

Withdraw from the University - Veterinary Medicine

Students who withdraw or seek a leave of absence from the College of Veterinary Medicine prior to successful completion of the first semester of the professional curriculum (Instructional Periods 1 through 2), and who seek readmission, must submit a letter of intent within 30 days of the withdrawal date to the Office of Student and Academic Affairs. The student's application will be evaluated for readmissions by the Admissions Committee by March 1 with the pool of incoming candidates.

Readmission will be based on their scoring within the pool of the next cohort and remediation plan submitted prior to March 1. Students who request a leave of absence after the first semester will develop a return and remediation plan in consultation with the Associate Dean for Academic and Student Affairs. Exceptions to this timeline will be evaluated on a case-by-case basis by the Committee.
