended: junior standing, 12 hours of biological science and 2.70 GPA

BIO_SC 2960: Readings in Biological Science

Supervised reading in biological literature. May be repeated up to six hours total credit. Selected sections of this course may be graded either on A-F or S/U basis only. May not be used in partial fulfillment of Arts and Science foundation requirement.

Credit Hour: 1-3

Prerequisites: instructor's consent

BIO_SC 2965H: Honors Readings in Biological Literature

Selected readings in biological literature for Honors, in consultation with instructor. May not be used in partial fulfillment of Arts and Science foundation requirement.

Credit Hour: 1-3

Prerequisites: overall 3.3 GPA; instructor's consent. Honors eligibility required

BIO_SC 3002: Topics in Biological Sciences- Biological/Physical/Mathematics

Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-3

Recommended: Junior Standing

BIO_SC 3002H: Topics in Biological Sciences- Biological/Physical/Mathematics - Honors

Selected topics not offered in regular curriculum.

Credit Hour: 1-3

Prerequisites: Honors eligibility required

BIO_SC 3010: Professional Skills

This course will focus on application and interview skills for students interested in medical school. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: instructor's consent

Recommended: junior standing; 3.4 GPA, and biological sciences majors

BIO_SC 3050: Genetics and Society

Introduction to genetics, emphasizing the impact of genetics on human society. Human evolution, molecular genetics, genetic engineering in medicine and agriculture. An intensive writing course.

Credit Hours: 3

BIO_SC 3075: The Human Microbiome

This course examines the astonishing diversity and medical significance of the microbes that inhabit our bodies. Interactive discussions explore scientific and ethical dimensions of topics ranging from probiotics and "poop transplants" to the role of microbes in asthma and obesity.

Credit Hours: 3

Prerequisites: BIO_SC 2200

BIO_SC 3210: Plant Systematics

Principles of classification of plants; survey of diversity in flowering plant families; identification of local flora; use of keys. Includes lab.

Credit Hours: 4

Recommended: 8 hours of Biological Sciences

BIO_SC 3250: Parasitology

(same as BIOMED 3250). Parasitism is considered as a fundamental type of interspecies interaction. Principles of parasitism as they apply to animals are presented with emphasis on parasite morphology, biology and host parasite relationships. Includes lab. Recommend: 8 hours of biology.

Credit Hours: 4

BIO_SC 3260: Invertebrate Zoology

Structure, ecology and phylogeny of the invertebrate phyla. Includes lab.

Credit Hours: 4

Prerequisites: BIO_SC 1100 or BIO_SC 1500

Recommended: Junior Standing

BIO_SC 3360: Herpetology

The biology, ecology, taxonomy, and distribution of amphibians and reptiles. Some Saturday field trips.

Credit Hours: 4

Recommended: 8 hours Biological Sciences or equivalent

BIO_SC 3400: Evolution and Ecology

Introduction to principles of evolution and ecology. Topics include natural selection, adaptation, phylogenetic analysis, human evolution, population growth and regulation, population interactions, ecosystem ecology, and human impacts on ecological processes. No credit for this course if either BIO_SC 3650 or BIO_SC 4600 already completed; may not co-enroll in this course and BIO_SC 4600.

Credit Hours: 3

Prerequisites: BIO_SC 2200

BIO_SC 3510: Biology of Fungi

(same as PLNT_S 3510). The diverse roles of fungi in the biosphere will be explored by considering fungi we eat, fungi which destroy our food, fungi in folklore and fungi as global nutrient recyclers. Includes lab.

Credit Hours: 3

Prerequisites: BIO_SC 1200 or BIO_SC 1500 or equivalent

BIO_SC 3650: General Ecology

Principles of populations, coevolution, density factors, competition; physical environment; concept of community, trophic structure, biotic succession; characterization of biomes, man in ecosystem. Biology majors having completed BIO_SC 3100: 2 hours credit.

Credit Hours: 5

Prerequisites: junior standing

Recommended: 10 hours in Biology

BIO_SC 3655: Tropical Ecology: Methods and Applications

Field study of tropical community; additional fee for transportation and accommodations required.

Credit Hours: 3

Prerequisites: BIO_SC 3650 or BIO_SC 4600 or BIO_SC 4660

BIO_SC 3660: Mammalogy

(same as F_W 3660). Taxonomy, distribution, structure, habits, importance of mammals; emphasizes those of central United States. Includes lab.

Credit Hours: 4

Recommended: Junior Standing or instructor's consent

BIO_SC 3700: Animal Physiology

Introduces concepts of vertebrate organ function and homeostatic control emphasizing mammalian physiology. Some comparisons to function in other vertebrates and strategies for coping with environmental stresses introduced. Includes lab.

Credit Hours: 5

Prerequisites: BIO_SC 2300

BIO_SC 3710: Introductory Entomology

(same as PLNT_S 3710). Emphasizes the role insects play in the scheme of life. Topics include insect structure, development, diversity, ecology, communication and behavior, and management. Prerequisites: Completion of 60 credit hours and one of the following: BIO_SC 1100 (or F_W 1100) or BIO_SC 1200, or BIO_SC 1500.

Credit Hours: 3

BIO_SC 3715: Insect Diversity

(same as PLNT_S 3715). Laboratory exercises emphasizing external insect anatomy, classification, and identification (to family level). Preparation of an insect collection is required.

Credit Hours: 2

Prerequisites: PLNT_S 3710 (or BIO_SC 3710) or concurrent registration

BIO_SC 3750: General Microbiology

Principles of microbiology. Includes lab.

Credit Hour: 3-4

Prerequisites: BIO_SC 2200 and BIO_SC 2300

Recommended: grades in C range for prerequisites

BIO_SC 3780: Genetics Laboratory

Experimental genetic studies of *Drosophila*, corn and microorganisms.

Credit Hours: 2

Prerequisites: C range grade or better in BIO_SC 2200 or instructor's consent

BIO_SC 3790: Developmental Biology Laboratory

Laboratory studies of development in sea urchin, chicken and roundworm.

Credit Hours: 2

Prerequisites: BIO_SC 3800 or co-enrollment in BIO_SC 3800

BIO_SC 4002: Topics in Biological Science - Biological/Physical/Mathematics

Selected topics not in regularly offered courses. May be repeated up to 2 times for credit.

Credit Hour: 1-3

Prerequisites: senior standing

BIO_SC 4085: Problems in Biological Sciences

Individual supervised work to supplement regularly organized courses in biology; introduction to research. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-3

Prerequisites: instructor's consent

Recommended: Junior Standing

BIO_SC 4100: Limnology

(same as F_W 4100; cross-leveled with BIO_SC 7100, F_W 7100). (lecture/lab: 4 hrs.; lecture only: 3 hrs.) Ecology of inland waters with emphasis on productivity.

Credit Hour: 3-4

Prerequisites: senior standing

BIO_SC 4300: Analysis of Biological Macromolecules

(cross-leveled with BIO_SC 7300). Theory/application of techniques used for characterization of proteins, nucleic acids; topics: sedimentation velocity; equilibrium; sucrose density gradients; electrophoresis; spectrophotometry.

Credit Hours: 3

Prerequisites: BIO_SC 2300 or BIOCHM 4270, and MATH 1500

Recommended: one year Physics

BIO_SC 4310: Physics in Cell and Developmental Biology

(same as PHYSCS 4310; cross-leveled with BIO_SC 7310, PHYSCS 7310, MPP 7300). Discusses the role of physical mechanisms in specific cellular and developmental processes and phenomena, in particular those characterizing the embryonic stage of multicellular organisms. Each process and phenomenon is first described in biological terms and then within a physical model, with special emphasis on the interplay between the two descriptions.

Credit Hours: 3

Prerequisites: PHYSCS 1220 or PHYSCS 2760 and BIO_SC 2300, or instructor's consent

BIO_SC 4320: Molecular Plant Physiology

(same as PLNT_S 4320; cross-leveled with BIO_SC 7320, PLNT_S 7320). Modern physiology of higher plants using common cultivated plants as examples.

Credit Hours: 3

Prerequisites: BIO_SC 1200 or BIO_SC 1500 and CHEM 1320

BIO_SC 4328: Introductory Radiation Biology

(same as NU_ENG 4328, RADIOL 4328; cross-leveled with BIO_SC 7328, NU_ENG 7328, RADIOL 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

Credit Hours: 3

Prerequisites: junior standing, Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

BIO_SC 4400: Plant Anatomy

(same as PLNT_S 4400; cross-leveled with BIO_SC 7400, PLNT_S 7400). Comparative structure, growth of meristems; development, structure of important cell types, tissues, tissue systems; comparative anatomy of stem, root, leaf. Emphasizes anatomy of gymnosperms, angiosperms. Includes lab.

Credit Hours: 4

Prerequisites: BIO_SC 1200 or BIO_SC 1500

BIO_SC 4500: Neurobiology

(cross-leveled with BIO_SC 7500). Vertebrate and invertebrate neurobiology, including cell and molecular biology of the neuron, neurophysiology, neuroanatomy, neuroethology and developmental neurobiology.

Credit Hours: 3

Prerequisites: BIO_SC 2300 or instructor's consent

Recommended: BIO_SC 3700

BIO_SC 4560: Sensory Physiology and Behavior

(cross-leveled with BIO_SC 7560). Basic principles of coding and integration of sensory stimuli; neural correlates of animal behavior; environmental influences on postnatal sensory development. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIO_SC 4500

BIO_SC 4580: Computational Neuroscience

(same as ECE 4580, BIOL_EN 4575;; cross-leveled with BIO_SC 7580, ECE 7580, BIOL_EN 7575). An interdisciplinary course with a strong foundation in quantitative sciences for students in biological and behavioral science and an introduction to experimental methods for students from quantitative sciences.

Credit Hours: 4

Prerequisites: BIO_SC 1010 or BIO_SC 1500; MATH 1500

BIO_SC 4600: Evolution

Surveys various processes in organic evolution and underlying genetic mechanisms.

Credit Hours: 3

Prerequisites: BIO_SC 2200

BIO_SC 4640: Behavioral Biology

(cross-level with BIO_SC 7640). Comparative study of animal ethology. Principles of animal ethology illustrated in different animal phyla. May be taken with Laboratory for 4 credits.

Credit Hour: 3-4

Prerequisites: BIO_SC 1500

Recommended: one additional upper-level course in Biological Sciences or Psychology

BIO_SC 4642: Animal Communication

Physical properties of sensory stimuli, receptor mechanisms, functional significance of communication behavior, and multidisciplinary and experimental approaches to current research in animal communication.

Credit Hours: 3

Prerequisites: BIO_SC 3400 or BIO_SC 4600

BIO_SC 4660: Plant Population Biology

(cross-leveled with BIO_SC 7660). Covers the ecological and evolutionary processes that influence the distribution and abundance of plant species. Topics include evolution of life history schedules, gender evolution, population growth and demography, competition, herbivory, plant-pollinator interactions, clonal growth, and plant community structure. Includes lab.

Credit Hours: 4

Recommended: 2 courses in Biological Sciences

BIO_SC 4670: Avian Ecology

(cross-level with BIO_SC 7670). Advanced examination of ecological patterns in birds. Explores the environmental factors affecting the evolution of avian behavior, morphology, community structure and distribution.

Credit Hours: 3

Prerequisites: BIO_SC 2600 or BIO_SC 3650

BIO_SC 4950: Undergraduate Research in Biology

Individually directed field or laboratory research for upperclass students under faculty supervision. Project must be arranged by student and faculty member prior to registration. May be repeated to a maximum of 6 hours.

Credit Hour: 1-3

Prerequisites: instructor's consent

Recommended: Overall GPA 2.75; 20 hours of Biological Sciences and/or Chemistry

BIO_SC 4950H: Honors Research in Biology

Individually directed field or laboratory research for upper-level Honors students, in consultation with a faculty member. Project must be arranged by student and faculty member prior to registration. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: overall GPA 3.3; instructor's consent; biology or microbiology major. Honors eligibility required

BIO_SC 4952: Undergraduate Research in Biology

Individually directed field or laboratory research for upperclass students under faculty supervision. Project must be arranged by student and faculty member prior to registration. May be repeated to a maximum of 6 hours.

Credit Hour: 1-3

Prerequisites: BIO_SC 4950; overall GPA 2.75; instructor's consent

BIO_SC 4952H: Honors Research in Biology

Continuation of research program. Successful completion requires public presentation and leads to degree with Honors in biological sciences. May be repeated for credit for maximum of 6 hours. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: BIO_SC 4950H; overall GPA 3.3; instructor's consent. Honors eligibility required

BIO_SC 4960: Special Readings in Biological Sciences

Independent readings and discussions of topics in biology selected in consultation with supervising faculty member. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-3

Prerequisites: senior standing in Biological Sciences and instructor's consent

BIO_SC 4970: Neurobiology Laboratory

Laboratory experience with experimental neurobiology, with emphasis on neural networks, motor systems, and developmental neurobiology.

Credit Hours: 3

Prerequisites: BIO_SC 3700 or BIO_SC 4500 or instructor's consent

BIO_SC 4972: Developmental Biology

Analysis of the molecular, genetic, cellular, and morphological processes responsible for phenotypic changes in developing organisms. A variety of experimental systems are discussed to identify common mechanisms used by developing organisms.

Credit Hours: 3

Prerequisites: BIO_SC 2200, BIO_SC 2300, CHEM 2100

BIO_SC 4974: Molecular Biology Laboratory

Emphasizes recently developed genetic and biochemical techniques; illustrates how they apply to contemporary problems in biological research. Prerequisites: BIO_SC 2200 or BIOCHM 4272 or

Credit Hours: 3

Corequisites: BIO_SC 4976

BIO_SC 4976: Molecular Biology

(cross-leveled with BIO_SC 7976). Molecular mechanisms of DNA replication, mutation, recombination and gene expression in prokaryotes, eukaryotes, and their viruses; gene fine structure; genetic engineering.

Credit Hours: 3

Prerequisites: BIO_SC 2200 and BIO_SC 2300

BIO_SC 4978: Cancer Biology

(same as BIOCHM 4978; cross-leveled with BIO_SC 7978, BIOCHM 7978). The cellular and molecular basis of cancer, with emphasis on the application of genomics, proteomics, and genetic manipulations in model organisms to the study of cancer biology.

Credit Hours: 3

Prerequisites: BIO_SC 2200 and BIO_SC 2300

Recommended: BIO_SC 4976 or BIOCHM 4270 and BIOCHM 4272

BIO_SC 4980: Cellular Interactions in Health and Disease

(cross-leveled with BIO_SC 7980). The cell as a functional unit.

Credit Hours: 3

Prerequisites: 10 hours Biological Sciences and 5 hours Physics and 5 hours Organic Chemistry

Recommended: some background in Biochemistry and/or Molecular Biology

BIO_SC 4982: Human Inherited Diseases

(cross-leveled with BOP_SC 7982). Analysis of the molecular and cellular mechanisms underlying inherited diseases in humans. Topics include genetics of sex determination, metabolic disorders, cancer, blood groups, transplantation, AIDS.

Credit Hours: 3

Prerequisites: BIO_SC 2200 and BIO_SC 2300

BIO_SC 4983: Molecular Ecology

Application of molecular genetic techniques to topics in ecology and population biology such as sex ratios, dispersal, mating systems, biogeography and conservation genetics.

Credit Hours: 4

Prerequisites: BIO_SC 2200 or equivalent and BIO_SC 3650

BIO_SC 4984: Mammalian Reproductive Biology

Adult reproductive anatomy, physiology and behavior; gametogenesis and fertilization; placentation; sexual differentiation; parturition; maternal behavior and lactation; puberty; reproductive aging; reproductive ecology.

Credit Hours: 3

Prerequisites: junior standing

Recommended: 15 hours of Biological Sciences

BIO_SC 4986: Neurology of Motor Systems

(cross-leveled with BIO_SC 7986). Examination of the function of neural networks at all levels, from properties of single neurons to large collections of neural elements.

Credit Hours: 3

Prerequisites: BIO_SC 3700 or instructor's consent

BIO_SC 4988: Nerve Cells and Behavior

The cellular basis of behavior. Molecular and cellular properties of nerve cells, as related to behavior, will be represented and discussed.

Credit Hours: 3

Prerequisites: BIO_SC 3700 or instructor's consent

BIO_SC 4990: Vertebrate Histology and Microscopic Anatomy

Microscopic anatomy of vertebrate tissues and organs. Includes lab.

Credit Hours: 5

Prerequisites: junior standing

Recommended: BIO_SC 3700, or equivalent

BIO_SC 4994: Senior Seminar

Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized subdisciplinary emphasis.

Credit Hour: 1-3

Prerequisites: Biological Sciences major, senior standing

BIO_SC 4994H: Senior Seminar - Honors

Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized sub disciplinary emphasis.

Credit Hour: 1-3

Prerequisites: Biological Sciences major, senior standing; Honors eligibility required

BIO_SC 7002: Topics in Biological Sciences

Advanced topics not in regularly offered courses. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIO_SC 7100: Limnology

(same as F_W 7100; cross-leveled with BIO_SC 4100, F_W 4100). (lecture/lab: 4 hrs.; lecture only: 3 hrs.) Ecology of inland waters with emphasis on productivity.

Credit Hour: 3-4

Prerequisites: graduate standing or BIO_SC 3650

BIO_SC 7300: Analysis of Biological Macromolecules

(cross-leveled with BIO_SC 4300) Theory/application of techniques used for characterization of proteins and nucleic acids. Topics include sedimentation velocity; equilibrium; sucrose density gradients; electrophoresis; spectrophotometry. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIO_SC 2300; BIOCHM 4270; MATH 1500; 1 year of physics

BIO_SC 7310: Physics in Cell and Developmental Biology

(same as PHYSCS 7310 and MPP 7300; cross-level with BIO_SC 4310, PHYSCS 4310). Discusses the role of physical mechanisms in specific cellular and developmental processes and phenomena, in particular those characterizing the embryonic stage of multicellular organisms. Each process and phenomenon is first described in biological terms and then within a physical model, with special emphasis on the interplay between the two descriptions.

Credit Hours: 3

Prerequisites: instructor's consent or PHYSCS 1220 or PHYSCS 2760 and BIO_SC 2300

BIO_SC 7320: Molecular Plant Physiology

(same as PLNT_S 7320; cross-leveled with BIO_SC 4320, PLNT_S 4320). Modern physiology of higher plants using common cultivated plants as examples. May be taken with or without laboratory.

Credit Hours: 3

Prerequisites: BIO_SC 1200 or BIO_SC 1500 and 5 hours Chemistry

BIO_SC 7328: Introductory Radiation Biology

(same as NU_ENG 7328, RADIOL 7328, V_M_S 7328; cross-leveled with BIO_SC 4328, NU_ENG 4328, RADIOL 4328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

Credit Hours: 3

Prerequisites: Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

BIO_SC 7350: Summer Institute in Biotechnology

Development of experiments in molecular genetics for use in high school biology laboratories. May be repeated for credit.

Credit Hours: 3

Prerequisites: instructor's consent

BIO_SC 7374: Molecular Biology Laboratory

Emphasizes recently developed genetic and biochemical techniques; illustrates how they apply to contemporary problems in biological research.

Credit Hours: 3

Prerequisites: BIO_SC 2200, BIOCHM 4272 or concurrent registration in BIO_SC 4976

BIO_SC 7400: Plant Anatomy

(same as PLNT_S 7400; cross-leveled with BIO_SC 4400, PLNT_S 4400). Comparative structure, growth of meristems; development, structure of important cell types, tissues systems; comparative anatomy of stem root, leaf. Emphasizes anatomy of gymnosperms, angiosperms. Includes lab. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: BIO_SC 1200 or equivalent

BIO_SC 7490: Vertebrate Histology and Microscopic Anatomy

Microscopic anatomy of vertebrate tissues and organs. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: BIO_SC 2300 and BIO_SC 3700, or equivalent

BIO_SC 7500: Neurobiology

(cross-leveled with BIO_SC 4500). Vertebrate and invertebrate neurobiology, including cell and molecular biology of the neuron, neurophysiology, neur anatomy, neurothology and developmental biology. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIO_SC 2300 or BIO_SC 3700

BIO_SC 7560: Sensory Physiology and Behavior

(cross-leveled with BIO_SC 4560). Basic principles of coding and integration of sensory stimuli; neural correlates of animal behavior; environmental influences on postnatal sensory development.

Credit Hours: 3

Prerequisites: BIO_SC 4500 or equivalent

BIO_SC 7580: Computational Neuroscience

(Same as BIOL_EN 7575, ECE 7580; cross-leveled with BIO_SC 4580, BIOL_EN 4575, ECE 4580). An interdisciplinary course with a strong foundation in quantitative sciences for students in biological and behavioral sciences and an introduction to experimental methods for students from quantitative sciences.

Credit Hours: 4

Prerequisites: BIO_SC 1010 or BIO_SC 1500, MATH 1500

BIO_SC 7640: Behavioral Biology

(cross-leveled with BIO_SC 4640). Comparative study of animal ethology. Principles of animal ethology illustrated in different animal phyla.

Credit Hours: 3

Prerequisites: BIO_SC 1500 and one additional upper-level course in Biological Sciences or Psychology

BIO_SC 7660: Plant Population Biology

(cross-leveled with BIO_SC 4660). Covers the ecological and evolutionary processes that influence the distribution and abundance of plant species. Topics include evolution of life history schedules, gender evolution, population growth and demography, competition, herbivory, plant-pollinator interactions, clonal growth, and plant community structure.

Credit Hours: 4

Prerequisites: 2 courses in Biological Sciences

BIO_SC 7670: Avian Ecology

(cross-leveled with BIO_SC 4670). Advanced examination of ecological patterns in birds. Explores the environmental factors affecting the evolution of avian behavior, morphology, community structure and distribution.

Credit Hours: 3

Prerequisites: BIO_SC 2060 or BIO_SC 3650; BIO_SC 2600

BIO_SC 7976: Molecular Biology

(cross-leveled with BIO_SC 4976). Molecular mechanisms of DNA replication, mutation, recombination and gene expression in prokaryotes, eukaryotes, and their viruses; gene fine structure; genetic engineering.

Credit Hours: 3

Prerequisites: BIO_SC 2200 and BIO_SC 2300

BIO_SC 7978: Cancer Biology

(same as BIOCHM 7978; cross-leveled with BIO_SC 4978, BIOCHM 4978). The course will cover major molecular and cellular aspects of cancer. Students will read original research articles, present overviews and lead class discussions.

Credit Hours: 3

Prerequisites: BIOCHM 4270, BIO_SC 2300 and BIO_SC 4976 or equivalent

BIO_SC 7980: Cellular Interactions in Health and Disease

(cross-leveled with BIO_SC 4980). Advanced discussion of topics in cell biology and genetics as they relate to health and disease. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

BIO_SC 7982: Human Inherited Diseases

Advanced analysis of the molecular basis for genetic disorders in humans. Topics will include both Mendelian and complex traits with readings from the primary literature. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIO_SC 2200 and instructor's consent

BIO_SC 7986: Neurology of Motor Systems

(cross-leveled with BIO_SC 4986). Examination of the function of neural networks at all levels, from properties of single neurons to large collections of neural elements. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIO_SC 3700

BIO_SC 7990: Non-thesis Research

Independent research not leading to a thesis.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIO_SC 8002: Topics in Biological Sciences- Biological/Physical/Mathematics

Advanced topics not in regularly offered courses.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIO_SC 8050: Professional Survival Skills

Introduction to resources, facilities, and communication skills for professional careers in biological sciences. Topics include computer resources, accessing scientific literature, making slides and figures, grantsmanship, resume preparation, manuscript review, and research presentation.

Credit Hours: 2

BIO_SC 8060: Ethical Conduct of Research

(same as BIOCHM 8060). Discussion of ethical issues in biological research, including the rules and conventions for appropriate research conduct. Graded on S/U basis only.

Credit Hour: 1

BIO_SC 8070: Professional Communication Development

The purpose of this course is to develop professional communication skills in students that are planning to attend (or are in their first year of) graduate training. Some sections may be offered with A-F or S/U grading option.

Credit Hour: 1-2

BIO_SC 8080: Workshop in Area of Specialization

Intensive course in the theory and methodology of biological investigation. Conducted by visiting scientists. Offered in one or more specialized sections. May be repeated for credit.

Credit Hour: 1

Prerequisites: graduate standing or instructor's consent

BIO_SC 8085: Problems in Biological Sciences

Research not expected to terminate in thesis, or individual advanced study in special subjects.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIO_SC 8087: Seminar

Current topics in the biological sciences. Open to all graduate students. Graded S/U basis only.

Credit Hour: 1

BIO_SC 8090: Research in Biological Sciences

Research leading to thesis. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIO_SC 8187: Seminar in Areas of Specialization

Offered each semester in one or more specialized sections followed by the topic title of the seminar. Graded on S/U basis only.

Credit Hour: 1

BIO_SC 8300: Advanced Plant Genetics

Genetic approaches to molecular and biochemical studies in maize, wheat, and Arabidopsis.

Credit Hours: 3

Prerequisites: General Genetics and course in Cell Biology or Plant Physiology

BIO_SC 8310: Fungal Genetics and Biology

Introduction to fungal research, with an emphasis on genetics, biochemistry, cell and molecular biology, and pathogenicity of fungi. Graded A-F only.

Credit Hours: 3

BIO_SC 8320: Developmental Genetics

An overview of various developing systems amenable to classical and molecular genetic analysis. Specific developmental phenomena will be introduced in particular model systems, with an emphasis on experimental approaches used to address the underlying mechanisms.

Credit Hours: 3

Prerequisites: BIO_SC 2200 and BIOCHM 7270, BIOCHM 7272, or equivalent

BIO_SC 8330: Stem Cell Biology

A comparative approach to stem cell biology, with emphasis on embryonic, neural and bone marrow-derived stem cells in rodents and humans. Ethical considerations associated with the use of stem cells to study development and repair mechanisms will also be addressed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIO_SC 2300

BIO_SC 8340: Advanced Microscopy Techniques

Electron microscopy and modern light microscopy techniques including epifluorescence, confocal fluorescence microscopy, low light video microscopy, differential interference optics, and computerized image analysis.

Credit Hours: 3

Prerequisites: BIO_SC 4990 or BIO_SC 8350 and instructor's consent

BIO_SC 8350: Advanced Cell Biology

Structure and function of membranes; cell ultrastructure; organellar function; cellular movement; microtubules; microfilaments; mitosis and meiosis.

Credit Hours: 3

Prerequisites: BIO_SC 2300; instructor's consent

BIO_SC 8362: Introduction to Plant Metabolism

(same as PLNT_S 8362, BIOCHM 8362). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant metabolism. Graded on A-F basis only.

Credit Hours: 2

BIO_SC 8365: Introduction to Molecular Cell Biology

(same as BIOCHM 8365, PLNT_S 8365). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis on plant biology. This course examines the basic concepts and techniques used to understand molecular cell biology. Graded on A-F basis only.

Credit Hours: 2

BIO_SC 8370: Plant Developmental Biology

Critical discussions of recent publications in plant development, with particular focus on developmental genetics.

Credit Hours: 3

BIO_SC 8440: Integrative Neuroscience I

(same as NEUROSCI 8440). Organization, development and function of the nervous system focusing on cellular and molecular processes. Graded on A-F basis only.

Credit Hours: 3

BIO_SC 8442: Integrative Neuroscience II

(same as NEUROSCI 8442). Organization and function of the nervous system at the systems level to examine processes of behavior and cognition. Graded on A-F basis only.

Credit Hours: 3

BIO_SC 8450: Developmental Neurobiology

Principles of neural development. Development of neuron and nerve patterns, axon growth, synapses, and development of behavior.

Credit Hours: 3

Prerequisites: BIO_SC 4500 or equivalent

BIO_SC 8460: Advanced Cancer Biology

A study of the molecular basis of cancer, including topics in tumor cell biology, interactions between cancer cells and normal cells, mechanisms of metastasis, and novel approaches to development of new chemotherapies.

Credit Hours: 3

BIO_SC 8505: Introduction to Plant Stress Biology

(same as PLNT_S 8505). This course is part of a series that aims to provide a solid conceptual foundation to interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant stress biology. Graded on A-F basis only

Credit Hours: 2

BIO_SC 8520: Sensory Ecology

A study of information exchange and acquisition in organisms, with an emphasis on communication, orientation, and predator detection. The course will also examine the effects of biotic and abiotic factors on sensory systems.

Credit Hours: 3

BIO_SC 8600: Design of Ecological Experiments

Principles of experimental design in the context of ecological, behavioral, and evolutionary research.

Credit Hours: 2

Prerequisites: STAT 1400

BIO_SC 8610: Current Concepts in Conservation Biology

Survey of current concepts in conservation biology literature. Discussions will provide students with an appreciation of the historical development of concepts, the interdisciplinary nature of conservation problems, and the research required for effective solutions.

Credit Hours: 2

BIO_SC 8620: Phylogenetic Methods and Applications

A review of principles for constructing and testing phylogenies followed by a survey of methods for inferring ancestral characteristics and adaptive features in living species.

Credit Hours: 4

BIO_SC 8633: Molecular and Network Evolution

(same as AN_SCI 8633). Evolution of biological macromolecules and networks, including sequence analysis algorithms and theory, phylogenetics, gene duplication, genome evolution, principles of biological networks. Development of computational skills emphasized.

Credit Hours: 3

Prerequisites: Instructor's consent required

BIO_SC 8650: Ecological and Evolutionary Genomics

(same as PLNT_S 8650). This course is designed to give a background in evolution and then explore an exciting new field: Ecological and evolutionary genomics. We will study genes that affect fitness and how whole genomes evolve. Graded on A-F basis only.

Credit Hours: 2

BIO_SC 8700: Ecological Genetics

Population genetics and evolutionary theory, with emphasis on studies of natural populations.

Credit Hours: 3

Prerequisites: BIO_SC 2200, BIO_SC 3100 or BIO_SC 3650, and STAT 1400 or equivalent

BIO_SC 8720: Speciation

Advanced discussion of species concepts and the processes of formation of species.

Credit Hours: 3

Prerequisites: BIO_SC 2200 and BIO_SC 4600

BIO_SC 8724: College Science Teaching

(same as LTC 8724, PHYSCS 8310, ASTRON 8310). Study of learner characteristics, teaching strategies, and research findings related to teaching science at the post-secondary level.

Credit Hours: 3

BIO_SC 8725: Science Outreach: Public Understanding of Science

(same as AN_SCI 8725, PHYSCS 8350, LTC 8725). Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.

Credit Hour: 1-2

BIO_SC 8726: Integrating Science with Outreach

(same as LTC 8726). This course provides an opportunity for students to earn credit for outreach activities in the community. Students will capitalize on their area of study and scientific expertise in developing, implementing, and evaluating related outreach activities. May be repeated for credit.

Credit Hour: 1-6

BIO_SC 8730: Advanced Community Ecology

Detailed examination of new happenings in population and community ecology. Topics vary but will include species interactions, community structure, reproductive strategies.

Credit Hours: 3

Prerequisites: BIO_SC 3650 or instructor's consent

BIO_SC 8740: Plant/Animal Interactions

Discussion and lectures on herbivory, pollination biology, and dynamics of fruit and seed dispersal from ecological and evolutionary perspectives.

Credit Hours: 3

Prerequisites: BIO_SC 3650 or BIO_SC 4660 or equivalent

BIO_SC 8982: Advances in Human Genetic Disorders

Critical review of recent publications describing the molecular and cellular processes underlying genetic disorders in humans. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: BIO_SC 4982 or concurrent enrollment in BIO_SC 7982

BIO_SC 9090: Research in Biological Sciences

Research leading to dissertation. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIO_SC 9432: Molecular Biology II

(same as MICROB 9432, BIOCHM 9432. Detailed experimental analysis of eukaryotic cellular and molecular biology relevant to cellular and viral gene expression, post-transcriptional and post-translational modifications and genome replication. Models for developmental genetic analysis and genetic determinants controlling processes utilizing the current literature will be examined.

Credit Hours: 4

Prerequisites: MICROB 9430

BIO_SC 9468: Molecular Biology of Plant Growth and Development

(same as BIOCHM 9468). Molecular biology of plant hormones, signal transduction, environmental signals.

Credit Hours: 3

Prerequisites: BIO_SC 4976

Biomedical Sciences (BIOMED)

BIOMED 1010: Biomedical Career Explorations

An introduction to the variety of career possibilities within the growing field of biomedical sciences. Graded on S/U basis only.

Credit Hour: 1

BIOMED 2001: Topics in Veterinary Biomedical Science

May be repeated 2 times for credit. Graded on A-F basis only. Prerequisites: instructor's consent

Credit Hour: 1-99

BIOMED 2085: Problems in Biomedical Research

Assignment of special Topics for Research training in biomedical research.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIOMED 2110: Biomedical Terminology

Life science etymology (Greek for "true meaning", means the study of word derivation) taught by classroom presentation and discussion. The course organization is based primarily on common themes of Greek and Latin terms along with historical reasons for current usage. The application of these terms is for all biomedical sciences and life sciences. Graded on A-F basis only.

Credit Hours: 3

BIOMED 2111: Veterinary Medical Terminology

Veterinary Medical Terminology is an extension of Biomedical Sciences 2110, Biomedical Terminology. The course organization is lecture, based primarily on domestic species and common themes of Greek and Latin terms. In addition, major veterinary medical eponyms, acronyms, and medical and surgical instruments are included. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: BIOMED 2110 or instructor's consent

BIOMED 2120: Essentials of Animal Handling and Physical Restraint

Fundamentals of handling and physical restraint of domestic large and small animals, laboratory animals, and common non-domestic pets. Graded on A-F basis only.

Credit Hours: 2

BIOMED 2140: Companion Animals

(same as AN_SCI 2140). Focus on companion dog, cat, horse owners concerns re: health, zoonoses, legal responsibilities, inbreeding, choice of breeds, behavioral problems and loss of companion animals.

Credit Hours: 3

BIOMED 2210: Microbiology for the Health Sciences

Introductory course for students in the applied health curricula. Presents biomolecules of life, enzyme interaction, physiology and structure of representative organisms. Emphasizes bacteria, viruses, fungi and protozoa of health significance. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: CHEM 1100 or equivalent and instructor's consent

BIOMED 2230: Animal Sanitation and Disease Prevention

Preventative measures for diseases and parasites of farm animals.

Credit Hours: 3

BIOMED 2235: Domestic Animal Behavior

An examination of the effects of domestication on the behavior of companion and food animal species. Comparisons to similar animals in feral or wild conditions will be made. The causes, development and potential treatments of abnormal behavior will also be examined. Graded on A-F basis only.

Credit Hours: 3

BIOMED 2420: Biology of Healthy Living

(same as PH_THR 2420 and NEP 2420). Biology of inactivity as a casual factor in chronic disease.

Credit Hours: 2

BIOMED 2940: Internship in Biomedical Sciences

Supervised work experience to develop technical skills and enhance student knowledge in an area of biomedical science. Not intended for more than 50% independent research. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: sophomore standing and instructor's consent

BIOMED 3000: Specialty Careers for Veterinary Technicians

Specialty careers for veterinary technicians are jobs which required knowledge and skills beyond those needed in primary care clinical veterinary practice. This course will explore veterinary technician specialties, the education required, and the advantages of advanced academic training. Course graded on A-F basis only.

Credit Hour: 1

Prerequisites: AAS degree in veterinary technology or instructors consent required

BIOMED 3001: Topics in Biomedical Sciences

Topics in Biomedical Sciences.

Credit Hour: 1-99

BIOMED 3085: Problems in Biomedical Science

Assignment of special topics for research training in biomedical research.

Credit Hour: 1-99

Prerequisites: DVM degree and instructor's consent

BIOMED 3100: Biomedical Pathophysiology

Pathophysiology is the study of changes in the body resulting from disease. This course requires knowledge of normal anatomy and physiology. A comparative approach is used involving both domestic animal and human examples. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 3254 or BIO_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructor's consent

BIOMED 3200: Comparative Hematology

Hematology is the study of blood cells in health and disease. Emphasis in this course is placed on the changes associated with disease. Transfusion medicine and coagulation disorders will also be included. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 3254 or BIO_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructor's consent

BIOMED 3219: Elements of Comparative Anatomy

This course is designed to give students an introduction to and appreciation for comparative anatomy of various species encountered in animal science, veterinary technology and veterinary medicine. Detailed and labeled photos of dissected specimens are used to aid instruction. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: five hours of biological science or zoology or equivalent or instructor's consent or an AAS degree in veterinary technology

BIOMED 3250: Parasitology

(same as BIO_SC 3250) Parasitism is considered as a fundamental type of interspecies interaction. Identifying characteristics, life cycle, and resulting disease caused by the common parasites of domestic animals, common laboratory animals, selected wildlife, and humans are described. Special emphasis is given to parasites that can be transmitted from animals to man.

Credit Hours: 3

Prerequisites: 8 hours of biology or instructor's consent

BIOMED 3300: Animal Welfare and Ethics

An introductory examination of contemporary ethical issues related to biomedical science including animal welfare, agriculture, and cloning. Topics related to animal law issues will also be discussed.

Credit Hours: 3

Prerequisites: junior standing

BIOMED 3310: Equine Health Topics

An in-depth examination of equine disease and health topics that are pertinent to today's horse owner and veterinarian. The course will integrate horse management practices with disease recognition, control and prevention. Students will learn how to recognize problems and when to call a veterinarian. Emerging disease problems such as West Nile Virus will be examined as well as topics of continuing concern. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 4977 or equivalent or instructor's consent

BIOMED 3320: Comparative Microscopic Anatomy

The course will provide students with a background in the structure of body organs at the microscopic level. The material will emphasize structure-function relationship of cells and organs using material from diverse animal species, including human, that exemplify unique adaptations to environmental or physiological requirements.

Credit Hours: 3

Prerequisites: BIO_SC 1500 or equivalent

BIOMED 3326: Comparative Pharmacology

An introduction to terminology used in pharmacology. Mechanisms of drug administration, absorption, distribution, metabolism, and excretion are described. Treatment modalities in animals and humans are compared. Basics of drug actions and the medicolegal aspects of pharmacology are discussed.

Credit Hours: 3

Prerequisites: an AAS degree in veterinary technology or AN_SCI 3254 or BIO_SC 3700, or equivalent, or instructor's consent

BIOMED 4001: Topics in Biomedical Sciences

Topics in Biomedical Sciences.

Credit Hour: 1-99

BIOMED 4010: Life Sciences Research: Models and Methods

(cross-leveled with BIOMED 7010, V_BSCI 7010). A review of basic laboratory animal and non-animal research models and procedures commonly used in the life sciences area in academia and drug/chemical industry. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Biology or Cell Biology; junior standing required

BIOMED 4100: Veterinary Clinical Chemistry

(cross-leveled with V_PBIO 7100). This course is designed to hone the skills of the practicing veterinary technician, veterinary student, or veterinarian and assumes some basic knowledge of normal serum chemistry and urinalysis results. The review of normal will be minimal and emphasis will be placed on clinical serum chemistry and urinalysis findings associated with diseases. The graduate level course will include discussion of ancillary tests and more extensive case interpretations.

Credit Hours: 3

Prerequisites: An AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association accredited programs; Undergraduate physiology on mammals (AN_SCI 3254, BIO_SC 3700, or equivalent

Recommended: BIOMED 2110 and BIOMED 3200 or instructor's consent

BIOMED 4110: Veterinary Cytology

(cross-leveled with V_PBIO 7110). This course of Veterinary Cytology is designed to hone the skills of the practicing Veterinary Technician, Veterinary Student, or Veterinarian and assumes some basic knowledge of microscope usage and normal hematology. The review of normal cells will be minimal and emphasis will be placed on findings associated with inflammatory and neoplastic diseases. The graduate level course will include discussion of ancillary tests, special stains and treatment alternatives. The focus will be on canine and feline diseases but some common equine and bovine disease. Prerequisites: An AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association-accredited program, or instructor's consent

Credit Hours: 2

Recommended: BIOMED 3200 and BIOMED 2110

BIOMED 4120: Principles of Toxicology

(cross-leveled with V_PBIO 7120). This course will provide an introduction to the general principles of toxicology, including the history and scope of the field; risk assessment and management; mechanisms of toxicology; the disposition of toxicants; non-target organ-directed toxicity; toxic responses of specific target organs; and various toxicological application, such as environmental toxicology.

Credit Hours: 3

Prerequisites: one year of college chemistry and biology, each or instructor's consent

BIOMED 4200: Veterinary Public Health and Community Practice

Veterinary Public Health is the field of veterinary medicine that deals with food production and safety, zoonosis (animal to human) disease control, prevent and control of environmental contamination, and the role of animals in society. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 3254 or BIO_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructors consent

BIOMED 4210: Animal Issues in Disasters

(cross-leveled with V_PBIO 7210). This course describes the various aspects of responding to disasters that involve animals. Government involvement, legal requirements, effects on the human-animal bond, preparation for disasters of different kinds, and impacts on animal-related businesses will be discussed.

Credit Hour: 1

Prerequisites: an AAS in veterinary technology from an American Veterinary Medical Association accredited program, or equivalent training, or instructor's consent

BIOMED 4300: Clinical Veterinary Neurology

Clinical veterinary neurology will review the neurologic examination, common neurologic diseases and techniques to properly care for the neurologic patient. The course organization is based primarily on neuroanatomic localization of disease. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AAS in Veterinary Technology or BIOMED 3219 and 3100 or instructor's consent; junior or senior standing

BIOMED 4320: Fundamentals of Small Animal Emergency and Critical Care

(cross-leveled with V_BSCI 7320). This course will provide students with the knowledge and skills to assist in small animal medical emergency and critical care facilities.

Credit Hours: 3

Prerequisites: An AAS in veterinary technology from an American Veterinary Medical Association accredited program, or equivalent training, or instructor's consent

BIOMED 4333: Veterinary Cell Biology

(same as V_BSCI 5506). Course material stresses cell biology as related to animal health and medical issues. A comprehensive course overviewing molecular and biochemical issues of cell function especially as related to medicine and the underlying molecular causes of disease.

Credit Hours: 4

Prerequisites: BIO_SC 1500, or equivalent, 1 course in biochemistry or 4 credit hours in chemistry; or instructor's consent

BIOMED 4400: Veterinary Surgical Nursing

Veterinary Surgical Nursing will enable the student to properly identify, care for, and maintain surgical equipment. The course will also prepare the student to learn surgical anatomy as well as the potential complications of common clinical setting surgeries. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIOMED 2111, BIOMED 3219, and BIOMED 3100, or instructor's consent

BIOMED 4410: Small Animal Physical Rehabilitation

This course will review the science of veterinary rehabilitation, assessment of rehabilitation patients, and the techniques used to treat these patients. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AAS degree in veterinary technology or BIOMED 2110 or HTH_PR 2190 or equivalent, plus BIOMED 3219 or PTH_AS 2201 or equivalent, or instructor's permission

BIOMED 4500: Equine Critical Care and Nursing

This course provides advanced information for veterinary technicians, veterinary assistants, and pre-veterinary students wishing to enhance and focus their understanding of equine critical care and nursing concepts. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 2095 and AN_SCI 3254 or BIO_SC 3700 or equivalents, AAS or equivalent degree from AVMA-accredited program or instructor's consent

BIOMED 4510: Equine Clinical Anatomy: Forelimbs

(cross-leveled with V_BSCI 7510). Basic foundation in selected aspects of equine clinical anatomy from veterinary technicians, pre-veterinary students, and other students wishing to enhance their understanding of anatomical structures of the horse's forelimbs.

Credit Hour: 1

Prerequisites: five hours of biologic science or zoology, or equivalent, or instructor's consent, or an AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association accredited program

BIOMED 4520: Equine Clinical Practice

This course is an introduction to a common medical conditions of the horse. Emphasis will be placed on the presenting complaint and the veterinarians approach to diagnosis, treatment, and prognosis.

Credit Hour: 1

Prerequisites: BIOMED 2110, BIOMED 2111 and AN_SCI 4977 or their equivalents, or an associate's degree in veterinary technology, or instructor's consent

BIOMED 4993: Internship in Veterinary Medical Technical Specialties

Supervised work experience in the MU Veterinary Medical Teaching Hospital of affiliated veterinary medical specialty practices or in MU laboratory animal facilities to develop technical skills and knowledge relevant to becoming a specialist in veterinary medical technology. A written report and oral presentation are required. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: junior standing, an AAS degree from an AVMA accredited veterinary technical program or its equivalent, and instructor's consent

BIOMED 7010: Life Sciences Research: Models and Methods

(same as V_BSCI 7010; cross-leveled with BIOMED 4010). A review of basic laboratory animal and non-animal research models and procedures commonly used in the life sciences area in academia and drug/chemical industry. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Biology or Cell Biology

BIOMED 9090: Research - Biomedical Sciences

Research hours for BMS doctoral students continuous enrollment. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIOMED 9434: Gonadal Function

(same as AN_SCI 9434). Survey of current and in-depth mechanisms involved in ovarian, testicular, and epididymal function. Emphasis will be given to comparative differences in gonadal functions among domestic animals.

Credit Hours: 3

Prerequisites: AN_SCI 4314 or equivalent, a course in endocrinology, and biochemistry or cell biology

Black Studies (BL_STU)

BL_STU 1100: Introduction to Swahili and African Culture

Introduction to Swahili and African Culture is a three credit hour course, which serves as a survey of an indigenous African language and the culture of East Africa. There are no prior requirements.

Credit Hours: 3

BL_STU 1250: World Theatre Workshop

(same as THEATR 1250). Provides a diverse ensemble of student performers, writers, and technicians with an intensive immersion in the process of theatrical production through the public presentation of dramatic literature that focuses on global issues of ethnicity and culture.

Credit Hours: 2

BL_STU 1335: Introduction to Soul and Country

(same as MUSIC_NM 1335). Examination of musical cultures signified by "soul" and "country". Study of the evolution and aesthetics of these genres and how they deal with concepts like identity, class, race, and ethnicity; gender and sexuality; politics and patriotism.

Credit Hours: 3

BL_STU 1410: African American History

(same as HIST 1410). Survey of social, political and economic development to the African American people in American life from 1619 to the present.

Credit Hours: 3

BL_STU 1500: The Black Woman in America

(same as WGST 1500). Review and critiques of a variety of materials about Black women from slavery to present. The course allows students to generate their own view about psychological, social and philosophical impact of the Black women's struggle on all women.

Credit Hours: 3

Prerequisites: sophomore standing

BL_STU 1705: Introduction to Black Studies in Culture

Introduction to the concepts, terms, themes, and practices in the study of the African diaspora cultures, through readings in literature, music, and the arts that demonstrate concepts, terms, themes, and practices. Recommended for prospective Black Studies Majors. Program consent for repetition.

Credit Hours: 3

BL_STU 1720: African-American Theatre History

(same as THEATR 1720). A historical and critical analysis of the evolution of African American cultural performance in the American theatre and entertainment industry.

Credit Hours: 3

BL_STU 1790: History of Early Africa

(same as HIST 1790). This course introduces students to the early history of Africa. It focuses on political, social, economic and cultural developments based on primary and secondary sources available in print and online.

Credit Hours: 3

BL_STU 1800: History of Modern Africa

(same as HIST 1800). This course introduces students to the recent history of Africa. It provides them with an opportunity to understand the main challenges Africans faced since colonial times based on primary and secondary sources.

Credit Hours: 3

BL_STU 1810: History of South Africa

(same as HIST 1810). South African Society from the 16th century to the present with an emphasis on the last two centuries and the consolidation of the apartheid state.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

BL_STU 2000: Black Studies

An interdisciplinary introduction to the basic concepts and literature in the disciplines covered by African-American studies. The role of historical, political, social, and economic forces in shaping cultural expression will be stressed.

Credit Hours: 3

BL_STU 2001: Undergraduate Topics in Black Studies-General

Organized study of selected topics. Subjects and credits may vary from semester to semester. Program consent for repetition.

Credit Hour: 1-3

BL_STU 2003: Undergraduate Topics in Black Studies-Behavioral Science

Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hours: 3

BL_STU 2005: Topics in Black Studies - Humanities

Organized study of selected topics focusing on Black history and culture. Specific content may vary from semester to semester and will be announced in advance.

Credit Hours: 3

BL_STU 2150: African-American Cinema

(same as THEATR 2150). Study of the impact of cinema and the entertainment industry on the social perceptions of African-Americans and on African-American culture.

Credit Hours: 3

BL_STU 2200: Social Inequalities

(same as SOCIOL 2200). Survey of inequalities based upon criteria such as race, ethnicity, sex, age, religion and social class in contemporary societies. Focus on dynamics by which privilege and inequality are structured.

Credit Hours: 3

BL_STU 2210: The Black Americans

(same as SOCIOL 2210.) Analysis of history of blacks in the United States. Assessment of contemporary black community in terms of its institutions, style of life, patterns of work and intergroup relations.

Credit Hours: 3

Prerequisites: SOCIOL 1000 or equivalent or instructor's consent

BL_STU 2303: Studies in Black Relationships

This course examines constructions of Black American coupling and therefore, gender, race, sexuality, and class in the 20th and 21st centuries. Blackness has been and continues to be reconstructed via marriage, dating, and other forms of coupling. Emphasis will be placed on the role of socialization, institutions, mass media, myth, and individual and group practices. Students will have the opportunity to explore their own socialization and personal construction through assigned readings, self-reflection, experiential activities, and small group presentations.

Credit Hours: 3

BL_STU 2310: Literature of the African Diaspora

(Same as RM_LAN 2310) A postcolonial analysis of selected literary texts interpreting the African diaspora in the Americas.

Credit Hours: 3

BL_STU 2400: Introduction to African Diaspora Literature

(same as ENGLSH 2400). Introduces students to African Diaspora literature with an emphasis on literature written originally in English. No more than six hours may be taken in the Introduction to African Diaspora Literature series.

Credit Hours: 3

Recommended: ENGLSH 1000

BL_STU 2407: Introduction to African Diaspora Literature, 1603-17

(same as ENGLSH 2407). See BL_STU 2400 for course description.

Credit Hours: 3

BL_STU 2408: Introduction to African Diaspora Literature, 1789-1890

(same as ENGLSH 2408). See BL_STU 2400 for course description.

Credit Hours: 3

BL_STU 2409: Introduction to African Diaspora Literature, 1890-Present

(same as ENGLSH 2409). See BL_STU 2400 for course description.

Credit Hours: 3

BL_STU 2410: African American Women in History

(same as HIST 2410 and WGST 2410). African American Women in history is a topics course covering major issues affecting black women since their introduction into english-speaking North America to the present.

Credit Hours: 3

BL_STU 2450: Themes in the Geography of Africa South of the Sahara

(same as GEOG 2450). Major concepts of African geography in current and historical perspective. Case studies of major African countries.

Credit Hours: 3

Prerequisites: sophomore standing or one introductory Geography course

BL_STU 2500: Special Problems in Black Studies

Research apprenticeship with faculty member, assisting a faculty member in the development and execution of a research project. May be repeated for a maximum of six hours.

Credit Hour: 1-99

Recommended: sophomore standing, instructor's consent

BL_STU 2501: Undergraduate Topics in Black Studies

Organized study of selected topics. Subjects and credit may vary from semester to semester. program consent for repetition.

Credit Hour: 1-3

Prerequisites: sophomore standing

BL_STU 2570: Black Religion

A history of religion approach to the study of black religion which takes into consideration the unique past experiences of the African American community as it underwent the terror of forced migration, slavery, segregation, and discrimination.

Credit Hours: 3

Prerequisites: sophomore standing

BL_STU 2601: Languages of Africa

(same as ENGLSH 2601 and LINGST 2601). Introduction to the diversity of the 2000+ African languages, including first-hand experience exploring a few in detail with native speakers. Features of African languages are compared with others of the world. Political and social aspects of language in Africa are discussed.

Credit Hours: 3

BL_STU 2610: Islam and Black America

A historical survey of the origins, development and impact of the Black Islamic tradition.

Credit Hours: 3

BL_STU 2715: Studies in Black Culture

This course will survey selected forms of black cultural expression, from a range of U.S., Africa, and the African Diaspora cultures in various media including literature, music, film studies, as well as other related disciplines. Program consent for repetition.

Credit Hours: 3

BL_STU 2720: African-American Visual Culture

(Same as AR_H_A 2720) This course introduces students to African-American art history, visual culture, and material culture in their cultural, political, and historical contexts. Specific focuses may include the Harlem Renaissance, the Black Arts Movement, and other topics.

Credit Hours: 3

BL_STU 2904: Black Studies in Slavery and Freedom

(same as HIST 2904). This course provides study of historical background, economic, political and social implications of slavery and freedom in the African Diaspora (Americas, Africa, Europe, Asia) as well as the legal and extralegal struggles for and meaning of (global, local, and national) freedom.

Credit Hours: 3

BL_STU 2975: Theoretical Traditions in Blacks Studies - Culture

This course provides a broad understanding of the diverse theoretical traditions within the field of Black Studies, through a comparative examination of concepts, developments, and debates in humanities, including literature, languages, and music. Course graded on A-F basis only.

Credit Hours: 3

BL_STU 3001: Undergraduate Topics in Black Studies - General

Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hours: 3

Prerequisites: Junior standing and/or BL_STU 2000

BL_STU 3003: Undergraduate Topics in Black Studies - Behavioral Sciences

Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hour: 1-3

BL_STU 3004: Undergraduate Topics in Black Studies - Social Science

Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hour: 1-3

BL_STU 3005: Undergraduate Topics in Black Studies - Humanities

Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to six credit hours with program consent.

Credit Hours: 3

Prerequisites: Junior Standing and/or BL_STU 2000

BL_STU 3005H: Undergraduate Topics in Black Studies - Humanities - Honors

Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to six credit hours with program consent.

Credit Hours: 3

Prerequisites: Junior Standing and/or BL_STU 2000. Honors eligibility required

BL_STU 3100: African American Psychology

(same as ESC_PS 3100 and PSYCH 3880). The research, theories, and paradigms developed to understand the attitudes, behaviors, and psychosocial realities of African-Americans are discussed.

Credit Hours: 3

Prerequisites: PSYCH 1000

BL_STU 3200: Black Freedom Movement, 1955-1973

(same as HIST 3200). Examines the dismantling of American apartheid and its transformation into a new racial control system. It also explores how and why the Civil Rights Movement was converted into a struggle for Black Power.

Credit Hours: 3

BL_STU 3230: Studies in Black Sexual Politics

Course explores Black transnational politics of sex/sexuality and examines the theoretical, historical, and socio-cultural context that race, gender, and sexuality are used as analytical concepts. Students learn a transdisciplinary approach and apply this newly acquired information to analyze shifts in the field of Black sexuality studies. May be repeated for credit.

Credit Hours: 3

Recommended: sophomore standing required

BL_STU 3303: Black Athletes

This course examines Black Athletes in the 20th and 21st centuries. Emphasis will be placed on how Blacks entered competitive athletics and the role of racism and power, socialization, institutions, mass media, myth, and individual and group practices. Students will have the opportunity to explore their own socialization and personal construction through assigned readings, self-reflection, experiential activities, and small group presentations.

Credit Hours: 3

BL_STU 3400: Survey of African American Literature, Beginnings to 1900

(same as ENGLISH 3400). A survey of major authors and movements in African American literature from its beginnings to 1900.

Credit Hours: 3

Prerequisites: ENGLISH 1000

BL_STU 3410: Survey of African American Literature, 1900-Present

(same as ENGLISH 3410). A survey of major authors and movements in African American literature from 1900 to the present.

Credit Hours: 3

Prerequisites: ENGLISH 1000

BL_STU 3420: Periods and Genres in African Diaspora Literature

(same as ENGLISH 3420). Topic (e.g. Harlem Renaissance, African Diaspora Poetry) Announced at time of registration. No more than 6

hours may be taken in the Periods and Genres in African Diaspora Literature series.

Credit Hours: 3

Prerequisites: ENGLISH 1000

BL_STU 3427: Periods and Genres in African Diaspora Literature, 1603-1789

(same as ENGLISH 3427). See BL_STU 3420 for course description.

Credit Hours: 3

BL_STU 3428: Periods and Genres in African Diaspora Literature, 1789-1890

(same as ENGLISH 3428). See BL_STU 3420 for course description.

Credit Hours: 3

BL_STU 3429: Periods and Genres in African Diaspora Literature, 1890-Present

(same as ENGLISH 3429). See BL_STU 3420 for course description.

Credit Hours: 3

BL_STU 3590: Religious Biography: Black Religion

(same as HIST 3400). Studies black American religion through the biographies of representative and influential figures of the nineteenth and twentieth centuries, including Nat Turner, W.E.B Dubois, Marcus Garvey, M.L. King, and Malcolm X.

Credit Hours: 3

BL_STU 3624: Comparative Approaches to Black Studies in History

(same as HIST 3624). Comparative approach to the study of Black Diaspora history that focuses on the theory, method, structure, and application of modes of cultural production within the history of Black Diaspora cultures. Recommended for students with an interest in Black Studies or majors in the Humanities field. Program consent for repetition.

Credit Hours: 3

BL_STU 3625: Comparative Approaches to Black Studies in Culture

Comparative approach to the study of Black Diaspora cultures that focus on the theory, method, structure, and application of modes of cultural production within Black Diaspora cultures. Recommended for students with an interest in Black Studies or majors in the Humanities field. Course may be repeated for credit with consent of program.

Credit Hours: 3

BL_STU 3670: History of Black Nationalism in the United States

(same as HIST 3410). Examines the struggle of African Americans to construct autonomous institutions, to build all Black communities or to acquire an independent nation-state. We will study the ideology, structure, strategy and tactics.

Credit Hours: 3

Prerequisites: HIST 1410 or SOCIOL 2210

BL_STU 3703: Themes in Black Society

Examines various themes, issues, and perspectives in political science, psychology, sociology, and other related disciplines related to social

and historical institutions in the U.S., Africa, and the African Diaspora. Recommended for Black Studies or Behavioral Science Majors. Program consent for repetition.

Credit Hours: 3

BL_STU 3705: Themes in Black Culture

Examines various themes, issues and perspective in literature, music, the arts, and other related disciplines related to social and historical institutions in the U.S., Africa, and the African Diaspora. Recommended for Black Studies Majors. Program consent required for repetition.

Credit Hours: 3

BL_STU 3800: Women in African History

(same as HIST 3800). Focuses on the varied and changing roles of women in sub-Saharan Africa from pre-colonial times to the present.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

BL_STU 3850: Gender, Hip Hop, and the Politics of Representation

This class will examine gender in hip hop while exploring the intra- and interracial politics of representation among those of the hip hop generation.

Credit Hours: 3

BL_STU 3977: Black Studies Methodologies

Advanced research, writing, and application of knowledge and critical paradigms in Black Studies, through study of such topics as slavery, colonialism, urbanization and migration, environment, gender, race, identity, intellectual movements, cultural studies and popular culture. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BL_STU 2975

BL_STU 4000: Special Problems in Black Studies

Independent investigation leading to a paper or a project.

Credit Hour: 1-99

Prerequisites: junior standing, instructor's consent

BL_STU 4001: Undergraduate Topics in Black Studies-General

Organized study of selected topics. Subjects and credit may vary from semester to semester. Program consent for repetition.

Credit Hour: 1-3

Prerequisites: junior standing

BL_STU 4020: Studies in Black Feminist Thought

(same as WGST 4020; cross-leveled with BL_STU 7020, WGST 7020). Examines recent problems and critical debates within black feminist theory.

Credit Hours: 3

Prerequisites: WGST 2020 or instructor's consent

BL_STU 4040: Houses Divided: Society and Politics in the Civil War Era

(same as HIST 4040). Examines the sectional crisis, the Civil War and reconstruction through the lens of divided households. Considers the experience of soldiers and civilians, women and men, slaves and freedpeople.

Credit Hours: 3

BL_STU 4130: African-American Politics

(same as POL_SC 4130). Surveys political participation of African-Americans in American politics. Analyzes their public lives in the context of elections, behavior of political organizations, social movements, parties, and level of government.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

BL_STU 4181: Themes in Literature by Women

(same as WGST 4181 and ENGLSH 4181). Examines works by a number of women writers with particular attention to their sociopolitical context. May repeat to six hours with department's consent.

Credit Hours: 3

Prerequisites: junior standing

BL_STU 4210: African-American Religion

(same as REL_ST 4210). Examines the organization of major African American Christian denominations, Islam and religious movements. Twentieth century issues will be discussed, including sexism, classism and homophobia in church communities.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

BL_STU 4220: Religion in Afro-American Literature

(same as REL_ST 4220). Examination of Afro-American fiction, poetry and drama which present significant racial attitudes toward the Christian religion.

Credit Hours: 3

Prerequisites: sophomore standing

BL_STU 4230: Women, Development, and Globalization

(same as SOCIOL 4230, WGST 4230, PEA_ST 4230; cross-leveled with BL_STU 7230, SOCIOL 7230, WGST 7230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities.

Credit Hours: 3

Prerequisites: BL_STU 1332, BL_STU 2200; SOCIOL 2200, WGST 1332 or WGST 2010

BL_STU 4235: Social Perspectives on Gender and Emotion

(same as SOCIOL 4235, WGST 4235; cross-leveled with BL_STU 7235, SOCIOL 7235, WGST 7235). Examines theories of affect and emotions, the social contexts and the implications for human development and behavior, with special emphasis on sex, gender, race, class and culture. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: WGST 1332 or WGST 1360; SOCIOL 1360 or SOCIOL 2300; BL_STU 1332 or BL_STU 2200; junior standing

BL_STU 4270: African-Americans in the Twentieth Century
(same as HIST 4270; cross-leveled with BL_STU 7270, HIST 7270).
Surveys the African-American experience from 1900 to the present.
Attention is given to economic, political, social, and cultural trends.

Credit Hours: 3

BL_STU 4300: The Black Family: Past, Present & Future
(same as H_D_FS 4300; cross-leveled with BL_STU 7300, H_D_FS 7300).
Emphasis is on the unique social, economic, religious, educational and political environments that have affected the structure and function of the black family.

Credit Hours: 3

Prerequisites: junior standing

BL_STU 4303: Race, Class, Gender and U.S. Social Policy
Examines the causes and effects of the vast social and economic inequalities that exist between blacks and whites in US society, including the role federal, state and local government plays in creating and addressing these inequalities.

Credit Hours: 3

BL_STU 4352: Historical Studies in African Music
(same as MUS_H_LI 4352).
Ethnomusicological introduction to the music and culture of countries and ethnic groups in Africa. Traditional and contemporary popular styles are explored, and influences of Islamic invasions, missionary arrivals, colonial conquests, neo-colonial trends, and globalization.

Credit Hours: 3

Prerequisites: Open to upper-level undergraduate students with instructor's consent

BL_STU 4360: Working with Minority Youth
(same as SOC_WK 4360).
Develops awareness and understanding of social/psychological/ cognitive realities influencing the behavior of black youth. Content draws upon theories, research, and practice skills relevant to understanding black youth. Minority groups included.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

BL_STU 4380: Social Work Practice With Minorities: African-American Emphasis
(same as SOC_WK 4380).
Provides students with an appreciation of the black experience in the United States on a knowledge and feeling level.

Credit Hours: 3

BL_STU 4400: Studies in African Diaspora Literature
(same as ENGLISH 4400; cross-leveled with BL_STU 7400, ENGLISH 7400).
Topics (e.g., African American Poetry, African Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in African Diaspora Literature series.

Credit Hours: 3

Recommended: junior standing

BL_STU 4407: Studies in African Diaspora Literature, 1603 to 1789
(same as ENGLISH 4407; cross-leveled with BL_STU 7407, ENGLISH 7407).
See BL_STU 4400 for course description.

Credit Hours: 3

BL_STU 4408: Studies in African Diaspora Literature, 1789 to 1890
(same as ENGLISH 4408; cross-leveled BL_STU 7408, ENGLISH 7408).
See BL_STU 4400 for course description.

Credit Hours: 3

BL_STU 4409: Studies in African Diaspora Literature, 1890 to Present
(same as ENGLISH 4409; cross-leveled with BL_STU 7409, ENGLISH 7409).
See BL_STU 4400 for course description.

Credit Hours: 3

BL_STU 4410: Major Africana Diaspora Writers
(same as ENGLISH 4410; cross-leveled with BL_STU 7410, ENGLISH 7410).
An intensive study of selected writers of African Diaspora literature focusing on texts original in English. No more than six hours may be taken in the Major African Diaspora Writers series.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

BL_STU 4415: African Americans and American Justice
(same as HIST 4415; cross-leveled with BL_STU 7415, HIST 7415).
This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws.

Credit Hours: 3

Prerequisites: senior standing required

BL_STU 4417: Major African Diaspora Writers, 1603 to 1789
(same as ENGLISH 4417; BL_STU 7417, ENGLISH 7417).
See BL_STU 4410 for course description.

Credit Hours: 3

BL_STU 4418: Major African Diaspora Writers, 1789 to 1890
(same as ENGLISH 4418; BL_STU 7418, ENGLISH 7418).
See BL_STU 4410 for course description.

Credit Hours: 3

BL_STU 4419: Major African Diaspora Writers, 1890-Present
(same as ENGLISH 4419; cross-leveled with BL_STU 7419, ENGLISH 7419).
See BL_STU 4410 for course description.

Credit Hours: 3

BL_STU 4420: Africana Womanism
(same as ENGLISH 4420; cross-leveled with BL_STU 7420, ENGLISH 7420).
An intensive study of Africana Womanism, focusing on selected

Africana women writers. May be repeated to six hours with departmental consent.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

BL_STU 4460: Economic Characteristics of the African American Experience

(same as HIST 4460; cross-leveled with BL_STU 7460, HIST 7460). Examines how economic considerations have influenced African American history from the transAtlantic slave trade to the present.

Credit Hour: 1

Prerequisites: junior standing or instructor's consent

BL_STU 4480: Major African Diaspora Women Writers

(same as WGST 4480, ENGLISH 4480; cross-leveled with BL_STU 7480, WGST 7480, ENGLISH 7480). Study of selected Africana Diaspora women writers, focusing on texts originally in English. Repeatable with department's consent. Maximum of 6 hours for Black Studies 4180 and 4480.

Credit Hours: 3

BL_STU 4487: Major African Diaspora Women Writers, 1603 to 1789

(same as WGST 4487, ENGLISH 4487; cross-leveled with BL_STU 7487, WGST 7487, ENGLISH 7487). See BL_STU 4480 for course description.

Credit Hours: 3

BL_STU 4488: Major African Diaspora Women Writers, 1789 to 1890

(same as WGST 4488, ENGLISH 4488, cross-leveled with BL_STU 7488, WGST 7488, ENGLISH 7488). See BL_STU 4480 for course description.

Credit Hours: 3

BL_STU 4489: Major African Diaspora Women Writers, 1890 to Present

(same as WGST 4489, ENGLISH 4489; cross-leveled with BL_STU 7489, WGST 7489, ENGLISH 7489). See BL_STU 4480 for course description.

Credit Hours: 3

BL_STU 4500: Special Problems in Black Studies

Independent project or paper, not leading to dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent

BL_STU 4530: Caribbean Women Writers

Examines representative works by female authors from the Caribbean; primarily the English speaking islands. The depiction of Caribbean women will be a major consideration, as well as the unique qualities of Caribbean literature.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

BL_STU 4640: African Politics

(same as POL_SC 4640). A general comparative course focusing on post-independent Africa. Theories and concepts related to decolonization, nationalism, democratization, and ethnicity; also

institutional forms and organizations: political parties, parliaments, and executives.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

BL_STU 4700: Race, Gender and Ethnicity in Higher Education

Historical relationships of race, gender, and ethnic issues in United States higher education. Issues include: theory and research of curriculum and teaching, diversity within the academy, and leadership, governance, and policy.

Credit Hours: 3

BL_STU 4710: Themes in African Diaspora Folklore

(same as ANTHRO 4160 and ENGLISH 4710.) Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. 4710 may be repeated for a maximum of six hours with instructor's consent.

Credit Hours: 3

Recommended: junior standing

BL_STU 4720: Third World Politics

(same as POL_SC 4720). Comparative, interdisciplinary analysis of the politics of selected states in Southeast Asia, Africa, and Latin America. Special attention given to the problems of political and socioeconomic development.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

BL_STU 4804: Historical Studies of Black Women

This course offers a comprehensive examination of the origins, developments, and productions of the specified time period with emphases on black women as creative artists, activists, performers, musicians, and writers.

Credit Hours: 3

BL_STU 4877: Black Studies Abroad

This interdisciplinary study abroad course provides students with global experience within the African Diaspora, the opportunity to study in a foreign culture and augment their "global competencies" and course of study across the three Black Studies tracks-History, Culture and Society-as well as support their study and/or career development. Graded A-F basis only.

Credit Hours: 3

BL_STU 4904: Historical and Contemporary Slavery

(same as HIST 4904). An exploration of slavery in both its historical and contemporary context, focusing on the origins, characteristics, and struggles to abolish the practice. Historical slavery examined using African enslavement in the Americas, and contemporary slavery using human trafficking and forced labor in the developed and developing world.

Credit Hours: 3

BL_STU 4972: Undergrad. Seminar in Black Studies: History of Race in the U.S.

Readings on problems in American history with reports and discussion on selected topics. Departmental consent for repetition up to a maximum of 6 hours.

Credit Hours: 3

Prerequisites: junior standing, fifteen hours or instructor's consent

BL_STU 4977: Black Studies Capstone

This course is designed to permit students to integrate general and specialized knowledge within the three Black Studies tracks (History, Society, Culture) using an interdisciplinary approach. Topics vary according to instructor and core discipline. Graded on A-F basis only.

Credit Hours: 3

Recommended: junior standing

BL_STU 7004: Topics in Black Studies

Organized study of selected topics in Black Studies. Subjects and earnable credit may vary from semester to semester. Graded on A-F basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

BL_STU 7020: Studies in Black Feminist Thought

(same as WGST 7020; cross-leveled with BL_STU 4020 and WGST 4020). Examines recent problems and critical debates within black feminist theory.

Credit Hours: 3

BL_STU 7230: Women, Development, and Globalization

(same as SOCIOL 7230; cross-leveled with BL_STU 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities.

Credit Hours: 3

BL_STU 7235: Social Perspectives on Gender and Emotion

(same as SOCIOL 7235 and WGST 7235; cross-leveled with BL_STU 4235, SOCIOL 4235, WGST 4235). Examines theories of affect and emotions, the social contexts and the implications for human development and behavior, with special emphasis on sex, gender, race, class and culture. Graded on A-F basis only.

Credit Hours: 3

BL_STU 7270: African-Americans in the Twentieth Century

(same as HIST 7270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.

Credit Hours: 3

BL_STU 7300: The Black Family: Past, Present & Future

(same as H_D_FS 7300). Emphasis is on the unique social, economic, religious, educational and political environments that have affected the structure and function of the black family.

Credit Hours: 3

BL_STU 7400: Studies in African Diaspora Literature

(same as ENGLSH 7400). Topics (e.g., African American Poetry, African Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in African Diaspora Literature series.

Credit Hours: 3

BL_STU 7407: Studies in African Diaspora Literature, 1603 to 1789

(same as ENGLSH 7407). See BL_STU 7400 for course description.

Credit Hours: 3

BL_STU 7408: Studies in African Diaspora Literature, 1789 to 1890

(same as ENGLSH 7408). See BL_STU 7400 for course description.

Credit Hours: 3

BL_STU 7409: Studies in African Diaspora Literature, 1890 to Present

(same as ENGLSH 7409). See BL_STU 7400 for course description.

Credit Hours: 3

BL_STU 7410: Major Africana Diaspora Writers

(same as ENGLSH 7410). An intensive study of selected writers of African Diaspora literature focusing on texts originally in English. No more than six hours may be taken in the Major Anglophone African Diaspora Writers series.

Credit Hours: 3

Prerequisites: instructor's consent

BL_STU 7415: African Americans and American Justice

(same as HIST 7415) This course provides opportunities to examine the judicial system and discuss selected court cases in which black men, women, or children were plaintiffs or defendants in local and national courts. Moreover, the readings will subject conventional wisdom about black Americans and the legal system to scrutiny while allowing students to "witness" the mechanics of the courts and to assess long and short range social, economic, and political implications for Americans, black and white.

Credit Hours: 3

BL_STU 7417: Major African Diaspora Writers, 1603 to 1789

(same as ENGLSH 7417). See BL_STU 7410 for course description.

Credit Hours: 3

BL_STU 7418: Major Anglophone African Diaspora, 1789 to 1890

(same as ENGLSH 7418). See BL_STU 7410 for course description.

Credit Hours: 3

BL_STU 7419: Major African Diaspora Writers, 1890 to Present
(same as ENGLSH 7419). See BL_STU 7410 for course description.

Credit Hours: 3

BL_STU 7420: Africana Womanism

(same as ENGLSH 7420). An intensive study of Africana Womanism, focusing on selected Africana women writers. May be repeated to six hours with departmental consent.

Credit Hours: 3

BL_STU 7460: Economic Characteristics of the African American Experience

(same as HIST 4460). Examines how economic considerations have influenced African American history from the transatlantic slave trade to the present.

Credit Hour: 1

Prerequisites: junior standing or instructor's consent

BL_STU 7480: Major African Diaspora Women Writers

(same as WGST 7480 and ENGLSH 7480). Study of selected African Diaspora women writers, focusing on texts originally in English. May be repeated for credit with departmental consent. Maximum of 6 hours for Black Studies 7180 and 7480.

Credit Hours: 3

BL_STU 7487: Major African Diaspora Women Writers, 1603 to 1789
(same as WGST 7487 and ENGLSH 7487). See BL_STU 7480 for course description.

Credit Hours: 3

BL_STU 7488: Major African Diaspora Women Writers, 1789 to 1890
(same as WGST 7488 and ENGLSH 7488). See BL_STU 7480 for course description.

Credit Hours: 3

BL_STU 7489: Major African Diaspora Women Writers, 1890 to Present

(same as WGST 7488 and ENGLSH 7488). See BL_STU 7480 for course description.

Credit Hours: 3

BL_STU 7710: Themes in African Diaspora Folklore

(same as ANTHRO 7160 and ENGLSH 7710.) Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. ENGLSH 7700 and ENGLSH 7710 may be repeated for a maximum of six hours with instructor's consent.

Credit Hours: 3

BL_STU 7810: African-American Religion

(same as REL_ST 7810). Examines the organization of major African American Christian denominations, Islam and religious movements. Twentieth century issues will be discussed, including sexism, classism and homophobia in church communities.

Credit Hours: 3

BL_STU 7877: Black Studies Abroad

This interdisciplinary study abroad course provides students with global experience within the African Diaspora, the opportunity to study in a foreign culture and augment their "global competencies" and course of study across the three Black Studies tracks - History, Culture, and Society - as well support their study and/or career development. Graded on A-F basis only.

Credit Hours: 3

BL_STU 8000: Independent Readings in Black Studies

Readings on selected topics in Black Studies, with emphasis on the implications of the interdisciplinary and intersecting areas of History, Society, and Culture. May be repeated to a maximum of six hours.

Credit Hours: 3

Prerequisites: Department Consent Required

BL_STU 8277: Race, Ethnicity, and Transnational Inequalities

(same as SOCIOL 8277). This graduate seminar examines the global contest of our radicalized modern world system. How do people develop and give meaning to race/ethnicity in different regions? Focus on the construction of bodies Creole identities, gender, sexualities, citizenships and immigration. Graded on A-F basis only.

Credit Hours: 3

BL_STU 8400: Seminar in African Diaspora Literature

(same as ENGLSH 8400). Topic (e.g., Autobiography, Black Women Writers) announced at time of registration. May be repeated to 12 hours with departmental consent.

Credit Hours: 3

BL_STU 8410: Seminar in African Diaspora Theory and Literature Criticism

(same as ENGLSH 8410). Modern and contemporary African Diaspora criticism and theory including diverse approaches to literary and cultural studies. May be repeated to 12 hours with departmental consent.

Credit Hours: 3

BL_STU 8415: Readings in African-American History

(Same as HIST 8415). Readings on selected topics in African-American history from 1619 to the present, with emphasis on conflicting interpretations. May be repeated to a maximum of six hours.

Credit Hours: 3

BL_STU 8416: Seminar in African-American History

(same as HIST 8416). Directed research in selected topics in African-American history. May be repeated to a maximum of six hours.

Credit Hours: 3

BL_STU 8510: Ecology, Conservation, and Environmental Justice

(same as F_W 8510). The goal of this course is to introduce graduate students in natural resource management and conservation biology to the ecological and management concepts that underlie environmental justice

issues, and to explain how broader environmental justice concepts are relevant to natural resource and conservation fields. Graded on A-F basis only. Prerequisites: One undergraduate course from the following list of disciplines: ecology, natural resource management, conservation biology, sociology or equivalent.

Credit Hours: 2

BL_STU 8901: Graduate Topics in Black Studies

Graduate seminar arranged by topics or themes related to Black Studies. Graded on A-F basis only.

Credit Hours: 3

Business Administration (BUS_AD)

BUS_AD_0585: Placeholder for TCoB S.America Intersession study abroad program

Place holder Course for required per-departure on campus information sessions. Zero credit and billing hours. No Term Finalization.

Credit Hours: 0

BUS_AD_0591: Bergamo Study Abroad Pre-departure required on-Campus Information Session (GRAD)

Place holder Course for Pre-departure required on-Campus Information Session Zero credit and billing hours No Term Finalization

Credit Hours: 0

BUS_AD_0592: Alicante Study Abroad Pre-departure required on-Campus Information Session (GRAD)

Place holder Course for Pre-departure required on-Campus Information Session Zero credit and billing hours No Term Finalization

Credit Hours: 0

BUS_AD_0593: Prague Study Abroad Pre-departure required on-Campus Information Session (GRAD)

Place holder Course for Pre-departure required on-Campus Information Session Zero credit and billing hours No Term Finalization

Credit Hours: 0

BUS_AD 1500: Foundations of Professional Development in Business

This course will provide students the opportunity to learn how to be successful in the Trulaske College of Business (TCoB) as they prepare for a career in business. Students will be led through an exploration of opportunities in our college as well as their personal strengths and how those strengths match with various business academic and career paths. Further, students will learn competencies that are necessary for both academic and professional success. This course is offered as a component of the college's unique Professional Development Program. Graded on A-F basis only.

Credit Hours: 2

BUS_AD 2500: Introduction to Professional Development in Business

Introduction to Professional Development in Business, will provide students the opportunity to learn about professional interpersonal dynamics - understanding and working with others. Students will learn skills imperative to forming and nurturing professional relationships and will have the opportunity to practice these skills via field experience. Throughout the course, students will continue to develop the professional competencies necessary for career success. This course is offered as a component of the college's unique Professional Development Program. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Sophomore standing

Corequisites: BUS_AD 1500

BUS_AD 3500: Professional Development in Business

Provides an introduction to professional competencies important for success as a business professional. Includes the assessment, communication and development of competencies valued by employers. Prerequisites: Upper level in the TCoB

Credit Hours: 3

BUS_AD 4500: Professional Development Program - Internship

This course is designed to help students practice professional core competencies in the workplace. Students will secure a professional-level work experience and apply classroom knowledge and interpersonal skills. This course is a graduation requirement for students seeking the BSBA degree. Graded on S/U basis only.

Credit Hours: 3

Prerequisites: BUS_AD 3500; Restricted to Upper Level Business Majors who have had their internship approved by the Professional Development Program

BUS_AD 7050: MBA Communications Practice

Special laboratory instruction in oral and written communication skills with an emphasis on business. communications.

Credit Hour: 1-3

BUS_AD 7330: Business Law/Regulation

Legal aspects of employment, administrative regulation, corporate and noncorporate ownership structures, and legal issues involving business transactions.

Credit Hour: 2-3

BUS_AD 7340: Business Ethics and Leadership

Case studies, discussion, and readings used to integrate critical thinking about ethical issues into business decision. Development and application of ethical decision making frameworks.

Credit Hour: 1-3

BUS_AD 8001: Topics in Business Administration

Selected topics in administration offered on experimental basis.

Credit Hour: 1-99

Prerequisites: instructor's consent

BUS_AD 8010: MBA Seminar

Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. May be repeated.

Credit Hour: 1-3

Prerequisites: MBA students only

BUS_AD 8020: MBA Seminar

Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. May be repeated.

Credit Hour: 1-3

Prerequisites: MBA students only

BUS_AD 8030: MBA Seminar

Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. Some sections may be graded A-F or S/U only. May be repeated.

Credit Hour: 1-3

Prerequisites: MBA students only

BUS_AD 8500: Business Problem Analysis: Field Project

Application of functional areas of business to real-world cases in business planning. Students will prepare and present business plan for an organization as a team project in a supervised experience.

Credit Hour: 1-3

BUS_AD 8600: Business Consulting

Students work in a team consulting capacity, with medium to large organizations, identifying and defining relatively complex and often ambiguous business problems such as needs assessment, quality management, systems management, policy/strategy formulation and similar areas.

Credit Hour: 2-3

BUS_AD 8730: International Study Abroad

Study abroad opportunities in one or more countries. Focuses on selected international business issues, cultural differences, and visiting businesses on-site. Some sections may be graded on A-F or S/U basis only.

Credit Hour: 3-6

Prerequisites: consent required

Chemical Engineering (CH_ENG)

CH_ENG 1000: Introduction to Chemical Engineering

Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations.

Credit Hours: 2

Prerequisites or Corequisites: MATH 1500, CHEM 1320

CH_ENG 1000H: Introduction to Chemical Engineering - Honors

Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations.

Credit Hours: 2

Prerequisites or Corequisites: MATH 1500, CHEM 1320. Honors eligibility required

CH_ENG 1320: Chemistry and Chemical Technology I

Covers fundamental principals of chemistry, gases, engineering materials, electrochemistry, and applications with instruction including numerical modeling. Graded on A/F basis only. May be repeated for credit.

Credit Hours: 3

Prerequisites or Corequisites: MATH 1500

CH_ENG 1330: Chemistry and Chemical Technology II

Covers fundamentals principals of chemistry, gases, engineering materials, electrochemistry, and applications with instruction including numerical modeling. May be repeated for credit. Graded on A/F basis only.

Credit Hours: 3

Prerequisites: CH_ENG 1320 or CHEM 1320 and MATH 1500

Corequisites: MATH 1500

CH_ENG 2001: Advanced Experimental Course

Content and number of credit hours to be listed in Schedule of Courses.

Credit Hour: 1-99

Prerequisites: sophomore standing

CH_ENG 2118: Introduction to Energy Technology and Sustainability

An introductory course on energy technology and those resources and practices that allow for sustainable commercialization. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: sophomore standing in engineering

CH_ENG 2225: Mass and Energy Balance

Industrial stoichiometry, material and energy balances, thermophysics, thermochemistry; related topics.

Credit Hours: 3

Prerequisites or Corequisites: PHYSICS 2750, CHEM 2100

CH_ENG 2226: Engineering Process Computations and Laboratory

Introduction to the effective use of computer software with emphasis on chemical engineering applications, which include solutions for systems of algebraic equations using matrix methods; solutions of ordinary differential equations and partial differential equations and visualization of those solutions; linear, multilinear, and nonlinear regression for data analysis; 2D and 3D plotting, symbolic calculations, process control simulations, and text processing.

Credit Hours: 3

Prerequisites or Corequisites: MATH 1700, CH_ENG 2225

CH_ENG 3234: Principles of Chemical Engineering I

Fluid flow, heat and mass transfer. A comprehensive treatment of the transport processes related to chemical engineering operations, with focus on both theory and applications.

Credit Hours: 4

Prerequisites: grade of C- or better in CH_ENG 2225

CH_ENG 3235: Principles of Chemical Engineering II

Separation processes in chemical engineering, including: Evaporation, absorption, distillation, extraction, leaching, membrane separation, and drying.

Credit Hours: 3

Prerequisites: CH_ENG 3234

CH_ENG 3243: Chemical Engineering Laboratory I

Laboratory study of some principal unit operations of chemical engineering.

Credit Hours: 3

Prerequisites or Corequisites: CH_ENG 2226 and CH_ENG 3235

CH_ENG 3261: Chemical Engineering Thermodynamics I

Study of thermodynamics, with particular reference to chemical engineering applications.

Credit Hours: 3

Prerequisites: grade of C or better in CH_ENG 2225

CH_ENG 3262: Chemical Engineering Thermodynamics II

Credit Hours: 3

Prerequisites: CH_ENG 3261

CH_ENG 3307: Chemical Process Safety and Professional Ethics

A course focused on important technical fundamentals of chemical process safety and their application including professional ethics considerations. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CH_ENG 3234, CH_ENG 3261 or instructor's consent

CH_ENG 4001: Topics in Chemical Engineering

Current and new technical developments in chemical engineering.

Credit Hours: 3

Prerequisites: instructor's consent

CH_ENG 4085: Problems in Chemical Engineering

Directed study of chemical engineering problems.

Credit Hour: 2-4

Prerequisites: instructor's consent

CH_ENG 4220: Hazardous Waste Management

(same as CV_ENG 4220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous waste, waste minimization, legislation on hazardous wastes and groundwater contamination.

Credit Hours: 3

Prerequisites: junior standing

CH_ENG 4226: Engineering Research Calculations and Reporting

Application and analysis of engineering calculations in MS Excel, Matlab, and project-specific software including applications of calculus, experiential learning, and supervised research. Must have research advisor define at least one experiment and review at least one report. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 4100

CH_ENG 4270: Design of Experiments and Statistical Quality Control for Process Engineers

(same as BIOL_EN 4270). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control.

Credit Hours: 3

Recommended: experience with Excel or instructor's consent

CH_ENG 4285: Pollution Prevention

Identify, analyze, and solve energy, water, and raw materials inefficiencies common to industrial processes and facilities. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CHEM 1320, ENGINR 2300, MATH 2300, PHYSCS 2760

CH_ENG 4306: Advanced Engineering Math

(same as NU_ENG 4306). Applies ordinary and partial differential equations to engineering problems; Fourier's series; determinants and matrices; Laplace transforms; analog computer techniques.

Credit Hours: 3

Prerequisites: MATH 4100

CH_ENG 4311: Chemodynamics

(cross-leveled with CH_ENG 7311). Environmental movement of chemicals in air, water, and soil; designed to introduce students to the basic principles and techniques useful for the prediction of the movement and fate chemicals in ecosystems.

Credit Hours: 3

Prerequisites: CH_ENG 3234 or instructor's consent

CH_ENG 4312: Air Pollution Control

(cross-leveled with CH_ENG 7312). Modeling of urban air pollution and control techniques. Topics treated are plume dispersion theories, photochemistry, methods of monitoring, methods of industrial abatement and legal aspects.

Credit Hours: 3

Prerequisites: CH_ENG 3234 or instructor's consent

CH_ENG 4315: Introduction to Bioprocess Engineering

(same as BIOL_EN 4315; cross-leveled with CH_ENG 7315, BIOL_EN 7315). This general introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a

biomass refinery. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 (for Biological Engineering students) or CH_ENG 2225 (for Chemical Engineering students) or instructor's consent

CH_ENG 4316: Biomass Refinery Operations

(same as BIOL_EN 4316; cross-leveled with CH_ENG 7316, BIOL_EN 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 (for Biological Engineering students) or CH_ENG 2225 (for Chemical Engineering students) or instructor's consent

CH_ENG 4317: Chemical Processing in Semiconductor Device

This course covers the current plasma processing methods used to produce semiconductor devices with emphasis on memory devices. The physics and chemistry of how plasmas are formed, sustained and interact with the semiconductor wafers being processed. Plasma chemistry and the chemical reactions used in plasma etching are discussed.

Credit Hours: 3

Prerequisites: MATH 4100 or MATH 7100

CH_ENG 4318: Energy Technology and Sustainability

An introductory course on energy technology, resources, practices, and common calculations used for energy analysis. May be repeated for credit.

Credit Hours: 3

Recommended: at least one engineering thermodynamics course or a Physical Chemistry course or instructor's consent

CH_ENG 4319: Introduction to Polymer Materials

(cross-leveled with CH_ENG 7319) An introduction to the structure and properties of polymers. Solution properties, molecular weight determination and rheological behavior are studied. Manufacturing and processing techniques are considered.

Credit Hours: 3

Prerequisites: CH_ENG 3262 and CHEM 2110

CH_ENG 4321: Introduction to Ceramics

(cross-leveled with CH_ENG 7321). Introductory course in ceramics materials, crystal structure, processes and properties. The course content and level of presentation would allow an entry level engineering to be conversant with the terminology and concepts of ceramic science and engineering.

Credit Hours: 3

Recommended: Chemistry and Physics

CH_ENG 4335: Transport Phenomena

(cross-leveled with CH_ENG 7335). Integrated study of momentum, heat and mass transport.

Credit Hours: 3

Prerequisites: CH_ENG 3235, and MATH 4100 or MATH 7100

CH_ENG 4345: Special Reading in Chemical Engineering

Individually supervised special reading leading to an engineering report.

Credit Hour: 2-5

Prerequisites: senior standing

CH_ENG 4363: Chemical Reaction Engineering and Technology

Reactor design and optimization; rate equations; thermal effects in reactor.

Credit Hours: 3

Prerequisites: CH_ENG 2226, CH_ENG 3262, or instructor's consent

CH_ENG 4370: Process Control Methods and Laboratory

Stat-space modeling, simulation, and experimental validation; stability analysis; feedback design and experimental studies; methods for disturbance rejection.

Credit Hours: 3

Prerequisites: CH_ENG 2226

CH_ENG 4385: Chemical Engineering Design I

The course presents optimum design methods, cost estimation, material selection and other relevant areas for the design of chemical plants. In addition, chemical safety and risk assessment will be covered.

Credit Hours: 3

Prerequisites: CH_ENG 2226, CH_ENG 3235, CH_ENG 3262, PHYSICS 2760, CHEM 2110

CH_ENG 4464: Electrochemical Reaction Engineering Science

(cross-leveled with CH_ENG 7464). Phenomenological behavior of electrochemical processes (battery emphasis). Theoretical interpretations of diffusion and reaction processes including system modeling. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CH_ENG 3261 or MAE 2300 or CHEM 3310 or instructor's consent

Recommended: A course in thermodynamics or physical chemistry

CH_ENG 4980: Process Synthesis and Design

(cross-leveled with CH_ENG 7980). Continuation of CH_ENG 4385: application of chemical analysis and modeling to a capstone design project.

Credit Hours: 3

Prerequisites: CH_ENG 4385

CH_ENG 4990: Undergraduate Research in Chemical Engineering

Directed study of chemical engineering problems.

Credit Hour: 2-4

Prerequisites: instructor's consent

CH_ENG 4995: Undergraduate Research in Chemical Engineering - Honors

Individual research for a senior thesis; research is supervised by the chemical engineering faculty. The thesis is to be defended before the departmental Honors committee.

Credit Hour: 3-6

Prerequisites: senior standing

CH_ENG 7001: Topics in Chemical Engineering

Current and new technical developments in chemical engineering.

Credit Hours: 3

Prerequisites: instructor's consent

CH_ENG 7220: Hazardous Waste Management

(same as CV_ENG 7220). Engineering principles involved in handling, collection transportation, processing and disposal of hazardous waste minimization, legislation on hazardous wastes and groundwater contamination.

Credit Hours: 3

CH_ENG 7226: Engineering Research Calculations and Reporting

Application and analysis of engineering calculations in MS Excel, Matlab, and project-specific software including applications of calculus, experiential learning, and supervised research. Must have research advisor define at least one experiment and review at least one report. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 4100

CH_ENG 7270: Design of Experiments and Statistical Quality Control for Process Engineers

(same as BIOL_EN 7270). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control.

Credit Hours: 3

Prerequisites: experience with Excel or instructor's consent

CH_ENG 7311: Chemodynamics

(cross-leveled with CH_ENG 4311). Environmental movement of chemicals in air, water, and soil; designed to introduce students to the basic principles and techniques useful for the prediction of the movement and fate chemicals in ecosystems.

Credit Hours: 3

Prerequisites: CH_ENG 3234 or instructor's consent

CH_ENG 7312: Air Pollution Control

(cross-leveled with CH_ENG 4312). Modeling of urban air pollution and control techniques. Topics treated are plume dispersion theories, photochemistry, methods of monitoring, methods of industrial abatement and legal aspects.

Credit Hours: 3

Prerequisites: CH_ENG 3234 or instructor's consent

CH_ENG 7315: Introduction to Bioprocess Engineering

(same as BIOL_EN 7315; cross-leveled with CH_ENG 4315, BIOL_EN 4315). This General introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analysis proceed through the use of mass balances, energy balances, and empirical or theoretical models.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 (for biological engineering students) or CH_ENG 2225 (for chemical engineering students) or instructor's consent

CH_ENG 7316: Biomass Refinery Operation

(same as BIOL_EN 7316; cross-leveled with CH_ENG 4316, BIOL_EN 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CH_ENG 2225 or instructor's consent

CH_ENG 7317: Chemical Processing in Semiconductor Device

This course covers the current plasma processing methods used to produce semiconductor devices with emphasis on memory devices. The physics and chemistry of how plasmas are formed, sustained and interact with the semiconductor wafers being processed. Plasma chemistry and the chemical reactions used in plasma etching are discussed.

Credit Hours: 3

Prerequisites: MATH 4100 or MATH 7100

CH_ENG 7319: Introduction to Polymer Materials

(cross-leveled with CH_ENG 7319). An introduction to the structure and properties of polymers. Solution properties, molecular weight determination and rheological behavior are studied. Manufacturing and processing techniques are considered.

Credit Hours: 3

Prerequisites: CH_ENG 3262 and CHEM 2110

CH_ENG 7321: Introduction to Ceramic Material

(cross-leveled with CH_ENG 4321). Introductory course in ceramics materials, crystal structure, processes and properties. The course content and level of presentation would allow an entry-level engineer to be conversant with the terminology and concepts of ceramics science and engineering.

Credit Hours: 3

Recommended: Chemistry and Physics

CH_ENG 7335: Transport Phenomena

(cross-leveled with CH_ENG 4335). Integrated study of momentum, heat and mass transport.

Credit Hours: 3

Prerequisites: CH_ENG 3235, and MATH 4100 or MATH 7100

CH_ENG 7464: Electrochemical Reaction Engineering Science

(cross-leveled with CH_ENG 4464). Phenomenological behavior of electrochemical processes (battery emphasis). Theoretical interpretations of diffusion and reaction processes including system modeling. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CH_ENG 3261 or MAE 2300 or CHEM 3310 or instructor's consent

Recommended: A course in thermodynamics or physical chemistry

CH_ENG 7980: Synthesis and Design of Chemical Process

(cross-leveled with CH_ENG 4980). This is a heuristics-based design course intended to assist students in bringing together capabilities from previous course. An emphasis is placed on the creation process of design. Graded on A-F basis only.

Credit Hours: 3

CH_ENG 8001: Advanced Topics in Chemical Engineering

Credit Hours: 3

Prerequisites: instructor's consent

CH_ENG 8029: Advanced Plasma Processing

Concepts and techniques in novel plasma processing: plasma characteristics, plasma sputtering, plasma enhanced chemical vapor deposition (PECVD), plasma etching, plasma treatment, plasma fabrication of nano-structured materials and diamondlike films, biomedical applications.

Credit Hours: 3

CH_ENG 8085: Problems in Chemical Engineering

Supervised investigation in chemical engineering to be presented in the form of a report.

Credit Hour: 1-5

Prerequisites: instructor's consent

CH_ENG 8087: Seminar in Chemical Engineering

Reviews investigations and projects of importance in chemical engineering.

Credit Hour: 1

CH_ENG 8230: Advanced Ceramic Materials

(same as BIOL_EN 8230 and MAE 8230). To provide an advanced level understanding between processing, properties, and microstructure of ceramic materials. Topics include crystallography, defect chemistry, transport properties, microstructure, and forming methods. Graded on A-F basis only.

Credit Hours: 3

CH_ENG 8320: Plasma Polymerization

Fundamental aspects of polymer formation in plasma state: gas ionization, reaction kinetics, plasma characteristics and operational parameters of plasma reactors. Properties of plasma - synthesized ultrathin films and their utilization also discussed.

Credit Hours: 3

Prerequisites: CH_ENG 4319 or instructor's consent

CH_ENG 8336: Advanced Heat and Momentum Transfer

Advanced study of these transport phenomena.

Credit Hours: 3

Prerequisites: CH_ENG 3235 or instructor's consent

CH_ENG 8337: Advanced Mass Transfer

Advanced study of mass transfer.

Credit Hours: 3

Prerequisites: CH_ENG 4336 or instructor's consent

CH_ENG 8338: Analysis of Equilibrium Stage Processes

Advanced study of stage processes.

Credit Hours: 3

Prerequisites: CH_ENG 2226, CH_ENG 3235 and CH_ENG 3262

CH_ENG 8429: Membranes and Membrane Processes

Thermodynamics and mass transfer of membrane separation processes; Concentration-Driven Processes; Pressure-Driven Processes; Electromembrane Processes; Biological Membrane Processes; Membrane Polymers; Preparation of Membranes; Membrane Separation Application (potable and ultrapure water, effluent treatment, gas separations, electrochemistry, dialysis therapeutic, and other applications).

Credit Hours: 3

CH_ENG 8451: Advanced Chemical Engineering Thermodynamics I

Advanced thermodynamics; particular reference to its application to chemical engineering.

Credit Hours: 3

Prerequisites: CH_ENG 3262 or instructor's consent

CH_ENG 8463: Chemical Reaction Engineering Science

Phenomenological behavior of catalysts. Theoretical interpretations for heterogeneous and homogeneous catalysts.

Credit Hours: 3

Prerequisites: CH_ENG 4363

CH_ENG 8471: Process Optimization Methods in Chemical Engineering

Steady-state and unsteady-state optimization techniques applied to chemical processes.

Credit Hours: 3

Prerequisites: CH_ENG 2226

CH_ENG 8990: Research-Masters Thesis in Chemical Engineering

Independent investigation in chemical engineering, to be presented as a thesis. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: Masters candidate

CH_ENG 9990: Research-Doctoral Dissertation in Chemical Engineering

Independent investigation in chemical engineering, to be presented as a thesis. Graded on a S/U basis only. candidate

Credit Hour: 1-99

Prerequisites: Ph.D

Chemistry (CHEM)

CHEM 1000: Introductory Chemistry

Introductory course for students with no high school background in chemistry. Covers fundamental principles of scientific measurement, stoichiometry, solutions, basic atomic structure, gases. No credit if taken after CHEM 1100.

Credit Hours: 2

Prerequisites or Corequisites: MATH 1100 or MATH 1120

CHEM 1100: Atoms and Molecules with Lab

One-semester introduction for non-science majors to the basic concepts and important applications of chemistry. Satisfies A&S requirement for a laboratory science. No credit if taken after CHEM 1310.

Credit Hours: 3

CHEM 1100H: Atoms and Molecules with Laboratory - Honors

One-semester introduction for non-science majors to the basic concepts and important applications of chemistry. Satisfies A&S requirement for a laboratory science. No credit if taken after CHEM 1310.

Credit Hours: 3

Prerequisites: Honors eligibility required

CHEM 1320: College Chemistry I

First of two-course sequence emphasizing principles and applications of modern chemical sciences. Covers chemical nomenclature, stoichiometry, kinetic molecular theory, atomic structure, periodic properties, and molecular structure and bonding. Satisfies laboratory science requirement. Math Reasoning Proficiency Course.

Credit Hours: 4

Prerequisites: MATH 1100 or MATH 1120 or equivalent

CHEM 1320H: College Chemistry I - Honors

First of a two-course sequence emphasizing principles and applications of modern chemical sciences. Covers chemical nomenclature, stoichiometry, kinetic molecular theory, atomic structure, periodic properties, and molecular structure and bonding. Satisfies laboratory science requirement. Math Reasoning Proficiency Course.

Credit Hours: 4

Prerequisites: MATH 1100 or MATH 1120 or equivalent. Honors eligibility required

CHEM 1330: College Chemistry II

Continuation of CHEM 1320. Covers intermolecular forces, solutions, kinetics, acid-base chemistry, electrochemistry, nuclear chemistry, thermodynamics. Satisfies requirement for a laboratory science. May be taken concurrently with CHEM 2030 or CHEM 2100.

Credit Hours: 4

Prerequisites: grade of C- or better in CHEM 1320 or CHEM 1320H

CHEM 1330H: College Chemistry II- Honors

Continuation of CHEM 1320H. Covers equilibria, kinetics, electrochemistry, nuclear chemistry, thermodynamics. Satisfies

requirement for a laboratory science. May be taken concurrently with CHEM 2030 or CHEM 2100.

Credit Hours: 4

Prerequisites: grade of C- or better in CHEM 1320 or CHEM 1320H. Honors eligibility required

CHEM 1500H: Honors Intensive General Chemistry with Lab - Honors

A one-semester, intensive introduction to chemistry for honors-eligible students that takes the place of CHEM 1320, CHEM 1330. Four lectures and one 3-hour lab period per week. Math Reasoning Proficiency Course.

Credit Hours: 5

Prerequisites: honors eligibility, college algebra and one year of high school chemistry or instructor's consent

CHEM 2030: Survey of Organic Chemistry

One-semester introduction to structure and bonding, functional group chemistry, principles of reactivity, reaction mechanisms, the molecules of life.

Credit Hours: 3

Prerequisites: Grade of C or better in CHEM 1320 or CHEM 1320H or equivalent. Recommended CHEM 1330, or CHEM 1330 concurrently

CHEM 2100: Organic Chemistry I

First course of a two-semester sequence. Structure and bonding; chemistry of hydrocarbons, alkyl halides, alcohols and ethers; reaction mechanisms; principles of reactivity and synthesis; IR and NMR spectroscopy. Only 1 hour credit if taken after CHEM 2030 or equivalent. Prerequisites: grade of C or better in CHEM 1320 or equivalent or CHEM 1330 concurrently,

Credit Hours: 3

Recommended: CHEM 1330

CHEM 2110: Organic Chemistry II

Continuation of CHEM 2100. Aromatic hydrocarbons, carbonyls, amines; chemistry of carbanions; reactions of polar double bonds; nucleic acids, proteins, carbohydrates and fats.

Credit Hours: 3

Prerequisites: grade of C or better in CHEM 2100 or equivalent, or departmental consent

CHEM 2130: Organic Laboratory I

Basic lab techniques, functional group manipulations, and short syntheses. Pre-lab and post-lab writing assignments. 1 hour recitation, 3 hours lab per week.

Credit Hours: 2

Recommended: Concurrent enrollment in CHEM 2110 or CHEM 2030. No credit for students who have previous organic laboratory credit

CHEM 2140: Organic Laboratory II

Continuation of CHEM 2130. Preparation and identification of organic compounds; application of instrumental techniques. 2 lab sessions, 1 recitation session per week.

Credit Hours: 2

Prerequisites: grade of C or better in CHEM 2110 and CHEM 2130 or equivalent

CHEM 2160H: Honors Organic Chemistry I - Honors

First course of a two-semester sequence. Similar to CHEM 2100 but with increased depth and breadth; emphasis on preparing science students for research and professional careers. 3 lectures, 1 discussion session per week.

Credit Hours: 4

Prerequisites: honors eligibility, grade of B or better in CHEM 1320 or equivalent

CHEM 2170H: Honors Organic Chemistry II with Lab - Honors

Continuation of CHEM 2160H; includes laboratory. Content and structure similar to CHEM 2110, but with increased depth and breadth.

Credit Hours: 5

Prerequisites: honors eligibility, grade of B or better in CHEM 2160H or instructor's permission

CHEM 2190H: Honors Organic Chemistry Laboratory - Honors

Preparation and identification of organic compounds; multistep syntheses; application of instrumental techniques, including NMR, FTIR, MS and HPLC. 2 lab sessions, 1 discussion session per week.

Credit Hours: 2

Prerequisites: honors eligibility, grade of C or better in CHEM 2170H or equivalent

CHEM 2400: Fundamentals of Inorganic Chemistry with Lab

A systematic introduction with laboratory to inorganic and organometallic compounds, reactions, and periodic properties.

Credit Hours: 3

Prerequisites: grade of C or better in CHEM 1330

CHEM 2950: Undergraduate Research in Chemistry

A laboratory research project and/or preparation of compounds with a written final report. Cannot be substituted for other chemistry courses required for a B.S. or B.A. degree. No more than 6 hrs. total credit.

Credit Hour: 1-3

Prerequisites: sophomore standing, 2.75 GPA and/or instructor's consent

CHEM 3200: Quantitative Methods of Analysis with Lab

Principles and practice of quantitative analysis, including the basic principles of modern instrumental methods.

Credit Hours: 4

Prerequisites: CHEM 1330 or CHEM 1500H

CHEM 3300: Fundamentals of Physical Chemistry

Survey of physical chemistry. Satisfies physical chemistry prerequisite for BIOCHM 8430.

Credit Hours: 3

Prerequisites: MATH 1700, a course in organic chemistry; PHYSCS 1210 and PHYSCS 1220 or PHYSCS 2175, or PHYSCS 2176 concurrently

CHEM 3310: Physical Chemistry I

Lecture only. Topics include the kinetic theory of gases, chemical kinetics, thermodynamics and chemical equilibrium.

Credit Hours: 3

Prerequisites: one semester organic chemistry and PHYSCS 2175, PHYSCS 2176 and MATH 2300, or MATH 2300 concurrently

CHEM 3330: Physical Chemistry II

Continuation of CHEM 3310. Lecture only. Covers wave mechanics, bonding, molecular spectroscopy and statistical mechanics.

Credit Hours: 3

CHEM 3340: Physical Chemistry Laboratory

Credit Hours: 3

Prerequisites: Grade of C or better in CHEM 3200; CHEM 3330 or CHEM 3330 concurrently

CHEM 3700: Undergraduate Seminar in Chemistry

Methods for locating and presenting chemical information, data analysis techniques, professional issues.

Credit Hours: 3

Prerequisites: CHEM 1330 or CHEM 1500H; CHEM 2100 or CHEM 2160H

CHEM 3800: Internship in Chemistry

Cannot be substituted for other chemistry courses required for B.S. or B.A. degree.

Credit Hour: 1-6

Prerequisites: departmental consent

CHEM 3940: Service-Learning in Chemistry

A service-learning community outreach program affording chemistry students with an opportunity to enhance their problem-solving skills. May be repeated once for credit. Satisfies no specific chemistry degree requirements, nor Arts and Science general education requirements. Graded on a S/U basis only.

Credit Hours: 2

Prerequisites: departmental consent

CHEM 4001: Topics in Chemistry - General

Organized study designed to broaden the knowledge base of students. Subjects on analytical, inorganic, organic and physical chemistry covered.

Credit Hour: 1-99

Prerequisites: departmental consent

CHEM 4003: Topics in Chemistry- Natural Science

Organized study designed to broaden the knowledge base of students. Subjects on analytical, inorganic, organic and physical chemistry covered.

Credit Hour: 1-99

Prerequisites: departmental consent

CHEM 4010: Advanced Chemistry Laboratory

Advanced methods for the synthesis and characterization of organic, inorganic, and organometallic compounds.

Credit Hours: 3

Prerequisites: CHEM 2400, CHEM 2140, or CHEM 2190H, CHEM 3200, CHEM 3330 (or CHEM 3330 corequisite)

CHEM 4050: Problems in Chemistry

Individual study under the direction of a faculty member that supplements regular course work.

Credit Hour: 1-99

Prerequisites: instructor's consent

CHEM 4160: Intermediate Organic Chemistry

Stresses synthetic organic chemistry at an intermediate level.

Credit Hours: 3

Prerequisites: at least one year organic chemistry

CHEM 4170: Medicinal Chemistry

Chemical mechanisms of drug action. Topics include drug metabolism and action, chemical toxicology and medicines, enzyme activity, and specific drug case studies.

Credit Hours: 3

Prerequisites: CHEM 2110, or CHEM 2170H, CHEM 3300 or CHEM 3310 or instructor's consent

CHEM 4200: Instrumental Methods of Analysis with Lab

Chemical instrumentation methods including electrochemistry, spectroscopy, and advanced separations techniques.

Credit Hours: 3

Prerequisites: CHEM 3200, a semester of physical chemistry

CHEM 4280: Environmental Chemistry

Surveys the chemistry of air and water environments; discusses the chemistry of waste treatment.

Credit Hours: 3

Prerequisites: 8 hours chemistry including organic and analytical

CHEM 4290: Environmental-Toxicological Chemistry

In-depth study of the chemical aspects of current issues dealing with environmental pollutants and toxic chemical substances.

Credit Hours: 3

Prerequisites: CHEM 4280 or equivalent

CHEM 4400: Inorganic Chemistry

Atomic and molecular structure, bonding, kinetics and mechanism, ligand field theory, coordination compounds, acids and bases.

Credit Hours: 3

Prerequisites: one semester Physical Chemistry, second semester concurrently

CHEM 4490: Physics and Chemistry of Materials

(same as NU_ENG 4319, PHYSCS 4190 and BIOL_EN 4480).

Undergraduate/graduate level course offered every spring semester for

students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper.

Credit Hours: 3

Prerequisites: PHYSCS 2760 and CHEM 1320 or equivalent and instructor's consent

CHEM 4600: Introduction to Radiochemistry with Lab

(same as NU_ENG 4391). Introduces application of radio-tracer techniques to chemical research.

Credit Hours: 3

Prerequisites: CHEM 1330 or CHEM 1500H; and one semester of physical chemistry, or instructor's consent

CHEM 4800: Chemistry Teaching Practicum

Provides practical experience teaching introductory chemistry in discussion and laboratory settings. For students pursuing dual degrees in chemistry and secondary education. For students pursuing simultaneous dual degrees in chemistry and secondary education. Graded on S/U basis only.

Credit Hours: 3

Prerequisites: senior standing; departmental consent required

CHEM 4950: Senior Research

A laboratory research project with approved written goals and a final written report. It may be taken twice.

Credit Hours: 3

Prerequisites: a 2.75 GPA, departmental consent

CHEM 4990H: Senior Honors Research I

A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination.

Credit Hours: 3

Prerequisites: a 3.33 GPA, departmental consent, and approval of project outline. Honors eligibility required

CHEM 4991H: Senior Honors Research II

A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination.

Credit Hours: 3

Prerequisites: a 3.33 GPA, departmental consent, approval of project outline. Honors eligibility required

CHEM 7087: Seminar in Chemistry for Beginning Graduate Students

Seminar in Chemistry for Beginning Graduate Students

Credit Hour: 1

CHEM 7200: Instrumental Methods of Analysis with Lab

Chemical instrumentation methods including electrochemistry, spectroscopy, and advanced separations techniques.

Credit Hours: 3

Prerequisites: CHEM 3200, a semester of physical chemistry

CHEM 7300: Intermediate Physical Chemistry

Treatment of atomic and molecular, structure and spectroscopy based on quantum concepts. Designed to provide a broad base of knowledge in these fundamental areas to beginning graduate students in chemistry.

Credit Hours: 3

Prerequisites: departmental consent

CHEM 7400: Inorganic Chemistry

Atomic and molecular structure, bonding, kinetics and mechanism, ligand field theory, coordination compounds, acids and bases.

Credit Hours: 3

Prerequisites: one semester Physical Chemistry, second semester concurrently

CHEM 7490: Physics and Chemistry of Materials

(same as NU_ENG 7319, PHYSCS 7190 and BIOL_EN 7480).

Undergraduate/graduate level course offered every winter semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper.

Credit Hours: 3

Prerequisites: PHYSCS 2760 and CHEM 1320 or equivalent and instructor's consent

CHEM 8003: Topics in Chemistry - Natural Science

Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: instructor's consent

CHEM 8020: Introduction to X-ray Crystallography

Designed for students in chemistry and related fields. Aimed at offering a practical understanding of single-crystal x-ray structural studies. Includes hands-on laboratory work (data collection and analysis).

Credit Hours: 3

Prerequisites: instructor's consent

CHEM 8050: Non-Thesis Research in Chemistry

Does not lead to dissertation.

Credit Hour: 1-99

CHEM 8085: Topics in Chemistry

Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: instructor's consent

CHEM 8087: Seminar in Chemistry

Seminar in Chemistry

Credit Hour: 1

CHEM 8090: Thesis/Dissertation (pre-candidacy) Research in Chemistry

Research leading to thesis. Graded on a S/U basis only.

Credit Hour: 1-99

CHEM 8120: Physical Organic Chemistry I

Bonding theory, physical methods, absorption spectroscopy, conformational analysis, mechanism of reactions.

Credit Hours: 3

CHEM 8130: Physical Organic Chemistry II

Case studies and methods for determining organic reaction mechanisms.

Credit Hours: 3

CHEM 8150: Organic Reaction Mechanisms

Organic reaction mechanisms are discussed within a framework of structure-reactivity relationships. Particular attention directed to the chemistry of reactive intermediates and the application of stereochemical and molecular orbital concepts.

Credit Hours: 3

Prerequisites: 1 year of Organic Chemistry and Physical Chemistry

CHEM 8160: Organic Spectroscopy

Structural analysis of organic compounds involving problem solving using modern NMR, IR, UV-VIS, MS CD/ORD and other spectroscopic techniques.

Credit Hours: 3

Prerequisites: CHEM 3330 or equivalent or instructor's consent

CHEM 8170: Applications of the Reactions of Organic Chemistry

Credit Hours: 3

Prerequisites: CHEM 8150

CHEM 8210: Analytical Measurement

Fundamental and applied aspects of scientific measurements. Topics include: Statistics, signal-to-noise, frequency analysis, sources of noise, digital and analog filtering, time vs. frequency domain measurements, Fourier transformation, sampling, convolution/deconvolution, autocorrelation and cross-correlation. Directed toward entering graduate students.

Credit Hours: 3

CHEM 8230: Separations and Chromatography

Classical and instrumental methods of separation: gas, paper, thin film, and column chromatography; ion exchange.

Credit Hours: 3

CHEM 8240: Mass Spectrometry

This course will cover various aspects of modern mass spectrometry. Topics will include instrumentation, theory, uses and interfaces to mass spectrometry. Graded on A-F basis only.

Credit Hours: 3

CHEM 8250: Analytical Spectroscopy

Selected topics dealing with recent advances in analytical chemistry.

Credit Hours: 3

CHEM 8260: Surface Analysis and Characterization

Covers various aspects of modern methods of surface analysis and characterization. Topics include instrumentation, theory, and data reduction methods. Major sections include electron spectroscopy, microscopy, and vibrational spectroscopy as applied to surfaces. Graded on A-F basis only.

Credit Hours: 3

CHEM 8265: Fluorescence Spectroscopy

Advanced analytical chemistry course that explores the fundamental principles and uses of modern fluorescence spectroscopy in biology, materials science, chemistry, physics and engineering. Special emphasis is placed on the methodologies used to obtain specific information about a particular chemical system. Graded on A-F basis only.

Credit Hours: 3

CHEM 8270: Advanced Analytical Chemistry

Continuation of CHEM 8250.

Credit Hours: 3

CHEM 8280: Bioanalytical Chemistry

This course is aimed at introducing students to the instrumental and theoretical principles by which biological molecules are measured in vivo and in vitro. The course explores how protein, DNA and metabolite structures and quantities are determined in the laboratory with an emphasis on understanding historical methods up through cutting edge approaches in each field. The theory of measurement techniques, separation techniques and related instrumentation are explored in the context of understanding the chemical equilibria that govern each instance. Students will leave this course with a broad understanding for how many biological molecules are measured and what the limitations of various techniques may be. Graded on A-F basis only.

Credit Hours: 3

CHEM 8285: Nanochemistry

Covers various aspects of nanochemistry. Topics include synthesis and characterization of nonmaterial, nanotoxicity, and catalysis. Graded on A-F basis only.

Credit Hours: 3

CHEM 8300: Advanced Physical Chemistry

Advanced Physical Chemistry

Credit Hours: 3

CHEM 8310: Quantum Chemistry

Introduction to formal quantum mechanical theory, quantum measurement, simple model problems having exact solutions, angular momenta, approximation methods (perturbation theory, variation principle, WKB), and the structure of many-electron atoms.

Credit Hours: 3

Prerequisites: CHEM 3330 or equivalent or instructor's consent

CHEM 8320: Chemical Kinetics

Factors affecting rates, orders and mechanisms of chemical reactions, with emphasis on current theories and experimental techniques.

Credit Hours: 3

Prerequisites: CHEM 3330 or equivalent or instructor's consent

CHEM 8330: Computational Chemistry

Theory and application of modern computational techniques (molecular mechanics, ab initio and semiempirical molecular orbital methods) for predicting the structures, energies, and properties of molecules and molecular systems.

Credit Hours: 3

Prerequisites: CHEM 3300 or equivalent or instructor's consent

CHEM 8340: Statistical Mechanics

Principles of statistical mechanics and their application to chemical systems; ensemble theory; condensed phases.

Credit Hours: 3

Prerequisites: CHEM 3330 or equivalent or instructor's consent

CHEM 8350: Magnetic Resonance

Basic principles of nuclear magnetic resonance (NMR) and electron spin resonance (ESR), nuclear spin relaxation, current experimental techniques and the application to studies of structures, dynamics and chemical analysis.

Credit Hours: 3

Prerequisites: One year of organic chemistry, CHEM 3300 or equivalent

CHEM 8400: Inorganic Mechanisms

Experimental stoichiometry and rate law determination. Isotopic applications. Methods and results of fast reaction studies. Basic known inorganic mechanisms. Experimental methods of establishing mechanisms of reaction.

Credit Hours: 3

CHEM 8410: Chemistry of the Main Group Elements

Descriptive inorganic chemistry of the main group elements. Textbook material extensively supplemented with information from the current chemical literature.

Credit Hours: 3

CHEM 8420: Supramolecular Chemistry

The basics of supramolecular chemistry will be covered, including host-guest complexes, reorganization, complementarity, thermodynamic interactions, self assembly and biochemical, molecular device and crystal engineering applications. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BS in Chemistry, Biochemistry or Chemical Engineering

CHEM 8430: Coordination Chemistry and Reactivity

The chemistry of the transition elements (d-block) and their reactivity will be discussed, including bonding, coordination numbers, oxidation states, and reactivity (kinetics). Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CHEM 4400 or equivalent; graduate standing in chemistry or instructor's consent

CHEM 8440: Inorganic Structural Methods

Chemical bonding, application of group theory, spectroscopy; diffraction as applied to structure determination; structural implications of dipole moment and magnetic susceptibility measurements.

Credit Hours: 3

CHEM 8450: Organometallics

Condensations effected by organometallics; dissolving metal reductions; sandwich compounds and related organotransition metal derivatives.

Credit Hours: 3

CHEM 8460: Solid State Chemistry

An introduction to the unique aspects of extended solids. Crystal symmetry, group theory and their applications to crystallography. Bonding and electronic structure theories of metals and semiconductors. Cooperative magnetism and superconductivity. Defects and ionic conductivity. Preparative methods in solid state chemistry.

Credit Hours: 3

CHEM 8470: Actinide Chemistry

The course covers the inorganic and organometallic chemistry of the actinides. Graded on A-F basis only.

Credit Hours: 3

CHEM 8480: Chemistry of Nanomaterials

This course will cover several aspects of nanomaterials including synthesis and processing of small particles, as well as their characterization by crystallography, scanning tunneling microscopy magnetism, and other optical properties. Also studied will be the application of quantum confinement to the electronic and optical properties of nanomaterials and the development of photonic materials. The nanostructure of organic polymers, micelles, and the process of biomineralization to make organic-inorganic hybrid materials will also be discussed.

Credit Hours: 3

CHEM 8600: Radiochemistry and Detection with Lab

An introductory course in the applications of radionuclides in chemistry. Topics include radioactive decay, interactions of radiation with matter, radioactive tracers, and nuclear methods of analysis. Directed towards entering graduate students.

Credit Hours: 3

CHEM 8610: Advanced Radiochemistry

Reviews current advances in radiochemistry, hot atom chemistry, radiation chemistry, nuclear spectrometry.

Credit Hours: 3

Prerequisites: CHEM 8600 or equivalent

CHEM 8620: Nuclear Chemistry

Designed for graduate students in chemistry and related fields. Studies nuclear reaction and nuclear properties.

Credit Hours: 3

Prerequisites: CHEM 3300, MATH 2300 or instructor's consent

CHEM 8630: Radiopharmaceutical Chemistry

The radiotracer concept, history of nuclear medicine, radionuclide production, organic and inorganic chemistry of radiopharmaceutical chemistry, and applications will be discussed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: undergraduate organic and inorganic chemistry; graduate standing in chemistry or instructor's consent

CHEM 8640: Biological Radiochemistry

Covers the interaction of radiation on biological material. The effects of radiation overdose is discussed along with the use of radiation in therapy. Graded on A-F basis only.

Credit Hours: 3

CHEM 9090: Post-candidacy Dissertation Research in Chemistry

Research leading to Ph.D. dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Child Health (CH_HTH)

CH_HTH 6000: Child Health Clerkship

Students have the opportunity to learn about common illnesses and abnormalities in children. Emphasis also is placed on the importance of preventive and developmental aspects of child care. Lectures and case presentations correlate with the clinical experiences.

Credit Hours: 8

CH_HTH 6010: Rural Child Health Clerkship

Rural Child Health Clerkship

Credit Hours: 8

CH_HTH 6020: Springfield Child Health Clerkship

Students have the opportunity to learn about common illnesses and abnormalities in children. Emphasis also is placed on the importance of preventive and developmental aspects of child care. Lectures and case presentations correlate with the clinical experiences.

Credit Hours: 8

Prerequisites: Successful completion of the first two years of medical school

CH_HTH 6100: Remediation Child Health Clerkship

Enrolled students are those who received an unsatisfactory grade in a Child Health Clerkship at any Mizzou Med location or site. This course gives them the opportunity to rectify a deficiency.

Credit Hours: 8

Prerequisites: CH_HTH 6000 Child Health Clerkship, received unsatisfactory grade

CH_HTH 6221: Advanced Biomedical Science Medicine Problem Premature Infant

Advanced Biomedical Science Medicine Problem Premature Infant

Credit Hours: 5

CH_HTH 6223: ABS Child Health Research

ABS Child Health Research

Credit Hour: 5-10

CH_HTH 6225: ABS Child Health Research and Review

ABS Child Health Research and Review

Credit Hour: 5-10

CH_HTH 6425: Child Health Genetics

Goals/Objectives: To develop an understanding of medical genetics, including genetic diagnosis, cytogenetics, metabolic genetic diseases, teratology, and the genetics literature, and computer databases.

CURRICULUM: During the block, each student will see patients in consultation and in the genetics clinics (general genetics, metabolic, PKU, autism, Down Syndrome, outreach) where they will work up the patients and prepare a report and discussion of the diagnosis or diagnostic differential. Each student will also prepare a literature review around a specific patient or problem. For interested students, cytogenetics or metabolic problems are available. Prerequisites: Child Health clerkship

Credit Hours: 5

CH_HTH 6426: Child Health Infectious Disease

Child Health Infectious Disease

Credit Hours: 5

CH_HTH 6427: Pediatric Hematology/Oncology

Pediatric Hematology/Oncology

Credit Hours: 5

CH_HTH 6428: Pediatric Diabetes and Endocrinology

Goals/Objectives: 1) To understand the pathophysiology of endocrine and metabolic diseases in childhood. 2) To understand the fundamentals of growth processes in infancy, childhood, and adolescence.

CURRICULUM: The Department of Child Health has a large patient care and research program for children with diabetes mellitus. In addition, the Department has a busy general endocrinology program. Thus, students on the elective can participate in the care of patients with a wide spectrum of endocrine and metabolic diseases. Students can carry out specific clinical or laboratory projects relating to specific aspects of either diabetes or endocrine disease, deepen their understanding of pathophysiology of disease and gain a better understanding of the impact of a chronic disorder on the child and his/her family.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6429: Developmental Pediatrics

Developmental Pediatrics

Credit Hours: 5

CH_HTH 6430: Pediatric Cardiology

Goals/Objectives: Clinical and laboratory material is available to achieve the following objectives: 1) Develop skills in auscultation, resuscitation, treatment of congestive heart failure, and recognition of congenital heart disease in infants. 2) Adequate exposure to pediatric electrocardiography, echocardiography, cineangiography, and interpretation of cardiac catheterization data. 3) Proficiency in the management of postoperative cardio-vascular patients.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6431: Pediatric Pulmonology

Goals/Objectives: To gain experience in the treatment of asthma, bronchopulmonary dysplasia, cystic fibrosis, sleep disorders, and other respiratory diseases and to learn about pulmonary function testing in children.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6432: Pediatric Gastroenterology

Goals/Objectives: 1) Gain experience in GI diseases of children noting the difference and similarities with adult diseases. 2) To introduce the student to some of the most commonly encountered diagnoses in pediatrics and to its management. 3) To learn to focus on physical diagnosis skills. CURRICULUM: Preceptorship with a pediatric subspecialist for four weeks will include inpatient and outpatient service activities.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6433: Child Health Sports Medicine

Child Health Sports Medicine

Credit Hours: 5

CH_HTH 6434: Child Adolescent Medicine

Goals/Objectives: To teach 4th year students the intricacies of care of the adolescent patient. Specifically, the rotation will address the adolescent interview, important considerations in the adolescent "check-up", and managing the varied problems in adolescents, from attention deficit disorder to eating disorders and gynecological issues. The student will leave the rotation with a better understanding of the care of adolescents.

CURRICULUM: These objectives will be met in the following manner: 1) Student will actively participate in adolescent medicine clinic with both clinical attendings. He/she will be responsible for the initial evaluation of the patients in the clinic, will actively participate in clinical decision-making, and will be responsible for helping with patient write-ups and referral letters (at the discretion of the attending). The student will be expected to function on an extern level, following up on laboratory evaluations and checking in with patients seen, when needed. 2) The student will participate in the adolescent interview practice sessions with the interact teen theatre with the residents on the rotation. This

process will help to improve interviewing skills with adolescents. 3) The student will be responsible for helping with any inpatient care, including consultations and/or admissions. 4) The student will be asked to identify particular areas of interest to be used as topics for interactive discussion with one of the attendings or for a short paper.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6435: Ped Renal and Rheumatology

4th year elective for renal/rheumatology rotation, four weeks.

Credit Hours: 5

Prerequisites: 3rd year Pediatrics/Child Health or Internal Medicine rotation

CH_HTH 6706: Internal Medicine Hematology and Medical Oncology Rural Elective

The student will work as part of a team providing hands-on clinical services in a rural outpatient setting. Students will participate in daily morning report and other didactic sessions provided by the rotation site. Students will learn using a variety of evidence-based resources, direct observations and demonstration.

Credit Hours: 5

Prerequisites: CH_HTH 6002; restricted to medical students only

CH_HTH 6725: Developmental Pediatrics - Rural

Rural developmental pediatrics general elective.

Credit Hours: 5

Prerequisites: CH_HTH 6000; Restricted to fourth year medical students

CH_HTH 6726: Child Health Rural Elective

Students will enhance their knowledge about patient-centered care of children through active participation in a primarily outpatient clinical experience. Limited inpatient experience may be offered as well.

Credit Hours: 5

Prerequisites: CH_HTH 6000; restricted to medical students only

CH_HTH 6825: General Child Health - Inpatient

Goals/Objectives: To provide additional experience in general pediatrics in inpatient care. CURRICULUM: The student will function as a member of the house staff team assuming many of the roles of the first year resident in patient care. This includes working up of patient's management plans, rounding, staffing, conferences, etc. Night coverage with supervision is included.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6826: General Child Health - Outpatient

Goals/Objectives: To provide additional experience in general pediatrics in outpatient care. CURRICULUM: The student will function as a member of the healthcare team. This includes taking histories, performing physical exams, and working up patient management plans. This may require working evening clinic and Saturday clinic in addition to regular daytime clinics.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6827: Neonatology/Neonatal Intensive Care Unit

Goals/Objectives: To gain experience: 1) in the evaluation, diagnosis, and management of sick newborns, and 2) in the performance of specialized procedures necessary for ICU care. CURRICULUM: The student will function as a first-year house officer, with his/her own neonatal ICU patients for initial work-up and management, under the supervision of the PL-2 or PL-3 and attending staff. (rotation at Columbia Regional Hospital)

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6828: Pediatric Intensive Care Unit

Goals/Objectives: 1) To provide the student with the initial approach and management of children requiring care in the Pediatric Intensive Care Unit. 2) To provide the student with the basics of airway management in children. 3) To provide the student with an understanding of the preoperative assessment with preparation of pediatric patients. 4) To provide the student with an introduction to the perioperative management of common pediatric surgical problems. CURRICULUM: Students in this elective will spend time in both the Pediatric ICU and the operating rooms. They will be required to participate in daily rounds in the PICU and follow the medical/surgical patients admitted to the PICU.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6829: Pediatric Neurology

Pediatric Neurology

Credit Hours: 5

CH_HTH 6912: Introduction to Adolescent Medicine

The rotation is primarily an outpatient experience, though the student may be asked to do inpatient consultations with the attending physician on service. In addition to learning and practicing primary care of adolescent patients the elective will present an in-depth experience of adolescent medicine as a subspecialty, including, but not limited to, conditions such as eating disorders, disorders of puberty and menstruation, obesity, ADHD, and substance abuse. Additional teaching methods used include a pre-post test, lectures, and readings relevant to adolescent medicine. Completion of the Child Health Clerkship: CH_HTH 6000 and CH_HTH 6010.

Credit Hours: 2

Prerequisites: Successful completion of the first two years of medical school

CH_HTH 6913: Introduction to Pediatric Endocrinology

The rotation is primarily an outpatient experience, though the student may be asked to do inpatient consultations with the attending physician on service. The elective will present an in-depth experience of diabetes/endocrinology as a subspecialty, including, but not limited to, exposure to disorders in growth and puberty, obesity, abnormalities in thyroid function and managing blood glucose levels in patients with type 1 diabetes. Additional teaching methods used may include lectures and readings relevant to this subspecialty.

Credit Hours: 2

Prerequisites: Successful completion of the first two years of medical school

Recommended: Completion of the Child Health Clerkship (CH_HTH 6000 or CH_HTH 6010) is suggested but not required

Chinese (CHINSE)

CHINSE 1100: Elementary Chinese I

For beginners with no prior knowledge of Chinese. Five hours of classroom instruction, with one hour lab work weekly.

Credit Hours: 6

CHINSE 1200: Elementary Chinese II

Five hours of classroom instruction, with one hour lab work weekly.

Credit Hours: 6

Prerequisites: C- or better in CHINSE 1100 or equivalent

CHINSE 2001: Undergraduate Topics in Chinese-General

Organized study of selected topics. Subjects and credits may vary from semester to semester.

Credit Hour: 1-3

CHINSE 2005: Undergraduate Topics in Chinese - Humanities

Organized study of selected topics. Subjects and credits may vary from semester to semester. No knowledge of Chinese required. No language credit.

Credit Hour: 1-3

CHINSE 2100: Everyday Spoken Chinese Level I

Reinforces and extends ability to use Chinese language for spoken communication. Studies situation-specific Chinese in real-life situations. Intended to supplement, not replace, Chinese language courses taught on MU campus.

Credit Hours: 3

Prerequisites: CHINSE 1200. Restricted to students enrolled in MU China Study Abroad

CHINSE 2160: Intermediate Chinese I Conversation and Composition

Credit Hours: 3

Prerequisites: C- or better in CHINSE 1200 or equivalent

CHINSE 2310: Chinese Civilization I

Survey of Chinese culture and arts. No knowledge of Chinese is required. No foreign language credit.

Credit Hours: 3

CHINSE 2330: Chinese Language and Culture

Presents information about the development of Chinese language over time, the variety of dialects spoken in China, and around the world. Explores relationship between Chinese language and culture. Considers different genres of Chinese literature. Visits to sites significant to development of Chinese language and literature. Introduction to calligraphy and basic daily Chinese.

Credit Hours: 3

Prerequisites: Must be enrolled in MU China Study Abroad; sophomore standing required

CHINSE 3001: Topics in Chinese - General

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: Sophomore standing and instructor consent

CHINSE 3005: Topics in Chinese - Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Some sections may be graded on A-F or S/U basis only.

Credit Hour: 1-3

Prerequisites: sophomore standing and instructor's consent

CHINSE 3005H: Topics in Chinese - Humanities - Honors

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Some sections may be graded on A-F or S/U basis only.

Credit Hour: 1-3

Prerequisites: sophomore standing and instructor's consent, Honors eligibility required

CHINSE 3085: Problems in Chinese

Supervised study in Chinese language and/or culture.

Credit Hour: 1-3

Prerequisites: instructor's consent

CHINSE 3160: Intermediate Chinese II Conversation and Composition

Continuation of CHINSE 2160. Introduces more complex grammatical constructions and extends ability to use those constructions for written and oral communication. Successful completion of course will enable students to communicate in Mandarin Chinese regarding everyday topics, with a vocabulary of just over 1900 words, and about 380 sentence patterns.

Credit Hours: 3

Prerequisites: C- or higher in CHINSE 2160

CHINSE 3170: Everyday Spoken Chinese Level II

For students who have completed 18 credits college-level Chinese. Reinforces and extends ability to use Chinese language for Spoken communication. Class-time spent studying situation-specific Chinese in real-life situations. Intended to supplement, not replace, Chinese language courses taught on UMC campus.

Credit Hours: 3

Prerequisites: CHINSE 3160 or consent of instructor. Restricted to students enrolled in the MU China Study Abroad

CHINSE 3180: Advanced Chinese I

Improves vocabulary, listening, spoken and written Chinese Skills.
Discusses basic cultural ideas. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: C- or higher in CHINSE 3160, or equivalent

CHINSE 3300: Chinese Traditions and Global Integration

Focuses on developments in China's International relations that have led to prominence on world stage, and the impact of modernization and integration into world community on China's sense of national identity, shape of Chinese culture, and lives of the people. Visits to cultural and business sites, guest lectures, and conversations with Chinese people.

Credit Hours: 3

Prerequisites: Must be enrolled in MU China Study Abroad; sophomore standing required

CHINSE 3300H: Chinese Traditions and Global Integration - Honors

Focuses on developments in China's International relations that have led to prominence on world stage, and the impact of modernization and integration into world community on China's sense of national identity, shape of Chinese culture, and lives of the people. Visits to cultural and business sites, guest lectures, and conversations with Chinese people.

Credit Hours: 3

Prerequisites: Must be enrolled in MU China Study Abroad; sophomore standing required. Honors eligibility required

CHINSE 3310: Chinese Poetry

This is an introductory course to Chinese poetry, both classical and contemporary, in English. It will explore issues in the intercultural and interlingual interpretation of foreign literature through the study of Western translations of and scholarship on selected Chinese poets.

Credit Hours: 3

Prerequisites: sophomore standing

CHINSE 3320: Modern and Contemporary Chinese Fiction (in translation)

Studies Chinese fiction from 1920s to 1990s. Preceded by a brief historical survey of Chinese literature. Analyzes works by authors like Lu Xun, Ba Jin, Lao She, Wang Meng and many others of the younger generation. Readings and lectures in English.

Credit Hours: 3

CHINSE 3400: Negotiating Chinese Culture

As political, business, religious, and personal encounters between Chinese and Americans increase, so also does the need for competence in negotiating these cross-cultural interactions. Whether hosting Chinese guests, visiting China for business or as a scholar, or simply trying to understand current events, a clear understanding of cultural differences and similarities can be quite valuable. Students will be introduced to multiple perspectives on American and Chinese cultural differences along with narratives of cross-cultural experiences. Course address issues related to American and Chinese cross-cultural communication in five spheres of interaction: political, religious, business, interpersonal, education. Through related readings, discussions, and structured conversations with Chinese, students will explore how this information and a deeper understanding of Chinese and American culture can be

applied to more fruitful and positive cross-cultural interactions in multiple contexts.

Credit Hours: 3

Prerequisites: sophomore standing

CHINSE 3880: Contemporary Chinese Film

(same as FILM_S 3880). Introduces development of 20th century Chinese film and popular genres, including review of earlier times. Explores how present day Chinese understand their own history, and issues they face in drive toward modernization in a global context. Films and readings in English or with English subtitles. No previous knowledge of the culture or language required.

Credit Hours: 3

Prerequisites: sophomore standing

Civil Engineering (CV_ENG)

CV_ENG 1000: Introduction to Civil Engineering

Introduces various aspects of Civil Engineering practice. May be repeated one time for credit.

Credit Hour: 1

CV_ENG 1001: Experimental Course

For freshman-level students. Content and number of credit hours to be listed in Schedule of Courses.

Credit Hour: 1-99

CV_ENG 2001: Experimental Course

For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.

Credit Hour: 1-99

CV_ENG 2080: Introduction to Dynamics

Basic fundamentals of particle and rigid body dynamics; energy and momentum methods.

Credit Hours: 3

Prerequisites: ENGINR 1200

CV_ENG 3001: Fundamental Topics in Civil Engineering

Special engineering topics for undergraduate students.

Credit Hour: 1-3

Prerequisites: instructor's consent

CV_ENG 3010: Decision Methods for Civil Engineering Design

Essential features of civil engineering including the design process, design teams, experimental and computational tools, engineering economy, communication skills, and ethical considerations.

Credit Hours: 3

Prerequisites: grade of C- or better in ENGLSH 1000

Corequisites: ENGINR 1200

CV_ENG 3050: Introduction to Geographic Information Systems GIS
(same as GEOG 3040) Introduces theory, concepts and techniques related to the creation, manipulation, processing, and basic analysis of spatial data using GIS. Data management, current data models, GIS applications and course topics are reinforced through hands-on computer laboratory exercises.

Credit Hours: 3

Prerequisites: sophomore standing

CV_ENG 3100: Fundamentals of Transportation Engineering

Covers fundamentals of transportation engineering including geometric design, traffic engineering, pavements, and planning.

Credit Hours: 4

Prerequisites: grade of C- or better in ENGINR 1100

Corequisites: CV_ENG 3010

CV_ENG 3200: Fundamentals of Environmental Engineering

Fundamentals of water quality engineering and water resources, water and wastewater treatment, solid and hazardous and radioactive waste management, air pollution, environmental regulation, and environmental ethics.

Credit Hours: 4

Prerequisites: grade of C- or better in CHEM 1320 or equivalent

Corequisites: CV_ENG 3010

CV_ENG 3250: Pollutant Fate and Transport

(same as ENV_SC 3250). Introduction to concepts governing pollutant fate and transport in the environment, including pollutant interactions within and migration through environmental systems, as well as analytical techniques and tools necessary to quantify conditions and movement.

Credit Hours: 3

Prerequisites: ENV_SC 1100 or SOIL 2100 or CV_ENG 3200; and CHEM 1320; or instructor's permission

CV_ENG 3300: Structural Analysis I

Analysis of statically determinate beams, frames; shear and moment diagrams; influence line diagrams; beam deflections. Analysis of statically indeterminate structures; moment distribution; energy methods. Introduction to matrix analysis.

Credit Hours: 4

Prerequisites: grade of C- or better in ENGINR 1200 and ENGINR 2200

CV_ENG 3300H: Structural Analysis I - Honors

Analysis of statically determinate beams, frames; shear and moment diagrams; influence line diagrams; beam deflections. Analysis of statically indeterminate structures; moment distribution; energy methods. Introduction to matrix analysis.

Credit Hours: 4

Prerequisites: grade of C- or better in ENGINR 1200 and ENGINR 2200. Honors Eligibility required

CV_ENG 3312: Reinforced Concrete Design

Basic principles of reinforced concrete design. Design of beams for flexure and shear; design of short and slender columns. Prerequisites: CV_ENG 3300;

Credit Hours: 3

Corequisites: CV_ENG 3600

CV_ENG 3313: Structural Steel Design

Basic principles of structural steel design. Design of beams, axially loaded members, columns, and bolted and welded connections.

Credit Hours: 3

Corequisites: CV_ENG 3300 and CV_ENG 3600

CV_ENG 3400: Fundamentals of Geotechnical Engineering

Detailed study of physical and mechanical properties of soil governing its behavior as an engineering material.

Credit Hours: 4

Prerequisites: grade of C- or better in ENGINR 2200 and GEOL 1150

CV_ENG 3600: Civil Engineering Materials

Introduces composition, structure, properties, behavior, and selection of civil engineering materials. Prerequisites: grade of C- or better in ENGINR 2200 or instructor's consent;

Credit Hours: 4

Corequisites: CV_ENG 3010

CV_ENG 3700: Fluid Mechanics

Statics and dynamics of fluids, principles of continuity, momentum and energy, pipe flow.

Credit Hours: 3

Prerequisites: grade of C- or better PHYSICS 2750

CV_ENG 3702: Hydrology

Fundamental concepts of hydrology in engineering; quantitative estimation of stream-flow magnitude and frequency; and open channel flow considerations from stream-flow. Fluid Mechanics lab with lab reports.

Credit Hours: 4

Prerequisites: grade of C- or better MATH 2300 and CV_ENG 3200 and CV_ENG 3700

CV_ENG 4001: Topics in Civil Engineering

Study of current and new technical developments in civil engineering.

Credit Hour: 1-3

Prerequisites: instructor's consent

CV_ENG 4006: Digital Computer Applications in Engineering

Use of digital computer for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, differentiation, and differential equations. Prerequisites: MATH 2300

Credit Hours: 3

CV_ENG 4008: Risk and Reliability for Civil Engineers

This course focuses on how to use probability and statistics to quantify uncertainties and consider risks when making civil engineering decisions and designing civil engineering systems.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3010 or other introductory probability/statistics course

CV_ENG 4080: Advanced Surveying

Celestial observations for determination of position; state coordinate systems, precise surveys, introduction to geodetic surveys, principles of photogrammetry. Theory of optical surveying instruments.

Credit Hours: 3

Prerequisites: MATH 1500

CV_ENG 4085: Problems in Civil and Environmental Engineering

Directed investigation of civil engineering.

Credit Hour: 2-4

Prerequisites: instructor's consent

CV_ENG 4100: Traffic Engineering

Characteristics and studies associated with highway traffic. Capacity analysis and evaluation of freeways, rural highways, and urban streets. Traffic signal control and coordination.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4102: Infrastructure Management

Civil infrastructure condition assessment, performance modeling, deterioration processes and models, maintenance and rehabilitation strategies, management techniques, data analysis, management systems, financing, case studies, emerging technologies.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4103: Planning and Geometric Design of Highways

Techniques of highway planning in rural and urban areas. Design of the visible elements of highways.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4104: Pavement Materials and Design

Properties of materials used in roads, airports and other pavement construction. Design methods for rigid and flexible pavements.

Credit Hours: 3

Prerequisites: grade of C- or better in ENGINR 2200

CV_ENG 4106: Intelligent Transportation Systems

This is an introductory course in Intelligent Transportation Systems (ITS). Topics include the theory of transportation networks and systems optimization, current implementations of ITS, and practical issues and implications of ITS.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4108: Bicycle and Pedestrian Transportation

This course teaches how to integrate pedestrian and bicyclist accommodations into the planning and design of transportation facilities.

Topics include bicyclist safety, accommodation at intersections, traffic calming techniques and facility design.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4110: Transportation Simulation

Theory and application of simulation in transportation engineering.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4120: Airport Engineering

Airport systems planning, design, and management.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3010

CV_ENG 4125: Transportation Legal Issues

This course discusses some of the legal issues that transportation engineers encounter throughout the course of their careers.

Credit Hours: 3

Prerequisites: CV_ENG 3010

CV_ENG 4130: Transportation Safety

This course is an introduction to transportation safety. The focus will be on surface transportation. The student is expected to analyze safety data and to devise engineering solutions to safety problems.

Credit Hours: 3

Prerequisites: CV_ENG 3010

CV_ENG 4145: Civil and Environmental Engineering Legal Issues

Discussion of legal issues facing civil engineers including right of way, risk and liability, environment, financing public works, contracting and ethics.

Credit Hours: 3

Prerequisites: CV_ENG 3010

CV_ENG 4155: Transportation Geography

(same as GEOG 4850). Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.

Credit Hours: 3

CV_ENG 4175: The Geospatial Science in National Security

(Same as GEOG 4130). This course explores the critical contribution of the geospatial sciences in the collection processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.

Credit Hours: 3

Prerequisites: instructor's consent

Recommended: junior standing

CV_ENG 4185: Location Analysis/Site Selection

(same as GEOG 4740). An overview of location analysis in regional planning and spatial decision support, this course focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. Maybe be repeated for credit.

Credit Hours: 3

CV_ENG 4190: Infrastructure Project Development

Students will learn how the key elements of major civil engineering infrastructure projects fit together. The course will focus on the horizontal integration of: financing - planning - environment - right of way - design - construction - operations - maintenance. Engineering is important but so are a lot of other things. Graded on A-F basis only. Prerequisites: junior standing

Credit Hours: 3

CV_ENG 4200: Remote Sensing of the Environment

Principles, characteristics and applications of remote sensing in engineering, geosciences, agriculture and environmental projects. Topics: basic concepts, photographic, thermal multispectral and microwave systems, satellite remote sensing and digital image processing.

Credit Hours: 3

Prerequisites: junior standing

CV_ENG 4210: Solid Waste Management

Engineering principles involved in generation, handling, collection, transport, processing, and disposal of solid wastes, resource recovery and reuse, legislation on solid wastes and groundwater contamination problems.

Credit Hours: 3

Prerequisites: junior standing

CV_ENG 4220: Hazardous Waste Management

(same as CH_ENG 4220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination.

Credit Hours: 3

CV_ENG 4230: Introduction to Water Quality

Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineered systems for the distribution, collection and treatment of water and wastewater.

Credit Hours: 3

Prerequisites: junior standing

CV_ENG 4232: Water and Wastewater Treatment Facilities

Physical, chemical, and biochemical processes for treating drinking water supplies and wastewaters (domestic and industrial), with emphasis on planning and design of such facilities.

Credit Hours: 3

Prerequisites: CV_ENG 4230 or CV_ENG 7230 or instructor's consent

CV_ENG 4240: Water Quality Analysis

Chemical, physical and biological methods for analysis of streams, lakes, wastewaters and water supplies and their use in water quality management.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 4230 or instructor's consent

CV_ENG 4250: Environmental Regulatory Compliance

(cross-leveled with CV_ENG 4250). Systems of water law; provisions of major federal environmental laws and regulations; development of regulations at the federal, state, and local levels; regulatory frameworks; permits; and enforcement.

Credit Hours: 3

CV_ENG 4260: Environmental Public Policy

Engineering and economic aspects of environmental policy. Basic understanding of environmental statutes and case law.

Credit Hours: 3

CV_ENG 4270: Environmental Engineering Microbiology

Theory and application of fundamental principles of microbiology, ecology, and aquatic biology of the microorganisms of importance to sanitary engineers.

Credit Hours: 3

Prerequisites: senior standing or instructor's consent

CV_ENG 4290: Wastewater Treatment and Process Design

Selection and use of wastewater and sludge treatment processes, disposal methods, sustainable wastewater treatment including anaerobic treatment of wastewater reuse.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3200. Instructor's consent required

CV_ENG 4300: Advanced Structural Steel Design

(cross-leveled with CV_ENG 7300). Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3313

CV_ENG 4302: Prestressed/Advanced Reinforced Concrete

Principles of prestressing. Constituent materials, loading and allowable stresses. Working and ultimate stress analysis and design. Shear and torsion. Deflections. Prestress losses. Continuous beams. Composite beams. Compression members. Footings.

Credit Hours: 3

Corequisites: CV_ENG 3312

CV_ENG 4310: Structural Design and Analysis

Design and analysis of building frames and bridges in steel and concrete using case studies. Economic selection of structural type and material. Basic methods of analysis for statically indeterminate structures.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 4300

CV_ENG 4320: Energy Methods in Mechanics

Variational mechanics including practical examples. Topics include calculus of variation of boundary value problems, energy methods such as Ritz and Galerkin methods, approximate solutions methods such as the finite element and finite difference, and eigenvalue problems.

Credit Hours: 3

Prerequisites: senior or graduate standing required

CV_ENG 4330: Structural System Design

Design of buildings in steel and reinforced concrete, including estimation of loads and design of gravity and lateral force resisting systems.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3312 and CV_ENG 3313

CV_ENG 4350: Matrix Methods of Structural Analysis

An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the STRUDL and NASTRAN programs to three dimensional structures.

Credit Hours: 3

Prerequisites: senior standing; grade of C- or better in CV_ENG 3300

CV_ENG 4360: Bridge Engineering

Review of Highway Bridge Analysis and Design Fundamentals. Study of Influence Line Diagrams and Shear and Moment Envelopes. Design of Medium- and Short-Span Girder Bridges based on AASHTO LRFD specs.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3312 and CV_ENG 3313

CV_ENG 4404: Geotechnical Earthquake Engineering

This course provides an introduction to geotechnical aspects of earthquake engineering. Topics include: basic seismology, seismic hazard analysis, dynamic soil properties, site response analysis and soil liquefaction.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3400 or instructor's consent

CV_ENG 4406: Geotechnics of Landfill Design

This course will focus on geotechnical and construction aspects in the analysis, design and construction of waste containment facilities (landfills) including expansions of existing facilities.

Credit Hours: 3

Prerequisites: instructor's consent

CV_ENG 4410: Foundation Engineering

(cross-leveled with CV_ENG 7410). Subsurface exploration. Design of basic foundation structures, shallow foundations, retaining walls, deep foundations.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3400

CV_ENG 4412: Applied Geotechnical Engineering

Study of concepts, theories, and design procedures for modern earthwork engineering including: compaction and densification of soils and soil improvement, seepage and drainage, slope stability and performance, and earth retaining structures.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3400

CV_ENG 4500: Introduction to Construction Management

Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques.

Credit Hours: 3

Prerequisites: junior standing

CV_ENG 4600: Advanced Mechanics of Materials

(same as MAE 4600; cross-leveled with CV_ENG 7600 and MAE 7600). Analysis of more complicated problems in stresses, strains.

Credit Hours: 3

Prerequisites: grade of C- or better in ENGINR 2200

CV_ENG 4610: Sensors and Experimental Stress Analysis

Sensors and instrumentation for stress analysis, mechanical measurement and health monitoring of civil structures. Application and design of data acquisition systems, basic digital signal processing. Electronics and instrumentation circuits.

Credit Hours: 3

Prerequisites: grade of C- or better in ENGINR 2200 and PHYSCS 2760

CV_ENG 4660: Vibration Analysis

(same as MAE 4660). Vibration theory with application to mechanical systems.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 2080 and MATH 4100

CV_ENG 4692: Introduction to Structural Dynamics

Theory of structural response to dynamic loads. Computation of dynamic response of structures to dynamic loads like blast and earthquake. Modal analysis and single degree of freedom methods will be covered.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3300

CV_ENG 4700: Hydraulics of Open Channels

Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3700

CV_ENG 4703: Applied Hydrology

Modern methods of applied hydrologic analysis and synthesis of hydrologic records.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3700 and CV_ENG 3702 or instructor's consent

CV_ENG 4710: Soil and Water Conservation Engineering

(same as BIOL_EN 4150). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CV_ENG 3200

CV_ENG 4720: Watershed Modeling Using GIS

(same as BIOL_EN 4350). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP, Procedures for model calibration/sensitivity data analysis.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CV_ENG 3200

CV_ENG 4730: Hydraulic Design

(cross-leveled with CV_ENG 7730). Design of hydraulic infrastructure utilizing principles of both pressure conduits and open channels. Hand calculations and use of commercial design software for water distribution (quantity and quality), stormwater collection and sanitary sewer systems, and detention basins. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CV_ENG 3700 or equivalent

CV_ENG 4792: Analysis of Water-Resource Systems

Applies hydrology, hydraulic and sanitary engineering, and economics to water-resource design problems considering man and his environment. Uses methods of systems analysis.

Credit Hours: 3

Prerequisites: instructor's consent

CV_ENG 4980: Civil Engineering Systems Design

Design of civil engineering systems.

Credit Hours: 3

Prerequisites: senior standing in Civil Engineering at the University of Missouri-Columbia or written consent of Chairman

CV_ENG 4990: Undergraduate Research in Civil and Environmental Engineering

Independent investigation or project in Civil Engineering. May be repeated to 6 hours. Enrollment limited to seniors in Civil and Environmental Engineering.

Credit Hour: 1-4

Prerequisites: instructor's consent

CV_ENG 4995: Research in Civil & Environmental Engineering- Undergraduate Honors

Independent project, supervised by the honors advisor, to be presented as a formal written report.

Credit Hour: 1-3

Prerequisites: Civil Engineering students only

Recommended: participation in the Civil and Environmental Engineering Departmental Honors Program

CV_ENG 7001: Topics in Civil Engineering

Study of current and new technical developments in civil engineering.

Credit Hour: 1-3

Prerequisites: instructor's consent

CV_ENG 7002: Analysis of Civil Engineering Decisions

Formulates and analyzes probabilistic models of civil engineering systems and their environment. Elementary theory of decision making under uncertainty. Application to selected civil engineering problems.

Credit Hours: 3

CV_ENG 7003: Optimization of Civil Engineering Systems

Automated design techniques such as linear, nonlinear, and dynamic programming; gradient and random searching. Civil engineering applications emphasized throughout.

Credit Hours: 3

CV_ENG 7004: Engineering Administration

Cash flow analysis, financial analysis, managerial accounting and cost control, budgeting, organizational structure and behavior.

Credit Hours: 3

Prerequisites: MATH 1300 or MATH 1500, or instructor's consent

CV_ENG 7006: Digital Computer Applications in Engineering

Use of digital computer for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, differentiation, and differential equations.

Credit Hours: 3

Prerequisites: MATH 2300

CV_ENG 7007: Quality Management in Civil Engineering

Quantitative and qualitative quality planning and analysis concepts, including statistical tools and total quality management techniques, control, measurement and assessment. Graded on A-F basis only.

Credit Hours: 3

CV_ENG 7008: Risk and Reliability for Civil Engineers

This course focuses on how to use probability and statistics to quantify uncertainties and consider risks when making civil engineering decisions and designing civil engineering systems.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3010 or other introductory probability/statistics course

CV_ENG 7080: Advanced Surveying

Celestial observations for determination of position; state coordinate systems, precise surveys, introduction to geodetic surveys, principles of photogrammetry. Theory of optical surveying instruments.

Credit Hours: 3

Prerequisites: CV_ENG 2090 and MATH 1500

CV_ENG 7082: Property Boundary Location

Principles of real property ownership, deeds, property boundary surveying, legal principles of original and retracement surveys Missouri statutes and regulations affecting surveying, GLO corner restoration and re-establishment.

Credit Hours: 3

Prerequisites: ENGINR 1500 and CV_ENG 2090

CV_ENG 7100: Traffic Engineering

Characteristics and studies associated with highway traffic. Capacity analysis and evaluation of freeways, rural highways, and urban streets. Traffic signal control and coordination.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 7102: Infrastructure Management

Civil infrastructure condition assessment, performance modeling, deterioration processes and models, maintenance and rehabilitation strategies, management techniques, data analysis, management systems, financing, case studies, emerging technologies.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 7103: Planning and Geometric Design of Highways

Techniques of highway planning in rural and urban areas. Design of the visible elements of highways.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 7104: Pavement Materials and Design

Properties of materials used in roads, airports and other pavement construction. Design methods for rigid and flexible pavements.

Credit Hours: 3

Prerequisites: grade of C- or better in ENGINR 2200

CV_ENG 7106: Intelligent Transportation Systems

This is an introductory course in Intelligent Transportation Systems (ITS). Topics include the theory of transportation networks and systems optimization, current implementations of ITS, and its practical issues and implications of ITS.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 7108: Bicycle and Pedestrian Transportation

This course teaches how to integrate pedestrian and bicyclists accommodations into the planning and design of transportation facilities. Topics include, including pedestrian and bicyclist safety, accommodation at intersections, traffic calming techniques and facility design.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 7109: Urban Development and Planning

Introduction to planning processes; procedures and forces that shape urbanization.

Credit Hours: 3

CV_ENG 7110: Transportation Simulation

Theory and application of simulation in transportation engineering.

Credit Hours: 3

Prerequisites: C- or better in CV_ENG 3100

CV_ENG 7120: Airport Engineering

Airport systems planning, design, and management.

Credit Hours: 3

Prerequisites: C- or better in CV_ENG 3010

CV_ENG 7125: Transportation Legal Issues

This course discusses some of the legal issues that transportation engineers encounter throughout the course of their careers.

Credit Hours: 3

Prerequisites: CV_ENG 3010

CV_ENG 7130: Transportation Safety

This course is an introduction to transportation safety. The focus will be on surface transportation. The student is expected to analyze safety data and to devise engineering solutions to safety problems.

Credit Hours: 3

Prerequisites: CV_ENG 3010

CV_ENG 7145: Civil and Environmental Engineering Legal Issues

Discussion of legal issues facing civil engineers including right of way, risk and liability, environment, financing public works, contracting and ethics.

Credit Hours: 3

Prerequisites: CV_ENG 3010

CV_ENG 7155: Transportation Geography

(same as GEOG 7850. Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.

Credit Hours: 3

CV_ENG 7165: Geographic Information Systems I

Introduces concepts of computer analysis of geographic data and emphasizes the techniques for handling geographic data. Application of computer-based GIS systems in coursework.

Credit Hours: 3

Prerequisites: instructor's consent; GEOG 2840

CV_ENG 7175: The Geospatial Sciences in National Security

(Same as GEOG 7130). This course explores the critical contribution of the geospatial sciences in the collection, processing, visualization and

analysis of geospatial information related to national security. May be repeated for credit.

Credit Hours: 3

Prerequisites: instructor's consent

CV_ENG 7185: Location Analysis/Site Selection

(Same as GEOG 7740). An overview of location analysis in regional planning and spatial decision support, this course focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. May be repeated for credit.

Credit Hours: 3

CV_ENG 7190: Infrastructure Project Development

Students will learn how the key elements of major civil engineering infrastructure projects fit together. The course will focus on the horizontal integration of: financing - planning - environment - right of way - design - construction - operations - maintenance. Engineering is important but so are a lot of other things. Graded on A-F basis only.

Credit Hours: 3

CV_ENG 7200: Remote Sensing of the Environment

Principles, characteristics and applications of remote sensing in engineering, geosciences, agriculture and environmental projects. Topics: basic concepts, photographic, thermal multispectral and microwave systems, satellite remote sensing and digital image processing.

Credit Hours: 3

CV_ENG 7210: Solid Waste Management

Engineering principles involved in generation, handling, collection, transport, processing, and disposal of solid wastes, resource recovery and reuse, legislation on solid wastes and groundwater contamination problems.

Credit Hours: 3

CV_ENG 7220: Hazardous Waste Management

(same as CH_ENG 7220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination.

Credit Hours: 3

CV_ENG 7230: Introduction to Water Quality

Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineered systems for the distribution, collection and treatment of water and wastewater..

Credit Hours: 3

CV_ENG 7232: Water and Wastewater Treatment Facilities

Physical, chemical, and biochemical processes for treating drinking water supplies and wastewaters (domestic and industrial), with emphasis on planning and design of such facilities.

Credit Hours: 3

Prerequisites: CV_ENG 4230 or CV_ENG 7230 or instructor's consent

CV_ENG 7240: Water Quality Analysis

Chemical, physical and biological methods for analysis of streams, lakes, wastewaters and water supplies and their use in water quality management.

Credit Hours: 3

Prerequisites: C- or better in CV_ENG 4230 or instructor's consent

CV_ENG 7250: Environmental Regulatory Compliance

(cross-leveled with CV_ENG 4250). Systems of water law; provisions of major federal environmental laws and regulations; development or regulations at the federal, state, and local levels; regulatory frameworks; permits; and enforcement.

Credit Hours: 3

CV_ENG 7260: Environmental Public Policy

Engineering and economic aspects of environmental policy. Basic understanding of environmental statutes and case law. Graded on A-F basis.

Credit Hours: 3

CV_ENG 7270: Environmental Engineering Microbiology

Theory and application of fundamental principles of microbiology, ecology, and aquatic biology of the microorganisms of importance to sanitary engineers.

Credit Hours: 3

CV_ENG 7290: Wastewater Treatment and Process Design

Selection and use of wastewater and sludge treatment processes, disposal methods, leading to rational design of overall wastewater treatment systems. Sustainable wastewater treatment including advanced processes in nutrient removal, anaerobic treatment for wastewater reuse. Graded on A-F basis only.

Credit Hours: 3

CV_ENG 7300: Advanced Structural Steel Design

(cross-leveled with CV_ENG 4300). Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3313

CV_ENG 7302: Prestressed/Advanced Reinforced Concrete

Principles of prestressing. Constituent materials, loading and allowable stresses. Working and ultimate stress analysis and design. Shear and torsion. Deflections. Prestress losses. Continuous beams. Composite beams. Compression members. Footings.

Credit Hours: 3

Corequisites: CV_ENG 3312

CV_ENG 7310: Structural Design and Analysis

Design and analysis of building frames and bridges in steel and concrete using case studies. Economic selection of structural type and material. Basic methods of analysis for statically indeterminate structures.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 4300

CV_ENG 7320: Energy Methods in Mechanics

Design of building structures and bridges in steel and reinforced concrete using case studies.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3300

CV_ENG 7330: Structural System Design

Design of buildings in steel and reinforced concrete, including estimation of loads and design of gravity and lateral force resisting systems.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3312 and CV_ENG 3313

CV_ENG 7350: Matrix Methods of Structural Analysis

An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the STRUDL and NASTRAN programs to three dimensional structures.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3300

CV_ENG 7360: Bridge Engineering

Review of Highway Bridge Analysis and Design Fundamentals. Study of Influence Line Diagrams and shear and Moment Envelopes. Design of medium-and Sort-Span Girder Bridges based on AASHTO LRFD Specs. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Grade of C- or better in CV_ENG 3312 and CV_ENG 3313

CV_ENG 7404: Geotechnical Earthquake Engineering

This course will provide an introduction to topics relating to geotechnical aspects of earthquake engineering. Topics to be covered include; basic seismology, seismic hazard analysis, dynamic soil properties, site response analysis and soil properties, site response analysis and soil liquefaction. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Grade of C- or better in CV_ENG 3400 or instructor's consent

CV_ENG 7406: Geotechnics of Landfill Design

This course will focus on geotechnical and construction aspects in the analysis, design and construction of waste containment facilities (landfills) including expansions of existing facilities.

Credit Hours: 3

Prerequisites: instructor's consent

CV_ENG 7410: Foundation Engineering

(cross-leveled with CV_ENG 4410). Subsurface exploration. Design of basic foundation structures: shallow foundations, retaining walls, deep foundations.

Credit Hours: 3

Prerequisites: Grade of C- or better in CV_ENG 3400

CV_ENG 7412: Applied Geotechnical Engineering

Study of concepts, theories, and design procedures for modern earthwork engineering including: compaction and densification of soils and soil improvement, seepage and drainage, slope stability and performance, and earth retaining structures.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3400

CV_ENG 7500: Introduction to Construction Management

Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques.

Credit Hours: 3

CV_ENG 7510: Construction Methods and Equipment

Selection and use of construction equipment, planning construction operations, equipment economics and operations analyses.

Credit Hours: 3

Prerequisites: MATH 1300 or MATH 1500, or instructor's consent

CV_ENG 7600: Advanced Mechanics of Materials

(same as MAE 7600; cross-leveled with CV_ENG 4600 and MAE 4600). Analysis of more complicated problems in stresses, strains.

Credit Hours: 3

Prerequisites: grade of C- or better in ENGINR 2200

CV_ENG 7610: Sensors and Experimental Stress Analysis

Sensors and instrumentation for stress analysis, mechanical measurement and health monitoring of civil structures. Application and design of data acquisition systems, digital signals and basic digital signal processing. Electronics and instrumentation circuits.

Credit Hours: 3

Prerequisites: Grade of C- or better in ENGINR 2200 and PHYSICS 2760

CV_ENG 7660: Vibration Analysis

(same as MAE 7660). Vibration theory with application to mechanical systems.

Credit Hours: 3

Prerequisites: grade of C- or better in MAE 2600 and MATH 4100

CV_ENG 7692: Introduction to Structural Dynamics

Theory of structural response to dynamics loads. Computation of dynamic response of structures to dynamic loads like blast and earthquake. Modal analysis and single degree of freedom methods will be covered. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Grade of C- or better in CV_ENG 3300

CV_ENG 7700: Hydraulics of Open Channels

Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves.

Credit Hours: 3

Prerequisites: graduate standing and Grade of C- or better in CV_ENG 3700

CV_ENG 7702: Pipeline Engineering

Theoretical and practical aspects of pipeline engineering including pipeline transport of natural gas and various solids such as coal, sand and solid wastes.

Credit Hours: 3

Prerequisites: CV_ENG 3700 and MAE 3400

CV_ENG 7703: Applied Hydrology

Modern methods of applied hydrologic analysis and synthesis of hydrologic records.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3700 and CV_ENG 3702, or instructor's consent

CV_ENG 7710: Soil and Water Conservation Engineering

(same as BIOL_EN 7150). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.

Credit Hours: 3

Prerequisites: BIOL_EN 3200 or CV_ENG 3200 or instructor's consent

CV_ENG 7720: Watershed Modeling Using GIS

(same as BIOL_EN 7350). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP. Procedures for model calibration/sensitivity data analysis.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor's consent

CV_ENG 7730: Hydraulic Design

(cross-leveled with CV_ENG 4730). Design of hydraulic infrastructure utilizing principles of both pressure conduits and open channels. Hand calculations and use of commercial design software for water distribution (quantity and quality), stormwater collection and sanitary sewer systems, and detention basins. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CV_ENG 3700 or equivalent

CV_ENG 7792: Analysis of Water-Resource Systems

Applies hydrology, hydraulic and sanitary engineering, and economics to water-resource design problems considering man and his environment. Uses methods of systems analysis.

Credit Hours: 3

Prerequisites: instructor's consent

CV_ENG 8001: Advanced Topics in Civil Engineering

New and current technical developments in civil engineering.

Credit Hour: 1-3

Prerequisites: CV_ENG 4006 or equivalent

CV_ENG 8002: Directed Reading In Civil Engineering

Faculty supervised readings course.

Credit Hour: 1-3

CV_ENG 8085: Problems in Civil Engineering

Supervised investigation in civil engineering to be presented in the form of a report.

Credit Hour: 1-6

CV_ENG 8087: Seminar in Civil Engineering

Review of research in progress. Research techniques.

Credit Hour: 1

CV_ENG 8100: Transportation Planning and Models

Regional and metropolitan transportation studies; land use, traffic generation, distribution and assignment models.

Credit Hours: 3

Prerequisites: CV_ENG 4002 or CV_ENG 4003

CV_ENG 8106: Advanced Intelligent Transportation Systems

This course is intended to be an introductory course in Intelligent Transportation Systems (ITS). This course includes the background of ITS, current implementations, sample deployments, and practical issues and implications.

Credit Hours: 3

CV_ENG 8110: Theory of Traffic Flow

Scientific approach to study of traffic phenomena with emphasis on applications. Deterministic and stochastic models of traffic flow; optimization of intersection controls; computer simulation of traffic problems.

Credit Hours: 3

Prerequisites: CV_ENG 4002 or instructor's consent

CV_ENG 8120: Traffic Control Engineering

Information retrieval and analysis of human and vehicular characteristics; roadway element; system control and optimization of highways, intersections; planning and design of new traffic facilities including ways, terminals.

Credit Hours: 3

Prerequisites: CV_ENG 3100 or equivalent

CV_ENG 8130: Land Use Planning

Case study of site planning using systems analysis; feasibility for development or redevelopment; restraints imposed by political, social and economic conditions on land use activity as related to urban and regional relationships.

Credit Hours: 3

Prerequisites: CV_ENG 4106

CV_ENG 8140: Highway Transportation

Economics of transportation on highways. Comparison of vehicle operation costs. Project studies of highway problems in general.

Credit Hours: 3

Prerequisites: CV_ENG 4103 or equivalent

CV_ENG 8150: Transportation Networks

This course presents techniques used in equilibrium analysis of transportation networks. The details of traffic assignment algorithms will be discussed along with theory and practical algorithms.

Credit Hours: 3

CV_ENG 8187: Seminar in Transportation Engineering

Review of research in progress in the area of transportation engineering.

Credit Hour: 1

CV_ENG 8200: Water Quality Modeling

Derivation and application of models for describing oxygen budget, nutrient exchange, and biological productivity in streams, lakes and estuaries.

Credit Hours: 3

Prerequisites: CV_ENG 7230

CV_ENG 8208: Finite Element Methods

(same as MAE 8280). The concepts and fundamentals of the finite element method with applications to problems in solid and fluid mechanics.

Credit Hours: 3

Prerequisites: MAE 4280

CV_ENG 8210: Groundwater Pollution Evaluation and Modeling

Fundamentals of groundwater hydraulics and groundwater contamination. Use and development of computer models to simulate flow and pollutant transport.

Credit Hours: 3

Prerequisites: CV_ENG 3700, MATH 4100, or instructor's consent

CV_ENG 8215: Environmental Transport Phenomena

Fundamental processes that control the transport of constituents substances in fluids, and the implications of these processes for a variety of important applications in natural and engineered systems.

Credit Hours: 3

CV_ENG 8220: Advanced Hazardous Waste Treatment Processes

Course includes some introductory materials about hazardous waste regulations followed by advanced treatment methods such as air stripping, soil-vapor extraction, chemical oxidation, membrane processes, in-situ and ex-situ biotreatment methods, solidification and thermal processes.

Credit Hours: 3

Prerequisites: CV_ENG 4220

CV_ENG 8225: Aquatic Chemistry

Principles of chemical thermodynamics and equilibrium applied to processes in natural water and water and wastewater treatment systems. Emphasis on quantitative analyses of acid/base, complexation/dissociation, precipitation/dissolution, and reduction/oxidation reactions. Graded on A-F basis only.

Credit Hours: 3

CV_ENG 8230: Unit Process Laboratory

Studies chemical and physical relationships as applied to unit processes of water and wastewater.

Credit Hours: 3

CV_ENG 8240: Physiochemical Treatment Processes

Fundamental principles, analysis and modeling of physical and chemical processes for water and wastewater treatment.

Credit Hours: 3

CV_ENG 8250: Biochemical Treatment Processes

Biochemical principles, kinetic models and energy considerations in the design of biological wastewater treatment processes.

Credit Hours: 3

CV_ENG 8260: Environmental Biotechnology

Major biochemical reactions relevant to environmental engineering. Theory and application of fundamental principles of attached and suspended microbial growth and process engineering for sanitary engineering and biodegradation.

Credit Hours: 3

Prerequisites: CV_ENG 8250 or instructor's consent

CV_ENG 8270: Design of Water and Wastewater Treatment Facilities

Development of design criteria and their application to the design of water and wastewater treatment facilities.

Credit Hours: 3

CV_ENG 8280: Engineering Aspects of Water Quality

Theoretical aspects of biological, chemical, physical processes; applications in water, wastewater, industrial-waste treatment processes, natural water systems; chemical equilibria, flow models; reaction kinetics on process design, pollutants.

Credit Hours: 3

Prerequisites: CV_ENG 4230 or instructor's consent

CV_ENG 8287: Seminar in Environmental Engineering

Review of research in progress in the area of environmental engineering.

Credit Hour: 1

CV_ENG 8290: Environmental Practicum

Application of advanced analysis and design techniques to practical problems in environmental engineering. Collaborative group investigations that may include experimental and computer-aided studies. No more than 6 practicum hours may be applied toward the MS degree. Graded on A-F basis only.

Credit Hour: 2-4

Prerequisites: graduate standing in Civil Engineering

CV_ENG 8295: Environmental Regulatory Policy

Discussion of the various policy aspects of environmental regulation: economic and non-economic impacts of degradation; risk assessment and management; distribution of environmental risks; regulatory tools; federal vs. state; disclosure; enforcement. Relation to environmental laws. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CV_ENG 4250 or CV_ENG 7250 or equivalent

CV_ENG 8303: Behavior of Reinforced Concrete Members

The design philosophy, constitutive laws, creep rate sensitivity and aging, shrinkage. Nonlinear response of reinforced concrete members. Deflection computation and control. Bond and anchorage.

Credit Hours: 3

Prerequisites: CV_ENG 3312

CV_ENG 8311: Nondestructive Evaluation Engineering

This course will present the interaction of nondestructive evaluation (NDE) technologies and engineering decision-making. Theory and application NDE technologies will be presented in the context of the engineering analysis required to effectively utilize the technologies. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 2760, ENGINR 1200, MATH 4100

CV_ENG 8312: Advanced Structural Analysis

Current trends in structural analysis. Elastic analysis of curved beams, arches and suspensions. Finite element and nonlinear methods of analysis.

Credit Hours: 3

CV_ENG 8313: Random Vibration

Analysis of random vibrations including topics in stationary, ergodic and nonstationary random processes, with application to single-degree of freedom, discrete and continuous mechanical systems.

Credit Hours: 3

Prerequisites: CV_ENG 4606

CV_ENG 8314: Numerical Methods in Engineering

Classification and numerical solution of engineering problems--ordinary and partial differential equations, algebraic equations. Includes initial, boundary, eigen- and characteristic-value problems. Prerequisites: MATH 4100

Credit Hours: 3

CV_ENG 8320: Continuum Mechanics

(same as MAE 8320). Introductory course in the mechanics of continuous media. Basic concepts of stress, strain, constitutive relationships; conservation laws are treated using Cartesian tensor notation. Examples from both solid and fluid mechanics investigated.

Credit Hours: 3

Prerequisites: CV_ENG 3700, MATH 7100, ENGINR 2200

CV_ENG 8322: Structural Analysis

Classical and modern methods for elastic analysis. Influence line, Miller-Breslau principle. Introduction to force and displacement methods using matrix analysis. Application to continuous beams, grids, plane and space frames and trusses.

Credit Hours: 3

CV_ENG 8330: Theory of Elasticity

(same as MAE 8330). Stress and strain at a point. General equations of elasticity. Plane stress, plain strain problems; torsion of prismatic bars. Energy methods.

Credit Hours: 3

CV_ENG 8332: Design of Special Structures Systems

Reviews current trends in design of structural systems and components. Critical evaluation of recent code modifications. Application to design of light gauge metal structures, lateral bracing systems, curved beams and panel systems.

Credit Hours: 3

Prerequisites: CV_ENG 4310 or CV_ENG 4330

CV_ENG 8340: Theory of Plates and Shells

(same as MAE 8340). Rectangular and circular plates. Variational methods in the analysis of plates and shells. Plates of unusual shape. Shear deformation effects. Large deformation analysis. Analysis of cylindrical shells.

Credit Hours: 3

CV_ENG 8342: Space Mechanics

Rigid body dynamics analysis of satellites, space vehicles. Trajectories, time of flight optimization.

Credit Hours: 3

Prerequisites: MAE 3600 or equivalent, and MATH 4100

CV_ENG 8350: Theory of Elastic Stability

(Same as MAE 8350). Buckling of Columns, frames, arches and other structural systems. Kinematic approach to stability. Large deflections. Energy approach to buckling. Plate and shell buckling. Inelastic buckling of columns. Creep buckling.

Credit Hours: 3

CV_ENG 8360: Theory of Plasticity

(same as MAE 8360). Plastic yield conditions and stress-strain relations. Behavior of elastic-perfectly plastic members. Plain strain in plastic members.

Credit Hours: 3

Prerequisites: CV_ENG 8330 or instructor's consent

CV_ENG 8372: Reinforced Concrete Theory and Design

Advanced design of reinforced concrete structures; review of standard codes and specifications and their influence.

Credit Hours: 3

Prerequisites: CV_ENG 4350 or equivalent

CV_ENG 8380: Nonlinear Mechanical Analysis

Analysis of behavior of nonlinear mechanical systems. Nonlinear phenomena of importance in mechanical design.

Credit Hours: 3

Prerequisites: MAE 3600 or equivalent and MATH 4100

CV_ENG 8382: Dynamical Theory

Engineering principles and application in mathematical expression of energy, force, inertia system.

Credit Hours: 3

Prerequisites: MAE 3600 or equivalent and MATH 4100

CV_ENG 8387: Seminar in Structural Engineering

Review of research in progress in the area of structural engineering.

Credit Hour: 1

CV_ENG 8390: Advanced Topics Structural Analysis

Computer implementation and application of finite element analysis. Material and geometric nonlinearities. Plastic analysis of structures. Code provisions for analysis of seismic and wind loadings.

Credit Hours: 3

Prerequisites: CV_ENG 4350

CV_ENG 8392: Dynamics of Structures

(same as MAE 8392). Study of the dynamic behavior of structures. Analysis of equivalent lumped parameter systems for the design of structures in a dynamic environment.

Credit Hours: 3

Prerequisites: MAE 2600 and MATH 4100 or MATH 7100

CV_ENG 8402: Advanced Shear Strength of Soils

Theoretical soil mechanics as applied to solution of specific engineering problems.

Credit Hours: 3

CV_ENG 8403: Consolidation and Settlement

Settlement of soil, Theory of Consolidation, consolidation testing, settlements of earth fills and embankments, stress distribution in soils, elastic settlement, bearing capacity of shallow foundations, shallow foundations design.

Credit Hours: 3

Prerequisites: CV_ENG 3400

CV_ENG 8404: Seepage in Soils

General principles that govern flow of water through soils and specific procedures for analysis and design of filtration and drainage media in geotechnical and geoenvironmental applications.

Credit Hours: 3

Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8406: Unsaturated Soil Mechanics

Fundamental principles governing the strength, deformation, and fluid flow behavior of multiphase porous media. Includes specific procedures for analyzing, measuring and modeling strength, hydraulic conductivity, and suction characteristics of unsaturated soil.

Credit Hours: 3

Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8407: Soil Behavior

Detailed study of composition, fabric, and geotechnical and hydrologic properties of soils that consist partly or wholly of clay. Emphasizes physico-chemical factors governing volume change and shear strength. Expansive clay behavior is examined in detail.

Credit Hours: 3

Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8408: Soil Dynamics

Cover topics relating to the response of soils to dynamic loading. Topics to be covered include: lab and field methods, cyclic soil models, foundation vibrations, and wave propagation through soil. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CV_ENG 3400 and instructor's consent

CV_ENG 8410: Advanced Foundation Engineering

Foundation design beyond simple spread footings, special footings and beams on an elastic foundations, mat foundations, pile foundations - static capacity, lateral loads, bucklin, dynamic analysis load tests, pile groups, drilled piers.

Credit Hours: 3

Prerequisites: CV_ENG 4410

CV_ENG 8412: Stability and Performance of Earth Slopes

Principles, mechanics and procedures for analyzing the stability of earth slopes and landfills under short-term, long-term, rapid drawdown, and earthquake conditions.

Credit Hours: 3

Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8413: Design and Analysis of Earth Retaining Structures

General principals and specific procedures for analysis and design of earth retention systems including consideration of soil-structure interaction.

Credit Hours: 3

Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8420: Advanced Geotechnics

Advanced study of specific geotechnical engineering topics. Topics may include: Environmental Geotechnics, Landfill Design, Geosynthetics, Laboratory Testing, and Case History. May be repeated for credit when topics vary.

Credit Hours: 3

Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8487: Seminar in Geotechnical Engineering

Review of research in progress in the area of geotechnical engineering.

Credit Hour: 1

CV_ENG 8510: Construction Engineering

Selection and layout of construction plant. Design and construction of formwork, falsework, cofferdams, conveyors and other temporary structures used by contractors.

Credit Hours: 3

Prerequisites: CV_ENG 4510 or equivalent

CV_ENG 8520: Construction Productivity

Work improvement techniques in the construction industry reviewed and applied to local construction site. Construction safety influenced by supervisors and managers studied in detail. Declining productivity in the construction industry evaluated and solutions considered.

Credit Hours: 3

Prerequisites: CV_ENG 4500

CV_ENG 8530: Construction Project Management

Cost analysis, estimating techniques. Time, cost, and quality control of construction projects. Recording/analyzing construction effort. Applications of crew balance, process charts, time-lapse motion pictures, operations research, and preplanning techniques to construction operations. Construction safety.

Credit Hours: 3

CV_ENG 8540: Construction Administration

Organization, management, engineering, business, and legal problems in the construction industry. Purchasing, bonding, insurance, financing, labor relations, and contract administration.

Credit Hours: 3

Prerequisites: CV_ENG 4500

CV_ENG 8610: Materials and Measurement

About 25% of the course is devoted to the physical measurement of strain, force, displacement and motion. Remainder of course is devoted to advanced study of the behavior of steel and concrete with emphasis on brittle fracture in steel.

Credit Hours: 3

Prerequisites: CV_ENG 3600 or equivalent

CV_ENG 8620: Advanced Dynamics

(same as MAE 8620). Fundamental principles of advanced rigid body dynamics with applications. Special mathematical techniques including Lagrangian and Hamiltonian methods.

Credit Hours: 3

Prerequisites: CV_ENG 2080 and MATH 4100

CV_ENG 8630: Vibrations of Distributed Parameter Systems

(same as MAE 8630). Vibration analysis of strings, cables, bars, rods, shafts, beams, membranes, plates, circular rings, frames; free and forced oscillation; miscellaneous loading; various boundary conditions; effect of damping; energy methods; method of difference equations.

Credit Hours: 3

Prerequisites: CV_ENG 4660

CV_ENG 8710: Advanced Hydraulic Engineering

Unsteady flow in pipes and open channels is studied using the method of characteristics and finite difference equations. Hydraulic transient in pipe networks due to valve adjustments, pump startup and pump power failure are analyzed. Control of transient using surge tanks and air chambers is included.

Credit Hours: 3

Prerequisites: CV_ENG 3720

CV_ENG 8720: Hydrotechnical Practicum

Application of advanced analysis and design techniques to practical problems in hydrotechnical engineering. Collaborative group investigations that may include experimental and computer aided studies. No more than 6 practicum hours may be applied toward the MS degree. Graded on A-F basis only.

Credit Hour: 2-4

Prerequisites: graduate standing in Civil Engineering

CV_ENG 8730: Fundamentals of Fluid Mechanics

Treatment of fundamental concepts and theories in fluid mechanics at a level suitable for beginning graduate students.

Credit Hours: 3

Prerequisites: CV_ENG 3700 or equivalent

CV_ENG 8740: Hydrodynamics

Special topics in potential theory and conformal mapping.

Credit Hours: 3

CV_ENG 8750: Wind Engineering

Study of wind effects on the safety of engineering structures, air pollution and building energy consumption, and the use of wind.

Credit Hours: 3

Prerequisites: CV_ENG 3700

CV_ENG 8990: Research-Masters Thesis in Civil & Environmental Engineering

Independent investigation in the field of civil engineering to be presented in the form of a thesis. Graded on a S/U basis only.

Credit Hour: 1-99

CV_ENG 9001: Advanced Topics in Civil Engineering - PhD

New and current technical developments in civil engineering. For PhD students.

Credit Hour: 1-4

CV_ENG 9990: Research-Doctoral Dissertation Civil & Environmental Engineering

Independent investigation in the field of civil engineering to be presented in the form of a thesis. Graded on a S/U basis only.

Credit Hour: 1-99

Classical Humanities (CL_HUM)

CL_HUM 1050: Greek and Latin in English

A survey of the influence of Greek and Latin upon English literary, scientific, technical, legal and medical vocabulary. Emphasis is upon building competency with complex English words while studying the cultural influence of the classical languages on modern vocabulary.

Credit Hours: 3

CL_HUM 1060: Classical Mythology

Myths of Greece and Rome in literature and art.

Credit Hours: 3

CL_HUM 1060H: Classical Mythology - Honors

Myths of Greece and Rome in literature and art.

Credit Hours: 3

Prerequisites: Honors eligibility required

CL_HUM 2005: Topics in Classical Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

CL_HUM 2100: Greek Culture

Survey of Greek life and thought. Principal developments in literature, the arts, politics, religion and philosophy, and their influence on Western civilization.

Credit Hours: 3

CL_HUM 2100H: Greek Culture - Honors

Survey of Greek life and thought. Principal developments in literature, the arts, politics, religion and philosophy, and their influence on Western civilization.

Credit Hours: 3

Prerequisites: Honors eligibility required

CL_HUM 2200: Roman Culture

Survey of Roman life and thought. Principal developments in literature, the arts, politics, religion, philosophy, and private life, and their influence on Western Civilization.

Credit Hours: 3

CL_HUM 2300: Greek Classics in Translation

Reading in translation and critical study of the most important literary works of the ancient Greek World.

Credit Hours: 3

CL_HUM 2300H: Greek Classics in Translation

Reading in translation and critical study of the most important literary works of the ancient Greek world.

Credit Hours: 3

Prerequisites: Honors eligibility required

CL_HUM 2400: Roman Classics in Translation

Reading in translation and critical study of the most important literary works of the ancient Roman world.

Credit Hours: 3

CL_HUM 2940: Service Learning in Classical Studies

Students provide enrichment programming on the Ancient World at various Columbia Public School sites. Participants must be Classical Studies majors or minors. Graded on A/F basis only. Does not meet Arts and Science general education requirements.

Credit Hour: 1

Prerequisites: instructor's consent required

CL_HUM 3000: Foreigners and Dangerous Women in Greek and Latin Literature

(same as PEA_ST 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3000H: Foreigners and Dangerous Women in Greek and Latin Literature - Honors

(same as PEA_ST 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 3005: Topics in Classical Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Recommended: CL_HUM 1060

CL_HUM 3005H: Topics in Classical Humanities - Honors

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 3025: Ancient Western Philosophy

(same as PHIL 3000). Philosophical thought on nature, knowledge, the gods, human life and society, from Thales to Augustine. Emphasis on Plato and Aristotle. The relevance of the ancients to contemporary life.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3050: Philosophy Before Socrates

A study of the origin of philosophical thinking in the Ancient Greek world. Topics to be explored include the nature of reality and our knowledge of it, the structure and constituents of the cosmos, human excellence and its relation to morality, political power, and happiness.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3050H: Philosophy Before Socrates - Honors

A study of the origin of philosophical thinking in the Ancient Greek world. Topics to be explored include the nature of reality and our knowledge of it, the structure and constituents of the cosmos, human excellence and its relation to morality, political power, and happiness.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 3100: The Age of Pericles

A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3100H: The Age of Pericles - Honors

A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 3150: The Age of Augustus

Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3150H: The Age of Augustus - Honors

Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 3200: Power and Oratory in Ancient Greece

Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3200H: Power and Oratory in Ancient Greece - Honors

Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 3225: Roman Comedy, Wit and Humor

Study of works illustrating the comedy, wit and humor of the Romans: readings in comedies of Plautus and Terence, Catullus, Ovid's *Metamorphoses*, Petronius' *Satyricon*, Martial, Juvenal and Macrobius.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3250: Greek and Roman Epic

A study of the major representatives of the ancient epic genre. Readings will include Homer's *Iliad* and *Odyssey*, Apollonius' *Argonautica*, Vergil's *Aeneid*.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3250H: Greek and Roman Epic - Honors

A study of the major representatives of the ancient epic genre. Readings will include Homer's *Iliad* and *Odyssey*, Apollonius' *Argonautica*, Vergil's *Aeneid*.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 3300: Greek Drama

Reading and interpretation of Greek tragedies and comedies in translation.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3300H: Greek Drama - Honors

Reading and interpretation of Greek tragedies and comedies in translation.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 3350: Advanced Mythology

Interpretation of selected classical myths and their influence on later literature and art.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3350H: Advanced Mythology - Honors

Interpretation of selected classical myths and their influence on later literature and art.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 3400: Murder and Mayhem: Images of Justice in Classical Antiquity

Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and courts, techniques of persuasion.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3400H: Murder & Mayhem: Images of Justice in Classical Antiquity - Honors

Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and courts, techniques of persuasion.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 3450: Greek and Roman Characters and Ideals

Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3450H: Greek and Roman Characters and Ideals - Honors

Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 3550: War and Democracy in Late 5th c. BCE Athens

(same as PEA_ST 3550). Explores the discourse on war and peace in Athenian texts and art that survives from the last quarter of the 5th century B.C.E. This was a period of relentless warfare: the Athenians were fighting the Spartans, Sparta's allies, unaligned cities and several of their own subject states.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3600: The Ancient Novel

Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3600H: The Ancient Novel - Honors

Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 3650: Paganism and Christianity

A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3650H: Paganism and Christianity - Honors

A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 3700: Women in the Ancient World

Using classical literary texts as the central focus this course examines the role of women: the conflict inherent in their obligations and their identity in the context of these obligations.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3700H: Women in the Ancient World - Honors

Using classical literary texts as the central focus this course examines the role of women: the conflict inherent in their obligations and their identity in the context of these obligations.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 3750: Classics in a Cross-Cultural Context

The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3750H: Classics in a Cross-Cultural Context - Honors

The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 3775: The Ancient World on Film

(same as AR_H_A 3775 and FILM_S 3775). This course explores how classical antiquity has been represented in twentieth and twenty-first-century film, with particular emphasis on the ways in which ancient narratives and iconography have been appropriated by filmmakers to address contemporary cultural issues.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 3800: Sports and Spectacles in Greco-Roman Antiquity

Investigates athletic display in ancient Greek and Roman culture, from its earliest representations in Greek literature to the massive spectacles of the Roman empire, with an emphasis on the intersections between sport and spectacle and other areas of ancient cultural life.

Credit Hours: 3

Recommended: CL_HUM 1060

CL_HUM 4005: Topics in Classical Humanities

Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Recommended: CL_HUM 1060 and junior standing

CL_HUM 4100: Greece: From the Bronze Age to the Byzantine Empire

Study abroad in Greece, in conjunction with the MU International Center. Immersion in the physical and intellectual heritage of ancient Greece; emphasis on cross-disciplinary, on-site learning and the intersections among ancient, Byzantine, and modern Greece. Application required. Graded on A/F basis only.

Credit Hours: 6

Recommended: CL_HUM 1060

CL_HUM 4100H: Greece: From the Bronze Age to the Byzantine Empire - Honors

Study abroad in Greece, in conjunction with the MU International Center. Immersion in the physical and intellectual heritage of ancient Greece; emphasis on cross-disciplinary, on-site learning and the intersections among ancient, Byzantine, and modern Greece. Participants chosen by instructor. Graded on A/F basis only. Application required.

Credit Hours: 6

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060

CL_HUM 4500: Greek and Roman Religion

(same as REL_ST 4500). Survey of religious development among the Greeks and Romans.

Credit Hours: 3

Recommended: CL_HUM 1060 and junior standing

CL_HUM 4500H: Greek and Roman Religion - Honors

(same as REL_ST 4500). Survey of religious development among the Greeks and Romans.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060 and junior standing

CL_HUM 4550: Literature and Culture of the Hellenistic Age

A survey of the literature and culture of the Hellenistic Age.

Credit Hours: 3

Recommended: CL_HUM 1060 and junior standing

CL_HUM 4550H: Literature and Culture of the Hellenistic Age - Honors

A survey of the literature and culture of the Hellenistic Age.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060 and junior standing

CL_HUM 4600: The Classical Tradition

Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times.

Credit Hours: 3

Recommended: CL_HUM 1060 and junior standing

CL_HUM 4600H: The Classical Tradition - Honors

Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060 and junior standing

CL_HUM 4650: The World of Late Antiquity

A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity's development and the transformation of the classical heritage.

Credit Hours: 3

Recommended: CL_HUM 1060 and junior standing

CL_HUM 4650H: The World of Late Antiquity - Honors

A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity's development and the transformation of the classical heritage.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060 and junior standing

CL_HUM 4770: Oral Tradition

(same as ENGLSH 4770). Study of verbal art from living oral traditions (e.g. Native American and African American) and important literary works with roots in oral tradition (e.g. the Bible, the Iliad and Odyssey, and Beowulf).

Credit Hours: 3

Recommended: CL_HUM 1060 and junior standing

CL_HUM 4770H: Oral Tradition - Honors

(same as ENGLSH 4770). Study of verbal art from living oral traditions (e.g. Native American and African American) and important literary works with roots in oral tradition (e.g. the Bible, the Iliad and Odyssey, and Beowulf).

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: CL_HUM 1060 and junior standing

CL_HUM 4800: Political Thought in Classical and Christian Antiquity (same as POL_SC 4800). Reading and discussion of Greek, Roman, and Early Christian treatises on politics and political life. Survey of the political institutions and procedures of the Greek city states and Roman Republic and Empire. Examination of contemporary Christian responses and adaptations.

Credit Hours: 3

Recommended: CL_HUM 1060 and junior standing

CL_HUM 4970: Capstone in Classical Humanities

Culminating course in the study of Greek and Roman literature and Classical Culture. Required for Classical Humanities majors in first term of senior year.

Credit Hours: 3

Prerequisites: instructor's consent

CL_HUM 4970H: Capstone in Classical Humanities- Honors

Culminating course in the study of Greek and Roman literature and Classical Culture. Required for Classical Humanities majors in first term of senior year.

Credit Hours: 3

Prerequisites: instructor's consent; Honors eligibility required

Recommended: for Classical Humanities double-majors

CL_HUM 7005: Topics in Classical Humanities

Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: any Classical Humanities 3000 level course or instructor's consent

CL_HUM 7550: Literature and Culture of the Hellenistic Age

A survey of the literature and culture of the Hellenistic Age. Graded on A-F basis only.

Credit Hours: 3

CL_HUM 7650: The World of Late Antiquity

A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity's development and the transformation of the classical heritage.

Credit Hours: 3

Classics (CLASS)

CLASS 4100: History of the Greek and Latin Languages

(same as LINGST 4130). Evolution of classical languages and their relationship to each other.

Credit Hours: 3

Recommended: GREEK 4300 and LATIN 4300

CLASS 4205: Topics in Classical Studies

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

Credit Hour: 1-99

Recommended: GREEK 2000 and LATIN 2000

CLASS 4300: Introduction to Text Criticism and Paleography

Latin and/or Greek textual criticism and paleography, using manuscript facsimiles at the University library.

Credit Hours: 3

Recommended: GREEK 2000 and LATIN 2000

CLASS 4400: Ancient Pastoral

Reading and interpretation of pastoral poetry and prose in Greek and Latin; emphasis on Theocritus, Virgil, and Longus.

Credit Hours: 3

Recommended: GREEK 4300 and LATIN 4300

CLASS 4700: Advanced Study in the Teaching of the Classics

Credit Hours: 3

Prerequisites: instructor's consent

CLASS 4960: Special Readings in Classical Studies

Readings in authors and texts not covered in other courses.

Credit Hour: 1-3

Prerequisites: departmental consent

CLASS 4970: Capstone in Classical Languages

Culminating course in the study of Greek and Roman literature and Classical culture. Required for Greek, Latin, and Classical Languages majors in first term of senior year.

Credit Hours: 3

Prerequisites: Instructor consent

Recommended: for double-majors

CLASS 4970H: Capstone in Classical Languages

Culminating course in the study of Greek and Roman literature and Classical culture. Required for Greek, Latin, and Classical Languages majors in first term of senior year. Recommended for double-majors.

Credit Hours: 3

Prerequisites: instructor's consent. Honors eligibility required

CLASS 4995H: Honors Proseminar in Classical Studies

Limited to Honors undergraduates. To be taken in senior year. Integrated exploration of classical civilization. May repeat to 6 hours maximum.

Credit Hour: 3-6

Prerequisites: onors eligibility required

Recommended: Senior standing

CLASS 7000: Introduction to Graduate Study in Classics

Required of all first-year graduate students.

Credit Hour: 1

CLASS 7100: History of the Greek and Latin Languages

(same as LINGST 7130). Evolution of classical languages and their relationship to each other.

Credit Hours: 3

CLASS 7205: Topics in Classical Studies

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

Credit Hour: 1-99

CLASS 7300: Introduction to Text Criticism and Paleography

Latin and/or Greek textual criticism and paleography, using manuscript facsimiles at the University library.

Credit Hours: 3

Prerequisites: 2 years of Classical Languages or equivalent

CLASS 7400: Ancient Pastoral

Reading and interpretation of pastoral poetry and prose in Greek and Latin; emphasis on Theocritus, Virgil, and Longus.

Credit Hours: 3

Prerequisites: 2 years each of Greek and Latin

CLASS 7700: Advanced Study in the Teaching of the Classics

Credit Hours: 3

Prerequisites: classroom teaching experience or chairman's consent

CLASS 7960: Special Readings in Classical Studies

Readings in authors and texts not covered in other courses.

Credit Hour: 1-3

Prerequisites: graduate standing and classics/classical humanities; departmental consent; Greek--two years classical Greek or equivalent; Latin--two years Classical Latin or equivalent

CLASS 8085: Directed Readings in Classics

For graduate students to undertake special projects for graduate credit under the supervision of faculty.

Credit Hours: 3

CLASS 8090: Masters Research and Thesis in Classics

For graduate students studying for the MA and working on a thesis to receive credit for work directly related to the thesis. Graded S/U only.

Credit Hours: 3

CLASS 8440: Ancient/Medieval Topography

(same as AR_H_A 8440). Descriptive and historical analysis of selected city or site. Subject varies.

Credit Hour: 1-99

Prerequisites: instructor's consent

CLASS 9090: PhD Research and Thesis

Individual research in preparation for writing thesis and/or dissertation. Graded on a S/U basis only.

Credit Hour: 1-8

CLASS 9187: Seminar in Classical Mythology

Intensive study of classical mythology in origin, development, meaning and influence.

Credit Hours: 3

Prerequisites: instructor's consent

CLASS 9287: Seminar in the Hellenistic Age

Seminar in the Hellenistic Age

Credit Hour: 3-6

CLASS 9387: Seminar in Ancient Rhetoric and Oratory

Seminar in Ancient Rhetoric and Oratory

Credit Hours: 3

CLASS 9487: Seminar in Ancient Literary Criticism

Principles and theories of ancient Greek and Latin literary criticism, as developed in significant works on the subject.

Credit Hours: 3

CLASS 9587: Greco-Roman Didactic

Critical and comparative study of Greek and Latin didactic poetry with emphasis on major authors from Hesiod through the Augustan Age.

Credit Hour: 3-6

CLASS 9687: Seminar in Greco-Roman Religion

Seminar in Greco-Roman Religion

Credit Hours: 3

CLASS 9787: Seminar in Greco-Roman Satire and Social Criticism

Seminar in Greco-Roman Satire and Social Criticism

Credit Hours: 3

CLASS 9887: Seminar in the Age of the Antonines

Seminar in the Age of the Antonines

Credit Hour: 3-6

Clinical Laboratory Sciences (CL_L_S)

CL_L_S 1000: Orientation to Clinical Laboratory Science

The class is designed to give prospective Clinical Laboratory Science students clinical experience in the field of Clinical Laboratory Science. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: HLTH_SCI 1000

CL_L_S 4407: Clinical Laboratory Operations

This course provides a basic introduction to the theory, practical application, technical performance and evaluation of laboratory skills specific to the practice of clinical laboratory science. Laboratory safety; microscopy; pipetting; general laboratory equipment; quality control; mathematics; phlebotomy; pre-analytic, analytic and post-analytic processes, including specimen collection, processing and transport to maintain test result integrity, will be addressed. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4408: Introduction to Clinical Hematology

This course introduces the theory, practical application, technical performance and evaluation of hematological and hemostasis procedures. Correlation of laboratory data with the diagnosis of erythrocyte, leukocyte and bleeding/clotting disorders will be introduced. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4409: Introduction to Clinical Microbiology

This course introduces the theory, practical application, technical performance and evaluation of procedures for isolation, identification and susceptibility testing of infectious disease organisms in humans. The course primarily focuses on bacteriology, but will include introductory coverage of parasitology, mycology and virology. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4410: Introduction to Clinical Chemistry and Urinalysis

This course introduces the theory, practical application, technical performance and evaluation of basic laboratory skills and methods in clinical chemistry and urinalysis. The course focuses on the correlation of laboratory data with the diagnosis of renal conditions, but will include introductory coverage of carbohydrate, liver and protein conditions, as well as enzymes. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4411: Introduction to Clinical Immunohematology

This course introduces the theory, practical application, technical performance and evaluation of immunohematology procedures required to provide compatible blood components for transfusion. Methods for collection, processing, storage and transfusion of blood and blood components will be presented. Immunohematology procedures that assist in the diagnosis and management of hemolytic conditions will be introduced. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4412: Clinical Laboratory Science Theory, Application and Correlation

Application, evaluation and correlation of laboratory procedures used in the diagnosis and treatment of common disease states. Opportunities for building critical thinking, problem solving, and leadership skills are provided in small group clinical case discussions. Course may be repeated for credit. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: departmental consent, accepted in into the Medical Technology Program

CL_L_S 4413: Clinical Endocrinology and Toxicology

This course introduces the theory, practical application, and evaluation of clinical chemistry laboratory procedures. Correlation of clinical laboratory data with the diagnosis and treatment of endocrine disorders, toxicology disturbances and therapeutic drug monitoring is emphasized. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4414: Chemistry I

Introduction to theory, practical application, technical performance and evaluation of clinical chemistry laboratory procedures.

Credit Hour: 1-4

Prerequisites: departmental consent, accepted into the Medical Technology Program. May be repeated for credit. Graded on A-F basis only

CL_L_S 4415: Chemistry II

Advanced theory, practical application, technical performance and evaluation of clinical chemistry laboratory procedures. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: departmental consent, accepted into the Medical Technology Program

CL_L_S 4416: Clinical Hematology I

Introduction to the theory, practical application, technical performance and evaluation of hematological and coagulation procedures. Emphasis on correlations of clinical laboratory data with the diagnosis and treatment of anemia, leukemia, and bleeding/clotting disorders. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: departmental consent, accepted into the Medical Technology Program

CL_L_S 4417: Clinical Hematology II

Advanced theory, practical application, technical performance and evaluation of hematological and coagulation procedures. Emphasis on the correlation of clinical laboratory data with the diagnosis and treatment of anemia, leukemia, and bleeding/clotting disorders. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: departmental consent, accepted into the Medical Technology Program

CL_L_S 4418: Clinical Microbiology I

Introduction to the theory, practical application, technical performance and evaluation of procedures for isolation, identification and susceptibility testing of infectious disease organisms in humans. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: departmental approval, accepted into the Medical Technology Program

CL_L_S 4419: Clinical Microbiology II

Advanced theory, practical application, technical performance and evaluation procedures for isolation, identification and susceptibility testing of infectious disease in humans; bacteriology, mycology, parasitology, virology and serology and correlation of data with diagnosis and treatment. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: departmental approval, accepted into the Medical Technology Program

CL_L_S 4420: Clinical Immunology

Theory, practical application, and evaluation of immunological components; principles and methods used to assess immunologically-related disorders, including hypersensitivity reactions, autoimmune, immunoproliferative and immunodeficiency disorders, tumors and transplantations. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: departmental approval, accepted into the Medical Technology Program

CL_L_S 4422: Immunohematology I

Introduction to the theory, practical application, technical performance and evaluation of blood bank procedures required for transfusion of blood and blood components and for handling and storage of blood and blood components. May be repeated for credit. Graded on A/F basis only.

Credit Hour: 1-4

Prerequisites: departmental approval, accepted into the Medical Terminology Program

CL_L_S 4423: Immunohematology II

Advanced theory, practical application, technical performance and evaluation of blood bank procedures required for transfusion of blood and blood components and for handling and storage of blood and blood components. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: departmental approval, accepted into the Medical Technology Program

CL_L_S 4424: Phlebotomy

Theory, practical application, technical performance and evaluation of procedures used in collecting, handling and processing blood specimens. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: departmental approval, accepted into the Medical Technology Program

CL_L_S 4426: Body Fluid Analysis

Theory, practical application, technical performance and evaluation of procedures used in the analysis of urine and other body fluids, including cerebrospinal, synovial, serous, seminal, amniotic and feces. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: departmental consent, accepted into the Medical Technology Program

CL_L_S 4442: Clinical Immunohematology Laboratory Practicum I

This course provides practical application in a clinical laboratory setting for the technical performance and evaluation of clinical immunohematology procedures and preparation of blood components. Course content will include new skills and procedures, in addition to the skills and procedures presented in CL_L_S 4407 Clinical Laboratory Operations and CL_L_S 4411 Introduction to Clinical Immunohematology. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4443: Clinical Immunohematology Laboratory Practicum II

This course provides practical application in a clinical laboratory setting for the technical performance and evaluation of clinical immunohematology procedures and preparation of blood components. Course content will include new skills procedures, in addition to the skills and procedures presented in CL_L_S 4442 Clinical Immunohematology Laboratory Practicum I. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4444: Clinical Core Laboratory Practicum

This course provides practical application in a clinical laboratory setting for the technical performance and evaluation of clinical hematology/hemostasis, chemistry and urinalysis procedures. Course content will include new skills and procedures and the application of automation and automatic verification techniques, building on the skills and procedures presented in CL_L_S 4407 Clinical Laboratory Operations, CL_L_S 4408 Introduction to Clinical Hematology and CL_L_S 4410 Introduction to Clinical Chemistry and Urinalysis. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4445: Clinical Core Laboratory Practicum II

This course provides practical application in a clinical laboratory setting for the technical performance and evaluation of clinical hematology/hemostasis, chemistry and urinalysis procedures. Course content will include new skills and procedures, in addition to the skills and procedures presented in CL_L_S 4444 Clinical Core Laboratory Practicum. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4448: Clinical Microbiology Laboratory Practicum I

This course provides practical application in a clinical laboratory setting for the technical performance and evaluation of clinical microbiology procedures. Course content will include new skills and procedures, in addition to the skills and procedures presented in CL_L_S 4407 Clinical Laboratory Operations and CL_L_S 4409 Introduction to Clinical Microbiology. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4449: Clinical Microbiology Laboratory Practicum II

This course provides practical application in a clinical laboratory setting for the technical performance and evaluation of clinical microbiology

procedures. Course content will include new skills and procedures, in addition to the skills and procedures presented in CL_L_S 4448 Clinical Microbiology Laboratory Practicum I. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4970: Clinical Laboratory Management I

Theory, practical application and evaluation of laboratory management principles and associated models in communication, educational methodology, healthcare systems and financial resources. Opportunities for building critical thinking, problem-solving, and management/professional leadership skills are provided. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: departmental approval, accepted into the Medical Technology Program

CL_L_S 4980: Clinical Lab Management II

Continuation of Clinical Lab Management I. Theory, practical application, and evaluation of laboratory management principles and associated models in compliance and regulatory issues, human resource management, method evaluation, professionalism and laboratory quality. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CL_L_S 4970 or departmental consent

Communication (COMMUN)

COMMUN 1200: Public Speaking

Principles, process of speech communication in small group and public speaking situations.

Credit Hours: 3

COMMUN 1200H: Public Speaking - Honors

Principles, process of speech communication in small group and public speaking situations.

Credit Hours: 3

Prerequisites: Honors eligibility required

COMMUN 2100: Media Communication in Society

An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society.

Credit Hours: 3

Prerequisites: freshman, sophomore or junior standing only

COMMUN 2100H: Media Communication in Society - Honors

An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society.

Credit Hours: 3

Prerequisites: freshman, sophomore or junior standing only. Honors eligibility required

COMMUN 2200: Video Workshop: Mizzou Network

A hands-on workshop; students will participate in all phases of video production (camera operations, directing, graphics, video replay, and live audio production and digital editing) in a variety of live sports Projects. There is no requirement of previous production experience or course work. Course may be repeated an additional two times for credit. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: restricted to Communication majors

COMMUN 2315: Basic Audio Production and Performance

Radio speaking in varied types of programs; console operations, tape editing, microphone techniques.

Credit Hours: 3

Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2701: Topics in Communication - General

Topics in Communication - General.

Credit Hours: 3

Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2703: Topics in Communication - Behavioral Science

Topics in Communication - Behavioral Science.

Credit Hours: 3

Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2705: Topics in Communication - Humanities/Fine Arts

Topics in Communication - Humanities/Fine Arts.

Credit Hours: 3

Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 3050: Survey of Communication Studies

A survey of four main areas of the field communication, interpersonal, organizational, political, and mass communication.

Credit Hours: 3

Prerequisites: May be restricted to Communications majors through early registration

COMMUN 3310: Message Design and Writing for the Media

Styles and functions of various script formats for radio, television productions.

Credit Hours: 3

Prerequisites: COMMUN 2100. May be restricted to Communication majors only during early registration

COMMUN 3315: Advanced Audio Production

The study and application of techniques applicable to radio, television, and multimedia production with an emphasis on digital audio workstation systems.

Credit Hours: 3

Prerequisites: COMMUN 2315. May be restricted to Communication majors only during early registration

COMMUN 3390: Digital Production I

Focus on building familiarity with video cameras, microphones, lighting, editing as well as the fundamentals of visual composition, (framing, camera angles, story boards, and ways to visualize information) and processes and procedures for producing and directing.

Credit Hours: 3

Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3395: Digital Production II

Focus on advanced production work; more elaborate projects including digital shorts, music videos, and short documentaries; advanced editing, storyboards, and emphasis on developing narrative structure.

Credit Hours: 3

Prerequisites: COMMUN 3390 or instructor's consent. May be restricted to Communication majors only during early registration

COMMUN 3422: Communication Research Methods

Focuses on writing and administering surveys, conducting field research, and designing experimental studies.

Credit Hours: 3

Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3441: Nonverbal Communication

Analysis of form and content of nonverbal communication. Emphasis on role of nonverbal cues in interpersonal communication.

Credit Hours: 3

Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3460: Organizational Advocacy

Theory and analysis of communication to promote organizational culture and image.

Credit Hours: 3

Prerequisites: sophomore standing. May be restricted to Communication majors during early registration

COMMUN 3470: Culture as Communication

(same as ANTHRO 3470, LINGST 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction.

Credit Hours: 3

Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3490: Mass Media Theory

Survey of the theories of mass communication.

Credit Hours: 3

Prerequisites: COMMUN 2100 or senior standing. May be restricted to Communication majors only during early registration

COMMUN 3525: Conflict and Communication

Theory and analysis of communication in conflict situations across a variety of contexts.

Credit Hours: 3

Prerequisites: sophomore standing required. May be restricted to Communication majors only during early registration

COMMUN 3561: Relational Communication

Analysis of communication influences on relational identities and development.

Credit Hours: 3

Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3570: Performance of Literature

(same as ENGLISH 3570 and THEATR 3200). Analysis and oral interpretation of literary works. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: sophomore standing

COMMUN 3571: Group Decision Making Processes

(same as PEA_ST 3521). Procedures and techniques for interpersonal communication and decision making in small groups.

Credit Hours: 3

Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3572: Argument and Advocacy

Critical analysis and production of argument emphasizing evidence, reasoning, and refutation.

Credit Hours: 3

Prerequisites: COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3575: Business and Professional Communication

Principles and practice of speech communication in business and professional settings. Emphasis on interviews, group conferences and personal presentations.

Credit Hours: 3

Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3580: Crisis Communication

The theory and practice of corporate and political communication responses to crisis situations.

Credit Hours: 3

Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3636: Contemporary Issues in Mass Communication
Introduction to current issues and trends and relationship among the new technologies, policies, and potential impact on society.

Credit Hours: 3

Prerequisites: sophomore standing and COMMUN 2100. May be restricted to Communication majors only during early registration

COMMUN 3701: Topics in Communication-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

Credit Hours: 3

Prerequisites: COMMUN 1200 and COMMUN 2100. May be restricted to Communication majors only during early registration

COMMUN 3703: Topics in Communication-Behavioral Sciences
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent, May be restricted to Communication majors only during early registration

COMMUN 3705: Topics in Communication-Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent. May be restricted to Communications majors only during early registration

COMMUN 3705H: Topics in Communication-Humanities - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent, departmental consent for repetition. May be restricted to Communications majors only during early registration. Honors eligibility required

COMMUN 4395: Professional Seminar in Television Production
Application of principles to advanced television production, direction.

Credit Hours: 3

Prerequisites: COMMUN 3390 and instructor's consent. May be restricted to Communication majors only during early registration

COMMUN 4412: Gender, Language, and Communication
(same as LINGST 4412 and ANTHRO 4412). Relationship among gender, language, nonverbal communication, and culture.

Credit Hours: 3

Prerequisites: junior standing or departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4415: Language and Discourse
(same as LINGST 4415). Analysis of the rules of social interaction and the functions of language in discourse.

Credit Hours: 3

Prerequisites: junior standing and departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4440: Ethical Issues in Communication
(same as PEA_ST 4440). Exploration and analysis of ethical dimensions intrinsic to human communication.

Credit Hours: 3

Prerequisites: junior standing or departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4473: Political Communication
Study of role and impact of communication in political campaigns; historical and contemporary study of influence by communication; case studies and practicum.

Credit Hours: 3

Prerequisites: junior standing or departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4474: Theory and Research in Persuasion
Studies the persuasive process, attitude formation, modification.

Credit Hours: 3

Prerequisites: junior standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 4476: Organizational Communication
Theories of communication systems and processes in organizational structures; study of communication behavior in formal and informal organizational settings.

Credit Hours: 3

Prerequisites: junior standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 4481: Principles of Rhetoric
Development of rhetoric from time of Corax with emphasis on Aristotle; derivation, application of standards for judging effectiveness in communication.

Credit Hours: 3

Prerequisites: COMMUN 1200, junior standing and departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4520: Family Communication
(same as H_D_FS 4680). Analysis of the functions and processes of communication within families.

Credit Hours: 3

Prerequisites: junior standing or departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4530: Health Communication

A general overview of the impact of communication on health, including doctor/patient communication and health campaigns. Graded on A-F basis only.

Credit Hours: 3

COMMUN 4618: Television Program Analysis and Criticism

Development of critical viewing skills including analysis of program conventions, genres, and television aesthetics.

Credit Hours: 3

Prerequisites: junior standing. May be restricted to Communication Majors only during early registration

COMMUN 4628: Children, Adolescents and the Media

Focus on social scientific research concerning the mass media in the lives of children and adolescents. The course centers on media effects literature and controversies relevant to child and adolescent media users. Course involves readings, lectures, discussions of theories, concepts, methods, and finding. We will also consider social implication and personal choices in media use. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: junior standing required

COMMUN 4638: New Technologies and Communication

Explores the social implications of new technologies designed for communication. Assumes basic computer knowledge.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent. May be restricted to Communication Majors only during early registration

COMMUN 4701: Topics in Communication-General

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent. May be restricted to Communication majors only during early registration

COMMUN 4703: Topics in Communication-Behavioral Science

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent. May be restricted to Communication majors only during early registration

COMMUN 4705: Topics in Communication-Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent. May be restricted to Communication majors only during early registration

COMMUN 4940: Internship

Directed professional experience within and outside the University in communication-related fields or organizations. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: Admission to department, junior standing, instructor's consent, 2.5 GPA

COMMUN 4950: Research Project

Student contributes to a research project with approved goals and a final written report. As part of the project, student will read articles in the communication research literature. Project can be independent or in conjunction with a faculty research project. Course may be repeated once for credit. Graded on A-F basis only

Credit Hour: 1-3

Prerequisites: COMMUN 3050; junior standing and instructor's consent. Approval by a faculty member who will serve as project supervisor

COMMUN 4960: Directed Reading

Independent reading, reports.

Credit Hour: 1-99

Prerequisites: junior standing or instructor's consent

COMMUN 4974: Senior Project

Integration and adaptation of communication theories to an applied communication problem. Required for all majors.

Credit Hours: 3

Prerequisites: admission to department, senior standing, and departmental consent

COMMUN 4975: Visual Literacy

Integration of theory and practice. The theoretical component of the class is grounded in the study of visual literacy and the practice component will focus on documentary filmmaking. May not be taken by graduate students. It is a capstone course for undergraduate students only.

Credit Hours: 3

Prerequisites: COMMUN 3390, senior standing; Admission to the department

COMMUN 4996H: Honors in Communication

Special work for Honors candidates in communication.

Credit Hour: 1-2

Prerequisites: instructor's consent. Honors eligibility required

COMMUN 4997: Honors in Communication

Special work for Honors candidates in communication.

Credit Hours: 2

COMMUN 4997H: Honors in Communication

Special work for Honors candidates in communication.

Credit Hour: 1-2

Prerequisites: instructor's consent. Honors eligibility required

COMMUN 7412: Gender, Language, and Communication

(same as LINGST 7412 and ANTHRO 7412). Relationship among gender, language, nonverbal communication, and culture.

Credit Hours: 3

COMMUN 7415: Language and Discourse

(same as LINGST 4415). Analysis of the rules of social interaction and the functions of language in discourse.

Credit Hours: 3

Prerequisites: departmental consent

COMMUN 7440: Ethical Issues in Communication

(same as PEA_ST 4440). Exploration and analysis of ethical dimensions intrinsic to human communication.

Credit Hours: 3

Prerequisites: graduate standing or departmental consent

COMMUN 7473: Political Communication

Study of role and impact of communication in political campaigns; historical and contemporary study of influence by communication; case studies and practicum.

Credit Hours: 3

Prerequisites: graduate standing or departmental consent

COMMUN 7474: Theory and Research in Persuasion

Studies the persuasive process, attitude formation, modification.

Credit Hours: 3

Prerequisites: COMMUN 3576 and departmental consent

COMMUN 7476: Organizational Communication

Theories of communication systems and processes in organizational structures; study of communication behavior in formal and informal organizational settings.

Credit Hours: 3

Prerequisites: COMMUN 3571 or departmental consent

COMMUN 7481: Principles of Rhetoric

Development of rhetoric from time of Corax with emphasis on Aristotle; derivation, application of standards for judging effectiveness in communication.

Credit Hours: 3

Prerequisites: COMMUN 1200, and departmental consent

COMMUN 7520: Family Communication

(same as H_D_FS 7680). Analysis of the functions and processes of communication within families.

Credit Hours: 3

COMMUN 7530: Health Communication

A general overview of the impact of communication on health, including doctor/patient communication and health campaigns. Graded on A-F basis only.

Credit Hours: 3

COMMUN 7618: Television Program Analysis and Criticism

Development of critical viewing skills including analysis of program conventions, genres, and television aesthetics.

Credit Hours: 3

Prerequisites: instructor's consent

COMMUN 7638: New Technologies and Communication

Explores the social implications of new technologies designed for communication. Assumes basic computer knowledge.

Credit Hours: 3

COMMUN 8001: Topics in Communication-General

Study of selected topics in Communication. Topic and credit may vary semester to semester. Repeatable upon consent of department.

Credit Hours: 3

Prerequisites: instructor's consent

COMMUN 8085: Problems

Individual study not leading to thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent

COMMUN 8090: Master's Thesis Research in Communication

Research leading to thesis or dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

COMMUN 8110: Introduction to Graduate Study in Communication

Orientation to the field. Introduction to research methods. Production of research proposal. Emphasizes scholarly style of writing.

Credit Hours: 3

COMMUN 8120: Seminar in Quantitative Methods in Communication

Quantitative methods of speech research.

Credit Hours: 3

COMMUN 8130: Topics in Qualitative Research Methods

Examination of assumptions and techniques of qualitative methods adopting an interpretive framework for analyzing communication phenomena. May be repeated for credit.

Credit Hours: 3

COMMUN 8140: Content Analysis

Methods of Content Analysis; including consideration of reliability, validity Computer content analysis, codebooks.

Credit Hours: 3

COMMUN 8150: Seminar in Media Criticism

Examination and application of various critical methodologies to media texts.

Credit Hours: 3

COMMUN 8160: Rhetorical Criticism

Principles, practice criticism (description, analysis, evaluation) of rhetorical artifacts.

Credit Hours: 3

COMMUN 8170: Seminar in Quantitative Methods in Communication II

The focus of this course will be the study and practice of various multivariate statistical methods commonly used in communication research. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: COMMUN 8120; instructor's consent required

COMMUN 8310: Seminar in Interpersonal Communication

Examines theory and research concerning face-to-face dyadic interactions. Emphasis on context of interpersonal communication events and processes of interactional management.

Credit Hours: 3

COMMUN 8410: Seminar in Organizational Communication Theory

Exploration of the theoretical foundations of interpersonal communication in the organization, groups and team development, leadership, organizational decision making, motivation and power, bureaucracy, new information technologies, organizational effectiveness and the change process.

Credit Hours: 3

COMMUN 8420: Seminar in Small Group Communication

Identifies and analyzes theories and variables which explain, predict, and/or influence small group communication.

Credit Hours: 3

COMMUN 8510: Seminar in Mass Communication Theory

This course will offer graduate students a broad overview of extant theories employed in the study of mass communication and mass media effects. The class will focus on theories of society, theories of media, and the relationships between mass communication and culture. It will also focus on theories of media structures, media organizations, media content, audiences, and media effects.

Credit Hours: 3

COMMUN 8610: Survey of Political Communication

Survey of theory and research on political communication; emphasis on messages and audience responses to messages.

Credit Hours: 3

COMMUN 9050: Research

Completes comprehensive exams and writes a literature review.

Credit Hour: 1-9

COMMUN 9090: Doctoral Dissertation Research in Communication

Research leading to thesis or dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

COMMUN 9170: Research Practicum

Student conducts research under close supervision of faculty mentor. Goal: produce research report suitable for submission as convention paper, article, or book chapter. May be repeated once for credit.

Credit Hours: 3

Prerequisites: consent of mentor required; for advanced graduate students

COMMUN 9280: Seminar in Communication Theory

Examines the nature of theory, the assumptions underlying theoretical approaches to communication, and surveys themes in contemporary communication theories.

Credit Hours: 3

COMMUN 9310: Seminar in Family Communication

Examines research and theory of family communication; focus on family communication patterns and processes, emphasis on key conceptual, methodological and theoretical aspects of family communication scholarship and research on family forms, processes and outcomes. Graded on A-F basis only.

Credit Hours: 3

COMMUN 9330: Topics in Interpersonal Communication

The course will review theory and research on topics related to the study of communication and interpersonal relationships. Subjects will rotate and include areas such as relational conflict, gender communication, nonverbal communication, intercultural communication, or interpersonal violence and communication.

Credit Hours: 3

Prerequisites: instructor's consent

COMMUN 9430: Topics in Organizational Communication

Examination of theory and research in selected areas of organizational communication. Topics vary by semester. Topics may include socialization, power, gender, emotions, and others. May be repeated for credit.

Credit Hours: 3

COMMUN 9460: Topics in Political Communication

Examination of theory and research in selected areas of political communication. Topics vary by semester. Topics may include political polarization, political socialization, politics and the media, political advertising, politics and new media.

Credit Hours: 3

COMMUN 9520: Seminar in Mass Media Effects

Explores current research in the processes and effects of mass communication. Readings pertain to the current social and psychological effects of media on viewers.

Credit Hours: 3

COMMUN 9530: Topics in Mass Communication

Examination of theory and research in selected areas of media communication. Topics vary by semester. May be repeated for credit.

Credit Hours: 3

COMMUN 9610: Seminar in Disaster, Crisis, and Risk

This course examines several lines of research from multiple disciplines that influence communication during disasters, crises, and emergencies. The course takes a phased approach to disasters, covers Federal government paradigms for disaster communication; crisis communication from an organizational and public relations perspective, risk perception, role of social media and emerging technologies in disasters, media coverage of disasters, and communication and recovery, resilience, and growth.

Credit Hours: 3

COMMUN 9620: Political Campaign Debates

Theory and research on political campaign debates applied to analyses of candidate debates. Focus on primary and general presidential debates.

Credit Hours: 3

COMMUN 9630: Political Advertising

Theory and research on political advertising applied to analyses of candidate advertisements. Focus on primary and general presidential television spots and web pages.

Credit Hours: 3

COMMUN 9720: Seminar in Theories of Rhetoric and Criticism

Directed research on selected topics in rhetorical theory and criticism.

Credit Hour: 1-6

Prerequisites: instructor's consent

Communication Science And Disorders (C_S_D)

C_S_D 1000: Introduction to Communication Science and Disorders

Nature of communication and its development; types of speech, language and hearing disorders; professional preparation, settings, and work of speech-language pathologists and audiologists. Course graded on S/U basis only.

Credit Hour: 1

C_S_D 1050: Signed English

Introduction to the English-based sign system, Signed English, a system that has been developed to bridge the gap between English and American Sign Language. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Communication, Science and Disorder majors only during Early Registration

C_S_D 1060: Human Language

(same as ANTHRO 1060, LINGST 1060 and ENGLSH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data with some attention to application of linguistic study to other disciplines.

Credit Hours: 3

C_S_D 1100: American Sign Language I

Introduction to American Sign Language (ASL). Development of basic expressive and receptive skills in ASL, the manual alphabet, numbers, and signed vocabulary. Includes an overview of ASL syntax and grammar. Course graded on A-F basis only.

Credit Hours: 5

C_S_D 1200: American Sign Language II

This course is designed to increase students' understanding of American Sign Language. Students will increase their sign vocabulary, expressive and receptive skills, an understanding of ASL syntax and grammar. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: C_S_D 1100 or equivalent

C_S_D 2120: Survey of Communication Disorders

Systematic survey of the disorders of speech, language and hearing.

Credit Hours: 3

C_S_D 2150: American Sign Language III

This course expands on vocabulary and signing skills developed in ASL II. Includes review of ASL grammar and extensive discussions of ASL linguistic structure and Deaf culture. Class is conducted entirely in ASL. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: C_S_D 1200 with minimum grade of C or instructor's consent

C_S_D 3010: American Phonetics

(same as LINGST 3010). Analysis of production and acoustics of the sounds of speech with an emphasis on American English; practice in broad and narrow transcription using the International Phonetic Alphabet.

Credit Hours: 3

Prerequisites: Restricted to Communication Science and Disorders majors only

C_S_D 3020: Normal Language Development

(same as PSYCH 3810). Language development in children and changes in language processing during normal aging. Cognition and language; language learning processes; language sample analysis; relationship between spoken and written language.

Credit Hours: 3

Prerequisites: PSYCH 2410 or PSYCH 3140, or LINGST 4600

C_S_D 3210: Anatomy and Physiology of the Speech Mechanism

(same as LINGST 3210). Introduction to anatomical and functional aspects of the speech mechanism.

Credit Hours: 3

Prerequisites: Communication Science and Disorders majors only or instructor's consent

C_S_D 3220: Speech Acoustics

(same as LINGST 3220). An introduction to the acoustic aspects of speech as they relate to the respiratory, phonatory, resonatory, and articulatory systems.

Credit Hours: 2

Prerequisites: Communication Science and Disorders majors only or instructor's consent

C_S_D 3230: Hearing Science

Introduction to the nature of sound and its measurement; anatomy and physiology of the auditory and vestibular systems; psychoacoustic methods and phenomena.

Credit Hours: 3

C_S_D 4001: Topics in Communication Science and Disorders

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated with program consent.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent

C_S_D 4020: Language Disorders in Children

Overview of language disorders from early childhood through adolescence. Includes language disorders as primary disability and as secondary to other disabilities. Introduction to assessment and intervention.

Credit Hours: 3

Prerequisites: C_S_D 3020. Communication Science and Disorder majors only

C_S_D 4030: Language Disorders of Adults

Introduction to acquired adult language disorders. Review of neuroanatomy/physiology, etiology and symptomatology, with introduction to assessment and treatment procedures.

Credit Hours: 2

Prerequisites: C_S_D 4430 or instructor's consent

C_S_D 4050: Clinical Applications of Sign Language

This course covers research, theory, and methods of using sign language to assist the communication of the Deaf, individuals with disabilities, and hearing learners. Use of sign language to improve literacy and classroom management will also be targeted. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: C_S_D 1050 and C_S_D 1100 or equivalent. Instructor's consent required

C_S_D 4200: Professional Voice

Voice production, common voice problems and their causes; healthy vocal habits and techniques to achieve optimal voice. Communication Science and Disorders students may not take for graduate credit.

Credit Hours: 2

C_S_D 4210: Fluency Disorders

Introduction to the nature, assessment, and treatment of fluency disorders. Emphasis on developmental stuttering.

Credit Hours: 2

Prerequisites: C_S_D 2120 and C_S_D 3210

C_S_D 4220: Voice Disorders

Introduction to voice disorders in children and adults. Includes overview of perceptual and instrumental assessment procedures and selected treatment approaches.

Credit Hour: 1

Prerequisites: C_S_D 2120, C_S_D 3010, C_S_D 3210, C_S_D 4430

C_S_D 4320: Disorders of Phonology and Articulation

Overview of disorders of use and production of speech sounds with an emphasis on developmental disorders. Introduction to assessment and treatment.

Credit Hours: 3

Prerequisites: C_S_D 2120, C_S_D 3010, C_S_D 3020, C_S_D 3210. Communication Science and Disorders majors only

C_S_D 4330: Introduction to Audiology

Principles and techniques of audiological testing; etiologies of hearing impairment; current technologies in rehabilitation.

Credit Hours: 3

Prerequisites: C_S_D 3230; Communication Science and Disorders majors only or instructor's consent

C_S_D 4340: Aural Rehabilitation

Identification, evaluation, and management of problems associated with hearing impairment in both children and adults. Includes issues related to speech/language development, communication, education, and social factors.

Credit Hours: 3

Prerequisites: C_S_D 3230 and C_S_D 4330

C_S_D 4430: Neurophysiology for Speech, Language, and Hearing

Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.

Credit Hours: 3

Prerequisites: Communications Science and Disorders majors only or instructor's consent

C_S_D 4810: Psycholinguistics

(same as LINGST 4810). Examination of the knowledge and processes that underlie the human ability to produce and understand language.

Credit Hours: 3

Prerequisites: instructor's consent

C_S_D 4820: Speech Perception

(same as LINGST 4820). Selected topics in the perceptual processing of speech sounds and spoken language.

Credit Hours: 3

Prerequisites: instructor's consent

C_S_D 4830: Individual Differences in Language Processing

Examination of the normal variations exhibited across individuals in the acquisition, use, and representation of language. Also considered are individual differences seen in second language learning, the aging process, and language disorders.

Credit Hours: 2

Prerequisites: instructor's consent

C_S_D 4840: Language and Development in Infancy

Overview of theory and research on the foundations and development of language in infancy (0 to 2 years), with an emphasis on relevant, interrelated areas of development, individual differences, early recognition of delay, and assessment.

Credit Hours: 3

Prerequisites: senior standing required. Instructor's consent required

C_S_D 4900: Clinical Observation in Communication Disorders

Directed clinical observations designed to prepare the student for clinical practicum. Required for professional certification. Graded on a S/U basis only.

Credit Hours: 2

Prerequisites: senior standing and departmental consent. Communication Science and Disorders majors only

C_S_D 4945: Clinical Apprenticeship in Communication Disorders

Supervised observation and clinical experience in speech-language pathology for undergraduates.

Credit Hour: 1-3

Prerequisites: senior standing and departmental consent. Communication Science and Disorders majors only

C_S_D 4950: Research Apprenticeship

Research apprenticeship with a faculty member, assisting in the development and execution of research in communication processes and disorders. May be repeated to 6 hrs. maximum.

Credit Hour: 1-99

Prerequisites: instructor's consent

C_S_D 4960: Directed Reading in Communication Science and Disorders

Independent reading; reports.

Credit Hour: 1-3

Prerequisites: instructor's consent

C_S_D 4990: Honors Thesis

Individual honors thesis on a topic selected with a faculty advisor. Requires planning, conducting, and writing up a research project under the guidance of a faculty member. Successful completion of thesis and maintenance of 3.3 GPA, leads to degree with departmental honors. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Senior standing; 3.3 GPA; 3.5 GPA in Communication Science and Disorders courses; instructor's consent. Restricted to Communication Science and Disorders students only

C_S_D 7001: Topics in Communication Science and Disorders

Study of selected topics in speech pathology/audiology. Topic and credit may vary from semester to semester. May be repeated for credit with instructor and departmental consent.

Credit Hour: 1-99

Prerequisites: instructor's consent

C_S_D 7050: Clinical Applications of Sign Language

This course covers research, theory, and methods of using sign language to assist the communication of the Deaf, individuals with disabilities, and hearing learners. Use of sign language to improve literacy and classroom management will also be targeted. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: C_S_D 1050 and C_S_D 1100 or equivalent. Instructor's consent required

C_S_D 7085: Problems in Communication Science and Disorders

Individual study not leading to thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent

C_S_D 7200: Professional Voice

Voice production, common voice problems and their causes; healthy vocal habits and techniques to achieve optimal voice. Communication Science Disorder students may not take for graduate credit.

Credit Hours: 2

C_S_D 7340: Aural Rehabilitation

Identification, evaluation, and management of problems associated with hearing impairment in both children and adults. Includes issues related to speech/language development, communication, education, and social factors.

Credit Hours: 3

Prerequisites: C_S_D 3230 and C_S_D 4330

C_S_D 7430: Neurophysiology for Speech, Language, and Hearing

Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.

Credit Hours: 3

Prerequisites: Communication Science and Disorders majors or instructor's consent

C_S_D 7810: Psycholinguistics

(same as LINGST 7810). Examination of the knowledge and processes that underlie the human ability to produce and understand language.

Credit Hours: 3

Prerequisites: instructor's consent

C_S_D 7820: Speech Perception

(same as LINGST 7820). Selected topics in the perceptual processing of speech sounds and spoken language.

Credit Hours: 3

Prerequisites: instructor's consent

C_S_D 7830: Individual Differences in Language Processing

Examination of the normal variations exhibited across individuals in the acquisition, use, and representation of language. Also considered are individual differences seen in second language learning, the aging process, and language disorders.

Credit Hours: 2

Prerequisites: instructor's consent

C_S_D 7840: Language and Development in Infancy

Overview of theory and research on the foundations and development of language in infancy (0 to 2 years), with an emphasis on relevant, interrelated areas of development, individual differences, early recognition of delay, and assessment.

Credit Hours: 3

C_S_D 8001: Topics in Communication Science and Disorders

Study of selected topics in speech pathology/audiology. Topic and credit may vary from semester to semester. May be repeated for credit with instructor and departmental consent.

Credit Hour: 1-99

Prerequisites: instructor's consent, instructor's

C_S_D 8020: Developmental Language Disorders

Nature, etiology, assessment and management of childhood language disorders.

Credit Hours: 3

Prerequisites: C_S_D 3020, C_S_D 4020 and LINGST 7600 or equivalent, or instructor's consent

C_S_D 8030: Acquired Language Disorders

Etiology, symptomatology, assessment and rehabilitation of acquired neurogenic communication disorders in aphasia, traumatic brain injury, dementia, and right-hemisphere syndrome.

Credit Hours: 3

Prerequisites: C_S_D 4030 and C_S_D 4430, or instructor's consent

C_S_D 8050: Research in Communication Science and Disorders

Independent research leading to a report but not to a thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent

C_S_D 8085: Problems in Communication Science and Disorders

Individual study not leading to thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent

C_S_D 8087: Seminar: Contemporary Topics in Speech-Language Pathology

Advanced study involving critical literature review and research on selected topics in speech and language. May be repeated for up to 6 credits.

Credit Hour: 1-3

Prerequisites: instructor's consent

C_S_D 8090: Research in Communication Science and Disorders

Research leading to thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent. Graded on a S/U basis only

C_S_D 8150: Advanced Speech Science

Advanced exploration of the physiology of speech production and the corresponding acoustic characteristics of speech. Includes experience with pertinent laboratory instrumentation.

Credit Hours: 2

Prerequisites: C_S_D 3210 and C_S_D 3220

C_S_D 8200: Motor Speech Disorders

Review of neuroanatomic mechanisms underlying speech production; etiology, symptomatology, epidemiology, and prognosis of motor speech disorders resulting from acquired neurological damage. Emphasis on clinical assessment and rehabilitation procedures.

Credit Hours: 3

Prerequisites: instructor's consent

C_S_D 8210: Disorders of Fluency

Identification and remediation of fluency disorders in children and adults.

Credit Hours: 3

Prerequisites: C_S_D 3210, C_S_D 4210, C_S_D 4430, or equivalent or instructor's consent

C_S_D 8220: Disorders of Voice

Diagnosis and management of communicative disorders resulting from pathologies or abnormalities of the craniofacial structures and from pathologies or misuse of the phonatory systems.

Credit Hours: 2

Prerequisites: C_S_D 3210, C_S_D 4320 and C_S_D 4210 or instructor's consent

C_S_D 8225: Voice Science and Voice Disorders

Diagnosis and management of communicative disorders resulting from pathologies or misuse of the phonatory system. Includes experience with pertinent laboratory instrumentation. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: restricted to MHS CSD students; or with instructor's consent

C_S_D 8230: Dysphagia

Etiology, symptomatology, and epidemiology of acquired and developmental swallowing disorders (dysphagia). Emphasis on

instrumental and non-instrumental methods for assessing and treating dysphagia.

Credit Hours: 3

Prerequisites: C_S_D 3210, C_S_D 4220, C_S_D 8200; or instructor's consent

C_S_D 8240: Orofacial Anomalies

Nature, causes, diagnosis, and treatment of disorders of communication associated with congenital orofacial anomalies. Emphasis on cleft palate.

Credit Hour: 1

Prerequisites: C_S_D 3210, C_S_D 4320

C_S_D 8250: Clinical Methods in Speech-Language Pathology

An introduction to clinical procedures and evidence-based intervention methods relating to speech and language disorders. Topics include session design, data collection, measurement of progress, reporting of clinical results, and various treatment options. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: departmental consent

C_S_D 8260: Diagnosis in Speech-Language Pathology

General principles of diagnosis; specific diagnostic tools and procedures for various speech and language disorders.

Credit Hours: 3

Prerequisites: departmental consent

C_S_D 8320: Speech Sound Disorders

Principles of clinical assessment and treatment for speech sound disorders in children. Includes foundations in research on early speech sound acquisition, organic and developmental disorders, and treatment efficacy. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: C_S_D 3010 or equivalent or permission of instructor; departmental consent

C_S_D 8420: Reading and Language Disabilities in School-Age Children

Theories, research, and practice in reading development and disorders. Assessment and remediation of reading disabilities related to language disorders of various etiologies including developmental language disorders and head injury.

Credit Hours: 2

Prerequisites: C_S_D 4020 or C_S_D 8020

C_S_D 8430: Introduction to Augmentative and Alternative Communication

Students will learn the principles of AAC assessment, methods of intervention, and types of technology available for individuals unable to communicate fully through speech. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Motor Speech Disorders; Language Disorders in Children; Acquired Language Disorders; C_S_D 8020 and C_S_D 8030

C_S_D 8500: Issues in Professional Practice

Organizational, inter-professional, economic, legal, and ethical aspects of delivering speech, language, and hearing services. Graded on A/F basis only.

Credit Hours: 2

Prerequisites: departmental consent

C_S_D 8600: Clinical Language Analysis

This course provides a theoretical framework for understanding the morphology, semantics, syntax, and pragmatics of English as well as practice in the analysis of typical and atypical language samples. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: departmental consent required

C_S_D 8935: Clinical Practice in Audiology

Supervised practice in hearing screening, hearing conservation, and aural re/habilitation. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1

C_S_D 8945: Clinical Practice in Speech-Language Pathology

Supervised clinical practice in speech pathology for graduate students. May be repeated for credit.

Credit Hour: 1-10

Prerequisites: C_S_D 4945 or equivalent

C_S_D 8960: Directed Reading in Communication Science and Disorders

Independent reading; reports.

Credit Hour: 1-3

Prerequisites: instructor's consent

C_S_D 9050: Research in Communication Science and Disorders

Independent research leading to a report but not to a thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent

C_S_D 9087: Seminar: Contemporary Topics in Speech-Language Pathology

Advanced study involving critical literature review and research on selected topics in speech and language. May be repeated for up to 6 credits.

Credit Hour: 1-3

Prerequisites: instructor's consent

C_S_D 9090: Research in Communication Science and Disorders

Research leading to thesis or dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

Computer Science (CMP_SC)

CMP_SC 1000: Introduction to Computer Science

This course introduces the Computer Science field, including the history of computers, career opportunities, and ethical/social issues. There will be lectures given by MU Computer Science faculty to discuss exciting fields as well as career advisement given by Computer Science industry representatives.

Credit Hour: 1

Prerequisites: Restricted to freshman/sophomore Computer Science/ Information Technology majors

CMP_SC 1001: Topics in Computer Science

Topic and credit may vary from semester to semester. May be repeated upon consent of department.

Credit Hour: 1-99

CMP_SC 1050: Algorithm Design and Programming I

This course provides experience in developing algorithms, designing, implementing programs. Topics include syntax/semantics, flow control, loops, recursion, I/O, arrays, strings and pointers. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: MATH 1100 or MATH 1160 or MATH 1500 (C- or better). May be restricted to Engineering majors only

CMP_SC 2001: Topics in Computer Science

Topic and credit may vary from semester to semester. May be repeated upon consent of department.

Credit Hour: 1-99

Prerequisites: departmental consent

CMP_SC 2050: Algorithm Design and Programming II

A study of fundamental techniques and algorithms for representing and manipulating data structures. Topics include data abstraction, recursion, stacks, queues, linked lists, trees, efficient methods of sorting and searching, and Big-O analysis.

Credit Hours: 3

Prerequisites: CMP_SC 1050. May be restricted to Engineering majors only

CMP_SC 2111: Production Languages

The study of the syntax, semantics, and applications of one programming language suitable for large scale scientific or commercial projects, such as FORTRAN, COBOL, PL/1, C, or ADA. May be taken more than once for credit.

Credit Hour: 1-3

Prerequisites: CMP_SC 2050

CMP_SC 2270: Introduction to Digital Logic

Basic tools, methods and procedures to design combinational and sequential digital circuits and systems, including number systems, boolean algebra, logic minimization, adder design, memory elements, and finite state machine design.

Credit Hours: 3

Prerequisites: CMP_SC 1050

CMP_SC 2830: Introduction to the Internet, WWW and Multimedia Systems

This course will attempt to provide a comprehensive understanding of the evolution, the technologies, and the tools of the Internet. In particular, issues pertaining to the World Wide Web and Multimedia (HTML, CGI, Web based applications) will be discussed in detail.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 3001: Topics in Computer Science

Current and new technical developments in computer science. May be repeated for 6 hours credit.

Credit Hour: 1-99

Prerequisites: departmental consent. For juniors and seniors

CMP_SC 3050: Advanced Algorithm Design

This class surveys fundamental algorithms and data structures that have wide practical applicability, including search trees and graph algorithms. Emphasis is placed on techniques for efficient implementation and good software development methodologies.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 3280: Computer Organization and Assembly Language

Introduces computer architectures, programming concepts including parameter passing, I/O, interrupt handling, DMA, memory systems, cache, and virtual memory. Graded of A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 2270 or ECE 1210

CMP_SC 3330: Object Oriented Programming

This course focuses on object-oriented programming concepts: abstraction, polymorphism, encapsulation, inheritance, interfaces, abstract classes, files, streams, and object serialization. Topics such as GUI and event-driven programming are also tackled.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 3380: Database Applications and Information Systems

Covers fundamental topics of database management systems (DBMS) and database-enabled applications. Topics include a brief history of secondary storage and databases, data modeling, introductory SQL, an overview of current database trends, and current popular database systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 3530: UNIX Operating System

Introduction to the UNIX operating system and its interfaces including the file system, shell, editors, pipes and filters, input/output system, shell programming, program development including C, and document preparation.

Credit Hours: 3

Recommended: Advanced C programming experience

CMP_SC 3940: Internship in Computer Science

Computer-related experience in business or industry jointly supervised by faculty and computer professionals. Students should apply one semester in advance for consent of the supervising professor. Graded on a S/U basis only.

Credit Hour: 1-3

Prerequisites: CMP_SC 2050

CMP_SC 4001: Topics in Computer Science

Topic and credit may vary from semester to semester. May be repeated upon consent of department.

Credit Hour: 1-99

CMP_SC 4050: Design and Analysis of Algorithms I

(cross-leveled with CMP_SC 7050). This course reviews and extends earlier work with linked structures, sorting and searching algorithms, and recursion. Graph algorithms, string matching, combinatorial search, geometrical algorithms and related topics are also studied.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and MATH 2320

CMP_SC 4060: String Algorithms

(cross-leveled with CMP_SC 7060). This course provides an introduction to algorithms that efficiently compute patterns in strings. Topics covered include basic properties of strings, data structures for processing strings, string decomposition, exact and approximate string matching algorithms. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4050

CMP_SC 4070: Numerical Methods for Science and Engineering

(cross-leveled with CMP_SC 7070). Introduces basic numerical methods widely used by computer scientists/engineers. Students will use the MATLAB platform to computationally solve problems, such as finding roots of nonlinear equations, solving systems of equations, fitting curves, solving ODEs, finding eigenvalues, etc. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 2050, junior standing or instructor's consent

CMP_SC 4080: Parallel Programming for High Performance Computing

(cross-leveled with CMP_SC 7080) This course will provide in-depth treatment of the evolution high performance computing architectures and parallel programming techniques for those architectures. We will cover topics such as: multi-process and multi-threaded programming; multi-node system architectures (clusters, grids, and clouds) and distributed programming; and general purpose GPU programming. To reinforce lecture topics, programming projects will be completed using multi-process and multi-threaded techniques for modern multicore, multiprocessor workstations; parallel and distributed programming techniques for modern multi-node systems; and general purpose GPU programming. Parallel algorithms will be investigated, selected,

and then developed for various scientific data processing problems. Programming projects will be completed using C and C++ APIs and language extensions, e.g. threads (pthreads, Boost/C++), TBB, CILK, OpenMP, OpenMPI, CUDA and OpenCL.

Credit Hours: 3

Prerequisites: CMP_SC 3280 or ECE 3210 and CMP_SC 3050 or ECE 3220

CMP_SC 4085: Problems in Computer Science

Independent investigation or project in Computer Science. May be repeated to up 6 hours.

Credit Hour: 1-6

Prerequisites: senior standing in Computer Science

CMP_SC 4270: Computer Architecture I

Architectural features of high-performance computer systems including hierarchical and virtual memory, pipelining, vector processing and an introduction to multiple-processor systems.

Credit Hours: 3

Prerequisites: CMP_SC 2270

CMP_SC 4280: Network Systems Architecture

(same as ECE 4280; cross-leveled with CMP_SC 7280), The course covers network systems (interconnects and switch fabrics, network considerations) and relevant networking applications at the network, transport and application layer. Prerequisites: ECE 3210 or CMP_SC 3280 and ECE 3220 or CMP_SC 2050

Credit Hours: 4

CMP_SC 4320: Software Engineering I

(cross-leveled with CMP_SC 7320). Overview of software life cycle, including topics in systems analysis and requirements specification, design, implementation testing and maintenance. Uses modeling techniques, project management, peer review, quality assurance, and system acquisition.

Credit Hours: 3

Prerequisites: CMP_SC 3380

CMP_SC 4330: Object Oriented Design I

(cross-leveled with CMP_SC 7330). Building on a prior knowledge of program design and data structures, this course covers object-oriented design, including classes, objects, inheritance, polymorphism, and information hiding. Students will apply techniques using a modern object-oriented implementation language.

Credit Hours: 3

Prerequisites: CMP_SC 3330

CMP_SC 4350: Big Data Analytics

(cross-leveled with CMP_SC 7350). Big Data Analytics represents a new era of computing, where data in any format maybe processed and exploited to extract insights for industries and organizations to make informed decisions, whether that data is in-place, in-motion or at-rest, in large volume, structured or unstructured. More and more companies are embracing open source Big Data technologies, such as Hadoop and extending it into an enterprise ready Big Data Platform. This course

will cover advanced analytics technologies and techniques that enable industries to extract insights from data with sophistication, speed and accuracy. You will learn practical industry best practices to bridge the gap between classroom learning and real world; and have access to cloud services for labs/projects.

Credit Hours: 3

Prerequisites: CMP_SC 3330 and CMP_SC 3380

CMP_SC 4380: Database Management Systems I

(cross-leveled with CMP_SC 7380). Fundamental concepts of current database systems with emphasis on the relational model. Topics include entity-relationship model, relational algebra, query by example, indexing, query optimization, normal forms, crash recovery, web-based database access, and case studies. Project work involves a modern DBMS, such as Oracle, using SQL.

Credit Hours: 3

Prerequisites: CMP_SC 3380

CMP_SC 4410: Theory of Computation I

(cross-leveled with CMP_SC 7410). An introductory study of computation and formal languages by means of automata and related grammars. The theory and applications of finite automata, regular expressions, context free grammars, pushdown automata and Turing machines are examined. May not be counted toward Computer Science MS/PHD.

Credit Hours: 3

Prerequisites: MATH 2320

CMP_SC 4430: Compilers I

(cross-leveled with CMP_SC 7430). Introduction to the translation of programming languages by means of interpreters and compilers. Lexical analysis, syntax specification, parsing, error-recovery, syntax-directed translation, semantic analysis, symbol tables for block structured languages, and run-time storage organization. May not be counted toward Computer Science MS/PHD.

Credit Hours: 3

Prerequisites: MATH 2320, CMP_SC 3280 and CMP_SC 4450

CMP_SC 4440: Malware Analysis and Defense

(cross-leveled with CMP_SC 7440). Malicious software or "malware" is a security threat. This course teaches students to understand the nature and types of viruses and how they are threats; teaches techniques used to prevent, detect, repair and defend against viruses and worms; teaches program binary examination tools to detect malicious code; and teaches ethical issues surrounding computer security violations.

Credit Hours: 3

Prerequisites: CMP_SC 3280 or ECE 3210 or equivalent

CMP_SC 4450: Principles of Programming Languages

(cross-leveled with CMP_SC 7450). An introduction to the structure, design and implementation of programming languages. Topics include syntax, semantics, data types, control structures, parameter passing, run-time structures, and functional and logic programming. May not be counted toward Computer Science MS/PHD.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 4460: Introduction to Cryptography

(cross-leveled with CMP_SC 7460). Cryptography is an important technique used to achieve security goals in an untrusted and possibly adversarial environment. The goals of this course are: (1) to provide students with a solid background with basic cryptographic techniques and their applications, (2) to impart knowledge of standard cryptographic algorithms and (3) to foster understanding of the correct use of cryptographic techniques.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and MATH 2320

CMP_SC 4520: Operating Systems I

(cross-leveled with CMP_SC 7520). Basic concepts, theories and implementation of modern operating systems including process and memory management, synchronization, CPU and disk scheduling, file systems, I/O systems, security and protection, and distributed operating systems.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and MATH 1700

CMP_SC 4530: Cloud Computing

(cross-leveled with CMP_SC 7530). This course covers principles that integrate computing theories and information technologies with the design, programming and application of distributed systems. The course topics will familiarize students with distributed system models and enabling technologies; virtual machines and virtualization of clusters, networks and data centers; cloud platform architecture with security over virtualized data centers; service-oriented architectures for distributed computing; and cloud programming and software environments. Additionally, students will learn how to conduct some parallel and distributed programming and performance evaluation experiments on applications within available cloud platforms. Finally we will survey research literature and latest technology trends that are shaping the future of high performance, distributed and cloud computing.

Credit Hours: 3

Prerequisites: CMP_SC 3330 or instructor's consent

CMP_SC 4610: Computer Graphics I

(cross-leveled with CMP_SC 7610). Basic concepts and techniques of interactive computer graphics including hardware, software, data structures, mathematical manipulation of graphical objects, the user interface, and fundamental implementation algorithms.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and MATH 1500 or MATH 1300 and MATH 1400

CMP_SC 4620: Physically Based Modeling and Animation

This course introduces students to physically based modeling and animation methodology for computer graphics and related fields such as computer vision, visualization, biomedical imaging and virtual reality. We will explore current research issues and will cover associated computational methods for simulating various visually interesting physical phenomena. This course should be appropriate for graduate students in all areas as well as advanced undergraduate students. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4610, good knowledge of C or C++ programming, no physics background necessary

CMP_SC 4650: Digital Image Processing

(same as ECE 4850; cross-leveled with CMP_SC 7650, ECE 7650). Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

Credit Hours: 3

Prerequisites: CMP_SC 2050, STAT 4710 or instructor's consent

CMP_SC 4670: Digital Image Compression

(same as ECE 4675; cross-leveled with CMP 7670, ECE 7675). Covers digital image formation, information theory concepts, and fundamental lossless and lossy image compression techniques including bit plane encoding, predictive coding, transform coding, block truncation coding, vector quantization, subband coding and hierarchical coding.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 4720: Introduction to Machine Learning and Pattern Recognition

(same as ECE 4720; cross-leveled with ECE 7720, ECE 7720) This course provides foundations and methods in machine learning and pattern recognition that address the problem of programming computers to optimize performance by learning from example data or expert knowledge. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 2050 and STAT 4710 or instructor consent

CMP_SC 4730: Building Intelligent Robots

(same as ECE 4340; cross-leveled with CMP_SC 7340, ECE 7340). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures.

Credit Hours: 4

Prerequisites: junior standing

Recommended: programming experience in one of the following programming languages - Basic, C, C++, or Java

CMP_SC 4740: Interdisciplinary Introduction to NLP

(same as LINGST 4740; cross-leveled with CMP_SC 7740; LINGST 7740). The goal of this course is to enable students to develop substantive NLP applications. Focus on current structural and statistical techniques for the parsing and interpretation of texts.

Credit Hours: 3

Prerequisites: senior standing

CMP_SC 4750: Artificial Intelligence I

(cross-leveled with CMP_SC 7750). Introduction to the concepts and theories of intelligent systems. Various approaches to creating intelligent systems, including symbolic and computational approaches, insight into the philosophical debates important to understanding AI.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and junior standing

CMP_SC 4770: Introduction to Computational Intelligence

(same as ECE 4870; cross-leveled with CMP_SC 7770, ECE 7870). Introduction to the concepts, models and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization.

Credit Hours: 3

CMP_SC 4830: Science and Engineering of the World Wide Web

(cross-leveled with CMP_SC 7830). This course will study the science and engineering of the World Wide Web. We will study the languages, protocols, services and tools that enable the web. Emphasis will be placed on basics and technologies.

Credit Hours: 3

Prerequisites: CMP_SC 2830

CMP_SC 4850: Computer Networks I

(cross-leveled with CMP_SC 7850). Introduction to concepts and terminology of data communications and computer networking. Basic protocols and standards, applications of networking, routing algorithms, congestion avoidance, long-haul and local networks.

Credit Hours: 3

Prerequisites: CMP_SC 2270 or ECE 1210 and MATH 2320

CMP_SC 4860: Network Security

(cross-leveled with CMP_SC 7860). Principles and practice of cryptography, network security, and computer system security. It includes symmetric and asymmetric cryptography, authentication, security applications such as secure email, IP security, Web security, and system security issues such as intruders, viruses, worms, Trojan horses, and firewalls. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4850

CMP_SC 4870: Wireless and Mobile Networks

(cross-leveled with CMP_SC 7870). Concepts and techniques in wireless and mobile networks: cellular concepts, wireless physical layer, wireless MAC protocol, mobility management, power management, wireless network security, wireless telecommunication system, wireless LAN, wireless ad hoc networking, wireless personal area network. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4850

CMP_SC 4970: Senior Capstone Design I

(cross-leveled with CMP_SC 7970). communication skills, and prototyping. Covers professional ethics, intellectual property/patenting, knowledge of engineering literature, safety, economic and environmental impact of technology. Essays, oral and written reports.

Credit Hours: 3

Prerequisites: CMP_SC 4320 and senior standing

CMP_SC 4980: Senior Capstone Design II

Course entails completion of CMP_SC 4970 design project. Design prototyping, testing, evaluation, presentation, and preparation of documentation.

Credit Hours: 3

Prerequisites: CMP_SC 4970

CMP_SC 4990: Undergraduate Research in Computer Science

Independent investigation or project in Computer Science. May be repeated to 6 hours.

Credit Hour: 0-6

Prerequisites: senior standing in Computer Science

CMP_SC 4995: Undergraduate Research in Computer Science - Honors

Independent investigation to be presented as an undergraduate honors thesis.

Credit Hour: 1-6

Prerequisites: honors student in Computer Science

CMP_SC 7001: Topics in Computer Science

Topic and credit may vary from semester to semester. May be repeated upon consent of department.

Credit Hour: 1-99

CMP_SC 7010: Computational Methods in Bioinformatics

(same as INFOINST 7010) Introduces the fundamental concepts and basic computational techniques for mainstream bioinformatics problems. Emphasis will be placed on the computational aspect of bioinformatics, including formulation of a biological problem in a computable problem, design of scoring functions and algorithms, confidence assessment of prediction results and software development.

Credit Hours: 3

Prerequisites: CMP_SC 4050 and STAT 4710

CMP_SC 7050: Design and Analysis of Algorithms I

(cross-leveled with CMP_SC 4050). This course reviews and extends earlier work with linked structures, sorting and searching algorithms, and recursion. Graph algorithms, string matching, combinatorial search, geometrical algorithms and related topics are also studied. Cannot be counted toward CS MS/PHD.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and MATH 2320

CMP_SC 7060: String Algorithms

(cross-leveled with CMP_SC 4060). This course provides an introduction to algorithms that efficiently compute patterns in strings. Topics covered include basic properties of strings, data structures for processing strings, string decomposition, exact and approximate string matching algorithms. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4050

CMP_SC 7070: Numerical Methods for Science and Engineering

(cross-leveled with CMP_SC 4070). Introduces basic numerical methods widely used by computer scientists/engineers. Students will use the MATLAB platform to computationally solve problems, such as finding roots of nonlinear equations, solving systems of equations, fitting curves, solving ODEs, finding eigenvalues, etc. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 2050 or instructor's consent

CMP_SC 7080: Parallel Programming for High Performance Computing

(cross-leveled with CMP_SC 4080). This course will provide in-depth treatment of the evolution high performance computing architectures and parallel programming techniques for those architectures. We will cover topics such as: multi-process and multi-threaded programming; multi-node system architectures (clusters, grids, and clouds) and distributed programming; and general purpose GPU programming. To reinforce lecture topics, programming projects will be completed using multi-process and multi-threaded techniques for modern multicore, multiprocessor workstations; parallel and distributed programming techniques for modern multi-node systems; and general purpose GPU programming. Parallel algorithms will be investigated, selected, and then developed for various scientific data processing problems. Programming projects will be completed using C and C++ APIs and language extensions, e.g. threads (pthreads, Boost/C++), TBB, CILK, OpenMP, OpenMPI, CUDA and OpenCL.

Credit Hours: 3

Prerequisites: CMP_SC 3280 or ECE 3210 and CMP_SC 3050 or ECE 3220

CMP_SC 7087: Seminar in Computer Science

Reviews of recent investigations, projects of major importance.

Credit Hour: 1

CMP_SC 7270: Computer Architecture I

(cross-leveled with CMP_SC 4270). Architectural features of high-performance computer systems including hierarchical and virtual memory, pipelining, vector processing and an introduction to multiple-processor systems.

Credit Hours: 3

Prerequisites: CMP_SC 3210 or CMP_SC 2270

CMP_SC 7280: Network Systems Architecture

(same as ECE 7280; Cross-leveled with CMP_SC 4280). The course covers network systems (interconnects and switch fabrics, network considerations) and relevant networking applications at the network, transport and application layer.

Credit Hours: 4

Prerequisites: ECE 3210 or CMP_SC 3280 and ECE 3220 or CMP_SC 2050

CMP_SC 7320: Software Engineering I

(cross-leveled with CMP_SC 4320). Overview of software life cycle, including topics in systems analysis and requirements specification, design, implementation testing and maintenance. Uses modeling

techniques, project management, peer review, quality assurance, and system acquisition. May not be counted toward CS MS/PHD.

Credit Hours: 3

Prerequisites: CMP_SC 3380

CMP_SC 7330: Object Oriented Design I

(cross-leveled with CMP_SC 4330). Building on a prior knowledge of program design and data structures, this course covers object-oriented design, including classes, objects, inheritance, polymorphism, and information hiding. Students will apply techniques using a modern object-oriented implementation language.

Credit Hours: 3

Prerequisites: CMP_SC 3330

CMP_SC 7350: Big Data Analytics

(cross-leveled with CMP_SC 4350). Big Data Analytics represents a new era of computing, where data in any format maybe processed and exploited to extract insights for industries and organizations to make informed decisions, whether that data is in-place, in-motion or at-rest, in large volume, structured or unstructured. More and more companies are embracing open source Big Data technologies, such as Hadoop and extending it into an enterprise ready Big Data Platform. This course will cover advanced analytics technologies and techniques that enable industries to extract insights from data with sophistication, speed and accuracy. You will learn practical industry best practices to bridge the gap between classroom learning and real world; and have access to cloud services for labs/projects.

Credit Hours: 3

Prerequisites: CMP_SC 3330 and CMP_SC 3380

CMP_SC 7380: Database Management Systems I

(cross-leveled with CMP_SC 4380). Fundamental concepts of current database systems with emphasis on the relational model. Topics include entity-relationship model, relational algebra, query by example, indexing, query optimization, normal forms, crash recovery, web-based database access, and case studies. Project work involves a modern DBMS, such as Oracle, using SQL.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 7410: Theory of Computation I

(cross-leveled with CMP_SC 4410). An introductory study of computation and formal languages by means of automata and related grammars. The theory and applications of finite automata, regular expressions, context free grammars, pushdown automata and Turing machines are examined. May not be counted toward CS MS/PHD.

Credit Hours: 3

Prerequisites: MATH 2320

CMP_SC 7430: Compilers I

(cross-leveled with CMP_SC 4430). Introduction to the translation of programming languages by means of interpreters and compilers. Lexical analysis, syntax specification, parsing, error-recovery, syntax-directed translation, semantic analysis, symbol tables for blockstructured languages, and run-time storage organization. May not be counted toward CS MS/PHD.

Credit Hours: 3

Prerequisites: MATH 2320 and CMP_SC 3280 and CMP_SC 4450

CMP_SC 7440: Malware Analysis and Defense

(cross-leveled with CMP_SC 4440). Malicious software or "malware" is a security threat. This course teaches students to understand the nature and types of viruses and how they are threats; teaches techniques used to prevent, detect, repair and defend against viruses and worms; teaches program binary examination tools to detect malicious code; and ethical issues surround computer security violations.

Credit Hours: 3

Prerequisites: CMP_SC 3280, ECE 3210 or equivalent

CMP_SC 7450: Principles of Programming Languages

(cross-leveled with CMP_SC 4450). An introduction to the structure, design and implementation of programming languages. Topics include syntax, semantics, data types, control structures, parameter passing, run-time structures, and functional and logic programming. May not be counted toward CS MS/PHD.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 7460: Introduction to Cryptography

(cross-leveled with CMP_SC 4460). Cryptography is an important technique used to achieve security goals in an untrusted and (possibly) adversarial environment. The goals of this course are: (1) to provide students with a solid back-ground with basic cryptographic techniques and their applications, (2) impart knowledge of standard cryptographic algorithms and (3) foster understanding of the correct use of cryptographic techniques.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and MATH 2320

CMP_SC 7520: Operating Systems I

(cross-leveled with CMP_SC 4520). Basic concepts, theories and implementation of modern operating systems including process and memory management, synchronization, CPU and disk scheduling, file systems, I/O systems, security and protection, and distributed operating systems. Cannot be counted toward CS MS/PHD.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and MATH 1700

CMP_SC 7530: Cloud Computing

(cross-leveled with CMP_SC 4530). This course covers principles that integrate computing theories and information technologies with the design, programming and application of distributed systems. The course topics will familiarize students with distributed system models and enabling technologies; virtual machines and virtualization of clusters, networks and data centers; cloud platform architecture with security over virtualized data centers; service-oriented architectures for distributed computing; and cloud programming and software environments. Additionally, students will learn how to conduct some parallel and distributed programming and performance evaluation experiments on applications within available cloud platforms. Finally we will survey research literature and latest technology trends that are shaping the future of high performance, distributed and cloud computing.

Credit Hours: 3

Prerequisites: CMP_SC 3330 or instructor's consent

CMP_SC 7610: Computer Graphics I

(cross-leveled with CMP_SC 4610). Basic concepts and techniques of interactive computer graphics including hardware, software, data structures, mathematical manipulation of graphical objects, the user interface, and fundamental implementation algorithms.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and either MATH 1500 or MATH 1300 and MATH 1400

CMP_SC 7620: Physically Based Modeling and Animation

(cross-leveled with CMP_SC 4620). Introduces fundamental algorithms and techniques including interpolation, quaternions, rigid body dynamics, kinematics, particle systems, free form and dynamic deformations, spring and damper systems and computational natural phenomena simulation.

Credit Hours: 3

Prerequisites: CMP_SC 4610 or CMP_SC 7610, C/C++ programming, linear algebra

CMP_SC 7650: Digital Image Processing

(same as ECE 7655; cross-leveled with CMP_SC 4650, ECE 4655). Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

Credit Hours: 3

Prerequisites: CMP_SC 2050, STAT 7710 or instructor's consent

CMP_SC 7670: Digital Image Compression

(same as ECE 7675; cross-leveled with CMP_SC 4670, ECE 4675). Covers digital image formation, information theory concepts, and fundamental lossless and lossy image compression techniques including bit plane encoding, predictive coding, transform coding, block truncation coding, vector quantization, subband coding and hierarchical coding.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 7720: Introduction to Machine Learning and Pattern Recognition

(same as ECE 7720; cross-level CMP 4720, ECE 4720). This course provides foundation knowledge and methods in machine learning and pattern recognition that address the problem of programming computers to optimize performance by learning from example data or expert knowledge. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 2050 and STAT 4710 or instructor's consent

CMP_SC 7730: Building Intelligent Robots

(same as ECE 7340; cross-leveled with CMP_SC 4730, ECE 4730). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures. Prerequisites: programming experience in one of the following programming languages: Basic, C, C++, or Java.

Credit Hours: 4

CMP_SC 7740: Interdisciplinary Introduction to Natural Language Processing

(same as LINGST 7740; cross-leveled with CMP_SC 4740; LINGST 4740). The goal of this course is to enable students to develop substantive NLP applications. Focus on current structural and statistical techniques for the parsing and interpretation of text.

Credit Hours: 3

CMP_SC 7750: Artificial Intelligence I

(cross-leveled with CMP_SC 4750). Introduction to the concepts and theories of intelligent systems. Various approaches to creating intelligent systems, including symbolic and computational approaches, insight into the philosophical debates important to understanding AI.

Credit Hours: 3

Prerequisites: CMP_SC 3050

CMP_SC 7770: Introduction to Computational Intelligence

(same as ECE 7870; cross-leveled with CMP_SC 4770, ECE 4870). Introduction to the concepts, models and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization.

Credit Hours: 3

CMP_SC 7830: Science and Engineering of the World Wide Web

(cross-leveled with CMP_SC 4830). This course will study the science and engineering of the World Wide Web. We will study the languages, protocols, services and tools that enable the web. Emphasis will be placed on basics and technologies.

Credit Hours: 3

Prerequisites: CMP_SC 3330 and CMP_SC 2830

CMP_SC 7850: Computer Networks I

(cross-leveled with CMP_SC 4850). Introduction to concepts and terminology of data communications and computer networking. Basic protocols and standards, applications of networking, routing algorithms, congestion avoidance, long-haul and local networks.

Credit Hours: 3

Prerequisites: CMP_SC 2270 or ECE 1210 and MATH 2320

CMP_SC 7860: Network Security

Principles and practice of cryptography, network security, and computer system security. It includes symmetric and asymmetric cryptography, authentication, security applications such as secure email, IP security, Web security, and system security issues such as intruders, viruses, worms, Trojan horses, and firewalls.

Credit Hours: 3

Prerequisites: CMP_SC 7850 or CMP_SC 4850

CMP_SC 7870: Wireless and Mobile Networks

Concepts and techniques in wireless and mobile networks: cellular concepts, wireless physical layer, wireless MAC protocol, mobility management, power management, wireless network security, wireless

telecommunication system, wireless LAN, wireless ad hoc networking, wireless personal area network. Prerequisites: CMP_SC 7850 or CMP_SC 4850

Credit Hours: 3

CMP_SC 8001: Advanced Topics in Computer Science

Topic may vary from semester to semester. May be repeated upon consent of department.

Credit Hours: 3

Prerequisites: varies by topic

CMP_SC 8050: Design and Analysis of Algorithms II

Techniques for the design and analysis of correct, efficient algorithms. Topics include graph, geometric, and algebraic/ numeric algorithms, NP-completeness, and parallel algorithms.

Credit Hours: 3

Prerequisites: CMP_SC 4050

CMP_SC 8060: Survey of Advanced Algorithm Techniques

This class provides a survey of important algorithmic techniques, some of which are emerging right now, and show that they are much easier to understand than they first appear. The class will create a renewed appreciation for what makes Computer Science such a fun/interesting discipline.

Credit Hours: 3

Prerequisites: CMP_SC 4050

CMP_SC 8070: Computational Optimization Methods

The course covers typical computational optimization methods widely used in many computing domains, such as data mining, machine learning and bioinformatics. The theoretical foundation of each optimization method is rigorously studied, followed by typical real-world applications. An active, problem-solving based teaching/learning format will be applied to help students develop various skills including research, teaching, reading, communication, algorithms, programming, team work, collaboration, leadership, planning, project management, and presentation.

Credit Hours: 3

Prerequisites: CMP_SC 7050 or instructor's approval

CMP_SC 8085: Problems in Computer Science

Independent study project work with a professor in computer science.

Credit Hour: 1-4

Prerequisites: instructor consent

CMP_SC 8090: Computational Geometry

Studies fundamental geometric problems within the framework of analysis of algorithms: convex hull algorithms in the plane and in general dimension, Voronoi diagram construction and applications to the solution of proximity problems, intersection problems, and geometric searching problems.

Credit Hours: 3

Prerequisites: CMP_SC 4050 and MATH 2300, or instructor's consent

CMP_SC 8110: Problem Solving in Bioinformatics

(same as INFOINST 8010). The course covers a variety of bioinformatics research topics such as biological sequence comparison, protein structure prediction, protein and gene function prediction, and inference and modeling of biological networks. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010

CMP_SC 8120: Structural Bioinformatics of Proteins, Complexes, System

(same as INFOINST 8210). Main course objective is to provide an introduction to the state-of-the-art methods in structural bioinformatics. The course will cover the methods that are applied to a wide range of biomolecular objects from protein domains and small proteins to large biological systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010

Recommended: CMP_SC 4050 or CMP_SC 7050

CMP_SC 8130: Computational Genomics

(same as INFOINST 8310). This course introduces computational concepts and methods of genomics to students. The course covers genome structure, database, sequencing, assembly, annotation, gene and RNA finding, motif and repeats identification, single nucleotide polymorphism, and epigenomics. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010

CMP_SC 8150: Integrative Methods in Bioinformatics

(same as INFOINST 8150), Introduces the most popular experimental methods from the point of view of the information sources that can be used. Students will use data obtained directly from biological experiments and learn how to suggest new experiments to improve results. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010

CMP_SC 8160: Content Management in Biomedical Informatics

(same as INFOINST 8860). This course introduces theory and techniques for content extraction, indexing, and retrieval of biomedical media databases. Topics include biomedical media databases, feature extraction methods, advanced database indexing structures, query methods, and result visualization. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 7380, INFOINST 7010

CMP_SC 8170: Computational Modeling of Molecular Structures

This course uses a problem solving paradigm to investigate common principles, data structures, algorithms, challenges, and solutions in computationally modeling (constructing) 3D structures of proteins, RNAs, chromosomes, and genomes.

Credit Hours: 3

Prerequisites: CMP_SC 7010

CMP_SC 8180: Machine Learning Methods for Biomedical Informatics

(same as INFOINST 8880). Teaches statistical machine learning methods and applications in biomedical informatics. Covers theories of advanced statistical machine learning methods and how to develop machine learning methods to solve biomedical problems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 7050 and INFOINST 7010 or CMP_SC 7010 or CMP_SC 7005

CMP_SC 8190: Computational Systems Biology

(same as INFOINST 8390). This course covers current theories and methods in the modeling and analysis of high-throughput experiments such as microarrays, proteomics, and metabolomics. Topics include the inference of causal relations from experimental data and reverse engineering of cellular systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010; INFOINST 8010

CMP_SC 8270: Computer Architecture II

Study of array processors, multiprocessors, multicomputers, and networked computing systems. Topics include architectures, interconnection networks, communication mechanisms, distributed memories and security. Introduction to parallel algorithm design.

Credit Hours: 3

Prerequisites: CMP_SC 4210 or ECE 4270

CMP_SC 8320: Software Engineering II

Further discussion of software development methodology.

Credit Hours: 3

Prerequisites: CMP_SC 4320

CMP_SC 8330: Object Oriented Design II

Software system design using classes and their properties of abstraction, inheritance, dynamic binding, and polymorphism. Focus on object-oriented design of systems such as windows, graphics systems, and operating system.

Credit Hours: 3

Prerequisites: CMP_SC 4330

CMP_SC 8370: Data Mining and Knowledge Discovery

Course topics include an introduction to fundamental concepts, data mining techniques from machine learning and pattern recognition areas, association rules, web mining, spatial mining, temporal mining, multimedia/multimodal database mining, and database mining, and geospatial information mining.

Credit Hours: 3

Prerequisites: CMP_SC 7380

CMP_SC 8380: Database Management Systems II

Further study in the theory, design, organization and implementation of databases and database management systems. Topics include: high-dimensional database indexing, content-based retrieval from image and

video databases, object-relational databases, object-oriented databases, and data mining.

Credit Hours: 3

Prerequisites: CMP_SC 7380

CMP_SC 8390: Information Indexing and Retrieval

Theory and techniques for the modeling, indexing, and retrieval of text-based and multimedia databases. Topics include introduction to different information retrieval models, retrieval evaluation, query languages, query operations, and indexing/searching methods.

Credit Hours: 3

Prerequisites: CMP_SC 2050 and CMP_SC 2110

CMP_SC 8410: Theory of Computation II

An advanced study of computational and formal languages by means of automata and related grammars. Turing machines, decidability, computability, computational complexity, language translation, and recent trends in automata theory.

Credit Hours: 3

Prerequisites: CMP_SC 7410

CMP_SC 8430: Compilers II

Further study of the compilation process. Compiler generation tools, parsing methods, code generation, data-flow analysis, code optimization, error handling, discussion of programming language features and their relationship to the compilation process.

Credit Hours: 3

Prerequisites: CMP_SC 7430

CMP_SC 8440: Information Security: A Language-Based Approach

This course focuses on language-based techniques for information flow security. Students will gain a solid background in information security, be encouraged to do further research and be exposed to important/promising trends in state-of-the-art computer security. Prerequisites: CMP_SC 4450 or CMP_SC 7450

Credit Hours: 3

CMP_SC 8450: Formal Engineering Methods for Software and Security

Designing scalable exhaustive methods to ensure reliability of computer systems is an important challenge in computer science as even simple errors can have serious socio-economic-political consequences. This challenge is the focus of the field of automated verification techniques which draws techniques from complexity theory, automata theory, programming languages and logic, and provides tools to ensure that the computer systems are reliable. Computer-assisted techniques for verifying hardware implementations are regularly employed in the industry, and are also being increasingly adopted in the software industry as the costs of software bugs and security flaws escalate. The goals of this course are: (1) to provide students with a solid background in the fundamental techniques used in this field, (2) to encourage further research in software and security verification, and (3) to introduce students to important upcoming trends in verifying security protocols. The students will get theoretical background as well as learn to use some standard tools in this field. Students will also explore topics of particular

interest to them through the performance of a significant semester project.

Credit Hours: 3

Prerequisites: CMP_SC 4450 or CMP_SC 7450 or CMP_SC 4430 or CMP_SC 7430 or instructor's consent. A reasonable level of mathematical maturity and significant programming experience is expected

CMP_SC 8520: Operating Systems II

Discusses concurrent processes, distributed/network operating systems; models of processor scheduling, memory management and resource allocation, performance measurement, evaluation and simulation methodology; queuing models; security and reliability.

Credit Hours: 3

Prerequisites: CMP_SC 4520

CMP_SC 8610: Computer Graphics II

Further study of computer graphics, focused on 3-D graphics, transformations, geometric and surface modeling, color models, visible surface determination, lighting and shading, standard graphics software (Phigs/OpenGL). Selected current topics in graphics such as visualization, animation and realism.

Credit Hours: 3

Prerequisites: CMP_SC 7610

CMP_SC 8620: Physically Based Modeling and Animation II

This course introduces students to physical based modeling and animation methodology for computer graphics and related fields such as computer vision, visualization, biomedical imaging and virtual reality. We will explore current research issues and will cover associated computational methods for simulating various visually interesting physical phenomena. This course should be appropriate for graduate students in all areas as well as advanced undergraduate students.

Credit Hours: 3

Prerequisites: CMP_SC 4610 or CMP_SC 7610

CMP_SC 8630: Data Visualization

Data visualization broadly covers transforming multidimensional and timevarying datasets to dynamic visual representations and encodings that facilitate exploratory data mining, knowledge discovery, improved understanding, summarization, structural modeling, collaboration and decision making using interactive methods.

Credit Hours: 3

Prerequisites: CMP_SC 4610 or CMP_SC 7610 or instructor's consent

CMP_SC 8650: Advanced Image Processing

(same as ECE 8855). This course covers advanced topics in image understanding including multispectral multimodal imaging, motion estimation, texture analysis, geometric level set methods.

Credit Hours: 3

Prerequisites: CMP_SC 4650 or CMP_SC 7650 or instructor's consent

CMP_SC 8660: Multimedia Security

This course offers a comprehensive coverage of the theoretical foundation of multimedia security technologies, including encryption,

authentication, digital watermarking, key management, copy control, fingerprinting/tracing, digital media forensics, and biometrics, provides an in-depth study of the state-of-the-art digital rights management systems and the underlying security technologies. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4670 or CMP_SC 4650; instructor's consent

CMP_SC 8670: Multimedia Communication

Topics covered may include multimedia networking and network technologies as pertaining to multimedia communications; multimedia applications such as video conferencing, video-on-demand broadcasting, and web-based distance learning; wireless video and future generation wireless video communication systems.

Credit Hours: 3

Prerequisites: CMP_SC 4670 and CMP_SC 4850 or instructor's consent

CMP_SC 8690: Computer Vision

(same as ECE 8690). This course introduces students to the fundamental problems of computer vision, the main concepts and the techniques used to solve such problems. It will enable graduate and advanced undergraduate students to solve complex problems and make sense of the literature in the area. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECE 4655 or ECE 7655 or CMP_SC 4650 or CMP_SC 7650 or instructor's consent

CMP_SC 8725: Supervised Learning

(same as ECE 8725). This course introduces the theories and applications of advanced supervised machine learning methods. It covers hidden Markov model and expectation maximization (EM) algorithms, probabilistic graphical models, non-linear support vector machine and kernel methods. The course emphasizes both the theoretical underpinnings of the advanced supervised learning methods and their applications in the real world. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4720 or CMP_SC 7720 or ECE 4720 or ECE 7720 or instructor's consent

CMP_SC 8735: Unsupervised Learning

(same as ECE 8735). Theoretical and practical aspects of unsupervised learning including topics of expectation maximization (EM), mixture decomposition, clustering algorithms, cluster visualization, and cluster validity. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4720 or CMP_SC 7720 or ECE 4720 or ECE 7720 or instructor's consent

CMP_SC 8750: Artificial Intelligence II

Further discussion of theories and techniques of artificial intelligence. Investigating state-of-the-art systems with capabilities to perceive, reason, learn and react intelligently to their environment.

Credit Hours: 3

Prerequisites: CMP_SC 4750 or CMP_SC 7750 or instructor's consent

CMP_SC 8760: Pattern Recognition

(same as ECE 8820). Decision functions, crisp and fuzzy clustering methods, statistical pattern recognition methods, Bayesian classifiers, error probabilities, estimation of density functions, perceptrons, least-mean-square algorithms, feature selection, dimensionality reduction and syntactic pattern recognition.

Credit Hours: 3

Prerequisites: CMP_SC 4050, STAT 4710

CMP_SC 8770: Neural Networks

(same as ECE 8890). The course will consider computing systems based on neural networks and learning models along with implementations and applications of such systems.

Credit Hours: 3

Prerequisites: CMP_SC 4870 or CMP_SC 7870 or instructor's consent

CMP_SC 8780: Advanced Topics in Computational Intelligence

(same as ECE 8875). This course is a continuation of ECE 7870/ CMP_SC 7770 Introduction to Computational Intelligence in the concepts, models, and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation, and swarm intelligence. Advanced topics in these areas will be discussed with a focus on applications of these technologies.

Credit Hours: 3

Prerequisites: ECE 4870 or ECE 7870 or CMP_SC 4770 or CMP_SC 7770

CMP_SC 8790: Filtering, Tracking and Data Fusion

This course will cover theory and applications of rigorous and efficient techniques for determining the state of an observed system from a series of imperfect observations or measurements. Specific topics to be covered include semidefinite matrix theory, the Kalman filter, the Unscented Transform, Covariance Intersection and related techniques. Applications of these techniques include head and hand tracking in virtual reality systems, robotics, and distributed information fusion.

Credit Hours: 3

Prerequisites: CMP_SC 2050, MATH 2300 or Linear Algebra or Matrix Theory

CMP_SC 8850: Computer Networks II

In-depth analysis and evaluation of computer networking architectures, protocols and algorithms, network security, distributed database and computational networks, routing and congestion control, domains and internetworking.

Credit Hours: 3

Prerequisites: CMP_SC 7850

CMP_SC 8860: Parallel and Distributed Processing

This course covers basic issues of parallel and distributed processing, including parallel and distributed architectures and models, parallel programming, and parallel algorithms and applications.

Credit Hours: 3

Prerequisites: CMP_SC 4050

CMP_SC 8870: Modeling and Management of Uncertainty

(same as ECE 8870). Theoretical and practical issues in the modeling and management of uncertainty. Topics include probabilistic uncertainty, belief theory and fuzzy set theory. Applications to computer vision, pattern recognition and expert systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECE 4870 or ECE 7870 or CMP_SC 4770 or CMP_SC 7770 or instructor's consent

CMP_SC 8880: Wireless Embedded Systems

This course introduces wireless embedded systems and focuses on the nature of computation and communication needed to design large-scale, distributed, and wirelessly connected embedded systems. We will study emerging technology and standards by reading papers and doing projects on real systems.

Credit Hours: 3

Prerequisites: CMP_SC 4050 and CMP_SC 4850 or instructor's consent

CMP_SC 8980: Research Masters Project in Computer Science

Investigation and research of a topic, not leading to a thesis. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: departmental consent

CMP_SC 8990: Research-Masters Thesis Computer Science

Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: advisor's consent

CMP_SC 9001: Advanced Topics in Computer Science - PhD

New and current technical developments in computer science. For PhD students.

Credit Hour: 1-4

CMP_SC 9990: Research-Doctoral Dissertation Computer Science

Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: advisor's consent

Dermatology (DERM)

DERM 6233: ABS Dermatology Research

ABS Dermatology Research

Credit Hours: 5

DERM 6235: ABS Dermatology Research and Review

ABS Dermatology Research and Review

Credit Hour: 5-10

DERM 6450: Dermatology I

The Dermatology rotation is designed to provide the medical student with a broad general base in clinical dermatology for the non-dermatologist. During the rotation the student should: Enhance the visual diagnostic

skills and related reasoning used in dermatology; Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist; Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health; Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases; Learn appropriate use of both systemic and topical dermatologic medications; Learn basic punch, shave, and excisional biopsy techniques; Become proficient in skin surveillance, especially early detection of skin cancer. Students are evaluated using a standard evaluation. The student's knowledge of subject matter is evaluated in the following settings: informal discussion during clinics, ward rounds, inpatient consultation rounds and scheduled conferences.

Credit Hours: 5

Prerequisites: Internal Medicine Clerkship

DERM 6750: Dermatology I - Rural

The Dermatology rotation is designed to provide the medical student with a broad general base in clinical dermatology for the non-dermatologist. During the rotation the student should: Enhance the visual diagnostic skills and related reasoning used in dermatology. Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist. Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health. Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases. Learn appropriate use of both systemic and topical dermatologic medications. Learn basic punch, shave, and excisional biopsy techniques. Become proficient in skin surveillance, especially early detection of skin cancer.

Credit Hours: 5

DERM 6856: Dermatology II

This elective rotation is an expansion of the objective goals outlined for Dermatology I. The student is expected to expand the depth and breadth of his/her dermatology experiences and knowledge. Enhance the visual diagnostic skills and related reasoning used in dermatology. Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist. Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health. Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases. Learn appropriate use of both systemic and topical dermatologic medications. Learn basic punch, shave, and excisional biopsy techniques. Become proficient in skin surveillance, especially early detection of skin cancer. As Dermatology II is an extension of the Dermatology I curriculum, Dermatology II students are expected to master the above objectives. In addition, they are expected to expand their clinical skills related to the diagnosis and treatment of dermatologic diseases and they will have increased responsibilities for patient education. It is expected that they will further their surgical skills including biopsies, simple excisions, and basic cryotherapy. They will also become proficient in basic laboratory procedures including KOH and scabies prep.

Credit Hours: 5

DERM 6910: Clinical Dermatology Elective

The 2 week elective in Dermatology will allow students to participate in a wide breadth of general, pediatric, and surgical dermatology. Students will participate in clinics and in weekly didactic sessions. Students will also complete the American Academy of Dermatology online student modules and the self-evaluation that is provided.

Credit Hours: 2

Prerequisites: Successful completion of the first two years of medical school. Must have completed at least 1 core clinical rotation

Diagnostic Medical Ultrasound (DMU)

DMU 1000: Introduction to Diagnostic Medical Ultrasound

Introduction to the profession of diagnostic medical ultrasound. Imaging characteristics, educational requirements, professional trends. Observation opportunities. Graded on S/U basis only.

Credit Hour: 1

DMU 4001: Topics in Diagnostic Medical Ultrasound

Organized study of selected topics in medical ultrasound. Topics may vary. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-99

Prerequisites: restricted to Diagnostic Medical Ultrasound undergraduate students; program director's consent

DMU 4085: Problems in Diagnostic Medical Ultrasound

Independent study leading to a special project or paper. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-99

Prerequisites: restricted to Diagnostic Medical Ultrasound undergraduate students only; program director's consent

DMU 4200: Principles of Diagnostic Medical Ultrasound

Principles and history of ultrasound, ultrasound equipment, sonographic techniques, aspects of patient care.

Credit Hours: 3

Prerequisites: departmental consent

DMU 4234: Clinical Pathophysiology

Abnormal function of organ systems in the presence of disease; clinical manifestations and medical management.

Credit Hours: 3

DMU 4309: Normal Ultrasound Clinical

Integration of ultrasound instrumentation and clinical practice in a laboratory setting. Interaction between the sonographer, equipment and patient.

Credit Hours: 5

Prerequisites: DMU 4312 and instructor's consent

DMU 4311: Pathological Images of Ultrasound

Disease presentation in ultrasound imaging. Practical aspects of ultrasound scanning techniques in pathology.

Credit Hours: 3

Prerequisites: DMU 4200, DMU 4312 and instructor's consent

DMU 4312: Sectional Anatomy

(same as RA_SCI 4110). A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques.

Credit Hours: 3

Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 4313: Ultrasound Physics

Principles of diagnostic ultrasound physics. Sound wave characteristics, tissue interaction, power intensity, and Doppler physics.

Credit Hours: 3

Prerequisites: MATH 1100, CHEM 1100 or CHEM 1320, PHYSCS 1210, and departmental consent

DMU 4314: Abdominal Ultrasound

(cross-leveled with DMU 7314). Differentiation between normal and pathological ultrasound studies of the abdomen. Differential diagnosis of pathological states.

Credit Hours: 5

Prerequisites: DMU 4312, DMU 4309 and DMU 4311; instructor's consent

DMU 4315: Ultrasound Instrumentation

Integration of ultrasound physics and instrumentation components in a laboratory setting. Practice in modes of operation and safety.

Credit Hours: 3

Prerequisites: DMU 4200; instructor's consent

DMU 4318: Gynecology Ultrasound

Study of normal and abnormal gynecological ultrasound anatomy. Distinction between normal and pathological states and ultrasound differential diagnosis.

Credit Hours: 3

Prerequisites: DMU 4312, DMU 4309 and DMU 4311

DMU 4320: Obstetrics Ultrasound

Study of normal and abnormal obstetrical ultrasound anatomy. Distinction between normal and pathological OB ultrasound studies with emphasis on differential diagnosis.

Credit Hours: 3

Prerequisites: DMU 4312, DMU 4309 and DMU 4311; instructor's consent

DMU 4322: Superficial Organs Ultrasound

Ultrasound evaluation and diagnosis of normal and abnormal superficial organs; thyroid gland, testes, breasts, soft tissues and musculoskeletal.

Credit Hours: 3

Prerequisites: DMU 4312, DMU 4309 and DMU 4311; instructor's consent

DMU 4325: Ultrasound Clinical Pharmacology and Contrast Agents

Study of the biophysical, biochemical and complete action of ultrasound contrast agents and other drugs used in Diagnostic Medical Ultrasound and their pharmacodynamics.

Credit Hours: 3

Prerequisites: Restricted to Diagnostic Medical Ultrasound

DMU 4326: Vascular Ultrasound Physics, Instrumentation and Hemodynamics

Study of vascular principles and fundamentals including physics and instrumentation. Emphasis on ultrasound wave characteristics, Doppler principles, tissue interaction and hemodynamics.

Credit Hours: 3

Prerequisites: DMU 4313 and DMU 4315; instructor's consent

DMU 4330: Vascular Ultrasound Lab

Vascular ultrasound scanning techniques, protocols, measurements, film/video critique, and Plethysmography in a clinical lab setting.

Credit Hours: 3

Prerequisites: DMU 4312, and DMU 4326; instructor's consent

DMU 4332: Vascular Ultrasound

Vascular ultrasound for normal and pathological processes: study of disease, correlation of patients' clinical data and ultrasound findings used in differential diagnosis.

Credit Hours: 4

Prerequisites: DMU 4312, DMU 4311, DMU 4322, and DMU 4326 or instructor's consent

DMU 4338: Cardiac Ultrasound, Principles and Hemodynamics

Study of cardiac ultrasound fundamentals including: wave characteristics, principles of 2-D/3-D/4-D imaging, M-mode, and Doppler, cardiac anatomy and physiology, embryology, evaluation methods and hemodynamics. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: DMU 4313, DMU 4315, instructor's consent

DMU 4342: Adult Cardiac Ultrasound

(cross-leveled with DMU 7342). Provides principles of diagnostic adult cardiac ultrasound in relation to pathology, further presenting the practical aspects of scanning techniques, exam critique, patient care in relation to cardiac US exams. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: DMU 4313, DMU 4315 and DMU 4338; instructor's consent

DMU 4941: Ultrasound Clinical I

Application of medical ultrasound in supervised clinical settings. Decisions regarding diagnosis, patient handling and imaging.

Credit Hours: 7

Prerequisites: DMU 4312, DMU 4309 and DMU 4311

DMU 4943: Ultrasound Clinical III

Final clinical application of general medical ultrasound practicum in supervised clinical settings. Further enhancement of practice, decision making, patient handling, image processing and case studies.

Credit Hours: 6

Prerequisites: DMU 4993 and instructor's consent

DMU 4944: Vascular Ultrasound Clinical IV

Application of diagnostic vascular ultrasound in supervised clinical settings: practice, decision making, patient handling and image processing.

Credit Hours: 7

Prerequisites: DMU 4326 and instructor's consent

DMU 4945: Cardiac Ultrasound Clinical V

Application of ultrasonography in real clinical settings for learning, practicing and decision making regarding, patient handling and imaging process with students supervised in a clinical setting. Graded on A-F basis only.

Credit Hours: 6

Prerequisites: DMU 4313, DMU 4315, DMU 4944. Instructor and Departmental permission required

DMU 4946: Cardiac Ultrasound Clinical VI

Further application of ultrasonography for continuation of learning, practicing and decision making, patient handling and imaging process with students supervised in a clinical setting. Graded on A-F basis only.

Credit Hours: 6

Prerequisites: DMU 4313, DMU 4315, DMU 4338 and DMU 4945. Instructor and Departmental permission required

DMU 4993: Ultrasound Clinical II

Application of medical ultrasound in supervised clinical settings with practice and decision making related to ultrasound diagnosis, patient handling and image processing.

Credit Hours: 8

Prerequisites: DMU 4941; instructor's consent

DMU 7200: Diagnostic Medical Ultrasound Principles and Patient Care

Introduction diagnostic medical ultrasound principles including history, development, ultrasound physics - equipment fundamentals. Provides introduction to concepts of sonographic techniques, positioning, image critique, aspects of patient care and professional organizations. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: DMU 1000. Restricted to Graduate Diagnostic Medical Ultrasound students

DMU 7234: Clinical Pathophysiology

(same as PH_THR 7270). Abnormal function of organ systems in the presence of disease; clinical manifestations and medical management.

Credit Hours: 3

DMU 7309: Normal Ultrasound Clinical

(cross-leveled with DMU 4309). Integration of ultrasound instrumentation and clinical practice in a laboratory setting. Interaction between the sonographer, equipment and patient.

Credit Hours: 5

Prerequisites: DMU 7312, DMU 7313 and DMU 7315

DMU 7311: Pathological Images Ultrasound

Disease presentation in ultrasound imaging. Practical aspects of ultrasound scanning techniques in pathology.

Credit Hours: 3

Prerequisites: DMU 4200, DMU 7312 and DMU 7315; instructor's consent

DMU 7312: Sectional Anatomy

(cross-leveled with RA_SCI 4110). A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques.

Credit Hours: 3

Prerequisites: Restricted to Graduate Diagnostic Medical Ultrasound students

DMU 7313: Ultrasound Physics

Principles of diagnostic ultrasound physics. Sound wave characteristics, tissue interaction, power intensity, and Doppler physics.

Credit Hours: 3

Prerequisites: MATH 1100, CHEM 1100 or CHEM 1320, PHYSCS 1210, and departmental consent

DMU 7314: Abdominal Ultrasound

(cross-leveled with DMU 4314). Differentiation between normal and pathological ultrasound studies of the abdomen. Differential diagnosis of pathological states.

Credit Hours: 5

Prerequisites: DMU 7312, DMU 7309 and DMU 7311; instructor's consent

DMU 7315: Ultrasound Instrumentation

Integration of ultrasound physics and instrumentation components in a laboratory setting. Practice in modes of operation and safety.

Credit Hours: 3

Prerequisites: DMU 4200; instructor's consent

DMU 7318: Gynecology Ultrasound

Study of normal and abnormal gynecological ultrasound anatomy. Distinction between normal and pathological states and ultrasound differential diagnosis.

Credit Hours: 3

Prerequisites: DMU 7312, DMU 7309 and DMU 7311

DMU 7320: Obstetrics Ultrasound

Study of normal and abnormal obstetrical ultrasound anatomy. Distinction between normal and pathological OB ultrasound studies with emphasis on differential diagnosis.

Credit Hours: 3

Prerequisites: DMU 7312, DMU 7309 and DMU 7311; instructor's consent

DMU 7322: Superficial Organs Ultrasound

Ultrasound evaluation and diagnosis of normal and abnormal superficial organs; thyroid gland, testes, breasts, soft tissues and musculoskeletal.

Credit Hours: 3

Prerequisites: DMU 7312, DMU 7309 and DMU 7311

DMU 7325: Ultrasound Clinical Pharmacology and Contrast Agents

Study of the biophysical, biochemical and complete action of ultrasound contrast agents and other drugs used in DMU and their pharmacodynamics.

Credit Hours: 3

Prerequisites: Restricted to Graduate Diagnostic Medical Ultrasound majors

DMU 7326: Vascular Ultrasound Physics, Instrumentation and Hemodynamics

Study of vascular principles and fundamentals including physics and instrumentation. Emphasis on ultrasound wave characteristics, Doppler principles, tissue interaction and hemodynamics.

Credit Hours: 3

Prerequisites: DMU 7313 and DMU 7315; instructor's consent

DMU 7330: Vascular Ultrasound Lab

Vascular ultrasound scanning techniques, protocols, measurements, film/video critique, and Plethysmography in a clinical lab setting.

Credit Hours: 3

Prerequisites: DMU 7312, and DMU 7326; instructor's consent

DMU 7332: Vascular Ultrasound

Vascular ultrasound for normal and pathological processes: study of disease, correlation of patients' clinical data and ultrasound findings used in differential diagnosis.

Credit Hours: 4

Prerequisites: DMU 7312, DMU 7311, DMU 7322, and DMU 7326 or instructor's consent

DMU 7338: Cardiac Ultrasound, Principles and Hemodynamics

Study of cardiac ultrasound fundamentals including: wave characteristics, principles of 2-D/3-D/4-D imaging, M-mode, and Doppler, cardiac anatomy and physiology, embryology, evaluation methods and hemodynamics. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: DMU 7313, DMU 7315

DMU 7342: Adult Cardiac Ultrasound

(cross-leveled with DMU 4342). Study of adult cardiac ultrasound for normal and pathological processes. Differential diagnosis of cardiac disease through correlation of patients' clinical data and ultrasound findings.

Credit Hours: 5

Prerequisites: DMU 7312, DMU 7313 and DMU 7315 and instructor's consent

DMU 7941: Ultrasound Clinical I

Application of medical ultrasound in supervised clinical settings. Decisions regarding diagnosis, patient handling and imaging.

Credit Hours: 7

Prerequisites: DMU 7312, DMU 7309 and DMU 7311

DMU 7943: Ultrasound Clinical III

Final clinical application of general medical ultrasound practicum in supervised clinical settings. Further enhancement of practice, decision making, patient handling, image processing and case studies.

Credit Hours: 6

Prerequisites: DMU 7993 and instructor's consent

DMU 7944: Vascular Ultrasound Clinical IV

Application of diagnostic vascular ultrasound in supervised clinical settings: practice, decision making, patient handling and image processing.

Credit Hours: 7

Prerequisites: DMU 7326 and instructor's consent

DMU 7945: Cardiac Ultrasound Clinical V

Application of diagnostic cardiac ultrasound in supervised clinical settings: practice and decision making regarding echocardiography, patient handling and image processing.

Credit Hours: 6

Prerequisites: DMU 7313 and DMU 7315

DMU 7946: Cardiac Ultrasound Clinical VI

Further enhancement of diagnostic cardiac ultrasound in supervised clinical settings: practice and decision making regarding echocardiography, patient handling and image processing.

Credit Hours: 6

Prerequisites: DMU 7945

DMU 7993: Ultrasound Clinical II

(cross-leveled with DMU 4993). Application of medical ultrasound in supervised clinical settings with practice and decision making related to ultrasound diagnosis, patient handling and image processing.

Credit Hours: 8

Prerequisites: DMU 7941. Restricted to Graduate Diagnostic Medical Ultrasound students

DMU 8001: Topics in Diagnostic Medical Ultrasound

Organized study of selected topics. Topic may vary.

Credit Hour: 1-3

Prerequisites: restricted to students enrolled in the Diagnostic Medical Ultrasound program only

DMU 8050: Research in Diagnostic Medical Ultrasound

Research not leading to a thesis or dissertation. Graded on an A-F basis only.

Credit Hour: 1-99

Prerequisites: restricted to students enrolled in the Diagnostic Medical Ultrasound program only

DMU 8085: Problems in Diagnostic Medical Ultrasound

Independent study of a special project involving clinical applications or research. Topic may vary.

Credit Hour: 1-99

Prerequisites: restricted to students enrolled in the Diagnostic Medical Ultrasound program only

DMU 8090: Research in Diagnostic Medical Ultrasound

Research leading to a thesis or dissertation. Graded on an S/U basis only.

Credit Hour: 1-99

Prerequisites: restricted to students enrolled in the Diagnostic Medical Ultrasound program only

DMU 8346: Pediatric Cardiac Ultrasound

Study of pediatric cardiac ultrasound for normal and pathological processes. Differential diagnosis of cardiac disease through correlation of patients' clinical data and ultrasound findings.

Credit Hours: 4

Prerequisites: DMU 7342 and instructor's consent

DMU 8947: Applied Clinical Research & Practicum

Clinical research application of cardiovascular & general ultrasound in clinical environment: clinical research, practicum, decision making, patient handling, and image processing. Graded on A-F basis only.

Credit Hour: 5-8

Prerequisites: DMU 7944, DMU 7946, instructor's consent

Economics (ECONOM)

ECONOM 1014: Principles of Microeconomics

A basic examination of the economy at the individual consumer, firm and market level. Simple economic models used to analyze the workings of the economy. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, the importance of free trade, the markets response to economic shocks and the effect of government intervention. Not open to students who have completed ECONOM 1024, ECONOM 1051, or AG_EC 1041.

Credit Hours: 3

ECONOM 1015: Principles of Macroeconomics

Macroeconomics generally refers to a collection of questions about how scarcity affects a collection of people interacting with one another. In this course, our focus is on understanding how scarcity affects welfare

of a nation. Topics include Gross Domestic Product, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, and exchange rates. Not open to students who have completed ECONOM 1051 or AG_EC 1042.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024

ECONOM 1024: Fundamentals of Microeconomics

This course uses mathematical reasoning to provide an elementary quantitative introduction to fundamental concepts in microeconomics. It uses college algebra and simple geometric concepts to describe the behavior of economic units, such as consumers, firms and resource owners, and to depict their interaction through production and exchange in perfect and imperfect markets. Not open to students who have completed ECONOM 1014, ECONOM 1051, or AG_EC 1041. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: MATH 1100 or MATH 1120 or equivalent with grade of C or better

ECONOM 1051: General Economics

One semester course covering similar material as covered in ECONOM 1014 and ECONOM 1015. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, exchange rates. Includes applications for Journalism students. Not open to students who have completed ECONOM 1014 or ECONOM 1024 and, ECONOM 1015 or AG_EC 1041 and AG_EC 1042. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: Open only to pre-Journalism and Journalism majors; departmental consent required

ECONOM 1051H: General Economics - Honors

One semester course covering similar material as covered in ECONOM 1014 and ECONOM 1015. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, exchange rates. Not open to students who have completed ECONOM 1014 or ECONOM 1024 and ECONOM 1015. Math Reasoning Proficiency Course.

Credit Hours: 5

Prerequisites: Honors eligibility required

ECONOM 2004: Undergraduate Topics in Economics - Social Science

Organized study of selected topics in Economics; applied or theoretical economics; covers subjects not included in regularly offered courses.

Credit Hour: 1-3

Prerequisites: instructor's consent

ECONOM 3004: Topics in Economics - Social Science

Study in applied or theoretical economics; covers subjects not included in regularly offered courses.

Credit Hour: 1-3

Prerequisites: instructor's consent

ECONOM 3224: Introduction to International Economics

A topical course which emphasizes the application of basic economic analysis to real and current international economic issues. Topics include free trade, protectionism, free trade areas, multilateral trade negotiations, trade and development, exchange rates, the International Monetary System, and economic integration.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 or ECONOM 1051

ECONOM 3229: Money, Banking and Financial Markets

Operation of the U.S. financial and economic system. Covers interest rates, banking regulation, the money supply process and the conduct of the Federal Reserve, inflation and the macroeconomy, exchange rates and the international financial system, rational expectations, and efficient markets.

Credit Hours: 3

Prerequisites: (ECONOM 1014 or ECONOM 1024) and ECONOM 1015, or ECONOM 1051

ECONOM 3229H: Money, Banking and Financial Markets - Honors

Operation of the U.S. financial and economic system. Covers interest rates, banking regulation, the money supply process and the conduct of the Federal Reserve, inflation and the macroeconomy, exchange rates and the international financial system, rational expectations, and efficient markets. Honors eligibility required.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015, or ECONOM 1051

ECONOM 3251: Theory of the Firm

Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Topics include the economics of the firm in the context of partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition as well as game theory. No credit for students who have completed ECONOM 4351.

Credit Hours: 3

Prerequisites: (ECONOM 1014 or ECONOM 1024 or ECONOM 1051) and MATH 1400, or equivalent. Not open to economics majors

ECONOM 3271: Introduction to Applied Econometric Practice

Introduction to the use of regression analysis of economic data, including simple and multiple regression, dummy variables. Econometric problems considered include heteroscedasticity, autocorrelation, multicollinearity and simultaneous equation issues.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015, or ECONOM 1051H and STAT 2500

ECONOM 3323: Capitalism, Democracy and Society

This is a one-credit seminar course for students interested in careers involving social science research and analysis; topics covered will be a selection of classic and contemporary debates in the social sciences.

Credit Hour: 1

Prerequisites: ECONOM 1014 and ECONOM 1015, or ECONOM 1051

ECONOM 4004: Topics in Economics- Social Science

Study in applied or theoretical economics; covers subjects not included in regularly offered courses.

Credit Hour: 1-3

Prerequisites: instructor's consent

ECONOM 4311: Labor Economics

Surveys theoretical explanations of wage and employment determination in contemporary labor markets.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4315: Public Economics

Analyzes economic effects of government expenditures, taxes and debt. Expenditure and taxation principles, tax reform, cost-benefit analysis, fiscal policy.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4320: History of Economic Thought

Origins of modern economic thought in the context of social and intellectual environment of the time in which they originated, their contribution to their period and to modern thought.

Credit Hours: 3

Prerequisites: (ECONOM 1014 or ECONOM 1024) and ECONOM 1015, or ECONOM 1051

ECONOM 4322: Economics of Regulation and Antitrust

Economic issues concerning the role of government regulation. The course examines the rationale for and effects of regulatory policies in public utilities, transportation, and communications industries.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4325: The International Monetary System

Study of macroeconomic and monetary relationships between the U.S. and the world. Topics include balance of payments, foreign exchange rates, history of the international monetary system.

Credit Hours: 3

Prerequisites: ECONOM 3229

ECONOM 4326: Economics of International Trade

The microeconomic theory of international trade. Topics include comparative advantage, the theory of commercial policy, economic integration, trade with less developed countries and the trade effects of economic growth.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4329: The Banking System and the Money Market

Organization of the money market; credit control procedures and aims, effect of bank expansion and contraction on money market and national income deregulation.

Credit Hours: 3

Prerequisites: ECONOM 1015 or ECONOM 1051

ECONOM 4340: Introduction to Game Theory

An introduction to the theory of games, viewed as a set of tools used widely in economics to study situations in which decision-makers (consumers, firms, governments, etc.) interact. The course introduces the basic theory, emphasizing the concepts and their economic applications.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4345: Economics of Education

Economic theory is used to analyze the market for educational services and education policy. Topics include: human capital theory, cost and performance measures for public and private schools, market based approaches to school reform, school finance, higher education cost and access.

Credit Hours: 3

Prerequisites: (ECONOM 1014 or ECONOM 1024 or ECONOM 1051), and STAT 2500 or equivalent

ECONOM 4351: Intermediate Microeconomics

Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed ECONOM 3251.

Credit Hours: 3

Prerequisites: (ECONOM 1014 or ECONOM 1024 or ECONOM 1051) and MATH 1400 or equivalent

ECONOM 4351H: Intermediate Microeconomics - Honors

Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed ECONOM 3251. Honors eligibility required.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 or ECONOM 1051, and MATH 1400, or equivalent

ECONOM 4353: Intermediate Macroeconomics

The study of the structure and performance of national economics. Topics include: long-term economic growth, aggregate economic fluctuations, unemployment, and inflation; consequences for national economies of being part of the global economic system; government policies and macroeconomic performance.

Credit Hours: 3

Prerequisites: ECONOM 1015 or ECONOM 1051, and MATH 1400 or equivalent

ECONOM 4355: Industrial Organization and Competitive Strategy

Analyzes the structure of industry, its impact on the operations of the firm and significance for public policy. The focus is on strategic interaction

among firms with market power. Topics include oligopoly, competition, collusion, price discrimination, product differentiation, advertising, entry and exit.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4357: Health Economics

Analyzes the economics of health care in the United States with particular attention paid to the role of government. It examines the demand for health care and the structure and consequences of public and private health insurance; the supply of health care, including professional training, licensure, specialization and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine and health care reform.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351 and STAT 2500, or equivalent

ECONOM 4360: Economic Development

(same as PEA_ST 4360). The study of less-developed countries including problems of measuring economic growth, analysis of sources of economic growth, causes of changes in economic and structure, development and trade policies. The consequences of goals and assumptions for development policy are analyzed.

Credit Hours: 3

Prerequisites: ECONOM 3229, and ECONOM 3251 or ECONOM 4351

ECONOM 4361: Comparative Economic Systems

Study of capitalism, market socialism, and central planning.

Credit Hours: 3

Prerequisites: ECONOM 3229, and ECONOM 3251 or ECONOM 4351

ECONOM 4367: Law and Economics

This course is a survey of economic analyses of American legal institutions. Students will apply basic microeconomics, game theoretic and statistical concepts to the study of property, contracts, torts, the legal process, crime, and the judiciary.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351, and STAT 2500, or equivalent

ECONOM 4370: Quantitative Economics

The aim of this course is to provide an introduction to the mathematical language of economic theory. Topics include linear models, matrix algebra, rules of differentiation and comparative static analysis, optimization.

Credit Hours: 3

Prerequisites: MATH 1500 or equivalent

ECONOM 4371: Introductory Econometrics

Study methods for quantitative analysis of economic data. Estimation techniques, tests of significance, prediction and forecasting reviewed with respect to problems presented by economic data and information demands of economic decision models.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351, and STAT 2500, or equivalent

ECONOM 4384: Structural Change in Economic History

Explores changes in the structure of the American economy from its earliest colonial beginnings. Structural change, an integral part of growth, is related to technical change, population growth and to the content and form of economic theory.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015, or ECONOM 1051

ECONOM 4385: Problems in Economics

Development of a carefully considered research project under close supervision of a faculty member. Credit arranged by instructor.

Credit Hour: 1-3

Prerequisites: ECONOM 4351, ECONOM 4371, and instructor's consent. Not open to non-majors

ECONOM 4775: Dynamic Optimization and its Applications to the Natural Sciences and Economics

(cross-leveled with ECONOM 7775). Development of Calculus of Variations and Optimal Control Theory. Applications. Extensions to stochastic and robust control.

Credit Hour: 1-3

Prerequisites: ECONOM 4370 or instructor's consent

ECONOM 4940: Internship in Economics

Internship experience for Economics majors. 40 hours of supervised internship work with approval of Director of Undergraduate Studies and academic advisor. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: C or higher in ECONOM 4351 and ECONOM 4371; Declared economics majors who have a minimum overall CUM GPA of 2.75 and have junior or senior standing

Recommended: Students must have completed at least 15 credit hours at MU

ECONOM 4965: Independent Study in Economics

Individual work, with conferences adjusted to needs of student.

Credit Hour: 1-3

Prerequisites: instructor's consent

ECONOM 4970: Senior Seminar in Economics

Seminar for graduating seniors who are majoring in economics. Multiple writing assignments will emphasize synthesis of theoretical, empirical, and institutional economics. Not open to non-majors.

Credit Hours: 3

ECONOM 4971: Supplemental Senior Seminar in Economics

Content description is the same as ECONOM 4970. Required for Economics honors students and double majors in Economics who take a capstone course in another major. No credit for students who have completed ECONOM 4970. Not open to non-majors. Graded on A-F basis only.

Credit Hour: 1

ECONOM 4995: Honors Proseminar

Seminar for graduating seniors. This capstone course integrates previous economics courses by applying economic theories to problems. Students acquire an understanding of what research in economics can produce and how to produce those results. Course requirements are to produce a list of distinctive activities that count as research and produce a research paper. Multiple writing assignments will emphasize synthesis of theoretical, empirical and institutional economics. No credit for students who have completed ECONOM 4970. Not open to non-majors. Capstone course required for Economics honors students.

Credit Hours: 3

ECONOM 7001: Topics in Economics - General

Study in applied or theoretical economics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: instructor's consent

ECONOM 7085: Problems in Economics

Individual study in Economics.

Credit Hour: 1-99

Prerequisites: instructor's consent

ECONOM 7311: Labor Economics

Surveys theoretical explanations of wage and employment determination in contemporary labor markets.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 7351

ECONOM 7315: Public Economics

Analyzes economic effects of government expenditures, taxes and debt. Expenditure and taxation principles, tax reform, cost-benefit analysis, fiscal policy.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 7320: History of Economic Thought

Origins of modern economic thought in the context of social and intellectual environment of the time in which they originated, their contribution to their period and to modern thought.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015 or ECONOM 1051H

ECONOM 7322: Economics of Regulation and Antitrust

Economic issues concerning the role of government regulation. The course examines the rationale for and effects of regulatory policies in public utilities, transportation, and communications industries.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 7351

ECONOM 7325: The International Monetary System

Study of macroeconomic and monetary relationships between the US and the world. Topics include balance of payments, foreign exchange rates, history of the international monetary system.

Credit Hours: 3

Prerequisites: ECONOM 3229

ECONOM 7326: Economics of International Trade

The microeconomic theory of international trade. Topics include comparative advantage, the theory of commercial policy, economic integration, trade with LDC's and the trade effects of economic growth.

Credit Hours: 3

Prerequisites: ECONOM 7351 or instructor's consent

ECONOM 7329: The Banking System and the Money Market

Organization of the money market; credit control procedures and aims, effect of bank expansion and contraction on money market and national income deregulation.

Credit Hours: 3

Prerequisites: ECONOM 1015 or ECONOM 1051

ECONOM 7332: Microeconomics for Managers

Microeconomic concepts presented at the intermediate level, graphic treatment with limited calculus, managerial issues presented at the MBA level. (Not open to economics majors).

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024, MATH 1300; permission required for MBA program

ECONOM 7340: Introduction to Game Theory

An introduction to the theory of games, viewed as a set of tools used widely in economics to study situations in which decision-makers (consumers, firms, governments, etc.) interact. The course introduces the basic theory, emphasizing the concepts and their economic applications.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 7351 or instructor's consent

ECONOM 7345: Economics of Education

Economic theory is used to analyze the market for educational services and education policy. Topics include: human capital theory, cost and performance measures for public and private schools, market based approaches to school reform, school finance, higher education cost and access.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024, or ECONOM 1051H and ECONOM 4371 or equivalent

ECONOM 7351: Intermediate Microeconomics

Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed 3251.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 or ECONOM 1051H and MATH 1320 or equivalent

ECONOM 7353: Intermediate Macroeconomics

The study of the structure and performance of national economics. Topics include: long-term economic growth, aggregate economic fluctuations, unemployment, and inflation; consequences for national economies of being part of the global economic system; government policies and macroeconomic performance.

Credit Hours: 3

Prerequisites: ECONOM 1015 or ECONOM 1051 and MATH 1400 or equivalent

ECONOM 7355: Industrial Organization and Competitive Strategy

Analyzes the structure of industry, its impact on the operations of the firm and significance for public policy. The focus is on strategic interaction among firms with market power. Topics include oligopoly, competition, collusion, price discrimination, product differentiation, advertising, entry and exit.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 7351

ECONOM 7357: Health Economics

(same as PUB_AF 7357). Analyzes the economics of health care in the United States with particular attention paid to the role of government. It examines the demand for health care and the structure and consequences of public and private health insurance; the supply of health care, including professional training, licensure, specialization and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine: and examination of recent proposals and initiatives for health care reform.

Credit Hours: 3

Prerequisites: STAT 2500 and ECONOM 4351

ECONOM 7360: Economic Development

(same as PEA_ST 4360). The study of less-developed countries including problems of measuring economic growth, analysis of sources of economic growth, causes of changes in economic and structure, development and trade policies. The consequences of goals and assumptions for development policy are analyzed.

Credit Hours: 3

Prerequisites: ECONOM 3229 and ECONOM 3251 or ECONOM 4351.; graduate standing required

ECONOM 7361: Comparative Economic Systems

Study of capitalism, market socialism, and central planning.

Credit Hours: 3

Prerequisites: ECONOM 3229 and ECONOM 3251 or ECONOM 4351

ECONOM 7367: Law and Economics

(same as Public Affairs PUB_AF 7367). This course is a survey of economic analyses of American legal institutions. Students will apply basic microeconomic, game theoretic and statistical concepts to the study of property, contracts, torts, the legal process, crime and the judiciary.

Credit Hours: 3

Prerequisites: [ECONOM 4351 or ECONOM 3251, and STAT 2500, or equivalent

ECONOM 7370: Quantitative Economics

The aim of this course is to provide an introduction to the mathematical language of economic theory. Topics include linear models, matrix algebra, rules of differentiation and comparative static analysis, optimization.

Credit Hours: 3

Prerequisites: MATH 1500 or equivalent

ECONOM 7371: Introductory Econometrics

Study methods for quantitative analysis of economic data. Estimating techniques, tests of significance, prediction and forecasting reviewed with respect to problems presented by economic data and information demands of economic decision models.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351 and STAT 2500 and MATH 1320 or instructor's consent

ECONOM 7384: Structural Change in Economic History

Explores changes in the structure of the American economy from its earliest colonial beginnings. Structural change, an integral part of growth, is related to technical change, population growth and to the content and form of economic theory.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015, or ECONOM 1051H or instructor's consent

ECONOM 7775: Dynamic Optimization and its Applications to the Natural Sciences and Economics

(cross-leveled with ECONOM 4775). Development of Calculus of Variations and Optimal Control Theory. Applications. Extensions to stochastic and robust control.

Credit Hour: 1-3

Prerequisites: ECONOM 7370 or instructor's consent

ECONOM 8001: Topics in Economics- General

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hours: 3

Prerequisites: instructor's consent

ECONOM 8085: Problems in Economics

Graduate students may select topics for study and investigation subject to approval by supervising faculty.

Credit Hour: 1-99

ECONOM 8090: Research in Economics

Thesis research for M.A. degree. Graded on a S/U basis only.

Credit Hour: 1-99

ECONOM 8340: Game Theory

Game theory is the study of strategic behavior by agents who perceive themselves as "large" relative to the market and who therefore consider the effect of their behavior on others. This course examines the rigorous theory of strategic interaction of rational agents. May be repeated for credit.

Credit Hours: 3

Prerequisites: ECONOM 4351 or equivalent; MATH 1320 or equivalent. . Graded on A-F basis only

ECONOM 8370: Mathematics for Economics

The aim of this course is to cover essential mathematics used in economics. Topics include introductory linear algebra, multivariate calculus, comparative statics analysis, unconstrained optimization, and equality constrained optimization. May be repeated for credit.

Credit Hours: 3

Prerequisites: ECONOM 4351 or equivalent; MATH 1320 or equivalent. Graded on A-F basis only

ECONOM 8413: Research Workshop I

Required course for economics MA students. Combines instruction, student presentations, and seminar participation to introduce research methods and practice. A major research paper are required.

Credit Hours: 3

Prerequisites: ECONOM 8451, ECONOM 8453, and ECONOM 8472 or instructor's consent

ECONOM 8451: Microeconomic Theory

MA-level course in microeconomic theory. The course relies extensively on calculus to survey theories of: rational behavior in consumption, production, and pricing decisions of households and firms; partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition; and general equilibrium and welfare.

Credit Hours: 3

ECONOM 8453: Macroeconomic Theory

Basic models in macroeconomics will be covered with emphasis on assumptions and on how hypotheses can be tested. Course is an introductory survey for students intending to develop ability for research in macroeconomics.

Credit Hours: 3

Prerequisites: ECONOM 4353 or equivalent; at least concurrent enrollment in ECONOM 8451. Instructor's consent required for non graduate level students

ECONOM 8470: Dynamic Optimization

Topics to be covered include calculus of variations, optimal control theory, dynamic programming in discrete time variables, and economic modeling. The Eules Equation, the Transversally Condition and the Bellman Equation will also be covered.

Credit Hours: 3

Prerequisites: ECONOM 7370

ECONOM 8472: Econometric Methods I

Familiarizes students with fundamental techniques found and used in applied economic research. Topics include: ordinary least squares, generalized least square, instrumental variables, maximum likelihood estimation, and generalized methods of moments.

Credit Hours: 3

Prerequisites: STAT 7710 or instructor's consent

ECONOM 8473: Applied Econometrics

Topics include: nonlinear least squares, numerical optimization, maximum likelihood and basic panel data and time series methods. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECONOM 7371 and MATH 7140 or equivalent, or instructor's consent

ECONOM 9001: Topics in Economics

Selected current topics in economics.

Credit Hours: 3

ECONOM 9085: Problems in Economics

Graduate students may select topics for study and investigation subject to approval by supervising faculty.

Credit Hour: 1-99

ECONOM 9090: Research in Economics

Thesis research for Ph.D. degree. Graded on a S/U basis only.

Credit Hour: 1-99

ECONOM 9411: Advanced Labor Economics I

Analysis of the determination of wages and employment and the relation of trade unionism to the economy.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9412: Advanced Labor Economics II

Applications of contemporary analytical techniques to labor market topics chosen by the instructor.

Credit Hours: 3

Prerequisites: ECONOM 9411 and ECONOM 9452 or instructor's consent

ECONOM 9413: Research Workshop II

Introduces doctoral students to practices of preparing scholarly economic research by moving through the process of selecting a topic, identifying relevant literature, and communicating results. Graded on A-F basis only.

Credit Hour: 1-2

Prerequisites: ECONOM 9452, ECONOM 9454 and ECONOM 9474; PhD standing

ECONOM 9415: Advanced Public Economics I

Tax incidence and optimal taxation in static economies and issues of taxation in dynamic economies.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9416: Advanced Public Economics II

Macroeconomic issues of government finance. Theoretical and empirical analysis of Ricardian equivalence.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9426: International Trade

Pure theory of international trade and commercial policy.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9427: Topics in International Trade

The course will cover recent research in International Trade and important issues related to the impact of trade on economic growth and development. Topics include the relationship between trade and growth, the impact of international trade on firms, households and economic growth. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9430: Advanced Money and Banking

The working and structure of institutional arrangements, welfare aspects of structural policies, operation of money and credit markets, and behavior of returns on assets.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9431: Central Banking Policies

Examines central banking procedures, policies and the role they play in maintaining economic stability. Special attention to connection of Federal Reserve System with money and capital markets.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9446: Advanced Empirical Methods

Empirical and modeling techniques for evaluation of microeconomic policy questions.

Credit Hours: 3

Prerequisites: ECONOM 8451, ECONOM 8472

Recommended: Concurrent enrollment in ECONOM 8473 or ECONOM 9473

ECONOM 9447: Topics in Microeconomic Policy Analysis

(cross-listed with PUB_AF 9447). Applies the methods and techniques of microeconomics and to specific timely policy questions. Taught by applied-microeconomics faculty and focuses on current topics in labor economics, public economics, the economics of education, health economics, and other applied areas of microeconomics.

Credit Hours: 3

Prerequisites: ECONOM 8451, ECONOM 8472, ECONOM 9446

Recommended: Concurrent enrollment in ECONOM 8473 or ECONOM 9473

ECONOM 9451: Advanced Microeconomic Theory I

The theory of rational behavior and partial equilibrium in markets. Topics include consumer behavior, theory of the firm, decisions making under uncertainty, perfect competition, monopoly and monopsony, and imperfect competition. Graded on A/F basis only.

Credit Hours: 3

Prerequisites: ECONOM 9451 or instructor's consent; PhD standing

ECONOM 9452: Advanced Microeconomic Theory II

Survey of equilibrium theory and market failures in economics. Topics include the structure and modeling of games, and cooperative and non-cooperative equilibrium concepts.

Credit Hours: 3

Prerequisites: Economics [ECONOM] 9451 or instructor's consent

ECONOM 9453: Advanced Macroeconomic Theory I

Aggregate models of life-cycle microfoundations, of macroeconomics fluctuations and growth. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: departmental consent; PhD standing

ECONOM 9454: Advanced Macroeconomic Theory II

Analyzes topics in income analysis, including capital theory and economic dynamics.

Credit Hours: 3

Prerequisites: ECONOM 9453 or instructor's consent

ECONOM 9455: Monopoly and Competition

A survey of the theoretical and empirical literature on the organization of industries. Includes study of monopolized markets, competitive markets, and strategic interaction among firms in imperfectly competitive markets. Both the rationale and practice of anti-trust policy are studied.

Credit Hours: 3

Prerequisites: ECONOM 9452 and ECONOM 9471 or instructor's consent

ECONOM 9460: Development Economics

Theories of economic development critically examined. Sources and consequences of growth processes analyzed in context of economic theory and historical occurrence.

Credit Hours: 3

Prerequisites: ECONOM 8451 and ECONOM 8472

ECONOM 9471: Advanced Game Theory

Presents core concepts in game theory and illustrates their uses with a range of applications.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9472: Econometric Theory I

Analysis of linear regression models from an advanced statistical perspective.

Credit Hours: 3

Prerequisites: Department consent required

ECONOM 9473: Econometric Theory II

Analysis of nonlinear regression models and other essential econometric tools not covered in ECONOM 9472 from an advanced statistical perspective.

Credit Hours: 3

Prerequisites: ECONOM 9472 or instructor's consent

ECONOM 9474: Advanced Topics in Econometrics I

Equips students with some essential tools for conducting publishable econometric research. Topics at the discretion of the instructor - typically time series analysis. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECONOM 9473 or instructor's consent

ECONOM 9476: Advanced Topics in Econometrics II

Equips students with some essential tools for conducting publishable econometric research. Topics at the discretion of the instructor - typically microeconometrics.

Credit Hours: 3

Prerequisites: ECONOM 9473 or instructor's consent

ECONOM 9477: Advanced Topics in Econometrics III

Equips students with some essential tools for conducting publishable econometric research. Topics at the discretion of the instructor - typically the second semester of a two-semester time series sequence beginning with ECONOM 9474 or a two-semester microeconometrics sequence beginning with ECONOM 9476.

Credit Hours: 3

Prerequisites: ECONOM 9473 or instructor's consent

ECONOM 9480: Independent Readings for Ph.D. Comprehensive Examinations

Independent Readings for Ph.D. Comprehensive Exam. Graded on S/U basis only.

Credit Hour: 1-6

ECONOM 9484: Economic History

Techniques of the new economic history are explored in the context of European economic development.

Credit Hours: 3

Prerequisites: ECONOM 8451

Education Honors (EDUC_H)

EDUC_H 3050H: Special Readings in Education Honors

Directed study of literature and research reports in education.

Credit Hour: 1-4

Prerequisites: Honors eligibility required

EDUC_H 3060H: Honors Seminar in Education Honors

Credit Hour: 1-2

Prerequisites: Honors eligibility required

EDUC_H 3070H: Special Practicum in Education Honors

Directed practicum experience with students in educational settings.

Credit Hour: 1-4

Prerequisites: Honors eligibility required

EDUC_H 3080H: Honors Research in Education Honors

Joint research in education with a member of the education faculty.

Credit Hour: 1-4

Prerequisites: Honors eligibility required

EDUC_H 4996H: Undergraduate Reading Honors

This course is designed to introduce students to a variety of readings from a broad array of research, historical, contemporary and philosophical documents and writings. Selection of topics and additional readings are determined by the faculty instructor for the course. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent; Honors eligibility required

EDUC_H 4997H: Honors Undergraduate Seminar I

This class will consist of a 1 credit hour seminar. The class is designed to allow undergraduates to develop the skills necessary to engage in practical research for application within the field of teaching and education. The culminating assignment for the class is a proposal for a research poster or presentation to be presented at the undergraduate research fair held each year in May. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: instructor's consent; Honors eligibility required

EDUC_H 4998H: Honors Undergraduate Seminar II

The class will consist of a 1 credit hour seminar. The class is designed to allow undergraduates to develop the skills necessary to engage in practical research for application within the field of teaching and education. The culminating assignment for the class is the production of a research poster or presentation at the undergraduate research fair held each year in May. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: instructor's consent; GPA of 3.5 or higher. Honors eligibility required

EDUC_H 4999H: Honors Undergraduate Research Seminar

This class will be offered over 2 academic semesters and will consist of a 1-2 credit hour lab each semester with a College of Education faculty member working on an undergraduate research project. This course is designed as part of the Honors sequence. Graded on A-F only. Corequisites: EDUC_H 4997H and EDUC_H 4998H

Credit Hour: 1-2

Prerequisites: instructor's consent; Honors eligibility required

Educational Leadership and Policy Analysis (ED_LPA)

ED_LPA 3100: Foundations of Education

Focus on developing a theoretical and conceptual knowledge of leadership. In addition, skill building-exercises will take place through group case studies and role playing exercises allowing each student to identify and achieve methods for personal development.

Credit Hour: 1-3

ED_LPA 4060: Inquiring into Schools, Community and Society II

Required 3 hour course for students pursuing teacher certification. Designed to transition students into the teaching internship through study of teacher roles, school organizations and cultures, and community contexts.

Credit Hours: 3

Prerequisites: LTC 2040

ED_LPA 7060: Inquiring into Schools, Community and Society II

Required 3 hours course for students pursuing teacher certification. Designed to transition students into the teaching internship through study of teacher roles, school organizations and cultures, and community contexts. Prerequisites: LTC 2040 and LTC 7040

Credit Hours: 3

ED_LPA 7085: Problems in Educational Leadership and Policy Analysis

Problems in Educational Leadership and Policy Analysis

Credit Hour: 1-99

ED_LPA 7301: Topics in Educational Leadership and Policy Analysis

Group study of topics in educational leadership, policy analysis, and higher and continuing education.

Credit Hour: 1-99

ED_LPA 7458: Sociology of Education

(same as SOCIOL 7410; cross-leveled with SOCIOL4410). Contexts, structures and processes of schooling; effects on class, race, ethnicity and gender; social change, educational policy, and organizational dynamics; higher education and the economy.

Credit Hours: 3

Prerequisites: SOCIOL 1000 or equivalent

ED_LPA 7822: College Teaching with Technology I

Examines the use of educational technologies, both class room based (e.g., student response systems) and online (e.g., course management's systems), to assist in the dissemination of course resources and the facilitation of student interaction.

Credit Hour: 1

ED_LPA 7823: College Teaching with Technology II

Integrates learning technologies into the traditional framework of a face-to-face course by creating a course website and developing technical proficiency with relevant educational technologies.

Credit Hour: 1

Prerequisites: College Teaching I or instructor's consent

ED_LPA 8409: Learning, Curriculum and Assessment for School Leaders

Addresses assessment, learning and curriculum and the integration of the instructional and assessment processes. Topics include authentic assessment, curriculum alignment, cognition and learning, instructional approaches, and application of student learning theory to the curriculum.

Credit Hours: 3

ED_LPA 8410: Learning Cultures

Integrates the themes of building a common purpose to enhance school culture, empowering teachers and students, and diversity. Topics include importance of shared mission and vision, the use of group processes and collaboration, the intricacies of school culture, and ethical and moral leadership.

Credit Hours: 3

ED_LPA 8411: Professional Development for Learning

Focuses on the professional development and reflection on practice. Topics include organizational actions and personal responsibility, life-long learning, and public education in a democratic society.

Credit Hours: 3

ED_LPA 8412: School Improvement

This course addresses the topics of organizational management and personal inquiry. It covers issues such as organizational effectiveness, organizing for an effective school environment, legal and fiscal decision-making and responsibilities of school leaders, creating an environment where stakeholders acquire and utilized data to inform decisions and practice, and where action research methods are utilized to evaluate and inform practice.

Credit Hours: 3

ED_LPA 8413: Internship

The internship experience provides the opportunity for the student to assume a leadership role associated with instructional improvement. Graded on S/U basis only.

Credit Hour: 1-11

ED_LPA 8414: Current Issues in Site-Level Leadership

This course is designed to introduce students to the rigors of the principalship. Topics will include issues affecting beginning principals, school cultures, and the use of technology for communication and research.

Credit Hours: 3

ED_LPA 8415: Leadership for Collaborative Cultures

This course will instill an understanding of major components of purposeful, systemic change, interpersonal relationships, communication and organizational management. The development of an appreciation of diversity, equity, and democracy for all students will be an ongoing theme of the course.

Credit Hours: 3

ED_LPA 8416: Foundations of School Leadership

School leader knowledge of student learning theory and related instructional practices is the focus of this course. The problem-based learning format will include topics on school culture, leadership communication, technology, and conflict resolution. Issues concerning professional relationships are also addressed.

Credit Hours: 3

ED_LPA 8417: Site-Level Organization and Leadership

Student will study state and national regulations that affect Missouri school policies. The student will develop a database on various legal issues. A study of middle level education will conclude with on-site evaluation of a local middle school.

Credit Hours: 3

ED_LPA 8418: Supervision for Learning Environments

Students are prepared to articulate, recognize, and support classroom practices that reflect the most current principles of learning. Effective instructional strategies that link this knowledge to practice will be entered into a computer database.

Credit Hours: 3

ED_LPA 8419: Structures and Processes for Effective Schools

Emphasis is placed on the Missouri Comprehensive Guidance Program and positive strategies for working with challenging students. A continuation of the study of state and national legal and policy issues will focus on special programs and services.

Credit Hours: 3

ED_LPA 8420: Curriculum for Site-Level Leadership

Student and program assessment are the primary topics for this course on curricular leadership. Class participants are engaged in the development of authentic experiences using technology to develop and apply the testing and assessment knowledge appropriate to school leaders.

Credit Hours: 3

ED_LPA 8421: Action Research in School Leadership

Databases on legal and policy issues are completed and merged into a single database and placed on the specialist program web site. Site and classroom level action research is investigated, concluding with an assessment of local action research efforts in area schools.

Credit Hours: 3

ED_LPA 8422: Advanced Problems of Leadership Practice

This pre-internship course is a study of team building, program assessment, and site-based management. Addressing problems through a comprehensive school improvement approach with practicing principal will serve to prepare the students for internship experiences.

Credit Hours: 3

ED_LPA 8423: Advanced Leadership for Learning Environments

Students will demonstrate their understanding of instructional improvement for all teachers and students by designing and defending a comprehensive strategy for instructional changes in a simulated school. The ongoing study of learning principles and effective instructional practices will be concluded.

Credit Hours: 3

ED_LPA 8424: Education Politics and Policymaking

This course examines the politics and policymaking process of education in the United States, paying particular attention to the influence of various institutions and actors at local, state, and federal levels. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 8428: Curriculum Leadership

A study of research, theory, and skills necessary for curriculum leadership in educational organizations. Course includes generic curriculum management processes, design trends, controversial issues multi-media, innovative instructional techniques, and program evaluation.

Credit Hours: 3

ED_LPA 8430: School Law and Finance for Principal Leadership

Designed to engage learners in examination of the legal (judicial and legislative) system, school law, and finance policies that govern public schools and their fiscal resources in the United States and the State of Missouri. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 8431: Leadership for Data-Driven Change

This course instructs school leaders on how to use data for school improvement. Students will: identify reliable sources of data; develop, implement, and monitor strategic School Improvement Plans using data; analyze data using technology; and describe evidence-based strategies that respond to data analysis. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 8432: Introduction to Improvement Systems in Education

This course explores tools and techniques of comprehensive school improvement systems, including theoretical, historical, and empirical frameworks in the field. Intended for school administrators, board members, and teacher-leaders involved in school improvement.

Credit Hours: 3

ED_LPA 8653: Education Toward Bi/Multilingualism: Theory, Policy, and Practice

(same as LTC 8653). Overview of the theory, policy, and practice of using at least two languages in education to develop children's bi/multilingualism. Key topics include: (1) models of bilingual/multilingual education; (2) policy and politics of language education in the U.S. and international contexts; (3) psycholinguistic and sociocultural perspectives on bi/multilingual language development, as related to schooling; and (4) evaluation and assessment issues in bi/multilingual education.

Credit Hours: 3

ED_LPA 8955: Discourse Analysis in Education

(same as LTC 8955). This course introduces the theories and methods of discourse analysis, including conversation, critical discourse, and multimodal. Students will analyze the role of context and ethics, as they transcribe and analyze discourse, especially from analytical settings. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ESC_PS 8957 and ESC_PS 9620

ED_LPA 8957: Qualitative Methods in Educational Research I

(same as LTC 8957 and ESC_PS 8957). This course provides a practical introduction to qualitative research and its applications in education and social sciences. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 9090: Research in Educational Leadership and Policy Analysis

Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: departmental consent

ED_LPA 9095: Problems in Educational Leadership and Policy Analysis

Credit Hour: 1-99

Prerequisites: instructor's consent

ED_LPA 9400: Social Theory in Education

Students will examine the relationship of society and education through a variety of theoretical perspectives and empirical studies. These theories deal with the relation of education to society as a whole, and the relation between education and the state. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 9401: Educational Leadership

Critical examination of key leadership theories and their application to various educational contexts. Includes consideration of research methods and designs appropriate for the study of leadership and the spectrum of lenses through which educational leadership is studied.

Credit Hours: 3

ED_LPA 9402: Educational Policy Analysis

Course centers on developing multiple understandings of the education policy making process. Theoretical constructs used to advance those

understandings are eclectic in nature, drawing from the fields of political science, history, sociology and economics.

Credit Hours: 3

ED_LPA 9403: Organizational Analysis

Analysis of organizational characteristics and principles in educational organizations. Topics include: Organizational theories and models, organizational culture, communication, innovation, planning, leadership, power and influence, and external environment influences.

Credit Hours: 3

ED_LPA 9404: Inquiry into Educational Leadership and Policy Analysis

A critical overview of theory development, research paradigms, and research ethics in the department of Educational Leadership and Policy Analysis. Required for all ELPA Ph.D. students.

Credit Hours: 3

Recommended: for students who have completed at least 2 semesters of coursework

ED_LPA 9405: Seminar in Educational Leadership and Policy Analysis

Seminar in Educational Leadership and Policy Analysis

Credit Hour: 1-99

ED_LPA 9406: Seminar in Educational Administration

Seminar in Educational Administration

Credit Hour: 1-99

ED_LPA 9407: Seminar in Educational Policy

Seminar in Educational Policy

Credit Hour: 1-99

ED_LPA 9408: Seminar in Higher Education

Seminar in Higher Education

Credit Hour: 1-99

ED_LPA 9409: Introduction to Research Design

This course provides an introduction to quantitative, qualitative, and mixed methods research, with an emphasis on the epistemological and ontological issues that inform our choice of research methods. This course is intended for first year doctoral students. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 9424: Superintendent: Instructional Leadership

Effective superintendents understand educational core knowledge of curriculum, instructional and assessment. They establish an exception for the use of best instructional practices for all students among both the educational and public communities. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 9427: School Budget Development and Fiscal Management

This course includes an overview of school finance programs of the 50 states, including special funds for exceptional children and compensatory education. Various aspects of planning, accounting, auditing, and reporting related to budget development and fiscal management are covered.

Credit Hours: 3

ED_LPA 9429: Superintendent: Communication, Team Leadership

Effective superintendents negotiate political and cultural challenges to lead diverse, socially-just school systems. Reflective practices that enhance competence in public board member, and district personnel relationships are essential skills. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 9430: Superintendent: Fiscal, Legal Leadership

Effective superintendents efficiently manage finances and ensure that rules, regulations, and policies adhere to statutory/case law. Fiscal and legal practices ensure equity of educational experiences for all students. Open to all graduate students. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 9437: Topics in Educational Leadership and Policy Analysis

Topics in Educational Leadership and Policy Analysis

Credit Hour: 1-99

ED_LPA 9439: Applying Higher Education Research to Practice

This course introduces quantitative, qualitative, and mixed within a student affairs context. Students will become familiar with, and able to critique research. Course graded on A-F basis only.

Credit Hours: 3

ED_LPA 9440: Race, Gender, and Ethnicity in Higher Education

(same as WGST 9440). Historical and current issues of race, gender, and ethnicity in colleges and universities in the U.S. Issues include: students, faculty, and staff experiences of diversity, access and equity, and salience of diversity in a higher education setting.

Credit Hours: 3

ED_LPA 9441: The Adult Learner

The identification of learning, motivation and participation patterns among adults will be examined. Learning theories and adult development life-cycle and stage research data will be explored as well as their implications for practice.

Credit Hours: 3

ED_LPA 9442: Curriculum Philosophy and Development in Higher Education

A study of the philosophical foundations of postsecondary curricula, current trends and issues, and approaches to curriculum reforms and revisions.

Credit Hours: 3

ED_LPA 9444: Program Planning in Higher Education

Analysis of program planning and evaluation in higher education. Topics include: conceptualizations of program planning, situational analysis, needs assessment, priority setting, marketing and promotion, and program evaluation.

Credit Hours: 3

ED_LPA 9445: College Student Development

Emphasis on college student development theory and its application in student affairs work.

Credit Hours: 3

ED_LPA 9446: Student Affairs Administration

History, philosophy, theory, and issues pertinent to student affairs work.

Credit Hours: 3

ED_LPA 9447: College Student Culture and Environment

This course examines the characteristics and outcomes of American undergraduates, and the aspects of the college environment the differentially influence students. Topics include: theoretical models of students change, campus climate and cultures, learning communities, institutional differences, and conditions for success.

Credit Hours: 3

ED_LPA 9448: College Teaching

Designed to introduce students to theories and practices central to teaching in a higher education setting. Teaching related to institutional contexts and disciplines will be considered. Teaching and learning theories will be introduced.

Credit Hours: 3

ED_LPA 9449: History of Higher Education in the United States

A study of the transformation of the English college tradition to what higher education is currently in the United States. The emphasis is on how institutions of higher learning changed to meet the needs of the nation or failed to do so.

Credit Hours: 3

ED_LPA 9450: Administration and Governance of Higher Education

Principles of administration, academic culture and environment, and structures of governance of higher education will be explored.

Credit Hours: 3

ED_LPA 9451: Higher Education Finance

How students pay for college and how institutions finance their operations is explored through the lens of economics. Topics include: Theories of student access, tuition and financial aid policy, institutional costs and revenue patterns, and resource allocation models.

Credit Hours: 3

ED_LPA 9452: Overview of Higher Education

This course provides an overview of American Higher education. Emphasis is placed on how these institutions currently operate and what issues dominate current discussions of academe.

Credit Hours: 3

ED_LPA 9453: Continuing Education for the Professions

Comparative study of education for the professions. Examination of professions as occupations, approaches and goals of preparatory and continuing education, professionals as adult learners and influence of intra-profession issues and societal exchange on education.

Credit Hours: 3

ED_LPA 9454: Introduction to Post-Secondary Law

Examination of the legal structure within which higher education operates. Includes consideration of legal analysis of case law, institutional responsibilities under the law, and analysis of legal issues within postsecondary education.

Credit Hours: 3

ED_LPA 9455: The Community College

An overview of the community college. Topics include historical roots and development of the community college, organization and governance, finance, students, faculty, administrators, curriculum, social role, and recurring and emerging issues.

Credit Hours: 3

ED_LPA 9456: The Professoriate

Overview of faculty roles and work in U.S. colleges and universities. Explores institutional and disciplinary differences and seeks to prepare future faculty for academic life.

Credit Hours: 3

ED_LPA 9457: Higher Education Policy

An overview of current higher education policy issues facing governmental bodies and institutions. An emphasis is placed on investigating both the policy-making and policy-evaluation processes through multiple theoretical lenses. Specific topics explored include access, equity, and accountability within the higher education setting.

Credit Hours: 3

ED_LPA 9459: Comparative and International Education

Theories, methods and issues in the field of comparative and international education. Topics cover PK-16 education and include globalization, centralization and decentralization, equity and equity, teaching and student learning, and social context of education.

Credit Hours: 3

ED_LPA 9460: Philosophic Theory in Education

Examines major ideological movements in modern education; their social antecedents and philosophic underpinnings.

Credit Hours: 3

ED_LPA 9461: Ethics in Education

Explores the ethical dimensions of work within and related to educational settings focusing on dilemmas that occur in professional practice, theories that inform thinking about ethical issues, and frameworks that guide ethical decision making.

Credit Hours: 3

ED_LPA 9462: History of U.S. Education Policy

Provides overview of major US education issues (primary K-12), explores analytic tools for studying history of education and introduces multiple ways of constructing the history of a particular movement reform or era in education.

Credit Hours: 3

ED_LPA 9463: Politics of Education

Focuses on politics of education in the United States, attending to the influence of various institutions and actors at local, state, and federal levels. Students will examine current reforms in PK-12 education and their impact on the future of education.

Credit Hours: 3

ED_LPA 9464: Theory and Practice in Multicultural Education

Designed to give educational professionals a better understanding of the theoretical foundations of multicultural education as well as current practices in this field.

Credit Hours: 3

ED_LPA 9465: Policy Analysis Using Large Data Bases

Intends to develop students' capacity to process national level large databases and to conduct policy-related research.

Credit Hours: 3

Prerequisites: an understanding of inferential statistics and experience with SPSS and SAS program

ED_LPA 9469: Education Leadership Inquiry IV

Developing and writing research proposals and conducting pilot studies. Knowledge and skills in writing the research report and sharing research with others.

Credit Hour: 1

Prerequisites: ED_LPA 9471, ED_LPA 9472 and ED_LPA 9473. Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9470: Organizational Analysis for Educational Leadership

Schools of organizational theory, six frames to analyze organizations and their underlying concepts, organizational change and leadership for change, and rationale for reframing organizations.

Credit Hours: 4

Prerequisites: Open only to students in Ed.D. program in Educational Leadership

ED_LPA 9471: Educational Leadership Inquiry I

Introductory seminar on evaluating research using, APA Publication guidelines, writing scholarly publications, and using computer technology for literature searches.

Credit Hours: 2

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9472: Educational Leadership Inquiry II

MU Graduate School policies related to doctoral research, use of multiple search sources, human subjects review process, and research ethics.

Credit Hour: 1

Prerequisites: Open only to students in Ed.D. program in Educational Leadership

ED_LPA 9473: Educational Leadership Inquiry III

Knowledge and skills in applying planning procedures for development and implementation of future dissertation research.

Credit Hour: 1

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9474: Professional Seminar I

Focuses on diversity and ethics in educational leadership and educational organizations. Students learn about professional development, professional practice, and professional service. May be repeated for credit.

Credit Hour: 1

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9475: Professional Seminar II

Problem-based learning via the Internet to make decisions involving professional practice and problem solving. The UCEA Internet program, Information Environment for School Leader Preparation, is used. May be repeated for credit.

Credit Hour: 1

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9476: Leadership Theory and Practice

An advanced study of leadership theories, concepts, and inquiry as applied to educational organizations. Explores power and authority in organizations, leader effectiveness, and organizational reform.

Credit Hours: 3

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9477: Leadership Theory and Practice Application

Focuses on building understanding of the conduct of leadership in organizations through application and extension of leadership theories in practice.

Credit Hour: 1

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9478: Policy Analysis for Educational Leadership

Analysis and investigation of educational policy utilizing various knowledge bases; organizational politics and culture's impact on policy processes; interpretation and application of policy-making activities.

Credit Hours: 4

Prerequisites: Open only to students in Ed.D. Program in Ed. Leadership

ED_LPA 9479: Content and Context of Learning

Students develop the knowledge and skills for examining designing, and implementing organizational, classroom, and training conditions that support quality learning experiences for learners.

Credit Hours: 3

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9480: Team Building and Group Dynamics

Stages of group development, team building and maintenance, team/group structures, team performance, problem-based learning as team process, and empowerment through development of self-managed teams.

Credit Hour: 1

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9481: Internship in Educational Leadership and Policy Analysis

Some sections may be graded on A-F or S/U basis only.

Credit Hour: 1-99

Prerequisites: departmental consent

ED_LPA 9482: Quantitative Tools for Applied Research in Educational Leadership

General introduction to quantitative methods of data analysis. Develop concepts of measurement, design, and analysis. The focus is on data driven decision making and using various quantitative methods to investigate problems of educational leadership practice. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Only students in the Statewide Cooperative Ed.D. program in Educational Leadership can enroll

ED_LPA 9483: Qualitative Tools for Applied Research in Educational Leadership

Students will learn about a number of qualitative research designs that leaders can use to critically examine research questions in their practice. They will also learn to analyze educational issues and execute processes to effectively explore those issues. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to students in the Statewide Cooperative Ed.D. Program in Educational Leadership

ED_LPA 9484: Program Evaluation and Planning for Educational Leaders

Participants develop thorough knowledge of theoretical underpinnings of selected approaches to program planning and evaluation and their necessary integration. Affords participants the opportunity to plan, conduct and deliver the results of a program evaluation to actual client. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Only students in the Statewide Cooperative Ed.D. Program in Educational Leadership can enroll

ED_LPA 9620: Qualitative Methods in Educational Research II

(same as ESC_PS 9620 and LTC 9620). This course constructs a conceptual and methodological bridge between the understandings of qualitative research developed in Qualitative Methods I and more advanced study of theories, designs, and methods. The focus is on theory, approaches to data analysis, and interpretation. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ESC_PS 8957

Educational, School and Counseling Psychology (ESC_PS)

ESC_PS 1901: Topics in Educational School, and Counseling Psychology - General

Topics place holder for lower division courses.

Credit Hour: 1-3

ESC_PS 2000: Experiencing Cultural Diversity in the United States

The purpose of this course is to examine cultural diversity in U.S. Society, to increase self-awareness related to worldviews and beliefs about diversity issues, and to increase understanding of the intersections of multiple group identities. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 2010: Inquiry Into Learning I

This course is designed to focus students on the central themes of learning and teaching. Emphasis will be placed on the interaction of theory, philosophy and practice as related to the field of education. Required for Phase II of the certification program.

Credit Hours: 3

ESC_PS 2014: Inquiry into Learning I - Field Experience

This field experience course supports the Inquiry into Learning I, component of Phase I. Graded on S/U basis only.

Credit Hour: 1

Recommended: departmental consent

ESC_PS 2014H: Inquiry into Learning I - Field Experience - Honors

This field experience course supports the Inquiry into Learning I, component of Phase I. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: Honors eligibility required

Recommended: Departmental consent

ESC_PS 2100: Career Explorations

Contribution of career development theory to choice of career and/or major. Exploration of personal and social determinants of career choice. Class consists of lecture, laboratory experiences, and use of facilities at the Career Planning and Placement Center. Some sections may be graded on either A-F basis or S/U basis only.

Credit Hour: 1-3

ESC_PS 2350: Transforming Stress: Heart Rate Variability Biofeedback

This course will offer an in-depth opportunity to learn the philosophy and management of stress through a computer-based biofeedback system. Students will develop a personal practice, track their progress and learn skills in using this technology for a range of concerns.

Credit Hour: 1

ESC_PS 2400: Learning and Instruction

The nature of human learning processes with implications for instruction. Emphasis on bases of and readiness for learning, types of learning, memory forgetting and transfer, and related topics.

Credit Hours: 2

ESC_PS 2500: Child Development

The psychological, intellectual, social, and physical development of children.

Credit Hours: 3

ESC_PS 2700: Psychological Perspectives in Sport

Survey of sport psychology literature with focus upon such topics as personality, positive and negative affect, cognitive and behavioral intervention, motivation, aggression, audience effects, team cohesion, team building, leadership, exercise, and multicultural issues.

Credit Hours: 3

ESC_PS 2901: Topics in Educational School, and Counseling Psychology - General

Topics place holder for lower division courses.

Credit Hour: 1-3

ESC_PS 3085: Problems in Educational, School, and Counseling Psychology

Credit Hour: 1-3

Recommended: instructor's consent

ESC_PS 3100: African-American Psychology

(same as BL_STU 3100 and PSYCH 3880). The research, theories and paradigms developed to understand the attitudes, behaviors and psychosocial realities of African-Americans are discussed.

Credit Hours: 3

Prerequisites: PSYCH 1000

ESC_PS 3200: Black Feminism

This course outlines the basic principles and practices of Black feminism in the United States. Examination of the multiple systems of oppression on Black women's lives and Black women's collective actions against social structures will occur.

Credit Hours: 3

Recommended: PSYCH 1000 or instructor's consent

ESC_PS 3901: Topics in Educational School, and Counseling Psychology - General

Topics place holder for lower division courses.

Credit Hour: 1-3

ESC_PS 4087: Seminar in Educational, School, and Counseling Psychology

Credit Hour: 1-3

Recommended: instructor's consent

ESC_PS 4115: Human Learning

An introduction to the basic principles of learning. Focus is on principles of learning which have the greatest utility for professional educators. This course provides a foundation for more advanced courses in human learning.

Credit Hours: 3

ESC_PS 4120: Foundations of Counseling Psychology

Survey of contemporary theories underlying individual feminist, family systems, and multicultural approaches to counseling. Introduction to professional and ethical issues in Counseling Psychology.

Credit Hours: 3

Recommended: departmental consent

ESC_PS 4160: Developmental Aspects of Human Learning

Investigates aspects of human development that affect classroom learning. Topics include parenting style, divorce, friendship, mental health, attachment, play, aggression, culture, and media.

Credit Hours: 3

ESC_PS 4170: Introduction to Applied Statistics

Introduces statistical techniques including descriptive statistics, correlation, simple regression and hypothesis testing. Math Reasoning Proficiency Course.

Credit Hours: 3

Recommended: College Algebra or equivalent

ESC_PS 4185: Health Behavior: Drug and Sexuality Education

Psychological, social, and physical factors related to drug taking and sexuality behaviors.

Credit Hours: 3

Recommended: instructor's consent

ESC_PS 4200: Positive Psychology

Using self-actualization and self-determination theory, the course builds on identifying personal strengths in people. An emphasis is placed on developing interventions that promote positive thinking. Some sections graded on either A-F or S/U basis only.

Credit Hours: 3

ESC_PS 4460: Exploring Mental Health Issues in Schools

This course is an introduction to the mental health challenges found in schools. It provides education professionals with the knowledge and basic skills to promote positive mental health practices in the schools.

Credit Hours: 3

ESC_PS 4901: Topics in Educational School, and Counseling Psychology - General

Topics place holder for lower division courses.

Credit Hour: 1-3

ESC_PS 4960: Readings in Educational, School, and Counseling Psychology

Credit Hour: 1-3

Recommended: instructor's consent

ESC_PS 7000: Foundation of Teacher Prep I

Designed for graduate students seeking teacher certification, this course addresses content and application in comprehensive classroom management, development, behavior management, and diversity. Field work is required and integrated with course content.

Credit Hours: 3

Prerequisites: PSYCH 1000

ESC_PS 7087: Seminar in Educational, School, and Counseling Psychology

Credit Hour: 1-3

Prerequisites: instructor's consent

ESC_PS 7100: Theories and Applications of Educational Psychology

An introduction into the ideas and purpose of Educational Psychology in human development, learning, assessment/measurement and education.

Credit Hours: 3

Prerequisites: PSYCH 1000

ESC_PS 7115: Human Learning

An introduction to the basic principles of learning. Focus is on principles of learning which have the greatest utility for professional educators. This course provides a foundation for more advanced courses in human learning. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ESC_PS 4100 or ESC_PS 7100

ESC_PS 7120: Foundations of Counseling Psychology

Survey of contemporary theories underlying individual, feminist, family systems, and multicultural approaches to counseling. Introduction to professional and ethical issues in Counseling Psychology.

Credit Hours: 3

Prerequisites: departmental consent

ESC_PS 7130: Parent Counseling and Consultation

For personnel working with parents in professional settings. Examines current family needs and child-rearing practices. Basic skills in diagnosis, counseling, consultation, parent education are developed.

Credit Hours: 3

Prerequisites: ESC_PS 4120 or ESC_PS 7120

ESC_PS 7150: Interviewing and Counseling

Study of beginning interviewing and counseling skills applied to helping relationships in human services professions. Emphasis placed on learning helping skills in small group format. Lab required.

Credit Hours: 3

Prerequisites: PSYCH 1000 or PSYCH 1010

ESC_PS 7160: Developmental Aspects of Human Learning

Investigates aspects of human development that affect classroom learning. Topics include parenting style, divorce, friendship, mental health, attachment, play aggression, culture, and media. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 7170: Introduction to Applied Statistics

Introduces statistical techniques including descriptive statistics, correlation, simple regression and hypothesis testing. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: College Algebra or equivalent

ESC_PS 7180: Foundations of Rehabilitation

The vocational and independent living rehabilitation system for disabled persons. Concept of disability, its social psychological implications, and techniques of preparing disabled persons for adult adjustment.

Credit Hours: 3

Prerequisites: PSYCH 1000

ESC_PS 7185: Health Behaviors: Drug and Sexuality Education

Psychological, social and physical factors related to drug taking and sexuality behaviors.

Credit Hours: 3

Prerequisites: LTC 1310 or equivalent or instructor's consent

ESC_PS 7190: Alcohol Abuse and Rehabilitation I

Covers historical perspective, definition and measurement of the problem, classifications and theories about the etiology of alcoholism.

Credit Hours: 3

Prerequisites: ESC_PS 4120 or ESC_PS 7120 or ESC_PS 4180 or ESC_PS 7180 or instructor's consent

ESC_PS 7195: Sport and Applied Coaching Psychology

Sport and Applied Coaching Psychology is a fusion of positive psychology and sport psychology. Positive psychology teaches coaches a healthy approach based in positive motivation and behavior modeling. Sport psychology helps coaches identify with the mental training of athletes and its role in delivering maximum performance. Course focus is on helping coaches maximize the potential of their athletes and teams, while also building upon their emotional and psychological wellbeing.

Credit Hours: 3

ESC_PS 7200: Positive Psychology

Positive psychology explores what is positive, creative, and fulfilling in human behavior. It is the scientific study of well-being and flourishing:

what people do right. This course will examine cornerstones and key concepts such as emotions, engagement, relationships, strengths, virtues, meaning, and purpose. Proven as a very effective application in the realms of organizations, governments, businesses, education, counseling, etc., it is best originally understood by applying it to oneself.

Credit Hours: 3

ESC_PS 7220: Measurement of Cognitive Abilities

Analysis of the function of psychological testing and a critical examination of various achievement, aptitude, and intelligence assessment instruments.

Credit Hours: 3

ESC_PS 7460: Foundations of School Mental Health

Explores the history, foundations, and implementation of an expanded framework of school mental health focusing on collaborative and interdisciplinary approaches to supporting the wellness and school success of youth. Introduces professional working in or with schools to the school mental health framework emphasizing a behavioral health continuum of care, links between mental health and academic performance, a comprehensive system of learning supports, and data-based decision-making.

Credit Hours: 3

ESC_PS 8000: Advanced Child Development

Psychological development from birth to adolescence. Examines the influence of maturation and learning upon the acquisition of normal development tasks. Emphasizes the application of current research and theory with the school-age child.

Credit Hours: 3

Prerequisites: ESC_PS 4100 or ESC_PS 7100

ESC_PS 8010: Advanced Adolescent Development

Analysis of normal adolescent psychological development, including the cognitive, affective, academic, physiological, moral and social parameters. Applications with typical adolescent problems are emphasized.

Credit Hours: 3

Prerequisites: ESC_PS 4100 or ESC_PS 7100

ESC_PS 8015: Child and Adolescent Development

A comprehensive analysis of normal development across the lifespan with a primary focus on children and adolescents. Will investigate the cognitive, affective, academic, physical, moral and social/cultural/racial domains. Examples of atypical development will be discussed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ESC_PS 4100 or equivalent

ESC_PS 8020: Overview of Research Methods

Survey of research design and methods of data collection for masters, educational specialists, and doctoral students.

Credit Hours: 3

Prerequisites: ESC_PS 7170 or instructor's consent

ESC_PS 8030: Role and Function of the School Psychologist

Introduction to major helping relationship approached in School Psychology, applied to various professional settings. History, current issues, trends, professional organizations, legal/ethical standards, discussed.

Credit Hours: 3

Prerequisites: enrollment in Educational School, and Counseling Psychology Program

ESC_PS 8040: Counseling Methods and Practices

Introduction to counseling microskills and techniques, with attention to case conceptualization, therapeutic alliance, and counseling process. Laboratory experience in demonstrating skills and the ability to form an effective counseling relationship is required.

Credit Hours: 3

ESC_PS 8050: Marriage and Family Counseling

Appropriate for students who work with couples and families in a professional setting. Examines major family and marriage theories and research, counseling, skill development communication, and marital/family enrichment.

Credit Hours: 3

Prerequisites: ESC_PS 8040

ESC_PS 8060: Lifespan Development

A comprehensive analysis of normal development across the lifespan with a primary focus on children and adolescents. Will investigate the cognitive, affective, academic, physical, moral, social/cultural/racial, religious/spiritual and sexual domains. Examples of atypical development will be discussed.

Credit Hours: 3

Prerequisites: ESC_PS 4100 or equivalent. Consent of instructor required

ESC_PS 8070: Ethical and Legal Issues in Psychological Practice

Legal and ethical concepts and issues relevant to the practice of psychology and student personnel services.

Credit Hours: 3

Prerequisites: ESC_PS 4120 or ESC_PS 7120 or instructor's consent

ESC_PS 8082: Foundations of Educational and Psychological Measurement

Basic principles of educational and psychological measurement including test construction, validity, reliability, item analysis, and derived scores.

Credit Hours: 3

Prerequisites: ESC_PS 4170 or ESC_PS 7170 or instructor's consent

ESC_PS 8085: Problems in Educational, School, and Counseling Psychology

Credit Hour: 1-3

Prerequisites: instructor's consent

ESC_PS 8087: Seminar in Educational, School, and Counseling Psychology

Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: instructor's consent

ESC_PS 8090: Master's Thesis in Educational, School, and Counseling Psychology

Independent research leading to Master's Thesis. Graded on S/U basis only. Prerequisites: advisor's consent

Credit Hour: 3-6

ESC_PS 8095: Research in Educational, School, and Counseling Psychology

Supervised research that is independent of master's thesis or doctoral dissertation. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: advisor's consent

ESC_PS 8100: Psychological Assessment of Children and Adolescents: Cognitive Assessment

Basic principles in intelligence theory and intermediate measurement concepts. Practice in administering, scoring, and interpretation of data from individually administered intelligence tests with school aged children and adolescents. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

ESC_PS 8110: Methods in Group Counseling

Study of group counseling methods and techniques. Participation in a group is required.

Credit Hours: 3

Prerequisites: ESC_PS 8040, demonstrated knowledge of ethical principles and departmental consent

ESC_PS 8120: Psychological Assessment of Children and Adolescents: Psychoeducational Assessment

Practice in administering, scoring, and interpretation of data from academic achievement, nonverbal intelligence, memory, adaptive behavior, and perceptual/motor assessments with school-age youth and adolescents.

Credit Hours: 3

Prerequisites: ESC_PS 8100 and instructor's consent

ESC_PS 8125: Professional Iss. in Sch. Psych. I: Hist., Trends & Ethical Pract.

For first-year doctoral students in school psychology. History, current issues, trends, professional organizations, legal-ethical standards of doctoral level school psychology are discussed. The scientist-practitioner model and scientific reasoning process as they apply to both science and practice are reviewed.

Credit Hours: 3

Prerequisites: Must be admitted to school psychology program

ESC_PS 8130: Psychological Assessment of Adults

Students develop and practice skills in writing psychological reports with special emphasis on assessing psychological social-vocational functioning.

Credit Hours: 3

Prerequisites: ESC_PS 8100

ESC_PS 8135: Foundations of Career Psychology

Theoretical orientations to counseling for career development; nature and structure of work, education, and leisure; work and family issues; career concerns of special populations; use of career information in counseling.

Credit Hours: 3

Prerequisites: PSYCH 1000

ESC_PS 8140: Psychological Assessment in Children and Adolescents: Behavior and Social Emotional Assessment

This course introduces behavior theory, behavioral and social-emotional assessment techniques (including observations, interviewing, rating scales, and projective techniques) and their link to relevant interventions, with a primary focus on school-age youth and adolescents.

Credit Hours: 3

ESC_PS 8145: Psychological Interventions with Children and Adolescents: Behavioral Intervention

This course will emphasize behavioral theory, assessment, and intervention, including functional behavior assessment, positive behavior supports, and the conceptualization from an individual, systems, and public health perspective. Graded on A-F basis only

Credit Hours: 3

ESC_PS 8160: Psychological Interventions with Children and Adolescents: Educational Instruction

This course investigates models of school instruction in both general and special education, and how instruction can be adapted for learners who exhibit a range of academic and psychological problems and disabling conditions.

Credit Hours: 3

Prerequisites: ESC_PS 8100, ESC_PS 8120 and instructor's consent

ESC_PS 8165: Psychological Interventions with Children and Adolescents: Evidence- Based Therapies

An introduction to evidence-based child and adolescent psychotherapies, including individual and group interventions. Various aspects will be considered including assessment, diagnosis, and treatment planning. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8170: Career Resources in Business and Industry

Personnel practices, occupational requirements, and career opportunities and resources in business and industry. Applications are emphasized through on-site visits and use of business-industry-labor personnel. Graded on S/U basis only.

Credit Hour: 2-4

Prerequisites: ESC_PS 8135 or instructor's consent

ESC_PS 8180: Theory and Practice in Career Psychology

Methods and programs for facilitating the career development of individuals over the life span. Organization and development of activities and programs for all ages emphasized.

Credit Hours: 3

Prerequisites: ESC_PS 8135

ESC_PS 8185: Health Promotion

An overview of the important concepts of health promotion. Emphasis on specific health-related problems and issues, health behavior change, and the design, development implementation, and evaluation of comprehensive health promotion programs.

Credit Hours: 3

Prerequisites: LTC 1310 or equivalent or instructor's consent

ESC_PS 8195: Applied Positive Coaching

Explores concepts of sport, coaching and positive psychology, particularly the interventions and applications designed to further develop a coach's philosophy, communication skills, understanding of motivation, leadership skills, and the coach's and athlete's well-being. Prerequisites: ESC_PS 7195

Credit Hours: 3

ESC_PS 8200: Applied Positive Psychology

This course will require students to implement positive psychology concepts from the introductory course into their personal, professional, and/or social lives. We will also study specific ways in which these concepts and theories are being applied throughout various realms of well-being. Among the topics in this course are therapeutic lifestyles, goal-setting and attainment, self-care, meaning making, transformational leadership, influence and sustainable happiness theory. Prerequisites: ESC_PS 7200

Credit Hours: 3

ESC_PS 8210: Projective Assessment of Adults

Assessment of personality functioning using projective and inferential testing procedures. Rudimentary skills in using the Rorschach method.

Credit Hours: 3

Prerequisites: ESC_PS 8000 or ESC_PS 8100

ESC_PS 8220: Vocational Assessment of Individuals with Disabilities

This course is an overview of the philosophy of vocational assessment of individuals with disabilities. The course also emphasizes to positive integration of vocational assessment into the rehabilitation counseling process. Assessment practice included.

Credit Hours: 3

Prerequisites: ESC_PS 7180 and ESC_PS 8082

ESC_PS 8232: Foundations of Sport Performance

Focuses on principles and methods to become an effective sport performance coach. Examines the development of athletes and education of basic sports nutrition, strength, and conditioning.

Credit Hours: 3

ESC_PS 8240: Sport in America

Sociological perspectives of sport in America. Attention given to the influence of society on sport as in institution, and the role of sport as an agent of social change.

Credit Hours: 3

Prerequisites: SOCIOL 1000 or PSYCH 1000

ESC_PS 8250: School Psychology Practicum: Introduction to School Services

This course is an intro practicum that exposes students to the organization and functions of schools. Students work with psychologists and other school personnel on academic and behavioral interventions to learn how schools serve children and their families. May be repeated for credit.

Credit Hour: 1-6

Prerequisites: instructor's consent

ESC_PS 8255: Legal Aspects of Sport and Coaching

Emphasis is to provide insight about how the law is applied in sport settings, the types of litigation involved, and the standard of care required. Fundamental terminology and concepts, and contemporary issues in sport law will be addressed.

Credit Hours: 3

ESC_PS 8260: School Psychology Practicum: School-Based

Level II School Psychology Practicum provides students with experience in school-based psychological service delivery. Students gain experience with psychoeducational assessment and diagnosis, intervention planning and delivery, consultation, and serving on multidisciplinary teams. May be repeated for credit.

Credit Hour: 1-6

Prerequisites: instructor's consent

ESC_PS 8265: Administration of Athletic Programs

Examines methods, principles, and roles of athletic administrators. Also, examines the job responsibilities and competencies required of sport leaders in athletic administration.

Credit Hours: 3

ESC_PS 8270: Student-Athlete Wellbeing

As a positive coach and career educator, your knowledge of student wellbeing is critical to support your students' physical, mental, and social health alongside their academic success and development beyond sport. Although our semester will focus largely on the most critical components of student welfare, we will also frame our study of student wellbeing using the tenets of Positive Psychology, a discipline that champions a strengths-based approach to guide positive behaviors associated with health and wellbeing. Health promotion theory will also guide our course of study as we examine: (a) individual student-athlete wellbeing with a focus on physical, mental, and social health (b) wellbeing in the context of student services provided by the school or organization, and (c) program evaluation methodology to identify strengths and opportunities for program improvement to enhance wellbeing and welfare for all student-athletes. Graded on A-F basis only.

Credit Hours: 3

Recommended: ESC_PS 7200 Positive Psychology

ESC_PS 8280: Gender Issues in Sport

Through a study of theory and applied practice, students will explore personal biases, understand intersecting identities and explore privilege and oppression at the individual, interpersonal, structural, and cultural level when considering gender awareness in sport.

Credit Hours: 3

ESC_PS 8290: Multicultural Issues in Sport

The purpose of this course is to increase the level of multicultural awareness, knowledge, skills, and relationship of athletic coaches working with diverse student populations. Activities and assignments are designed to assist, encourage, and challenge each student to more fully develop awareness and knowledge of self, and to use this information to improve intercultural interactions with others in professional settings as well as other settings.

Credit Hours: 3

ESC_PS 8300: Positive Leadership in Sport

A Positive Leadership philosophy requires Positive Leadership delivery. Course is designed to prepare leaders to bridge content knowledge to practical application. Students will use core competencies learned throughout their program to develop their leadership approach.

Credit Hours: 3

ESC_PS 8310: Colloquium in Educational Psychology

A course that covers current topics in learning, development, and schooling. Topics include cognitive, affective, academic, physical, moral ethnic/cultural domains. May be repeated for credit.

Credit Hour: 1

Prerequisites: Instructor's consent required

ESC_PS 8320: Advanced Human Learning

A study of behavioral and cognitive theories of learning with an emphasis on those greatest utility for educators. Experimental evidence forming the theoretical base for educational practice is examined.

Credit Hours: 3

Recommended: ESC_PS 2400 or ESC_PS 7100

ESC_PS 8330: Motivating At-Risk and Diverse Students

This course examines motivational concepts that apply to students of all ages. The course is designed to help teachers design classrooms and assignments that would improve the motivation of students, especially at-risk students. The course pays special attention to issues of diversity relevant to motivation. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8340: Cultural Backgrounds and Learning

The course explores the influence of culture on the process of learning. Topics and discussions will center on learning within the K-12 classroom. Readings and assignments are tailored to engage students in practical classroom applications of the information and discussions within the

course. At the conclusion of the course students will have a deep understanding of how culture shapes thinking, learning, behavior, and the classroom environment. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8350: Cognition, Learning and Instruction

Examines the topics of memory and cognition as they apply to the process of learning and instruction.

Credit Hours: 3

Prerequisites: ESC_PS 8320 or instructor's consent

ESC_PS 8355: Cognition and Emotion

This course looks at human cognition and emotions and their influence on learning, self-control, motivation, executive processes, and behavior change. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8360: Advanced Counseling Theories and Interventions

Contemporary theories and interventions of counseling. Advanced study of efficacious techniques. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ESC_PS 8040 or ESC_PS 8342

ESC_PS 8380: Data-Driven Instructional Decisions

This course explores the uses of assessments and evaluation techniques for practical applications within the classroom. Focus is on use of data gathering techniques to increase student academic performance and inform classroom instruction. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8400: Analysis of Research in Career Psychology

Examination of career development theories, the research supporting the theories, and the practical application of these ideas in career counseling and career programs.

Credit Hours: 3

Prerequisites: ESC_PS 8135

ESC_PS 8410: School Guidance Programs

Provides knowledge and skills in the development and management of school guidance programs including program planning, structuring, implementing, and evaluating.

Credit Hours: 3

Prerequisites: ESC_PS 7120

ESC_PS 8415: Program Evaluation for School Counselors

Program Evaluation is a graduate seminar intended to provide students with the skills needed to evaluate comprehensive guidance and counseling programs. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ESC_PS 7120

ESC_PS 8425: Effects of Maltreatment on Child and Adolescent Development

Course topics to be covered include 1) definitions of child maltreatment, 2) incidence and prevalence rates, 3) possible causes and consequences associated with child maltreatment, 4) treatment of survivors and perpetrators, and 5) prevention efforts. Important legal and ethical issues will be discussed, such as children's competence and eyewitness abilities, false allegations of abuse, mandated reporting, and investigative interviewing of children. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8430: Mental, Emotional, and Behavioral Disorders in Youth

The course will include an overview of normal development and an investigation into specific deviations in intensity, frequency, and/or duration of normal development which impact the individual in his or her home, school, and community.

Credit Hours: 3

ESC_PS 8435: Wellness Management for School Personnel

The current climate in schools places considerable demands on teachers and other school personnel. Often, those working in schools find themselves under enormous stress and pressure. In this course, school personnel will examine a variety of topics related to both identifying and effectively dealing with these pressures. Topics include communication skills, dealing with challenging individuals in the school system, recognizing and effectively managing stress, and recognizing burnout and re-energizing. The course will provide an overview of the research on these topics, as well as numerous effective strategies to deal with these pressures. Students in the course will have opportunities to apply learned strategies to real-life situations in the schools. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8440: School Mental Health: Policy, Law and Ethics

This course is designed to familiarize school-based professionals with policies, laws and ethics associated with children and youth and schools.

Credit Hours: 3

ESC_PS 8445: Building Resiliency and Optimism in Youth

Examines risk and resiliency processes during childhood and adolescence. Focuses on defining resilience; sources of risks and protective factors within families, schools, and communities; prevention programs targeting early, middle childhood and adolescence. Promotion of one's own resilience and well-being discussed. Special topics include strengths-based models of resiliency, resilience and family difficulties, violence and maltreatment, poverty, dropout, and school/community-based prevention and intervention.

Credit Hours: 3

ESC_PS 8450: Diversity Issues in School Mental Health

The purpose of this course is to increase the level of multicultural awareness, knowledge, skills, and relationship of school personnel working with diverse student populations.

Credit Hours: 3

ESC_PS 8455: Bully and Youth Violence: Prevention and Reduction

This course is a survey of current issues in bullying and youth violence with an emphasis on applications in the school environment. The course will present effective strategies for bullying and violence prevention within the school and in collaboration with the community at large. Students are encouraged to apply the course concepts to their work environment and develop tools for future practice in schools and other youth-serving settings. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8460: Communication and Collaboration with Children and Families

This course will provide education professionals with the knowledge and basic skills to address common mental health issues through positive and solution focused communication and collaboration.

Credit Hours: 3

ESC_PS 8465: Vital Issues in School Mental Health

The course is highly individualized in that students, as a group, will choose the specific topics to be covered. Readings and assignments have three foci: 1) improve understanding of each issue within a broader context of public mental health policy, prevention, intervention, and maintenance; 2) deepen student knowledge of the topic from practice and research-based sources; and 3) enable students to deal more effectively with those issues within relevant settings. Topics may include, but are not limited to: school dropout, substance use, self-injury/cutting, relational aggression, management of extreme behaviors, homelessness, divorce/death, eating disorders, pregnancy, ADHD, and many others. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8470: Preventions and Interventions in School Mental Health

This course explores the role that educators and school mental health professionals play in promoting, prevention and early intervention practices for mental, emotional, and behavioral disorders in youth and considers the basic steps for designing, implementing and evaluating evidence based interventions.

Credit Hours: 3

ESC_PS 8475: Proactive Behavior Management

This course provides a framework to a prevention-focused model of classroom support and behavior management. Prevention is less time-consuming in the long run and leads to more opportunities for learning and social engagement because discipline problems are not interfering with teaching. This course will include evidence based strategies to structure proactive learning environments that promote students' academic skills and competencies as well as their social and emotional development. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8490: Mental Health in Schools Capstone Paper

Course focuses on writing a capstone integration paper that is intended to be a culminating experience. Allows students to reflect on the content of their course work, evaluate the knowledge and skills acquired,

and apply what they have learned into their professional practice.

Prerequisites: instructor's consent

Credit Hour: 1

ESC_PS 8500: Rehabilitation Counseling

A study of the history and current status of rehabilitation counseling, and the role, theory, and practice of counseling in rehabilitation settings with persons with disabilities.

Credit Hours: 3

ESC_PS 8510: Medical and Psychological Aspects of Disability

Presentation of medical aspects of major disabilities and their effects upon social, vocational, personal, and economic adjustment. Study of basic restoration and accommodating services.

Credit Hours: 3

ESC_PS 8515: Sport Psychology

Current topics of research in sport psychology are examined. Topics include: sport personality, attention, activation and anxiety intervention, motivation, sport aggression, audience effects, team cohesion, leadership, and health psychology.

Credit Hours: 3

Prerequisites: PSYCH 1000

ESC_PS 8520: Job Acquisition for Individuals with Disabilities

Techniques of job development, placement, job analyses of the individual's skill and abilities and the employer's needs, and how to build professional relationships with employers.

Credit Hours: 3

Prerequisites: ESC_PS 7180

ESC_PS 8530: Developmental Psychopathology and Exceptionality

An investigation into the presentation, diagnosis, and treatment of psychopathologies in individuals, emphasizing causal pathways, risks/resiliency, prevalence, incidence, and continuity/discontinuity of the disorders from research in the field of developmental psychopathology. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8540: Theory and Practice in Feminist Therapy

Theory, research, practice standards and current debates within feminist therapy. Includes both examination of topical areas in a seminar format and live observation of feminist therapy.

Credit Hours: 3

Prerequisites: ESC_PS 8940 or instructor's consent

ESC_PS 8550: Diversity and Multiculturalism II - Practical Application

This course is part two in the Multicultural Education Certificate series of online courses designed for students working in a broad range of professions, such as health care, social work, education, school counseling, administration, etc. Students will examine various topics on diversity and multiculturalism to enhance their personal and professional development. To this end, the milieu of this course will be a safe online

environment that is conducive to open dialogue, self-reflection, critical thinking, and questioning, and one in which students can actively engage in the learning process through affective and cognitive approaches.

Postings, along with relevant readings and assignments, will be used as the primary tools and resources for this collective learning experience.

Graded on A-F basis only.

Credit Hours: 3

Recommended: ESC_PS 8450

ESC_PS 8555: African American Education - Historic and Current Issues

Critical examination of the deculturalization of American educational system. Concepts of race, culture, and "post racial society" are juxtaposed with social and systemic trends impacting African American students both in and out of the classroom. Pedagogical strategies are discussed. Graded on A-F basis only.

Credit Hours: 3

Recommended: ESC_PS 8450

ESC_PS 8560: Immigrant Issues in Education

The purpose of this course is to increase the level of cross-cultural awareness, knowledge, and skills of school personnel working with students who are immigrants. It is designed to be practically and experientially oriented. Activities and assignments in the class are designed to assist, encourage, and challenge each student to more fully develop awareness and knowledge of self, and to use this information to improve intercultural interactions with others in professional settings as well as other settings. The anticipated outcome includes improved skills in conceptualizing the unique needs of and responding with appropriate approaches to effectively assist students who are immigrants. Graded on A-F basis only.

Credit Hours: 3

Recommended: ESC_PS 8450

ESC_PS 8565: Gay, Lesbian and Bisexual Issues in the Schools

This online course seeks to expand your perspective, worldview, and knowledge of GLB individuals and in your work environments as well as an invitation to promote social justice to make positive changes for the benefit of GLB individuals. Individuals who identify as GLB face many unique experiences, challenges, and opportunities during their developmental life span including issues related to coming out, psychological well-being and mental health development, heterosexism and homophobia, stereotypes and myths, and sexual identity. These issues and more are discussed in the course. Graded on A-F basis only.

Credit Hours: 3

Recommended: ESC_PS 8450

ESC_PS 8580: Social and Cultural Identity Development

Graduate-level course designed to introduce students to: (a) the dominant social and cultural identity theories and paradigms; (b) how these theories have been operationalized and measured.

Credit Hours: 3

ESC_PS 8585: Gender Issues in Counseling and Education

Topics include conceptions of gender roles, measurement of gender-related constructs, gender role socialization process, high incidence

gender-related problems, and psychoeducational and counseling interventions.

Credit Hours: 3

Prerequisites: instructor's consent

ESC_PS 8590: Multicultural Counseling Competencies: Theory and Research
