Many students in the ECE department combine the BS in Electrical Engineering with the BS in Computer Engineering in a special 138-credit program. These students receive both the BS EE and BS CoE degrees.

plasma science applications, like high voltage accelerators to propel micro spacecraft, electromagnetic launchers, radio-frequency effects on electronics, power electronics, microwave photonics, electrooptics and photoconductive switches. 

Intelligent Systems. Basic and applied research in computational intelligence (neural networks, fuzzy systems, evolutionary computation, swarm intelligence), spatial reasoning for scene understanding and human/robot interaction, pattern recognition and automated decision making, eldercare technology, computer vision and image processing, human activity analysis, cognitive robotics, landmine and explosive detection.

Systems Modeling and Control. Control systems, computer process control, digital and sampled data control, robotics, system biology; biologically realistic modeling, computational, neuroscience, theoretical neuroscience, electrophysiology.

Nano and Micro Electronics. Nano/microelectromechanical systems (N/ MEMS), micro sensors and actuators, High K dielectrics, nano structures, complex heterostructures (i.e. HEMTs, VCSELs, detectors, HBTs, etc), BioMEMS and biomedical microsystems.

Digital System and Circuit Design, Computer Process Control. Excellent computer equipment and other laboratory facilities are used for research sponsored by various government and industry sources. The ECE department is the home department of the following University centers: Center for Geospatial Intelligence, Center for Micro/Nano Systems and Nanotechnology, Center for Eldercare and Rehabilitation Technology, Center for Physical Electronics and Power Electronics, Center for Electromechanics and Energy Conversion, Interdisciplinary Center for Research in Earth Science Technologies, Institute for Computational Neurobiology.

Internal Funding
Teaching Assistantships
Teaching assistantships are normally awarded to qualified graduate students with appropriate communication skills who assist faculty members in various phases of instruction. International students may not be appointed to teaching assistantships in their first semester on campus. International students must pass a language screening test at a proper level to be eligible for the TA positions available.

Research Assistantships
Research assistantships are granted to students qualified for working with professors on particular research projects. The research assistants are selected by faculty members who have research funds to support graduate students. Therefore, students should contact the faculty members directly for the RA possibility.

Fellowships
The department faculty actively pursue funding for selected research fellowships. Available fellowship opportunities can be found by contacting the ECE Graduate Office. Additionally, a limited number of “Teaching Fellows” are awarded annually to outstanding PhD students, particularly for those preparing for academic careers. Details can obtained from the ECE Graduate Office.

Undergraduate
BSCoE in Computer Engineering

Major Program Requirements

The computer engineering degree offers a balanced approach to both hardware and software, as well as other areas of engineering. Focused areas of work in additional hardware or software, communications, discrete and integrated electronics, and robotics are offered by the department. (Focus areas are not listed on transcripts or diplomas.) Students must complete all university requirements, including general education (p. 18), and Department Level Requirements (p. 438), in addition to the degree requirements below.

Major core requirements

Constitutional Elective

Select one of the following:

- HIST 1100 Survey of American History to 1865
- HIST 1200 Survey of American History Since 1865
- HIST 1400 American History
- HIST 2210 Twentieth Century America
- HIST 2440 American History
- HIST 2210 Twentieth Century America
- HIST 2440 American History
- HIST 4000 American History
- HIST 4220 U.S. Society Between the Wars 1918-1945
- HIST 4230 Our Times: United States Since 1945
- POL_SC 1100 American Government
- POL_SC 2100 State Government

Total Credits: 126

Graduate

MS in Computer Engineering

Admission

349 Engineering Building West, Columbia, MO 65211
Phone: 573-882-4436
Email: umcengrecegradoff@missouri.edu
http://engineering.missouri.edu/ece/

**Admission Criteria**

Fall deadline: February 15  
Spring deadline: September 1  
Note: Applications received after these deadlines will be evaluated as time allows.

- Minimum GPA: 3.0 for the last 60 hours  
- Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal</th>
<th>Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>

Required Application Materials:

- Statement of Purpose (upload to the Supplemental information section of the application)
- Copies of your official transcripts (upload to the Educational History section of the application)
- Copies of your GRE scores (upload to the Test Information section of the application)
- Copies of your TOEFL or IELTS Scores (for non-native English speakers only) (upload to the Test Information section of the application)
- 3 letters of Recommendation (the department accepts electronic recommendations – in the recommendation section of the online application, enter the information for three recommenders. Each recommender will receive an email with instructions on how to complete the recommendation). The department does also accept hard copy letters of recommendation. The letters may be mailed to: Graduate School, 210 Jesse Hall, Columbia, MO 65211.

To the Graduate School:  
Official Transcripts. The mailing address is: Graduate School, 210 Jesse Hall, Columbia, MO 65211.

Note: when registering for GRE or TOEFL exams, be sure to designate your program of interest at the University of Missouri – Columbia. MU’s Institutional Code is 6875 (no departmental code is necessary).

**Admissions Criteria for the MS in Electrical or Computer Engineering**

To be accepted outright by the director of graduate studies (DGS), the student needs to have a BS degree in either Electrical Engineering or Computer Engineering in addition to meeting the above requirements. Students who meet the academic requirements but have degrees in other engineering or science disciplines can be accepted directly into the MS program by the graduate program committee (GPC). Such students are strongly encouraged to consult with the DGS or their advisor about appropriate bridge courses. Based on individual circumstances, students may be advised to register as an undeclared graduate student to fill in background course work prior to admission into the department.

Students who do not meet the above requirements may still be admitted on probation by the GPC if there are mitigating factors. Students admitted on probation must receive at least a 3.0 GPA for the first 12 hours of graded graduate coursework completed in their first two semesters. Failure to achieve this GPA will result in expulsion from the ECE MS program.

**Appeal Process**

All students have the right to a timely formal appeal to the GPC. Upon receipt of an admission decision or disciplinary action, the student has 10 working days in which to request a formal appeal. The DGS will convene a meeting of the GPC, the student, and the student’s advocate (if appropriate) within 10 working days of receiving the request. The decision of the GPC at the hearing is final.

**Degree Requirements**

To fulfill the requirements for the MS degree, the following rules apply:

- A candidate must complete 30 hours, including at least 12 hours of 8000-level graded course work (exclusive of ECE 8990 or ECE 8085 or ECE 8010 hours).
- At least six of these graded 8000 level course hours need to come from ECE.
- At least 15 hours of graded course work (total combination of 7000 and 8000 level courses, exclusive of ECE 8990, ECE 8085, or ECE 8010 hours) must be taken from the Electrical and Computer Engineering Department course offerings.
- A maximum of six hours of graduate credit may be transferred from another campus in the University of Missouri System or other university, while a maximum of eight hours of graduate credit may be used from a previous MU master’s degree.
- At most, three hours of course work in supervised study (ECE 8990) or problems (ECE 8085) are required, based on whether the student writes a master’s thesis or a master’s Report.
- The student’s cumulative GPA must be at least 3.0 to graduate.

The requirements for the MS degree must be met within an eight year period. Each candidate must pass a final oral examination to demonstrate...
mastery of the work included in the thesis or in a substantial independent project. These MS requirements apply to ECE graduate students first enrolled in MU ECE in the Fall semester 2007 or later. UM ECE graduate students enrolled prior to Fall semester 2007 may choose to follow the MU ECE MS requirements that were in effect for their MU ECE graduate admission semester.

**Academic Probation**

A student whose GPA drops below 3.0 is automatically placed on academic probation. In such a case, the student has one semester to raise his or her cumulative GPA to 3.0. Failure to do so will result in expulsion from the program. Additionally, a student who receives the grade of “C” in 9 hours of coursework will be expelled. As with acceptance, students here also have a right to the same formal appeal process described above.

**Selection of an Advisor**

Students must choose an academic advisor who will then provide guidance for the selection of coursework, and in the choice and execution of a research question. The student's academic advisor and the Director of Graduate Studies must approve all coursework used to satisfy the credit hour requirements for this degree. After performing satisfactorily for a minimum of one semester, the student, with the advisor's assistance, completes the Program of Study form that outlines the plan of study for the student's graduate program. M1 - Program of Study form.

The form is forwarded through the DGS to the Graduate School for approval. In the event that an adviser retires or leaves MU, he/she may continue to serve as the student's main adviser unless there is written academic program policy prohibiting such an arrangement. If an adviser is unable or unwilling to continue to serve, the academic program, with the leadership of the DGS, will assist the student to ensure that a replacement is found.

The Program of Study form must be filed with the Graduate School by the end of the student's second semester of enrollment. Upon approval of the program by the Graduate School, the student is a candidate for the degree. If changes must be made on a student's Program of Study form, a Program of Study Substitution form is used.

**Thesis Option**

For students under the thesis option of the MS degree, i.e., students enrolling for ECE 8990, an M-2 Request for Thesis Committee form is required to be submitted for approval by the department DGS and the Graduate School by the end of the student's second semester.

A thesis committee is composed of three members of the MU faculty: a major adviser from the academic program, a second reader from the academic program, and an outside reader who is a member of the graduate faculty from a different MU graduate program. Upon approval of the department DGS, the student may petition the Graduate School to allow a person who is not a member of the MU graduate faculty to serve as the third reader. The petition should include a written justification for such a request and a copy of the person's curriculum vitae. The Graduate School maintains copies of curriculum vitae previously received and approved, and if such a request is anticipated, the student should contact the Graduate School to see if the curriculum vitae of a particular person is already on file. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date.

Information about submitting the thesis can be found in the Thesis and Dissertation Guidelines.

**Non-Thesis Option**

For students who enroll in ECE 8085 (Problems), a problem report rather than a thesis is required. The student is not required to submit the M-2 form (request for a thesis committee). Instead, the student must have the report approved by his or her advisor and two other members of the graduate faculty, forming the student's Problem Committee. It is not required that a member outside of ECE be included, although it is permissible for such a member of the MU graduate faculty to be appointed. At least one of the three members must have a primary academic appointment in ECE. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date. At that time, an announcement is to be made to the department faculty and graduate students to allow them to attend the defense. The student must defend the problem report to the committee, and make any needed adjustments in format and corrections/clarifications based on input from the committee. A final copy of the problem report must be filed with the ECE graduate office.

**Report of the Master's Examining Committee**

The purpose of the M-3 Report of the Master's Examining Committee Form is to have an official record of the final examining process, whether it is a thesis defense or presentation of a report. The student's committee will indicate on this form if the student has passed the final exam. This form must be submitted to the Graduate School by a deadline for the semester in which the students plan to graduate. For a report option, the 3rd reader of the committee may be from the student's department. The form is due in the Graduate School two weeks prior to graduation.
Computer Science

Dong Xu, Chair
College of Engineering (BS in Computer Science, BS Information Technology, MS Computer Science, Master of Engineering, PhD Computer Science)

About Computer Science Programs

The Department of Computer Science is a fast-growing and research-active entity at the University of Missouri. In fact, it is the hub of all campus computer science activities that involve well-established research programs in computational biology and bioinformatics, cyber-security, distributed and mobile computing, geospatial information mining and retrieval, intelligent systems, multimedia communications, large dataset scientific visualization, networking, spoken language processing and human-machine interfaces, wireless sensor networks, etc.

The Department offers masters, dual masters, and doctoral degrees. The graduate degree programs prepare prior recipients of four-year BS degrees in computer science or closely related areas for further study at the doctoral level or for successful careers as specialized computer professionals. The PhD programs are a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well as research and development in industrial, government, and nonprofit organization. Specialized training is available through close interaction with the faculty in their active research fields.

The faculty members of the Department of Computer Science participate in the full spectrum of undergraduate and graduate education. Graduate education, in addition to direct involvement in projects funded by the federal government and industries, places equal emphasis on interdepartmental and cross-college research. The aim is to produce computer scientists who can function well in interdisciplinary research teams. Close integration of research with education is an invariant goal in the department’s graduate programs. It emphasizes in-depth studies that can also be tailored to fit graduate students’ individual interests. Additionally, members of the department lead the University’s institutional efforts in developing infrastructure for bioinformatics, computational biology, and high-performance computing and networking. Our major research projects are heavily funded by both federal agencies and industries. While National Science Foundation (NSF), National Institute of Health (NIH), National Geospatial-Intelligence Agency (NGA), Department of Energy (DoE), and Department of Defense (DoD) are examples for federal funding, Microsoft and Monsanto are representatives for industrial funding.

Research facilities are well established around faculty members’ expertise in bioinformatics and computational biology, biological and biomedical image analysis, graphics, mobile computing, artificial intelligence, multimedia, networking, human-computer interaction, information management systems, and computer science foundations. These facilities are clustered in core laboratories for bioinformatics, multimedia and visualization, video processing, spoken-language processing, mobile networking and communications, wireless sensor networks, high-performance computing, cyber security, and medical informatics.

Careers

The graduate degree programs prepare prior recipients of four-year B.S. degrees in computer science or closely related areas for further study at the doctoral level or for successful careers as specialized computer professionals.

The Ph.D. programs are a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well as research and development in industrial, government, and nonprofit organization. Specialized training is available through close interaction with the faculty in their active research fields.

With foundations covered in algorithms, compilers, computational theories, database, networking, operating systems, programming languages and software engineering, the undergraduate and graduate programs are integrated over many application areas such as:

- cyber-security
- multimedia
- smartphone applications
- filming
- mobile and sensor networks
- information management systems
- bioinformatics and computational biology
- medical informatics

Research

This department is the hub of all campus computer science activities that involve well-established research programs in:

- bioinformatics and computational biology
- graphics and image processing
- geospatial information mining and retrieval
- cyber-security
- multimedia communications and networking
- ambient intelligence and sensor networks
- mobile and distributed computing
- spoken language processing and human-machine interfaces, etc.

Additionally, members of the department lead the University’s institutional efforts in developing infrastructure for bioinformatics, computational biology and high-performance computing and networking.

The Department of Computer Science offers a broad curriculum that spans the theory, design and applications of computing and information technology. The Bachelor of Science degree in Computer Science includes a strong component of mathematics and sciences along with more theoretical courses in computer science. The Bachelor of Science in Information Technology is application-oriented, and allows students to develop skills in database administration, cyber security, game development and film production. The Bachelor of Arts degree, offered by the College of Arts and Science, includes computer science courses and encourages students to develop skills in related fields in areas such as computer animation, business, art, music and geography. Computer Science and Information Technology minors are available. The College of Arts and Science also offers a BA in Computer Science (p. 162).

- PhD in Computer Science (p. 449)

**MS and PhD Admission Criteria**

Students applying to the CS graduate program must have a sufficient background in mathematics and computer science to be able to enroll in and perform satisfactorily in the CS courses numbered 7000 and above. Students applying for admission must fulfill the following minimum requirements that include material contained in specific CS courses or their equivalent taken at another institution. It is preferred that students have earned a BS degree in Computer Science. However, students from other disciplines meeting the minimum requirements will be considered for admission.

1. Proficiency in a procedural programming language equivalent to that gained by taking CMP_SC 1050 Algorithm Design and Programming I and CMP_SC 2050 Algorithm Design and Programming II. The preferred programming language is Java. This material includes fundamental algorithm design and data structures.
2. Three semesters of formal course work in Calculus (MATH 1500, MATH 1700 and MATH 2300 at MU).
5. Knowledge of computer system architecture equivalent to that contained in CMP_SC 2270 Introduction to Digital Logic and CMP_SC 3280 Computer Organization and Assembly Language.
6. Four courses with grades B or better equivalent to those defined as follows:
   a. CMP_SC 4050 Design and Analysis of Algorithms I
   b. CMP_SC 4320 Software Engineering I
   c. CMP_SC 4410 Theory of Computation I, CMP_SC 4430 Compilers I, or CMP_SC 4450 Principles of Programming Languages
   d. CMP_SC 4520 Operating Systems I
7. A GPA of at least 3.0 (A=4.0) for the last half of the undergraduate curriculum.
8. Acceptable Minimum GRE scores (taken within last 5 years): 25 percentile on the verbal part, 80 percentile on the quantitative part, and 4 on the analytical writing part.
9. For those not schooled in English as their native language, a recommended minimum TOEFL score (taken within last two years):
   - Internet-based test (iBT)  Paper-based test (PBT)
     90 577
   OR
   - IELTS 6.5-7.0

10. For admission into the PhD program, the student must have either:
   a. A Bachelor's degree in Computer Science with a GPA of 3.4 (out of 4.0), or
   b. An equivalent of a Master's degree in Computer Science, or a closely related field, with a GPA of at least 3.4 (out of 4.0).

**Application Procedures**

In order to be considered for admission in a particular semester we must receive all required paperwork by these deadlines:

**Fall admission:** Applications and all paperwork must be received by March 1st. NOTE: If applying for financial assistance in the department, applications and all paperwork must be received by January 15th.

**Spring admission:** Applications and all paperwork must be received by October 1st.

Application for admission involves submitting a formal application through the Graduate School's Apply Yourself (http://gradschool.missouri.edu/...
A student may also choose to complete a Master of Engineering (ME) Degree. Current/Former MU students: the maximum of six hours of credit earned in the previous program toward a second Master’s degree. But any decision on admission is non-binding until the official records are submitted for evaluation. A student who has completed one Master’s degree at MU or elsewhere cannot be accepted in lieu of the official reports from the originating institutions. Copies of these records should be submitted for evaluation, and any decision on admission is non-binding until the official records have been received. 

Current/Former MU students: All current and former MU students must meet the same requirements as external students and file one of the following forms (in lieu of an MU Application Form):

- Current Non-Degree Graduate Students: Change of Division, Degree Program, Emphasis, or Advisor form,
- Current graduate students in another department: Change of Division, Degree Program, Emphasis, or Advisor form (same as 1)
- Previous graduate students returning to same program: Re-Activation form.

Forms can be obtained from the Computer Science Graduate Advisor’s office in 244 EBW or the Graduate School, 210 Jesse Hall.

Degree Completion Requirements

Use the links at the top of the page to direct you to details on the requirements that must be completed in order to earn the respective graduate degrees from the CS department. The Master of Science degree program has both a thesis and a non-thesis option, which can be chosen by the student after consultation with their selected advisor.

Credit toward a Second Master’s Degree

A student who has completed one Master’s degree at MU or elsewhere may present, upon the recommendation of the student’s advisor and approval by the Director of Graduate Studies and the Graduate School, a maximum of six hours of credit earned in the previous program toward a second Master’s degree.

Master of Engineering Degree

A student may also choose to complete a Master of Engineering (p. 460) degree. The requirements for the ME degree are the same as the MS CS with the following exceptions: 1) the student must complete at least 36 hours of graduate courses, 2) a minimum of 30 credit hours must be earned from UM System institutions, 3) at least 21 hours must be courses offered by the CS Department, 4) at least 15 hours must be 8000 level courses offered by CS Department (excluding CMP_SC 8085), 5) CMP_SC 8980, CMP_SC 8990 and CMP_SC 9990 may not be taken, 6) at most 3 hours of CMP_SC 8085 may be taken, 7) no final examination is required. Entrance requirements for ME and MS degree are the same.

Financial Aid

Teaching and research assistantships are available for qualified students in the graduate programs. The Department also offers fellowships (including Shumaker Bioinformatics Fellowships) to a limited number of new PhD students. In addition, there are other fellowships and scholarships available at the university level. Teaching assistantships and research assistantships are available with tuition waivers in the Department. Requests for financial aid are examined at the same time as those for graduate admission, which are due before January 15 for fall semester and October 1 for spring semester.

Student Group

The department’s graduate enrollment is about 135, with approximately half enrolled in the PhD program. Advised by the Director of Graduate Studies, the CS Graduate Student Council is an active body that works with the department and provides social support as well as student input for the continuous improvement of the graduate programs in computer science.

Undergraduate

BS in Computer Science

Major Program Requirements

The Bachelor of Science with a major in Computer Science emphasizes the study of software systems and graphics, computational theories and algorithms, computer organization, networking and multimedia, and programming methodology. Students who complete the BS in Computer Science can work for government agencies, academic institutions, or private industry creating and applying new technologies to solve complex problems.

The BS degree requires the completion of the three-semester calculus sequence plus discrete math and statistics. A student who selects an appropriate additional math course as a technical elective and has at least 9 credits in math with appropriate grades at MU can earn a math minor.

The BS degree requires the completion of 126 credits. To graduate, a student must earn a 2.0 GPA or better in all CMP SC/IT courses. A grade of C- or better is required in each CMP SC course that is a prerequisite for a CMP SC course that the student takes.

The Engineering Career Services Office, W1025 Lafferre Hall, can assist students in searching for employment opportunities upon graduation and for internship/co-op positions.

Course requirements listed here apply to students beginning as regular college freshmen in Fall 2013 or after. A student who started college before Fall 2013 and who has been continuously enrolled as a full-time
A student may be pursuing the previous program and should contact the department for information on these degree requirements.

In addition to the major core requirements, students must complete all University graduation requirements including University general education (p. 18), as well as all degree and college or school requirements.

1 At least 15 credit hours of computer science electives must be numbered above 4000; two of the 4000-level courses must be CMP_SC 4410, CMP_SC 4430, or CMP_SC 4450. A maximum of 6 hours of IT courses can be taken as CS electives with the following stipulations: One 3000/4000 level INFOTC course (excluding IT 4400 and 4500) can be taken as a CMP_SC elective but it is counted as a lower level (below 4000) CMP_SC course. IT 4400 and 4500 are counted as CS 4000 level courses.

2 2000-level or above CMP_SC course or 4000-level MATH course, 2000-level or above engineering courses, MANGMT 3000, FINANC 3000 or other courses that meet prior approval of Computer Science advisor. An INFOTC course at the 2000 level or above can be taken. Students cannot take INFOTC 2810 or INFOTC 2910 as a technical elective if they have already taken CMP_SC 4850.

3 Including one of the two-semester sequences below. At least one of the courses must include a lab. Labs listed separately are not considered a second science course (for example, BIO_SC 1010 and BIO_SC 1020 equal one science course).

Semester Plan

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.

Minor in Computer Science

A minor in computer science is offered through the College of Engineering. To obtain a minor, a student must complete 18 hours of courses approved by the Department of Computer Science. The student must earn a grade of C- or better in each course counting toward the minor and have a 2.0 GPA in all courses counting toward the minor. At least 9 hours must be taken in residence. The following courses are required.

- CMP_SC 1050 Algorithm Design and Programming I 3
- CMP_SC 2050 Algorithm Design and Programming II 3
- CMP_SC 2270 Introduction to Digital Logic 3
- Three additional department-approved CMP SC courses with at least one numbered above 3000 9

Total Credits 18

Graduate

MS in Computer Science

All students completing a master’s degree must fulfill the following minimum requirements:

1. The student must earn a minimum of 30 credit hours of course work approved by the CS Department. This course work must include at least 15 credit hours of course work numbered 8000 or above (CMP_SC 8990 Research-Masters Thesis Computer Science credit is counted in the required 15 credit hours, but CMP_SC 8980 is not).
2. The overall GPA of course work taken as an enrolled graduate student must be at least 3.0 (out of 4.0).
3. Courses taken in other departments (up to 6 credit hours) will be considered for approval as part of a student’s MS program and the approval is sought prior to the student undertaking the course work.
4. A 4000-level course listed in the minimum requirements for graduate admission cannot be taken at the equivalent 7000 level as part of the required hours for the MS, ME, or PhD programs.
5. Non-Thesis Option:
   In order to complete the non-thesis option, the student must complete an independent project under a faculty adviser approved by the department. This project is carried out by enrolling in CMP_SC 8980 (Non-Thesis Research) for at least one hour of credit. This project is documented and presented to a faculty committee of at least three graduate faculty members and defended in a public defense as part of a final oral examination. The CMP_SC 8980 course grade is assigned by the student’s faculty adviser upon the conclusion of the oral examination. This course is graded on an S/U basis and cannot be used to increase the student’s overall GPA in graduate work. In this option, at most, 3
PhD in Computer Science

All students completing a PhD degree must fulfill the following minimum requirements:

1. Complete all of the course work requirements of the Master’s degree in CS or have an MS degree in CS from another institution. The student must have maintained an overall GPA of at least 3.4/4.0 in their prior graduate level course work (excluding research and problems courses).

2. Pass a qualifying examination to be admitted to candidacy in the CS PhD program.

3. Earn a minimum of 72 credit hours of course work and research past the student’s Bachelor’s degree.

4. Pass a comprehensive examination covering their areas of expertise.

5. Complete a doctoral dissertation on a topic approved by the candidate’s advisory committee.

6. Defend the dissertation in a final oral examination.

7. Have at least one journal paper submitted, accepted or published, as approved by the advisor.

8. Present on a research topic as part of the CS Seminar Series at some point between passing the qualifying exam and the dissertation defense. This policy is effective for entering PhD students in Spring 2013 and after.

9. Seminar Attendance: The approval of the D4 form is tied to the attendance records for the department’s seminar series. PhD students are required to attend a total of at least twenty CS approved seminars including all CS Seminar Series presentations, Dr. Harrison’s Security Reading Group meetings, and others as announced. Master’s students who add the PhD program can apply up to ten seminars attended as part of their Master’s program toward the attendance requirement for doctoral students.

10. D Forms: After the successful completion of the Qualifying Examination - by or before the end of the third year in the program - the D1 Qualifying Exam Results and Doctoral Committee Approval form should be submitted to the Graduate School, followed by the D2 Plan of Study for the Doctoral Degree form. The D3 form Doctoral Comprehensive Examination Results is submitted when the student has completed the Comprehensive Exam. Graduate School policy requires the completion of the Comp Exam within five years of starting the PhD program. At least seven months must pass between the Comp Exam and the dissertation defense, which is followed by submission of the D4 Dissertation Defense form.

11. Annual Review Requirement of the Graduate School: All graduate students are required to complete the Annual Review Requirement by updating their information in the Graduate Student Progress System by the end of their second, fourth, etc. semesters of their program. The CS Department requires that this report be approved online by the student’s faculty adviser and a printed copy attached to each D form before being signed by the CS Director of Graduate Studies.

*Students cannot take CMP_SC 9990 before passing the PhD qualifying exam. Pre-Qual students should take CMP_SC 8990 for Research credit.
Electrical and Computer Engineering

S. Kovaleski, Interim Chair
College of Engineering
349 Engineering Building West
(573) 882-6387
KovaleskiS@missouri.edu

The Department of Electrical & Computer Engineering is one of 9 academic departments within the College of Engineering at the University of Missouri.

Established in 1884 as the first electrical engineering program in the nation, this ABET accredited program is now home to more than 300 undergraduate students, almost 150 graduate students and 21 faculty members.

Faculty

Assistant Professor M. Becchi*, T. Han**, C. Xiao*, A. Zare**
Associate Professor Emeritus R. W. Leavene Jr.*

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

The University does not offer an undergraduate degree in the combined areas of Electrical and Computer Engineering. See Electrical Engineering (p. 454) and Computer Engineering (p. 438) for details on the undergraduate degree programs.

Graduate

349 Engineering Building West
Columbia, MO 65211
Phone: 573-882-4436
Email: umcengregradoff@missouri.edu
http://engineering.missouri.edu/ece/

Director of Graduate Studies: James Keller

- PhD in Electrical and Computer Engineering (p. 451)

The Department also offers an MS in Computer Engineering (p. 441), an MS in Electrical Engineering (p. 458), and the College offers an interdepartmental ME in Engineering with a focus in Computer and Electrical Engineering (p. 460).

Established in 1885, the Department of Electrical & Computer Engineering has a long tradition of excellence. Our classes are small with extensive design and laboratory experimentation. Research opportunities exist for both undergraduate and graduate students in Communication and Signal Processing, Physical Electronics, Intelligent Systems, Systems Modeling and Control, Nano and Micro Electronics, and Digital / Computer Systems.

Career Opportunities

Throughout the 20th century, the electrical engineering and computer engineering professions devised many of the innovations that dominated the technology landscape. In the 21st century, electrical and computer engineers will be at the forefront of a wide spectrum of technologies including nanotechnology, biotechnology, sensors, power generation, electric vehicles, and telecommunications.

Areas of Study

Communications and Signal Processing, Satellite remote sensing, geospatial intelligence, image/video processing, land-mine detection, speech signal processing, wireless communications, underwater communications.

Physical Electronics. Medical applications and advanced sterilization of food, water and products using pulsed power, pulsed power applications and research (MU Gigawatt Rep-rate Test Stand. Lasers, high voltage switching and power conditioning, high voltage pulse technology and plasmas with the 2.5 MV, 250 kA MU-Terawatt Test Stand), interesting plasma science applications, like high voltage accelerators to propel micro spacecraft, electromagnetic launchers, radio-frequency effects on electronics, power electronics, microwave photonics, electrooptics and photoconductive switches.

Intelligent Systems. Basic and applied research in computational intelligence (neural networks, fuzzy systems, evolutionary computation, swarm intelligence), spatial reasoning for scene understanding and human/robot interaction, pattern recognition and automated decision making, eldercare technology, computer vision and image processing, human activity analysis, cognitive robotics, landmine and explosive detection.

Systems Modeling and Control. Control systems, computer process control, digital and sampled data control, robotics, system biology; biologically realistic modeling, computational, neuroscience, theoretical neuroscience, electrophysiology.

Nano and Micro Electronics. Nano/microelectromechanical systems (NMEMS), micro sensors and actuators, High K dielectrics, nano structures, complex heterostructures (i.e. HEMTs, VCSELs, detectors, HBTs, etc), BioMEMS and biomedical microsystems.

Digital System and Circuit Design, Computer Process Control. Excellent computer equipment and other laboratory facilities are used for research sponsored by various government and industry sources. The ECE department is the home department of the following University centers: Center for Geospatial Intelligence, Center for Micro/Nano Systems and Nanotechnology, Center for Eldercare and Rehabilitation Technology, Center for Physical Electronics and Power Electronics, Center for Electromechanics and Energy Conversion, Interdisciplinary Center for Research in Earth Science Technologies, Institute for Computational Neurobiology.

Internal Funding

Teaching Assistantships

Teaching assistantships are normally awarded to qualified graduate students with appropriate communication skills who assist faculty
members in various phases of instruction. International students may not be appointed to teaching assistantships in their first semester on campus. International students must pass a language screening test at a proper level to be eligible for the TA positions available.

**Research Assistantships**

Research assistantships are granted to students qualified for working with professors on particular research projects. The research assistants are selected by faculty members who have research funds to support graduate students. Therefore, students should contact the faculty members directly for the RA possibility.

**Fellowships**

The department faculty actively pursue funding for selected research fellowships. Available fellowship opportunities can be found by contacting the ECE Graduate Office. Additionally, a limited number of “Teaching Fellows” are awarded annually to outstanding PhD students, particularly for those preparing for academic careers. Details can obtained from the ECE Graduate Office.

**Graduate**

**PhD in Electrical and Computer Engineering**

**Admission Contact Information**

349 Engineering Building West  
Columbia, MO 65211  
573-882-4436  
Email: umcengregradoff@missouri.edu

The ECE department offers the Doctor of Philosophy in Electrical and Computer Engineering.

**Admission Criteria for the PhD Electrical or Computer Engineering**

Deadline for Fall entrance: February 15  
Deadline for Spring entrance: September 1

- Minimum GPA: 3.5 (with A = 4.0) in the last 60 hours of the MS graded coursework
- Minimum GRE scores:
- When did you take the GRE? Verbal Quantitative Analytical
  Prior to August 1, 2011 90th percentile will be considered will be considered
  On or after August 1, 2011 90th percentile will be considered will be considered

International applicants only:

- Minimum TOEFL scores:
  Internet-based test (iBT) Paper-based test (PBT)
  80 550
- Minimum Academic IELTS scores:
  Item Score
  Listening 5.5

- Holds the equivalent of a BS degree in electrical or computer engineering with an outstanding record, or holds the equivalent of an MS degree in electrical or computer engineering

Consideration in doctoral program admissions is given to the applicant’s grade trends, experience and maturity, and to the availability of expertise in areas of the applicant’s technical interest.

**Required Application Materials**

- Statement of Purpose (upload to the Supplemental information section of the application)
- Copies of your official transcripts (upload to the Educational History section of the application)
- Copies of your GRE scores (upload to the Test Information section of the application)
- Copies of your TOEFL or IELTS Scores (for non-native English speakers only) (upload to the Test Information section of the application)
- 3 letters of Recommendation (the department accepts electronic recommendations – in the recommendation section of the online application, enter the information for three recommenders. Each recommender will receive an email with instructions on how to complete the recommendation). The department does also accept hard copy letters of recommendation. The letters may be mailed to: Graduate School, 210 Jesse Hall, Columbia, MO 65211.

To the Graduate School:  
Official Transcripts. The mailing address is: Graduate School, 210 Jesse Hall, Columbia, MO 65211.

Note: when registering for GRE or TOEFL exams, be sure to designate your program of interest at the University of Missouri-Columbia. MU’s Institutional Code is 6875 (no departmental code is necessary).

To be accepted outright by the director of graduate studies (DGS), the student needs to have an MS degree in either Electrical Engineering or Computer Engineering.

Students who meet the academic requirements but have degrees in other engineering or science disciplines can be accepted into the PhD program by the Graduate Program Committee (GPC).

Students who don’t meet the above requirements may still be admitted by the GPC if there are mitigating factors. Consideration in doctoral program admissions is given to the applicant’s grade trends, experience and maturity, and to the availability of expertise in areas of the applicant’s technical interest.

Outstanding BS students who meet the following requirements may be accepted directly for advisement in the department’s doctoral program:

- Holds the equivalent of a BS degree in electrical or computer engineering
- GRE quantitative score of at least the 90th percentile
- TOEFL score of at least 550 paper-based. IELTS score: 5.5
- A 3.5 or better grad point average (A=4.0) in their undergraduate studies
- Submission of three letters of recommendation from persons familiar with the applicant’s engineering or related work
• Submission of a statement of research interests

Additional information can be obtained from the Graduate Division of the Department of Electrical and Computer Engineering, 349 Engineering Building West, Columbia, MO 65211, or via email: umcengrecegradoff@missouri.edu

Appellate Process

All students have the right to a timely formal appeal to the GPC. Upon receipt of an admission decision or disciplinary action, the student has 10 working days in which to request a formal appeal. The DGS will convene a meeting of the GPC, the student, and the student’s advocate (if appropriate) within 10 working days of receiving the request. The decision of the GPC at the hearing is final.

Transfer of Credit

The doctoral committee may recommend up to 30 hours of post-baccalaureate graduate credit from an accredited university be transferred toward the total hours required for the doctoral degree. It is the responsibility of the doctoral committee to determine the appropriateness of coursework for transfer credit. All requests for exceptions to this policy must be approved by the Dean of the Graduate School. This policy applies to students who begin their enrollment during the Fall Term 2006 and subsequent semesters.

(Note: The preceding represents a change in policy and becomes effective for graduate students beginning their doctoral programs during the Fall Term 2006 and subsequent semesters.

The committee may recommend that courses taken through MU’s Extension division be counted toward the credit hour requirement. Extension or correspondence course work from institutions other than MU may not be used to meet the total hours required for the doctoral degree.

Time Limits on Transfer Credits

All courses to be applied to the plan of study must be completed within 8 years of filing the plan.

Requirements to obtain the PhD degree in Electrical Engineering and Computer Engineering

1. The student must be qualified to be a PhD candidate.
   Students admitted with an MS degree must prove competency in a written qualifying examination conducted by a PhD qualifying committee within 3 semesters of admission.
   Students admitted directly from a BS degree program must complete the 24 hours of graded coursework requirements of the MS degree during the first two years of their program. This will prepare them for the PhD qualifying examination process, to be passed within 4 semesters after this requirement is satisfied, and will allow them to obtain an MS degree if a thesis or project report is completed and defended, consistent with MS requirements, or to obtain an ME degree once the course work requirement has been satisfied. A student may petition the faculty for an extension of the two year requirement.

2. A minimum of 72 semester hours beyond the BS are required by the Graduate School; the student’s doctoral program committee sets the total number of credit hours and specific courses to be completed as part of his/her PhD program. However, the Graduate School requires a minimum of 15 hours of 8000/9000 level classes to be taken at MU exclusive of research, problems, and supervised study.

3. The candidate must pass a written and oral comprehensive examination.

4. The student must complete a doctoral dissertation on a topic approved by his or her Doctoral Advisory Committee and defend the dissertation in an oral final examination.

These PhD requirements apply to ECE graduate students first enrolled in MU ECE in the Fall semester 2007 or later. UM ECE graduate students enrolled prior to Fall semester 2007 may choose to follow the MU ECE PhD requirements that were in effect for their MU ECE graduate admission semester.

Selection of an Advisor

The student selects an advisor or co-advisors, by mutual consent, from doctoral faculty members who are dissertation supervisors in the department or area program in which the major work is planned. In the event that an advisor retires or leaves MU, he/she may continue to serve as a student’s advisor unless there is written academic program policy prohibiting such an arrangement. If an advisor is unable or unwilling to continue to serve, the academic program, with the leadership of the director of graduate studies, will assist to ensure that a replacement is found.

Doctoral Degree Forms

By the end of the second semester of study at MU, a student should begin submitting degree program forms which will aid the academic program and the Graduate School in tracking the student’s progress toward degree completion. These forms include the following:

• D1 Qualifying Exam Results & Doctoral Committee Approval (http://gradschool.missouri.edu/forms-downloads/repository/d1.pdf)
  Submitted after passing qualifying exams

• D2 Plan of Study Form (http://gradschool.missouri.edu/forms-downloads/repository/d2.pdf)
  Submitted no later than the end of the student’s third semester.

• D3 Result of the Comprehensive Examination (http://gradschool.missouri.edu/forms-downloads/repository/d3.pdf)
  Submitted to the Graduate School within one month of exam completion

  Submitted by the Graduate School deadline for the semester in which the students plan to graduate.

• Change of Committee (http://gradschool.missouri.edu/forms-downloads/repository/cocform.pdf)

• Plan of Study Course Substitution Form (http://gradschool.missouri.edu/forms-downloads/repository/subform.pdf)

More information is available at: http://gradschool.missouri.edu/academics/graduation-requirements/doctoral-grad-requirements.php
Qualifying Examination/Process

To be officially admitted to the PhD program, the student must pass a qualifying examination/process. The student is given two opportunities to pass the Qualifying Examination with a score of 70% or above.

Qualifying Exam Rules

1. To be eligible to take the Qualifying Examination, graduate students must be accepted for advisement in the Ph.D. program. The examination must be passed before the end of his or her second year of advisement as a Ph.D. student. Each student may take the exam twice. Students who have been accepted into the PhD program with a BS degree must complete the 24 hours of graded coursework requirements of the MS degree during the first two years of their program. This will prepare them for the PhD qualifying examination process, to be passed within two years after the requirement is satisfied, and will allow them to obtain an MS degree if a thesis or project report is completed and defended, consistent with the MS requirements, or to obtain an ME degree once the course work requirement has been satisfied. A student may petition the faculty for an extension of the two year requirement.

2. All eligible students who intend to take the exam must complete the REQUEST FOR QUALIFYING EXAMINATION form and submit it to the ECE Graduate Office within four weeks after the start of the semester. At this time the student will be asked to select two of the seven topic areas over which he or she wishes to be examined. Only students on the approved lists will be allowed to take the exam. When a student submits the REQUEST FOR QUALIFYING EXAMINATION form, the Graduate Office will provide:
   a. The date, time and place of the examination;
   b. A reminder to bring their ID card to the exam.
   c. A copy of the Qualifying Examination Rules.
   d. A copy of the Guidelines For Qualifying Exam Committee.

3. The examination shall be prepared and administered during the 12th week of both the fall and winter semesters by the Qualifying Examination (QE) Committee. The ECE Graduate Committee currently serves as the QE Committee since it contains a representative from each of the 6 focus areas in the department. The Graduate Director will select the specific date, time and place of the exam at the beginning of each semester.

4. It shall be a written examination taken by all students desiring to qualify during the given semester.

5. The exam will contain five questions from each of the two areas selected by the student. Each student must select and answer five questions from this set, with no more than three questions from one area. The exam will be closed book, with two standard pages of notes, front and back, allowed. A book of mathematical tables will be provided by the department. The exam will last four hours.

6. The QE committee shall administer the examination and identify passing candidates. The ECE faculty as a whole have the responsibility to approve that action.

Qualifying Examination Guidelines

These guidelines have been prepared to help maintain consistency in the form and difficulty of the Department’s qualifying examination.

1. The QE Committee shall consist of one faculty representative from each of the following topic areas, except Foundations:
   a. Communications and Signal Processing Area;
   b. Intelligent Systems Area;
   c. Physical and Power Electronics Area;
   d. System Modeling and Control;
   e. Micro/Nano Electronics;
   f. Digital/Computer Systems; and
   g. Applied Physics
   h. Foundations

2. The ECE graduate Committee serves as the QE Committee since it contains a representative from each research area. The ECE department chair appoints the Graduate Committee with input by the Graduate Director.

3. The faculty from each topic area will be responsible for maintaining a list of topics which constitute the core material an MS graduate should be expected to have mastered. The members of each group will be responsible for preparing questions for the exam covering topics from the list. For the major core focus area, questions will come from 4000/7000 – 8000 level courses. Questions for the topics in the Foundation area will be from a set of required 3000 level courses.

4. The QE Committee will solicit questions from the faculty group, but the Committee will have the responsibility of combining these questions into a fair, comprehensive exam. The QE Committee member for each group will be responsible for coordinating his or her group. The representatives of each topic group shall call a meeting of all faculty from that group for the purpose of reviewing the exam questions to be submitted to the Qualifying Exam Committee. The group’s submission must be approved by a majority vote of those present.

5. Solutions will be graded by faculty members who prepared the questions. The grading must be completed within two weeks after the exam. A guideline is that each question should be doable by a strong MS graduate in 40 to 45 minutes.

6. Solutions will be graded on a 100 point scale with 70 points as a minimum passing grade.

7. Each student's performance will be reviewed by the QE Committee and a majority vote of the QE Committee is required for passing.

8. The QE Committee must report the results of the exam to the ECE Faculty within four weeks of the exam.
Electrical Engineering

S. Kovaleski, Interim Chair
College of Engineering
349 Engineering Building West
(573) 882-6387
kovaleskis@missouri.edu

The Department of Electrical & Computer Engineering is one of 9 academic departments within the College of Engineering at the University of Missouri.

Established in 1884 as the first electrical engineering program in the nation, this ABET accredited program is now home to more than 300 undergraduate students, almost 150 graduate students and 21 faculty members.

Faculty

Assistant Professor M. Becchi**, T. Han**, C. Xiao*, A. Zare**

Associate Professor Emeritus R. W. Leavene Jr. *
* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

beatty@missouri.edu

The Department of Electrical and Computer Engineering offers both the Bachelor of Science with a major in Electrical Engineering and the Bachelor of Science with a major in Computer Engineering. The undergraduate program in both degrees at the University of Missouri provides students with the requisite fundamentals in either discipline and prepares them for beginning practice in both the traditional and emerging fields of these disciplines. The degree programs are flexible 126-credit structures that provide the fundamentals of engineering, in addition to a thorough coverage of the major specialties within their respective fields. In addition, technical electives allow concentration in selected areas.

The ECE department emphasizes close interaction with industry. Industry engineers visit regularly and industry-sponsored student projects are provided to give extra dimension to the program.

Many students in the ECE department combine the electrical engineering major with the computer engineering major in a special 138-credit program. These students receive both the BS EE and BS COE degrees.

Students interested in interdisciplinary studies may use some electives to study business, premedicine, prelaw, and other areas. Students are able to choose from a wide variety of courses offered by other departments in the College of Engineering, as well as from other MU colleges, taking advantage of the multidisciplinary nature of the campus.

Commencing in the Fall Semester 2011, the Program Educational Objectives (PEOs) of the undergraduate program in Electrical Engineering at MU are to nurture graduates who:

• Communicate effectively, both in written reports and oral presentations.
• Analyze and design electrical systems effectively.
• Possess comprehensive problem-solving skills, including the ability to define problems and to evaluate alternative solutions.
• Are passionate about engineering, as demonstrated by their leadership, innovation, motivation, and interest in continuing education.

Commencing in the Fall 2011, the Program Educational Objectives (PEOs) of the undergraduate program in computer Engineering at MU are to nurture graduates who:

• Communicate effectively, both in written reports and oral presentations.
• Analyze and design electrical systems effectively.
• Possess comprehensive problem-solving skills, including the ability to define problems and to evaluate alternative solutions.
• Are passionate about engineering, as demonstrated by their leadership, innovation, motivation, and interest in continuing education.

Both the Bachelor of Science in Electrical Engineering (BS EE) and the Bachelor of Science in Computer Engineering (BS COE) require that students earn a 2.0 GPA or better in all courses that have an MU engineering prefix. All ECE courses require a grade of C or better in ECE prerequisites.

Engineering design in both the electrical engineering and computer engineering programs is provided through an integrated laboratory structure. Beginning with the first laboratory course in the fourth semester of each program, students have a significant design and laboratory experience in each semester of their respective programs.

In addition to the major core requirements, students must complete all University graduation requirements including University general education, as well as all degree and college or school requirements.

ECE Honors Program

The ECE Honors Program follows the general rules and philosophy of the College of Engineering Honors Program. Students may enter the program from the beginning of the junior year and must have a GPA of 3.0/4.0 at the start. Eligible students participate in the program by enrolling in ECE 4995 Undergraduate Honors Research in Electrical Computer Engineering for one to three credit hours, which replaces an equivalent number of hours of ECE technical electives.
The heart of the program is a research or advanced design project culminating in an undergraduate honors thesis. The project is conducted under the supervision of the honors advisor, who is an ECE faculty member selected by mutual agreement between the student and the professor. Satisfactory completion of the project requires approval (signatures) of the honors thesis by both the honors advisor and an additional faculty member, who serves as second reader of the thesis. Students who complete the program and graduate with a GPA of at least 3.0 receive the designation “Honors Scholar in Engineering” at graduation and on their diploma.

Another valuable feature of the Honors Program is that participants may reduce the number of credit hours required for degree completion to the University minimum of 120 by substituting up to six hours of credit from graduate courses through dual (undergraduate/graduate) enrollment during the last four semesters of the undergraduate program and after completion of the honors project.

**Double Majors - Electrical Engineering and Computer Engineering**

Many students in the ECE department combine the BS in Electrical Engineering with the BS in Computer Engineering in a special 138-credit program. These students receive both the BS EE and BS CoE degrees.

**Major Program Requirements**

**Constitutional Elective**

Select one of the following:

- HIST 1100 Survey of American History to 1865 (3)
- HIST 1200 Survey of American History Since 1865 (3)
- HIST 1400 American History (3)
- HIST 2210 Twentieth Century America (3)
- HIST 2440 History of Missouri (3)
- HIST 4000 Our Times: United States Since 1945 (3)
- HIST 4220 U.S. Society Between the Wars 1918-1945 (3)
- HIST 4230 Our Times: United States Since 1945 (3)
- POL_SC 1100 American Government (3)
- POL_SC 2100 State Government (3)

**Humanities/Fine Arts courses**

- Select two of the following: (6)
  - ENGINR 1200 Statics and Elementary Strength of Materials
  - ENGINR 2300 Engineering Thermodynamics
  - IMSE 2710 Engineering Economic Analysis

**Other major core requirement courses:**

- MATH 1500 Analytic Geometry and Calculus I (5)
- MATH 1700 Calculus II (5)
- MATH 2300 Calculus III (3)
- MATH 2320 Discrete Mathematical Structures (3)
- MATH 4100 Differential Equations (3)
- STAT 4710 Introduction to Mathematical Statistics (3)
- PHYSICS 2750 University Physics I (5)
- PHYSICS 2760 University Physics II (5)
- CHEM 1320 College Chemistry I (4)
- ENGLISH 1000 Exposition and Argumentation (3)
- ECONOM 1014 Principles of Microeconomics (3)
- or ECONOM 1015 Principles of Macroeconomics
- or ECONOM 1024 Fundamentals of Microeconomics
- CMP_SC 1050 Algorithm Design and Programming I (3)
- CMP_SC 2050 Algorithm Design and Programming II (3)
- ECE 1000 Introduction to Electrical and Computer Engineering (2)
- ECE 1210 Introduction to Logic Systems (3)
- ECE 2100 Circuit Theory I (4)
- ECE 3210 Microprocessor Engineering (4)
- ECE 3810 Circuit Theory II (4)
- ECE 3220 Software Design in C and C++ (3)
- ECE 3830 Signals and Linear Systems (3)
- ECE 3510 Electromagnetic Fields (3)
- ECE 3410 Electronic Circuits and Signals I (4)
- ECE 3610 Semiconductors and Devices (3)
- ECE 3110 Electrical and Computer Engineering Projects (3)
- ECE 4220 Real Time Embedded Computing (3)
- ECE 4250 VHDL and Programmable Logic Devices (4)
- ECE 4270 Computer Organization (4)
- ECE 4970 Senior Capstone Design (3)

**Electives**

- 3000+ ECE or CMP_SC Elective (12)
- ECE 4000+ Technical Elective (6)
- ECE 4000-level Senior Lecture/Lab (4)
- Any Elective (1)

**Semester Plan**

- MS in Electrical Engineering (p. 458)
The Department also offers a PhD in Electrical and Computer Engineering (p. 451), and the College of Engineering offers an interdepartmental ME in Engineering with a focus in Computer or Electrical Engineering (p. 460).

Established in 1885, the Department of Electrical & Computer Engineering has a long tradition of excellence. Our classes are small with extensive design and laboratory experimentation. Research opportunities exist for both undergraduate and graduate students in Communication and Signal Processing, Physical Electronics, Intelligent Systems, Systems Modeling and Control, Nano and Micro Electronics, and Digital / Computer Systems.

Career Opportunities

Throughout the 20th century, the electrical engineering and computer engineering professions devised many of the innovations that dominated the technology landscape. In the 21st century, electrical and computer engineers will be at the forefront of a wide spectrum of technologies including nanotechnology, biotechnology, sensors, power generation, electric vehicles, and telecommunications.

Degrees Offered

At the University of Missouri, the Department of Electrical and Computer Engineering offers accredited programs of study leading to Bachelor of Science (BS), Master of Science (MS), and Doctoral (PhD) degrees.

Areas of study include

Communications and Signal Processing, Satellite remote sensing, geospatial intelligence, image/video processing, land-mine detection, speech signal processing, wireless communications, underwater communications.

Physical Electronics. Medical applications and advanced sterilization of food, water and products using pulsed power, pulsed power applications and research (MU Gigawatt Rep-rate Test Stand. Lasers, high voltage switching and power conditioning, high voltage pulse technology and plasmas with the 2.5 MV, 250 kA MU-Terawatt Test Stand), interesting plasma science applications, like high voltage accelerators to propel micro spacecraft, electromagnetic launchers, radio-frequency effects on electronics, power electronics, microwave photonics, electrooptics and photoconductive switches.

Intelligent Systems. Basic and applied research in computational intelligence (neural networks, fuzzy systems, evolutionary computation, swarm intelligence), spatial reasoning for scene understanding and human/robot interaction, pattern recognition and automated decision making, eldercare technology, computer vision and image processing, human activity analysis, cognitive robotics, landmine and explosive detection.

Systems Modeling and Control. Control systems, computer process control, digital and sampled data control, robotics, system biology; biologically realistic modeling, computational, neuroscience, theoretical neuroscience, electrophysiology.

Nano and Micro Electronics. Nano/microelectromechanical systems (N/ MEMS), micro sensors and actuators, High K dielectrics, nano structures, complex heterostructures (i.e. HEMTs, VCSELs, detectors, HBTs, etc), BioMEMS and biomedical microsystems.

Digital System and Circuit Design, Computer Process Control. Excellent computer equipment and other laboratory facilities are used for research sponsored by various government and industry sources. The ECE department is the home department of the following University centers: Center for Geospatial Intelligence, Center for Micro/Nano Systems and Nanotechnology, Center for Eldercare and Rehabilitation Technology, Center for Physical Electronics and Power Electronics, Center for Electromechanics and Energy Conversion, Interdisciplinary Center for Research in Earth Science Technologies, Institute for Computational Neurobiology.

Internal Funding

Teaching Assistantships

Teaching assistantships are normally awarded to qualified graduate students with appropriate communication skills who assist faculty members in various phases of instruction. International students may not be appointed to teaching assistantships in their first semester on campus. International students must pass a language screening test at a proper level to be eligible for the TA positions available.

Research Assistantships

Research assistantships are granted to students qualified for working with professors on particular research projects. The research assistants are selected by faculty members who have research funds to support graduate students. Therefore, students should contact the faculty members directly for the RA possibility.

Fellowships

The department faculty actively pursue funding for selected research fellowships. Available fellowship opportunities can be found by contacting the ECE Graduate Office. Additionally, a limited number of “Teaching Fellows” are awarded annually to outstanding PhD students, particularly for those preparing for academic careers. Details can obtained from the ECE Graduate Office.
**Undergraduate**

**BSEE in Electrical Engineering**

**Major Program Requirements**

The electrical engineering degree offers course work in all traditional areas of the electrical engineering field. Focused areas of work are offered in the areas of communications, digital systems, discrete and integrated electronics, electromagnetics, energy systems and power electronics, robotics and system control. (Focus areas are not listed on transcripts or diplomas).

Students must complete all university requirements (p. 17), including general education (p. 18), and degree requirements below.

Total Credits: 126

**Graduate**
MS in Electrical Engineering

Master of Science in Electrical or Computer Engineering (MS)

Admission

349 Engineering Building West, Columbia, MO 65211
Phone: 573-882-4436
Email: umcengregradoff@missouri.edu
http://engineering.missouri.edu/ece/

Admission Criteria

Fall deadline: February 15
Spring deadline: September 1
Note: Applications received after these deadlines will be evaluated as time allows.

- Minimum GPA: 3.0 for the last 60 hours
- Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal</th>
<th>Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011, 80th percentile</td>

Required Application Materials:

- Statement of Purpose (upload to the Supplemental information section of the application)
- Copies of your official transcripts (upload to the Educational History section of the application)
- Copies of your GRE scores (upload to the Test Information section of the application)
- Copies of your TOEFL or IELTS Scores (for non-native English speakers only) (upload to the Test Information section of the application)
- 3 letters of Recommendation (the department accepts electronic recommendations – in the recommendation section of the online application, enter the information for three recommenders. Each recommender will receive an email with instructions on how to complete the recommendation). The department does also accept hard copy letters of recommendation. The letters may be mailed to: Graduate School, 210 Jesse Hall, Columbia, MO 65211.

To the Graduate School:

Official Transcripts. The mailing address is: Graduate School, 210 Jesse Hall, Columbia, MO 65211.

Note: when registering for GRE or TOEFL exams, be sure to designate your program of interest at the University of Missouri – Columbia. MU's Institutional Code is 6875 (no departmental code is necessary).

Admissions Criteria for the MS in Electrical or Computer Engineering

To be accepted outright by the director of graduate studies (DGS), the student needs to have a BS degree in either Electrical Engineering or Computer Engineering in addition to meeting the above requirements. Students who meet the academic requirements but have degrees in other engineering or science disciplines can be accepted directly into the MS program by the graduate program committee (GPC). Such students are strongly encouraged to consult with the DGS or their advisor about appropriate bridge courses. Based on individual circumstances, students may be advised to register as an undeclared graduate student to fill in background course work prior to admission into the department.

Students who do not meet the above requirements may still be admitted on probation by the GPC if there are mitigating factors. Students admitted on probation must receive at least a 3.0 GPA for the first 12 hours of graded graduate coursework completed in their first two semesters. Failure to achieve this GPA will result in expulsion from the ECE MS program.

Appeal Process

All students have the right to a timely formal appeal to the GPC. Upon receipt of an admission decision or disciplinary action, the student has 10 working days in which to request a formal appeal. The DGS will convene a meeting of the GPC, the student, and the student’s advocate (if appropriate) within 10 working days of receiving the request. The decision of the GPC at the hearing is final.

Degree Requirements

To fulfill the requirements for the MS degree, the following rules apply:

- A candidate must complete 30 hours, including at least 12 hours of 8000-level graded course work (exclusive of ECE 8990 or ECE 8085 or ECE 8010 hours).
- At least six of these graded 8000 level course hours need to come from ECE.
- At least 15 hours of graded course work (total combination of 7000 and 8000 level courses, exclusive of ECE 8990, ECE 8085, or ECE 8010 hours) must be taken from the Electrical and Computer Engineering Department course offerings.
- A maximum of six hours of graduate credit may be transferred from another campus in the University of Missouri System or other university, while a maximum of eight hours of graduate credit may be used from a previous MU master’s degree.
- At most, three hours of course work in supervised study (ECE 8990, ECE 8085, or ECE 8010) may be taken during the MS program and they will be graded on an S/U basis.
- At least one course from each of three different emphasis areas must be taken; a minimum of two of the emphasis areas must be in Electrical and Computer Engineering. (Each ECE graduate course is designated to an emphasis area. Contact the ECE graduate office for a current list).
• A minimum of 3 hours to a maximum of 6 hours of research (ECE 8990) or problems (ECE 8085) are required, based on whether the student writes a master’s thesis or a master’s Report.
• The student’s cumulative GPA must be at least 3.0 to graduate.

The requirements for the MS degree must be met within an eight year period. Each candidate must pass a final oral examination to demonstrate mastery of the work included in the thesis or in a substantial independent project. These MS requirements apply to ECE graduate students first enrolled in MU ECE in the Fall semester 2007 or later. UM ECE graduate students enrolled prior to Fall semester 2007 may choose to follow the MU ECE MS requirements that were in effect for their MU ECE graduate admission semester.

Academic Probation

A student whose GPA drops below 3.0 is automatically placed on academic probation. In such a case, the student has one semester to raise his or her cumulative GPA to 3.0. Failure to do so will result in expulsion from the program. Additionally, a student who receives the grade of “C” in 9 hours of coursework will be expelled. As with acceptance, students here also have a right to the same formal appeal process described above.

Selection of an Advisor

Students must choose an academic advisor who will then provide guidance for the selection of coursework, and in the choice and execution of a research question. The student’s academic advisor and the Director of Graduate Studies must approve all coursework used to satisfy the credit hour requirements for this degree. After performing satisfactorily for a minimum of one semester, the student, with the advisor’s assistance, completes the Program of Study form that outlines the plan of study for the student’s graduate program. M1 - Program of Study form

The form is forwarded through the DGS to the Graduate School for approval. In the event that an advisor retires or leaves MU, he/she may continue to serve as the student’s main adviser unless there is written academic program policy prohibiting such an arrangement. If an advisor is unable or unwilling to continue to serve, the academic program, with the leadership of the DGS, will assist the student to ensure that a replacement is found.

The Program of Study form must be filed with the Graduate School by the end of the student’s second semester of enrollment. Upon approval of the program by the Graduate School, the student is a candidate for the degree. If changes must be made on a student’s Program of Study form, a Program of Study Substitution form is used.

Thesis Option

For students under the thesis option of the MS degree, i.e., students enrolling for ECE 8990, an M-2 Request for Thesis Committee form is required to be submitted for approval by the department DGS and the Graduate School by the end of the student’s second semester.

A thesis committee is composed of three members of the MU faculty: a major adviser from the academic program, a second reader from the academic program, and an outside reader who is a member of the graduate faculty from a different MU graduate program. Upon approval of the department DGS, the student may petition the Graduate School to allow a person who is not a member of the MU graduate faculty to serve as the third reader. The petition should include a written justification for such a request and a copy of the person’s curriculum vitae. The Graduate School maintains copies of curriculum vitae previously received and approved. If such a request is anticipated, the student should contact the Graduate School to see if the curriculum vita of a particular person is already on file. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date.

Information about submitting the thesis can be found in the Thesis and Dissertation Guidelines.

Non-Thesis Option

For students who enroll in ECE 8085 (Problems), a problem report rather than a thesis is required. The student is not required to submit the M-2 form (request for a thesis committee). Instead, the student must have the report approved by his or her advisor and two other members of the graduate faculty, forming the student’s Problem Committee. It is not required that a member outside of ECE be included, although it is permissible for such a member of the MU graduate faculty to be appointed. At least one of the three members must have a primary academic appointment in ECE. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date. At that time, an announcement is to be made to the department faculty and graduate students to allow them to attend the defense. The student must defend the problem report to the committee, and make any needed adjustments in format and corrections/clarifications based on input from the committee. A final copy of the problem report must be filed with the ECE graduate office.

Report of the Master’s Examining Committee

The purpose of the M-3 Report of the Master’s Examining Committee Form is to have an official record of the final examining process, whether it is a thesis defense or presentation of a report. The student’s committee will indicate on this form if the student has passed the final exam. This form must be submitted to the Graduate School by a deadline for the semester in which the students plan to graduate. For a report option, the 3rd reader of the committee may be from the student’s department. The form is due in the Graduate School two weeks prior to graduation.
Engineering Programs in Engineering are multi-department programs, and administered by the College of Engineering. Requirements are determined based on the specific area of interest. Options include a minor at the undergraduate level, and a master's degree at the graduate level.

College of Engineering
W1025 Lafferre Hall
Columbia, MO 65211
http://engineering.missouri.edu

Faculty
Instructor D. R. Huaco, R. T. Whelove

Please see the appropriate degree program pages for faculty information.

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• Minor in Engineering (p. 460)

Graduate

• ME in Engineering (p. 460)

The College of Engineering offers the Master of Engineering degree for graduate students interested in a terminal master’s degree, who have a demonstrated need for a professional, non-research degree in engineering, and have an academic interest in a specific focus area within engineering.

Several departments in the College of Engineering administers an ME degree focusing in that area.

Note: A focus area is not listed on the MU transcript. Hence the transcript and the diploma for any student completing an ME degree will only indicate Master of Engineering, with no designation of any specific department.

Undergraduate

Minor in Engineering

The minor in engineering is designed for students majoring in disciplines such as physics, math, chemistry and computer science, but it is available to students in all disciplines. It consists of 18 or 19 hours of engineering courses as listed below.

Required Courses

<table>
<thead>

Graduate

ME in Engineering

NOTE: Focus areas do not appear on diplomas or transcripts.

ME with a focus in Biological Engineering

Recognizing the immense promise of bioengineering and the unique position of MU for a strong bioengineering program, the College of Agriculture, Food and Natural Resources (CAFNR) and the College of Engineering (CoE) joined forces to form the Department of Biological Engineering (BE). BE unites existing faculty and infrastructure from both colleges. CoE contributes biomedical engineering capabilities while CAFNR brings strengths in bioprocess and bioenvironmental engineering. Biological engineering confers both masters and doctoral degrees to students who satisfy the general requirements of the Graduate School and the specific requirements for the masters degree and the doctoral degree of the Department of Biological Engineering.

ME with a focus in either Electrical or Computer Engineering

The ME degree is designed for entering master students interested in a terminal master’s degree, who have a demonstrated need for a professional, non research degree in engineering, and have a academic interest in the department. Please note that the official University transcript and diploma will only indicate Master of Engineering, with no designation of the focus area. The entrance requirements for the ME degree/Electrical and Computer Engineering Focus are the same as for the MS in Electrical Engineering and MS in Computer Engineering. Note: When registering for the GRE and TOEFL exams, be sure to designate the University of Missouri-Columbia and your program of interest as locations to receive the scores. MU’s Institutional Code for the GRE and TOEFL is: 6875.
ME with a focus in Industrial and Manufacturing Systems Engineering

The Master of Engineering (ME) degree is a non-research thirty-six-credit-hour program for U.S. students designed to be a terminal degree. The ME curriculum is based upon a seven-course core with the remaining 15 hours made up of courses appropriate to the student’s concentration area.

ME Entrance requirements

- GPA of 3.0 on 4.0 scale in the last 60 hours of the BS program
- Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal</th>
<th>Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>

</tr>
<tr>
<td>Speaking</td>
<td>5.5</td>
</tr>
</tbody>
</table>

- 3 letters of recommendation
- statement of purpose
- transcripts

When registering for the GRE and TOEFL exams, be sure to designate the University of Missouri - Columbia and your program of interest as locations to receive the scores. MU's institutional code for the GRE and TOEFL is 6875.

Graduation Requirements

An ME student must complete a minimum of 36 credit hours of graduate course work. At least 15 hours must be in 8000+ level courses and a minimum of 21 hours must be from the College of Engineering. The student must maintain at least a 3.0 cumulative gpa and complete the program in eight years. A project may be required by the adviser. For additional degree requirements based on the focus area, students should consult with the specific College of Engineering Department.

How to Apply

Applicants must concurrently apply to the MU Graduate School and the engineering department offering the focus area interest. Contact the department before applying for specific instructions.
Industrial Engineering

Luis G. Occeña, Chair
College of Engineering
E3437 Lafferre Hall
(573) 882-2692
http://engineering.missouri.edu/imse

Industrial and manufacturing systems engineering is a blending of natural sciences, engineering science, mathematics, computers, social science and management. This fusion of diverse skills allows industrial engineers to design and implement socio-technical systems - complex combinations of people and technology brought together to solve problems. With its diversity, industrial engineering is used in a wide variety of areas in both manufacturing and service industries.

Industrial engineers in a manufacturing organization address many issues including designing workplaces, considering not only the capabilities of machines, but also the physiological and psychological capabilities of humans. They may design computer-integrated manufacturing systems with robots and computer systems to control production or manage inventory and quality of complex products, determining plant and warehouse locations. They may also develop sales forecasts, evaluate proposals to produce new products and build new or improved production facilities.

The same skills used as an industrial engineer to design manufacturing systems are also useful in designing better systems to care for patients in hospitals, to facilitate the judicial process, to provide faster and more accurate mail distribution and to improve airline routing and reservation methods. In effect, the industrial engineer may be involved in the design of a range of systems that provide beneficial services at a cost that society can afford.

The department offers the Bachelor of Science with a major in Industrial Engineering (BSIE), and 5 year Industrial Engineering BSIE/MS and BSIE/MBA programs. The department also offers students the opportunity to obtain Lean Six Sigma Green Belt certification.

Faculty

Associate Professor C. H. A. Chang**, L. G. Occeña**
Assistant Professor J. H. Kim, R. G. McGarvey

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BSIE in Industrial Engineering (p. 464)

Advising Contact
James S. Noble, Director of Undergraduate Studies

Scholarship Information Contact
Luis G. Occeña

Industrial engineering undergraduates complete a curriculum similar to all engineering students during the first two years. The objective of this curriculum is to give the student a rigorous foundation in mathematics, natural sciences, basic engineering sciences, applied probability and computer science, as well as a complementary and meaningful exposure to the humanities and social sciences.

In addition to the foundational courses, students gain knowledge of optimization methodologies, static and dynamic modeling. They also learn evaluation techniques for the modeling and evaluation of integrated systems of people, technology and information in the areas of strategic planning, production systems, control systems, quality systems, information systems, product and process design.

These fundamental skills provide the foundation from which students learn to develop systematic and integrated solution approaches to large-scale enterprise problems. In order to be successful as they begin their careers (or graduate study) students learn to communicate effectively in both oral and written forms, and become proficient in working in diverse teams of individuals.

Lastly, the curriculum prepares the student to practice in an ethical and professional manner, to serve as well as benefit from the engineering profession, and to continue the learning of and the contribution to the advancement of industrial and manufacturing systems engineering concepts.

Industrial engineering design experiences are integrated throughout the curriculum, many times in a team-based environment. Industrial engineering design is the process of developing and improving integrated systems that include people, materials, information, equipment and energy.

Educational Objectives

Graduates of the Department of Industrial and Manufacturing Systems Engineering (IMSE) at the University of Missouri are able to:

- Assess and create enterprise value through innovative structured problem solving, in order to make processes faster, more innovative, reliable or cost-efficient
- Analyze and design optimized solutions to systems of people, technology and information
- Provide leadership for and communicate effectively in a team-based environment in order to be agents of change in dynamically changing organizations

Educational Outcomes

All IMSE BSIE graduates should have:

- **Foundational knowledge** in mathematics, natural sciences, engineering sciences, applied probability, computer science, humanities and social science.
  - ABET a) knowledge of math, science, engineering
  - ABET h) understanding of global/societal context of engineering
  - ABET j) knowledge of contemporary issues
- **Optimization skill sets** for modeling, optimization and evaluation of integrated systems of people, technology and information.
  - ABET b) ability to design/conduct experiment; data analysis
  - ABET k) ability to use techniques, skill and tools
- **Problem-solving ability** based upon knowledge and skills to develop integrated solutions to large-scale, socio-technical problems
  - ABET c) ability to design integrated systems
  - ABET e) ability to identify, formulate and solve IE problems
  - ABET k) ability to use techniques, skill and tools
• Communication and group dynamics skills to communicate in both oral and written forms and to become proficient in working in diverse teams of individuals.
  • ABET d) ability to function in teams
  • ABET g) ability to communicate effectively
• Understanding of professional and ethical behavior to be prepared for ethical decision making, service to the engineering profession, and to have the means to continue in the acquisition of knowledge.
  • ABET f) understanding of professional/ethical responsibility
  • ABET i) recognition of need for life-long learning.

In summary, graduates of the Department of Industrial and Manufacturing Systems Engineering (IMSE) will possess a strong foundation upon which they can grow professionally, and continue to build a focused set of fundamental and engineering knowledge and skills that are integrated and applicable to real-world problems in any enterprise setting.

Because industrial engineering graduates are capable of solving complex problems requiring an understanding of an entire organization, they become prime candidates for top management or administrative positions.

**IMSE Honors Program**

The IMSE Honors Program follows the regulations and philosophy of the College of Engineering Honors Program, and as such is intended to encourage, facilitate and reward independent study by high-ability undergraduate students.

The heart of the program is an undergraduate honors project, undertaken and completed by the time of graduation while enrolling in 1 to 6 credits of IMSE 4995 Undergraduate Research Industrial Engineering - Honors. The academic credit for the honors project (1-6 credits in IMSE 4995) replaces an equivalent number of credits of IMSE or Technical electives. The project is conducted under the direction of an IMSE professor (honors advisor) who is selected by the student, with agreement by the professor. The project culminates in an honors thesis, which is read and approved by the honors advisor and then approved by the chair of the IMSE honors committee. A finished copy of the honors thesis, signed by the honors advisor and second reader, is required for satisfactory completion of the project.

**Academic Qualifications for the Honors Program**

In the case of a transfer student, transferred credit plus MU credit must average 3.0/4.0. A student is typically eligible for the honors program at the junior year of their undergraduate program.

The successful honors scholar is given a degree of flexibility in the program of study. Additionally, honors scholars may reduce the credits required for degree completion to the University minimum (i.e., 120 credits) by substituting graduate course credits through dual enrollment (undergraduate/graduate at MU) during the last two semesters of the undergraduate program.

Honors students must maintain and graduate with a 3.0 overall GPA.

**Lean Six Sigma Green Belt Certification**

IMSE students have the opportunity to obtain a Lean Six Sigma Green Belt certification either during their degree program or after. Certification requires students to obtain a GPA average of 2.5 or better in IMSE 4110, IMSE 4310, and IMSE 4610, then they must successfully complete IMSE 4385 - Lean Six Sigma Green Belt Project (a 1 credit hour course where DMAIC is used to improve a process within an organization).

**Graduate**

Industrial & Manufacturing Systems Engineering Graduate Programs
College of Engineering
E3437 Lafferre Hall
573-882-2691
http://engineering.missouri.edu/imse/

**Director of Graduate Studies:** Cheng-Hsiung A. Chang

• MS in Industrial Engineering (p. 465)
• PhD in Industrial Engineering (p. 466)

**About IMSE**

The graduate program in industrial engineering provides a scholarly environment in which highly qualified, creative students may obtain the knowledge and develop the skills necessary to solve complex industrial, governmental and societal system design problems. These systems are required to operate within increasingly complex constraints, thus requiring the use of sophisticated and creative designs. The industrial engineer responsible for such designs must be capable of applying a broad spectrum of scientific tools if the most effective systems are to be obtained.

Our master of science program is designed to provide a basic understanding of these tools and experience in the application of these tools in the design process. The doctor of philosophy program is designed to provide the specialized knowledge and skills necessary to develop new tools or methods for solving complex systems design problems. Information on engineering licensure is detailed under Professional Engineering Registration.

**General Admission Guidelines**

Acceptance for advisement in the department’s graduate programs is available to students with an ABET accredited undergraduate engineering degree. Engineering graduates who have not taken linear programming, linear algebra, statistical quality control or engineering economic analysis must complete 12 hours of additional course work before graduation.

Students with baccalaureate degrees in mathematics, physics, chemistry or computer science may be accepted if they have completed 13 hours of calculus, three hours of differential equations and six hours of calculus-based probability and statistics. Several factors are considered in evaluating an applicant’s capability, such as overall GPA, grade trends and major area grades. In addition, each applicant is required to take the general test of the GRE and International students must take the TOEFL and TWE, or IELTS.

**Facilities and Resources**

Laboratory facilities in several major application areas, both within the department and in the college, support the academic program. Neighboring industries, city, county and state government agencies, local hospitals and nearby large metropolitan centers provide a reservoir of research and design opportunities.

**Computing and Reference Materials**

The department has access to the University of Missouri System computing network and maintains its own computing facilities for
student use. Besides Ellis Library facilities, an excellent collection of mathematical, statistical and engineering books and reference materials are housed in the engineering library and the industrial and manufacturing systems engineering departmental library.

**Funding**

Fellowships, scholarships and teaching and research assistantships are available to qualified graduate students. These forms of financial assistance are supported by funds made available through state, federal and industrial graduate support programs and through research grants from various industrial and governmental agencies.

**Undergraduate**

**BSIE in Industrial Engineering**

**Major Program Requirements**

In addition to the major core requirements, students must complete all University graduation requirements (p. 17) including University general education (p. 18), as well as all degree and college or school requirements.

**Major Core Requirements**

**Technical electives**

A technical elective is defined as any course relevant to the degree program but not required, such as computer science, engineering, mathematics, science and select business courses.

**Semester Plan**

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.

**First Year**

- **Fall**
  - MATH 1500 5
  - MATH 1700 5
  - CHEM 1320 4
  - IMSE 1000 1
  - Constitutional Requirement (Social Science Elective) 3
  - Humanities / Social Science Elective 3
  - 16

- **Spring**
  - MATH 1700 5
  - CHEM 1320 4
  - IMSE 2030 3
  - IMSE 2110 3
  - IMSE 2210 3
  - Technical electives 6
  - 16

**Second Year**

- **Fall**
  - MATH 1500 5
  - CHEM 1320 4
  - IMSE 2030 3
  - IMSE 2110 3
  - IMSE 2210 3
  - 17

- **Spring**
  - MATH 1700 5
  - CHEM 1320 4
  - IMSE 2030 3
  - IMSE 2110 3
  - IMSE 2210 3
  - Technical electives 6
  - 17

**Third Year**

- **Fall**
  - MATH 1500 5
  - CHEM 1320 4
  - IMSE 2030 3
  - IMSE 2110 3
  - IMSE 2210 3
  - Technical electives 6
  - 16
The Master of Science in Industrial Engineering (MS) degree consists of two options: a 30-credit hour research oriented program requiring a thesis or a 30-credit hour application oriented program requiring a project report. The MS Industrial Engineering thesis option curriculum is built upon the choice of a concentration area around which students can mold their overall academic effort including six hours of research. The three current focus areas are Operations Research and Statistics, Manufacturing/Production/Service Systems and Human and Enterprise Systems. Other focus areas are in development. The MS Industrial Engineering project option requires three hours of an approved project advised by a faculty member in lieu of a thesis, and one more course.

Master of Engineering

The Master of Engineering (ME) degree is a non-research thirty-six-credit-hour program for U.S. students designed to be a terminal degree. The ME curriculum is based upon a seven-course core with the remaining 15 hours made up of courses appropriate to the student's concentration area.

Dual Master's Degree Programs: Master of Science and MBA

The Department of Industrial and Manufacturing Systems Engineering, in cooperation with the College of Business, offers a dual master's degree program for those students who wish to combine the specialized skills of the industrial engineer with the general knowledge of the professional manager. The program was developed in recognition of the fact that solutions to organization problems often require that the engineer's analytical abilities be applied simultaneously with the manager's integrative perspective. This dual program has been carefully structured to provide the necessary academic background to obtain an MS in industrial engineering and an MBA simultaneously, in a minimum amount of time, usually two academic years.

Master of Science and MHA

The Department of Industrial and Manufacturing Systems Engineering, in cooperation with the health services management program of the School of Medicine, offers a dual master's degree program to prepare its graduates for careers in the design and administration of health-care delivery systems and organizations. The program was developed in recognition of the highly complex nature of health-care organizations. The program's basic objective is to fuse competencies in health-service management and in health-systems design. The required courses in the industrial engineering program serve as the area of specialization in the health services management program, and the required courses in the health-services management program are used as electives in the industrial engineering program. As a result, it is possible for the student to earn an MHA in health-services management and an MS in industrial engineering simultaneously.

Application Deadlines

Applications accepted all year.
Fall decision dates: March 1
Spring decision date: September 1

Minimum Admission Criteria

- Minimum GPA: 3.0/4.0
- Test of Written English: (TWE) of 4.0 (international applicants only)
- Minimum Academic IELTS OVERALL score: 6.0; or Minimum TOEFL scores:
  - Internet-based test (iBT) 80
  - Paper-based test (PBT) 550
- Minimum GRE scores:
  - When did you take the GRE?
    - Prior to August 1, 2011
      - Verbal + Quantitative 350
      - Analytical 700
    - On or After August 1, 2011
      - Verbal + Quantitative 143
      - Analytical 155
- Foreign Language: No foreign language is required in either program.

Required Application Materials

To the Graduate School:
- All required Graduate School documents

To the IMSE Graduate Program:
- 3 letters of recommendation
- Statement of Purpose
- Curriculum Vitae (CV)
- GRE scores

TA/RA Hiring

This academic department does not have any function of financial aid. Rather, IMSE hires TA/RA automatically based on the department needs. No separate application or contacts are necessary; all top ranked applicants will be considered.

Degree Completion Requirements

The Master of Science in Industrial Engineering (MS) degree consists of two options: a 30-credit hour research oriented program requiring a thesis or a 30-credit hour application oriented program requiring a project report. The MS Industrial Engineering thesis option curriculum is built upon the choice of a concentration area around which students can mold their
overall academic effort including six hours of research. The three current focus areas are Operations Research and Statistics, Manufacturing/Production/Service Systems and Human and Enterprise Systems. Other focus areas are in development. The MS Industrial Engineering project option requires three hours of an approved project advised by a faculty member in lieu of a thesis, and one more course.

PhD in Industrial Engineering

Admission Contact Information

About the Doctoral Degree

Programs are individually tailored to meet students’ objectives and to culminate in an original research dissertation. The PhD builds upon the MS programmatic areas. The three current focus areas are Operations Research and Statistics, Manufacturing/Production/Service Systems and Human/Enterprise Systems. Other focus areas are in development. Fundamental IE knowledge in each is expected. The basic goals of the PhD program are to provide students with a solid understanding of the theoretical bases for the latest tools and techniques of systems analysis and design, an extensive experience in applying these analyses and design tools and techniques, and research experience in the development of new tools or applications of existing techniques to design or analyze problems.

Application Deadlines

Applications accepted all year.
Fall decision dates: March 1
Spring decision date: September 1

Minimum Criteria to be Considered for Admission

- Minimum BS GPA: 3.3/4.0; MS GPA: 3.5/4.0
- Minimum OVERALL IELTS scores: 6.0; or Minimum TOEFL scores:
  - Internet-based test (IBT) 80
  - Paper-based test (PBT) 550
- Minimum GRE scores:
  - Verbal + Quantitative
  - Analytical
    - Prior to August 1, 2011
      - 350
      - 700
    - On or After August 1, 2011
      - 143
      - 155
- Foreign Language: No foreign language is required in either program.
- Completed master's thesis or equivalent (Non-thesis MS is not considered).
- Compatible research interests with a member of the IMSE faculty.
- BS in Math is very welcome in OR focus.

Note: Only highly qualified students are accepted for advisement in the PhD program. The faculty looks for excellence in undergraduate and graduate work, high GRE scores, thesis training, and strong indications of research potential.

Notification

This department does not use “rolling admission.” Applicants will be notified within a month after decision date.

Required Application Materials

To the Graduate School:
- All required Graduate School documents

To the IMSE Graduate Program:
- 3 letters of recommendation
- Statement of Purpose
- Curriculum Vitae (CV)
- GRE scores
- English thesis or draft (in PDF file or hard copy)

TA/RA Hiring

This academic department does not have any function of financial aid. Rather, IMSE hires TA/RA automatically based on the department needs. No separate application or contacts are necessary; all top ranked applicants will be considered.

Degree Completion Requirements

The granting of a PhD requires completion of five major requirements:

1. A qualifying examination,
2. A course of study (Study Plan),
3. Comprehensive examination,
4. Acceptance of dissertation proposal, and
5. Final public defense of the completed dissertation.
Information Technology

Dong Xu, Chair
College of Engineering (BS in Computer Science and BS Information Technology)
College of Arts and Science (BA in Computer Science)
201 Engineering Building West
(573) 884-1887
engineering.missouri.edu/cs

The information technology (IT) degree program was launched in 2005 with a gift from AT&T/SBC. IT students collaborate with students from other disciplines to create software applications, produce videos and films and use technology to solve a wide range of complex problems. The program proves attractive to students because of its distinguished faculty and state-of-the-art facilities that greatly exceed what is available at competing institutions.

Faculty
Assistant Professor R. Chadha**, P. Calyam**, D. Korkin**
Associate Teaching Professor D. Musser*
Adjunct Professor J. M. Keller**, S. Nair**, M. Skubic**
Adjunct Associate Professor G. DeSouza**
Adjunct Assistant Professor M. Becchi**, M. Popescu**
* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate
• BS in Information Technology (p. 467)
  • with emphasis in Information Systems (p. 468)
  • with emphasis in Media Technologies (p. 468)
  • with emphasis in Networks and Wireless Technologies (p. 469)
• Minor in Information Technology (p. 469)

This degree program is offered by the Computer Science Department within the College of Engineering. Career opportunities include database administration, web design, cyber security, game development, film production, and more.

Graduate
While the College of Engineering does not offer a graduate degree specifically in Information Technology, it does offer a number of graduate degrees in closely related areas such as Computer Science (p. 445), and Computer Engineering (p. 440). The University also offers a number of information technology degrees in its other Colleges, and through interdisciplinary programs such as Health Informatics (p. 641), Health Administration (p. 639), or Informatics (p. 645). Or you may browse a complete list of degree options (p. 5) at the University of Missouri.

BS in Information Technology

Major Program Requirements
To receive the Bachelor of Science Degree in Information Technology, the candidate must successfully complete 126 semester hours of credit including the following distribution: Computer Science (CMP SC) course requirements - 55 hours of CMP SC/INFOTC core courses, 12 hours of related math and business courses, 9-12 hours of science, 15-22 hours of courses in a minor and any remaining hours for elective courses. The BS IT degree requires the completion of at least 9 hours of mathematics and statistics including 3 hours of business calculus. An INFOTC student can earn a minor in a related area outside of INFOTC/CMP SC.

Information Technology students must earn a C-range grade or better in all INFOTC/CMP SC courses that are prerequisites for other INFOTC/CMP SC courses that the student takes. To graduate, a student must earn a cumulative UM grade point average of 2.0 or better and a 2.0 grade point average or better in all CMP SC/INFOTC courses.

The Engineering Career Services Office, W1025 Lafferre Hall, can assist students in searching for employment opportunities and for internship/co-op positions.

These course requirements apply to students beginning full-time Fall 2013 or after.

In addition to the major core requirements, students must complete all University graduation requirements including University general education, as well as all degree and college or school requirements. See course descriptions for prerequisites.

Science Concentration

Twelve hours in science are required including one 2-semester sequence in which both courses include laboratories. If student completes a minor by pursuing the formal course requirements for minors in a department outside Computer Science, only 9 credit hours of science with one lab are required.

Total Credits: 126

BS in Information Technology with Emphasis in Information Systems

Major Program Requirements

Students are no longer being accepted into this emphasis area. Students should refer to the degree requirements for the BS in Information Technology (p. 467).

BS in Information Technology with Emphasis in Media Technologies

Major Program Requirements

Students are no longer being accepted into this emphasis area. Students should refer to the degree requirements for the BS in Information Technology (p. 467).

Semester Plan

A sample plan of study has not been designed for this emphasis. Students should refer to the semester plan for the BS in Information Technology (p. 467), or contact the academic department for assistance with academic planning.
BS in Information Technology with Emphasis in Networks and Wireless Technologies

Major Program Requirements
Students are no longer being accepted into this emphasis area. Students should refer to the degree requirements for the BS in Information Technology (p. 467).

Semester Plan
A sample plan of study has not been designed for this emphasis. Students should either refer to the semester plan for the BS in Information Technology (p. 467), or contact the academic department for assistance with academic planning.

Minor in Information Technology
A minor in Information Technology is offered through the College of Engineering. To obtain a minor, a student must complete courses in a sequence approved by the Department of Computer Science. The student must earn a 2.0 GPA in all courses counting toward the minor. At least 9 hours must be taken in residence at MU. A total of 15 credit hours are required.

The following courses are required for sequence one. At least 9 hours must be at the 2000 level or above. For other possible sequences, contact the department.

Total Credits 15

1 Prerequisite: INFOTC 1610 or INFOTC 2610
2 Prerequisite: INFOTC 3640
Mechanical and Aerospace Engineering

Yuwen Zhang, Interim Chair and James C. Dowell Professor
College of Engineering
E2412 Lafferre Hall
(573) 882-2785
ZhangYu@missouri.edu

Melanie M Carraher, Administrative Associate
Mechanical & Aerospace Engineering
E2412 Lafferre Hall
(573) 882-2085
carrahermm@missouri.edu

The Department of Mechanical and Aerospace Engineering is one of 9 academic departments within the College of Engineering at the University of Missouri. Established in 1891, this ABET accredited program is home to more than 800 total undergraduate and graduate students and about 27 faculty.

Faculty

Teaching Associate Professor G. L. Solbrekken**
Teaching Assistant Professor S. Naz**
Research Professor V. Gruzdev, N. Kim, L. Chen, C. Wilson, X. Han
Resident Instructor R. T. Whelove
Professor Emeritus W. L. Carson*, R. C. Duffield, A. D. Krawitz*, D. E. Wollerheim*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BSME in Mechanical Engineering (p. 472)
• with emphasis in Aerospace Engineering (p. 473)

Advising and Scholarship Contact
Gary L. Solbrekken, Undergraduate Director
solbrekkeng@missouri.edu
Shannon Kirk, Advisor
kirksd@missouri.edu

The department endeavors to present a strong experimental program through laboratory experiences to expose undergraduate students to modern instrumentation and measurement methodologies. Students work in well-equipped laboratories in design optimization, engineering computation, fluid power dynamics and control, materials, structural dynamics, measurement and instrumentation, laser processing, heat transfer and fluid dynamics, stress measurement and nondestructive evaluation.

The MU Mechanical Engineering program offers a Bachelor of Science in Mechanical Engineering (BSME) and prepares students for practice of the profession in industry or government or for further study toward other degrees such as the JD, MD, MS and PhD.

Mission Statement

The mission of the Mechanical and Aerospace Engineering Department is:

Prepare our students for successful careers in the mechanical engineering profession, conduct high quality and innovative research, and serve the community and industry providing educational and research resources.

Program Educational Objectives

The educational objectives of the undergraduate program in Mechanical Engineering are to produce graduates who (during the first several years following graduation)

• are able to apply the analytical, experimental, and computational techniques to solve engineering problems associated with the design and manufacture of devices, machines and systems (a,b,e,k);
• are able to analyze and synthesize integrated thermal/fluid and mechanical systems (a,c,e,k);
• are able to communicate effectively and work collaboratively on multidisciplinary teams (d,g);
• contribute to society and the profession through professional activities, and understand the impact of engineering solutions on a diverse and global society and their professional and ethical responsibility (f,h,j);
• engage in life-long learning necessary to advance professionally through continued education and training (a,h,i,j);
• succeed in graduate studies in mechanical engineering or a related field if pursued (a-k).

Note: letter(s) in parentheses indicates ME Program Outcome(s).

Program Outcomes

Students from the Mechanical Engineering program will attain (by the time of graduation):

a. an ability to apply knowledge of mathematics, science, and engineering
   a1. a knowledge of chemistry and calculus-based physics with depth in at least one;
   a2. an ability to apply advanced mathematics through multivariate calculus and differential equations;
   a3. familiarity with statistics, linear algebra, and numerical methods;
   b. an ability to design and conduct experiments, as well as to analyze and interpret data;
   c. an ability to design thermal, fluid, and mechanical systems, components, or processes to meet desired needs within realistic
constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
d. an ability to function on multi-disciplinary teams;
e. an ability to identify, formulate, and solve mechanical engineering problems;
f. an understanding of professional and ethical responsibility;
g. an ability to communicate effectively in oral, written and graphical forms;
h. the broad education necessary to understand the impact of engineering solutions global, economic, environmental, and societal context;
i. a recognition of the need for, and an ability to engage in, life-long learning;
j. a knowledge of contemporary issues in mechanical engineering;
k. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice in the areas of design and manufacturing, dynamics and controls, thermal and fluid systems, and mechanics and materials.

Double Majors and Dual Degrees

Dual majors and dual degrees are possible at the undergraduate level. These could lead to degrees in the College of Engineering and the College of Arts and Sciences or the College of Agriculture. Dual enrollments could also lead to two engineering majors within the College of Engineering. Any of these dual enrollments would add to the traditional 126-credit undergraduate degree program. Consult with the directors of undergraduate studies of the departments involved for further information.

MAE Honors Program

The MAE Honors Program follows the general rules, regulations and philosophy of the College of Engineering Honors Program, and as such is intended to encourage, facilitate and reward independent study by high-ability undergraduate students.

The heart of the program is an undergraduate honors project, undertaken and completed by the time of graduation while enrolling in 1 to 6 credits of MAE 4995 Undergraduate Honors Research Mechanical & Aerospace Engineering. The academic credit for the honors project (1-6 credits in MAE 4995 replaces an equivalent number of credits of technical or MAE elective. The project is conducted under the direction of an MAE professor (honors advisor) who is selected by the student, with agreement by the professor. The project culminates in an honors thesis, which is read and approved by the honors advisor and then approved by the chair of the MAE honors committee. A finished copy of the honors thesis, signed by the honors advisor and second reader, is required for satisfactory completion of the project.

Academic Qualifications for the Honors Program

In the case of a transfer student, transferred credit plus MU credit must average 3.0/4.0. A student is typically eligible for the honors program at the junior year of their undergraduate program.

The successful honors scholar is given a degree of flexibility in the program of study. Additionally, honors scholars may reduce the credits required for degree completion to the University minimum (i.e., 120 credits) by substituting graduate course credits through dual enrollment (undergraduate/graduate at MU) during the last two semesters of the undergraduate program.

Honors students must maintain and graduate with a 3.0 overall GPA.

In the case of a transfer student, transferred credit plus MU credit must average 3.0/4.0. A student is typically eligible for the honors program at the junior year of their undergraduate program.

The successful honors scholar is given a degree of flexibility in the program of study. Additionally, honors scholars may reduce the credits required for degree completion to the University minimum (i.e., 120 credits) by substituting graduate course credits through dual enrollment (undergraduate/graduate at MU) during the last two semesters of the undergraduate program.

- PhD in Mechanical and Aerospace Engineering (p. 474)

About Mechanical & Aerospace Engineering

Like markets merging together to create a global economy, this decade has approached the exciting frontier of joint research. The marriage of Mechanical Engineering to related fields has contributed to a new “Interdisciplinary Era”. In meeting the challenges brought on by this co-operative approach to engineering, the Department of Mechanical & Aerospace Engineering (MAE) at the University of Missouri has broadened its scope in both education and research while maintaining strengths in the fundamental disciplines: Dynamics & Control, Design & Manufacturing, Materials & Solids and Thermal & Fluid Science Engineering. Such well-established academic traditions in the undergraduate and graduate curriculum as well as nationally renowned research programs are the basis for MAE having become the largest department in the College of Engineering at MU. An equally important aspect contributing to the quality of the MAE department is the aggressive pursuit of funding, by our faculty, to establish nationally recognized research programs. Well-earned support through sizable funding from both federal agencies and industry are valuable resources in the promotion of our graduate research and undergraduate teaching.

Career Opportunities

Graduate programs are planned to prepare students for advanced professional engineering careers. In recognition of the broad nature of the field of mechanical and aerospace engineering, considerable latitude in programs is encouraged so students may prepare for employment in industry, education and government. The usual purpose of a PhD program is to prepare a person for a career in research or teaching. The program is oriented toward research culminating in a dissertation suitable for publication.

Areas of Study

A student may pursue an area of concentration selected from AI/expert systems, automation, bioengineering, combustion, control, creep and
plasticity, design optimization, numerical methods, computational fluid dynamics, fracture mechanics, heat transfer, interactive computer graphics, laser diagnostics, manufacturing systems, materials science, mechanical syntheses, mechatronics, mechanics, parallel computation, residual stress, robotics, thermal systems design and management and ultrasonic nondestructive evaluation.

**Licensure**

Information on degree requirements for engineering licensure is detailed under Professional Engineering Registration.

**Facilities and Equipment**

The department has several specialized laboratories in aerosol mechanics, combustion, computer control, creep and fracture mechanics, fluid mechanics and heat transfer, manufacturing, materials science and structural dynamics.

Besides the modern instrumentation and equipment normally found in well-equipped mechanical and aerospace engineering laboratories, the department has, or has access to, such specialty items as MTS and Instron material and structural test equipment, wind tunnels, X-ray and a scanning electron microscope facility, computer control systems, a scanning laser vibrometer, a microscope heat transfer and electronic coding laboratory, an experimental stress laboratory, a fluid power laboratory and the university research reactor.

**Information Technology and Computing**

A combination of the campus Division of Information Technology and the Engineering Technical Services (ETS) provided advanced engineering computation for College of Engineering faculty and students. CAD/CAM and graphics are the primary emphasis, although artificial intelligence, multiple high-level programming languages and computational and simulation libraries also are available.

The College of Engineering operates one high performance enterprise server, two super minicomputers and 17 HP workstations. The ETS also provides hardware/software support, locally, to nine College of Engineering departments and their affiliated research centers. These units are networked via Ethernet to the superminicomputers operated by the College of Engineering.

The Division of IT operates two remote terminal sites in the Engineering Buildings East. The University also supports an extensive computer system consisting of IBM mainframe computers, remote terminal sites, and PC and Macintosh labs throughout the campus.

**Financial Aid from the Program**

Admission decisions to the graduate program are made without considerations of a student’s financial need. Once admitted, a student may be considered for fellowships, research assistantships (RAs) and teaching assistantships (TAs). Awarding of fellowships is initiated by the department. RAs are awarded by individual faculty members. A student may apply by contacting faculty members directly. Application forms for TAs are available in the department office. International students are not eligible for TAs in their first semester of study. For specific departmental requirements, please refer to the MAE Graduate Handbook. Please see the department website for information on how to contact the professors individually about research assistantships offered.

**BSME in Mechanical Engineering**

**Major Program Requirements**

The MAE curriculum allows students to transfer among departments during the first two years. Students concentrate on departmental requirements during the junior year. The senior year includes three MAE electives that allow students to develop individual study programs. This enables students to complete a traditional program or create their own with special emphasis on system design, materials, manufacturing, energy systems, controls, or aerospace.

Experience in design is integrated throughout the required courses in the curriculum and culminates in the capstone design sequence. The capstone design experience integrates earlier technical work with economic, safety and environmental considerations. The projects are primarily obtained from industrial or private business clients. The presentations of project results are made to a review panel consisting of members of the faculty, the MAE Industrial Advisory Council and representatives of the client firms.

**Major Core Requirements**

In addition to the University general education and graduation requirements, the Department of Mechanical and Aerospace Engineering requires the following courses:

BSME in Mechanical Engineering with emphasis in Aerospace Engineering

Major Program Requirements

The MAE curriculum allows students to transfer among departments during the first two years. Students concentrate on departmental requirements during the junior year. The senior year includes three MAE electives that allow students to develop individual study programs. This enables students to complete a traditional program or create their own with special emphasis on system design, materials, manufacturing, energy systems, controls, or aerospace.

Experience in design is integrated throughout the required courses in the curriculum and culminates in the capstone design sequence. The capstone design experience integrates earlier technical work with economic, safety and environmental considerations. The projects are primarily obtained from industrial or private business clients. The presentations of project results are made to a review panel consisting of members of the faculty, the MAE Industrial Advisory Council and representatives of the client firms.

Options

The senior year includes three MAE electives that allow students to develop individual study programs. This enables students to complete a traditional program or create their own program with special emphasis on system design, materials, manufacturing, energy systems or controls.

An Aerospace Emphasis area is available to students wanting to pursue careers in the aerospace industry. Completing the aerospace emphasis requires taking at least three senior MAE 4000+ electives from a selection of available courses. These can be chosen from the broad areas of structures/materials, thermal/propulsion, aerodynamics/fluids, flight mechanics/dynamics/controls, and design. Upon completion of the appropriate coursework, an Aerospace Emphasis is shown on the students transcript.

An entrepreneurship option may be added by taking and in the sixth and seventh semesters before the . These three courses combine to give the student a fundamental understanding of entrepreneurial methods. This option will add credits to the degree program.

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.

Semester Plan

A sample plan of study has not been designed for this major. Students should either refer to the plan designed for the BSME in Mechanical Engineering or contact the academic department for assistance with academic planning.

Graduate
MS in Mechanical and Aerospace Engineering

Admission Contact Information
Marilyn Estes Nevels (nevelsma@missouri.edu)
E2413 Mechanical & Aerospace Engineering
Columbia, MO 65211
573-884-8610

Application Deadline for all applicants
Fall deadline: May 31
Spring deadline: October 31
Summer deadline: April 30

Admission Criteria
- BS in same or closely related field
- Minimum GPA: 3.0 during last 2 years
- Minimum GRE Score: 298 combined score on Verbal and Quantitative sections
- Minimum TOEFL score: 61
- Minimum academic IELTS overall score: 5.5

Note: Lower GPAs require special action and substantiation, such as good test scores on the GRE or other recognized examinations.

How to apply to the MAE master’s program:
Step 1: All documents should be uploaded directly in ApplyYourself. Mailing in documents may delay your application process.
Step 2: Required documents:
- Official Transcripts (all Universities and Colleges attended)
- TOEFL/IELTS score - sent to University by ETS (Institution Code 6875 Department Code 1502)
- 3 letters of recommendation - uploaded in ApplyYourself
- GRE score - sent to us by ETS (Institution Code 6875 Department Code 1502)
- Statement of Objectives - one page letter telling about yourself and the area you will study if accepted
- CV/Résumé

Contact:
Mechanical & Aerospace Engineering, Graduate Admissions
ATTN: Marilyn Estes Nevels
E2413 Lafferre Hall, Columbia, MO 65211
Questions: 573-884-8610

Plan of Study
A plan of study is developed by the student and the advisor, subject to approval. The minimum degree requirement is 30 hours with a minimum of 18 hours at the 8000 level. Included within the 30 hours must be a special project report or thesis. A special project consists of three to five hours of MAE programs.

Alternatively, programs directed toward a thesis shall include three to eight hours of MAE 8990 (Research). A thesis or a report is approved by designated faculty committees and is deposited in the department libraries.

Passing the MS final committee fulfills the degree requirements.

Questions: 573-884-8610

Degree Requirements
A minimum of 72 semester hours are required including the credit hours taken during the MS program. Students who received the MS degree
from other than MU may transfer a maximum of 30 hours from their MS course work.

A doctoral student must satisfy a special requirement, either proficiency in foreign languages or a collateral field. The collateral field requires a minimum of nine hours of course work in one area other than MAE.

**Plan of Study**

The PhD candidate plans a plan of study and research under the immediate supervision of an advisor and in close cooperation with the doctoral program committee approved by the dean of the Graduate School upon the department's recommendation.

**Qualifying Examination**

A qualifying examination is given soon after the student begins doctoral study. Successful completion of this examination is a prerequisite to formal acceptance into the PhD program.

Students with an MS from MU or another accredited U.S. engineering program will be exempt from the qualifying examination if their MS GPA and total GRE scores satisfy a departmental exemption rule. See http://engineering.missouri.edu/mae/degree-programs/phd-mae/ for more information.

**Comprehensive Examination & Dissertation**

A comprehensive examination is given after all course work and language or collateral requirements have been satisfied. Upon completion of the plan of study and research a final examination, essentially a defense of the dissertation, is administered.
University of Missouri

Nuclear Engineering

About the Nuclear Engineering Program

The Nuclear Engineering Program at University of Missouri was established in 1964 and conferred its first Master of Science degree in that same year.

Undergraduate students may pursue an academic minor in nuclear engineering (a baccalaureate degree is not offered at this time).

The master’s program is designed for those entering students with a B.S. degree in engineering or in chemistry or physics. Students from other fields will be considered on an individual basis. Those students who have attained a B.S. degree in nuclear engineering may be given revised curricula depending on their backgrounds and the requirements of the specific program in which they are enrolled.

The Ph.D. program is typically tailored to fit the academic needs and research goals of our students. The graduate certificates provide students and working professionals with the opportunity to develop unique skills and expertise for jobs in the areas of nuclear material protection, control and accountability.

Faculty

Professor

Associate Professor
S. Kovaleski, J. Kwon, K. Trauth*, R. Winholz

Assistant Professor
M. Bernards

Associate Teaching Professor
G. Solbrekken

Assistant Teaching Professor
S. Naz

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• Minor in Nuclear Engineering (p. 477)

While MU does not offer undergraduate degrees specifically in nuclear engineering, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Engineering, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

• MS in Nuclear Engineering (p. 477)
  • with emphasis in Environmental and Regulatory Compliance (p. 477)
  • with emphasis in Health Physics (p. 478)
  • with emphasis in Materials (p. 478)
  • with emphasis in Medical Physics (p. 478)
  • with emphasis in Thermal Hydraulics (p. 478)

• PhD in Nuclear Engineering (p. 478)
  • with emphasis in Environmental and Regulatory Compliance (p. 479)
  • with emphasis in Materials (p. 479)
  • with emphasis in Thermal Hydraulics (p. 479)

• Graduate Certificate in Nuclear Engineering (p. 479)

About the Nuclear Science Engineering Program

The Nuclear Engineering Program at University of Missouri was established in 1964 and conferred its first Master of Science degree in that same year. Educational programs are closely connected with the research foci of participating faculty members. The master’s program is designed for those entering students with a B.S. degree in engineering or in chemistry or physics. Students from other fields will be considered on an individual basis. Those students who have attained a B.S. degree in nuclear engineering may be given revised curricula depending on their backgrounds and the requirements of the specific program in which they are enrolled. The Ph.D. program is typically tailored to fit the academic needs and research goals of our students. The graduate certificates provide students and working professionals with the opportunity to develop unique skills and expertise for jobs in the areas of nuclear material protection, control and accountability.

Illustrative Areas of Study

Course topics include nuclear materials management, aerosol mechanics, reactor safety analysis, nuclear energy conversion, reactor physics, reactor design, nondestructive testing and measurement, radiative heat transfer, neutron spectrometry, neutron and gamma ray transport, neutron activation analysis, nuclear waste management, nuclear plasma research, health physics, magnetic resonance imaging, radiation therapy and alternative and renewable energy concepts.

Students Admitted in 2012 and Earlier

**Minor in Nuclear Engineering**

The Minor in Nuclear Engineering is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related disciplines who are interested in nuclear power.

The minor requires a minimum of 15 credits of course work. As background preparation, the minor requires math through differential equations and two semesters of calculus-based physics.

**Required courses:**
- **ENGINR 2300** Engineering Thermodynamics 3
- **NU_ENG 4315** Energy Systems and Resources 3
- **NU_ENG 4346** Introduction to Nuclear Reactor Engineering I 3
- **NU_ENG 4391** Nuclear Radiation Detection 3
  or **CHEM 4600** Introduction to Radiochemistry with Lab

**Select one additional course from the list below:**
- **NU_ENG 2201** Topics in Nuclear Engineering 3
- **NU_ENG 4303** Radiation Safety 3
- **NU_ENG 4330** Science and Technology of Terrorism and Counter Terrorism 3
- **NU_ENG 4353** Introduction to Fusion 3
- **ECE 7550** Introduction to Plasmas 3

**Admission Criteria**

- Minimum TOEFL scores:
  - Internet-based test (iBT) 61
  - Paper-based test (PBT) 500
- Minimum GRE score: none set
- Minimum GPA: 3.0 during last 2 years
- Undergraduate degree (with a strong math and physics background) in an engineering field, physics, biology, chemistry or mathematics from an accredited institution.

**Required Application Materials**

To the Graduate School
- All required Graduate School documents
  - 3 letters of recommendation and the online recommendation form from previous instructors or technical employers who are familiar with the student’s qualifications for graduate study, submitted directly online through the application. (If the student is applying to the PhD program, one of these letters must be from the MS adviser.)
  - Statement of Purpose (uploaded via online application)

To the Nuclear Engineering Program
- Official GRE score report (Use Department Code 1609)

**Degree Completion Requirements**

The nuclear engineering master’s degree program requires 31 hours, including a research project or thesis. The requirements are based on the assumption that the student is entering graduate study with a bachelor’s degree in engineering from an ABET-accredited school. An original research project is required either in the form of a three-credit master’s project or a six-credit master’s thesis. Typical time-to-degree completion for the master’s degree is 18 months.

**Preparation for the Program**

Students with degrees in physics or chemistry are generally adequately prepared for the nuclear engineering graduate program. Those from other backgrounds may be required to complete engineering undergraduate courses in thermodynamics, advanced engineering mathematics and the full complement of calculus-based physics, based on the student’s particular experience.

**Application Deadlines**

- Fall deadline: March 1
- Spring deadline for International students: September 1
- Spring deadline for Domestic Students: October 1

Applications received after those time frames will be reviewed for acceptance only as time permits.
MS in Nuclear Engineering with Emphasis in Health Physics

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in the Nuclear Engineering program (http://gradschool.missouri.edu/academics/programs/nuclear-engineering/masters.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

Qualifying Examination

The PhD program is a research program and is tailored to meet specific educational needs. To qualify for the research phase of the PhD program, the student must pass a comprehensive, multi-part qualifying examination, usually administered during the first semester of study for the PhD.

PhD Plan of Study

If the student is entering the PhD program, the planned course of study will be individually evaluated by the nuclear engineering faculty. A comprehensive examination covering the student’s dissertation topic is required at least seven months before anticipated graduation. The PhD degree is a research degree, with a suitable dissertation topic to be chosen in the respective field and usually requires 24 classroom credits of advanced courses beyond the MS degree and 18 credits of research. Typical time-to-degree completion for the PhD degree is three years past the MS degree.

PhD in Nuclear Engineering with Emphasis in Materials

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in the Nuclear Engineering program (http://gradschool.missouri.edu/academics/programs/nuclear-engineering/doctorate.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

PhD in Nuclear Engineering with Emphasis in Thermal Hydraulics

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in the Nuclear Engineering program (http://gradschool.missouri.edu/academics/programs/nuclear-engineering/doctorate.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

Graduate Certificate in Nuclear Engineering

Eligibility & Mission

The objective of the graduate certificate in Nuclear Engineering is to provide graduate students and professional, non-degree students from various engineering and science departments at MU with a unique opportunity to develop expertise in nuclear engineering that will enhance their job opportunities in the nuclear field.

Requirements for Graduate Certificate in Nuclear Engineering

Students will be required to take the 12 credit hours of coursework from the Nuclear Engineering (NE) degree program curriculum. Co-
listed courses with the Nuclear Science and Engineering Institute NE classes may be considered towards this requirement. As permitted by the University Policy regarding Graduate Certificate offerings, a maximum of 6 credit hours may be counted for both degree course credit within their department and the Graduate Certificate in Nuclear Engineering. However, total credit hours needed to complete their degree need not exceed Departmental or Graduate School requirements. Students will be required to take courses that broaden their knowledge and understanding in nuclear engineering.

The student must complete a Change of Academic Program form to enter the program. The student must also complete the “Course of Study for Graduate Certificate” form, which must be approved by NISEI before taking any courses. Without this prior approval, the NISEI has the authority to deny the certificate.

A student’s advisor and graduate committee from the host department and the Graduate Studies Director in the Nuclear Science and Engineering Institute will approve the courses. The selection of courses is restricted to the 7000 level or above and all courses must be successfully completed with a final grade of ‘B’ or above. Courses must be selected from the list shown in Table 1 at the certificate’s website (http://nisei.missouri.edu/graduateCertification.html), and documented on the Graduate School’s “Course of Study for Graduate Certificate” form.

Course credit hours for the certificate could also be applied towards the total credit hours needed for the departmental degree requirements, if accepted by the student’s department.

Course Work

Students should take at least one course from each of the first three clusters listed in Table 1. The student may choose their fourth course from either the Basic Radiation Science Cluster or from any of the four (I, II, III, IV) clusters at the certificate’s site (http://nisei.missouri.edu/graduateCertification.html).

A minimum of 12 credit hours must be documented (using the Course of Study for Graduate Certificate form) in order to qualify for the Graduate Certificate in Nuclear Engineering.

For additional information about this certificate, contact:

Dr. John Gahl, professor of Electrical Engineering, 573-884-7414,
GahlJ@missouri.edu

Certificate Objectives and Requirements

The objective of offering the Graduate Certificate in Nuclear Safeguards is to provide graduate students and professional, non-degree-seeking, students in various engineering disciplines with an opportunity to develop unique skills and expertise that will enhance their performance in jobs requiring knowledge of nuclear material protection, control and accountability.

The graduate certificate program serves degree-seeking graduate students and also functions as a stand-alone graduate certificate program for professional, non-degree-seeking students. Both degree-seeking and non-degree-seeking students will be required to take four specific classes (12 credit hours) involving nuclear science, policy and safeguards.

The student must complete a Change of Academic Program form to enter the program. The student must also complete the “Course of Study for Graduate Certificate” form, which must be approved by NSEI before taking any courses. Without this prior approval, the NSEI has the authority to deny the certificate.

For MU students, a maximum of 6 credit hours may be counted for both degree course credit within their department and the Graduate Certificate in Nuclear Safeguards. However, total credit hours needed to complete their degrees need not exceed departmental or Graduate School requirements (see the Graduate School catalog for additional information contact Dr. Gahl).

Nuclear Safeguards Science and Technology Certificate Plan of Study

Four specific classes, comprising 12 hours of course credit, are required for a student to receive this graduate certificate in nuclear safeguards:

Additional Minors and Certificates - Engineering

Undergraduate

• Minor in Aerospace (p. 481)
• Minor in Computational Neuroscience (p. 481)
• Minor in Energy (p. 482)
• Minor in Medical/Health Physics (p. 482)
• Minor in Naval Science (p. 482)
• Minor in Radioenvironmental Sciences (p. 482)

Graduate

• Certificate in Energy Efficiency (p. 482)

Undergraduate

Minor in Aerospace

Purpose

• To provide a fundamental grounding in aerospace engineering
• To prepare students to be competitive for positions in aerospace-oriented industries

Students will take courses from the 4 fundamental areas of aerospace engineering:

• aerodynamics
• aerospace structures
• flight mechanics
• propulsion

To Apply

• Meet with your advisor sophomore/junior year to plan minor courses into your schedule.
• Complete the necessary course work (at least 18 credit hours)
• Submit the application below in the semester before you are graduating.
• It will then appear on your diploma.

Required Course Work

| Must take both: | MAE 3400 | Fluid Mechanics | 3 |
| MAE 3600 | Dynamic Systems and Control | 3 |
| Select at least 2 from: | MAE 4210 | Aerospace Structures | 3 |
| MAE 4390 | Aerospace Propulsion | 3 |
| MAE 4420 | Intermediate Fluid Mechanics | 3 |
| MAE 4430 | Introduction to Computational Fluid Dynamics and Heat Transfer | 3 |
| MAE 4440 | Aerodynamics | 3 |
| MAE 4450 | Gas Dynamics | 3 |
| MAE 4620 | Aircraft Flight Performance | 3 |
| MAE 4630 | Space Flight Mechanics | 3 |
| MAE 4940 | Aircraft Design | 3 |

Auxiliary Courses

A maximum of 6 credit hours can be counted toward the minor

MAE 4001 Topics in Mechanical and Aerospace Engineering (When taken as topics title "Applied Finite Element Analysis)) | 3 |
MAE 4280 Introduction to Finite Element Methods | 3 |
MAE 4320 Design of Thermal Systems | 3 |
MAE 4600 Advanced Mechanics of Materials | 3 |
MAE 4720 Modern Control | 3 |
MAE 4920 Advanced Computational Design | 3 |

Minor in Computational Neuroscience

Computational neuroscience is becoming an important tool for neuroscientists to understand how complex brain circuits work, for example, what causes post-traumatic stress disorder. This intersection of engineering and neuroscience is allowing great advances in health care, manufacturing and communication.

Required for all students:

ECE/BIO_SC 4580 Computational Neuroscience | 4 |

Select 2 courses from the following list:

| BIO_SC 3700 | Animal Physiology |
| BIO_SC 4310 | Physics in Cell and Developmental Biology |
| BIO_SC 4500 | Neurobiology |
| BIO_SC 4560 | Sensory Physiology and Behavior |
| BIO_SC 4986 | Neurology of Motor Systems |
| BIO_SC 4988 | Nerve Cells and Behavior |
| BIOL_EN 4070 | Bioelectricity |
| BIOL_EN 4080 | Engineering Computation |
| PHYSCS 4310 | Physics in Cell and Developmental Biology |
| PHYSCS 4500 | Computational Biological Physics |

For students majoring in Engineering, Physics, Math, Psychology or Statistics, choose 6 credits from the following list of courses:

| BIO_SC 1010 | General Principles and Concepts of Biology (with BIO_SC 1020) | 3 |
| BIO_SC 1500 | Introduction to Biological Systems with Laboratory | 3-5 |
| BIO_SC 2300 | Introduction to Cell Biology | 4 |
| F_W 1100 | Introductory Zoology with Laboratory | 5 |
| PSYCH 2210 | Mind, Brain, and Behavior | 3 |
| PSYCH 4210 | Physiological Psychology | 3 |

For students majoring in Biology choose 6 credits from the following list of courses:

| PHYSCS 1220 | College Physics II | 4 |
| PHYSCS 2760 | University Physics II | 5 |
| INFOTC 1040 | Introduction to Problem Solving and Programming | 3 |
| BIOL_EN 2080 | Introduction to Programming for Engineers | 3 |

Seminar for Undergraduates | 1 |
## Minor in Energy

Energy engineering requires many different types of engineers, and this minor lets you choose from several different tracks to fit your career interests. The minor requires completion of 18 credit hours between the core and the tracks.

### Required Core Courses:

## Minor in Medical/Health Physics

The Minor in Medical/Health Physics is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in the nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related discipline who are interested in the biological effects of radiation in medical utilization and in occupational health and safety.

The minor requires a minimum of 15 credits of course work. As background preparation, the student must have had the prerequisites of a minimum of college algebra and two semesters of college physics.

### Required courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

## Minor in Naval Science

A minor in Naval Science is available upon the completion of 20 semester hours to include 11 hours of the lower level and 9 hours of the upper level Naval Science curriculum.

### Minor in Radioenvironmental Sciences

The Minor in Radioenvironmental Sciences is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in the nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related discipline who are interested in the environmental aspects of radiation and radioactive materials.

The minor requires a minimum of 15 credits of course work. As background preparation, the student must have had the prerequisites of a minimum of college algebra and two semesters of college physics.

### Required courses:

## Graduate

### Graduate Certificate in Energy Efficiency

Federal Gainful Employment disclosure information for this Graduate Certificate is available at [http://gradschool.missouri.edu/academics/programs/energy-efficiency-graduate-certificate/GEdisclosure/Gedt.html](http://gradschool.missouri.edu/academics/programs/energy-efficiency-graduate-certificate/GEdisclosure/Gedt.html)
The School of Health Professions is Missouri’s only state-supported health professions school on a campus with an academic health center. It is uniquely positioned to educate highly qualified health care professionals committed to fulfilling the mission of improving society through education, service and discovery in diagnostic, medical imaging, and rehabilitation sciences. The school is credited with establishing the nation’s first baccalaureate degree program in respiratory therapy and the first master’s degree program in diagnostic medical ultrasound. Its six departments and eight accredited academic programs have long and distinguished histories. Graduates of the School of Health Professions are nationally recognized leaders in their fields.

The school offers undergraduate degrees with majors in Athletic Training, Communication Science and Disorders, Diagnostic Medical Ultrasound, Health Sciences, Occupational Therapy, Respiratory Therapy, Radiologic Sciences with emphasis in Radiography or Nuclear Medicine Technology, and Clinical Laboratory Sciences with an emphasis in Medical Technology. The school offers graduate degrees in Communication Science and Disorders with an emphasis of Speech-Language Pathology, Diagnostic Medical Ultrasound, Occupational Therapy and Physical Therapy.

Students gain valuable experience by participating in nationally recognized service centers including The Adult Day Connection, The Health Connection, the Speech and Hearing Clinic, Robert G. Comb’s Language Preschool and more than eight hundred fieldwork sites.

Undergraduate
- Admissions (p. 483)
- Exploratory Courses (p. 483)
- Required Entry Level Courses (p. 483)
- School of Health Professions Scholars Guaranteed Admission Program (SHarP Scholars) (p. 484)
- International Admissions (p. 484)
- Academic Regulations (p. 484)
- Enrolling in Other Institutions Simultaneously (p. 485)
- Advising (p. 485)
- Career Placement (p. 485)

Admissions

Undergraduate students are enrolled in the School of Health Professions for academic advisement in order to complete University general education (p. 18) and prerequisite courses. Students will be advised by faculty of the department in which they have declared a major, or by an advisor in the Student Services Office. Students should contact the SHP Advising Office to ensure satisfactory progress toward completion of the prerequisites.

Admission to the University and to the School of Health Professions as a pre-professional student does not constitute admission as a candidate for most Bachelor of Health Science degree programs. Pre-professional students are admitted to candidacy for the BHS only when they have been selected to participate in the professional component of a program. Application deadlines and requirements vary for each program (an application is not required for the health sciences programs). Students are strongly encouraged to seek advising to ensure they are making satisfactory progress towards pre-requisites (p. 18), and program requirements.

Exploratory Courses

The School of Health Professions offers introductory courses and experiences to provide information about career opportunities in these areas. These courses are listed below:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HLTH_SCI 1000</td>
<td>Introduction to the Health Professions</td>
<td>3</td>

</tr>
<tr>
<td>CL_L_S 1000</td>
<td>Orientation to Clinical Laboratory Science</td>
<td>1</td>
</tr>
</tbody>
</table>

Required Entry-level Courses

To be admitted into or continue in the School of Health Professions, all students with 55 or more credits must have completed MATH 1100 and ENGLISH 1000, or their equivalents, with grades in the C range or higher.

While completing prerequisite requirements, students must make formal application for admission to the professional component of the program of their choice. Enrollment is limited and is governed by program admission committees. Application to the professional component is also required for transfer students.

In addition to academic record, attributes such as interpersonal skills, motivation, attitude, interest, commitment and knowledge of the field are considered in selecting students to participate in the professional phase of any program. Applicants may also be evaluated on school and college aptitude tests, pattern of academic achievement, verbal expression, extracurricular activities and motivation demonstrated by employment and volunteer activities.

To achieve the goals of diversity and equal opportunity, the School of Health Professions encourages the participation of minority students in its programs.

The application deadlines for the professional component of each program are shown below.

School of Health Professions Scholars Guaranteed Admission Program (SHarP Scholars)

Eligibility Requirements for the SHarP Scholar’s Program:
- Minimum 30 composite ACT score (1330 SAT).
- Top 10% high school (HS) rank at the time of application.
- Performance in college courses completed prior to HS graduation will be considered by the admissions committee.
- Completed applications must be submitted by March 1st during the senior year in high school or November 15th during the freshman year at MU.
- Four (4) hours of clinical observation in the discipline of choice (documented on the SHarP application). All applications must include recommendations from a high school teacher and from a high school counselor or principal.

** Students who are accepted as SHarP Scholars may also have to complete additional application requirements prior to entering their professional program. Specific program requirements are communicated to students upon acceptance as SHarP Scholars.

Application materials are available in the School of Health Professions Student Services Office and on the school’s website (http://shp.missouri.edu).

Students accepted as SHarP Scholars who maintain participant status at MU are guaranteed admission into one of the following degree programs:
- Athletic Training
- Clinical Laboratory Sciences with an emphasis in Medical Technology
- Communication Science and Disorders (BHS program only)
- Occupational Therapy
- Diagnostic Medical Ultrasound
- Master of Public Health Program (upon completion of the Health Sciences BHS degree)
- Radiologic Sciences, with emphasis in Radiography or Nuclear Medicine Technology
- Respiratory Therapy
- Physical Therapy (Doctor of Physical Therapy program, upon completion of a baccalaureate degree)

International Admissions
Students whose native language is not English should contact the School of Health Professions for requirements.

Prerequisite Curriculum Requirements
See the degree requirements in the following pages for specific course requirements in the various programs. The student is responsible for meeting graduation requirements for the program and the University.

Graduation Requirements
In addition to degree and major requirements, students must complete university graduation requirements (p. 17), which include university general education (p. 18) requirements.

Degree Core Requirements
The Bachelor of Health Science degree is granted to candidates who have successfully fulfilled all didactic and clinical requirements of the program as described for each area, in addition to all University requirements (p. 17), including University general education (p. 18) requirements.

In addition to the academic and clinical education requirements of a program, students must possess and exhibit those personal qualities and characteristics that are associated with patient welfare and professional trust. These elements are a part of the overall evaluation process for the professional phase of each program. Should it be determined that these qualities are not present in sufficient degree or that a student does not demonstrate satisfactory growth and progress in these areas, the student is subject to dismissal from the program.

Degree with Honors Requirements
To earn Latin Honors in the School of Health Professions, a student must meet the following requirements:
- 50 graded MU undergraduate credits
- At least a 3.0 MU cumulative GPA
- MU cumulative GPA equal to or greater than 3.5 or
- last 50 graded credits at MU equal to or greater than 3.5
- GPA for each level

<table>

Academic Regulations

Time Limits on Credits Earned
Contact each department for information on time limits.

Credits by Examination
Students with previous training or experience may be allowed to earn advanced-standing credit through challenge or equivalency evaluation in certain programs. Contact the Health Professions Student Affairs Office for information pertaining to the awarding of credit for these exams.

Maximum Credits Enrolled
A student may not enroll for more than 17 credits in a term without permission from the associate dean.
Independent Study
Students must receive prior approval before enrolling in independent study courses.

Satisfactory/Unsatisfactory Grades
A student wishing to enroll in a course on an S/U basis must receive permission from the faculty advisor in his or her department and from the SHP Advising Center.

Enrolling in Other Institutions Simultaneously
Students must receive approval from the SHP Advising Center before enrolling simultaneously at another institution.

Advising
Students may be assigned a faculty advisor in their program of study or a professional academic advisor in the Office of Student Services.

Students should select an area of interest prior to completing the first two years of college. To assist with career decisions, the School of Health Professions offers introductory courses and experiences to provide information and career opportunities in these areas.

Career Placement
Graduates of programs in the School of Health Professions are highly recruited and frequently hired prior to receiving degrees. The Career Services office in the School of Health Professions offers résumé, cover letter and personal statement review, mock interviews, and workshops to enhance students' career development. Students are encouraged to seek out and use the Career Services office early in their undergraduate career.

Graduate
The School of Health Professions offers a wide variety of programs of study for students interested in careers in healthcare. At the graduate level, we offer degrees in

- Communication Science and Disorders
- Occupational Therapy
- Physical Therapy
- Diagnostic Medical Ultrasound Program

The Graduate School confers an interdisciplinary Master's of Public Health (MPH) degree. The MPH is available in two emphasis areas: Health Promotion and Policy or Veterinary Public Health. This public health coursework reflects the University of Missouri's strength in the health professions, social work, nursing, medicine, veterinary medicine, and arts and sciences.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.
Athletic Training

Interim Program Director & Clinical Education Coordinator:
Keith Belmore, MEd, ATC, CSCS

Athletic training is a professional field of study that primarily addresses the well-being of the athlete. The Athletic Trainer assumes responsibility for the overall health care of the athletic population, particularly having an integral role in the prevention, recognition, care and rehabilitation of athletic injuries. Athletic Trainers have been employed in traditional settings that include: high schools, colleges, universities, professional sports teams, hospitals, and rehabilitation clinics. Of late, the practice of athletic training has expanded to include a variety of settings apart from the traditional athletic population which now include: physicians’ offices, corporate and industrial institutions, the military, and the performing arts. Regardless of the practice setting, Athletic Trainers practice athletic training (or provide athletic training services) according to educational preparation and state practice act.

The Department of Physical Therapy, Athletic Training Program offers a Bachelors of Health Science (BHS) degree in Athletic Training.

Disclaimer: The Athletic Training Program at the University of Missouri is NOT accredited by the Commission on Accreditation of Athletic Training Education (CAATE). Only graduates of CAATE accredited programs are eligible to sit for the Board of Certification exam. The program is anticipating submission of application for accreditation and subsequent site visit for accreditation in the Spring 2016. Application and site visitation for accreditation does not guarantee accreditation.

Faculty
Assistant Teaching Professor K. Belmore, B. Mann, S. Wehring
Adjunct Faculty J. Artioli, D. Belmore, C. Hairston, J. Heitmeyer, T. McCleland, A. Mosel, R. Sharp

Undergraduate
• BHS in Athletic Training (p. 486)

Graduate
While MU does not offer graduate degrees specifically in athletic training, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Undergraduate

BHS in Athletic Training

Major Program Requirements
The Athletic Training major consists of a one-year pre-professional phase followed by a three-year professional phase. The major is a professional preparation program requiring admission into the program and a clinical component. Clinical experiences are completed at on- and off-campus locations during the three-year professional phase. All required Athletic Training courses must be completed with a grade of “C” (2.0) or higher.

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the below degree requirements.

Semester Plan
Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.

Total Credits: 120

*The Freshman year is considered “pre-professional”. Students apply into the “professional” portion of the program during the Freshman year. All students applying into the “professional” portion of the program must meet the minimum requirements for application into the BHS in Athletic Training degree program.

Required Application Materials

- Acceptance into the University of Missouri.
- Declaration of “Pre-Athletic Training” area of interest.
- Demographic Information ATP Form.
- Written statement of professional interests and goals.
- Signed Technical Standards.
- Minimum overall Grade Point Average of 2.75/4.0.
- Minimum grade of a "C" in ATHTRN 1100, 1200, 2100, 2500, MATH 1100 College Algebra, ENGLISH 1000 Exposition, BIO_SC 1010 Biological Science & Lab (or equivalent). May be currently enrolled in courses during application process, but must successfully complete for full program acceptance.
- Completion of Blood-borne Pathogen training. (Done in ATHTRN 1100)
- Completion of observation hours. (Done in ATHTRN 1100)
- Signed Confidentiality Waiver. (Done in ATHTRN 1100)
- Completed a minimum of 12 semester hours and enrolled in at least 12 semester hours during time of application.
- Personal interview with ATP Selection Committee.
Clinical Laboratory Sciences

Clinical Laboratory Science
School of Health Professions
605 Lewis Hall
(573) 882-8011 and (573) 884-1847
Director: Steven Starr

Clinical laboratory scientists are skilled, certified professionals trained in the theoretical and practical aspects of clinical laboratory medicine – chemistry, hematology, microbiology, immunology, molecular pathology, and blood banking. Clinical Laboratory Scientists have various levels of responsibility - as staff technologists, research technologists, supervisors, managers, or educators -- and can work in a variety of settings, including hospitals, clinics, laboratories, and research centers. Approximately 60 to 70 percent of all medical decisions regarding a patient’s diagnosis and treatment, as well as their hospital admission and discharge, are based upon laboratory test results obtained by Clinical Laboratory Scientists.

The Clinical Laboratory Science (CLS) program at MU is a unique collaboration with the University of Nebraska Medical Center in Omaha. The CLS program includes three years of prerequisite coursework, requiring 16 hours of both Biology and Chemistry, and 11 months in the clinical phase of the CLS program. The clinical year begins during the third week of May, with 11 weeks of coursework and clinical lab rotations in a dedicated summer student lab facility at the University of Nebraska’s Medical Center in Omaha. After the initial 11 weeks in the program, CLS students return to Columbia and complete their clinical laboratory rotations at one of three clinical sites, which include the University of Missouri Hospital and Clinics, Boyce and Bynum Pathology Laboratories, and Harry S. Truman Memorial Veteran’s Hospital. Students graduate with a Bachelor of Health Science degree in Clinical Laboratory Science from the University of Missouri with a Certificate in Medical Technology from the University of Nebraska Medical Center.

Faculty

Clinical Professor G. D. Heggie*
Clinical Instructor S. Starr

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

BHS in Clinical Laboratory Sciences with Emphasis in Medical Technology

Major Program Requirements

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Professional Certification: Upon completion of the program, students are eligible to take the Medical Technology Licensure examination given by the American Society for Clinical Pathology (ASCP).

Graduate

While MU does not offer graduate degrees specifically in clinical laboratory sciences, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).
CL_L_S 4416 Clinical Hematology I 4
CL_L_S 4417 Clinical Hematology II 3
CL_L_S 4418 Clinical Microbiology I 4
CL_L_S 4419 Clinical Microbiology II 3
CL_L_S 4420 Clinical Immunology 1
CL_L_S 4422 Immunohematology I 3

Total Credits: 125

** NOTE:** Third Year - Summer to be completed in Omaha.
Communication Science and Disorders

Judith Goodman, Chair
School of Health Professions
301 Lewis Hall
(573) 884-2940
mucsd@health.missouri.edu

Advising Contact
Jill S. Diener
(573) 882-8011

Communication Science and Disorders includes the study of normal language, speech and hearing across the life span, as well as communication disorders that result from biological, environmental and behavioral factors. Communication Science and Disorders includes the professions of speech-language pathology and audiology.

Speech-language pathologists evaluate the speech and language of children and adults to determine whether problems exist in such areas as voice, articulation, fluency and receptive or expressive language. They also plan and carry out programs for the treatment of these problems. Audiologists evaluate hearing, identify hearing loss and participate in the rehabilitation of persons with hearing impairments.

The professions of speech-language pathology and audiology require master’s or doctoral degrees. Acceptance to an undergraduate program does not guarantee acceptance to a graduate program. Refer to the Graduate Catalog for information about the MHS and PhD degrees (p. 490).

Faculty

Associate Professor J. C. Goodman**, S. A. Wagovich**
Assistant Professor M. Dietrich, M. Fagan**, E. S. Kelley, M. Kuruvilla
Clinical Associate Professor B. L. Brinkman, D. R. Fritz, B. A. McLay*
Clinical Assistant Professor L. B. Lawrence*, M. A. Scheneman
Clinical Instructor G. Hull, G. Nolan
Research Associate Professor Emerita L. S. Day*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BHS in Communication Science and Disorders (p. 491)

Graduate

Julie Aston
301 Lewis Hall
573-884-2940
http://shp.missouri.edu/csd/

- MHS in Communication Science and Disorders (p. 492)
- with emphasis in Speech-Language Pathology (p. 492)

About Communication Science and Disorders

The field of Communication Science and Disorders, or CSD, encompasses the related but distinct disciplines of speech-language pathology (SLP), audiology and speech, language, and hearing sciences (SLHS). Speech-language pathologists and audiologists are professionals educated in human communication and its disorders. Speech-language pathologists diagnose and treat disorders such as delayed language development, stuttering, articulation and voice problems. Audiologists specialize in the prevention, identification, assessment and rehabilitation of hearing disorders. Speech, language, and hearing scientists are professionals concerned with exploring trends in the communication sciences, as well as developing strategies for improving or adding to the knowledge base within the fields of speech-language pathology and audiology.

MU established its first independent master’s and doctoral programs in speech-language pathology and audiology in the 1940s. The MU master’s degree program in speech-language pathology has been continuously accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology since 1966. An active local chapter of the National Student Speech Language Hearing Association is sponsored by the program.

The master’s degree prepares students for national certification in speech-language pathology and for professional clinical practice in both health care and educational settings. The doctoral degree involves a program of research and advanced study beyond the clinical master’s degree in preparation for a career in research and college teaching or administration.

Career Opportunities

A wide variety of work settings are available to speech-language pathologists and audiologists. Possibilities range from hospitals, clinics, and rehabilitation centers to schools, colleges and universities, government agencies, and private practice. Speech, language, and hearing scientists work primarily in colleges and universities, research labs and government agencies. Professional certification in speech-language pathology and audiology is awarded by the American Speech-Language-Hearing Association (ASHA). The master’s degree, which is the entry-level degree for speech-language pathologists, typically takes two to three years beyond the undergraduate degree depending on the student’s undergraduate field of study. Students wishing to pursue a career in audiology will need to attend a program that offers clinical doctorate in audiology (AuD), the entry-level degree for audiologists.

Facilities and Resources

The department uses many cooperative facilities in Columbia, both on and off the MU campus, as clinical and scientific resources. Among these are the University Hospitals and Clinics, Rusk Rehabilitation Center, Ellis Fischel Cancer Center, Truman Memorial Veterans Hospital, Adult Day Connection, Assistive Technology Evaluation Center, Thompson Center for Autism and Neurodevelopmental Disorders, Missouri Rehabilitation Center, and Columbia Public Schools.

Other cooperative facilities are available both within and outside the state. The department operates the MU Speech and Hearing Clinic, a diagnostic and treatment center serving individuals with communication disorders from the campus and the community, the MU Robert G. Combs Language Preschool, and the Accent Modification and Pronunciation
Program. In addition, there are many research opportunities for students in the laboratories of individual faculty where they may gain experience with sophisticated equipment for research and clinical evaluation in normal and disordered speech, language, and hearing. A master's thesis option is available to students interested in conducting research.

Funding
All graduate students are considered for available scholarships, fellowships, work-study grants, traineeships and graduate teaching and research assistantships.

Undergraduate

BHS in Communication Science and Disorders

Major Program Requirements
Students are required to apply to the Communication Science and Disorders major. Applications into the BHS program are considered once a year, and they must be submitted by February 1 of the student's sophomore year. Applicants must have completed at least 42 hours of college credit before applying, and students who are admitted must have completed 60 hours of college credit before beginning coursework as Communication Science and Disorders majors. A minimum GPA of 2.75 on a four-point scale and a composite score of 22 or above on the ACT are required for acceptance into the BHS program. Meeting the minimum criteria and declaring a major of pre-Communication Science and Disorders do not guarantee acceptance into the program.

In addition to university (p. 17), college and degree requirements, including university general education (p. 18), students must complete the following:

Total Credits: 122

* Denotes elective coursework. These specific courses are not required, though the credit hours are required to reach the University requirements of 120 total hours.

Graduate

MHS in Communication Science and Disorders

Admission Contact Information

Julie Aston mucsd@missouri.edu
301 Lewis Hall; Columbia, MO 65211
573-884-2940

Admission Criteria

Deadline for Summer entrance (required for all applicants): January 15

- Undergraduate GPA: 3.0 (on last 60 hours of course work)
- Minimum TOEFL scores:
  - Internet-based test (iBT) 100*
  - Paper-based test (PBT) 600
- Minimum TOEFL (iBT) score of 100, with minimum score of 28 on speaking
- Minimum GRE scores:
  - Verbal + Quantitative
  - Analytical
  - When did you take the GRE?
    - Prior to August 1, 2011 1000 (preferred)
    - On or After August 1, 2011 300 (preferred)

Required Application Materials

All applicants to the MHS program in Communication Science and Disorders with an emphasis in Speech-Language Pathology must apply through the Communication Sciences and Disorders Centralized Application Service (CSDCAS) at www.csdcas.org. The CSDCAS Applicant Portal Link will open on September 17, 2014 to begin accepting applications for the 2015-16 academic year. Additional information may be found on the MHS Admissions (http://shp.missouri.edu/csd/admission.php#mhs) web page.

Personal interviews may be requested.

Students who are accepted into the MHS program and commit to attending the University of Missouri will be required to complete the MU Graduate School’s online application which includes an additional fee. Information will be provided when admission is offered.

Admission Process

The current graduate admission process in Speech-Language Pathology is highly competitive nationwide. All MHS admission decisions are made by the Departmental Graduate Admissions Committee.

Prerequisite Course Work

All applicants to the MHS program in Communication Science and Disorders with an emphasis in Speech-Language Pathology must have completed, or be in the process of completing, standard prerequisite course work in CSD. Any prospective applicant with an undergraduate degree in a major field other than Communication Science and Disorders should contact the Department prior to submitting an application to the MHS program. Prerequisite course work must be approved by the CSD Director of Graduate Studies prior to application. Many options exist for completing prerequisite course work nationwide. Please contact the Department for more information.

Financial Aid from the Program

All applicants accepted for admission to the MHS program will be considered for departmental financial aid.

Plan of Study

MHS candidates are required to complete a minimum of 48 semester hours in graduate-level courses with grades of B- or higher. No fewer than 24 hours must be earned in 8000/9000-level course work offered by the program. A maximum of 9 hours in clinical practicum courses may be counted toward the 48-hour requirement.

Thesis Option

The student may choose the thesis option for the master’s degree; work toward the thesis may count for up to six semester hours of credit.

Examination

During the final semester of course work, we expect master’s degree candidates to achieve a passing score on the PRAXIS II Examination in Speech-Language Pathology. This exam serves as the comprehensive examination for the degree. See the program’s online Graduate Student Handbook for additional information.

MHS in Communication Science and Disorders with Emphasis in Speech-Language Pathology

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MHS in Communication Science and Disorders (http://gradschool.missouri.edu/academics/programs/communication-science-and-disorders/master-of-health-science-emphasis-in-speech-language-pathology.php) and the minimum
requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.
Diagnostic Medical Ultrasound

Undergraduate

BHS in Diagnostic Medical Ultrasound

Major Program Requirements

The Diagnostic Medical Sonographer uses high-frequency sound waves to perform a variety of diagnostic examinations. The sonographer performs an essential role in the process of data gathering and synthesis required to reach a diagnosis. Ultrasound is a profession requiring a high degree of independence, skill, judgment and knowledge. Sonographers work in hospitals, clinics, private physician offices and other medical facilities performing examinations in their areas of specialization. The Diagnostic Medical Ultrasound (DMU) Program offers multiple educational options.

Any student interested in applying to the DMU Program should seek advisement as soon as possible to assure that all general education and prerequisite courses including the criteria for application have been completed.

Students must complete the courses listed below in addition to degree and university requirements (p. 17), which include university general education (p. 18) requirements.

Total Credits: 141

** DMU 1000 Introduction to Diagnostic Medical Ultrasound required for application to the DMU Program. Prospective students may enroll in the fall semester or the spring semester.

Graduate

MHS in Diagnostic Medical Ultrasound

Admission Contact Information
Dr. Moses Hdeib hdeibm@health.missouri.edu
406 Lewis Hall
Columbia, MO 65211
573-884-2994

Admission Criteria

Deadline for spring entrance: December 1

- Minimum TOEFL scores:
The minimum TOEFL score for the Diagnostic Medical Ultrasound Program is 100 in the new scoring model. This is equivalent to a paper-based score of 600. Test of Written English (TWE) - 4.5
- Minimum GRE score: check with Program Director of Graduate Studies
- Undergraduate GPA minimum: 3.00 (A=4.0) for the last 60 hours of college work

Potential applicants who have all the prerequisites for admission to the program should submit their application early (before November) in the fall of the academic year in order to be considered for early acceptance with start in the following spring semester. Please contact the director of graduate studies.

Required Application Materials

To the Graduate School:

- All required Graduate School documents
- GRE scores

To the Diagnostic Medical Ultrasound Program:

- Departmental Application
- Transcripts
Degree Requirements

Graduate students must maintain a 3.0 grade point average in all courses required for the degree. Failure to achieve a semester cumulative grade point average of 3.0 in required courses will result in delay of graduation or dismissal from the program. Students are expected to maintain full-time enrollment in the sequenced curriculum and complete the degree requirements as outlined in the course of study.

For More Information

Moses Hdeib, MD, PhD, RDMS, RDCS, RVT
Diagnostic Medical Ultrasound
406 Lewis Hall
Columbia, MO 65211
573-884-2994 or send an e-mail Dr. Hdeib: hdeibm@health.missouri.edu
The Department of Health Sciences (DHS) is part of the School of Health Professions (SHP), which serves the citizens of Missouri through its outstanding research, community service clinics, and the education of students in the areas of health literacy and health promotion. Faculty in DHS teach courses for the Bachelor of Health Sciences program and are actively involved in a wide range of interdisciplinary research. Our faculty provide expertise in several domains including Public health, Psychology, Sociology, Medical Anthropology, Education, and Social Work. Faculty research covers a wide range of topics including health promotion, health communication, decision support, health disparities for disadvantaged groups, access to healthcare, and suicide prevention. Our research also spans a number of substantive areas including Autism Spectrum Disorders, breast cancer, HIV/AIDS, aging, and adolescent health.

Students can only earn the BHS concurrently with the Masters of Occupational Therapy (p. 500).

Students can only earn the BHS concurrently with the Doctor of Physical Therapy (p. 503).

**Faculty**

**Associate Professor** E. Schatz*
**Associate Clinical Professor** R. Hogan
**Associate Teaching Professor** D. Hume*, M. Kuhnert
**Assistant Professor** N. Cheak-Zamora*, J. Chen, A. Kabel*, N. Khosla, W. Majee, V. Shaffer, M. Teti*, M. Thullen
**Assistant Clinical Professor** K. Flynn Peters
**Assistant Teaching Professor** B. Blackburn, R. Bowman, C. Orbann, D. Gerhart

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

- BHS in Health Science (p. 497)

The Department of Health Sciences’ BHS in Health Science degree program is for students who wish to enter non-clinical health careers such as medical case management, corporate wellness, human services, medical sales, pharmaceutical manufacturing and distribution, and more. Graduates of the BHS degree program may also be qualified to enter either graduate or professional health science programs such as Physical Therapy, Health Administration and Public Health. The Health Sciences program requires physical, biological, behavioral and social sciences to provide students with an education in foundational sciences, human function, health research, service and policy.

The department offers the Bachelor of Health Science in Health Science (BHS).

**Departmental Requirements**

Courses may be delivered using traditional or distance delivery methods. The Health Sciences degree program credits must include a minimum of 120 university-level credit hours including: General education requirements comprise a minimum of 42 credit hours; Health Sciences core course requirement comprise a minimum of 19 credit hours; Health Sciences approved elective courses comprise a minimum of 18 credit hours; Electives fulfilling the student’s concentration area comprise the remaining 41 credit hours.

Students are required to file a graduation plan for the BHS degree by the time they have completed 90 university-level credit hours, including all MU and transfer credits. Students should meet with their academic advisor to discuss the graduation plan, and then file their plan prior to early registration for the fall, summer and spring semesters. Students who transfer from another institution or another school/college at MU with more than 60 hours must file their graduation plan within their first semester of coursework in SHP and at MU.

**Residency Requirement**

There is a residency requirement for Health Sciences majors. Students must complete, at minimum, the 30 hours of coursework for the degree as declared Health Sciences majors in the School of Health Professions. Students must be in the Health Sciences major at the beginning of a semester to include the hours in the residency requirement. Residency requirement hours for students transferring into the major during the semester will begin the following semester.

**Admission to the BHS in Health Sciences**

The BHS in Health Sciences program does not require an application. Students may declare their major in the BHS program by indicating the program on the MU application (for new students), filling out a transfer of division form (for current MU students), or indication of their intention to declare a health science major to their academic advisor (for current SHP students). There is a 2.0 MU cumulative and term GPA requirement to declare a major in Health Sciences. The cumulative GPA is calculated on all MU and transfer coursework. Students must maintain the 2.0 GPA, term and cumulative, to remain in the Health Sciences program. Students who fail to achieve that GPA may stay in the program for two probationary semesters. If the 2.0 term or cumulative GPA is not achieved after two probationary semesters, students must transfer out of the Health Sciences program.

**Graduate**

While MU does not offer graduate degrees specifically in health sciences, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

**Undergraduate**

**BHS in Health Science**

**Major Program Requirements**

- Students must maintain the 2.0 GPA, term and cumulative, to remain in the Health Sciences program. Students who fail to achieve a 2.0 GPA may stay in the program for two probationary semesters,
and if they fail to earn a 2.0 term or cumulative GPA after the two probationary semesters, students must transfer out of the Health Sciences program.

- All required core and elective coursework for the BHS in Health Sciences program, including requirements outside the department, must be completed with a grade of C- or higher.
- Students may repeat a core required course one time.
- Students must complete all university requirements, including general education (p. 18), and Departmental Requirements (p. 497), in addition the degree requirements below.
- Students may only repeat a core required course one time.

**Capstone Requirement**

The BHS capstone is comprised of two courses: HLTH_SCI 4975 and HLTH_SCI 4985. HLTH_SCI 4975 offers ways to complete the capstone experience through internships. The internship will be approved by the internship advisor and faculty internship coordinator. Students may find their own internship experience or work with the course instructor/internship advisor to identify an appropriate placement given interests and goals.

Students may choose from:

- an internship at an agency, company, or corporation of their choice. For an internship to be approved as a capstone experience, it must help students solidify and explore areas of concentration. Internships must have prior approval from the Health Sciences Internship advisor;
- service learning project which allows a student to serve approximately 50 clock hours in an organization. This can be arranged with the Internship advisor or through the Office of Service Learning on campus, and
- an approved study abroad program

- Math Reasoning Proficiency Course Typically fulfilled by one of the following:
  - STAT 1200 | Introductory Statistical Reasoning |
  - STAT 1300 | Elementary Statistics |
  - CHEM 1320 | College Chemistry I |
  - PHYSCS 1210 | College Physics I |
  - PHYSCS 1220 | College Physics II |

- Behavioral and Social Sciences (9 or more credits):

  - Behavioral Science
    - HIST 1100 | Survey of American History to 1865 |
    - HIST 1200 | Survey of American History Since 1865 |
    - POL_SC 1100 | American Government |
    - Or other approved course |

  - Humanities and Fine Arts (9 or more credits required from 2 different areas)
    - 12 or more credits of a single foreign language may be used to fulfill this requirement |

- Distribution of Content:

  - Students must have at least one 2000 level or above course in two of the following:
    - 1. Biological/Physical/Mathematical Science |
    - 2. Behavioral/Social Science |
    - 3. Humanities/Fine Arts |

- BHS Electives

  - Students must complete 18 hours of approved elective courses. At least 9 credit hours must be from 3000/4000 level courses. Students must complete course work in at least two out of these three thematic areas: Social/Behavioral; Medical/Biological; Administrative/Leadership.

Advising Contact
MUOT@health.missouri.edu
Scholarship Information Contact
MUOT@health.missouri.edu

Occupational therapists are skilled health professionals who provide services to infants, children, adults and older persons experiencing physical, emotional or mental limitations in performing everyday activities. The department’s philosophy supports a holistic model that emphasizes empowerment and the mind, body, spirit. The curriculum focuses on the value of occupation in relationship to health and wellness. The department’s mission is to produce competent practitioners who can meet the challenges and changes occurring in institutions, community-based programs and educational settings in both urban and rural areas of Missouri.

Occupational therapists are employed in public and private schools, hospitals, rehabilitation centers, mental health facilities, nursing homes, home health agencies, community health programs and industry. As independent health practitioners, they are also involved in business, working with disability claims, in work-hardening programs and wellness/health promotion, or as proprietors of their own therapy services. Occupational therapists also work as educators, administrators, consultants and researchers.

The department offers a Bachelor of Health Science in Occupational Therapy (BHS) followed by the entry level master degree (MOT). To become a registered therapist the master degree is required.

Department accreditation is granted by the Accreditation Council for Occupational Therapy Education of the American Occupational Therapy Association, 4720 Montgomery Lane, Bethesda, MD, 20814-3425, (301) 652-2682.

http://shp.missouri.edu/ot/

• MOT in Occupational Therapy (p. 502)
The School of Health Professions offers an entry level master’s degree in occupational therapy. Students apply to the Department of Occupational Therapy as an undergraduate, receive a Bachelor of Health Sciences in Occupational Therapy (BHS-OT) and continue on to graduate level courses. Student with completed bachelor degree at time of application to the program may opt to take all program courses at graduate level. Graduate courses are only offered to students enrolled in the program. The degree program is approved to meet accreditation requirements requiring a graduate degree. Contact the Department of Occupational Therapy for more information regarding the degree.

Accreditation & Certification

The Department of Occupational Therapy is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association, 4720 Montgomery Lane, Bethesda, MD, 20814-3425, (301) 652-2682.

Graduates are eligible to sit for the national certification examination administered by the National Board for Certification in Occupational Therapy (NBCOT), Inc. 12 South Summit Ave., Suite 100, Gaithersburg, MD 20877-4150, telephone (301) 990-7979; Fax (301) 869-8492.

Financial Aid from the Program

Check the School of Health Professions website at http://shp.missouri.edu for scholarship information.

Undergraduate

BHS in Occupational Therapy

Major Program Requirements

The professional degree program requires three years of course work after completion of all prerequisites and university general education requirements. Six months of field experiences in affiliated clinical and community-based sites, must be completed within 24 months after required didactic courses.

Students with a bachelor’s degree must complete the prerequisite courses and meet the university and OT admission requirements.

The following are MU courses. Students transferring from other institutions should seek advisement from the school and OT advisors and select appropriate prerequisite courses for admission. Medical terminology proficiency and 30 hours of observation is required. In addition to university, college and degree requirements, students must complete the following:

Major core requirements

</tbody>
</table>
Professional Certification

Upon successful completion of all courses, including field work experiences, students are eligible to sit for the examination of the National Board for Certification in Occupational Therapy, 800 South Fredrick, Suite 200, Gaithersburg, MD 20877-4150, (301) 990-7979. Successful completion of the exam is required by state regulatory agencies before entering into the profession.

* Denotes elective coursework. These specific courses are not required, though the credit hours are required to reach the minimum amount of credit hours (59) needed to be eligible for the OT Professional Program.

Graduate
MOT in Occupational Therapy

Leanna Garrison, Department Manager
809 Clark Hall; Columbia, MO 65211
573-884-2113

Admission Criteria
Application Deadline for Summer entrance: December 31
• Minimum MAT score: none set
• Undergraduate GPA: 3.3 or higher (4.0=A)
• Minimum TOEFL scores:
<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>61</td>
<td>500</td>
</tr>
</tbody>
</table>
• Completion of all undergraduate/OT prerequisites
• 30 hours of occupational therapy observation
• 20 hours of volunteering
• Completion of all required application materials
• Acceptance to program

Required Application Materials
To the Graduate School:
• All required Graduate School documents (only for degreed students opting to take courses at graduate level)
Required Application Materials to the Program (Occupational Therapy):
• Go to http://shp.missouri.edu/ot/ for departmental application forms (available Oct. 1-Dec. 31)
• Apply at the “Occupational Therapy Centralized Application Service (OTCAS)” found at https://portal.otcas.org.
• Observation Forms, Volunteer Forms, supplemental fee

Requirements for Masters Degree in Occupational Therapy
The Department of Occupational Therapy offers the Master of Occupational Therapy degree as the terminal degree of the program. All students must complete the prerequisite courses and meet the admission requirements to apply. The occupational therapy graduate courses include a minimum of 34 credits beyond the bachelor’s degree in OT. The masters degree is required to become certified and licensed to practice as an Occupational Therapist.
Physical Therapy

K. Gibson, Chair
Department of Physical Therapy
School of Health Professions
801 Clark Hall
(573) 882-7103
Fax: (573) 884-8369
mushppt@missouri.edu
http://shp.missouri.edu/pt/

Physical Therapy involves the evaluation and treatment of physical disability and pain that may result from injury, disease or developmental disability. Prevention of disability and public education are also roles of the physical therapist. Physical therapists use tests and measurements to assess body system dysfunction and determine diagnosis and treatment. Daily living skills, including work, are also addressed.

The University of Missouri offers a Doctor of Physical Therapy degree. No master’s degree or terminal undergraduate degree in Physical Therapy are available.

Admissions

Doctor of Physical Therapy Program, Regular Admissions

Most students admitted to the Doctor of Physical Therapy program will have a baccalaureate degree. Students who are interested in pursuing application to the Doctor of Physical Therapy Program are encouraged to work on an undergraduate degree that will allow them to fulfill application requirements.

Doctor of Physical Therapy Program, Early Admissions

Admission to the Doctor of Physical Therapy program may be available to students who have completed at least 90 credit hours, completed at least six full-time semesters of residential course work, and have shown excellent academic progress. Students who gain early admission to the Doctor of Physical Therapy program will be awarded the Bachelor of Health Science in pre-professional physical therapy upon completing one year of coursework in the physical therapy program.

Information regarding the admissions procedures and curriculum for the Doctor of Physical Therapy (p. 503) program can be found on the graduate tab.

• DPT in Physical Therapy (p. 503)

Starting in 2007, students who enter the MU Physical Therapy program will complete a Doctor of Physical Therapy (DPT) degree program.

Careers

The DPT degree is an entry-level clinical degree that prepares the student to enter the field of physical therapy as a general practitioner with a background in musculoskeletal, neuromuscular, cardiovascular/pulmonary and integumentary systems.

Financial Aid from the Program

Students may apply for scholarships during the professional phase of the program. Check the program website or ask the program contact for availability and details.

Undergraduate

BHS in Pre-Professional Physical Therapy

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

</table>

- Minimum GPA: 3.0

**Prerequisites for the Doctoral Degree**

*Note:* The DPT program accepts students to begin the professional program only for summer terms, which begin in June.

Admission to the DPT program is available through regular admission (applicants will have a bachelor’s degree prior to beginning the professional program) or through an early admission option that allows students to enter the professional program with 90 credit hours.

Regular applicants must have at least a 3.0 GPA in the core required courses and the cumulative GPA in the last 60+ credit hours.

On-campus interviews are required for admission to the professional program.

Students who enter without a bachelor’s degree must have satisfied the MU general education and graduation requirements and taken two Writing Intensive courses at MU. These applicants must possess a 3.5 GPA.

Applicants are notified of the selection committee’s decision by March.

All students are strongly encouraged to contact the School of Health Professions Student Affairs Office for advisement and planning well in advance of application.

Admission to the program is selective.

**Required Application Materials**

*To the Graduate School:*

- All required Graduate School documents/application fee

*To the Program [http://shp.missouri.edu/pt/]*

- Uploaded Departmental application/application fee
- 2 letters of recommendation (resume) as specified by the application guidelines
- Curriculum Vitae (resume) as specified by the application guidelines
- Unofficial transcripts (year of application, fall grades must be recorded on transcript)

- GRE scores must be sent to MU

**Plan of Study**

The professional program is offered in sequential blocks and requires full-time enrollment for three academic years (including two summer sessions), beginning in the summer session following acceptance. The curriculum contains foundational and clinical sciences combining traditional lectures and course work, laboratory sessions, problem-based learning classes and clinical education. More than 200 clinical sites in Missouri and beyond are available for supervised clinical education.

A graduate must pass the National Physical Therapy Examination to receive a license to practice in the United States. The program is accredited by the Commission on Accreditation in Physical Therapy (CAPTE). Graduates are eligible for licensure anywhere in the United States.

**Degree Requirements**

All students admitted must maintain a 3.0 grade point average with no grade below C (2.0) in courses required for the degree. Failure to achieve a semester or professional cumulative grade point average of 3.0 in required courses will result in probation or dismissal from the program. Students are expected to maintain full-time enrollment in the curriculum and complete the degree requirements as outlined in the course of study. Any exception must be approved by departmental faculty. Students must demonstrate the personal behaviors and characteristics associated with optimal patient welfare and professional trust.
Radiologic Sciences

There are two active emphasis areas in the radiologic sciences: Radiography and Nuclear Medicine. Students planning to complete one of these emphasis areas should contact the program director to determine eligibility for admission.

Emphasis in Radiography

Radiography
School of Health Professions
607 Lewis Hall
(573) 884-2623
Director: Patricia Tew

Radiographers are highly skilled health professionals who work closely with physicians and specialize in the use of x-rays. They provide patient services using a variety of imaging modalities. In addition to conventional x-ray procedures, the radiographer also works with computerized axial tomography (CT), magnetic resonance imaging (MRI), cardiovascular-interventional technology, mammography, bone densitometry, and quality management.

More About Radiography

Established in 1960, the Radiography Program is the only baccalaureate level program at a public institution of higher education in Missouri. This discipline provides preparation for leaders in the field by offering a Bachelor of Health Science degree. Graduates have demonstrated their superior achievement through their performance on national certifying examinations with a 100% overall pass rate. After graduating from the program, students may choose to do an additional clinical externship in computerized tomography or magnetic resonance imaging, which will lead to a certificate of completion and eligibility to take the national certifying examination in that area.

Mission Statement

The primary mission of the radiography program is to prepare highly competent, registry eligible professionals in the medical imaging sciences. Our program and curriculum are designed to provide an educational foundation for the advancement into leadership and managerial positions within medical imaging, as well as providing an environment where scholarly activity, professional development, and service are expectations. Our curriculum enables successful graduates to readily interact with a variety of health care and science related fields.

Emphasis in Nuclear Medicine

Nuclear Medicine
School of Health Professions
605 Lewis Hall
(573) 884-7843
Director: Glen Heggie

The nuclear medicine technologist is concerned with the use of radioactivity for patient diagnosis, monitoring of treatment and in some cases the treatment itself. The nuclear medicine technologist uses radioactive compounds to perform body function studies, produce images of internal organs and analyze biological specimens.

More About Nuclear Medicine

Nuclear Medicine uses extremely small amounts of radioactive compounds in order to image and assess the function and state of health of many of the body’s internal organs, and to treat some forms of cancer. It is a multidisciplinary field dependent upon contributions from Physics, Chemistry and Medicine. This highly sophisticated discipline is at the forefront of discovering and understanding the complex physiologic processes of our bodies. This discipline is of enormous importance to medical specialties such as Cardiology (heart), Neurology (nervous system), Oncology (cancer), Orthopedics (bone), Endocrinology (hormone system), Hematology (blood), Nephrology (kidney), and Pulmonology (lung).

Faculty

Clinical Professor  G. D. Heggie*
Clinical Associate Professor  C. M. Allen
Clinical Assistant Professor  M. Feldman, M. C. Sebacher, P. A. Tew

** Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BHS in Radiologic Sciences (p. 506)
  - with emphasis in Nuclear Medicine Technology (p. 506)
  - with emphasis in Radiography (p. 507)

The Department of Clinical and Diagnostic Sciences offers the Bachelor of Health Science (BHS) with majors in Clinical Laboratory Science (with an emphasis area of Medical Technology), Diagnostic Medical Ultrasound, Respiratory Therapy, and Radiological Sciences. Students majoring in Radiological Sciences must complete emphasis areas in Radiography or Nuclear Medicine Technology.

Radiography Program

Instructional Plan

Radiography program faculty advise interested students throughout their college career. During the first two years, students enroll in general education courses (p. 18) and complete required prerequisite courses. Students apply to the radiography program during spring semester of their sophomore year (by February 1st). Upon acceptance into the program, students begin their professional radiography courses starting summer semester of their Junior year. This professional phase of the program runs for 24 consecutive months (6 consecutive semesters).

In addition to general requirements and courses pertinent to radiography, students in the program will take interdisciplinary courses in cardiology, research, healthcare organization and management, radiation safety, and radiation biology. They will also have an opportunity to experience problem based learning (PBL) cases.

While in the program, students will receive clinical instruction at several clinical affiliates such as University of Missouri Hospital Center, Women’s & Children’s Hospital, Harry S Truman Veteran’s Administration Hospital and Boone Hospital Center. Our clinical affiliates provide students with a broad base of learning experiences. Other clinical rotations may include radiation therapy, nuclear medicine, diagnostic medical ultrasound, CT, MRI, veterinary medicine, mammography and trauma/emergency imaging.
Essential Requirements

Before beginning the professional phase of the School of Health Professions’ Radiography Program, we want you to have certain information available to you. We encourage you to read through the Essential Requirements (http://shp.missouri.edu/rs/download/Essential_Requirements.pdf). The Radiography Program is a serious commitment—for you and for us. More than anything else, however, it is a serious commitment to patients, including those you will see and work with as students and, most importantly, those for whom you will be responsible later in your careers.

Graduate

While MU does not offer graduate degrees specifically in radiologic sciences, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Undergraduate

BHS in Radiologic Sciences

Major Program Requirements

There are two active emphasis areas in the radiologic sciences: Radiography and Nuclear Medicine Technician. Students planning to complete one of these emphasis areas should contact the program director to determine eligibility for admission. All degree requirements are listed that the emphasis level.

Semester Plan

Refer to the Semester Plan for the emphasis areas.

BHS in Radiologic Sciences with Emphasis in Nuclear Medicine Technology

Major Program Requirements

The nuclear medicine technologist is concerned with the use of radioactivity for patient diagnosis, monitoring of treatment and in some cases the treatment itself. The nuclear medicine technologist uses radioactive compounds to perform body function studies, produce images of internal organs and analyze biological specimens.

The curriculum incorporates the fundamentals needed for specialization as a nuclear medicine professional. Accreditation of the program is granted by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology.

The following are MU courses. Students transferring from other institutions should contact the program director to select appropriate prerequisite courses for admission. Students must complete these courses in addition to major, degree and University requirements (p. 17), including University general education (p. 18) requirements.

Professional Certification

Upon completion of the program, students are eligible to take the national certifying examinations given by the Nuclear Medicine Technology
Certification Board. Students may also pursue credentials offered through the American Registry of Radiologic Technologists.

**Semester Plan**

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

### First Year

**Fall**
- MATH 1100 3 NUCMED 1000 1
- PSYCH 1000 3 ENGLSH 1000 3
- HIST 1100, 1200, or POL_SC 1100
- BIO_SC 1010 & BIO_SC 1020 (or BIO_SC 1500)
  - STAT 1200 or ESC_PS 4170

**Spring**
- CHEM 1320 4
- BIO_SC 1010 & BIO_SC 1020 (or BIO_SC 1500)

Total Credits: 14  14

### Second Year

**Fall**
- PTH_AS 2201 & PTH_AS 2203
- PHYSCS 1210
- CPD 2190
- CPD 4955 (Writing Intensive)

**Spring**
- MPP 3202 5
- PHYSCS 1220 4
- Behavioral/Social Science (level 2000+)
- Humanities 2000+

Total Credits: 15  15

### Third Year

**Fall**
- NUCMED 3255 2 CHEM 2100
- NUCMED 3263 3 CHEM 4600
- NUCMED 4329 3 NUCMED 3256
- RA_SCi 4303 3 NUCMED 4299
- RADIOL 4328 3 Humanities

**Summer**
- NUCMED 3255 2 CHEM 2100

Total Credits: 14  14  6

### Fourth Year

**Fall**
- NUCMED 4268 3 NUCMED 4269
- NUCMED 4327 3 NUCMED 4330
- NUCMED 4940 6 NUCMED 4941
- RA_SCi 4110 3 RA_SCi 4150

Total Credits: 15  16

Total Credits: 123

**BHS in Radiologic Sciences with Emphasis in Radiography**

**Major Program Requirements**

Radiographers are highly skilled health professionals who work closely with physicians specializing in the use of x-rays. They provide patient services using a variety of imaging modalities such as general x-ray, computed tomography, magnetic resonance imaging, mammography, interventional radiography, and bone densitometry. The radiographer must apply the principles of radiation protection, must have the ability to deal with patients and medical professionals.

Accreditation of the program is granted by:

The Joint Review Committee on Education in Radiologic Technology
20 North Wacker Drive, Suite 2850
Chicago, Illinois 60606-3182
312-704-5300
mail@jrcert.org

Students transferring from other institutions should contact the program director to select appropriate prerequisite courses for admission. Students must complete these courses in addition to major, degree and University requirements (p. 17), including University general education requirements (p. 18).

**Emphasis core requirements**

**PREREQUISITES FOR RADIOGRAPHY EMPHASIS**
- MATH 1100 College Algebra 3
- ENGLSH 1000 Exposition and Argumentation 3
- HLTH_SCi 1000 Introduction to the Health Professions 3

**Humanities and Fine Arts**
- COMMUN 1200 Public Speaking 3
- Humanities (Elective) 6

**Behavioral/Social Sciences**
- HIST 1100 Survey of American History to 1865 3
- or HIST 1200 Survey of American History Since 1865
- or POL_SC 1100 American Government
- PSYCH 1000 General Psychology 3
- Behavior Sciences (Elective) 3

**Biological/Physical Sciences**
- BIO_SCi 1010 General Principles and Concepts of Biology 5
- BIO_SCi 1020 and General Biology Laboratory
- BIO_SCi 1500 Introduction to Biological Systems with Laboratory
- CHEM 1320 College Chemistry I 4
- PTH_AS 2201 Human Anatomy Lecture & PTH_AS 2203 and Human Anatomy Laboratory
- MPP 3202 Elements of Physiology 5
- ESC_PS 4170 Introduction to Applied Statistics 3

**CORE REQUIREMENTS FOR RADIOGRAPHY EMPHASIS**
- RA_SCi 3110 Radiography Procedures I 2
- RA_SCi 3120 Fundamentals of Radiography 3
- RA_SCi 3130 Basic Radiographic Skills 2
- RA_SCi 3140 Principles in Radiographic Exposure I 3
- RA_SCi 3150 Radiologic Pharmacology 3
- RA_SCi 3160 Radiologic Physics 3
- RA_SCi 3170 Imaging Modalities 2
- RA_SCi 3180 Radiography Procedures II 2
- RA_SCi 3190 Radiography Procedures III 3
- RA_SCi 4110 Sectional Anatomy 3
- RA_SCi 4140 Magnetic Resonance Imaging: Physics and Procedures 5
- or RA_SCi 4150 Computed Tomography: Physics and Procedures
- RA_SCi 4303 Radiation Safety 3
- RA_SCi 4947 Radiography Overview 3
- RA_SCi 4980 Imaging Pathology 3
RA_SCI 3941 Clinical Education I 3
RA_SCI 3942 Clinical Education II 3
RA_SCI 4943 Clinical Education III 3
RA_SCI 4944 Clinical Education IV 3
RA_SCI 4945 Clinical Education V 3
CPD 3460 Cardiovascular and Pulmonary Diagnostic Applications I 3
CPD 4440 Organization and Administration 3
CPD 4460 Cardiovascular and Pulmonary Diagnostic Applications II 3
CPD 4955 Introduction to Research 3
RADIOL 4328 Introductory Radiation Biology 3

Total Credits 122

Professional Certification
Upon completion of the program, students are eligible to sit for the national certifying exam given by the American Registry of Radiologic Technologists.

Respiratory Therapy

School of Health Professions
614 Lewis Hall
(573) 882-9722
Program Director: Monica Schibig

The University of Missouri Respiratory Therapy Program was established in 1967. The program is credited to be among the country's first baccalaureate degree programs in Respiratory Therapy. The University of Missouri's Respiratory Therapy program prepares graduates for the Advanced Practitioner level, Registered Respiratory Therapist (RRT) and students graduate with a Bachelor of Health Science in Respiratory Therapy.

The Mission of the University of Missouri Respiratory Therapy Program is to coordinate superior classroom, laboratory, and clinical experiences to prepare advanced Respiratory Care Practitioners, develop learners who will effectively engage in professional leadership roles, and provide an environment where research and service are expectations.

Faculty
Clinical Professor G. D. Heggie*
Clinical Associate Professor K. S. Moss*, M. A. Schibig
Clinical Assistant Professor L. M. Lair
Clinical Instructor J. L. Keely, S. W. Parker

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BHS in Respiratory Therapy (p. 509)

The Department of Clinical and Diagnostic Sciences offers the Bachelor of Health Science (BHS) with majors in Clinical Laboratory Science (with an emphasis area of Medical Technology), Diagnostic Medical Ultrasound, Respiratory Therapy, and Radiological Sciences. Students majoring in Radiological Sciences must complete emphasis areas in Radiography or Nuclear Medicine Technology.

Graduate

While MU does not offer graduate degrees specifically in respiratory therapy, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Undergraduate

BHS in Respiratory Therapy

Major Program Requirements

Respiratory care is a diverse, growing, health profession with extensive patient contact, often with the critically ill. Respiratory therapists administer prescribed respiratory care and life support to patients with deficiencies and abnormalities of the cardiopulmonary system. They work in many settings requiring a considerable degree of independent clinical judgment under the direct or indirect supervision of a physician.

The two-year, professional phase of the program begins the summer semester of the junior year. Students complete lecture and laboratory courses designed to develop knowledge and skills necessary for application to the clinical settings. Required courses in management, research, respiratory physiology and pharmacology, pathology and cardiology are integrated with the respiratory therapy curriculum. The final semester of the program consists entirely of clinical externships and online coursework. Students may select affiliated hospitals outside the Columbia area for this clinical experience or remain on campus at MU Health Care. The MU RT program has a satellite campus at Mercy Hospital-St. Louis for those students living in the St. Louis area.

Accreditation of the program is granted by the Commission on Accreditation for Respiratory Care (CoARC) www.coarc.com (http://www.coarc.com).

The following are MU courses. Students transferring from other institutions should contact the program director to select appropriate courses for admission. Students must complete the courses listed below in addition to degree and University requirements, which include University general education requirements.

The College of Human Environmental Sciences addresses human needs and enhances individual and family life in a diverse and global society by conducting advanced research, preparing professionals and providing outreach.

The college is unique among its peers in its comprehensive use of professional advisory boards, whose members are leaders in business, government, education and the social services. These experts provide guidance and support from their specialized fields to students and faculty and contribute powerful perspectives to curriculum development.

Undergraduate
• Admissions (p. 511)
• Advising (p. 511)
• Career Services (p. 511)

Admissions
Undergraduate students may enter the College of Human Environmental Sciences as freshmen. Some programs have requirements beyond those of the University. An entering freshman has the first year to explore the departments and the college as well as the combinations of subject areas for positions in fields such as education, health and welfare, business, industry and government.

All freshmen entering the College of Human Environmental Sciences enroll in GN_HES 1100 Introduction to Human Environmental Sciences or SOC_WK 1110 Introduction to the Social Work Major. These courses emphasize career decision-making, provide an orientation to the campus and the college, and bring into focus the role of a professional in the improvement of the quality of life in the near environment.

Transfer Student Application
Human Environmental Sciences
Students in another MU school or college, or from another UM System campus, must have a cumulative GPA and term GPA of 2.0 or better to be eligible for admission to the College of Human Environmental Sciences. For students who transfer to the UM System from another institution and then apply for transfer into the college, transcripts are re-evaluated by the college to determine what courses will apply to the degree.

A student ineligible to enroll in another school or college may not enroll in the College of Human Environmental Sciences during the period of ineligibility. An appeal for admission may be made after the period of ineligibility is over.

School of Social Work
Undergraduate students who have been admitted to the University after attending another college may request a social work major. Those who have completed more than 55 credits need a GPA of 2.5 or higher on all college work attempted.

Advising
Professional advising staff in the Student Services Office assists the students in planning their college programs.

Students earning credit from another institution will have a transfer equivalencies form completed by faculty for course work in their professional program. Transfer work is evaluated by the Office of Admissions. The HES Office of Student Services determines how transferred courses fit into a particular degree program.

It is the student’s responsibility to initiate a graduation check to be certain that all requirements are met. An application for graduation should be submitted to the HES Student Services Office the semester preceding graduation. The application is available online at: http://hes.missouri.edu/students_evalforgrad.html

Career Services
Career services cover a spectrum of career programs. These include business, education and agriculture career services offices on the campus. The Student Services Office and individual advisers provide information regarding procedures. Career exploration and preparation information may be obtained in the Career Center.

Graduate
The College of Human Environmental Sciences (HES) addresses human needs and enhances individual and family life in a diverse and global society by conducting advanced research. HES faculty have earned national and international research reputations while building programs that are valued by private citizens, government, business and industry, and human services agencies. The College has more than 400 graduate students enrolled in a variety of master’s and doctoral degrees. Graduate certificates and online study are other academic options in several disciplinary areas.

Architectural Studies
Human Development & Family Studies
Nutrition & Exercise Physiology
Personal Financial Planning
Textile & Apparel Management

Social Work

The School of Social Work (http://ssw.missouri.edu), housed within the College, offers a CSWE accredited Master of Social Work (MSW) Program that prepares competent, effective and ethical social work professional leaders for social change. The PhD program prepares students as educators and researchers with knowledge and skills to inform policy making, program development and evaluation, and research on clinical practice issues.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column. For a look at the College's online graduate degree programs, see Mizzou Online.
Architectural Studies

R. B. Tofle, Chair
College of Human Environmental Sciences
137 Stanley Hall
(573) 882-7224
http://arch.missouri.edu

The Department of Architectural Studies promotes connections between people and place and between interior design and architecture with the intention of preparing our graduates to become lifelong designers of the built environment.

The Department is a dynamic and personal place engaged in the processes, procedures, observations and techniques essential to the development of environmental designs for human living, work and leisure. It can be placed between the world of physical realities and the imaginary.

Architectural studies uses the arts and the sciences: the exact science for its stability and durability, thermal and acoustic capabilities of buildings; and the social sciences to develop a better understanding of people's relationship with places and time.

Faculty

Professor B. Schwarz**, R. B. Tofle**
Associate Professor R. G. Phillips**, N. D’Souza**
Assistant Professor B. Balakrishnan**

The Department of Architectural Studies offers a Bachelor of Science in Human Environmental Sciences with emphasis areas of either Interior Design or Architectural Studies. Through teaching, research, and service, faculty and students conduct systematic inquiry into 1) the design process, 2) its products, 3) the interaction between people and the built environment, and 4) the implications of digital technologies for the above. The program advances the interdisciplinary interaction between interior design, architecture, the human sciences and aesthetics to improve quality of life for the public good.

Students may receive a minor in Entrepreneurship with required courses in Architectural Studies, an internship, and an additional 4 credits of specified coursework. See Undergraduate Minor in Entrepreneurship (p. 667) for more information.

The department offers some undergraduate coursework taught 100% online in asynchronous delivery for distance learners. For distance learners seeking degree completion, some courses meet MU general education requirements. Students may also enroll as post-baccalaureate or non-degree undergraduate students. In addition, selected courses could be used toward a 15-credit Minor in Architectural Studies. On-campus and distance-learners are taught by the same accomplished professors. This is a fully integrated model of online instruction with established quality. For more information see MizzouOnline (http://online.missouri.edu/course-search).

Portfolio Review and Admission to Studio Sequence in the Department of Architectural Studies

Students must apply for admission to the studio sequence required for undergraduate majors. Applications are made at the end of the spring semester of the freshman level for enrollment in ARCHST 2811 Studio I.

Application forms with deadlines are available from the department and the department website. Admittance decisions are based on:

1. Review of design work submitted in a portfolio, which should include:
   - Satisfactory completion of ARCHST 1200 Architectural Drafting and Working Drawings
   - Satisfactory completion of 2-dimensional design coursework from: ARCHST 1100 Visual Design OR ART_GNRL 1030 Basic 2-D Design
   - Satisfactory completion of ART_DRAW 1050 Drawing I
2. Overall grade point average (including transfer courses), grades received in courses completed, and ACT scores (or equivalent for transfer students)
3. Enrollment capacity (approximately 40 students)

Laptop Computer Requirements

A laptop computer is required for the studio sequence at the beginning of the sophomore year. See department website for recommended specifications.
Graduate

- MA in Architectural Studies (p. 517)
  - with emphasis in Design with Digital Media (p. 518)
  - with emphasis in Environment and Behavior (p. 519)
- MS in Architectural Studies (p. 519)
  - with emphasis in Design with Digital Media (p. 520)
  - with emphasis in Environment and Behavior (p. 521)

The College also offers a PhD in Human Environmental Sciences with an emphasis in Architectural Studies (p. 534).

A Design Research Concentration is developed for

- Designers engaged in architecture, interior design, graphic, or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry -- Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

The Design Research concentration can be taken as independent coursework for professional advancement or applied to a Masters (30 cr) or PhD program. Four courses comprise the concentration:

- ARCHST 7961 Design Research and Service Design (3 credits)
- ARCHST 7963 Human Factors Research for Design (3 credits)
- ARCHST 7962 Information Visualization and Visual Analytics (3 credits)
- ARCHST 7964 Design Thinking and Creative Process (3 credits)

About the Program

The department's mission is to educate future design practitioners, advance research of the built environment and disseminate knowledge of architectural studies to improve quality of life for people. The philosophy of the Department of Architectural Studies embraces the synergy created between interior design and architecture. Having a symbiotic relationship, both fields explore the design process and its final products. Promoting the meaning and value of physical settings and responding to the human condition, the program investigates the interaction between people and their surroundings to create a more beautiful and sustainable world.

The program encourages an interdisciplinary, scholarly climate celebrating aesthetic values and the human sciences. Consistent attention is placed on planning and designing physical environments that support human needs and aspirations. Course work may include courses in supportive areas such as the human and physical sciences, art, humanities and allied design professions.

Online Study

On-campus and distance-learners are taught by the same accomplished professors. This is a fully integrated model of online instruction with established quality. The Department of Architectural Studies offers 100% online graduate education in the following formats:

- Master of Arts (http://arch.missouri.edu/academics_masters.html#page_MA) in the major area of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html).
- Master of Science (http://arch.missouri.edu/academics_masters.html#page_MS) in the major area of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html).
- Doctor of Philosophy (http://arch.missouri.edu/academics_phd.html) in HES and in the major area of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html).
- Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) as stand-alone coursework or as part of a masters or doctorate.
- Stand-alone courses for non-degree (http://gradschool.missouri.edu/admissions/eligibility-process/non-degree-applicants) graduate students. Students select online courses from an extensive menu for professional advancement. Up to 12 credit hours of graduate credit taken as a non-degree graduate student may be applied to a graduate degree program upon approval of the academic program if the student is accepted.

Graduate courses are delivered as:

- Asynchronous or Synchronous. Asynchronous coursework is completed independently according to the provided schedule.
- Synchronous courses will include real-time discussion during arranged weekly class periods.
- Semester-based or self-paced online.

See Mizzou Online http://online.missouri.edu/course-search/ for a complete listing of online course offerings and enrollment procedures. All graduate core courses are offered online. Transfer of credit (http://arch.missouri.edu/academics_transfer.html) to a degree program is allowed with the approval of the student’s adviser and approval of the director of graduate studies and Graduate School.

Professional Opportunities

Career opportunities for master’s and doctoral graduates of the Department and College include leadership positions in design; consultation practices in industry, government and education; and academic and administrative positions in higher education and research. Graduates from the MA degree program may pursue careers in the design professions, building construction industry, government, education and the advertising and entertainment industries. Graduates of the MS and PhD degree programs pursue academic and professional careers integrating design theory with their research skills.

Financial Aid from the Program

Limited teaching and/or research assistantships and scholarships are available to graduate students. GTA appointments are available to resident graduate students and are based on the match between the department’s needs and candidate’s background.

Graduate Program Requirements

The academic program should be developed in consultation with an adviser by the end of the first full semester or at the successful conclusion of at least nine credit hours. See Graduate School website ("Doctoral Plan of Study and Degree Requirements") for guidelines and requirements regarding course work and role of dissertation committee. Students complete the online Graduate Student Progress System. Annual reviews of graduate students will be conducted to include the indicators listed by the Graduate School.
Architectural Studies Graduate Degrees & Concentration

Graduate programs offer two emphases: 1) environment and behavior studies with a creative project leading to an MA degree and with research leading to the MS and PhD degrees and 2) design with digital media studies leading to the MA, MS and PhD degrees. The graduate program builds on Architectural Studies course work and a core of courses in design theory, research methods, graduate seminars, research and readings in digital media and environment and behavior.

Undergraduate

BSHES in Architectural Studies

Major Program Requirements

The BSHES in Architectural Studies is an interdisciplinary combination of interior design, architecture, the human sciences and aesthetics to improve quality of life. Students are engaged in the processes, procedures, observations, and techniques of design.

The BSHES is offered with two emphasis area options: Interior Design and Architectural Studies. Both emphasis areas focus on the development of environmental designs for human living, work, and leisure. The Interior Design emphasis results in a terminal bachelor’s degree accredited by the Council of Interior Design Accreditation (CIDA). The Architectural Studies emphasis is a pre-architecture bachelor’s degree or pre-professional option and students continue their education with the M Arch to become practicing architects.

Some courses in the Professional Program area double count for General Education (p. 18) requirements. See degree information at the emphasis level.

Semester Plan

Refer to the Semester Plans at the emphasis level.

BSHES in Architectural Studies with Emphasis in Architectural Studies

Major Program Requirements

The Architectural Studies emphasis prepares students at the undergraduate level for application to professional architecture programs as well as for other roles in society in related fields - in research, government, development, management, planning, etc. While many of these occupations do not require a professional license, they do require an understanding of a professional education.

Students may choose to continue their program of study for a master’s degree in architecture (M. Arch) at another university. A program reciprocity agreement was developed with the University of Kansas (KU) where students pay Kansas in-state tuition. All students interested in continuing their education are encouraged to maintain regular communication with the cooperating institution because application and transfer procedures are subject to change. Students also continue at many other M. Arch programs in the U.S. where scholarships and financial support may be available as determined by the institution.

Semester Plan

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.
BSHES in Architectural Studies with Emphasis in Interior Design

Major Program Requirements

The Interior Design emphasis is a four-year, first-professional baccalaureate interior design program accredited by the Council for Interior Design Accreditation (CIDA).

The program’s mission is to provide academic training with high-quality educational experiences to prepare students for their successful careers as interior designers. The program addresses health, safety, and welfare and strives to provide students with experiences and design skills that allow them to design meaningful interior spaces to enhance human life. The program emphasizes a quest for true artistic beauty, use, and techniques based on precision, truthfulness and sincerity.

See interior design definition at NCIDQ (http://www.ncidq.org/aboutus/aboutinteriordesign/definitionofinteriordesign.aspx).

### ARCHST 4962 Information Visualization and Visual Analytics 3
### ARCHST 4963 Human Factors Research for Design 3
### ARCHST 4964 Design Thinking and Creative Process 3

For exceptional students, with consent of instructor and department approval, additional course work in the department may be selected.

### Graduate

#### MA in Architectural Studies

**Admission Contact Information**

Dr. Newton D’souza (dsouzan@missouri.edu)  
137 Stanley Hall; Columbia, MO 65211  
573-882-7496

**Admission Criteria**

- Fall deadline: January 15
- Minimum GPA: 3.0
- Minimum TOEFL scores:
  - Internet-based test (iBT) 61
  - Paper-based test (PBT) 500

**Required Application Materials**

**To the Program:**

- Application statement of graduate goals and educational objectives discussing which of the department’s emphasis areas is of interest; intentions regarding MA or MS; and request for a specific advisor.
- 3 letters of recommendation (excluding MU Architectural Studies faculty). Can be uploaded to the online.
- Graduate School application or mailed directly to the program.
- For MA applicants only, electronic portfolio of images and/or publications. (Do not mail originals.)

### Master of Art

The creative, project-based, MA plan of study is often undertaken in preparation for careers in the design professions and education, as well as in the advertising and entertainment industries. The project is conducted in the area of design with digital media using high-end computer software. The culmination of the degree is a professionally reviewed, visual project.

A Design Research concentration is offered for:

- Designers engaged in interior design, architecture, graphic or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry -- Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

The course work for the concentration is applied to the program of study.
Environment and Behavior Studies Emphasis

The Environment and Behavior Studies focuses on the multifaceted relationships between people and their physical, social, and cultural environments. Environment-behavior research explores a variety of environments, linking them to a range of behavioral concerns. This program is suitable for persons who seek careers in research, consulting, and/or teaching in architecture, interior design, and related environmental design disciplines. A design project leads to the MA and research leads to the MS or PhD degrees.

Current study areas in environment and behavior include:

- Design Research
- Design Education
- Learning Environments for Design
- History of the Designed Environment
- Design Planning and Analysis
- Aesthetics of Design
- Universal Design/Accessibility
- Environment and Aging
- Health Care Design
- Sustainable Environments
- Housing, Neighborhood Design
- Organizational Systems and Design
- Facility Management and Design
- Programming, Design and Post-Occupancy Evaluation

Contact Dr. Newton D’souza for more information about the department’s graduate program or the emphasis in environment and behavior.

Design with Digital Media Emphasis

Design with Digital Media, as an integral part of the design process, focuses on graphic ideation and the application of computer technology for architecture, interior design and related disciplines. This program of study has an emphasis on design with digital media leading to MA, MS, and PhD degrees. The MA is a project-based program of study, whereas the MS is research-based.

Current study areas in the digital media program include:

- Design computing and cognition
- Design process using digital media and creativity research
- Virtual reality (VR) and augmented reality (AR) technologies for design visualization
- Advanced visualization technologies for environment-behavior simulation
- Building Information Modeling (BIM)
- Building Simulation
- Human-computer interaction aspects of digital tools for design

The culmination of the degree is a written and/or visual project employing computer applications for design methods. Applicants interested in the Design with Digital Media option should contact the coordinator of Design with Digital Media Dr. Bimal Balakrishnan for course content and research proposals.

MA in Architectural Studies with Emphasis in Design with Digital Media

MU’s Design with Digital Media program attracts a diverse group of talented, intellectually engaged graduate students for interdisciplinary and transdisciplinary exploration in the digital arts. The curriculum enables students to investigate innovative approaches to contemporary theory and practice, and fosters both individual inquiry and high-level collaboration. The primary objective of the program is to prepare creative critical thinkers to become leaders in their fields.

Structured to promote thought and work that crosses traditional lines between disciplines, the Digital + Media curriculum challenges students to consider non-standard approaches to the computer as a creative and expressive medium. Study of technology, art and design is balanced with inquiry grounded in conceptual, critical, social, cultural and historical considerations.

Design with Digital Media, as an integral part of the design process, focuses on graphic ideation and the application of computer technology for architecture, interior and related disciplines. This program of study has an emphasis on design with digital media leading to MA, MS, and PhD degrees. MA is a project-based program of study, whereas the MS is research-based.

The graduate courses can either be taken as a MA/MS or Doctoral program. MA is a project-based program of study, whereas MS is research-based. The MA/MS courses are generally two year courses. The duration of the PhD may range from 3.5-6 years.

Current study areas in the digital media program include:

- Design computing and cognition
- Design process using digital media and creativity research
- Virtual reality (VR) and augmented reality (AR) technologies for design visualization
- Advanced visualization technologies for environment-behavior simulation
- Building Information Modeling (BIM)
- Building Simulation
- Human-computer interaction aspects of digital tools for design

See resources in our immersive visualization lab, the ilab (http://arch.missouri.edu/resources_ilab.html), and the ilab website (http://arch.missouri.edu/ilab)

The culmination of the degree is a written and/or visual project employing computer applications for design methods. Applicants interested in the Design with Digital Media option should contact the coordinator of Design with Digital Media, Dr. Bimal Balakrishnan (http://arch.missouri.edu/faculty_balakrishnan.html), for course content and research proposals.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Architectural Studies program (http://gradschool.missouri.edu/academics/programs/architectural-studies/masters.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/).
Minimum requirements (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

**MA in Architectural Studies with Emphasis in Environment and Behavior**

The Environment and Behavior Studies focus is on the multifaceted relationships between people and their physical, social and cultural environments. Environment-behavior research explores a variety of environments, linking them to a range of behavioral concerns. This program is suitable for persons who seek careers in research, consulting, and/or teaching in architecture, interior design, and other environmental design disciplines.

A design project leads to the MA and research leads to the MS or PhD degrees.

**Emphasis areas in environment and behavior include:**

- Design Education
- History of the Designed Environment
- Design Planning and Analysis
- Interior Design Systems
- Universal Design/Accessibility
- Environment and Aging
- Quality of Life and Design
- Health Care Design
- Housing, Neighborhood Design, and Sustainability
- Organizational Systems and Design
- Facility Management and Design
- Programming, Design and Post-Occupancy Evaluation

Contact Dr. Newton D’Souza (http://arch.missouri.edu/faculty_dsoouza.html) at dsouzan@missouri.edu for more information about the Department’s Graduate program or the emphasis in environment and behavior.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Architectural Studies program (http://gradschool.missouri.edu/academics/programs/architectural-studies/masters.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. **MS in Architectural Studies**

**Admission Contact Information**

Dr. Newton D’souza (dsouzan@missouri.edu)
137 Stanley Hall; Columbia, MO 65211
573-882-7496

**Admission Criteria**

Fall deadline: January 15
Minimum GPA: 3.0
Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (IBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>61</td>
<td>500</td>
</tr>
</tbody>
</table>

**Required Application Materials**

To the Program:

- Application statement of graduate goals and educational objectives discussing which of the department’s emphasis areas is of interest; intentions regarding MA or MS; and request for a specific advisor.
- 3 letters of recommendation (excluding MU Architectural Studies faculty). Can be uploaded to the online.
- Graduate School application or mailed directly to the program.

**Master of Science**

The design and research-based MS plan of study is often undertaken in preparation for professional practice or design education. The project is conducted in emphasis areas as described below. Within each of these emphases, specific course work is selected based on subject matter, the type of design project and its research application. The culmination of the degree is a professionally reviewed design project with supporting written report. The research-based MS plan of study is often undertaken as preparation for the doctoral degree.

Research is conducted in one of two emphasis areas — design with digital media or environment and behavior studies. Within each emphasis area, specific course work is selected based on subject matter and the type of research method selected — quantitative, qualitative or a combination of both methods. The culmination of the degree is the written research thesis.

MS students must complete a final oral examination by an approved faculty committee and submit a presentation proposal at a professional conference or a manuscript in a professional journal.

A Design Research concentration is offered for:

- Designers engaged in interior design, architecture, graphic or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry -- Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

The course work for the concentration is applied to the program of study.
Environment and Behavior Studies Emphasis

The Environment and Behavior Studies emphasis area focuses on the multifaceted relationships between people and their physical, social, and cultural environments. Environment-behavior research explores a variety of environments, linking them to a range of behavioral concerns. This program is suitable for persons who seek careers in research, consulting, and/or teaching in architecture, interior design, and related environmental design disciplines. A design project leads to the MA and research leads to the MS or PhD degrees.

Current study areas in environment and behavior include:

- Design Research
- Design Education
- Learning Environments for Design
- History of the Designed Environment
- Design Planning and Analysis
- Aesthetics of Design
- Universal Design/Accessibility
- Environment and Aging
- Health Care Design
- Sustainable Environments
- Housing, Neighborhood Design
- Organizational Systems and Design
- Facility Management and Design
- Programming, Design and Post-Occupancy Evaluation

Contact Dr. Newton D’souza for more information about the department’s graduate program or the emphasis in environment and behavior.

Design with Digital Media Emphasis

Design with Digital Media, as an integral part of the design process, focuses on graphic ideation and the application of computer technology for architecture, interior design and related disciplines. This program of study has an emphasis on design with digital media leading to MA, MS, and PhD degrees. The MA is a project-based program of study, whereas the MS is research-based.

Current study areas in the digital media program include:

- Design computing and cognition
- Design process using digital media and creativity research
- Virtual reality (VR) and augmented reality (AR) technologies for design visualization
- Advanced visualization technologies for environment-behavior simulation
- Building Information Modeling (BIM)
- Building Simulation
- Human-computer interaction aspects of digital tools for design

The culmination of the degree is a written and/or visual project employing computer applications for design methods. Applicants interested in the Design with Digital Media option should contact the coordinator of Design with Digital Media, Dr. Bimal Balakrishnan for course content and research proposals.

MS in Architectural Studies with Emphasis in Design with Digital Media

MU’s Design with Digital Media program attracts a diverse group of talented, intellectually engaged graduate students for interdisciplinary and transdisciplinary exploration in the digital arts. The curriculum enables students to investigate innovative approaches to contemporary theory and practice, and fosters both individual inquiry and high-level collaboration. The primary objective of the program is to prepare creative critical thinkers to become leaders in their fields.

Structured to promote thought and work that crosses traditional lines between disciplines, the Digital + Media curriculum challenges students to consider non-standard approaches to the computer as a creative and expressive medium. Study of technology, art and design is balanced with inquiry grounded in conceptual, critical, social, cultural and historical considerations.

Design with Digital Media, as an integral part of the design process, focuses on graphic ideation and the application of computer technology for architecture, interior and related disciplines. This program of study has an emphasis on design with digital media leading to MA, MS, and PhD degrees. MA is a project-based program of study, whereas the MS is research-based.

- **Extension Faculty** J. Britt-Rankin*, C. Gabel
- **Professor Emeritus** R. P. Dowdy*, M. McDonald, B. L. O'Dell, T. R. Thomas*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Graduate Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

While MU does not offer undergraduate degrees specifically in exercise physiology, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

**Graduate**

- **PhD in Exercise Physiology** (p. 522)

**About the Program**

The Exercise Physiology PhD program is designed to provide advanced training in both the basic and applied aspects of exercise, physical activity and physical inactivity. Currently, the research focus is to examine the mechanisms by which physical activity levels and/or exercise modulate risk and development of obesity, type 2 diabetes, and overall metabolic and cardiovascular diseases using both animal models and human subjects, and to be able to translate the findings into the clinical or applied setting. Graduate students will receive training in laboratory research, seminar preparation, scientific writing, problem solving and grant writing. Graduate studies at the University of Missouri offer the advantage of interdisciplinary exercise research that is facilitated by numerous collaborations at the many research centers at MU. In addition, the Exercise Physiology research program collaborates closely with other units on campus including the Department of Biomedical Sciences in the Vet School, and the Departments of Internal Medicine and Medical Pharmacology and Physiology in the School of Medicine among others.

The Exercise Physiology Graduate Program offers a PhD degree. This exercise physiology degree is designed to prepare students for careers in exercise physiology or exercise physiology/nutrition. The curriculum has a scientific basis with core courses in exercise physiology, nutrition, biochemistry, and physiology. Teaching and research assistantships are available on a competitive basis.

**Graduate**

**PhD in Exercise Physiology**

**Degree Requirements**

The PhD program requires a minimum of 72 hours beyond the bachelor’s degree. A committee of 4 faculty members must approve all graduate courses, including those from other universities. The graduate course work includes 15 hours in exercise physiology, plus coursework in physiology, nutrition and biochemistry. Research requirements include NUTR_S 7500 (9 hours of research projects) and NUTR_S 9090 (12 hours dissertation). One semester of teaching experience is required, as is participation on a major external grant proposal. NUTR_S 8850 Advanced Exercise Physiology is used as your competency course and the student must earn a B or better. If the student has a similar course in their transfer courses from a masters, then another course will be used - this must be approved by the graduate director and committee.

Note: Specific Masters courses (36 hours maximum) may be counted on the doctoral program at the discretion of the student’s committee (3 members in dept., 1 member outside). Target ~ 72 hours beyond B.S.)

Sample Plan of Study

Because students in the PhD program are from a wide variety of circumstances, and pursue the PhD at different paces, a sample plan of study is not easily produced. Students are encouraged to work out their plan of study with their advisor.

Qualifying Process

NUTR_S 8850 Advanced Exercise Physiology is used as your competency course and the student must pass with the grade of B or better. If the student comes in with a master’s course similar to NUTR_S 8850, then another course can be used as the competency course and will be approved by the committee and graduate director (e.g. NUTR_S 8870 Exercise Metabolism).

Comprehensive Examination Process

Candidacy for a doctoral degree is established by passing the comprehensive examination. The comprehensive examination includes written and oral sections and is completed as the candidate is completing the prescribed coursework.

Dissertation Requirements

The dissertation must be written on a subject approved by the candidates doctoral program committee, must embody the results of original and significant investigation and must be the candidates own work. All dissertation defenses shall be open to the general faculty. For the dissertation to be successfully defended, the student’s doctoral committee must vote to pass the student on the defense with no more than one dissenting or abstaining vote.

Undergraduate

- BS HES in Human Development and Family Studies (p. 525)
  - with emphasis in Child Development and Education (p. 526)
  - with emphasis in Child Life Specialist (p. 527)
  - with emphasis in Family and Consumer Sciences Education (p. 528)
  - with emphasis in Family and Lifespan Development (p. 528)
  - Minor in Human Development and Family Studies (p. 529)

The Department of Human Development and Family Studies (HDFS) combines basic understanding of human development with preparation for professional service to individuals and families. Career opportunities are primarily found in human service agencies serving children, adolescents, older adults, parents and families. The human development and family studies major also prepares the student for graduate study in HDFS and related fields.

The department offers the BS HES with a major in Human Development and Family Studies. The student working with children and/or adults is encouraged to maximize the resources offered by the family. The student concerned with the quality of family life must also recognize the intricate spiral of changing needs in the developing individual. Students in the HDFS major must select one of the emphasis areas listed below. (Note: Emphasis areas appear on transcripts but not on diplomas.)

Graduate

Graduate Admission Contact Information
Ashlie Lester lestera@missouri.edu

573-882-1301

Director of Graduate Studies: Ashlie Lester

- MA in Human Development and Family Studies (p. 529)
  - with emphasis in Early Childhood Development (p. 530)
  - with emphasis in Family and Community Services (p. 530)
  - with emphasis in Family Studies (p. 531)

- MS in Human Development and Family Studies (p. 531)
  - with emphasis in Early Childhood Development (p. 532)
  - with emphasis in Family and Community Services (p. 533)
  - with emphasis in Family Studies (p. 533)

The College also offers a PhD in Human and Environmental Studies with an emphasis Human Development and Family Studies (p. 535). They also offer Graduate Certificates in the following related areas: Youth Development Specialist (p. 568), Youth Development Program Management and Evaluation (p. 568), Gerontology (p. 568), and Geriatric Care Management (p. 568).

The Department of Human Development and Family Studies offers Master of Arts (applied emphasis) and Master of Science (research emphasis; on-campus only) degrees. The MA and MS degrees prepare students for positions in junior college or college teaching and leadership in public and private human service institutions. The MS degree also provides research training toward the PhD degree.
Selected in 2002 and again in 2007 as the Most Outstanding Graduate Department on campus, we have a nationally recognized faculty whose research productivity consistently has been ranked in the top 5% of the 235 family studies programs across the country. Our department houses former journal editors as well as a past president of the National Council of Family Relations.

We have a well-established mentoring program, which begins as soon as the student is accepted into HDFS. We actively prepare our students to become successful academic scholars both in terms of research and teaching. The range of careers for which we prepare our students is unparalleled. Since 2000, our program has placed more faculty into research extensive family studies departments than any other program in the U.S. We also prepare PhDs and master’s students for applied careers in administration, program evaluation, and program development. Our alumni have positions with universities and colleges in the United States, Canada, and Korea. We have developed an outstanding reputation as a place to study individual and family diversity and multiculturalism across the life course. Because we define diversity and multiculturalism broadly, our focus is on the multitude of ways that individuals and families may differ, including, but not limited to race, ethnicity, socioeconomic status, age, family structure, nationality, geographic location, and sexual orientation.

Financial Aid from the Department

All applicants for the on-campus program are automatically considered for assistantships, fellowships, and other funding packages. Check the HDFS website or ask the program contact for additional details.

About the Master’s Degrees

The Department of Human Development and Family Studies offers Master of Arts (applied emphasis) and Master of Science (research emphasis; on-campus only) degrees. The MA and MS degrees prepare students for positions in junior college or college teaching and leadership in public and private human service institutions. The MS degree also provides research training toward the PhD degree.

Areas of Study

On-campus students selecting the MA or MS degree may specialize in family studies, child life, early childhood development, life span development, family mediation, human services program (emphasis in administration or policy), or a dual-degree program in HDFS and the School of Law. Online students may select an MA specializing in gerontology, youth development, or family and community services.

Master’s Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master’s degree is as follows:

- Family Studies: 36 hours
- Child Life: 30 (fast track) or 36 hours
- Early Childhood: 36 hours
- Life Span: 36 hours
- Human Services Administration: 36 hours
- Gerontology: 36 hours
- Youth Development: 36 hours
- Family and Community Services: 36 hours

- Dual MSorMA/JD: approximately 113 hours

About the PhD

The Department of Human Development and Family Studies PhD degree prepares students for careers in research, college or university teaching, or leadership positions in public and private human service institutions.

PhD Plan of Study

Students selecting the doctoral degree work with members of their doctoral committee to create an individualized plan of study tailored to their specific research interests. Over the course of their degree program all doctoral students are required to enroll in six credit hours of research practicum, three credit hours of teaching practicum, and complete coursework in theory, research methods, statistics, and their collateral area. In addition, all doctoral students complete a minimum of 12 credit hours of research for their dissertation. A sample plan of study can be found on the HDFS website (http://hdfs.missouri.edu/).

About the Online Certificate Programs

The Department of Human Development and Family Studies offers four online graduate certificates with specialization in youth development, youth development program management and evaluation, gerontology, and geriatric care management.

Note: Courses taken for any of the above certificate programs may be applied toward the related online MA degrees in youth development and gerontology. Up to 12 credits of coursework from the courses taken for any of the certificate programs may be applied toward their related online MA degrees described above.

For more information please follow the link to the certificate of interest (p. 567).

Undergraduate

BSHES in Human Development and Family Studies

Major Program Requirements

Majors in all of the emphasis areas in HDFS must complete the core courses below:

<table>
<thead>
<tr>
<th>Grade of 2.0 (C) or better required in these core classes:</th>
<th>Major Program Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Major Program Requirements</td>
<td>16</td>
</tr>
<tr>
<td>H_D_FS 1600 Foundations of Family Studies</td>
<td>3</td>
</tr>
<tr>
<td>H_D_FS 2200 Research Methods in Human Development and Family Studies</td>
<td>3</td>
</tr>
<tr>
<td>H_D_FS 2300 Multicultural Study of Children and Families</td>
<td>3</td>
</tr>
<tr>
<td>H_D_FS 2400 Principles of Human Development</td>
<td>4</td>
</tr>
<tr>
<td>H_D_FS 3420 Early and Middle Childhood</td>
<td>3</td>
</tr>
</tbody>
</table>

Child Development Laboratory Courses such as H_D_FS 3500, H_D_FS 3700, and H_D_FS 4971 have prerequisites and require the consent of the instructor. Students must have full HDFS status. Because enrollment is limited, students must see the HDFS advisor to be placed on the waiting list a minimum of two semesters before anticipated enrollment. Students in Families and Lifespan Development may substitute another practicum experience with consent of department advisor.
In addition to the required courses, the degree program is completed with courses selected from within the department, from other areas in the College of Human Environmental Sciences, and from the social sciences and allied professional fields such as education, recreation, business and health. For some students, courses in the arts, humanities, or biological sciences may be appropriate.

BSHES in Human Development and Family Studies with Emphasis in Child Development and Education

Major Program Requirements

This emphasis is designed to prepare graduates for positions of responsibility and leadership in public and private preschool programs, child-care centers, infant-care programs, after-school programs and other educational and social service settings that serve families and children. Additional job opportunities include group homes, shelters, child care and provider training agencies, Parents as Teachers, and YMCA/YWCA.

The general goal of the emphasis area is to provide instruction and experience to help students gain competence in working with young children and their families. The emphasis is on understanding human development, with primary focus on child development, early childhood education, and children’s relationships with family members. Attention is also devoted to the development of working relationships with professional colleagues and community workers.

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Total Credits: 123-127
BSHES in Human Development and Family Studies with Emphasis in Child Life Specialist

Major Program Requirements

This emphasis prepares graduates to provide for the social-emotional needs, and support the optimum growth and development of children and their families in a variety of health care settings. Child life specialists use therapeutic play, psychological preparation, and coping skills interventions to help reduce the anxiety and stress related to illness, disability, hospitalization and medical procedures. Through a family-centered care approach, they provide parents and other family members reassurance and emotional support, help them understand children’s psychosocial needs, and provide tools to help them minimize psychological trauma.

Courses focus on understanding normal and exceptional child and family development, effective methods of working with children and families, as well as integration of theory and research into hands-on clinical practice experiences (evidence-based practice). Students who successfully complete the degree program should be well prepared to take the Child Life Professional Certification Exam presented by the Child Life Council Certification Committee. The student’s last semester is spent outside Columbia in a 480-clock-hour (minimum) clinical internship in a pediatric hospital setting.

This academic emphasis requires that students successfully complete child life volunteer, practicum, and clinical education experiences in child life. Students must also pass mandatory drug screens, criminal background checks, immunizations, and student professional liability insurance. Students must provide proof of health insurance, up-to-date needs, and support the optimum growth and development of children and their families in a variety of health care settings. Child life specialists use therapeutic play, psychological preparation, and coping skills interventions to help reduce the anxiety and stress related to illness, disability, hospitalization and medical procedures. Through a family-centered care approach, they provide parents and other family members reassurance and emotional support, help them understand children’s psychosocial needs, and provide tools to help them minimize psychological trauma.

Courses focus on understanding normal and exceptional child and family development, effective methods of working with children and families, as well as integration of theory and research into hands-on clinical practice experiences (evidence-based practice). Students who successfully complete the degree program should be well prepared to take the Child Life Professional Certification Exam presented by the Child Life Council Certification Committee. The student’s last semester is spent outside Columbia in a 480-clock-hour (minimum) clinical internship in a pediatric hospital setting.

This academic emphasis requires that students successfully complete child life volunteer, practicum, and clinical internship experiences to attain this degree, as well as be eligible to take the national Child Life Certification Exam to obtain the CCLS credential. Clinical education sites require that students provide proof of health insurance, up-to-date immunizations, and student professional liability insurance. Students must pass mandatory drug screens, criminal background checks, and any other additional qualification checks prior to beginning any clinical education experience in child life.

Failure to provide appropriate documentation, or pass drug screens and criminal background checks prior to the beginning of these experiences may result in dismissal from the child life degree program in HDFS. The student is responsible for all costs incurred with these qualification checks.

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below. All courses in sections A-B below are required.

** Student must earn 2.00 (C) or better in course.

*** Students are admitted to H_D_FS 4130 on a competitive, space-available basis. Interview applications are considered the semester before the student wishes to take H_D_FS 4130. Student must have attained a 3.0 CUM GPA to be eligible to interview, in addition to completing coursework requirements. See advisor for more information.

**** Students are admitted to H_D_FS 4993 after successful completion of H_D_FS 4130 (grade of 3.0 or higher). Students must be selected by hospitals outside of Columbia through a student initiated competitive application process.

***** Should be completed prior to end of sophomore year.

BSHES in Human Development and Family Studies with Emphasis in Family and Consumer Sciences Education

Major Program Requirements

This emphasis prepares graduates for certification to teach family and consumer sciences from birth to grade 12 in public schools. The program combines courses in the human sciences with courses in teacher preparation from the College of Education. This academic emphasis requires that students successfully complete field experiences and a student teaching internship. Public schools require that students provide proof of up-to-date immunizations and professional liability insurance. Criminal background checks and other qualifications may be required depending on the school.

Due to changes from the Missouri Department of Elementary and Secondary Education (DESE) that affect certification beginning in 2017, new students are not being accepted into this program at this time.

Semester Plan

There is not a semester plan built for this emphasis area.

BSHES in Human Development and Family Studies with Emphasis in Family and Lifespan Development

Major Program Requirements

Courses required for Certified Family Life Educator can be found at http://hdfs.missouri.edu/current.html under the CFLE Certification information.

Students must complete all university requirements, including general education (p. 18), in addition to the degree requirements below.

</tr>
</tbody>
</table>

*Some exceptions are made*
Minimum GPA: 3.0 for last 60 hours

Required Application Materials for Campus Programs (submitted online via the applyyourself system)

- Application form
- 3 letters of recommendation from people who can speak to applicant’s potential to do graduate work (e.g., professors, advisors).
- GRE score (and TOEFL score for international applicants)
- Personal statement
- Resume or Curriculum Vitae
- Official Transcripts

Admission Criteria for Online Programs

- No Admission Deadlines (We guarantee processing of complete applications received at least two months prior to the beginning of the expected term of admission. This will give admitted students adequate time to enroll in coursework.)
- Minimum GPA: 3.0 for last 60 hours

Required Application Materials for Online Programs

Submit online via the applyyourself system

- Application form
- 3 letters of recommendation from people who can speak to applicant’s potential to do graduate work (e.g., professors, advisors).
- Personal statement
- Resume or Curriculum Vitae
- Official Transcripts

Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master’s degree is as follows:

- Family Studies: 36 hours
- Child Life: 30 (fast track) or 36 hours
- Early Childhood: 36 hours
- Life Span: 36 hours
- Family Mediation: 36 hours
- Human Services: 36 hours
- Gerontology: 36 hours
- Youth Development: 36 hours
- Family and Community Services: 36 hours
- Dual MSorMA/JD: approximately 113 hours Research

Based on their chosen degree option and whether they are pursuing the MS or MA degree, master’s students may write a thesis (H_D_FS 9090), complete a project (H_D_FS 8972), or do an internship (H_D_FS 8972) for up to six credit hours. The thesis requires testing a hypothesis or exploring a research question. The project option is no less scholarly than a thesis, but usually has an applied focus. For instance, a project may involve designing a program and developing curriculum materials (e.g., instructional videotapes, websites, resource manuals). Internships are often conducted off-campus and must be negotiated with the student’s advisor and approved by the student’s faculty committee. Students who wish to pursue the thesis option must petition the department’s graduate faculty for approval. Students completing a thesis earn a Master of Science degree. Those completing a project or internship earn the Master of Arts. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student’s program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department’s description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Time Limits for Masters’ Degree Completion

Students working toward the master’s degree have 5 years from the semester the first course is taken in which to complete all degree requirements. Extensions for one additional year to complete the degree may be granted with submission of a detailed plan for completion, including a timetable. Students must be making progress toward completion when they apply for the extension. A maximum of two extensions may be granted.

MA in Human Development and Family Studies with emphasis in Early Childhood Development

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

For admission requirements, refer to the Graduate School’s website for the minimum qualifications for the degree program (http://gradschool.missouri.edu/academics/programs) and the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

MA in Human Development and Family Studies with emphasis in Family and Community Services

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master’s degree is as follows:

• Family Studies: 36 hours
• Child Life: 30 (fast track) or 36 hours
• Early Childhood: 36 hours
• Life Span: 36 hours
• Family Mediation: 36 hours
• Human Services: 36 hours
• Gerontology: 36 hours
• Youth Development: 36 hours
• Family and Community Services: 36 hours
• Dual MSorMA/JD: approximately 113 hours Research

Based on their chosen degree option and whether they are pursuing the MS or MA degree, master’s students may write a thesis (H_D_FS 9090), complete a project (H_D_FS 8090), or do an internship (H_D_FS 8972) for up to six credit hours. The thesis requires testing a hypothesis or exploring a research question. The project option is no less scholarly than a thesis, but usually has an applied focus. For instance, a project may involve designing a program and developing curriculum materials (e.g., instructional videotapes, websites, resource manuals). Internships are often conducted off-campus and must be negotiated with the student’s advisor and approved by the student’s faculty committee. Students who wish to pursue the thesis option must petition the department’s graduate faculty for approval. Students completing a thesis earn a Master of Science degree. Those completing a project or internship earn the Master of Arts. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Research

Based on their chosen degree option and whether they are pursuing the MS or MA degree, master’s students may write a thesis (H_D_FS 9090), complete a project (H_D_FS 8090), or do an internship (H_D_FS 8972) for up to six credit hours. The thesis requires testing a hypothesis or exploring a research question. The project option is no less scholarly than a thesis, but usually has an applied focus. For instance, a project may involve designing a program and developing curriculum materials (e.g., instructional videotapes, websites, resource manuals). Internships are often conducted off-campus and must be negotiated with the student’s advisor and approved by the student’s faculty committee. Students who wish to pursue the thesis option must petition the department’s graduate faculty for approval. Students completing a thesis earn a Master of Science degree. Those completing a project or internship earn the Master of Arts. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student’s program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department’s description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Time Limits for Masters’ Degree Completion

Students working toward the master’s degree have 5 years from the semester the first course is taken in which to complete all degree requirements. Extensions for one additional year to complete the degree may be granted with submission of a detailed plan for completion, including a timetable. Students must be making progress toward completion when they apply for the extension. A maximum of two extensions may be granted.

MS in Human Development and Family Studies with emphasis in Early Childhood Development

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

For admission requirements, refer to the Graduate School’s website for the minimum qualifications for the degree program (http://gradschool.missouri.edu/academics/programs) and the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Human Environmental Sciences Extension Specialist

A student who plans to be an extension specialist may choose a subject-matter area of interest. In addition, a master's degree in a subject-matter area generally is required in Missouri.

The student must fulfill the requirements for the chosen major while pursuing the extension objective. Additional electives can be chosen from such areas as adult education, communications and the social sciences.

Faculty

Millsap Professor G. Carlo**

Curator's Professor M. Coleman**

Assistant Teaching Professor M. Goldschmidt*, S. L. Green-Ivey, F. Palermo, C. Reeser*

Assistant Research Professor M. Herzog*

Professor Emeritus R. Helmick*, K. Thornburg*

Instructor R. Law, AFC

Associate State Personal Finance Specialist B. Procter, L. Schrader, A. Zumwalt

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in human environmental sciences, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

137 Stanley Hall

Required Application Materials

To the Graduate School:
- All required Graduate School documents.
- Statement of graduate goals and educational objectives discussing which of the department's emphasis areas of interest; intentions regarding PhD; and request for a specific adviser (upload to online application).

To the Architectural Studies Program:
- 3 letters of recommendation (excluding MU Architectural Studies faculty). Can be uploaded to the online Graduate School application.

Doctor of Philosophy

The Doctor of Philosophy (PhD) degree is designed for individuals who are interested in acquiring the knowledge and skills that are needed to conduct substantive, innovative, and original research that contributes to the theoretical and methodological foundation of architecture and interior design, and the dissemination of this research through teaching, publication, and practice. To this end, the curriculum is structured so that students move gradually from overview of architectural research to the identification and pursuit of major and minor areas of specialization and, finally, to highly specialized original dissertation research. This framework promotes stimulating intellectual discourse among individuals with varying research philosophies and interests.

Both faculty and students interact within this framework to develop an enhanced understanding of how specialized research contributes to the definition and evolution of an improved theoretical and methodological basis for architectural studies.

In order to pass examination, and thus qualify as the basis for the award of the PhD degree, the dissertation should have the following attributes:
The research-based plan of study leads to the written doctoral dissertation. The dissertation is distinctive because it demonstrates the ability to conceive of and execute scholarly research, and it makes a contribution of new knowledge to the discipline. Research is conducted in one of the two interest areas — environment and behavioral studies or design with digital media. Specific course work is chosen based on subject matter and the type of research method selected—quantitative, qualitative or a combination of both.

PhD students must complete a final oral examination by an approved faculty committee and submit a presentation proposal at a professional conference or a manuscript in a professional journal.

• Official Transcripts
General Information

Students selecting the doctoral degree work with members of their doctoral committee to create an individualized plan of study tailored to their specific research interests. Over the course of their degree program, all doctoral students are required to enroll in six credit hours of research practicum, three credit hours of teaching practicum, and complete coursework in theory, research methods, statistics, and their collateral area. In addition, all doctoral students complete a minimum of 12 credit hours of research for their dissertation. A sample plan of study can be found on the HDFS website (http://hdfs.missouri.edu/).

Qualifying Process for Doctoral Students

To be officially admitted to the HDFS doctoral program, students generally must have completed a master’s degree in HDFS or a related field, although exceptions are granted.

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student’s program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department’s description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

PHD Comprehensive Matriculation Exam

The comprehensive exam consists of two parts. Part I involves an in-house written and oral examination over

1. theory, methods, and statistics,
2. the student’s area of specialization and core content, and
3. the student’s collateral area.

The advisor is responsible for collecting questions from all five committee members, constructing the exam, and getting approval for the final version of the exam from available committee members. It is expected that the written exam will take the student no longer than 8 hours (e.g., two half-days or one full day) to complete. The written exam will be assessed by the committee and the student will meet with the committee for an oral defense of the written exam. If this part of the exam is passed, the student moves to Part II of the comprehensive exam, which involves writing a grant pre-proposal and, if approved, a full grant proposal as outlined in the HDFS Graduate Handbook. For a detailed description of the comprehensive exam timeline please refer to the Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Admission to Candidacy

After students pass Parts I and II of the comprehensive examination, they complete the D3 form to apply to the Division of Graduate Studies for admission to doctoral candidacy. Following admission to candidacy, students complete a prospectus for the dissertation project. The prospectus includes a pertinent review of the literature, statement of the problem, the purpose of the proposed study, description of the research design, and discussion of the specific means by which the data will be analyzed. Subsequently, the dissertation committee will meet to evaluate, request revisions to, and approve the student’s dissertation prospectus.

Time Limits on Degree Completion

A graduate degree represents current knowledge of the field as of the date the degree is granted. Limitations have therefore been set regarding the number of years to finish the degree. Doctoral students have 6 years in which to complete degree requirements. The clock starts at the year that the first class beyond the master’s degree is taken. The comprehensive exam must be completed no later than by the end of the fourth year of study. HDFS doctoral students have only three years after passing the comprehensive examination to complete the doctoral degree.

Petitions for Extension

On petition of the candidate, an extension of 1 year may be granted by the HDFS graduate faculty. The student may petition for no more than two one-year extensions. Therefore, a doctoral student may have no more than 5 years, including two one-year extensions, to complete the doctoral degree after passing the comprehensive exam. On petition of the candidate and the candidate’s department, an extension of this time limit may be granted by the Graduate School.

PhD in Human Environmental Sciences with Emphasis in Personal Financial Planning

College of Human Environmental Sciences
239 Stanley Hall
573-882-9343
http://pfp.missouri.edu/

The doctoral program is designed to develop skill in the evaluation and generation of research that advances the disciplines engaged in Personal Financial Planning, such as Personal Finance, Family Economics, Consumer Economics, Corporate Finance, Law, among others. This program prepares students for careers in university research and teaching, government, Extension, or public policy evaluation.

MS in Nutrition and Exercise Physiology

The MS is Nutrition and Exercise Physiology has two emphasis areas. Please see the emphasis area pages in Nutritional Sciences (p. 539) and in Exercise Physiology (p. 538) for degree information.

MS in Nutrition and Exercise Physiology with emphasis in Exercise Physiology

About the Program

The graduate program in Nutrition and Exercise Physiology is designed to provide advanced training in both the basic and applied aspects of exercise, physical activity and physical inactivity. Currently, the research focus is to examine the mechanisms by which physical activity levels and/or exercise modulate risk and development of obesity, type 2 diabetes, and overall metabolic and cardiovascular diseases using both animal models and human subjects, and to be able to translate the findings into the clinical or applied setting. Graduate students will receive training in laboratory research, seminar preparation, scientific writing, problem solving and grant writing. Graduate studies at the University of Missouri offer the advantage of interdisciplinary exercise research that is facilitated by numerous collaborations at the many research centers at MU. In addition, the Exercise Physiology research program collaborates closely with other units on campus including the Department of Biomedical Sciences in the Vet School, and the Departments of Internal Medicine and Medical Pharmacology and Physiology in the School of Medicine among others.

Exercise physiology faculty seek to develop new knowledge in the area of exercise training, exercise metabolism, and obesity. The current focus of the program is physical inactivity, exercise and nutrition strategies for weight management and the prevention of lifestyle related diseases. The mission of the Exercise Physiology Graduate Program is to train graduate students who will provide professional leadership and research developments in areas of human health and sports conditioning.

The curriculum has a scientific basis with core courses in exercise physiology, nutrition, biochemistry, and physiology. Exercise physiology research emphasizes human studies, but other exercise models are available on campus, including the pig (Vet. Biomedical Sci.) and the rat (Medical School and VA).

Degree Requirements

Students in Nutrition and Exercise Physiology emphasis will choose between two options for final completion: thesis or internship. The
course curriculum will be the same for both options. Students will complete a minimum of 36 credits of graduate coursework beyond the bachelor’s degree. For a full explanation of the thesis/non-thesis options, see section below on Thesis/Non-Thesis Requirements (p. 539) or view the information on the programs website: http://ns.missouri.edu/exphyma.html.

Prerequisites courses for the program are a B or better in General Chemistry, Physiology, Human Anatomy, Kinesiology and Physiology of Exercise. Biochemistry, Organic Chemistry and Nutrition are recommended.

Select to give 36 hours total

**Thesis/Non-Thesis Requirements**

1. **Internship Option**

This option is oriented toward improving a practitioner’s professional proficiency in the applied aspects of exercise physiology. The program of study will include courses and learning experiences that will develop the student’s knowledge in the theoretical aspects of exercise physiology. They will be required to complete an approved internship (300 hours minimum) which will provide them with experience in an applied or clinical setting. The student is responsible for identifying and securing the internship. Students selecting this option will graduate with the same preparation for credentialing from organizations including the American College of Sports Medicine (ACSM) and the National Strength and Conditioning Association (NSCA). Completion of this degree as well as obtaining certification will prepare students for careers such as registered clinical exercise physiologists, strength and conditioning coaching, personal trainer or wellness coach, health/fitness instructor, as well as in other health professions.

2. **Thesis Option**

This option is research-oriented, focusing on designing and conducting research in exercise physiology. The program of study will include courses and learning experiences that will maximize a student’s progress in developing lab skills and critical thinking that will enable the student to continue his/her education in a research-oriented area. The thesis option requires a minimum of 36 hours of graduate credit. A written thesis, based upon original research, that is the student’s own work and that demonstrates a capacity for research and independent thought is required. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

**Admissions**

**Exercise Physiology Program Applicants** must have a 3.0 undergraduate GPA and competitive GRE scores to apply. TOEFL scores are required from international applicants. Entering MS students are expected to have a B or better in undergraduate training in biology, chemistry, anatomy/physiology, and exercise physiology. It is also advantageous to have nutrition, biochemistry and organic chemistry, but not required. Courses should be taken at an accredited institution.

Applications to our graduate programs should be submitted by December 30th. While applications received after that date will still be considered, there is no guarantee that we will have space for additional students. Admission at the beginning of spring semester is possible, but limited.

Complete instructions on the application process can be found on the programs website: http://ns.missouri.edu/graduate_apply.html

**MS in Nutrition and Exercise Physiology with emphasis in Nutritional Sciences**

**About the Program**

The Nutritional Sciences Graduate Program provides training in the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition: general research skills; structure and biochemical and metabolic functions of nutrients and other dietary constituents; food, diets, and supplements; nutritional status assessment; nutrition and disease; nutrition interventions and policies; and, analytical skills. Graduate students also receive training in laboratory research, seminar preparation and delivery, scientific writing, problem solving and research grant
writing. Graduate study in Nutritional Sciences at the University of Missouri offers the advantage of interdisciplinary nutrition research that is facilitated via the many research centers at MU, including Food for the 21st Century (F21C), the Botanical Center, the Life Sciences Center and MU Nutritional Center for Health (MUNCH). The graduate program is administered by the Department of Nutrition and Exercise Physiology in association with the College of Human Environmental Sciences, the College of Agriculture, Food and Natural Resources, and the School of Medicine.

Degree Requirements

The program consists of a total of 30 hours of credit beyond the bachelor’s degree, of which 15 credits must be at the 8000 or 9000 level; no more than 40 percent of the 30-hour credit requirement can be satisfied by a combination of special investigations, Research, Readings and/or Problems courses. The master of science degree is awarded in part for the completion of a thesis. The thesis is based upon original research, that is student’s own work and that demonstrates a capacity for research and independent thought is required. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

The minimum department course requirements for the master of science degree are:

Thesis/Non-Thesis Requirements

The M.S. program in Nutritional Sciences only offers a thesis option.

Students earning this degree must provide a written thesis, based upon original research, that is student’s own work and that demonstrates a capacity for research and independent thought. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BSHES in Nutritional Sciences (p. 542)
  - with emphasis in Medical Dietetics (p. 542)
  - with emphasis in Nutrition and Fitness (p. 543)
  - with emphasis in Nutritional Sciences (p. 544)
- Minor in Nutritional Sciences (p. 545)

The program leading to the BS in Human Environmental Sciences with a major in Nutritional Sciences offers designated emphasis areas in medical dietetics, nutrition and fitness, and nutritional sciences. A minor is also available in nutritional sciences. The department administers graduate programs in nutrition and exercise physiology, nutritional sciences and exercise physiology.

Students who want to explore the major can take NUTR_S 1034 Nutrition, Current Concepts and Controversies or NUTR S 1340 Introduction to Exercise and Fitness.

The department has a set GPA requirement for students entering each program. The specific requirements can be found on our department website http://ns.missouri.edu

Dietetics - This is a Professional Program. Admission is competitive and application requirements include a minimum cumulative grade point average of 3.2 on a 4.0 scale and completion of (or in progress at the time of application) the following prerequisite courses: 15-20 hours of general education requirements, human physiology with laboratory, organic chemistry with laboratory, biochemistry, basic nutrition with physiology and chemistry prerequisites, and food preparation with chemistry prerequisite.

Nutrition and Fitness - students may transfer into the program as pre-N&F, but will be unable to take the upper level courses until they advance into the program. To advance, a student must earn a minimum 2.65 CUM GPA after 30 credit hours, including completion of CHEM 1320, BIO_SC 1010/BIO_SC 1020 or BIO_SC 1500 , MATH 1100 or equivalent, NUTR_S 1340 and Physiology (MPP 3202 or MPP 3333 /MPP 3337 ) or Anatomy (PTH_AS 2201 ). These classes require a C or better.

Nutritional Sciences (pre_Med)- To transfer into the Nutritional Sciences Program, students are required to have a minimum GPA of 2.65 and be enrolled in at least one required biology, chemistry, physics, or biochemistry course to be eligible.

Graduate

Information on our graduate degrees can be found under the following listings:

Nutrition Area Program (p. 656) (PhD)
Nutrition and Exercise Physiology (p. 538) (MS)
Exercise Physiology (p. 522) (PhD)

The catalog provides a complete list of degree options (p. 5) at the University of Missouri.

Undergraduate
BSHES in Nutritional Sciences

Major Program Requirements

The BSHES in Nutritional Sciences is offered with three emphasis options: Medical Dietetics, Nutrition and Fitness, and Nutritional Sciences. All degree requirements are listed at the emphasis level.

Semester Plan

Refer to the Semester Plans in the emphasis areas.

BSHES in Nutritional Sciences with Emphasis in Medical Dietetics

Major Program Requirements

The Coordinated Program in Dietetics combines academic course work with supervised practice in healthcare and other practice settings. Enrollment is limited to a maximum of 15 students per year. To apply, students must have completed (or be enrolled in) prerequisite courses and have a GPA of at least 3.2. Students must achieve a course grade of "B-" or better in BIOCHM 3630 and NUTR_S 2340 or equivalent transfer courses approved by faculty.

Graduates are eligible to take the Registration Examination for Dietitians, which is required to obtain the RD (Registered Dietitian) or RDN (Registered Dietitian Nutritionist) credential. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics. For additional information, please go to http://ns.missouri.edu/.

Students must complete all university requirements, including general education (p. 18), in addition to the degree requirements below.

BSHES in Nutritional Sciences with Emphasis in Nutrition and Fitness

Major Program Requirements

Graduates of this program are prepared for employment in fitness and community nutrition or to continue in graduate studies in a variety of areas, including exercise science. Many students move into the health professions fields from this degree or seek out additional certifications. This is a rapidly expanding area with opportunities in corporate and commercial industries, government and non-profit sectors. Typical employment responsibilities include fitness assessment, nutrition education, health and wellness, exercise supervision and program administration.

Students desiring to declare Nutrition and Fitness as a major are required to have earned a minimum overall GPA of 2.65 after 30 credit hours, including completion of the following courses or their equivalents with a minimum grade of “C”:

Prior to achieving these requirements, students will be considered “Pre-Nutrition and Fitness” and are not eligible to take upper-level Nutrition and Fitness courses. Students must complete all university requirements, including general education (p. 18), in addition to the degree requirements below.

BSHES in Nutritional Sciences with Emphasis in Nutritional Sciences

Major Program Requirements

This program of study provides a strong foundation in science with a focus on human nutrition. Graduates are prepared for advanced study in human nutrition, medicine, dentistry or other health-related careers. This program is an excellent choice for pre-dental or pre-medicine students.

To transfer into the nutritional sciences program, students are required to have a minimum overall GPA of 2.65 and be enrolled in at least one required biology, chemistry, physics, or biochemistry course or one required NUTR_S course.

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Minor in Nutritional Sciences

The minor in nutritional sciences is intended for students majoring in biological sciences, biochemistry, health and exercise sciences or related fields.

Minor core requirements consist of a minimum of 15 hours of nutrition (not exercise/fitness) courses, including NUTR_S 2340: Human Nutrition I (this class is only offered in the spring semester) plus 12 hours from the list of approved nutrition courses.

**Minor core requirements**

Graduate
Personal Financial Planning Graduate Programs
College of Human Environmental Sciences
239 Stanley Hall
573-882-9343
http://pfp.missouri.edu/

Director of Graduate Studies: Rui Yao
• MS in Personal Financial Planning (p. 550)
  • with emphasis in Consumer and Family Economics (p. 550)
  • with emphasis in Personal Financial Planning (p. 551)
• Certificate in Personal Financial Planning (p. 551)

The College also offers a PhD in Human Environmental Sciences with an emphasis in Personal Financial Planning (p. 536).

Individuals and families today bear an ever-growing responsibility for achieving and sustaining financial and economic success across their life span. Never has there been a greater need for well-trained professionals who can help individuals and families make informed and effective financial and economic decisions. In addition, research that helps to evaluate and recommend public policies that influence the economic opportunities and futures of individuals and families is in high demand.

Graduate course work in Personal Financial Planning at the University of Missouri analyzes household and consumer economic conditions and behavior, evaluating the interrelationships between households and markets with a focus on improving social policy. Students’ programs are designed to develop professional competencies and interests. A resident doctoral and two masters programs are available. Online graduate offerings may be viewed at http://pfp.missouri.edu/graduate_distance.html.

Certification Information
Degrees registered with the Certified Financial Planner Board of Standards Inc. include: a graduate Certificate in Personal Financial Planning and an Applied Master’s Degree. There is also a registered graduate certificate leading to the CFP® certification examination.

Financial planning course work could also be completed as a doctoral program that is registered with the Certified Financial Planner Board of Standards Inc.

Financial Aid
If you wish to be considered for internal assistantships, fellowships or other funding packages, check the program website or contact the director of graduates studies, Rui Yao (yaor@missouri.edu) for details.

Faculty Areas of Study
Students have opportunity to work closely with department faculty who are widely recognized professionals in various aspects of personal financial planning and consumer and family economics. Faculty research
interests cover a broad spectrum of financial and economic issues, including, but not limited to college savings and affordability, retirement savings, health care financing, risk analysis, labor supply and household production choices, consumer behavior, consumer expenditure patterns, consumer credit use, insurance demand, and low-income financial literacy. More information is available at: http://pfp.missouri.edu/research.html.

Semester Plan
A sample plan of study has not been designed for this major. Students should contact the academic department for assistance with academic planning.

BSHES in Personal Financial Planning with Emphasis in Financial Counseling

Major Program Requirements
This emphasis prepares students to be financial counselors. Financial counselors require expertise in a variety of financial counseling and planning strategies, therefore students take a mix of classes in financial counseling, financial planning, human development and family studies (HDFS) and social work. This emphasis satisfies the academic requirements for the Accredited Financial Counselor (AFC) designation and allows the graduate to sit for the AFC exam, which is offered by the Association for Financial Counseling and Planning Education (AFCPE). Graduates must complete education requirements, pass the AFC exam, obtain professional experience and agree to adhere to the AFCPE code of ethics before being able to use the AFC mark.

Students must complete all university requirements, including general education (p. 18), major core requirements and social and behavioral sciences requirements (p. 547), in addition to the degree requirements for the professional specialization below.

Minor in Personal Financial Management Services

This minor is intended for majors other than Finance and Agricultural Economics.

Required Courses:
- FINPLN 2083 Financial Planning Careers 1
- FINPLN 2183 Personal and Family Finance 3
- FINPLN 3283 Financial Planning: Computer Applications 3
- FINPLN 4387 Consumer and Household Economics 3

Choose at least two of the following:
- FINPLN 3282 Financial Counseling
- FINPLN 4187 Tax Planning
- FINPLN 4380 Assessing the American Dream
- FINPLN 4382 Financial Planning: Risk Management
- FINPLN 4383 Financial Planning: Investment Management

Total Credits 16

Minor in Personal Financial Planning for Agriculture Economics majors

Students can minor in Personal Financial Planning to complement their degrees in journalism, business, arts and science or other disciplines that provide expertise in matters related to personal financial management. A specific agreement exists with the Department of Agricultural Economics allows students from those departments to complete a particular set of courses and be awarded a minor in Personal Financial Planning that, upon completion, allows them to sit for the CFP® certification examination.

Minor in Personal Financial Planning
- FINPLN 2083 Financial Planning Careers 1
- FINPLN 2183 Personal and Family Finance 3
- FINPLN 3283 Financial Planning: Computer Applications 3
- FINPLN 4387 Consumer and Household Economics 3

Choose at least one of the following:
- FINPLN 4382 Financial Planning: Risk Management
- FINPLN 4383 Financial Planning: Investment Management

Total Credits 13

Majors Incorporating the Personal Financial Planning Minor

These minors, when combined with appropriate courses in the major, create a CFP® Board Registered degree option. Please see a faculty advisor for details.

Graduate
MS in Personal Financial Planning

Degree Information

Master of Science (thesis option)

The thesis-based Master of Science program requires a minimum of 30 hours. Course work focuses on critical analysis of the interaction of the household sector with the markets for labor, consumer goods and financial products. Emphasis is placed on developing analytical skills. Course work culminates in a master’s thesis.

Five-Year Bachelor of Science/Master of Science Option

The curriculum of this 150-Hour Program provides students with a comprehensive background in financial planning procedures and practice, meeting the Certified Financial Planner Board of Standards’ education requirement, allowing a student to sit for the CERTIFIED FINANCIAL PLANNER™ exam. Coursework encompasses root disciplines of economics, mathematics, and statistics and focuses on the interaction between the household and the financial sector. Students will acquire a broad background in business related courses, as well as skills in communication, professional practice, and use of computer information systems.

Applied Master of Science (non-thesis option)

The Applied Master of Science is a 36 hour program. Course work is designed to complete the education required to sit for the national CERTIFIED FINANCIAL PLANNER™ exam and to broaden the practitioner’s understanding of the various factors that can affect and enhance a client’s financial security and economic well-being. Coursework culminates in a creative component, providing students an opportunity to integrate theory and practice in exploring or resolving issues related to personal financial planning. (This degree is also available via distance education through the Great Plains IDEA group. Note, the Great Plains IDEA degree option also requires 36 hours to complete. Please see http://pfp.missouri.edu/graduate_distance.html for more information.)

• Résumé

MS in Personal Financial Planning with emphasis in Consumer and Family Economics

Degree Requirements

Please review the Resident Research and Policy Master’s Degree Program Handbook or the Resident Applied Master’s Degree Program Handbook. (http://pfp.missouri.edu/documents/graduate/Applied_MS_handbook.pdf)

Sample Plan of Study

Each student’s plan of study will vary to some degree, depending on the specific program and the student’s background, needs, and career plans. Please review the Resident Research and Policy Master’s Degree Program Handbook or the Resident Applied Master’s Degree Program Handbook.

Thesis/Non-Thesis Track

The resident Research and Policy Master of Science track prepares students for college teaching, consumer research positions, social service agencies, extension or other adult education programs, financial services institutions, consumer journalism and other positions in business, the public sector and not-for-profit institutions. Studies culminate in a research-based thesis that may either have a theoretical or applied focus. This masters degree also prepares students for subsequent work on a doctoral degree.

Acceptance to this program requires GRE or GMAT scores that meet department standards. This program requires a minimum of 30 hours to complete.

Download the Resident Research and Policy Master’s Degree Program Handbook.

The resident Applied Master of Science is for students who view the MS as their terminal degree and plan to work as a financial services professional following graduation. The Applied MS focuses on understanding issues and solving practical problems in the financial services industry. An industry-relevant capstone research project, rather than a thesis, is required for graduation.

Acceptance to this program requires GRE or GMAT scores that meet department standards. The Applied Master’s program is a non-thesis 36-hour program. This program is registered with the Certified Financial Planner Board of Standards, Inc. and is designed to prepare students to sit for the CFP® exam.

Download the Resident Applied Master’s Degree Program Handbook.
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Personal Financial Planning program (http://gradschool.missouri.edu/academics/programs/personal-financial-planning/masters.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

MS in Personal Financial Planning With Emphasis in Personal Financial Planning

Degree Requirements

Please review the Resident Research and Policy Master’s Degree Program Handbook or the Resident Applied Master’s Degree Program Handbook. (http://pfp.missouri.edu/documents/graduate/Applied_MS_handbook.pdf)

Sample Plan of Study

Graduate Certificate in Personal Financial Planning

The Personal Financial Planning Certificate is an 18 hour non-degree, post-baccalaureate program designed to prepare students to sit for the national CERTIFIED FINANCIAL PLANNER™ exam.

Program applicants must have completed a bachelor’s degree. Completing the Personal Financial Planning Certificate satisfies the Certified Financial Planner Board of Standard’s education requirement, which is one of four requirements leading to approval to use the CFP® designation. The other three requirements are passing the national exam, meeting an experience requirement and agreeing to adhere to the CFP® code of ethics. The CERTIFIED FINANCIAL PLANNER™ designation is widely recognized as the premier professional designation in the personal financial management services industry. (This certificate is also available via distance education through the Great Plains IDEA group. Please see http://pfp.missouri.edu/graduate_distance.html for more information.)

Undergraduate

BSW in Social Work (p. 554)
Social work is a dynamic and growing human service profession that plays an increasingly important and visible role in our everyday lives. The major educational objective of the undergraduate program in the School of Social Work, which is a unit in the College of Human and Environmental Sciences, is to prepare students for competent and skillful first-level professional social work practice.

The Bachelor of Social Work (BSW) professional program is built upon a rigorous liberal arts foundation that prepares students for general practice in social work. Within this framework, students are prepared to apply a configuration of knowledge, values and skill to a variety of individual, family and community problems to effect positive change.

The School of Social Work is accredited by, and a charter member of, the Council on Social Work Education. BSW students and graduates are eligible for membership in the National Association of Social Workers.

Departmental Honors
Candidates for departmental Honors must be students in the BSW professional program with a 3.5 or higher GPA. The student must complete honors designated sections of SOC_WK 4951 Research for Social Work Practice, SOC_WK 4952 Research Methods for Social Work, and SOC_WK 4971 Undergraduate Field Practicum - Honors section.

To be considered the applicant must have 30 graded MU cumulative hours.

The student must submit his/her application.

The student must submit a personal statement from outlined questions presented by the BSW Faculty.

Students are rated by Faculty and accepted or denied based upon the presented information.

The BSW Field Instructor, Faculty and Student identify early the Field Placement site, Learning Agreement that he/she will complete while in their field placement. The Learning Agreement will identify strategic research information that the student will compile for the agency to utilize in the future.

The student will complete these outlined research criteria within the 400 clock hours learning plan for his/her field placement.

Career & Employment Outlook
Jobs in social work are expected to grow faster than average into the 21st century. Through social work’s unique person-in-environment focus, BSW graduates are prepared to work effectively with individuals, families, small groups, communities and organizations.

Graduates are employed in many different settings, including nursing homes, hospices, hospitals, home care agencies, family service agencies, children and youth services, aging services, residential treatment programs, domestic violence shelters, criminal justice agencies, schools, and legal services agencies.
Graduation Requirements

A minimum of 120 credits with a GPA of 2.5 is required for graduation. The requirements include liberal arts foundation courses, professional BSW core courses and general electives. Students are allowed only two grades of a C+ in the professional program.

The Professional BSW core consists of 46 credits. BSW core courses are offered only once each year in sequence and require three semesters to complete. In the third semester of the BSW core, each student will participate in a social service agency for a 400 hour supervised field instruction.

Admission to the School of Social Work

Students in good academic standing with fewer than 55 hours may declare a social work major. Students are required to complete a range of courses in liberal arts as foundation to the BSW professional program and as electives.

Admission to the BSW professional program is competitive. In the spring, students may apply for fall admission to the BSW professional social work program if they meet the following criteria:

1. At least 42 credits completed (second semester sophomore status) by the application deadline and
2. 55 credits expected before the beginning of the first semester (fall) of the BSW foundation curriculum
3. Minimum 2.5 cumulative GPA required
4. Completion of required liberal arts prerequisite courses (denoted with *) with minimum grades in “C” range or higher.

• Graduate Certificate in Gerontological Social Work (p. 559)
• Graduate Certificate in Military Social Work (p. 559)

About the School of Social Work

For over ninety years, social work education has been offered to students at Missouri’s premier public institution. The school is proud of its grass roots history: an early pioneer of social work education in 1906, a founding member of the original accrediting body for social work education in 1919, an institution advancing research and scholarship throughout the 20th century, and finally, to its role as an innovator in doctoral education, with a nationally distinctive PhD program emphasizing state social policy.

The mission of the MU School of Social Work is to promote leadership for social and economic justice by preparing students for professional excellence and leadership in practice, research, and policy. Within the context of a land grant institution, the mission of the School of Social Work reflects the University of Missouri’s tightly interlocked missions of teaching, research, outreach, and economic development.

Careers

The nation faces a critical shortage of qualified personnel who possess the rigorous research skills needed to develop, plan, and evaluate social work interventions and the structure of social services. The Master of Social Work (MSW) Program prepares graduates for leadership in professional social work practice within the areas of Advanced Clinical Social Work Practice or Policy, Planning and Administration in Human Services. Doctoral programs in social work are the major resource for social work researchers and scholars. The rapid growth and development in new social work undergraduate and graduate programs throughout the country has also increased the demand for doctoral social work faculty. In recent years, there have been 400-500 doctoral faculty vacancies advertised annually in schools of social work, while the number of graduates has remained at 250-300 per year, with one hundred of those graduates seeking non-academic positions.

Undergraduate

BSW in Social Work

Major Program Requirements

Required Entry-Level Courses: Specific liberal arts requirements for graduation are listed below (* denotes a prerequisite course to the BSW professional program that must be completed before beginning social work core courses).

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.
## Degree Core Requirements

1. Students accepted into the professional BSW program must take SOC_WK 2220 and SOC_WK 4951, which must both be designated “WI.” No additional “WI” courses are required.
2. Humanities include art and music history and appreciation classes, classical studies courses, foreign civilization courses, literature courses in English or other languages and religious studies courses. Applied art and music performance courses do not count toward the humanities requirement. Students are urged to check with their advisor before selecting courses.
3. One course in humanities or biological, physical or mathematical sciences must be at the 2000 level or higher.
4. Two courses that reflect the cultural diversity of our society; often selected from social work, sociology, anthropology, peace studies, English, foreign civilizations, religious studies and human development and family studies, black studies and women and gender studies. SOC_WK 2000 Exploration in Social and Economic Justice, is strongly preferred as one of the courses. Students are urged to check with their advisor before selecting courses.
5. Students accepted into the professional BSW program must take SOC_WK 2220 and SOC_WK 4951, which must both be designated “WI.” No additional “WI” courses are required.

### Capstone Requirements

All students accepted into the professional BSW program must take SOC_WK 4971 Undergraduate Field Practicum and SOC_WK 4970 Senior Professional Seminar as their capstone experience.

### Basic Skills Credit Limitations

No more than 4 credits may be taken from “skills” courses to count toward the required 120 credits. More skill classes may be taken, but will be in excess of the 120 credits. Examples of skills courses are applied art and music performance classes, computer skills, self-defense and first aid.
Semester Plan

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.

Graduate

MSW in Social Work

Admission Contact Information
Crystal Null (nullc@missouri.edu)
724 Clark Hall; Columbia, MO 65211
573-884-9385
http://ssw.missouri.edu/msw.html

The University of Missouri’s Master of Social Work (MSW) Program prepares competent, effective and ethical social work professional leaders for social change. The MSW Program emphasizes a commitment to enhancing human well-being by alleviating social problems, embracing diversity and promoting social and economic justice with systems of all sizes through advanced clinical social work practice and policy planning and administration in human services. The MSW program prepares students to promote social and economic justice that responds to the broad economic, social, and cultural needs of the public and private. The MSW Program is fully accredited by the Council on Social Work Education, of which the School of Social Work is a charter member.

Financial Aid from the Program

Scholarship opportunities are available for full-time and part-time program applicants who meet the early application deadline. A separate Scholarship Application is available on the department website. Submission of the Scholarship Application is due by early application deadline.

Application Deadlines

Fall deadline: January 15
Spring deadline: September 15
Summer deadline: January 15

Admission Criteria

- Minimum GPA: 3.0
- Bachelor’s degree from an accredited college or university with the applicant’s undergraduate transcript reflecting a sound liberal arts foundation, including courses in the humanities, as well as in the social and behavioral sciences.
- All International students must submit Internet-based (iBT) TOEFL scores or IELTS scores. No waivers will be given.

Minimum iBT TOEFL scores:

Prerequisites

All MSW applicants must complete an approved college level statistics course with a grade of C- or higher before they will be accepted to enroll in the MSW program. SOC_WK 4310 is the recommended course for University of Missouri students. The following University of Missouri courses are also approved and may be taken in lieu of SOC_WK 4310: STAT 1200, STAT 1400, STAT 2500, and ESC_PS 4170. Statistics courses completed at other academic institutions may substitute for University of Missouri statistic courses, pending submission of official transcript and approval by the MSW Program Director. Completion of the statistics course prior to application submission is preferred and strongly recommended. If an applicant is enrolled in a statistics course at the time of application and accepted into the MSW Program, the acceptance will be “pending successful completion of the approved statistics class”. 
Priority admission deadline for Regular Standing Applicants: January 15. A student qualifies for Regular Standing Admission if s/he has an undergraduate degree in any field other than Social Work. Any applicant who applies after the priority deadline will be considered on the rolling admission cycle until April 15.

Priority admission deadline for Advanced Standing applicants: January 15 (for summer admission), September 15 (for spring admission). An applicant qualifies for Advanced Standing admission if they have a bachelor’s degree in Social Work earned within the last seven (7) years. Any Advanced Standing applicant who applies after the priority deadline of January 15 for summer admission will be considered on a rolling admission cycle until April 15. Any Advanced Standing applicant who applies after the priority deadline of September 15 for spring admission will be considered on a rolling admission cycle until November 15.

Read more about Regular vs. Advanced Standing below.

**Required Application Materials**

To the Graduate School:

- All required Graduate School documents

To the MSW Program:

- Personal statement (see department instruction)
- Resume/CV
- Three letters of reference from persons who can address the applicant’s intellectual ability and interpersonal skills, potential for graduate education, and potential for professional social work practice through observation in an educational or work (paid or volunteer) setting. Letters of reference should not be submitted from friends or family
- Unofficial transcripts
- Advanced standing students only: the most recent copy of your field evaluation (see department instruction)

**Plans of Study**

Preparation for professional leadership encompasses two major components:

**Foundation**

Develops knowledge and skills related to social interaction, human development, community dynamics, social policy and societal values applicable to generalist social work practice.

**Foundation Courses**

<table>

Total Credits 24

**Concentrations**

The MSW program offers two concentrations: Advanced Clinical Practice and Policy, Planning and Administration (PP&A). Within these concentrations, students have the opportunity to create a plan of study based on their individual interests and professional goals. Decisions regarding their chosen concentration are made by students in consultation with faculty advisors. A brief description of the two concentrations is as follows:

**Advanced Clinical Social Work Practice**: includes strategies of clinical intervention with socially and economically disadvantaged individuals, families, and small groups in a variety of health, mental health, family and children services, and senior citizen agencies.

**Concentration Courses: Clinical**

- Requirements for admission may vary; please consult the university’s official resources for the most up-to-date information.
Blackboard, learning management system licensed to the University of Missouri for online courses. An occasional elective course is offered in a combined format (ITV and in-person), with the on-campus MSW student attending in-person while the course is broadcast to the Off Campus MSW Program students through Interactive Television (ITV).

Traditional in-person courses offered to the Off Campus MSW Program are held on the campuses of collaborating regional universities for these programs: Southeast Missouri State University (SEMO), Missouri University of Science and Technology in south central Missouri, Missouri Western State College and Northwest Missouri State University in northwest Missouri and Truman State University in north central Missouri.

The Off-Campus program also collaborates with a number of offices throughout the state to provide courses through Interactive Television (ITV). Other courses are offered online through Blackboard, a learning management system licensed to the University of Missouri for online courses. Elective courses offered online or ITV elective courses may have both on and off campus students enrolled in a common section. When this occurs with courses offered through ITV, on campus students attend the ITV classroom where the class is originated.

An Online MSW Program for Advanced Standing students will be offered beginning Fall 2014. The online MSW is designed for part-time study with two courses, typically 6 credit hours of course work, per semester. All courses are offered online through Blackboard with the exception of the practicum, which requires 680 hours of supervised work at an approved agency.

Regular Standing: Non-Social-Work Bachelor’s

The regular 60-credit hour degree is appropriate for students who have undergraduate degrees other than accredited social work degrees. The school admits full-time students to the regular 60-credit hour program at the beginning of the fall semester only. Part-time students are admitted at the beginning of fall and spring semester.

Advanced Standing: Bachelor’s in Social Work (BSW)

Students who have graduated within the past seven years from a baccalaureate social work program accredited by the Council on Social Work Education may be eligible for the Advanced Standing Program, which is an accelerated 39-credit hour degree.

Starting Dates

On-campus students admitted to the Regular Standing Program are admitted either in fall semester (full-time or part-time study) or spring semester (part-time study only). On-campus students admitted to the Advanced Standing Program are admitted either in the spring or summer session. On-campus Advanced standing students in the policy, planning and administration concentration must enter in the spring semester. Off-campus students admitted to the Regular Standing Program are admitted for fall semester (part-time) in even numbered years and off-campus students admitted to the Advanced Standing Program are admitted for fall semester (part-time) in odd numbered years.

Length of Study & Satisfactory Progress

Full-time Regular Standing students take 15 credits each semester and graduate in two years (4 semesters of study). Full-time Advanced Standing students take 3-5 classes each semester (9-15 credits) and graduate in 12-17 months (3 semesters of study). Part-time Regular Standing students take 2-3 classes (6-9 credits) every semester, including summer, and graduate in three years (9 semesters of study). Part-time Advanced Standing students take 2-3 classes (6-9 credits) every semester, including summer, and graduate in two years (6 semesters of study). All students are full-time during their last semester while completing block placement. All students must complete at least eight hours per academic year to maintain a satisfactory rate of progress.

PhD in Social Work

Admission Contact Information
Shannon Mezzanotte (mezzanottes@missouri.edu)
724 Clark Hall; Columbia, MO 65211
573-884-1438

About the Program

The Doctor of Philosophy (PhD) program in social work focuses on research that informs social welfare policy and practice. It is designed to prepare scholars for research, teaching and program development positions in academic and professional social work practice and policy settings.

Financial Aid from the Program

Scholarship opportunities are available for full-time program applicants who meet the application deadline. Graduate teaching and research assistantships are also often available. Some forms of support require additional forms from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Admission Criteria

Early priority fall deadline: Midnight October 31
Rolling admission fall deadline: Midnight January 15

• Minimum GPA: 3.0; 3.5 in graduate study
• Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>
• An MSW or related master’s is required. Applicants without the MSW must take a minimum of 12 credit hours of MSW course work. This requirement may be waived for applicants with additional graduate work.
• Minimum of two years post-master’s practice experience encouraged.

Note: These criteria are used flexibly to assess the applicant's potential for study and research in this program.

Required Application Materials

To the Graduate School:
• All required Graduate School documents
To the Director of the Doctoral Program in Social Work (either via the grad schools online application system or mailed in hard copy):
• Cover letter
• Three letters of recommendation
• Resume
• Writing proficiency sample
• Personal statement
• GRE test scores from within the last 7 years
• A personal interview is required, and if possible, will be arranged at MU. A Skype interview may be utilized in some cases.

Plan of Study
The PhD program is available to both persons with a Masters of Social Work (MSW) degree and those with other master’s degrees. The curriculum consists of a minimum of 51 post MSW semester credit hours or, for applicants without an MSW, 63 hours. The curriculum is divided among three distinct but highly interrelated elements designed to complement one another in assisting students to achieve the competencies expected of a graduate of this program. A core of social work courses provides the foundation in the traditions and knowledge in the profession and exposure to state-of-the-art research and techniques for the 21st century. Electives from the broad spectrum of social and behavioral sciences offering available through MU departments provide students with the opportunity to design an individualized plan of study that capitalizes on their unique interests and talents. A strong regimen of research methodology, theory, and policy analysis are designed to prepare students for use of both current and emerging methods of scientific inquiry.

Graduate Certificate in Gerontological Social Work

The Graduate Certificate in Gerontological Social Work at the University of Missouri is designed to expand the pool of professionals who are qualified to work in settings with older adults and their families. The certificate focuses on practice strategies of social work intervention from micro, mezzo, and macro perspectives.

This certificate will be available to students enrolled in the MU School of Social Work master’s program as part of their graduate training as well as a stand-alone certificate to graduate level clinical social work practitioners and graduate level policy and administration social work practitioners who wish to augment their knowledge and skills in this area. Approval of the MSW Program Director and Committee, and Director of the Graduate certificate in Gerontological Social Work is required for admission to the certificate program.

Participants in the Gerontological Social Work Certificate program build awareness and expertise for work in settings that serve older adults and their families. Participants are trained in micro, mezzo, macro and clinical strategies known to be effective in work with older adults and their families. An interdisciplinary, multi-level emphasis will be provided in the program since a large component of elder care is the coordination and management of services provided by various disciplines. Course work will utilize a bio-psycho-social-cultural perspective emphasizing the ecological perspective, Lawton’s theory of environmental press, resiliency, and the functional age model of family work. In addition, students will build awareness of aging policies and services, and policies that impact persons with disabilities and women.

As a result of earning the Gerontological Social Work Graduate Certificate, practicing MSW’s or Post-MSW degree practitioners can expect enhanced employability due to the development of new skills that respond to growing societal need. Current MSW students benefit from the graduate certificate by completing a concentrated course of study on a population group and obtaining specialty training with population/services needing graduate level social workers.

Because all of the Gerontological Social Work Graduate Certificate courses fulfill other requirements of our MSW program, a current MSW student can conveniently earn the Gerontological Social Work Graduate Certificate while completing their MSW. No additional coursework is required.

The Gerontological SW Grad Certificate consists of 12 credit hours.

Students will choose from a variety of acceptable interdisciplinary courses for fourth class

3

During the final semester of the MSW Program, the full-time block practicum experience 40 hours/week (680 total hours) is arranged at a setting where students will gain skills practicing with older adults. The Director of Field in conjunction with the Director of the Graduate Certificate in Gerontological Social Work works with students to choose a practicum setting that fits SSW requirements and student interests. Practicing MSWs only complete 12 hours of coursework and are not required to complete an additional practicum experience.

For additional information about the Graduate Certificate in Gerontological Social Work, please contact Dr. Colleen Galambos at galambosc@missouri.edu.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/gerontological-social-work-graduate-certificate/gerontol-sw-ge/Gedt.html

Graduate Certificate in Military Social Work

The School of Social Work offers graduate certificates in Military Social Work and in Gerontological Social Work.

The Graduate Certificate in Military Social Work is designed to expand the pool of professionals who are qualified to work in settings with military personnel, veterans, and their families. The Certificate focuses on clinical practice strategies of social work intervention with military personnel and their families to improve the mental health and health of this population.

This certificate is available both to students enrolled in the MU School of Social Work Masters of Social Work (MSW) Program as part of their graduate training as well as a stand-alone entity to civilian graduate level clinical social work practitioners who wish to augment their knowledge and skills in this area. Only Clinical MSWs and MSW Clinical students will
be accepted to the Military SW Graduate Certificate Program. Approval of the MSW Program Director is required for admission into the graduate certificate program.

Because all of the Military Social Work Graduate Certificate courses fulfill other requirements of our MSW program, a student can conveniently earn the Military SW Graduate Certificate while completing their MSW. No additional coursework is required.

The Military SW Grad Certificate consists of 12 credit hours.

Faculty

Professor J. Hawley**, P. S. Norum**,
Associate Professor J. Ha-Brookshire**, J. Parsons**
Assistant Professor M. Sohn*, S. Song*
Instructor K. McBee-Black

Professor Emeritus K. G. Dickerson, D. Saxon, L. E. Wilson**
Associate Professor Emeritus B. Dillard*, J. H. Pry

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BSHES in Textile and Apparel Management (p. 562)
• Minor in Textile and Apparel Management (p. 565)

The Department of Textile and Apparel Management is a global leader focusing on the apparel and textile supply chain. TAM’s award-winning faculty is internationally recognized. TAM prepares students for a wide variety of career options such as merchandising, buying, sourcing, product development, technical design, e-retailing or retail operations. The curriculum focuses on leadership, the global supply chain, sustainability, creativity/innovation and technology. Through course work, field study experiences, internships, leadership conferences and student organizations, TAM students develop the marketing and management skills they need to be a top recruit for industry positions.

Students who major in Textile and Apparel Management may choose from several options and tracks:

• Apparel Marketing and Merchandising
• Apparel Product Development
• International Apparel Marketing and Merchandising
• International Apparel Product Development

These tracks are designed to provide students with knowledge and skills necessary to function in the global textile and apparel industry. (Note: Tracks do not appear on transcripts or diplomas). Students majoring in Textile and Apparel Management are required to take a set of core courses (p. 562). Students may not take departmental courses using the Pass/Fail grading option. In addition to college and department requirements, students must meet all University graduation requirements (p. 17) including University general education (p. 18).

Students who want to explore Textile and Apparel Management may take the following classes:

<table>

Graduate

137 Stanley Hall
Columbia, MO 65211
573-882-7317
http://tam.missouri.edu/

Director of Graduate Studies: Jung Ha-Brookshire

• MA in Textile and Apparel Management (p. 565)
• MS in Textile and Apparel Management (p. 566)

The College also offers a PhD in Human Environmental Sciences with an emphasis Textile and Apparel Management (p. 537).

Graduate programs in textile and apparel management offer the following areas of study: apparel manufacturing management; apparel marketing and merchandising; e-commerce, supply chain management, economic/trade issues related to domestic and global textile and apparel industry; historical and cultural aspects textiles and dress; and consumer marketplace concerns.

Careers

Career opportunities for graduates exist in many areas, such as higher education, industry analysis, museums, product development, production management and cooperative extension.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Undergraduate
BSHES in Textile and Apparel Management

Major Program Requirements

There are four tracks available in Textile and Apparel Management: (1) Apparel Marketing and Merchandising, (2) International Apparel Marketing and Merchandising, (3) Apparel Product Development, or (4) International Apparel Product Development. These tracks are designed to provide students with knowledge and skills necessary to function in the global textile and apparel industry. (Note: Tracks do not appear on transcripts or diplomas.) Students majoring in TAM may not take departmental courses using the Pass/Fail grading option. In addition to college requirements, students must meet all University graduation requirements including University general education. Some courses in the Professional Program are allowed to double count for General Education requirements. This program can be completed in 120 hours. The following courses are required of all students majoring in Textile and Apparel Management (TAM).

Minor in Textile and Apparel Management

An undergraduate minor in Textile and Apparel Management is available for students pursuing a major in other departments. Students who wish to complete a minor should declare the minor by completing the form at http://hes.missouri.edu/students_minorapp.html. A minimum of 18 credit hours is required with at least six hours at the 2000 level or above. Prerequisites for all courses must be met, or the student must have the permission of the instructor.

Required Courses:

Admission Criteria
Fall deadline: February 1 (January 15 for early financial support considerations)
Spring deadline: September 1
- Minimum GPA: 3.0 in last 60 hours
- Bachelor’s degree from an accredited college or university in textile and apparel management or related field. Those with unrelated majors will need to do make-up work
- Minimum TOEFL scores:
  - Internet-based test (iBT) 79
  - Paper-based test (PBT) 550
- Minimum GRE scores:
  - When did you take the GRE?
    - Prior to August 1, 2011 500/500 160
    - On or After August 1, 2011 153/144 3.0

Required Application Materials
To the Graduate School:
- All required Graduate School documents
- Statement of professional objectives (upload to application)
- Departmental application (upload through the Graduate School application or send directly to department)
- Official transcripts from every college or university you have attended
- Three letters of recommendation (upload preferred, or send directly to department)
- GRE Scores
• Latest vitae or resume
• TOEFL scores if international student

Additional Minors and Certificates - HES

Undergraduate

- Minor in Financial Literacy for Helping Professionals (p. 567)
- Minor in Social Justice (p. 567)

Graduate

- Certificate in Financial and Housing Counseling (p. 567)
- Certificate in Geriatric Care Management (p. 568)
- Certificate in Gerontology (p. 568)
- Certificate in Youth Development Program Management and Evaluation (p. 568)
- Certificate in Youth Development Specialist (p. 568)

Undergraduate

Minor in Financial Literacy for Helping Professionals

The School of Social Work has collaborated with Personal Financial Planning department within the College of Human Environmental Sciences to develop a minor in Financial Literacy for Helping Professionals. As front line helping professionals encounter clients who face challenging economic situations, skills in addressing those challenges and knowledge of foundational personal finance information will aid in helping clients. Knowledge of predatory lending practices, social welfare policy designed to help the working and non-working poor and tax strategies to enhance financial situations will be addressed. This minor hopes to embrace the imperative need to educate our graduates on the role of financial literacy for those professionals who will serve others.

Students who complete the financial literacy minor may not refer to themselves as BSW-level social workers upon graduation. Fifteen credits are required to complete the financial literacy minor.

Minor Requirements

- FINPLN 2183 Personal and Family Finance 3
- FINPLN 3282 Financial Counseling 3
- FINPLN 4188 Community Agencies and Volunteering 3
- SOC_WK 4750 Interaction Skills Workshop 3
- SOC_WK 2000 Exploration in Social and Economic Justice 3
- SOC_WK 4710 Social Justice and Social Policy 3

Total Credits 15

Completion of these two courses, as well as the proposed curriculum for the minor, will allow the student to sit for the Accredited Financial Counselor Exam.

Note: Satisfactory completion (as defined by C range grade or above) of Microeconomics and College Algebra is required. Satisfactory completion (as defined by C range grade or above) of each required course is necessary in order to attain this minor. This minor is available to students regardless of major.

Minor in Social Justice

The social justice minor is designed to give non-social work majors the opportunity to develop knowledge and understanding about social justice in the person-environment context. Social justice involves the idea that in a perfect world all citizens would have identical social benefits, protections and opportunities regardless of their backgrounds and membership in diverse groups. Recognizing that the world is not perfect, the primary goals for the minor in social justice are to enhance sensitivity to vulnerable and at-risk populations, to provide opportunity for critical review of social policies and the allocation of societal resources and to stimulate interest in advocacy and the planned change process.

Students who complete the social justice minor may not refer to themselves as BSW-level social workers upon graduation.

A minimum of 15 credits, comprised of the courses below, is required to complete the social justice minor.

Minor core requirements

- SOC_WK 1115 Social Welfare and Social Work 3
- SOC_WK 2220 Human Behavior and the Environment 3
- SOC_WK 2000 Exploration in Social and Economic Justice 3
- SOC_WK 4710 Social Justice and Social Policy 3

Social work electives

Select two of the following: 6

- SOC_WK 4101 Topics in Social Work
- SOC_WK 4330 Addiction Treatment and Prevention
- SOC_WK 4350 Deaf Culture: A Social Work Perspective
- SOC_WK 4360 Working with Minority Youth
- SOC_WK 4370 Delinquency, Corrections and Social Treatment
- SOC_WK 4390 Helping Strategies With Children and Adolescents
- SOC_WK 4400 Domestic Violence
- SOC_WK 4410 Law and Social Work Practice
- SOC_WK 4450 Professional Perspectives on Child Welfare Services in the 21st Century
- SOC_WK 4455 Latino/a Immigrants and Receiving Communities

Total Credits 15

Graduate

Graduate Certificate in Financial and Housing Counseling

The purpose of the Financial and Housing Counseling Certificate is to develop a student’s financial and housing counseling skills and to prepare a student to sit for the Accredited Financial Counselor and Certified Housing Counselor exam offered through the National Association for Financial Planning and Counseling Education. Students with this
background would be equipped to provide professional assistance in debt counseling, financial management, and housing finance to those in need. Typical clients would include those with low levels of income and resources, disaster recovery, and military personnel dealing with financial and housing issues related to deployment, relocation.

This certificate is offered as part of the Family Financial Planning programs in the Great Plains Interactive Distance Education Alliance. More information is available at http://www.gpidea.org/index.html?page=majorsDegreesCourses.html&anchor=programAnchor1.

Graduate Certificate in Geriatric Care Management

The Geriatric Care Management certificate is a web-based, four course certificate designed for those who provide independent case management services to elder Americans or who wish to do so in the future. The certificate provides an educational credential in addition to preparing students to sit for certification examinations given by national credentialing organizations.

About the School
The world’s first School of Journalism was established in 1908 at the University of Missouri to strengthen the effectiveness of public communication in a democratic society. The school’s first dean, Walter Williams (who went on to become president of the University in 1930) wrote the Journalist’s Creed, which stresses the profession’s rights and responsibilities as a public trust.

The faculty is committed to educating students in the responsibilities and skills of the professional journalist. It also has a broader commitment to advance the profession of journalism through scholarly research, analysis and criticism and through special programs to serve practitioners. The school also prepares students for careers in corporate communication through its strategic communication emphasis area. Students in that area typically pursue careers in advertising or public relations or in strategic communication, a combination of those fields.

The Missouri Plan assures a journalism graduate the broad, liberal education essential for a journalist whose work may span many segments of today’s complex society. In addition to a liberal arts education, students complete practical laboratory work in a variety of settings, including a public radio station, a commercial daily newspaper and a network-affiliated television station. The school offers the Bachelor of Journalism, Master of Arts and Doctor of Philosophy degrees, along with cooperative programs with other divisions in the University. It was the first school in the world to offer all three of those degrees.

The Accrediting Council on Education in Journalism and Mass Communication has accredited the undergraduate program and a professional master’s degree.

Undergraduate
- Admissions (p. 569)
- Required Entry-Level Courses (p. 571)
- Special Programs (p. 572)
- Academic Regulations (p. 572)
- Advising (p. 574)
- Opportunities for Graduate Study on MU Campus (p. 574)

Admissions
(Effective Fall Semester 2013)
Students must be admitted to the School of Journalism to pursue the Bachelor of Journalism degree. Students are admitted in one of two categories:

Directly Admitted Students
A freshman applicant will be directly admitted to the School of Journalism if he or she meets standard MU admissions requirements and any one of the following three criteria:

- Ranks in the top 10 percent of his or her high school class.
- Scores 29 or higher on the ACT Composite.
- Scores 1290 or higher on the math-verbal portions of the SAT.

Pre-Journalism A&S Students
Students accepted by MU who do not meet one of the criteria for direct admission are admitted as pre-Journalism students in the College of Arts and Science and apply for admission to Journalism as the student is completing the fifth journalism course, which is either JOURN 2100-News or JOURN 2150-Fundamentals of Multimedia Journalism. That usually occurs in the second semester of the sophomore year as the student is completing 60 credits and all other requirements.

NOTE: All undergraduate admissions to MU are handled by the Office of Undergraduate Admissions, not the School of Journalism, and no exceptions are made to the standards for direct admission to Journalism. A student either meets one of the admissions standards or does not. There is no appeals process for direct admission.

However, once accepted to MU as a pre-Journalism student, the student may continue to take the ACT or SAT to try to improve his or her score. If the student receives the necessary score for direct admission, once the score is received by the Admissions Office the student may request a change of admissions status. The new test score must be received by the Admissions Office at least one month before the student is to begin classes at MU. Similarly, a student who was admitted outside the top 10 percent of his or her class but who subsequently achieves top 10 percent standing at the end of the senior year of high school may request a change of admissions status. No change is possible later than one month before the student begins classes at MU.

Differences in the Admission Categories
Directly admitted students have several advantages over students admitted as pre-Journalism students in the College of Arts and Science. Directly admitted students:

- Advance automatically to upper-class status in Journalism if they maintain a cumulative UM GPA of record of 3.0 or higher upon completion of 60 credit hours and fulfill all other requirements.
- Are guaranteed admission to the upper-class interest area of their choice provided they maintain a cumulative UM GPA of record of 3.0 or higher.
- Have access to a far larger portion of the School of Journalism’s freshman scholarship pool. The School of Journalism annually awards more than $450,000 in scholarships in addition to scholarships awarded by the Admissions Office and others. To apply for all scholarships, including those offered by the School of Journalism, apply through the Office of Financial Aid (http://
financialaid.missouri.edu/index.php). Priority consideration is given to those who apply by Dec. 1.

To continue to enjoy these benefits, directly admitted students are expected to maintain a UM cumulative GPA of 3.0 or higher. Those without GPAs of at least 3.0 after completion of 60 credit hours lose these benefits and will be placed in a pool with pre-Journalism students and considered individually for upper-class status through a process outlined below.

Unlike directly admitted students, pre-Journalism A&S students:

- Are not guaranteed to advance to upper-class status in Journalism if they maintain a cumulative UM GPA of record of 3.0 or higher upon completion of 60 credit hours and after fulfilling all other requirements. Students in this category instead are accepted on a space-available basis. However, to date no one who has earned a 3.0 cumulative GPA or higher has been rejected, and space has been available. The School merely reserves the right to reject students should overcrowding occur in the future.

- Are not guaranteed an interest area of choice even with a cumulative GPA of record of 3.0 or higher. Admission to the interest area of choice is dependent upon space availability. To date, no one with a 3.0 GPA or higher has been denied admission to an area of choice.

- Have access to fewer scholarships from the School of Journalism. The school has only four scholarships available to pre-Journalism Arts and Science students. That’s because most scholarships are designated for “Journalism students,” and pre-Journalism A&S students have not yet been accepted to the School of Journalism.

To apply for all scholarships, including those offered by the School of Journalism, apply through the Office of Financial Aid (http://financialaid.missouri.edu/index.php).

The School of Journalism is eager to accept hard-working pre-Journalism students who have demonstrated aptitude and drive into upper division interest areas of our program.

**Admission to Upper-Division Interest Area**

As noted above, directly admitted students who maintain a UM GPA of record of 3.0 or higher and complete the necessary coursework are automatically admitted to upper-class status and their interest area of choice upon completion of 60 credits and other requirements for upper-division status.

Students who do not meet the criteria for direct admission and directly admitted students who have not maintained a cumulative UM GPA of record of 3.0 or higher must apply for upper-division status upon completion of 60 credit hours and fulfillment of all other requirements for upper-division status. Committees of faculty in each emphasis area will review applications for admission, and admission will be by interest area based on space available in that program.

GPA alone will not be used to evaluate the applications of pre-Journalism students and directly admitted students with UM GPAs below 3.0. In addition to GPA, the committees will consider a student’s stated desire to work in the fields of journalism or strategic communication, demonstrated commitment to journalism or strategic communication (as evidenced by work with student or professional media, high school activities or participation in journalism student groups), needs of the profession, etc. For example, it is possible for a student with a 2.87 GPA who has demonstrated strong commitment to the field to be selected over one with a 2.95 GPA who has shown no similar commitment. Students applying through this process must submit brief letters of application (not to exceed two pages) stating a case for admission to an interest area.

The School will attempt to match interests of students applying through this process with openings in the School’s various academic disciplines. The School does not guarantee first choice of interest area to students admitted through this process. It may be necessary from time to time to limit enrollment in high-demand areas.

Students who are rejected for upper-division status through this process must transfer to another MU division and will no longer be considered Journalism or pre-Journalism students. If, however, a student subsequently spends a semester taking non-journalism courses and raises his or her cumulative GPA of record above 3.0, the student may reapply. No such application will be accepted after a student has completed 70 or more hours of college credit.

**Transfer Student Admissions Standards**

Transfer students are admitted to upper-division status in Journalism when they complete 60 credit hours, fulfill all prerequisites and establish a cumulative GPA of record of at least 3.0. Completion of at least three terms at MU is required for transfer students to qualify for admission. Because of that, students who plan to major in Journalism are encouraged to transfer to MU after taking no more than 30 credit hours elsewhere.

Transfer students who have completed 60 credit hours and the necessary coursework but who do not have a 3.0 UM GPA of record are placed in the same pool of applicants as pre-Journalism students and will be considered using the same process. Criteria used in evaluating these applications are similar to those for pre-Journalism applicants and direct admits who do not maintain 3.0 GPAs. The Admissions Committee will review the student’s GPA of record as well as a student’s stated desire to work in the fields of journalism or strategic communication, demonstrated commitment to journalism or strategic communication (as evidenced by work with student or professional media, high school or community college activities, or participation in journalism student groups), needs of the profession, etc. A transfer student in this category also must submit a brief letter of application (not to exceed two pages) stating a case for admission.

Unless otherwise specified by a formal articulation agreement that allows additional hours, up to 64 credits may be transferred from two-year colleges at any time before graduation. Students must also complete 30 of their last 36 hours in MU coursework. The Office of Undergraduate Admissions, not the School of Journalism, determines transfer equivalencies for the University. Transfer students from other accredited schools and colleges in Missouri should check the MU website to see how coursework will transfer to MU or contact the Office of Admissions. Students also should contact an advisor to see how these courses would apply toward a degree at MU. The School of Journalism may accept up to six journalism credit hours transferred from other accredited journalism programs or from Missouri colleges with which the school of Journalism has working agreements. The six credits eligible for transfer are those that equate to Principles of American Journalism, Cross-Cultural Journalism, News, Multimedia Journalism, History of American Journalism and Communications Law. Other courses may be accepted on a case-by-case basis by the Associate Dean for Undergraduate Studies. Current Missouri journalism students may not transfer journalism credits from other institutions. Many communications courses are similarly rejected and may not be used toward graduation requirements even as electives. Some other
Transfer Credit

The Office of Undergraduate Admissions, 230 Jesse Hall, determines transfer equivalencies for the University, including the School of Journalism.

The School of Journalism accepts transfer credit according to the transfer credit equivalency report. Transfer credit from two-year colleges can transfer only as lower-level credit.

The School of Journalism accepts a maximum of six transfer credits from other schools accredited by the Accrediting Council on Education in Journalism and Mass Communications. It also accepts journalism credits from those two-year colleges with which the School has articulation agreements.

Transfer students from other accredited schools and colleges in Missouri should check the website of the Office of Undergraduate Admissions to see how course work will transfer to MU.

International Admission

A minimum score of 100 (internet), 600 (paper) or 250 (computerized) on the Test of English as a Foreign Language (TOEFL) is required for all pre-Journalism and Journalism students whose native language is other than English. Alternatively, students may take the International English Language Testing System (IELTS) exam: overall-7.0, no band below-6.0.

Required Entry-Level Courses

Prior to admission to an interest area in the School of Journalism, the student must complete a course of study that includes at least 60 credits of work at MU or another accredited two- or four-year institution. The courses listed below are required for students to be admitted to an interest area in journalism.

English Composition (3 credits):
- (3 credits) with a grade of “B” or better OR a grade of “C” and a satisfactory score on the Missouri College English Test. AP and IB test credit may satisfy this requirement.

College Algebra (3 credits):
- MATH 1100 College Algebra with a C- range grade is required, or an exemption from College Algebra.

Foreign Language (12-13 credits):
- Unless students have completed four or more years in a single foreign language in high school, they must complete 12-13 credits in a single foreign language at the college level.
- The final 3-credit course may be taken the first semester in an interest area in the School of Journalism. In this case, it will count as elective credit. Placement and proficiency exams are available in French, German and Spanish.
- If you have four or more years of high school credit and elect to take a lower-level course in the same language, you negate the option of satisfying your language requirement based on high school credit. You must either continue through level 3 or request that the credits for the lower-level course not be counted toward graduation.

Biological, Mathematical and Physical Science (9 credits):
- Statistics (3 credits): STAT 1200 Introductory Statistical Reasoning, STAT 1300 Elementary Statistics or its equivalent in transfer may be accepted.
- Additional courses (6 credits) from the following areas: biological anthropology, astronomy, biology, chemistry, CMP_SC 1050 Algorithm Design and Programming I, geology, math and physics. One course must include a lab.
- Note that College Algebra, with a C-range grade, must be the prerequisite for math courses counting in the science area. MATH 1140 Trigonometry, counts as general elective credit only.

Social and Behavioral Science (14 credits):
- American History: HIST 1100, HIST 1200, HIST 1400, HIST 1410, HIST 2210 or HIST 2440
- Economics: ECONOM 1051/ECONOM 1051H or ECONOM 1014 and ECONOM 1015, or AG_EC 1041 and AG_EC 1042
- A 3-credit behavioral science course

Note that ECONOM 1014 is the prerequisite for ECONOM 1015

Humanistic Studies (6 credits):
- Any literature course, including foreign language literature courses.

Additional courses (3 credits):
- Communication/film studies/theatre
- History or appreciation of art or music
- Humanities
- Non-US civilization or classics
- Philosophy
- Religious studies

Journalism (13 credits, effective fall semester 2013):
- JOURN 1010 Career Explorations in Journalism (1 credit). Should be taken the first semester on campus. Graded S/U.
- JOURN 1100 Principles of American Journalism Restricted to first-time college students with a high school core GPA of 3.00 or higher and 15 college credits (dual, AP, IB or other), or current students with 15 completed credits and UM GPA of 2.75. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students only.
- JOURN 2000 Cross-Cultural Journalism Sophomore standing required. Prerequisites: JOURN 1100 and UM GPA of 2.8. Should be taken concurrently with JOURN 2100 or JOURN 2150. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students only.
- JOURN 2100 News Sophomore standing required. Prerequisites: ENGLISH 1000 with a B- grade or higher, JOURN 1100 and UM GPA of 2.8. May NOT be taken concurrently with JOURN 2150. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students only.
- JOURN 2150 Fundamentals of Multimedia Journalism Sophomore standing required. Prerequisites: JOURN 1100 and UM GPA of 2.8. May NOT be taken concurrently with JOURN 2100. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students only.
Laptop Computer Requirement

Journalism courses require the use of a computer. Students must demonstrate word-processing proficiency. Incoming freshmen and transfer students are required to have a wireless laptop computer for their work in the School of Journalism.

Special Programs

The School of Journalism attracts some of the best students at MU. The School encourages high-ability students to enroll in the MU Honors College (http://honors.missouri.edu) and take honors courses whenever possible. Such courses are taught by some of MU's best professors. The School recognizes incoming high-ability students with two special designations and the following benefits:

Journalism Scholars Program

Qualifications: Any incoming freshman journalism major who has a composite ACT score of 29 or higher (or 1290 or higher on the combined math and verbal portions of the SAT) and who ranks in the top 10 percent of his or her high school graduating class qualifies for:

• Direct admission to the Missouri School of Journalism
• Designation as a Missouri Journalism Scholar
• Student's who are eligible for the Honor's College are automatically accepted into the Journalism Scholars program

Benefits:

• The opportunity to participate in a Freshman Interest Group designed exclusively for Journalism students, space permitting
• Special advisement and programs directed by the school of Journalism's associate dean for undergraduate studies and administration
• Regular meetings with various members of the journalism faculty
• Space permitting, assignment to residence halls set aside for Journalism Scholars
• The opportunity to participate in many on-campus journalism events, and journalism clubs and organizations
• Social activities planned exclusively for Journalism Scholars

The Walter Williams Scholars Program

The highest-achieving Journalism Scholars win separate designation as Walter Williams Scholars. The Walter Williams Scholars program is named in honor of the school’s founding dean, a Missouri newspaper publisher who went on to become president of the University of Missouri.

Qualifications: To win acceptance into the exclusive circle of top Walter Williams scholars, incoming freshmen must earn an ACT composite score of 33 or higher (1440 or higher on the SAT). They also must rank in the top 20 percent of the high school class (if the school ranks) or must have maintained a high school GPA of at least 3.25 on a 4.0 scale. Admission is by invitation only.

Benefits:

Walter Williams Scholars are also Journalism Scholars and have all of the rights and privileges enjoyed by that group. Additional benefits include:

• Placement in a special Freshman Interest Group, space permitting
• Assigned individual faculty mentors

• A $1,000 scholarship that can be used for study abroad or in our New York or Washington programs. The scholarship can be used at any time before graduation
• Automatic admission to the one-year BJ/MA program at the School of Journalism, which allows students to complete their graduation degrees in one year rather than two. Admission is contingent upon the following criteria:
  • Maintenance of a 3.25 GPA in your journalism coursework and for your cumulative average, throughout you undergraduate career
  • Submission of a complete MA application, including payment of the application fee, and with two (out of three) of your letters of recommendation from journalism faculty. You do not need to take the GRE. Details can be found on the Master’s Application Checklist: http://journalism.missouri.edu/programs/masters/admissions/

Academic Regulations

Dual-Degree - Bachelor of Arts/Bachelor of Journalism

To receive two bachelor’s degrees, a Bachelor of Arts and a Bachelor of Journalism, a student must complete a minimum of 132 credits and complete all of the specific requirements for both degrees. Normally, a minimum of one additional semester is required for both degrees. Each candidate for a dual degree is assigned an advisor in the School of Journalism and in the department of major interest in the College of Arts and Science.

Science and Agricultural Journalism

The College of Agriculture, Food and Natural Resources, in cooperation with the School of Journalism, offers an inter-divisional Bachelor of Science degree in Science and Agricultural Journalism. This is not considered a dual degree. For more information, see the College of Agriculture, Food and Natural Resources (p. 31) in this catalog.

Credit Restrictions

Students may enroll in a maximum of 10 journalism credits each semester without permission from the associate dean for undergraduate studies.

Academic Assessment

Students in convergence, magazine, photojournalism, print and digital news, and Radio-TV news must compile a portfolio prior to graduation showing their preparedness for employment or graduate education. This is a requirement for graduation. Information about the assessment process is sent to students from their faculty chair during their final semester in school. Strategic communication students must complete this requirement as part of the capstone course.

Independent Study

Mizzou Online offers a variety of courses that can be taken on your own through correspondence or online. Many of the courses can be used to satisfy degree requirements. Students may enroll themselves for as many as 3 hours per semester of online semester based or self-paced (9 months) courses. Any more than 3 hours per semester will have to be approved by an academic advisor.

Standards for Academic Performance

The School of Journalism is a competitive environment in which students are expected to maintain high standards of academic achievement.
In general, the faculty expects each student to maintain a grade point average of 3.0 or higher to be considered in good standing. The faculty has established rules for handling students who fall below that level. Those rules follow:

1. A student admitted directly to the School of Journalism as a freshman must maintain a cumulative GPA of record of at least 2.5 during the first 29 hours of credit. The credits applicable in this sense are all credits earned in any way, including transfer, advanced placement and credit by examination. Grades in courses taken elsewhere will not be considered for this purpose. Those who do not meet the standard will be dismissed from the School of Journalism and will not be permitted to re-enroll.

2. A student admitted directly to the School of Journalism as a freshman must maintain a cumulative GPA of record of at least 2.75 after completion of 30 to 70 hours of credit. The credits applicable in this sense are all credits earned in any way, including transfer, advanced placement and credit by examination. Grades in courses taken elsewhere will not be considered for this purpose. Those who do not meet the standard will be dismissed from the School of Journalism and will not be permitted to re-enroll.

3. Students with 70 credits who have still not earned admission to the School of Journalism will be dismissed from the School of Journalism. The credits applicable in this sense are all credits earned in any way, including transfer, advanced placement and credit by examination.

4. Directly admitted freshmen with 70 credits who have still not earned admission to an emphasis area will be dismissed from the School of Journalism. The credits applicable in this sense are all credits earned in any way, including transfer, advanced placement and credit by examination.

5. Students must repeat any required journalism course in which they do not earn a grade of C- or higher.

**Probation, Suspension and Dismissal**

Journalism students are placed on probation when either their journalism or their overall (term or cumulative) grade point average falls below 2.0. Students may remain on probation no more than one term. They regain good standing when their term and cumulative grade point averages, for journalism and overall, climb to 2.0 or higher.

First semester freshman journalism students are placed on final probation when their first term grade point average falls between 0.50 - 1.99. Students may remain on final probation no more than one term. They regain good standing when their term and cumulative grade point averages climb to 2.0 or higher.

First semester freshman journalism students are dismissed and become ineligible to enroll for a period of one calendar year when their first term grade point average is below 0.50.

Students may be placed on academic probation and may be declared ineligible to enroll if they neglect their academic duties.

Students are suspended and become ineligible to enroll for a period of one regular semester when their term grade point average (journalism or overall) is below 1.5, when they pass less than one-half of their work in any term or when they are on probation and their term grade point average is 2.0 or lower.

Students are dismissed and become ineligible to enroll for a period of one calendar year when their term grade point average (journalism or overall) is below 1.0, when they pass less than one-fourth of their work in any term or when they fail to perform their academic duties.

A student may be placed on probation, suspended or dismissed for excessive in-completes at the discretion of the associate dean for undergraduate studies. In such cases, the associate dean shall set a time limit for successful completion of all the courses in which the student has an incomplete. That time limit shall be no more than one calendar year from the scheduled completion of the course and may be a shorter duration. The associate dean also may place limitations on the number of additional credit hours in which the student may enroll before the in-completes are resolved. If the student fails to finish the required courses within the time limit set by the associate dean, the student is subject to dismissal.

A student who fails to achieve an acceptable grade (C- or better) in a required journalism course for the second time will be permanently dismissed from the School of Journalism for lack of acceptable progress toward the degree. That student may be readmitted only with the consent of the faculty chair of the student’s emphasis area and the associate dean for undergraduate studies. Before recommending approval for the student to re-enroll, the faculty chair will consult with the instructor or instructors of record in the required course to determine the likelihood of that student passing the course on the third attempt. The faculty chair then will make a recommendation to the associate dean, who shall make the final decision to readmit or deny admission to the School of Journalism.

A student who fails to achieve an acceptable grade (C- or better) in two or more required journalism courses may be placed on probation, suspended or dismissed at the discretion of the associate dean for undergraduate studies in consultation with the faculty chair and the instructors of record.

**Satisfactory/Unsatisfactory Grading System**

No required course or courses in a required area may be taken on a Satisfactory/Unsatisfactory basis either before or after admission to the School of Journalism. Only elective, non-journalism courses may be taken S/U and only one per semester. Journalism courses offered only as S/U courses are exceptions.

**Ethics of Journalism**

The School of Journalism is committed to the highest standards of academic and professional ethics and expects its students to adhere to those standards. Students are expected to observe strict honesty in academic programs and as representatives of school-related media.

Should any student be guilty of plagiarism, falsification, misrepresentation or other forms of dishonesty in assigned work, he or she may be subject to a failing grade from the course teacher and such disciplinary action as may be recommended pursuant to university regulations.

**Non-Journalism Majors**

Students from other divisions with junior or higher standing may take non-laboratory courses in journalism without being admitted to the school. Permission of the journalism academic unit is required. Courses directly related to the skills in the media are usually not open to students while they are undergraduates in other disciplines. Students from other schools or colleges admitted to journalism courses are expected to meet the
course prerequisites and grade point averages required of students in the School of Journalism.

**Advising**

Students directly admitted to Journalism as freshmen have a full-time academic advisor in the school.

Pre-Journalism students receive academic advising from the College of Arts and Science. Students admitted to an interest area in the school have a full-time academic advisor in the school and a faculty advisor from their selected emphasis area. Students are expected to seek the advice of the academic advisor in the selection of courses. The faculty advisor provides career counseling and specific journalism related issues.

The school provides advising checklists so that students can maintain a record of academic course work. The forms are used by the student and advisor to plan the student’s program. Students are responsible for determining an appropriate schedule of courses each semester; however, the course schedule should be approved by the student’s advisor. The responsibility for meeting admission and graduation requirements rests with the student.

**Opportunities for Graduate Study on MU Campus**

The five-year combined bachelor/master degree program was designed for students in the Missouri School of Journalism who desire a graduate education after the undergraduate program is complete. Students in the program complete requirements as outlined for the Bachelor of Journalism degree and then spend one more year (approximately 12 months) to earn a master’s degree. The program requires students to carry an intensive load (12-15 credits) each semester. Course work in the program builds on the undergraduate program and enhances student’s skills and understanding of the chosen area of journalism. At the present time, students can focus their program in areas such as strategic communication, newspaper design, broadcast management, computer-assisted reporting and magazine areas such as magazine writing and magazine design.

**Graduate**

**About Our Graduate Programs**

The University of Missouri’s School of Journalism is the recognized leader for graduate study in journalism and strategic communication, having awarded the first master’s and doctoral degrees in journalism in 1921 and 1934, respectively.

The Missouri Method is the time-honored process of journalism and strategic communication education: Graduate students gain valuable research-based, managerial experience while honing tactical skills. We operate the only network affiliate (NBC) television station in the country used to train journalism students. We publish a community daily newspaper (not a campus paper), and we operate four major web sites, a local magazine and an international magazine. Students also may train at our campus-based NPR affiliate. Our strategic communication students design media campaigns for local and national clients. Examples: Our students have created advertising and public relations campaigns for Nokia, Apple, Dr Pepper, Anheuser-Busch, Duncan Hines, DuPont, Dow Chemical, Kinko’s, Eastman Kodak and many other leading international brands. Graduate studies in CAFNR are taking an innovative, high-tech approach to traditional agriculture, food and natural resources. Our students are highly engaged with expert faculty mentors who are impacting the future with findings on health breakthroughs, sustainable agriculture techniques and food safety. Prospective students are able to choose from a range of academic programs consistently recognized for excellence.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

We operate educational programs in Washington, D.C., New York, and Brussels where many of our students carry out their capstone projects or do research. We also partner with educational programs around the world.

Our 80+ faculty members have earned impressive credentials from years of working in journalism and strategic communication. School resources include an extensive journalism library and Freedom of Information Center, Center for Advanced Social Research, and the Stephenson Research Center, named for the late William Stephenson, known globally as the inventor of Q-methodology.
Journalism

The world’s first School of Journalism was established in 1908 at the University of Missouri to strengthen the effectiveness of public communication in a democratic society. The school’s first dean, Walter Williams (who went on to become president of the University in 1930) wrote the Journalist’s Creed, which stresses the profession’s rights and responsibilities as a public trust.

The faculty is committed to educating students in the responsibilities and skills of the professional journalist. It also has a broader commitment to advance the profession of journalism through scholarly research, analysis and criticism and through special programs to serve practitioners. The school also prepares students for careers in corporate communication through its strategic communication emphasis area. Students in that area typically pursue careers in advertising or public relations or in strategic communication, a combination of those fields.

The Missouri Plan assures a journalism graduate the broad, liberal education essential for a journalist whose work may span many segments of today’s complex society. In addition to a liberal arts education, students complete practical laboratory work in a variety of settings, including a public radio station, a commercial daily newspaper and a network-affiliated television station. The school offers the Bachelor of Journalism, Master of Arts and Doctor of Philosophy degrees, along with corporate communication in a democratic society. The world's first School of Journalism was established in 1908 at the University of Missouri to strengthen the effectiveness of public communication in a democratic society. The school’s first dean, Walter Williams (who went on to become president of the University in 1930) wrote the Journalist’s Creed, which stresses the profession’s rights and responsibilities as a public trust.

The Missouri Plan assures a journalism graduate the broad, liberal education essential for a journalist whose work may span many segments of today’s complex society. In addition to a liberal arts education, students complete practical laboratory work in a variety of settings, including a public radio station, a commercial daily newspaper and a network-affiliated television station. The school offers the Bachelor of Journalism, Master of Arts and Doctor of Philosophy degrees, along with cooperative programs with other divisions in the University. It was the first school in the world to offer all three of those degrees.

The Accrediting Council on Education in Journalism and Mass Communication has accredited the undergraduate program and a professional master’s degree.

Undergraduate

• BJ in Journalism (p. 578)
  • with emphasis in Convergence Journalism (p. 579)
  • with emphasis in Magazine Journalism (p. 582)
  • with emphasis in Photojournalism (p. 584)
  • with emphasis in Print and Digital News (p. 585)
  • with emphasis in Radio-Television Journalism (p. 589)
  • with emphasis in Strategic Communication (p. 592)
• Minor in Journalism (p. 594)

Each Emphasis Area, however, has separate tracks that permit students to prepare for employment in more specialized fields. These are called Interest Areas, and students select from more than 30 choices among these. Interest Areas do not appear on transcripts or diplomas, although the transcript coursework should provide evidence of competency in the appropriate area.

To ensure maximum flexibility for students, the School also offers an Individually Designed Interest Area. Working with three faculty members, and with the approval of the associate dean for undergraduate studies, a student can design his or her program by selecting from the School’s robust offerings of more than 100 courses. Students who pursue this option must do so within accrediting guidelines and within one of the six approved Emphasis Areas.

Students who desire more information on a particular program should see an Academic Advisor or seek out a member of the supervising Faculty, which is indicated following the description of the Interest Area.

Students interested in one of the international programs should seek out an advisor in the International Programs Office. Interdisciplinary Programs, those that cross traditional media boundaries or depend on skills-based coursework from other MU divisions, are assigned to one of the School’s Faculties as indicated.

Degree with Honors Requirements

Graduation with honors is based on the grade point average during the final 60 graded credits in residence. Cum laude requires 3.5, magna cum laude 3.7, and summa cum laude 3.9. The student must have a minimum of 60 credits in residence at MU to be considered for graduation with honors. The School computes the grades to three decimal points and does not round up. A student must request consideration for graduation with honors when applying for graduation.

Kappa Tau Alpha is a journalism honorary society that accepts the top 10 percent of each graduating class. Qualifying students are sent a letter with details about the society and are recognized at the journalism graduation ceremony.

Individually Designed Interest Area

Students who find that none of the existing Interest Areas meet their needs may work with the faculty to construct a tailored Interest Area to meet their educational objectives. To do this, students work with a faculty mentor and at least two other faculty members to design a course plan using existing courses in the School of Journalism, relevant courses outside the School and no more than six credits of Problems, Topics or Communications Practice courses. The student will enroll and be granted a degree in the emphasis area that aligns with their faculty mentor. Because of large enrollment, students are not able to tailor an Interest Area in Strategic Communication. Students wishing to pursue an individually designed Interest Area should start by seeing a journalism advisor in 76 Gannett Hall.

Electives to Achieve the Interest Area’s Goal

The student must complete 16 hours of elective journalism courses mutually agreed to in advance by the student and the three supervising faculty members. These courses must form a coherent plan that leads to competency in the targeted area of expertise and must fit within one of the approved Emphasis Areas of the School.

Journalism or Non-Journalism Electives (6 Non-Journalism Credits)

In consultation with the faculty mentor, the student should choose a minimum of six non-journalism credits that complement the program’s objectives. For example, if a student were to design a program in some aspect of entrepreneurial journalism, six or more credits in business courses might be desirable. In the absence of relevant courses for the targeted interest area, these credits become general electives for students.

Capstone

Students pursuing this interest area should choose from among the School’s available capstone courses to find one that best meets the model’s objectives. In the absence of a clear choice, JOURN 4990: Journalism and Democracy, is recommended. Students also are required to complete an upper-division Writing Intensive (WI) course. Some capstones carry WI designation. Others may be found in the journalism curriculum or outside the school.
Approval Procedure

Students who wish to construct a special interest area may pick up a form for that purpose in Students Services, 76 Gannett. After meeting with the three faculty members chosen to oversee progression through the program, the student will submit the form - complete with the signatures of the student and the three supervising faculty members - to the Associate Dean for Undergraduate Studies. The student must win approval of the tailored program from the associate dean before beginning the program. Thus, a student must file a proposal for approval by the time he or she has completed no more than 70 total credits. Once approved, the proposal goes to the student’s academic advisor, who places it in the student’s file and uses it to help the student navigate the remainder of the curriculum.

Total Credits for the Degree and their Breakdown

Students pursuing a tailored program must complete 123 credit to include:

- The same 60 credits that all students must complete before entering upper-division status.
- Not more than 44 journalism credits.
- A total of at least 79 non-journalism credits.

Graduate

- MA in Journalism (p. 595)
  - with emphasis in Health Communication (p. 596)
  - with emphasis in Interactive Media (p. 597)
  - with emphasis in Media Management (p. 597)
  - with emphasis in Strategic Communication (p. 598)
- PhD in Journalism (p. 598)

School of Journalism
179 Gannett Hall
573-882-4852

Master’s Programs: journalism.missouri.edu/programs/masters/
Doctoral Programs: journalism.missouri.edu/programs/doctoral/

While most graduate journalism students will find that these graduate programs meet their needs, some may wish to structure an independent model. Such a model takes into account the student’s prior education and experience, as well as their unique professional goals. Refer to the MA in Journalism (p. 595) for additional models.

About Journalism’s Graduate Degree Programs

The Missouri School of Journalism awarded the first master’s and doctoral degrees in journalism in 1921 and 1934, respectively. The master’s and doctoral programs at the School enjoy superb reputations, both among scholars and among practitioners in news, advertising, public relations and strategic communication.

For the master’s program, Missouri Journalism offers a complete set of real-media experiences. We operate the only network affiliate (NBC) television station in the country used to train journalism students. We publish a community daily newspaper (not a campus paper), and we operate four major web sites, a local magazine and an international magazine. Students also may train at our campus-based NPR affiliate.

Our strategic communication students design media campaigns for local and national clients. Our students have created advertising and public relations campaigns for Nokia, Apple, Dr Pepper, Anheuser-Busch, Duncan Hines, DuPont, Dow Chemical, Kinko’s, Eastman Kodak and many other leading international brands.

We operate educational programs in Washington, D.C., New York, and Brussels where many of our students carry out their capstone projects or do research. We also partner with educational programs around the world.

Graduate Minor in Law and Conflict Resolution

This program is for journalism doctoral students who are interested in teaching and researching in journalism, law and conflict resolution in a school of journalism or communication department. For details, refer to the Graduate Minor in Law and Conflict Resolution (p. 600).

Facilities and Resources

A variety of special facilities and resources are available to help students meet their educational objectives. The Columbia Missourian, a general circulation daily newspaper with full-leased wires of The Associated Press and The New York Times Service, KOMU-TV, an NBC affiliate, KBIA-FM, a National Public Radio station, Mojo Ad Agency and Vox magazine provide students the opportunity for hands-on learning under faculty supervision and to conduct applied research.

The Journalism Library subscribes to more than 125 newspapers and magazines worldwide and catalogs more than 40,000 volumes. Many more resources are available in electronic format.

The State Historical Society of Missouri, on-campus, has an extensive collection of state newspapers dating from 1808.

The Freedom of Information Center maintains a day-to-day study of the actions by government, media and society affecting the movement of information.

The national headquarters of Investigative Reporters and Editors and the National Institute for Computer Assisted Reporting provide educational services to reporters, editors and others interested in investigative journalism.

The Service Journalism program, based in the magazine sequence, focuses on how to effectively provide information to consumers and offers workshops for professionals, covering such topics as health and nutrition, travel, science and minorities coverage.

The Center for Advanced Social Research provides survey and other services to a broad variety of governmental, corporate and media organizations. It employs more than 50 graduate students from around the MU campus.

The Association of Health Care Journalists is headquartered at Missouri and is dedicated to advancing public understanding of health care issues. Its mission is to improve the quality, accuracy and visibility of health care reporting, writing and editing.

The Center on Religion & the Professions works to improve religious literacy among professionals, to help them serve a diverse public. As America grows more religiously diverse, professionals need to better understand the religious traditions and beliefs of the public they serve. CORP’s interdisciplinary, practical and applied work centers on that mission. Founded in 2003 with a grant from The Pew Charitable Trusts, the Center is one of Pew’s 10 Centers of Excellence. CORP is affiliated with Religion Newswriters Association.
Founded in 2003 with a generous gift from the Donald W. Reynolds Foundation, the Reynolds Journalism Institute is committed to developing and testing new ways to improve journalism through new technology and improved processes.

**Special Events**
Each year the school sponsors the Missouri Honor Medal Award program, which brings contemporary leaders in mass communications to the campus. The school also directs a number of professional development and awards programs, including the international competition for the best Pictures of the Year.

**Honor Society**
Kappa Tau Alpha, national honor society for scholarship in journalism, founded at the university in 1910, has its headquarters in the school.

**Funding**
An array of competitively awarded fellowships, assistantships, scholarships and other financial aid opportunities are available. All applicants for admission are considered for any available funding. No separate application form is needed.

**Undergraduate**

**BJ in Journalism**

**Major Program Requirements**
Effective Fall Semester 2013, the Bachelor of Journalism degree requires 44 journalism credits and 79 non-journalism credits.

To obtain the Bachelor of Journalism degree, a student must:
- Be regularly admitted to an interest area within the school
- Complete at least 31 upper-division credits of acceptable journalism course work
- Complete at least 31 credits of acceptable course work outside the school
- Earn a cumulative GPA of at least 2.0 for all work taken while in the School of Journalism and a GPA of at least 2.0 for all journalism courses
- Complete all University graduation requirements (p. 17), including University General Education (p. 18) requirements

**Major Core Requirements**

**General Electives**

Electives necessary to complete a minimum of 79 credits of non-journalism classes. Any course acceptable to the School and advisor is allowed.

**Special Offerings**

**International Journalism (Interdisciplinary)**
The next generation of journalism students must be equipped to work in a global environment. This Interest Area is designed to capitalize on Missouri’s international reputation and its international resources by placing under one umbrella the school’s existing Study Abroad opportunities, its internationally focused media and multimedia projects with global partners. Students in this Interest Area may take courses within any of the existing or prospective areas to complement their international interests. This degree is granted in the student’s emphasis area of choice (Convergence Journalism, Magazine Journalism, Photojournalism, Print and Digital News or Radio-TV Journalism) but is administered by the School’s International Programs Office.

BJ in Journalism with Emphasis in Convergence Journalism

Major Program Requirements

All Convergence Interest Areas teach multimedia storytelling by having students take the three core convergence classes, JOURN 4804 Convergence Reporting, JOURN 4806 Convergence Editing and Producing; and the capstone, JOURN 4992 Reporting, Editing and Marketing of Converged Media. Students then choose to specialize by taking classes from selected requirements and electives.

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Emerging Media (Interdisciplinary)

The journalism industry is constantly changing as it discovers new ways of covering the news and new technologies to deliver it. This Interest Area is for the student who wants to learn and work with some of the latest developments in journalism, such as delivery of news via mobile devices and tablets. Classes in this area provide a wide range of opportunities from content creation, and Web and application development to classes working with content created by other journalists. This program of study is primarily for students interested in online, social and mobile delivery of news and information and organizations. Administered by the Convergence Faculty.

Semester Plan

A sample plan of study has not been designed for this major. Students should contact the academic department for assistance with academic planning.
Entrepreneurial Journalism (Interdisciplinary)

More and more of today’s journalism students will go to work in non-traditional news organizations, start their own businesses or freelance. Students in this Interest Area will learn about current markets in journalism and what audiences want. They also will study the relative marketability of content. Students will learn the market value of their own work, how to build their own brands and how to market. Administered by the Convergence Faculty.

ACCTCY 2036 | Accounting I |
MRKTNG 3000 | Principles of Marketing |
MRKTNG 4050 | Marketing Research |
MRKTNG 4420 | Sales Management |
MRKTNG 4650 | e-Marketing |

* Required prerequisite for these courses is MRKTNG 3000.

Multimedia Producing (Interdisciplinary)

The focus of this Interest Area is planning and producing content across medium platforms. A student in this area will have the knowledge and skills to work in traditional newsrooms, Web-only newsrooms, non-traditional news organizations and other growing media areas. A student choosing this path is one who is less interested in a traditional reporting track and is more interested in working with content created by others. Administered by the Convergence Faculty.

Convergence Photojournalism (Interdisciplinary)

This course of study is for those interested in communicating largely through photography and other visual mediums. Skills acquired include documentary photography, lighting and studio techniques, and photo editing with both still and moving images. Students build an appreciation for and understanding of visual communication and can expand into illustrative graphics, video and multimedia management. Students are prepared for careers as photojournalists for print and online publications and as freelancers. Administered by the Convergence Faculty.

BJ in Journalism with Emphasis in Magazine Journalism

Major Program Requirements
Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Arts and Culture Journalism (Interdisciplinary)
This interdisciplinary Interest Area gives students the opportunity to expand their understanding of the arts as they develop critical thinking skills about society, culture and the media. Students are encouraged to see culture as a central part of the journalistic enterprise as they learn about art, music, theatre, popular culture and critical reviewing. This is intended to lay the groundwork for careers not only in traditional and emerging forms of journalism but also as communicators in cultural institutions, museums, nonprofit agencies, government programs and community arts organizations. Administered by the Magazine Faculty.

Arts-In-Depth Classes:
Magazine Editing

Students in this Interest Area focus on the finer aspects of microediting: grammar, style, syntax and usage. They also gain hands-on experience in macroediting: pitching and assigning stories, writing display type, coordinating photography and art, working with designers, fact checking, proofreading and following a publication through all stages of print or online production. Classes provide an analysis of the industry and study of innovative techniques and delivery platforms. Recommended for those who seek careers as editors in the magazine and book-publishing industries. *Administered by the Magazine Faculty.*

**Required Journalism Classes**
- JOURN 4408 Magazine Editing 3
- JOURN 4410 Intermediate Writing 3
- JOURN 4450 News Reporting 3
- JOURN 4506 Magazine Design 3
- JOURN 4984 Magazine Staff (capstone) 3

**Suggested Journalism Electives**

- JOURN 4718 Law and the Courts
- JOURN 4730 Journalism and Conflict
- JOURN 4806 Convergence Editing and Producing
- JOURN 4940 Internship in Journalism
- JOURN 4950 Understanding Audiences

**Suggested Non-Journalism Electives**
- COMMUN 1200 Public Speaking
- MANGMT 3000 Principles of Management
- MRKTNG 3000 Principles of Marketing
- SOCIOL 2310 Culture and Mass Media

Magazine Writing

This Interest Area uses an “intra-disciplinary” approach grounded in magazine traditions, theories and practices. Students learn the power of revision and learn to tell stories with frankness and intimacy. They learn to use narrative storytelling tools: character, key moments, dialogue, telling details and place. The students learn to track the notion of the journalist as a savvy, articulate, thoughtful and emphatic witness of events. *Administered by the Magazine Faculty.*

**Required Journalism Classes**
- JOURN 4408 Magazine Editing 3
- JOURN 4410 Intermediate Writing 3
- JOURN 4450 News Reporting 3
- JOURN 4986 Advanced Writing (capstone) 3

**Suggested Journalism Electives**
Select 10 credits from the following: 10
- JOURN 4148 Interviewing Essentials
- JOURN 4400 Introduction to News Editing
- JOURN 4412 Lifestyle Journalism
- JOURN 4416 Science, Health and Environmental Writing
- JOURN 4418 Critical Reviewing
- JOURN 4420 Editorial Writing
- JOURN 4426 Religion Reporting and Writing
- JOURN 4428 Health Reporting Skills
- JOURN 4430 Computer-Assisted Reporting
- JOURN 4436 Investigative Reporting
- JOURN 4438 Business and Economics Reporting

JOURN 4662  Global News Across Platforms
JOURN 4700  Participatory Journalism
JOURN 4716  Women and the Media
JOURN 4806  Convergence Editing and Producing
JOURN 4940  Internship in Journalism
JOURN 4950  Understanding Audiences

Suggested Non-Journalism Electives

ENGLSH 2010  Intermediate Composition
ENGLSH 2520  Creative Writing: Intermediate Nonfiction Prose
ENGLSH 4520  Creative Writing: Advanced Nonfiction Prose

Arts-In-Depth Classes:
ART_GNRL 2030 & 2030H  Context and Culture and Context and Culture - Honors
MUSIC_NM 2306 & 2306H  Perceiving Musical Traditions and Styles and Perceiving Musical Traditions and Styles - Honors
THEATR 3770  The Theatre Experience: From Page to Stage and Screen

Semester Plan

See your advisor to set up semester plan.

BJ in Journalism with Emphasis in Photojournalism

Major Program Requirements

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Photojournalism Interest Areas

Photojournalism

This Interest Area educates students in the history, theory and skills of photojournalism, including still and moving images, as well as audio. Also covered are the principles and practice of visual editing and design for print and online. Photojournalism students learn to create truly integrated multimedia projects, incorporating audio, video and stills into compelling visual story-telling projects. The program’s essential element remains understanding the power of image, and it embraces all the new technologies in presentation. Students are prepared for careers as photojournalists for print and online publications and as freelancers. Administered by the Photojournalism Faculty.

Required Journalism Classes

JOURN 4556  Fundamentals of Photojournalism 3
JOURN 4558  Advanced Techniques in Photojournalism 3
JOURN 4560  Staff Photojournalism 3
JOURN 4980  The Picture Story and Photographic Essay (capstone) 3

Select one of the following: 3
JOURN 4450  News Reporting
JOURN 4804  Convergence Reporting

Suggested Journalism Electives

Select 10 credits from the following: 10
JOURN 4464  Magazines Across Platforms
JOURN 4500  Publication Design
JOURN 4506  Magazine Design
JOURN 4508  Information Graphics
JOURN 4510  Visual Communication
JOURN 4554  Visual Editing for Multimedia
JOURN 4558  Advanced Techniques in Photojournalism
JOURN 4560  Staff Photojournalism
JOURN 4562  Photojournalism Business Practices
JOURN 4564  Micro-Documentary Photojournalism and Videography
JOURN 4568  History of Photojournalism
JOURN 4710  Newspaper Management
JOURN 4940  Internship in Journalism
JOURN 4980  The Picture Story and Photographic Essay

Suggested Non-Journalism Electives

FILM_S 3550  Introduction to Field Production
IS_LT 4360  Introduction to Web Development
IS_LT 4364  Flash Authoring

Visual Editing and Management

This Interest Area educates students in the skills and theory of picture editing and visual presentation in print and online publications. This will prepare students for careers in visual editing at newspapers, magazines and with online publications. Administered by the Photojournalism Faculty.

Required Journalism Classes

JOURN 4502  Multimedia Planning and Design 3
JOURN 4556  Fundamentals of Photojournalism 3
JOURN 4566  Electronic Photojournalism 3
JOURN 4972  Photo and Visual Editing 3

Take one of these: 3
JOURN 4450  News Reporting
JOURN 4804  Convergence Reporting

Suggested Journalism Electives

Select 10 credits from the following: 10
JOURN 4464  Magazines Across Platforms
JOURN 4500  Publication Design
JOURN 4506  Magazine Design
JOURN 4508  Information Graphics
JOURN 4510  Visual Communication
JOURN 4554  Visual Editing for Multimedia
JOURN 4558  Advanced Techniques in Photojournalism
JOURN 4560  Staff Photojournalism
JOURN 4562  Photojournalism Business Practices
JOURN 4564  Micro-Documentary Photojournalism and Videography
JOURN 4568  History of Photojournalism
JOURN 4710  Newspaper Management
JOURN 4940  Internship in Journalism
JOURN 4980  The Picture Story and Photographic Essay

Suggested Non-Journalism Electives

FILM_S 3550  Introduction to Field Production
IS_LT 4360  Introduction to Web Development
IS_LT 4364  Flash Authoring
BJ in Journalism with Emphasis in Print and Digital News

Major Program Requirements
Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Print and Digital News Interest Areas
Business and Economics Journalism (Interdisciplinary)
This Interest Area is for journalism students interested in learning the skills of reporting business and economics news across platforms. It allows students to add a focus on economic, business and consumer reporting and emphasizes the use of financial data analysis in reporting. Similarly, it encourages students to take basic courses in other subject areas that will give them important skills, such as basic accounting, or advanced economics and finance. Students will gain the skills to work covering Wall Street, government economics, consumer and personal finance issues, and local business. A minor in Economics or Business is suggested. Administered by the Print and Digital News Faculty.

Required Journalism Classes
Select one of the following:
- JOURN 4450 News Reporting
- JOURN 4804 Convergence Reporting
- JOURN 4300 Broadcast News I

Select one of the following:
- JOURN 4460 Advanced News Reporting
- JOURN 4806 Convergence Editing and Producing
- JOURN 4306 Broadcast News II

Select one of the following:
- JOURN 4410 Intermediate Writing
- JOURN 4308 Broadcast News III

Required
- JOURN 4438 Business and Economics Reporting **

Select one of the following:
- JOURN 4992 Reporting, Editing and Marketing of Converged Media
- JOURN 4990 Journalism and Democracy
- JOURN 4974 Advanced Internet Applications for Radio/TV News
- JOURN 4976 Seminar in Radio/TV News
- JOURN 4978 Media Management and Leadership

Suggested Journalism Electives
Select 10 credits from the following:
- JOURN 4148 Interviewing Essentials
- JOURN 4150 Using Infographics
- JOURN 4300 Broadcast News I
- JOURN 4734 Journalism and Chaos: How to Understand and Cover 21st Century Business Models
- JOURN 4414 Field Reporting on the Food System and Environment
- JOURN 4416 Science, Health and Environmental Writing
- JOURN 4410 Intermediate Writing
- JOURN 4436 Investigative Reporting
- JOURN 4508 Information Graphics
- JOURN 4510 Visual Communication
- JOURN 4550 Basic Photography and Photo Editing
- JOURN 4700 Participatory Journalism
- JOURN 4718 Law and the Courts
- JOURN 4728 Confronting Controls on Information
- JOURN 4736 Changing Media Business Models
- JOURN 4940 Internship in Journalism
- JOURN 4950 Understanding Audiences
- JOURN 4986 Advanced Writing
- JOURN 4058 New York Program: Journalism Theory and Practice
- ACCTCY 2010 Introduction to Accounting
- ACCTCY 2026 Accounting I
- ECONOM 3229 Money, Banking and Financial Markets
- ECONOM 4315 Public Economics
- FINANC 2000 Survey of Business Finance
- FINANC 3000 Corporate Finance
- MANGMT 3000 Principles of Management
- MRKTNG 3000 Principles of Marketing
- NAT_R 4325 Introduction to Geographic Information Systems GIS
- GEOG 3040 Introduction to Geographic Information Systems GIS
- POL_SC 2100 State Government
- POL_SC 2200 The Judicial Process
- POL_SC 4000 Introductory Statistics for Political Science
- POL_SC 4100 Political Parties and Election Campaigns
- POL_SC 4320 Public Policy

Multiplatform Design (Interdisciplinary)
This Interest Area teaches students to tell stories visually across online and print platforms. Students learn to make decisions about the framing and packaging of information, and the effects of those decisions on user perceptions. They learn to design in a way that lets the users take control of their information consumption and to use multimedia tools to enhance a story or persuasive message, not distract from it. Administered by the Print and Digital News Faculty.

Required Journalism Classes
- JOURN 4902 Multimedia Planning and Design

Select one of the following:
- JOURN 4450 News Reporting
- JOURN 4804 Convergence Reporting
- JOURN 4400 Introduction to News Editing
- JOURN 4408 Magazine Editing
News Reporting (Interdisciplinary)

This Interest Area provides the opportunity for reporting and writing across a variety of styles and platforms, including breaking news, enterprise and features. Stories are reported and produced using words, video, audio, graphics and more. The program of study prepares students for jobs in online media, and print publications such as newspapers, magazines and nonprofit organizations. Administered by the Print and Digital News Faculty.

News Editing

Students in this Interest Area learn the fundamentals of editing to correct and present copy for publication; content management, selection and display; how to evaluate content; copy flow and time management needed for publishing on deadline, whether that be at a set time or throughout a 24-hour cycle. The program of study prepares students for jobs in online and print publications, including newspapers, magazines and nonprofit organizations. Administered by the Print and Digital News Faculty.

News Design

This Interest Area teaches students to tell stories using the tools of visual journalism. Students learn to make decisions about the framing and packaging of information, and the effects of those decisions on user perceptions. Through hands-on-work in the Columbia Missourian newsroom, students gain real-world experience that prepares them to organize information and be clear visual communicators. The program of study prepares students for jobs in online and print publications, including newspapers, magazines and nonprofit organizations. Administered by the Print and Digital News Faculty.

**Sports Journalism**

This Interest Area is for those interested in pursuing a career in sports journalism at any level. Covering sports today includes not only knowing the games but also knowing about the larger financial, legal and ethical issues in sports. Students in this interest area have an opportunity to work across media platforms to gain experience in covering games, finding in-depth issue and feature stories and covering breaking news in sports. Students choose a core course of study through a specific emphasis area (convergence journalism (p. 579), magazine journalism (p. 582), or print and digital news (p. 585)), then pick from a wide range of electives to round out their skills. Electives include everything from advanced reporting and editing to business journalism, to social media techniques and community outreach.

**Note:** Students who want to do sports reporting with KOMU must be in or have taken JOURN 4308 Broadcast News III.

**Watchdog Journalism (Interdisciplinary)**

This Interest Area is for journalism students interested in learning the skills of investigative and computer-assisted reporting across platforms. It allows students to add a strong investigative-watchdog focus and emphasizes the use of data analysis in reporting. The program encourages students to develop a specialty area, such as covering health care or religion, but that is not required. Similarly, it encourages students to take basic courses in other subject areas that will give them important skills, such as introductory accounting (though again, this is not required). Students will gain the skills to work in computer-assisted reporting or investigative reporting. Students choose a core course of study through a specific emphasis area (convergence journalism (p. 579), magazine journalism (p. 582), or print and digital news (p. 585)), then pick from a wide range of electives to round out their skills. Electives include everything from advanced reporting and editing to business journalism, to social media techniques and community outreach.

 BJ in Journalism with Emphasis in Radio-Television Journalism

Major Program Requirements

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Radio-Television Interest Areas

Radio-Television Producing

This Interest Area teaches students how to structure, write and build a newscast. They will receive instruction in newsroom leadership and practice guiding a newscast to completion in the professional newsrooms and control rooms of KBIA Radio and KOMU-TV. Administered by the Radio-TV Faculty.

Semester Plan

See your advisor to set up a semester plan.
Radio-Television Reporting and Anchoring

This Interest Area will teach students how to gather the information they will need to write and edit stories for radio, television and the Internet. They also will learn on-air delivery techniques and receive instruction on how best to deliver their journalism. They will do so in the professional newsroom settings of KBIA Radio and KOMU-TV. Administered by the Radio-TV Faculty.

</table>
This interest area is for those students who are preparing for a career in sports journalism at any level. Covering sports today includes not only knowing the games, but also knowing about the larger financial, legal and ethical issues in sports. Students in this interest area have an opportunity to work across media platforms to gain experience in covering games, finding in-depth issue and feature stories and covering breaking news in sports. Students choose a core course of study in the radio-television journalism emphasis area. Students then pick from a wide range of electives to round out their skills and work in other media. Electives include everything from advanced reporting and editing to business journalism, to social media techniques and community outreach.

**Required Journalism Classes**
- JOURN 4300 Broadcast News I
- JOURN 4306 Broadcast News II
- JOURN 4308 Broadcast News III
- JOURN 4422 Sports Journalism

Take one of these capstones:
- JOURN 4974 Advanced Internet Applications for Radio/TV News
- JOURN 4976 Seminar in Radio/TV News
- JOURN 4978 Media Management and Leadership

**Suggested Journalism Electives**
- JOURN 4148 Interviewing Essentials
- JOURN 4150 Using Infographics
- JOURN 4320 Advanced Broadcast Reporting (The Sports Section)
- JOURN 4406 News Editing
- JOURN 4410 Intermediate Writing
- JOURN 4416 Science, Health and Environmental Writing
- JOURN 4436 Investigative Reporting
- JOURN 4438 Business and Economics Reporting
- JOURN 4440 Mapping for Stories and Graphics
- JOURN 4508 Information Graphics
- JOURN 4510 Visual Communication
- JOURN 4550 Basic Photography and Photo Editing
- JOURN 4950 Understanding Audiences
- JOURN 4700 Participatory Journalism
- JOURN 4718 Law and the Courts
- JOURN 4728 Confronting Controls on Information
- JOURN 4738 Thought, Language and Journalism
- JOURN 4940 Internship in Journalism
- JOURN 4986 Advanced Writing

**Suggested Non-Journalism Electives**
- P_R_TR 1080 Introduction to Sport Management
- P_R_TR 1081 Sport Facility Design
- P_R_TR 2082 Domestic and International Sports Environment
- P_R_TR 2083 Technological Advancement in Sport
- P_R_TR 2281 The Business of Sport

- P_R_TR 3282 Governance and Policy in Sport and Leisure
- P_R_TR 4385 Legal Aspects of Sport
- HSP_MGMT 1505 Fundamentals of Sport Venue Management
- HSP_MGMT 3510 Guest Service Management: Delivering the Fan Experience
- HSP_MGMT 3515 Sport Venue Operation Management
- HSP_MGMT 4520 The Business of Sport Venue Management
- HSP_MGMT 4525 Sport Venue Security and Operational Risk Management

* Students who want to do sports reporting with KOMU-TV must be in or have taken JOURN 4308 Broadcast News III.

**Radio-Television Watchdog Journalism**
This interest area is for journalism students interested in learning the skills of investigative and computer-assisted reporting for radio and television news. Students choose their core course of study in radio-television journalism. The interest area builds student skills in investigative reporting and using data analysis in reporting. It also encourages, but does not require students to use elective coursework to develop a specialty area such as business news, health care or religion reporting. Through this interest area, students will gain the skills to work as an investigate reporter or producer in radio or television news.

**Required Journalism Classes**
- JOURN 4430 Computer-Assisted Reporting
- JOURN 4436 Investigative Reporting
- JOURN 4300 Broadcast News I
- JOURN 4306 Broadcast News II
- JOURN 4308 Broadcast News III

Take one of these capstones:
- JOURN 4974 Advanced Internet Applications for Radio/TV News
- JOURN 4976 Seminar in Radio/TV News
- JOURN 4978 Media Management and Leadership

**Suggested Journalism Electives**
- JOURN 4150 Using Infographics
- JOURN 4330 From Murrow to Moore: What Good Journalists Read
- JOURN 4414 Field Reporting on the Food System and Environment
- JOURN 4416 Science, Health and Environmental Writing
- JOURN 4426 Religion Reporting and Writing
- JOURN 4438 Business and Economics Reporting
- JOURN 4440 Mapping for Stories and Graphics
- JOURN 4508 Information Graphics
Students who want to do investigative work with KOMU-TV must be in or have taken JOURN 4308 Broadcast News III.

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

This Interest Area educates students in the principles and practice of all communication designed to create a desired response from a given audience. It includes focused study and hands-on practice within the Pathways of Account Management, Art Direction, Copywriting, Media Planning, Public Relations, Research and Interactive-and prepares students for careers in these seven areas. Crossover between these Pathways is permissible and encouraged. Administered by the Strategic Communication Faculty.

International Strategic Communication

The next generation of strategic communication students must be equipped to work in a global environment. This Interest Area is designed to capitalize on Missouri's international reputation and its international resources by placing under one umbrella the school's existing Study Abroad opportunities, its internationally focused media and multimedia projects with global partners. Students in this area take Strategic Communication courses to complement their international interests. The Strategic Communication Interest Area is administered by the School's International Programs Office.

**Required Journalism Classes**

</tbody>
</table>

These are the classes the School of Journalism currently offers for international and U.S. exchange, MU interdisciplinary and general studies majors plus non-degree seeking undergraduate students. These courses are not skills-oriented and frequently have room for non-majors to enroll. JOURN 1000 also was intended as a class for non-majors.

The selected courses focus on news media and society issues. Students can choose whatever combination of classes they wish to reach 15 credits. Journalism minors are ineligible to take any other courses with the School of Journalism. Journalism minors may take no more than 15 credits within the School of Journalism.

Registration

MU students can register for JOURN 1000 through regular procedures. For all other courses, journalism minors place their course preference on a waiting list. Students are eligible to enroll after course registration by journalism majors is completed. The School’s designated liaison for journalism minors will inform students when course space is available following registration periods each semester.

Academic Status

Journalism minors are subject to probationary or suspension status as determined by the division in which each student’s major resides. Journalism minors who receive lower than a C- in any journalism course must repeat it and complete with a C- or better. Journalism courses may only be repeated one time. Upon repeating a course, if a student fails to earn a C- or better, the student is no longer eligible for the Journalism Minor.

Fees

Journalism minors must pay School of Journalism activity fees for all journalism courses.

Advising

Journalism minors will not be assigned a faculty advisor or an academic advisor within the Journalism School. Academic advising occurs in the division of each student’s major. Journalism minors are free to consult...
with the school’s designated liaison and with the School of Journalism faculty on course-specific matters at any time. Journalism minors also can consult on longer-range career and professional issues with journalism faculty. However, faculty advising priority is given to journalism majors.

Career Services

Journalism minors are ineligible to interview with prospective employers who visit the School of Journalism. Journalism minors should interview employers in their home division. The School of Journalism’s placement website is open for use by journalism minors. Journalism minors can consult with the School of Journalism’s Career Service Coordinator, although priority is given to journalism majors and Pre-Journalism students.

Other Disciplinary Actions

Disciplinary actions for Journalism minors are the same as for Journalism majors. All cases of alleged academic misconduct will be immediately forwarded and reviewed by the MU Provost’s office. All cases of classroom misconduct will be immediately forwarded and reviewed by the office of the Vice Chancellor for Student Affairs.

http://journalism.missouri.edu/programs/online/

About the Master of Arts

The program leading to the MA degree is designed to accommodate several objectives, including: comprehensive professional preparation for careers in the news media and mass communications; expansion of previous professional preparation and experience (e.g. newspaper editing) into a new area (e.g. broadcasting reporting); comprehensive academic preparation for careers in journalism teaching and research; and combinations of the three.

Degree Options

Program Models

Students choose from more than 20 program models, covering the full range of skills and media of journalism. Because the faculty periodically updates these models, students should visit the school’s Web site for the latest details. In addition to the course work in any model, students complete either a thesis or a professional project. Students who make progress on the degree requirements and maintain at least a B average each semester are considered to be in good standing.

Five-year Bachelor to Master Program

Another option for students who seek a master’s degree is the 5-year bachelor to master’s program (http://journalism.missouri.edu/programs/masters/models-and-programs/five-year-bjma-models). To be eligible for this option, students must have completed a bachelor’s degree in journalism from Missouri. Students following the 5-year plan are expected to carry 10-12 hours per semester and will graduate after completion of two semesters of course work and a third semester of project or thesis. Only graduates of Missouri Journalism’s undergraduate program are eligible for the BJ/MA program.

Joint Journalism and Law Programs

The School of Journalism and the School of Law have created joint programs (http://journalism.missouri.edu/programs/masters/models-and-programs/journalism-law-programs) that provide an opportunity to earn a MA in Journalism and either a JD or a LLM from Law. Students in the joint programs complete one of the journalism models and the course requirements for the law degree with a block of courses that are used for both degrees.

Dual-degree option with Masters of Public Health

The School of Journalism and the program in Public Health have created a dual-degree option (p. 662) that allows students to earn a journalism degree in reporting or strategic communication with an emphasis in public health. Students complete a block of courses in public health, as well as in journalism, and complete the dual degree with a public health internship and capstone, in which the focus is on journalism or strategic communication.

Distance Learning

Professional journalists or others who cannot travel to mid-Missouri to attend the on-campus program might consider doing their program in an online format. Health communication, interactive media, media management and strategic communication models are available through distance learning to applicants who have a minimum of three years professional journalism-related experience. Students in the online program are required to make two short visits, two to three days each, to campus during their program. Learn more about our online master’s programs here http://journalism.missouri.edu/graduate/online/.

Master’s Admission Criteria

Campus program deadlines:
Fall deadline: January 1
Spring deadline: September 1

Online program deadlines:
Fall deadline: July 1
Spring deadline: November 15
Summer deadline: April 15

• Minimum Academic IELTS scores:

<table>

<tr>
<td>OVERALL Score</td>
<td>7.0</td>
</tr>
</tbody>
</table>

• Minimum TOEFL scores:
Internet-based test (iBT)  Paper-based test (PBT)
Speaking: 25  600

• Suggested GRE scores:
When did you take the GRE?  Verbal + Quantitative
Prior to August 1, 2011  1100
On or After August 1, 2001  V: 153-160; Q: 144-148

• Minimum GPA: 3.0 in last 60 hours

Note: Deadlines are adhered to strictly, and no applicant is considered for admission until all required information is received.

Required Application Materials

To the Graduate School
All required Graduate School documents

To the Journalism Master’s Program:

Please upload the following application materials into the online Graduate School application in Apply Yourself:

• 3 essays as specified on Departmental application website
• Résumé
• 3 letters of recommendation (use the online Graduate School application system)

Please submit official GRE scores to:
Earl English Graduate Studies Center
Missouri School of Journalism
University of Missouri
179 Gannett Hall
Columbia, MO 65211-1200

Financial Aid from the Program

Limited fellowships, assistantships, scholarships and other financial aid opportunities are available. All applicants for admission are considered for any available funding. No separate application form is needed. Check the program Web site or ask the program contact for details.

Plan of Study

Two-year students are required to complete a minimum of 37 hours, at least half of which must be in 8000-level courses. Five-year BJ-MA students complete a minimum of 30 hours (15 hours at the 8000-level). Specific course requirements vary depending on the option selected.

Professional Project or Thesis

Students must enroll in either the Project Seminar or the Thesis Seminar in the semester prior to embarking on their professional project or thesis. These seminar courses guide students in developing proposals for their professional project or thesis. After proposal approval, students enroll in 8190, Area Problem (for projects) or 8090, Research (for Thesis). Students earn an additional nine credit hours for either the professional project or thesis research.

Students in any model may choose to complete the professional project or thesis off campus. The school operates program in WAshington DC, Brussels and Bueno Aires which are supervised by full-time faculty members. In the Missouri state capital the school has a program focusing on public affairs reporting in any medium. Other off-campus opportunities can be arranged.

Length of Study

The degree must be earned within eight years of beginning the program.

MA in Journalism with Emphasis in Health Communication

Degree Requirements

The Health Communication emphasis area is available in the online MA program. This area, which includes a minimum of 37 credits to graduate, includes both required and elective courses. The electives may be courses from within the same area, from another area or transferred graduate hours from another accredited institution. For students with special needs, an individualized curriculum may be designed with the student’s advisor, subject to approval of the associate dean for graduate studies.

Core Requirements

The program core is completed by all students:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>JOURN 8000</td>
<td>Mass Media Seminar</td>
<td>3</td>
</tr>
<tr>
<td>JOURN 8006</td>
<td>Quantitative Research Methods in Journalism</td>
<td>3</td>
</tr>
<tr>
<td>JOURN 8008</td>
<td>Qualitative Research Methods in Journalism</td>
<td>3</td>
</tr>
<tr>
<td>JOURN 8070</td>
<td>Proseminar in Communications</td>
<td>1-3</td>
</tr>
<tr>
<td>JOURN 8080</td>
<td>Media Ethics</td>
<td>3</td>
</tr>
</tbody>
</table>

Emphasis Area Electives

Students may select 15-17 hours of the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>JOURN 7000</td>
<td>Communications Law</td>
<td>3</td>
</tr>
<tr>

<td>3</td>
</tr>
<tr>
<td>JOURN 8058</td>
<td>Communication in Media Organizations</td>
<td>3</td>
</tr>
</tbody>
</table>

Thesis/Non-thesis Requirements

Students may choose from two options: thesis or professional project. The thesis is an independent research study and is appropriate for students who may intend to pursue a doctorate. The professional project is appropriate for students who wish to work as professionals in the journalism industry.

To prepare for the capstone semester students will enroll in either JOURN 8100 MA Thesis Seminar, or JOURN 8098 MA Project Seminar, in the semester prior to their capstone. During the seminar students will form their faculty committee and develop and gain approval for their thesis or project proposal. Successful completion of the seminar is one of the prerequisites to beginning the capstone semester.
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Journalism program (http://gradschool.missouri.edu/academics/programs/journalism) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MA in Journalism with Emphasis in Interactive Media

Degree Requirements

Core Requirements

The program core is completed by all students:

- JOURN 8000 Mass Media Seminar 3
- JOURN 8006 Quantitative Research Methods in Journalism 3
  or JOURN 8008 Qualitative Research Methods in Journalism
- JOURN 8070 Proseminar in Communications 1-3
- JOURN 8080 Media Ethics 3

Emphasis Area Requirements

Students may select 15-17 hours of the following courses:

- JOURN 7150 Using Infographics 1
- JOURN 7256 Public Relations 3
- JOURN 7262 Interactive Advertising I 3
- JOURN 7510 Visual Communications 2-3
- JOURN 7700 Participatory Journalism 3
- JOURN 7736 Changing Media Business Models 3

PhD in Journalism

Admission Contact Information

Sarah Smith-Frigerio (smithfrigerios@missouri.edu)
179A Gannett Hall
Columbia, MO 65211
573-882-6194
http://www.journalism.missouri.edu/graduate/doctoral/

About the Doctorate

The objective of the doctoral program is to develop an ability to conduct independent and advanced scholarly research and to integrate this skill with a depth of scholarship in journalism and mass communication. Although it is primarily a research degree, the PhD is designed to facilitate a variety of academic aims. Students must expand their intellectual horizons, gain a theoretical framework for examining and understanding communication and refine their own communication competencies.

Doctoral Admission Criteria

Fall deadline: December 15
Spring deadline: September 1

- Minimum Academic IELTS scores:
  - Listening
  - Reading
  - Writing
  - Speaking: 7.0
  - OVERALL Score: 7.0

- Minimum TOEFL scores:
  - Internet-based test (iBT): 100
  - Paper-based test (PBT): 600

- Minimum GRE scores:
  - Verbal + Quantitative
  - Prior to August 1, 2011: 1100
  - On or After August 1, 2011: V: 156+; Q: 146+

- Minimum GPA: 3.0, undergraduate; 3.5, graduate

Applicants should have demonstrated interest, education or professional experience in journalism, advertising, public relations, mass
communication or a related field. A degree (bachelor’s or master’s) in one of those fields or two years of full-time professional media experience is preferred. All required information must be received before the admission review can begin. Applicants may be required to participate in an interview with the doctoral faculty as part of the review process. Students who did not write a thesis in their master’s program may be required to complete a project to demonstrate their ability to do independent research.

Deadlines for application are December 15 for fall entry and September 1 for spring. Deadlines are firm, and no applicant is considered for admission until all required information is received.

Required Application Materials

Upload the following application materials into the Graduate School’s online application system:

• All required Graduate School documents
• Statement of Doctoral Objectives
• Résumé
• An abstract of your master’s thesis (or thesis proposal, if your thesis is not yet complete)
• Unofficial transcripts
• 3 letters of recommendation (use the online Graduate School application system)

Financial Aid from the Program

Doctoral students are provided assistantship and scholarship support for a maximum of six terms (three years). Contact the department for details on this financial assistance.

Plan of Study

Doctoral study in journalism and mass communication is an interdisciplinary enterprise. The doctoral program is designed by the student in collaboration with the adviser and doctoral committee. Course selections are based on the intellectual requirements of the dissertation and the teaching areas the student wishes to pursue. No courses that focus primarily on professional skills may be counted toward the doctoral program, whether taken at the master’s or the doctoral level. Courses from journalism should compose no more than two-thirds of the total credit.

Students must develop two research tools, pass qualifying and comprehensive examinations, submit and defend a dissertation, and satisfactorily meet all other requirements of the Graduate School. Doctoral Proseminar I (JOURN 9000), Doctoral Proseminar II (JOURN 9006), Doctoral Seminar (JOURN 9010) and Doctoral Research Seminar (JOURN 9087) are required of all PhD students.

Foreign Language & Research Tool Requirements

Students are expected to have a background in a foreign language and to develop a research tool. The language requirement may be met by three semesters of college-level foreign language courses or an equivalency acceptable to the doctoral faculty. At the discretion of the student’s doctoral committee and the associate dean for graduate studies, a second tool may be used to substitute for the language requirement.

There are four research tool options:

1. competency in a second foreign language. This may be satisfied by two years of college-level work recently passed with a grade of C or better or an acceptable ETS score. A foreign language is one that is non-native or not the primary language used in the student’s school system;
2. computer proficiency as evidenced by completion of two computer courses or an equivalency acceptable to the doctoral faculty;
3. two courses in statistics;
4. two 7000 or 8000-level research methods courses outside the School of Journalism.

A grade of A or B must be made in any course used for options 2, 3 or 4.

Teaching

Doctoral students who plan to teach will participate in a teaching program. Each student’s teaching skills will be evaluated in the first year of study, at which point planning for the student’s future teaching opportunities begins. Most students will serve as teaching assistants in such classes as JOURN 1100 or JOURN 2100 during their third semester in the program.

In the student’s fourth semester, he/she may have an additional teaching experience, either as a teaching assistant, co-instructor or instructor of record in a course. Depending on the student’s ability and desire, students might teach a course independently during later semesters.
Additional Minors and Certificates - Journalism

Undergraduate

Graduate

• Minor in Law and Conflict Resolution for Journalism Doctoral Students

Graduate Minor in Law and Conflict Resolution for Journalism Doctoral Students

This program is designed for doctoral students who are interested in teaching and researching in journalism and law and conflict resolution in a school of journalism or communication department. Under the program, students may receive the Minor upon completion of at least 15 credits at the Law School, including both core courses and at least 9 credits of electives. The Minor will appear on the student’s transcript.

Required Core Courses

<table>
<thead>
<tr>
<th>Course</th>

<td>LAW 5760</td>
<td>Media Law</td>
<td>3</td>
</tr>
<tr>
<td>or JOURN 8038</td>
<td>Seminar in Communications Law</td>
<td></td>
</tr>
</tbody>
</table>

Electives

Students may take any available course at the Law School in satisfying this requirement. Actual course offerings and availability vary by semester, and enrollment is subject to professor approval. The following courses are ones that are expected to be generally available. They are grouped by tracks to help students more quickly identify areas of specific interest, and to develop deeper concentrations in desired areas. However, students may take any of the courses in meeting the elective requirement for the Minor. Students should consult with a member of the School of Law faculty or administration about which Law School courses or sequences may be most appropriate to the student’s curricular needs.

Electives - Track 1: Civil Rights and International Law

<table>

* Limited Enrollment. Course likely to be full. Law students have first priority.
School of Nursing

Administration
Judith F. Miller, Dean
Roxanne McDaniel, Associate Dean for Academic Affairs
Vicki Conn, Associate Dean for Research

Office of Student Affairs
S235 Nursing School Bldg.
(573) 882-0277

The nursing program at MU began in 1901 with the establishment of Parker Memorial Hospital Training School. Today, the Sinclair School of Nursing is committed to promoting, maintaining and improving health and health-care delivery in Missouri and worldwide through nursing education, research and service. Nursing faculty combine research and education to offer students hands-on experience in the art and science of nursing.

The School of Nursing is approved by the Missouri State Board of Nursing and has national accreditation.

The undergraduate program is approved by the Missouri State Board of Nursing and has national accreditation.

The School is also committed to rural health care and to educating nurses for practice in rural Missouri. Therefore, the School seeks to ensure that the student body includes persons from rural Missouri and persons of backgrounds that are underrepresented in the nursing workforce.

Commitment to Diversity and the call of the American Nurses Association holistically for each admission period. The School values MU's codes of the nursing profession; and

RN to BSN Option
The RN to BSN online option is for registered nurses who have earned a diploma or associate degree in nursing with a cumulative GPA of a 2.8 of higher and seek a bachelor’s degree in nursing. RN to BSN courses are offered via the Internet with limited trips to campus for some nursing course.

RN to BSN registered nurse applicants must meet the same admission standards described above for the Traditional BSN Option. They must be currently licensed to practice nursing (or eligible for licensure) in Missouri or another state. Completion of the program includes 120 credit hours. The length of the program varies, depending on equivalent prerequisite courses completed and choice of part-time or full-time enrollment.

BSN Accelerated Option
The BSN Accelerated Option is a 15 month program designed for individuals who hold a non-nursing degree at the baccalaureate level or higher.

Students are admitted to the Accelerated BSN Option based on the following criteria:

- A baccalaureate or higher degree from an accredited college or university.
- Two letters of reference from individuals that can attest to the student’s motivation and ability to complete a course of intensive study.
- Statement of career goals
- Description of the applicant’s view of nursing as a profession.
- A personal interview.
- Evidence of academic achievement of a 3.0 cumulative GPA or higher on a 4.0 scale on undergraduate degree.
- Completion of prerequisite courses with a minimum of a C or better
- Evidence of potential and motivation for nursing.
- Evidence of prior work success and/or ability to handle a fast-paced academic program.

A Bachelor of Science (BSN) degree is awarded at graduation, and the graduate may be eligible to take the licensing examination to become a registered nurse (RN).

Transfer Students
Students transferring to MU from another accredited institution of higher education or other schools and colleges within the University are subject to the regulations established by the MU Faculty Council concerning transfer of credit.

For more information regarding the transfer guidelines for the School of Nursing, call (573) 882-0277. Prior to admission, transfer students must have the following:

- Appropriate GPA for credit hours attempted, 3.0 cumulative GPA or higher
International Students
In addition to the admission criteria described above, international students must meet the following criteria:

- Test of Written English (TWE) score of 4 or higher
- Test of Spoken English (TSE) score of 50 or higher
- TOEFL score of 600 (paper-based) or 250 (computer-based) or 100 (internet-based)
- English Language Support Program Test taken with success

Advising
The academic advisor’s office is in room S235 of the School of Nursing Building, (573) 882-0277. In addition, each clinical nursing major is assigned a faculty advisor who is available for consultation about academic or professional matters.

Health Care
Nursing students participate in a variety of on- and off-campus educational experiences. The School of Nursing does not assume responsibility for health-care expenses incurred in either setting. Students assume responsibility for all health care for illness and injury, including emergency treatment. Student Health is located at University Physicians Medical Building, 1101 Hospital Drive, (573) 882-7481. For additional information, visit their web site at http://studenthealth.missouri.edu/.

Graduate Nursing Graduate Programs
Sinclair School of Nursing
S235 Sinclair School of Nursing Building
573-882-0277
http://nursing.missouri.edu/

About the Sinclair School of Nursing
Nursing was an integral part of the Parker Memorial Hospital Training School, which served as the university’s first hospital in 1901. Although a nursing program was not officially established until 1920 within the School of Medicine, MU graduated its first nursing class in 1904. Sixteen years later, the Curators approved a Graduate Nursing designation. Today, the Sinclair School of Nursing provides a rich and rewarding learning environment for our students. Our faculty includes knowledgeable and skillful teachers, respected scholars and researchers in the nursing profession, and experienced, caring practitioners. The master’s program is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Technology Requirements

- Student will require a computer with a video card (responsibility of the student).
- Computer plus laptop is ideal for clinical courses and on-campus sessions.
- For home: 384K minimum download/upload speed; a business connection best for quality. If using satellite or wireless – connection delays may be a problem and you are expected to find a site near your home to make connection for classes.
- For work: firewalls need to be evaluated, conducive location when at work – not interfering with work.
- Quality – testing (initial, and 30 minutes before classes and as needed)
- Logitech camera (webcam)
- Headset with microphone or speakers and microphone.
- Windows XP or newer, with 1GB RAM, 80GB Hard Drive, 2.0Ghz or better processor (Core 2 Duo -Dual Core preferred).
- Microsoft Office – latest version (to purchase)
- Endnote (to purchase)
- E-mail capabilities
- Functional Anti-Virus Software (example: Norton-Symantec/McAfee) (software)

Career Preparation
The DNP program prepares nurses to develop clinical programs based on the latest evidence. The student will choose an area of study (Adult or Pediatric CNS, FNP, PNP, or FMHNP) on which to focus their clinical practice. Successful completion of the program prepares nurses for an advanced clinical practice in primary care, hospital and community settings as well as leadership roles in practice settings and clinical faculty positions.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.
Nursing

The school offers a baccalaureate program that prepares students for the general practice of nursing, a master’s degree program that prepares advanced-practice nurses and a doctoral degree program. The continuing education program serves practicing nurses throughout the state to update and increase nursing knowledge and skills.

The graduate of the baccalaureate program is a generalist in the practice of nursing, able to design, implement, and evaluate nursing systems for individuals, families, and small groups. As a generalist, the graduate uses a general concept of nursing as a framework for integrating and organizing specific knowledge in nursing, the sciences and the humanities. Graduates begin their professional careers with a focused nursing perspective and, along with other professional health providers, assume responsibility for meeting the health needs of our society.

Faculty

Assistant Professor T. Bloom**, U. Jefferson*, K. Lane**, T. Ruppar**, A. Vogelsmeier**
Associate Teaching Professor J. E. Bostick*, S. Farrah, D. Gayer*, J. Sherman*
Assistant Teaching Professor K. Bowman*, M. Butler, R. Harris*, L. Kuensting*, G. M. Oliver*, D. Pennington*
Adjunct Associate Professor C. Brooks
Adjunct Assistant Professor C. Crumley*, M. Goedert*, K. Metcalf-Wilson*, C. Stowe-Byrd*, C. S. Ulbrich*
Adjunct Instructor M. Creger, W. Evans, L. Hathaway, G. Kelly, L. Phillips, S. Revelle, J. Welborn, C. Yonkman
Teaching Professor L. Miller*
Associate Research Professor B. Wakefield**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BSN in Nursing (p. 606)

Academic Regulations

Credit by Examination

RN to BSN and Accelerated BSN students may earn advanced-standing credit in some courses by satisfactorily completing examinations. Those who elect not to take the examinations or who fail to achieve satisfactory results are required to enroll in the courses. The cumulative grade point average is not affected by examination results. A student who has a record of enrollment in a support course with a grade lower than C is not eligible later for credit on the basis of an examination covering the same subject.

The student may acquire advanced standing by taking subject CLEP examinations in university general education courses and required support courses. If no CLEP examination is offered, department examinations may be available. More information on CLEP examinations is available through MU Testing Services.

Distance Education Courses

Certain courses offered by the Mizzou Online (self-paced) may be applied toward degree requirements. Courses such as literature, advanced psychology or sociology may be taken through independent study.

Students should not expect to begin nor continue work on independent study courses during the regular semester except by special permission of the associate dean and then only when carrying less than a full course load in residence.

Progression Criteria

Pre-nursing Years

- Satisfactory academic standing requires a minimum semester GPA of 2.0 and a cumulative GPA at or above the standards listed below:

<table>
<thead>
<tr>
<th>Class</th>
<th>Semester</th>
<th>Credits</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>1st semester</td>
<td>1-15</td>
<td>2.8</td>
</tr>
<tr>
<td>Freshman</td>
<td>2nd semester</td>
<td>16-30</td>
<td>3.0</td>
</tr>
<tr>
<td>Sophomore</td>
<td>3rd semester</td>
<td>31-45</td>
<td>3.0</td>
</tr>
<tr>
<td>Sophomore</td>
<td>4th semester</td>
<td>46-60</td>
<td>3.0</td>
</tr>
</tbody>
</table>

- A grade of C or better is required for anatomy, biology, chemistry, ENGLSH 1000, human development, microbiology, nutrition, physiology, nursing courses and Writing Intensive courses. A grade of “C-” or better is required in algebra or statistics. A grade of “F” is unacceptable for any course.
- Students may repeat a course in which an unsatisfactory grade was earned. If less than a C is earned on repetition of a course, students are ineligible to continue enrollment in the School of Nursing.
- Students who are in the traditional BSN option and withdraw in good standing for any reason must contact the Associate Dean for readmission.

Clinical Nursing Years

- Progression into the next semester’s nursing courses is contingent on the completion, with a grade of C or better, of all of the previous semester’s courses.
- A satisfactory academic standing for clinical students is a minimum semester GPA and cumulative GPA of 2.0.
- A grade of C or better is required for all nursing courses. One repetition of a course is permitted, but requires ap-proval of SAP committee. Students who earn less than a C on repetition of a nursing course are ineligible to continue enrollment in the School of Nursing.
- Students in the clinical nursing phase who withdraw in good standing for any reason must contact the Associate Dean for readmission.

Probation and Academic Dismissal

The faculty of the School of Nursing has established criteria governing nursing probation and dismissal.
Pre-nursing Years

• Students who do not meet the requirements set forth in the progression criteria are placed on academic probation. They must attain the cumulative grade point average required for their classification, as outlined previously, within two semesters or they are ineligible to re-enroll in the School of Nursing, and must transfer divisions.
• A student whose semester GPA falls below 1.0 is ineligible to re-enroll at MU for the period of one year.

Clinical Nursing Years

• A student who does not meet the requirements set forth in progression criteria is placed on academic probation.
• A student on academic probation must obtain a cumulative GPA of 2.0 within two semesters or is ineligible to re-enroll in the School of Nursing.
• Students who have been dismissed may reapply through the established admissions procedure for all students and petition the Faculty Assembly Student Admissions and Progression Committee. Students who are readmitted are guided by the rules in operation for the class they join.
• A student in the clinical nursing phase who has been dismissed from the School of Nursing for a second time may not reapply for admission.

Additional Requirements

Students in the clinical phase of the degree requirements must be prepared to provide their own transportation to clinical agencies. In addition, they must meet the following requirements:
• Valid CPR certificate
• yearly TB tests
• Hepatitis B series
• School of Nursing medical form showing current immunizations
• Negative drug screen
• Criminal background check

Practicums

Clinical practicums (patient/client care) are an integral part of the curriculum. Students have the opportunity to practice in a variety of health care and related agencies, including:
• University of Missouri Health Care
• Boone Hospital Center
• Truman Veterans Hospital
• Fulton State Hospital
• Mid-Missouri Mental health Center
• Multiple county and city health departments
• Long-term care facilities
• Day-care centers
• Schools (K-12)

Licensure by the Missouri State Board of Nursing

On receipt of the Bachelor of Science in Nursing degree, students may be eligible to take the NCLEX examination for licensure as registered nurses. The Missouri State Board of Nursing grants a license to practice to persons who meet the policies and regulations contained within the Nursing Practice Act, Chapter 335.011 to 335.096.

About the Sinclair School of Nursing

Sinclair School of Nursing
S235 Sinclair School of Nursing Building
573-882-0277
http://nursing.missouri.edu/

Nursing was an integral part of the Parker Memorial Hospital Training School, which served as the university’s first hospital in 1901. Although a nursing program was not officially established until 1920 within the School of Medicine, MU graduated its first nursing class in 1904. Sixteen years later, the Curators approved a Graduate Nursing designation. Today, the Sinclair School of Nursing provides a rich and rewarding learning environment for our students. Our faculty includes knowledgeable and skillful teachers, respected scholars and researchers in the nursing profession, and experienced, caring practitioners. The master’s and Doctor of Nursing Practice (DNP) program is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Facilities and Resources

Graduate students in the School of Nursing have access to all campus libraries and the various services they provide. The School of Nursing building is adjacent to University Hospital and Clinics, MU Psychiatric Center and Ellis Fischel Cancer Center. Women and Children’s Hospital is located nearby. A variety of learning experiences also are available
Career Opportunities
Nursing is a professional career for those who would like to combine the following words in any number of ways: Servant leadership, challenge, advanced nursing skills, caring, science, and meaningful work. Graduates of our program work in a variety of settings - from hospital inpatient units and hospital based clinics, to community health centers, private practices, and schools, to areas of research and teaching.

Funding
Financial assistance is available as scholarships, fellowships, assistantships and traineeships.

Undergraduate

BSN in Nursing

Major Core Requirements
The completion of all requirements for graduation is the responsibility of the student. The Bachelor of Science in Nursing (BSN) is granted to candidates who have satisfactorily completed all of the following requirements:

- Completion of all foundational and clinical nursing courses
- Minimum cumulative GPA of 2.0
- No more than 30 credits through independent study or extension courses
- Completion of all University graduation requirements

Pre-Nursing requirements
Curriculum is based on prerequisite of one year of high school biology with lab and grades of C or better. The student must meet all University general education requirements.

Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing Master’s webpage (http://nursing.missouri.edu/academics/master-of-science/areas-of-study.php).

Thesis/Non-Thesis Requirements

Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of the work included in the course of study offered for the degree. This requirement may be fulfilled by completion of a thesis or Master’s Exam (MS exam).

Thesis Option

The Master’s Thesis (N8090) requires the student to use the research process to discover and/or further develop new knowledge applicable to nursing practice. After completion of the research project, a formal written report using Graduate School guidelines and the American Psychological Association Manual, 6th edition is required. In the final semester, the student must successfully present (defend) the thesis. Three members of the student’s committee must sign the Report of the Master’s Degree Examining Committee (pdf) (M-3), http://gradschool.missouri.edu/forms-downloads/repository/m3.pdf, which is then forwarded through the academic program’s director of graduate studies to the Graduate School by the semester deadline. Details about the thesis option can be found in the School of Nursing Master’s Student Handbook (http://nursing.missouri.edu/handbooks/grad-programs-handbook.pdf).

Non-Thesis Option

In the School of Nursing, the Master’s Examination (MS exam) consists of a paper that should reflect the graduate student’s grasp and synthesis of the clinical and theoretical knowledge gained in the course of study. The MS exam is offered on a pass/fail basis. Students are required to discuss the focus of their MS exam early in their master’s program with their faculty advisor. The Critical Review of the Literature master’s exam is offered for the degree. This requirement may be fulfilled by completion of problems, readings and research hours. For example, in a 38-hour master’s degree program, 15 hours may be from problems, readings and research hours.

Degree Requirements

A minimum of 30 hours beyond the bachelor’s degree is required. Students must take a minimum of 15 hours of 8000-9000 level course work. No more than forty percent of the total required credit hours may be problems, readings and research hours. For example, in a 38-hour master’s degree program, 15 hours may be from problems, readings and research hours.

To satisfy requirements for the MS, a student must:

• Complete an approved plan of study with a cumulative GPA of 3.0
• Successfully defend a written thesis or complete the Master’s Exam
• Complete the program within a five-year period

Because the program is distance-mediated, students are required to obtain the required computer technology for successful participation in distance-mediated courses (see Mizzou Online Computer Requirements (http://online.missouri.edu/prepare/computer.aspx)).

Graduate

MS in Nursing

About

Students in the distance mediated Master’s of Science program obtain advanced nursing preparation in one of two areas:

• Nursing Education (http://nursing.missouri.edu/academics/master-of-science/areas/nurse-educator.php)
• Leadership in Nursing and Healthcare Systems (http://nursing.missouri.edu/academics/master-of-science/areas/leadership.php)

Degree Requirements

A minimum of 30 hours beyond the bachelor’s degree is required. Students must take a minimum of 15 hours of 8000-9000 level course work. No more than forty percent of the total required credit hours may be problems, readings and research hours. For example, in a 38-hour master’s degree program, 15 hours may be from problems, readings and research hours.

To satisfy requirements for the MS, a student must:

• Complete an approved plan of study with a cumulative GPA of 3.0
• Successfully defend a written thesis or complete the Master’s Exam
• Complete the program within a five-year period

Because the program is distance-mediated, students are required to obtain the required computer technology for successful participation in distance-mediated courses (see Mizzou Online Computer Requirements (http://online.missouri.edu/prepare/computer.aspx)).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (http://nursing.missouri.edu/apply/master-of-science) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

* Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in Massachusetts. You may find more information at this link: http://online.missouri.edu/about/stateauthorization.aspx.

Deadline for Summer entrance: February 1

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (http://gradschool.missouri.edu/academics/programs/nursing/masters.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MS in Nursing with Emphasis in Nurse Educator

Area of Study Information

DNP in Nursing Practice

About

The DNP program at Mizzou prepares leaders in the advanced nursing practice roles of Pediatric & Adult-Gerontology Clinical Nurse Specialist, Pediatric Nurse Practitioner (http://nursing.missouri.edu/academics/dnp/areas/adult-gerontology-and-pediatric-cns.php) Family Nurse Practitioner (http://nursing.missouri.edu/academics/master-of-science/areas/family-nurse-practitioner.php), Pediatric Nurse Practitioner (http://nursing.missouri.edu/academics/master-of-science/areas/pediatric-np.php), Family Psychiatric & Mental Health Nurse Practitioner (http://nursing.missouri.edu/academics/master-of-science/areas/mental-health-fmhnpph.php) and Leadership and Innovation in Health Care (http://nursing.missouri.edu/academics/dnp/areas/leadership.php). Our program strengths include a strong clinical focus and a well-developed trajectory for the development of clinical scholarship. Unique aspects of our program are a focus on rural and underserved populations and the opportunity for students to select electives in family dynamics, financial management, nursing education, or symptom management. Successful completion of the program prepares nurses for an advanced clinical practice in primary care, hospital and community settings as well as leadership roles in practice settings and clinical faculty positions.

Degree Requirements

The DNP in nursing requires a minimum of 72 credits beyond the baccalaureate degree. Of the 72 hours, 36.5 credits must be completed at the University of Missouri.

Ultimately, the student, in collaboration with their DNP residency committee, determines the student’s plan of study and total credit hours necessary to adequately prepare the student to successfully complete their DNP residency project.

Upon admittance to the program, the following must be completed by the student and documentation of these items must be submitted before registering for coursework:

- Current required immunizations
- Satisfactory criminal background check
- Satisfactory drug screen
- Current CPR certification
- Proof of undisciplined nursing licensure

To ensure that your computer is set up and ready to begin your online course, your computer must comply with the Mizzou Online Computer Requirements webpage.

DNP students are required to spend one week on campus the first summer of enrollment and during their last semester of enrollment. All clinical courses will have required on campus days that range from one to four days during the semester (see required On Campus dates (http://nursing.missouri.edu/academics/master-of-science/on-campus-dates.php)).

Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing DNP webpage (http://nursing.missouri.edu/academics/dnp/areas-of-study.php).

Doctor of Nursing Practice Residency Project Requirements

The DNP Residency Project is an in-depth, evidence-based practice change project that will focus on a theoretically and clinically relevant problem impacting a rural or other underserved population or critical healthcare system need. Specifics of the DNP Residency Project can
be found the in the Sinclair School of Nursing DNP Student Handbook (http://nursing.missouri.edu/handbooks/grad-programs-handbook.pdf).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Doctor of Nursing Practice program (http://nursing.missouri.edu/apply/dnp) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied."

* Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in several states. You may find more information at this link: http://online.missouri.edu/about/stateauthorization.aspx.

Application Deadlines: November 1 (for early acceptance) and March 1

### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the DNP in Nursing Practice (http://gradschool.missouri.edu/academics/programs/nursing/dnp.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

**DNP in Nursing Practice with Emphasis in Pediatric Nurse Practitioner**

**Area of Study Information**

For more information on Area of Study Information please see the Pediatric Nurse Practitioner page (http://nursing.missouri.edu/academics/dnp/areas/pediatric-np.php).

**Sample Plan of Study**

There are multiple plans of study for this emphasis area. Below is the Plan of Study for the post-baccalaureate, four year plan. For more Sample Plans of Study, please visit our website (http://nursing.missouri.edu/academics/dnp/areas/pediatric-np.php).

### PhD in Nursing

**About the PhD Program**

The PhD program prepares scholars to conduct original research, thereby; advancing the body of knowledge that guides nursing practice and contributes to improving population health and healthcare systems. Successful completion of the program prepares graduates for college or university faculty positions as well as leadership roles in nursing, health care, industry, and governmental agencies.

The MU Sinclair School of Nursing (MUSSON) offers a challenging and yet enriching PhD program with two options.

- **Distance-Mediated PhD Program Option**: PhD coursework may be accessed online through the Distance-Mediated PhD program option by learning over the World Wide Web using the Blackboard learning platform. This option also requires a 5 Day On Campus visit (held on the Columbia campus) the first summer of enrollment and 3-4 Day On Campus Intensives every April until coursework is completed (see PhD On Campus Dates (http://nursing.missouri.edu/academics/phd/on-campus-dates.php)). Because the program is distance-mediated, students are responsible for obtaining the required technology for successful participation in synchronous distance-mediated courses (see Computer Requirements (http://online.missouri.edu/prepare/computer.aspx));

- **International Residential PhD Option**: Through the International Residential PhD option, international students attend the MU campus hybrid classes in Columbia, Missouri. The International Residential PhD student attends the hybrid classes in person, while the Distance-Mediated student cohort participates electronically. International Residential PhD students may also enroll in traditional residential course offerings through the MU Sinclair School of Nursing and the rest of the MU campus. Students in the International Residential PhD option must enroll in 4 credits during their first summer and maintain full-time status by enrolling in 9 credits each fall and spring term thereafter. Of the 9 credits each term, at least 6 credits must be either traditional face-to-face or hybrid coursework in order to qualify for and retain the F-1 student visa status. The remaining 3 credits each term may be taken 100% on-line.

The PhD curriculum and program requirements are the same whether you choose the Distance-Mediated PhD option or the International Residential PhD option. Only the method of course delivery varies.

### Degree Requirements

The PhD in Nursing at MU requires a minimum of 72 credit hours beyond the baccalaureate degree. Students entering with a master’s degree can transfer in a maximum of 30 credits. A minimum of 42 credit hours must be completed at the University of Missouri. There are two curricular options (http://nursing.missouri.edu/academics/phd/curriculum.php): (a)

Total Credits: 77.5-80

**1110-1260 Clinical Hours ***

* On-campus visits required with specialty clinical courses

# Nursing course electives from which to choose:
- NURSE 7750 Physical Function and Older Adults
- NURSE 7751 Psychosocial Function and Older Adults
- NURSE 8010 Family Dynamics and Intervention
- NURSE 8720 Symptom Management in Acute and Chronic Illness
- NURSE 8854 Teaching Strategies in Nursing
- NURSE 8864 Curriculum Development in Nursing
- NURSE 8820 Health Care Financial Management

Additional interdisciplinary online elective choices can be found in the areas of geriatric care management, gerontology, grantmanship, health ethics, health informatics, multicultural education, online education, public health, and youth development (see http://online.missouri.edu/prepare/degrees.aspx).

*** Reflects minimum required DNP clinical and project hours. Additional clinical hours may be required based on specialty, annual portfolio evaluation, and complexity of DNP clinical residency project.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the DNP in Nursing Practice (http://gradschool.missouri.edu/academics/programs/nursing/dnp.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.
post-baccalaureate (BS-PhD) and (b) post-master’s (MS-PhD). For both options, the doctoral curriculum is divided into three categories:

- **Nursing and Health Care Content areas** - Minimum of 20 credit hours (theory analysis and development, specialty area applied sciences, substantive science seminars, and education courses, as well as teaching practicum experiences)
- **Research and Inquiry** - Minimum of 40 credit hours (philosophy of science, statistics and measurement, qualitative and quantitative methods courses, research practicum experiences as well as dissertation research)
- **Collateral area** - Minimum of 6 - 12 credit hours (coursework taken outside the School of Nursing that helps to support the dissertation research topic).

### Sample Plan of Study

Sample plans of study for both the BS-PhD and the MS-PhD can be found on the School of Nursing PhD Curriculum webpage (http://nursing.missouri.edu/academics/phd/curriculum.php). Ultimately, the doctoral program committee, in collaboration with the student, determines the student's plan of study and total credit hours necessary to adequately prepare the student to successfully complete their dissertation research.

### Qualifying Process

To be officially admitted to the PhD program, the student must pass a qualifying examination or process. Students admitted with a master's degree have completed the qualifying process. Students admitted with a bachelor's degree are admitted to the PhD program on a provisional basis. Following successful completion of a qualifying process, bachelor's prepared students will be granted admission to the PhD program. To fully qualify for the PhD program, BSN-to-PhD students must earn at least a grade of B in the following:

- NURSE 7100 Theoretical Basis for Advanced Nursing
- NURSE 7150 Research Basis for Advanced Nursing
- A three-hour graduate-level statistics course
- Nine credits in nursing applied sciences

The student initiates the qualifying process by enrolling in three credits of N8900 Research Practicum with a member of their BSN-PhD program committee. The student is officially admitted to the PhD program following approval of the written report and oral presentation for N8900 by the BSN-PhD Program Committee.

### Comprehensive Examination Process

Through the PhD Comprehensive Examination process, the student demonstrates his/her ability to address the theoretical, methodological and substantive issues of his/her field of study. The examination tests the breadth and depth of knowledge and the ability to integrate ideas across substantive areas. The student must be enrolled to take this examination and it may be administered only when MU is officially in session. The student is not allowed to sit for the doctoral comprehensive examination until the last semester of course work or when course work is substantially completed, all incomplete grades are satisfied, and the PhD Competencies are met.

The Comprehensive Exam, which is prepared by the student's PhD program committee, has a written component followed by an oral section. The written component of the examination is completed at home or another site of the student's selection during five consecutive days. The oral defense is a two-hour examination by the PhD program committee. The two sections of the examination must be completed within one month. The student is expected to complete the Comprehensive Examination within five (5) years of enrollment in the PhD program and it must be completed at least seven (7) months before the final defense of the doctoral dissertation. Additional details of the process can be found on the School of Nursing PhD Comprehensive Exam webpage (http://nursing.missouri.edu/academics/phd/comprehensive-exam.php).

### Dissertation Requirements

The culmination of the PhD degree is the completion of a written doctoral dissertation. The dissertation must:

- Be written on a subject approved by the candidate's doctoral dissertation committee
- Embody the results of original and significant investigation
- Be the candidate's own work.

Within the MU Sinclair School of Nursing, the PhD Dissertation process consists of:

- Development of a dissertation proposal
- Approval of the proposal by the doctoral dissertation committee
- Approval of the research project by the Health Sciences Institutional Review Board
- Ethical conduct of the research project
- Writing the doctoral dissertation
- Public defense of the doctoral dissertation
- Approval of the dissertation by the candidate's doctoral dissertation committee
- Submission of the written doctoral dissertation in an approved format.

Students have five (5) years from completion of the PhD Comprehensive Exam to complete the doctoral dissertation. Additional details of the process can be found on the School of Nursing PhD Dissertation webpage (http://nursing.missouri.edu/academics/phd/dissertation.php).

### Admissions

**January 1** is the application deadline for the School of Nursing PhD program.

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Sinclair School of Nursing PhD program (http://nursing.missouri.edu/apply/phd) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

* Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in Massachusetts. You may find more information at this link: http://online.missouri.edu/about/stateauthorization.aspx.

- Certificate in Psychiatric/Mental Health Clinical Nurse Specialist (p. 620)

Graduate

Graduate Certificate in Adult Health Clinical Nurse Specialist

The Post-Master's Certificate Program at the MU Sinclair School of Nursing enables nurses with a master's degree to expand their knowledge and scope of practice in one or more specialty areas. Adult Health CNSs are clinical experts in the diagnosis and treatment of illness, and delivery of evidence-based nursing interventions for adults and older adults across the care continuum from wellness through acute care. Additionally, CNSs are experts in executing delegated medical regimes associated with the diagnosis and treatment of disease for a specialty population. A CNS may be unit-based or have agency-wide responsibilities for a patient population. The CNS has a unique APRN role to integrate care across the continuum and through three spheres of influence: direct patient/client care, nurses & nursing practice, and systems and organizations (APRN Joint Dialogue Group, 2008). Thus, in addition to direct patient/client care, key elements of CNS practice are to create environments through mentoring and system changes that empower nurses to develop caring, evidence-based practices. Accordingly, CNSs are involved in developing staff education as well as safety and quality improvement activities. Certificate is available via online learning.

Graduate Certificate in Family Mental Health Nurse Practitioner

Advanced practice nurses are traditionally prepared at the graduate level in a specific clinical area. The specialty area may be identified in terms of population (e.g. pediatrics or adults), and/or type of problem (e.g. mental health). The advanced practice nurse is directly accountable
for clinical judgments which includes independent and interdependent decision making. Holders of this certificate provide primary mental health care at an advanced level to individuals of all ages and families. Includes differential diagnosis and management of psychiatric & mental health disorders, medication management, and psychotherapeutic interventions. Certificate is available via online learning.

Established by the University of Missouri Board of Curators in May 2001, the Harry S Truman School of Public Affairs is dedicated to the advancement of study and practice of governance in the state, nation and world. The School offers graduate degrees and certificates in the theory and practice of public and nonprofit management, public policy, and organizational change.

In keeping with Truman’s legacy, TSPA has numerous international linkages. Truman School students and alumni have served as Peace Corps volunteers, United Nations interns, in the US State Department, other national consulates or embassies in Washington, and international non-government organizations (NGOs) such as the Red Cross/Red Crescent. Truman School faculty members participate in international projects in Europe, Asia, Africa, and South America. Scholars from Europe, Asia, and other parts of the world regularly visit the Truman School, helping to inform curriculum and classroom discussions.

Undergraduate

The School of Public Affairs currently offers academic pursuits solely at the graduate level.

Graduate

The Harry S Truman School of Public Affairs offers master’s and doctoral degrees in the theory and practice of public and nonprofit management, public policy, and organizational change. MPA students are prepared for careers in a new public service that spans government, nonprofit, and private sectors. PhD students are trained for careers in academic and research institutions.

Graduate Degrees
Master of Public Affairs (p. 622) (MPA)
Doctor of Philosophy in Public Affairs (p. 623) (PhD)

Cooperative Dual Degrees
Master of Public Affairs and Juris Doctorate
Master of Public Affairs and Master of Public Health

Graduate Certificates:
Grantsmanship Graduate Certificate (p. 624)
Nonprofit Management Graduate Certificate (p. 624)
Organizational Change Graduate Certificate (p. 624)
Public Management Graduate Certificate (p. 625)
Science and Public Policy Graduate Certificate (p. 625)

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.
About the Study of Public Affairs

The Harry S Truman School of Public Affairs offers master’s and doctoral degrees in the theory and practice of public and nonprofit management, public policy, and organizational change. MPA students are prepared for careers in a new public service that spans government, nonprofit, and private sectors. PhD students are trained for careers in academic and research institutions.

Faculty

Professor of Professional Practice S. Allcorn

Associate Professor B. Curs, A. C. Drury, C. Heflin**, S. Holan, L. Keiser**, P. Klein, B. Naughton, C. L. Sampson (Emeritus)*

Assistant Professor D. Albright, I. Arteaga*, E. Crawford, R. Darolia*, S. Diem, R. McGarvey, A. Murdie, C. Peters, S. Potochnick*

Graduate

MPA in Public Affairs

MU Truman School of Public Affairs students study with outstanding faculty, who are talented teachers as well as active, nationally recognized scholars. Policy forums, round-tables with policy makers, lectures by distinguished visiting scholars, and research symposia also enrich student learning. Small classes taught both on campus and in Jefferson City, the state’s capital, make for a lively learning environment. The Truman School MPA program provides a balance of public service values, interpersonal and analytic skills, and a thorough knowledge of administrative and policy processes.

Financial Aid from the Program

To be considered for funding from the Truman School (including a Graduate Research Assistantship and scholarships), please arrange to have all of your application materials submitted by the January 15 deadline. Contact the Truman School at (573) 884-1656 or visit http://truman.missouri.edu/degrees-programs/funding for more details.

Application and Admission Information

Admission to the Master of Public Affairs Program

Ms. Nicole Harris, Assistant Program Director for Student Services
101 Middlebush Hall, Columbia, Missouri 65211
573-884-1656

Truman@missouri.edu

Admission Criteria

Fall deadline: Priority admission and funding consideration are given to applications received by January 15. Applications submitted after January 15 will be considered, with preference going to those received by May 1. Prospective students applying after May 1 will be considered for fall admission on a case by case basis.

Spring deadline: Priority admission consideration is given to applications received by November 15.

Assistantship/Fellowship deadline: January 15

• Minimum GPA: 3.0 in last 60 hours

• Minimum TOEFL scores:
  • iBT: 80
  • CBT: 213
  • PBT: 550

• Minimum preferred GRE scores:
  • Prior to August 2012: 1000 (combined)
  • After August 2012: 300 (combined)

Admission to the MPA program is competitive and open to students holding baccalaureate degrees from accredited institutions and meeting admissions standards of the Truman School of Public Affairs and the Graduate School.
Required Application Materials

To the Graduate School:
• All required Graduate School documents

To the Truman School MPA Program:
• 3 letters of recommendation (at least two academic)
• GRE score report (GRE alternatives accepted: LSAT and GMAT scores will be considered)
• Resume
• Statement of interest
• Unofficial transcripts

Degree Requirements

Consisting of 45 hours of graduate work, the MPA program includes a core (27 hours), an area of specialization (15 hours) and an internship (3 hours). The areas of specialization are Nonprofit and Public Management, and Public Policy.

Students with significant public service experience may have some courses waived, making the MPA program 33 hours for them. The MPA’s Mid-Career option is available to students with 3-5 years of public service experience.

Internship

During the summer after their first year in the program, students without significant public sector work experience are required to complete a public service internship. Interns apply what they have learned during the first year in the program, plus they gain practical experience that enables deeper learning during second-year classes.

PhD in Public Affairs

PhD Contact: Dr. Colleen Heflin
(573) 882-4398
heflincm@missouri.edu

About the PhD Program in Public Affairs

The Harry S Truman School of Public Affairs at the University of Missouri offers an interdisciplinary PhD in Public Affairs that prepares graduates for careers in universities, colleges and applied research settings in the public, private and nonprofit sectors. Students complete core sequences in public policy and management as well as research methods, and specializations tailored to students’ research interests.

PhD Acceptance

The Harry S Truman School of Public Affairs PhD is an academic and research-oriented degree in public affairs. Applicants without previous coursework in public affairs (public management and policy) are required to complete up to 18 hours of foundation coursework.

Acceptance Criteria

In making its decision, the PhD committee considers:
• The applicant’s record of academic achievement (Applicants typically have undergraduate GPAs higher than 3.0, and graduate GPAs higher than 3.5.)
• The quality of the applicant’s writing sample
• Evaluations contained in letters of recommendation
• Acceptable performance on the Graduate Record Examination (GRE). Applicants typically have combined scores of 310 or higher.
• Results of a personal interview with the applicant in person or by telephone
• Other factors bearing upon the candidate’s potential for success

Application Procedure

1. Applications for the PhD program are accepted for fall entrance only. For a prospective student’s application to be complete, the Truman School must receive all required materials by January 15.
2. Applicants are required to upload application materials to the MU Graduate School Application for Admission.
3. Official transcripts must be mailed to the Graduate School and GRE/TOEFL scores directed to institution code 6875.

Required application materials

A student’s application is complete when all of the following materials have been received. The Truman School’s downloadable checklist contains more information on the following required application materials:
• University of Missouri Graduate School application (application fee required)
• Statement of interest
• Curriculum vitae/Resume
• Writing sample
• Personal data sheet
• Three letters of recommendation
• Official undergraduate and graduate transcripts (must be mailed directly to the Graduate School)
• Official Graduate Record Examination (GRE) score report (must be sent by ETS)
• Official TOEFL score report (must be sent by ETS; required of applicants whose native language is not English)

Entrance Exams

• The Graduate Record Examination (GRE) is required of all applicants.
• Applicants whose native language is not English must achieve a score of 625 (107 iBT) in the Test of English as a Foreign Language (TOEFL).
• Use the following codes to submit test scores to the Truman School:
  • University of Missouri-Columbia Institution Code: 6875
  • Truman School Department Code: 4801

Cost of Attendance and Financial Aid

Prospective students should visit the University of Missouri Graduate School financial information and support web page for current information about tuition and fees. The University’s Office of Student Financial Aid provides information about other types of aid students can obtain, including federally financed student loans. Financial aid applications are due by January 15.
Additional Minors and Certificates - Public Affairs

Graduate

- Certificate in Grantsmanship (p. 624)
- Certificate in Nonprofit Management (p. 624)
- Certificate in Organizational Change (p. 624)
- Certificate in Public Management (p. 625)
- Certificate in Science and Public Policy (p. 625)

Graduate Certificate in Grantsmanship

Harry S Truman School of Public Affairs
101 Middlebush Hall
573-884-1656
http://truman.missouri.edu/degrees-programs/certificates

The Truman School offers one of the few completely online grant writing certificate programs in the country, making it easy to fit classes into a busy schedule. Students will learn to write grant proposals and manage grant funded programs effectively. Learn winning grant writing techniques and proper grant management with this four-course graduate certificate in grantsmanship. Our program is well suited for a variety of audiences, including community-based professionals in nonprofit organizations, state and local government and educators in K-12 settings. Graduate and post-doctoral students and young faculty members who are seeking to become more competitive in research careers dependent on external funding will find this certificate to be useful.

Eligibility

Students do not need to be enrolled in a graduate degree program at MU to participate in the program.

Plan of Study

Students must complete 12 credit hours to receive the certificate.

Graduate Certificate in Nonprofit Management

Harry S Truman School of Public Affairs
101 Middlebush Hall
573-884-1656
http://truman.missouri.edu/degrees-programs/certificates

The graduate certificate in nonprofit management provides students with the managerial, fiduciary, and analytical tools necessary for leadership of nonprofit entities. The goal is to develop and hone skills that can be used to achieve organizational missions uniquely aimed at serving the interests of the community.

Eligibility

Students do not need to be enrolled in a graduate degree program at MU to participate.

Careers

As one of the fastest growing sectors in today's economy, nonprofit organizations have undergone a professionalization in management, with board members changing their orientation from one of personal networks to a bottom-line, information-based outlook. Successful nonprofit organizations today thrive on their ability to compete effectively in the marketplace, read community needs and priorities, and deliver appropriate services within budget.

Plan of Study for the Nonprofit Management Certificate

Students must complete 12 credit hours to receive the certificate.

Elective Course

The fourth course is an elective chosen in consultation with the certificate coordinator from among the courses offered by the Truman School or by another graduate unit at MU.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/nonprofit-management-graduate-certificate/nonprofit-mgmt-ge/Gedt.html

Graduate Certificate in Organizational Change

Harry S Truman School of Public Affairs
101 Middlebush Hall
573-884-1656
http://truman.missouri.edu/degrees-programs/certificates

The graduate certificate in organizational change is a multidisciplinary and multisector approach to the theory and practice of transforming organizations and communities in a technologically advanced and global economy. Students will have an opportunity to develop knowledge and competencies appropriate to the advanced study and diagnosis of evolving and emerging organizations and communities in the public, private, and nonprofit arena. They will find a curriculum supportive of careers in academics, management, and consulting.

Eligibility

Students do not need to be enrolled in a graduate degree program at MU to participate in the program.

Plan of Study

Students must complete 12 credit hours to receive the certificate.

### Elective Course

The fourth course is an elective chosen in consultation with the certificate coordinator from among the courses offered by the Truman School or by another graduate unit at MU.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at [http://gradschool.missouri.edu/academics/programs/organizational-change-graduate-certificate/org-change-ge/Gedt.html](http://gradschool.missouri.edu/academics/programs/organizational-change-graduate-certificate/org-change-ge/Gedt.html)

### Graduate Certificate in Public Management

Harry S Truman School of Public Affairs  
101 Middlebush Hall  
573-884-1656  
http://truman.missouri.edu/degrees-programs/certificates

The graduate certificate in public management encompasses administrative skills for ethical, effective leadership and management roles in the public service. Students completing this graduate certificate will be well positioned to begin or advance a public service career with many expecting to pursue management careers in state and local governments.

### Eligibility

Students do not need to be enrolled in a graduate degree program at MU to participate.

### Plan of Study

Students must complete 12 credit hours to receive the certificate.

### Required Public Management Certificate Courses

The first two courses are required along with one of the remaining two:

</tbody>
</table>

### Elective Course

The fourth course is an elective chosen in consultation with the certificate coordinator from among the courses offered by the Truman School or by another graduate unit at MU.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at [http://gradschool.missouri.edu/academics/programs/public-management-graduate-certificate/pub-mgmt-ge/Gedt.html](http://gradschool.missouri.edu/academics/programs/public-management-graduate-certificate/pub-mgmt-ge/Gedt.html)

### Graduate Certificate in Science and Public Policy

Harry S Truman School of Public Affairs  
101 Middlebush Hall  
573-884-1656  
http://truman.missouri.edu/degrees-programs/certificates

The public policy specialization offers students a strong foundation in the skills necessary to work effectively in the policy environment. Students in the public policy specialization learn theories of the policy process, quantitative and qualitative research methods to analyze policy, and program evaluation. Students also have the opportunity to gain expertise in specific policy areas including education policy, environmental policy, health policy, social policy, and regional development policy.

### Eligibility

Students do not need to be enrolled in a graduate degree program at MU to participate in the program. Some prerequisite courses may be necessary for students without prior coursework in statistical or economics analysis.

### Plan of Study

Students must complete 12 credit hours to receive the certificate.

### Required Courses

### Elective Course

The third and fourth courses are electives chosen in consultation with the certificate coordinator from among the courses offered by the Truman School or by another graduate unit at MU.

Interdisciplinary Academic Programs

MU offers a number of academic degree programs that are planned, administered and taught collaborative by faculty from numerous disciplines. Those interdisciplinary programs are enumerated in this section of the catalog.
Biomedical Sciences

The study of biomedical sciences includes the major disciplines of:

- anatomy (gross or microscopic)
- physiology/pharmacology (molecular, cellular and integrative)
- biochemistry/molecular biology
- endocrinology
- toxicology

Specific areas of interest are exercise biology including cardiac, vascular and muscle biology; cardiovascular biology including neuroendocrine regulation; membrane transport biology including cystic fibrosis and cardiac disease; and reproductive biology including environmental estrogen toxicities and developmental processes.

All of the biomedical sciences degrees at MU are at the graduate level, and within two very distinct programs. See the Graduate tab for details on these options.

For undergraduate students interested in studying biomedical sciences, there are more than two dozen courses taught at the undergraduate level. See the Courses tab for details on these options.

Faculty

Comparative (Veterinary) Medicine

Professor C. L. Franklin
Associate Professor Y. Agca, E. C. Bryda
Clinical Associate Professor L. W. Dixon
Adjunct Professor C. L. Besch-Williford
Adjunct Clinical Associate Professor R. S. Livingston
Clinical Veterinarian S. W. Korte, E. K. O’Connor

Pathobiology Emphasis

Clinical Associate Professor L. Berent*, D. Kim*, T. Reilly**, C. Vogelweid*, M. Whitney*
Associate Research Professor M. Lorson*, A. Ray*
Professor Emeritus C. A. Carson
R. Phillip and Diane Acuff Endowed Professor D. Pintel
McKee Endowed Professor G. Stewart**

Biomedical Sciences: Veterinary Medicine and Surgery emphasis

Assistant Professor S. M. Axiak*, A. Bukoski*, A. E. DeClue**, M. Heller*, P. Pithua*, F. Wininger*
Clinical Assistant Professor K. R. Branson*
Teaching Professor L. Masseau*
Assistant Teaching Professor L. Britt*, C. R Cook*, D. Nagy*, J. Pearce*, S. Reed*
Associate Teaching Professor M. Kerf*, J. Kramer*, L. Schultz*, K. A. Selting*
Assistant Extension Professor S. Poock*

Biomedical Sciences

Associate Professor C. S. Reddy**, C. S. Rosenfeld**, L. J. Rubin**, W. V. Welshons*
Assistant Professor C. P. Baines**, K. Cummings**, C. Emter**, D. D. Kline**
Adjunct Professor M. B. Brown*, V. H. Huxley, S. S. Segal**
Adjunct Assistant Professor T. Boyd
Adjunct Associate Professor G. S. Johnson*, G. E. Ruttinghaus*
Clinical Associate Professor I. A. Constantinescu, B. L. Frappier*
Assistant Teaching Professor D. Cross, M. C. Kuehl-Kovarik**
Research Professor S. Yang**

* Graduate Faculty Member - membership is required to teach undergraduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in biomedical sciences, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

Biomedical Sciences Area Program Degrees

- MS in Biomedical Sciences with emphasis in Biomedical Sciences (p. 628)
- PhD in Biomedical Sciences (p. 631)

Biomedical MS Degrees with Veterinary Medicine Emphasis Areas

- MS in Biomedical Sciences with emphasis in Comparative Medicine (post DVM degree only) (p. 629)
- MS in Biomedical Sciences with emphasis in Pathobiology (p. 630)
- MS in Biomedical Sciences with emphasis in Veterinary Medicine and Surgery (p. 630)
An Array of Biomedical Degrees Offered

The University of Missouri offers several degree program options in Biomedical Sciences:

• The Biomedical Sciences Area Program offers a master’s program in basic biomedical sciences and a PhD area program. Dual biomedical-DVM degrees are other options. Students in the Biomedical Sciences Area Program do not have to be enrolled in the College of Veterinary Medicine.
• The Graduate School also confers three MS degrees related to veterinary biomedical sciences. Available emphasis areas are (a) comparative veterinary medicine, (b) pathobiology and (c) veterinary medicine and surgery. Generally, applicants to these biomedical degree programs are concurrently enrolled in College of Veterinary Medicine or have previously earned a Doctorate in Veterinary Medicine (DVM).

Additional Program Options

Pathobiology

The Pathobiology Area Program offers a PhD in Pathobiology (p. 659).

DVM/Graduate degree in Biomedical Sciences

The Biomedical Sciences graduate programs enable veterinary medical students to pursue studies in the basic biomedical discipline of their choice for a PhD or MS degree while enrolled in the College of Veterinary Medicine. The program is designed to prepare students for advanced professional careers in universities and colleges, research institutes and industrial research.

With consent of the student’s graduate program committee, courses from the professional curriculum (which includes a major portion of the core curriculum) can be accepted toward the graduate degree.

Master of Science: The MS/DVM program enables veterinary medical students to complete a master’s degree while enrolled in the College of Veterinary Medicine. The program allows qualified students to seek in-depth involvement in the basic biomedical discipline of their choice. Six hours of 9090 Research that result in an original thesis are required. Financial support may be provided to VM2-4 students through teaching assistantships in gross anatomy laboratory (V_BSCI 5500 Veterinary Anatomy with Laboratory).

Doctor of Philosophy: The PhD/DVM program requires a minimum of 30 credit hours of 9090 Research culminating in completion of original research and defense of a written dissertation. Major biomedical disciplines include anatomy of domestic species (gross or microscopic); physiology/pharmacology (molecular, cellular and integrative); biochemistry/molecular biology; endocrinology; and toxicology. Specific areas of interest are exercise sciences; cardiovascular and neurosciences; muscle biology; membrane transport biology; reproductive biology; and developmental toxicology.

Graduate

MS in Biomedical Sciences with Emphasis in Biomedical Sciences

Director of Graduate Studies Dr. Douglas Bowles
Biomedical Sciences Area Program
W111 Veterinary Medicine Building
1600 Rollins Road
Columbia, MO 65211
573-882-7305
http://www.dbms.missouri.edu/

About the Program

The MS program in Basic Biomedical Sciences provides in-depth training to prepare scientists in interdisciplinary basic research (molecular, cellular, organ and integrative). Departmental faculty members represent diverse Medical-related basic science disciplines that provide a unique opportunity for biomedical research training. Core courses include physiology, cell biology and an introduction to research methodology. The multidisciplinary focus of the program is also emphasized in the candidate’s MS program committee.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission Criteria

• Fall deadline: January 15
• Spring deadline: September 15
• Summer deadline: Not Applicable
• Minimum TOEFL scores:
  Internet-based test (iBT) 600
  Paper-based test (PBT) 500
• Minimum GRE scores:
  Prior to August 1, 2011 300 3.5
  On or After August 1, 2011 300 3.5
• Minimum GPA: 3.0
• Required prerequisite courses: Biology (10 hrs), Physics (3 hrs), Biochemistry (3 hrs), Chemistry (10 hrs), Calculus (3 hrs)

NOTE: The GRE requirement may be waived for applicants with an MD or DVM. Prerequisite courses may be completed during the master’s program.

Required Application Materials

To the Graduate School:
• All required Graduate School documents

To the Biomedical Sciences MS Program:

• Program-specific application
• Letter of intent
• GRE scores
• Copy of transcripts
• 3 letters of recommendation

**MS Degree Requirements**

To attain the master’s degree, 30 hours of graduate credit must be completed; 15 hours or more shall be 8000 level (exclusive of research, problems and independent study courses); and 6 to 9 hours of 8090 Research. A grade of 3.0 or better is required in all core courses and serves as the qualifying examination for the degree. In additional to the departmental core courses, students may take courses specifically planned to meet the needs and strengths of the individual.

**Evaluation**

The master’s candidate is evaluated semiannually for satisfactory rate of progress as defined by timely completion of course courses and progress on research activities as stipulated by the master’s program committee. The master’s candidate must carry out original research culminating in a written thesis, present the thesis work at a departmental seminar and defend the thesis in an oral examination by the master’s program committee.

**Length of Study**

The time limit for the master’s degree is five years after initiating the program.

**MS in Biomedical Sciences with Emphasis in Comparative Medicine (post DVM)**

**Admission Contact Information**

Director of Graduate Studies Craig Franklin, DVM, PhD
Discovery Ridge Bldg Rm N128
4011 Discovery Drive
Columbia, MO 65201
573-882-6623
http://cmp.missouri.edu/

**About This Degree**

The University of Missouri Comparative Medicine Program provides advanced graduate training to veterinarians who wish to pursue careers in comparative medicine. Trainees may combine one year of residency training in clinical, administrative and diagnostic laboratory animal medicine with two or more years of research training. Alternatively, trainees with experience in laboratory animal medicine, comparative pathology or related disciplines may begin research training at the time of admission. Training is designed to prepare individuals for a variety of careers including comparative medicine research and laboratory animal medicine/collaborative research. Students may either pursue an MS or PhD. Research opportunities are available in several areas including infectious disease, molecular biology, mouse biology, genetics, microbiota, biomedical engineering, cancer and cardiovascular physiology. Resources available include the University of Missouri Office of Animal Resources (OAR), the Laboratory of Infectious Disease Research (LIDR), Mutant Mouse, Rat and Swine Resource and Research Centers and IDEXX-Bioresearch, an internationally known research animal diagnostic laboratory.

**Programmatic Strengths**

• The opportunity for comparative studies in a joint veterinary and human medical environment
• The multidisciplinary nature of the faculty participating in the training program
• The potential to couple training in research with residency training in laboratory animal medicine, comparative pathology, diagnostics, and training toward board certification
• Strong research resources including AAALAC-accredited research animal facilities, a full-service, internationally-recognized research animal diagnostic laboratory, a BSL-3 infectious disease research facility and NIH-funded research resource centers for mice, rats and swine
• A long history of successful training in comparative medicine

**Class Size & Resources**

Typically there are 10-12 postdoctoral trainees in the program at a given time. Networking and sharing of experiences and cooperation among trainees is an important factor in the success of the program.

**Admission Criteria**

• Fall deadline: N/A
• DVM or equivalent from an accredited college of veterinary medicine or successful completion of the foreign equivalency examination and approval by the Comparative Medicine Program faculty
• Meet standards for admission to the Graduate School

**Required Application Material**

*To the Graduate School:*
• All required Graduate School documents

*To the CMP Postdoctoral MS Program:*
• For combined residency/degree positions, the CMP uses the Veterinary Internship & Residency Matching Program – see virmp.org (http://virmp.org) for details.

**Degree Requirements**

The CMP emphasizes comparative medicine research training and includes graduate course work. Research training is performed under an established investigator in one of several life science departments on the MU campus. Recommended graduate courses include pathology of laboratory animals, methodology of animal experimentation, biology of laboratory animals, laboratory animal resource management, grant and manuscript writing for biomedical researchers, laboratory and project management, biomedical ethics and seminars. Elective courses frequently taken by trainees include basic and advanced courses in immunology, molecular biology, physiology, reproductive biology and/or disease pathogenesis. Research typically deals with the application of an animal model in the investigation of human diseases or the study of naturally occurring diseases of laboratory animals. Requirements for elective course work, residency and teaching experience are determined
with the student’s advisory committee. Trainees also participate in teaching and instructional programs offered to veterinary students and research personnel.

Written Scholarly Work

The MS degree requires the completion of a significant first author manuscript suitable for publication in a refereed journal, or an approved equivalent scholarly effort.

Residency

For trainees enrolled in the combined graduate/residency program, residency rotations are performed during the first year of training and research training occurs in years two and three.

Residency rotations include:

• clinical medicine and animal resource management in the Office of Animal Resources (OAR)
• colony management, diagnostic, comparative and research pathology in the Mutant Mouse Regional Resource Center (MMRRC) and Rat Resource and Research Center (RRRC)

Moving to a PhD Program

Trainees desiring to change to a PhD program have the opportunity to do so in a variety of programs including the Pathobiology Area Program.

MS in Biomedical Science with Emphasis in Pathobiology

Contact: Anne Chegwidden
College of Veterinary Medicine

chegwiddena@missouri.edu
http://vpbio.missouri.edu/training_programs.html

Director of Graduate Studies: Catherine Vogelweid

About the Program

The College of Veterinary Medicine offers a Master of Science degree in biomedical sciences with a specialization in veterinary pathobiology and/or laboratory animal medicine, which is administered through the Department of Veterinary Pathobiology. The degree requires 30 credit hours of work including courses, seminars, research, and problems courses. The program includes research in a particular field and defense of a thesis which embodies the results of this work. Certain areas of emphasis require submission of a formal master’s thesis while others require preparation of a publishable manuscript.

PhD in Pathobiology

For admission information about the doctorate of philosophy (PhD) in Pathobiology, refer to Pathobiology Area Program in this catalog.

Admission Criteria

Fall deadline: n/a

• Minimum TOEFL score (when appropriate):

<table>

• GRE scores required
• Undergraduate GPA of last 60 credits of undergraduate work: 3.0
• Designated faculty mentor
• Professional students with a DVM degree may be eligible to waive the GRE

Required Application Materials

To the Graduate School:

• All required Graduate School documents

To the Veterinary Pathobiology Program:

• 3 letters of recommendation (can be submitted through the Graduate School’s online application as well)
• GRE scores
• Mentor letter of support

MS in Biomedical Science with Emphasis in Veterinary Medicine and Surgery

Contact: Connie Sievert
College of Veterinary Medicine
Department of Veterinary Medicine and Surgery
A-384 Clydesdale Hall
573-882-1807
http://www.cvm.missouri.edu/VMS/index.htm

Director of Graduate Studies: Leah Cohn

About the Program

The College of Veterinary Medicine, through the Department of Veterinary Medicine and Surgery, offers graduate work leading to the master of science degree in veterinary biomedical sciences with an emphasis in veterinary medicine and surgery. In addition, faculty within the department offer supervision for doctoral and postdoctoral study and research. Many but not all graduate students in this area of study combine their graduate degree training with clinical residency programs leading to board certification in some specialty field within veterinary medicine.

Types of Study

The program provides advanced training in anesthesiology, comparative cardiology, equine, food animal and companion animal medicine and surgery, neurology, oncology, comparative ophthalmology, radiation oncology, radiology, nutrition, and theriogenology among other areas.

Resources and Facilities

Graduate students have ready access to clinical patients, medical records and facilities of the Veterinary Medical Teaching Hospital to aid them in clinical research. The college has its own library. More detailed information regarding the emphasis area of veterinary medicine and surgery can be found at the website http://www.cvm.missouri.edu/VMS/index.htm
Admission Criteria

Fall deadline: n/a

- Completion of a bachelor's or professional degree
- Identification of a mentor with graduate faculty standing within the Department of Veterinary Medicine and Surgery
- Identification of funding (with advice of mentor) for the period of research and study
- Minimum TOEFL score (when appropriate):

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>65</td>
<td>520</td>
</tr>
</tbody>
</table>

- Minimum GRE score: none

The majority of MS students within our program are completing specialty residency training programs in some field of veterinary medicine simultaneously with the MS degree. Admission to these programs generally precedes admission to our graduate programs. The GRE requirement may be waived for exceptional students by the Veterinary Medicine and Surgery Departmental Research and Graduate Studies Committee. Applicants may be asked to strengthen any deficiencies in prerequisites to the chosen area of concentration through enrollment in a post- or non-degree graduate student program.

Required Application Materials

To the Graduate School:

- All required Graduate School documents

To the Veterinary Medicine and Surgery Emphasis Program:

- GRE scores

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Degree Requirements

Advisers and the Advisory Committee

Formulating a plan of study is the joint responsibility of the student, the adviser and the student’s advisory committee. An advisory committee of at least three faculty members should be chosen during the first semester of enrollment. The advisory committee offers guidance and is responsible for approving a definitive plan of study.

The advisory group should consist of the major adviser and appropriate faculty members from the department, and at least one other member from another department within the college or university. Members of this committee may be recommended later for appointment to the examining committee. Members of the final examination committee should be chosen in the same manner as the advisory committee.

Publications

A thesis reporting the results of original research is required of all candidates. A scientific paper based on the thesis research must be submitted to a refereed journal.
15 hours or more at the 8000/9000 level (exclusive of research, problems and independent study courses)

The core curriculum includes:

• physiology (10 credit hours)
• biochemistry/cell biology or histology (4 or 5 credit hours, respectively)
• multidisciplinary approaches to biomedical research (2 credit hours)
• departmental seminar (2 credit hours)

Minimum of 1 additional 7000-level course in each of the following areas:

• molecular biology
• cellular biology
• integrative biology

**Rate and Quality of PhD Progress**

A grade of 3.0 or better is required in the core curriculum and serves in lieu of a qualifying examination for the degree. The choice of additional courses will be made individually by the student in consultation with his/her advisor and doctoral program committee. Following completion of the plan of study, candidates for the PhD degree must pass a comprehensive examination designed by the doctoral program committee that reflects an understanding of the multidisciplinary approach to biomedical research. The PhD candidate is evaluated semiannually by a faculty committee to ensure a satisfactory rate of progress as defined by timely completion of core courses and productivity in research activities as stipulated by the student’s doctoral program committee. The PhD candidate must carry out original research culminating in a written dissertation, present the dissertation work at a departmental seminar and defend it in an oral examination given by the doctoral program committee. The program for the PhD degree must be completed within five years of passing the comprehensive examination.

From Particles to Populations
The University of Missouri Institute for Clinical and Translational Science transforms discoveries made in laboratories across MU into community-based products, services and practices for the state and nation. The institute (ICATS) is the focal point of MU's efforts to develop clinical and translational science programs that improve health through better research, education and public service.

Few universities share MU's potential for saving lives through research. With more than 1,000 biomedical scientists and engineers — all on one campus — MU focuses its research on the deadliest diseases, such as cancer and cardiovascular disease, and the most vulnerable patients, including children and the elderly

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate
While MU does not offer undergraduate degrees specifically in dispute resolution, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate
• LLM in Dispute Resolution (p. 634)

About the Dispute Resolution Program
Students in the Master of Laws (LL.M.) dispute resolution program have a unique opportunity to gain a deeper understanding of theoretical, policy, design and ethical issues in dispute resolution. They study with leading dispute resolution scholars who generate important academic work influencing dispute resolution theory and practice around the world. Small class sizes create a close community with faculty and students.

Our program blends theoretical analysis, practitioner skills, and systems design work in courses usually limited to LL.M. students. Our diverse student body — by age, race, nationality, legal background — enriches the level of discussion, inside and outside the classroom.

The LL.M. meets the needs of those with backgrounds as advocates, neutrals, law-trained court administrators and government agency personnel, among others.

Admission Requirements
Applicants must have completed the first degree in law (JD, LLB or equivalent) required for law practice or law teaching in the country in which law studies were pursued. Note: U.S. applicants must have satisfied the JD requirements of an ABA-accredited law school. In exceptional cases, U.S. applicants may be admitted if they have satisfied the JD requirements of a non-ABA-accredited law school.

• Applicants may be admitted without a JD degree if they have a bachelor’s degree and substantial experience in dispute resolution.
• Applicants must possess a minimum 2.5 (A = 4.0) grade point average in their law program, and a 3.0 GPA for work completed in any additional graduate or advanced degree program.
• Applicants must be able to start the program in the fall semester (which begins in mid-August). New students are not admitted in the spring or summer semesters.

LLM in Dispute Resolution

Program of Study
The LL.M. program requires 24 credit hours of study. A minimum of 12 credits are required courses in dispute resolution and the remaining 12 credits are electives. Students choose electives according to their interests. With approval of the director of the LL.M. Program, students can apply six (6) credits of graduate-level courses outside the Law School toward the LL.M. graduation requirements.

Students studying full-time can complete degree requirements within one academic year. Part-time students in a continuous course of study can complete the program within two academic years.

** Doctoral Faculty Member - membership is required to chair doctoral examination and dissertation committees.

* Graduate faculty member - membership is a prerequisite for Doctoral faculty membership.

** Doctoral faculty member - membership is a prerequisite for Doctoral faculty membership.
Tailoring the Program

In addition to the recommended electives outlined above, the MU Law School offers courses in many areas. Refer to the Courses tab above for course descriptions. Please note: Every effort is made to teach each of these courses every year, but the ability to offer them depends on faculty availability and budget constraints.

Some of the concentrated areas in the J.D. curriculum include:

- Business Planning/Corporations
- E-commerce
- Employment
- Environmental Law
- Family
- Governmental Processes
- Healthcare
- International Law
- Normative Theory and Diversity
- Tax
- Trial Practice
The Genetics Area Program (GAP) is an interdisciplinary PhD program that will prepare you for a research or teaching career in genetics. As genetic analysis is used in all aspects of biological research, our Program has integrated the efforts of approximately 60 life sciences faculty into one of the strongest training programs at MU. The curriculum provides broad, individualized training tailored to your career objectives.

Genetics graduate students play a major role in the research programs of our life sciences departments. Students spend approximately twelve weeks in three different laboratories during their first year. This promotes diversity in techniques learned, and it encourages students to meet and work with faculty members in the associated departments. This scientific interaction helps our students choose a lab in which to complete the degree.

As part of the degree, students will spend a semester teaching or assisting with a course in the Genetics curriculum that is relevant to their career goals.

A genetics seminar series is organized and conducted by the graduate students to promote research interest and encourage scientific communication. Speakers include prominent researchers from universities throughout the country, as well as MU faculty. An annual retreat brings faculty and students together to share research results and techniques.

Genetics graduates leave MU with a strong scientific background, excellent laboratory skills and interpersonal communication abilities.

**PhD in Genetics Area Program**

**Financial Aid from the Program**

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

**Application Deadline**

Fall deadline: January 15

**Admission Criteria**

- **Minimum TOEFL scores:**
  - Internet-based test (iBT): 93
  - Paper-based test (PBT): 580

- **Minimum GRE scores:**
  - Verbal + Quantitative: Prior to August 1, 2011: 1100, On or after August 1, 2011: 302
  - Analytical: 4.5

- **Minimum GPA: 3.0 in last 60 hours**
- **Bachelor’s degree**
- **One or more courses in each of the following: organic chemistry, biochemistry, mathematics (calculus and statistics), physics, introductory genetics**
- **Research experience highly desirable**

**Undergraduate**

While MU does not offer undergraduate degrees specifically in the genetics area program, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

**Graduate**

- **PhD in Genetics Area Program** (p. 636)

**About the Program**

We believe that an understanding of genetics is essential in solving global problems such as famine, environmental degradation and disease.
• Broad background in biology
Note: Deficiencies in the subjects listed can be remedied after admission.

**Required Application Materials**

*To the Graduate School:*
• All required Graduate School documents

*To the Genetics Area Program:*
Genetics Area Program application (download form from website)
• GRE scores
• TOEFL scores (international applicants)
• 3 letters of recommendation (use provided form)
• Personal statement

**Degree Completion Requirements**
The minimum requirements for the PhD degree are:
• advanced courses in genetics, biochemistry and molecular biology
• regular participation in the genetics area seminar program
• successful completion of a comprehensive examination
• at least one semester of teaching in a genetics course
• 3 seminar presentations
• research, dissertation and oral defense

These are beyond the Graduate School’s requirements. Others are determined in consultation between the student and faculty advisor.

Department of Health Management and Informatics

The HMI Department develops, translates, and disseminates knowledge, innovations, and evidence-based solutions to improve health management and informatics performance in complex health systems. HMI advances the health of Missouri’s communities, the nation, and international partners by:

• Creating a culture of collaborative relationships in research, education, and service to generate innovative ideas and solutions;
• Providing professional health management and informatics education and fostering lifelong learning;
• Delivering technical assistance and consultation by partnering with health, human service, and policy-making organizations; and
• Developing innovative commercial products and services for health- and education-related application

Degrees & Certificates Offered

The HMI Department offers the following degrees and graduate certificate programs:
• Master of Health Administration (executive and residential cohort)
• Master of Science in Health Informatics (executive and residential cohort)
• Dual Master of Health Administration and Master of Science in Health Informatics (executive and residential cohort)
• Graduate Certificate in Health Informatics (executive and residential cohort)
• Graduate Certificate in Health Ethics (100% online format)

Residential Master of Health Administration students may also pursue a dual MBA, MS in Industrial Engineering, or JD degree, or may complete an additional Master’s degree, such as the MPA or MPH, concurrently with the MHA degree.

Undergraduate

While MU does not offer undergraduate degrees specifically in health administration, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

• MHA in Health Administration (p. 639)

About the Master of Health Administration

The graduate program in Health Services Management prepares professionals to meet critical and complex challenges in leadership and improvement in organizations and systems throughout the health industry. The program provides recognized national and global leadership in health management education.

The program is competency-based and distinctively equips graduates for success through (a) providing solid grounding in professional and operational knowledge and skills, (b) integrating health informatics throughout the health services management curriculum, and (c) incorporating overarching complex systems context and analytical approaches.

The residential and executive master’s degrees launch and advance patient-centered, improvement-oriented, financially-responsible, and ethically-grounded careers in evidence-based health services management.

The program admits diverse cohorts of students from Missouri, other states, and other nations. During the admissions process, the program
seeks learners with strong academic records, maturity, motivation, leadership capabilities, and career potential. Primary post-graduation placement organizations include health systems, hospitals, academic medical centers, physician group practices, surgery centers, information technology companies, consulting firms, government agencies, insurance entities, and other points of health services delivery.

Whereas the residential master’s degree format is a traditional on-campus residential program, the executive master’s degree is offered in a hybrid model featuring both on-campus and distance learning. In both formats, emphasis is on fostering an individualized and collaborative culture of learning, mentoring, and professional development among students, faculty, staff, alumni, and other practitioners. The intent is to prepare students to enable transformational leadership and improve patient care quality, safety, value, and overall level of population health.

Established in 1965, the program is a member of the Association of University Programs in Health Administration (AUPHA) and has been accredited since 1968 by the Commission on Accreditation of Healthcare Management Education (CAHME), formerly Accrediting Commission on Education for Health Services Administration (ACEHSA).

Both executive and residential students may pursue the MHA degree jointly with the MS in Health Informatics degree. Residential students may also pursue a dual MBA, MS in Industrial Engineering, or JD degree, or complete an additional Master’s degree, such as a MPA or MPH, concurrently with the MHA program.

Graduate

MHA in Health Administration

About the MHA

The HMI Department’s MHA degree is designed for students from a range of educational backgrounds and provides the knowledge and skills necessary to function effectively as a healthcare executive. The curriculum includes such competency areas as health systems operations, organization theory, information management, financial management, strategic planning and marketing, human resource management, health economics, managerial epidemiology, leadership, and ethics. By combining basic and advanced course work with an internship and executive management study (an applied management study that replaces a thesis), the student may develop expertise in a focused area. Professional elective course selection is a mutual decision between the student and adviser, and in all cases, the intent is to tailor the degree program to the student’s interests. The goal of the graduate program in health services management is to prepare professionals for leadership roles in health administration. Students develop an excellent applied knowledge in such areas as clinical decision support systems, risk assessment and management, clinical outcomes assessment, managing interdisciplinary teams and integrated health systems.

Degree Requirements

The residential MHA degree requires a total of 54 credit hours, which includes 36 hours of core coursework, three credit hours earned for a required 12-week summer internship, a three-credit hour capstone group management project, and 12 credit hours of professional electives. Students must maintain a minimum 3.0 cumulative MU graduate grade point average.

The professional elective requirement, which comprises four courses, allows MHA students the opportunity to concentrate in a particular area of study if they choose. They may take courses in health informatics or health ethics within the HMI Department, pursue graduate certificates in areas such as health informatics, public health, geriatric care management, or Lean Six Sigma methodology, or complement their MHA coursework with classes in business administration, public administration, architectural studies, industrial engineering and public health, to name a few.

MHA students are required to complete a 12-week administrative internship at an approved integrated managed care system, group practice, hospital or other healthcare organization under the guidance of a qualified preceptor (often an HMI alumnus/a). The internship is designed to incorporate the academic training students receive in their first year of the master’s degree with practical applications within the host site. The students receive hands-on exposure to health care management in a real-world environment and experience first-hand the dynamics of a career in health care. The intern should have the opportunity to observe their mentor and other professionals in the work environment, as well as opportunities to discuss their experiences.

Specific general skills to be developed include:
- Leadership
- Strategic decision making
- Project management
- Teamwork

HMI’s executive-in-residence works with each student individually to place him or her at an internship site. For a list of recent internship placements, please see http://hmi.missouri.edu/prospective/educational_partners.html.

Total Credits: 54

Thesis/Non-Thesis Requirement

- improvement of patient experience of wait times in the Orthopaedic Clinic at the Missouri Orthopaedic Institute
- surgical site infection reduction informed by NSQIP resources for UMHC
- system-wide urinary catheter reduction for UMHC
- improving screening and follow-up for students with substance use and/or mood disorders at MU Student Health

Financial Aid

Students admitted to the MHA program are automatically considered for merit-based scholarships. A list of scholarships available through the Department as well as external scholarships and other sources of aid is available at: http://hmi.missouri.edu/prospective/financial_aid.html. All admitted students who are not Missouri residents are considered for out-of-state fee waivers, which include a $1,000 scholarship and waive nonresident fees. A limited number of Graduate Research Assistantship (GRA) positions, which include a full tuition waiver, are available within the HMI Department. All incoming and current students receive consideration for GRAs, and the Department awards positions based on merit, the availability of project funding, and alignment of student and faculty research interests and skills. Applicants admitted on probation are not eligible for GRAs, fee waivers, or scholarships until they attain a 3.0 GPA.

Executive MHA Degree

In addition to the traditional, residential MHA, the degree is offered in an alternative format to healthcare professionals who have significant clinical or administrative experience in health care. HMI accepts an executive MHA cohort to begin January of each year. The Executive MHA combines monthly on-campus weekend sessions, independent study, and online interaction in an innovative two-year course of study, and requires 42 credit hours of health services management coursework. Students are required to complete a substantial independent research project, which they present during their oral comprehensive examination in their final semester. For additional information about the Executive MHA, please visit http://www.hmi.missouri.edu, or call the Student Recruitment Specialist at (573) 884-0698.

Admissions

Deadline for Fall entrance: Rolling, recommended by March 31st

A minimum of a baccalaureate degree from an accredited institution

About the Master of Science in Health Informatics and Bioinformatics

The Master of Science in Health Informatics and Bioinformatics program prepares professionals to meet critical and complex challenges in applying information technology within the health industry. It provides recognized national and global leadership in health informatics education.

The residential master’s degree prepares students for careers in developing and evaluating clinical information systems, data and knowledge management, decision support, and doctoral study in health informatics. The executive master’s degree advances the careers of physicians, managers, nurses, information system designers, consultants, entrepreneurs, and others committed to the application of information technology for improving the quality, safety, and efficiency of health services.

The program admits diverse cohorts of students from Missouri, other states, and other nations. During the admissions process, the program seeks learners with strong academic records, maturity, motivation, leadership capabilities, and career potential. Primary post-graduation
placements include doctoral programs, health systems, hospitals, academic medical centers, physician group practices, outpatient facilities, information technology companies, consulting firms, government agencies, insurance entities, and other points of health services delivery.

Whereas the residential master’s degree format is a traditional on-campus residential program, the executive master’s degree is offered in a hybrid model featuring both on-campus and distance learning. In both formats, emphasis is on fostering an individualized and collaborative culture of learning, mentoring, and professional development among students, faculty, staff, alumni, and other practitioners. The intent is to prepare students to enable transformational leadership and improve patient care quality, safety, value, and overall level of population health.

**Graduate**

**MS in Health Informatics and Bioinformatics**

**Degree Requirements**

The residential MS in Health Informatics (MSHI) curriculum requires 36 credit hours of course work, which includes foundational coursework in health information technology as well as health services management. Prior coursework in computer science is not required. Residential MSHI students have the option to complete a 12-week internship during the summer following their first year, although it is not required for the degree. HMI’s executive-in-residence will work with HI students who wish to complete an internship to find an appropriate placement. For a list of recent internship placements, please see http://hmi.missouri.edu/prospective/educational_partners.html. The MSHI curriculum integrates learning across computer science, health informatics, and health services management, and also develops students’ research interests. Those with excellent academic records are encouraged to pursue a PhD degree in informatics. Students must maintain a minimum 3.0 cumulative MU grade point average. Individuals with three or more years of professional experience are encouraged to apply for admission to the Executive MSHI cohort (please see information below).

Total Credits: 36

**Thesis/Non-Thesis Requirement**

Residential MSHI students have the option to complete a formal Master’s thesis, which must be submitted to the Graduate School. Students who choose not to complete a thesis must complete a substantial independent research project. All MSHI students must present their thesis or independent research during their oral comprehensive examination in their final semester.

**Financial Aid**

Students admitted to the MSHI program are automatically considered for merit-based scholarships. A list of scholarships available through the Department as well as external scholarships and other sources of aid is available at: http://hmi.missouri.edu/prospective/financial_aid.html. All admitted students who are not Missouri residents are considered for out-of-state fee waivers, which include a $1,000 scholarship and waive nonresident fees. A limited number of Graduate Research Assistantship (GRA) positions, which include a full tuition waiver, are available within the HMI Department. All incoming and current students receive consideration for GRAs, and the Department awards positions based on merit, the availability of project funding, and alignment of student and faculty research interests and skills. Applicants admitted on probation are considered for GRAs, and the Department awards positions based on merit, the availability of project funding, and alignment of student and faculty research interests and skills. Applicants admitted on probation are not eligible for GRAs, fee waivers, or scholarships until they attain a 3.0 GPA.

**Executive MSHI Program**

In addition to the traditional, residential MSHI, the degree is offered in an alternative format for professionals who have significant experience in health informatics. HMI accepts an executive MSHI cohort to begin January of each year. The executive MSHI combines three on-campus weekend sessions per semester with independent study and online interaction in an innovative two-year course of study, and requires 33 credit hours of health informatics coursework. Students are required to complete a substantial independent research project, which they present during their oral comprehensive examination in their final semester. For additional information about the Executive MSHI degree, please visit...
Admissions

Deadline for Fall entrance: Rolling, recommended by March 31st

A minimum of a baccalaureate degree from an accredited institution

- Minimum TOEFL scores:
  - Internet-based test (iBT) | Paper-based test (PBT)
    | Score |
    | 100    | 603 |

- Minimum Academic IELTS scores:
  - Item | Score
  - OVERALL | 7.5
- Minimum GRE scores:
  - When did you take the GRE? | Verbal + Quantitative
  - Prior to August 1, 2011 | 50th percentile
  - On or After August 1, 2011 | 50th percentile

- In lieu of GRE, minimum GMAT score: 50th percentile. HMI also accepts LSAT and MCAT scores.
- Undergraduate GPA: 3.0 during the last 60 hours of undergraduate course work and any subsequent graduate course work

The Health Services Management Program recruits and accepts qualified applicants regardless of race, sex, age, physical ability, or national origin.

Required Application Materials

To the Graduate School:
All required Graduate School documents

To the HMI Program
3 letters of recommendation
GRE or GMAT scores
Current résumé or curriculum vitae
Personal essay
Official transcripts
TOEFL report (international applicants only)

Doctor of Philosophy in Informatics, emphasis in Health Informatics

(Degree administered by the MU Informatics Institute)

Contact Information

University of Missouri Informatics Institute
573-882-9007
email muiigraduateprogram@missouri.edu
web: http://muii.missouri.edu

The University of Missouri also offers a PhD in Informatics with Health Informatics as an emphasis area. Thus, official transcripts of students who complete this doctoral program will reflect both the degree (Informatics) and the emphasis area (Health Informatics).

The doctoral program in informatics draws on the considerable resources and strengths of our department along with other academic programs at the University of Missouri. The benefit to students: a rigorous yet flexible program of study. For example, courses may include statistics, computer science, health systems, clinical informatics, consumer health informatics, public health informatics, program evaluation, information architecture, decision support and knowledge systems, and biomedical data/text mining. The integrated doctoral program assures broad exposure to the field and fosters new insights and innovative research concepts.

Careers

The US government predicts that employer demand will remain high for individuals with skills in health and clinical informatics. Mizzou students acquire the skills necessary to establish careers at the forefront of health informatics. This program is ideal for students who aspire to become researchers and thought leaders. Specific career paths may include health research; collegiate informatics teaching faculty; health informatics managers. Job sectors span government, medicine, health professions, and private, nonprofit and public research institutions.

About MUII

Building on a tradition of outstanding informatics education and research at Missouri, the MU Informatics Institute is an interdisciplinary research and education program supported by 38 core faculty members from 14 departments and six colleges/schools, such as the College of Engineering; School of Medicine; School of Nursing; College of Arts and Sciences; College of Agriculture, Food & Natural Resources; and College of Education. The Institute, under the Governance of the Graduate School, offers a doctoral degree program with concentrations in bioinformatics and health informatics. Each concentration stresses the skill sets and research appropriate for the subfield within the broad area of informatics. Students are accepted into the program with diverse backgrounds and varying degrees of experience.

About the Graduate Certificate in Health Informatics

The Graduate Certificate in Health Informatics offered by the Department of Health Management and Informatics provides learners with the skills necessary to participate in the selection, use, and evaluation of information technology applications throughout the health services industry. The certificate program is designed for students, physicians, nurses, managers, information system designers, consultants, and others committed to the application of information technology for improving the quality, safety, and efficiency of health services.

Students may pursue the HI Certificate in either the residential or executive format. Students who wish to pursue the HI Certificate only must apply to the HMI Department and the Graduate School for admission to the Graduate Certificate program. Students enrolled in the MHA degree program may earn an HI Certificate in addition to their Master’s degree. The HI Certificate requires the completion of the following four courses (a total of 12 credit hours):

<table>
<thead>
<tr>

Informatics

Academic doctoral programs at MU in the area of Informatics are coordinated through the Informatics Institute.

muiigraduateprogram@missouri.edu
241 Engineering Building West
Columbia, MO 65211-2060
573-882-9007
http://muii.missouri.edu/

About the Informatics Institute (MUII)

Building on a tradition of outstanding informatics education and research at Missouri, the MU Informatics Institute is comprised of over 40 faculty from 15 different departments and 8 schools/colleges, including the Colleges of Agriculture, Food, and Natural Resources; Arts & sciences; Education; Engineering; Veterinary Medicine; and the Schools of Health Professionals; Medicine; and Nursing. The Institute offers emphasis areas in bioinformatics and health informatics, along with a concentration area in geoinformatics. Each emphasis area and concentration area stress skill sets and research appropriate to the subfield within the broad area of informatics. A core curriculum provides all students with a foundation of knowledge and tools in biology, computer sciences, health systems, and statistics, after which they complete further coursework in their chosen area. The integrated program assures broad exposure to the field and fosters new insights and innovative research concepts.

Faculty

Associate Research Professor J. Jackson-Thompson (https://muii.missouri.edu/people_details.php?person=573)**

Associate Teaching Professor W. Phillips (https://muii.missouri.edu/people_details.php?person=574)**

- Graduate Faculty Member  - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
- Doctoral Faculty Member  - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in informatics, the University does offer baccalaureate opportunities in a number of related areas. Many successful informatics students have received bachelor’s degrees in Geography, Computer Science, Statistics, Business, Biology, and Biochemistry before starting their doctorate.

In addition, MUII offers several service courses designed for upper-level undergraduates and master’s students to expose students to the fundamentals of bioinformatics.

Graduate

- PhD in Informatics (p. 646)
- with emphasis in Bioinformatics (p. 647)
- with emphasis in Health Informatics (p. 647)

Emphasis Areas & Concentration Areas

MUII offers a doctoral degree (PhD) in two emphasis areas: bioinformatics and health informatics. In addition, students may also opt for a doctoral degree with a concentration area in geoinformatics.

Students with areas of interests outside of informatics may also wish to pursue a collaborative degree program between MUII and other degree programs. The purpose of the collaborative degree program is to allow students the opportunity to obtain advanced degrees in fields that complement the study of informatics and expand the student’s knowledge and applicability.

MUII students may also select the collaborative degree between the Master of Public Health program and MUII PhD in Informatics program. Students must be accepted by both MUII and the MPH program to be eligible. Upon completion of the PhD requirements for the Informatics Institute and degree requirements for the MPH in Health Promotion and Policy with Focus on Informatics, students will receive both the PhD in Informatics and MPH degrees. For a full list of courses for the MPH in Health Promotion and
Policy with Focus on Informatics, please visit the MPH program website (http://publichealth.missouri.edu/).

Resources and Facilities
The Institute is located in multiple locations on MU campus with well-equipped laboratories containing state-of-the-art instrumentation and computing facilities for informatics research. Major instrumentation includes a Dell EM64T cluster system with 512 processors, an SGI Altix BX2 SMP server with 64 Itanium2 processors, IBM iDataPlex high-performance computing system, and a number of DELL servers with multiple quad-core processors for computational researches.

In 2014, the Institute added a farm of Intel NUC machines to provide Big Data learning sandpits for students and research groups to have hands-on experience in Big Data Ecosystem (Hadoop, Hive, HBase, and Pig) for their data analytics research in genomics, healthcare, and geospatial applications. In addition, the institute is partnering with IBM for student access to the new BlueMix cloud space with application software packages, such as SPSS, DB2, etc.

Faculty Areas of Research Interest
Faculty research covers a wide range of interests including structural bioinformatics, systems biology, cancer informatics, chemical informatics, epigenomics, phenomenics, text mining & understanding, electronic health records, evidence-based medicine, personalized medicine, human-computer interactions in health care, consumer informatics, patient safety, public health informatics, geospatial informatics, information retrievals, biomedical data mining & knowledge discovery, and machine learning. For a list of faculty members and their research areas, please visit our web page (http://muii.missouri.edu/people.php).

Internal Funding
Fellowships and research/teaching assistantships are available for highly qualified applicants. Application information is available on the Institute’s website (http://muii.missouri.edu/financial.php).

Admission Criteria
Fall deadline: The deadline for Fall admission is March 1. However, to be considered for departmental and Graduate School fellowships and assistantships, applications should be submitted by January 15th.

• Preferred GPA: 3.3 out of 4.0
• Preferred GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal + Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>
<td>1200</td>
<td>3.5-4.0</td>
</tr>
<tr>
<td>On or After August 1, 2011</td>
<td>309</td>
<td>3.5-4.0</td>
</tr>
</tbody>
</table>

* or a preferred GMAT score of 570

Preferred TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (IBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>90</td>
<td>577</td>
</tr>
</tbody>
</table>

** or a preferred IELTS score: 6.0

• Sufficient background and training to pursue advanced degree in informatics

All Required Documents
Students are required to send ALL required application materials through the Office of Graduate Studies on-line application system. To begin your application, please see the ApplyYourself website (http://gradschool.missouri.edu/admissions/apply).

1. Curriculum Vitae
2. Statement of Purpose, which should include a summary of why the applicant is interested in pursuing an advanced informatics degree, a brief description of your previous research experiences, the specific area of informatics you are interested in pursuing, and your future career goals and plans in the informatics field.
3. GRE/GMAT scores. Use institution code 6875. The departmental code is not required.
4. TOEFL/IELTS scores for international applicants, if required.
5. Three letters of recommendation from faculty or supervisors who can evaluate the applicant’s credentials and potential to become successful in the area of informatics.
6. Scanned copies of transcripts from each college and university attended. If accepted, applicants will be required to have official copies of their transcripts sent directly from the institution to the Office of Graduate Studies.

Optional Documents
Applicants are encouraged to submit representative publications in informatics, if available.

Informatics Doctoral Degree Requirements

The following is a brief synopsis of the general degree requirements; please see the Informatics Institute web site (http://muii.missouri.edu/2012program.php) for complete details:

• Students must take required and area courses
• Students must pass a qualifying examination
• Students must present at least one institutional seminar annually
• Students are required to complete a comprehensive exam, which includes written and oral elements, within a specified time frame
• Students must pass a comprehensive examination at least 7 months before their scheduled defense
• Students must submit and defend a dissertation describing the results of successful and original research in one of the branches of informatics.
To show research progress, students are expected to be working toward presenting at conferences and publishing in peer-reviewed journals based on their informatics research.

**PhD in Informatics with Emphasis in Bioinformatics**

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Informatics program (http://gradschool.missouri.edu/academics/programs/informatics-institute/doctorate.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

**PhD in Informatics with Emphasis in Health Informatics**

**Qualifying Process**

Students are required to take their qualifying exam by the end of the third semester into the program. Students must submit a Qualifying Exam Request Form (http://muii.missouri.edu/qualexam.php) to the MUII office, complete with a one-page research statement, a draft of a D-2 Program of Study form (http://muii.missouri.edu/planStudy.php), and advisor consent.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Informatics program (http://gradschool.missouri.edu/academics/programs/informatics-institute/doctorate.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.
Medical Pharmacology and Physiology

Pharmacology and Physiology
School of Medicine
MA415 Medical Sciences Building
573-882-4957
http://medicine.missouri.edu/mpp/

The joining of these two disciplines provides a powerful way to address modern questions of biology.

The department offers MS and PhD degree programs in Pharmacology and Physiology. These programs are designed to prepare students for rewarding teaching and/or research careers in academia, government or the pharmaceutical and biotechnical industries.

Faculty

Associate Professor C. Baines, T. Domeier*, M. Krenz**, L. Polo-Parada**, J. Smith, G. Sowa**, M. Thakkar**

Graduate Faculty Member - membership required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in medical pharmacology and physiology, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

Monica Elliott
School of Medicine
MA415 Medical Sciences Building
573-882-4957
http://medicine.missouri.edu/mpp/

• MS in Medical Pharmacology and Physiology (p. 649)
• PhD in Medical Pharmacology and Physiology (p. 649)

The joining of these two disciplines provides a powerful way to address modern questions of biology. The department offers MS and PhD degree programs in Pharmacology and Physiology. These programs are designed to prepare students for rewarding teaching and/or research careers in academia, government or the pharmaceutical and biotechnical industries.

Pharmacology

Pharmacology is a basic medical science that deals with actions of drugs, hormones and neurotransmitters on living processes. Knowledge based on the results of pharmacological research leads to increased effectiveness and safety in the treatment of diseases in man and animals. Pharmacology is different from pharmacy, which is a profession concerned with the preparation and dispensing of drugs.

Physiology

The discipline of Physiology focuses on understanding the integrative function of living organisms from the molecular to the organismal level. As such, physiological research addresses how genes, organelles, cells, tissues and organs are integrated to accomplish the complex functions of living organisms. From a medical prospective, understanding normal function is a prerequisite to understanding disease.

Areas of Study

Regardless of their final degree objectives, students admitted into the departmental graduate programs will participate in a core curriculum during the first year and choose a specific tract leading to either a degree in Pharmacology or in Physiology following successful completion of the first year. The department also offers specially designed curriculum for individuals interested in a combined MD/graduate degree or who have previous relevant medical education.

Departmental Research

The departmental faculty has expertise in a variety of mammalian systems, with emphases in cardiovascular and endocrine physiology and molecular and cellular pharmacology. Individual labs utilize a number of different experimental models ranging from the whole animal studies to cellular, subcellular, biochemical and modern molecular approaches. Human research is also emphasized.

Research problems under current investigation include microvascular control of blood flow; modulation of vascular function by the extracellular matrix; role of the microcirculation in inflammation and diabetes; mechanisms involved in angiogenesis membrane regulation and ion transport; barriers separating circulating blood and tissue; energetics and metabolism of vascular smooth and cardiac muscle; electrophysiology of isolated cardiac vascular smooth muscle and endothelial cells; exercise physiology and regulation of contractile protein functions; and hormonal induction of genetic transcription, intracellular signaling mechanisms and genetic regulation of cell proliferation, cell cycle, cell differentiation and apoptosis; and the pathogenetic mechanisms of alcohol on liver cells.

Partnerships

Cooperative interactions exist with other clinical and basic science departments in the School of Medicine as well as with the Truman Veterans Hospital, the Dalton Cardiovascular Research Center, the College of Veterinary Medicine, Nutrition and Exercise Department and various campus-wide programs in Molecular Biology and Food for the 21st Century. The cooperative research atmosphere encourages staff...
and students to work across departmental lines and provides a unique opportunity for interdisciplinary training of the students.

**Teaching Experience**

In addition to course work and research training, all graduate students are required to participate as teaching assistants in laboratory or lecture instruction offered by the department. Such experience enhances the students’ presentation and teaching skills, contributes to their professional maturity, and reinforces a sense of collegiality between students and faculty.

**Financial Aid from the Program**

Financial support in this program for qualified graduate students is available from several sources. Students also may be eligible for institutional teaching and research assistantships. In addition, there are a number of fellowship awards from the Graduate School and the campuswide Life Science Program available on a competitive basis through nominations by the Department.

Deadlines for these fellowships are January to mid-February each year. Applicants do not directly apply for these fellowships. Rather the department applies on behalf of successful applicants for admission. Therefore a prospective candidate should submit an application for admission to the department in the preceding fall. Finally, some of our students are supported by research grants of individual faculty members or by predoctoral fellowships from extramural sources.

**Graduate**

**MS in Medical Pharmacology and Physiology**

**Admission Contact Information**

Monica Elliott  
MA415 Medical Sciences Bldg, DCO63.00  
Columbia, MO 65211  
573-882-4957

**Application Deadlines**

Fall deadline: January 7  
Spring deadline: September 15

**Admission Criteria**

- Minimum TOEFL scores:
  - Internet-based test (iBT): 61  
  - Paper-based test (PBT): 500
- Minimum IELTS overall academic score: 5.5
- Minimum GPA: 3.0 in the last 60 hours
- Bachelor’s degree in chemistry, biology, pharmacy or related areas from an accredited college
- Background in biology and chemistry and an understanding of mathematics and physics
- Course work in biochemistry and physiology is highly recommended.
- Previous lab or research experience preferred

Students are usually admitted to begin their program in the Fall semester, but applications for admission in other semesters will be considered on a space-available basis. Women and minorities are encouraged to apply. Students with an appropriate educational background are encouraged to apply for entrance into the PhD program. A master’s degree is not a prerequisite for admission to the doctoral program. The department will consider applications for the MS degree programs from U.S. citizens but PhD degree students will be given priority consideration for financial support. Deficiencies in course work may be remedied during the first years of the graduate program.

**Required Application Materials**

To the Graduate School:
- All required Graduate School documents

To the Medical Pharmacology & Physiology Program:
- Departmental application
- Personal statement
- Transcripts
- 3 letters of recommendation (use form provided). The letters should be written by individuals knowledgeable of the student’s academic capability.
- Official GRE & TOEFL scores

**Degree Requirements**

To satisfy requirements for the MS degree, a student must complete the professional plan of study with an average grade of B or better and pass an oral examination over an acceptable master’s thesis. Candidates also must comply with other regulations governing master’s degrees.

**Length of Study**

MS degree students should normally complete their studies and thesis project within 2-3 years of admission to the degree program.

**PhD in Medical Pharmacology and Physiology**

**Admission Contact Information**

To the Graduate School:
• All required Graduate School documents

To the Medical Pharmacology & Physiology Program:
• Departmental application
• Personal statement
• Transcripts
• 3 letters of recommendation (use form provided). The letters should be written by individuals knowledgeable of the student’s academic capability.
• Official GRE & TOEFL scores

Plan of Study
The PhD plan of study includes at least two years of basic and advanced courses in physiology and/or pharmacology, as well as courses in cell and molecular biology. The students also will be trained in conducting physiological and pharmacological research in the laboratory of individual faculty members during the first year.

Qualifying Examination Policy
The department does not require a formal qualifying examination. Successful completion of the core curriculum and satisfactory performance in conducting scientific research and teaching will qualify students for continuation in the PhD program.

Choosing a Track and Mentor
The student will choose a dissertation mentor at or before the end of the first year and decide whether they wish to pursue the doctoral program in Pharmacology or Physiology.

Comprehensive Examination
All PhD program students must pass a comprehensive examination before the end of the first semester of the third year of enrollment. The usual format of the comprehensive exam includes the writing and oral defense of a research proposal outside of the student’s dissertation research area.

Dissertation
Each student must then carry out a dissertation research project, original in nature, which is expected to contribute significant new knowledge to the area of study. To facilitate this process, each student submits a dissertation research proposal within six months of passing the comprehensive examination.

Oral Defense
Finally, all PhD candidates must pass an oral defense of the dissertation and comply with all university and departmental regulations governing the PhD degree.

Length of Study
The doctoral program normally requires four to five years beyond the baccalaureate degree.
Microbiology

School of Medicine
M616 Medical Sciences Building
573-882-8152
http://medicine.missouri.edu/mmi/

The Department of Molecular Microbiology & Immunology (MMI), in partnership with the faculty from the Department of Veterinary Pathobiology (VPB), offers a comprehensive graduate program, Molecular Pathogenesis and Therapeutics Graduate Program, leading to the Doctor of Philosophy (Ph.D.) degree. This program provides individualized training that is strongly oriented toward basic research in molecular and cellular biology, microbiology, pathogenesis, immunology and host-parasite interactions. MMI offers:

- PhD in Microbiology (Medicine)
- Cooperative Degrees: MD and PhD in Microbiology (Medicine)

Note: The Molecular Pathogenesis and Therapeutics Graduate Program is not accepting students into the master’s program.

Faculty

Molecular Microbiology and Immunology

Associate Professor J. F. Cannon**, M. Johnson**, D. R. Lee**, S. Liu**, S. Sarafianos**
Assistant Professor M. R. Baldwin**, M. A. Daniels**, H. Guo **, E. Teixeiro-Pernas**
Professor Emeritus K. L. Bennett, R. A. Finkelstein, K. S. Wise**
Assistant Teaching Professor J. L. Furrer

Veterinary Pathobiology

Associate Professor D. Anderson**, B. T. Beerntsen**, M. J. Calcutt**,

Jointly appointed to Molecular Microbiology and Immunology

Professor H. Braley-Mullen**, J. D. Wall**
Associate Professor U. Atasoy**
Assistant Professor B. Hahn**, S. C. McKarns**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in molecular microbiology and immunology, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

- MS in Microbiology (p. 652)
- PhD in Microbiology (p. 652)

School of Medicine
M616 Medical Sciences Building
573-882-8152
http://medicine.missouri.edu/mmi/

The Molecular Pathogenesis and Therapeutics Graduate Program is built around scholarly activities with three important missions: cutting-edge research programs to address relevant biomedical problems in microbiology, pathogenesis, and immunology, a graduate training program to educate strong, independent research scientists, and a commitment to provide knowledge-based service to the state, national and international communities that will improve global understanding of the microbial world, infectious diseases and host immunity to infection. Graduate (and postgraduate) education programs offer the basic principles of microbiology, pathogenesis, and immunology as well as research training opportunities in the laboratories of established scientists with diverse research interests.

Faculty Research

The program is equipped to support a wide range of research activities at the cutting edge of our diverse science. Faculty research activities focus on key problems in pathogenic microbiology, immunology, molecular biology, genetics, therapeutics, and virology.

Research Facilities and Resources

The research environment at MU with Colleges of Medicine, Veterinary Medicine, Agriculture, Engineering, and Arts and Sciences on one comprehensive campus fosters the development of interdisciplinary scientific interactions that enhance both research and training opportunities for faculty and students alike. The Bond Life Sciences Center represents such an interdisciplinary research enterprise and houses investigators from multiple colleges and departments, including MMI and VPB. Critical to the Molecular Pathogenesis and Therapeutics Graduate Program interests in infectious diseases, pathogenesis, therapeutics, and immunity research, the recent construction of an NIH-funded Laboratory for Infectious Disease Research provides modern BSL3/ABSL3 containment research space and animal holding facilities for the investigation of highly infectious organisms and human select agents. This resource, and the Molecular Pathogenesis and Therapeutics Graduate Program’s partnership with the Midwest Regional Center for Excellence in Biodefense and Emerging Infectious Disease Research, centered at Washington University in St. Louis, position MU in the national network of infectious disease research and training efforts. Please visit the MMI Web site (http://medicine.missouri.edu/mmi) for additional information on MMI’s access to state of the art facilities.

Career Opportunities

Graduates completing this training are prepared to pursue challenging and rewarding professional careers that involve research and teaching at supervisory levels in both the academic and private sectors.
Research & Teaching Assistantships

Students in the doctoral program are awarded research assistantships. Research assistants work with faculty members to obtain practical experience in carrying out research proposals through the collection of research data and writing research reports. All students in the graduate program are required to participate as teaching assistants for two semesters during their studies.

Required Courses for MPT Graduate Students in Program

- **Fall semester, 1st year (all required):**
  - MICROB 7101 Structure and Synthesis of Macro Molecules (2 credit hrs.)
  - MICROB 7303 Fundamental Virology (2 credit hrs.)
  - MICROB 7304 Immunology (2 credit hrs.)
  - MICROB 7404 Bacterial Pathogenesis (2 credit hrs.)
  - MICROB 8050 Graduate Student Survival Skills (1 credit hr.)
  - Three of the following courses (only one of these may be an approved elective):
    - MICROB 9407 Advanced Immunology (4 credit hrs.; offered Spring semesters of even years only)
    - MICROB 9432 Molecular Biology II (4 credit hrs.; offered every Spring semester).
    - MICROB 9449 Infection and Immunity (4 credit hrs.; offered every Fall semester).
- Approved 8/9000 current literature-based elective (3-4 credit hrs.)

  - 8000/9000-level electives: The DGS and the Curriculum Committee must approve these courses. They should also be approved by the student's doctoral committee (examples of courses still needing approval are given below):
    - V_PBIO 8436 Pathogenic Mechanisms in Veterinary Pathobiology (3 hours)
    - BIO_SC 8350 Advanced Cell Biology (3 hours)
    - BIO_SC 8320 Developmental Genetics (3 hours)
    - BIO_SC 8440 Integrative Neuroscience I (3 hours)
    - BIO_SC 8442 Integrative Neuroscience II (3 hours)
    - MPP 9426 Transmembrane Signaling (4 hours)
    - MPP 9435 Skeletal Muscle (3 hours)
    - V_PBIO 8641 Introduction to Research Ethics (1 credit hr.; every Spring semester)
    - MICROB 9087 Seminar in Microbiology (required to take this 4 times; 2nd-5th years) (1 credit hr.; every Spring semester)
    - MICROB 9403 Advanced Medical Microbiology (credit for teaching) (2 credit hrs.; every semester)

Other duties

- Act as a teaching assistant (TA) in MICROB 2800 or MICROB 3200 for two semesters (to be completed during the first two years, but not during the Fall semester of the first year).
- Attend Program seminars (any invited speakers and student seminars) on Wednesdays at 1:15 pm usually in Monsanto Auditorium in the Bond LSC; attendance will be taken; enroll in MICROB 9087 Seminar in Microbiology for 1 credit hr. in the Spring semesters of years 2-5.

and your grade will be determined by attendance and your presentation.

Credit Hour Requirements:

The Graduate School requires 72 hours of advanced study to be completed for the Ph.D. degree. A minimum of 15 hours of 8000-level course work, not including MICROB 9085 Problems in Microbiology and MICROB 9090 Research in Microbiology, at most, four hours of MICROB 9087 Seminar in Microbiology can count toward this requirement.

Full-Time Student Enrollment:

Graduate student full-time enrollment statuses pre-comprehensive exam:

- 9 credit hours for fall and spring, 4 credit hours for summer.

Graduate student full-time enrollment statuses post-comprehensive exam:

- 2 credit hours for fall and spring, 1 credit hour for summer.

Graduate

MS in Microbiology

Thesis/Non-Thesis Requirements

Minimum requirements by the Graduate School (http://gradschool.missouri.edu/academics/graduation-requirements/masters-grad-requirements.php).

Students must make the degree change with the Graduate School and follow the minimum requirements set by the Graduate School. The Molecular Pathogenesis and Therapeutics Graduate Program requires all Masters students to provide a written thesis as well as present it orally in a public seminar.

Admissions

The Department does not accept students into the program.

PhD in Microbiology (MED)

Admission Contact Information
Jana Clark
Department of Molecular Microbiology and Immunology
M616 Medical Science Building
Columbia, MO 65212
573-882-3938
mmi@missouri.edu

The Departments of Microbiology and Immunology in the Medical School and Veterinary Pathobiology in the Veterinary School have combined, Molecular Pathogenesis and Therapeutics Graduate Program, to offer a graduate program designed to prepare students for an advanced professional career in microbiology and immunology. Emphasis is placed on developing outstanding students for productive supervisory roles in universities and colleges, industry, government and research institutes. Enrollment is limited to those students who show evidence of potential for research.

Application Deadline

Fall deadline: January 15
Admission Criteria

- Minimum TOEFL scores:
  - Internet-based test (iBT)
    - 92
  - Paper-based test (PBT)
    - 580
- Minimum GRE scores:
  - When did you take the GRE?
    - Verbal + Quantitative
    - Analytical
  - Prior to August 1, 2011
    - 1100
  - On or After August 1, 2011
    - 300
- Minimum GPA: 3.0
- Bachelor’s degree from an accredited college or university
- Courses in the following: biology; advanced courses in biochemistry and/or molecular biology are highly desirable; chemistry (quantitative or organic); physics; mathematics

The PhD degree is offered only to students who demonstrate a high level of specialized knowledge and clear evidence of research potential.

Required Application Materials

To the Graduate School:
- All required Graduate School (https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=umc-grad) documents
- TOEFL score (if international applicant)

To the MMI Program:
- Departmental application (https://mmi.missouri.edu/apps/grad_app)
- 3 letters of recommendation from individuals competent to comment on the applicant’s potential for graduate work
- GRE scores
- Personal statement
- Copy of TOEFL scores (if international applicant)

Research & Teaching Assistantships

Students in the doctoral program are awarded research assistantships. Research assistants work with faculty members to obtain practical experience in carrying out research proposals through the collection of research data and writing research reports. All students in the graduate program are required to participate as teaching assistants for two semesters during their graduate studies.

Degree Completion Requirements

To be accepted for candidacy into the PhD program in microbiology & immunology, all applicants must perform satisfactorily in a core curriculum that includes advanced-level courses in the sub disciplines of immunology, molecular biology and microbial pathogenesis. Under the guidance of a doctoral program committee, a course of study is individually designed to fit each student’s academic background, experience and objectives. Interdisciplinary courses in biochemistry, molecular and cellular biology and genetics provide breadth and balance in the program and enhance the student’s research abilities. In addition, the PhD program consists of the following:

- Practical experience in teaching
- Successful completion of a comprehensive examination that tests the student’s ability to develop an original scientific hypothesis and devise a feasible research plan that will test the hypothesis.
- A demonstration of research and writing ability by completing a scholarly dissertation on an approved research problem that results in the contribution of significant new knowledge. The final examination primarily covers this dissertation research.

University of Missouri Graduate School Application:

“You can apply to the University of Missouri Graduate School (http://gradschool.missouri.edu) or directly to the MPT Program Application (http://medicine.missouri.edu/mmi/graduate-application.html) and your application will receive equal attention. However, if you apply through the MPT Program Application and are accepted by the MPT Admissions Committee you will ultimately have to complete the Graduate School application before you can be formally admitted to the program. Applicants will not be registered with University of Missouri Graduate School (http://gradschool.missouri.edu) until they have completed the graduate school application and paid the graduate school application fee.”

Applicants who are in the United States and reviewed favorably by the Graduate Admissions Committee will be invited to visit the University of Missouri for an interview for which the program defrays expenses. This visit provides an excellent opportunity for the prospective student to meet the faculty members, talk and interact with our current students, view the University of Missouri-Columbia and the Molecular Pathogenesis and Therapeutics Graduate Program, and experience Columbia, Missouri.

All application materials are filed alphabetically under the family name as indicated by the applicant on the International Student Application form. It is important that all supporting documents use the same name and spelling as the International Student Application so they can be quickly matched up to complete the application file.

You may either print the completed online application form or the PDF version of the form off and mail to:

Jana Clark, Business Support Staff II
Department of Molecular Microbiology & Immunology
M616 Medical Sciences Building

About the Program

One of the most exciting and dynamic fields of modern science worldwide is neuroscience, the study of how the nervous system is organized and how it functions. The field of neuroscience encompasses many disciplines, including biology, biochemistry, computer sciences, electrical engineering (neural modeling of neural networks and biomedical instrumentation), neurology, neurosurgery, pharmacology, physics, physiology, psychology, psychiatry, and radiology. Neuroscientists have advanced our understanding of nervous system development, neural function, injuries of the nervous system, and disease processes. At MU, neuroscientists investigate the molecular and cellular organization of the nervous system, the structure and function of neural systems (including vision and hearing), behaviors generated by the nervous system, and neurological diseases and disorders.

Faculty

**Assistant Professor** K. Aldridge, S. Christ, S. Ding, Z. Gu, M. Iyer, D. Kline, C. Kuehl-Kovarik, L. Reneker, M. Thakkar, M. Will

**Associate Research Professor** A. Simonyi

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
- Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in neuroscience, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

About the Program

One of the most exciting and dynamic fields of modern science worldwide is neuroscience, the study of how the nervous system is organized and how it functions. The field of neuroscience encompasses many disciplines, including biology, biochemistry, computer sciences, electrical engineering (neural modeling of neural networks and biomedical instrumentation), neurology, neurosurgery, pharmacology, physics, physiology, psychology, psychiatry, and radiology. Neuroscientists have advanced our understanding of nervous system development, neural function, injuries of the nervous system, and disease processes. At MU, neuroscientists investigate the molecular and cellular organization of the nervous system, the structure and function of neural systems (including vision and hearing), behaviors generated by the nervous system, and neurological diseases and disorders.

Students interested in the program are encouraged to contact members of the faculty directly by phone or e-mail, or visit the Interdisciplinary Neuroscience Program website.

Career Opportunities

MU’s Interdisciplinary Neuroscience Program offers talented graduate students a chance to train for a career in one of the most exciting fields of modern science. Most of our students pursue research and teaching careers in basic neuroscience departments at prestigious research universities. Others opt for challenging and rewarding positions in applied fields, such as drug research or neurodiagnostic technology. Whatever their ultimate goals, the graduate neuroscientists who are trained at MU gain a solid understanding of the nervous system and of the experimental methods by which this knowledge is acquired.

Plan of Study

Typical undergraduate majors that constitute preparation for graduate work in neuroscience include, but are not limited to, biochemistry, engineering, biology, computer science, chemistry, physics, neurobiology, physics and psychology.

After completing comprehensive course work in molecular, cellular, systems and behavioral neuroscience, graduate students join a research laboratory and work with other lab personnel to master the relevant technical skills and theoretical concepts in their chosen field. Students in the Interdisciplinary Neuroscience Program have the opportunity to present their findings at lab meetings, seminars, journal club sessions, and both national and international professional scientific conferences.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Graduate Certificate in Neuroscience

The purpose of this certificate is to provide formal recognition to post-baccalaureate students who are taking neuroscience courses and conducting research in neuroscience laboratories. This stand-alone certificate would allow post-baccalaureate students to have a specific, formal indication of their advanced studies and would be very beneficial to students who are considering applying to graduate degree programs or health sciences programs, such as medical or dental school.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/neuroscience-graduate-certificate/neurosci-ge/Gedt.html

Graduate

PhD in Nutrition Area Program

About the Program

The Nutrition Area Program provides training in the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition: general research skills; structure and biochemical and metabolic functions of nutrients and other dietary constituents; food, diets, and supplements; nutritional status assessment; nutrition and disease; nutrition interventions and policies; and analytical skills. Graduate students also receive training in laboratory research, seminar preparation and delivery, scientific writing, problem solving and research grant writing. Graduate study in nutritional sciences at the University of Missouri offers the advantage of interdisciplinary nutrition research that is facilitated via the many research centers at MU, including Food for the 21st Century (F21C), the Botanical Center, the Life Sciences Center and the MU Nutritional Center for Health (MUNCH).

Nutrition is, by definition, an applied and multi-disciplinary science that integrates other disciplines such as biochemistry, physiology, biology, psychology, sociology, and economics. A primary research focus in the department of Nutrition and Exercise Physiology is the role of diet in the prevention and treatment of chronic diseases that are prevalent in the United States today: obesity, the metabolic syndrome, diabetes, immune disorders, neurodegenerative diseases, and osteoporosis. Specific dietary components being studied for their role in human health include protein, calcium, vitamin D, copper, iron, omega-3 fatty acids, and nutraceuticals. Another important research area is the determinants of eating behavior, including neuro-psychological, sociologic, and economic factors. Investigative approaches include epidemiology, clinical trials, human studies, experimental and transgenic animal models, and cultured cell models.

A total of 72 hours beyond the bachelor’s degree, including but not limited to courses from the emphasis areas are required; courses from the Masters degree may be counted at the discretion of the student’s committee. At least 15 of the 72 hours must be at the 8000/9000 level (exclusive of research, problems and independent study experiences). Graduate students may elect to take suggested courses from the following emphasis areas: Human/Clinical Nutrition, Public Health Nutrition, Behavioral Science, Food Science and Biochemistry/Cell Physiology. A list of possible courses that fall within these areas can be found on the department website: http://ns.missouri.edu/graduate_phd.html.
Sample Plan of Study

Because students in the PhD program are from a wide variety of circumstances, and pursue the PhD at different paces, a sample plan of study is not easily produced. Students are encourage to work out their plan of study with their advisor.

Qualifying Process

Nutritional Sciences Program Applicants must pass a Qualifying Exam before a student is officially admitted to the doctoral program. The Qualifying Exam should be completed by the end of the second semester (D1 form should be filed with the Graduate School). The Qualifying Exam consists of a knowledge-based written exam and an oral exam.

Comprehensive Examination Process

Candidacy for a doctoral degree is established by passing the comprehensive examination. The comprehensive examination includes written and oral sections and is completed as the candidate is completing the prescribed work. The comprehensive examination is the most advanced posed by MU. It consists of written and oral sections. A doctoral student must successfully complete the comprehensive examination within a period of five years beginning with the first semester of enrollment as a PhD student and at least seven months before the final defense of the dissertation. The two sections of the examination must be completed within one month. A report of this decision (pdf) carrying the signatures of all members of the committee, must be sent to the Graduate School and the student no later than two weeks after the comprehensive examination is completed.

Dissertation Requirements

The dissertation must be written on a subject approved by the candidate’s doctoral program committee, must embody the results of original and significant investigation and must be the candidate’s own work. All dissertation defenses shall be open to the general faculty. For the dissertation to be successfully defended, the student’s doctoral committee must vote to pass the student on the defense with no more than one dissenting or abstaining vote.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Exercise Physiology (http://gradschool.missouri.edu/academics/programs/exercise-physiology) and the minimum requirements of the Graduate School. Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you applied. Specific information can be found on the department website: http://ns.missouri.edu/grad_admission.html

Nutritional Area Program PhD Applicants are expected to have undergraduate training (lecture and laboratory courses) in general and organic chemistry and biology, a two-semester course in biochemistry, and an upper-level human nutrition course. They must have an average of B or better in science courses (chemistry, biology, physics, biochemistry, mathematics, etc.) taken at an accredited institution and must provide GRE scores. TOEFL scores are required for all international applicants.

Deadline for Applications is December 30th. While applications received after that date will still be considered, they will not be eligible for all fellowships.

Pathobiology Area Program

College of Veterinary Medicine
201 Connaway Hall
Columbia, MO 65211
573-884-2444

About the Pathobiology Area Program

The Pathobiology Area Program is university-wide and is staffed by faculty from the College of Veterinary Medicine (Veterinary Pathobiology, Veterinary Medicine and Surgery), School of Medicine (Pathology and Anatomical Science, Molecular Microbiology and Immunology, Biochemistry), College of Arts and Science (Biological Sciences), and College of Agriculture, Food and Natural Resources (Biochemistry, Animal Sciences).

Note: The master of science program in biomedical sciences (p. 630), with an emphasis in veterinary pathobiology, is listed separately in this catalog but shares the pathobiology doctoral courses and faculty list.

Faculty

McKee Endowed Professor G. Stewart

Associate Clinical Professor L. Berent*, D. Kim, T. Reilly**, C. Vogelweid*, M. Whitney

Associate Research Professor A. Ray

Professor Emeritus C. A. Carson

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in pathobiology, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

• PhD in Pathobiology Area Program (p. 659)

About the Program

The Pathobiology Area Program is university-wide and is staffed by faculty from the College of Veterinary Medicine (Veterinary Pathobiology, Veterinary Medicine and Surgery), School of Medicine (Pathology and Anatomical Science, Molecular Microbiology and Immunology, Biochemistry), College of Arts and Science (Biological Sciences), and College of Agriculture, Food and Natural Resources (Biochemistry, Animal Sciences).

Note: The master of science program in biomedical sciences (p. 630), with an emphasis in veterinary pathobiology, is listed separately in this catalog but shares the pathobiology doctoral courses and faculty list.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. In this program, various stipends are available, including teaching and research assistantships and postdoctoral fellowships. Check the program Web site or ask the program contact for details.

Career Preparation

Graduate training relates to the major departmental thrust — application of advanced biotechnology to solving today’s most perplexing agricultural, biomedical and companion animal questions. The faculty in the Pathobiology Area Program consists of scientists engaged in a wide variety of research programs supported by grants and contracts from government, foundations and private industry.

The Pathobiology Program is designed to prepare students for advanced professional careers in universities and colleges, research institutes, public health, hospital laboratories and industrial research. The broad scope of the program and its organization across departments creates an atmosphere for meaningful interdisciplinary dialogue between graduate students and faculty. Furthermore, it increases availability of advisers, committee members, facilities and equipment for doctoral candidates. A PhD candidate may choose a plan of research to take advantage of a wide range of interests and specialties in pathology and microbiology.

Facilities and Resources

Facilities are available that are suitable for advanced research in pathology, microbiology and molecular biology. A wide range of equipment for advanced molecular biological procedures is available. BSL-3 biocontainment facilities are available.

Areas of Study

Toxicology, environmental toxicology, comparative medicine, epidemiology and pathogenesis of avian and mammalian diseases (companion animal, food-producing animal and spontaneous disease of laboratory animals), molecular biology, ultrastructure, parasitology, DNA and RNA analysis, biomechanics, physiology, pathophysiology, oncology, bioinformatics, diagnostic anatomic pathology, veterinary neuropathology, pathology of infectious disease, quantitative pathology, molecular genetics, domestic animal genomics, bacteriology/mycology, virology, cell biology, genomics, and antimicrobial resistance.

Professional students with a DVM degree may be eligible to waive the GRE.

Required Application Materials
To the Graduate School:
All required Graduate School documents

To the Pathobiology Area Program:
3 letters of recommendation (can be submitted through the Graduate School’s online application as well)
GRE scores (required)
Mentor letter of support

Plan of Study
Most of the student's program and examining committees shall be from the Area Program faculty. Under the guidance of a program committee, a course of study is individually designed to fit each student's academic background, experience and objectives. Courses may be chosen from one or more departments, as decided by the student in conjunction with the student's mentor/committee, but shall constitute a definite plan of education for research or scholarly investigation in some particular aspect of microbiology, pathology, or comparative medicine. The final examination covers mainly the dissertation.

Degree Requirements
Research is the foundation of graduate and postdoctoral study and students within the Pathobiology Area Program can expect to spend 75 percent of their time engaged in research activities. The PhD degree requires 72 credit hours of work including a minimum of 15 credits of upper-level graduate course work exclusive of research credits. The student must pass a written and/or oral comprehensive examination in the area of study and write, present and defend a dissertation that embodies the results of original and significant investigation by the candidate. Up to 30 hours of post-baccalaureate credit from an accredited institution may be transferred toward the doctoral degree.

Interdisciplinary Area of Pathobiology
The Department of Veterinary Pathobiology in the College of Veterinary Medicine, along with the Department of Pathology and Anatomical Sciences in the School of Medicine and faculty from many other departments throughout the University, offer a PhD degree through the Pathobiology Area Program.

Prospective students must have a solid background in the life sciences, with advanced level experience in microbiology, immunology, genomics, molecular biology, cell biology, pathology, and/or biology.

Research experience at the undergraduate and/or master’s level is also desirable.

The Pathobiology Area Program is designed to prepare students for advanced professional careers in universities and colleges, research institutes, public health, hospital laboratories and industrial research. The broad scope of the program and its organization across departments creates an atmosphere for meaningful interdisciplinary dialogue between graduate students and faculty. A PhD candidate may choose a plan of research to take advantage of a wide range of interests and specialties in pathology and microbiology. Facilities are available that are suitable for advanced research in pathology, microbiology, and molecular biology. A wide range of equipment for advanced molecular biological procedures is available. Various stipends are available, including teaching and research assistantships and postdoctoral fellowships.

Faculty members of the Program guide the selection of coursework and the development of a dissertation project. A list of doctoral faculty eligible to supervise PhD students is available here (http://www.cvm.missouri.edu/AreaPatho).

For additional information regarding mentorship specifically in the Department of Pathology and Anatomical Sciences program, please contact:

About Pathology and Anatomical Sciences

The Department of Pathology and Anatomical Sciences in the School of Medicine, along with the department of Veterinary Pathobiology in the College of Veterinary Medicine, offers a PhD degree through the Pathobiology Area Program. Faculty also participate in other doctoral programs such as the Integrative Neuroscience Program, Genetics Area Program, and Molecular Pharmacology and Physiology. The MS degree is designed primarily to prepare students for supervisory roles in basic-science and clinical laboratories, and to offer greater in-depth study in pathology and anatomical sciences concurrent with studies leading to the PhD and/or MD degree.

Faculty

Professor  G. E. Davis, W. J. Krause**, J. H. Miles, G. Y. Sun, C. V. Ward*
Associate Professor  E. H. Adelstein**, A. A. Diaz-Arias*, E. A. Ingram, R. Mitra*
Lecturer  D. L. Dufeau, R. H. Dunn, S. D. Maddux*
Clinical Instructor  J. Jones, D. V. Shin
Clinical Professor  D. C. Miller*, M. Petrides*
Associate Clinical Professor  A. D. Havey*
Assistant Clinical Professor  M. Esebua, S. R. Frazier, C. C. Stacy*, M. X. Wang*
Associate Research Professor  R. R. Little
Assistant Research Professor  J. Cui
Adjunct Professor  M. J. Ravosa**, M. S. Stack**
Associate Professor Emeritus  L. E. Spollen

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in pathology and anatomical sciences, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

MS in Pathology

Application Deadline

Fall entrance: Inquire with Director of Graduate Studies

Admission Criteria

- Admission to candidacy in the master’s program is limited to those who hold at least a baccalaureate degree from an accredited college or university.
- Preference will be given to students with a college GPA of 3.5 or higher.
- Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal + Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>
<td>N/A</td>
<td>N/A</td>
</tr>
<tr>
<td>On or After August 1, 2011</td>
<td>325</td>
<td>N/A</td>
</tr>
</tbody>
</table>
Required Application Materials to the Graduate School:

• All required Graduate School documents

Degree Completion Requirements

Each candidate for the master’s degree is required to complete a minimum of 30 semester hours at the 8000 or 9000 level and maintain a B or better GPA in graduate course work, with no more than 12 hours of research, problems, seminars or special investigations.

Candidates also must satisfactorily complete a thesis. A candidate is expected to demonstrate knowledge of clinical and/or research techniques and to defend the thesis.

Faculty members advise students regarding their program of study and thesis research. A list of graduate faculty eligible to supervise MS students is available on the departmental website.

Required courses and those of special interest should complement the student’s academic background and career objectives. The MS degree is designed primarily to prepare students for supervisory roles in basic-science and clinical laboratories, and to offer greater in-depth study in pathology and anatomical sciences concurrent with studies leading to the PhD and/or MD degree.

Admission to candidacy in the master’s program is limited to those who hold at least a baccalaureate degree from an accredited college or university.

Preference will be given to students with a college GPA of 3.5 or higher, GRE scores (verbal + analytical) over 325, and strong letters of recommendation.

Each candidate for the master’s degree is required to complete a minimum of 30 semester hours at the 8000 or 9000 level and maintain a B or better GPA in graduate course work, with no more than 12 hours of research, problems, seminars or special investigations.

Candidates also must satisfactorily complete a thesis. A candidate is expected to demonstrate knowledge of clinical and/or research techniques and to defend the thesis.

Required courses and those of special interest should complement the student’s academic background and career objectives.
Two Different Public Health Degree Options

The University of Missouri offers two different degree programs in the area of public health: the Master of Public Health, and a Master of Science in Public Health.

- The Graduate School confers the Master of Public Health (MPH) degree. The MPH Program has two emphasis areas Health Promotion and Policy or Veterinary Public Health; dual degrees with Public Affairs, Journalism, and Veterinary Medicine; and a graduate certificate. This public health coursework reflects the University of Missouri's strength in the health professions, social work, nursing, medicine, veterinary medicine, and arts and sciences. The MPH is a course of study appropriate for students with a wide variety of undergraduate degrees including social work, political science, biology, and communication.

- A Master of Science in Public Health (post-doctorate) is offered by the Department of Family and Community Medicine in the College of Medicine. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents, and licensed to practice in a primary care specialty.

Faculty

- MS in Public Health: Family and Community Medicine (p. 664)

The Master of Science in Public Health is offered by the Department of Family and Community Medicine in the College of Medicine. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents and licensed to practice in a primary care specialty.

**Graduate**

MPH in Public Health

MPH Application and Admission Information

Admission Contact Information
Enola White (mumphprogram@missouri.edu)
The Master of Public Health (MPH) is the standard professional degree recognized throughout the world for public health practice. The MPH program at the University of Missouri trains practitioners, teachers, researchers, and administrators to plan, implement, and evaluate programs aimed at enhancing health in human populations through organized effort on the local, state, and national level.

All public health students are educated in the core domains of public health and participate in a supervised internship in a public health agency. The combination of course work and practical experience produces individuals who are highly qualified to enter the public health workforce.

The MPH curriculum is drawn from a variety of collaborating academic programs and units. Public health coursework reflects the University of Missouri’s strength in the health professions, social work, journalism, public affairs, nursing, medicine, veterinary medicine, and arts and sciences.

**Degrees**

The MPH is available in two emphasis areas:
- Health Promotion and Policy
- Veterinary Public Health

**Three dual degrees are also offered:**
- MPH/Doctor of Veterinary Medicine (http://publichealth.missouri.edu/programs_mphdvm.php)
- MPH/Master of Public Affairs (http://publichealth.missouri.edu/programs_mphmpa.php)
- MPH/Master of Arts, Journalism (http://publichealth.missouri.edu/programs_mphma.php)

**Thesis Option**

The Masters Thesis Research (P_HLTH 8090) requires independent research aimed at discovery and/or development of elements or relationships derived from a public health theory. A formal written report using guidelines established by the MU Graduate School is required. Masters Thesis Research enables the student to use the research process in a systematic inquiry of elements and relationships within public health theory. MU Graduate School Guidelines for the Thesis Process is available at http://gradschool.missouri.edu/academics/thesis-dissertation/process/index.php.

The Master’s Thesis Project provides students with the opportunity to:
- generate a research question within a theory,
- formulate and implement a research design, and
- make recommendations for replication, revisions, or future investigations.

**Application Deadlines**
- Fall semester: July 1st
- Spring semester: December 1st
- Summer semester: May 1st

**Admission Criteria**

- Minimum TOEFL scores:
  - Internet-based test (iBT) 80
  - Paper-based test (PBT) 550
- Minimum Academic IELTS overall score: 6.0
- Minimum GRE score: not set
- Minimum GPA: 3.0 in last 60 hours of undergraduate coursework

**Required Application Materials**

For more information to apply click here (http://publichealth.missouri.edu/apply.php).

**MPH in Public Health with Emphasis in Health Promotion and Policy**

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

For admission requirements, refer to the Graduate School’s website for the minimum qualifications for the degree program (http://gradschool.missouri.edu/academics/programs) and the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

Graduate Certificate in Public Health

Financial Aid from the Program
Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission
Students wishing to pursue a Graduate Certificate in Public Health should complete the MU Graduate School’s online application (standardized test scores are not required). Certificate candidates must provide the MPH Program’s Personal Data Sheet and official transcripts to the MPH Program.

About the Certificate
This 12-credit-hour program provides students with the core public health education that they need to enhance their professional knowledge. The certificate program includes the following courses:

• Principles of Public Health
• An approved Health Statistics course
• Human Health and the Environment, Social and Behavioral Sciences in Public Health or Epidemiology
• One approved elective

Applying to the Graduate Certificate Program
Students who complete the Graduate Certificate in Public Health with a minimum grade of B in each of the four courses will be recommended for admission to the Master of Public Health (MPH) program should they wish to continue their studies. The course credits earned for the graduate certificate will be credited toward the MPH degree. To apply click here.

Application Deadline
Deadline for Fall entrance: Call for deadline dates

Admission Criteria
• Board-certified/board-eligible primary care physicians

Required Application Materials
To the Graduate School:
All required Graduate School documents
To the Program (call for application):
• 3 letters of recommendation
• Departmental application
• Personal statement
• CV or résumé
• Verification from medical school and residency program
• Official transcripts

Financial Aid from the Program
Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Plan of Study
The graduate program leading to the master of science includes a combination of course work, research and field experience. Courses cover areas such as research methods, epidemiology, biostatistics and learning theory.

The program requirements include 30 hours of graduate course work and the completion of scholarly project.

MS in Public Health: Family and Community Medicine

Admission Contact Information
Ashley Granger
One Hospital Dr,
M224 Medical Sciences Building, DCO32.00
573-884-7060

The Department of Family and Community Medicine has responsibilities for teaching, research and service activities covering the spectrum from primary medical care to community medicine. This graduate degree program is designed to prepare primary care physicians to work in an academic setting as faculty members with responsibilities for patient care, teaching, research, and scholarly endeavors. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents and licensed to practice in a primary care specialty.
Social Work/Public Health

Students can earn a Master of Social Work (http://ssw.missouri.edu/msw.html) (MSW) and a Master of Public Health (http://publichealth.missouri.edu) (MPH) with an emphasis in Health Promotion and Policy (http://publichealth.missouri.edu/programs_health_promo_pol.php). Graduates of the dual degree will be well-positioned to find employment as a health policy advocate, health agency administrator or in an integrated behavioral health setting as a care managers, health coach, patient advocate, counselor, or team leader. Students pursuing dual degrees must be independently admitted to each program. Only Regular Standing (http://ssw.missouri.edu/msw_options.html) (RS), full-time MSW students (both clinical or PP&A concentration) will be admitted to the program.

The dual degree reduces total student credit hours by 24-27 credits and reduces the length of study by one academic year. If completed separately, students would be required to complete 105 credit hours (60 credit hours for RS MSW; 45 credit hours for MPH). Students completing both degrees will be required to complete 78-81 credit hours, with 51-54 of those being discipline specific (18 MPH and 33 [PP&A]- 36 [Clinical] MSW) and 27 credits shared between the two programs. Students will complete the both degree programs in 7 semesters, including one summer session. Please see our sample plans of study (http://ssw.missouri.edu/msw_studyplans.html#dual).

Students will apply separately to each program and be admitted to both programs before they are accepted as a dual degree student. Students may apply at any point before beginning graduate school or during the first year of either program. MPH students applying for the MSW program (http://ssw.missouri.edu/mswapp.html) must submit their MSW application no later than April 15th (http://ssw.missouri.edu/msw_deadlines.html#dual) of their first year of study but early application submission is encouraged. MSW students applying for the MPH program must submit their MPH application (http://publichealth.missouri.edu/apply_mph.php) by December 1st of their first year. Once accepted into both programs, the student must complete the Intent to Complete MSW/MPH Dual Degree form (http://ssw.missouri.edu/docs/msw/dualDegree.pdf).

The advisor for the MSW/MPH Dual Degree program participants will be a faculty member with a joint appointment in both the MSW and MPH Programs. If a faculty member with a joint appointment is not available for advising, the student will be appointed a separate advisor for both degree programs. In cases where student difficulties are experienced that require advisory services other than that available from the advisor, the School of Social Work's formal student advisory process will be followed.

Up to eight hours of transfer credit (http://ssw.missouri.edu/msw_coursedepend.html#dual) may be applied as follows: to one of the two degree programs, or divided between the two degree programs per the advisor(s) and program directors’ decision. The eight hours of transfer credit will not be applied separately to each degree program.

Credit requirements, shared hours, and curriculum focus conform to the requirements of the MU Graduate School, the national accrediting body for graduate education in public health (CEPH), and the national accrediting body for graduate education in social work (CSWE). The capstone and internship will satisfy the requirements of both programs and will focus on the intersection of subject matter between social work and public health.

Faculty

Faculty for the Social Work/Public Health dual degree are housed in other departments.

Undergraduate

While MU does not offer undergraduate degrees specifically in social work/public health, the University does offer a dual graduate degree in the subject, as well as baccalaureate, master’s and doctoral degree opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MSW in Social Work program (http://gradschool.missouri.edu/academics/programs/social-work/masters.php), the requirements of the MPH in Public Health program (http://publichealth.missouri.edu/apply.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.
Additional Minors and Certificates - Interdisciplinary Academic Programs

Undergraduate

• Certificate in Digital Global Studies (p. 667)
• Minor in Entrepreneurship (p. 667)
• Certificate in Environmental Studies (p. 670)
• Certificate in General Honors (p. 670)

Graduate

• Minor in Ancient Studies (p. 670)
• Certificate in Autism and Neurodevelopmental Disorders (p. 671)
• Certificate in Center for the Digital Globe (p. 671)
• Minor in College Teaching (p. 674)
• Certificate in Community Processes (p. 675)
• Certificate in Conservation Biology (p. 675)
• Certificate in European Union Studies (p. 675)
• Minor in Gerontology Studies (p. 676)
• Certificate in Global Public Health (p. 676)
• Minor in International Development (p. 676)
• Certificate in Life Science Innovation and Entrepreneurship (p. 677)
• Certificate in Society and Ecosystems (p. 677)

Certificate in Digital Global Studies

This certificate is designed to prepare students in any discipline for our new global reality and equip them with the knowledge and skills needed to be successful in today's highly competitive global job market. All current MU undergraduate students in any discipline are eligible to participate.

The structure of the certificate includes two required core courses, two elective courses, and an experiential learning component. Below are the details on the required courses (more cross-listed options will be added).

A list of approved options for the electives is available online at: http://cdig.missouri.edu/globalconnect/electives.html.

The experiential learning component varies depending on the student's field of study and interest, but an emphasis on global relations, cultural awareness, or media technology is required. This component could be study abroad, service learning, internship, etc. with an MU Center or an outside local, national or international organization.

For additional information about the certificate, contact:
Professor Monika Fischer, Certificate Director
458 Strickland Hall
Columbia, MO 65211
E-mail: globalconnect@missouri.edu
Website: http://globalconnect.missouri.edu/

Requirements

- GERMAN/JOURN 3510/ Think Global: Fundamentals of Globalization 3
- GERMAN/JOURN 3510/ Think Global: Fundamentals of Digital Technologies 3
- GERMAN/T_A_M 4810  Case Studies in an Inter/Multicultural World 3

Minor in Entrepreneurship

• CAFNR Track (p. 667)
• BUSI Track (p. 668)
• HES Track (p. 668)
• JOURN Track (p. 669)
• JOURN Strategic Communication Track (p. 669)

The undergraduate minor in entrepreneurship is built upon three pillars: development of creativity, opportunity for innovative action, and management of entrepreneurial enterprises. It is available to students in the College of Agriculture, Food and Natural Resources (CAFNR); the College of Business (BUSI); and the College of Human Environmental Sciences (HES); School of Journalism (JOURN).

Students who wish to complete the minor are encouraged to declare their intention as soon as possible. This allows the required courses to be effectively integrated into their course schedules along with other courses required for their intended major. An advisory committee will be appointed to make administrative decisions related to the minor (course additions/deletions). The members will be recommended by deans of the participating schools and colleges. Primary responsibility for student advising falls within the home college of the student OR in the unit where students claim the minor (e.g. Arts and Sciences students).

The minor consists of 16 credit hours. Students must complete coursework in management, creativity, and innovation, as well as in a workshop series that represents a common learning experience for all MU entrepreneurship minors. Three hours of coursework is required in each area, and a one hour experiential seminar course. Students must select the final three hours to complete the minor from approved courses in one of the pillars. Each of the academic units that offer the minor recommend a set of courses, which are referred to as tracks. Details on those tracks are below.

CAFNR Track

Course 1: Management of Entrepreneurial Organizations & Enterprises

**PLUS 1: Experimental Seminar**

Recommended Courses:

- MANGMT 4185 Problems in Management 1

This seminar gives students exposure to a variety of experiences including lectures, networking with entrepreneurs, and participant observation.

**JOURN Strategic Communication Track**

**JOURN Strategic Communication Track**

**Course 1: Management of Entrepreneurial Organizations & Enterprises**

A course designed to help students develop and understand the principles of entrepreneurship.

Recommended Courses:

- AG_EC 3283 Fundamentals of Entrepreneurship 3

**Course 2: Development of Creativity (within the major requires pre-reqs/consent of instructor)**

Recommended Classes:

- JOURN 4208 Strategic Writing II ((copywriters)) 3
- JOURN 4228 Strategic Design and Visuals II ((art directors)) 3
- JOURN 4256 Public Relations 3

**Course 3: Organizational & Business Fundamentals**

A course designed to develop a background in one of the general functions of a new business.

Recommended Classes:

- ACCTCY 2010 Introduction to Accounting 3

**Course 4: Opportunity for Innovative Experience and Action**

Students take an internship that offers an opportunity to develop experience in innovation or students take an additional course 3 (management) or course 2 (creativity).

Recommended Classes:

- JOURN 4734 Journalism and Chaos: How to Understand and Cover 21st Century Business Models 3

**Course 5: Practicum Capstone**

Experimental learning courses, where the student and the supervisor create an opportunity for innovative output.

Recommended Classes:

- JOURN 4970 Strategic Campaigns 3
**Certificate in Environmental Studies**

Special Degree Programs  
114 Switzler Hall  
(573)882-6060  

Many environmental careers require the kind of discipline-specific education available in traditional majors, but with an added base of knowledge about environmental issues and the skills to address them. The Certificate in Environment Studies provides that base. The Certificate is available to all majors. However, because of the variety of majors and the goal of the certificate program to compliment a specific course of study, students must select courses in consultation with the Environmental Studies advisor.

**Certificate Requirements**

- 6 hours of Natural or Social Dimension courses  
- 3 hours of AG_EC 2070 or NAT_R 2160  
- 6 hours of upper level environmental-focused courses

**Sample Certificate for a Sciences Major**

**Natural and Social Dimensions Courses are offered in other departments throughout the university. Check the Environmental Studies website or visit with the advisor to get an up-to-date list of courses that fit these categories.**

**Graduate Minor in Ancient Studies**

Interdisciplinary Minor within the College of Arts and Science  
http://ancientstudies.missouri.edu/index.shtml

**About the Minor**

The Ancient Studies program, created in 1968, is shared among the faculty from six departments at the University of Missouri. This minor provides an opportunity for students to diversify their curriculum and to perceive their field in a broader context than is possible within a departmental program. Students in this program select about one quarter of the total courses from among a variety of courses designated by the participating departments.

A student pursuing a graduate degree in Anthropology, Art History and Archaeology, Classical Studies, History, Philosophy or Religious Studies may elect an Ancient Studies minor at either the M.A. or Ph.D. level. The Department of Classical Studies offers graduate work leading to the master of arts degree in classical languages with emphasis on Latin, Greek or both classical languages. The PhD degree in classical studies requires work in both Greek and Latin.

**Contact Information**

Department of Anthropology  
107 Swallow Hall  
573-882-4731

Department of Art History and Archaeology  
109 Pickard Hall  
573-882-6711

Department of Classical Studies  
405 Strickland Hall
Admissions
Ancient Studies Program Requirements

1. Admission into one of the following graduate departments: Anthropology, Art History and Archaeology, Classical Studies, History, Philosophy or Religious Studies.

2. Fulfillment of all the requirements of the major department. The master’s degree may be completed within approximately two years; the doctorate normally requires three years of course work beyond the master’s level.

3. The minor consists of additional courses to be selected from Ancient Studies courses outside the student’s major department; it usually constitutes about one-quarter of the graduate course work. For recognition of the minor, students should apply formally to the current chair of the Ancient Studies Committee.
   a. For the M.A. degree, a minimum of 9 hours from at least two departments.
   b. For the Ph.D. degree, a minimum of 24 hours (including the work for the M.A.) from at least two departments outside the student’s home department. These must include at least one course on the 7000-level in each of the two departments.

To the University

General admission and degree requirements for the Graduate School are determined by the Graduate Faculty Senate. However, admission to the Graduate School does not in itself entitle a student to candidacy for an advanced degree. A student must also be accepted for advisement by the faculty of a department or area. Departments and areas establish admission standards that, in many cases, exceed the minimum requirements of the Graduate School. Admission to the Graduate School is based on three considerations:

• an official transcript showing that the applicant has earned a baccalaureate, DVM, MD or JD degree equivalent to that granted by MU,
• a grade point average of B or better in the last 60 hours of undergraduate courses and
• Official GRE results

Financial Support

The Ancient Studies Committee is able to award one fellowship (renewable for four further years) to a doctoral student entering from a University other than MU. In addition, applicants may be eligible for fellowships administered by the Graduate School, including the Gus T. Ridgel Fellowships for Minority Americans. In addition to a stipend, University fellowships include exemption from resident and non-resident educational fees. Some individual departments also offer fellowships, scholarships and other financial assistance for graduate students, including teaching and research assistantships. For information concerning financial aid, write directly to the directors of graduate studies in the department to which you are applying. Financial aid deadlines are frequently earlier than the deadline for applications for admission.

In addition to the materials for admission to the Ancient Studies program, applicants for financial support must submit a separate letter to the department applying for fellowship or assistantship support.

Graduate Certificate in Autism and Neurodevelopmental Disorders - Interdisciplinary

Note: This program is no longer accepting applicants

The certificate is designed to allow students from multiple disciplines to gain knowledge of the specialized needs of persons with autism and other developmental disorders. Professionals currently working with children with ASD and other Neurodevelopmental Disorders will enhance their skills, and those who wish to work with this population will enhance their future employability. Additionally, students might use the Certificate to learn about the field, perhaps leading to further graduate study and an advanced academic degree.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/autism--neurodevelopmental-disorders-graduate-certificate/autism-ge/Gedt.html

Graduate Certificate in Center for the Digital Globe

The Center for the Digital Globe graduate certificate is a 12 credit hour graduate certificate program established by the College of Business,
School of Journalism, School of Law and the Department of Textile and Apparel Management in the College of Human Environmental Sciences. The Center for the Digital Globe offers two graduate certificate options. The requirements for each are outlined below.

**Stand-Alone Certificate (For non-degree graduate students and students completing professional degrees) OR Graduate-Degree-Dependent Certificate (For students completing a graduate degree)**

**I. CDiG STAND-ALONE CERTIFICATE**
(For non-degree graduate students and students completing professional degrees)

The Center for the Digital Globe, established by the College of Business, School of Journalism, School of Law and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers a 12 credit hour interdepartmental certificate to non-degree graduate students and professional students of the University of Missouri. The prerequisite for the stand-alone certificate is a baccalaureate degree. The certificate program supplements the students' studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students' successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization. Students receiving the stand-alone certificate will have demonstrated competencies in:

- **Technology** - Students need not have achieved mastery of specific engineering, programming or application skills. Instead, the students must demonstrate a working understanding of how digital technologies function.

- **Global Communication** - One of the primary characteristics of digital technologies, and particularly the Internet, are their function as worldwide communications media. Whether from the perspective of journalism, business or the law, the impact of these new communications channels has been substantial. Students should achieve an understanding of how new media are different from print or broadcast media and the consequences of those differences.

- **Business** - Students should be well grounded in the principles, opportunities and ethical uses of electronic commerce and its impact on journalism, law and commercial practices.

- **Culture and Society** - Digital media raise recurrent questions which call for political and social solutions. Students should be able to understand the broader issues raised by technological change and be prepared to take positions of leadership as such issues present themselves. Examples of such issues are questions of globalization, political boundaries, access, ownership and uses of information, marketing, etc. To achieve the goals of the certificate and assure its value to students, the University and prospective employers or donors, the certificate program enjoys certain characteristics. Perhaps most fundamental is the interdisciplinary nature of the program. While each department has the capability of offering a course emphasis, track or intra-departmental certificates to students in the area of technology and commerce, one of the fundamental concepts underlying the Center is the value and necessity of approaching these issues from the perspective of various disciplines. With these principles in mind, the program has been designed to assure that the interdisciplinary character of the course of work will be emphasized. The required course work compels students to come together for an interdisciplinary introduction to their studies and permits them to work separately and within their respective disciplines for further study. Students come together for a concluding experience that involves working collectively through a case study.

**Academic Requirements for the Stand-Alone Certificate:**

**Eligibility:**
Prerequisite for the stand-alone certificate is a baccalaureate degree. Professional students who are pursuing the stand-alone certificate must dually enroll in the Graduate School, be admitted to the CDiG Graduate Certificate Program and receive graduate credit for their 12 semester hours of stand-alone certificate courses. Others seeking this certificate who are not professional students and have not been admitted to Graduate School must also apply and be admitted to the CDiG Graduate Certificate Program. Apply online at the following web site: https://app.applyyourself.com/?id=umc-grad

**SPECIAL NOTE FOR LAW STUDENTS:** No more than six non-Law credits may count toward the JD degree.

**Credits required for the Stand-Alone Certificate:**
At least 12 eligible credit hours, consisting of an introductory, interdisciplinary course (MANGMT 8100), 6 credit hours in two or more eligible graduate courses, and a concluding seminar/research project course (JOURN 8052). The course of work for graduate certificate students is more specifically described as:

1. **MANGMT 8100 Exploring the Digital Globe, 3 credits (offered fall semesters).** This inter-departmental course introduces students to the impacts of technological change and globalization from the perspective of business, law and journalism. Students are introduced to electronic commerce, digitization and globalization to prepare them to respond to the challenges of the digital globe. Students do not acquire specific technological skills; they acquire a working understanding of how digital technologies function. The course is taught by faculty from the journalism, business and law schools, and from the Department of Textile and Apparel Management of the College of Human Environmental Sciences. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.

2. **6 credits of graduate course work -** The courses taken to satisfy this requirement are those that have been approved by the Center’s faculty in consultation with the academic programs that offer the courses. The approved courses are graduate level courses that address one or more of the competencies specified above. See the Center for the Digital Globe’s graduate courses web page http://cdig.missouri.edu/coursesgrad.html for a list of approved courses that meet this requirement.

3. **JOURN 8052 Case Studies in the Digital Globe, 3 credits (offered fall and winter semesters).** The course is designed to further develop the levels of understanding and skills obtained in previous course work. In this class, students will achieve a better understanding of how new media are different from print or broadcast media and the consequences of those differences. Students are introduced to the principles, opportunities and ethical use of electronic commerce. Students critically analyze issues raised by technological change, including globalization, political boundaries, access, ownership and uses of information, marketing, etc. As with the introductory class, this course is taught by faculty from a variety of departments. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.
Stand-Alone Certificate Requirements Summary and Final Application for Certificate

To be eligible for the stand-alone certificate in the Center for the Digital Globe, students are required to take four courses for graduate credit: two courses offered through Center for the Digital Globe and two electives. The required courses are MANGMT 8100 Exploring the Digital Globe and JOURN 8052 Case Studies in the Digital Globe. The two electives should be determined in consultation with the student’s CDiG affiliated advisor. To receive the certificate upon completion of the program, students must also print and fill out the Application for a Graduate Certificate Form located on the Graduate School web site: http://gradschool.missouri.edu/forms-downloads/repository/cert-plan.pdf The form asks for a list of courses taken by the student to fulfill the certificate requirements. The form must be signed by the student, the CDiG executive director and the graduate dean. For students completing a professional degree, a copy of the student’s approved degree program must be attached to the certificate application form when submitting it for the CDiG executive director’s approval. The form then must be submitted to the Graduate School, 210 Jesse Hall.

II. CDiG GRADUATE DEGREE DEPENDENT CERTIFICATE
(for students completing a graduate degree)

The Center for the Digital Globe, established by the College of Business, School of Journalism, School of Law and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers a 12 credit hour interdepartmental certificate to graduate students of the University of Missouri. The certificate program supplements the students’ graduate studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students’ successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization. Students receiving the graduate degree dependent certificate will have demonstrated competencies in:

Technology - Students need not have achieved mastery of specific engineering, programming or application skills. Instead, the students must demonstrate a working understanding of how digital technologies function.

Global Communication - One of the primary characteristics of digital technologies, and particularly the Internet, are their function as worldwide communications media. Whether from the perspective of journalism, business or the law, the impact of these new communications channels has been substantial. Students should achieve an understanding of how new media are different from print or broadcast media and the consequences of those differences.

Business - Students should be well grounded in the principles, opportunities and ethical uses of electronic commerce and its impact on journalism, law and commercial practices.

Culture and Society - Digital media raise recurrent questions which call for political and social solutions. Students should be able to understand the broader issues raised by technological change and be prepared to take positions of leadership as such issues present themselves. Examples of such issues are questions of globalization, political boundaries, access, ownership and uses of information, marketing, etc.

To achieve the goals of the certificate and assure its value to students, the University and prospective employers or donors, the certificate program enjoys certain characteristics. Perhaps most fundamental is the interdisciplinary nature of the program. While each department has the capability of offering a course emphasis, track or intra-departmental certificates to students in the area of technology and commerce, one of the fundamental concepts underlying the Center is the value and necessity of approaching these issues from the perspective of various disciplines. With these principles in mind, the program has been designed to assure that the interdisciplinary character of the course of work will be emphasized. The required course work compels students to come together for an interdisciplinary introduction to their studies and permits them to work separately and within their respective disciplines for further study. Students come together for a concluding experience that involves working collectively through a case study.

Academic Requirements for the Graduate Degree Dependent Certificate

Graduate degree seeking students who want to pursue a Center for the Digital Globe Certificate must complete a Change of Program Form and be formally admitted to the certificate program. Print the Change of Program Form located on the Graduate School web site: http://gradschool.missouri.edu/forms-downloads/repository/change-degree.pdf. See your graduate faculty advisor to process the form.

SPECIAL NOTE: No more than six of the twelve credits necessary for the CDiG Graduate Degree Dependent Certificate may count toward the graduate degree.

Eligibility: Students who have completed their baccalaureate studies and are enrolled in a master’s, doctoral or professional program and working toward a graduate degree at the University of Missouri.

Credits: At least 12 eligible credit hours, consisting of an introductory, interdisciplinary course (MANGMT 8100), 6 credit hours in two or more eligible graduate courses, and a concluding seminar/research project course (JOURN 8052). The course of work for certificate students is more specifically described as:

1. MANGMT 8100 Exploring the Digital Globe, 3 credits (offered fall semesters). This inter-departmental course introduces students to the impacts of technological change and globalization from the perspective of business, law and journalism. Students are introduced to electronic commerce, digitization and globalization to prepare them to respond to the challenges of the digital globe. Students do not acquire specific technological skills; they acquire a working understanding of how digital technologies function. The course is taught by faculty from the journalism, business and law schools, and from the Department of Textile and Apparel Management of the College of Human Environmental Sciences. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.

2. 6 credits of graduate course work - The courses taken to satisfy this requirement are those that have been approved by the Center’s faculty in consultation with the academic programs that offer the courses. The approved courses are graduate level courses that address one or more of the competencies specified above. See the Center for the Digital Globe’s graduate courses page http://cdig.missouri.edu/coursesgrad.html for a list of approved courses to meet this requirement.
3. JOURN 8052 Case Studies in the Digital Globe, 3 credits (offered fall and winter semesters). The course is designed to further develop the levels of understanding and skills obtained in previous course work. In this class, students will achieve a better understanding of how new media are different from print or broadcast media and the consequences of those differences. Students are introduced to the principles, opportunities and ethical use of electronic commerce. Students critically analyze issues raised by technological change, including globalization, political boundaries, access, ownership and uses of information, marketing, etc. As with the introductory class, this course is taught by faculty from a variety of departments. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.

4. Grades: Students must maintain a minimum grade of 3.0 or equivalent in each course to receive credit toward completion of the certificate.

Graduate Degree Dependent Certificate Summary and Final Application for Certificate

To be eligible for the graduate degree dependent certificate in the Center for the Digital Globe, students are required to take four courses: two courses offered through Center for the Digital Globe and two electives. The required courses are MANGMT 8100 Exploring the Digital Globe and JOURN 8052 Case Studies in the Digital Globe. The two electives should be determined in consultation with the student’s graduate advisor.

SPECIAL NOTE: No more than six of the twelve credits necessary for the CDIG Graduate Degree Dependent Certificate may count toward the graduate degree. To receive the certificate upon completion of their program, students must print and fill out the Application for a Graduate Certificate Form located on the Graduate School web site: http://gradschool.missouri.edu/forms-downloads/repository/cert-plan.pdf. The form asks for a list of courses taken by the student to fulfill the certificate requirements. The form must be signed by the student, the CDIG executive director and graduate dean. A copy of the student’s approved graduate degree program must be attached to the certificate application form when submitting it for the CDIG executive director’s approval. The form then must be submitted to the Graduate School, 210 Jesse Hall.

FOR ADDITIONAL INFORMATION:

See the Center for the Digital Globe web site for further program details, including contact information, courses, affiliated faculty list, etc. http://cdig.missouri.edu/certificatesgrad.html

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/center-for-the-digital-globe-certificate/center-digital-globe-ge/Gedt.html

Graduate Minor in College Teaching

Approximately 75 percent of faculty positions in the United States are at institutions where the importance of teaching and professional service is equal to or greater than the emphasis on research. The Minor in College Teaching, available to all MU graduate degree-seeking students, demonstrates your preparation as an effective teacher to potential employers.

The Minor in College Teaching (MCT) requires 9 credit hours. This includes a 3-hour core course, a teaching practicum, plus 3-6 elective hours. It is highly recommended that students enroll in ED_LPA 9456, but it is not a requirement.

Core Required Courses - students must complete one of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ED_LPA 9448</td>
<td>College Teaching</td>

Graduate Certificate in Community Processes

The Graduate Certificate in Community Processes offers graduate students and professionals a unique opportunity to develop expertise in how spatial and relational communities function in today's society: their processes for forming, for maintaining the community and for achieving community objectives. A vital part of the certificate is acquiring applied skills in community facilitation processes or community analytical processes.

For more information please contact:
Dr. Judith Stallmann
231 Gentry Hall
phone: 573-882-6455
email: stallmannj@missouri.edu

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/community-processes-certificate/community-process-ge/Gedt.html

Graduate Certificate in Conservation Biology

A certificate in Conservation Biology from the University of Missouri shows that you have interdisciplinary coursework and experience not already met by any single degree program at MU. As Conservation Biology is an interdisciplinary science the curriculum for our certificate provides coursework and experience beyond what is offered in a single degree program. The interdisciplinary nature of the curriculum is designed to help you reach a higher level of competence in conservation biology.

To accomplish this goal, the program has 2 required components:

1. Interdisciplinary coursework that includes at least one course each from the categories of Natural Sciences, Techniques and Policy/Social Sciences with at least 3 credits are from outside your degree program. A list of approved courses (http://www.conservbio.missouri.edu/forms&paperson/Courses%20Fall%202009Updated.pdf) is available on the Conservation Biology website.
   - Ph.D. students: 15 credit hours of coursework at the 7000, 8000 or 9000 level, 12 of which may overlap with the degree course of study
   - M.S./M.A. students: 12 credit hours of coursework at the 7000, 8000 or 9000 level, all of which may overlap with the degree course of study
   - Coursework must include one course each from the following areas: Science, Techniques and Policy (See approved course list)

2. Practical experience through an internship that falls outside your discipline
   - 160 hours of an internship exploring an area complementary to the student's conservation career goals
   - Designed and completed under the guidance of a mentor other than your major advisor
   - Results in a tangible product (e.g. paper, publication, presentation)

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/conservation-biology-graduate-certificate/conserv-bio-ge/Gedt.html

Graduate Certificate in European Union Studies - Interdisciplinary

The Graduate Certificate in European Union Studies requires students to take 12 hours of coursework.

Required Courses

Graduate Minor in Gerontology Studies

The graduate minor in gerontology consists of nine to 15 hours of aging-related course work approved as a graduate minor by the student’s department/discipline. The MU Interdisciplinary Center on Aging will collaborate and provide assistance to both the student and his or her adviser. Twenty-three courses in more than 10 disciplines can be supplemented by independent and topics courses. Mentoring from experienced researchers on interdisciplinary research teams contributes to the learning curve of students specializing in aging studies. More than 40 teams are located throughout the university. Students are encouraged to contact the Interdisciplinary Center on Aging for help connecting with these productive groups of scholars.

For additional information, contact:
MU Interdisciplinary Center on Aging
M245A Medical Sciences Building
Columbia, MO 65212
phone: 573-884-3337
email: aging@missouri.edu
website: http://medicine.missouri.edu/aging/home.html

Graduate Certificate in Global Public Health

The Graduate Certificate in Global Public Health includes 15 credit hours of course work and a required international public health experience and may be taken independently or combined with an MPH. Course credits earned for the Graduate Certificate may also be credited toward the MPH degree. It is recommended that Graduate Certificate students start with Interdisciplinary Perspectives in Global Health, which is offered every semester in varying formats.

Required Courses:

- P_HLTH 7150 Principles of Public Health 3
- STAT 7020 Statistical Methods in the Health Sciences 3
- or STAT 7410 Biostatistics
- P_HLTH 8420 Principles of Epidemiology 3
- P_HLTH 8953 Developing and Evaluating Global Public Health Programs 3

Elective 3

For more information:
mumphprogram@missouri.edu
573-884-6844

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/global-public-health-certificate/global-ph-ge/Gedt.html

Graduate Certificate in Health Ethics

The certificate program is ideal for working professionals such as physicians, nurses, healthcare administrators, those serving on hospital ethics committees or considering such health ethics issues in their daily employment, and students in the health professions. The certificate program will help the learner develop an understanding of the ethical issues related to health and healthcare and will foster skill in analyzing and resolving ethical problems and conflicts in the healthcare environment.

Veronica Kramer
Coordinator of Student Recruitment & Admissions
(573) 884-0699
kramerv@missouri.edu

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/health-ethics-graduate-certificate/health-ethics-ge/Gedt.html

Graduate Minor in International Development

The requirements for acceptance and completion of work for the minor are as follows:

1. The student must be enrolled as a master’s or PhD candidate in good standing at MU.
2. A formal request to be included in the minor must be made in advance of taking courses, to the director, Associate Professor Corinne Valdivia, 214D Mumford Hall. This request should be approved by the student’s adviser. A copy will be sent to the Graduate School.
3. Once the student is admitted to the minor, s/he should seek advisement from the director and his/her adviser concerning which courses to take. The plan of study must be submitted to the Graduate School no later than the semester before graduation.
4. The student must satisfactorily complete a total of twelve credit hours in courses dealing with Third World Development. At least six of the twelve hours must be taken in at least two departments outside the student’s home department.
5. Foreign language courses are not required, but students who are not fluent in a second language are strongly encouraged to take intensive language courses to develop competency. Credit for language courses does not count toward the twelve hours of credit required for the minor.
6. When the required twelve hours of credit are completed from approved courses, the student’s adviser should inform the director, who will in turn inform the policy committee which governs the operation of the minor. This should be done in advance of the student’s orals to give members of the policy committee an opportunity to sit in on the examining committee if they so desire.
7. The certificate is only awarded after all departmental and Graduate School requirements for the advanced degree have been satisfied. An overall grade point average of 3.0 is required for the twelve hours within the minor.

Preapproved course options:

- AG_EC 8430 International Agricultural Development Policy 3
- ECONOM 7325 The International Monetary System 3
- ECONOM 7326 Economics of International Trade 3
- ECONOM 7360 Economic Development 3
- ECONOM 9460 Development Economics 3
- ED_LPA 9459 Comparative and International Education 3
- HIST 8445 Studies in World Environmental History 3
Overview

A certificate in Life Science Innovation and Entrepreneurship at the University of Missouri will broaden the training of graduate and professional students from the fields of business, engineering and medicine, among others. A collaborative program among MU’s Trulaske College of Business, College of Engineering and School of Medicine, the program will prepare participants for a wider range of employment opportunities and provide core skills for entrepreneurial endeavors.

Interdisciplinary Curriculum

Through an interdisciplinary approach, the program will allow MU graduate and professional students to receive training to translate life science discoveries into products and services that will improve health. The program will require completion of three three-hour core curriculum courses designed to cover the life cycle of a translational science/business venture, as well as elective courses for a total of 12 hours of course credit. The three-course sequence will be augmented by elective courses that round out the educational needs of particular students.

Program Objectives

- Know and understand the life sciences industry well enough to be familiar with terms, trends, issues, and industry culture in order to be able to recognize needs that may be commercially viable.
- Know and understand the three disciplines represented by the courses such that they are able to assess the commercial viability of a life sciences technological innovation.
- Know how to commercialize new life science discoveries into products and services to improve health in humans and/or animals.

Course Content

School of Medicine
- Nature of discovery
- Protecting intellectual property
- Reimbursement models in health care
- Life science methods and research tools
- Research with industry partners

College of Engineering
- Identification of clinical needs
- Concept screening and selection
- Regulatory pathways and the FDA
- Patents and intellectual property basics
- Design and prototypes

Trulaske College of Business
- Commercialization process
- Market assessment and competitive landscape
- Technology transfer, licensing, and startups
- Sources of capital
- Business plan and market strategy

Admission Requirements

The only prerequisite for the first course in the sequence will be good standing in a graduate/professional program or the consent of the instructor on a case-by-case basis.

Graduate Certificate in Society and Ecosystems - Interdisciplinary

Contact

Sandy Rikoon, Ph.D.
Coordinator Society and Ecosystems Program
200 A Gentry Hall
University of Missouri-Columbia
Columbia, MO 65211
Telephone: 573-882-0861
Email: rikoonj@missouri.edu

Goals

Understanding the complex and dynamic interactions between human activities and natural ecosystems is essential for achieving sustainable...
development. Developing this understanding in the next generation of scientists, educators and resource management professionals is the primary goal of the University of Missouri’s interdisciplinary graduate certificate program in Society and Ecosystems.

The Society and Ecosystems Program (SEP) is a unique interdisciplinary program that prepares students for careers with private and public organizations through advanced graduate level training and research. The certificate program is designed for students with undergraduate-graduate training in agriculture, biology, business administration, economics, engineering, fisheries and wildlife, forestry, geography, geology, rural sociology and related disciplines. Students who are in a graduate or professional program in their area of specialization take two integrated courses and complete a thesis or dissertation that applies more than one discipline. The program is designed to enhance the student’s familiarity with disciplinary and interdisciplinary concepts and principles from the social and natural sciences and humanities.

The goal of the program is to develop critical thinking and analytical skills related to:

• sustainable natural resource and environmental management and planning,
• dynamic interactions between social, economic and ecological systems,
• quantitative-qualitative analysis of individual and social behavior,
• cultural interpretations of natural resource and environmental issues, and
• application of knowledge gained in the above areas to the evaluation of public policy.

Admission

Admission to the SEP is open to students who have been admitted to a graduate or professional program in the University of Missouri-Columbia, have undergraduate-graduate training in natural and social sciences, and have interest in interdisciplinary studies. Persons interested in the SEP should contact the Coordinator.

Curriculum

Students must be enrolled in a regular academic department and working toward completion of a graduate degree in a natural resource-related discipline. All students are required to take the following core courses: a) six credits from a department/unit other than the one in which the student is enrolled, b) a three-credit interdisciplinary course on the human dimensions of ecosystem management, and c) three credits of a research seminar in Society and Ecosystems.

The interdisciplinary course examines the sociocultural, economic, ethical and biophysical aspects of ecosystem management with emphasis on the human dimension. It is normally taken during the student’s first year. The primary objective of this course is to develop a student’s appreciation of a) major issues in the society-ecosystems nexus, b) roles of various disciplines in understanding and resolving socioeconomic-ecological issues, and c) systems analysis. A course requirement is for students to work in multidisciplinary teams to evaluate human effects on and responses to global warming, loss of biodiversity, water pollution, and other contemporary natural-environmental resource issues.

The research seminar exposes students to interdisciplinary research on the interactions between social, economic and ecological systems. Emphasis is placed on the impacts of economic activity, population growth, technology and public policy on the functioning and resilience of ecological systems, and how ecological systems support socioeconomic development at the local, regional and global scales. Speakers for the research seminar include faculty, students, visiting scholars, and private and public officials. Students are expected to present their thesis or dissertation research at the research seminar. Thesis and dissertation research must be conducted on a topic related to the interactions between society and ecosystems. Students completing the SEP receive a certificate in Society and Ecosystems. Recognition of the certificate appears on the student’s transcript.

Advisory Committee

The student’s plan of study and research topic are selected in collaboration with an advisory committee established in accordance with the requirements of the student’s department/unit and the Graduate School. The advisory committee includes at least one faculty member affiliated with the SEP. Graduate school permission is required in cases where it is highly desirable for the three faculty members comprising a masters student’s advisory committee to be from different departments/units.

Honors College

The Honors College is a community of motivated and high-achieving students from all the undergraduate colleges at the University of Missouri. It offers an innovative and dynamic curriculum that encourages in-depth study in traditional fields of learning as well as other kinds of intellectual inquiry, including interdisciplinarity and experiential learning. The College also fosters scholarly engagement through research opportunities, study abroad, service learning, internships, and other experiences that expand learning beyond the classroom, and it provides personalized advising through a team of professionally trained advisors.

The Honors College gives honors students maximum flexibility in order to serve their individual interests. Honors courses, taught by many of the university’s best professors, encourage close interaction between students and faculty and allow students to experience a small-college atmosphere within a large, research university.

Opportunities in the Honors College are described below.

Honors Curriculum

Honors courses fall into 3 categories:

1. Courses offered through individual departments. These include special topics courses (e.g. “Social Neuroscience”) and honors sections of regularly offered courses (e.g. “Introduction to Biology”).
2. Courses offered through the Honors College.
3. Research and other independent-study types of courses, offered both through departments and the Honors College.

Honors courses offered through the Honors College include the following:

• Humanities Series. This series of four, historically-organized courses provides an interdisciplinary approach to art, art history, literature, music, philosophy, and religion.
• Human Sciences Series. This series of four, thematically-based courses provides an interdisciplinary approach to the behavioral and social sciences, including cultural geography, economics, family studies, history, psychology, and sociology.
• Science series. This series of two, thematically-based courses provides an interdisciplinary, hands-on laboratory approach to science for non-science majors. It is designed to introduce students to the methods, range, and big ideas of scientific knowledge.
• Honors Discussion Groups and Seminars. These are small and informal courses typically focused on a special topic (e.g. “Sherlock Holmes” and “Big Ideas in Science”)”
• Career Explorations Courses. These lower-level courses are designed to introduce students to different career choices in fields like Journalism, Medicine and Health, and Law.
• Honors Tutorials. These upper-level courses are informal discussion groups of 2-5 students and a faculty member. Tutorials focus on special topics that change from semester to semester, depending on which faculty members are offering them. Past examples include “The Financial Crisis of 2008” and “The Vikings.” They are based on the Oxford-style of learning, with heavy emphasis on conversation and in-depth investigation.
• Honors Independent Study Courses. These courses provide honors students with an opportunity to study topics (typically of the student’s choosing) with a faculty member.
• Honors Colloquia. These courses focus on interdisciplinary topics and typically adopt a more flexible and experimental approach to teaching (e.g. “Sports Psychology”).
• Honors Preceptorships. These courses provide honors students with an opportunity to conduct specialized research with a faculty member.
• Honors by Contract. This arrangement allows honors students to take a non-honors course for honors credit by completing additional or alternative work. To do an Honors by Contract, students must enter into a contractual agreement with a professor, approved by the director and associate directors of the Honors College. Contractual forms are available online.

More information on honors courses can be found on the website (honors.missouri.edu).

Special Programs and Services

Advising. The Honors College offers one-on-one academic advising for all honors students. Through its MedOpp office, it also offers specialized advising for students planning a career in medicine, dentistry, optometry, or podiatry. MedOpp advising provides students with a comprehensive program that includes a variety of services to guide students through the academic and application process necessary to become a health professional.

Honors Housing. The Honors Learning Community fosters a living and learning space that fosters intellectual and social stimulation and encourages residents to succeed academically and socially during their time at the University of Missouri.

Service Learning. The Honors MU Community Engagement Project is a service-learning outreach program designed to assist members of the community and offer honors students problem-solving and leadership experiences. Service projects include mentoring at-risk adolescents, working with low-income pre-school children, and investigating and providing service for local public health agencies. Students perform community service, participate in a seminar, and complete research projects.

Honors College Admissions

Incoming Freshmen

Incoming freshmen may apply for automatic admission to the Honors College upon submission of an application, if they satisfy any one of the following three criteria:

• An ACT score of 31 (SAT 1360) AND either a top 15% class rank OR a high school Core or Enhanced Core GPA of 3.58
• An ACT score of 30 (SAT 1330) AND either a top 10% class rank OR a high school Core or Enhanced Core GPA of 3.74
• An ACT score of 29 (SAT 1290) AND either a top 5% class rank OR a high school Core or Enhanced Core GPA of 3.91

Incoming freshmen who do not meet both of the admission criteria are required to submit an essay as part of their application.
Essays are evaluated on an individual basis. Specific information on the requirements for the essay can be found on the website (honors.missouri.edu).

Transfer Students
Transfer Students are eligible for admission to the Honors College if they have completed at least 30 credit hours of college credit at an accredited institution and have achieved a GPA of 3.7 or above. If you meet these criteria, please fill out the online application (http://honors.missouri.edu/future_students/application.php). The cumulative GPA, for the purpose of applying to the Honors College, is the calculated average of transfer work from all institutions the student has attended.

Current MU Students
Current students are eligible for admission to the Honors College if they are an MU student who has completed at least 12 credit hours and achieved a cumulative MU GPA of 3.7 or higher. Students who meet these criteria, must fill out the online application (http://honors.missouri.edu/future_students/application.php).

Program Requirements

Maintaining Honors Eligibility

GPA Requirement
To retain membership in the Honors College, students must maintain an MU cumulative GPA of 3.5 or above. Students with an MU cumulative GPA below 3.5 will receive a warning letter the first semester in which this occurs. Students with an MU cumulative GPA below 3.5 for a second consecutive semester will no longer be members of the Honors College. Students wishing to reapply to the Honors College must meet the eligibility requirements for current MU students (see above).

Participation Requirement
Students who join the Honors College as first-year students will be required to complete two honors courses per year for their first two years at MU. All honors courses will count toward this requirement, including honors-designated courses, and Honors Learning-by-Contract. MU students who join the Honors College in their sophomore year and transfer students who are admitted with sophomore standing will be required to complete two courses in their first year of Honors College membership. MU students who join the Honors College after their second year and transfer students who are admitted with junior or senior standing will be exempted from the participation requirement.

Honors Certificate Requirements
Students who complete 20 or more hours of courses for honors credit and maintain a 3.5 cumulative GPA (as calculated after final grades are posted at the end of the semester in which the student is graduating) are eligible to graduate with an Honors Certificate. In addition to General Honors and Departmental Honors course credits, the 20 hours may include up to 6 hours of honors transfer credit, 8 hours of Learning-by-Contract credit, and 8 hours of approved graduate credit (form required) (http://honors.missouri.edu/students/graduate_credit_form.pdf). Students must achieve a minimum letter grade for each course: a C or better for regular honors classes or a B or better for Learning-by-Contract courses. Students must apply for the Honors Certificate by completing the application (http://honors.missouri.edu/students/certificate_application.php). In order to participate in the Honors Convocation, students must apply no later than the end of the third week of classes in their final semester. For more information, see the Application for Graduation with the Honors Certificate (http://honors.missouri.edu/students/certificate_application.php).

University Honors Designation
Students who complete the Honors Certificate and a qualified departmental honors program will be eligible for this designation, which will be noted on their permanent transcript. See your department or the Honors College for information about departmental honor programs.

Faculty
There are faculty from all disciplines who teach Honors College courses.
School of Law

203 Hulston Hall
Columbia, MO 65211-4190
phone: 573-882-6042
fax: 573-882-4984
web: http://law.missouri.edu

Welcome to the University of Missouri School of Law’s online catalog for the 2014-2015 academic year.

Information in this searchable, interactive catalog is current as of May 2014. The next catalog will be made available in May 2015. In the interim, changes to the law school curriculum will be made on our website (http://law.missouri.edu).

Use the search box above or click on the left hand menus to navigate through the catalog. There is also a PDF version available through the “Print Options” link above.

Broken links inside the law school’s online catalog may be reported by contacting umclawweb@missouri.edu. (umclawweb@missouri.edu)

The University of Missouri School of Law offers a collegial environment, reinforced by a small student body and a low faculty-student ratio. The intimacy of this setting, coupled with reasonable cost, consistently high bar passage rates, a network of alumni around the globe and access to top scholars in the legal world, make the School of Law one of the best values in the nation.

Administration

• Gary Myers, Dean and Earl F. Nelson Professor of Law
• Christina Wells, Associate Dean for Academic Affairs
• Rigel C. Oliveri, Associate Dean for Faculty Research and Development
• Elisabeth E. Key, Assistant Dean for Career Development and Student Services
• Robert G. Bailey, Assistant Dean
• Randy J. Diamond, Director of Library and Technology Resources and Professor of Legal Research
• Rafael Gely, Director of the Center for the Study of Dispute Resolution and James E. Campbell Missouri Endowed Professor of Law
• Alisha L. Rychnovsky, Manager of Business and Fiscal Operations
• Mark Langworthy, Senior Director of Development
• Casey Baker, Director of External Relations
• Michelle L. Heck, Director of Admissions and Financial Aid

Mission Statement

The MU School of Law aspires to be the school of choice for outstanding students, both from Missouri and other states. As a national leader in the field of dispute resolution, we seek to complement a strong traditional curriculum with an orientation toward lawyering as a problem-solving endeavor. We strive to foster a diverse faculty of nationally recognized scholars who are committed to effective teaching, and to attract a student body with diverse experiences and views. We also strive to offer an intellectually rigorous and collegial environment for the study of law. Furthermore, we seek to graduate well-rounded lawyers who are sensitive to ethical issues, prepared to serve clients, and ready to be leaders in promoting justice.

Academics

Known worldwide for its Center for the Study of Dispute Resolution, the School of Law’s curriculum combines both traditional law school classes with an appreciation of the many dispute resolution techniques in which lawyers engage and includes a certificate program in the rapidly developing area of dispute resolution.

Mizzou Law students are required to complete 89 hours of law school classes in order to graduate. Following the prescribed first year, students are required to take Constitutional Law, Evidence, Criminal Procedure and Professional Responsibility. Several clinical and externship programs are available to upper level students, along with skills training in trial practice, negotiation, interviewing and counseling. The curriculum couples courses traditionally tested on the bar examination so that the law school can continue its long tradition of success on bar examinations nationwide, with cross disciplinary dual degree and certificate programs in several other areas. As a result, the law school’s curriculum is appealing not only to those who want to engage in the traditional practice of law, but also to those who want to use their law degree as a stepping stone into other disciplines.

Faculty

Professor Emeritus P. N. Davis, W. B. Fisch, D. A. Fischer, E. H. Hunvald Jr., D. A. Whitman

The catalog also has a cumulative listing of all faculty at the University of Missouri (p. 1420) that includes information on the faculty member’s highest degree attained.

Detailed faculty profiles for the School of Law faculty is also available at http://law.missouri.edu/faculty/directory/.

Academic Policies

Below is a listing of policies that only apply to students in the School of Law. Be sure to also check the listing of the University’s Academic Policies (p. 700) for policies that apply to all students.

The policies and procedures of the MU School of Law are revised on a regular basis. Provisions regarding such policies and procedures contained on our website are subject to change without notice. If you have questions or note errors or omissions, please contact the Associate Dean for Academic Affairs. All statements concerning requirements, prerequisites, conditions or other matters are for informational purposes only, and are subject to change without notice. They are not to be regarded as offers to contract.
Attendance (p. 704)
Course-Load Rules (p. 706)
Credit for Non-Law Courses (p. 706)
Disability Accommodations (p. 707)
Dismissal and Probation (p. 708)
Examinations (p. 712)
Grades & Ranks (p. 716)

Juris Doctor (JD)

The Juris Doctor (J.D.), or “law degree,” is a three year post-baccalaureate program. Students must complete 89 credit hours of law courses roughly one-half of which are required courses.

Upon favorable recommendation of the Faculty of Law, the degree of Juris Doctor will be conferred upon a student who:

1. Has pursued in residence the full-time study of law for at least three academic years (or the equivalent), two of which must have been completed in this School. A full-time student is one who is registered for credit in 12 or more hours in a semester or six or more hours in a summer session. A student registered for less than 12 hours in a semester or less than six in two summer sessions, will receive proportional residence credit. The maximum number of residency credits obtainable in any one summer session shall be seven, provided that for purposes of accelerated graduation (in less than three academic years) no more than twelve residency credits may be obtained in summer sessions.

2. Has received a passing grade in all required courses, except required courses which have been waived.

3. Has received passing grades in law courses aggregating at least 89 credits and has a numerical grade point average of at least 77.5; and

4. Has received an undergraduate degree before or concurrently with his or her graduation from law school.

[Note: The summer school residency provisions allow a student to combine two six-hour summer sessions or a seven-hour summer session with a five-hour summer session and obtain the equivalent of a full semester’s residency credit.]

Completion of a Writing Requirement for students who first matriculated in or after Fall 2006

1. Every J.D. student must complete a rigorous upper-level writing experience in either the second or third year of study.

2. A "rigorous writing experience" means an experience that culminates in an individually authored paper of at least 20 pages (double-spaced), based on independent research, through a process that includes preparation of a substantial draft, review and feedback by a faculty member, and revision of the draft.

3. Any of the following activities may satisfy the upper-level writing requirement, provided that the activity meets the definition of a "rigorous writing experience" in the individual case:
   a. completion of any course designated as a writing course,
   b. completion of a writing section attached to a traditional course,
   c. completion of an independent research project under L5875 Research, or
   d. membership on one of the journals of the University of Missouri School of Law.

4. A "designated writing course" is one in which all students complete a rigorous writing experience as defined in section (2) above and in which, in lieu of a final examination, a substantial portion of the final grade for the course is based on that writing.

5. In every case, the supervising full-time faculty member must certify that the writing requirement has been satisfied before a notation will be made in the student’s record.

6. As stated in the Student Handbook, “[g]rading is done anonymously in all classes where it is possible.” With the exception of Independent Research, if grading is to be done other than anonymously, the syllabus shall so state.

Professional Perspectives Requirement

1. As lawyers, each of you will be required to complete a required number of Continuing Legal Education requirements each year.

2. As law students at MU, you have a similar requirement.

3. You MUST complete a certain number of Professional Perspective hours each year to be eligible to graduate from this law school.

4. Professional Perspective’s hours are designed to further your legal knowledge by presenting you with information about current legal events; from current practitioners, including judges; and about other legal or legally-related matters. These hours are also designed to present you with needed information about career planning, the job market, and placement;

   a. As a result, matters counting for Professional Perspectives credit are broken into two categories:

   b. Professional Perspectives are those programs that give students a new or different prospective on the law or its practice;

   c. Career Component credits are those programs that give students information about career planning and placement;

   d. Any program approved for credit will designate the category applicable to that program;

5. Matters qualifying for Professional Perspectives credit will appear on the School of Law Calendar. It is your responsibility to select the events you wish to attend, within the guidelines set out below;
6. Many programs sponsored by the School of Law automatically qualify for Professional Perspectives credit. When listed on the law school calendar, qualifying programs are so designated.

7. Programs sponsored by student or other groups may qualify for Professional Perspectives credit, but ONLY if an application for credit is filed, in advance, of the event, with the Associate Dean. Application forms are available in the Dean’s Office.

8. In every event for which Professional Perspectives credit is offered MUST be overseen by a responsible person who agrees to maintain an attendance record for that event.

9. Because Professional Perspectives credit is required, it is an event for which attendance counts. As a result, please note that it is an offense under the Honor Code to misrepresent one’s own or another attendance or absence from such an event. This would include signing in for an event and then leaving before the conclusion of that event.

10. The Professional Perspectives requirement for each class of students is as follows:
   a. For First Year Law Students:
      i. 1 Professional Perspectives program in the fall semester;
      ii. 1 Career Component program in the fall semester;
      iii. 1 Professional Perspectives program in the winter semester;
      iv. 1 Career Component program in the winter semester;
   b. For Second and Third Year Law Students:
      i. 2 Programs each semester;
      ii. At least two of the programs during the year MUST be for general Professional Perspectives credit;
      iii. At least one program during the year MUST be for the Career Component credit.

The above checklist (http://catalog.missouri.edu/schooloflaw/jurisdoctor/Degree_Requirements_Checklist.pdf) is also available in PDF.

Certificates & Emphasis

JD Certificates

- Graduate Certificate in Dispute Resolution (p. 684)
- Graduate Certificate in Electronic, Commercial and Intellectual Property Law (p. 685)
- Graduate Certificate in Taxation (p. 685)

JD Emphasis Areas

- Emphasis in Criminal Justice (p. 684)
- Emphasis in Tax Law (p. 684)

Experiential Opportunities

The School of Law recognizes the importance of providing students with opportunities to apply the knowledge they receive in the classroom in “real-life” situations. Over their course of study, students have the opportunity to enroll in clinical programs or practicums in criminal prosecution, family violence, mediation, the state legislature, landlord/tenant law and the wrongly convicted. Additional details are available from the School of Law at http://law.missouri.edu/skills/.

In addition to these clinical opportunities, students can participate in our extensive externship program. In this program, students work under the supervision of a lawyer or judge in a public law office, government agency or not for profit organization or for an attorney in private practice engaged in pro bono work. Additional details are available from the School of Law at http://www.law.missouri.edu/academics/externships.html.

Juris Doctor with Emphasis in Criminal Justice

Criminal Justice Concentration

The Criminal Justice Concentration is designed for two groups of students: those who are considering beginning their legal careers as prosecutors or criminal defense counsel and those who may not have an express interest in criminal practice, but who are nonetheless seeking a course of study structured to provide training in the range of skills necessary to the practice of law in most substantive areas – particularly including legal analysis, factual investigation, counseling, negotiation and the persuasive arts employed in written and oral advocacy.

Additional details and a list of courses satisfying the Criminal Justice Concentration requirements are available from the School of Law here (http://www.law.missouri.edu/academics/certificates/criminal.html).

Juris Doctor with Emphasis in Tax Law

Tax Law Concentration

The Tax Law concentration is designed to provide each student in the concentration basic education in both general skills and subject-matter specific knowledge and provide each student with an opportunity to bring the entire skill set to bear in a capstone experience designed to teach integrated legal problem-solving. Completion of a concentration should improve the overall preparedness of graduates by conferring entry-level competence to begin practicing law with appropriate supervision in the concentration’s subject matter area or practice setting.

Additional details and a list of courses satisfying the Tax Law Concentration requirements are available from the School of Law here (http://www.law.missouri.edu/academics/certificates/tax.html).

Graduate Certificate in Dispute Resolution

MU Certificate in Dispute Resolution

Clients and society today need and expect much more than traditional advocacy from their lawyers. Modern lawyers need to be able to address legal problems in ways that accommodate a variety of needs, goals and values, in addition to vindicating legal rights. As a result, today’s lawyer must have the knowledge, skills and perspectives not only to advocate in the courtroom, but to participate in such processes as client counseling, negotiation, mediation, arbitration and creative problem-solving.

The MU Certificate in Dispute Resolution is designed to foster such learning in students by providing the opportunity to work with some of the nation’s leading dispute resolution scholars and practitioners. The MU School of Law has been ranked No. 1 in dispute resolution by U.S. News
and World Report since 1999, and has more full-time faculty specializing in dispute resolution than any other law school.

This certificate program will give students an advantage in addressing the complex challenges of today’s legal environment.

**Requirements**

To receive a Certificate in Dispute Resolution from the MU School of Law, a J.D. student must take at least 10-11 credit hours of dispute resolution courses approved by the Law School. Eight of those credit hours are required core program courses and provide students with a basic understanding of the theory, skills and practice of dispute resolution. Students must take at least 2-3 additional elective hours from among the courses approved for the Certificate program.

Additional details and a list of courses satisfying the certificate requirements are available from the School of Law at [http://www.law.missouri.edu/academics/certificates/resolution.html](http://www.law.missouri.edu/academics/certificates/resolution.html).

Federal Gainful Employment disclosure information for this Graduate Certificate is available at [http://gradschool.missouri.edu/academics/programs/dispute-resolution-graduate-certificate/dispute-resolution-ge/Gedt.html](http://gradschool.missouri.edu/academics/programs/dispute-resolution-graduate-certificate/dispute-resolution-ge/Gedt.html).

**Graduate Certificate in Electronic, Commercial and Intellectual Property Law**

This certificate program is not currently offered. A variety of other certificates, concentrations and dual-degree programs are offered at the Law School. Information available at [https://nextcatalog.missouri.edu/schooloflaw/additionalacademicprograms/](https://nextcatalog.missouri.edu/schooloflaw/additionalacademicprograms/).

**Graduate Certificate in Taxation**

This certificate program is not currently offered. A variety of other certificates, concentrations and dual-degree programs are offered at the Law School. Information available at [https://nextcatalog.missouri.edu/schooloflaw/additionalacademicprograms/](https://nextcatalog.missouri.edu/schooloflaw/additionalacademicprograms/).
Master of Laws (LLM)

The Master of Laws degree is offered through a joint effort of the Graduate School and the School of Law. For detailed information on this program, consult the Dispute Resolution (p. 634) page.
Additional Academic Programs - Law

Students in the School of Law have a wide variety of additional academic options before them, including a number of other degree and certificate programs available at the University of Missouri that can make a good accompaniment to the J.D. Below is a description of some of those options.

Certificates:
- Center for the Digital Globe (Certificate) (p. 687)
- European Union (Certificate) (p. 687)

Dual/Concurrent Degrees:
- Business Administration (Masters) (p. 687)
- Economics (Masters) (p. 687)
- Educational Leadership & Policy Analysis (Masters) (p. 687)
- Health Administration (Masters) (p. 687)
- Human Development & Family Studies (Masters) (p. 687)
- Journalism (Masters) (p. 687)
- Journalism (Doctorate) (p. 688)
- Library & Information Science (Masters) (p. 688)
- Public Affairs (Masters) (p. 688)

Certificates:
- Center for the Digital Globe (Certificate) (p. 687)
- European Union (Certificate) (p. 687)

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mba-business.shtml.

Economics (Masters)

The Department of Economics and the School of Law offer an integrated program in which students may obtain both an MA degree in economics and a JD degree from the School of Law. Although an MA degree in economics normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-economics.shtml.

Educational Leadership & Policy Analysis (Masters)

With and Emphasis in Higher Education

The College of Education’s Department of Educational Leadership & Policy Analysis and the School of Law offer an integrated program in which students may obtain both an MA degree in higher education with a concentration in general higher education administration and a JD degree from the School of Law. Although an MA degree in higher and continuing education normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-educational.shtml.

Health Administration (Masters)

Students completing this course of study will be eligible to receive the JD degree from the School of Law and the MHA degree from the Health Management and Informatics graduate program. This course of study may be completed in four years and an additional summer session. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MHA degree.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-health-admin.shtml.

Human Development & Family Studies (Masters)

The Department of Human Development and Family Studies and the School of Law offer an integrated program in which students may obtain both a JD degree from the School of Law and an MS or MA degree in Human Development and Family Studies. Although a Master’s degree normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mams-human-dev.shtml.

Journalism (Masters)

The School of Journalism and the School of Law offer an integrated program in which students may obtain both an MA degree in journalism and a J.D. degree in law. This program is especially suitable for students interested in enhancing their competencies, qualifications, and career options through the successful completion of two complementary
professional programs. Although an MA degree in journalism normally requires two years of study, and a J.D. requires three, many students will be able to complete the full program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-journalism.shtml.

**Journalism (Doctorate)**

The University of Missouri-Columbia School of Journalism and School of Law offer an integrated program for students seeking both a Ph.D. degree in journalism and a J.D. degree in law. Students should consider this program if they are interested in teaching or in senior-level practice or policy work in either of these fields, nationally or internationally. Although a Ph.D. degree in journalism normally requires three years of study, and a J.D. requires three, students may be able to complete the full program in as few as five years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/phd-journalism.shtml.

**Library & Information Science (Masters)**

The School of Information Science and Learning Technologies (SISLT) and the School of Law offer an integrated program in which students may obtain both an MA degree in library and information science from SISLT and a JD degree from the School of Law. Although an MA degree in Information Science and Learning Technology with an emphasis in Library and Science normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/MLS-library.shtml.

**Public Affairs (Masters)**

Students completing the required course of study will be eligible to receive the JD degree from the School of Law and the MPA degree from the Harry S Truman School of Public Affairs. The course of study may be completed in four years. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MPA degree. Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mpa-public-admin.shtml.
School of Medicine

Established in 1841, the school offers an innovative problem-based curriculum that provides medical students with early exposure to clinical training. In addition to undergraduate medical education, the school offers a master’s degree in health administration and boasts well-established, residency and continuing education programs. It is recognized nationally for its primary care and rural training programs. The Health Sciences Center provides health care for patients from every Missouri county.

For more information about the School of Medicine, call (573) 882-9219. http://medicine.missouri.edu
College of Veterinary Medicine

The college was established in 1946. It offers a four-year professional program leading to the Doctor of Veterinary Medicine (DVM) degree. Applicants generally have a B.S. or B.A. degree but can be admitted with 2-3 years of undergraduate experience.

The Pre-Veterinary Medical Scholars and AgScholars programs (http://cvm.missouri.edu/pre-vet-scholars.htm) provide early assurance of admission to the MU College of Veterinary Medicine upon satisfactory completion of undergraduate and program requirements. Students work with advisers in the college, and they observe veterinarians at work as part of the program. Students with a minimum ACT score of 30 or an equivalent SAT score are eligible to apply for the Pre-Vet Scholars Program. The required minimum ACT score for the AgScholars Program is 27 and applicants must have demonstrated experience in livestock production and health. Once at Mizzou, scholars must meet program minimum standards, including maintaining a 3.3 cumulative GPA. For more information, call the College of Veterinary Medicine at 573-884-6435.

In addition to the professional program, on-line biomedical science courses (http://biomedonline.missouri.edu/online-programs-for-graduate-veterinary-technicians-in-veterinary-biomedical-technology) available to undergraduate and graduate students are listed in this catalog. These can be used to fulfill the requirements of a Certificate in Biomedical Science, for a licensed veterinary technician to complete a baccalaureate degree or to earn a Master's degree in Biomedical Sciences.

The college also provides diagnostic and patient care services for animals. The CVM has a national reputation for excellent student-to-instructor ratio and state-of-the-art facilities. The college also offers post-graduate training to interns, residents in various specialties (http://cvm.missouri.edu/residencies.htm) and graduate students (http://cvm.missouri.edu/research-gradstudies.htm).

For more information about the College of Veterinary Medicine, call (573) 882-9594. http://cvm.missouri.edu

Faculty

Department of Biomedical Sciences: http://biomed.missouri.edu/faculty-and-staff/

Department of Veterinary Medicine and Surgery: http://www.vms.missouri.edu/faculty.html

Department of Veterinary Pathobiology: http://vpbio.missouri.edu/faculty.html

Academic Policies

Below is a listing of policies that apply only to students admitted to the College of Veterinary Medicine. The full CVM student handbook can be found at: http://www.cvm.missouri.edu/stuhandbook.htm

CVM students must also abide by the University’s Academic Policies that apply to all students.

The policies and procedures of the MU College of Veterinary Medicine are revised on a regular basis. Provisions regarding such policies and procedures contained on our website are subject to change without notice. If you have questions or note errors or omissions, please contact the College. All statements concerning requirements, prerequisites, conditions or other matters are for informational purposes only, and are subject to change without notice. They are not to be regarded as offers to contract.

DVM in Veterinary Medicine

The DVM degree is achieved after a four-year course of study. Applicants generally have a B.S. or B.A. degree but can be admitted with 2-3 years of undergraduate experience. [http://cvm.missouri.edu/prospective.htm](http://cvm.missouri.edu/prospective.htm)

At the University of Missouri, the first two years are largely spent in classrooms and laboratories with the second two years devoted primarily to clinical study in the MU Veterinary Medical Teaching Hospital.

The curriculum at the MU College of Veterinary Medicine is designed to provide students with the knowledge and technical skills necessary to be competent entry-level veterinarians. We prepare our students for general veterinary practice, for entry into graduate or specialty training programs and with the background necessary for careers in regulatory medicine.

In the first two years, all students follow the same schedule, and courses must be successfully completed in sequence. In the final two years of the professional program, the student must successfully complete the required and elective clinical rotations to fulfill graduation requirements.

To receive the DVM degree, students must pass all courses. In addition to passing examinations, attendance and participation in all lectures, laboratories and clinical exercises is required. The doctor of veterinary medicine degree is awarded after successful completion of the professional program.

Curriculum

Objectives and Summary of the Professional Curriculum

The primary objective of the CVM curriculum is to provide students with the knowledge and technical skills necessary to be competent entry level veterinarians. We prepare our students for general veterinary practice, for entry into graduate or specialty training programs, or for careers in regulatory medicine. The overall objective of the first two years of the curriculum is to provide students with a solid foundation in basic biomedical sciences. The courses in the preclinical professional curriculum include anatomy, physiology, cell and molecular biology, pathology, pharmacology, microbiology, virology, and toxicology. The fundamentals of the clinical disciplines are also taught during this time and include anesthesiology, clinical pathology, radiology, public health, medicine and surgery.

The organizational scheme of the professional curriculum differs from that of other schools in that the first two academic years are divided into eight-week instructional periods and our academic year runs from August through June. The students have a summer break between the first and second years and second and third years of instruction that is approximately seven weeks in duration. The overall objective of the clinical curriculum is to solidify basic knowledge and practice clinical skills in the VMTH, VMDL, and external preceptorships. This portion of the curriculum is organized into 12 clinical blocks that begin in October of the third year of professional instruction. These clinical blocks are six to eight weeks in duration and may be divided into 1, 2, or 3 clinical courses. The required clinical rotations are listed below and organized by duration:

Required Clinical Rotations

**Full Block Rotations**: Food Animal Medicine and Surgery; Equine Medicine and Surgery; Small Animal Community Practice and Shelter Medicine; Diagnostic Pathology and Special Species Medicine.

**Half Block Rotations**: Theriogenology; Ophthalmology; Small Animal Internal Medicine; Small Animal Emergency and Critical Care; Oncology; Soft Tissue Surgery; Orthopedic Surgery; Neurology and Neurosurgery

**Hall Block Rotations**: Clinical Radiology; Clinical Anesthesia

Note that students are required to complete four credit hours (four weeks) of external evaluated preceptorships as part of the required curriculum. Students also select 10 credit hours of elective rotations (cardiology, nutrition, production medicine, special imaging, etc.). In addition to required and elective blocks, students are allotted two blocks as "free time." Most students utilize their free time to study for licensing examinations, complete preceptorships at practices, or interview with prospective employers. A total of 166 semester credit hours are required for graduation. Most students accumulate a higher number of credit hours as a result of enrollments in extra didactic or clinical elective courses.

Preceptorships

Missouri students are encouraged to use free blocks as preceptorships to increase exposure to veterinary practice and to meet the requirements of the Missouri Veterinary Medical Practice Act. The University of Missouri College of Veterinary Medicine does not have the authority to approve the use of student free block time or the veterinarians with whom they gain experience.

Available Preceptorships may be found at: https://cvmsecure.missouri.edu/vdb/preceptorships.php

Preceptorship requirements and forms required by the Missouri State Veterinary Medical Board can be found at their website: http://pr.mo.gov/veterinarian.asp

The level of supervision required by preceptors is detailed at: http://pr.mo.gov/boards/veterinary/VetSupervisionChart.pdf
The Missouri State Veterinary Medical Board preceptorship form may be found at: http://pr.mo.gov/veterinarian-application-forms.asp

Licensing Examination

Professional Licensing Information

In addition successfully completing a professional veterinary education, most states require state and national licensing examinations to meet requirements to practice. Please visit the National Board of Veterinary Medical Examiners (NBVME (http://www.nbvme.org)) and the American Association of Veterinary State Boards (AAVSB (http://catalog.missouri.edu/collegeofveterinarnmedicine/dvm/www.aavsb.org)) websites for further information.
About MU

Our mission

Our distinct mission, as Missouri’s only state-supported member of the Association of American Universities, is to provide all Missourians the benefits of a world-class education enriched by service and global interaction. We are stewards and builders of a priceless state resource, a unique physical infrastructure and scholarly environment in which our tightly interlocked missions of teaching, research, service and economic development work together on behalf of all citizens. Students work side by side with some of the world’s best faculty to advance the arts and humanities, the sciences and the professions. Scholarship and teaching are driven by a sense of public service — the obligation to produce and disseminate knowledge that will improve the quality of life in the state, the nation and the world.

We are MU — Missouri’s Flagship University

We are a diverse group of students, faculty and staff who value the excitement and learning that come from interaction among people with richly different backgrounds and ideas.

We challenge talented undergraduates to stretch their minds and imaginations with the unique strengths of a major research university. Our students experience an interwoven web of learning experiences — in classrooms, in residence hall learning communities, and in collaborative research and creative, artistic and service projects with faculty.

We develop the world leaders of tomorrow through rigorous graduate and professional programs across the broadest range of disciplines offered on a Missouri campus.

We ensure improving the quality of MU through a financial model that supplements taxpayer support with rational tuition and student aid, public-private partnerships and aggressive fundraising. Our responsible fiscal planning assures both excellence and access for all well-prepared students, regardless of socioeconomic status.

We live and work in a community of scholars. We treasure our core values of respect, responsibility, discovery and excellence.

As a 21st century land-grant university, we are an economic engine for Missouri. We generate businesses and jobs by creating and disseminating the knowledge that fuels the new economy.

We use our unique intellectual resources to improve the civic, economic, health and educational well-being of Missourians from all walks of life and all corners of the state. We are committed to improving the quality of life of students and their families and communities through the creative and performing arts and the application of new knowledge.

Important Facts

History

The University of Missouri was established in Columbia in 1839 as the first public university west of the Mississippi River, and the first public university in Thomas Jefferson's Louisiana Purchase territory. In 1870 the University of Missouri was approved as a land-grant university under the Morrill Act of 1862. The original mission of land-grant institutions was to make higher education accessible to more people. Gradually that mission has expanded to include research, service and outreach; enabling the state’s citizens to benefit directly from the knowledge gained through university research. As Missouri’s flagship university, MU continues its historic mission through its emphasis on excellence in teaching, research, service and economic development.

Students

- Students come from all 50 states and more than 100 countries. The diversity of backgrounds, opinions and lifestyles improves the overall quality of the student experience.
- The university has more than 27,000 undergraduate students who choose courses from a broad range of academic disciplines.
- The university also has more than 7,000 graduate and professional students enrolled in more than 90 different degree programs. The professional schools include more than 1,200 students in law, medicine and veterinary medicine.
- MU is nationally recognized for its Freshman Interest Groups, where students with shared academic interests live in the same residence hall and often attend classes together. These communities provide a strong academic and social foundation for freshmen, as well as increased faculty involvement with students.

The Campus

- The University of Missouri prides itself on respecting the past while embracing the future. The 1,262-acre Mizzou campus is a testament to that belief. From the six Ionic Columns that adorn Francis Quadrangle to the Memorial Union Tower that honors fallen soldiers to the MU Student Center completed in 2010, every piece of campus represents equally the heart and soul of what it means to be a Tiger.
- The campus is also a living museum with hundreds of plant species from all over the world that make up the Mizzou Botanic Garden. The garden features over 42,000 plants and invites a stroll through more than 170 years of history as MU was transformed into the global university it is today. National magazines and newspapers consistently rank Columbia, among the top cities in the nation for its excellent quality of life.

Alumni

There are more than 260,000 living alumni worldwide. Many continue to support the University through membership in the Mizzou Alumni Association.

University of Missouri Board of Curators

Ann K. Covington, Columbia

Mason Schara, President, Missouri Students Association
Hallie Thompson, President, Graduate Professional Council
Dudley McCarter, President, Mizzou Alumni Association

Accommodations for Students with Disabilities

The University of Missouri complies with the American with Disabilities Act and other applicable laws and regulations. If you have a disability and need accommodations, please contact Disability Services, S5 Memorial Union, Voice (573) 882-4696, TTY (573) 882-8054, or e-mail disabilityservices@missouri.edu as soon as possible so that appropriate arrangements can be made. For more information please visit the website at http://disabilityservices.missouri.edu. If you need this information in an alternative format (Braille, large print, or digital format), Disability Services can provide assistance.

Equity in Athletics Disclosure Act

The University of Missouri complies with the Equity in Athletics Disclosure Act of 1994, Section 360B of Pub. L. 103-382. This act and accompanying federal regulations require that certain information with regard to intercollegiate athletics, including operation expenses, revenue, salaries and participation rates, be made available to current and prospective students and the public. This report is available from the Department of Intercollegiate Athletics at (573) 882-6501.

Family Education Rights and Privacy Act (FERPA)

The University of Missouri policies and procedures adhere to this federal law. Students have the right to restrict the release of directory information. Directory information for MU is defined as: a student’s name, address, telephone listing, e-mail address, major field of study, student level, dates of attendance, degrees and awards received, enrollment status in any past and present semester (i.e. full/part-time), and the most recent previous educational agency or institution attended by the student.

To restrict this information, students should change their privacy settings in myZou or contact the Office of the University Registrar-Registration, 125 Jesse Hall. For the full policy, go to http://registrar.missouri.edu/policies/ferpa.php.

Note: University of Missouri students can grant other users direct authorized online access to their student information in myZou, which may include academic information (including, but not limited to grades), account information, directory information and financial aid. See http://registrar.missouri.edu/register-adddrop/additional-authorized-access.php for more information. The University does not release grades to parents unless the student specifically authorizes it in writing in the...
Office of the University Registrar or a parent shows proof that the student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954. “Parent” means a parent of a student and includes a natural parent, a guardian, or an individual acting as a parent in the absence of a parent or guardian.

**Nondiscrimination**

The University of Missouri does not discriminate on the basis of race, color, religion, sex, sexual orientation, national origin, age, disability, protected veterans. Any person having inquiries concerning the University of Missouri compliance with implementing Title VI of the Civil Rights Act of 1964, Title IV of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, or other civil rights laws should contact the Assistant Vice Chancellor, Human Resources Services, University of Missouri, 130 Heinkel Building, Columbia, MO 65211, (573) 882-4256, or the Assistant Secretary for Civil Rights, US Department of Education.

**Oak Ridge Associated Universities (ORAU) Consortium**

Since 1981, students and faculty of the University of Missouri have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 96 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at http://www.orau.gov/orise/educ.htm, or by calling either of the contacts below.

ORAU’s Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU’s members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact:

Robert V. Duncan  
Vice Chancellor for Research  
ORAU Councilor for University of Missouri  
Monnie E. Champion

ORAU Corporate Secretary (865-576-3306); or  
Visit the ORAU Home Page (http://www.orau.org)

**State of Missouri Registration for Professional Engineers**

The Revised Statutes of Missouri (Section 327.221) require that “all applicants for registration as a professional engineer in the State of Missouri after Jan. 1, 1977, be a graduate of and hold a degree in engineering in a curriculum accredited by the Accreditation Board for Engineering and Technology (ABET).” All MU undergraduate engineering bachelor’s-level programs are so accredited. Applicants who receive advanced degrees in MU’s engineering programs but who do not have a bachelor’s degree in an accredited engineering program are not eligible for registration in Missouri. Candidates for a graduate degree (MS or PhD) in engineering who want to establish eligibility for registration should consult with their academic program chair about a plan of study that also will lead to a bachelor’s degree in an ABET-accredited program. Further information about professional engineering registration may also be obtained from the Missouri Board for Architects, Professional Engineers and Land Surveyors, P.O. Box 184, Jefferson City, MO 65102.

**A Statement of Values**

The University of Missouri, as the state’s major land-grant university, honors the public trust placed in it and accepts the associated accountability to the people of Missouri for its stewardship of that trust. Our duty is to acquire, create, transmit, and preserve knowledge, and to promote understanding.

We the students, faculty, and staff of MU hold the following values to be the foundation of our identity as a community. We pledge ourselves to act, in the totality of our life together, in accord with these values.

**Respect**

Respect for one’s self and for others is the foundation of honor and the basis of integrity. A hallmark of our community is respect — for the process by which we seek truths and for those who engage in that process. Such respect is essential for nurturing the free and open discourse, exploration, and creative expression that characterize a university. Respect results in dedication to individual as well as collective expressions of truth and honesty. Respect is demonstrated by a commitment to act ethically, to welcome difference, and to engage in open exchange about both ideas and decisions.

**Responsibility**

A sense of responsibility requires careful reflection on one’s moral obligations. Being responsible imposes the duty on us and our university to make decisions by acknowledging the context and considering consequences, both intended and unintended, of any course of action. Being responsible requires us to be thoughtful stewards of resources — accountable to ourselves, each other, and the public we serve.

**Discovery**

Learning requires trust in the process of discovery. Discovery often fractures existing world views and requires acceptance of uncertainty and ambiguity. Therefore, the university must support all its members in this lifelong process that is both challenging and rewarding. As we seek greater understanding and wisdom, we also recognize that knowledge itself has boundaries — what we know is not all that is.
Excellence

We aspire to an excellence that is approached through diligent effort, both individual and collective. Pursuing excellence means being satisfied with no less than the highest goals we can envision. Pursuing excellence involves being informed by regional, national, and global standards, as well as our personal expectations. We recognize and accept the sacrifices, risks, and responsibilities involved in pursuing excellence, and so we celebrate each other’s successes. We commit ourselves to this process in an ethical and moral manner.

These statements are mere words until we integrate them as values in our individual lives and reflect them in our institutional policies and practices. We pledge ourselves to make them effective in the very fabric of our lives, our community, and all our relationships with others, thereby enhancing the development of individuals and the well-being of society.

Undergraduate Academic Assessment Goals
All undergraduate students are required to participate in the University’s processes/program for assessing student learning in general education and in the major fields. The purpose of assessment at MU is to provide faculty and administrators with the information they need to ensure high levels of student learning. The key goal is to improve how and what students learn in their programs and to increase how much they learn. At the same time, the process provides documentation of student learning to
help programs and the University meet external requirements, including those of accreditation organizations.

Faculty members develop assessment strategies specific to each degree program and conduct assessments at appropriate points in their students’ undergraduate careers. Each program at the University has defined learning objectives for their students that form the basis of assessments. Students participate in assessments of discipline-specific learning objectives and of learning objectives aligned with the University’s learning objectives for all students.

In order to meet the needs of the people of the State of Missouri, the nation and the global society, the University of Missouri shall provide its baccalaureate graduates with a sound intellectual foundation in the liberal arts and sciences and in the student’s chosen major fields of study. Toward that end, in addition to having every bachelor’s degree recipient fulfill appropriate course work requirements for general education and for degree programs, MU strives to have all students achieve the following goals:

**Goal 1: Graduates of MU will be able to identify and evaluate new information in light of previous knowledge.**

MU graduates will be able to:
- Identify issues and problems important to society, define their scope, and identify information needed to address them.
- Find existing sources of information on a topic.
- Evaluate the accuracy, validity, and reliability of information presented in a wide variety of media.
- Conduct appropriately focused library, field or laboratory research.
- Analyze and synthesize information gathered, demonstrating strategic and logical reasoning skills.
- Demonstrate understanding of costs, benefits, and/or consequences of proposed resolutions of issues and problems important to society.
- Organize information, data and ideas for further analysis and/or presentation.

**Goal 2: Graduates of MU will possess the knowledge, abilities, and skills necessary to communicate effectively.**

MU graduates will be able to:
- Communicate information to a variety of audiences and purposes.
- Revise and edit their presentations to improve clarity and accuracy.
- Engage in the healthy and positive exchange of ideas.
- Apply communication skills in furthering their post-MU careers.
- Use multiple formats and technologies to communicate ideas effectively.

**Goal 3: Graduates of MU will possess the knowledge, abilities, and skills necessary to serve society responsibly.**

MU graduates will be able to:
- Understand the duties of being a responsible citizen.
- Identify and analyze the requisite behaviors for carrying out their academic and professional lives with integrity.
- Work collaboratively with others where appropriate.

**Goal 4: Graduates of MU will possess knowledge to observe and critically analyze the diverse human experience.**

MU graduates will be able to:
- Engage in life-long learning.
- Appreciate fine art and literature.
- Understand the contributions of diverse groups and experiences to life at the individual, community, national, and the world levels.
- In addition, some students will be required to take standardized tests in their major field and/or for general education.

**University General Education Assessment**

Each year, a sample of seniors will participate in a University general education assessment examination known as the CAAP Exam, which addresses University general education competencies of MU students in the areas of mathematics, science reasoning, reading, writing and critical thinking.

**Major Field Assessment**

Prior to graduation, all seniors will participate in assessment of their mastery of course work in their major field. The assessment program is determined by the faculty of each department to measure the extent to which students are achieving instructional goals and outcomes for graduates in that field. The methods of assessment are appropriate to the educational goals for students in their respective major fields. Information on subject field assessment is included with the college and school sections of this catalog. Methods may include:
- Nationally-normed examinations
- Portfolio review
- Performance review
- Capstone project
- Faculty-developed exit examinations
- Exit interviews University

**University Organization**

The largest academic units at the University of Missouri are its colleges and schools. Each college and school may consist of smaller units called departments. Some colleges have divisions within them as well, which are a collection of departments within a college or school. By long tradition, some of the smaller units are also called schools.

The academic year is divided into two 16 week semesters (fall and spring) and one 8 week summer semester. The January intersession is considered part of the spring semester for registration and financial aid purposes. The May intersession is considered part of the summer session.

**Academic Programs and Degree Structure**

To earn a degree from the University of Missouri, students must complete all University, college and/or school, departmental and major requirements. In some cases, the major requirements may include emphasis areas and/or minors. In other cases, there may be options or tracks, which do not appear on transcripts.
The academic rules and regulations of the University of Missouri are published online in the Collected Rules and Regulations of the University of Missouri and the MU Faculty Council Academic Regulations (http://facultycouncil.missouri.edu/handbook/intro.html). The following are selected policies and procedures. Many are summarized as a guide for students. Students needing additional information on academic regulations in specific colleges and schools may obtain this information from their deans' offices.

If a policy is only applicable to certain students and not all students, this is indicated with one of the following codes. Else the policy is applicable to all University of Missouri students.

(G) policy applicable to Graduate students only
(L) policy applicable to Law students only
(U) policy applicable to Undergraduate students only
(V) policy applicable to Veterinary Medicine students only

Withdraw from a Course (p. 730)
Absences

Students are expected to attend all scheduled class sessions. A student who does not complete assigned academic work because of absence from class is responsible for making up that work in accordance with instructions provided by the faculty member consistent with any policy established by the faculty of the respective department, school or college. A school or college faculty, a department faculty, a course director or an individual instructor may establish attendance standards and will determine whether a student will be permitted to make up work missed as a result of absence(s). There is no dean’s excuse or official absence. (See Satisfactory Academic Progress Policy for Financial Aid Eligibility).

However, a student, who is also a member of a national guard, Federal Emergency Management Agency or military reserve unit and is called to active duty while the University is in session, will be permitted to make up work missed as a result of such absences for up to two weeks of absences, provided that to do so does not require the instructor to engage in individualized tutorial work with the student. Recognizing that some students have contractual obligations to the University, while others are participating in intercollegiate events at the behest of their departments, faculty are encouraged to make accommodations for absences incurred because of these responsibilities. In enforcing their absence policy, it is recommended that faculty give due consideration to the important role that extracurricular activities play in the development of students, as well as to the benefits they provide to both our university and community.

Students must notify instructors of any scheduled absences within the first two weeks of the semester. In the case of later qualifying events, the instructor must be informed two weeks prior to those events. Instructors are encouraged to advise students of their absence policy at the beginning of the semester.

Academic Dishonesty

Academic honesty is essential to the intellectual life of the University. Thus, academic dishonesty, such as cheating and plagiarism, is a basis for disciplinary action. In all cases of academic dishonesty, the faculty member makes an academic judgment about the student’s grade on that work and in that course and reports all incidents to the provost for disciplinary action.

Academic honesty is fundamental to the activities and principles of the University. All members of the academic community must be confident that each person’s work has been responsibly and honorably acquired, developed and presented. Any effort to gain an advantage not given to all students is dishonest whether or not the effort is successful. The academic community regards academic dishonesty as an extremely serious matter, with serious consequences that range from probation to expulsion. When in doubt about plagiarism, paraphrasing, quoting or collaboration, consult the Office of the Vice Provost for investigation.

Academic Progress (G)

Measuring Graduate Student Progress

Annual Requirement: Review of Graduate Student Progress

Since 2006, the Graduate School has required that all graduate students file an annual report on their academic performance, degree program milestones, and related academic/scholarly/creative achievements. Faculty mentors (advisers) are required to review their advisees’ annual reports to assess if their advisees are making satisfactory progress toward degree completion. In some cases, the director of graduate studies and/or department chair also reviews the students’ annual reports and faculty member responses.

Each division/area/department degree program must inform all students of the annual progress reporting requirement. This includes printed, published or electronic materials provided to graduate students (e.g., handbooks, orientation materials, guidelines, web site.)

Graduate Student Progress System (gspss.missouri.edu)

The Graduate Student Progress System (GSPS) is a web-based reporting system where students document their progress toward degree completion. All graduate students (i.e., in all disciplines) are required to submit an annual progress report by starting/updating a GSPS record. Faculty members use the GSPS to review students’ annual reports, assess their progress and provide feedback to the students.

At a minimum, students are required to report on academic progress, completion of required forms, award and honors, conferences, presentations, publications, service activities, creative activities, employment, funding activity, and job placement. Academic program faculty or administrators may require additional indicators of performance or achievement to accommodate the unique needs of their programs. Additional information on measuring graduate student progress is at http://gradschool.missouri.edu/policies/satisfactory-progress.php.

Probation and Termination Dismissal

In addition to dismissal for failure to meet the usual examination and grade requirements, departments and graduate degree-granting area programs have the right to place on probation and, after at least 30 days of probation, to dismiss from their program any graduate student who is deemed to be making insufficient academic progress or whose work is not of the quality required. The faculty adviser or academic program chair must inform the Graduate School as soon as the student is notified and the probationary period begins. The dismissal may occur at any time during a student’s work toward a graduate degree.

For additional information on satisfying progress, probation, termination, extension and appeals go to the Extension and Appeals of Satisfactory Progress Infractions section of this policy manual (click here to go to that section), or go to the web page version of the catalog, found at http://gradschool.missouri.edu/academics/progress/probation-termination.php.
Extension and Appeals of Satisfactory Progress Infractions

The progress of each graduate student is evaluated annually by the student’s adviser and/or director of graduate studies (DGS). The definition of “satisfactory progress” and procedures for its verification may vary among departments/programs. If a department/program has institutionalized timelines that differ from those applying generally to graduate students (see below), these timelines should be made available to students from their entrance into the graduate degree program. If a student is authorized to diverge from progress timelines established by either the department/program or the Graduate School, this fact should be documented in written form and endorsed by the student's adviser and DGS.

Progress Toward Degree

Full-time students (those taking 9 hours or more per semester) should follow the time frames associated with degree programs discussed in the Graduate Policy Manual under Master’s Degrees and Doctoral Degrees. They must submit required forms on time and maintain a grade point average of 3.0 or better. Furthermore, they must successfully undergo their departments’ annual review processes.

Part-time students should file a timeline for successful degree completion with their departments and the Graduate School. This timeline should be endorsed by the director of graduate studies and a prospective adviser by the end of the first calendar year of admission into the department/program. When these timelines conflict with time to degree guidelines laid out in the Graduate Policy Manual’s sections on master’s and doctoral degrees, they must receive the endorsement of the dean of the Graduate School.

Distinction Between Requests for Extension and Appeals

A “Request for an Extension” and an “Appeal” are distinct processes for dealing with problems related to “satisfactory progress.” A “Request for Extension” is the appropriate course of action when a student has failed to meet satisfactory progress provisions of the Graduate School. The “Appeal Process” should be followed when a department/program has dismissed a student after the required probationary period.

Academic Progress (L)

Annual Review of Students’ Progress (Applicable to LLM Students)

The progress of each graduate student will be evaluated annually by the Director of the LL.M. Program.

For students who first enrolled in the LL.M. Program after January 1, 2001, the following are the standards of “satisfactory progress” in the LL.M. Program, subject to individual exceptions for good cause as approved by the Director of the LL.M. Program. Normally, students should complete all degree requirements within three (3) years of enrollment. By the end of the first year of enrollment, students must have completed at least eight (8) credits that satisfy requirements for the LL.M. degree. By the end of the second year of enrollment, students must have completed at least sixteen (16) credits that satisfy requirements for the LL.M. degree. By the end of the third year of enrollment, students must have completed at least twenty-four (24) credits that satisfy requirements for the LL.M. degree. Time spent in the armed services will not count toward the period for completing the degree requirements.

For students who first enrolled in the LL.M. Program before January 1, 2001, to achieve “satisfactory progress,” students must complete an average of at least four (4) credits for every academic year since their initial enrollment in the LL.M. Program.

The Graduate School will be informed of all students who are not making satisfactory progress. When there is a question as to whether satisfactory progress is being made, the Director of the LL.M. Program will write to the student and recommend a face-to-face meeting with the student. If there is disagreement, the Director of the LL.M. Program will ask the student to submit a separate letter to him or her. Copies of both letters will be made available to the student, maintained in a departmental file, and forwarded to the Graduate School.

If difficulties persist and the Director of the LL.M. Program determines that probation is appropriate, the Director will notify the student in writing of the probationary period, which may be from 30 days to a full semester. The probation letter will state explicitly that the student is on departmental probation and state precisely what must be accomplished and by what date in order to enable the student to return to good standing in the Program and be removed from probation. Within ten (10) working days of receipt of the probation letter, the student may submit a written request for a review of this decision by the LL.M. Admissions Committee, which may affirm or revise the probation letter or determine that probation is not appropriate.

If the student does not comply with the conditions of probation, a letter signed by Director of the LL.M. Program will be sent to the student (with a copy to the Graduate School) with notification of dismissal from the LL.M. Program. Within ten (10) working days of receipt of the probation letter, the student may submit a written request for a review of this decision by the LL.M. Admissions Committee, which may affirm or revise the notification of dismissal or determine that dismissal is not appropriate (with a copy to the Graduate School). The Graduate School sends the official notice of dismissal from the Program.

A student may appeal a dismissal decision to the Graduate Faculty Senate only after completing the Program’s appeal process. The full text of the Dismissal Policy and Appeals Process for Graduate Students (http://gradschool.missouri.edu/academics/progress/requests-for-extensions-appeals.php) can be found in the Graduate School Catalog on its web site.

Academic Renewal (U)

Students who are returning to the University of Missouri to pursue an undergraduate degree after an extended absence may request permission to remove one or more complete academic terms from future degree and GPA considerations.

Eligibility

To be eligible for academic renewal consideration, students must meet these requirements:

• Students must not have enrolled as degree-seeking at the University of Missouri for four or more consecutive years.
• Students must not have graduated from the University of Missouri-Columbia.
• Students must either:
Any beginning student admitted to the University of Missouri who does not meet the minimum entrance standards as specified in the Faculty Handbook, Article II, Admissions, Advanced Standing, and Classification will enter on scholastic probation and will have one semester in which to remove probation.

Ineligible to enroll

Students whose term GPA falls below 1.0 are ineligible to re-enroll. Students on probation must establish a 2.0 cumulative GPA within two successive terms of enrollment; otherwise they are ineligible to enroll.

In the application of the foregoing rules, the dean or faculty committee of the division concerned will determine how an incomplete grade in a course will be considered in determining a student's academic standing. Students who have been ineligible to enroll for a period of one year may be readmitted only upon the approval of the dean of the school or college in which the student desires to enroll. If a readmitted student again becomes ineligible to enroll, his or her ineligibility is normally considered permanent. These regulations are the prescribed minimal standards but do not limit the authority of the faculty of any school or college to adopt and enforce additional regulations affecting students enrolled therein.

Advanced Standing - Credit by Exam (U)

MU offers the opportunity for advanced credit by examination to any student with fewer than 90 credits. Credit may be awarded, but no grades or honors points are recorded. General eligibility to receive advanced standing at MU does not guarantee its applicability to a degree program. A student who has received credit for any portion of a lower level course will not receive advanced standing credit for that same course. More information can be found at http://admissions.missouri.edu/apply/ap-ib-and-college-credits/index.php. The programs described below are used to award credit.

Advanced Placement Program

The Advanced Placement Program of the College Board is accepted by MU. The examinations are prepared and graded by national committees, and the results are furnished to MU on request of the student. Students who receive a sufficiently high score are eligible for college credit. Students should contact their academic units if they have questions.

College Level Examination Program

The College Level Examination Program of the College Board provides general examinations and subject examinations. Credit may be awarded for CLEP subject exams only. Credit must be applicable in students' programs of study. (Refer to the appropriate section in this catalog for the school or college, or contact the academic unit to ascertain the specific limitations for CLEP examinations.)

Credit by Examination for Mathematics Courses

It is possible to receive credit in the following math courses by passing the appropriate examination:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1100</td>
<td>College Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1140</td>
<td>Trigonometry</td>
<td>2</td>
</tr>
<tr>
<td>MATH 1160</td>
<td>Precalculus Mathematics</td>
<td>5</td>
</tr>
<tr>
<td>MATH 1360</td>
<td>Geometric Concepts</td>
<td>3</td>
</tr>
</tbody>
</table>
To inquire about these examinations, contact the Group Testing Program, 220 Parker Hall, (573) 882-4801, or the departmental representative on testing for advanced placement. Credit for a course by examination is not available to students who have essentially covered the material of the course in college or university courses.

**Departmental Examinations**

Departmental examinations are limited to students with fewer than 90 credits and with no official record of previous enrollment in the course(s) in which credit is to be received.

Departmental examinations are comparable to final examinations given in the various courses offered on campus. The examinations are objective or essay formats and are prepared and graded by the faculty of the department concerned and MU Testing Services. Arrangements for departmental examinations should be made through Testing Services. (Also see the College of Arts and Science information on departmental exams (p. 120).)

**International Baccalaureate**

MU recognizes the International Baccalaureate Program. Students may receive credit and/or advanced standing for proficiency on the higher-level subject examinations. No credit is granted for subsidiary-level examinations.

**Additional College Course Work**

MU recognizes college course work completed before high school graduation if the college attended provides an official transcript of the course work.

**Freshman Placement Tests**

Placement in English is based on ACT score in English. Math placement is based on ALEKS Exam score or prior course credit. (See mathplacement.missouri.edu for more details)

**Subject Examinations**

Subject examinations are limited to students with fewer than 90 credits. The subject examinations are generally accepted by most schools and colleges but may not be considered for credit in all degree programs.

**Application for Degree**

Students should contact their academic unit at least a full semester before they anticipate graduating to complete the appropriate steps and paperwork to apply for receiving their degree. The University does not automatically anticipate or calculate who will be degree candidates each term.

**Attendance (L)**

**Policies & Rules — Attendance**

Law Schools approved by the American Bar Association must require regular and punctual class attendance. The rules below implement this requirement at MU, and were adopted by the faculty on November 19, 1992:

1. **Class Attendance**
   a. Attendance is expected, in accordance with the ABA policy statement.
   b. Administration of the attendance policy lies with the individual instructor for each course.
   c. The individual instructor determines the number and nature of absences from each course for an excess of which sanctions may be imposed, as well as the sanctions which will be imposed, up to and including dismissal from the course.
   d. If the instructor intends to attach a formal sanction (grade reduction or dismissal from the course) to inadequate attendance, he/she must announce to the class in writing at the beginning of the course what the rules governing attendance in that course will be, with appropriate provision for notice to late enrollers.
   e. A student who is in danger of accumulating excessive absences must be given notice by the instructor in advance of the absence which will give rise to a significant sanction (major grade reduction or dismissal from the class).

2. **Appeals**
   - A student who is dropped from a course for excessive absences may meet with the Dean and request reversal of the decision. Such a student may seek the assistance of the Grievance Committee of the Student Bar Association in support of the request. A final decision on the appeal rests in the discretion of the Dean.

**Auditing a Course (Hearer)**

Students who wish to obtain knowledge from a course, but do not need or want the credit for graduation, may enroll in the course(s) as auditors/hearers.

- Hearers receive no credit toward a degree and an H grade appears on the transcript.
- Students pay standard fees for the course(s).
- Students’ academic advising unit must approve and change their grading option in myZou for the change to become official. Students may not change their registration status (hearer vs. credit) after the expiration of two weeks following the first day of classes in regular session or the equivalent thereof in a shorter session. See the University Registrar’s website at http://registrar.missouri.edu/dates-deadlines.php for deadlines for each semester.
- Students who fail to meet class requirements may be dropped from the course by their academic advising unit upon request of their instructor and with the dean’s stamp.
- Normally, a hearer will attend the course on a regular basis; either the department or an individual instructor will stipulate the requirements for enrollment in a course as a hearer.

**Catalog Editions (Which catalog applies to whom?)**

These policies concern the application of the University of Missouri’s graduation, divisional and departmental degree requirements. MU
students' academic requirements for graduation are typically met as follows:

University general education and other University-wide policies:

• Students must complete the graduation requirements in effect for the term that they first enroll at MU or they may choose those in effect for the term that their degree is awarded with the agreement of their academic unit.
• This policy applies to newly admitted freshmen as well as transfer students.
• Students who have a lapse in enrollment must meet the degree requirements in effect at the time the students are readmitted to MU.

Divisional, departmental and other degree requirements:

• Students must meet the specified divisional, departmental and major requirements for the degree(s) that were in effect when they were admitted as degree seeking to the program or may choose those in effect for the term in which they will graduate, with the agreement of their division or department.
• Students who have a lapse in enrollment must meet the standards of the degree requirements in effect when they return to MU.

After consulting with an advisor, students may appeal. Requests for exceptions to the above policy may be made to the academic dean for the academic unit in which the student is enrolled. Some academic units may have unique “grandfathering” policies that apply to changes in their programs and that supersede this policy. Students should consult with an advisor in all cases.

Class Cancellation Guidelines

Refer to the the MU Faculty Council on University Policy regarding class cancellation guidelines (http://facultycouncil.missouri.edu/handbook/class-cancellation.html).

Completion of a Course

A course is considered complete if the student earns a grade of A, B, C, D, F or U, and the “-“ or “+” sign if appropriate, or S for the course. A course in which the student receives a grade of W, NR, or I is not considered a completed course.

• The faculty of the division concerned will determine how the grade of I in a course and a grade in a repeated course will be considered in determining a student’s academic standing. However, for financial aid purposes the grade of I is not considered a completed course and a repeated course will be counted as additional credits attempted.
• The dean of the relevant division may, after consulting with relevant faculty, waive any of the regulations governing a student’s eligibility to re-enroll. However, the Financial Aid Advisory Committee shall have authority concerning students’ satisfactory progress toward their educational objectives and eligibility to receive federal, state and institutional student financial aid.

Computer Policies (L)

Acceptable Use Policy

• Priority use of lab computing equipment is for academic rather than recreational purposes. If you are asked to relinquish use for this reason, your compliance is expected and appreciated.
• Computing at MU is a community enterprise serving academic, administrative and research needs. Please conserve resources by carefully managing your e-mail, data, web files, and printing.
• Users will respect copyright, slander, libel, anti-discrimination and other appropriate laws as well as the security and proper functioning of the campus network.
• MU is committed to privacy and will not routinely inspect the contents of your computer files.
• MU provides uncensored access to materials on the campus network or the Internet unless those materials violate federal or state laws.

For more detailed information on current acceptable use guidelines, or to report a potential violation, view MU’s Acceptable Use Policy (http://www.umsystem.edu/ums/rules/collected_rules/facilities/ch110/110.005_acceptable_use_policy).

Law School Computer Lab Policies

• Limited Access to the Law School Computer Lab - In order to use the computer lab you must be a current MU law student. Access to the computer lab is a privilege and is not transferable to non-law students. You may not let your family use the lab for any purpose.
• Computer Availability and Priority of Use - Computers in back of the lab are available during regular library service hours on a first-come, first-served basis. Computer training classes held in the front room of the lab take priority over individual use. An ADA workstation is available in Room 119 of the lab. Students who require access to this equipment in order to be able to access library resources have priority. All decisions as to the use of the computers are at the discretion of the Library Director, the Associate Director, or the Automation Librarian.
• Copyright and Licensing Restrictions - The user is responsible for observing all copyright laws. The software and documentation made available in the lab is for use only in the lab and is not to be duplicated for use elsewhere. Duplicating a copyrighted program or documentation is illegal and is an Honor Code violation. Any use of computer-assisted legal research databases (Westlaw and Lexis) is for academic purposes only. Terms of use are governed by individual subscriber agreements for each system.
• Assumption of the Risk - The MU Law Library and MU School of Law make no guarantee with respect to any equipment, programs, or other materials in the computer lab. The entire risk as to the quality and performance of the computer equipment, programs, and documentation is with the user. The lab is not responsible for loss of data due to faulty programs or equipment.
• Data Storage - Users may not store their files on the hard drives of the individual workstations or on the law school’s network. Users may not save their personal settings on individual workstations.
• Reporting Equipment Problems - Report any PC or printer problem, such as paper jams, toner replacement, backed-up print jobs, etc. to the User Support Analyst, student lab assistant, or reference office. Do not attempt to fix any lab equipment on your own. Lab supplies (paper reams, toner etc.) are to be handled by staff only.
• Food, Drink and Tobacco are not allowed in the lab.
• Lab Phones and Help Desk - Lab phones are for staff use only. Public telephones are available in the student area of the subplaza.

Failure to observe lab policies and directions from library staff regarding proper lab use may result in restriction or revocation of computer access, or in termination, academic probation, or prosecution under federal or state law.
Course Changes (V)

Any changes in course enrollments and/or number and dates of course offerings shall be initiated by the course coordinator and the appropriate chairman in consultation with the Associate Dean for Academic Affairs. (CVM Executive Committee, 1986)

Course Repeat Policy

The course repeat policy will not be applied automatically to a student’s GPA. After completing the second attempt of a course, a student must submit a request for GPA adjustment form to the University Registrar’s Office 125 Jesse Hall.

When the grade received in an initial attempt, for an undergraduate course at University of Missouri-Columbia, or any University of Missouri System Campus, is a “C–”, “D+”, “D“, “F” or “WF”, the grade will be replaced in the calculation of the GPA by the grade received in any second attempt of the same course at the University of Missouri-Columbia (unless the repeat grade is an I or W). All grades received in second and subsequent attempts will be included in GPA calculations. No more than 15 semester hours will be dropped from the calculation of the student’s GPA. All attempts of a given course will appear on the official transcript with the grade(s) earned. The transcript will have an explanation that the GPA is calculated using all grades earned in a course except the initial attempt when a course has been repeated. This policy is effective with course work where the initial enrollment and completion of the course was fall semester 2000 and thereafter.

Any course being repeated may not be taken on an S/U basis. This policy does not imply a guarantee that openings will be available in courses if and when students wish to retake them, and instructors will not ordinarily know whether a student is enrolled in a course for the second time. When a course is repeated, all applicable tuition and required fees apply.

Degree credit may be earned only once for a particular course unless a department or division has, in other policies, allowed for multiple credit regardless of the course level. A student may not apply the course repeat policy to a course repeated as an undergraduate student for graduate credit.

If the department or course number has changed since the student completed the first attempt of a course, the department offering the course will verify that the subsequent course is substantially the same and the course repeat policy may apply. If the initial course is a cross-listed course, a student may apply the course repeat policy if the student subsequently completes the cross-listed course offered by the alternate department.

Courses for which a NR, W or a grade of I are assigned are not considered attempts since no final grade has been recorded. Grades of C or greater may not be repeated under the course repeat policy because these grades are considered acceptable work and would not prevent a student from graduating from MU.

Students should be aware that if the second course does not have the same attribute as the initial course they will no longer be allowed to count the initial attempt toward any graduation requirement.

The policy is applicable to undergraduate students only.

Clarifying comments

Students should not re-enroll in a course for which they have been assigned a grade of “I”.

Students may not apply the course repeat policy to courses once they have graduated. This also applies to students who are seeking a second undergraduate degree.

For the purposes of this policy, an undergraduate course is any course an undergraduate student attempts for undergraduate credit regardless of the course level. A student may not apply the course repeat policy to a course repeated as an undergraduate student for graduate credit.

If the initial attempt of a course contained an attribute such as; honors, writing intensive, math reasoning proficiency, service learning, or computer proficiency, the second attempt is not required to contain the same course attribute for the purpose of the course repeat policy. Students should be aware that if the second course does not have the same attribute as the initial course they will no longer be allowed to count the initial attempt toward any graduation requirement.

Grades of C or greater may not be repeated under the course repeat policy because these grades are considered acceptable work and would not prevent a student from graduating from MU.

Students may replace the grade earned from the course at the University of Missouri-Columbia or any other University of Missouri campus with a grade earned in an equivalent course at University of Missouri-Columbia campus. Courses for which a W or a grade of I are assigned are not considered attempts since no final grade has been recorded.

Course-Load Rules (L)

The maximum number of hours permitted for a semester is seventeen (17), and seven (7) for a summer session, unless the Associate Dean for good cause approves a heavier load. The minimum number of hours permitted for a semester in order to be considered a full-time student is twelve (12). There is no minimum for the summer session.

Credit for Non-Law Courses (L)

Law students are permitted to take up to a total of three (3) hours of courses for Law School credit in other schools of the University during law school. Please note that because you are listed at "primary degree program-Law" with the University, you will be charged the per credit hour rate for ANY non-law courses (NOT the undergraduate or graduate per credit hour rate). This does not apply to students officially enrolled in a dual degree program.

1. These credits are taken on an S/U basis and are subject to the following regulations:
   a. The course must be at the graduate level (numbered 7000-9999).
   b. The course must be related to the student’s study and future practice of law.
   c. The semester hours of the non-law course will be counted in the student’s total number for the semester, and the student may not (without permission) take any more than a combined total of 16 hours in a regular semester, or 7 in a Summer Session.
   d. Students wishing to take a non-law course for law credit MUST request approval of the course in writing prior to enrolling in the course. The request should be given to the
Deficient Academic Performance (V)

Mid-course/rotation grade warnings must be issued to students if they are not achieving at least a "C" grade average. The notice should be copied to the Associate Dean for Academic Affairs.

A student who receives a grade of "F" in any required or elective course of the professional curriculum will be dismissed.

No more than 9 total semester credit hours of "D" grades may be accumulated prior to graduation. Greater than 9 semester credit hours of "D" grades will result in dismissal from the CVM. If readmitted, any subsequent "D" grades will again result in dismissal from the CVM.

NOTE: These regulations were adopted by faculty action August 4, 1983. They are subject to change by faculty action. Revised in 1986, 2002, 2009, 2011 and 2012.

Degrees, Diplomas and Certificates

The process for awarding Degrees, Diplomas and Certificates at the University of Missouri is governed by the Faculty Council. For a full listing of this process please see Article IX of the Faculty Handbook (http://faculty.council.missouri.edu/handbook/article-9.html).

Disability Accommodations (L)

It is the policy and practice of the University of Missouri School of Law to comply with the Americans with Disabilities Act, Section 504 of the Rehabilitation Act, and state and local requirements regarding students and applicants with disabilities. No individual shall be discriminated against by the University of Missouri School of Law because of a disability, nor shall any qualified individual with a disability be denied access to or participation in Law School services, programs, or activities because of the disability. The School of Law is committed to providing reasonable accommodations for individuals with disabilities, though the School is not required to make accommodations that are unduly burdensome or that fundamentally alter the nature of the program.

Students who have been accepted for admission are advised in their acceptance letter to contact the Associate Dean as soon as possible regarding disabilities that might require accommodation. Continuing students who believe they have acquired or developed a disability should also contact the Associate Dean as soon as possible. Early identification of disabilities is necessary to allow adequate time to evaluate documentation and to coordinate accommodations required. The accommodation process takes some time, so the Law School may be unable to grant last-minute requests for accommodation.

Academic Dismissal and Readmission

If a student who is academically dismissed raises a previously undisclosed disability as a basis for academic difficulty, the burden will be on the student to explain why the disability was not previously brought to the attention of the administration, to explain why accommodations were not requested or why those provided were not adequate, and to demonstrate that the disability was the cause of the dismissal.

Readmission requests should be directed to the Associate Dean. The Associate Dean will forward the request to the Law School’s Standards & Readmissions Committee which acts on the requests. For further information on the readmission process, please see the Student Handbook.

Bar Examination

Law students with disabilities who believe they will require accommodations in taking the bar examination should inquire early in their legal education as to what will be necessary to obtain accommodations. Information on how to contact bar examiners in all states is available from the Office of Career Services. Many state boards of bar examiners will request that the law school provide information on
accommodations provided during law school upon a written release from the student.

**Career Services**
The Office of Career Services provides assistance to all students and does not discriminate on the basis of disability. Students who believe that an employer working through Career Services has discriminated on the basis of disability should bring their concerns to the attention of the Director of Career Services.

**Grievances**
If a student who requests accommodations from the School of Law believes that he/she has been discriminated against on the basis of his/her disability, the student should bring this matter to the attention of the Associate Dean. The Associate Dean and the Office of Disability Services will attempt to resolve the matter and will communicate their decision to the student. If the student is dissatisfied with the decision, the student may file a grievance with the ADA Coordinator. Grievances filed with the ADA Coordinator must be in writing and must be filed within two weeks of the date the Associate Dean communicated the decision to the student.

**Confidentiality**
Information related to a student’s disability is treated as confidential information under applicable federal, state, and university laws.

**Dismissal**
A dean may at any time, and following such procedures as are reasonable, dismiss a student from a class or from a school or college for failure to perform academic duties.

In addition, the director of the Student Health Center (http://studenthealth.missouri.edu) has the authority to exclude a student from classes and other University exercises and activities because of exposure to a communicable or contagious disease, or to require a student to withdraw from the University at any time if the student has a medical condition constituting a hazard to themselves, other students or the campus community.

Adapted from the Faculty Handbook. (http://faculty.council.missouri.edu/handbook/article-3.html)

**Dismissal and Probation (L)**

**A. Rules for Dismissal and Probation**

1. For purposes of this section (Policies & Rules – Dismissal and Probation)
   a. “First year” consists of that series of semesters or summer sessions, or both, at the end of which a student first receives grades in courses aggregating to not less than 24 hours.
   b. “Semester” means either the fall or spring semester. The summer session is considered to be part of the next succeeding semester for the purpose of computing semester grade point averages.

2. A student is dismissed:
   a. at the end of the student’s
      i. first semester if the student’s cumulative grade point average is equal to or less than 76.399; or
      ii. second semester if the student’s grade point average for that semester is equal to or less than 76.399
      iii. first year if the student’s cumulative grade point average is equal to or less than 76.399; or
   b. at the end of any semester after the student’s first year if the student’s grade point average for that semester is equal to or less than 76.399; or
   c. at the end of any semester during which the student has been on probation if the student’s grade point average for that semester is equal to or less than 77.499; or
   d. at the end of any semester during which the student has been on probation if the student’s grade point average for that semester is
      i. not sufficient to raise his or her cumulative grade point average to an average greater than 77.499 if continued in future semesters until the remaining requirements for graduation have been satisfied; or
      ii. is less than the semester or cumulative grade point average which was imposed upon the student as a condition of probation or readmission;
   e. at the end of any semester prior to the completion of the student’s first year if
      i. the student has received grades in at least two sessions and
      ii. has received grades in at least 12 hours of coursework; and
      iii. has a cumulative grade point average of equal to or less than 76.399;
   f. at the end of that semester where the student has a cumulative grade point average equal to or less than 77.499 after completing 89 or more hours of course work.

1. A student is placed or continued on probation:
   a. at the end of the student’s first year if the student’s cumulative grade point average is greater than 76.399 but equal to or less than 77.399; or
   b. at the end of any semester after the student’s first year, if the student’s grade point average for that semester is greater than 76.399 but equal to or less than 77.399; or
   c. a student who is on probation will be continued on probation if the student’s grade point average is equal to or less than 77.499 if continued in future semesters until the remaining requirements for graduation have been satisfied;
   d. the student has received grades in at least 12 hours of coursework and
   e. has a cumulative grade point average of equal to or less than 76.399;
   f. at the end of that semester where the student has a cumulative grade point average equal to or less than 77.499 after completing 89 or more hours of course work.

2. Any first year student who does not achieve a grade point average greater than 77.499 in the fall semester will be required to take the course in Legal Reasoning during the second semester. Students who are required to take the course in Legal Reasoning under this provision will drop one of their courses. The course to be dropped will be decided in consultation with the Associate Dean for Academic Affairs.

3. A student ceases to be on probation at the end of a semester when the student’s cumulative grade point average and grade point average for that semester are both greater than 77.499.
4. After the first semester of the first year, a student is in "good standing" at the School of Law if the student’s cumulative GPA is greater than 76.399. Thereafter, a student is in good standing when both the student’s current semester and overall GPA are greater than 77.499.

B. Rights of Students Petitioning for Readmission

Students who petition the Law School for readmission following academic dismissal have the following rights:

1. Fair notice of the time and place of the meeting.
2. To submit any supporting written material to the Faculty Readmissions Committee and/or to the Faculty at large in advance of the meeting, or to present such material at the meeting.
3. To appear personally at the meeting and make a presentation of reasonable duration.
4. To be accompanied by a person of their own choosing.
5. To be informed promptly following the meeting of the Committee’s recommendation or decision, or the Faculty’s decision.

C. Readmission Procedures

1. Readmission Procedures for students dismissed at the end of the first semester under Rule 2.a.1

   a. A student dismissed at the end of the student’s first semester whose grade point average for the first semester is equal to or less than 75.299 will not be permitted to attend law school for the succeeding spring semester. Such student will be permitted to enroll for the next fall semester provided the student gives notice of his or her intention to enroll by April 15 of the semester following the student’s dismissal. A student so re-enrolling will retake all the first year courses, and will be required to obtain a grade point average greater than 77.499 for the repeated semester. If the student fails to obtain this grade point average, the student will be dismissed. At its discretion, the Faculty Readmissions Committee may require readmitted students or students on probation to drop one or more of their courses.

   b. A student dismissed at the end of the student’s first semester whose grade point average is greater than 75.299 and equal to or less than 76.399 may apply for readmission for the spring semester. Such student may not attend classes unless he or she has filed a written petition for readmission within the time limits indicated in the letter of dismissal issued by the School of Law. To qualify for readmission, an applicant for readmission must show: (1) that the applicant’s poor academic performance was the result of facts other than intellectual inability to perform satisfactory law school work; (2) that these factors will not continue to impair the applicant’s performance in the future; and (3) that there is reasonable probability that the applicant’s grade point average can be raised to the graduation level by the time 89 credits have been accumulated.

   c. A petition for readmission by a student who has been dismissed shall be heard by the Faculty Readmissions Committee. A quorum of the Faculty Readmissions Committee, for purposes of deciding petitions for readmission, shall consist of one less than all voting members. If the Committee’s decision is favorable for readmission, or is unanimous against readmission, that decision shall be final and the student shall have no right of appeal to the faculty at large. If the Committee’s decision is unfavorable against readmission, but not unanimous, the petition shall be referred to the faculty at large for decision.

   d. A student who petitions for readmission has the right to appear personally before the Faculty Readmissions Committee and, if allowed under these rules, the Faculty at large. The student may be summoned to appear before either group by making a personal appearance or by supplying answers to written questions. (See above for a full statement of rights of petitioners.)

   e. A student who has been dismissed for scholastic reasons and whose readmission is approved will be on probation and subject to such conditions as may be imposed. The conditions below will apply unless varied by the Faculty or Faculty Readmissions Committee.

   f. It is the policy of the Faculty Readmissions Committee to make decisions on readmission prior to the end of the summer term for those students who are dismissed at the end of the spring semester and who may be enrolled in the summer term. Therefore, the readmission decision will not be delayed until summer grades are received.

D. Standard Conditions for Law Students Readmitted after Scholastic Dismissal, and for Law Students on Probation

Students who are readmitted or are on probation are subject to the following conditions as well as any specific conditions stated in the readmission action:

   a. they will continue on academic probation until achieving academic good standing, which requires a cumulative grade point average greater than 77.499.

   b. students placed on probation at the end of the Fall semester of their first year, will be required to take the course in Legal Reasoning (5090) (http://www.law.missouri.edu/academics/curriculum.html#5090) during the second semester. At its discretion, the Faculty Readmissions Committee may require such students to drop one or more of their courses.
University students and their guests and for employees on University-owned or controlled property and at University-sponsored or supervised activities.

University Discipline
Violation of these University regulations can result in disciplinary action up to and including expulsion for students and discharge for employees.

Legal sanctions
Local, state and federal laws also prohibit the unlawful possession, use, distribution, and sale of alcohol and illicit drugs. Criminal penalties for violation of such laws range from fines up to $20,000 to imprisonment for terms up to and including life.

Health risks
Specific serious health risks are associated with the use of alcohol and illicit drugs. Some of the major risks are listed below. For more information contact the Wellness Resource Center in G202 MU student Center or at www.wellness.missouri.edu.

Alcohol and Other Depressants (barbiturates, sedatives, and tranquilizers)
Addiction; accidents as a result of impaired ability and judgment; overdose when used with other depressants; damage to a developing fetus; heart and liver damage.

Marijuana
Impair short-term memory, thinking, and physical coordinations. Can cause panic reaction and increase the risk of lung cancer and emphysema. Can interfere with judgment, attention span concentration, and overall intellectual performance. Impairs driving ability. May cause psychological dependence and compromise the immune system.

Cocaine
Addiction, cardiovascular system damage including heart attack, brain damage, seizures, lung damage, severe depression, paranoia, psychosis. Similar risks are associated with other stimulants, such as speed and uppers.

Nicotine
Tobacco smoke contains thousands of chemical compounds, many of which are known to cause cancer. Nicotine, which is a central nervous system stimulant, produces and increase in heart and respiration rates, blood pressure, adrenaline production and metabolism. People can rapidly become physically and psychologically dependent on tobacco. Compromises the immune system.

Inhalants
Inhalants are a diverse group of chemicals that easily evaporate and can cause intoxication when their vapors are inhaled. Most inhalants are central nervous system depressants. Use of these drugs slows down many body functions. High doses can cause severe breathing failure and sudden death. Chronic abuse of some of these chemicals can lead to irreversible liver damage and other health problems.

Resources
A variety of resources exist for alcohol and other drug prevention education, counseling and referral. For detailed information concerning these resources available from the University and community agencies, students may contact the Wellness resource Center (http://wellness.missouri.edu), G202 MU Student Center, 882-4634 and/
Eligibility Requirement

With the approval of the undergraduate advisor, the undergraduate divisional dean, the Director of Graduate Studies, and the Graduate Dean, eligible seniors may dually enroll as an undergraduate for up to 12 semester hours of graduate credit. To qualify, seniors must:

1. Rank in the upper half of their class.
2. Have a B average in the most recent 45 semester hours of credit.
3. Be within 30 hours of completing graduation requirements for the first bachelor's degree.
Enrollment Requirements for Doctoral Candidates

Candidacy for a doctoral degree is established by passing the comprehensive examination. Status as a continuous enrollment doctoral student begins the term after the term in which the comprehensive exam was successfully completed. The continuous enrollment requirement is met by enrolling in 2 hours each spring and fall semester and 1 hour each summer semester.

Important Note on Graduate Examination Registration and Financial Aid

Students with financial aid should check with the Student Financial Aid office before registering for the Graduate Examination option. Failure to do so could cause serious consequences for the student’s financial aid status.

Important Note for International Students regarding Graduate Examination Registration and Your Visa Status

International students must check with the International Center before registering for the Graduate Examination option. Failure to do so could cause serious consequences for the student’s visa status.

Examinations (U)

Evening examinations

If a conflict arises between a group evening examination and a regularly scheduled class, the regularly scheduled class has priority. The instructor giving the group evening examination is responsible for scheduling a makeup examination at a mutually convenient time for both the student and the instructor.

Classes, Exams and Finals

For the schedule of evening exams and finals week schedule, refer to the Class, Exams and Finals (http://registrar.missouri.edu/classes-exams) on the University Registrar’s website.

Credits by Examination

Examinations (L)

Policies Related to Final Examinations

1. The examination schedule is specified by the Associate Dean of Academic Affairs.
2. All students should arrive and be settled in the examination room 15 minutes prior to the scheduled beginning of the examination.
3. Arrivals after the examination begins should report immediately to Room 203, Hulston Hall.
4. The "Instructions" page of any examination is reserved for all special instructions for the examination. This includes:
   a. the length of the examination
   b. any special instructions for collaboration or material to be used during the examination
   c. any special instructions for turning in the examination or parts thereof
   d. any other general instructions not a substantive part of the exam itself
5. Each student will have a different number on each examination. A three-part, perforated slip printed with a number on each of the three parts will be distributed to each student at the time of the examination. The student will complete each portion of the exam number slip and tear off the bottom part for his/her records. (If more than one bluebook is used for any one examination, the student will carefully number the extra book(s) with the assigned number.) At the end of the examination, students will turn in their bluebooks with the remaining two portions attached. The proctor collecting the examinations will remove the identifying second part to be retained in the office and the professor will receive the bluebook bearing only the examination number.
6. It is important for students to retain their portion of the number slip in order to review an examination or check grades when posted.
7. There must be an accounting for all copies of an examination. As a result, the person administering the exam will:
   a. notify students to complete the exam slip on the front of the bluebook
   b. check the exam slips against the class roster at the conclusion of the exam (any portion of the exam slip that contains the student’s name is removed by the law school staff before the exam is given to a faculty member)
   c. collect all copies of the examination itself - all copies of the exam must be turned in with the exam answer
8. Examinations are scheduled in rooms that accommodate the taking of that examination. A list of the examination rooms is posted in various places in the law school prior to the last day of classes. This list specifies the place at which examinations will be picked up and which examination rooms are typing rooms.
9. Examinations are distributed in the rooms scheduled and in no other rooms.
10. Students may work on their examinations in assigned rooms only and in designated computer rooms. It is the responsibility of the student to return the completed examination to the place where it is to be picked up, at or before the time scheduled for the end of the examination.
11. A student who chooses to leave a designated examination room is responsible for returning their examination to the designated place at or prior to the end of the examination period.
12. Earplugs are permitted in any exam room.
13. The items below are NOT permitted in any examination room, unless SPECIFICALLY authorized by the “Instructions” at the beginning of the written examination, or specifically permitted pursuant to the law school policy relative to exams on computer. These items should not be brought into the exam room. If they are, they MUST be turned into the proctor PRIOR TO THE START OF THE EXAMINATION. The proctor will keep these items until the examination has concluded:

Registration and Your Visa Status

International students must check with the International Center before registering for the Graduate Examination option. Failure to do so could cause serious consequences for the student’s visa status.
a. cellular or other telephones
b. Personal Digital Assistants (PDA) or any device having the characteristics of a PDA
c. laser pointers
d. any device that allows for the recording of data, or the playing of recorded data, including, but not limited to iPods, MP3 players, CD players, DVD players, cassette players or recorders
e. The devices above should not be brought into the examination room. The person administering the exam in each room will, however, have a box to collect any such device while the exam is being taken.

14. Smoking is NEVER permitted in any examination room.
15. Examinations are distributed by the proctor unless the professor elects to do so. Upon receipt of an examination, each student places their initials beside their names on the class roll. The proctor writes the time the examination begins and ends on the blackboard.

16. Students in the authorized examination rooms are given a ten-minute warning prior to the end of the examination period. The warning is given by the proctor unless the instructor elects to do so. Once the ten-minute warning is given, no student may leave the examination room. Students shall remain quietly seated.

17. The examination ends at the earliest of the following:
   a. the time written on the blackboard by the proctor or at the conclusion of the time designated on the examination. In some rooms, a law school staff member may say “Stop,” but the failure to so indicate does not allow a student to continue to write after the time limit has expired. No writing whatsoever is permitted after the exam ends.
   b. the time a student submits a written examination to the proctor collecting exams and leaves the immediate line of sight of that proctor. Whether such a student has left the immediate line of sight of the proctor is a question left to the discretion of the proctor, it being recognized that as more students turn in exams, the sight line of the proctor will be decreased.
   c. The time a student taking an exam on computer submits their exam and exits from the exam writing software.

18. When the examination period ends, students who have not earlier completed the examination go to the place announced for examination pickup and hand to the proctor the examination, bluebooks and/or answer sheet and all scratch paper, used and unused. The material is checked at that time to be sure exam numbers are on each examination, bluebook and/or answer sheet and then placed in receptacles provided for that purpose. Students should not walk away until the proctor has confirmed they have all materials.

19. At the conclusion of each examination, each student again places their initials by their name on the class roll. The proctor checks to be sure all examinations and materials that should be returned are returned.

Externships (V)

Students from other colleges of veterinary medicine desiring an externship or participation in one or more instructional periods of the segmented curriculum must be accepted by the section/department involved. The University of Missouri will not provide insurance coverage for any externship.

Students from colleges with animal health technician training programs desiring an internship in the Veterinary Medical Teaching Hospital will be considered upon proper application through the director of that program. They must be enrolled in and paying fees at their college, be evaluated by their director in consultation with the involved departmental unit during the externship period while allowing full utilization of their expertise in the Teaching Hospital operation. http://www.vms.missouri.edu/vet_tech_int_prog.html (CVM Executive Committee, 1986)

Final Examination Week (V)

The College of Veterinary Medicine, University of Missouri-Columbia, does not schedule “final examination week” for those courses included in the professional veterinary curriculum. Instead, classes will be scheduled through the last day of any regular session (term). Final grades will be submitted to the Dean’s Office so they can be filed with the Office of Academic Affairs as specified in the faculty handbook, i.e., “within 2 days, except Sunday, after the end of the examination period”. The “end of the examination period” will be interpreted as the time and date when the “semester (or session) closes”. (General Faculty meeting minutes, 10-9-73). Changes in examinations can be scheduled as outlined in the Student Handbook.

Full-time/Part-time Status

Undergraduate students who register for fewer than 12 hours and graduate students who register for fewer than nine hours during the fall or spring semesters will be considered as enrolled part time. Undergraduate students may not enroll in a program part time without the express permission of the academic advising unit of the school or college in which the student is, or plans to be, enrolled.

- A full-time undergraduate student is enrolled in at least 12 semester hours during the fall and spring semesters, or an equivalent number of hours during the summer session.
- A three-quarters-time undergraduate student is enrolled in at least nine semester hours during the fall and spring semesters, or an equivalent number of hours during the summer session.
- A half-time undergraduate student is enrolled in at least six semester hours during the fall and spring semesters, or an equivalent number of hours during the summer session.

Full-time enrollment for graduate and professional students:

- Graduate student — nine hours
- Law student — 12 hours
- Medical student — 14 hours
- Veterinary medicine student — 12 hours

Grades

GPA of Record

The grade point average for any period is obtained by dividing the quality points earned by the total number of credits for which the student was enrolled during that period. Grades of S, U, H, W, NR, or I are not included in determining the grade point average.
The undergraduate CUM GPA is the University of Missouri GPA, which will include all grades, credits, and honor points attempted at any University of Missouri campus, including all grades and credits. In computing the undergraduate GPA the grade points assigned to students’ transfer work are the grade points that would have been assigned if the courses had been taken on the University of Missouri System campus, including any adjustments made under policies related to course repeats and/or Academic Renewal/Forgiveness.

GPA Calculator Web Site

To calculate a grade point average, go to the GPA Calculator Web Site at http://registrar.missouri.edu/grades-transcripts-records/gpa-calculator.php

Plus-Minus Grading System

The purpose of the grading system is to provide a framework in which the faculty can report evaluation of student performance and achievement. For undergraduates, all teachers are expected to use the grading scale approved by the faculty. This precludes any department or unit from opting to use a modification of the scale.

The A through F grading system is appropriate for those subjects and situations that allow discrimination in quality of achievement and performance. The S/U grading system is more appropriate for students wishing to take elective courses in a subject matter field in which they will be competing with majors, for mastery learning situations, and for courses graded primarily on the basis of attendance.

Grades carrying credit are: A+/-, B+/-, C+/-, D+/-, and S. Grades calculated in the grade point average are A+ (4.00), A (4.00), А (3.7), B+(3.3), B(3.00), B-(2.7), C+(2.3), C(2.00), C-(1.7), D+(1.3), D (1.00), D-(0.7), and F(0). The grades of S, U, NR, and W are not incorporated in the grade point average.

Students must have a cumulative GPA of 2.00 to remain in good academic standing.

All regulations currently applicable on a course-by-course basis and currently tied to a specific letter grade would be interpreted to mean a specific letter grade range. Hence, if a student must achieve a C in one course in order to proceed to another course, under the plus-minus grading system, that student must achieve a grade in the “C range,” which would include the grade of C-.

All regulations currently tied to a specific grade average are interpreted to mean the numerical average currently associated with that specific grade. Hence, the required “C average or better” on all courses is a “2.00 average or better.”

The grade of S (on S/U basis) is defined as equivalent to the letter grade of C- or higher.

Satisfactory/Unsatisfactory Grading System

Students may elect to take courses under the S/U (pass/fail) grading system in several MU colleges and schools. Before electing to take a course on a pass/fail basis, the student should evaluate the advantages and disadvantages of the S/U grading system. The S/U grading status is indicated in the appropriate column on the registration or add/drop form. Students may choose to or from the S/U status only through the tenth day of classes in a semester.

In general, the teacher of a course does not know which students, if any, are enrolled on the S/U system, and a grade of A-/+ or F for each student is reported to the Office of the University Registrar. The Office of the University Registrar staff members ascertain which students are enrolled on the S/U system and assign a grade of U to those reported for grades of D+/+ or F, and a grade of S for those reported A-/+, B-/+ or C-/+.

Grades of S and U are not included in the computing of grade point averages.

Enrollment in courses under the S/U system is subject to the following restrictions by the University faculty:

• Students cannot change from one grading system to the other after the tenth day of classes in the fall or spring semesters, or the equivalent thereof in a shorter session.
• Students cannot elect to enroll in more than one course on an S/U basis in a given semester. This excludes courses taught only with the S/U grading system.
• First-semester freshmen and students on scholastic probation are not eligible to enroll in courses on an S/U system. This excludes courses taught only with the S/U grading system.
• A+, B+, and C+ grades are recorded on the transcript as an S. S grades are not included in the semester or cumulative grade point average on the transcript. Full credit is earned for courses completed with a grade of S.
• D+/+ and F grades are recorded on the transcript as a U. U grades are not included in the semester or cumulative grade point average on the transcript and no academic credit is awarded for courses completed with a grade of U.
• Courses completed with a grade of S may be accepted in an area of concentration only with the prior approval of the area advisor.

Courses completed with a grade of S may constitute no more than 20 percent of the total credits for the baccalaureate degree.

• Taking S/U courses may affect eligibility for Latin or other graduation honors for undergraduate students. Contact the academic advising unit for information.
• Some specified courses may not be taken on S/U basis to meet graduation or degree program requirements. Contact the academic advising unit for S/U approval.

Selecting Grading Options (S/U vs. A through F)

Students must choose to change their grading option no later than after the expiration of two weeks following the first day of classes in regular session or the equivalent thereof in a shorter session. Students’ academic advising unit must approve and change their grading option in myZou for the change to become official. See the University Registrar’s website at http://registrar.missouri.edu/dates-deadlines.php for deadlines for each term.

How Dropping/Withdrawing from a Class Affects the GPA

Students may drop a course through the end of the business day of the fifth week or the 25th class day of the semester. It will have no effect on the grade point average. After the 25th class day, the signature of the course instructor and/or dean of the academic unit is required. After the last day to drop, students are withdrawing from a course if they choose to leave the course. Students may withdraw from a course through the end of the business day of the 10th week or 50th class day of the semester. At this point a grade of W for withdraw is recorded if the student was
passing at the time of withdrawal. If the student was failing at the time of withdrawal, the course grade is F. The instructor determines which grade to assign. A W grade does not affect the grade point average, while a grade of F does. The grade generally will not appear until all grades for the course are submitted at the end of the semester.

**Grades for Students Who Officially Withdraw from the University**

No grade will be assigned to a student who officially drops prior to the 26th day of the fall or spring semester or an equivalent period in a summer session (other non-standard classes are also adjusted accordingly).

Students who officially withdraw from a standard 16-week course on or after the 26th day may be required to obtain the signature of the course instructor on the Course Withdrawal Form, available from the academic advising unit. This will inform the student of the grade (W or F) that will be submitted to the Office of the University Registrar at the end of the semester. A grade of F is assigned if the student is judged to be failing at the time of the withdrawal and will be calculated into the grade point average. Once the course withdrawal form is completed, students should return the form to their academic advising unit to obtain the dean’s signature (stamp of approval) on an add/drop form. The add/drop form is submitted to 125 Jesse Hall for processing.

Dropping or withdrawing from all classes for a term is considered withdrawing from the University. If done after the first day of standard classes the student remains eligible to pre-register for the following term. If a term elapses (other than summer) between enrollments, the student must apply for readmission. NOTE: Refund dates are different from withdrawal dates. (See Withdrawal from the University section on the University Registrar’s website: [http://registrar.missouri.edu/policies/withdrawal-university.php](http://registrar.missouri.edu/policies/withdrawal-university.php).)

**Grade Appeal**

Guidelines for grade changes are as follows:

- Students who believe that they have been graded unfairly or incorrectly should see the course instructor.
- If still dissatisfied, the student may appeal to the chair of the department. (If the course has a large number of sections, it may have a course director. If so, the student should see the director before appealing the grade to the department chair.)
- The chair of the department will conduct an investigation. The chair cannot substitute his or her judgment for that of the instructor concerning the quality of the student’s work.
- If the instructor of the course also is the department chair, the dean of the school or college will handle grade appeals.
- No one may substitute personal judgment for that of the instructor concerning the quality of the student’s work. However, mathematical or mechanical errors in scoring examinations may be corrected.
- No grade shall be otherwise changed unless there is clear, convincing and unequivocal evidence that it was a direct result of arbitrary and capricious conduct by the instructor.

**Incomplete Grades (Grade of I)**

Whenever students cannot be assigned a grade at the end of a course in which they have been enrolled because their work is for good reason incomplete, the instructor will postpone the grades, reporting I grades to the University Registrar.

An I grade may be assigned only when:

1. The completed portion of the student’s work in the course is of passing quality AND
2. There is such evidence of hardship as to make it unjust to hold the student to the limits previously fixed for the completion of the work.

Each department of the schools and colleges maintains a record of I grades in courses of that department. (Exemptions are made for research courses and problems courses related to research assignments.) This record, kept in the electronic student information system, will include:

- The name of the student
- The course number, title and credits
- Semester and year of enrollment
- A brief statement of the reason for delaying the grade
- An adequate guide for the removal of the I grade along with a suggested final grade in the event of the departure or extended absence of the instructor from the campus

An undergraduate student who receives an I grade must complete the course requirements either:

1. within one year from the date it was recorded (unless the course is numbered 4950-4959 or 4995), OR
2. before the date of graduation (whichever comes first).

When an incomplete is satisfactorily resolved, the faculty member responsible for the grade change will notify the University Registrar of the revised grade.

Otherwise, the University Registrar will remove the I and record a grade of F in classes graded A-F or a grade of U in classes graded S/U. Any student planning to graduate with an unresolved I grade should be aware that translation to an F could drop the GPA below the requirements for graduation. As with any academic deficiency, the low GPA would delay the student’s graduation until all requirements for graduation are met.

**Note:**

- A grade of I is not figured into the grade point average.
- Students should not re-enroll in a course for which they have been assigned a grade of I.
- For further information, see the Faculty Handbook, Academic Regulations ([http://facultycouncil.missouri.edu/handbook/intro.html](http://facultycouncil.missouri.edu/handbook/intro.html)).
- Exceptions to unresolved incomplete grades changing to an F are as follows:
  - Courses taken for graduate level credit
  - Courses taken prior to Fall 2003
  - Undergraduate research, honors research or problems courses that are approved for multiple terms of continuous research
- Grades of I and the reason for the delay of grade may also be entered directly into myZou.

Questions may be directed to the Office of the University Registrar, (573) 882-4249.
Unassigned or Erroneous Grades

To correct a grade erroneously reported, proper notification is sent from instructors and their department chairs to the Office of the University Registrar on a form provided for that purpose.

Note: Grade corrections must be processed within one year of the original reporting date.

In situations when there is a failure to record a grade on the official grade sheet, the University Registrar will record a NR (not reported) and send a written notification of this action to the faculty member and relevant department chair. The faculty member is responsible for submitting a corrected entry. After 12 months NR will change to an F.

No student may be re-examined for the purpose of changing a grade after a final grade has been reported to the University Registrar. For further information see the Faculty Handbook, Academic Regulations (http://facultycouncil.missouri.edu/handbook/intro.html). Questions may be directed to the Office of the University Registrar, (573) 882-4249.

Grades & Credits (G)

Grading Scale

Graduate students' grades in all courses counting toward an advanced degree may be reported as: A +/-, B +/-, and C +/- . Faculty members are not required to use a plus/minus grading scale; that decision should be based on the faculty member's evaluation of student performance and/or policies of their academic program.

Grade point averages are calculated as: A+ (4.0), A (4.0), A- (3.7), B+ (3.3), B (3.0), B- (2.7), C+ (2.3), C (2.0), and C- (1.7).

The Graduate School considers grades of C+, C and C- as passing grades; however, grades in the C range may not be acceptable for specific programmatic requirements and may result in the student being unable to maintain a 3.0 cumulative average. No D grade may be awarded graduate student, and a grade of F means the work has not satisfied the minimum requirements of the course. W denotes withdrawn passing and does not affect a student's grade point average.

S/U Grading

Graduate students may be graded satisfactory/unsatisfactory (S/U) in graduate-level courses only when those courses are designated as "graded on S/U basis only" in the online Schedule of Courses available through myZou.

Incompletes

An incomplete grade (I) may be recorded when the student's work is incomplete but otherwise worthy of credit, or when the instructor is unable to assign a grade at the end of the semester. The student must finish this work (Problems and Research courses exempted) within the next calendar year of residence.

If the work is not completed after one calendar year, the request to change an "I" grade will require an accompanying letter of justification from the instructor. Although grades of "I" do not automatically convert to an "F" if not completed, academic programs or the instructor may establish conditions or regulations pertaining to "I" grades that are more stringent.

Unreported Grades: NR

When grades are not reported by the instructor, these “Blank Grades" will be recorded as "NR" (Not Reported). The NR designation will remain on the student's transcript until a letter grade is submitted. If a letter grade is not submitted, the NR can remain on the student's record indefinitely and will not revert to an "F".

Grade Changes by Faculty

Faculty members may change grades within the policies set by the faculty. Grade Change Forms, available from the faculty member's academic unit, must be completed, signed and submitted to the Office of the University Registrar - Records Dept., 126 Jesse Hall.

Graduate-Level Credit

No graduate credit is given for courses numbered below 7000. Graduate students taking 7000-level courses that are cross-leveled with 4000-level courses will be given additional course requirements in order to warrant graduate credit received for those courses. Courses at 8000/9000 level are primarily for graduate credit. 8090/9090 research (8990/9990 Research for Engineering students) is reserved for master's and doctoral degree students working on a thesis or dissertation.

Grade Point Average

A graduate student's grade point average is based on the student's entire graduate record at MU. To remain in good standing, a graduate student must maintain a cumulative GPA of 3.0 or better.

GPA and Probation

At the end of each semester, graduate students with a cumulative GPA below 3.0 are placed on probation. If at the end of the following semester the cumulative GPA is 3.0 or better, the probationary status is removed. A student on probation failing to raise the cumulative GPA to 3.0 may, on the recommendation of the department or area program, be allowed a second probationary semester.

A student is subject to dismissal upon failure to raise the cumulative GPA to 3.0 by the end of the second probationary semester, or at any time a student's cumulative GPA is 3.0 or better, the probationary status is removed. A student on probation failing to raise the cumulative GPA to 3.0 may, on the recommendation of the department or area program, be allowed a second probationary semester.

GPA and Graduation

To graduate, a student must have an overall GPA of 3.0 in all graduate courses taken at MU and not just those courses listed on a plan of study.

For more information on grading, credit and related policies go to http://gradschool.missouri.edu/academics/progress/grading-credit.php.

Grades & Ranks (L)

Class Rankings

At the end of each semester, students are included in the first year, second year or third year class lists and are given a class rank based on their position in their class list. Classes are ranked by expected date of graduation.

When calculating the class rankings for the first year and second year classes, summer grades are included in the rankings for the following Fall semester.
The graduating class ranking is determined as of the end of the summer semester and includes all students graduating within the academic year (preceding fall and spring semesters and current summer session).

**Rules for Determining Class Levels**

In order to register for courses students are assigned a class level. Those class levels are determined as follows:

1. **First Year Students**: A first year student is one who has received lesson more than 24 hours of law school grades;
2. **Second Year Students**: A student who has between 25 and 56 (inclusive) of law school grades;
3. **Third Year Students**: A third year student is one who has received more than 56 hours of law school grades;
4. **Law School Grades**: As used herein, “law school grades” means grades counting towards credit at the School of Law. Failing grades do not count as “law school grades;”
5. **Effect of Summer School**: The determination of class level is made ONLY at the conclusion of the fall and spring semesters. A student’s class level will NOT, therefore change at the end of summer school;
6. **Exceptional Circumstances**: In cases of students in unusual situations, including, for example part-time or unusually heavy or light-load semesters, a determination will be made on the basis of dividing the student's law school career into relatively equal periods for the first, second and third years.

**Computation of Grade Point Average (GPA)**

Grade point averages are based only on law school courses taken at this school and only upon "graded courses." For the purpose of computing grade point averages a "graded course" is one which is graded on the 65-100 scale.

A grade point average is obtained as follows:

1. The "grade points" for a graded course are obtained by multiplying the numerical grade for the course by the credit hours for the course.
2. The "grade point average" is obtained by dividing the total grade points for all graded courses by the total number of hours for all graded courses.

In computing grade point averages, all graded courses are included. When a course is repeated, the grade and hours for both takings are included in computing cumulative grade point averages subject to the following exception:

A student who is required to repeat a course will have his or her cumulative grade point average computed as follows: If the grade on the repeated course is 81 or higher, neither the hours nor the grade for the previous taking of the course will thereafter be used in the computation of the student’s cumulative grade point average. The earlier grade will, however, remain on the transcript.

Grade point averages are computed for each student by semester, year, and cumulatively. The fall semester grade point average includes the courses taken in the fall semester and courses taken in the preceding summer session. The yearly grade point average is based upon courses taken during a student’s first, second and third years.

**Course Repeat Policy**

The School of Law’s Standards and Readmissions committee has adopted the following course repeat policy:

1. Students who petition the Standards Committee for readmission may be required to repeat any or all courses previously completed;
2. Students who achieve a grade in a course above the graduating average are not eligible to repeat that course;
3. Students who achieve a passing grade in a course that is below the graduating average are eligible to petition the Standards Committee for permission to repeat the course. The Standards Committee may grant such petition based on exceptional circumstances;
4. Students who fail a non-required course are eligible to petition the Standards Committee for permission to repeat the course. The Standards Committee may grant such petition based on exceptional circumstances;
5. Students who fail a required course are required to repeat that course, unless, in exceptional circumstances, repeating the course is waived.

Note: When a course is repeated only the hours for one taking may be credited toward meeting the graduation requirement of having passed 89 hours, without regard to how the course is treated for computing grade point averages.

**Dean’s List**

A student qualifies for inclusion on the Dean’s List with a semester average greater than 85.999.

**Good Standing**

After the first semester of the first year, a student is in “good standing” at the School of Law if the student’s cumulative GPA is greater than 76.399. Thereafter, a student is in “good standing” at the School of Law when both the student’s current semester and overall GPA are greater than 77.499.

**Grades and Grading**

The grades recorded in the School of Law are the official grades and the determination of grade point averages and satisfaction of law school requirements is based on the grades recorded in the School of Law.

Grades are recorded in the School of Law as numerical grades ranging from 65 through 100 or, where authorized, by the letters "S" (Satisfactory) and "U" (Unsatisfactory). The grades of S and of 70 through 100 are passing grades and carry course credit. The grades of U and of 65 through 69 are failing grades and carry no course credit. A 70 is the lowest passing grade and a cumulative grade point average greater than 77.499 is the minimum required for graduation.

With the exception of Independent Research, and any of the activities that satisfy the writing requirement, if grading is to be done other than anonymously, the syllabus shall so state. Professors do not know the names of students until after grades are turned in to the Dean’s Office. Professors may not obtain the names of students prior to assigning a class rank order for grades. The rank order may not be changed after the names are known.

Explanation of the Grading Scale (http://law.missouri.edu/students/pdf/gradingscale.pdf) (PDF)
Grades from myZou

Students may obtain their grades from MyZou. In addition to the student’s PawPrint, when checking grades for only one course, students must know the course number.

Student Honors

J.D. Degree Cum Laude

Any student with a graduating grade point average greater than 96.999 is eligible for the designation of Juris Doctor Summa Cum Laude upon graduation.

Any student with a graduating grade point average within the top 7% of the graduating class is eligible for the designation of Juris Doctor Magna Cum Laude.

Any student with a graduating grade point average within the top 12% of the graduating class is eligible for the designation of Juris Doctor Cum Laude.

Order of the Coif

The Order of the Coif is a national law school honor society, founded for the purpose of encouraging legal scholarship and of advancing the ethical standards of the legal profession. It has established chapters in the leading law schools of the country. Its members are selected by the faculty from the top ten percent of the graduating class and rank highest in scholarship and whose achievements as students make them worthy of this distinction. Selections are made after sixth semester grades and rankings have been determined. To be eligible for membership in the Order of Coif students must complete 75% of their law studies in graded courses. Starting in 2014, transfer students will be considered as having completed their first year of law studies in graded courses for purposes of calculating the 75% of coursework in graded courses requirement.

Order of the Barristers

The Order of the Barristers is a national law school honor society founded for the purpose of promoting legal advocacy and of advancing the ethical standards of the legal profession. Members are selected based upon participation and excellence in the advocacy programs of the School of Law.

Graduate Academic Minors (G)

Nondesignated minors

Nondesignated minors consist of course work constituting a unified plan of study that includes a minimum of nine hours of graduate course work. These minors should be listed on a student’s plan of study; however, they are not listed on a student’s transcript.

Obtaining approval for a minor

Both designated and non-designated minors must be approved by the student’s major adviser, the student’s academic program director of graduate studies, and the Graduate School.

In addition, the inclusion and completion of a designated minor must be approved by the director of graduate studies (or academic program chair/program director) of the academic program or interdisciplinary group offering the minor.

Graduate Assistants and Fellows (G)

Graduate Assistantships

Graduate assistantships give students opportunities for professional experience, academic training and financial support while pursuing advanced degrees. Specific assignments vary by type of assistantship. Graduate assistantships generally entail 10-20 hours of work per week (.25 to .50 full-time exempt). Students who hold graduate assistantships are discouraged from working more than 20 hours per week for more than one semester during the period of the assistantship.

Fellowships

Fellowships are a type of aid granted to graduate students to help support their education. Some fellowships include a tuition waiver or a payment to the university in lieu of tuition. Most fellowships include a small stipend to cover living expenses. Unlike a loan, a fellowship is a form of gift aid and does not have to be repaid. However, fellowships may be taxable and reportable to the Internal Revenue Service. No service or work requirement is associated with a fellowship.

Assistantship and Fellowship Policies

The complete set of policies regarding graduate assistantships and fellowships may be found on the Graduate School’s website (http://gradschool.missouri.edu/policies/graduate-assistantships-fellows.php).

Graduate Certificates

A graduate certificate is not a graduate degree. Rather, it is a document verifying the successful completion of a specified group of graduate courses. Certificates are intended to help students acquire (or enhance) discipline-related knowledge and skills. Upon completion of a designated set of courses and other requirements, the name of the graduate certificate will appear on the student’s official University of Missouri Transcript.

To accommodate a variety of learners’ needs, MU offers two types of graduate certificate programs:

• Stand-alone graduate certificates allow individuals to earn graduate credit hours without having to enroll in a specific degree program. Prospective students have an option to apply to the Graduate School as a Certificate-Seeking Student only. Degree seeking students may also pursue this type of certificate as complementary to (or independent of) their graduate degree program.

• Degree-dependent graduate certificates are designed for degree-seeking students only. Further, the students must be enrolled in the particular degree program offering the certificate. In other words, this type of certificate is intended for degree seeking students who wish to pursue specialized courses or related, complementary study.

Federal Disclosure Requirements for Stand Alone Graduate Certificates: “Final regulations published in the Federal Register on October 29, 2010, require institutions to report certain information about students who enrolled in Title IV eligible educational programs that lead to gainful employment in a recognized occupation (GE programs). Those regulations also provide that institutions must disclose to prospective students certain information about the institution’s GE programs.

Finally, the new regulations require institutions to notify the Department if they wish to add an additional GE Program to its list of Title IV eligible...
programs. All of these requirements are effective July 1, 2011. The Secretary published additional regulations related to the program eligibility metrics that will be calculated for gainful employment programs in the Federal Register on June 13, 2011."

Source: Federal Student Aid, see http://www.ifap.ed.gov/GainfulEmploymentInfo/index.html

At the University of Missouri, the Graduate School's Stand Alone certificates are subject to federal Gainful Employment disclosure requirements. A disclosure form for each Stand Alone certificate may be found in the last section of this catalog and on our web site.

Certificate Admission Information

Stand-Alone Certificate Applicants. All students enrolled in a stand-alone graduate certificate program will be classified as Graduate Certificate-seeking graduate students. As such, to qualify for admission, they must have successfully completed the baccalaureate degree at an accredited college/university. Specific graduate certificate programs may have admission standards that exceed those for post-baccalaureate graduate students. New graduate applicants wishing to pursue a stand-alone certificate only should complete the Graduate School's online application for admission and meet the Graduate School's minimum admission requirements for all programs.

Degree-Dependent Certificate Applicants

New applicants applying for a degree program should complete the Graduate School's online application for admission for the degree program. Once enrolled at MU, the Application for Graduate Change of Division, Program, Degree Emphasis or Adviser Form (pdf) should be completed to add a graduate certificate.

Financial Aid

Check eligibility on both types of certificates Degree-dependent graduate certificate programs are federal financial-aid-eligible. Students only enrolled in stand-alone graduate certificates are potentially eligible for federal financial aid. Read our disclosure pages to learn more about the costs (tuition & fees); time needed to complete the certificate; and future placement (e.g., degree programs, jobs) of certificate holders. Next, check with MU Student Financial Aid Office to determine eligibility. Students enrolled only in a stand-alone graduate certificates are not eligible for scholarships, fellowships, assistantships, tuition waivers, etc.

From the Graduate School or University of Missouri.

Stand-Alone Certificate Admission Requirements for Non-Degree Seeking Students

A non degree-seeking student who is admitted into a stand-alone certificate program will be officially classified as "certificate-seeking" graduate student. To be admitted, the student must have successfully completed a baccalaureate degree at an accredited college/university. Specific graduate certificate programs may have admission standards that exceed those for post-baccalaureate graduate students. Transfer credit for stand-alone certificate seekers. A maximum of three graduate credit hours which correspond directly to the MU graduate certificate program course requirements may be used as transfer credit from another university to satisfy the requirements for the certificate program. An original transcript from the other university, verifying graduate credit received for the requested hours of transfer credit, must be submitted to the Graduate School when the Plan of Study form is submitted. Please refer to the certificate program's site for certificate policy updates.

Credit Hours Necessary for Certificate Completion

Graduate certificates vary in completion requirements, including the minimum credit hours. Please refer to the certificate program’s site for credit hour requirements.

Up to 12 hours of graduate credit earned for graduate certificate may be applied to degree requirements for a graduate degree upon approval of the degree program.

Grievances (L)

The School of Law is a charter member of the Association of American Law Schools. Information on the AALS may be found at their web page http://www.aals.org/.

The School of Law is fully accredited by the American Bar Association. Questions regarding ABA accreditation may be directed to the Office of the Consultant on Legal Education, American Bar Association, 321 N. Clark Street, 21st Floor, Chicago, IL 60654-7597, (312) 988-6738.

Student complaints implicating compliance with the standards imposed by the American Bar Association Section on Legal Education and Administration to the Bar shall be filed in writing with the Associate Dean for Academic Affairs, or if the complaint involves the person serving in that capacity, with the Dean of the Law School. The complaint shall include the date in which the complaint is being filed; the name and address of the complainant; and a description of the complaint.

The description of the complaint shall include a description of the accreditation standard which the law school’s action or inaction implicates. The Associate Dean for Academic Affairs (or the Dean of the Law School) will investigate the complaint and respond to the complainant in writing within 30 calendar days from receiving the complaint. The response will indicate whether the Law School has taken any corrective action, or if not, the reasons for not taking any action.

Students who have a grievance not implicating the ABA accreditation standards may file it with the Student Bar Association which has a Grievance Committee that meets periodically with the Dean or Associate Dean.

Holds

There are several types of holds, which are restrictions that may block registration. Students notified on myZou if they have a hold. They should go to the office indicated on the individual hold to resolve the hold.

Honors Recognition (V)

Each student graduating from the College of Veterinary Medicine and whose cumulative grade point average (G.P.A.) in the professional curriculum is within the range listed below will be designated, as indicated on the diploma, to graduate with honors:

G.P.A. 3.9-4.0 summa cum laude
G.P.A. 3.8-3.89 magna cum laude
G.P.A. 3.7-3.79 cum laude

(General Faculty meeting minutes, 10-10-74)
Late Registration

A student cannot register in classes offered by any school or college after one week following the first day of classes in a regular semester or the equivalent period of time for other sessions or classes. Class session meeting dates may be found in the class details on myZou (http://myzou.missouri.edu).

A late registration fee equal to the tuition for one undergraduate credit hour will be assessed starting the first day of classes for the regular session for the term.

Exceptions to this rule are enrollments in class sections of graduate exam, internships, problems, research and special readings.

Leave of Absence (G)

Key Terms

Leave of Absence
The student anticipates a need to discontinue enrollment for one or more semesters.

Active Duty Leave or Withdrawal
Students who are members of the US Military (e.g., Reserve or National guard) may be called into active duty by the government. As a result of the assignment, the student may need to request an active duty leave or may decide to withdraw from the University.

Contact Adviser and Director of Graduate Studies
Students considering a leave of absence that will result in a break in enrollment of one or more semesters must first contact their graduate adviser and the academic program’s director of graduate studies to inform them of their intent, the reason requesting leave and the expected duration.

Letters to the Graduate School Office
After approval of the leave at the academic program level, the director of graduate studies and the student will submit letters to the vice provost/ dean of the Graduate School. The DGS letter will verify that the academic program has been informed and that a leave of absence has been approved. The letter from the student will provide an explanation for the request as well as the anticipated departure and return date.

Resolving Financial Support Responsibilities
It will be the responsibility of students to resolve all issues pertaining to their support (e.g., research or teaching assistantship, scholarship) with their adviser or other relevant authority before departure. These issues include the date when support will be terminated and whether or under what conditions the student will be reinstated for support upon their return.

Notification for Re-Entry
Before the completion of the Leave of Absence, the student must notify the academic program’s director of graduate studies and the Graduate School so that the re-entry process can be initiated.

Contact with the University During Leave
Students on a Leave of Absence may not make significant use of University resources and services or engage in significant consultation with the faculty.

Extension of Degree Time, Continuous Enrollment
Time spent on leave does not automatically extend limits for completion of the graduate degree but can be considered in a request for an extension.

Doctoral students who are required to maintain continuous enrollment may petition for an exception to this policy while they are on an approved Leave of Absence.

International Students
International students in F-1 and J-1 non-immigrant status must also obtain authorization from the International Center before the initiation of a Leave of Absence and before returning to campus to ensure compliance with current SEVIS regulations and visa restrictions.

F-1 and J-1 students approved for a leave of absence may not remain in the United States during the leave period unless authorized by the International Center. For students who must depart the United States, leave periods exceeding five months will necessitate updated student immigration documentation for re-entry.

All international students considering a leave of absence should meet with an international student adviser to determine the appropriate steps to safeguard their immigration status.

Military - Active Duty

Enrolled students called into active service in the armed forces of the United States prior to the completion of the semester, whether voluntarily or involuntarily, but not including active service for training, shall be eligible for either of the options listed as follows: NOTE: Students must choose either option 1 or 2

Students taking distance / online classes who reside in states other than Missouri where a conflicting law may require other options than listed below will be given the accommodations required by that law when the student provides documentation of the law’s existence and proof of its applicability to him/her. Please note: Students who are enrolled at the University of Missouri and reside in a state outside of Missouri should review the information below related to unique military deployment benefits:

State of Iowa “Code Section 261.9(1)g" (http://www.iowacolleageaid.gov/PostsecondaryRegistration/iowacodechapter261b.html#ComplianceRequirements) http://www.iowacolleageaid.gov/PostsecondaryRegistration/iowacodechapter261b.html)

Option 1 - Withdrawal from all courses for semester
They may choose to withdraw from all classes. In such cases, a student may request either:

1. That the official transcript indicate the courses from which he or she has withdrawn, the date of withdrawal and the reason for withdrawal. Students choosing this option will have their tuition
and fee charges and their student financial aid eligibility calculated effective with their official withdrawal date.

2. Or the student may request that all courses for that semester be expunged from the student's academic record. Students taking this option will receive a complete refund of all educational and incidental fees paid by the student for enrollment for that semester. However, students who have received federal, state or institutionally funded financial aid must return all aid disbursed to them for the semester.

NOTE: Students must see their Academic Advising Unit to withdraw and return the form to Office of the University Registrar, 125 Jesse Hall.

Refunds will not be immediately available. Refunds are based on your last method of payment (i.e. credit card, check, etc). Refund checks will be sent to your mailing address unless a forwarding address is left with the University.

**Option 2 - Receive Incompletes in all courses for the semester**

The student may choose to receive an incomplete in all courses not yet completed for the semester. In that case the following rules apply:

- The student must complete all course work for the semester to the satisfaction of the instructor(s), and the time a student spends on active military duty shall not be counted against time allowed for the completion of an “Incomplete” grade.

- **I to F policy:** Students called to active military duty will be exempted from the one-year automated changes of I to F grades for the term of deployment and the year prior to deployment. In accordance with State statute, students may complete work upon their return from duty or may choose to maintain the I grade. Therefore, I grades for students called to active military duty will remain listed as “I” until a change of grade is submitted by the faculty member, or indefinitely, if so desired by the student.

- **NR to F Policy:** Military duty will be exempted from the one-year automated changes of NR to F grades for the term of deployment and the year prior to deployment. In accordance with State statute, students may choose to maintain the NR grade. Therefore, NR grades for students called to active military duty will remain listed as “NR” indefinitely, if so desired by the student.

Upon completion of all course work for the semester, the student may choose either to:

1. Have the grade earned for the course and have the “Incomplete” expunged from his or her official record
   OR

2. Have the “Incomplete” grade remain as the final grade with reason for the “Incomplete” noted on his or her official record

**NOTE:** No refunds will be given for option 2.

**Residential life:** Residential life will be contacted and informed of your intent to exit the University. Room, board and social fees will be prorated and applied to your University student account based on the effective date of your official check out from the residence hall or other University accommodations.

**Financial Aid:** The Office of Student Financial Aid will be informed of your student status and your official withdrawal date and may make adjustments according to federal, State of Missouri and institutional guidelines.

**Scholarships:** Scholarships may or may not be applicable upon the student’s return to the University. For example, Section 41.948.2, RSMo, provides that if a student has been awarded a scholarship to be used to pursue an academic program in any higher education institution in Missouri and he or she is not able to complete the term for which the scholarship was granted, the student shall be awarded that scholarship at any subsequent academic term provided the student returns to the academic program at the same institution at the beginning of the next academic term after the completion of active military service. If a student has any scholarships or other aid or award, he or she should contact the issuer to determine whether it will be applicable on his or her return and whether he or she will need to satisfy any other conditions.

**Contact:**
Office of the University Registrar
125 Jesse Hall
The University of Missouri - Columbia
Columbia, MO 65211
Office: (573) 882-7881
Fax: (573) 884-4530

The Office of the University Registrar will require the following information:

- A copy of your military orders, as soon as possible
- Forwarding Address
- Name, address and phone number of a contact or your representative
- Your name as it is on MU records
- MU ID number
- Which option student wishes to choose for classes

This information may be brought to 125 Jesse Hall or faxed to (573) 884-4530.

**Re-admission of previously enrolled students**

Undergraduate students who are returning to MU after an absence of at least one semester must complete a request for re-admission for undergraduate studies (http://admissions.missouri.edu/apply/re-admission) and return it to the Office of Admissions, 230 Jesse Hall, Columbia, MO 65211-1300 or fax to 573-882-7887. Degree-seeking graduate students who are returning to MU after an absence of at least two semesters must complete a graduate school reactivation form (PDF) (http://gradschool.missouri.edu/forms-downloads/repository/reenroll.pdf) and return it directly to the academic program for approval. Post-baccalaureate (non-degree seeking) graduate students should return the completed form to the Graduate Admissions Office, 210 Jesse Hall, Columbia, MO 65211-1160 or fax it to 573-884-5454.

View Missouri Revised Statutes Chapter 41 (41.948) (http://www.moga.mo.gov/statutes/C000-099/0410000948.HTM). This policy is implemented to assure that students called to active duty prior to the end of a term receive fair and just treatment, both financially and academically.

Contact the Office of the University Registrar-Registration for more information at 573-882-7881.
Name Changes

Current students and alumni of the University of Missouri may change their names in the student records system for the University of Missouri during or after attendance according to the following:

1. For a student to change his/her name, legal documentation is required of the student’s new name and verification that he/she was previously known as the name in the MU records system.

For Undergraduate students, a name change may be processed either in person, at the Office of Admissions, 230 Jesse Hall, or through the mail provided the necessary documentation is submitted. The mailing address is: Office of Admissions, 230 Jesse Hall, University of Missouri, Columbia, MO 65211.

For Graduate and Professional students, a name change may be processed either in person, at the Graduate School, 210 Jesse Hall, or through the mail provided the necessary documentation is submitted. The mailing address is: Graduate School, 210 Jesse Hall, University of Missouri, Columbia, MO 65211.

2. The student must submit a minimum of two of the documents listed below, one from list a. Proof of use of former name and one from list b. Proof of legal change to new name. At least one of the documents must have date of birth, a photograph, and a signature:
   a. Proof of use of former name
      i. Former government issued government ID card such as a driver’s license, military ID, passport
      ii. A federally recognized Indian tribe’s enrollment card or a US Bureau of Indian Affairs identification card containing the signature and photograph of the individual
      iii. School yearbook with photo
      iv. Previously-issued Social Security Card
   b. Proof of legal change to new name
      i. Current, government-issued ID card such as a driver’s license, military ID, passport
      ii. Current, valid Social Security Card with new name
      iii. A federally recognized Indian tribe’s enrollment card or a US Bureau of Indian Affairs identification card containing the new name, the signature and photograph of the individual
      iv. A certified copy of a court order or a marriage certificate or a dissolution decree reflecting the new name in full

3. Students may abbreviate their middle name(s) without documentation. Documentation is required if a student is adding or deleting a middle name or changing an initial to a name.

Non-Degree Graduate Study (G)

The Non-Degree Graduate Student Program allows post-baccalaureate students to complete graduate courses without being formally accepted into a degree-granting program. Many students use this enrollment option to explore a discipline, take courses for career advancement, prepare for application to a graduate degree program, or as personal enrichment. This program is administered by the Graduate School.

Once enrolled, the non-degree graduate student may take undergraduate- or graduate-level courses but hours earned are not credit toward a graduate degree. However, if the student is later admitted to a degree-granting program, up to 12 hours of earned graduate credit may be applied toward a graduate degree program, at the discretion of faculty in the admitting academic program.

Students admitted under the non-degree seeking status have access to MU libraries, museums, laboratories, and recreational and athletic facilities.

Note: To manage course enrollment, some academic programs may limit available courses to non-degree graduate students. Contact the academic program in which you wish to take courses for more information.

Eligibility

Applicants who hold a baccalaureate degree or its equivalent from a U.S. university or a university in which instruction is in the English language may be admitted to MU as non-degree graduate students.

International Student Eligibility

International students residing in the United States who do not satisfy the above requirement and are seeking admission as post-baccalaureate graduate students must provide evidence of proficiency in English. Either a minimum score on the TOEFL or IELTS or a minimum of 24 semester credit hours in which the student maintains a 2.0 GPA (A=4.0) in a degree program in which English was the primary language is required. The minimum required TOEFL score for entrance to the Graduate School is 500 paper-based, 61 internet-based. The Graduate School also accepts a 5.5 Academic IELTS score for admission to the Graduate school. Please consult your academic program of interest to determine if it requires higher TOEFL or IELTS scores for admission.

The University of Missouri will not issue I-20s to international students so that they may enter the United States to become non-degree graduate students.

Tuition and Fees

Non-degree graduate students must pay graduate educational and student activities fees regardless of whether they take graduate or undergraduate courses.

Financial Aid

Non-degree graduate students are not eligible to receive federal financial aid or veteran’s benefits or to hold campus-sponsored assistant ships.

How to Apply for On-Campus Non-Degree Study

- Complete and submit the Graduate School Application (https://app.applyyourself.com/AYApplicantLogin/flow=ApplicantLogin.asp?id=umc-grad). The Graduate School encourages applicants to use the online application. The submission of a hard-copy application (PDF) (http://gradschool.missouri.edu/forms-downloads/repository/gradapp.pdf) will slow the application review process.
- Submit the application fee, (http://gradschool.missouri.edu/admissions/eligibility-process/non-degree-applicants/application-fee.php) which is $55 (US) for domestic applicants and $75 (US) for nonresident international applicants. You can pay the fee online through the Graduate School’s online application.
- Official transcripts or mark sheets must be sent directly from each university or college you have attended to the Graduate Admission
Office, 210 Jesse Hall, Columbia, MO 65211. Transcripts/mark sheets for all baccalaureate degrees or their equivalents and any additional degrees must be sent. At this time, the Graduate School only accepts hard copies of transcripts. All transcripts/mark sheets become the property of MU.

- Standardized test scores, such as the GRE, are not required for non-degree graduate applicants. See below for the transfer and use policies for non-degree courses taken at MU.

How to Apply for Online Non-Degree Study
If you are planning to take course work online or at a distance, please contact Mizzou Online (http://online.missouri.edu) about course offerings and registration. The application process is different for online-only students.

Maintaining Good Standing
Non-degree graduate students must maintain a 3.0 GPA. If the cumulative GPA is less than 3.0, the student will be given one automatic probationary semester. If, after one semester of probation, the student’s cumulative GPA does not reach 3.0, the student may be granted a second probationary semester following a successful written petition made directly to the dean of the Graduate School. (Summer sessions are not counted as probationary semesters.) If the student fails to achieve a cumulative GPA of 3.0 following the second probationary semester, the student will be made ineligible to enroll as a non-degree or degree-seeking graduate student. If at any time a student’s term or cumulative GPA falls below 2.0, the student will be ineligible to enroll as a non-degree or degree-seeking graduate student.

Switching Student Status from “Non-Degree” to “Degree-Seeking”
Non-degree graduate students who want to earn a graduate degree (master’s, doctoral or educational specialist) must:

- Submit official scores, if required by the degree program of interest (http://gradschool.missouri.edu/academics/programs), from an appropriate graduate admission examination (GRE, GMAT, MAT). The scores must be sent directly from the examination service to Graduate School Admissions, 210 Jesse Hall, Columbia, MO 65211.
- Meet Graduate School minimum admission requirements (http://gradschool.missouri.edu/admissions/eligibility-process).
- Apply directly to the degree program of interest using a Change of Degree form (PDF) (http://gradschool.missouri.edu/forms-downloads/repository/change-degree.pdf).

Posthumous Degree Awarding (G)

Honoring Deceased Graduate Students
The following policies and procedures apply in instances in which a graduate student dies before being awarded a degree.

Student Completed All Degree Requirements
If the student has completed all degree requirements, the college or school’s representative (dean, assistant/associate dean or director) will contact the Office of the Provost and the vice provost for advanced studies and dean of the Graduate School to nominate the individual to receive a posthumous degree.

The diploma for the degree that the student was pursuing will be prepared in the same manner as if the student had lived. This diploma may be presented to the family of the deceased in a special ceremony, at Commencement or in whatever manner is deemed appropriate.

Student Did Not Yet Complete Degree Requirements
If the student had not completed degree requirements but was making satisfactory progress at the time of death, a dean’s certificate honoring the student can be provided by the appropriate academic unit(s). These certificates may be designed and presented in a manner that is fitting to the circumstances.

- In some instances, presentation of the degree or certificate to family members may be made at a remembrance ceremony.

Refund of Fees Policy

Exceptions to published tuition and required fees assessment policy and charges

1. The Office of the University Registrar and the vice provost for enrollment management are charged with considering and approving exceptions to published tuition and required fees assessment policy.
2. Any change in assessment can be adjusted or pro-rated only to a rate already established in the published university tuition and required fees schedule.
3. Only tuition related to a student’s assessment for registration in credit hours are covered by these guidelines. Other required fees such as those for residence halls, the bookstore, etc. need to be directed to departments responsible for assessment of those required fees.
4. Grade assignments and other academic issues are not within the scope of these procedures and should be addressed to the dean of the college or school in which the student is enrolled for further direction.

Initial appeal by a student

1. An appeal and all pertinent written documentation must be submitted in writing within 90 calendar days of notification of assessment, adjustment or refund. In cases of incapacitation, exceptions may be made on a case-by-case basis.

Minimally, each written appeal must be dated and include the student name, address and phone number, student number, signature of the student, statement describing specifically what is being requested and for what term, statement of any extenuating circumstances, and why the request should be honored.

2. All appeals must be submitted to the Office of the University Registrar, 125 Jesse Hall. Appeals must meet one or more of the following criteria to be considered and approved:
   a. Written documentation of an illness, accident, injury or situation that could not be influenced, planned for, or prevented by the student or the institution and which subsequently caused a change in the student’s enrollment, thus changing the assessment. This provision specifically

3. Any change in assessment can be adjusted or pro-rated only to a rate already established in the published university tuition and required fees schedule.
4. Only tuition related to a student’s assessment for registration in credit hours are covered by these guidelines. Other required fees such as those for residence halls, the bookstore, etc. need to be directed to departments responsible for assessment of those required fees.
5. Grade assignments and other academic issues are not within the scope of these procedures and should be addressed to the dean of the college or school in which the student is enrolled for further direction.

Initial appeal by a student

1. An appeal and all pertinent written documentation must be submitted in writing within 90 calendar days of notification of assessment, adjustment or refund. In cases of incapacitation, exceptions may be made on a case-by-case basis.

Minimally, each written appeal must be dated and include the student name, address and phone number, student number, signature of the student, statement describing specifically what is being requested and for what term, statement of any extenuating circumstances, and why the request should be honored.

2. All appeals must be submitted to the Office of the University Registrar, 125 Jesse Hall. Appeals must meet one or more of the following criteria to be considered and approved:
   a. Written documentation of an illness, accident, injury or situation that could not be influenced, planned for, or prevented by the student or the institution and which subsequently caused a change in the student’s enrollment, thus changing the assessment. This provision specifically
Refund of tuition and fees in the event of a student death

1. When a student dies prior to completing the current academic semester, a full refund of or credit for tuition and required fees will be made after the deduction of the following:
   a. Any required adjustments to scholarships, grants or loans determined by federal formula applied by the Office of Student Financial Aid.
   b. Any other debts owed to the University that occurred prior to the death of the student.

2. Any refund will be made payable to the student.

3. If, after all adjustments are made, there still remains a debt to the University, generally the University would not attempt to recover the debt from the estate of the deceased student.

Students called to active military duty

Enrolled students called into active service in the armed forces of the United States prior to the completion of the semester, whether voluntarily or involuntarily, but not including active service training, and unable to complete their course work, shall be eligible for two options. The options are implemented to assure that students called to active duty prior to the end of a term receive fair and just treatment, both financially and academically. Contact the Office of the University Registrar at 573-882-7881 for more detailed information.

Students called to jury duty

Full refunds (100 percent) of required tuition and any applicable required fees for all credit hours from which a student withdraws, when following University procedures announced by the provost.

Residency (L)

The School of Law residence rules satisfy the requirements of the American Bar Association and the Association of American Law Schools. The purpose of the residency requirements is to assure that the study of law will be spread evenly over a minimum period of six semesters or the equivalent.

The rules regarding the size of a student’s course load -- the number of hours a student enrolls for in a given semester -- and residency rules -- are not the same.

The residency requirement means that students may not graduate in less than six semesters or the equivalent. Students who plan to attend summer school for two years and graduate a semester earlier, should visit with the Associate Dean for Academic Affairs concerning their summer course loads.

For residency purposes a minimum load of twelve hours is required for a semester. For purposes of accelerated graduation, minimum residency hours for a summer session are five if combined with another summer session of no less than seven hours. Two summer sessions of six hours each serve the same purpose. If fewer hours are taken in a summer session, they may not be used toward residency for the purpose of accelerated graduation but may be combined with an appropriate number of hours in a regular semester in order to fulfill a twelve hour semester residency requirement.

Students completing more than twelve hours in a semester may not use surplus hours over twelve toward residency in any other session; hence the three surplus hours from a fifteen hour semester cannot be added to a subsequent nine hour semester to give residency for two semesters. On the other hand, a nine hour semester can be combined with a three hour summer session to give residence for one semester.
In cases of extreme hardship the Faculty may make a slight variance in the residency requirements, but cannot go below the standards set by the American Bar Association and the Association of American Law Schools.

Revision of Records

The Committee for Revision of Records reviews petitions from students asking for changes to their academic records. Students should discuss the petition process with their adviser before appealing to the committee to verify that changes are warranted and will benefit the student.

Instructions for completing petition to the committee

Students must:

- Obtain forms from the appropriate school or college advising office and discuss their case with their adviser.
- Complete the forms, being as thorough and specific as possible. You must sign and date the petition(s).
- Leave the petition with the class instructor, who will forward it to the department chairperson. The chairperson will return it to the dean’s office, which will send it to the Office of the University Registrar. Signatures of the instructor, department chairperson and dean must be obtained before the committee will consider the petition.
- Provide specific dates if requesting to backdate a withdrawal from the University. A separate form is required for each class.
- Supply documentation or evidence to support the petition. For example, if a student has a medical justification, please supply the medical certification form. Obtain forms from the academic units.

General guidelines

- The committee cannot change a grade given by an instructor. If a student disagrees with a grade, they must contact their instructor and then follow the appropriate appeals process. An instructor cannot change a letter grade to “W” unless a withdrawal has been approved.
- If the committee approves a requested change and additional charges apply, payment must be made before the transcript changes.
- The committee reviews all complete petitions, and its decisions are based on the information presented. Decisions are communicated in writing to the student. If the petition is approved, a transcript reflecting any changes will be included.
- The committee cannot grant refund appeals. Students must complete a refund appeal form (PDF) (http://registrar.missouri.edu/forms/fee-adjustment-appeal-form.pdf).

The committee is composed of faculty appointed by the chancellor. Members are anonymous and students are not allowed to communicate directly with them. Forward questions to Victor Price at PriceV@missouri.edu.

Student Conduct (L)

The academic life of students at the MU School of Law is governed by a Code of Honor that has been adopted by the Faculty and the Student Bar Association.

Students should note that they generally will be required to report any Honor Code violation on state bar application forms.

The Honor Code is available at http://www.law.missouri.edu/students/policies/conduct.html.

Incidents involving bias or harassment can be reported through the MU Equity Office. Information is available at http://equity.missouri.edu/bias-reporting/.

Student Employment (L)

In December 1998 the American Bar Association Section of Legal Education Accreditation Committee requested the Law School establish a faculty approved policy on student employment in accordance with Standard 304(c) of the ABA Standards for the Accreditation of Law Schools. At its meeting on February 16, 1999, the Faculty of Law adopted the following policy which mirrors the ABA requirement:

"The Law School shall not award full-time residence credit to a student who does not devote substantially all of the student’s working hours to the study of law or engages in employment for more than 20 hours per week, whether outside or inside the Law School."

Further, the faculty acknowledged ABA Interpretation 304-7 which requires that:

"a law school shall demonstrate that it has adopted and enforces policies ensuring that individuals enrolled as full-time students devote substantially all working hours to the study of law including the implementation of policies relating to...limitation on employment..."

This memo serves as notice to the entire Law School community of the policy, with the expectation that it will be followed. The enforcement of this policy will be undertaken as follows:

For all law students who are employed by the School of Law in any capacity, including research assistant or other part-time student employment, the School of Law cannot process for payment time sheets which indicate more than 20 hours per week of work. Law School faculty and staff are not authorized to permit or require law student employees to work more than 20 hours per week.

The 20-hour rule does not apply to the period of time between semesters, or the summer (unless the student is enrolled full-time in law school,) or spring and fall breaks.

Student Files (V)

The following policy relates to compliance with the Family Educational Rights and Privacy Act Amendment to the Elementary and Secondary Education Act of 1974:

(1) Each student requesting permission to examine his/her file will be referred to the Associate Dean for Academic Affairs or his or her designate.

(2) Each student must provide proof of:

a. Current student status at the University of Missouri (or, if during an academic recess, attendance during the past academic session).

b. Identity. They must provide some identification which allows visual comparison of person’s appearance with a photograph on an item such as a driver’s license or student identification card.

(3) If the above conditions are met and permission is granted, a student will be allowed to examine their entire student record. This must be
affected only in an office occupied by one of the assistants in the Dean’s Office.

(4) Copies of any item in the student’s folder except for transcripts or letters of recommendation and/or evaluation will be provided at cost. In such cases the sum of 25 cents per page must be collected before any copies are provided.

(5) A student must not, under any circumstances, be left alone with the folder.

(6) A record will be placed in the student’s folder stating the date and time that such examination occurred. It should be initialed and dated by the Associate Dean for Academic Affairs or his or her designate. (CVM Executive Committee, 1986)

---

### Student Level (U)

Students are assigned to a particular class level based upon the number of credits they have completed in accordance with the following limitations:

<table>
<thead>
<tr>
<th>Class</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>0 to 29 credits</td>
</tr>
<tr>
<td>Sophomore</td>
<td>30 to 59 credits</td>
</tr>
<tr>
<td>Junior</td>
<td>60 to 89 credits</td>
</tr>
<tr>
<td>Senior</td>
<td>90 or more credits</td>
</tr>
</tbody>
</table>

For registration purposes, student level will be determined by earned credits plus those credits in progress at MU. Undergraduate students pursuing degree programs at other institutions who enroll at MU as visiting students will generally be considered as freshmen, non-degree students. They are not assigned to a school or college. This applies to students who enroll under agreements with the Mid-Missouri Associated Colleges and Universities as well as those from other colleges and universities.

---

### Testing Out of Courses (V)

For professional courses cross-listed as undergraduate or graduate courses, students may opt out of the course during the professional curriculum if the following conditions are met. The student took the course within three years, received an A or B in a course, and received instructor permission to waive the course.

Veterinary students are charged a flat rate per academic semester and testing out of a course will not result in a prorated tuition rate.

---

### Theses and Dissertations: Submission Deadline, Review and Public Disclosure (G)

**Formatting the Thesis**

A thesis, when required for a master’s program, must be written on a subject approved by the candidate’s advisory committee. The thesis must be the student’s own work and must demonstrate a capacity for research and independent thought. Refer to the Master’s Degree section for details.

All work must be properly cited and permission to use copyrighted materials must be obtained prior to submission.

---

### Formatting the Dissertation

A dissertation is required for all doctoral programs and must be written on a subject approved by the candidate’s advisory committee. The dissertation must include the results of original and significant investigation, and it must be the candidate’s own work. Refer to the Doctoral Degree section for details.

Dissertation formatting guidelines may be found at [http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/](http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/). Students must follow the style manual recommended by their academic program. All work must be properly cited and permission to use copyrighted materials must be obtained prior to submission.

---

### About Third-Party Copyright

If your work contains material that has been copyrighted by another party, you may need to seek permission to use the material in your thesis or dissertation. Examples of materials for which you would need to seek copyright permission include but are not limited to: third-party software, images, graphics, large portions of text and maps. If copyright permission is needed, you must submit written approval for the use of the copyrighted material along with your thesis or dissertation.

---

### Substituting for Copyrighted Materials in Theses and Dissertations

The Graduate School encourages students to seek permission to use copyrighted material in their theses and dissertations. Your work is published after it is submitted in approved form to the Graduate School, and it will be available to audiences who wish to know more about the subject you investigate. The more full and complete the thesis or dissertation, the better the experience for your reader and therefore the better the response to the fruits of your hard work. However, if you are unable or unwilling to obtain copyright permission for some of the materials in your research, you may substitute for the copyrighted material as described below.

**Acceptable substitutions include:**

- Redrawing or tracing of maps, images, graphics, etc
- References to URLs, printed documents, or physical locations where the copyrighted material can be found

A student whose thesis or dissertation has had copyrighted material removed prior to submission must have his or her adviser sign a document reading:

[Student’s name] has removed copyrighted material from the copy of the thesis or dissertation submitted to the Graduate School for electronic publication. I certify that:

- I approve the thesis or dissertation in this form;
- The student has presented accurate information as to where the removed, copyrighted material can be found

Adviser’s name (signature line) Date (date line)
Submission Deadline for a Thesis or Dissertation Following Committee Approval

Each semester the Graduate School establishes semester deadlines for the Report of the Examining Committee (master’s & EdS students), Report Dissertation Defense (doctoral students), and submission of theses, dissertations and supplemental materials. Those deadlines may be found on the Graduate School’s page.

http://gradschool.missouri.edu/about/news-events/events/index.php

After successful defense of the thesis or dissertation, students must comply with their academic program’s and/or the International Center’s enrollment requirements.

Generally, based upon input from the thesis/dissertation committee, a student will make corrections to a thesis/dissertation. The student will prepare the final document and supplemental materials in the required format (http://gradschool.missouri.edu/policies/thesis-dissertation) and submit everything to the Graduate School by the semester deadline. In the event the student misses the current semester deadline, the student is required to submit the final dissertation or thesis by the end of the following semester after a successful defense. If an extension is needeed, the student’s advisor and program’s DGS must submit a request for an extension letter to the Graduate School Dean.

Submission Requirements and Forms

A thesis or dissertation must be presented before the deadline to the MU Graduate School on a high-quality CD. The thesis or dissertation must be contained in a Portable Document Format (PDF) file (http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/technology-ch7.php), with the appropriate margins and formatting. For the 2009-2010 academic year, the CD must be readable on a standard PC running Windows XP. Additional electronic files must be included (http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/supplements-cd-ch4.php) on the CD as PDF documents with the appropriate file name. If all files will not fit on one CD, a DVD or multiple CDs may be used, as long as no single file is split between CDs.

Paper Documents that Accompany the Electronic Submission

Several paper documents must be submitted with the CD, including the original signed Approval of the Committee page, paper copies of the Short Academic Abstract and Title Page, fees forms, release forms, and copyright agreement forms. See http://gradschool.missouri.edu/academics/thesis-dissertation/diss-thesis-guideline/supplemental-paper-materials/index.php for more information.

Review of Theses and Dissertations by the Graduate School

Before a manuscript can be accepted for publication in scholarly journals, it is examined by editorial board members, for conformance to specific format style guidelines in addition to validity of content. In much the same manner, MU Graduate School staff, acting as an editorial board, reviews every submitted thesis and dissertation for conformance to University guidelines. Failure to meet the appropriate standards will result in the rejection of your work.

Copies of Theses and Dissertations

The MU library catalogs all thesis and dissertations in the Merlin system. To locate a thesis or dissertation go to the Merlin search engine. Theses and Dissertations submitted Fall 2004 and later are available electronically from the MU Graduate School’s searchable Thesis and Dissertation Archive.

Specific Questions about MU Theses or Dissertations?

Specific questions should be directed to the academic advising staff of the MU Graduate School, 210 Jesse Hall, (573) 882-9575 or 1-800-877-6312.

Thesis and Dissertation Research Must be Open to Public Disclosure

Students are prohibited from using research (data, results, methods or other content) in their theses or dissertations that could restrict subsequent publication or public disclosure of these documents. Examples of restricted information include classified or proprietary materials. It is important to note that these restrictions do not apply to non-thesis or non-dissertation research that is approved by the student’s adviser and allowed by University of Missouri policies. Questions regarding the applicability of this policy to thesis or dissertation content should be referred to the MU Graduate School.

Transfer Admission from Other AVMA Accredited Schools (V)

Transfer students entering in the professional curriculum from other AVMA accredited veterinary schools: applications will be referred to the Committee on Admissions and Scholarship for recommendation to the Dean. Each case shall be handled on an individual basis. (CVM Executive Committee, 1986)

Transfer Credit and Degree Applicability

- Transfer from a Regionally Accredited Missouri College (p. 728)
- Transfer from a Community College (p. 728)
- Transfer Within the UM Systems (p. 728)
- Military Transfer Credits (p. 729)
- Transfer Students and University General Education Requirements (p. )

Credits and Transfers

After students are admitted to the University of Missouri (MU), an admissions evaluator will evaluate whether any college credit earned elsewhere is transferable to MU. Coursework being transferred from schools outside of Missouri may need faculty review, which can delay the evaluation process.

- Advanced Placement (http://admissions.missouri.edu/apply/ap-ib-and-college-credits/advanced-placement-program.php) credit is only awarded based on official score reports sent to MU directly from the College Board, and not based on scores reported on transcripts.
Questions should be directed to the MU Office of Admissions.

Transfer from a Regionally Accredited Missouri College

Students may transfer more than 64 credit hours of lower division courses from either Missouri associate degree-granting or baccalaureate degree-granting institutions. Any additional lower division course credits above 64 credit hours will be accepted in transfer if the credits are applicable to the baccalaureate degree or are prerequisites for an upper division course in the major, in accordance with the Missouri Coordinating Board's policy.

Transfer from a Community College

Community college courses can only have transferable equivalents at the 1000 or 2000 level. At no time can a community college course be the equivalent of a University of Missouri-Columbia course of 3000 or greater.

If a 2000 level course title from a community college is similar to a 3000 level title on this campus, that course can be an elective in that department at the 2000 level. Individual schools and colleges can waive the requirement for a student to take a course with similar or same title on this campus, however there will be no direct transfer equivalency.

If a college or department wants to accept a course from a community college as an equivalency to a course numbered 3000 or greater, they need to give that course a new number of less than 3000.

Courses from a community college can account for six of the last 36 credits, but only for students who have general education or other 1000-2000 level courses remaining for their degree. (The University is not prohibited from accepting community college credit for juniors and seniors if it is at the 1000-2000 level.)

Students may transfer more than 64 credit hours for lower division courses from either Missouri associate degree-granting or baccalaureate degree-granting institutions. Any additional lower division course credits above 64 credit hours will be accepted in transfer if the credits are applicable to the baccalaureate degree or are prerequisites for an upper division course in the major, in accordance with the Missouri Coordinating Board’s Handbook.

For additional information, contact the college or school from which the degree is sought or see Credits and Transfers (http://admissions.missouri.edu/apply/transfer/credits-and-transfers.php) information from the MU Office of Admissions (http://admissions.missouri.edu).

Articulation Agreements

Contact departmental advisors for information on articulation programs and agreements.

Associate of Arts Degree

An Associate of Arts degree (AA) is a two-year program that indicates the completion of a student’s lower-division education. It also is a specific transfer degree for entry, at the junior level, into the general range of baccalaureate degree programs offered by the University. Students transferring to MU from a regionally-accredited Missouri college or university with an AA degree and a certified 2.0 GPA will be accepted with junior standing. They will also have completed lower-division general education requirements if the AA degree consisted of at least 60 credits of college-level work. These 60 credits must include completion of an institutionally-approved, general-education program of not fewer than 39 credits.

Students holding the AA degree are admissible to MU, but are not necessarily admissible to specific programs. Some of the specific programs with specialized lower-division requirements are the colleges of Business, Education, Human Environmental Sciences and the schools of Health Professions, Journalism, Nursing and Social Work. The transfer requirements for all academic units may be found in this catalog on the degree specific pages. Students applying with an AA degree from another state will have their courses reviewed for equivalency on an individual basis.

Associate of Science Degree

An Associate of Science degree (AS) is a specialized degree intended for transfer into a specific, preprofessional program. Junior standing is guaranteed to the transfer student only if curricular details have been agreed on by MU and the institution granting the AS. Students who receive a specialized AS degree do not automatically qualify for junior standing in all MU programs. To enroll in some degree programs, students may have to take additional, general-education courses.

Students without Associate Degrees

Students transferring without associate degrees must meet regular MU transfer admission standards.

Transfer within the UM System

Students may transfer among campuses within the University of Missouri System. University of Missouri Policy states that "Any course that leads to an undergraduate degree on any campus of the University of Missouri
shall be accepted in transfer toward the same degree on each campus of the University offering said degree. Students transferring within the UM system are still required to satisfy the course and residency requirements of the campus from which they wish to graduate. Grades, including D and F grades, and grade points earned will also transfer and be included in the cumulative UM grade-point-average.

For more information contact the following offices:
University of Missouri - Columbia, Office of Admissions, 800-225-6075, mu4u@missouri.edu (%20mu4u@missouri.edu)
University of Missouri - Kansas City, Registration & Records Office, 816-235-1125, registrar@umkc.edu (%20registrar@umkc.edu)
Missouri University of Science and Technology, Registrar’s Office, 573-341-4181, registrar@mst.edu
University of Missouri - St. Louis, Office of the Registrar, 314-516-5545, registration@umsl.edu

Military Transfer Credits

Military veterans, with at least two years of honorable service are allowed to transfer military course credit. The transcript coursework must have been accredited by the American Council of Education (ACE). Veterans are advised to contact University Admissions regarding specific transfer credit policies. An exception to current transfer credit policies is that military veterans be allowed a maximum of 9 hours credit as general electives. This policy began with military veterans enrolled for the Fall 2010 semester.

Transfer Students and University General Education Requirements

All University, general-education requirements are considered completed for students who transfer to MU with an AA degree from a regionally-accredited Missouri institution. Transfer credits for other students are evaluated on a course-by-course basis. All students must complete University graduation requirements beyond the University general education requirements.

NOTE: Many departments, degrees and majors have more specific requirements for foundation course work in addition to the University, general-education requirement. However, the reverse is not true. Departments or academic units may not have fewer general education requirements than described by the University general education requirements. Careful planning will allow students to simultaneously meet University, general-education requirements and prepare for many of the more specific foundation courses required by their field of study.

Credit Toward LL.M. Requirements for Non-Law Courses/Transfer Credit

With approval of the Director of the LL.M. Program, students may apply to the LL.M. graduation requirements up to six (6) graduate credits of university or college courses from outside the MU School of Law. This limit includes independent study courses supervised by faculty in units other than the School of Law. Credit toward the LL.M. degree for a non-law school course will be granted only under the following conditions:

- The course must be a graduate-level course and clearly marked as such on the transfer transcript complete with credit hours and a grade. If taken at the University of Missouri-Columbia, it must be numbered 5000 or above.
- The transfer coursework is from a regionally accredited institution in the U.S. or an overseas institution that is recognized by its country’s Ministry of Education as a graduate degree-granting institution.
- The course must involve at least 14 class-hours per credit (based on 50-minute class-hours).
- The course must be related to the student’s program of study. Students must submit a copy of the course syllabus if possible.
- The semester hours of the non-law school course will be counted in the student’s total number for the semester.
- The grade must be B or higher.
- The transfer coursework is not online, extension or correspondence credit.

Normally, the Director of the LL.M. Program must approve the course in advance of the student’s work. In unusual situations, the Director of the LL.M. Program may approve application of credits earned within four (4) years prior to initial enrollment in the LL.M. Program if the credits were for work closely related to the student’s work in the LL.M. Program and were taken for graduate credit. Credits will not be applied from the student’s J.D. degree program or equivalent. A written request must be submitted to the Director of the LL.M. Program and include the following:

1. Institution, course name, number, and instructor;
2. Description how the course relates to the student’s program of study.

MU Course Work Required

MU requires that 30 of a student’s last 36 credits must be MU course work. Mizzou Online-Self Paced courses authored by MU faculty are acceptable as are courses offered for credit through Mizzou Online.

Credit Earned at Other Law Schools

A student may earn credits at another law school to be applied toward the JD graduation requirements of MU School of Law, on the following conditions:

1. No more than 31 semester credits may be so applied. Grades in courses taken at other law schools are reflected in the transcript. However, those grades do not calculate in the student’s grade point average.
2. The law school at which the credits are earned must be, at the time of the student’s work there, approved by the American Bar Association.

To participate in the UM System Visiting Graduate Student Program,
Withdrawal forms will normally be dated according to the date the request was first received with the following exception: When health or other critical circumstances constitute the reason for withdrawal, the dean may designate an earlier date to which academic rules will apply.

Withdraw from the University (L)

Formal withdrawal from MU is arranged through the Graduate School using a Notice of Withdrawal form that is signed by the Director of the LL.M. Program and the Dean of the Graduate School. If the student is making a C or better at withdrawal time, a grade of W is recorded. If the student is doing failing work at withdrawal time, a grade of F is recorded. Students are responsible for notifying their instructors of their intention to withdraw and for determining if their work qualifies for a W grade. Students who leave MU without filing a statement of formal withdrawal are given a grade of F in all courses. If the reason is so urgent that an official withdrawal cannot be obtained, the student should notify the LL.M. Program as soon as possible and officially request to be withdrawn.

Withdraw from the University (V)

An individual will be withdrawn from the university if they drop prior to the 2nd block of classes held during that semester. If the withdrawal occurs during the first three weeks of the first block of the semester, all courses are “dropped” and will be removed from the transcript. No grades will be assigned. If the withdrawal occurs during the first block but after the first 3 weeks the student will be withdrawn from the courses and grades of W or F will appear on the transcript. A notice of withdrawal form may be used for this purpose and individual classes do not have to be detailed on an Add/Drop form.

If the student completes the first block of courses and then subsequently is either dismissed or chooses to not continue in the remaining enrollment blocks the student will not be withdrawn from the university but instead will be either dropped or withdrawn from individual courses depending on when during the block the student chooses to drop.

Example 1:

Student A completes Block 1 and is dismissed from the university. The courses from Block 1 will remain on the transcript with grades but the student will be dropped from all subsequent terms since the student never attended those courses. The courses for the remaining blocks will be removed from her record, i.e. dropped.

Example 2:

Student B completes Block 1 and in the 4th week of Block 2 becomes ill and needs to withdraw. The courses from Block 1 will be posted with the grades she earned. The courses from Block 2 will also remain on the transcript with grades of either W or F.

Example 3:

Student C does not enroll in any courses for Block 1. During the first week of the 2nd block the student decides to withdraw. The student would be withdrawn from the university and because the withdrawal occurred within the first 3 weeks of the first block in which she was enrolled the courses would be dropped and therefore be removed from the transcript.
## Course Numbering System

<table>
<thead>
<tr>
<th>Course</th>
<th>Number</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basic skills courses</td>
<td>0000-0999</td>
<td>Courses that do not count toward degree requirements—primarily used for skill development.</td>
</tr>
<tr>
<td>Freshmen-level courses</td>
<td>1000-1999</td>
<td>Entry-level courses that have only skill development courses for course prerequisites. (Test scores, etc. are acceptable prerequisites.) Considered lower-division. Community college courses will be considered equivalent to this level.</td>
</tr>
<tr>
<td>Sophomore-level courses</td>
<td>2000-2999</td>
<td>Intended primarily for second-year or sophomore students who have the essential prerequisites or background. Considered lower-division. Community College courses will be considered equivalent to this level.</td>
</tr>
<tr>
<td>Junior/Senior-level courses (Upper Division)</td>
<td>3000-3999</td>
<td>Upper-division courses that may NOT be listed as cross level with 5000-8999. Intended primarily for third and fourth-year (juniors and seniors) students who have the essential prerequisites or background. Often restricted to students admitted to junior-level entry degree programs.</td>
</tr>
<tr>
<td>Junior/Senior-level courses (Upper Division)</td>
<td>4000-4999</td>
<td>Upper-division courses that may be listed as cross level with 5000-7999. Intended primarily for juniors and seniors. Note special sub-ranges for capstone, research and departmental honors courses.</td>
</tr>
<tr>
<td>Undergraduate Research courses</td>
<td>4950-4959</td>
<td>Upper-division, undergraduate research courses</td>
</tr>
<tr>
<td>Capstone courses</td>
<td>4970-4990</td>
<td>Courses that are both capstone and departmental honors courses.</td>
</tr>
<tr>
<td>Capstone/Honor courses</td>
<td>4991</td>
<td></td>
</tr>
<tr>
<td>Capstone/Reading courses</td>
<td>4992</td>
<td></td>
</tr>
<tr>
<td>Capstone/Internship courses</td>
<td>4993</td>
<td></td>
</tr>
<tr>
<td>Capstone/Research courses</td>
<td>4994</td>
<td></td>
</tr>
<tr>
<td>Extended Research &amp; Departmental Honors course</td>
<td>4995</td>
<td>Multiple term duration courses based on research</td>
</tr>
<tr>
<td>Departmental Honors courses</td>
<td>4996-4999</td>
<td>Used only for departmental honors courses. Include Dept. Honors in title or course description. No “H” is listed after the catalog number.</td>
</tr>
<tr>
<td>Professional-level courses</td>
<td>5000-6999</td>
<td>Professional-level courses for Law, Vet. Med and Medicine. Generally, not for undergraduate credit. May be listed as cross-level with 4000-4999 courses.</td>
</tr>
<tr>
<td>Beginning Graduate courses</td>
<td>7000-7999</td>
<td>Graduate-level courses for beginning and mid-level graduate students primarily. Generally not for undergraduate credit, but may be listed as cross-level with 4000-4999 courses.</td>
</tr>
<tr>
<td>Mid-level Graduate courses</td>
<td>8000-8999</td>
<td>Graduate-level courses intended primarily for mid-and upper-level graduate students. Not for undergraduate credit. May not be listed as cross-level with 4000-4999 courses.</td>
</tr>
<tr>
<td>Upper-level Graduate courses</td>
<td>9000-9999</td>
<td>Graduate-level courses intended primarily for upper-level graduate students. Not for undergraduate credit. May not be listed as cross-level with 4000-4999 courses.</td>
</tr>
</tbody>
</table>
“H” after a number indicates that it is an Honors course, approved by the Honors College for use toward Honors Certificate or University Honors. Not applicable to courses only designated for departmental honors.

Undergraduate Topics Courses

Final two digits represent the distribution category within the University requirements.

Guidelines for Cross-Listed and Cross-Level Courses

* Approved by Faculty Council February 13, 2003

Per the faculty approved policies, only 4000 and 7000 level courses may be cross-level listed. Courses that are cross-listed should be from different departments, but cover the same content, with matching course descriptions.

Cross-Listed Courses must:

- Be at the same level
- Cover the same content

Cross-Listed Courses may:

- Meet different general education requirements (i.e. social science for one and humanities for another)
- Not have the exact same number, but it is preferred that they do
- Have different additional fees. However, students may need to enroll in a specific course to meet a requirement and may or may not be allowed to substitute the cross-listed course to avoid the fee. There are limits on enrollment and space may not be available in the non-fee course or section.
- Exceptions: Fine art and music “skills” classes such as painting or drawing may have different levels meeting in the same room at the same time, such as 1000, 2000, etc. with the instructor requiring the appropriate additional quality and/or quantity of work for the respective level.

Cross-Level Courses:

- Only 4000 and 7000-level courses may be cross-level listed.
- The 7000-level course must require work appropriate for graduate credit and be approved as such by the Graduate Faculty Senate.

Courses that are not cross-level may not meet in the same room at the same time or near each other are the same time so that they attempt to “get around” this rule.

Glossary

Below are definitions of academic terms used throughout the University catalog. Additional terms used at MU can be found in the Mizzou Glossary. (http://glossary.missouri.edu)

**Academic Action:** Students who do not meet requirements for University academic standing requirements are subject to academic action, such as being placed on probation or being declared ineligible to enroll, which is often called dismissal. NOTE: Academic units may have more restrictive standards. (Also refer to Academic Standing and Satisfactory Progress for additional policy information.)

**Academic Plan:** A primary field of specialized study also referred to as a degree program or major.

**Academic Program:** The academic organization to which a student applies, is admitted, and ultimately graduates. These will, in most cases, correspond to schools and colleges.

**Academic Progress for Financial Aid:** Federal regulations require the University of Missouri to establish, publish, and apply standards of satisfactory academic progress (SAP) for financial aid eligibility. For detailed criteria, please visit Student Financial Aid’s website (http://financialaid.missouri.edu/eligibility/satisfactory-academic-progress.php).

**Academic Standing:** For further information see, Academic Policies: Academic Standing (p. 703).

**Academic Sub-plan:** An emphasis area or concentration within a specific academic plan.

**Academic Unit:** Colleges and schools are approved to offer degree programs or oversee degree or non-degree programs approved by the state Coordinating Board of Higher Education. Because the organization of these units varies across the campus, these entities are referred to as academic units, or AUs for short.

**Applied Course:** A course that is focused on the personal practice of the subject matter. Applied courses are typically found in music, art, and courses preparing for certain vocations.

**Audit:** A method of taking a course in which a student receives no grade or credit. Sometimes referred to as Hearer. See Academic Policies: Auditing a Course (Hearer (p. 704)).

**Basic Skills Courses:** Basic skills courses are considered remedial or preparatory for college level course work that follows. Credit hours for basic skills courses do apply toward minimums required for financial aid and grades earned in these courses show on the transcript and are averaged into the cumulative grade point average. However, credit hours earned in basic skills courses do NOT apply to the minimum number of hours required for a degree.

**Capstone Experience:** An academic activity that integrates general knowledge with the specialized knowledge each student has developed in the major area and, when appropriate, the related field.

**Certificate:** A program of study that requires completion of a minimum of 12 credits. It can be part of a degree program, may be completed in addition to a degree program, or may stand-alone. Officially approved Certificates are listed on transcripts.

**Commencement:** A ceremony in which students are recognized for degree completion. In May and December, each MU school and college holds commencement ceremonies for graduates, during which students walk across the stage and are recognized individually. Ceremonies are not held for summer session graduates; however, these students are invited to participate in May or December commencements.

**Consent Required:** Courses that require the permission of the instructor, department or division. Also referred to as permission required.

**Corequisite:** A course or requirement that must be met prior to or concurrent with enrolling in a course. Exceptions may be made with permissions.

**Core Requirements:** The basic, required courses or standards that students must meet for a given major, degree, minor, emphasis or concentration.

**Course Components:** A portion or part, (i.e. subset) of a course.

- **Lecture/Standard (LST):** Faculty delivered instruction to multiple students often in, but not always, a classroom setting. A lecture or standard class is the primary portion of the course that is often delivered face to face, but does not have to be. It may be presented on-line or via other delivery methods. While it is usually presented in a small or large group setting led by a faculty member the course might also be very interactive and include group activities. It may be offered in a traditional lecture format, a seminar format, sections with group interaction, etc.

- **Discussion (DIS):** A small group that meets to discuss topics introduced in a related lecture to supplement the instruction and allow for discussion.

- **Lab (LAB):** A class or the “practice” portion of a course in which experimentation, class projects or other exercises or skills conjunction with material presented, are performed.

- **Individual Study (IST):** One-on-one instruction allowing for greater individualized learning and self direction. Individual study may be directed studies that are based upon an agreed upon topic between instructor and student. Titles may include but are not limited to research, problems and readings.

- **Lesson (LES):** Typically a musical or other performance art instruction delivered one-on-one or in a small group.

- **Studio (STU):** Hands-on, interactive, project-oriented instruction that is delivered one-on-one or in a small group. May apply to art, architectural studies, textile and apparel management, broadcast media, film creation, and communication instruction.

- **Exam-only (EXM):** Graduate student enrollment required to complete the final, comprehensive examination.

- **Internship/Externship (IXT):** Provides opportunity for students to gain experience in their field outside the classroom. Instruction is hands-on, experimental learning that may require additional research and written assignments. Titles may include, but are not limited to, preceptorships, clinical, practicums.

- **Field Study (FLD):** Off-campus, hands-on instruction directed by a faculty member with one or more students. Typically part of science and social science, as well as some humanities instruction.

**Credit by Exam:** Credit earned by passing advanced-standing examinations in a subject-matter field. Examinations can include: departmental exams, CLEP subject-matter exams and International Baccalaureate and Advance Placement exams given by the College
Entrance Examination Board of Princeton, N.J. See Academic Policies: Advanced Standing - Credit By Exam. (p. 703)

Credit: One credit represents approximately three hours of a student's time each week for one semester. This may mean one hour in lecture or standard classroom instruction, in addition to two hours spent in preparation. According to State of Missouri policy, a credit hour is a permanently transcripted instructional activity in which one semester credit hour shall consist of a minimum of 750 minutes (for example, 15 weeks x 50 minutes per week) of classroom experiences, such as lecture, discussion, or similar instructional approaches, or a minimum of 1,500 minutes of such experiences as laboratory, studio or equivalent experiences. Both of the above are exclusive of registration and final examination time. Greater amounts of supervised practicum or internship instruction are normally required to be the equivalent of one credit. (Also referred to as Units.)

Cross-level Course: A cross-level course is a course offered at both the undergraduate and the graduate level. Undergraduate students enroll in a course numbered in the 4000 range and graduate students enroll in a course numbered in the 7000 range. Lectures and discussions may be held jointly, but different graduate level work will be required of students in the 7000-level courses. (They are also referred to as combined sections.)

Cross-listed Course: A course that is considered the same as, and often may meet with a section of, another course with a different curricular abbreviation and possibly a different course number. (They are also referred to as combined sections.)

Curriculum: An organized program of study arranged to provide integrated cultural or professional education.

Curriculum Designator (Subject Area): A specific area of instruction within an academic organization. These are the subject matter headings that appear in the Course Catalog and the Schedule of Classes.

Dean’s Signature: The dean’s signature is the mark of approval for certain academic actions, such as approvals to withdraw at certain points in the term. Usually a “dean’s signature” refers to a stamped signature from the academic advising office within the academic unit. A dean’s signature may also be the signature of the dean or associate dean of the college or school. When instructions indicate that a student should obtain a dean’s signature for approval of a process, students should first inquire in the academic advising office for their degree program.

Degree: A formal award or title conferred upon an individual for the completion of a program or courses of study.

Degree Audit Report: MU uses a degree audit system called DARS for short, which tracks degree programs. Many academic units and departments use these reports to assist in advising students. Students may look at their own DARS reports using myZou.

Degree Program: A primary field of specialized study also referred to as a major or academic plan.

Discipline: A branch of learning or field of study (e.g., mathematics, history or psychology).

Dual Degree (undergraduate): A student may be granted two baccalaureate degrees if all requirements for both degrees have been met and the student has completed at least 12 semester hours of course work beyond that required for the first degree. See Faculty Handbook (http://facultycouncil.missouri.edu/handbook/article-9.html)

Emphasis Area: A sub-area of specialized study within a major that has been formally approved. Emphasis areas are printed on students' transcripts.

General Education (University): The MU Faculty has developed a comprehensive program of University general education course work that equips students with the skills, knowledge and foundations in the disciplines required of all informed citizens. All MU students must satisfy University general education requirements as a part of their undergraduate degrees. See General Education Requirements. (p. 18)

GPA of Record: The GPA stands for grade point average. A GPA of record is the official GPA. See Academic Policies: Grades. (p. 713)

Graded Course: A course in which credit is awarded if successfully completed. A course in which a student has enrolled as a “Hearer/Auditor” is not regarded as a graded course for that student.

Grading Basis: The grading system used to assign a grade. See Academic Policies: Grades (p. 713).

Graduation: Graduation is the completion of all degree requirements, as recorded on the official transcript, and the conferring of a diploma.

Honors Course-Departmental: See Academics at MU: Course Numbering section (p. 731). Catalog number is not followed by an “H”.

Honors Course-General: A course limited to honors-eligible students. Course has been approved by Honors college for use towards Honors Certificate or University Honors. Catalog number is followed by an “H”.

Honors Eligibility: See Undergraduate/Graduate: Honors College (p. 679) for more information.

Instructional Mode: The dominant delivery method of instruction of the class content.

• Traditional (TR): No online technology used -- content is delivered in writing or orally. May have a video of the class that is used during the initial delivery and viewed later. Course attributes should indicate this.

• Web Facilitated (WF): Includes face-to-face instruction. Includes those courses in which zero to 29 percent of the content is delivered online. May have a video of the class that is used during the initial delivery and viewed later. Course attributes should indicate this.

• Blended class instruction (BL): Defined as having between 30 percent and 80 percent of the course content delivered online. It is sometimes called hybrid.

• On-line (OL): A course where most or all (80% or greater) of the content is delivered online. Typically these sections have no face-to-face meeting, but there may be some or face-to-face exams, etc.

• E-Learning (EL): A course where 100% of the content is delivered online. (May have proctored exams)

Interdisciplinary: A course of study that combines two or more academic disciplines.

Location: An indication of where a student is taking a course for billing and informational purposes.

Lower Division: Undergraduate courses numbered less than 3000.

Major: A primary field of specialized study also referred to as a degree program or academic plan.

Minor: A secondary field of specialized study that does not lead to a degree. A minor will be noted on the transcript by not on the diploma.
**Mizzou Online:** Mizzou Online partners with academic units to develop, market, and deliver programs and courses designed for distance students.

**Mizzou Online-Self Paced:** Students may enroll in self-paced, online courses year-round, (minimum six weeks, maximum nine months) and complete coursework at their own pace. Students with 60 or more approved credit hours may complete a bachelor of general studies degree online.

**Mizzou Online-Semester Based:** Semester-based courses have specific start and end dates and follow the University semester calendar. Students participate with other students and instructors in the courses and have assignment due dates and deadlines. Enrollment periods are the same as campus sections.

**myZou:** MU's online student information system.

**Option:** A track or other portion of a major that may be required or optional. A separate designation is not made on the transcript or diploma for an option or track.

**Prerequisite:** A course or requirement that must be met prior to enrolling in a course. Exceptions may be made with permissions.

**Readmission:** See Admissions Office (http://admissions.missouri.edu/apply/re-admission) for information on the readmission process and standards.

**Recommended course:** A course that is beneficial or preferred for the student to have taken before enrolling in a subsequent course. It is a strong suggestion, but not a requirement.

**Registration:** The act of enrolling in classes for a given semester or term. At the University of Missouri, registration refers to the process in which students select course work for a term and, reserve spaces (enroll) in the courses in the University's computer system. This may be done through myZou.

**Repeat for Credit:** Courses that may be taken more than once for credit (e.g., music performance courses.)

**Satisfactory Progress towards degree:** The time progression in meeting the requirements of the student's established educational objective, typically, the completion of a degree program. Satisfactory progress is based on two concepts:

- Minimum number of credits completed expressed as a percentage of total credits attempted
- Maximum time to complete the degree as expressed by a total number of credits attempted

The term may also refer to financial aid requirements. See Financial Aid (http://financialaid.missouri.edu).

**Second Undergraduate Degree:** Some academic units will admit students who have already earned one undergraduate degree to pursue a different degree program. Ordinarily students who enroll for a second degree are expected to meet requirements in place at the time of beginning work of the second degree instead of requirements in place at the beginning of work on the first degree.

**Sequence of Courses:** Two or three closely related courses that must be taken in specified order.

**Session:** A class scheduling/enrollment control time period within an academic term.

**Student Center (myZou):** The page in myZou where a student can view a synopsis of all their information. (i.e. schedule, service indicators, enrollment dates, financial information.)

**Student Level:** Students are assigned to a particular class level based upon the number of credits they have completed. (i.e. freshmen, sophomore, junior and senior.) See Academic Policies: Student Level (p. 726).

**Track:** An option or other portion of a major that may be required or optional. A separate designation is not made on the transcript or diploma for an option or track.

**Upper Division:** Undergraduate courses numbered 3000-4000.

**Variable Credit (Units):** For some courses, the student may choose the number of credits.

**Waive:** To waive a requirement is to set it aside without credit. In other words, if a requirement is waived for a student that student does not have to meet the requirement, but no credit hours are earned. For example, an international student pursuing a BA degree in the College or Arts and Science has the foreign language requirement waived but will not receive academic credit for his/her native language.
Course Offerings

- A
  - Accountancy (ACCTCY) (p. 740)
  - Aerospace Studies (AERO) (p. 745)
  - Agricultural Economics (AG_EC) (p. 746)
  - Agricultural Ed Leadership (AG_ED_LD) (p. 751)
  - Agricultural Systems Management (AG_S_M) (p. 755)
  - Agriculture, Food and Natural Resources (AFNR) (p. 758)
  - Anesthesiology (ANESTH) (p. 759)
  - Animal Science (AN_SCI) (p. 760)
  - Anthropology (ANTHRO) (p. 766)
  - Arabic (ARABIC) (p. 778)
  - Architectural Studies (ARCHST) (p. 778)
  - Art History And Archaeology (AR_H_A) (p. 785)
  - Art-Ceramics (ART_CERM) (p. 793)
  - Art-Drawing (ART_DRAW) (p. 794)
  - Art-Fibers (ART_FIBR) (p. 795)
  - Art-General (ART_GNRL) (p. 795)
  - Art-Graphic Design (ART_GRDN) (p. 798)
  - Art-Painting (ART_PNT) (p. 800)
  - Art-Photography (ART_PHOT) (p. 800)
  - Art-Printmaking (ART_PRNT) (p. 801)
  - Art-Sculpture (ART_SCUL) (p. 801)
  - Astronomy (ASTRON) (p. 802)
  - Athletic Training (ATHTRN) (p. 803)
  - Atmospheric Science (ATM_SC) (p. 805)

- B
  - Biochemistry (BIOCHM) (p. 808)
  - Biological Engineering (BIOL_EN) (p. 812)
  - Biological Sciences (BIO_SC) (p. 818)
  - Biomedical Sciences (BIOMED) (p. 827)
  - Black Studies (BL_STU) (p. 831)
  - Business Administration (BUS_AD) (p. 838)

- C
  - Cardiopulmonary Diagnostic Sciences (CPD) (p. 839)
  - Chemical Engineering (CH_ENG) (p. 840)
  - Chemistry (CHEM) (p. 844)
  - Child Health (CH_HTH) (p. 850)
  - Chinese (CHINESE) (p. 852)
  - Civil Engineering (CV_ENG) (p. 853)
  - Classical Humanities (CL_HUM) (p. 866)
  - Classics (CLASS) (p. 871)
  - Clinical Laboratory Sciences (CL_L_S) (p. 872)
  - Communication (COMMUN) (p. 874)
  - Communication Science And Disorders (C_S_D) (p. 880)
  - Computer Science (CMP_SC) (p. 884)

- D
  - Dermatology (DERM) (p. 893)
  - Diagnostic Medical Ultrasound (DMU) (p. 894)

- E
  - Economics (ECONOM) (p. 897)
  - Education Honors (EDUC_H) (p. 905)
  - Educational Leadership and Policy Analysis (ED_LPA) (p. 905)
  - Educational, School and Counseling Psychology (ESC_PS) (p. 911)
  - Electrical And Computer Engineering (ECE) (p. 922)
  - Emergency Medicine (EMR_ME) (p. 934)
  - Engineering (ENGINE) (p. 935)
  - English (ENGLISH) (p. 936)
  - English Language Support Program (ELSP) (p. 954)
  - Environmental Science (ENV_SC) (p. 954)
  - Environmental Studies (ENV_ST) (p. 957)

- F
  - Family And Community Medicine (F_C_MD) (p. 957)
  - Film Studies (FILM_S) (p. 960)
  - Finance (FINANC) (p. 964)
  - Fisheries And Wildlife (F_W) (p. 968)
  - Food Science (F_SC) (p. 973)
  - Forestry (FOREST) (p. 978)
  - French (FRENCH) (p. 982)

- G
  - General Human Environmental Sciences (GN_HES) (p. 988)
  - General Studies (G_STDY) (p. 988)
  - Geography (GEOG) (p. 988)
  - Geology (GEOL) (p. 995)
  - German (GERMAN) (p. 1002)
  - Graduate School (GRAD) (p. 1007)
  - Greek (GREEK) (p. 1008)

- H
  - Health Management and Informatics (HMI) (p. 1011)
  - Health Professions (HTH_PR) (p. 1013)
  - Health Sciences (HLTH_SCI) (p. 1014)
  - Hebrew (HEBREW) (p. 1016)
  - History (HIST) (p. 1016)
  - Honors-General (GN_HON) (p. 1033)
  - Hospitality Management (HSP_MGMT) (p. 1036)
  - Human Development And Family Studies (H_D_FS) (p. 1039)

- I
  - Industrial And Manufacturing Systems (IMSE) (p. 1051)
  - Information Science And Learning Technologies (IS_LT) (p. 1056)
  - Information Technology (INFOTC) (p. 1061)
  - Integrative Neuroscience (NEUROSCI) (p. 1063)
  - Interdisciplinary Studies (INTDSC) (p. 1063)
  - Internal Medicine (IN_MED) (p. 1064)

**Accountancy (ACCTCY)**

**ACCTCY 2010: Introduction to Accounting**

Introduction to accounting for non-business majors. Emphasis on introducing students to business operations, as well as preparing and
using management information and financial accounting information for business decisions (does not count as either ACCTCY 2036 or ACCTCY 2037).

**Credit Hours:** 3

**ACCTCY 2026: Accounting I**
An introduction to the field of accounting, this course covers the fundamentals of financial accounting. Business students at UMC must have advisor's approval. Credit may not be earned for both ACCTCY 2026 and ACCTCY 2036. Course only offered through Mizzou Online (self paced). Prerequisites: Sophomore Standing

**Credit Hours:** 3

**ACCTCY 2027: Accounting II**
This course covers the fundamentals of managerial accounting and additional topics in financial accounting. Business students at UMC must have advisor's approval. Credit may not be earned for both ACCTCY 2027 and ACCTCY 2037. Course only offered through Mizzou Online (self paced).

**Credit Hours:** 3

**Prerequisites:** ACCTCY 2026

**ACCTCY 2036: Accounting I**
First half of two-part course focusing on the business environment and the use of managerial and financial accounting information for decision making in various business settings. Emphasizes the use of accounting information about a retail company (sole proprietorship) by internal and external users, followed by an introduction to other forms of business and, then, planning for corporate operations.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing

**ACCTCY 2037: Accounting II**
Second half of two-part course focusing on the business environment and the use of managerial and financial accounting information for decision making in various business settings. This half emphasizes the use of accounting information about a manufacturing company (corporation) by internal and external users.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 2036 or ACCTCY 2136H

**ACCTCY 2136H: Honors Accounting I**
First part of two-part course focusing on the nature and use of managerial and financial accounting information for decision making in various business settings. Emphasizes use of accounting information by internal and external users.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing in Accounting or Business, 3.3 or higher GPA. Honors eligibility required

**ACCTCY 2137H: Honors Accounting II**
Continuation of Accountancy 2136H.

**Credit Hours:** 3

**Prerequisites:** C or better ACCTCY 2136H. Honors eligibility required

**ACCTCY 2258: Computer-Based Data Systems**
Introduces the computer as a tool in the efficient operation of a business. Skills developed in the course include electronic information retrieval, information analysis using a spreadsheet, what-if analysis macro development, and information presentation. In addition, computer components, data storage, networks, and information technology are discussed.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 2036 or ACCTCY 2136H

**ACCTCY 3326: Financial Accounting Theory and Practice I**
Institutional structure, conceptual framework, and reporting standards and practices of financial accounting, with special emphasis on accounting for assets.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 2037 or ACCTCY 2137H

**ACCTCY 3328: Accounting Information Systems**

**Credit Hours:** 3

**Prerequisites:** ACCTCY 2258

**ACCTCY 3346: Financial Accounting Theory and Practice II**
Continuation of Accountancy 3326, with special emphasis on income recognition and accounting for liabilities and ownership equity.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 3326

**ACCTCY 3347: Cost and Managerial Accounting**
Activity based and traditional job order and process cost systems for service, merchandising, and multinational manufacturing companies; Cost accounting techniques and procedures for financial reporting by multinational companies. Strategic focus to management accounting measurement and reporting. Standard costs and variances, capital budgeting.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 2037 or ACCTCY 2137H and ACCTCY 2258

**ACCTCY 4000: Accountancy Professional Speakers and Symposia**
This non-credit course, recommended for all accountancy majors, will provide exposure to issues in the accounting profession through professional speaker series and symposia. Components will include the Dawdy Speaker Series, Orin Ethics Symposium, and Symposia delivered by accounting firms and/or professional accounting organizations.

**Credit Hours:** 0

**Prerequisites:** ACCTCY 2036, ACCTCY 2037, and ACCTCY 2258; Accountancy Majors. This will be a non-credit, non-billed, no hours course
ACCTCY 4301: Topics in Accounting
Independent investigations, reports on approved topics.
Credit Hour: 1-3
Prerequisites: instructor’s consent

ACCTCY 4353: Introduction to Taxation
Introduction to the structure and conceptual foundation of the U.S. federal income tax system for individual taxpayers. Topics include income recognition, deductions, property transactions, trusts, and family wealth planning. This course also introduces students to legal tax research and preparation of individual income tax returns.
Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H. Restricted to TCoB professional program students only

ACCTCY 4356: Financial Accounting Concepts
Current issues in the financial reporting of business corporations to external parties.
Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H. Not open to accountancy majors

ACCTCY 4365: Governmental Accounting and Budgeting
Introduction to government and not-for-profit accounting. Concepts and principles of fund accounting, budgeting, auditing, and financial reporting in government and not-for-profit entities.
Credit Hours: 3
Prerequisites: ACCTCY 3326

ACCTCY 4373: Taxation of Business Entities
The course focuses on federal tax laws related to various business entities which include (C Corporations, Partnerships and S Corporations) and their owners. We will follow the life cycle of these business entities and discuss the tax issues involved with the formation, operation, distribution to owners, liquidations, and sales of interest to other owners of each type of business entity. Graded on A-F only. Prerequisites: ACCTCY 4353 or ACCTCY 7353
Credit Hours: 3

ACCTCY 4384: Auditing Theory and Practice I
Introduction to the auditing profession, assurance function, and generally accepted standards for conducting audits.
Credit Hours: 3
Prerequisites: ACCTCY 3328 and ACCTCY 3346

ACCTCY 4940: Professional Accounting Internship
Provides full-time professional accounting work experience of at least eight weeks duration. Graded on S/U basis only.
Credit Hour: 3-6
Prerequisites: Completion of first 105 hours of 150-hour accountancy curriculum (or equivalent) and consent of Internship Coordinator

ACCTCY 7000: Accountancy Professional Speakers and Symposia
(cross-leveled with ACCTCY 4000). This non-credit course, recommended for all accountancy majors, will provide exposure to issues in the accounting profession through professional speaker series and symposia. Components will include the Dawdy Speaker Series, Orin Ethics Symposium, and Symposia delivered by accounting firms and/or professional accounting organizations. Graded on S/U basis only.
Credit Hours: 0
Prerequisites: ACCTCY 2036, ACCTCY 2037, and ACCTCY 2258; Accountancy Majors. This will be a non-credit, non-billed, no hours course

ACCTCY 7310: Accounting for Managers
Introduction to understanding how accounting information is used to help make informed decisions in various business settings. Includes an introduction to basic financial and management accounting concepts and procedures.
Credit Hours: 3
Prerequisites: MBA or MSPA candidate, or departmental consent

ACCTCY 7353: Introduction to Taxation
Introduction to the structure and conceptual foundation of the U.S. federal income tax system for individual taxpayers. Topics include income recognition, deductions, property transactions, trusts, and family wealth planning. This course also introduces students to legal tax research and preparation of individual income tax returns.
Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H

ACCTCY 7356: Financial Accounting Concepts
Current issues in the financial reporting of business corporations to external parties. Not open to accountancy majors.
Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 7310

ACCTCY 7365: Governmental Accounting and Budgeting
Introduction to government and not-for-profit accounting. Concepts and principles of fund accounting, budgeting, auditing, and financial reporting in government and not-for-profit entities.
Credit Hours: 3
Prerequisites: ACCTCY 3326

ACCTCY 7384: Auditing Theory and Practice I
Introduction to the auditing profession, assurance function, and generally accepted standards for conducting audits.
Credit Hours: 3
Prerequisites: ACCTCY 3328 and ACCTCY 3346

ACCTCY 7940: Professional Accounting Internship
Provides full-time professional accounting work experience of at least eight weeks duration. Graded on S/U basis only.
Credit Hour: 3-6
Prerequisites: Completion of undergraduate portion of 150 hour program (or equivalent) and consent of Internship Coordinator
ACCTCY 8358: Systems Analysis and Design
Modern information systems analysis and design, focusing on business process modeling.
Credit Hours: 3
Prerequisites: ACCTCY 2258
Recommended: CMP_SC 1001 or CMP_SC 1050

ACCTCY 8363: Multi-Jurisdictional Tax
This course takes a practical approach to exploring multistate and international tax concepts by focusing on tax issues that can arise as a company expands from a single business location into a multinational corporation. Part 1 of this course focuses on the economic, political, and constitutional constraints imposed on state and local taxation, including the due process clause, the commerce clause and state uniformity and equality clauses. Part 2 of the course includes a survey of state and local tax laws, with a particular emphasis on the imposition of sales and use taxes and the allocation and apportionment of state income taxes. Part 3 of the course surveys principals of international taxation, including U.S. taxation of the foreign investments or activities of U.S. taxpayers (outbound) and U.S. taxation of the U.S. activity or investments of foreign taxpayers (inbound). Prerequisites: ACCTCY 4353
Credit Hours: 3

ACCTCY 8373: Taxation of Corporations and Shareholders
Life cycle of a corporation including formations, operations, distributions, and liquidations of corporations.
Credit Hours: 3
Prerequisites: ACCTCY 4353 or ACCTCY 7353

ACCTCY 8383: Taxation of Flow-Through Entities
This course covers formations, operations, distributions, and liquidations of partnerships and S-Corporations. Course graded on A-F basis only.
Credit Hours: 3
Prerequisites: ACCTCY 4353 or ACCTCY 7353

ACCTCY 8393: Taxation of Trust, Gifts and Estates
This course covers two main topics. Students are introduced to the construction, operation and income taxation of trusts. After this portion of the course students will learn about the gift tax consequences of completed exchanges. Finally, students will learn the basic rules regarding the estate tax. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ACCTCY 4353 or ACCTCY 7353

ACCTCY 8401: Topics in Accounting
Independent investigations, reports on approved topics.
Credit Hour: 1-3
Prerequisites: instructor’s consent

ACCTCY 8404: Internal Auditing
This course covers the concepts, practices, and application of internal audit activities. The course will review the entire internal audit process including annual audit and engagement planning, fieldwork, reporting, and management communication. Other topics including internal controls, enterprise risk management, and key behavior skills will be discussed. The Professional Practices Framework and industry best practices will be incorporated throughout the semester. This course will prepare students for entry-level internal audit positions. Graded A-F only.
Credit Hours: 3
Prerequisites: ACCTCY 4384 or ACCTCY 7384

ACCTCY 8408: Advanced Accounting Information Systems
Emerging concepts and technologies in accounting information systems, with an emphasis on E-Business.
Credit Hours: 3
Prerequisites: ACCTCY 3328

ACCTCY 8414: Information Systems Assurance and Control
A combination of control theory, concept application, demonstration of actual practice, and student research to develop an understanding of the concepts and practices used in the design, development or assurance of information systems (IS) controls.
Credit Hours: 3
Prerequisites: ACCTCY 3328, and ACCTCY 4384 OR ACCTCY 7384

ACCTCY 8419: International Accounting
Introduction to accounting regulations and practices outside of the U.S., accounting regulations for foreign registrants on the NYSE and NASDAQ, international accounting standards and international management control issues. Review of cultural frameworks; transfer pricing methods and international accounting standards.
Credit Hours: 3
Prerequisites: ACCTCY 3346 and ACCTCY 3347

ACCTCY 8423: Tax Research and Planning
Applied tax research using print and electronic data bases; heuristic biases in tax judgments; responsibilities of professional tax practices.
Credit Hours: 3
Prerequisites: ACCTCY 8373 (or concurrent enrollment in ACCTCY 8373)

ACCTCY 8424: Fraud Examination
A study of the methods and techniques of fraud examination, particularly with regard to frauds perpetrated by the company against the public. The ethical and professional standards that underlie the accountant’s responsibility for fraud detection and prevention are emphasized. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ACCTCY 4384 or ACCTCY 7384

ACCTCY 8425: Accounting for Governments and Other NonProfit Entities
Role of accounting information in planning, managing, and controlling nonbusiness organizations; reporting to external parties; concepts of governmental auditing.
Credit Hours: 3
Prerequisites: ACCTCY 4365 or ACCTCY 7365 or instructor’s consent
ACCTCY 8428: Data Warehousing and Data Mining
Enterprise-wide view of data and transaction processing. Concepts and techniques of data warehousing and data mining of business-critical data.

Credit Hours: 3
Prerequisites: ACCTCY 3328 or departmental consent

ACCTCY 8434: Applications of Auditing Concepts
Application of auditing concepts and techniques in various phases of audit engagements.

Credit Hours: 3
Prerequisites: ACCTCY 4384

ACCTCY 8436: Financial Accounting Theory and Practice III
Continuation of Accountancy 3346. Addresses a series of special financial accounting topics including income taxes, pensions, leases, business combinations, consolidated statements, and foreign currency translation.

Credit Hours: 3
Prerequisites: ACCTCY 3346

ACCTCY 8437: Strategic Cost Analysis
Analysis to support organizational strategy including cost management, performance evaluation, and control of responsibility centers.

Credit Hours: 3
Prerequisites: ACCTCY 3347, MATH 1320 and STAT 3500, or the equivalent

ACCTCY 8438: Forensic Accounting
Coverage of forensic accounting processes and tools used in the detection and prevention of fraud against the company. Topics include skimming, cash larceny, check tampering, billing schemes and others. An emphasis of the course will be upon the use of computer aids. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ACCTCY 3328, ACCTCY 4384 or ACCTCY 7384

ACCTCY 8444: Advanced Audit
The Advanced Auditing course helps students develop a better understanding of the audit environment and gives them the opportunity to gain hands-on experience planning for an audit engagement, performing test work, and completing an audit engagement. The course also addresses additional topics not covered in detail in the Audit Theory and Practice I course, including inventory observation, legal liability issues faced by auditors today, the regulatory environment, professional responsibilities of auditors, preparing appropriate documentation for audit engagements, providing required communications to clients, and performing Single Audits. The course is designed to encourage open discussions of cases and current issues and provide learning opportunities for the students. The class meetings and assignments are designed to improve the student’s critical thinking skills, communication skills, and team-building skills.

Credit Hours: 3
Prerequisites: ACCTCY 4384 or ACCTCY 7384

ACCTCY 8446: Application of Financial Accounting Pronouncements
Development, content and application of authoritative pronouncements in financial accounting. Problems and case studies.

Credit Hours: 3
Prerequisites: ACCTCY 8436

ACCTCY 8448: Emerging Issues in Accounting Information Systems
Current developments in the implementation of accounting information systems. Topics may vary.

Credit Hours: 3
Prerequisites: ACCTCY 8408

ACCTCY 8450: Accounting and Strategic Business Analysis
Capstone course in the Master of Accountancy program. Emphasis on case analysis to develop critical thinking and analytical skills in the use of accounting reports for broad-based business analysis.

Credit Hours: 3
Prerequisites: ACCTCY 3346 or equivalent

ACCTCY 8453: Taxes and Business Strategies
This class examines the role taxes in business decisions. The analysis involved considers 1) tax consequences of all parties to a transaction, 2) both explicit and implicit taxes, and 3) tax as well as non-tax costs.

Credit Hours: 3

ACCTCY 8456: Corporate Governance
Corporate governance has taken on new prominence in light of the accounting scandals of the early 2000’s (e.g., Enron) and the new regulatory regime of Sarbanes-Oxley. As a result, corporations, investors, auditors, and others are paying more attention to corporate governance. This course will familiarize students with corporate governance mechanisms and how they interact with financial reporting. This course should appeal to students pursuing careers in auditing, finance, management, as well as anyone seeking a deeper understanding of relations between financial reporting and corporate governance.

Credit Hours: 3
Prerequisites: ACCTCY 8436

ACCTCY 9090: Research in Accounting
Each student is under direction and guidance of an accountancy professor in writing a dissertation. Periodic seminars discuss research projects. Graded on a S/U basis only.

Credit Hour: 1-99
Prerequisites: doctoral candidacy and instructor’s consent

ACCTCY 9401: Doctoral Research Problems in Accounting
Independent investigations, reports on approved topics. Restricted to Doctoral level students only

Credit Hour: 1-3
Prerequisites: instructor’s consent and director’s consent
ACCTCY 9444: Seminar in Auditing Research
The economic role of auditing; the audit process; audit reports and the consequences of auditing on financial statements; new audit directions and perspectives.

Credit Hours: 3
Prerequisites: doctoral candidacy or instructor’s consent

ACCTCY 9455: Seminar in Governmental and Nonprofit Accounting
Critical review of the governmental and nonprofit accounting research literature, with emphasis on auditing issues and research methods.

Credit Hours: 3
Prerequisites: doctoral candidacy or instructor’s consent. ACCTCY 4384 or ACCTCY 7384 and ACCTCY 4365 or ACCTCY 7365

ACCTCY 9457: Quantitative Methods in Accounting
Application of mathematics and statistics to managerial and financial accounting problems.

Credit Hours: 3
Prerequisites: ACCTCY 3347, MATH 1300 and MATH 1320 and STAT 3500, or instructor’s consent

ACCTCY 9460: Research Methods in Accounting
Application of research methods to the investigation of current accounting issues. A research paper is required.

Credit Hours: 3
Prerequisites: doctoral candidacy or instructor’s consent

ACCTCY 9466: Seminar in Financial Accounting Research
Theory of financial accounting and regulated disclosure; empirical tests of financial accounting theory, with emphasis on the nature of the research question addressed, and the method used to address the research question.

Credit Hours: 3
Prerequisites: doctoral candidacy or instructor’s consent

ACCTCY 9467: Seminar in Behavioral Accounting Research
Critical review of the Behavioral accounting research literature with emphasis on issues and research methods.

Credit Hours: 3
Prerequisites: doctoral candidacy and instructor’s consent

ACCTCY 9468: Seminar in Information Systems Research
Overview of research related to advanced systems and how accounting information is processed, with emphasis on current issues and research methods.

Credit Hours: 3
Prerequisites: doctoral candidacy or instructor’s consent

Aerospace Studies (AERO)

AERO 1100: The Foundations of the United States Air Force
Introduces the Air Force and Air Force ROTC. Topics include professional appearance, military customs and courtesies, core values, equal opportunity and treatment, officer opportunities, group leadership problems. Applies communicative skills. Leadership lab.

Credit Hours: 2

AERO 1200: The Foundations of the United States Air Force
Continues the introduction to the Air Force and Air Force ROTC. Topics include Air Force origins, organizations, major commands, installations, sister services (Army and Navy), group leadership problems. Applies communicative skills. Leadership lab.

Credit Hours: 2

AERO 2100: The Evolution of USAF Air and Space Power
A survey course designed to facilitate the transition from Air Force ROTC cadet to Air Force ROTC officer candidate. Explores Air Force heritage, Air Force leaders and Air Power doctrine. Applies communicative skills. Leadership lab.

Credit Hours: 2

AERO 2200: The Evolution of USAF Air and Space Power
Continues the examination of air and space power from the Vietnam era through the present. Topics include the Vietnam War, the Persian Gulf War, and overseas contingency operations. Applies communicative skills. Leadership lab.

Credit Hours: 2

AERO 3100: Air Force Leadership Studies
An integrated leadership and management survey course emphasizing development of the individual as an Air Force leader. Special topics include situational leadership, principle centered leadership, corrective supervision and counseling. Leadership lab.

Credit Hours: 3

AERO 3200: Air Force Leadership Studies
Air Force leadership principles are examined from the foundation developed in AERO 3100. Ethical decision making, personal core values, and character development are discussed. Military evaluation systems are outlined. Leadership lab.

Credit Hours: 3

AERO 4100: National Security Affairs/Preparation for Active Duty
Examines the national security process, regional studies, Air Force and joint doctrine. Special topics include the military as a profession and civilian control of the military. Continued emphasis on communicative skills. Leadership lab.

Credit Hours: 3

AERO 4200: National Security Affairs/Preparation for Active Duty
Examines civilian control of the military, officership, the military justice system, and current issues affecting military professionalism. Continued refinement of communicative skills. Leadership laboratory.

Credit Hours: 3
### Agricultural Economics (AG_EC)

**AG_EC 1010: Introduction to Agribusiness Management**  
Management concepts and techniques. Coordination of business activity, motivation, and decision-making approaches used by industry leaders in global food chain. Unique aspects of managing enterprises in the agriculture-food sector.  
**Credit Hour:** 1

**AG_EC 1011: Survey of Global Agribusiness**  
Economic, social and political forces and trends and the impact on U.S. and global agribusinesses. Global production, consumption trade, and investment patterns in agriculture-food sector. Developing management strategy in changing economic political environment.  
**Credit Hour:** 1

**AG_EC 1041: Applied Microeconomics**  
Introduction to the microeconomic principles and their application to decision-making in agribusinesses. Consumer decision analysis, producer goals and optimization and the market environment where they meet and trade. Applications to current issues. Students who complete AG_EC 1041 may not have credit for ECONOM 1014.  
**Credit Hours:** 3

**AG_EC 1042: Applied Macroeconomics**  
Introduction to macroeconomic principles and their application to agriculture-food sector and natural resource issues. Using macroeconomic principles in decision making and in evaluating national and regional economic problems and issues. Students who complete AG_EC 1042 may not have credit for ECONOM 1015.  
**Credit Hours:** 3

**AG_EC 2070: Environmental Economics and Policy**  
(same as ENV_ST 2070). Examines current environmental and natural resource issues using a systems perspective and key economic concepts. Explores connections between the environment and the economy based on problems at the local, national, and international levels.  
**Credit Hours:** 3  
**Prerequisites:** ENGLSH 1000 and sophomore standing

**AG_EC 2123: Quantitative Applications in Agricultural Economics**  
Familiarize students with the use of calculus and other quantitative tools in developing and analyzing fundamental economic concepts.  
**Credit Hours:** 3  
**Prerequisites:** AG_EC 1041 and MATH 1400

**AG_EC 2183: The Agricultural Marketing System**  
Analysis of marketing systems that transforms agricultural products into food products. Examines functions and institutions in marketing and distributing food from both micro and macro perspectives.  
**Credit Hours:** 3  
**Prerequisites:** AG_EC 1041, AG_EC 1042 and ENGLSH 1000

**AG_EC 2223: Agricultural Sales**  
Principles of salesmanship in agricultural input and output markets; buyer motivations; time and territory management; communication models and techniques; planning and executing sales calls; after-sale service.  
**Credit Hours:** 3  
**Prerequisites:** AG_EC 1041

**AG_EC 2225: Statistical Analysis**  
**Credit Hours:** 3  
**Prerequisites:** AG_EC 1041 and MATH 1100

**AG_EC 2940: Practicum in Agricultural Economics**  
Off-campus integrated working and learning experience for departmental majors and minors. Application of economic concepts in business or government. Graded on S/U basis only.  
**Credit Hour:** 1-3  
**Prerequisites:** 6 credit hours Agricultural Economics, 3 credits communications, and 30 total University credits

**AG_EC 3150: International Agribusiness**  
This course covers the primary factors that shape the business environment for food and agricultural firms conducting business across borders. The course examines how culture, institutions and public policy affect business operations and business strategies.  
**Credit Hours:** 3  
**Prerequisites:** AG_EC 2183 or instructor’s consent

**AG_EC 3224: New Products Marketing**  
Learning experience to develop skills in marketing new agriculture products. To include market analysis, goals and objectives, action plan, financial evaluation and monitoring and measurement. In small groups, students will develop complete marketing plan for a new product.  
**Credit Hours:** 3  
**Prerequisites:** ENGLSH 1000 and either AG_EC 1041 or ECONOM 1014

**AG_EC 3230: Agricultural and Rural Economic Policy**  
Study and analysis of past and present government policies affecting agriculture and rural economy.  
**Credit Hours:** 3  
**Prerequisites:** AG_EC 1041 and AG_EC 1042 or equivalent

**AG_EC 3241: Ethical Issues in Agriculture**  
The study of how economics, philosophy, and science inform on and impact important ethical problems in agriculture, such as the environment, biotechnology, animal welfare, farm structure, the role of
agribusiness, development, sustainability, and agriculture-related public policy. Course may be repeated once for credit.

**Credit Hours:** 3  
**Prerequisites:** ENGLSH 1000, AG_EC 1041 or equivalent, and junior standing

---

**AG_EC 3251: Agricultural Prices**  
Variations in prices of agricultural products; underlying factors.

**Credit Hours:** 3  
**Prerequisites:** AG_EC 1041, AG_EC 1042, AG_EC 2123 and AG_EC 2225 or STAT 2500

---

**AG_EC 3256: Agribusiness and Biotechnology Law**  
Legal concepts applicable to agribusiness and biotech firms. To include contracts, torts, product liability, warranties, corporate farming laws, UCC, corporations/partnerships/limited liability companies, labor laws, patent copyrights/trademark laws, international and ethical perspectives.

**Credit Hours:** 3  
**Prerequisites:** 3 hours of Agricultural Economics or Economics

---

**AG_EC 3257: Rural and Agricultural Law**  
Everyday practical legal problems facing rural residents, farmers, agribusiness, and local government. Laws include statutes, common law (cases), customs, and administrative regulations. Topics include corporate/contract farming, right-to-farm, leases, fence laws, estate planning and water rights.

**Credit Hours:** 3  
**Prerequisites:** 3 hours of Agricultural Economics or Economics

---

**AG_EC 3260: General Farm Management**  
Economics and management principles applied to planning and operating farm businesses. Includes enterprise combination, resource acquisition, water management, profit maximizing techniques and annual adjustments to changing conditions.

**Credit Hours:** 3  
**Prerequisites:** AG_EC 1041

---

**AG_EC 3267: Conservation and Use of Protected Areas**  
Evaluation of socioeconomic, cultural and ecological values influencing the development and management of protected areas including parks, forests, wildlife refuges, wilderness and wild/scenic rivers.

**Credit Hours:** 3  
**Prerequisites:** AG_EC 1041 or equivalent, or AG_EC 2070 and introductory natural resources courses, or instructor’s consent

---

**AG_EC 3270: International Agricultural Development**  
Examines world food problem; analyzes its causes; economic and noneconomic policy alternatives for modernizing agriculture in less-developed countries.

**Credit Hours:** 3  
**Prerequisites:** AG_EC 1041 and AG_EC 1042 and junior standing

---

**AG_EC 3272: International Food Trade and Policy**  
Examines food trade; develops economic analyses of trade impacts on domestic agricultural policies; examines international trade agreements; and interface of trade and environment.

**Credit Hours:** 3  
**Prerequisites:** AG_EC 1041 and AG_EC 1042

---

**AG_EC 3278: Agribusiness Finance**  
Examination of the concepts and methods of finance to the management of agribusiness firms, including cooperatives. Special attention is given to the working capital needs of agribusiness and to the specialized lending institutions in the agricultural economy.

**Credit Hours:** 3  
**Prerequisites:** AG_EC 1041 and ACCTCY 2037

---

**AG_EC 3279: Fundamentals of Entrepreneurship**  
Introduce students to entrepreneurial way of thinking. Entrepreneurship is a way of thinking about identifying/creating opportunities and transforming those opportunities into new businesses, new institutions, or solutions to problems. Students will participate in the process of formulating and evaluating solutions to problems and identifying and exploiting opportunities.

**Credit Hours:** 3  
**Prerequisites:** AG_EC 1041 and ACCTCY 2036 or equivalent

---

**AG_EC 3285: Problems in Agricultural Economics**  
Supervised study in a specialized phase of agricultural economics. Graded on S/U basis only.

**Credit Hour:** 1-3  
**Prerequisites:** AG_EC 1041 and AG_EC 1042; instructor’s consent

---

**AG_EC 3286: Economics of Managerial Decision Making**  
Introduces tools and concepts from price theory, game theory, industrial organization and organizational economics, and applies them to managerial decision making activities for businesses in the agrifood system and for natural resource and environmental management.

**Credit Hours:** 3  
**Prerequisites:** AG_EC 1041, AG_EC 2123 and AG_EC 2183

---

**AG_EC 3294: Agricultural Marketing and Procurement**  
Content of course focuses on marketing issues in the agriculture supply chain. Topics covered include price discovery, basis, futures/options, contracting, logistics, and management decision making.

**Credit Hours:** 3  
**Prerequisites:** AG_EC 2183 and AG_EC 2225

---

**AG_EC 3295: Real Money: Speculative Trading for Beginners**  
Familiarize students with the learning components of commodity future/option trading. Students learn through involvement by investing in a commodity pool and trading futures/options. Students apply both fundamental and technical analysis. Students taking this course are required to invest from $100 to $300 in $100 increments.

**Credit Hours:** 3  
**Prerequisites:** AG_EC 2183, AG_EC 3294 or instructor’s consent
AG_EC 3321: Economic History of Agriculture
Emphasizes Europe and U.S. historical interpretation; usefulness in evaluating present and probable future developments in agriculture.
Credit Hours: 3
Prerequisites: AG_EC 1041

AG_EC 3383: Rural Entrepreneurship II
Rural Entrepreneurship II is designed for students that realize they may need to create their own career or opportunity if they want to return to their rural community and for students who would like to better understand how to create that option in their career choice set.
Credit Hours: 3
Prerequisites: AG_EC 1041, AG_EC 3283 and ACCTCY 2036

AG_EC 4110: In-Service Course in Agricultural Economics
A. Profit Maximizing Principles B. Farm Planning C. Farm Records and Analysis D. Business Management E. Using Computers in Farm Management Decision Making. Basic principles of farm management. Applications of principles and methods in successful classroom presentation primarily for high school teachers. Course is offered in sections A-E as listed, for 2 hours each.
Credit Hour: 2-10
Prerequisites: 10 hours credit in Agricultural Economics, including AG_EC 3260, or instructor’s consent

AG_EC 4230: Understanding the Agricultural Policy Process
The goal of this course is to prepare students for a career in agricultural policy and will build the skill set needed in the agricultural policy environment.
Credit Hours: 3
Prerequisites: AG_EC 3230 and instructor’s consent

AG_EC 4295: Agricultural Risk Management
This class will examine the range of risks business face and explore ways of characterizing and evaluating those risks.
Credit Hours: 3
Prerequisites: AG_EC 2183 and AG_EC 2225 or instructor’s consent

AG_EC 4301: Topics in Agricultural Economics
Current and new topics not currently offered in applied and/or theoretical areas in Agricultural Economics.
Credit Hour: 1-6

AG_EC 4301H: Topics in Agricultural Economics
Current and new topics not currently offered in applied and/or theoretical areas in Agricultural Economics.
Credit Hour: 1-6
Prerequisites: honors eligibility required

AG_EC 4310: Local Economic Analysis
Economic based theory, including multipliers and how local economies are affected by external events. Methods for local economic analysis: trends, location quotients, shift-share, and retail analyses.

AG_EC 4320: In-Service Course in Agricultural Economics
A. Profit Maximizing Principles B. Farm Planning C. Farm Records and Analysis D. Business Management E. Using Computers in Farm Management Decision Making. Basic principles of farm management. Applications of principles and methods in successful classroom presentation primarily for high school teachers. Course is offered in sections A-E as listed, for 2 hours each.
Credit Hour: 2-10
Prerequisites: 10 hours credit in Agricultural Economics, including AG_EC 3260, or instructor’s consent

AG_EC 4356: Environmental Law and Policy
Legislative, administrative, and common law dealing with the environment. Introduces the fundamental concepts and classic issues underlying the body of law and policy dealing with the environment. Includes air and water quality, endangered species preservation, land use, and waste disposal.
Credit Hours: 3
Prerequisites: senior or graduate standing. For non-law students Recommended: AG_EC 2156, AG_EC 3256 or AG_EC 3257

AG_EC 4940: Internship Experiences in Agricultural Economics
Combines study, observation, and employment in a public agency or private firm in marketing, farm management, or credit. Staff supervision and evaluation. Reports required. Graded on S/U basis only.
Credit Hour: 1-3
Prerequisites: 2.5 GPA; 75 hours of course work and instructor’s consent

AG_EC 4962: Planning the Farm Business
Economic analysis and planning of the farm business and its organization. Applications of computerized management techniques to farm business including resource acquisition, tax management, enterprise analysis, and business analysis through farm records and budgets.
Credit Hours: 3
Prerequisites: AG_EC 3260 or AFNR 1111 or equivalent

AG_EC 4971: Agribusiness Management Strategy
Analysis of industry forces in agriculture and food sector. Assessing risks and firms’ capabilities. Development of firm’s competitive strategy, including vertical integration, diversification, international business option, and financial planning and performance measurement.
Credit Hours: 3
Prerequisites: AG_EC 2183, AG_EC 3256, AG_EC 3286 and AG_EC 4971

AG_EC 4972: Agri-Food Business and Cooperative Management
Risk management in the global agrifood chain, including managing the unique uncertainties of biological production processes, global market analysis, and government intervention, of risk management tools and institutions unique to strategic decision making in agribusiness and cooperative firms.
Credit Hours: 3
Prerequisites: AG_EC 2183, AG_EC 3256, AG_EC 3286 and AG_EC 4971
AG_EC 4983: Strategic Entrepreneurship in Agri-Food
Strategic entrepreneurship is the search for opportunities to generate income streams from innovation, development of new markets, and altering the rivalry positions in existing markets.

Credit Hours: 3
Prerequisites: AG_EC 3257, AG_EC 3282, AG_EC 3283, and AG_EC 3383; senior standing

AG_EC 4990: Agricultural Economics Capstone Seminar
Apply key concepts of agricultural economics in traditional and non-traditional settings.

Credit Hours: 3
Prerequisites: AG_EC 3230, AG_EC 3251, and senior standing

AG_EC 4995: Economics of Agricultural Production and Distribution
Applies economic principles to agricultural production including price theory, linear programming and uncertainty.

Credit Hours: 3
Prerequisites: ECONOM 3251, STAT 1400 or equivalent

AG_EC 7110: In-Service Course in Agricultural Economics
A. Profit Maximizing Principles B. Farm Planning C. Farm Records and Analysis D. Business Management E. Using Computers in Farm Management Decision Making. Basic principles of farm management. Applications of principles and subject matter in successful classroom presentation primarily for high school teachers. Course is offered in sections A-E as listed, for 2 hours each.

Credit Hour: 2-10
Prerequisites: graduate standing and 10 hours credit in Agricultural Economics, including AG_EC 3260, or instructor's consent

AG_EC 7295: Agricultural Risk Management
This class will examine the range of risks businesses face and explore ways of characterizing and evaluating those risks.

Credit Hours: 3
Prerequisites: AG_EC 2183 and AG_EC 2225 or instructor's consent

AG_EC 7301: Topics in Agricultural Economics
Current and new topics not currently offered in applied and/or theoretical areas in Agricultural Economics.

Credit Hour: 1-6

AG_EC 7310: Local Economics Analysis
Economic based theory, including multipliers and how local economies are affected by external events. Methods for local economic analysis: trends, location quotients, shift-share, and retail analyses. On-line course.

Credit Hour: 1

AG_EC 7340: Rural Real Estate Appraisal
Principles, techniques, practices of rural real estate appraisal. Field trips.

Credit Hours: 3
Prerequisites: AG_EC 3260

AG_EC 7356: Environmental Law and Policy
Legislative, administrative, and common law dealing with the environment. Introduces the fundamental concepts and classic issues underlying the body of law and policy dealing with the environment. Includes air and water quality, endangered species preservation, land use, and waste disposal.

Credit Hours: 3
Prerequisites: For non-law students. Recommended AG_EC 2156, AG_EC 3256 or AG_EC 3257

AG_EC 7940: Internship Experiences in Agricultural Economics
Combines study, observation, and employment in a public agency or private firm in marketing, farm management, or credit. Staff supervision and evaluation. Reports required. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: 2.5 GPA; 75 hours of course work and instructor's consent

AG_EC 7962: Planning the Farm Business
Economic analysis and planning of the farm business and its organization. Applications of computerized management techniques to farm business including resource acquisition, tax management, enterprise analysis, and business analysis through farm records and budgets.

Credit Hours: 3
Prerequisites: AG_EC 3260 or AFNR 1111 or equivalent

AG_EC 7971: Agribusiness Management Strategy
Analysis of industry forces in agriculture and food sector. Assessing risks and firms capabilities. Development of firm's competitive strategy, including vertical integration, diversification, international business option, and financial planning and performance measurement.

Credit Hours: 3
Prerequisites: AG_EC 2183, AG_EC 3256 and AG_EC 3286

AG_EC 7972: Agri-Food Business and Cooperative Management
Risk management in the global agrifood chain, including managing the unique uncertainties of biological production processes, global market analysis, and government intervention, of risk management tools and institutions unique to strategic decision making in agribusiness and cooperative firms.

Credit Hours: 3
Prerequisites: AG_EC 2183, AG_EC 3256 and AG_EC 3286

AG_EC 7995: Economics of Agricultural Production and Distribution
Applies economic principles to agricultural production including price theory, linear programming and uncertainty.

Credit Hours: 3
Prerequisites: ECONOM 3251, STAT 1400 or equivalent

AG_EC 8001: Advanced Topics in Economics

Credit Hours: 3
### AG_EC 8010: Research Methodology
Students explore the roles of theory and methods in economics research, develop a program of research, and critique published research. Students also study the scientific methods and the research process, including problem definition, research design, data collection and analysis, and generalization.

**Credit Hours:** 3  
**Prerequisites:**

### AG_EC 8024: Advanced Production Economics
Production function analyses and advanced theory of the firm as applied to agricultural production problems. Concepts of input demand, production supply, quality, time and technology, dynamic analysis and production under uncertainty.

**Credit Hours:** 3  
**Prerequisites:** MATH 1500, AG_EC 4995; ECONOM 8451; STAT 4510 or ECONOM 8472

### AG_EC 8050: Economics of Institutions and Organizations
This course expands upon the fundamental principles of neo-classical economics by relaxing traditional behavioral and informational assumptions and by introducing the importance of transaction costs and institutions for economic analysis.

**Credit Hours:** 3

### AG_EC 8060: Mathematical Modeling for Social Scientist
Introduction to mathematical programming, emphasizing problem formulation and solution interpretation. Computer applications are stressed.

**Credit Hours:** 3  
**Prerequisites:** STAT 4510

### AG_EC 8085: Masters Problems in Agricultural Economics
Supervised study, research in specialized phases of agricultural economics.

**Credit Hour:** 1-99

### AG_EC 8087: Seminar in Agricultural Economics
Lectures, reports on economic problems in agriculture.

**Credit Hour:** 1

### AG_EC 8090: Masters Thesis Research in Agricultural Economics
Independent investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-6

### AG_EC 8210: Theory of Markets
Development of theories of monopolistic, monopolistic competition; application to agricultural markets. Market structure influence on price, nonprice competition in buying, selling of farm products and inputs.

**Credit Hours:** 3  
**Prerequisites:** ECONOM 7351

### AG_EC 8350: Regional Development Issues and Analysis
(same as PUB_AF 8350). Examines theories of regional growth and development and methods for analysis with applications to current policy issues. Topics include firm location, new economic geography and agglomeration theory, clusters, human capital, migration, social capital, tax and development incentives, and sustainable regional development.

**Credit Hours:** 3  
**Prerequisites:** ECONOM 7351 or PUB_AF 8190 or equivalent

### AG_EC 8410: Natural Resource and Environmental Economics
Contemporary natural resource/environmental problems; natural resource capacity, alternative economic theories, property rights, externalities, market failures, efficient use of exhaustible and renewable resources, and economics of environmental pollution.

**Credit Hours:** 3  
**Prerequisites:** ECONOM 7351

### AG_EC 8430: International Agricultural Development Policy
An analytical review of economic policies directed toward stimulating agricultural development in the world’s low income countries.

**Credit Hours:** 3  
**Prerequisites:** ECONOM 7351 and ECONOM 7353

### AG_EC 8448: Society and Ecosystems Research Seminar
(same as RU_SOC 8448 and NAT_R 8448). This seminar, capstone for the Graduate Certificate Program in Society and Ecosystems, exposes students to interdisciplinary research on interactions between social, economic and ecological systems.

**Credit Hours:** 3

### AG_EC 8450: Masters Non Thesis Research
Independent investigation of advanced nature. Report required.

**Credit Hour:** 1-6

### AG_EC 8520: Economics of Transaction and Contracting
This course focuses on the economic incentives underlying transaction relationships and develops and implements a framework for analyzing contract documents governing various kinds of transactions.

**Credit Hours:** 3

### AG_EC 8510: Economic and Sociological Approaches to Collective Action
(same as RU_SOC 8610). This course identifies analytical and methodological tools, including rational choice and social capital, to deal with practical problems of collective action in: agricultural cooperatives, rural community development, political interest groups and other mutuals.

**Credit Hours:** 3  
**Prerequisites:** AG_EC 7972

### AG_EC 8860: International Comparative Rural Policy
(same as PUB_AF 8860). Compares the rural policy objectives and implementation strategies of various countries, and assesses these policies in terms of economic, social, environmental outcomes and their
implications for international relations. Includes 2-weeks of study Abroad. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: instructor’s consent

**AG_EC 9001: Advanced Topics in Economics II**

Credit Hours: 3

**AG_EC 9040: Advanced Microeconomics Theory and Applications I**

First semester advanced micro theory covering choice under uncertainty, industry structure, game theory, information econ, and political economy of regulation. Includes applications of micro models to issues in agricultural, natural resource, and development sectors. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: AG_EC 9040

**AG_EC 9042: Advanced Microeconomics Theory and Applications II**

Second semester advanced micro theory covering choice under uncertainty, industry structure, game theory, information econ, and political economy of regulation. Includes applications of micro models to issues in agricultural, natural resource, and development sectors.

Credit Hours: 3  
Prerequisites: AG_EC 9040

**AG_EC 9085: Doctoral Problems in Agricultural Economics**

Supervised study, research in specialized phases of agricultural economics.

Credit Hour: 1-99  
Prerequisites: instructor’s consent

**AG_EC 9090: Doctoral Dissertation Research in Agricultural Economics**

Independent investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.

Credit Hour: 1-99  
Prerequisites: instructor’s consent

**AG_EC 9200: Advanced Price Analysis**

Applies economic theory and quantitative methods to analyze agricultural price issues. Examines problem formulation, estimation, and model evaluation applied to demand and supply situations.

Credit Hours: 3  
Prerequisites: ECONOM 8451 or ECONOM 8472; STAT 4510

**AG_EC 9230: Welfare and Consumption Economics**

Introduces welfare economic principles; application to problems of resource allocation. Appraises economic policies, programs; consumers’ choice; measurement of consumption; living standards; household decisions and markets relation.

Credit Hours: 3  
Prerequisites: ECONOM 8451 or instructor’s consent

**AG_EC 9265: Food, Agricultural and Rural Policy**

Application of welfare economics theory to food, agricultural and rural development policy analysis. Historical perspective and economics analysis of contemporary issues in national and international policy and institutions.

Credit Hours: 3  
Prerequisites: ECONOM 7351 and AG_EC 9230

**AG_EC 9320: Regional Economic Theory and Methods**

Theory of spatial economics: Central place theory, spatial labor markets, location theory, social accounting matrices, input-output, computable general equilibrium, geographic information systems and regional econometric models.

Credit Hours: 3  
Prerequisites: ECONOM 7351, ECONOM 7353, and matrix algebra

**AG_EC 9475: Econometrics I**

Emphasis is given to special estimation problems which occur in integrating the theory with various types of economic data.

Credit Hours: 3

**AG_EC 9476: Econometrics II**

(same as ECONOM 9476).

Credit Hours: 3

**AG_EC 9510: Economics of Agribusiness Firm**

This course builds on transaction cost-based theories and tools to study the economic underpinnings of intra-firm organization, firm boundaries, and the structure of inter-firm transactions.

Credit Hours: 3  
Prerequisites: AG_EC 8050

**AG_EC 9520: Economics of Agribusiness Markets**

Relationships of neoclassical and new institutional economics to designing organizational strategy and structure. Internal coordination and structure, organizational boundaries, and competitiveness and sustainability of food system organizations.

Credit Hours: 3  
Prerequisites: AG_EC 8050

**Agricultural Ed & Leadership (AG_ED_LD)**

**AG_ED_LD 1000: Orientation to Agricultural Education and Leadership**

Overview of the discipline of agricultural education including: career opportunities, certification requirements, professional development, and current issues.

Credit Hour: 1
AG_ED_LD 2220: Verbal Communication in Agriculture, Food and Natural Resources
Application of verbal communication skills used in the dissemination of information related to agriculture, food, and natural resource topics. Acquisition of interpersonal communication skills and small group, impromptu and professional presentation skills.
Credit Hours: 3
Prerequisites: Restricted to College of Agriculture, Food and Natural Resources students only during Early Registration

AG_ED_LD 2250: Introduction to Leadership
Overview of basic leadership principles and theories, including, but not limited to: personal leadership development, characteristics of effective leaders, leadership styles, ethics as a leader and leadership obstacles.
Credit Hours: 3

AG_ED_LD 2260: Team and Organizational Leadership
Principles and practices in planning, developing, conducting, and evaluating leadership programs for agricultural groups. The course focuses on helping students better understand themselves and others; improving group communications; becoming effective leaders and members of groups; improving leadership and personal development skills; assessing leadership situations, determining and administering appropriate leadership strategies, and evaluating results.
Credit Hours: 3

AG_ED_LD 2270: Leadership Development in Youth Organizations
This course focuses on how to develop leadership in youth through participation in a youth organization. In particular, this course explores youth development, how to develop leadership through youth organizations and their activities, and organizational structures.
Credit Hours: 3

AG_ED_LD 2271: Early Field Experience
This field experience is designed for students to explore the role of being a school-based agricultural educator. In particular, students will experience the total agricultural education program with a focus on youth organizations.
Credit Hour: 1
Prerequisites: AG_ED_LD 2270 or concurrent enrollement

AG_ED_LD 3085: Problems in Agricultural Education and Leadership
Supervised and independent study of problems and issues in Agricultural Education and Leadership at the undergraduate level.
Credit Hour: 1-99
Prerequisites: instructor’s consent

AG_ED_LD 3320: Metal Fabrication and Laboratory Management
Application of metal fabrication skills, including cutting, bending, and welding, using a variety of processes. Operations of hand tools and power equipment used in project construction. Also includes laboratory management, instructional strategies, and assessment techniques related to secondary agriculture programs.
Credit Hours: 3

AG_ED_LD 4001: Topics in Agricultural Education and Leadership
Courses on specialized topics offered on a trial basis until the course has been assigned a course number.
Credit Hour: 1-3

AG_ED_LD 4087: Internship Seminar in Agricultural Education and Leadership
Seminar focused on the problems of practice and developing skills needed for a career in teaching agriculture at the secondary level. The core of the seminar is on coordinating experiential learning and leadership development activities, managing the complete program, and professional development.
Credit Hours: 3
Corequisites: AG_ED_LD 4995

AG_ED_LD 4310: Intracurricular Program Management in Agricultural Education
This course explores the philosophical foundations and current structures of secondary Agricultural Education Programs. Students will learn how to plan, supervise, and evaluate the intracurricular components within Agricultural Education programs.
Credit Hours: 3

AG_ED_LD 4320: Methods of Teaching I
Investigations into the teaching and learning process which including lesson planning, direct instruction methods, and assessment.
Credit Hours: 3
Prerequisites: junior standing; acceptance into Phase II of Teacher Development Program or instructor’s consent

AG_ED_LD 4321: Integrated Field Experience II
A field-based experience that examines the integration of Supervised Agricultural Experience and Career Development Events into the secondary agriculture curriculum. Investigates the use of advisory committees and graduate follow-up data in curriculum planning. Graded on S/U basis only.
Credit Hour: 1
Corequisites: AG_ED_LD 4320

AG_ED_LD 4330: Methods of Teaching II
Further investigations into the teaching and learning process which includes methods beyond direct instruction, classroom and behavior management, and curricular design.
Credit Hours: 3
Prerequisites: AG_ED_LD 4320; acceptance into Phase II of Teacher Development Program or instructor’s consent

AG_ED_LD 4331: Field Experience II
A field-based experience that provides students with comprehensive experience directed toward learning, teaching, and assessment in secondary agriculture programs. Graded on S/U basis only.
AG_ED_LD 4330: Designing and Delivering Nonformal Educational Programs
Course designed to overview learning theory and practice applicable to teaching adults and youth in nonformal education contexts including: planning programs, methods of instructional delivery, marketing, and evaluation of educational outcomes.
Credit Hours: 4
Prerequisites: AG_ED_LD 2220 or equivalent; junior or senior standing

AG_ED_LD 4993: Internship in Agricultural Education and Leadership
Field-based learning experience that combines study, observation, and employment with an agricultural business, industry or government agency in the area of education, training, and development. Individual internship plans are developed by a student, faculty supervisor, and an industry cooperator.
Credit Hour: 1-4
Prerequisites: departmental consent

AG_ED_LD 4995: Student Teaching Internship in Agriculture
A field-based learning experience that combines observation and practice in a secondary/adult agriculture program. The purpose of the internship is to provide an opportunity to apply teaching and learning concepts in a practical context.
Credit Hour: 1-12
Prerequisites: departmental consent

AG_ED_LD 7087: Internship Seminar in Agricultural Education and Leadership
Seminar focused on the problems of practice and developing skills needed for a career in teaching agriculture at the secondary level. The core of the seminar is on coordinating experimental learning and leadership development activities, managing the complete program, and professional development.
Credit Hours: 3
Corequisites: AG_ED_LD 4995

AG_ED_LD 7310: Intracurricular Program Management in Agricultural Education
This course explores the philosophical foundations and current structures of secondary Agricultural Education Programs. Students will learn how to plan supervise and evaluate the intracurricular components within Agricultural Education Programs.
Credit Hours: 3

AG_ED_LD 7320: Methods of Teaching I
Investigations into the teaching and learning process which includes lesson planning, direct instruction methods, and assessment.
Credit Hours: 3
Prerequisites: acceptance into the Teacher Certification option

AG_ED_LD 7330: Methods of Teaching II
Further investigations into the teaching and learning process which includes methods beyond direct instruction, classroom and behavior management, and curricular design.
Credit Hours: 3
Prerequisites: acceptance into Teacher Certification option and AG_ED_LD 4320 or AG_ED_LD 7320

AG_ED_LD 7340: Designing and Delivering Nonformal Educational Programs
Course designed to overview learning theory and practice applicable to teaching adults and youth in nonformal education contexts including: planning programs, methods of instructional delivery, marketing, and evaluation of educational outcomes.
Credit Hours: 4
Prerequisites: AG_ED_LD 2220 or equivalent

AG_ED_LD 7350: Inservice Course in Agricultural Education and Leadership
Professional development course which focuses on enhancing the technical, administrative, or management skills of agricultural educators.
Credit Hour: 1-99

AG_ED_LD 8080: Creative Component in Agricultural Education and Leadership
Independent original work that culminates in a scholarly project, document or presentation. Graded on S/U basis only.
Credit Hour: 1-3
Prerequisites: instructor’s consent

AG_ED_LD 8085: Problems in Agricultural Education and Leadership
Credit Hour: 1-99
Prerequisites: instructor’s consent

AG_ED_LD 8087: Seminar in Agricultural Education and Leadership
Seminar in Agricultural Education and Leadership.
Credit Hour: 1-99

AG_ED_LD 8090: Thesis Research in Agricultural Education and Leadership
Independent research activities by a master’s student that culminates in a thesis. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor’s consent

AG_ED_LD 8210: History and Leadership of the Land Grant University
Historical overview of the evolution and development of land-grant colleges. Students examine early public mandates and evaluate education, research, public service developments and new initiatives needed for Land Grant universities to effectively serve society.
Credit Hours: 2
AG_ED_LD 8250: Leadership Theory and Application
Survey of concepts, theories and practices of leadership, personal
development and group dynamics. Exploration of leadership traits and
models with a focus upon how they apply to Agricultural Education.
Credit Hours: 3

AG_ED_LD 8330: Advanced Methods of Teaching
Explores the principles and psychological aspects of teaching and
learning; teaching strategies, methods, and techniques; evaluating
student learning; motivating students; and personal teacher behaviors
that influence learning.
Credit Hours: 3

AG_ED_LD 8340: Student and Teacher Development in Agricultural
Education and Leadership
Examines planning and supervising career exploration, experiential
learning, and leadership development activities of secondary agriculture
students. The professional development of the secondary agriculture
teacher is also examined.
Credit Hours: 3
Prerequisites: AG_ED_LD 4310 or equivalent

AG_ED_LD 8350: College Teaching of Agriculture, Food and Natural
Resources
A course designed to assist current or future college faculty who wish
to improve their teaching skills. Topics include theories, principles and
practices associated with effective teaching and learning in higher
education.
Credit Hours: 3

AG_ED_LD 8351: Induction Year Teaching I
Continuing education course for the professional development of first-
year teachers of agriculture. The course focuses on the pedagogical
knowledge, skills, and attitudes and managerial skills needed by
beginning teachers of agriculture.
Credit Hour: 1-2

AG_ED_LD 8352: Induction Year Teaching II
Continuing education course for the professional development of second-
year teachers of agriculture. The course is a continuation of AG_ED_LD
8351 and focuses on the pedagogical knowledge, skills, and attitudes
and managerial skills needed by beginning teachers of agriculture.
Credit Hour: 1-2
Prerequisites: AG_ED_LD 8351

AG_ED_LD 8410: Philosophical Foundations of Agricultural
Education and Leadership
Overview of the history and philosophical development of agricultural
education and leadership as a discipline. Philosophers, policy makers,
movements, trends, and legislation that has influenced agricultural
education. Current issues and future trends impacting the field. Graded
on A-F basis only.
Credit Hour: 1-3

AG_ED_LD 8430: Evaluation of Educational Programs
(same as RU_SOC 8430). Examines program evaluation concepts,
principles, and models; and identifies major steps in planning,
conducting, and reporting results of evaluation objects.
Credit Hours: 3

AG_ED_LD 8510: Research Methods and Design
(same as RU_SOC 8510). A foundations course on qualitative research
methodology and design principles for investigating problems in social
and behavioral sciences. A focus is on the language of research,
purposes, validity threats, and data collection methods. Graded on A-F
basis only.
Credit Hours: 3

AG_ED_LD 8520: Preparing Manuscripts for Publication
An introduction to planning, preparing, and submitting research based
articles for publication in professional journals and research proceedings.
Credit Hour: 1

AG_ED_LD 8530: Grant Proposal Writing
Preparation of proposals designed to solicit grant funding to support
teaching, research or outreach programs. Emphasis on proposal
development, identifying funding sources, and proposal review
processes.
Credit Hours: 2

AG_ED_LD 8540: Methods of Qualitative Research
(same as RU_SOC 8540). Overview of philosophies, approaches toward,
design, data collection, analysis and reporting of qualitative research.
Credit Hours: 3

AG_ED_LD 8995: College Teaching Practicum
Learning experience that combines the study, observation, and practice
of teaching university-level courses in food, agriculture and/or natural
resources under the supervision of teaching mentors. Graded on S/U
basis only.
Credit Hours: 3
Prerequisites: instructor's consent and AG_ED_LD 8330 or AG_ED_LD
8350

AG_ED_LD 9090: Doctoral Research in Agricultural Education and
Leadership
Independent research activities by a doctoral student that culminates in a
dissertation or other scholarly work. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent

AG_ED_LD 9410: Foundations and Practices of Teacher Education
Foundations and practices of teacher preparation programs including
student selection and advisement, licensure requirements, accreditation,
curriculum, clinical and field experiences, supervision, evaluation and
research.
Credit Hours: 3
Prerequisites: Doctoral student or instructor's consent
AG_ED_LD 9510: Data Collection, Analysis and Interpretation (same as RU_SOC 9510). A quantitative methods course in measurement, data collection and analysis related to social and behavioral science research. An applied approach is taken on instrumentation and analyzing data using descriptive and inferential statistics. Practical skills in data manipulation using SPSS are developed. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: AG_ED_LD 8510 or RU_SOC 8510 or instructor's consent

Agricultural Systems Management (AG_S_M)

AG_S_M 1002: Topics in Agricultural Systems Management-Biological/Physical/Math
Current and new technical developments in agricultural systems management.
Credit Hours: 3
Prerequisites: 6 hours in AG_S_M or instructor's consent

AG_S_M 1020: Introduction to Agricultural Systems Management
Introductory course that acquaints students with the general technical areas of Agricultural Systems Management. A systematic problem-solving approach is applied to problems derived from each of the technical areas within Agricultural Systems Management.
Credit Hours: 3

AG_S_M 1040: Physical Principles for Agricultural Applications
Introductory survey course to help students: formulate problems; understand units/accuracy; learn basic definitions; understand simple machines, power transmission, fluid statics, electricity, heat-flow, and temperature/moisture relationships.
Credit Hours: 3
Prerequisites: MATH 1120

AG_S_M 1120: Agricultural/Industrial Materials and Processes
Structure and properties of manufacturing materials; conditioning and machining materials; assembling processes; finishing processes; automation of manufacturing systems.
Credit Hours: 3

AG_S_M 2002: Topics in Agricultural Systems Management-Biological/Physical/Math
Current and new technical developments in agricultural systems management.
Credit Hours: 3
Prerequisites: 6 hours in AG_S_M or instructor's consent

AG_S_M 2020: Environmental Ethics in Agriculture
Credit Hours: 3
Prerequisites: ENGLISH 1000 and sophomore standing

AG_S_M 2220: Agricultural/Industrial Structures
A building science course looking at construction materials, structural component selection, ventilation, moisture control and energy use. Math reasoning proficiency course.
Credit Hours: 3
Prerequisites: MATH 1100
Recommended: AG_S_M 1040, or instructor's consent

AG_S_M 2320: Agricultural/Industrial Structures
A building science course looking at construction materials, structural component selection, ventilation, moisture control and energy use. Math reasoning proficiency course.
Credit Hour: 3
Prerequisites: MATH 1100
Recommended: AG_S_M 1040, or instructor's consent

AG_S_M 2340: Pesticide Application Equipment
Principles of pesticide application; sprayer hydraulics and spray atomization; calibration, mixing calculations and compatibility of tank mixes; personal and environmental protection; pesticide labels and regulations. Students earn their private applicators license.
Credit Hours: 3
Prerequisites: MATH 1100 or instructor's consent

AG_S_M 2345: Chemical Application Systems
Systems, components and operation practices used in the chemical application industry. Liquid and granular application systems and respective components will be studied along with procedures for minimizing drift, system calibration, recommended maintenance, and off-season storage procedures.
Credit Hour: 2-3
Prerequisites: MATH 1100 or equivalent

AG_S_M 2360: Fluid Power
Basic power hydraulic theory. Hydraulic systems, components and circuits. Math reasoning proficiency course.
Credit Hours: 3
Prerequisites: MATH 1100 and sophomore standing

AG_S_M 3350: Problems in Agricultural Systems Management
Supervised independent study at the undergraduate level.
Credit Hours: 1-5
Prerequisites: instructor's consent

AG_S_M 4020: Agricultural Safety and Health
Analysis, organization and implementation of agriculture safety and health programs. Physical and economic impact of accidents, standards and liabilities. Role of man in the man-machine system.
Credit Hours: 3
Prerequisites: junior or senior standing or instructor's consent
AG_S_M 4120: Advanced Agricultural/Industrial Materials and Processes
(cross-leveled with AG_S_M 7120). Primarily for students majoring in agricultural education. Applies shop principles to the design and construction of projects.

Credit Hour: 2-3
Prerequisites: instructor’s consent

AG_S_M 4140: Electricity: Wiring and Equipment
Home and agricultural electricity; emphasis on proper selection and use of electrical wiring materials and equipment. Basic electrical theory.

Credit Hours: 3
Prerequisites: MATH 1100 and junior standing or instructor’s consent

AG_S_M 4145: Sensors and Control Systems for Agri-Industries
This course helps one understand sensors including performance, data acquisition systems and selection. In addition, introduction to programmable logic controllers, ladder-rung diagram programming, fluid flow rate, and associated analysis is discussed.

Credit Hours: 2
Prerequisites: AG_S_M 1040 and AG_S_M 4140; junior standing required

AG_S_M 4150: Biorenewable Systems Technology
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation and logistics, and marketing.

Credit Hours: 3
Prerequisites: MATH 1100, CHEM 1100 and AG_EC 1041 or equivalent

AG_S_M 4220: Material Handling and Conditioning
Principles required for processing and handling food and feed materials; selection of machines; analysis and development of systems for processing and handling grain and bulk material.

Credit Hours: 3
Prerequisites: MATH 1100, AG_S_M 1040 and junior standing

AG_S_M 4225: Preservation of Grain Quality
Principles and management for grain quality preservation. Grain drying and grain storage. Psychrometrics. Fan and airflow. Grain handling methods and system planning. Grain quality measurement and end-use value analysis.

Credit Hours: 2
Prerequisites: MATH 1100 or equivalent

AG_S_M 4320: Agricultural Equipment and Machinery
Operation of agricultural machinery. Selection and management of equipment.

Credit Hours: 3
Prerequisites: AG_S_M 1040 and junior standing

AG_S_M 4350: Problems in Agricultural Systems Management
Supervised independent study at the undergraduate level.

Credit Hour: 1-5
Prerequisites: instructor’s consent

AG_S_M 4360: Precision Agriculture Science and Technology
(same as PLNT_S 4360 and SOIL 4360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

Credit Hours: 3
Prerequisites: SOIL 2100, PLNT_S 2110 or instructor’s consent

AG_S_M 4365: Machinery Management Using Precision Agriculture Technology
Planters, combines, fertilizer application equipment, and sprayer management along with GPS technologies are the focus of the course. One will learn how to manage these tools efficiently and accurately. Valuable precision agriculture management skills emphasized.

Credit Hours: 3
Prerequisites: Junior standing required; Prefer AG_S_M 4360

AG_S_M 4370: In-Service Course Agriculture System Management-Farm Power and Machinery
A. Farm Power and Machinery B. Farm Buildings and Conveniences C. Soil and Water Management D. Rural Electrification and Processing E. Agricultural Construction and Maintenance Basic principles relating to agricultural systems management. Applies principles and subject matter in successful classroom presentation at the high school level.

Credit Hour: 1-8
Prerequisites: 10 credits from Agricultural System Management courses; a B.S. degree in Agriculture or instructor’s consent

AG_S_M 4390: Optimization and Management of Food and Agricultural Systems
(same as F_S 4390 and HSP_MGMT 4390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.

Credit Hours: 3
Prerequisites: MATH 1100

AG_S_M 4420: Surface Water Management
Topics include hydrology; soil erosion precautions; elementary surveying; selection and layout of ponds, terraces and water control structures.

Credit Hours: 3
Prerequisites: MATH 1100 and junior standing

AG_S_M 4440: Water Quality and Pollution Control
Applies scientific principles to a variety of water quality problems arising from activities associated with nonpoint pollution, agricultural chemicals, land disposal of wastes, on-site sewage disposal and individual drinking water systems.

Credit Hours: 3
Prerequisites: MATH 1100 and junior standing

AG_S_M 4460: Irrigation and Drainage
Soil, water, plant relationships. Selection and layout of irrigation and drainage systems.
Credit Hours: 3
Prerequisites: AG_S_M 4420 or instructor’s consent

AG_S_M 4940: Agricultural Systems Management Internship
Problem course following prior approved internship work experience. Problem selected by internship company representative, faculty problem advisor and student. Supervised by faculty problem advisor and presented in technical report form.
Credit Hour: 2-5

AG_S_M 4970: Agricultural Systems Management - Capstone
Capstone course required of Agricultural Systems Management majors. Team project involving extensive use of the students education, oral presentations and comprehensive written reports are required. Class experiences include but may not be limited to system selection and comparison, replacement and operating cost calculations, life cycle costing, and business feasibility analysis.
Credit Hours: 3
Prerequisites: Senior Standing

AG_S_M 7001: Topics in Agricultural Systems Management
Initial offering of a course in a specific subject matter area related to Agricultural Systems Management. The course is offered when proposed by a faculty member in that area of expertise.
Credit Hours: 3

AG_S_M 7020: Agricultural Safety and Health
Analysis, organization and implementation of agriculture safety and health programs. Physical and economic impacts of accidents, standards and liabilities. Role of man in the man-machine system.
Credit Hours: 3

AG_S_M 7085: Problems in Agricultural Systems Management
Supervised individual study at the graduate level.
Credit Hour: 1-99

AG_S_M 7120: Advanced Agricultural/Industrial Materials and Processes
(cross-leveled with AG_S_M 4120). Primarily for students majoring in agricultural education. Applies shop principles to the design and construction of projects.
Credit Hour: 2-3
Prerequisites: instructor’s consent

AG_S_M 7140: Electricity: Wiring and Equipment
Home and agricultural electricity; emphasis on proper selection and use of electrical wiring materials and equipment. Basic electrical theory.
Credit Hours: 3

AG_S_M 7220: Material Handling and Conditioning
Principles required for processing and handling food and feed materials; selection of machines; analysis and development of systems for processing and handling grain and bulk materials.
Credit Hours: 3
Prerequisites: MATH 1100 and AG_S_M 1040

AG_S_M 7320: Agricultural Equipment and Machinery
Operation of agricultural machinery. Selection and management of equipment.
Credit Hours: 3
Prerequisites: AG_S_M 1040

AG_S_M 7340: Agricultural Mechanization Systems
Credit Hours: 3

AG_S_M 7360: Precision Agriculture Science and Technology
(same as PLNT_S 7360 and SOIL 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.
Credit Hours: 3
Prerequisites: SOIL 2100, PLNT_S 2110 or instructor’s consent

AG_S_M 7365: Machinery Management Using Precision Agriculture Technology
This course focuses on agricultural equipment that is commonly used in conjunction with GPS technology. Planters, combines, fertilizer application equipment and sprayer application equipment are commonly equipped with GPS equipment to control and record operational parameters. These parameters focus around the equipments geographic location and can be recorded simultaneously with the volume of product applied and weather information (wind, temperature, humidity, etc.). GPS guidance is one of the main technologies to be studied throughout this course. The management of this equipment and the GPS technologies used to control and record this information is the focus of the course.
Credit Hours: 3
Recommended: AG_S_M 7360

AG_S_M 7370: In-Service Course Agriculture Systems Management-Farm Power and Machinery
A. Farm Power and Machinery B. Farm Buildings and Conveniences C. Soil and Water Management D. Rural Electrification and Processing E. Agricultural Construction and Maintenance Basic principles relating to agricultural systems management. Applies principles and subject matter in successful classroom presentation at the high school level.
Credit Hour: 1-8
Prerequisites: 10 credits from Agricultural Systems Management courses; a B.S. degree in Agriculture or instructor’s consent
### AG_S_M 7390: Optimization and Management of Food and Agriculture Systems
(same as F_S 7390 and HSP_MGMT 7390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.

*Credit Hours: 3*

*Prerequisites:* instructor’s consent

### AG_S_M 7420: Surface Water Management
Topics include hydrology; soil erosion precautions; elementary surveying; selection and layout of ponds, terraces and water control structures.

*Credit Hours: 3*

*Prerequisites:* MATH 1100

### AG_S_M 7440: Water Quality and Pollution Control
Applies scientific principles to a variety of water quality problems arising from activities associated with nonpoint pollution, agricultural chemicals, land disposal of wastes, on-site sewage disposal and individual drinking water systems.

*Credit Hours: 3*

*Prerequisites:* MATH 1100

### AG_S_M 7460: Irrigation and Drainage
Soil, water, plant relationships. Selection and layout of irrigation and drainage systems.

*Credit Hours: 3*

*Prerequisites:* AG_S_M 4420 or instructor’s consent

### AG_S_M 7480: Irrigation and Drainage

### AG_S_M 8085: Problems in Agricultural Systems Management
Supervised individual study at the graduate level.

*Credit Hours: 3*

### AG_S_M 8090: Thesis Research in Agricultural Systems Management
Independent investigation to be presented as a thesis. Graded on a S/U basis only.

*Credit Hours: 1-99*

### Agriculture, Food and Natural Resources (AFNR)

### AFNR 1101: Special Topics in Agriculture
Selected topics not offered in other courses.

*Credit Hours: 1-3*

*Prerequisites:* instructor’s consent

### AFNR 1111: Computing and Information Systems I
Provide students with a basic understanding of microcomputer usage, electronic communications, and use of the internet. Topics include operating systems, word processing, database management systems, spreadsheets, electronic mail, online library searches, and the World Wide Web.

*Credit Hours: 3*

### AFNR 1115: Foundations for College Success
An investigation of principles and practices associated with academic success and the interpersonal challenges encountered in collegiate life. Learning preferences, time investment, study skills, degree requirements, and personal development opportunities available in the College and across campus are explored. Graded on A-F basis only.

*Credit Hours: 1*

*Prerequisites:* freshman standing

### AFNR 1120: Computing and Information Technology
Provides students with a basic understanding of computer usage, electronic communications and use of the internet. Topics include understanding of operating systems, word processing, and presentation media.

*Credit Hours: 2*

*Prerequisites:* Restricted to freshmen and sophomores

### AFNR 2115: College to Career: Strategies for Success
Systematic approach to self-assessment, career research and exploration, goal-setting and implementation of a career development plan. Students will learn specific skills, research knowledge and lifelong career management techniques.

*Credit Hours: 1*

### AFNR 2120: Working with Data Using Excel
Provide students with a basic understanding of computer usage and spreadsheet applications.

*Credit Hours: 1*
AFNR 2150: Agricultural Travel Course
General travel course designed to broaden the perspective of agricultural students. Cost of course is borne by the student. Prerequisites: one course in each of the following areas: agricultural economics, animal science, plant science, and instructor’s consent.
Credit Hour: 1-99

AFNR 2190: International Agriculture and Natural Resources
This course is designed to provide students with an introduction into the agriculture/natural resources of the host country. Activities may include course work at an international institution, professional and personal development and special projects. Selected sections of this course may be graded either on A-F or S/U basis only.
Credit Hour: 1-15
Prerequisites: instructor’s and student’s advisor consent

AFNR 2191: International Agriculture and Natural Resources - Humanities
This course is designed to provide students with an introduction to valuing and appreciating the culture and philosophy entrenched in the host country’s civilization through the examination of its arts, culture, language and history. May be repeated for credit. Selected sections of the course may be offered on A-F or S/U basis only.
Credit Hour: 1-6
Prerequisites: student’s advisor or consent of instructor

AFNR 2192: International Agriculture/Natural Resources-Social Science
This course is designed to provide students with an examination of the social sciences of the host country; including the sociology, psychology, economics, government, and history of the country; including the dynamics of urban and rural communities. May be repeated for credit. Selected sections of this course may be graded either on A-F or S/U basis only.
Credit Hour: 1-6
Prerequisites: student’s advisor and instructor’s consent

AFNR 2215: Introduction to the Theory and Practice of Sustainable Agriculture
This experiential course provides an overview of the theoretical and practical principles of sustainable agriculture by exploring the holistic nature of sustainable agriculture, and analyzing agriculture systems based on their impact on the environment, economy and community.
Credit Hours: 3

AFNR 3115: Lifelong Career Management and Success Strategies
Systematic approach to understanding the importance of effective leadership in the professional world, obtaining transferable skills necessary in the work force, and understanding important aspects that allow one’s career to grow over the course of one’s professional life. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: junior standing or higher

AFNR 3215: Community Food Systems
Essential concepts in research, implementation and understanding of community food systems and macro-level global trends in food production and distribution will be discussed. Students will examine the social, economic and health implications of conventional and alternative food systems.
Credit Hours: 3
Prerequisites: AFNR 2215

AFNR 3315: Advanced Practices in Sustainable Agriculture
Course furthers students’ understanding of sustainable production systems with an emphasis on stewarding natural resources (soil, water, biodiversity and energy) while maintaining and economically profitable enterprise that provides for a good quality of life.
Credit Hours: 3
Prerequisites: AFNR 2215 and Junior standing
Recommended: SOIL 2100, PLNT_S 2110 or AN_SCI 1065 or AN_SCI 2175

AFNR 4001: Topics in Agriculture-General
Topics in Agriculture-General
Credit Hour: 1-99

AFNR 4972: Capstone Project in Agriculture, Food and Natural Resources
A culminating learning experience focused on student’s area of concentration that requires the application of knowledge and skills taught in the undergraduate curriculum. The capstone project comprises independent, original work culminating in a scholarly project, written document, and/or presentation. Graded on S/U basis only.
Credit Hour: 1-3
Prerequisites: junior standing and instructor’s consent

AFNR 4993: Internship in Agriculture, Food and Natural Resources
Field-based learning experience combining the study, observation, and employment with a business, organization, or governmental agency. The internship provides opportunities to apply skills, concepts and theories about agriculture, food and natural resources in a practical context. The student intern, internship supervisor, and university coordinator will develop an individualized internship plan. May be repeated for credit.
Credit Hour: 1-6
Prerequisites: junior standing and instructor’s consent

AFNR 7190: International Agriculture/Natural Resources
This course is designed to provide students with an introduction into the agriculture/natural resources of the host country. Activities may include course work at an international institution, professional and personal development and special projects. Selected sections of the course may be offered on A-F or S/U basis only.
Credit Hour: 1-9
Prerequisites: advisor and instructor’s consent

Anesthesiology (ANESTH)
ANESTH 6203: ABS Anesthesiology Research
ABS Anesthesiology Research
Credit Hour: 5-10

ANESTH 6205: ABS Anesthesiology Research and Review
ABS Anesthesiology Research and Review
Credit Hour: 5-10

ANESTH 6400: Anesthesiology
Goals/Objectives: The goals are providing students with opportunities to: 1. Understand the anesthetic state (e.g. the inability of a person to protect themselves from the environment; concomitant and common depression of other systems of the body other than the nervous system). 2. Learn how to think and react quickly and correctly in times of stress. 3. Develop knowledge and skill at maintaining artificial ventilation and circulation. 4. Develop technical skills (e.g. insertion of endotracheal tubes, intravenous catheters). 5. Understand the rationale behind the choice of an anesthetic agent or technique. 6. Learn the function of an anesthesiologist as a perioperative physician and pain consultant. 7. Learn about the specialty of anesthesiology as a possible future career.
Notes: Curriculum: Direct participation in anesthetic evaluation and administration for surgical procedures is combined with close individual supervision. Attendance at weekly teaching conferences is expected. Each student will follow a patient pre, intra, and post operatively and write a case presentation. Interblock: First consideration given to students interested in anesthesia as a career choice; honors considered only with documentation of participation and completion of a research project related to anesthesia. Evaluations: Evaluations are compiled from daily encounter cards completed by anesthesia providers, a written paper that discusses one patient’s anesthetic, and a 50 question written examination at the end of the rotation.
Credit Hour: 5

Animal Science (AN_SCI)

AN_SCI 1001: Topics in Animal Science
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.
Credit Hour: 1-4
Prerequisites: departmental consent

AN_SCI 1011: Animal Science
Principles of animal science including importance of animal agriculture, genetics, anatomy, physiology and nutrition.
Credit Hours: 3

AN_SCI 1011H: Animal Science - Honors
Principles of animal science including importance of animal agriculture, genetics, anatomy, physiology and nutrition.
Credit Hours: 3
Prerequisites: Honors eligibility required

AN_SCI 1012: Introduction to Captive Wild Animal Management
(same as F_W 1012), General introduction to housing, husbandry, behavior, genetics, nutrition, reproduction, animal health, and disease control of native and exotic species in zoological parks and other animal conservation facilities; emphasizes the role of captive animals in wildlife conservation. Graded on A-F basis only.
Credit Hours: 3

AN_SCI 1013: Biotechnology in Animal Agriculture
Concepts, discoveries, and applications of biotechnology ranging from the discovery of brewing and baking to animal cloning and genetic engineering are covered. Students will acquire a foundation to understand how biotechnology affects agriculture and our everyday lives. Graded on A-F basis only.
Credit Hours: 3

AN_SCI 1065: Animal Science Laboratory Practicum
An introductory course in skill related to the care and management of livestock and poultry plus a section dealing with meats and a section dealing with research methods. Students will be expected to participate in hands-on learning development of fundamental skills and animal husbandry. This class will include one 3 hour lab and 1 hour DIS per week.
Credit Hours: 2

AN_SCI 2001: Topics in Animal Science
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.
Credit Hour: 1-4
Prerequisites: departmental consent

AN_SCI 2085: Problems in Animal Science
Library and laboratory study of assigned problems in animal breeding, nutrition, physiology or production and management. Planning, conduction and reporting to be in consultation with instructor.
Credit Hour: 1-5
Prerequisites: instructor’s consent

AN_SCI 2095: Equine Behavior and Training
Students learn the psychology and ethology of equine behavior and how it relates to training. The use and proper fitting of equipment is taught and students learn to teach horses to perform the basic movements needed prior to advancing to specialized training. Prerequisites: AN_SCI 1065 and instructor’s consent
Credit Hours: 3

AN_SCI 2110: Global Animal Agriculture
Animal Agriculture as influenced globally by political, religious cultural, economic and climatic factors.
Credit Hours: 2
Prerequisites: sophomore standing
AN_SCI 2111: Sophomore Seminar: Societal Issues Facing Animal Agriculture
Course designed to introduce students to key issues facing animal agriculture. Assignments focus on reading current publications associated with issues affecting the animal agriculture industry. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ENGLSH 1000

AN_SCI 2114: Live Animal and Meat Evaluation
(same as F_S 2114). The composition and quality meat produced from food animals is the driving component of livestock economic value. This course will teach the principles and procedures involved in evaluation, grading, selection, and economic value of meat animals and poultry and the carcasses they produce. This course is an excellent introduction and (or) prerequisite for all livestock production courses and will provide a baseline of information for students interested in livestock or meat judging.
Credit Hours: 3

AN_SCI 2115: Livestock Judging
Comparative judging and evaluation; various classes of farm animals; particular reference to utility. Reference reading; illustrated lectures.
Credit Hours: 3
Prerequisites: AN_SCI 1065

AN_SCI 2131: Dairy Products Evaluation
(same as F_S 2131.) Sensory Evaluation and judging of dairy products.
Credit Hours: 2

AN_SCI 2135: Horse Selection and Evaluation
Techniques of selecting and evaluating horses based on conformation and performance characteristics. Effects of conformation on soundness. Includes learning to organize observations on the relative merits of a group of horses into an oral presentation.
Credit Hours: 2
Prerequisites: AN_SCI 1065

AN_SCI 2140: Companion Animals
(same as BIOMED 2140). Focus on companion dog, cat, and horse owners concerns re: health zoonoses, legal responsibilities, inbreeding, choice of breeds, behavioral problems and loss of companion animals.
Credit Hours: 3
Prerequisites: sophomore standing

AN_SCI 2165: Introduction to Ruminant Livestock Production
This is an introductory theory course which provides fundamental understanding of ruminant livestock - beef cattle and dairy cattle, production, management and associate industries. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: AN_SCI 1065

AN_SCI 2175: Introduction to Monogastric Production
Introductory course which provides fundamental understanding of hogs, horses and poultry. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: AN_SCI 1065

AN_SCI 2195: Equine Facility Management and Marketing
Focuses on learning equine facility management through student care and management of the University’s equine facility and breeding herd. Students also learn handling techniques for a wide variety of horses and gain experience in general equine facility maintenance. Students will be responsible for marketing horses sold in the annual MU online horse auction. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: AN_SCI 2135 and instructor’s consent. Cannot be taken at the same time as AN_SCI 2095

AN_SCI 3001: Topics in Animal Science
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.
Credit Hour: 1-4
Prerequisites: department consent

AN_SCI 3085: Problems in Animal Science
Current problems in animal breeding, nutrition, livestock production and management, meats. Assigned topics. In some cases student may undertake a project by outlining objectives, planning work, keeping records and summarizing results in written report. Some sections may be graded either on S/U or A-F basis only.
Credit Hour: 1-6
Prerequisites: instructor’s consent

AN_SCI 3190: Study Abroad: International Meat, Dairy and Enology
(same as F_S 3190). This study abroad course introduces students to the meat, dairy and wine industries in Germany or in New Zealand (destinations are on a rotational basis). Students will visit small, medium and large-scale producers and learn about differences in comparisons to the US industries. May be repeated once for credit.
Credit Hours: 3
Prerequisites: instructor’s consent

AN_SCI 3212: Principles of Animal Nutrition
The purpose of this course is to teach students the essential nutrients for animal life and to understand the basic principles of nutrition. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: 1 course in biochemistry or at least 4 hours of chemistry and MATH 1100 or equivalent

AN_SCI 3213: Genetics of Agricultural Plants and Animals
(same as PLNT_S 3213). Concepts of molecular, transmission, and population and quantitative genetics. Special emphasis given to breeding and biotechnological applications in plant and animal agriculture.
Credit Hours: 3

AN_SCI 3215: Genetics of Meats and Poultry
Focuses on meat genetics including molecular, transmission, and population genetics. Specifically covers molecular and quantitative genetics concepts for poultry and mammalian meats. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: instructor’s consent
Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500, MATH 1100

**AN_SCI 3214: Principles of Meat Science**  
(same as F_S 3214). Study of the principles involved in the conversion of living animals to meat and by-products; efficient utilization of meat as a food.

Credit Hours: 3  
Prerequisites: one course in Biology

**AN_SCI 3231: Principles of Dairy Foods Science**  
(same as F_S 3231). Technology, chemistry and microbiology related to milk and its transformation into fluid milk products, fermented dairy foods and spreads. (2 hours of lecture and two hours of laboratory per week.)

Credit Hours: 3  
Prerequisites: One course in Chemistry or Biological Sciences

**AN_SCI 3232: Animal Feeds and Feeding**  
Description of feed ingredients, formulation of diets, and animal feeding management.

Credit Hours: 3  
Prerequisites: AN_SCI 3212 and MATH 1100 or equivalent

**AN_SCI 3254: Physiology of Domestic Animals**  
Basic concepts of physiology and anatomy as related to domestic animals.

Credit Hours: 3  
Prerequisites: BIO_SC 1010 and BIO_SC 1020 or BIO_SC 1500; CHEM 1310 and CHEM 1320

**AN_SCI 3254H: Physiology of Domestic Animals - Honors**  
Basic concepts of physiology and anatomy as related to domestic animals.

Credit Hours: 3  
Prerequisites: BIO_SC 1010 and BIO_SC 1020 or BIO_SC 1500; CHEM 1310 and CHEM 1320; Honors eligibility required

**AN_SCI 3255: Physiology of Domestic Animals Laboratory**  
This laboratory course covers the basic concepts of physiology as related to domestic animals.

Credit Hours: 2  
Prerequisites: BIO_SC 1010 and BIO_SC 1020 or BIO_SC 1500; CHEM 1310 and CHEM 1320; AN_SCI 3254 or equivalent

**AN_SCI 3275: Meat Animal Evaluation**  
Meat animal evaluation highlights the relationships and limitations that exist when evaluating market and breeding animals and develops an appreciation for carcass excellence as it relates to production, merchandising and consumption. Some travel time and commitments will be necessary.

Credit Hours: 2  
Prerequisites: AN_SCI 2114 and AN_SCI 2115

**AN_SCI 4001: Topics in Animal Science**  
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

Credit Hour: 1-4  
Prerequisites: instructor’s consent

**AN_SCI 4312: Monogastric Nutrition**  
(same as NUTR_S 4020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: AN_SCI 3254

**AN_SCI 4314: Physiology of Reproduction**  
Principles of animal reproduction with emphasis on endocrine control of reproductive processes.

Credit Hours: 3  
Prerequisites: AN_SCI 3254 and BIO_SC 1500 or equivalent; or AN_SCI 3254 as a co-requisite and instructor’s consent

**AN_SCI 4314H: Physiology of Reproduction - Honors**  
Principles of animal reproduction with emphasis on endocrine control of reproductive processes.

Credit Hours: 3  
Prerequisites: AN_SCI 3254 and BIO_SC 1500 or equivalent; or AN_SCI 3254 as a co-requisite and instructor’s consent. Honors eligibility required

**AN_SCI 4323: Applied Livestock Genetics**  
Genetic principles applied to improvement of farm animals. Covers selection, prediction of genetic merit and mating systems. Math Reasoning Proficiency Course.

Credit Hours: 2  
Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500 and MATH 1100

**AN_SCI 4324: Genomics of Plants and Animals**  
Analysis of organisms at the level of the complete genome sequence. Covers genome sequencing, assembly and annotation, as well as functional, evolutionary and computational genomics.

Credit Hours: 2  
Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500, MATH 1100, AN_SCI 3213 /PLNT_S 3213 or equivalent

**AN_SCI 4332: Ruminant Nutrition**  
Physiology, chemistry, microbiology and pathology of ruminants. Emphasizes the digestion, absorption, metabolism and utilization of nutrients.

Credit Hours: 3  
Prerequisites: AN_SCI 3212

**AN_SCI 4344: Processing Muscle Foods**  
(same as F_S 4344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience
problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility.

**Credit Hours:** 3
**Prerequisites:** One Chemistry course

**AN_SCI 4354: Physiology and Biochemistry of Muscle as Food**
(same as F_S 4354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.

**Credit Hours:** 3
**Prerequisites:** BIO_SC 1010 or equivalent or AN_SCI 3214 or instructor's consent

**AN_SCI 4384: Reproductive Management**
Reproductive management of cattle, swine and sheep; estrous synchronization; artificial insemination; embryo development and transfer; assisted reproductive technologies.

**Credit Hours:** 3
**Prerequisites:** senior standing and AN_SCI 4314 and instructor's consent

**AN_SCI 4387: Equine Breeding Management**
Focuses on practical applications of reproductive management techniques and breeding in the horse. Topics include stallion collection and evaluation, artificial insemination, interpreting ultrasound images, teasing, parturition, and foal care. Students will gain hands-on experience in each of these areas.

**Credit Hours:** 5
**Prerequisites:** AN_SCI 2175 and AN_SCI 4314 and instructor's consent

**AN_SCI 4437: Environmental Physiology**
Principles of environmental physiology and animal adaptation with emphasis on mechanisms of temperature regulation and related nutritional and metabolic-hormonal functions.

**Credit Hours:** 3
**Prerequisites:** AN_SCI 3254 or equivalent

**AN_SCI 4900: Senior Seminar in Captive Wild Animal Management**
(same as F_W 4910). Investigates key issues in captive wild animal management, focusing on the role of animal caretakers in addressing the issues. Students are required to formulate informed opinions regarding these topics and communicate effectively about the subject matter. Graded A-F only.

**Credit Hour:** 1
**Prerequisites:** AN_SCI 1012 or F_W 1012 or instructor's consent; junior or senior standing

**AN_SCI 4940: Internship in Animal Science & Technology**
Off-campus training to develop technical skills and understanding of an area of animal science. Written reports required. Graded on an S/U basis only.

**Credit Hour:** 1-12
**Prerequisites:** instructor's consent

**AN_SCI 4950: Undergraduate Research in Animal Science**
Individually directed field or laboratory research culminating in a poster or oral presentation for upper-class students under faculty supervision.

**Credit Hour:** 1-3
**Prerequisites:** At least sophomore standing or instructor's consent

**AN_SCI 4973: Molecular and Cellular Techniques in Animal Science**
A directed research project that employs current molecular and cellular technologies. Students will generate experimental data, analyze the data and draft a research report in the format of a scientific paper.

**Credit Hours:** 4
**Prerequisites:** an introductory course in biology and a course in organic chemistry, at least junior standing and instructor’s consent

**AN_SCI 4975: Beef Production and Management**
Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle.

**Credit Hours:** 3
**Prerequisites:** AN_SCI 1065, AN_SCI 2165 and AN_SCI 3212 or instructor’s consent

**AN_SCI 4976: Dairy Production**
Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects.

**Credit Hours:** 3
**Prerequisites:** AN_SCI 1065, AN_SCI 2165, AN_SCI 3212, and AN_SCI 3232 or instructor’s consent

**AN_SCI 4977: Horse Production**
Systems of horse production: breeding, feeding and management of horses.

**Credit Hours:** 3
**Prerequisites:** AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor’s consent

**AN_SCI 4978: Swine Production**
Systems of pork production: breeding, feeding, management of commercial and purebred swine.

**Credit Hours:** 3
**Prerequisites:** AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor’s consent

**AN_SCI 4979: Poultry Production**
Principles of housing systems, nutrition, management, business and production of commercial chickens and turkeys.

**Credit Hours:** 3
**Prerequisites:** AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor’s consent
AN_SCI 7001: Topics in Animal Science
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

Credit Hour: 1-4
Prerequisites: instructor’s consent

AN_SCI 7312: Monogastric Nutrition
(same as NUTRIT 7020 and NUTR_S 7020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 3212

AN_SCI 7314: Physiology of Reproduction
Principles of animal reproduction with emphasis on endocrine control of reproductive processes.

Credit Hours: 3
Prerequisites: AN_SCI 3254 and BIO_SC 1500 or equivalent; or AN_SCI 3254 as a co-requisite and instructor’s consent

AN_SCI 7323: Applied Livestock Genetics
Genetic principles applied to improvement of farm animals. Covers selection, prediction of genetic merit and mating systems.

Credit Hours: 2
Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500 and MATH 1100

AN_SCI 7324: Genomics of Plants and Animals
Analysis of organisms at the level of the complete genome sequence. Covers genome sequencing, assembly and annotation, as well as functional, evolutionary and computational genomics.

Credit Hours: 3
Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500, MATH 1100, AN_SCI 3213 /PLNT_S 3213 or equivalent; and instructor’s consent

AN_SCI 7332: Ruminant Nutrition
Physiology, chemistry, microbiology and pathology of ruminants. Emphasizes the digestion, absorption, metabolism and utilization of nutrients.

Credit Hours: 3
Prerequisites: AN_SCI 3212

AN_SCI 7344: Processing Muscle Foods
(same as F_S 7344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility.

Credit Hours: 3
Prerequisites: one Chemistry course

AN_SCI 7354: Physiology and Biochemistry of Muscle as Food
(same as F_S 7354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.

Credit Hours: 3
Prerequisites: BIO_SC 1010 or equivalent or AN_SCI 3214 or instructor’s consent

AN_SCI 7384: Reproductive Management
Reproductive management of cattle, swine and sheep; estrous synchronization; artificial insemination; embryo development and transfer; assisted reproductive technologies.

Credit Hours: 3
Prerequisites: AN_SCI 4314 and instructor’s consent

AN_SCI 7437: Environmental Physiology
Principles of environmental physiology and animal adaptation with emphasis on mechanisms of temperature regulation and related nutritional and metabolic-hormonal functions.

Credit Hours: 3
Prerequisites: AN_SCI 3254 or equivalent

AN_SCI 7975: Beef Production and Management
Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle.

Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2165 and AN_SCI 3212 or instructor’s consent

AN_SCI 7976: Dairy Production
Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects.

Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2165, AN_SCI 3212 and AN_SCI 3232 or instructor’s consent

AN_SCI 7977: Horse Production
Systems of horse production: breeding, feeding and management of horses.

Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor’s consent

AN_SCI 7978: Swine Production
Systems of pork production: breeding, feeding, management of commercial and purebred swine.

Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor’s consent
AN_SCI 7979: Poultry Production
Principles of housing systems, nutrition, management, business and production of commercial chickens and turkeys.
Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor’s consent

AN_SCI 8085: Problems in Animal Science
Advanced independent studies in fields not directly related to thesis or non-thesis degree research program. May be graded on S/U or A-F basis only.
Credit Hour: 1-6
Prerequisites: instructor’s consent

AN_SCI 8087: Seminar in Animal Science
Critical consideration of research and other selected subjects in animal breeding, animal nutrition, reproductive physiology, growth and development and livestock production and management.
Credit Hour: 1

AN_SCI 8090: Thesis Research in Animal Science
Investigations in animal breeding, animal nutrition, reproduction physiology, growth and development livestock production and management. Graded on a S/U basis only.
Credit Hours: 1-99

AN_SCI 8413: Reproductive Biology Seminar
Presentation and discussion of selected topics from all phases of reproductive biology. Open to qualified students of graduate standing in the field of Reproductive Biology.
Credit Hour: 1

AN_SCI 8414: Meat Quality
(same as F_S 8414). Discussion of factors affecting meat quality in beef, pork, lamb and poultry. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: AN_SCI 3214 or equivalent

AN_SCI 8415: Survey of Epigenetics
This course will introduce graduate students to the basic concepts in epigenetics, including DNA methylation, histone modifications, epigenetic modifiers/transacting factors, non-coding RNAs, genomic imprinting, and dosage compensation. The courses designed to be a combination of lectures, paper discussions, and research talks by invited faculty speakers from across campus.
Credit Hours: 3
Prerequisites: instructor’s consent

AN_SCI 8420: Endocrinology
Hormones of pituitary and endocrine glands; special reference to influence on growth, reproduction, milk secretion.
Credit Hours: 3
Prerequisites: AN_SCI 7314 or equivalent

AN_SCI 8424: Meat Investigations
(same as F_S 8424). Discussions of scientific literature and hands-on experimentation with research techniques customarily used in the field of meat science. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: F_S 3214/AN_SCI 3214 or equivalent; instructor’s consent

AN_SCI 8431: Nutritional Biochemistry of Lipids
(Same as NUTR_S 8310 and NUTRIT 8310). Current concepts in the nutritional regulations of lipid metabolism. Emphasis on integrating information and interpreting current research data.
Credit Hours: 3
Prerequisites: BIOCHM 4270 and BIOCHM 4272

AN_SCI 8433: Nutrient Regulation of Gene Expression
(same as NUTRIT 8438, NUTR_S 8438 and BIOCHM 8438). This second semester of the graduate nutritional sciences core curriculum will cover nutritional biochemistry of minerals and on research literature, with an emphasis on in-depth coverage of several minerals that illustrate emerging themes in mineral nutritional biochemistry and nutrient regulation of gene expression. The course will be taught in tutorial format.
Credit Hours: 3
Prerequisites: BIOCHM 4270 and BIOCHM 4272 and 1st semester Graduate Nutrition core curriculum

AN_SCI 8438: Nutrient Regulation of Gene Expression
The curriculum covers methods for functional genomics. It explores experimental designs, data filtering, ANOVA analysis, power calculations, clustering and classification systems, and functional annotation of genes through lectures, and bioinformatics and regular laboratories. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: BIO_SC 4974 and BIO_SC 4374 or equivalent courses, Anova analysis course (STAT 7530) or equivalent experience in using Anova analysis

AN_SCI 8441: Livestock Production and Management Research Methods
Techniques of experimentation, with application to livestock production and management. Exercises in methods of planning, conducting, analyzing, evaluating and reporting research.
Credit Hours: 3
Prerequisites: STAT 4530/STAT 7530 or equivalent or instructor’s consent

AN_SCI 8443: Functional Genomics of Mammalian Genomes: Focus on Microarray
The curriculum covers methods for functional genomics. It explores experimental designs, data filtering, ANOVA analysis, power calculations, clustering and classification systems, and functional annotation of genes through lectures, and bioinformatics and regular laboratories. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: BIO_SC 4974 and BIO_SC 4374 or equivalent courses, Anova analysis course (STAT 7530) or equivalent experience in using Anova analysis

AN_SCI 8447: Recent Advances in Environmental and Endocrine Physiology
Seminar. Presentation, discussion, and critical evaluation of current status of selected topics in environmental and endocrine physiology.
Credit Hour: 1
Prerequisites: AN_SCI 3254 or equivalent
AN_SCI 8450: Research in Animal Science
Research in Animal Science
Credit Hour: 1-99

AN_SCI 8472: Amino Acid Metabolism
An in-depth study of amino acid metabolism and their relationship to animal nutrition.
Credit Hours: 2
Prerequisites: BIOCHM 4270 and BIOCHM 4272

AN_SCI 8633: Molecular and Network Evolution
(same as BIO_SC 8633). Evolution of biological macromolecules and networks, including sequence analysis algorithms and theory, phylogenetics, gene duplication, genome evolution, principles of biological networks. Development of computational skills emphasized.
Credit Hours: 3
Prerequisites: Instructor’s consent required

AN_SCI 8725: Science Outreach: Public Understanding of Science
(same as BIO_SC 8725, PHYSCS 8350 and LTC 8725). Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.
Credit Hour: 1-2

AN_SCI 9001: Topics in Animal Science
Credit Hour: 1-99
Prerequisites: instructor’s consent

AN_SCI 9090: Dissertation Research in Animal Science
Investigations in animal breeding, animal nutrition, livestock production and management. Dissertation required. Graded on a S/U basis only.
Credit Hour: 1-99

AN_SCI 9423: Genetics of Populations
Introduction to quantitative genetics with application to animal and plant breeding.
Credit Hours: 4
Prerequisites: STAT 4530 or STAT 7530

AN_SCI 9432: Ruminant Nutrition
(same as NUTRIT 8320). Physiology, chemistry, microbiology, pathology of ruminants. Emphasizes digestion, absorption, metabolism, utilization of nutrients. Lecture, laboratory, assigned readings.
Credit Hours: 3
Prerequisites: AN_SCI 4332/AN_SCI 7332 or equivalent and BIOCHM 4270

AN_SCI 9433: Gamete and Embryo Development
A classical and molecular approach to spermatogenesis, oogenesis, fertilization and preimplantation development in the domestic species.
Credit Hours: 3
Prerequisites: AN_SCI 4314/AN_SCI 7314 or BIO_SC 4984 or equivalent

AN_SCI 9434: Gonadal Function
(same as BIOMED 9434).
Credit Hours: 3
Prerequisites: AN_SCI 4314, biochemistry or cell biology and AN_SCI 8420

AN_SCI 9441: Bioenergetics
(same as NUTRIT 8400). Energetic interactions of animals and their physical and nutritional environments.
Credit Hours: 3
Prerequisites: instructor’s consent

AN_SCI 9442: Vitamins and Minerals
Designed to provide students with an understanding of the chemical, metabolic, and functional role of vitamins and minerals in nutrition. While the primary focus will be on animals, comparative aspects to human nutrition will be discussed.
Credit Hours: 4
Prerequisites: AN_SCI 3212, BIOCHM 4270 or equivalent

AN_SCI 9452: Mycotoxins
Designed to provide students with an understanding of the occurrence of mycotoxins, mechanisms of toxicity, analytical methodology, and approaches for ameliorating the toxic effects of mycotoxin in animals.
Credit Hours: 3
Prerequisites: instructor’s consent and courses in Nutrition and Biochemistry

Anthropology (ANTHRO)

ANTHRO 1000: General Anthropology
General survey course in fields of anthropological concern: archaeology, cultural anthropology, physical anthropology, linguistics; emphasizes underlying concepts, principles. Examples from peoples of the world.
Credit Hours: 3

ANTHRO 1000H: General Anthropology - Honors
General survey course in fields of anthropological concern: archaeology, cultural anthropology, physical anthropology, linguistics; emphasizes underlying concepts, principles. Examples from peoples of the world.
Credit Hours: 3
Prerequisites: Honors eligibility required

ANTHRO 1001: Topics in Anthropology - General
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3
ANTHRO 1002: Topics in Anthropology - Biological/Physical/Mathematics
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 1-3

ANTHRO 1003: Topics in Anthropology - Behavioral
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 1004: Topics in Anthropology - Social Science
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 1005: Topics in Anthropology - Humanities
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 1060: Human Language
(same as LINGST 1060, C_S_D 1060 and ENGLSH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data with some attention to application of linguistic study to other disciplines.
Credit Hours: 3

ANTHRO 1150: Introduction to Folklore Genres
(same as ENGLSH 1700). Course focus is on genres of folklore in both historic and contemporary contexts, as well as in people’s daily lives. Genres include narrative, proverbs, oral poetry and rhyme, riddles, jokes, legends, epics, material culture and intangible expressive culture. Graded on A-F basis only.
Credit Hours: 3

ANTHRO 1200: Significant Discoveries of Archaeology
Detailed consideration of approximately 20 archaeological discoveries and conclusions, from the field and the laboratory, which have been of surpassing importance for an understanding of human origins, behavior, culture and past experiences on earth.
Credit Hours: 3

ANTHRO 1300: Multiculturalism: An Introduction
Examines contemporary multiculturalism (and its origins) globally; introduces key concepts; uses diverse, extended cross-cultural and American examples; and emphasizes complexity of cultures, practicality of issues, and change.
Credit Hours: 3

ANTHRO 1350: Deviance: A Cross-Cultural Perspective
Cross-cultural studies of problem behavior with emphasis on violence, suicide, sexual misconduct, drug use and mental disorder.
Credit Hours: 3

ANTHRO 1500: Monkeys, Apes and Humans
For those with little or no background in anthropology. Surveys the ecology and behavior of major nonhuman primate groups, and how these relate to the evolution of human behavior.
Credit Hours: 3

ANTHRO 2001: Topics in Anthropology-General
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 2002: Topics in Anthropology-Biological/Physical/Mathematics
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 2003: Topics in Anthropology - Behavioral
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 2004: Topics in Anthropology - Social Science
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 2005: Topics in Anthropology - Humanities
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hour: 1-3

ANTHRO 2020: Fundamentals of Archaeology with Laboratory
Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. The lab involves hands-on experience with archaeological materials. No credit for both ANTHRO 2020 and ANTHRO 2021.

Credit Hours: 4
Recommended: sophomore standing

ANTHRO 2021: Fundamentals of Archaeology
Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. No credit for both ANTHRO 2020 and ANTHRO 2021.

Credit Hours: 3
Recommended: sophomore standing

ANTHRO 2022: Fundamentals of Archaeology Lab
Involves hands-on experience with archaeological materials. No credit given to students who have taken ANTHRO 2020.

Credit Hour: 1
Prerequisites: must have completed ANTHRO 2021

ANTHRO 2030: Cultural Anthropology
Analysis of human cultures with emphasis on both constant and variable factors at different levels of social complexity; contact between cultures, and cultural influences on individual behavior.

Credit Hours: 3
Recommended: Sophomore standing

ANTHRO 2040: Anthropological Linguistics
(same as LINGST 2040). Language in relation to other aspects of human behavior. Introduction to description and analysis of the basic units of language. Emphasis on non-Indo-European and preliterate languages.

Credit Hours: 3
Recommended: Sophomore standing

ANTHRO 2050: Introduction to Biological Anthropology with Laboratory
A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. Three hours lecture and two hours lab. No credit for both ANTHRO 2050 and ANTHRO 2051. Math Reasoning Proficiency Course.

Credit Hours: 5
Prerequisites: MATH 1100
Recommended: sophomore standing

ANTHRO 2051: Introduction to Biological Anthropology
A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. No credit for both ANTHRO 2050 and ANTHRO 2051.

Credit Hours: 3
Recommended: Sophomore standing

ANTHRO 2052: Biological Anthropology Laboratory
Laboratory exercises dealing with human genetics, non-human primates, the human fossil record, and human variation. Credit not given for students who have taken ANTHRO 2050. Math Reasoning Proficiency Course.

Credit Hours: 2
Prerequisites: ANTHRO 2051 (or equivalent) and MATH 1100

ANTHRO 2100: Indigenous Religions
(same as REL_ST 2100). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.

Credit Hours: 3

ANTHRO 2100H: Indigenous Religions - Honors
(same as REL_ST 2100H). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.

Credit Hours: 3
Prerequisites: Honors eligibility required

ANTHRO 2150: Introduction to Folklore Field Research
(same as ENGLSH 2700). Course will focus on the specifics of how to identify, collect, preserve and document folklore within communities.

Credit Hours: 3
Prerequisites: ENGLSH 1000

ANTHRO 2215: World Archaeology
Major events in cultural evolution such as control of fire, invention of ceramic and metallurgical technologies, colonization of Australia and the Americas, development of agriculture, and emergence of complex sociopolitical organization are described in all regions of the world.

Credit Hours: 3
Recommended: Sophomore standing

ANTHRO 2300: Anthropology of War
Anthropological approaches to tribal and modern war; theories of war's origins; relation to ecology, economy, gender, belief systems, politics; transformation of tribal warfare by state expansion; peace.

Credit Hours: 3
Recommended: Sophomore standing

ANTHRO 2340: Hunters and Gatherers
Exploration of how different hunter-gatherer groups interact with their physical and social environment. Topics include food acquisition, allocation of labor, reproduction and family life, and deciding where to live and when to move.

Credit Hours: 3
Recommended: Sophomore standing
<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Credit Hours</th>
<th>Recommended</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHRO 2500: Primate Anatomy and Evolution</td>
<td>This course will explore why primates (and humans) are built the way they are, how they evolved, and what their anatomy tells us about their biology. We will cover basic primate anatomy and ecology, and then survey the fossil record of primate evolution.</td>
<td>3</td>
<td>Sophomore standing</td>
</tr>
<tr>
<td>ANTHRO 2520: Forensic Anthropology</td>
<td>This course will introduce students to how biological anthropologists apply expertise in human osteology, skeletal variation and plasticity, skeletal pathology, body decomposition, and archaeological recovery of evidence to medicolegal investigations.</td>
<td>3</td>
<td>Sophomore standing</td>
</tr>
<tr>
<td>ANTHRO 2570: Parents and Offspring</td>
<td>A comparative investigation of the evolution of parental behaviors and family interactions in humans and other primates.</td>
<td>3</td>
<td>Sophomore standing</td>
</tr>
<tr>
<td>ANTHRO 2580: Evolution of Human Sexuality</td>
<td>Biological and cultural aspects of human reproduction are examined from the perspective of evolutionary and ecological theory.</td>
<td>3</td>
<td>Sophomore standing</td>
</tr>
<tr>
<td>ANTHRO 2800: Introduction to Field Methods in Archaeology</td>
<td>Techniques of field research and laboratory analysis through field experience.</td>
<td>1-6</td>
<td>Sophomore standing</td>
</tr>
<tr>
<td>ANTHRO 2825: Analyzing Artifacts</td>
<td>A brief introduction to the main methods used to analyze artifacts.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 2950: Research Skills in Anthropology</td>
<td>Participation in faculty research activities. Course coordinator matches students with participating faculty. Three hours of research activities per week per credit hour. May be repeated to a maximum of nine hours.</td>
<td>1-3</td>
<td>Sophomore standing</td>
</tr>
<tr>
<td>ANTHRO 3001: Topics in Anthropology - General</td>
<td>Problems, topics, issues, or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 3002: Topics in Anthropology-Biological/Physical/ Mathematics</td>
<td>Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 3003: Topics in Anthropology - Behavioral Science</td>
<td>Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 3004: Topics in Anthropology - Social Science</td>
<td>Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 3005: Topics in Anthropology - Humanities</td>
<td>Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 3150: American Folklore</td>
<td>(same as ENGLSH 3700). Regional and ethnic American folklore, with emphasis on analysis of folklore in context. Book reports and two analytical papers based on student field research required.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 3380: Native American Religions</td>
<td>(same as REL_ST 3380). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 3380H: Native American Religions - Honors</td>
<td>(same as REL_ST 3380H). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts.</td>
<td>3</td>
<td>Honors eligibility required</td>
</tr>
<tr>
<td>ANTHRO 3470: Culture as Communication</td>
<td>(same as COMMUN 3470, LINGST 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction.</td>
<td>3</td>
<td>Sophomore standing</td>
</tr>
</tbody>
</table>
ANTHRO 3540: Human Biology and Life History
A general survey of human biology, focusing on the development of the individual from infancy to adult and the biology of human populations.

Credit Hours: 3
Prerequisites: one course in Anthropology or Biological Sciences

ANTHRO 3560: Plagues and Peoples
Overview of the ecology of human host-pathogen interactions and the influence of human culture on the transmission and spread of infectious diseases through time and in different environments.

Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent

ANTHRO 3600: North American Indian Culture
Comparative study of American Indians north of Mexico, emphasizes eastern United States.

Credit Hours: 3

ANTHRO 3610: Peoples of Canada
This course provides an anthropological approach to the culture and peoples of Canada. The course will include in depth studies of several First Nations People, Quebec, various recent immigrant populations, and the modern popular culture of Canada.

Credit Hours: 3

ANTHRO 3650: Aztec, Maya, and Inca Civilization
Origin of native Americans and development of American civilizations emphasizing Aztecs, Mayas, and Incas; rise of these civilizations known from archaeology, early European and early native American accounts, and the condition of the descendants today.

Credit Hours: 3
Prerequisites: sophomore standing

ANTHRO 3660: Peoples of the Andes
Archaeological and linguistic prehistory set the stage for the clash of Iberian and indigenous peoples whose descendants make up the Andean countries. Ethnographic studies provides a basis for their understanding.

Credit Hours: 3
Prerequisites: sophomore standing

ANTHRO 3680: Plants and People in Native America
Explores the present and past interactions between people and the plant world, covering use of plants as foods, medicines, and in rituals, and reviewing the origin of major food plants.

Credit Hours: 3
Prerequisites: sophomore standing

ANTHRO 3700: Cultures of Europe
Examines ethnic, linguistic, and folk cultural backgrounds of contemporary Europe and the articulation of local sociocultural units with national society and culture.

Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent

ANTHRO 3780: Cultures of Southeast Asia
Survey of peoples and cultures of Southeast Asia; topics include regional geography and prehistory, European colonialism, economic and social organization, religious practices, changing status of women, urban and rural poverty, and environmental transformations.

Credit Hours: 3

ANTHRO 4001: Topics in Anthropology-General
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4002: Topics in Anthropology - Biological/Physical/Mathematics
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4003: Topics in Anthropology - Behavioral Science
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4004: Topics in Anthropology - Social Science
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4005: Topics in Anthropology - Humanities
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4150: Special Themes in Folklore
(same as ENGLSH 4700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. May be repeated for a maximum of six hours with department’s consent.

Credit Hours: 3

ANTHRO 4160: Themes in African Diaspora Folklore
(same as ENGLSH 4710 and BL_STU 4710). Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group.

Credit Hours: 3
ANTHRO 4150 and ANTHRO 4160 may be repeated for a maximum of six hours with instructor's consent.

**Credit Hours:** 3  
**Prerequisites:** junior standing

### ANTHRO 4200: Environment and Archaeology
Study of Quaternary environments and cultural systems. Focuses on North American records emphasizing climate and biologic components of regional ecosystems; regional environmental reconstruction.

**Credit Hours:** 3  
**Prerequisites:** ANTHRO 2020 or ANTHRO 2021 or instructor's consent

### ANTHRO 4240: History of Archaeology
Growth of archaeology worldwide since AD 1700. Emphases include intellectual and theoretical developments, field and laboratory techniques, and major figures in the history of the discipline.

**Credit Hours:** 3  
**Prerequisites:** ANTHRO 2020 or ANTHRO 2021 or instructor's consent

### ANTHRO 4280: Archaeology of Religion
Examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmogonical constructs, worldview and ideology in the Americas.

**Credit Hours:** 3  
**Prerequisites:** ANTHRO 2020 and/or REL_ST 2100

### ANTHRO 4300: Comparative Social Organization
Cross-cultural comparison, analysis of social structures. Role of kinship, age, sex, locality, economics, religion and other factors in determining relationships between individuals and groups cross-culturally.

**Credit Hours:** 3  
**Prerequisites:** ANTHRO 2030 or instructor's consent

### ANTHRO 4320: Ecological and Environmental Anthropology
Cultural anthropological approaches to human-environment interaction; cultural adaptations to diverse environments; theoretical developments and current issues; cultural, social, and historical contexts of natural resource use.

**Credit Hours:** 3  
**Prerequisites:** junior or senior standing or instructor's consent

### ANTHRO 4340: Cultural Evolution and Change
Alternative hypotheses about the relationship between culture and evolution are evaluated in light of ethnographic evidence.

**Credit Hours:** 3  
**Prerequisites:** ANTHRO 2030 or instructor's consent

### ANTHRO 4350: Psychological Anthropology
Examines cross-cultural approaches to the study of perception, cognition, and personality; methods for gathering and validating data; examples from non-Western societies.

**Credit Hours:** 3

### ANTHRO 4360: Medical Anthropology
Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. Several non-Western health care systems are studied in detail.

**Credit Hours:** 3  
**Prerequisites:** junior or senior standing or instructor's consent

### ANTHRO 4370: Anthropology of Gender
(same as WGST 4370). The Anthropology of Gender introduces the student to the variation in the relationships between male and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

**Credit Hours:** 3

### ANTHRO 4380: Anthropological Theories of Religion
(same as REL_ST 4380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology, and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today.

**Credit Hours:** 3  
**Prerequisites:** ANTHRO 2030, ANTHRO 2100 or REL_ST 2100, or instructor's consent

### ANTHRO 4400: Language and Culture
(same as LINGST 4400). Interrelations between language, thought, culture, and society; role of language in cognition; methods and concepts of linguistics in cultural analysis.

**Credit Hours:** 3  
**Prerequisites:** ANTHRO 2040 or LINGST 2040 or instructor's consent

### ANTHRO 4412: Gender, Language, and Communication
(same as COMMUN 4412 and LINGST 4412). Relationship among gender, language, nonverbal communication, and culture.

**Credit Hours:** 3  
**Prerequisites:** junior standing or departmental consent

### ANTHRO 4420: Historical Linguistics
(same as LINGST 4420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.

**Credit Hours:** 3  
**Prerequisites:** junior or senior standing or instructor's consent

### ANTHRO 4500: Human Origins
History and theory in the study of human paleontology.

**Credit Hours:** 5  
**Prerequisites:** ANTHRO 2050 or ANTHRO 2052 or instructor's consent
ANTHRO 4540: Human Biological Variation
Human biological variation both among and within living populations. Evolutionary, genetic, ecological, demographic and especially cultural factors which contribute to biological variation.
Credit Hours: 3
Prerequisites: ANTHRO 2050 or ANTHRO 2051 or BIO_SC 1010 and MATH 1100 or MATH 1120

ANTHRO 4580: Evolutionary Medicine
Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class.
Credit Hours: 3
Prerequisites: lower level course in Biology or Biological Anthropology, junior or senior standing or instructor’s consent

ANTHRO 4560: Ethnographic Studies of Selected Cultures
Specific content varies with student interest, faculty availability. Will concentrate on peoples and cultures of one area such as East Asia, South Asia, Africa, North America, Mesoamerica, Oceania, Europe. Amplifies ethnographic knowledge gained in lower-level survey courses.
Credit Hours: 3
Prerequisites: junior standing or instructor’s consent

ANTHRO 4600: North American Archaeology
Ancient peoples and development of American Indian culture.
Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2021 or instructor’s consent

ANTHRO 4620: Prehistory of the Greater Southwest
The course will introduce students to the archaeology of aboriginal peoples of the American Southwest and northwestern Mexico. The emphasis will be on prehistoric culture development from the Paleoindians to the arrival of the Spanish. Ethnographic and modern peoples will be discussed as well.
Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2021

ANTHRO 4640: Prehistory of Mesoamerica
Archaeology and prehistory of Mesoamerica (Mexico and Northern Central America). Emphasis on archaeological evidence for development of human societies from late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s.
Credit Hours: 3

ANTHRO 4650: Prehistory of Mesoamerica
Archaeology and prehistory of Mesoamerica (Mexico and Northern Central America). Emphasis on archaeological evidence for development of human societies from late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s.
Credit Hours: 3

ANTHRO 4670: Prehistory of South America
Development of culture in South America from the Pleistocene to European contact.
Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2021, or junior or senior standing

ANTHRO 4680: Cultures and Peoples of the Amazon
Ethnographic survey of indigenous Amazonian cultures.
Credit Hours: 3
Prerequisites: ANTHRO 2050 or ANTHRO 2051 or BIO_SC 1010 and MATH 1100 or MATH 1120

ANTHRO 4690: Old World Prehistory
Beginnings of culture in the Old World through the early Iron Age.
Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2021, or instructor’s consent

ANTHRO 4720: Mesolithic, Neolithic, and Bronze Age Archaeology
Analysis of both hunter-gatherer and food-producing prehistoric sociocultural systems in western Eurasia and adjacent areas from the end of the Pleistocene until the development of iron metallurgy. Includes the symbolic material of these periods.
Credit Hours: 3
Prerequisites: junior or senior standing or instructor’s consent

ANTHRO 4740: Celtic and Iron Age Archaeology
Analysis of the pre-and protohistoric sociocultural systems of the Celts and other iron-using tribal cultures of western Eurasia from the inception of an iron based technology until the full historic period. Includes the symbolic material of these cultures.
Credit Hours: 3
Prerequisites: junior or senior standing or instructor’s consent

ANTHRO 4770: Asiatic Prehistory
Prehistory and early cultures of Asia excluding the Near East. Emphasis on Northern Asia, China, Japan, South and Southeast Asia and Oceania.
Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2021 or instructor’s consent

ANTHRO 4790: Culture and Society in South Asia
(same as S_A_ST 4790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include cast, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian diaspora.
Credit Hours: 3
Prerequisites: junior standing

ANTHRO 4800: Field Methods in Archaeology
Techniques of archaeological excavation; field surveying, recording, care and interpretation of materials.
Credit Hour: 1-8
Prerequisites: ANTHRO 2800 or equivalent

ANTHRO 4810: Paleoethnobotany
Application of ethnobotanical approaches in archaeology; techniques to recover and interpret floral remains (macroremains, phytoliths, pollen); research questions in ethnobotany; integration of ethnobiological and archaeological data. Critique of original works in the field emphasized.
Credit Hours: 3
Prerequisites: junior or senior standing or instructor’s consent
ANTHRO 4820: Zooarchaeology
Survey of specialized techniques for archaeological faunal analysis, including zooarchaeological sampling, taphonomy, study of paleoecology, and recognition of domestication.
Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2022 or instructor’s consent

ANTHRO 4826: Stone Artifact Analysis
Theory, methods, and techniques of studying lithic artifacts and deriving culturally meaningful interpretations. Emphasizes flaked artifacts. Includes physical examination, manufacture and experimentation with stone tools.
Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2022 or instructor’s consent

ANTHRO 4828: Archaeological Analysis of Ceramics
To introduce students to the basic methods and concepts used in the archaeological analysis of pottery. By the end of the semester students will understand the various ways that pottery is created and how archaeologists can use ceramics to gain insights into everything from the organization of craft production to trade to symbolism.
Credit Hours: 3
Prerequisites: ANTHRO 2020 and/or ANTHRO 2022

ANTHRO 4830: Ethnographic Methods
Relation of problems to techniques; surveys techniques of gathering data; discusses their limitations and potentials.
Credit Hours: 3
Prerequisites: ANTHRO 2030 or instructor’s consent

ANTHRO 4850: Practical Phonetics for Fieldwork
(same as LINGST 4850). Self-paced course using computer and tape recorded lessons from world’s languages. Teaches practical articulatory and transcription phonetics. Weekly meeting with instructor to monitor progress, resolve questions.
Credit Hours: 3
Prerequisites: junior standing or instructor’s consent

ANTHRO 4860: Techniques in Linguistic Analysis
(same as LINGST 4860). Problems in analyzing data from various languages.
Credit Hours: 3
Prerequisites: introductory course in Linguistics or instructor’s consent

ANTHRO 4870: Field Methods in Linguistics
(same as LINGST 4870 and ENGLSH 4670). Intensive training in collection and analysis of data taken from a native speaker of non-Indo-European language.
Credit Hours: 4
Prerequisites: 9 hours of Linguistics or instructor’s consent

ANTHRO 4880: Demographic Anthropology
The major topics considered in this course are basic demographic analysis, including life tables, models for population growth and stable population theory; fertility analysis; disease and fertility; disease in human populations; and paleodemography. Math Reasoning Proficiency Course.
Credit Hours: 3
Prerequisites: MATH 1100 or MATH 1120 and junior or senior standing or instructor’s consent

ANTHRO 4885: Anthropological Genetics
Population genetics theory and methods applied to human and primate evolution and variation.
Credit Hours: 3
Prerequisites: ANTHRO 2050 or ANTHRO 2051 and ANTHRO 2052, or BIO_SC 1500, or instructor’s consent

ANTHRO 4890: Human Skeletal Identification and Analysis
Students interested in archaeology, physical anthropology, and law enforcement will learn human osteological methods of analysis applied to bioarchaeological problems and modern forensic techniques for personal identification.
Credit Hours: 5
Prerequisites: ANTHRO 2050 or ANTHRO 2052 or instructor’s consent

ANTHRO 4894: Skeletal Biology
This course is designed to provide students advanced and in-depth training in skeletal biology. Basic bone biology will be studied and advanced methods of skeletal analysis applicable to forensic anthropology and bioarchaeology will be explored.
Credit Hours: 3
Prerequisites: ANTHRO 4890 or equivalent background in osteology and/or anatomy

ANTHRO 4940: Internship in Anthropology
Students will work for a semester in a community-based organization (NGO, nonprofit, for profit, or governmental). They will conduct a research study in coordination with that agency. Upon completion of the research study, students will prepare a final report to be given to the agency and turned in for course credit. The course coordinator will help students identify and make contact with interested organization and oversee their progress during the internship. Graded on S/U basis only.
Credit Hours: 3-6
Prerequisites: junior standing, Anthropology major, coordinator’s consent, 2.5 GPA

ANTHRO 4950H: Honors Research in Anthropology
Individual study and research leading to Honors in Anthropology. In consultation with instructor, student works on Honors Thesis. May be repeated for up to 6 credit hours.
Credit Hours: 3
Prerequisites: Anthropology majors only with junior or senior standing; Honors level GPA, instructor’s consent
ANTHRO 4950: Undergraduate Research in Anthropology
Advanced research approved by and under the direction of a departmental faculty member.
Credit Hour: 2-8
Prerequisites: junior or senior standing and instructor’s consent

ANTHRO 4960: Undergraduate Readings in Anthropology
Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.
Credit Hour: 1-99
Prerequisites: two courses in Anthropology and instructor’s consent

ANTHRO 4990: Capstone Seminar in Anthropology
Readings, discussions, and problems in the integration of the subfields of anthropology through theory and examples.
Credit Hours: 3
Prerequisites: Anthropology major and senior standing, or instructor's consent

ANTHRO 7001: Topics in Anthropology-General
Problems, topics, issues, or review of research; experimental development of new contact areas. Specific content varies depending on needs of faculty or students and will be announced in advance.
Credit Hours: 3

ANTHRO 7150: Special Themes in Folklore
(same as ENGLISH 7700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. May be repeated for a maximum of six hours. Instructor's consent for repetition.
Credit Hours: 3

ANTHRO 7160: Themes in African Diaspora Folklore
(same as ENGLISH 7710 and BL_STU 7710). Intensive study in a selected area of African Diaspora folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature; or the folklore of a particular group. ENGLISH 7700 and ENGLISH 7710 may be repeated for a maximum of six hours with instructor's consent.
Credit Hours: 3

ANTHRO 7200: Environment and Archaeology
Study of quaternary environments and cultural systems. Focuses on North American records emphasizing climate and biologic components of regional ecosystems; regional environmental reconstruction.
Credit Hours: 3

ANTHRO 7240: History of Archaeology
Growth of archaeology worldwide since AD 1700. Emphasis include intellectual and theoretical developments, field and laboratory techniques, and major figures in the history of the discipline.
Credit Hours: 3

ANTHRO 7280: Archaeology of Religion
(Same as REL_ST 7280) This course examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmological constructs, worldview and ideology in the Americas.
Credit Hours: 3
Prerequisites: ANTHRO 2020 and/or REL_ST 2100

ANTHRO 7300: Comparative Social Organization
Cross-cultural comparison, analysis of social structures. Role of kinship, age, sex, locality, economics, religion and other factors in determining relationships between individuals and groups cross culturally.
Credit Hours: 3

ANTHRO 7320: Ecological and Environmental Anthropology
Cultural anthropological approaches to human-environment interaction; cultural adaptations to diverse environments; theoretical developments and current issues; cultural, social, and historical contexts of natural resource use.
Credit Hours: 3

ANTHRO 7340: Cultural Evolution and Change
Alternative hypotheses about the relationship between culture and evolution are evaluated in light of ethnographic evidence.
Credit Hours: 3

ANTHRO 7350: Psychological Anthropology
Examines cross-cultural approaches to the study of perception, cognition, and personality; methods for gathering and validating data; examples from non-Western societies.
Credit Hours: 3

ANTHRO 7360: Medical Anthropology
Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. Several non-Western health care systems are studied in detail.
Credit Hours: 3

ANTHRO 7370: Anthropology of Gender
(Same as WGST 7370) The Anthropology of Gender Introduces the student to the variation in the relationships between males and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.
Credit Hours: 3

ANTHRO 7380: Anthropological Theory of Religions
(Same as REL_ST 7380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today.
Credit Hours: 3
ANTHRO 7400: Language and Culture
(same as LINGST 7400). Interrelations between language, thought, culture, and society; role of language in cognition; methods and concepts of linguistics in cultural analysis.

Credit Hours: 3

ANTHRO 7412: Gender, Language, and Communication
(same as COMMUN 7412 and LINGST 7412). Relationship among gender, language, nonverbal communication, and culture.

Credit Hours: 3

ANTHRO 7420: Historical Linguistics
(same as LINGST 7420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.

Credit Hours: 3

ANTHRO 7500: Human Origins
History and theory in the study of human paleontology.

Credit Hours: 5

ANTHRO 7540: Human Biological Variation
Human biological variation both among and within living populations. Evolutionary, genetic, ecological, demographic and especially cultural factors which contribute to biological variation.

Credit Hours: 3

ANTHRO 7580: Evolutionary Medicine
Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class.

Credit Hours: 3

ANTHRO 7600: Ethnographic Studies of Selected Cultures
Specific content varies with student interest, faculty availability. Will concentrate on peoples and cultures of one area such as East Asia, South Asia, Africa, North America, Mesoamerica, Oceania, Europe. Amplifies ethnographic knowledge gained in lower-level survey courses.

Credit Hours: 3

ANTHRO 7620: North American Archaeology
Ancient peoples and development of American Indian culture.

Credit Hours: 3

ANTHRO 7640: Prehistory of the Greater Southwest
The course will introduce students to the archaeology of aboriginal peoples of the American southwest and northwestern Mexico. The emphasis will be on prehistoric culture development from the Paleoindians to the arrival of the Spanish. Ethnographic and modern peoples will be discussed as well.

Credit Hours: 3

ANTHRO 7650: Prehistory of Mesoamerica
Covers the archaeology and prehistory of Mesoamerica (Mexico and Northern Central America). Emphasis on archaeological evidence for development of human societies from late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s.

Credit Hours: 3

ANTHRO 7670: Archaeology of South America
Development of culture in South America from the Pleistocene to European contact.

Credit Hours: 3

ANTHRO 7680: Cultures and Peoples of the Amazon
Ethnographic survey of indigenous Amazonian cultures.

Credit Hours: 3

ANTHRO 7700: Old World Prehistory
Beginnings of culture in the old world through the early Iron Age.

Credit Hours: 3

ANTHRO 7720: Mesolithic, Neolithic, and Bronze Age Archaeology
Analysis of both hunter-gatherer and food-producing prehistoric sociocultural systems in western Eurasia and adjacent areas from the end of the Pleistocene until the development of iron metallurgy. Includes the symbolic material of these periods.

Credit Hours: 3

ANTHRO 7740: Celtic and Iron Age Archaeology
Analysis of the pre-and protohistoric sociocultural systems of the Celts and other iron-using tribal cultures of western Eurasia from the inception of an iron based technology until the full historic period. Includes the symbolic material of these cultures.

Credit Hours: 3

ANTHRO 7770: Asiatic Prehistory
Survey of the prehistory and early cultures of Asia excluding the Near East. Emphasis on Northern Asia, China, Japan, South and Southeast Asia and Oceania.

Credit Hours: 3

ANTHRO 7790: Cultures and Society in South Asia
(same as S_A_ST 7790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include cast, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian Diaspora.

Credit Hours: 3
ANTHRO 7800: Field Methods in Archaeology
Techniques of archaeological excavation; field surveying, recording, care and interpretation of materials.
Credit Hour: 1-8

ANTHRO 7810: Paleoethnobotany
Application of ethnobotanical approaches in archaeology; techniques to recover and interpret floral remains (macroremains, phytoliths, pollen); research questions in ethnobotany; integration of ethnobiological and archaeological data. Critique of original works in the field emphasized.
Credit Hours: 3

ANTHRO 7820: Zooarchaeology
Survey of specialized techniques for archaeological/faunal analysis, including zoo archaeological sampling, taphonomy study of paleoecology, and recognition of domestication.
Credit Hours: 3

ANTHRO 7826: Stone Artifact Analysis
Theory, methods, and techniques of studying lithic artifacts and deriving culturally meaningful interpretations. Emphasizes flaked artifacts. Includes physical examination, manufacture and experimentation with stone tools.
Credit Hours: 3

ANTHRO 7828: Archaeological Analysis of Ceramics
To introduce students to the basic methods and concepts used in the archaeological analysis of pottery. By the end of the semester students will understand the various ways that pottery is created and how archaeologists can use ceramics to gain insights into everything from the organization of craft production to trade to symbolism.
Credit Hours: 3
Prerequisites: ANTHRO 2020 and/or ANTHRO 2022

ANTHRO 7830: Ethnographic Methods
Relation of problems to techniques; surveys techniques of gathering data; discusses their limitations and potentials.
Credit Hours: 3

ANTHRO 7850: Practical Phonetics for Fieldwork
(same as LINGST 7850). Self-paced course using computer and tape recorded lessons from world’s languages. Teaches practical articulatory and transcription phonetics. Weekly meeting with instructor to monitor progress, resolve questions.
Credit Hours: 3

ANTHRO 7860: Techniques in Linguistic Analysis
(same as LINGST 7860). Problems in analyzing data from various languages.
Credit Hours: 3

ANTHRO 7870: Field Methods in Linguistics
(same as LINGST 7870 and ENGLISH 7870). Intensive training in collection and analysis of data taken from a native speaker of non-Indo-European language.
Credit Hours: 4
Prerequisites: 6 hours of Linguistics and instructor's consent

ANTHRO 7880: Demographic Anthropology
The major topics considered in this course are basic demographic analysis, including life tables, models for population growth and stable population theory; fertility analysis; disease and fertility; disease in human populations; and paleodemography.
Credit Hours: 3

ANTHRO 7885: Anthropological Genetics
Population genetic theory and methods applied to human and primate evolution and variation.
Credit Hours: 3
Prerequisites: ANTHRO 2050 and ANTHRO 2052 or BIO_SC 1500

ANTHRO 7890: Human Skeletal Identification and Analysis
Students interested in archaeology, physical anthropology, and law enforcement will learn human osteological methods of analysis applied to bioarchaeological problems and modern forensic techniques for personal identification.
Credit Hours: 5

ANTHRO 7894: Skeletal Biology
This course is designed to provide students advanced and in-depth training in skeletal biology. Basic bone biology will be studied and advanced methods of skeletal analysis applicable to forensic anthropology and bioarchaeology will be explored.
Credit Hours: 3

ANTHRO 7940: Internship in Anthropology
Students will work for a semester in a community-based organization (NGO, nonprofit, for profit, or governmental). They will conduct a research study in coordination with that agency. Upon completion of the research study, students will prepare a final report to be given to the agency and turned in for course credit. The course coordinator will help students identify and make contact with interested organization and oversee their progress during the internship. Graded on S/U basis only.
Credit Hour: 3-6
Prerequisites: coordinator’s consent

ANTHRO 7950: Introduction to Post-Graduate Anthropology
How to succeed in graduate school and profession, and who is MU Anthropology. Introduces skills for success in graduate school, describes attributes of a professional anthropologist and how to find a job. Handouts and readings supplement discussions. Graded on S/U basis only.
Credit Hour: 1
ANTHRO 7960: Graduate Readings in Anthropology
Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.
Credit Hour: 1-99
Prerequisites: instructor's consent

ANTHRO 7990: Non Thesis Research in Anthropology
Original research not leading to the preparation of a thesis or dissertation.
Credit Hour: 1-99
Prerequisites: instructor's consent

ANTHRO 8001: Topics in Anthropology-General
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and is announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 8010: History of Anthropology I
Development of anthropological theories, methods, perspectives, major figures and contributions in cultural and linguistic subfields.
Credit Hours: 3

ANTHRO 8020: History of Anthropology II
Development of anthropological theories, methods, perspectives, major figures and contributions in archaeology and biological anthropology.
Credit Hours: 3

ANTHRO 8090: Masters Thesis Research in Anthropology
Advanced work leading to thesis. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: consent of major advisor

ANTHRO 8157: Seminar in Folklore
(same as ENGLISH 8700 and REL_ST 8700). Roots of folklore scholarship and methodology; their evolution in modern approaches to the study of oral, traditional, verbal genres; and their performance in natural folk groups. May repeat to twelve hours with departments consent.
Credit Hours: 3

ANTHRO 8187: Seminar in Ecological Adaptation
Relationships and interactions between humans and their environments, with emphasis on the physical and cultural adaptations to environment. May be repeated to 9 hours maximum.
Credit Hours: 3

ANTHRO 8257: Seminar in Ethnohistory
Introduction to the uses of historical documents and historical methods in anthropological research. May be repeated to 6 hours maximum.
Credit Hours: 3

ANTHRO 8287: Seminar in Theory and Methods in Archaeology
Application of theory and conceptual frameworks to archaeological studies drawn from both Old and New Worlds. May be repeated to 6 hours maximum.
Credit Hours: 3

ANTHRO 8357: Seminar in Psychological Anthropology
Focuses on developments in psychological anthropology, cross-cultural psychology. Special attention on cognition, perception, socialization, personality assessment, psycho-cultural change, psycho-linguistics, psychometrics, within cross-cultural contexts. May be repeated to 6 hours maximum.
Credit Hours: 3

ANTHRO 8387: Seminar in Health Anthropology
We survey the field of health behaviors from an anthropological perspective. We ask, what are health behaviors? and what models have social scientists proposed to account for such actions? May be repeated to 6 hours maximum.
Credit Hours: 3

ANTHRO 8487: Seminar in Anthropological Linguistics
(same as LINGST 8487). Topics: Ethnolinguistics, linguistic prehistory, pidgin and Creole languages, linguistic theories and cultural and cultural analysis. French structural anthropology. May be repeated for 9 hours maximum.
Credit Hours: 3

ANTHRO 8587: Seminar in Physical Anthropology
Readings and discussion concerning current problems in human and nonhuman primate evolution, with emphasis on taxonomy, morphology, and behavior. May be repeated to 9 hours maximum.
Credit Hours: 3

ANTHRO 8687: Seminar in Cultural Dynamics
Focuses on geographical, topical, and/or theoretical developments within cultural anthropology. May be repeated to 6 hours maximum.
Credit Hours: 3

ANTHRO 8787: Seminar in Old World Archaeology
Intensive studies in application of anthropological concepts to problems in Old World archaeology and prehistory. May be repeated to 9 hours maximum.
Credit Hours: 3

ANTHRO 8857: Scientific Writing in Anthropology
Students will be taught to construct research papers that reflect logic, organization, and clarity. Topics covered include outline preparation, syntax, punctuation, sentence construction, and correct reference citation.
Credit Hours: 3
ANTHRO 8887: Seminar in Anthropological Methods
Focuses on specific methods/techniques for collecting and analyzing data in archaeological, biological, linguistic, and/or cultural anthropology. May be repeated to 6 hours maximum.
Credit Hours: 3

ANTHRO 8888: Analyzing Anthropological Data I
Provides students with the conceptual and analytic tools necessary to conduct and evaluate the analysis of anthropological data. Examples gleaned from archaeology, bioanthropology, ethnography, and linguistics will provide a broad perspective of the application and utility of the various methods discussed.
Credit Hours: 3

ANTHRO 8889: Analyzing Anthropological Data II
This course introduces a variety of conceptual tools and advanced quantitative methods that anthropologists use to analyze their data. It includes an introduction of common software packages used to manipulate and analyze anthropological data.
Credit Hours: 3
Prerequisites: ANTHRO 8888 or grad-level intro stats or instructor's consent

ANTHRO 8960: Graduate Readings in Anthropology
Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.
Credit Hour: 1-99
Prerequisites: instructor's consent

ANTHRO 8987: Seminar in Formal Anthropological Research Design
Methods of fitting statistical and formal research designs to quantitative and qualitative data discussed and illustrated, with research by participants. May be repeated to 9 hours maximum.
Credit Hours: 3
Prerequisites: introductory course in statistics

ARCHST 1005: Topics in Architectural Studies - Humanities
Organized study of selected topics in architectural studies. Particular topic and earnable credit may very by semester. May be repeated for credit up to 6 credit hours.
Credit Hour: 1-99
Prerequisites: instructor's consent

ARCHST 1100: Visual Design
Design study on introduction to basic design and visual composition and their application to creation of two- and three-dimensional abstract and/or functional design. Studio exercises expressed through drawings and abstract models, using various media.
Credit Hours: 3

ARCHST 1200: Architectural Drafting and Working Drawings
Beginning drafting including equipment and materials; lettering; floor plans, sections, elevations; orthographic and axonometric drawings; working drawings; and details.
Credit Hours: 3

ARCHST 1600: Fundamentals of Environmental Design
Survey of the architectural environment emphasizing design fundamentals such as use, aesthetics, stability of structures and human relationships with places and time.
ARCHST 2005: Topics in Architectural Studies - Humanities
Organized study of selected topics in architectural studies. Particular topic and earnable credit may vary by semester. May be repeated for credit up to 6 credit hours.
Credit Hours: 3
Prerequisites: ENGLSH 1100
Credit Hour: 1-99
Prerequisites: instructor’s consent

ARCHST 2085: Problems in Architectural Studies
Supervised independent work.
Credit Hours: 3
Prerequisites: instructor’s consent

ARCHST 2100: Understanding Architecture and the American City
Analysis of the American city and its architecture.
Credit Hours: 3

ARCHST 2210: Understanding Visualization for Animated Films
Provides a critical overview of design and visualization techniques in animated film making. Emphasizes the role of built environment and spatial design features.
Credit Hours: 3

ARCHST 2230: Design Communication I
Beginning studio course in techniques and conventions of graphic communication as an aid in the design process for interior designers.
Credit Hours: 3
Prerequisites: ARCHST 1200

ARCHST 2310: Building Systems
Integrated building systems: structure, construction, technology, comfort; including voice-data communication, safety, floor, wall, ceiling, mechanical, electrical, and plumbing systems; and project estimating.
Credit Hours: 3
Prerequisites: ARCHST 1200, MATH 1100 or MATH 1120

ARCHST 2315: Introduction to Building Systems Laboratory
Building system renovations, materials, processes, finishes, and applications testing: furniture design, fabrication, finishing, lighting, concrete and masonry, wood and steel light framing construction, and mock-up fabrication and testing. All equipment training and safety is covered in this introductory course.
Credit Hour: 1

ARCHST 2316: Advanced Building Systems Lab
Advanced exposure to building system renovations, materials, processes, finishes, and applications testing: furniture design, fabrication, finishing, lighting, concrete and masonry, wood and steel light framing construction, and mock-up fabrication and testing. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: ARCHST 2315

ARCHST 2811: Studio I
Application of basic design and composition to built form. Studio exercises in two and three dimensions using various media relating to usable spaces. Formation of design concept, development of form and space, and application in built environment.
Credit Hours: 4
Prerequisites: ARCHST 1100, ARCHST 1200, ART_DRAW 1050 and admission to Studio Sequence in Architectural Studies

ARCHST 3100: Color and Light
The theory, application, and specification of color and light for interior and architectural design. Includes assigned lab exercises for color and light portfolio.
Credit Hours: 3
Prerequisites: 3.0 credit visual literacy coursework Architectural Studies, Art, Art History or equivalent

ARCHST 3182: Studio II
Application of basic design principles to built forms and functional spaces. Identification and manipulation of elements of design, understanding spatial relationships between human body and spatial enclosures related to built forms. Spatial organization and familiarity with role of immediate context.
Credit Hours: 4
Prerequisites: ARCHST 2811

ARCHST 3230: Advanced Design Communication Using BIM
Advanced course in techniques and conventions of computer aided design (CAD) and Building Information Modeling (BIM) for contemporary design process.
Credit Hours: 3
Prerequisites: ARCHST 2230

ARCHST 3371: Design Resource Management
Field experience (5 hours per week) in organization and management of resources used by interior designers, including references, product information, and samples of materials and finishes.
Credit Hour: 1
Prerequisites: restricted to Architectural Studies students only

ARCHST 3600: Environmental Analysis
Discover through analytical methods of primary organizational factors which operate in a building and reveal the preoccupations of designer. Analytical approach investigates design principles by means of dissection.
Credit Hours: 3
Prerequisites: ARCHST 1600
ARCHST 3860: Human Factors Programming
Design Programming for Human Factors using a Case Study.
Credit Hours: 3
Prerequisites: ARCHST 1600

ARCHST 4001: Topics in Architectural Studies
Selected current topics in field of interest.
Credit Hour: 1-99

ARCHST 4085: Problems in Architectural Studies
Supervised independent work.
Credit Hour: 1-99
Prerequisites: 3000-level course in field of problem and junior or senior standing and instructor's consent

ARCHST 4230: Computer Graphic Application for Design I
Applications of computer graphics for design and art; includes visualization, animation and creative development. May repeat up to 12 credit hours maximum.
Credit Hours: 3
Prerequisites: junior standing

ARCHST 4320: Materials, Methods and Products
Inherent qualities of materials used in the design of interior environments. Manufacturing, application, and installation methods. Focus on environmentally sensitive materials.
Credit Hours: 3
Prerequisites or Corequisites: ARCHST 2310 or instructor's consent

ARCHST 4323: Sustainable Technologies and Systems
An in-depth study of ecologically-sensitive and energy-efficient strategies used in building and interiors.
Credit Hours: 3
Prerequisites: senior standing required

ARCHST 4330: Compliance and Specifications
Application of laws, codes, regulations, standards in specifying for life safety, barrier-free and universal design, lighting, human factors, and contract documents.
Credit Hours: 3
Prerequisites: ARCHST 2220, ARCHST 4320, ARCHST 4813 or ARCHST 4823

ARCHST 4355: Recent Trends in Digital Media I
Recent Trends in Digital Media I
Credit Hour: 1-99

ARCHST 4411: Study Abroad in Architectural History
Discovery of historic architecture through on-site tour of timeless cities and places. May be repeated for credit.
Credit Hour: 1-3
Prerequisites: instructor's consent

ARCHST 4420: History of the Designed Environment after 1750
An in-depth study of the designed environment, including housing, interiors, and furniture of the major historical periods from the Industrial Revolution to today.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or AR_H_A 1120

ARCHST 4430: Guiding Design with Historic Preservation
Approaches to historic preservation; historic roots of architecture and interiors; regulations and design guidelines governing intervention; assessing significance of historic properties.
Credit Hours: 3
Prerequisites or Corequisites: American History or Government, or Art History, or instructor's consent

ARCHST 4435: History of the Designed Environment to 1750
An in-depth study of the designed environment including interiors, architecture, art, and the decorative arts within the major historical periods and cultural context from prehistory to the Industrial Revolution.
Credit Hours: 3
Prerequisites: ARCHST 4430 or AR_H_A 1110 or AR_H_A 1120

ARCHST 4440: Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution
Analysis of historical exemplars of architecture, interiors and furniture design offering strategies for approaching contemporary design problems. Covers design precedents from industrial revolution to contemporary design.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or AR_H_A 1120, or ARCHST 4430

ARCHST 4550: Visual Presentation for Design
Emphasizes principles and techniques for effective visual design presentation. Focuses on concepts of design, layout, storytelling, critiques, and hands on exercise.
Credit Hours: 3

ARCHST 4555: Recent Trends
Upper-division students seeking additional knowledge in specific subject matter areas including digital media software.
Credit Hour: 1-99

ARCHST 4620: Environment and Behavior
Evaluate relationships between human behavior and environmental design. Survey of environment and behavior theoretical foundations examining how these concepts translate into a more responsive theory of design.
Credit Hours: 3
Prerequisites: junior standing
ARCHST 4630: Shaping Human Settlements
Review classic designs and designers, key concepts and enduring issues of community design within the overall framework of environmental design.
Credit Hours: 3
Prerequisites: junior standing

ARCHST 4660: Housing Concepts and Issues
Evaluate housing policies, regulations, codes, programs; global and ecological perspectives of environment and behavior; historic preservation; financial issues; trends and projections.
Credit Hours: 3
Prerequisites: junior standing

ARCHST 4700: Place-Making in Community Design
Ideologies, case studies and participatory methods on place-making in community design. Use processes to design a place-making scheme in actual community project.
Credit Hours: 3
Prerequisites: junior standing

ARCHST 4710: Design Business Practices
Analysis of the basic professional, human, and business skills necessary for the successful design practice. Pre- or Co-requisites of Studio IV and anticipated graduation during final academic year.
Credit Hours: 3

ARCHST 4813: Interiors Studio III
Spatial morphology, organization pattern, construction methods, materials, systems, and processes and integration with total design processes. Space planning and spatial manipulation in response to social, environmental, functional, and aesthetics specific to interiors.
Credit Hours: 4
Prerequisites: instructor’s consent required
Corequisites: ARCHST 3182 and ARCHST 3230

ARCHST 4814: Interiors Studio IV
Continuation of ARCHST 4813. Manipulation of form and space responding to programmatic functions and activities, and constraints imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space to multiple-function layered spaces - both vertically and horizontally.
Credit Hours: 4
Prerequisites: ARCHST 4813

ARCHST 4815: Construction Documents and Building Information Modeling Studio
Studio of how materials, systems, and assemblies reinforce and extend intentions of designers. Course teaches strategies and techniques for integration and coordination of the building components and details in construction documents and building information modeling.
Credit Hours: 4
Prerequisites or Corequisites: ARCHST 4814 or ARCHST 4824

ARCHST 4823: Architectural Studio III
Continuation of ARCHST 3182. Spatial morphology, organization pattern, construction methods, materials, systems, and processes and integration with total design process. Space planning and spatial manipulation in response to social, environmental, functional, and aesthetics specifics to architecture.
Credit Hours: 4
Prerequisites: ARCHST 3182; ARCHST 3230

ARCHST 4824: Architectural Studio IV
Continuation of ARCHST 4823. Manipulation of form and space responding to programmatic functions and activities, and constraints imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space to multiple-function layered spaces - both vertically and horizontally.
Credit Hours: 4
Prerequisites: ARCHST 4823

ARCHST 4860: Programming for Thesis Design Studio
Develop written comprehensive program for thesis design studio project. Supervised by student-selected committee - one departmental thesis advisor and at least one additional faculty member.
Credit Hour: 0-1
Prerequisites: ARCHST 3860 and ARCHST 4814 or ARCHST 4824

ARCHST 4940: Internship in Environmental Design
Field experience in design under professional and educational supervision. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor’s consent

ARCHST 4960: Readings in Architectural Studio
Readings in recent research materials.
Credit Hour: 1-99

ARCHST 4961: Design Research and Service Design
(cross-leveled with ARCHST 7961). Provides an overview of applied research methods for design and development of products, services and environments. Introduces human-centered approach to design research and Communication of research findings to informed design concepts.
Credit Hours: 3
Prerequisites: senior standing and instructor’s consent

ARCHST 4962: Information Visualization and Visual Analytics
(cross-leveled with ARCHST 7962). Foundation for information visualization and deals with external representation and interactive manipulation of information, data or artifacts using digital tools to enhance communication, analytical reasoning and decision-making.
Credit Hours: 3
Prerequisites: senior standing and instructor’s consent

ARCHST 4963: Human Factors Research for Design
(cross-leveled with ARCHST 7963). Investigate effect of people’s physical psychological, social functions in environments of differing scales. Use
research techniques of photo-interviewers, mapping, and user analysis to develop an appropriate program for redesign.

Credit Hours: 3  
Prerequisites: ARCHST 3860 or instructor’s consent

ARCHST 4964: Design Thinking and Creative Process  
(cross-leveled with ARCHST 7964). Analysis of how designers think, solve design problems, and engage in the creative process. Includes design methods, design cognition computations, and design protocol studies.

Credit Hours: 3  
Prerequisites: ARCHST 4813 or ARCHST 4823 or instructor’s consent

ARCHST 4990: Thesis Design Studio  
Capstone experience on a single comprehensive project. Objective is to enable synthesis of previous course work by addressing a design problem defined in ARCHST 4860.

Credit Hours: 4  
Prerequisites: ARCHST 4860, ARCHST 4814 or ARCHST 4824

ARCHST 7001: Topics in Environmental Design  
Selected current topics in field of interest.

Credit Hour: 1-99

ARCHST 7085: Problems in Environmental Design  
Supervised independent work.

Credit Hour: 1-99  
Prerequisites: 3000-level course in field of problem and instructor’s consent

ARCHST 7100: Allied Architecture and Urban Design  
Overview of the built environment in relation to architecture and allied design. Emphasis on architecture, interior, landscape and urban design studies.

Credit Hours: 3

ARCHST 7230: Computer Graphic Application for Design I  
Applications of computer graphics for design and art; includes visualization, animation and creative development. May repeat up to 12 credit hours maximum.

Credit Hours: 3

ARCHST 7232: Graduate Design Communication I  
Studio course in techniques and conventions of graphic communication as an aid in the design process of built forms.

Credit Hours: 3

ARCHST 7310: Graduate Building Systems  
Integrated building systems; structure construction, technology, comfort; including voice-communications, safety, floor, wall, ceiling, mechanical, electrical, and plumbing systems, project estimating and management.

Credit Hours: 3  
Prerequisites: MATH 1100 or MATH 1120

ARCHST 7315: Graduate Systems Laboratory  
Experimental learning setting involving building construction systems, renovation, materials and finishes testing and experimentation. Focus on hands-on opportunities investigating building technology properties in detail. Laboratory 3 hrs/week.

Credit Hour: 1-9

ARCHST 7320: Materials, Methods and Products  
Inherent qualities of materials used in the design of interior environments. Manufacturing, application, and installation methods. Focus on environmentally sensitive materials.

Credit Hours: 3  
Prerequisites: MATH 1100 or MATH 1120

ARCHST 7323: Sustainable Technologies and Systems  
An in-depth study of ecologically-sensitive and energy-efficient strategies used in buildings and interiors.

Credit Hours: 3

ARCHST 7325: Energy-Efficient Building Design  
This course is a broad study of energy use and energy-efficient strategies for buildings. The course will cover the fundamentals of climate-based design, energy-efficient heating/cooling/daylighting strategies, alternative energy systems applicable to buildings, energy auditing/modeling/verification, applicable building energy codes, and high performance building technologies. Recommended for graduate students with undergraduate degrees and experience in engineering, architecture, and/or building science.

Credit Hours: 3

ARCHST 7333: Compliance and Specifications  
Application of laws, codes, regulations, standards in specifying for life safety, barrier-free and universal design, lighting, human factors, and contract documents.

Credit Hours: 3

ARCHST 7355: Recent Trends in Digital Media I  
Recent Trends in Digital Media I

Credit Hour: 2-4

ARCHST 7410: History of the Designed Environment to 1750  
An in-depth study of the designed environment including housing interiors, and furniture of the major historical periods from prehistory to the Industrial Revolution.

Credit Hours: 3

ARCHST 7411: Study Abroad in Architectural History  
Discovery of historic architecture through on-site tour of timeless cities and places. May be repeated for credit.

Credit Hour: 1-99  
Prerequisites: instructor’s consent

</table>
ARCHST 7961: Design Research and Service Design (cross-leveled with ARCHST 4961). Provides an overview of applied research methods for design and development of products, services and environments. Introduces human-centered approach to design research and communication of research findings to inform design concepts.

Credit Hours: 3

ARCHST 7962: Information Visualization and Visual Analytics (cross-leveled with ARCHST 4962). Foundation for information visualization and deals with external representation and interactive manipulation of information, data or artifacts using digital tools to enhance communication, analytical reasoning and decision-making.

Credit Hours: 3

ARCHST 7963: Human Factors Research for Design (cross-leveled with ARCHST 4963). Investigate effect of people’s physical psychological, social functions in environments of differing scales. Use research techniques of photo-interviewers, mapping, and user analysis to develop an appropriate program for redesign.

Credit Hours: 3

ARCHST 7964: Design Thinking and Creative Process (cross-leveled with ARCHST 4964). Analysis of how designers think, solve design problems, and engage in the creative process. Includes design methods, design cognition and computations, and design protocol studies.

Credit Hours: 3

ARCHST 8001: Topics in Environmental Design
Selected current topics in field of interest.

Credit Hour: 1-99

ARCHST 8050: Research Methods in Environmental Design
A comparative study of quantitative and qualitative methods in environmental design with emphasis on research results and analyses. Lectures and seminar discussions.

Credit Hours: 3
Prerequisites: 12 hours advanced design

ARCHST 8085: Problems in Environmental Design
Credit Hour: 1-99
Prerequisites: 4000-level course in field of problem and instructor’s consent

ARCHST 8090: Master’s Research in Environmental Design
Independent research leading to a creative project. Graded on S/U basis only.

Credit Hour: 1-99

ARCHST 8230: Computer Graphic Application for Design II
Creative computer graphic modeling, rendering and animation projects related to the academic background and interests of individual students. May be repeated to 6 hours maximum.

Credit Hours: 3

ARCHST 8233: Graduate Design Communication II
Advanced studio in techniques and conventions of graphic communication as aides in the design process.

Credit Hours: 3
Prerequisites: ARCHST 7232 or advisor’s consent

ARCHST 8600: Graduate Environmental Analysis
Analysis of design principles and organizational factors operating in a building by means of dissection. Volumetric disposition, circulation pattern, axes, structural system, materials, purpose, and symbolism.

Credit Hours: 3

ARCHST 8630: Philosophy of Environmental Design Research
Formal environmental design theory concerning historical precedents, current aesthetic trends, and design processes. Assignments investigate philosophical influences, architectonic vocabularies, and communication of idea and artifact. May be repeated up to 12 credit hours.

Credit Hours: 3

ARCHST 8650: Theories in Architectural and Interior Design
Architectural and interior design theory is explored as a field of inquiry. Students become familiar with a theoretical framework that is sensitive to the play between the principles of a building (what it is as a design) and the circumstances of a building (what it becomes to be).

Credit Hours: 3

ARCHST 8820: Graduate Digital Design Studio
Graduate level design experience emphasizing project complexity, design skill refinement, and use of digital media for design representation.

Credit Hour: 1-99

ARCHST 8830: Digital Design Studio II
Advanced graduate level design experience emphasizing design, documentation, and representation using digital media. Optional development of graduate thesis project may be scheduled in this studio.

Credit Hours: 4

ARCHST 8840: Graduate Design Studio
Advanced graduate level design experience emphasizing project complexity, design skill refinement, and optional development of thesis project strategies.

Credit Hour: 1-99
Prerequisites: instructor’s consent

ARCHST 8850: Seminar in Environmental Design
Reports, discussion of recent work in area of concentration.

Credit Hour: 1-4

ARCHST 8887: Environment and Behavior II
Synthesis of environment and behavior themes in design research and application to professional practice. Research on socio-behavioral
phenomena, user groups, places. Emphasis on integrated interactive character of elements.

Credit Hours: 3

ARCHST 8950: Qualitative Research Methods
Explores qualitative research methods as foundation for subsequent study. Focuses on qualitative research of the built environment. Course may be repeated for credit.

Credit Hours: 3

ARCHST 8960: Readings in Environmental Design
Readings in recent research materials.

Credit Hour: 1-99
Prerequisites: ARCHST 4960 or ARCHST 7960

ARCHST 8990: Thesis Project Proposal
The formal opportunity to express the intent and scope of the thesis project.

Credit Hour: 1
Prerequisites: instructor’s consent

ARCHST 9001: Topics in Environmental Design
Selected current topics in field of interest.

Credit Hour: 1-99

ARCHST 9015: Problemas in Environmental Design
Credit Hour: 1-99
Prerequisites: 4000-level course in field of problem and instructor’s consent

ARCHST 9090: Doctoral Research in Environmental Design
Independent research leading to thesis or dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

ARCHST 9095: Recent Trends in Environmental Design
For students seeking additional knowledge and understanding in specific subject matter areas.

Credit Hour: 1-99

ARCHST 9990: Dissertation Proposal
A formal dissertation proposal is written and presented to the dissertation committee for approval.

Credit Hour: 1
Prerequisites: instructor’s consent

ARCHST 9995: Pilot Project for Dissertation
Working with advisor, student proposes, conducts, and reports the findings from a pilot study germane to the dissertation topic in preparation for the dissertation research.

Credit Hour: 1-99
Prerequisites: instructor’s consent

---

Art History And Archaeology
(AR_H_A)

AR_H_A 1005: Undergraduate Topics in Art History and Archaeology- Humanities
Special studies in Art History and Archaeology.

Credit Hour: 1

AR_H_A 1010: Introduction to Museum of Art and Archaeology, UMC
This course is a brief introduction to the Museum of Art and Archaeology on Francis Quadrangle. Special attention will be given to the history of the Museum, to its operation and to its collection. Guest lecturers from the museum will provide first hand accounts of their contributions to the day-to-day operations of the Museum and to the academic mission of the University.

Credit Hour: 1

AR_H_A 1020: Giotto and the Arena Chapel
This course is a brief introduction to one of the major monuments of western art, the Area (or Scrovegni) Chapel of Giotto di Bondone. Special attention will be given to stories about him by Renaissance authors.

Credit Hour: 1

AR_H_A 1030: Early Works of Michelangelo
This course is a brief introduction to the life and work of Michelangelo. Special attention will be given to his early works and to stories about him, especially those by Giorgio Vasari in his Lives of the Artist, Florence, 1568.

Credit Hour: 1

AR_H_A 1040: Rembrandt
This course is a brief introduction to the life and work of the seventeenth-century Dutch painter Rembrandt van Rijn. Special attention is give to the appreciation of his art by his contemporaries.

Credit Hour: 1

AR_H_A 1105: Undergraduate Topics in Art History and Archaeology
Special studies in Art History and Archaeology.

Credit Hours: 3

AR_H_A 1110: Ancient and Medieval Art
Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe.

Credit Hours: 3

AR_H_A 1110H: Ancient & Medieval Art - Honors
Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe.

Credit Hours: 3
Prerequisites: Honors eligibility required

AR_H_A 1120: Renaissance through Modern Art
Introductory survey of architecture, sculpture and painting of Europe and America from the Renaissance to Modern times.
Credit Hours: 3

AR_H_A 1120H: Renaissance through Modern Art - Honors
Introductory survey of architecture, sculpture and painting of Europe and America from the Renaissance to Modern times.
Credit Hours: 3
Prerequisites: Honors eligibility required

AR_H_A 1230: Introduction to Asian Arts
(same as HIST 1820, REL_ST 1820, S_A_ST 1152). This course is an introduction to the literature and visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.
Credit Hours: 3

AR_H_A 2005: Topics Art History and Archaeology - Humanities
Study of special topics in Art History and Archaeology.
Credit Hour: 1-3

AR_H_A 2150: The Art of the Book
Introduction to the illustrated book as a locus of artistic style, cultural currency, and visual literacy.
Credit Hours: 3

AR_H_A 2230: Introduction to the Arts of Islam
Architecture, decorative arts and painting of the Muslim world from the seventh to the 19th century. The formation of Islamic art and its relationships with religion, philosophy and symbolism.
Credit Hours: 3

AR_H_A 2410: Ancient Technology
Engineering, architecture, and military technology in the ancient world.
Credit Hours: 3

AR_H_A 2720: African-American Visual Culture
(Same as BL_STU 2720) This course introduces students to African-American art history, visual culture, and material culture in the cultural, political, and historical contexts. Specific focuses may include Harlem Renaissance, the Black Arts Movement, and other topics.
Credit Hours: 3

AR_H_A 2830: American Art and Architecture
Architecture, sculpture, painting of America from 17th century to present day.
Credit Hours: 3

AR_H_A 2850: Introduction to Visual Culture
Introduction to the problems of understanding, analyzing, and writing about visual culture.
Credit Hours: 3

AR_H_A 2860: The Lives of Objects
Introduction to the problems of understanding, analyzing and writing about art history and material culture.
Credit Hours: 3

AR_H_A 2940: Archaeological Methods
Methods of excavating various types of sites; recording, preserving their materials.
Credit Hour: 2-6
Prerequisites: instructor’s consent

AR_H_A 2960: Special Readings in Art History and Archeology
Independent readings and research selected in consultation with supervisory faculty.
Credit Hour: 1-3
Prerequisites: instructor’s consent

AR_H_A 3005: Topics in Art History and Archaeology- Humanities
Selected studies in various facets of art history and archaeology.
Credit Hour: 1-3

AR_H_A 3005H: Topics in Art History and Archaeology- Humanities - Honors
Selected studies in various facets of art history and archaeology.
Credit Hour: 1-3
Prerequisites: AR_H_A 1110, AR_H_A 1120, AR_H_A 2830 as appropriate. Honors Eligibility Required

AR_H_A 3010: Study Abroad in Art History and Archaeology
Instruction in art history, architecture, or archaeology takes place in a foreign country or countries. Trips are led and taught by University of Missouri faculty.
Credit Hour: 3-6
Prerequisites: sophomore standing or higher and departmental consent

AR_H_A 3120: Art and Gender in Antiquity
Comparative survey of art and archaeology in Egypt, Greece, and Rome to understand how societies constructed gender through material resources and how cultural perceptions of gender affected individual lives and behaviors. Emphasis on research methods and evaluation of sources.
Credit Hours: 3

AR_H_A 3210: Near Eastern and Egyptian Art and Archaeology
General survey of material culture of the Near East and Egypt from the earliest times to the early Iron Age.
AR_H_A 3310: Greek Art and Archaeology
General survey of material culture in Greece from earliest times to the Hellenistic period.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3410: Roman Art and Archaeology
General survey of material culture in the Roman world from earliest times through the 3rd century.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3510: Byzantine and Islamic Art and Archaeology
General survey of the visual world of the Middle Ages in southwest Asia and the east Mediterranean, from late antiquity through the rise of the Ottoman empire.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3520: Early Medieval Art and Archaeology
An investigation of the arts of western Europe during the first millennium, when the unifying traditions of Rome were transformed by the diverse cultures of her Northern neighbors.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3530: Late Medieval Art
General survey of the art and architecture of Europe from Charlemagne through the 14th century.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3540: Northern Renaissance Art
General survey of the art and architecture of Northern Europe from the 14th through the 16th century.
Credit Hours: 3
Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3560: Baroque Art
General survey of 17th century European architecture, painting and sculpture.
Credit Hours: 3
Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3620: Italian Renaissance Art
General survey of the architecture, painting and sculpture of Italy from the 14th through the 16th century.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or AR_H_A 1120 or equivalent

AR_H_A 3630: Northern Renaissance Art
General survey of the art and architecture of Northern Europe from the 14th through the 16th century.
Credit Hours: 3
Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3640: Baroque Art
General survey of 17th century European architecture, painting and sculpture.
Credit Hours: 3
Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3720: Cities in the Western Imagination
Interdisciplinary introduction to the forms, functions, and meanings of cities in Europe and the Americas from ancient to modern times; plans and predictions for the future also considered. Emphasis is placed on cities as fields for imaginative activity on the part of those who have designed, built, used, and interpreted them.
Credit Hours: 3

AR_H_A 3730: Eighteenth Century European Art
General survey of 18th-century European painting, sculpture and architecture.
Credit Hours: 3
Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3740: Nineteenth Century European Art
General survey of 19th-century European painting, sculpture and architecture.
Credit Hours: 3
Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3750: Modern Art in Europe and America
General survey of international directions in painting, sculpture, and architecture from 1885 to ca. 1940.
Credit Hours: 3
Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3760: Contemporary Art
General survey of painting, sculpture, and architecture from the Second World War to the present.
Credit Hours: 3
Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3775: The Ancient World on Film
(same as CL_HUM 3775 and FILM_S 3775) This course explores how classical antiquity has been represented in twentieth and twenty-first-century film, with particular emphasis on the ways in which ancient narratives and iconography have been appropriated by filmmakers to address contemporary cultural issues.
Credit Hours: 3
Prerequisites: Prior 2000 level coursework in Classical Humanities, Art History and Archaeology, or Film Studies. Instructor's consent required

AR_H_A 3780: Architecture in Film
(same as FILM_S 3780) Filmmakers use architecture to convey meaning on symbolic, psychological, and ideological levels. Using architectural history and theory, in conjunction with weekly film screenings from a variety of genres, this course explores how architecture operates within film.
Credit Hours: 3

AR_H_A 3785: Arts and Artists on Film
(same as FILM_S 3785) This course explores representations of art and artists in film, including documentary films, fictionalized films, and films made by artists.
AR_H_A 3830: American Art and Culture, 1500-1820
General survey of American visual culture - painting, sculpture, architecture-between 1500 and 1820.
Credit Hours: 3
Prerequisites: AR_H_A 1120 or AR_H_A 2830 or equivalent

AR_H_A 3840: American Art and Culture, 1820-1913
General survey of American visual culture - painting, sculpture, architecture, photography - between 1820-1913.
Credit Hours: 3
Prerequisites: AR_H_A 1120 or AR_H_A 2830 or equivalent

AR_H_A 3850: American Art and Culture, 1913-Present
General survey of American visual culture - painting, sculpture, architecture, photography, advertising, film, new media - between 1913 and the present.
Credit Hours: 3
Prerequisites: AR_H_A 1120 or AR_H_A 2830 or equivalent

AR_H_A 4005: Topics in Art History and Archaeology-Humanities
Special studies in art history/archaeology; covers subjects not included in regularly offered courses.
Credit Hour: 1-99
Prerequisites: instructor’s consent

AR_H_A 4120: Women, Art and Society
(same as WGST 4120). Analysis of the careers and works of women artists, and images of women (by female and male artists), in selected eras.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4200: Minor Arts of Antiquity
Discussion of selected minor arts and crafts of the Greco-Roman world.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4360: Greek Sculpture
Survey of sculptor’s art in Aegean and Classical world from earliest times to Hellenistic period.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4420: Minor Arts of Antiquity
Discussion of selected minor arts and crafts of the Greco-Roman world.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4440: Roman Architecture
The history of Roman architecture, origin and development of forms and techniques, major monuments in Rome and its provinces through the 3rd century after Christ.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4460: Roman Sculpture
The origins and development of sculpture in the Roman Republic and the Roman Empire.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4490: Late Antique Art and Archaeology
Exploration of the material culture of the Mediterranean world from the 3rd century to Iconoclasm.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4510: Byzantine Art and Archaeology
Historical investigation of Byzantine material culture in the eastern Mediterranean and Russia, from the outbreak of Iconoclasm to the Ottoman conquest.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4520: Art of the Dark Ages
Survey of the visual arts of western Europe during the period of migrations, from the fall of Rome to the Carolingian renovation of the 9th century.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4540: Gothic Art and Architecture
Discussion of selected topics in architecture, sculpture and painting and their artistic and cultural relationship from ca. 1150 to ca. 1400.
AR_H_A 4620: Michelangelo and the High Renaissance
Sculpture, architecture, paintings, and drawings of Michelangelo in the context of his times.
Credit Hours: 3
Prerequisites: instructor's consent

AR_H_A 4630: The Renaissance Artist
Lectures, readings, discussions and a research paper related to the Renaissance artist. Focus will be on representations of the artist in art and literature from ca. 1300 to ca. 1650.
Credit Hours: 3
Prerequisites: instructor's consent

AR_H_A 4640: Renaissance and Baroque Architecture
Problems in European architectural history from the 15th through the 18th century.
Credit Hours: 3
Prerequisites: instructor's consent

AR_H_A 4650: Venetian Painting
Survey of Venetian Painting from the 14th through the 18th century.
Credit Hours: 3
Prerequisites: instructor's consent

AR_H_A 4660: Renaissance Figural Arts of Northern Europe
Discussion of selected topics in painting and sculpture and their artistic and cultural relationships from the fourteenth through the sixteenth century in northern Europe.
Credit Hours: 3
Prerequisites: instructor's consent

AR_H_A 4670: Baroque Figural Arts
Painting and sculpture of Italy in the 17th century.
Credit Hours: 3
Prerequisites: instructor's consent

AR_H_A 4710: The Arts of the Rococo
This course explores European Art from approximately 1710 to 1770, focusing on art associated with two different social sectors: The early modern aristocratic court culture whose artistic predilections had formed the European norm, and the increasingly powerful merchant classes whose newfound wealth enabled new artistic genres and styles to proliferate. Our inquiry begins with an exploration of the rococo as an ornamental style; we examine its origins in Italian garden architecture and subsequent transformation into a decoration for both French palatial interiors and German Churches. We then launch a succession of case studies of important artists, media, and objects in order to assess the varied ways that diverse social identities were deflected through the periods’ art an architecture. Students will pursue a research topic on rococo art for their semester project.
Credit Hours: 3
Prerequisites: instructor's consent

AR_H_A 4720: Revolution and Romanticism: Art C. 1800
This course examines European art from circa 1780 to 1820, focusing on art made in conjunction with the major events of the French Revolution, its aftermath, and its global repercussions.
Credit Hours: 3
Prerequisites: AR_H_A 3730 or AR_H_A 3740; instructor's consent. May be repeated for credit

AR_H_A 4730: Realism Through Post-Impressionism
Styles and issues in nineteenth-century art.
Credit Hours: 3
Prerequisites: instructor's consent

AR_H_A 4740: Modern Architecture
Problems in the history of architecture from the late 18th century to the present.
Credit Hours: 3
Prerequisites: instructor's consent

AR_H_A 4750: Contemporary World Architecture
This course will study key themes, events, and figures in architectural theory and practice from around the world since the 1960s. As with any course treating such a large body of material, this one will be selective topical rather than comprehensive in nature. The format will include lectures, discussions based on reading, writing, and research assignments, films, and field trips. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: AR_H_A 1120; instructor's consent

AR_H_A 4760: Modern Sculpture
Sculpture in Europe and the U.S. ca. 1880 to the present, with special emphasis on changing definitions of the medium.
Credit Hours: 3
Prerequisites: instructor's consent

AR_H_A 4780: Advanced Course in Contemporary Art
Topics in European and American painting and sculpture after 1950.
Credit Hours: 3
Prerequisites: instructor's consent

AR_H_A 4820: American Material Culture
An exploration of American material culture from a multidisciplinary perspective.
Credit Hours: 3
Prerequisites: instructor's consent

AR_H_A 4840: American Architecture
An exploration of architecture and urbanism from the colonial period to the present.
Credit Hours: 3
Prerequisites: instructor's consent

As with any course treating such a large body of material, this one will be selective, topical rather than comprehensive in nature. The format will include lectures, discussions based on reading, writing, and research assignments, films and field trips. Graded A-F only.
Credit Hours: 3
Prerequisites: AR_H_A 1120 and instructor’s consent

AR_H_A 7760: Modern Sculpture
Sculpture in Europe and the U.S. ca. 1880 to the present, with special emphasis on changing definitions of the medium.
AR_H_A 7780: Advanced Course in Contemporary Art
Topics in European and American painting and sculpture after 1950.
Credit Hours: 3
Prerequisites: departmental consent

AR_H_A 7820: American Material Culture
An exploration of American material culture from a multidisciplinary perspective.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 7840: American Architecture
An exploration of architecture from the colonial period to the present.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 7940: Archaeological Methods
Methods of excavating various types of sites; recording, preserving their materials.
Credit Hour: 2-6
Prerequisites: instructor’s consent

AR_H_A 7960: Special Readings in Art History or Archaeology
Independent readings and research selected in consultation with supervisory faculty.
Credit Hour: 1-99
Prerequisites: instructor’s consent

AR_H_A 7980: Internship in Art History and Archaeology
A one semester or full summer intensive internship with specific projects and responsibilities to be arranged by the student and the program director.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 8090: Master’s Thesis Research and Thesis
Individual research leading to preparation of the M.A. thesis Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor’s consent

AR_H_A 8110: Introduction to Graduate Study
Research methods, bibliography, use and criticism of source material. Required of graduate students in Art History and Archaeology who have not had AR_H_A 4996.
Credit Hours: 3
Prerequisites: departmental consent

AR_H_A 8120: Theories and Methodologies in Art History and Archaeology
Literature of art and archaeology in terms of works of leading European and American art historians, archaeologists.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 8130: Museum Studies Seminar
Appropriate means for care and display of artifacts. Topics include: accessioning, cataloging, retrieval of information, and laws and ethics of collecting; the museum environment and its monitoring; condition reports, shipping and storage, and conservation. Field trips.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 8140: Art Theory and Criticism
Theoretical and critical literature of art from earliest times to the present.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 8170: Historic Preservation Seminar
Research techniques to solve research problems and conduct field recording in historic preservation, material culture, historic architecture, and cultural heritage studies.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 8320: Seminar in Greek Art and Archaeology
Special subjects of study assigned for individual research; discussion of reports by seminar members.
Credit Hour: 1-99
Prerequisites: instructor’s consent

AR_H_A 8420: Seminar in Roman Art and Archaeology
Special subjects of study assigned for individual research; discussion of reports by seminar members.
Credit Hour: 1-99
Prerequisites: instructor’s consent
AR_H_A 8440: Ancient/Medieval Topography
(same as CLASS 8440). Descriptive and historical analysis of a selected
city or site. Subject varies.
Credit Hour: 1-99
Prerequisites: instructor’s consent

AR_H_A 8490: Seminar in Late Antique Art and Archaeology
Special subjects of study assigned for individual research; discussion of
reports by seminar members.
Credit Hours: 3
Prerequisites: AR_H_A 7490 or equivalent

AR_H_A 8520: Seminar in Medieval Art and Archaeology
Specific subjects of study will be assigned to students for presentation in
relation to broader questions of the cultural/ historical phenomena of the
time, from ca 700 to ca 1400.
Credit Hour: 1-99
Prerequisites: instructor’s consent

AR_H_A 8620: Seminar in Renaissance Art
Special subjects of study assigned for Northern or Southern Renaissance
for individual research, discussion of reports by seminar members.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 8710: Seminar in 18th Century Art
Special subjects of study in 18th century art assigned for individual
research; reports to be presented and discussed by seminar members.
Credit Hour: 1-99
Prerequisites: instructor’s consent

AR_H_A 8720: Seminar in 19th Century Art
Special subjects of study in 19th century art assigned for individual
research; reports to be presented and discussed by seminar members.
Credit Hour: 1-99
Prerequisites: instructor’s consent

AR_H_A 8740: Seminar in Modern Architecture
Special subjects of study assigned for individual research; discussion of
reports by seminar members.
Credit Hour: 1-99
Prerequisites: instructor’s consent

AR_H_A 8750: Seminar in Modern and Contemporary Art
Special subjects of study assigned for individual research; discussion of
reports by seminar members.
Credit Hour: 1-99
Prerequisites: instructor’s consent

AR_H_A 8800: Seminar in American Art
Special subjects of study assigned for individual research; discussion of
reports by seminar members.
Credit Hour: 1-99
Prerequisites: instructor’s consent

PREREQUISITES

AR_H_A 9080: Readings for PhD Dissertation in Art History and
Archaeology
Reading, critical evaluation of literature of special fields of art history and/
or archaeology.
Credit Hour: 1-99
Prerequisites: instructor’s consent

AR_H_A 9090: Doctoral Dissertation Research in Art History and
Archaeology
Individual research leading to preparation of the Ph.D. dissertation.
Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor’s consent

ART_CERM 2100: Beginning Ceramics
Exploration of ceramic art as an expressive, communicative medium.
Study of ceramic design, technique and historic and contemporary
models within the context of the creative process. Group critiques, slides,
demonstrations. Expendable materials fee.
Credit Hours: 3
Prerequisites: instructor’s consent

ART_CERM 3100: Intermediate Ceramics
Continuation of ART_CERM 2100 with emphasis on wheel throwing and
the vessel format. Further exploration of glazing and firing techniques.
Group and individual critiques, demonstrations, slide lectures and visiting
artists. Expendable materials fee.
Credit Hours: 3
Prerequisites: instructor’s consent

ART_CERM 4100: Advanced Ceramics
Continuation of ART_CERM 3100. Includes advanced problems in
firing, clay and glaze technology, forming and ornamentation. Payment
of expendable materials fee required. May be repeated to 15 hours
maximum.
Credit Hours: 3
Prerequisites: instructor’s consent

ART_CERM 4110: Ceramics Sculpture
Sculptural forms constructed of slabs, coils and wheel-thrown elements.
Payment of expendable materials expense is required. May be repeated
to 15 hours maximum.
Credit Hours: 3
Prerequisites: ART_CERM 4100

ART_CERM 4185: Problems in Ceramics
Credit Hour: 1-3
Prerequisites: departmental consent
ART_CERM 7100: Graduate Ceramics
Advanced study of ceramic technology and design concepts with emphasis on directed development of individual work. Payment of expendable materials expense is required. May be repeated to 18 hours maximum.

Credit Hours: 3
Prerequisites: ART_CERM 4100

ART_CERM 7110: Graduate Ceramic Sculpture
Directed development of individual work. Payment of expendable materials expense is required. May be repeated to 18 hours maximum.

Credit Hours: 3
Prerequisites: ART_CERM 4100

ART_CERM 7185: Problems in Ceramics
Graduate level work in ceramics.

Credit Hours: 1-3
Prerequisites: ART_CERM 7100 and ART_CERM 7110 and departmental consent

ART_CERM 8100: Graduate Ceramics II
Continuation of ART_CERM 7100. Repeatable to 15 hours.

Credit Hours: 3
Prerequisites: ART_CERM 7100 or equivalent

Art-Drawing (ART_DRAW)

ART_DRAW 1050: Drawing I
An introduction to visual hierarchy, composition, and pictorial space in drawing. Emphasis on linear perspective and the language of light and shadow using black and white media (graphite, charcoal and/or conte crayon). Development of skills and concepts in drawing based on historical models, lectures, demonstrations and critiques. Expendable materials fee required.

Credit Hours: 3

ART_DRAW 2200: Drawing II
An introduction to drawing systems, problem solving and study of the proportions of the human form. Development of skills and concepts in drawing based on historical and contemporary models, lectures, demonstrations and critiques. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_DRAW 1050

ART_DRAW 2210: Beginning Color Drawing
Theory and practice in the use of pastel working from stilllife, landscape, and portrait. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_DRAW 1050

ART_DRAW 2220: Drawing III
Development of drawing techniques with an emphasis on materials and methods. Emphasis in conceptual and formal skills based on contemporary and historical models. May be repeated to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_DRAW 1050 and ART_DRAW 2200

ART_DRAW 3210: Intermediate Color Drawing
Continuation of ART_DRAW 2210 with emphasis on design and organization. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_DRAW 1050 and ART_DRAW 2210

ART_DRAW 3220: Anatomical Drawing
Anatomical structure of human figure as it relates to art. Drawing from live model; emphasis on gross anatomy as defined by skeletal and muscular structure. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_DRAW 1050 and either ART_DRAW 2200 or instructor’s consent

ART_DRAW 3230: Beginning Illustration
An introduction to visual problem solving from initial concept through final execution. Emphasis in drawing and painting skills and exploration of mixed media techniques including drawing from the model. Graded on A-F basis only. Expendable materials fee.

Credit Hours: 3
Prerequisites: ART_DRAW 1050 and ART_DRAW 2200

ART_DRAW 4200: Drawing IV
This course will provide an intensive experience in the development of a portfolio of artwork. Students will explore the connections between their work and contemporary art. May be repeated 3 times. Expendable Materials Fee Required.

Credit Hours: 3
Prerequisites: ART_DRAW 1050, ART_DRAW 2200 and ART_DRAW 3200

ART_DRAW 4210: Advanced Color Drawing
Continuation of ART_DRAW 3210 with emphasis on the expressive properties of color in figural compositions. Repeatable to 15 hours. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_DRAW 1050, ART_DRAW 2210 and ART_DRAW 3210

ART_DRAW 4220: Advanced Anatomical Drawing
Continuation of ART_DRAW 3220 with and emphasis on formal analysis of the figure in drawing based on superficial and deep anatomical structure. May be repeated to 15 hour maximum. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_DRAW 1050 and ART_DRAW 3220
Recommended: ART_DRAW 2200 and ART_DRAW 3200 before taking this class
ART_DRAW 4230: Advanced Illustration
Further development of conceptual problem solving skills and technical proficiency through self generated assignments. Emphasis is placed on portfolio development by exploring sequential and narrative themes. Topics include contract, copyrights, and the art of freelancing. Students are advised to take the course a minimum of two times. May be repeated to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_DRAW 1050, ART_DRAW 2200 and ART_DRAW 3230

ART_DRAW 4285: Problems in Drawing
Credit Hour: 1-3
Prerequisites: departmental consent

ART_DRAW 7200: Graduate Drawing: Studio Practice and Critique
Drawing with emphasis on individual creative expression. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3
Prerequisites: graduate Art major

ART_DRAW 7210: Graduate Color Drawing
Continuation of ART_DRAW 4210 with emphasis on individual creative expression. Repeatable to 15 hours. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_DRAW 4210 and instructor’s consent

ART_DRAW 7285: Problems in Drawing
Credit Hour: 1-3
Prerequisites: ART_DRAW 7200 and departmental consent

ART_DRAW 8200: Graduate Drawing: Advanced Studio Practice and Critique
Continuation of ART_DRAW 7200. Repeatable to 15 hours.

Credit Hours: 3
Prerequisites: ART_DRAW 7200 or equivalent

ART_DRAW 8210: Graduate Color Drawing II
Continuation of ART_DRAW 7210. Repeatable to 15 hours.

Credit Hours: 3
Prerequisites: ART_DRAW 7210 or equivalent

ART_DRAW 8270: Graduate Drawing - Theory and Context
Contextualizing artwork in culture, history, and theory. May be repeated to 18 hours for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Graduate Art Majors

ART_DRAW 8285: Problems in Drawing II
Advanced independent studio practice including critical evaluation of student’s creative work. Individual study in drawing is to be proposed by the student and approved by the instructor. The student will meet on a regular basis with the instructor to review student progress. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: for students with strong preparation in Art; departmental consent; ART_DRAW 7285

Art-Fibers (ART_FIBR)

ART_FIBR 2300: Beginning Fibers
Exploration of various fiber and media including papermaking, weaving, surface design and sculptural techniques. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_FIBR 1030

ART_FIBR 3300: Intermediate Fibers
Continuation of ART_FIBR 2300 with emphasis on utilizing acquired technical processes in loom and off weaving, paper making and surface design and a means of developing visual statements. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_FIBR 2300

ART_FIBR 4300: Advanced Fibers
Exploration of aesthetic concepts, development of personal style and instruction in advanced fiber techniques within medium selected by student. Expendable materials fee required. May repeat to 15 hours maximum.

Credit Hours: 3
Prerequisites: ART_FIBR 3300 or approved equivalents

ART_FIBR 4385: Problems in Fibers
Credit Hour: 1-3
Prerequisites: ART_FIBR 3300 and departmental consent

ART_FIBR 7300: Graduate Fibers
Advanced technical and aesthetic study in medium of choice with emphasis on development of the individual student’s ideas and goals. Expendable materials fee required. May repeat to 15 hours maximum.

Credit Hours: 3
Prerequisites: ART_FIBR 4300

ART_FIBR 7385: Problems in Fibers
Graduate level work in fibers.

Credit Hour: 1-3
Prerequisites: ART_FIBR 7300 and departmental consent

ART_FIBR 8300: Graduate Fibers II
Continuation of ART_FIBR 7300. Repeatable to 15 hours.

Credit Hours: 3
Prerequisites: ART_FIBR 7300 or equivalent

Art-General (ART_GNRL)
ART_GNRL 1010: Introduction to Art
Basic practice in drawing, painting, design. Exploratory course for beginners. Non-majors only.
Credit Hours: 3

ART_GNRL 1020: Appreciation of Art
Illustrated discussion with examples from varied historic and contemporary art fields on nature of art, functions, methods of creative expression. One section is writing intensive each semester and the other is NON writing intensive each semester.
Credit Hours: 3
Prerequisites: ENGLISH 1000 may be required on some sections

ART_GNRL 1030: Basic 2-D Design
Basic study of line, shape and texture; their use and control according to the basic variables and the principles of design. Two dimensional exercises employing a variety of tools and materials.
Credit Hours: 3

ART_GNRL 1040: Basic 3-D Design
A foundational course designed to familiarize students with the elements and principles of three-dimensional design as well as some of the materials, tools, processes and techniques used in the creation of sculptural art. Study and development of formal aesthetic ideas, conceptual vocabulary and technical skills is emphasized. Expendable materials fee required.
Credit Hours: 3

ART_GNRL 2000: Color Theory
An investigation of various color systems and their application to art.
Credit Hours: 3
Prerequisites: ART_GNRL 1030 or its equivalent, and sophomore standing

ART_GNRL 2001: Topics in Art
Special studies in studio art; covers subjects not included in regularly offered courses. Topics course are repeatable for up to 6 credits per individual topic.
Credit Hour: 1-3
Prerequisites: instructor’s consent

ART_GNRL 2001H: Topics in Art - Honors
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.
Credit Hour: 1-3
Prerequisites: instructor’s consent. Honors eligibility required

ART_GNRL 2005: Topics in Art - Humanities
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.
Credit Hour: 1-3
Prerequisites: Instructor’s consent

ART_GNRL 2005H: Topics in Art - Humanities - Honors
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.
Credit Hour: 1-3
Prerequisites: Instructor’s consent. Honors eligibility required

ART_GNRL 2020: International Summer Study Abroad
A four-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at schedule critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated once for credit.
Credit Hours: 4

ART_GNRL 2030: Context and Culture
The purpose of this course is to give journalism students a framework for engaging with the visual arts, with a focus on the 20th century and today. Our goal is to conduct a foundation for thinking, talking and writing about the visual arts, especially works and movements that might be challenging for the novice to understand.
Credit Hours: 3
Prerequisites: instructor’s consent

ART_GNRL 2030H: Context and Culture - Honors
The purpose of this course is to give journalism students a framework for engaging with the visual arts, with a focus on the 20th century and today. Our goal is to conduct a foundation for thinking, talking and writing about the visual arts, especially works and movements that might be challenging for the novice to understand.
Credit Hours: 3
Prerequisites: instructor’s consent. Honors eligibility required

ART_GNRL 3001: Topics in Art
Special studies in studio art; covers subjects not included in regularly offered courses. Topics course are repeatable for up to 6 credits per individual topic.
Credit Hour: 1-3
Prerequisites: junior standing and instructor’s consent

ART_GNRL 3001H: Topics in Art - Honors
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.
Credit Hour: 1-3
Prerequisites: instructor’s consent. Honors eligibility required

ART_GNRL 3005: Topics in Art - Humanities
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.
Credit Hour: 1-3
Prerequisites: Instructor’s consent

ART_GNRL 3005H: Topics in Art - Humanities Honors
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.
Credit Hour: 1-3
Prerequisites: Instructor’s consent. Honors eligibility required
ART_GNRL 3005: Topics in Art - Humanities
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.
Credit Hour: 1-3
Prerequisites: Instructor's consent

ART_GNRL 3020: International Summer Study Abroad
A four-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at scheduled critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated once for credit.
Credit Hours: 4
Prerequisites: Instructor's consent

ART_GNRL 3030: Undergraduate Internship in Art
Special learning situations not covered by coursework. Credit standards pre-arranged with dept. Limit on total hours of problems courses applies.
Credit Hour: 1-3
Prerequisites: junior standing and departmental consent. Open only to Art and Art Education majors

ART_GNRL 4001: Topics in Art
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.
Credit Hour: 1-3
Prerequisites: consent of instructor

ART_GNRL 4001H: Topics in Art - Honors
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.
Credit Hour: 1-3
Prerequisites: instructor's consent, honors eligibility required

ART_GNRL 4005H: Topics in Art - Humanities Honors
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.
Credit Hour: 1-3
Prerequisites: Instructor's consent. Honors eligibility required

ART_GNRL 4005: Topics in Art - Humanities
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.
Credit Hour: 1-3
Prerequisites: Instructor's consent

ART_GNRL 4030: Video Art and the Moving Image
Video as a fine art form intersection sculpture, performing arts, doc filmmaking, pop culture and the Internet. Theoretical and historical knowledge is integrated with studio practice. Students create video works in Final Cut Pro demonstrating technical ability and aesthetic vision. May be repeated for credit.
Credit Hours: 3

ART_GNRL 4040: 2-D Portfolio Development
This course will provide an intensive experience in the development of a portfolio of personal work outside the traditional media boundaries. Students will explore media relevant to their particular needs and begin to explore the connections between their work and contemporary art and culture through readings, discussions and critiques. Expendable Materials Fee Required. May be repeated t 6 credits. Prerequisites: 3000-level or above course in one of the following media areas: Drawing, Painting or Printmaking. Junior Standing and Instructor's consent required.
Credit Hours: 3

ART_GNRL 4975: Senior Seminar in Art
A capstone course for the undergraduate art degree with emphasis on the production of a written statement relating to the students' visual research.
Credit Hours: 3
Prerequisites: senior standing and ENGLSH 1000

ART_GNRL 4976: Design - Senior Seminar
Capstone for undergraduate art students who are interested in graphic design. Emphasis placed on research and writing about the theory and practice of design. All students will participate in a final, formal portfolio review with outside evaluators.
Credit Hours: 3
Prerequisites: senior standing and ENGLSH 1000

ART_GNRL 7000: Graduate Art - Studio Practice and Critique
Art studio practice emphasis on individual creative expression. Course may be repeated for up to 15 credit hours. Expendable materials fee required. Graded on A-F basis only. Prerequisites: Graduate Art Major
Credit Hours: 3

ART_GNRL 7001: Topics in Art
Special studies in studio art at the graduate level; covers subjects not included in regularly offered courses. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: instructor's consent

ART_GNRL 7005: Topics in Art - Humanities
Special studies in graduate level studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topics.
Credit Hour: 1-3
Prerequisites: instructor's consent

ART_GNRL 7020: International Summer Study Abroad
A four-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at scheduled critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated for credit.
ART_GNRL 7030: Video Art and the Moving Image
Video as a fine art form intersecting sculpture, performing arts, doc filmmaking, pop culture and the Internet. Theoretical and historical knowledge is integrated with studio practice. Students create video works in final Cut Pro demonstrating technical ability and aesthetic vision. May be repeated for credit.

Credit Hours: 4

ART_GNRL 7085: Problems in Art
Individual study in a subject area to be proposed by the student and approved by the instructor. The student will meet periodically on a regular basis with the instructor to review progress on the work assigned. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: for students with strong preparation in Art; departmental consent

ART_GNRL 8000: Graduate Art - Advanced Studio Practice and Critique
Continuation of ART_GNRL 7000. Art studio practice with emphasis on individual creative expression. Course may be repeated for up to 15 credit hours. Expendable materials fee required. Graded on A-F basis only. Prerequisites: Graduate Art Major

Credit Hours: 3

ART_GNRL 8001: Topics in Art
Special studies in graduate level studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.

Credit Hour: 1-3
Prerequisites: instructor’s consent

ART_GNRL 8005: Topics in Art - Humanities
Special studies in graduate level studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.

Credit Hour: 1-3
Prerequisites: instructor’s consent

ART_GNRL 8020: International Summer Study Abroad
A four week study abroad in studio art with required participation in scheduled excursion to art-related sites. Students create original art for review at schedule critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated once for credit. Graded on A-F basis only.

Credit Hours: 4

ART_GNRL 8070: Graduate Art - Theory and Context
Contextualizing artwork in culture, history, and theory. May be repeated up to 18 hours for credit. Graded on A-F basis only

Credit Hours: 3
Prerequisites: Graduate Art standing

ART_GNRL 8080: MFA Thesis Exhibition Documentation
Preparation of materials deemed necessary to document in a permanent form the thesis exhibition. Credit will be granted upon the satisfactory completion of the document, which will be retained by the Department of Art. Required of all MFA candidates. Graded on S/U basis only.

Credit Hour: 1

ART_GNRL 9010: Graduate Studio Seminar
Practical and philosophical concerns of the visual artist. Mandated for all MFA candidates.

Credit Hour: 1

Art-Graphic Design (ART_GRDN)

ART_GRDN 1400: Beginning Digital Imaging
Class will cover the basic tools used in digital imaging software. A variety of different software may be offered. Course may be repeated for up to 3 hours with the consent of instructor. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: basic understanding of the Macintosh computer

ART_GRDN 2400: Advanced Digital Imaging
Class will cover the basic tools used in digital imaging software. A variety of different software may be offered. Course may be repeated for up to 3 hours with the consent of instructor. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: ART_GRDN 1400, and a basic understanding of the Macintosh computer

ART_GRDN 2410: Graphic Design I
Emphasis on developing a design language and vocabulary. Projects explore visual images in two-dimensional space, each one focusing on a specific set of relationships. Introduction to methodological and research practices for designers. Payment of expendable materials fee is required.

Credit Hours: 3
Prerequisites: ART_GRDN 1030, ART_GRDN 1040 and ART_DRAW 1050

ART_GRDN 2420: Graphic Design II
Introduction to the discipline, function and tradition of typography. Topics include evolution and anatomy of typography, communication, legibility/readability, language sequence and information hierarchy. Course concludes with portfolio review for admission into Graphic Design III. Payment of expendable materials fee is required.

Credit Hours: 3
Prerequisites: ART_GRDN 2410

ART_GRDN 2430: Introduction to Calligraphy
Technical and historical instruction on five calligraphic alphabets. Application of hand lettering to both two and three-dimensional design projects. Emphasis placed on both technical mastery of letters and creative expression in projects.

Credit Hours: 3
Prerequisites: ART_GNRL 1030 and ART_DRAW 1050 or instructor’s consent

ART_GRDN 3410: Graphic Design III
Digital media and motion graphics are explored through the development of interactive presentations and web site design. Students experiment with the computer as a medium for delivery of communication. New, practical and conceptual skills will be discussed in order to develop meaningful, interactive user experiences. Payment of expendable materials fees is required.

Credit Hours: 3
Prerequisites: ART_GRDN 2420 and successful completion of the graphic design portfolio review

ART_GRDN 3420: Graphic Design IV
Goal directed graphic design problem solving stressing the integration of theory and practical applications while sharpening conceptual, computer, and research skills. Topics include current design theory, advanced typographic study, production methods and design/client interaction. Payment of expendable materials fee is required.

Credit Hours: 3
Prerequisites: ART_GRDN 3410

ART_GRDN 3430: Advanced Calligraphy
Technical and historical instruction to calligraphic alphabets including Uncial, Fraktur, Copperplate and Neuland. Application of hand lettering in two and three-dimensional design projects. Emphasis placed on both mastery of letters and creative exploration in projects.

Credit Hours: 3
Prerequisites: ART_GRDN 2430

ART_GRDN 3440: Packaging Design
This course will look at the discipline of packaging design from a three dimensional perspective. By gaining an understanding of the materials and processes that relate to packaging, students will develop a selection of packaging solutions for a variety of different clients. Payment of expendable material fee is required.

Credit Hours: 3
Prerequisites: Successful completion of the graphic design portfolio review and/or instructor’s consent

ART_GRDN 3441: The History of Graphic Design
Broad overview of the history of graphic design. Topics will range from the history of printing, the beginnings of the profession, major movements and developments to the practice of design. Also looks at how the history of design and printing apply to today’s visual communication.

Credit Hours: 3
Prerequisites: instructor’s consent

ART_GRDN 3442: Design for Corporate Identity and Branding
Planning, strategy and design of the visual components necessary to create a corporate identity. Course will focus on how cohesive design programs function across various mediums and engage specific audiences. Payment of expendable materials fees is required.

Credit Hours: 3
Prerequisites: successful completion of the graphic design portfolio review and/or instructor’s consent

ART_GRDN 3443: Letterpress
This course is about creating conceptual design solutions using the letterpress printing process. Projects are very broad, conceptual and highly individual with the opportunity to explore letterpress printing processes using several different presses and printing techniques. Each project will require a limited edition print run. Repeatable to 9 hours.

Credit Hours: 3
Prerequisites: Instructor’s consent

ART_GRDN 4410: Graphic Design V
Directed research, study and critical analysis in graphic design. Emphasis placed on research, writing, problem solving, aesthetic perception, conceptual thinking skills and technical proficiency. Students will focus on portfolio preparation and are advised to take the course a minimum of two times. May be repeated to 15 hours maximum. Payment of expendable materials fee is required.

Credit Hours: 3
Prerequisites: ART_GRDN 3420

ART_GRDN 4445: Problems in Graphic Design
Credit Hour: 1-3
Prerequisites: ART_GRDN 4410, and departmental consent

ART_GRDN 4996: Imprint - Design Practicum
Class operates as professional design studio doing work for university, local and regional clients. Focus on client/designer relationships, contracts and teamwork. Students passing with grade in A range will graduate with departmental honors. May be repeated for credit.

Credit Hours: 3
Prerequisites: Admission based on GPA (3.3 in art courses) and portfolio review; junior standing

ART_GRDN 7400: Graduate Graphic Design
Graduate level work in graphic design. Emphasis on self-directed research and critical analysis. Students are encouraged to focus on conceptual development of their design work. Instruction is tailored to the student’s individual investigations. Repeatable to 15 hours maximum. Payment of expendable materials fees is required.

Credit Hours: 3
Prerequisites: instructor’s consent

ART_GRDN 7485: Problems in Graphic Design
Graduate level work in graphic design.

Credit Hour: 1-3
Prerequisites: ART_GRDN 4410 and departmental consent

ART_GRDN 8400: Graduate Graphic Design II
Continuation of ART_GRDN 7400. Repeatable to 15 hours.

Credit Hours: 3
Prerequisites: ART_GRDN 7400 or equivalent
Art-Painting (ART_PNT)

ART_PNT 2500: Beginning Painting
Introduces primary techniques of painting. Emphasis on conceptualization of visual perception (understanding how we see) and the creative processes (understanding how we create). Sections either in oil or acrylic; contact instructor. Expendable material fee required.

Credit Hours: 3

Prerequisites: ART_PNT 2500

ART_PNT 2510: Beginning Watercolor Painting
Theory, practice of painting in water color from still life, landscape, figure. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050

ART_PNT 3500: Intermediate Painting
Continuation of ART_PNT 2500 with the addition of portrait painting. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PNT 2500

ART_PNT 3510: Intermediate Watercolor Painting
Continuation of ART_PNT 2510. Theory and practice of painting in watercolor. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PNT 2510

ART_PNT 4500: Advanced Painting
Advanced problems in oil and acrylic painting. May be repeated to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PNT 3500

ART_PNT 4510: Advanced Watercolor Painting
(cross-leveled with ART_PNT 7510). Advanced problems in watercolor. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PNT 4500

ART_PNT 4585: Problems in Painting

Credit Hours: 1-3

Prerequisites: ART_PNT 4500 and departmental consent

ART_PNT 7500: Graduate Painting; Studio Practice and Critique
Advanced study. Emphasis on individual creative expression. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: graduate Art major

ART_PNT 7510: Graduate Watercolor Painting

Credit Hours: 3

Prerequisites: ART_PNT 7500 or approved equivalent and consent required

ARC_PNT 7585: Problems in Painting

Credit Hours: 3

Prerequisites: ART_PNT 7500 and departmental consent

ART_PNT 8500: Graduate Painting: Advanced Studio Practice and Critique
Continuation of ART_PNT 7500. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_PNT 7500 or equivalent

ART_PNT 8510: Graduate Watercolor Painting
Continuation of ART_PNT 7510. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_PNT 7510 or equivalent

ART_PNT 8570: Graduate Painting - Theory and Context
Contextualizing artwork in culture, history, and theory. Repeatable to 18 hours for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Graduate Art standing

ART_PNT 8585: Problems in Painting II
Advanced independent studio practice including critical evaluation of student's creative work. Individual study in painting is to be proposed by the student and approved by the instructor. The student will meet on a regular basis with the instructor to review student progress. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 1-3

Prerequisites: For students with strong preparation in Art; departmental consent; ART_PNT 7585

Art-Photography (ART_PHOT)

ART_PHOT 2600: Beginning Photography
Basic photography as an art form; camera and darkroom techniques; surveys photographic history and aesthetics. Camera with adjustable aperture and shutter required. Payment of expendable materials expense is required.

Credit Hours: 3

Prerequisites: ART_GNRL 1030, ART_GNRL 1040, ART_DRAW 1050 and instructor's consent required

ART_PHOT 3600: Intermediate Photography
Continuation of ART_PHOT 2600 with emphasis utilizing acquired technical process to facilitate use of the camera as a means of developing awareness of immediate environment and the capabilities of Photography as a communicative, documentary, and expressive medium. Payment of expendable material fee is required.

Credit Hours: 3

Prerequisites: ART_PHOT 2600 or approved equivalent and consent required
ART_PHOT 4600: Advanced Photography
Exploration of aesthetic concepts, development of personal vision, and instruction in advanced technical process including fine B&W printing, negative and positive color, large format, zone system, and portfolios and book design to facilitate critical observation and personal expression through the medium of Photography. Payment of expendable materials fee is required. May repeat to 15 hours maximum.

Credit Hours: 3
Prerequisites: ART_PHOT 2600 and ART_PHOT 3600 or approved equivalents, and consent required

ART_PHOT 4685: Problems in Photography
Supervised research in creative photography.

Credit Hour: 1-3
Prerequisites: ART_PHOT 4410 and departmental consent

ART_PHOT 7600: Graduate Photography
Advanced technical study with emphasis on development of the individual student's creative ideas. Payment of expendable materials expense is required. May repeat to 15 hours maximum.

Credit Hours: 3
Prerequisites: ART_PHOT 3600 and consent required

ART_PHOT 7685: Problems in Photography
Supervised research in creative photography.

Credit Hour: 1-3
Prerequisites: ART_PHOT 4410

ART_PHOT 8600: Graduate Photography II
Continuation of ART_PHOT 7600. Repeatable to 15 hours.

Credit Hours: 3
Prerequisites: ART_PHOT 7600 or equivalent

Art-Printmaking (ART_PRNT)

ART_PRNT 2700: Beginning Printmaking
Introductory Relief, Intaglio and Lithography techniques in color and black and white including woodcut, linocut reduction, etching; aquatint, dry point, photo mechanics and pronto plate lithography. May be repeated to six hours maximum. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_GNRL 1030 or ART_DRAW 2200

ART_PRNT 2730: Serigraphy
Introduces methods, materials, and techniques of printmaking with the silk screen. Payment of expendable materials expense is required. May repeat to 6 hours maximum.

Credit Hours: 3
Prerequisites: ART_GNRL 1030 and one semester of Drawing

ART_PRNT 3700: Intermediate Printmaking
Continuing work in litho, intaglio, relief or serigraphy. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_PRNT 2700 and/or instructor's consent

ART_PRNT 4700: Advanced Printmaking
Advanced study in relief, intaglio, lithographic and/or serigraphy printmaking with emphasis on individual creative expression. May be repeatable to 15 hours. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_PRNT 3700 and/or consent required

ART_PRNT 4785: Problems in Printmaking
Credit Hour: 1-3
Prerequisites: departmental consent

ART_PRNT 7700: Graduate Printmaking
Graduate level study in relief, intaglio or lithographic printmaking with emphasis on individual creative expression. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_PRNT 4700

ART_PRNT 7785: Problems in Printmaking
Credit Hour: 1-3
Prerequisites: ART_PRNT 7700 and departmental consent

ART_PRNT 8700: Graduate Printmaking II
Continuation of ART_PRNT 7700. Repeatable to 15 hours.

Credit Hours: 3
Prerequisites: ART_PRNT 7700 or equivalent

Art-Sculpture (ART_SCUL)

ART_SCUL 2800: Beginning Sculpture
Principles of sculptural organization, figure studies, modeling techniques, simple plaster casting. Payment of expendable materials expense is required.

Credit Hours: 3
Prerequisites: ART_GNRL 1030 or ART_DRAW 2200

ART_SCUL 2810: Experimental Media I
Ordering and structuring materials into compositional forms, using various media, traditional as well as new. Subject matter will vary each semester.

Credit Hours: 3
Prerequisites: ART_DRAW 2200 or instructor's consent

ART_SCUL 3800: Intermediate Sculpture
Continuation of ART_SCUL 2800. Introduction to carving techniques. Payment of expendable materials expense is required.

Credit Hours: 3
Prerequisites: ART_SCUL 2800

ART_SCUL 3810: Experimental Media II
Continuation of ART_SCUL 2810.
Art (ART_SCUL)

ART_SCUL 2810: Advanced Sculpture
This course will build skills acquired in ART_SCUL 3800. Includes welding, casting, carving and assemblage with emphasis on the development of a personal visual language. May repeat to 15 hours maximum.

Credit Hours: 3
Prerequisites: ART_SCUL 2810

ART_SCUL 3800: Advanced Sculpture
Continuation of ART_SCUL 3800. May repeat to 15 hours maximum.

Credit Hours: 3
Prerequisites: ART_SCUL 3800

ART_SCUL 3810: Experimental Media III
Advanced study of compositional organization at the graduate level. May repeat to 9 hours maximum.

Credit Hours: 3
Prerequisites: ART_SCUL 3810

ART_SCUL 4800: Experimental Media III
Continuation of ART_SCUL 3810. May repeat to 15 hours maximum.

Credit Hours: 3
Prerequisites: ART_SCUL 4800

ART_SCUL 4855: Problems in Sculpture
Credit Hour: 1-3
Prerequisites: departmental consent

ART_SCUL 4885: Problems in Sculpture
Credit Hour: 1-3
Prerequisites: ART_SCUL 7800 and departmental consent

ASTRON (ASTRON)

ASTRON 1010: Introduction to Laboratory Astronomy
Laboratory supplement to Astronomy 1010. Satisfies physical science laboratory requirement. Survey of astronomical methods, instruments, observations and measurement techniques.

Credit Hours: 2
Prerequisites: high school algebra and geometry

ASTRON 3010: Introduction to Modern Astrophysics
(same as PHYSCS 3010). Elements of stellar, and galactic astrophysics. Interpretation of observations and physical conditions of various astronomical objects including stars, gaseous nubulae and, galaxies.

Credit Hours: 3
Prerequisites: PHYSCS 2760

ASTRON 4020: Astrophysical Techniques
(same as PHYSCS 4020). Elements of modern astronomical instruments, observations and analysis, with the emphasis in the optical regime. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PHYSCS 2760

ASTRON 4180: Solar System Science
(same as PHYSCS and GEOL 4180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.

Credit Hours: 3
Prerequisites: MATH 1700, PHYSCS 1220 or PHYSCS 2760 or instructor’s consent

ASTRON 4250: Stellar Astrophysics
(same as PHYSCS 4250). Basic astrophysics of stable and unusual stars, stellar systems. Investigates stellar dimensions, radiation, spectra, energy, evolution, populations; interstellar medium, stellar motions and aggregation.

Credit Hours: 3
Prerequisites: PHYSCS 3150 or concurrently or instructor’s consent

ASTRON 4350: Galactic Astronomy
(same as PHYSCS 4350). Observational properties of normal galaxies and clusters of galaxies, Seyfert and emission-line structure and dynamics of galaxies; interacting galaxies, quasi-steller objects. Introduction to cosmology.

Credit Hours: 3
Prerequisites: PHYSCS 3010, PHYSCS 4140 or instructor’s consent

ASTRON 4360: Extragalactic Astronomy
(same as PHYSCS 4360). This course introduces students to the most basic knowledge of extragalactic astronomy, starting from Milky Way and extending to the most distant universe. Topics covered will include galaxy morphology and classification, groups and clusters of galaxies, active galactic nuclei, and galaxy formation and evolution.

Credit Hours: 3
Prerequisites: PHYSCS 2760
ASTRON 4460: Interstellar Medium
(same as PHYSCS 4460). The course discusses observational properties and physical and chemical processes occurring in the interstellar medium. Topics include interstellar diffuse and molecular clouds, HII regions, dust grains, interstellar chemistry, star formation, supernova remnants, and interstellar shock waves.

Credit Hours: 3
Prerequisites: PHYSCS 1220 or PHYSCS 2760

ASTRON 4550: Cosmochemistry
(same as PHYSCS 4550). Cosmic dust, stardust, spectra, energy, interstellar medium, meteorites, astromineralogy.

Credit Hours: 3
Prerequisites: PHYSCS 2760 or PHYSCS 1220; instructor's consent

ASTRON 4950: Undergraduate Research in Astronomy
Special studies in astronomy; covers subjects not included in courses regularly offered.

Credit Hour: 1-99
Prerequisites: instructor's consent

ASTRON 4960: Senior Thesis in Astronomy
Special studies for senior undergraduate students in astronomy. The course requires an oral or poster presentation, or faculty-guided writing of a senior thesis involving independent research.

Credit Hours: 3
Prerequisites: instructor's consent and 3 units of ASTRON 4950. Departmental consent required for repetition

ASTRON 7020: Astrophysical Techniques
(same as PHYSCS 7020; cross-leveled with ASTRON 4020). Elements of modern astronomical instruments, observations and analysis, with the emphasis in the optical regime. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PHYSCS 2760

ASTRON 7180: Solar System Science
(same as PHYSCS 7180 and GEOL 7180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.

Credit Hours: 3
Prerequisites: PHYSCS 1220 or PHYSCS 2760 or instructor's consent

ASTRON 7360: Extragalactic Astronomy
(same as PHYSCS 7360). This course introduces students to the most basic knowledge of extragalactic astronomy, starting from Milky Way and extending to the most distant universe. Topics covered will include galaxy morphology and classification, groups and clusters of galaxies, active galactic nuclei, and galaxy formation and evolution.

Credit Hours: 3
Prerequisites: PHYSCS 2760

ASTRON 7550: Cosmochemistry
(same as PHYSCS 7550). Chemistry of cosmic dust and molecules.

Credit Hours: 3
Prerequisites: PHYSCS 2760 or PHYSCS 1220; instructor's consent

ASTRON 7750: Interstellar Medium
(same as PHYSCS 7750). The course discusses observational properties and physical and chemical processes occurring in the interstellar medium. Topics include interstellar diffuse and molecular clouds, HII regions, dust grains, interstellar chemistry, star formation, supernova remnants, and interstellar shock waves.

Credit Hours: 3
Prerequisites: PHYSCS 1220 or PHYSCS 2760

ASTRON 8301: Topics in Astronomy and Astrophysics
(same as PHYSCS 8301). Selected topics from solar system, stellar galactic and extragalactic astronomy and astrophysics. May be repeated to a maximum of 6 hours.

Credit Hours: 3
Prerequisites: instructor's consent

ASTRON 8310: College Science Teaching
(same as PHYSCS 8310, BIO_SC 8724 and LTC 8724). Study of learner characteristics, teaching strategies, and research findings related to teaching science at the post-secondary level.

Credit Hours: 3

ASTRON 8550: Stellar Structure and Evolution
(same as PHYSCS 8550). Reviews of atomic and molecular spectra. Investigates quantum radiation law, emission and absorption processes, radiation transfer theory, continuous and discrete line spectra of stars, stellar composition.

Credit Hours: 3
Prerequisites: ASTRON 4250, PHYSCS 4800, or instructor's consent

Athletic Training (ATHTRN)

ATHTRN 1100: Athletic Training Skills I
Introduction to the development of psychomotor skills for athletic training. Taping and wrapping skills for the lower extremity; wound care, ice bag/ massage; whirlpool and hydrocollator use are covered. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Restricted to Pre-Athletic Training Majors only; instructor’s consent

ATHTRN 1200: Athletic Training Skills II
Continuation of development of psychomotor skills for athletic training; taping and wrapping of the upper extremities and trunk. Record keeping; basic first aid; and other athletic training administrative tasks are discussed. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Pre-Athletic Training Majors; instructor’s consent
ATHTRN 2100: Principles and Fundamentals of Athletic Training
Introduces students to common principles associated with the athletic training profession which include important areas essential for the performance of athletic training duties. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic training majors; ATHTRN 2100, ATHTRN 2500, ATHTRN 2600

ATHTRN 2150: Athletic Training Practicum I
Practical application under the direct supervision of a certified athletic trainer. Athletic training room etiquette; practice and game preparation; understanding, recognizing, evaluating, and treating athletic injuries. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training Majors; ATHTRN 1100, ATHTRN 1200, ATHTRN 2100

ATHTRN 2250: Athletic Training Practicum II
Practical application under the direct supervision of a certified athletic trainer. Continuation of athletic training room etiquette; practice and game prep; understanding, recognizing, evaluating, and treating athletic injuries. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; ATHTRN 2100

ATHTRN 2500: Elementary Human Anatomy
Analysis of the structure and function of cells, tissue, and organ systems. Emphasis is placed on the muscular, skeletal, and nervous systems as they relate to human movement and homeostasis. An Introduction to key terminology and concepts is also presented. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training Majors only

ATHTRN 2600: Human Physiology
Investigation into the structure, function, physiology, and biochemistry of the cardiovascular, lymphatic, respiratory, digestive, urinary, endocrine, and reproductive systems as well as the study of special senses. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training Majors Only

ATHTRN 2610: Principles and Fundamentals of Athletic Training
Introduces students to common principles associated with the athletic training profession which include important areas essential for the performance of athletic training duties. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic training majors; ATHTRN 2100, ATHTRN 2500, ATHTRN 2600

ATHTRN 3350: Lower Extremity, Trunk, Spine Assessment Lab
Provides athletic training students with the practical experience with an equipment intensive sport, such as football. Option 2: Health science and medical rotation. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic training majors; taken concurrently with ATHTRN 3300

ATHTRN 3350: Lower Extremity, Trunk, Spine Assessment Lab
Provides athletic training students with the practical experience with an equipment intensive sport, such as football. Option 2: Health science and medical rotation. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic training majors; taken concurrently with ATHTRN 3300

ATHTRN 3400: Upper Extremity and Head Assessment Lab
Provides athletic training students with a systematic approach to orthopedic injury evaluation. Each body segment of the upper extremity, and head are examined including functional anatomy, neurological innervations, associated pathologies and comprehensive evaluation. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: restricted to Athletic training majors; ATHTRN 3300, ATHTRN 3350

ATHTRN 3450: Upper Extremity and Head Assessment Lab
Provides athletic training students with a systematic approach to orthopedic injury evaluation. Each body segment of the upper extremity, and head are examined including functional anatomy, neurological innervations, associated pathologies and comprehensive evaluation. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: restricted to Athletic training majors; Taken concurrently with ATHTRN 3400

ATHTRN 3500: Rehabilitation of Athletic Injuries
The Theory and Application behind rehabilitative tools utilized in the athletic setting (in-season and out-of-season). Emphasis is placed on developing and administering rehabilitative programs based on injury, the healing process, and return to function/play. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: restricted to Athletic training majors; ATHTRN 3300, ATHTRN 3350, ATHTRN 3400, ATHTRN 3450

ATHTRN 3700: Therapeutic Modalities
Comprehensive study of the various therapeutic modalities utilized in the treatment and rehabilitation of athletic injuries. Understanding the technology, theory and practical applications of appropriate modalities is emphasized. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: restricted to Athletic training majors; ATHTRN 3300, ATHTRN 3350, ATHTRN 3400, ATHTRN 3450

ATHTRN 4500: Nutrition for Athletic Performance and Rehabilitation
Nutritional study examining how nutrition impacts sports performance. Basic Nutritional biochemical and physiological principles provide the foundation for the understanding of the role of nutrition in performance. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: restricted to Athletic training majors; ATHTRN 3300, ATHTRN 3350, ATHTRN 3400, ATHTRN 3450

ATHTRN 2250: Athletic Training Practicum II
Practical application under the direct supervision of a certified athletic trainer. Continuation of athletic training room etiquette; practice and game prep; understanding, recognizing, evaluating, and treating athletic injuries. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; ATHTRN 2100

ATHTRN 2500: Elementary Human Anatomy
Analysis of the structure and function of cells, tissue, and organ systems. Emphasis is placed on the muscular, skeletal, and nervous systems as they relate to human movement and homeostasis. An Introduction to key terminology and concepts is also presented. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training Majors only

ATHTRN 2600: Human Physiology
Investigation into the structure, function, physiology, and biochemistry of the cardiovascular, lymphatic, respiratory, digestive, urinary, endocrine, and reproductive systems as well as the study of special senses. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training Majors Only

ATHTRN 2610: Principles and Fundamentals of Athletic Training
Introduces students to common principles associated with the athletic training profession which include important areas essential for the performance of athletic training duties. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic training majors; ATHTRN 2100, ATHTRN 2500, ATHTRN 2600

ATHTRN 3350: Lower Extremity, Trunk, Spine Assessment Lab
Provides athletic training students with the practical experience with an equipment intensive sport, such as football. Option 2: Health science and medical rotation. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic training majors; taken concurrently with ATHTRN 3300

ATHTRN 3350: Lower Extremity, Trunk, Spine Assessment Lab
Provides athletic training students with the practical experience with an equipment intensive sport, such as football. Option 2: Health science and medical rotation. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic training majors; taken concurrently with ATHTRN 3300

ATHTRN 3400: Upper Extremity and Head Assessment Lab
Provides athletic training students with a systematic approach to orthopedic injury evaluation. Each body segment of the upper extremity, and head are examined including functional anatomy, neurological innervations, associated pathologies and comprehensive evaluation. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: restricted to Athletic training majors; ATHTRN 3300, ATHTRN 3350

ATHTRN 3450: Upper Extremity and Head Assessment Lab
Provides athletic training students with a systematic approach to orthopedic injury evaluation. Each body segment of the upper extremity, and head are examined including functional anatomy, neurological innervations, associated pathologies and comprehensive evaluation. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: restricted to Athletic training majors; Taken concurrently with ATHTRN 3400

ATHTRN 3500: Rehabilitation of Athletic Injuries
The Theory and Application behind rehabilitative tools utilized in the athletic setting (in-season and out-of-season). Emphasis is placed on developing and administering rehabilitative programs based on injury, the healing process, and return to function/play. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: restricted to Athletic training majors; ATHTRN 3300, ATHTRN 3350, ATHTRN 3400, ATHTRN 3450

ATHTRN 3700: Therapeutic Modalities
Comprehensive study of the various therapeutic modalities utilized in the treatment and rehabilitation of athletic injuries. Understanding the technology, theory and practical applications of appropriate modalities is emphasized. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: restricted to Athletic training majors; ATHTRN 3300, ATHTRN 3350, ATHTRN 3400, ATHTRN 3450

ATHTRN 4500: Nutrition for Athletic Performance and Rehabilitation
Nutritional study examining how nutrition impacts sports performance. Basic Nutritional biochemical and physiological principles provide the foundation for the understanding of the role of nutrition in performance. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: restricted to Athletic training majors; ATHTRN 3300, ATHTRN 3350, ATHTRN 3400, ATHTRN 3450
Atmospheric Science (ATM_SC)

**ATM_SC 1050: Introductory Meteorology**  
(same as GEG 1050). Physical processes of atmosphere in relation to day-to-day changes in weather.  
**Credit Hours:** 3  
**Prerequisites:** restricted to Athletic training majors; HLTH_SCI 4420

**ATM_SC 2100: Introduction to Atmospheric Science**  
Physical process of the atmospheric and climate system will be related to day-to-day weather changes. Students will be introduced to the laws of motion and thermodynamics that govern motions in geophysical fluid. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** MATH 1160 or concurrent enrollment in MATH 1500

**ATM_SC 2150: Natural Hazards**  
A survey of natural hazards, including severe thunderstorms, tornadoes, flooding, tropical storms, ocean movements, earthquakes, Tsunamis, volcanoes, asteroids, solar weather, managing risk and human impacts. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** ATM_SC 1050 or equivalent or instructor's consent

**ATM_SC 2720: Weather Briefing**  
Student participation in daily discussions of current weather patterns and forecasts and their applications to weather sensitive activities including aviation, agriculture and industry.  
**Credit Hour:** 1  
**Prerequisites:** ATM_SC 1050

**ATM_SC 2792: Weather Communication**  
Methods of surface and upper air weather observation. How such data are distributed to users in the meteorological community is also addressed. Prerequisites: ATM_SC 1050; sophomore standing or instructor's consent  
**Credit Hour:** 1  
**Prerequisites:** ATM_SC 1050

**ATM_SC 3000: Independent Study in Atmospheric Science**  
Independent study of a topic dealing with meteorological theory or application of meteorological science to the solution of relevant problem.  
**Credit Hours:** 1-3  
**Prerequisites:** upper-level standing, ATM_SC 1050 or equivalent, and instructor's consent

**ATM_SC 3600: Climates of the World**  
(same as GEG 3600). A study of the world distribution of climates based on "cause and effect" relationships. Special attention is given to the impacts of climate on humanity.  
**Credit Hours:** 3  
**Prerequisites:** ATM_SC 1050 or equivalent or graduate standing

**ATM_SC 4001: Topics in Atmospheric Science**  
Development of theory and applications for selected topics in atmospheric science.  
**Credit Hours:** 1-99  
**Prerequisites:** junior standing and instructor's consent

**ATM_SC 4110: Broadcast Meteorology I**  
An introduction to broadcast meteorology including the business of media, use of meteorological data to produce a forecast, and television and radio presentation skills. Graded on A-F basis only.  
**Credit Hours:** 2  
**Prerequisites:** ATM_SC 1110, ATM_SC 2720, or equivalents  
**Corequisites:** ATM_SC 4710. Restricted to Atmospheric Science majors or instructor's consent

**ATM_SC 4310: Atmospheric Thermodynamics**  
Thermodynamics of dry and moist air, atmospheric hydrostatics, convection, and development of the fundamental equations of geophysical fluid dynamics.  
**Credit Hours:** 4  
**Prerequisites:** ATM_SC 1050, MATH 1700 (C or better), and one physics course

**ATM_SC 4320: Atmospheric Dynamics**  
Dynamics and kinematics of atmospheric flow. Manipulation of fundamental equations, numerical modeling of atmosphere.  
**Credit Hours:** 4  
**Prerequisites:** ATM_SC 4310 or ATM_SC 7310

**ATM_SC 4350: Mesoscale Meteorology and Dynamics**  
Survey of mesoscale phenomena, observing systems, analysis techniques, and modeling. Topics include fronts, jet streaks, gravity waves, organized convection, tornadoes, and severe local storm forecasting and structure.  
**Credit Hours:** 3  
**Prerequisites:** ATM_SC 4720 or ATM_SC 7720 and MATH 2300

**ATM_SC 4400: Micrometeorology**  
Study of transport processes in the surface boundary layer. Important applications in pollution will be discussed.  
**Credit Hours:** 3  
**Prerequisites:** ATM_SC 4310 or PHYSCS 2760, MATH 2300

**ATM_SC 4500: Advanced Meteorological Observation and Instrumentation**  
Automated weather observation and instrumentation used in networks of remote automated weather stations. Emphasis on electronic instrumentation, datalogger programming, data collection and data management, generating dynamic reports on the World Wide Web. May be repeated for credit.  
**Credit Hours:** 3  
**Prerequisites:** ATM_SC 1050
**ATM_SC 4510: Remote Sensing for Meteorology and Natural Resources**
Principles of remote sensing with emphasis on the properties of atmosphere and the earth’s surface from airborne and satellite sensors. The techniques for using geosynchronous and orbiting satellite platforms for assessing weather and natural resource features.

**Credit Hours:** 3  
**Prerequisites:** ATM_SC 1110, MATH 1500, junior standing or instructor’s consent

**ATM_SC 4520: Environmental Biophysics**  
(same as GEOG 4520). Students will learn techniques and principles used to describe the microenvironment of living organisms and use quantitative expressions to estimate missing values, and mass transfer laws to estimate flux of energy, water and gas.

**Credit Hours:** 3  
**Prerequisites:** College Physics and Calculus I

**ATM_SC 4550: Atmospheric Physics**
Physics of atmospheric nucleation-condensation, cloud droplet and precipitation formation, associated electrical phenomena, radiation transfer and remote sensing.

**Credit Hours:** 3  
**Prerequisites:** 1 year of college Physics and MATH 1700

**ATM_SC 4590: Radar Meteorology**
Course concerns the theory and application of radar in meteorology. May be repeated for credit.

**Credit Hours:** 3  
**Prerequisites:** ATM_SC 1110, MATH 1700, PHYSCS 2750

**ATM_SC 4650: Long-Range Forecasting**
Physical-dynamical principles of long-range forecasting from a month to a year. Empirical and numerical approaches in forecast practice.

**Credit Hours:** 3  
**Prerequisites:** ATM_SC 4050 or ATM_SC 7050 or ATM_SC 3600

**ATM_SC 4710: Synoptic Meteorology I**
Meteorological Data. Basic techniques for surface and upper air analysis, using selected examples of weather patterns.

**Credit Hours:** 4  
**Prerequisites or Corequisites:** one physics course  
**Prerequisites:** ATM_SC 1050, MATH 1700 (C or better)

**ATM_SC 4720: Synoptic Meteorology II**
Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research.

**Credit Hours:** 4  
**Prerequisites:** ATM_SC 4710 or ATM_SC 7710

**ATM_SC 4730: Advanced Forecasting Laboratory**
Advanced principles of weather forecasting will be addressed via online electronic modules and weekly laboratory exercises. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** ATM_SC 4710 or ATM_SC 7710, ATM_SC 4720 or ATM_SC 7720, MATH 2300

**ATM_SC 4800: Numerical Methods in Atmospheric Science and Natural Resources**
Examines numerical methods used in solving differential equations, filtering data sets, and Fourier decomposition of discrete data sets.

**Credit Hours:** 3  
**Prerequisites:** Math through Calculus III or senior standing

**ATM_SC 4949: Internship in Meteorology**
Practical professional work experience with professional or scientific meteorologists in off-campus work environment. Graded on S/U basis only.

**Credit Hours:** 1-6  
**Prerequisites:** junior standing, 12 hours Atmospheric Science

**ATM_SC 4950: Undergraduate Research in Atmospheric Science**
Research apprenticeship with a faculty mentor. Students are expected to develop initial concept for the research, design experiments, collect data, and analyze data with faculty input, oversight, and guidance.

**Credit Hours:** 1-4  
**Prerequisites:** STAT 1400, MATH 1500, 10 hours of Atmospheric Science and instructor's consent

**ATM_SC 4990: Daily Analysis and Forecast Interpretation**
A Capstone experience. In depth daily analysis and interpretation by students of the current and forecast states of the atmosphere. Discussions of implications to specific weather sensitive activities.

**Credit Hours:** 3  
**Prerequisites:** senior or graduate Atmospheric Science major

**ATM_SC 7001: Topics in Atmospheric Science**
Development of theory and applications for selected topics in atmospheric science.

**Credit Hour:** 1-99  
**Prerequisites:** instructor’s consent

**ATM_SC 7085: Problems in Atmospheric Science**
Independent study by graduate students in atmospheric science.

**Credit Hour:** 1-99

**ATM_SC 7310: Atmospheric Thermodynamics**
Thermodynamics of dry and moist air, atmospheric hydrostatics, convection, and development of the fundamental equations of geophysical fluid dynamics.

**Credit Hours:** 4  
**Prerequisites:** ATM_SC 1050, MATH 1700 (C or better), and one physics course
ATM_SC 7320: Atmospheric Dynamics
Dynamics and kinematics of atmospheric flow. Manipulation of fundamental equations, numerical modeling of atmosphere.
Credit Hours: 4
Prerequisites: ATM_SC 4310 or ATM_SC 7310

ATM_SC 7350: Mesoscale Meteorology and Dynamics
Survey of mesoscale phenomena, observing systems, analysis techniques, and modeling. Topics include fronts, jet streaks, gravity waves, organized convection, tornadoes, and severe local storm forecasting and structure.
Credit Hours: 3
Prerequisites: ATM_SC 4720 or ATM_SC 7720 and MATH 2300

ATM_SC 7400: Micrometeorology
Study of transport processes in the surface boundary layer. Important applications in pollution will be discussed.
Credit Hours: 3
Prerequisites: ATM_SC 4050 or ATM_SC 7050

ATM_SC 7510: Remote Sensing for Meteorology and Natural Resources
Principles of remote sensing with emphasis on the properties of atmosphere and the earth's surface from airborne and satellite sensors. The techniques for using geosynchronous and orbiting satellite platforms for assessing weather and natural resource features. Graduate student credit is dependent upon completion of additional advanced research assignments. Graded on A-F basis only.
Credit Hours: 3

ATM_SC 7520: Environmental Biophysics
(same as GEOG 7520). Students will learn techniques and principles used to describe the microenvironment of living organisms and use quantitative expressions to estimate missing values, and mass transfer laws to estimate flux of energy, water, and gas.
Credit Hours: 3
Prerequisites: college physics, calculus I

ATM_SC 7550: Atmospheric Physics
Physics of atmospheric nucleation-condensation, cloud droplet and precipitation formation, associated electrical phenomena, radiation transfer and remote sensing.
Credit Hours: 3
Prerequisites: 1 year of college Physics and MATH 1700

ATM_SC 7590: Radar Meteorology
Course concerns the theory and application of radar in meteorology. Graduate students will be required to conduct an independent research project using radar, in addition to the undergraduate requirements for the class. May be repeated for credit.
Credit Hours: 3
Prerequisites: MATH 1700, PHYSCS 2760

ATM_SC 7650: Long-Range Forecasting
Physical-dynamical principles of long-range forecasting from a month to a year. Empirical and numerical approaches in forecast practice.
Credit Hours: 3
Prerequisites: ATM_SC 4050 or ATM_SC 7050 or ATM_SC 3600

ATM_SC 7710: Synoptic Meteorology I
Meteorological Data. Basic techniques for surface and upper air analysis, using selected examples of weather patterns.
Credit Hours: 4
Prerequisites or Corequisites: one physics course
Prerequisites: ATM_SC 1050, MATH 1700 (C or better)

ATM_SC 7720: Synoptic Meteorology II
Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research.
Credit Hours: 4
Prerequisites: ATM_SC 4710 or ATM_SC 7710

ATM_SC 7800: Numerical Methods in Atmospheric Science and Natural Resources
Examines numerical methods used in solving differential equations, filtering data sets, and Fourier decomposition of discrete data sets.
Credit Hours: 3
Prerequisites: Math through Calculus III

ATM_SC 8001: Topics in Atmospheric Science
Development of the theory with its application for selected topics in atmospheric science.
Credit Hours: 3

ATM_SC 8090: Masters Research in Atmospheric Science
Original investigation in atmospheric science in support of a master's thesis. Graded on S/U basis only.
Credit Hour: 1-99

ATM_SC 8400: Atmospheric General Circulation
Comprehensive review of dynamical theories of general circulation with intensive discussion of current problems.
Credit Hours: 3
Prerequisites: ATM_SC 4320 or ATM_SC 7320

ATM_SC 8450: Tropical Meteorology
Study of the synoptic and dynamic character of the atmosphere in the tropical regions, including an examination of the general circulation and tropical storms.
Credit Hours: 3
Prerequisites: ATM_SC 4710 or ATM_SC 7710, ATM_SC 4720 or ATM_SC 7720 and MATH 2300; instructor's consent. Graded on A-F basis only
ATM_SC 8500: Radiation in the Atmosphere
Physics of solar and infrared radiative transfer in the atmosphere, including energy conversion effects, atmospheric optics, and photochemical processes.
Credit Hours: 3
Prerequisites: one year College Physics and MATH 1700

ATM_SC 8550: Nowcasting
Students will learn the science of nowcasting through the study of the various methods used and apply their knowledge in the design of the elements of a nowcast system and practical nowcasting exercises.
Credit Hours: 3
Prerequisites: ATM_SC 8500, instructor’s consent

ATM_SC 8600: Advanced Climate Dynamics
Study of global climate; application of large scale atmospheric dynamics; conservation of various forms of energy, climatic evaluation, large scale climatic modification.
Credit Hours: 3
Prerequisites: ATM_SC 4320 or ATM_SC 7320 and ATM_SC 8400 or ATM_SC 3600

ATM_SC 9001: Topics in Atmospheric Science
Development of the theory with its application for selected topics in atmospheric science.
Credit Hour: 1-99

ATM_SC 9085: Problems in Atmospheric Science
Independent study by graduate students in atmospheric science.
Credit Hour: 1-99

ATM_SC 9087: Seminar in Atmospheric Science
Seminar in Atmospheric Science.
Credit Hour: 1-99

ATM_SC 9090: Doctoral Research in Atmospheric Science
Original investigation in atmospheric science in support of a doctoral dissertation. Graded on S/U basis only.
Credit Hour: 1-99

ATM_SC 9300: Introduction to Chaos Theory
Atmospheric predictability and related topics are examined as they relate to governing equations of motion and their non-linear solutions.
Credit Hours: 3
Prerequisites: ATM_SC 4320 or ATM_SC 7320, MATH 4100

ATM_SC 9350: Advanced Dynamic Meteorology
Application of perturbation dynamics, advanced dynamics, and numerical methods to study of atmospheric circulations.
Credit Hours: 3
Prerequisites: ATM_SC 4320 or ATM_SC 7320

ATM_SC 9700: Advanced Synoptic Meteorology
Detailed examination of vertical motions, their forcing, and how each is diagnosed (quasigeostrophic theory, the Trenberth approximation, Q-vectors). Current issues in synoptic meteorology and operational forecasting are discussed.
Credit Hours: 3
Prerequisites: ATM_SC 4720 or ATM_SC 7720

ATM_SC 9712: Convection and Lightning
Cumulus convection and cloud physics topics that will facilitate a deeper understanding of cloud electrification and lightning production are studied. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ATM_SC 4710 or ATM_SC 7710, ATM_SC 4720 or ATM_SC 7720, MATH 2300; instructor’s consent

ATM_SC 9800: Numerical Weather Prediction
Examination of finite difference and objective analysis techniques, basic physical concepts, and parameterization of physical processes. Experience with a range of models (1-D cloud to operational PE models) stressed.
Credit Hours: 3
Prerequisites: instructor’s consent

Biochemistry (BIOCHM)

BIOCHM 1090: Introduction to Biochemistry
Fundamental concepts in biochemistry and molecular biology; structure function relationships, reactivity, thermodynamics, gene expression. Professional skills for biomedical careers. Primarily for freshman and sophomore biochemistry majors.
Credit Hours: 3
Prerequisites: departmental consent

BIOCHM 1094: Introductory Biochemistry Laboratory
Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes, PCR and cloning. Graded on A-F basis only.
Credit Hours: 2
Corequisites: concurrent enrollment in BIOCHM 1090 required.
Departmental Consent Required

BIOCHM 1094: Introductory Biochemistry Laboratory
Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes, PCR and cloning. Graded on A-F basis only.
Credit Hours: 2
Corequisites: concurrent enrollment in BIOCHM 1090 required.
Departmental Consent Required

BIOCHM 2110: The Living World: Molecular Scale
Survey of modern biochemistry and biotechnology. Structure and function of DNA, proteins, lipids and carbohydrates. The role of biopolymers in life processes and everyday living is emphasized.
Credit Hours: 3
Prerequisites: for non-Biochemistry majors only

BIOCHM 2112: Biotechnology in Society
Biotechnology in a social context covers three areas: introduction to terminology and concepts, specific biotechnological applications to modern problems, and ethical questions.
**BIOCHM 2480: Introduction to Macromolecular Structure and Function**
The function of biochemical macromolecules is directly related to their structure. The three-dimensional structures of proteins, nucleic acids, polysaccharides and membranes are each explored in the context of their functions and their microenvironments within living organisms. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** for non-biochemistry majors only

---

**BIOCHM 2484: Macromolecular Techniques Laboratory**
The laboratory experiments include DNA isolation, DNA cloning, PCR, plasmid transformation, protein expression, affinity-tagged chromatography, SDS-polyacrylamide gel electrophoresis, enzyme isolation, enzyme assay, buffer preparation, and Michaelis-Menten kinetics. Graded on A-F basis only.

**Credit Hours:** 2  
**Prerequisites:** sophomore standing; restricted to Biochemistry majors only

---

**BIOCHM 2484H: Macromolecular Techniques Laboratory - Honors**
The laboratory experiments include DNA isolation, DNA cloning, PCR, plasmid transformation, protein expression, affinity-tagged chromatography, SDS-polyacrylamide gel electrophoresis, enzyme isolation, enzyme assay, buffer preparation, and Michaelis-Menten kinetics. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** sophomore standing; Biochemistry majors only. Honors eligibility required

---

**BIOCHM 3630: General Biochemistry**
Survey of biochemistry; static/dynamic aspects of carbohydrates, lipids, proteins, nucleic acid. Discussion of metabolic pathways, energy production, and metabolic regulatory mechanism.

**Credit Hours:** 3  
**Prerequisites:** CHEM 2050

---

**BIOCHM 4001: Topics in Biochemistry**
Experimental courses; highly specialized topics taught infrequently or courses taught by visiting professors.

**Credit Hour:** 1-99

---

**BIOCHM 4270: Biochemistry**
First semester of a comprehensive biochemistry course: metabolic pathways, amino acids/proteins, carbohydrates, lipids, nucleic acids, kinetics, energy requirements, metabolic regulation in living cells.

**Credit Hours:** 3  
**Prerequisites:** CHEM 2110

---

**BIOCHM 4272: Biochemistry**
Second semester of a comprehensive biochemistry course, including metabolism of carbohydrates, fatty acids, steroids, amino acid synthesis and metabolism, molecular genetics, hormones, photosynthesis and integrated metabolism.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 4270

---

**BIOCHM 4300: Physical Chemistry of Biological Systems**
To present fundamental principles of physical chemistry in the context of the structure and function of biological macromolecules. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Biochemistry BIOCHM 4270 or concurrent enrollment

---

**BIOCHM 4376: Computer Assisted Sequence Analysis and Molecular Modeling**
Employs the use of computer-based interactive molecular graphics and sequence analysis software to analyze the three dimensional structures of macromolecules.

**Credit Hours:** 3  
**Prerequisites:** CHEM 2110

---

**BIOCHM 4385: Problems in Biochemistry**

**Credit Hour:** 1-3  
**Prerequisites:** departmental consent

---

**BIOCHM 4460: Cancer Biology**
(same as BIO_SC 4460). Cancer, cell biology, genetics, biochemistry.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 4272, BIO_SC 2300 and BIO_SC 2200

---

**BIOCHM 4510: Single Molecule Biophysics**
(same as PHYSCS 4510; cross-leveled with BIOCHM 7510). The course provides an overview of the biophysics of enzymes, nucleic acids and the cytoskeleton. Topics covered will include diffusion, molecular motors, polymerization and the cytoskeleton and the polymer properties of nucleic acids and microtubules.

**Credit Hours:** 3  
**Prerequisites:** PHYSCS 2760

---

**BIOCHM 4940: Internship in Biochemistry**
Field-based learning experience combining study, observation, and employment with a business, organization, or governmental agency. The internship provides opportunities to apply skills, concepts and theories about biochemistry in a practical context. The student intern, internship supervisor, and university coordinator will develop an individualized internship plan. Graded on S/U basis only.

**Credit Hours:** 1-6  
**Prerequisites:** junior standing; instructor’s consent

---

**BIOCHM 4950: Undergraduate Research in Biochemistry**
Individually directed laboratory research for upperclass students under faculty supervision.
Credit Hour: 2-3
Prerequisites: departmental consent

BIOCHM 4970: Senior Seminar in Biochemistry
Problem-based course on fundamental concepts of biochemistry. Requires written and oral presentations. One of two capstone courses required for biochemistry majors. Corequisites: BIOCHM 4974
Credit Hour: 1

BIOCHM 4974: Biochemistry Laboratory
Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes. One of two capstone courses required for biochemistry majors.
Credit Hours: 5
Prerequisites: BIOCHM 4272 or concurrent enrollment in BIOCHM 4272
Corequisites: BIOCHM 4970

BIOCHM 4996H: Honors Research in Biochemistry
Laboratory research for upper level honors students in consultation with Biochemistry faculty.
Credit Hour: 2-3
Prerequisites: Honors eligibility required

BIOCHM 7085: Problems in Biochemistry
Problems in Biochemistry.
Credit Hour: 1-6
Prerequisites: Consent of Director of Graduate Studies required

BIOCHM 7110: Maps in Medicine Summer Institute
Lab/lecture course in which high school teachers gain knowledge of two innovative, inquiry-based programs, Mapping Health and Mapping Cell Fate, that focus on influenza and developmental biology and Missouri science standards for biology and health. Graded on S/U basis only.
Credit Hours: 2
Prerequisites: departmental consent

BIOCHM 7270: Biochemistry
First semester of comprehensive biochemistry course: metabolic pathways, amino acids/proteins, carbohydrates, lipids, nucleic acids, kinetics, energy requirements, metabolic regulation in living cells.
Credit Hours: 3
Prerequisites: CHEM 2110

BIOCHM 7272: Biochemistry
Second semester of a comprehensive biochemistry course, including metabolism of carbohydrates, fatty acids, steroids, amino acid synthesis and metabolism, molecular genetics, hormones, photosynthesis and integrated metabolism.
Credit Hours: 3
Prerequisites: BIOCHM 7270

BIOCHM 7274: Biochemistry Laboratory
Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; radioisotope tracer in metabolism; isolation, purification and kinetics of enzymes.
Credit Hours: 5
Corequisites: concurrent enrollment in BIOCHM 7270

BIOCHM 7376: Computer Assisted Sequence Analysis and Molecular Modeling
This course uses advanced computer graphics and computational techniques to analyze protein and nucleic acid sequences and their three-dimensional structures.
Credit Hours: 2
Prerequisites: CHEM 2110

BIOCHM 7510: Single Molecule Biophysics
(same as PHYSCS 7510; cross-leveled with BIOCHM 4510). The course provides an overview of the biophysics of enzymes, nucleic acids and the cytoskeleton. Topics covered will include diffusion, molecular motors, polymerization and the cytoskeleton and the polymer properties of nucleic acids and microtubules.
Credit Hours: 3
Prerequisites: PHYSCS 2760

BIOCHM 7978: Cancer Biology
(same as BIO_SC 7978). The course will cover major molecular and cellular aspects of cancer. Students will read original research articles, present overviews and lead class discussions.
Credit Hours: 3
Prerequisites: BIOCHM 4270, BIO_SC 2300 and BIO_SC 4976

BIOCHM 8060: Ethical Conduct of Research
(same as BIO_SC 8060). Discussion of ethical issues in biological research, including the rules and conventions for appropriate research conduct. Graded on S/U basis only.
Credit Hour: 1

BIOCHM 8090: Research in Biochemistry
Research in biochemistry for qualified students, with counsel of faculty. Includes preparation of dissertation. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: Consent of Director of Graduate Studies required

BIOCHM 8240: Introduction to Graduate Biochemistry I
Introduction to biochemistry for life science graduate students. Core course for Biochemistry students. Structures and interactions of biological macromolecules including thermodynamics, binding, enzyme action and biological membranes as well as techniques of analysis and structure determination.
Credit Hours: 4
Prerequisites: Undergraduate organic chemistry plus undergraduate biochemistry or molecular biology, their equivalent or permission of instructor
**BIOCHM 8260: Macromolecular Systems Integration**
To introduce graduate students to biochemistry at the graduate level with particular emphasis on genomics/gene expression and replication; proteomics/cell signaling and metabolism. Course graded on A-F basis only.

**Credit Hours:** 4  
**Prerequisites:** BIOCHM 8240

---

**BIOCHM 8360: Nutritional Biochemistry of Carbohydrates**  
(same as NUTRIT 8360 and NUTR_S 8360). Current concepts with in-depth coverage of selected examples of key regulatory steps controlling carbohydrate metabolism; emphasizing molecular mechanisms. Based entirely on research literature and taught in a tutorial format.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 7272

---

**BIOCHM 8362: Introduction to Plant Metabolism**  
(same as PLNT_S 8362 and BIO_SC 8362). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant metabolism. Graded on A-F basis only.

**Credit Hours:** 2

---

**BIOCHM 8365: Introduction to Molecular Cell Biology**  
(same as BIO_SC 8365 and PLNT_S 8365). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis on plant biology. This course examines the basic concepts and techniques used to understand molecular cell biology. Graded on A-F basis only.

**Credit Hours:** 2

---

**BIOCHM 8390: Molecular Biology of Mineral Nutrition**  
(same as NUTRIT 8390 and NUTR_S 8390). Current concepts of metal ion transport, intracellular metal trafficking and metal-dependent regulation of gene expression. Based entirely on research literature and taught in a tutorial format.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 7272 and a 4000-level nutrition course

---

**BIOCHM 8430: Physical Biochemistry**
Physical concepts underlying a variety of physical chemical methods as they apply to biochemical research.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 7272 and CHEM 3300

---

**BIOCHM 8432: Enzymology and Metabolic Regulation**
A basic introduction to the study of enzymes and their role in intermediary metabolism. Topics include enzyme kinetics, mechanisms of enzymatic catalysis and control of metabolic pathways.

**Credit Hours:** 3

---

**BIOCHM 8438: Nutrient Regulation of Gene Expression**  
(same as AN_SCI 8438, NUTRIT 8438, and NUTR_S 8438). Current concepts with in-depth coverage of several minerals that illustrate themes in molecular mineral nutrition. Based entirely on research literature and taught in a tutorial format.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 7272 and a 4000-level nutrition course

---

**BIOCHM 8450: Rotation Research**
Introductory laboratory research. Graded on A-F basis only. Normally 1 hour per advisor per semester, two-1 hour sections can be taken per semester.

**Credit Hour:** 1-2

---

**BIOCHM 9001: Topics in Biochemistry**
Experimental courses, highly specialized topics taught infrequently or courses taught by visiting professors.

**Credit Hour:** 1-9

---

**BIOCHM 9085: Problems in Biochemistry**
Problems in Biochemistry

**Credit Hour:** 1-6

---

**BIOCHM 9087: Seminar in Biochemistry**
Review of current literature; individual presentation of research or classical science topics.

**Credit Hour:** 1

---

**BIOCHM 9090: Research in Biochemistry**
Research in biochemistry for qualified students, with counsel of faculty. Includes preparation of dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

**BIOCHM 9430: Molecular Biology I**  
(same as MICROB 9430). Detailed examination of current fundamental concepts of molecular genetics of bacteria, bacteriophages and yeast. Experimental approaches to analysis of the physical structures of genomic nucleic acids, the biochemistry and genetics of mutations, replication, gene transfer and gene expression will be examined in depth from reports in the current literature.

**Credit Hours:** 4

---

**BIOCHM 9432: Molecular Biology II**  
(same as MICROB and BIO_SC 9432) Detailed experimental analysis of eukaryotic cellular and molecular biology relevant to cellular and viral gene expression, post-transcriptional and post-translational modifications and genome replication. Models for developmental genetic analysis and genetic determinants controlling developmental processes utilizing the current literature will be examined.

**Credit Hours:** 4
BIOCHM 9462: Hormone Action
A lecture course with weekly assigned readings. Topics will include: a description of selected polypeptide, steroid and other hormones and their biological effects; receptors; second messengers; protein phosphorylation in hormone mediation; growth factors; cellular oncogenes.
Credit Hours: 2
Prerequisites: BIOCHM 7272

BIOCHM 9466: Plant Biochemistry
Emphasizes biochemistry unique to plants; biochemical events plants share with other organisms discussed, compared. Photosynthesis, metabolism, composition, compartmentation, regulation of biochemical events included.
Credit Hours: 3
Prerequisites: BIOCHM 4270

BIOCHM 9468: Molecular Biology of Plant Growth and Development
(same as BIO_SC 9468). Molecular biology of plant hormones, signal transduction, environmental signals.
Credit Hours: 3

BIOCHM 9470: Analytical Biochemistry—Chromatography
Principles, experimental design, capabilities, limitations, and applications of the general field of chromatography of biologically important molecules. Eight (2-hour) lectures, eight (4-hour) labs. Four weeks.
Credit Hours: 2

BIOCHM 9472: Analytical Biochemistry—Mass Spectrometry
Instrumentation, fragmentation mechanisms, interpretation of spectra, combined gas chromatography--mass spectrometry. Eight (2-hour) lectures, eight (4-hour) labs.
Credit Hours: 2

Biological Engineering (BIOL_EN)

BIOL_EN 1000: Introduction to Biological Engineering
For first semester engineering students. Develop appreciation for professional engineering. Students will participate with senior design students to conceptualize a case-study problem.
Credit Hour: 1-2

BIOL_EN 2000: Professional Development in Engineering
A review of professional opportunities, registration, ethics, and societies.
Credit Hour: 1-2
Prerequisites: sophomore standing

BIOL_EN 2080: Introduction to Programming for Engineers
This course teaches how to write scientific programs for analysis of data and simulation of physical phenomena using Matlab. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MATH 1500

BIOL_EN 2180: Engineering Analysis of Bioprocesses
Material and Energy Balances. Integrating principles of physics, chemistry and mathematics to analyze steady state and transient biological, biomedical processes. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MATH 1700, CHEM 1320, PHYSCS 2750
Corequisites: BIOL_EN 2080

BIOL_EN 3001: Topics in Biological Engineering
Current and new technical developments in biological engineering.
Credit Hours: 3
Prerequisites: instructor’s consent

BIOL_EN 3050: Environmental Control for Biological Systems
Systems for controlling the physical environments (heat, moisture, light, contaminating organism, chemicals) for plant and animal systems including livestock, aquacultures, crops and agricultural products.
Credit Hours: 3
Prerequisites: ENGINR 2300 and MATH 4100

BIOL_EN 3070: Biological Fluid Mechanics
Basic principles of fluid mechanics applied to transport processes in biological systems. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: PHYSCS 2750 and MATH 1700

BIOL_EN 3075: Introduction to Materials Engineering
Course covers concepts and techniques in materials engineering from an engineering design perspective, materials requirements for design, and fundamentals; intended for undergraduate engineering students. Graded on A-F basis only. Prerequisites: MATH 2300, ENGINR 1200, ENGINR 2200;
Credit Hours: 3
Corequisites: One of the following BIOL_EN 3180, CH_ENG 3261, MAE 4231, MAE 4300, or instructor consent

BIOL_EN 3170: Biomaterials
Engineering sciences and design will be leverage for the study and design of biomaterials. Understanding the structure-property relationship between biomaterials and tissue will be addressed for implant design.
Credit Hours: 3
Corequisites: BIOL_EN 2180, ENGINR 2200 or instructor’s consent

BIOL_EN 3180: Heat and Mass Transfer in Biological Systems
Principles of heat and mass transfer and their application to biomedical, bioenvironmental, and bioprocessing areas.
Credit Hours: 3
Prerequisites: ENGINR 2300 or CH_ENG 3261, or concurrently

BIOL_EN 4001: Topics in Biological Engineering
Current and new technical developments in biological engineering.
Credit Hours: 3
Prerequisites: instructor’s consent
BIOL_EN 4070: Bioelectricity
Application of engineering approaches to understand bioelectricity at the cellular level including the equivalent circuit of cell membranes and the electronic design of patch-clamp amplifiers.
Credit Hours: 3
Prerequisites: PHYSCS 2760 and BIOL_EN 3180 or instructor's consent

BIOL_EN 4080: Engineering Computation
An introduction to numerical methods relevant to biological engineering in the context of scientific computing. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MATH 4100

BIOL_EN 4085: Problems in Biological Engineering
Supervised independent study at the undergraduate level.
Credit Hour: 1-5
Prerequisites: instructor's consent

BIOL_EN 4150: Soil and Water Conservation Engineering
(same as CV_ENG 4710). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor's consent

BIOL_EN 4160: Food Process Engineering
Study of transport phenomena and unit operations in food processing systems. Emphasis on fluid flow and heat transfer in food processing, preservation processes, refrigeration, freezing, psychrometrics, and dehydration.
Credit Hours: 3
Prerequisites: BIOL_EN 3180 or instructor's consent

BIOL_EN 4170: Biomaterials Interfaces of Implantable Devices
Surface structures and properties to improve biocompatibility will be studied. Engineering sciences and design will be leverage in the design of an improved biocompatible surface.
Credit Hours: 3
Prerequisites: BIOL_EN 3170 or instructor's consent

BIOL_EN 4231: Transport Phenomena in Materials Processing
(same as MAE 4231). Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MAE 3200, MAE 3400, MAE 4300 (or equivalent courses) and MATH 4100

BIOL_EN 4250: Irrigation and Drainage Engineering
Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage.
Credit Hours: 3
Prerequisites: CV_ENG 3700 or MAE 3400 or BIOL_EN 2180

BIOL_EN 4260: Food Process Engineering II
Continuing study of transport phenomena and unit operations in food processing systems. Emphasis on fluid food evaporation concentration food dehydration, contact equilibrium processes and mechanical separation processes.
Credit Hours: 3
Prerequisites: BIOL_EN 4160 or instructor's consent

BIOL_EN 4270: Design of Experiments and Statistical Quality Control for Process Engineers
(same as CH_ENG 4270). A practical statistical tool box for experimenters including comparison of process means, effects of variables, design and interpretation of factorial experiments, and statistical quality control.
Credit Hours: 3
Prerequisites: experience with Excel or instructor's consent

BIOL_EN 4280: Survey of Bioengineering Techniques
Laboratory techniques to train students in Bioelectricity, Biomechantronics, Bioenvironment, Biomaterials, Biophotonics, Bioprocessing. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: senior standing
BIOL_EN 4350: Watershed Modeling Using GIS
(same as CV_ENG 4720). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP. Procedures for model calibration/sensitivity data analysis.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor’s consent

BIOL_EN 4370: Orthopaedic Biomechanics
(same as V.M.S 4370) Engineering sciences will be leverage to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ENGINR 1200, BIOL_EN 3170, instructor’s consent required

BIOL_EN 4380: Applied Electronic Instrumentation
Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning, computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems.
Credit Hours: 4
Prerequisites: PHYSCS 2760

BIOL_EN 4420: Introduction to Biomedical Imaging
(same as PHYSCS 4420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasound, MRI and Optical Imaging, as well as recent developments in biomedical imaging.
Credit Hours: 3
Prerequisites: PHYSCS 2760

BIOL_EN 4470: Biomolecular Engineering and Nanobiotechnology
Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: senior/graduate standing or instructor’s consent

BIOL_EN 4480: Physics and Chemistry of Materials
(same as PHYSCS 4190 and CHEM 4490 and NU_ENG 4319). Physics and Chemistry of Materials is a 3 credit hours undergraduate/graduate level course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid term and one final exam. Graduate students will submit a term paper.
Credit Hours: 3
Prerequisites: PHYSCS 2760/CHEM 1320 or equivalent/prior approval by instructor

BIOL_EN 4550: Design of Livestock Waste Management Systems
Development and application of design criteria to the design of agricultural waste management facilities.
Credit Hours: 3
Prerequisites: CHEM 1310 and CV_ENG 3700, MAE 3400 or instructor’s consent

BIOL_EN 4570: Fluorescent Imaging
Principles and applications of fluorescent imaging. The course covers: Image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; molecular and cellular fluorescent imaging.
Credit Hours: 3
Prerequisites: BIO_SC 1500 and BIOL_EN 2180 or instructor’s consent

BIOL_EN 4575: Computational Neuroscience
(same as BIO_SC and ECE 4580). An interdisciplinary course with a strong foundation in quantitative science for students in biological-behavioral sciences. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: BIO_SC 1010, BIO_SC 1500; MATH 1500

BIOL_EN 4580: Mechanical Systems Engineering
Fundamentals and applications of prime movers and power transmissions for the design of engineering systems.
Credit Hours: 3
Prerequisites: Thermodynamics course, Fluid Mechanics course
Corequisites: ENGINR 2100 or BIOL_EN 4380 or instructor’s consent

BIOL_EN 4670: Photonics and Nanotechnologies in Optical Biosensors
Latest applications of photonics and nanotechnologies in optical biochemical sensors will be reviewed. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: PHYSCS 2760

BIOL_EN 4770: Biomedical Optics
Essential concepts and methods for applying optical techniques to biomedical diagnosis and therapy will be covered with major application examples being discussed.
Credit Hours: 3
Prerequisites: PHYSCS 2760 and BIOL_EN 3180; or instructor’s consent

BIOL_EN 4870: Molecular and Cell Mechanics
Application of mechanics and engineering principles to biological systems at the cellular and molecular levels. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ENGINR 2200

BIOL_EN 4940: Engineering Internship
Problem course following prior approved work experience. Problem selected by internship company representative, faculty problem adviser and student. Supervised by faculty problem advisor and presented in engineering report form.
Credit Hours: 2-5
Prerequisites: advisor’s consent
BIOL_EN 4980: Biological Engineering Design
Capstone design course for the Biological Engineering major. Design of biological system devices or processes.
Credit Hours: 3
Prerequisites: senior standing or instructor’s consent

BIOL_EN 4990: Undergraduate Research in Biological Engineering
Supervised independent study at the undergraduate level.
Credit Hour: 1-5
Prerequisites: instructor’s consent

BIOL_EN 4995: Undergraduate Honors Research in Biological Engineering
Open only to honor students in Biological Engineering. Independent investigation in biological engineering to be presented as a thesis.
Credit Hour: 1-5
Prerequisites: advisor’s consent

BIOL_EN 7001: Topics in Biological Engineering
Study of advanced developments in biological engineering.
Credit Hour: 1-3

BIOL_EN 7070: Bioelectricity
Application of engineering approaches to understand bioelectricity at the cellular level including the equivalent circuit of cell membranes and the electronic design of patch-clamp amplifiers. Prerequisites: PHYSCS 2760 and BIOL_EN 3180 or instructor’s consent
Credit Hours: 3

BIOL_EN 7080: Engineering Computation
An introduction to numerical methods relevant to biological engineering in the context of scientific computing.
Credit Hours: 3
Prerequisites: MATH 4100

BIOL_EN 7150: Soil and Water Conservation Engineering
(same as CV_ENG 7710). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CV_ENG 3200, or instructor’s consent

BIOL_EN 7160: Food Process Engineering
Study of transport phenomena and unit operations in food processing systems. Emphasis on fluid flow and heat transfer in food processing, preservation processes, refrigeration, freezing, psychometrics, and dehydration.
Credit Hours: 3
Prerequisites: BIOL_EN 3180 or instructor’s consent

BIOL_EN 7170: Biomaterials Interfaces of Implantable Devices
Surface structures and properties to improve biocompatibility will be studied. Engineering sciences and design will be leverage in the design of an improved biocompatible surface.

BIOL_EN 7231: Transport Phenomena in Materials Processing
(same as MAE 7231). Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MAE 3200, MAE 3400, MAE 4300 or equivalent; and MATH 4100

BIOL_EN 7250: Irrigation and Drainage Engineering
Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage.
Credit Hours: 3
Prerequisites: CV_ENG 3700 or MAE 3400 or BIOL_EN 2180

BIOL_EN 7260: Food Process Engineering II
Continuing study of transport phenomena and unit operations in food processing systems. Emphasis on fluid food evaporation concentration food dehydration, contact equilibrium processes and mechanical separation processes.
Credit Hours: 3
Prerequisites: BIOL_EN 7160 or instructor’s consent

BIOL_EN 7270: Design of Experiments and Statistical Quality Control for Process Engineers
(same as CH_ENG 7270). A practical statistical tool box for experimenters including comparison of process means, effects of variables, design and interpretation of factorial experiments, and statistical quality control.
Credit Hours: 3
Prerequisites: experience with Excel or instructor's consent

BIOL_EN 7310: Feedback Control Systems
(same as ECE 7310). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Graded A-F only. May be repeated for credit.
Credit Hours: 4
Prerequisites: MATH 4100

BIOL_EN 7315: Introduction to Bioprocess Engineering
(same as CH_ENG 7315). This general introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analysis proceed through the use of mass balances, energy balances, and empirical or theoretical models.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 (for biological engineering students) or CH_ENG 2225 (for chemical engineering students) or instructor's consent
BIOL_EN 7316: Biomass Refinery Operation
(same as CH_ENG 7316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.

Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CH_ENG 2225 or instructor’s consent

---

BIOL_EN 7350: Watershed Modeling Using GIS
(same as CV_ENG 7720). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP, Procedures for model calibration/sensitivity data analysis.

Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor’s consent

---

BIOL_EN 7370: Orthopaedic Biomechanics
(same as V_M_S 7370). Engineering sciences will be leverage to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ENGINR 1200 and BIOL_EN 3170, instructor’s consent required

---

BIOL_EN 7380: Applied Electronic Instrumentation
(cross-leveled with BIOL_EN 4380). Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning, computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems.

Credit Hours: 4
Prerequisites: PHYSCS 2760

---

BIOL_EN 7420: Introduction to Biomedical Imaging
(same as PHYSCS 7420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasound, MRI and Optical Imaging, as well as recent developments in biomedical imaging, as well as recent developments in biomedical imaging.

Credit Hours: 3
Prerequisites: PHYSCS 2760

---

BIOL_EN 7470: Biomolecular Engineering and Nanobiotechnology
Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PHYSCS 7470

---

BIOL_EN 7480: Physics and Chemistry of Materials
(same as PHYSCS 7190 and NU_ENG 7319 and CHEM 7490). Physics and Chemistry of Materials is a 3 credit hours undergraduate/graduate level course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper.

Credit Hours: 3
Prerequisites: PHYSCS 2760 and BIOL_EN 3180 or instructor’s consent

---

BIOL_EN 7550: Design of Livestock Waste Management Systems
Development and application of design criteria to the design of agricultural waste management facilities.

Credit Hours: 3
Prerequisites: CHEM 1310 and CV_ENG 3700, MAE 3400 or instructor’s consent

---

BIOL_EN 7570: Fluorescent Imaging
Principles and applications of fluorescent imaging. The course covers: Image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; molecular and cellular fluorescent imaging. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BIO_SC 1500 and BIOL_EN 2180 or instructor’s consent

---

BIOL_EN 7575: Computational Neuroscience
(Same as BIO_SC 7580 and ECE 7580). An interdisciplinary course with a strong foundation in quantitative science for students in biological-behavioral science. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: BIO_SC 1010, BIO_SC 1500; MATH 1500

---

BIOL_EN 7580: Mechanical Systems Engineering
Fundamentals and applications of prime movers and power transmissions for the design of engineering systems.

Credit Hours: 3
Prerequisites: Thermodynamics course, Fluid Mechanics course Corequisites: ENGINR 2100 or BIOL_EN 7380 or instructor’s consent

---

BIOL_EN 7670: Photonics and Nanotechnologies in Optical Biosensors
Latest applications of photonics and nanotechnologies in optical biochemical sensors will be reviewed. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PHYSCS 2760

---

BIOL_EN 7770: Biomedical Optics
Essential concepts and methods for applying optical techniques to biomedical diagnosis and therapy will be covered with major application examples being discussed.

Credit Hours: 3
Prerequisites: PHYSCS 2760 and BIOL_EN 3180 or instructor’s consent

---

BIOL_EN 8001: Advanced Topics in Biological Engineering
Study of advanced developments in biological engineering.

Credit Hour: 1-3

---

BIOL_EN 8085: Problems in Biological Engineering
Supervised individual study at the graduate level.
Biol_EN 8087: Seminar in Biological Engineering
Recent investigations in biological engineering and related fields. Discussion of current literature; preparation and presentation of papers.
Credit Hours: 1
Prerequisites: departmental consent

Biol_EN 8088: Advanced Seminar in Biological Engineering
Student presentation and discussion of topical research. May be repeated for credit.
Credit Hours: 1
Prerequisites: Biol_EN 8087 and Biol_EN 8402 or instructor's consent

Biol_EN 8150: Natural Systems for Wastewater Treatment
Emphasis is on the design, management, and biological performance of lagoons, overland flow systems, and constructed wetlands.
Credit Hours: 3
Prerequisites: CV_ENG 7230 and Biol_EN 7150 or instructor's consent

Biol_EN 8170: Sensors and Biosensors
The course covers basic principles of chemical and biological sensors, such as immobilization techniques, transducers (optical, electrical, etc.) and performance factors.
Credit Hours: 3

Biol_EN 8180: Numerical Methods in Engineering Research
Numerical techniques and case studies in Biological Engineering. Topics include basic numerical methods, mathematical representation of data, matrix algebra, ordinary and partial differential equations.
Credit Hours: 3
Prerequisites: Math 4100

Biol_EN 8230: Advanced Ceramic Materials
(same as CH_ENG 8230 and MAE 8230). To provide an advanced level understanding between processing, properties, and microstructure of ceramic materials. Topics include crystallography, defect chemistry, transport properties, microstructure, and forming methods. Graded on A-F basis only.
Credit Hours: 3

Biol_EN 8250: Water Management Theory
Advanced studies in erosion control, irrigation, and drainage. Water resources engineering.
Credit Hours: 3
Prerequisites: Math 1500, Computer Engineering and Computer Science course, SOIL 4307 or SOIL 7307 and Soil Conservation course

Biol_EN 8270: Principles and Applications of Fluorescence
Physical foundations of fluorescence, fluorophores, steady-state and lifetime measurements, and instrumentation. Applications in the life science from tissues staining to DNA probes. Graded on A-F basis only.
Credit Hours: 3

Biol_EN 8280: Advanced Biological Transport Processes
Principles of fluid flow, heat transfer, and mass transfer applied to (a) understanding of how the human body functions (from the cellular up to the system level) and (b) designing biomedical devices. An independent project/case-study of a relevant research topic also required.
Credit Hours: 3

Biol_EN 8360: Food Extrusion
Engineering principles and applications of single and twin screw food cooking extrusion systems. Modeling, control, and optimization of extrusion systems. Dough rheology.
Credit Hours: 2
Prerequisites: Biol_EN 7260

Biol_EN 8370: Materials Characterization Techniques
Concepts and techniques in characterizing materials, including bulk and surface analyses. Techniques are presented in terms of use, sample requirements, and the engineering principles. Topics include: contact angle measurement, XPS, SEM, TEM, STM, AFM, XRD, and thermal analyses.
Credit Hours: 3
Prerequisites: at least one undergraduate course in material science, engineer, or design

Biol_EN 8380: Modeling and Identification of Engineering Systems
Generalized description of engineering systems, bond graph modeling, system identification techniques, and neural network approaches.
Credit Hours: 3
Prerequisites: Math 4100

Biol_EN 8402: Research Methods
(same as F_S 8402). Review of literature; planning research projects; publication procedures.
Credit Hours: 2

Biol_EN 8470: Ultrasensitive Biodetection
Multiplexing single-molecule, single-cell, nanobiotech analytical techniques to improve disease diagnosis, treatment, and understanding of biophenomena (membrane transport, gene expression, enzyme activities, cell communications). Graded A-F only.
Credit Hours: 3
Prerequisites: Instructor's consent required

Biol_EN 8570: Microscopic Imaging
Advanced topics in microscopic imaging with focus on applications of molecular and cellular imaging using fluorescent microscopy.
Credit Hours: 3
Prerequisites: Biol_EN 7570 or instructor's consent
BIOL_EN 8770: Photon Migration and Optical Imaging in Turbid Media  
The essential concepts and techniques in optical imaging in turbid media will be covered including both forward problems and inverse reconstruction theories. Graded on A/F basis only.  
Credit Hours: 3  
Prerequisites: instructor’s consent

BIOL_EN 8870: Molecular and Cell Mechanics  
Application of mechanics and engineering principles to biological systems at the cellular and molecular levels. Graded on A/F basis only.  
Credit Hours: 3  
Prerequisites: ENGINR 2200

BIOL_EN 8990: Masters Thesis Research in Biological Engineering  
Independent investigation to be presented as a thesis. Graded on S/U basis only.  
Credit Hour: 1-99

BIOL_EN 9990: Doctoral Dissertation Research in Biological Engineering  
Independent investigation to be presented as a thesis. Graded on S/U basis only.  
Credit Hour: 1-99

Biological Sciences (BIO_SC)  

BIO_SC 1001: Topics in Biological Science - General  
Selected topics not covered in current offerings. May not be used in partial fulfillment of requirements for a biological science in general education. May be graded on A-F or S/U basis.  
Credit Hour: 1-3

BIO_SC 1002: Topics in Biological Sciences- Biological/Physical/Mathematics  
Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.  
Credit Hour: 1-3

BIO_SC 1010: General Principles and Concepts of Biology  
Emphasizes connections and applications to society and the human condition, science literacy, and critical thinking skills. A discussion of general principles and fundamental concepts of living things. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.  
Credit Hours: 3  
Prerequisites: MATH 1100 or concurrent enrollment

BIO_SC 1020: General Biology Laboratory  
Laboratory exercises dealing with representative organisms and methods of modern biological sciences. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.  
Credit Hours: 2  
Prerequisites: BIO_SC 1010 or BIO_SC 1400 or BIO_SC 1010 concurrently

BIO_SC 1030: General Principles and Concepts of Biology with Laboratory  
Survey of general principles and basic concepts of life science, emphasizing applications to society and the human condition. Lectures address science literacy and critical thinking and laboratory exercises use representative organisms to complement lecture topics. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.  
Credit Hours: 5  
Prerequisites: MATH 1100 or concurrent enrollment

BIO_SC 1060: Basic Environmental Studies  
Considers the ecosystem, energy and biogeochemical cycles and population dynamics; relation of the environment to agriculture and technology, pollution, power and food production; politico-economic considerations; moral and ethical issues. For non-science majors.  
Credit Hour: 3

BIO_SC 1100: Introductory Zoology with Laboratory  
(same as F_W 1100). Introduces important principles and concepts of zoology. Emphasizes cell biology; evolution; genetics; ecology; structure, function, development of the organism.  
Credit Hour: 5

BIO_SC 1200: General Botany with Laboratory  
Introduction to study of plants. Emphasis on structure, growth, physiology, genetics and reproduction of plants.  
Credit Hours: 5

BIO_SC 1400: Evolution for Everyone  
This course will explore the application of evolutionary theory to modern human affairs. We will study the processes involved in evolution and investigate evolutionary interpretations of human social behavior (e.g., psychology, mate choice, economics, religion, and morality). No credit if student has received credit for BIO_SC 2060 or BIO_SC 4600.  
Credit Hours: 3

BIO_SC 1500: Introduction to Biological Systems with Laboratory  
Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology.  
Credit Hour: 3-5  
Prerequisites: MATH 1100 and high school chemistry

BIO_SC 1500H: Introduction to Biological Systems with Laboratory Honors  
Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology.
**BIO_SC 2001: Topics in Biological Sciences - General**
Selected topics not covered in current offerings. May not be used in partial fulfillment of requirements for a biological science in general education. May be graded on A-F or S/U basis only.

**Credit Hours:** 1-3

**Prerequisites:** a course in general biology

**BIO_SC 2002: Topics in Biological Sciences- Biological/Physical/Mathematics**
Selected topics not covered in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hours:** 1-3

**Prerequisites:** a course in general biology

**BIO_SC 2002H: Topics in Biological Sciences- Biological/Physical/Mathematics - Honors**
Selected topics not covered in regularly offered courses.

**Credit Hours:** 1-3

**Prerequisites:** a course in general biology; Honors eligibility required

**BIO_SC 2010: Undergraduate Seminar in Biological Sciences**
Discussion and critical evaluation of current topics in biological sciences for intermediate-level students. Some sections may be graded on either A-F or S/U basis only.

**Credit Hours:** 1-3

**Prerequisites:** sophomore standing

**BIO_SC 2020: How the Brain Works**
Basic structure and function of the brain; left and right brain studies; gender differences; learning and memory; brain disorders.

**Credit Hours:** 1

**Prerequisites:** BIO_SC 1010

**BIO_SC 2060: Community Biology**
Principles of population biology, ecology, and evolution, including consideration of human impacts on biological communities and ecosystems.

**Credit Hours:** 3

**Prerequisites:** BIO_SC 1010 or equivalent. Not open to biology majors

**BIO_SC 2100: Infectious Diseases**
An introduction to the basic science of bacterial, viral, protozoan, fungal and helminth infections, including discussions of how illness has influenced or been affected by public policy and culture.

**Credit Hours:** 3

**Prerequisites:** BIO_SC 1010. Not open to Biology Majors

**BIO_SC 2150: Genetic Diseases**
This course will discuss the biological basis for genetic diseases, including inherited diseases and non-inherited diseases such as cancer. The units will include an introduction providing necessary background information, as section studying the technology used to study genetic diseases and several units discussing specific diseases and their impact on history and society. This course is intended for non-science majors. Cannot be used to satisfy degree requirements for biology major or biology minor.

**Credit Hours:** 3

**Prerequisites:** BIO_SC 1010

**BIO_SC 2200: General Genetics**
Principles of inheritance in plants and animals; structure and use of genetic material, transmission of genetic information, linkage, modification of genetic information, regulation of genetic activity, population genetics.

**Credit Hours:** 4

**Prerequisites:** BIO_SC 1500 and CHEM 1320 (or concurrent enrollment)

**BIO_SC 2300: Introduction to Cell Biology**
Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized.

**Credit Hours:** 4

**Prerequisites:** BIO.SC 2200

**BIO_SC 2300H: Introduction to Cell Biology- Honors**
Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized.

**Credit Hours:** 4

**Prerequisites:** BIO.SC 2200. Honors eligibility required

**BIO_SC 2600: Ornithology**
(same as F&W 2600). Structure, identification, habits, importance of regional birds. Field work, lectures, lab.

**Credit Hours:** 4

**Prerequisites:** 5 hours biology or instructor's consent

**BIO_SC 2700: Ichthyology**
(same as F&W 2700). A broad introduction to the biology and ecology of fishes. Emphasis will be placed on understanding the adaptations fishes exhibit to aspects of their environment. Includes lab.

**Credit Hours:** 4

**Prerequisites:** 8 hours biology or equivalent

**BIO_SC 2940: Internship in Biological Science**
Work experience in a non-profit, for profit, or governmental organization relevant to the biological sciences. Intended for students doing internships in which independent research is less than 50% of the experience. Graded on S/U basis only.

**Credit Hours:** 1-3

**Prerequisites:** junior standing, instructor's consent, 12 hours of biological science

<td>BIO_SC 3100, BIO_SC 3650, BIO_SC 4600 or BIO_SC 4660</td>
</tr>
</tbody>
</table>
BIO_SC 3660: Mammalogy
(same as F_W 3660). Taxonomy, distribution, structure, habits, importance of mammals; emphasizes those of central United States. Includes lab.

Credit Hours: 4
Prerequisites: 8 hours of biology or instructor's consent

BIO_SC 3700: Animal Physiology
Introduces concepts of vertebrate organ function and homeostatic control emphasizing mammalian physiology. Some comparisons to function in other vertebrates and strategies for coping with environmental stresses introduced. Includes lab.

Credit Hours: 5
Prerequisites: BIO_SC 2300

BIO_SC 3710: Introductory Entomology
(same as PLNT_S 3710). Emphasizes the role insects play in the scheme of life. Topics include insect structure, development, diversity, ecology, communication and behavior, and management.

Credit Hours: 3
Prerequisites: BIO_SC 1200, or introductory Biological Sciences course

BIO_SC 3715: Insect Diversity
(same as PLNT_S 3715). Laboratory exercises emphasizing external insect anatomy, classification, and identification (to family level). Preparation of an insect collection is required.

Credit Hours: 2
Prerequisites: PLNT_S 3710 or BIO_SC 3710

BIO_SC 3750: General Microbiology
Principles of microbiology. Includes lab.

Credit Hour: 3-4
Prerequisites: BIO_SC 2200 and BIO_SC 2300 completed with C range grades

BIO_SC 3780: Genetics Laboratory
Experimental genetic studies of Drosophila, corn and microorganisms.

Credit Hours: 2
Prerequisites: C range grade or better in BIO_SC 2200 or instructor's consent

BIO_SC 3790: Developmental Biology Laboratory
Laboratory studies of development in sea urchin, chicken and roundworm.

Credit Hours: 2
Prerequisites: BIO_SC 3800 or co-enrollment in BIO_SC 3800

BIO_SC 3800: Developmental Biology
Analysis of the molecular, genetic, cellular, and morphological processes responsible for phenotypic changes in developing organisms. A variety of experimental systems are discussed to identify common mechanisms used by developing organisms.

Credit Hours: 3

Prerequisites: BIO_SC 2200, BIO_SC 2300, CHEM 2100

BIO_SC 4002: Topics in Biological Science - Biological/Physical/Mathematics
Selected topics not in regularly offered courses.

Credit Hour: 1-3
Prerequisites: instructor's consent and senior standing. May be repeated up to 2 times for credit

BIO_SC 4085: Problems in Biological Sciences
Individual supervised work to supplement regularly organized courses in biology; introduction to research. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-3
Prerequisites: junior standing and instructor's consent

BIO_SC 4100: Limnology
(same as F_W 4100). (lecture/lab: 4 hrs.; lecture only: 3 hrs.) Ecology of inland waters with emphasis on productivity.

Credit Hour: 3-4
Prerequisites: senior standing or BIO_SC 3650

BIO_SC 4300: Analysis of Biological Macromolecules
Theory/application of techniques used for characterization of proteins, nucleic acids; topics: sedimentation velocity; equilibrium; sucrose density gradients; electrophoresis; spectrophotometry.

Credit Hours: 3
Prerequisites: BIO_SC 2200 or BIOCHM 4270; MATH 1500 and one year Physics

BIO_SC 4310: Physics in Cell and Developmental Biology
(same as PHYSCS 4310). Discusses the role of physical mechanisms in specific cellular and developmental processes and phenomena, in particular those characterizing the embryonic stage of multicellular organisms. Each process and phenomenon is first described in biological terms and then within a physical model, with special emphasis on the interplay between the two descriptions.

Credit Hours: 3
Prerequisites: instructor's consent or PHYSCS 1220 or PHYSCS 2760 and BIO_SC 2300

BIO_SC 4320: Plant Physiology
(same as PLNT_S 4320). Modern physiology of higher plants using common cultivated plants as examples.

Credit Hours: 3
Prerequisites: BIO_SC 1200 or BIO_SC 1500 and 5 hours Chemistry

BIO_SC 4328: Introductory Radiation Biology
(same as NU_ENG 4328, RADIOL 4328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

Credit Hours: 3
Prerequisites: junior standing, Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

<td>BIO_SC 4660: Plant Population Biology</td>
<td>Covers the ecological and evolutionary processes that influence the distribution and abundance of plant species. Topics include evolution of life history schedules, gender evolution, population growth and demography, competition, herbivory, plant-pollinator interactions, clonal growth, and plant community structure. Includes lab.</td>
<td>4</td>
<td>2 courses in Biological Sciences</td>
<td></td>
</tr>
<tr>
<td>BIO_SC 4670: Avian Ecology</td>
<td>Advanced examination of ecological patterns in birds. Explores the environmental factors affecting the evolution of avian behavior, morphology, community structure and distribution.</td>
<td>3</td>
<td>BIO_SC 2060 or BIO_SC 3650; BIO_SC 2600</td>
<td></td>
</tr>
<tr>
<td>BIO_SC 4950: Undergraduate Research in Biology</td>
<td>Individually directed field or laboratory research for upperclass students under faculty supervision. Project must be arranged by student and faculty member prior to registration. May be repeated to a maximum of 6 hours.</td>
<td>1-3</td>
<td>Overall GPA 2.75; 20 hours of Biological Sciences and/or Chemistry; instructor’s consent</td>
<td></td>
</tr>
<tr>
<td>BIO_SC 4950H: Honors Research in Biology</td>
<td>Individually directed field or laboratory research for upper-level Honors students, in consultation with a faculty member. Project must be arranged by student and faculty member prior to registration. May be repeated for credit. Graded on A-F basis only.</td>
<td>1-3</td>
<td>Overall GPA 3.3; instructor’s consent; biology or microbiology major. Honors eligibility required</td>
<td></td>
</tr>
<tr>
<td>BIO_SC 4952: Undergraduate Research in Biology</td>
<td>Individually directed field or laboratory research for upperclass students under faculty supervision. Project must be arranged by student and faculty member prior to registration. May be repeated to a maximum of 6 hours.</td>
<td>1-3</td>
<td>BIO_SC 4950; overall GPA 2.75; instructor’s consent</td>
<td></td>
</tr>
<tr>
<td>BIO_SC 4952H: Honors Research in Biology</td>
<td>Continuation of research program. Successful completion requires public presentation and leads to degree with Honors in biological sciences. May be repeated for credit for maximum of 6 hours. Graded on A-F basis only.</td>
<td>1-3</td>
<td>BIO_SC 4950H; overall GPA 3.3; instructor’s consent. Honors eligibility required</td>
<td></td>
</tr>
<tr>
<td>BIO_SC 4960: Special Readings in Biological Sciences</td>
<td>Independent readings and discussions of topics in biology selected in consultation with supervising faculty member. Selected sections of this course may be graded either on A-F or S/U basis only.</td>
<td>1-3</td>
<td>BIOS_SC 4950; overall GPA 2.75; instructor’s consent</td>
<td></td>
</tr>
</tbody>
</table>
**Prerequisites:** senior standing in Biological Sciences and instructor’s consent

**BIO_SC 4970: Neurobiology Laboratory**
Laboratory experience with experimental neurobiology, with emphasis on neural networks, motor systems, and developmental neurobiology.

**Credit Hours:** 3
**Prerequisites:** BIO_SC 3700 or BIO_SC 4500 or instructor’s consent

**BIO_SC 4974: Molecular Biology Laboratory**
Emphasizes recently developed genetic and biochemical techniques; illustrates how they apply to contemporary problems in biological research.

**Credit Hours:** 3
**Prerequisites:** BIO_SC 2200, BIOCHM 4272 or concurrent registration in BIO_SC 4976

**BIO_SC 4976: Molecular Biology**
Molecular mechanisms of DNA replication, mutation, recombination and gene expression in prokaryotes, eukaryotes, and their viruses; gene fine structure; genetic engineering.

**Credit Hours:** 3
**Prerequisites:** BIO_SC 2200 and BIO_SC 2300

**BIO_SC 4978: Cancer Biology**
(same as BIOCHM 4978). The cellular and molecular basis of cancer, with emphasis on the application of genomics, proteomics, and genetic manipulations in model organisms to the study of cancer biology.

**Credit Hours:** 3
**Prerequisites:** BIO_SC 2200, BIO_SC 2300

**BIO_SC 4980: Cellular Interactions in Health and Disease**
The cell as a functional unit.

**Credit Hours:** 3
**Prerequisites:** 10 hours Biological Sciences and 5 hours Physics and 5 hours Organic Chemistry
**Recommended:** some background in Biochemistry and/or Molecular Biology

**BIO_SC 4982: Human Inherited Diseases**
Analysis of the molecular and cellular mechanisms underlying inherited diseases in humans. Topics include genetics of sex determination, metabolic disorders, cancer, blood groups, transplantation, AIDS.

**Credit Hours:** 3
**Prerequisites:** BIO_SC 2200 and BIO_SC 2300

**BIO_SC 4983: Molecular Ecology**
Application of molecular genetic techniques to topics in ecology and population biology such as sex ratios, dispersal, mating systems, biogeography and conservation genetics.

**Credit Hours:** 4
**Prerequisites:** BIO_SC 2200 or equivalent and BIO_SC 3650

**BIO_SC 4984: Mammalian Reproductive Biology**
Adult reproductive anatomy, physiology and behavior; gametogenesis and fertilization; placentation; sexual differentiation; parturition; maternal behavior and lactation; puberty; reproductive aging; reproductive ecology.

**Credit Hours:** 3
**Prerequisites:** junior standing and 15 hours of Biological Sciences

**BIO_SC 4986: Neurology of Motor Systems**
Examination of the function of neural networks at all levels, from properties of single neurons to large collections of neural elements.

**Credit Hours:** 3
**Prerequisites:** BIO_SC 3700 or instructor’s consent

**BIO_SC 4988: Nerve Cells and Behavior**
The cellular basis of behavior. Molecular and cellular properties of nerve cells, as related to behavior, will be represented and discussed.

**Credit Hours:** 3
**Prerequisites:** BIO_SC 3700 or instructor’s consent

**BIO_SC 4990: Vertebrate Histology and Microscopic Anatomy**
Microscopic anatomy of vertebrate tissues and organs. Includes lab.

**Credit Hours:** 5
**Prerequisites:** junior standing
**Recommended:** BIO_SC 2300 and BIO_SC 3700, or equivalent

**BIO_SC 4994: Senior Seminar**
Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized subdisciplinary emphasis.

**Credit Hour:** 1-3
**Prerequisites:** Biological Sciences major, senior standing

**BIO_SC 4994H: Senior Seminar - Honors**
Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized sub disciplinary emphasis.

**Credit Hour:** 1-3
**Prerequisites:** Biological Sciences major, senior standing; Honors eligibility required

**BIO_SC 7002: Topics in Biological Sciences**
Advanced topics not in regularly offered courses. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1-99
**Prerequisites:** instructor’s consent

**BIO_SC 7100: Limnology**
(same as F_W 7100). (lecture/lab: 4 hrs.; lecture only: 3 hrs.) Ecology of inland waters with emphasis on productivity.

**Credit Hour:** 3-4
**Prerequisites:** graduate standing or BIO_SC 3650
**BIO_SC 7300: Analysis of Biological Macromolecules**
Theory/application of techniques used for characterization of proteins and nucleic acids. Topics include sedimentation velocity; equilibrium; sucrose density gradients; electrophoresis; spectrophotometry. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BIO_SC 2300; BIOCHM 4270; MATH 1500; 1 year of physics

**BIO_SC 7310: Physics in Cell and Developmental Biology**
(same as PHYSCS 7310 and MPP 7300). Discusses the role of physical mechanisms in specific cellular and developmental processes and phenomena, in particular those characterizing the embryonic stage of multicellular organisms. Each process and phenomenon is first described in biological terms and then within a physical model, with special emphasis on the interplay between the two descriptions.

Credit Hours: 3
Prerequisites: instructor’s consent or PHYSCS 1220 or PHYSCS 2760 and BIO_SC 2300

**BIO_SC 7320: Plant Physiology**
(same as PLNT_S 7320 and MPP 7300). Modern physiology of higher plants using common cultivated plants as examples. May be taken with or without laboratory.

Credit Hours: 3
Prerequisites: BIO_SC 1200 or BIO_SC 1500 and 5 hours Chemistry

**BIO_SC 7328: Introductory Radiation Biology**
(same as NU_ENG 7328, RADIOD 7328 and V_FM_S 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

Credit Hours: 3
Prerequisites: Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor’s consent

**BIO_SC 7350: Summer Institute in Biotechnology**
Development of experiments in molecular genetics for use in high school biology laboratories. May be repeated for credit.

Credit Hours: 3
Prerequisites: instructor’s consent

**BIO_SC 7360: Molecular Biology Laboratory**
Emphasizes recently developed genetic and biochemical techniques; illustrates how they apply to contemporary problems in biological research.

Credit Hours: 3
Prerequisites: BIO_SC 2200, BIOCHM 4272 or concurrent registration in BIO_SC 4976

**BIO_SC 7400: Plant Anatomy**
(same as PLNT_S 7400). Comparative structure, growth of meristems; development, structure of important cell types, tissues systems; comparative anatomy of stem root, leaf. Emphasizes anatomy of gymnosperms, angiosperms. Includes lab. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: BIO_SC 2200 or equivalent

**BIO_SC 7490: Vertebrate Histology and Microscopic Anatomy**
(same as PHYSCS 7490 and MPP 7490). Microscopic anatomy of vertebrate tissues and organs. Graded on A-F basis only.

Credit Hours: 5
Prerequisites: BIO_SC 2300 and BIO_SC 3700, or equivalent

**BIO_SC 7500: Neurobiology**
Vertebrate and invertebrate neurobiology, including cell and molecular biology of the neuron, neurophysiology, neuranatomy, neurothology and developmental biology. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BIO_SC 2300 or BIO_SC 3700

**BIO_SC 7560: Sensory Physiology and Behavior**
Basic principles of coding and integration of sensory stimuli; neural correlates of animal behavior; environmental influences on postnatal sensory development.

Credit Hours: 3
Prerequisites: BIO_SC 4500 or equivalent

**BIO_SC 7575: Computational Neuroscience**
(same as BIOL_EN 7575 and ECE 7580). An interdisciplinary course with a strong foundation in quantitative sciences for students in biological and behavioral sciences and an introduction to experimental methods for students from quantitative sciences.

Credit Hours: 4
Prerequisites: BIO_SC 1010 or BIO_SC 1500, MATH 1500

**BIO_SC 7640: Behavioral Biology**
Comparative study of animal ethology. Principles of animal ethology illustrated in different animal phyla.

Credit Hours: 3
Prerequisites: BIO_SC 1500 and one additional upper-level course in Biological Sciences or Psychology

**BIO_SC 7650: Plant Population Biology**
Covers the ecological and evolutionary processes that influence the distribution and abundance of plant species. Topics include evolution of life history schedules, gender evolution, population growth and demography, competition, herbivory, plant-pollinator interactions, clonal growth, and plant community structure.

Credit Hours: 4
Prerequisites: 2 courses in Biological Sciences

**BIO_SC 7670: Avian Ecology**
Advanced examination of ecological patterns in birds. Explores the environmental factors affecting the evolution of avian behavior, morphology, community structure and distribution.

Credit Hours: 3
Prerequisites: BIO_SC 2060 or BIO_SC 3650; BIO_SC 2600
**BIO_SC 7976: Molecular Biology**  
Molecular mechanisms of DNA replication, mutation, recombination and gene expression in prokaryotes, eukaryotes, and their viruses; gene fine structure; genetic engineering.  
**Credit Hours:** 3  
**Prerequisites:** BIO_SC 2200 and BIO_SC 2300

**BIO_SC 7978: Cancer Biology**  
(same as BIOCHM 7978). The course will cover major molecular and cellular aspects of cancer. Students will read original research articles, present overviews and lead class discussions.  
**Credit Hours:** 3  
**Prerequisites:** BIOCHM 4270, BIO_SC 2300 and BIO_SC 4976 or equivalent

**BIO_SC 7980: Cellular Interactions in Health and Disease**  
Advanced discussion of topics in cell biology and genetics as they relate to health and disease. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** instructor’s consent

**BIO_SC 7982: Human Inherited Diseases**  
Advanced analysis of the molecular basis for genetic disorders in humans. Topics will include both Mendelian and complex traits with readings from the primary literature. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** BIO_SC 2200 and instructor’s consent

**BIO_SC 7986: Neurology of Motor Systems**  
Examination of the function of neural networks at all levels, from properties of single neurons to large collections of neural elements. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** BIO_SC 3700

**BIO_SC 7990: Non-thesis Research**  
Independent research not leading to a thesis.  
**Credit Hours:** 1-99  
**Prerequisites:** instructor’s consent

**BIO_SC 8002: Topics in Biological Sciences - Biological/Physical/Mathematics**  
Advanced topics not in regularly offered courses.  
**Credit Hours:** 1-99  
**Prerequisites:** instructor’s consent

**BIO_SC 8050: Professional Survival Skills**  
Introduction to resources, facilities, and communication skills for professional careers in biological sciences. Topics include computer resources, accessing scientific literature, making slides and figures, grantsmanship, resume preparation, manuscript review, and research presentation.  
**Credit Hours:** 2

**BIO_SC 8060: Ethical Conduct of Research**  
(same as BIOCHM 8060). Discussion of ethical issues in biological research, including the rules and conventions for appropriate research conduct. Graded on S/U basis only.  
**Credit Hours:** 1

**BIO_SC 8080: Workshop in Area of Specialization**  
Intensive course in the theory and methodology of biological investigation. Conducted by visiting scientists. Offered in one or more specialized sections. May be repeated for credit.  
**Credit Hours:** 1  
**Prerequisites:** graduate standing or instructor’s consent

**BIO_SC 8085: Problems in Biological Sciences**  
Research not expected to terminate in thesis, or individual advanced study in special subjects.  
**Credit Hours:** 1-99  
**Prerequisites:** instructor’s consent

**BIO_SC 8087: Seminar**  
Current topics in the biological sciences. Open to all graduate students. Graded S/U basis only.  
**Credit Hours:** 1

**BIO_SC 8090: Research in Biological Sciences**  
Research leading to thesis. Graded on S/U basis only.  
**Credit Hours:** 1-99  
**Prerequisites:** instructor’s consent

**BIO_SC 8187: Seminar in Areas of Specialization**  
Offered each semester in one or more specialized sections followed by the topic title of the seminar. Graded on S/U basis only.  
**Credit Hours:** 1

**BIO_SC 8300: Advanced Plant Genetics**  
Genetic approaches to molecular and biochemical studies in maize, wheat, and Arabidopsis.  
**Credit Hours:** 3  
**Prerequisites:** General Genetics and course in Cell Biology or Plant Physiology

**BIO_SC 8310: Fungal Genetics and Biology**  
Introduction to fungal research, with an emphasis on genetics, biochemistry, cell and molecular biology, and pathogenicity of fungi. Graded A-F only.  
**Credit Hours:** 3

**BIO_SC 8320: Developmental Genetics**  
An overview of various developing systems amenable to classical and molecular genetic analysis. Specific developmental phenomena will be introduced in particular model systems, with an emphasis on experimental approaches used to address the underlying mechanisms.  
**Credit Hours:** 3
Prerequisites: BIO_SC 2200 and BIOCHM 7270, BIOCHM 7272, or equivalent

BIO_SC 8330: Stem Cell Biology
A comparative approach to stem cell biology, with emphasis on embryonic, neural and bone marrow-derived stem cells in rodents and humans. Ethical considerations associated with the use of stem cells to study development and repair mechanisms will also be addressed. Graded on A-F basis only.
Credit Hours: 3

BIO_SC 8350: Advanced Cell Biology
Structure and function of membranes; cell ultrastructure; organellar function; cellular movement; microtubules; microfilaments; mitosis and meiosis.
Credit Hours: 3

Prerequisites: BIO_SC 2300; instructor’s consent

BIO_SC 8370: Plant Developmental Biology
Critical discussions of recent publications in plant development, with particular focus on developmental genetics.
Credit Hours: 3

BIO_SC 8440: Integrative Neuroscience I
(same as NEUROSCI 8440). Organization, development and function of the nervous system focusing on cellular and molecular processes. Graded on A-F basis only.
Credit Hours: 3

BIO_SC 8442: Integrative Neuroscience II
(same as NEUROSCI 8442). Organization and function of the nervous system at the systems level to examine processes of behavior and cognition. Graded on A-F basis only.
Credit Hours: 3

BIO_SC 8450: Developmental Neurobiology
Credit Hours: 3

BIO_SC 8460: Advanced Cancer Biology
A study of the molecular basis of cancer, including topics in tumor cell biology, interactions between cancer cells and normal cells, mechanisms of metastasis, and novel approaches to development of new chemotherapies.
Credit Hours: 3

Prerequisites: BIO_SC 4500 or equivalent

BIO_SC 8505: Introduction to Plant Stress Biology
(same as PLNT_S 8505). This course is part of a series that aims to provide a solid conceptual foundation to interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant stress biology. Graded on A-F basis only.
Credit Hours: 2

BIO_SC 8520: Sensory Ecology
A study of information exchange and acquisition in organisms, with an emphasis on communication, orientation, and predator detection. The course will also examine the effects of biotic and abiotic factors on sensory systems.
Credit Hours: 3

BIO_SC 8600: Design of Ecological Experiments
Principles of experimental design in the context of ecological, behavioral, and evolutionary research.
Credit Hours: 2

Prerequisites: STAT 1400

BIO_SC 8610: Current Concepts in Conservation Biology
Survey of current concepts in conservation biology literature. Discussions will provide students with an appreciation of the historical development of concepts, the interdisciplinary nature of conservation problems, and the research required for effective solutions.
Credit Hours: 2

BIO_SC 8620: Phylogenetic Methods and Applications
A review of principles for constructing and testing phylogenies followed by a survey of methods for inferring ancestral characteristics and adaptive features in living species.
Credit Hours: 4
**BIO_SC 8633: Molecular and Network Evolution**  
(same as AN_SC 8633). Evolution of biological macromolecules and networks, including sequence analysis algorithms and theory, phylogenetics, gene duplication, genome evolution, principles of biological networks. Development of computational skills emphasized.  
**Credit Hours:** 3  
**Prerequisites:** Instructor’s consent required

**BIO_SC 8650: Ecological and Evolutionary Genomics**  
(same as PLNT_S 8650). This course is designed to give a background in evolution and then explore an exciting new field: Ecological and evolutionary genomics. We will study genes that affect fitness and how whole genomes evolve. Graded on A-F basis only.  
**Credit Hours:** 2

**BIO_SC 8700: Ecological Genetics**  
Population genetics and evolutionary theory, with emphasis on studies of natural populations.  
**Credit Hours:** 3  
**Prerequisites:** BIO_SC 2200, BIO_SC 3100 or BIO_SC 3650, and STAT 1400 or equivalent

**BIO_SC 8720: Speciation**  
Advanced discussion of species concepts and the processes of formation of species.  
**Credit Hours:** 3  
**Prerequisites:** BIO_SC 2200 and BIO_SC 4600

**BIO_SC 8724: College Science Teaching**  
(same as LTC 8724 and PHYSCS 8310 and ASTRON 8310). Study of learner characteristics, teaching strategies, and research findings related to teaching science at the post-secondary level.  
**Credit Hours:** 3

**BIO_SC 8725: Science Outreach: Public Understanding of Science**  
(same as AN_SC 8725, PHYSCS 8350 and LTC 8725). Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.  
**Credit Hour:** 1-2

**BIO_SC 8726: Integrating Science with Outreach**  
(same as LTC 8726). This course provides an opportunity for students to earn credit for outreach activities in the community. Students will capitalize on their area of study and scientific expertise in developing, implementing, and evaluating related outreach activities. May be repeated for credit.  
**Credit Hour:** 1-6

**BIO_SC 8730: Advanced Community Ecology**  
Detailed examination of new happenings in population and community ecology. Topics vary but will include species interactions, community structure, reproductive strategies.  
**Credit Hours:** 3

**BIO_SC 8740: Plant/Animal Interactions**  
Discussion and lectures on herbivory, pollination biology, and dynamics of fruit and seed dispersal from ecological and evolutionary perspectives.  
**Credit Hours:** 3  
**Prerequisites:** BIO_SC 3650 or BIO_SC 4660 or equivalent

**BIO_SC 8982: Advances in Human Genetic Disorders**  
Critical review of recent publications describing the molecular and cellular processes underlying genetic disorders in humans. Graded on A-F basis only.  
**Credit Hour:** 1  
**Prerequisites:** BIO_SC 4982 or concurrent enrollment in BIO_SC 7982

**BIO_SC 9090: Research in Biological Sciences**  
Research leading to dissertation. Graded on S/U basis only.  
**Credit Hour:** 1-99  
**Prerequisites:** Instructor’s consent

**BIO_SC 9432: Molecular Biology II**  
(same as MICROB 9432 and BIOCHM 9432). Detailed experimental analysis of eukaryotic cellular and molecular biology relevant to cellular and viral gene expression, post-transcriptional and post-translational modifications and genome replication. Models for developmental genetic analysis and genetic determinants controlling processes utilizing the current literature will be examined.  
**Credit Hours:** 4  
**Prerequisites:** MICROB 9430

**BIO_SC 9468: Molecular Biology of Plant Growth and Development**  
(same as BIOCHM 9468). Molecular biology of plant hormones, signal transduction, environmental signals.  
**Credit Hours:** 3  
**Prerequisites:** BIO_SC 4976

**Biomedical Sciences (BIOMED)**

**BIOMED 1010: Biomedical Career Explorations**  
An introduction to the variety of career possibilities within the growing field of biomedical sciences. Graded on S/U basis only.  
**Credit Hour:** 1

**BIOMED 2001: Topics in Veterinary Biomedical Science**  
May be repeated 2 times for credit. Graded on A-F basis only.  
**Prerequisites:** instructor’s consent  
**Credit Hour:** 1-99

**BIOMED 2085: Problems in Biomedical Research**  
Assignment of special Topics for Research training in biomedical research.  
**Credit Hour:** 1-99  
**Prerequisites:** instructor’s consent
BIOMED 2110: Biomedical Terminology
Life science etymology (Greek for “true meaning”, means the study of word derivation) taught by classroom presentation and discussion. The course organization is based primarily on common themes of Greek and Latin terms along with historical reasons for current usage. The application of these terms is for all biomedical sciences and life sciences. Graded on A-F basis only.

Credit Hours: 3

BIOMED 2111: Veterinary Medical Terminology
Veterinary Medical Terminology is an extension of Biomedical Sciences 2110, Biomedical Terminology. The course organization is lecture, based primarily on domestic species and common themes of Greek and Latin terms. In addition, major veterinary medical eponyms, acronyms, and medical and surgical instruments are included. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: BIOMED 2110 or instructor’s consent

BIOMED 2120: Animal Handling and Physical Restraint
Fundamentals of handling and physical restraint of domestic large and small animals, laboratory animals, and common non-domestic pets. Graded on A-F basis only.

Credit Hours: 2

BIOMED 2140: Companion Animals
(same as AN_SCI 2140). Focus on companion dog, cat, horse owners concerns re: health, zoonoses, legal responsibilities, inbreeding, choice of breeds, behavioral problems and loss of companion animals.

Credit Hours: 3

BIOMED 2210: Microbiology for the Health Sciences
Introductory course for students in the applied health curricula. Presents biomolecules of life, enzyme interaction, physiology and structure of representative organisms. Emphasizes bacteria, viruses, fungi and protozoa of health significance. Graded on A-F basis only.

Credit Hours: 5
Prerequisites: CHEM 1100 or equivalent and instructor’s consent

BIOMED 2230: Animal Sanitation and Disease Prevention
Preventative measures for diseases and parasites of farm animals.

Credit Hours: 3

BIOMED 2235: Domestic Animal Behavior
An examination of the effects of domestication on the behavior of companion and food animal species. Comparisons to similar animals in feral or wild conditions will be made. The causes, development and potential treatments of abnormal behavior will also be examined. Graded on A-F basis only.

Credit Hours: 3

BIOMED 2420: Biology of Healthy Living
(same as PH_THR 2420 and NUTR_S 2420). Biology of inactivity as a casual factor in chronic disease.

Credit Hours: 2

BIOMED 2940: Internship in Biomedical Sciences
Supervised work experience to develop technical skills and enhance student knowledge in an area of biomedical science. Not intended for more than 50% independent research. Graded on S/U basis only.

Credit Hour: 1-6
Prerequisites: sophomore standing and instructor’s consent

BIOMED 3000: Specialty Careers for Veterinary Technicians
Specialty careers for veterinary technicians are jobs which required knowledge and skills beyond those needed in primary care clinical veterinary practice. This course will explore veterinary technician specialties, the education required, and the advantages of advanced academic training. Course graded on A-F basis only.

Credit Hour: 1
Prerequisites: AAS degree in veterinary technology or instructor’s consent required

BIOMED 3001: Topics in Biomedical Sciences
Topics in Biomedical Sciences.

Credit Hour: 1-99

BIOMED 3085: Problems in Biomedical Science
Assignment of special topics for research training in biomedical research.

Credit Hour: 1-99
Prerequisites: DVM degree and instructor’s consent

BIOMED 3100: Biomedical Pathophysiology
Pathophysiology is the study of changes in the body resulting from disease. This course requires knowledge of normal anatomy and physiology. A comparative approach is used involving both domestic animal and human examples. Course graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 3254 or BIO_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructor’s consent

BIOMED 3200: Comparative Hematology
Hematology is the study of blood cells in health and disease. Emphasis in this course is placed on the changes associated with disease. Transfusion medicine and coagulation disorders will also be included. Course graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 3254 or BIO_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructor’s consent

BIOMED 3219: Elements of Comparative Anatomy
This course is designed to give students an introduction to and appreciation for comparative anatomy of various species encountered in animal science, veterinary technology and veterinary medicine. Detailed and labeled photos of dissected specimens are used to aid instruction. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: five hours of biological science or zoology or equivalent or instructor’s consent or an AAS degree in veterinary technology

BIOMED 3250: Parasitology
(same as BIO_SC 3250) Parasitism is considered as a fundamental type of interspecies interaction. Identifying characteristics, life cycle, and resulting disease caused by the common parasites of domestic animals, common laboratory animals, selected wildlife, and humans are described. Special emphasis is given to parasites that can be transmitted from animals to man.

Credit Hours: 3
Prerequisites: 8 hours of biology or instructor’s consent

BIOMED 3300: Animal Welfare and Ethics
An introductory examination of contemporary ethical issues related to biomedical science including animal welfare, agriculture, and cloning. Topics related to animal law issues will also be discussed.

Credit Hours: 3
Prerequisites: junior standing

BIOMED 3310: Equine Health Topics
An in-depth examination of equine disease and health topics that are pertinent to today’s horse owner and veterinarian. The course will integrate horse management practices with disease recognition, control and prevention. Students will learn how to recognize problems and when to call a veterinarian. Emerging disease problems such as West Nile Virus will be examined as well as topics of continuing concern. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 4977 or equivalent or instructor’s consent

BIOMED 3320: Comparative Microscopic Anatomy
The course will provide students with a background in the structure of body organs at the microscopic level. The material will emphasize structure-function relationship of cells and organs using material from diverse animal species, including human, that exemplify unique adaptations to environmental or physiological requirements.

Credit Hours: 3
Prerequisites: BIO_SC 1500 or equivalent

BIOMED 3326: Comparative Pharmacology
An introduction to terminology used in pharmacology. Mechanisms of drug administration, absorption, distribution, metabolism, and excretion are described. Treatment modalities in animals and humans are compared. Basics of drug actions and the medicolegal aspects of pharmacology are discussed.

Credit Hours: 3
Prerequisites: an AAS degree in veterinary technology or AN_SCI 3254 or BIO_SC 3700, or equivalent, or instructor’s consent

BIOMED 4001: Topics in Biomedical Sciences
Topics in Biomedical Sciences.

Credit Hour: 1-99

BIOMED 4010: Life Sciences Research: Models and Methods
A review of basic laboratory animal and non-animal research models and procedures commonly used in the life sciences area in academia and drug/chemical industry. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Biology or Cell Biology; junior standing required

BIOMED 4100: Veterinary Clinical Chemistry
(cross-leveled with V_PBIO 7100). This course is designed to hone the skills of the practicing veterinary technician, veterinary student, or veterinarian and assumes some basic knowledge of normal serum chemistry and urinalysis results. The review of normal will be minimal and emphasis will be placed on clinical serum chemistry and urinalysis findings associated with diseases. The graduate level course will include discussion of ancillary tests and more extensive case interpretations.

Credit Hours: 3
Prerequisites: An AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association accredited programs; Undergraduate physiology on mammals (AN_SCI 3254, BIO_SC 3700, or equivalent

Recommended: BIOMED 2110 and BIOMED 3200 or instructor’s consent

BIOMED 4110: Veterinary Cytology
(cross-leveled with V_PBIO 7110). This course of Veterinary Cytology is designed to hone the skills of the practicing Veterinary Technician, Veterinary Student, or Veterinarian and assumes some basic knowledge of microscope usage and normal hematology. The review of normal cells will be minimal and emphasis will be placed on findings associated with inflammatory and neoplastic diseases. The graduate level course will include discussion of ancillary tests, special stains and treatment alternatives. The focus will be on canine and feline diseases but some common equine and bovine disease. Prerequisites: An AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association-accredited program, or instructor’s consent

Credit Hours: 2
Recommended: BIOMED 3200 and BIOMED 2110

BIOMED 4120: Principles of Toxicology
(cross-leveled with V_PBIO 7120). This course will provide an introduction to the general principles of toxicology, including the history and scope of the field; risk assessment and management; mechanisms of toxicity; the disposition of toxicants; non-target organ-directed toxicity; toxic responses of specific target organs; and various toxicological application, such as environmental toxicology.

Credit Hours: 3
Prerequisites: one year of college chemistry and biology, each or instructor’s consent

BIOMED 4200: Veterinary Public Health and Community Practice
Veterinary Public Health is the field of veterinary medicine that deals with food production and safety, zoonosis (animal to human) disease control, prevent and control of environmental contamination, and the role of animals in society. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCi 3254 or BIO_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructors consent

BIOMED 4210: Animal Issues in Disasters
(cross-leveled with V_PBIO 7210). This course describes the various aspects of responding to disasters that involve animals. Government involvement, legal requirements, effects on the human-animal bond, preparation for disasters of different kinds, and impacts on animal-related businesses will be discussed.
Credit Hours: 1
Prerequisites: an AAS in veterinary technology from an American Veterinary Medical Association accredited program, or equivalent training, or instructor's consent

BIOMED 4300: Clinical Veterinary Neurology
Clinical veterinary neurology will review the neurologic examination, common neurologic diseases and techniques to properly care for the neurologic patient. The course organization is based primarily on neuroanatomic localization of disease. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: AAS in Veterinary Technology or BIOMED 3219 and 3100 or instructor's consent; junior or senior standing

BIOMED 4320: Fundamentals of Small Animal Emergency and Critical Care
(cross-leveled with V_BSCI 7320). This course will provide students with the knowledge and skills to assist in small animal medical emergency and critical care facilities.
Credit Hours: 3
Prerequisites: An AAS in veterinary technology from an American Veterinary Medical Association accredited program, or equivalent training, or instructor's consent

BIOMED 4333: Veterinary Cell Biology
(same as V_BSCI 5506). Course material stresses cell biology as related to animal health and medical issues. A comprehensive course overviewing molecular and biochemical issues of cell function especially as related to medicine and the underlying molecular causes of disease.
Credit Hours: 4
Prerequisites: BIO_SC 1500, or equivalent, 1 course in biochemistry or 4 credit hours in chemistry; or instructor's consent

BIOMED 4400: Veterinary Surgical Nursing
Veterinary Surgical Nursing will enable the student to properly identify, care for, and maintain surgical equipment. The course will also prepare the student to learn surgical anatomy as well as the potential complications of common clinical setting surgeries. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BIOMED 2111, BIOMED 3219, and BIOMED 3100, or instructor's consent

BIOMED 4500: Equine Critical Care and Nursing
This course provides advanced information for veterinary technicians, veterinary assistants, and pre-veterinary students wishing to enhance and focus their understanding of equine critical care and nursing concepts. Course graded on A-F basis only.
Credit Hours: 3
Prerequisites: AN_SCi 2095 and AN_SCi 3254 or BIO_SC 3700 or equivalents, AAS or equivalent degree from AVMA-accredited program or instructor's consent

BIOMED 4510: Equine Clinical Anatomy: Forelimbs
(cross-leveled with V_BSCI 7510). Basic foundation in selected aspects of equine clinical anatomy from veterinary technicians, pre-veterinary students, and other students wishing to enhance their understanding of anatomical structures of the horse's forelimbs.
Credit Hours: 1
Prerequisites: five hours of biologic science or zoology, or equivalent, or instructor's consent, or an AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association accredited program

BIOMED 4520: Equine Clinical Practice
This course is an introduction to a common medical conditions of the horse. Emphasis will be placed on the presenting complaint and the veterinarians approach to diagnosis, treatment, and prognosis.
Credit Hours: 1
Prerequisites: BIOMED 2110, BIOMED 2111 and AN_SCi 4977 or their equivalents, or an associate's degree in veterinary technology, or instructor's consent

BIOMED 4593: Internship in Veterinary Medical Technical Specialties
Supervised work experience in the MU Veterinary Medical Teaching Hospital of affiliated veterinary medical specialty practices or in MU laboratory animal facilities to develop technical skills and knowledge relevant to becoming a specialist in veterinary medical technology. A written report and oral presentation are required. Graded on S/U basis only.
Credit Hours: 1-6
Prerequisites: junior standing, an AAS degree from an AVMA accredited veterinary technical program or its equivalent, and instructor's consent

BIOMED 7010: Life Sciences Research: Models and Methods
(same as V_BSCI 7010). A review of basic laboratory animal and non-animal research models and procedures commonly used in the life sciences area in academia and drug/chemical industry. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Biology or Cell Biology

BIOMED 9090: Research - Biomedical Sciences
Research hours for BMS doctoral students continuous enrollment. Graded on S/U basis only.
Credit Hours: 1-99
Prerequisites: instructor's consent

BIOMED 9434: Gonadal Function
(same as AN_SCi 9434). Survey of current and in-depth mechanisms involved in ovarian, testicular, and epididymal function. Emphasis will be
given to comparative differences in gonadal functions among domestic animals.

Credit Hours: 3  
Prerequisites: AN_SCI 4314 or equivalent, a course in endocrinology, and biochemistry or cell biology

### Black Studies (BL_STU)

#### BL_STU 1100: Introduction to Swahili and African Culture
Introduction to Swahili and African Culture is a three credit hour course, which serves as a survey of an indigenous African language and the culture of East Africa. There are no prior requirements.

Credit Hours: 3

#### BL_STU 1250: World Theatre Workshop  
(same as THEATR 1250). Provides a diverse ensemble of student performers, writers, and technicians with an intensive immersion in the process of theatrical production through the public presentation of dramatic literature that focuses on global issues of ethnicity and culture.

Credit Hours: 2

#### BL_STU 1410: African American History  
(same as HIST 1410). Survey of social, political and economic development to the African American people in American life from 1619 to the present.

Credit Hours: 3

#### BL_STU 1500: The Black Woman in America  
(same as WGST 1500). Review and critiques of a variety of materials about Black women from slavery to present. The course allows students to generate their own view about psychological, social and philosophical impact of the Black women’s struggle on all women.

Credit Hours: 3  
Prerequisites: sophomore standing

#### BL_STU 1705: Introduction to Black Studies in Culture  
Introduction to the concepts, terms, themes, and practices in the study of the African diaspora cultures, through readings in literature, music, and the arts that demonstrate concepts, terms, themes, and practices. Recommended for prospective Black Studies Majors. Program consent for repetition.

Credit Hours: 3

#### BL_STU 1720: African-American Theatre History  
(same as THEATR 1720). A historical and critical analysis of the evolution of African American cultural performance in the American theatre and entertainment industry.

Credit Hours: 3

#### BL_STU 1790: History of Early Africa  
(same as HIST 1790). This course introduces students to the early history of Africa. It focuses on political, social, economic and cultural developments based on primary and secondary sources available in print and online.

Credit Hours: 3

#### BL_STU 1800: History of Modern Africa  
(same as HIST 1800). This course introduces students to the recent history of Africa. It provides them with an opportunity to understand the main challenges Africans faced since colonial times based on primary and secondary sources.

Credit Hours: 3  
Prerequisites: sophomore standing or instructor’s consent

#### BL_STU 1810: History of South Africa  
(same as HIST 1810). South African Society from the 16th century to the present with an emphasis on the last two centuries and the consolidation of the apartheid state.

Credit Hours: 3  
Prerequisites: sophomore standing or instructor’s consent

#### BL_STU 2000: Black Studies
An interdisciplinary introduction to the basic concepts and literature in the disciplines covered by African-American studies. The role of historical, political, social, and economic forces in shaping cultural expression will be stressed.

Credit Hours: 3

#### BL_STU 2001: Undergraduate Topics in Black Studies-General  
Organized study of selected topics. Subjects and credits may vary from semester to semester. Program consent for repetition.

Credit Hour: 1-3

#### BL_STU 2003: Undergraduate Topics in Black Studies-Behavioral Science  
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hours: 3

#### BL_STU 2005: Topics in Black Studies - Humanities  
Organized study of selected topics focusing on Black history and culture. Specific content may vary from semester to semester and will be announced in advance.

Credit Hours: 3

#### BL_STU 2150: African-American Cinema  
(same as THEATR 2150). Study of the impact of cinema and the entertainment industry on the social perceptions of African-Americans and on African-American culture.

Credit Hours: 3

#### BL_STU 2200: Social Inequalities  
(Same as SOCIOL 2200.) Survey of inequalities based upon criteria such as race, ethnicity, sex, age, religion and social class in contemporary societies. Focus on dynamics by which privilege and inequality are structured.
BL_STU 2210: The Black Americans
(same as SOCIOL 2210.) Analysis of history of blacks in the United States. Assessment of contemporary black community in terms of its institutions, style of life, patterns of work and intergroup relations.
Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent

BL_STU 2301: Literature of the African Diaspora
(Same as RM_LAN 2310) A postcolonial analysis of selected literary texts interpreting the African diaspora in the Americas.
Credit Hours: 3
Prerequisites: SOCIOL 1000 or equivalent or instructor’s consent

BL_STU 2400: Introduction to African Diaspora Literature
(same as ENGLSH 2400). Introduces students to African Diaspora literature with an emphasis on literature written originally in English. No more than six hours may be taken in the Introduction to African Diaspora Literature series.
Credit Hours: 3
Prerequisites: ENGLSH 1000

BL_STU 2407: Introduction to African Diaspora Literature, 1603-17
(same as ENGLSH 2407). See BL_STU 2400 for course description.
Credit Hours: 3

BL_STU 2408: Introduction to African Diaspora Literature, 1789-1890
(same as ENGLSH 2408). See BL_STU 2400 for course description.
Credit Hours: 3

BL_STU 2409: Introduction to African Diaspora Literature, 1890-Present
(same as ENGLSH 2409). See BL_STU 2400 for course description.
Credit Hours: 3

BL_STU 2410: African American Women in History
(same as HIST 2410 and WGST 2410). African American Women in history is a topics course covering major issues affecting black women since their introduction into English-speaking North America to the present.
Credit Hours: 3

BL_STU 2450: Themes in the Geography of Africa South of the Sahara
(same as GEOG 2450). Major concepts of African geography in current and historical perspective. Case studies of major African countries.
Credit Hours: 3
Prerequisites: sophomore standing or one introductory Geography course

BL_STU 2500: Special Problems in Black Studies
Research apprenticeship with faculty member, assisting a faculty member in the development and execution of a research project. May be repeated for a maximum of six hours.
Credit Hour: 1-99
Prerequisites: sophomore standing, instructor’s consent

BL_STU 2501: Undergraduate Topics in Black Studies
Organized study of selected topics. Subjects and credit may vary from semester to semester. Program consent for repetition.
Credit Hour: 1-3
Prerequisites: sophomore standing

BL_STU 2570: Black Religion
A history of religion approach to the study of black religion which takes into consideration the unique past experiences of the African American community as it underwent the terror of forced migration, slavery, segregation, and discrimination.
Credit Hours: 3
Prerequisites: sophomore standing

BL_STU 2601: Languages of Africa
(same as ENGLSH 2601 and LINGST 2601). Introduction to the diversity of the 2000+ African languages, including first-hand experience exploring a few in detail with native speakers. Features of African languages are compared with others of the world. Political and social aspects of language in Africa are discussed.
Credit Hours: 3

BL_STU 2610: Islam and Black America
A historical survey of the origins, development and impact of the Black Islamic tradition.
Credit Hours: 3

BL_STU 2715: Studies in Black Culture
This course will survey selected forms of black cultural expression, from a range of U.S., Africa, and the African Diaspora cultures in various media including literature, music, and film studies, as will as other related disciplines. Program consent for repetition.
Credit Hours: 3

BL_STU 2720: African-American Visual Culture
(Same as AR_H_A 2720) This course introduces students to African-American art history, visual culture, and material culture in their cultural, political, and historical contexts. Specific focuses may include the Harlem Renaissance, the Black Arts Movement, and other topics.
Credit Hours: 3

BL_STU 2904: Black Studies in Slavery and Freedom
This course provides study of historical background, economic, political, and social implications of slavery and freedom in the African Diaspora (Americas, Africa, Europe, Asia) as well as the legal and extralegal struggles for and meaning of (global, local, and national) freedom.
Credit Hours: 3
BL_STU 2975: Theoretical Traditions in Blacks Studies - Culture
This course provides a broad understanding of the diverse theoretical traditions within the field of Black Studies, through a comparative examination of concepts, developments, and debates in humanities, including literature, languages, and music. Course graded on A-F basis only.
Credit Hours: 3

BL_STU 3001: Undergraduate Topics in Black Studies - General
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.
Credit Hours: 3
Prerequisites: Junior standing and/or BL_STU 2000

BL_STU 3003: Undergraduate Topics in Black Studies - Behavioral Sciences
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.
Credit Hours: 1-3
Prerequisites: Junior standing and/or BL_STU 2000

BL_STU 3004: Undergraduate Topics in Black Studies - Social Science
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.
Credit Hours: 1-3
Prerequisites: Junior standing and/or BL_STU 2000

BL_STU 3005: Undergraduate Topics in Black Studies - Humanities
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to six credit hours with program consent.
Credit Hours: 3
Prerequisites: Junior Standing and/or BL_STU 2000

BL_STU 3005H: Undergraduate Topics in Black Studies - Humanities - Honors
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to six credit hours with program consent.
Credit Hours: 3
Prerequisites: Junior Standing and/or BL_STU 2000. Honors eligibility required

BL_STU 3100: African American Psychology
(same as ESC_PS 3100 and PSYCH 3880). The research, theories, and paradigms developed to understand the attitudes, behaviors, and psychosocial realities of African-Americans are discussed.
Credit Hours: 3
Prerequisites: PSYCH 1000

(same as HIST 3200). Examines the dismantling of American apartheid and its transformation into a new racial control system. It also explores how and why the Civil Rights Movement was converted into a struggle for Black Power.
Credit Hours: 3

BL_STU 3230: Studies in Black Sexual Politics
Course explores Black transnational politics of sex/sexuality and examines the theoretical, historical, and socio-cultural context that race, gender, and sexuality are used as analytical concepts. Students learn a transdisciplinary approach and apply this newly acquired information to analyze shifts in the field of Black sexuality studies. May be repeated for credit.
Credit Hours: 3
Prerequisites: sophomore standing required

BL_STU 3400: Survey of African American Literature, Beginnings to 1900
(same as ENGLISH 3400). A survey of major authors and movements in African American literature from its beginnings to 1900.
Credit Hours: 3
Prerequisites: ENGLISH 1000

BL_STU 3410: Survey of African American Literature, 1900-Present
(same as ENGLISH 3410). A survey of major authors and movements in African American literature from 1900 to the present.
Credit Hours: 3
Prerequisites: ENGLISH 1000

BL_STU 3420: Periods and Genres in African Diaspora Literature
(same as ENGLISH 3420). Topic (e.g. Harlem Renaissance, African Diaspora Poetry) Announced at time of registration. No more than 6 hours may be taken in the Periods and Genres in African Diaspora Literature series.
Credit Hours: 3
Prerequisites: ENGLISH 1000

BL_STU 3427: Periods and Genres in African Diaspora Literature, 1603-1789
(same as ENGLISH 3427). See BL_STU 3420 for course description.
Credit Hours: 3

BL_STU 3428: Periods and Genres in African Diaspora Literature, 1789-1890
(same as ENGLISH 3428). See BL_STU 3420 for course description.
Credit Hours: 3
BL_STU 3429: Periods and Genres in African Diaspora Literature, 1890-Present (same as ENGLSH 3429). See BL_STU 3420 for course description.
Credit Hours: 3

BL_STU 3590: Religious Biography: Black Religion (same as HIST 3400). Studies black American religion through the biographies of representative and influential figures of the nineteenth and twentieth centuries, including Nat Turner, W.E.B Dubois, Marcus Garvey, M.L. King, and Malcolm X.
Credit Hours: 3

BL_STU 3624: Comparative Approaches to Black Studies in History (same as HIST 3624). Comparative approach to the study of Black Diaspora history that focuses on the theory, method, structure, and application of modes of cultural production within the history of Black Diaspora cultures. Recommended for students with an interest in Black Studies or majors in the Humanities field. Program consent for repetition.
Credit Hours: 3

BL_STU 3625: Comparative Approaches to Black Studies in Culture Comparative approach to the study of Black Diaspora cultures that focus on the theory, method, structure, and application of modes of cultural production within Black Diaspora cultures. Recommended for students with an interest in Black Studies or majors in the Humanities field. Course may be repeated for credit with consent of program.
Credit Hours: 3

BL_STU 3627: History of Black Nationalism in the United States (same as HIST 3410). Examines the struggle of African Americans to construct autonomous institutions, to build all Black communities or to acquire an independent nation-state. We will study the ideology, structure, strategy and tactics.
Credit Hours: 3
Prerequisites: HIST 1410 or SOCIOL 2210

BL_STU 3703: Themes in Black Society Examines various themes, issues, and perspectives in political science, psychology, sociology, and other related disciplines related to social and historical institutions in the U.S., Africa, and the African Diaspora. Recommended for Black Studies or Behavioral Science Majors. Program consent for repetition.
Credit Hours: 3

BL_STU 3705: Themes in Black Culture Examines various themes, issues and perspective in literature, music, the arts, and other related disciplines related to social and historical institutions in the U.S., Africa, and the African Diaspora. Recommended for Black Studies Majors. Program consent required for repetition.
Credit Hours: 3

BL_STU 3800: Women in African History (same as HIST 3800). Focuses on the varied and changing roles of women in sub-Saharan Africa from pre-colonial times to the present.
Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent

BL_STU 3850: Gender, Hip Hop, and the Politics of Representation This class will examine gender in hip hop while exploring the intra- and interracial politics of representation among those of the hip hop generation.
Credit Hours: 3

BL_STU 3977: Black Studies Methodologies Advanced research, writing, and application of knowledge and critical paradigms in Black Studies, through study of such topics as slavery, colonialism, urbanization and migration, environment, gender, race, identity, intellectual movements, cultural studies and popular culture. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BL_STU 2975

BL_STU 4000: Special Problems in Black Studies Independent investigation leading to a paper or a project.
Credit Hour: 1-99
Prerequisites: junior standing, instructor's consent

BL_STU 4001: Undergraduate Topics in Black Studies-General Organized study of selected topics. Subjects and credit may vary from semester to semester. Program consent for repetition.
Credit Hour: 1-3
Prerequisites: junior standing

BL_STU 4040: Houses Divided: Society and Politics in the Civil War Era (Same as HIST 4040) Examines the sectional crisis, the Civil War and reconstruction through the lens of divided households. Considers the experience of soldiers and civilians, women and men, slaves and freedpeople.
Credit Hours: 3

Credit Hours: 3
Prerequisites: POL_SC 1100 and junior standing

BL_STU 4181: Themes in Literature by Women (same as WGST and ENGLSH 4181). Examines works by a number of women writers with particular attention to their sociopolitical context. May repeat to six hours with department's consent.
Credit Hours: 3
Prerequisites: junior standing
BL_STU 4210: African-American Religion
(same as REL_ST 4210). Examines the organization of major African American Christian denominations, Islam and religious movements. Twentieth century issues will be discussed, including sexism, classism and homophobia in church communities.

Credit Hours: 3
Prerequisites: junior standing or instructor’s consent

BL_STU 4220: Religion in Afro-American Literature
(same as REL_ST 4220). Examination of Afro-American fiction, poetry and drama which present significant racial attitudes toward the Christian religion. Twentieth century issues will be discussed, including sexism, classism and homophobia in church communities.

Credit Hours: 3
Prerequisites: sophomore standing

BL_STU 4230: Women, Development, and Globalization
(same as SOCIOL 4230 and WGST 4230 and PEA_ST 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women’s strategies in defining and instituting programs to improve quality of life in communities.

Credit Hours: 3
Prerequisites: BL_STU 1332, BL_STU 2200; SOCIOL 2200, WGST 1332 or WGST 2010

BL_STU 4270: African-Americans in the Twentieth Century
(same as HIST 4270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.

Credit Hours: 3

BL_STU 4300: The Black Family: Past, Present & Future
(same as H_D_FS 4300). Emphasis is on the unique social, economic, religious, educational and political environments that have affected the structure and function of the black family.

Credit Hours: 3
Prerequisites: junior standing

BL_STU 4360: Working with Minority Youth
(same as SOC_WK 4360). Develops awareness and understanding of social/psychological/ cognitive realities influencing the behavior of black youth. Content draws upon theories, research, and practice skills relevant to understanding black youth. Minority groups included.

Credit Hours: 3
Prerequisites: junior standing or instructor’s consent

(same as SOC_WK 4380). Provides students with an appreciation of the black experience in the United States on a knowledge and feeling level.

Credit Hours: 3

BL_STU 4400: Studies in African Diaspora Literature
(same as ENGLISH 4400). Topics (e.g., African American Poetry, African Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in African Diaspora Literature series.

Credit Hours: 3

BL_STU 4407: Studies in African Diaspora Literature, 1603 to 1789
(same as ENGLISH 4407). See BL_STU 4400 for course description.

Credit Hours: 3

BL_STU 4408: Studies in African Diaspora Literature, 1789 to 1890
(same as ENGLISH 4408). See BL_STU 4400 for course description.

Credit Hours: 3

BL_STU 4409: Studies in African Diaspora Literature, 1890 to Present
(same as ENGLISH 4409). See BL_STU 4400 for course description.

Credit Hours: 3

BL_STU 4410: Major Africana Diaspora Writers
(same as ENGLISH 4410). An intensive study of selected writers of African Diaspora literature focusing on texts original in English. No more than six hours may be taken in the Major African Diaspora Writers series.

Credit Hours: 3
Prerequisites: junior standing or instructor’s consent

BL_STU 4415: African Americans and American Justice
(same as HIST 4415) This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws.

Credit Hours: 3
Prerequisites: senior standing required

BL_STU 4417: Major African Diaspora Writers, 1603 to 1789
(same as ENGLISH 4417). See BL_STU 4410 for course description.

Credit Hours: 3

BL_STU 4418: Major African Diaspora Writers, 1789 to 1890
(same as ENGLISH 4418). See BL_STU 4410 for course description.

Credit Hours: 3

BL_STU 4419: Major African Diaspora Writers, 1890-Present
(same as ENGLISH 4419). See BL_STU 4410 for course description.

Credit Hours: 3
BL_STU 4420: Africana Womanism
(same as ENGLSH 4420). An intensive study of Africana Womanism, focusing on selected Africana women writers. May be repeated to six hours with departmental consent.
Credit Hours: 3
Prerequisites: junior standing or instructor’s consent

BL_STU 4460: Economic Characteristics of the African American Experience
(same as HIST 4460). Examines how economic considerations have influenced African American history from the transAtlantic slave trade to the present.
Credit Hour: 1
Prerequisites: junior standing or instructor’s consent

BL_STU 4480: Major African Diaspora Women Writers
(same as WGST 4480 and ENGLSH 4480). Study of selected Africana Diaspora women writers, focusing on texts originally in English. Repeatable with department’s consent. Maximum of 6 hours for Black Studies 4180 and 4480.
Credit Hours: 3

BL_STU 4487: Major African Diaspora Women Writers, 1603 to 1789
(same as WGST 4487 and ENGLSH 4487). See BL_STU 4480 for course description.
Credit Hours: 3

BL_STU 4488: Major African Diaspora Women Writers, 1789 to 1890
(same as WGST 4488 and ENGLSH 4488). See BL_STU 4480 for course description.
Credit Hours: 3

BL_STU 4489: Major African Diaspora Women Writers, 1890 to Present
(same as WGST 4489 and ENGLSH 4489). See BL_STU 4480 for course description.
Credit Hours: 3

BL_STU 4500: Special Problems in Black Studies
Independent project or paper, not leading to dissertation.
Credit Hour: 1-99
Prerequisites: program’s approval

BL_STU 4530: Caribbean Women Writers
Examines representative works by female authors from the Caribbean; primarily the English speaking islands. The depiction of Caribbean women will be a major consideration, as well as the unique qualities of Caribbean literature.
Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent

BL_STU 4640: African Politics
(same as POL_SC 4640). A general comparative course focusing on post-independent Africa. Theories and concepts related to decolonization, nationalism, democratization, and ethnicity; also institutional forms and organizations: political parties, parliaments, and executives.
Credit Hours: 3
Prerequisites: POL_SC 1100 and junior standing

BL_STU 4700: Race, Gender and Ethnicity in Higher Education
Historical relationships of race, gender, and ethnic issues in United States higher education. Issues include: theory and research of curriculum and teaching, diversity within the academy, and leadership, governance, and policy.
Credit Hours: 3

BL_STU 4710: Themes in African Diaspora Folklore
(same as ANTHRO 4160 and ENGLSH 4710.) Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. 4710 may be repeated for a maximum of six hours with instructor’s consent.
Credit Hours: 3
Prerequisites: junior standing

BL_STU 4720: Third World Politics
(same as POL_SC 4720). Comparative, interdisciplinary analysis of the politics of selected states in Southeast Asia, Africa, and Latin America. Special attention given to the problems of political and socioeconomic development.
Credit Hours: 3
Prerequisites: junior standing or instructor’s consent

BL_STU 4804: Historical Studies of Black Women
This course offers a comprehensive examination of the origins, developments, and productions of the specified time period with emphases on black women as creative artists, activists, performers, musicians, and writers.
Credit Hours: 3

BL_STU 4877: Black Studies Abroad
This interdisciplinary study abroad course provides students with global experience within the African Diaspora, the opportunity to study in a foreign culture and augment their “global competencies” and course of study across the three Black Studies tracks-History, Culture and Society- as well as support their study and/or career development. Graded A-F basis only.
Credit Hours: 3

BL_STU 4972: Undergrad. Seminar in Black Studies: History of Race in the U.S.
Readings on problems in American history with reports and discussion on selected topics. Departmental consent for repetition up to a maximum of 6 hours.
Credit Hours: 3
Prerequisites: junior standing, fifteen hours or instructor’s consent

<tbody>
<tr>
<td>BL_STU 4977</td>
<td>Black Studies Capstone</td>
<td>This course is designed to permit students to integrate general and specialized knowledge within the three Black Studies tracks (History, Society, Culture) using an interdisciplinary approach. Topics vary according to instructor and core discipline. Graded on A-F basis only.</td>
<td>3</td>
<td>BL_STU 2975 and BL_STU 3977; instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7004</td>
<td>Topics in Black Studies</td>
<td>Organized study of selected topics in Black Studies. Subjects and earnable credit may vary from semester to semester. Graded on A-F basis only.</td>
<td>1-99</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7230</td>
<td>Women, Development, and Globalization</td>
<td>(same as SOCIOL 7230; cross-leveled with BL_STU 4230). Examines the history and structure of “development” discourse and practices. Stresses the interconnections and impact on women globally. Reviews women’s strategies in defining and instituting programs to improve quality of life in communities.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7270</td>
<td>African-Americans in the Twentieth Century</td>
<td>(same as HIST 7270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7300</td>
<td>The Black Family: Past, Present &amp; Future</td>
<td>(same as H_D_FS 7300). Emphasis is on the unique social, economic, religious, educational and political environments that have affected the structure and function of the black family.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7400</td>
<td>Studies in African Diaspora Literature</td>
<td>(same as ENGLSH 7400). Topics (e.g., African American Poetry, African Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in African Diaspora Literature series.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7407</td>
<td>Studies in African Diaspora Literature, 1603 to 1789</td>
<td>(same as ENGLSH 7407). See BL_STU 7400 for course description.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7408</td>
<td>Studies in African Diaspora Literature, 1789 to 1890</td>
<td>(same as ENGLSH 7408). See BL_STU 7400 for course description.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7409</td>
<td>Studies in African Diaspora Literature, 1890 to Present</td>
<td>(same as ENGLSH 7409). See BL_STU 7400 for course description.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7410</td>
<td>Major Africana Diaspora Writers</td>
<td>(same as ENGLSH 7410). An intensive study of selected writers of African Diaspora literature focusing on texts originally in English. No more than six hours may be taken in the Major Anglophone African Diaspora Writers series.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7415</td>
<td>African Americans and American Justice</td>
<td>(same as HIST 7415) This course provides opportunities to examine the judicial system and discuss selected court cases in which black men, women, or children were plaintiffs or defendants in local and national courts. Moreover, the readings will subject conventional wisdom about black Americans and the legal system to scrutiny while allowing students to “witness” the mechanics of the courts and to assess long and short range social, economic, and political implications for Americans, black and white.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7417</td>
<td>Major African Diaspora Writers, 1603 to 1789</td>
<td>(same as ENGLSH 7417). See BL_STU 7410 for course description.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7418</td>
<td>Major Anglophone African Diaspora, 1789 to 1890</td>
<td>(same as ENGLSH 7418). See BL_STU 7410 for course description.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7419</td>
<td>Major African Diaspora Writers, 1890 to Present</td>
<td>(same as ENGLSH 7419). See BL_STU 7410 for course description.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7420</td>
<td>Africana Womanism</td>
<td>(same as ENGLSH 7420). An intensive study of Africana Womanism, focusing on selected Africana women writers. May be repeated to six hours with departmental consent.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7460</td>
<td>Economic Characteristics of the African American Experience</td>
<td>(same as HIST 4460). Examines how economic considerations have influenced African American history from the transatlantic slave trade to the present.</td>
<td>1</td>
<td>junior standing or instructor’s consent</td>
</tr>
<tr>
<td>BL_STU 7480</td>
<td>Major African Diaspora Women Writers</td>
<td>(same as WGST 7480 and ENGLSH 7480). Study of selected African Diaspora women writers, focusing on texts originally in English. May be repeated for credit with departmental consent. Maximum of 6 hours for Black Studies 7180 and 7480.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
</tbody>
</table>
BL_STU 7487: Major African Diaspora Women Writers, 1603 to 1789
(same as WGST 7487 and ENGLSH 7487). See BL_STU 7480 for course description.
Credit Hours: 3

BL_STU 7488: Major African Diaspora Women Writers, 1789 to 1890
(same as WGST 7488 and ENGLSH 7488). See BL_STU 7480 for course description.
Credit Hours: 3

BL_STU 7489: Major African Diaspora Women Writers, 1890 to Present
(same as WGST 7488 and ENGLSH 7488). See BL_STU 7480 for course description.
Credit Hours: 3

BL_STU 7710: Themes in African Diaspora Folklore
(same as ANTHRO 7160 and ENGLSH 7710.) Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. ENGLSH 7700 and ENGLSH 7710 may be repeated for a maximum of six hours with instructor’s consent.
Credit Hours: 3

BL_STU 7810: African-American Religion
(same as REL_ST 7810). Examines the organization of major African American Christian denominations, Islam and religious movements. Twentieth century issues will be discussed, including sexism, classism and homophobia in church communities.
Credit Hours: 3

BL_STU 7877: Black Studies Abroad
This interdisciplinary study abroad course provides students with global experience within the African Diaspora, the opportunity to study in a foreign culture and augment their “global competencies” and course of study across the three Black Studies tracks - History, Culture, and Society - as well support their study and/or career development. Graded on A-F basis only.
Credit Hours: 3

BL_STU 8000: Independent Readings in Black Studies
Readings on selected topics in Black Studies, with emphasis on the implications of the interdisciplinary and intersecting areas of History, Society, and Culture. May be repeated to a maximum of six hours.
Credit Hours: 3
Prerequisites: Department Consent Required

BL_STU 8400: Seminar in African Diaspora Literature
(same as ENGLSH 8400). Topic (e.g., Autobiography, Black Women Writers) announced at time of registration. May be repeated to 12 hours with departmental consent.
Credit Hours: 3

BL_STU 8410: Seminar in African Diaspora Theory and Literature Criticism
(same as ENGLSH 8410). Modern and contemporary African Diaspora criticism and theory including diverse approaches to literary and cultural studies. May be repeated to 12 hours with departmental consent.
Credit Hours: 3

BL_STU 8415: Readings in African-American History
(Same as HIST 8415). Readings on selected topics in African-American history from 1619 to the present, with emphasis on conflicting interpretations. May be repeated to a maximum of six hours.
Credit Hours: 3

BL_STU 8416: Seminar in African-American History
(same as HIST 8416). Directed research in selected topics in African-American history. May be repeated to a maximum of six hours.
Credit Hours: 3

BL_STU 8901: Graduate Topics in Black Studies
Graduate seminar arranged by topics or themes related to Black Studies. Graded on A-F basis only.
Credit Hours: 3

Business Administration (BUS_AD)

BUS_AD 3500: Professional Development in Business
Provides an introduction to professional competencies important for success as a business professional. Includes the assessment, communication and development of competencies valued by employers. Prerequisites: Upper level in the TCoB
Credit Hours: 3

BUS_AD 4500: Professional Development Program - Practicum
This course is designed to help students practice professional core competencies in the workplace. Students will secure a professional-level work experience and apply classroom knowledge and interpersonal skills. This course is a graduation requirement for students seeking the BSBA degree. Graded on S/U basis only.
Credit Hours: 3
Prerequisites: BUS_AD 3500

BUS_AD 7050: MBA Communications Practice
Special laboratory instruction in oral and written communication skills with an emphasis on business communications.
BUS_AD 7330: Business Law/Regulation
Legal aspects of employment, administrative regulation, corporate and noncorporate ownership structures, and legal issues involving business transactions.
Credit Hour: 1-3

BUS_AD 7340: Business Ethics and Leadership
Case studies, discussion, and readings used to integrate critical thinking about ethical issues into business decision. Development and application of ethical decision making frameworks.
Credit Hour: 1-3

BUS_AD 8001: Topics in Business Administration
Selected topics in administration offered on experimental basis.
Credit Hour: 1-99
Prerequisites: instructor’s consent

BUS_AD 8010: MBA Seminar
Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. May be repeated.
Credit Hour: 1-3
Prerequisites: MBA students only

BUS_AD 8020: MBA Seminar
Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. May be repeated.
Credit Hour: 1-3
Prerequisites: MBA students only

BUS_AD 8030: MBA Seminar
Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. Some sections may be graded A-F or S/U only. May be repeated.
Credit Hour: 1-3
Prerequisites: MBA students only

BUS_AD 8500: Business Problem Analysis: Field Project
Application of functional areas of business to real-world cases in business planning. Students will prepare and present business plan for an organization as a team project in a supervised experience.
Credit Hour: 1-3

BUS_AD 8600: Business Consulting
Students work in a team consulting capacity, with medium to large organizations, identifying and defining relatively complex and often ambiguous business problems such as needs assessment, quality management, systems management, policy/strategy formulation and similar areas.
Credit Hour: 2-3

BUS_AD 8730: International Study Abroad
Study abroad opportunities in one or more countries. Focuses on selected international business issues, cultural differences, and visiting businesses on-site. Graded on a S/U basis only. May be repeated as venues change.
Credit Hour: 3-6
Prerequisites: consent required

Cardiopulmonary & Diagnostic Sciences (CPD)

CPD 2190: Medical Terminology
Medical terminology based on a word building system. This course is intended for students majoring in health professions, nursing and other helping professions, pre-med and biology.
Credit Hours: 3
Prerequisites: sophomore standing

CPD 3200: Essentials of Pathology
Provides basic foundation for understanding etiology of disease with emphasis on systemic pathology for non-medical students.
Credit Hours: 2
Prerequisites: general biology and one course in either physiology or anatomy

CPD 3460: Cardiovascular and Pulmonary Diagnostic Applications I
(same as RA_SCI 3460). Interdisciplinary small group, case-based study of common cardiovascular, pulmonary and other diseases. Pathophysiology, diagnosis and treatment from the perspective of allied health professionals. Emphasis on critical thinking, teamwork skills.
Credit Hours: 3
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program

CPD 4440: Organization and Administration
(same as RA_SCI 4440 and RS_THR 4440). Examines design and operation of allied health service departments and educational programs, including facilities, personnel procedures, record systems, ethics, medical-legal aspects, interdepartmental relations and curriculum development.
Credit Hours: 3

CPD 4460: Cardiovascular and Pulmonary Diagnostic Applications II
(same as RA_SCI 4460). Interdisciplinary study of cardiac dysrhythmias, MI, stroke. Application of current American Heart Association Advanced Cardiac Life Support (AHA ACLS) algorithms. Successful completion of this course fulfills AHA ACLS Provider requirements.
Credit Hours: 3

CPD 4480: Clinical Ethics
(same as HLTH_SCI 4480). Exploration of bioethics issues in health care with emphasis on issues related to patient choice and provider
responsibility. Topics include philosophical theories, principles and models for ethical and lawful decision making in healthcare. Prerequisites: Junior or Senior standing; Restricted to Health Science majors only  
Credit Hours: 3

CPD 4500: Bioterrorism in Healthcare  
This course will provide the student with an orientation the principles of disaster management in the community (both state and federal levels) and the acute care facility. Topics include biological agents, allocation of resources and ethical considerations.  
Credit Hour: 1

CPD 4840: Asthma Education  
This course will provide the student with a multi-faceted approach to caring for the patient with asthma. Topics include pathophysiology, pharmacology, patient/family education, patient assessment and management. Assists students to take the Asthma Educator Credentialing Exam. Graded on A-F basis only.  
Credit Hours: 2  
Prerequisites: instructor’s consent

CPD 4955: Introduction to Research  
(same as RS_THR 4955). An interdisciplinary course designed to promote undergraduate allied health research. Includes identifying and designing research problems through formulating relevant questions, learning to systematically search for answers, and methods for searching the literature.  
Credit Hours: 3

CPD 4985: Healthcare Organization and Leadership  
(same as HLTH_SCI 4985). In this course, students will explore leadership principles as they relate to the student’s focus area, combining previous expertise in the field with an interdisciplinary perspective within the healthcare community. Graded on A-F basis only.  
Credit Hours: 3  
Prerequisites: HTH_PR 2100

CPD 4985: Introduction to Research  
(same as RS_THR 4955). An interdisciplinary course designed to promote undergraduate allied health research. Includes identifying and designing research problems through formulating relevant questions, learning to systematically search for answers, and methods for searching the literature.  
Credit Hours: 3

CPD 4985: Healthcare Organization and Leadership  
(same as HLTH_SCI 4985). In this course, students will explore leadership principles as they relate to the student’s focus area, combining previous expertise in the field with an interdisciplinary perspective within the healthcare community. Graded on A-F basis only.  
Credit Hours: 3  
Prerequisites: HTH_PR 2100

Chemical Engineering (CH_ENG)  

CH_ENG 1000: Introduction to Chemical Engineering  
Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations.  
Credit Hours: 2

Prerequisites: MATH 1500, CHEM 1320, or concurrently

CH_ENG 1000H: Introduction to Chemical Engineering - Honors  
Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations.  
Credit Hours: 2  
Prerequisites: MATH 1500, CHEM 1320, or concurrently. Honors eligibility required

CH_ENG 1320: Chemistry and Chemical Technology I  
Covers fundamental principals of chemistry, gases, engineering materials, electrochemistry, and applications with instruction including numerical modeling. Graded on A/F basis only. May be repeated for credit.  
Credit Hours: 3  
Prerequisites: CH_ENG 1320 or CHEM 1320 and MATH 1500  
Corequisites: MATH 1500

CH_ENG 1330: Chemistry and Chemical Technology II  
Covers fundamentals principals of chemistry, gases, engineering materials, electrochemistry, and applications with instruction including numerical modeling. May be repeated for credit. Graded on A/F basis only.  
Credit Hours: 3  
Prerequisites: CH_ENG 1320 or CHEM 1320 and MATH 1500

CH_ENG 2001: Advanced Experimental Course  
Content and number of credit hours to be listed in Schedule of Courses.  
Credit Hour: 1-99  
Prerequisites: sophomore standing

CH_ENG 2118: Introduction to Energy Technology and Sustainability  
An introductory course on energy technology and those resources and practices that allow for sustainable commercialization. Graded on A/F basis only.  
Credit Hours: 3  
Prerequisites: sophomore standing in engineering

CH_ENG 2225: Mass and Energy Balance  
Industrial stoichiometry, material and energy balances, thermophysics, thermochemistry; related topics.  
Credit Hours: 3  
Prerequisites: PHYSCS 2750, CHEM 2100, or concurrently

CH_ENG 2226: Engineering Process Computations and Laboratory  
Engineering applications of ordinary and partial differential equations, spreadsheets, Matlab, discipline-specific software (Aspen), process simulation, data collection, data regression, and modeling of multiple experimental systems. Perquisites or  
Credit Hours: 3  
Corequisites: MATH 1700
CH_ENG 3234: Principles of Chemical Engineering I
Fluid flow, heat and mass transfer. A comprehensive treatment of the transport processes related to chemical engineering operations, with focus on both theory and applications.

Credit Hours: 4
Prerequisites: grade of C- or better in CH_ENG 2225

CH_ENG 3235: Principles of Chemical Engineering II
Separation processes in chemical engineering, including: Evaporation, absorption, distillation, extraction, leaching, membrane separation, and drying.

Credit Hours: 3
Prerequisites: CH_ENG 3234

CH_ENG 3243: Chemical Engineering Laboratory I
Laboratory study of some principal unit operations of chemical engineering.

Credit Hours: 3
Prerequisites or Corequisites: CH_ENG 2226 and CH_ENG 3235

CH_ENG 3261: Chemical Engineering Thermodynamics I
Study of thermodynamics, with particular reference to chemical engineering applications.

Credit Hours: 3
Prerequisites: grade of C or better in CH_ENG 2225

CH_ENG 3262: Chemical Engineering Thermodynamics II
Credit Hours: 3
Prerequisites: CH_ENG 3261

CH_ENG 3307: Chemical Process Safety and Professional Ethics
A course focused on important technical fundamentals of chemical process safety and their application including professional ethics considerations. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CH_ENG 3234 or instructor’s consent

CH_ENG 3226: Engineering Research Calculations and Reporting
Application and analysis of engineering calculations in MS Excel, Matlab, and project-specific software including applications of calculus, experiential learning, and supervised research. Must have research advisor define at least one experiment and review at least one report. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MATH 4100

CH_ENG 4235: Design of Experiments and Statistical Quality Control for Process Engineers
(same as BIOL_EN 4270). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control.

Credit Hours: 3
Prerequisites: experience with Excel or instructor’s consent

CH_ENG 4306: Advanced Engineering Math
(same as NU_ENG 4306). Applies ordinary and partial differential equations to engineering problems; Fourier’s series; determinants and matrices; Laplace transforms; analog computer techniques.

Credit Hours: 3
Prerequisites: MATH 4100

CH_ENG 4311: Chemodynamics
Environmental movement of chemicals in air, water, and soil; designed to introduce students to the basic principles and techniques useful for the prediction of the movement and fate chemicals in ecosystems.

Credit Hours: 3
Prerequisites: CH_ENG 3234 or instructor’s consent

CH_ENG 4312: Air Pollution Control
Modeling of urban air pollution and control techniques. Topics treated are plume dispersion theories, photochemistry, methods of monitoring, methods of industrial abatement and legal aspects.

Credit Hours: 3
Prerequisites: CH_ENG 3234 or instructor’s consent

CH_ENG 4315: Introduction to Bioprocess Engineering
(same as BIOL_EN 4315). This general introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models.

Credit Hours: 3
Prerequisites: BIOL_EN 2180 (for Biological Engineering students) or CH_ENG 2225 (for Chemical Engineering students) or instructor’s consent

CH_ENG 4270: Biomass Refinery Operations
(same as BIOL_EN 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.
CH_ENG 4317: Chemical Processing in Semiconductor Device
This course covers the current plasma processing methods used to produce semiconductor devices with emphasis on memory devices. The physics and chemistry of how plasmas are formed, sustained and interact with the semiconductor wafers being processed. Plasma chemistry and the chemical reactions used in plasma etching are discussed.

Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CH_ENG 2225 (for Chemical Engineering students) or instructor’s consent

CH_ENG 4318: Energy Technology and Sustainability
An introductory course on energy technology, resources, practices, and common calculations used for energy analysis. May be repeated for credit.

Credit Hours: 3
Prerequisites: at least one engineering thermodynamics course or a Physical Chemistry course or instructor’s consent

CH_ENG 4319: Introduction to Polymer Materials
An introduction to the structure and properties of polymers. Solution properties, molecular weight determination and rheological behavior are studied. Manufacturing and processing techniques are considered.

Credit Hours: 3
Prerequisites: CH_ENG 3262 and CHEM 2110

CH_ENG 4321: Introduction to Ceramics
Introductory course in ceramics materials, crystal structure, processes and properties. The course content and level of presentation would allow an entry level engineering to be conversant with the terminology and concepts of ceramic science and engineering.

Credit Hours: 3
Prerequisites: Chemistry and Physics

CH_ENG 4335: Transport Phenomena
Integrated study of momentum, heat and mass transport.

Credit Hours: 3
Prerequisites: CH_ENG 3235, and MATH 4100 or MATH 7100

CH_ENG 4345: Special Reading in Chemical Engineering
Individually supervised special reading leading to an engineering report.

Credit Hour: 2-5
Prerequisites: senior standing

CH_ENG 4363: Chemical Reaction Engineering and Technology
Reactor design and optimization; rate equations; thermal effects in reactor.

Credit Hours: 3
Prerequisites: CH_ENG 2226, CH_ENG 3262, or instructor’s consent

CH_ENG 4370: Process Control Methods and Laboratory
Stat-space modeling, simulation, and experimental validation; stability analysis; feedback design and experimental studies; methods for disturbance rejection.

Credit Hours: 3
Prerequisites: CH_ENG 2226

CH_ENG 4385: Chemical Engineering Design I
The course presents optimum design methods; cost estimation, material selection and other relevant areas for the design of chemical plants. In addition, chemical safety and risk assessment will be covered.

Credit Hours: 3
Prerequisites: CH_ENG 2226, CH_ENG 3235, CH_ENG 3262, PHYSCS 2760, CHEM 2110

CH_ENG 4464: Electrochemical Reaction Engineering Science
Phenomenological behavior of electrochemical processes (battery emphasis). Theoretical interpretations of diffusion and reaction processes including system modeling. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: A course in thermodynamics or physical chemistry; CH_ENG 3261 or MAE 2300 or CHEM 3310 or instructor’s consent

CH_ENG 4980: Process Synthesis and Design
Continuation of CH_ENG 4385: application of chemical analysis and modeling to a capstone design project.

Credit Hours: 3
Prerequisites: CH_ENG 4385

CH_ENG 4990: Undergraduate Research in Chemical Engineering
Directed study of chemical engineering problems.

Credit Hour: 2-4
Prerequisites: instructor’s consent

CH_ENG 4995: Undergraduate Research in Chemical Engineering - Honors
Individual research for a senior thesis; research is supervised by the chemical engineering faculty. The thesis is to be defended before the departmental Honors committee.

Credit Hour: 3-6
Prerequisites: senior standing

CH_ENG 7001: Topics in Chemical Engineering
Current and new technical developments in chemical engineering.

Credit Hours: 3
Prerequisites: instructor’s consent

CH_ENG 7220: Hazardous Waste Management
(same as CV_ENG 7220). Engineering principles involved in handling, collection transportation, processing and disposal of hazardous waste minimization, legislation on hazardous wastes and groundwater contamination.

Credit Hours: 3
CH_ENG 7226: Engineering Research Calculations and Reporting
Application and analysis of engineering calculations in MS Excel, Matlab, and project-specific software including applications of calculus, experiential learning, and supervised research. Must have research advisor define at least one experiment and review at least one report. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MATH 4100

CH_ENG 7270: Design of Experiments and Statistical Quality Control for Process Engineers (same as BIOL_EN 7270). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control.
Credit Hours: 3
Prerequisites: experience with Excel or instructor's consent

CH_ENG 7311: Chemodynamics
Environmental movement of chemicals in air, water, and soil; designed to introduce students to the basic principles and techniques useful for the prediction of the movement and fate chemicals in ecosystems.
Credit Hours: 3
Prerequisites: CH_ENG 3234 or instructor's consent

CH_ENG 7312: Air Pollution Control
Modeling of urban air pollution and control techniques. Topics treated are plume dispersion theories, photochemistry, methods of monitoring, methods of industrial abatement and legal aspects.
Credit Hours: 3
Prerequisites: CH_ENG 3234 or instructor's consent

CH_ENG 7315: Introduction to Bioprocess Engineering (same as BIOL_EN 7315). This General introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analysis proceed through the use of mass balances, energy balances, and empirical or theoretical models.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 (for biological engineering students) or CH_ENG 2225 (for chemical engineering students) or instructor's consent

CH_ENG 7316: Biomass Refinery Operation (same as BIOL_EN 7316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CH_ENG 2225 or instructor's consent

CH_ENG 7317: Chemical Processing in Semiconductor Device
This course covers the current plasma processing methods used to produce semiconductor devices with emphasis on memory devices. The physics and chemistry of how plasmas are formed, sustained and interact with the semiconductor wafers being processed. Plasma chemistry and the chemical reactions used in plasma etching are discussed.
Credit Hours: 3

CH_ENG 7319: Introduction to Polymer Materials
An introduction to the structure and properties of polymers. Solution properties, molecular weight determination and rheological behavior are studied. Manufacturing and processing techniques are considered.
Credit Hours: 3
Prerequisites: CH_ENG 3262 and CHEM 2110

CH_ENG 7321: Introduction to Ceramic Material
Introductory course in ceramics materials, crystal structure, processes and properties. The course content and level of presentation would allow an entry-level engineer to be conversant with the terminology and concepts of ceramics science and engineering.
Credit Hours: 3
Prerequisites: Chemistry and Physics

CH_ENG 7335: Transport Phenomena
Integrated study of momentum, heat and mass transport.
Credit Hours: 3
Prerequisites: CH_ENG 3235, and MATH 4100 or MATH 7100

CH_ENG 7464: Electrochemical Reaction Engineering Science
Phenomenological behavior of electrochemical processes (battery emphasis). Theoretical interpretations of diffusion and reaction processes including system modeling. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: A course in thermodynamics or physical chemistry; CH_ENG 3261 or MAE 2300 or CHEM 3310 or instructor's consent

CH_ENG 7980: Synthesis and Design of Chemical Process
This is a heuristics-based design course intended to assist students in bringing together capabilities from previous course. An emphasis is placed on the creation process of design. Graded on A-F basis only.
Credit Hours: 3

CH_ENG 8001: Advanced Topics in Chemical Engineering
Credit Hours: 3
Prerequisites: instructor's consent

CH_ENG 8029: Advanced Plasma Processing
Concepts and techniques in novel plasma processing: plasma characteristics, plasma sputtering, plasma enhanced chemical vapor deposition (PECVD), plasma etching, plasma treatment, plasma fabrication of nano-structured materials and diamondlike films, biomedical applications.
Credit Hours: 3

CH_ENG 8085: Problems in Chemical Engineering
Supervised investigation in chemical engineering to be presented in the form of a report.
Credit Hour: 1-5
Prerequisites: instructor's consent
CH_ENG 8087: Seminar in Chemical Engineering
Reviews investigations and projects of importance in chemical engineering.
Credit Hour: 1

CH_ENG 8230: Advanced Ceramic Materials
(same as BIOL_EN 8230 and MAE 8230). To provide an advanced level understanding between processing, properties, and microstructure of ceramic materials. Topics include crystallography, defect chemistry, transport properties, microstructure, and forming methods. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CH_ENG 4319 or instructor’s consent

CH_ENG 8240: Plasma Polymerization
Fundamental aspects of polymer formation in plasma state: gas ionization, reaction kinetics, plasma characteristics and operational parameters of plasma reactors. Properties of plasma - synthesized ultrathin films and their utilization also discussed.
Credit Hours: 3
Prerequisites: CH_ENG 4319 or instructor’s consent

CH_ENG 8336: Advanced Heat and Momentum Transfer
Advanced study of these transport phenomena.
Credit Hours: 3
Prerequisites: CH_ENG 3235 or instructor’s consent

CH_ENG 8337: Advanced Mass Transfer
Advanced study of mass transfer.
Credit Hours: 3
Prerequisites: CH_ENG 4336 or instructor’s consent

CH_ENG 8338: Analysis of Equilibrium Stage Processes
Advanced study of stage processes.
Credit Hours: 3
Prerequisites: CH_ENG 2226, CH_ENG 3235 and CH_ENG 3262

CH_ENG 8429: Membranes and Membrane Processes
Thermodynamics and mass transfer of membrane separation processes; Concentration-Driven Processes; Pressure-Driven Processes; Electromembrane Processes; Biological Membrane Processes; Membrane Polymers; Preparation of Membranes; Membrane Separation Application (potable and ultrapure water, effluent treatment, gas separations, electrochemistry, dialysis therapeutic, and other applications).
Credit Hours: 3

CH_ENG 8451: Advanced Chemical Engineering Thermodynamics I
Advanced thermodynamics; particular reference to its application to chemical engineering.
Credit Hours: 3
Prerequisites: CH_ENG 3262 or instructor’s consent

CH_ENG 8463: Chemical Reaction Engineering Science
Phenomenological behavior of catalysts. Theoretical interpretations for heterogeneous and homogeneous catalysts.
Credit Hours: 3
Prerequisites: CH_ENG 4363

CH_ENG 8471: Process Optimization Methods in Chemical Engineering
Steady-state and unsteady-state optimization techniques applied to chemical processes.
Credit Hours: 3
Prerequisites: CH_ENG 2226

CHEM 1000: Introductory Chemistry
Introductory course for students with no high school background in chemistry. Covers fundamental principles of scientific measurement, stoichiometry, solutions, basic atomic structure, gases. No credit if taken after CHEM 1100.
Credit Hours: 2
Prerequisites or Corequisites: MATH 1100 or MATH 1120

CHEM 1100: Atoms and Molecules with Lab
One-semester introduction for non-science majors to the basic concepts and important applications of chemistry. Satisfies A&S requirement for a laboratory science. No credit if taken after CHEM 1310.
Credit Hours: 3

CHEM 1100H: Atoms and Molecules with Laboratory - Honors
One-semester introduction for non-science majors to the basic concepts and important applications of chemistry. Satisfies A&S requirement for a laboratory science. No credit if taken after CHEM 1310.
Credit Hours: 3
Prerequisites: Honors eligibility required

CHEM 1320: College Chemistry I
First of two-course sequence emphasizing principles and applications of modern chemical sciences. Covers chemical nomenclature, stoichiometry, kinetic molecular theory, atomic structure, periodic
properties, and molecular structure and bonding. Satisfies laboratory science requirement. Math Reasoning Proficiency Course.

**Credit Hours:** 4  
**Prerequisites:** MATH 1100 or MATH 1120 or equivalent

<tbody>
<tr>
<td>CHEM 1320H: College Chemistry I - Honors</td>
<td>First of a two-course sequence emphasizing principles and applications of modern chemical sciences. Covers chemical nomenclature, stoichiometry, kinetic molecular theory, atomic structure, periodic properties, and molecular structure and bonding. Satisfies laboratory science requirement. Math Reasoning Proficiency Course.</td>
<td>4</td>
<td>MATH 1100 or MATH 1120 or equivalent</td>
<td>CHEM 1320 or CHEM 1320H concurrenty,</td>
</tr>
<tr>
<td>CHEM 1330: College Chemistry II</td>
<td>Continuation of CHEM 1320. Covers intermolecular forces, solutions, kinetics, acid-base chemistry, electrochemistry, nuclear chemistry, thermodynamics. Satisfies requirement for a laboratory science. May be taken concurrently with CHEM 2030 or CHEM 2100.</td>
<td>4</td>
<td>grade of C- or better in CHEM 1320 or CHEM 1320H</td>
<td></td>
</tr>
<tr>
<td>CHEM 1330H: College Chemistry II- Honors</td>
<td>Continuation of CHEM 1320H. Covers equilibria, kinetics, electrochemistry, nuclear chemistry, thermodynamics. Satisfies requirement for a laboratory science. May be taken concurrently with CHEM 2030 or CHEM 2100.</td>
<td>4</td>
<td>grade of C- or better in CHEM 1320 or CHEM 1320H</td>
<td></td>
</tr>
<tr>
<td>CHEM 1500H: Honors Intensive General Chemistry with Lab - Honors</td>
<td>A one-semester, intensive introduction to chemistry for honors-eligible students that takes the place of CHEM 1320, CHEM 1330. Four lectures and one 3-hour lab period per week. Math Reasoning Proficiency Course.</td>
<td>5</td>
<td>honors eligibility, college algebra and one year of high school chemistry or instructor’s consent</td>
<td></td>
</tr>
<tr>
<td>CHEM 2030: Survey of Organic Chemistry</td>
<td>One-semester introduction to structure and bonding, functional group chemistry, principles of reactivity, reaction mechanisms, the molecules of life.</td>
<td>3</td>
<td>Grade of C or better in CHEM 1320 or CHEM 1320H or equivalent. Recommended CHEM 1330, or CHEM 1330 concurrently</td>
<td></td>
</tr>
<tr>
<td>CHEM 2100: Organic Chemistry I</td>
<td>First course of a two-semester sequence. Structure and bonding; chemistry of hydrocarbons, alkyl halides, alcohols and ethers; reaction mechanisms; principles of reactivity and synthesis; IR and NMR spectroscopy. Only 1 hour credit if taken after CHEM 2030 or equivalent.</td>
<td>2</td>
<td>honors eligibility, grade of C or better in CHEM 2170H or equivalent</td>
<td></td>
</tr>
<tr>
<td>CHEM 2100H: Honors Organic Chemistry I - Honors</td>
<td>First course of a two-semester sequence. Similar to CHEM 2100 but with increased depth and breath; emphasis on preparing science students for research and professional careers. 3 lectures, 1 discussion session per week.</td>
<td>4</td>
<td>honors eligibility, grade of B or better in CHEM 1320 or equivalent</td>
<td></td>
</tr>
<tr>
<td>CHEM 2110: Organic Chemistry II</td>
<td>Continuation of CHEM 2100. Aromatic hydrocarbons, carbonyls, amines; chemistry of carbanions; reactions of polar double bonds; nucleic acids, proteins, carbohydrates and fats.</td>
<td>3</td>
<td>grade of C or better in CHEM 2100 or equivalent, or departmental consent</td>
<td></td>
</tr>
<tr>
<td>CHEM 2110: Organic Chemistry II with Lab - Honors</td>
<td>Continuation of CHEM 2100. Preparation and identification of organic compounds; application of instrumental techniques. 2 lab sessions, 1 recitation session per week.</td>
<td>2</td>
<td>Concurrent enrollment in CHEM 2110 or CHEM 2030. No credit for students who have previous organic laboratory credit</td>
<td></td>
</tr>
<tr>
<td>CHEM 2140: Organic Laboratory II</td>
<td>Preparation and identification of organic compounds; multistep syntheses; application of instrumental techniques. 2 lab sessions, 1 discussion session per week.</td>
<td>2</td>
<td>grade of C or better in CHEM 2110 and CHEM 2130 or equivalent</td>
<td></td>
</tr>
<tr>
<td>CHEM 2140H: Honors Organic Chemistry II with Lab - Honors</td>
<td>Continuation of CHEM 2160H; includes laboratory. Content and structure similar to CHEM 2110, but with increased depth and breadth.</td>
<td>5</td>
<td>honors eligibility, grade of B or better in CHEM 2160H or equivalent</td>
<td></td>
</tr>
<tr>
<td>CHEM 2160H: Honors Organic Chemistry I - Honors</td>
<td>First course of a two-semester sequence. Similar to CHEM 2100 but with increased depth and breath; emphasis on preparing science students for research and professional careers. 3 lectures, 1 discussion session per week.</td>
<td>4</td>
<td>honors eligibility, grade of B or better in CHEM 1320 or equivalent</td>
<td></td>
</tr>
<tr>

<td></td>
</tr>
<tr>
<td>CHEM 2190H: Honors Organic Chemistry Laboratory - Honors</td>
<td>Preparation and identification of organic compounds; multistep syntheses; application of instrumental techniques, including NMR, FTIR, MS and HPLC. 2 lab sessions, 1 discussion session per week.</td>
<td>2</td>
<td>honors eligibility, grade of C or better in CHEM 2170H or equivalent</td>
<td></td>
</tr>
</tbody>
</table>
CHEM 2400: Fundamentals of Inorganic Chemistry with Lab
A systematic introduction with laboratory to inorganic and organometallic compounds, reactions, and periodic properties.

Credit Hours: 3
Prerequisites: grade of C or better in CHEM 1330

CHEM 2950: Undergraduate Research in Chemistry
A laboratory research project and/or preparation of compounds with a written final report. Cannot be substituted for other chemistry courses required for a B.S. or B.A. degree. No more than 6 hrs. total credit.

Credit Hour: 1-3
Prerequisites: sophomore standing, 2.75 GPA and/or instructor’s consent

CHEM 3200: Quantitative Methods of Analysis with Lab
Principles and practice of quantitative analysis, including the basic principles of modern instrumental methods.

Credit Hours: 4
Prerequisites: CHEM 1330 or CHEM 1500H

CHEM 3300: Fundamentals of Physical Chemistry
Survey of physical chemistry. Satisfies physical chemistry prerequisite for BIOCHM 8430.

Credit Hours: 3
Prerequisites: MATH 1700, a course in organic chemistry; PHYSCS 1210 and PHYSCS 1220 or PHYSCS 2175, or PHYSCS 2176 concurrently

CHEM 3310: Physical Chemistry I
Lecture only. Topics include the kinetic theory of gases, chemical kinetics, thermodynamics and chemical equilibrium.

Credit Hours: 3
Prerequisites: one semester organic chemistry and PHYSCS 2175, PHYSCS 2176 and MATH 2300, or MATH 2300 concurrently

CHEM 3330: Physical Chemistry II
Continuation of CHEM 3310. Lecture only. Covers wave mechanics, bonding, molecular spectroscopy and statistical mechanics.

Credit Hours: 3

CHEM 3340: Physical Chemistry Laboratory

Credit Hours: 3
Prerequisites: Grade of C or better in CHEM 3200; CHEM 3330 or CHEM 3330 concurrently

CHEM 3700: Undergraduate Seminar in Chemistry
Methods for locating and presenting chemical information, data analysis techniques, professional issues.

Credit Hours: 3
Prerequisites: CHEM 1330 or CHEM 1500H; CHEM 2100 or CHEM 2160H

CHEM 3800: Internship in Chemistry
Cannot be substituted for other chemistry courses required for B.S. or B.A. degree.

Credit Hour: 1-6
Prerequisites: departmental consent

CHEM 3940: Service-Learning in Chemistry
A service-learning community outreach program affording chemistry students with an opportunity to enhance their problem-solving skills. May be repeated once for credit. Satisfies no specific chemistry degree requirements, nor Arts and Science general education requirements. Graded on a S/U basis only.

Credit Hours: 2
Prerequisites: departmental consent

CHEM 4001: Topics in Chemistry - General
Organized study designed to broaden the knowledge base of students. Subjects on analytical, inorganic, organic and physical chemistry covered.

Credit Hour: 1-99
Prerequisites: departmental consent

CHEM 4003: Topics in Chemistry - Natural Science
Organized study designed to broaden the knowledge base of students. Subjects on analytical, inorganic, organic and physical chemistry covered.

Credit Hour: 1-99
Prerequisites: departmental consent

CHEM 4010: Advanced Chemistry Laboratory
Advanced methods for the synthesis and characterization of organic, inorganic, and organometallic compounds.

Credit Hours: 3
Prerequisites: CHEM 2400, CHEM 2140, or CHEM 2190H, CHEM 3200, CHEM 3330 (or CHEM 3330 corequisite)

CHEM 4050: Problems in Chemistry
Individual study under the direction of a faculty member that supplements regular course work.

Credit Hour: 1-99
Prerequisites: instructor’s consent

CHEM 4160: Intermediate Organic Chemistry
Stresses synthetic organic chemistry at an intermediate level.

Credit Hours: 3
Prerequisites: at least one year organic chemistry

CHEM 4170: Medicinal Chemistry
Chemical mechanisms of drug action. Topics include drug metabolism and action, chemical toxicology and medicines, enzyme activity, and specific drug case studies.

Credit Hours: 3
Prerequisites: CHEM 2110, or CHEM 2170H, CHEM 3300 or CHEM 3310 or instructor’s consent
CHEM 4200: Instrumental Methods of Analysis with Lab
Chemical instrumentation methods including electrochemistry, spectroscopy, and advanced separations techniques.
Credit Hours: 3
Prerequisites: CHEM 3200, a semester of physical chemistry

CHEM 4280: Environmental Chemistry
Surveys the chemistry of air and water environments; discusses the chemistry of waste treatment.
Credit Hours: 3
Prerequisites: 8 hours chemistry including organic and analytical

CHEM 4290: Environmental-Toxicological Chemistry
In-depth study of the chemical aspects of current issues dealing with environmental pollutants and toxic chemical substances.
Credit Hours: 3
Prerequisites: CHEM 4280 or equivalent

CHEM 4400: Inorganic Chemistry
Atomic and molecular structure, bonding, kinetics and mechanism, ligand field theory, coordination compounds, acids and bases.
Credit Hours: 3
Prerequisites: one semester Physical Chemistry, second semester concurrently

CHEM 4490: Physics and Chemistry of Materials
(same as NU_ENG 4319, PHYSCS 4190 and BIOL_EN 4480).
Undergraduate/graduate level course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper.
Credit Hours: 3
Prerequisites: PHYSCS 2760 and CHEM 1320 or equivalent and instructor’s consent

CHEM 4600: Introduction to Radiochemistry with Lab
(same as NU_ENG 4391). Introduces application of radio-tracer techniques to chemical research.
Credit Hours: 3
Prerequisites: CHEM 1330 or CHEM 1500H; and one semester of physical chemistry, or instructor’s consent

CHEM 4800: Chemistry Teaching Practicum
Provides practical experience teaching introductory chemistry in discussion and laboratory settings. For students pursuing dual degrees in chemistry and secondary education. For students pursuing simultaneous dual degrees in chemistry and secondary education. Graded on S/U basis only.
Credit Hours: 3
Prerequisites: senior standing; departmental consent required

CHEM 4950: Senior Research
A laboratory research project with approved written goals and a final written report. It may be taken twice.
Credit Hours: 3
Prerequisites: a 2.75 GPA, departmental consent

CHEM 4990H: Senior Honors Research I
A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination.
Credit Hours: 3
Prerequisites: a 3.33 GPA, departmental consent, approval of project outline. Honors eligibility required

CHEM 4991H: Senior Honors Research II
A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination.
Credit Hours: 3
Prerequisites: a 3.33 GPA, departmental consent, approval of project outline. Honors eligibility required

CHEM 7087: Seminar in Chemistry for Beginning Graduate Students
Seminar in Chemistry for Beginning Graduate Students
Credit Hour: 1

CHEM 7200: Instrumental Methods of Analysis with Lab
Chemical instrumentation methods including electrochemistry, spectroscopy, and advanced separations techniques.
Credit Hours: 3
Prerequisites: CHEM 3200, a semester of physical chemistry

CHEM 7300: Intermediate Physical Chemistry
Treatment of atomic and molecular, structure and spectroscopy based on quantum concepts. Designed to provide a broad base of knowledge in these fundamental areas to beginning graduate students in chemistry.
Credit Hours: 3
Prerequisites: departmental consent

CHEM 7400: Inorganic Chemistry
Atomic and molecular structure, bonding, kinetics and mechanism, ligand field theory, coordination compounds, acids and bases.
Credit Hours: 3
Prerequisites: one semester Physical Chemistry, second semester concurrently

CHEM 7490: Physics and Chemistry of Materials
(same as NU_ENG 7319, PHYSCS 7190 and BIOL_EN 7480).
Undergraduate/graduate level course offered every winter semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper.
Credit Hours: 3
Prerequisites: PHYSCS 2760 and CHEM 1320 or equivalent and instructor’s consent
CHEM 8003: Topics in Chemistry - Natural Science
Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department.

Credit Hours: 1-99
Prerequisites: instructor’s consent

CHEM 8020: Introduction to X-ray Crystallography
Designed for students in chemistry and related fields. Aimed at offering a practical understanding of single-crystal x-ray structural studies. Includes hands-on laboratory work (data collection and analysis).

Credit Hours: 3
Prerequisites: instructor’s consent

CHEM 8050: Non-Thesis Research in Chemistry
Does not lead to dissertation.

Credit Hour: 1-99

CHEM 8085: Topics in Chemistry
Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department.

Credit Hour: 1-99
Prerequisites: instructor’s consent

CHEM 8087: Seminar in Chemistry
Credit Hour: 1

CHEM 8090: Thesis/Dissertation (pre-candidacy) Research in Chemistry
Research leading to thesis. Graded on a S/U basis only.

Credit Hour: 1-99

CHEM 8120: Physical Organic Chemistry I
Bonding theory, physical methods, absorption spectroscopy, conformational analysis, mechanism of reactions.

Credit Hours: 3

CHEM 8130: Physical Organic Chemistry II
Case studies and methods for determining organic reaction mechanisms.

Credit Hours: 3

CHEM 8150: Organic Reaction Mechanisms
Organic reaction mechanisms are discussed within a framework of structure-reactivity relationships. Particular attention directed to the chemistry of reactive intermediates and the application of stereochemical and molecular orbital concepts.

Credit Hours: 3
Prerequisites: 1 year of Organic Chemistry and Physical Chemistry

CHEM 8160: Organic Spectroscopy
Structural analysis of organic compounds involving problem solving using modern NMR, IR, UV-VIS, MS CD/ORD and other spectroscopic techniques.

Credit Hours: 3
Prerequisites: CHEM 3330 or equivalent or instructor’s consent

CHEM 8170: Applications of the Reactions of Organic Chemistry
Credit Hours: 3
Prerequisites: CHEM 8150

CHEM 8210: Analytical Measurement
Fundamental and applied aspects of scientific measurements. Topics include: Statistics, signal-to-noise, frequency analysis, sources of noise, digital and analog filtering, time vs. frequency domain measurements, Fourier transformation, sampling, convolution/deconvolution, autocorrelation and cross-correlation. Directed toward entering graduate students.

Credit Hours: 3

CHEM 8230: Separations and Chromatography
Classical and instrumental methods of separation: gas, paper, thin film, and column chromatography; ion exchange.

Credit Hours: 3

CHEM 8240: Mass Spectrometry
This course will cover various aspects of modern mass spectrometry. Topics will include instrumentation, theory, uses and interfaces to mass spectrometry. Graded on A-F basis only.

Credit Hours: 3

CHEM 8250: Analytical Spectroscopy
Selected topics dealing with recent advances in analytical chemistry.

Credit Hours: 3

CHEM 8260: Surface Analysis and Characterization
Covers various aspects of modern methods of surface analysis and characterization. Topics include instrumentation, theory, and data reduction methods. Major sections include electron spectroscopy, microscopy, and vibrational spectroscopy as applied to surfaces. Graded on A-F basis only.

Credit Hours: 3

CHEM 8265: Fluorescence Spectroscopy
Advanced analytical chemistry course that explores the fundamental principles and uses of modern fluorescence spectroscopy in biology, materials science, chemistry, physics and engineering. Special emphasis is placed on the methodologies used to obtain specific information about a particular chemical system. Graded on A-F basis only.

Credit Hours: 3

CHEM 8270: Advanced Analytical Chemistry
Continuation of CHEM 8250.

Credit Hours: 3
CHEM 8280: Bioanalytical Chemistry
This course is aimed at introducing students to the instrumental and theoretical principles by which biological molecules are measured in vivo and in vitro. The course explores how protein, DNA and metabolite structures and quantities are determined in the laboratory with an emphasis on understanding historical methods up through cutting edge approaches in each field. The theory of measurement techniques, separation techniques and related instrumentation are explored in the context of understanding the chemical equilibria that govern each instance. Students will leave this course with a broad understanding for how many biological molecules are measured and what the limitations of various techniques may be. Graded on A-F basis only.

Credit Hours: 3

CHEM 8285: Nanochemistry
Covers various aspects of nanochemistry. Topics include synthesis and characterization of nonmaterial, nanotoxicity, and catalysis. Graded on A-F basis only.

Credit Hours: 3

CHEM 8300: Advanced Physical Chemistry
Advanced Physical Chemistry

Credit Hours: 3

CHEM 8310: Quantum Chemistry
Introduction to formal quantum mechanical theory, quantum measurement, simple model problems having exact solutions, angular momenta, approximation methods (perturbation theory, variation principle, WKB), and the structure of many-electron atoms.

Credit Hours: 3
Prerequisites: CHEM 3330 or equivalent or instructor’s consent

CHEM 8320: Chemical Kinetics
Factors affecting rates, orders and mechanisms of chemical reactions, with emphasis on current theories and experimental techniques.

Credit Hours: 3
Prerequisites: CHEM 3330 or equivalent or instructor’s consent

CHEM 8330: Computational Chemistry
Theory and application of modern computational techniques (molecular mechanics, ab initio and semiempirical molecular orbital methods) for predicting the structures, energies, and properties of molecules and molecular systems.

Credit Hours: 3
Prerequisites: CHEM 3300 or equivalent or instructor’s consent

CHEM 8340: Statistical Mechanics
Principles of statistical mechanics and their application to chemical systems; ensemble theory; condensed phases.

Credit Hours: 3
Prerequisites: CHEM 3330 or equivalent or instructor’s consent

CHEM 8350: Magnetic Resonance
Basic principles of nuclear magnetic resonance (NMR) and electron spin resonance (ESR), nuclear spin relaxation, current experimental techniques and the application to studies of structures, dynamics and chemical analysis.

Credit Hours: 3
Prerequisites: One year of organic chemistry, CHEM 3300 or equivalent

CHEM 8400: Inorganic Mechanisms
Experimental stoichiometry and rate law determination. Isotopic applications. Methods and results of fast reaction studies. Basic known inorganic mechanisms. Experimental methods of establishing mechanisms of reaction.

Credit Hours: 3

CHEM 8410: Chemistry of the Main Group Elements
Descriptive inorganic chemistry of the main group elements. Textbook material extensively supplemented with information from the current chemical literature.

Credit Hours: 3

CHEM 8420: Supramolecular Chemistry
The basics of supramolecular chemistry will be covered, including host-guest complexes, reorganization, complementarily, thermodynamic interactions, self assembly and biochemical, molecular device and crystal engineering applications. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BS in Chemistry, Biochemistry or Chemical Engineering

CHEM 8430: Coordination Chemistry and Reactivity
The chemistry of the transition elements (d-block) and their reactivity will be discussed, including bonding, coordination numbers, oxidation states, and reactivity (kinetics). Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CHEM 4400 or equivalent; graduate standing in chemistry or instructor’s consent

CHEM 8440: Inorganic Structural Methods
Chemical bonding, application of group theory, spectroscopy; diffraction as applied to structure determination; structural implications of dipole moment and magnetic susceptibility measurements.

Credit Hours: 3

CHEM 8450: Organometallics
Condensations effected by organometallics; dissolving metal reductions; sandwich compounds and related organotransition metal derivatives.

Credit Hours: 3

CHEM 8460: Solid State Chemistry
Credit Hours: 3

CHEM 8470: Actinide Chemistry
The course covers the inorganic and organometallic chemistry of the actinides. Graded on A-F basis only.

Credit Hours: 3

CHEM 8480: Chemistry of Nanomaterials
This course will cover several aspects of nanomaterials including synthesis and processing of small particles, as well as their characterization by crystallography, scanning tunneling microscopy magnetism, and other optical properties. Also studied will be the application of quantum confinement to the electronic and optical properties of nanomaterials and the development of photon materials. The nanostructure of organic polymers, micelles, and the process of biomineralization to make organic-inorganic hybrid materials will also be discussed.

Credit Hours: 3

CHEM 8600: Radiochemistry and Detection with Lab
An introductory course in the applications of radionuclides in chemistry. Topics include radioactive decay, interactions of radiation with matter, radioactive tracers, and nuclear methods of analysis. Directed towards entering graduate students.

Credit Hours: 3

CHEM 8610: Advanced Radiochemistry
Reviews current advances in radiochemistry, hot atom chemistry, radiation chemistry, nuclear spectrometry.

Credit Hours: 3

Prerequisites: CHEM 8600 or equivalent

CHEM 8620: Nuclear Chemistry
Designed for graduate students in chemistry and related fields. Studies nuclear reaction and nuclear properties.

Credit Hours: 3

Prerequisites: CHEM 3300, MATH 2300 or instructor's consent

CHEM 8630: Radiopharmaceutical Chemistry
The radionuclide concept, history of nuclear medicine, radionuclide production, organic and inorganic chemistry of radiopharmaceutical chemistry, and applications will be discussed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: undergraduate organic and inorganic chemistry; graduate standing in chemistry or instructor's consent

CHEM 8640: Biological Radiochemistry
Covers the interaction of radiation on biological material. The effects of radiation overdose is discussed along with the use of radiation in therapy. Graded on A-F basis only.

Credit Hours: 3

CHEM 9090: Post-candidacy Dissertation Research in Chemistry
Research leading to Ph.D. dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Child Health (CH_HTH)

CH_HTH 6000: Child Health Clerkship
Child Health Clerkship

Credit Hour: 6-10

CH_HTH 6010: Rural Child Health Clerkship
Rural Child Health Clerkship

Credit Hours: 6

CH_HTH 6100: Remediation 6000 Child Health Clerkship
Child Health Clerkship remediation.

Credit Hours: 6

Prerequisites: 6000 Child Health Clerkship, received unsatisfactory grade

CH_HTH 6221: Advanced Biomedical Science Medicine Problem Premature Infant
Advanced Biomedical Science Medicine Problem Premature Infant

Credit Hours: 5

CH_HTH 6223: ABS Child Health Research
ABS Child Health Research

Credit Hour: 5-10

CH_HTH 6225: ABS Child Health Research and Review
ABS Child Health Research and Review

Credit Hour: 5-10

CH_HTH 6425: Child Health Genetics
Goals/Objectives: To develop an understanding of medical genetics, including genetic diagnosis, cytogenetics, metabolic genetic diseases, teratology, and the genetics literature, and computer databases.

CURRICULUM: During the block, each student will see patients in consultation and in the genetics clinics (general genetics, metabolic, PKU, autism, Down Syndrome, outreach) where they will work up the patients and prepare a report and discussion of the diagnosis or diagnostic differential. Each student will also prepare a literature review around a specific patient or problem. For interested students, cytogenetics or metabolic problems are available. Prerequisites: Child Health clerkship

Credit Hours: 5

CH_HTH 6426: Child Health Infectious Disease
Child Health Infectious Disease

Credit Hours: 5

CH_HTH 6427: Pediatric Hematology/Oncology
Pediatric Hematology/Oncology

Credit Hours: 5
CH_HTH 6428: Pediatric Diabetes and Endocrinology
Goals/Objectives: 1) To understand the pathophysiology of endocrine and metabolic diseases in childhood. 2) To understand the fundamentals of growth processes in infancy, childhood, and adolescence.
CURRICULUM: The Department of Child Health has a large patient care and research program for children with diabetes mellitus. In addition, the Department has a busy general endocrinology program. Thus, students on the elective can participate in the care of patients with a wide spectrum of endocrine and metabolic diseases. Students can carry out specific clinical or laboratory projects relating to specific aspects of either diabetes or endocrine disease, deepen their understanding of pathophysiology of disease and gain a better understanding of the impact of a chronic disorder on the child and his/her family.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6429: Developmental Pediatrics
Developmental Pediatrics
Credit Hours: 5

CH_HTH 6430: Pediatric Cardiology
Goals/Objectives: Clinical and laboratory material is available to achieve the following objectives: 1) Develop skills in auscultation, resuscitation, treatment of congestive heart failure, and recognition of congenital heart disease in infants. 2) Adequate exposure to pediatric electrocardiography, echocardiography, cineangiography, and interpretation of cardiac catheterization data. 3) Proficiency in the management of postoperative cardio-vascular patients.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6431: Pediatric Pulmonology
Goals/Objectives: To gain experience in the treatment of asthma, bronchopulmonary dysplasia, cystic fibrosis, sleep disorders, and other respiratory diseases and to learn about pulmonary function testing in children.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6432: Pediatric Gastroenterology
Goals/Objectives: 1) Gain experience in GI diseases of children noting the difference and similarities with adult diseases. 2) To introduce the student to some of the most commonly encountered diagnoses in pediatrics and to its management. 3) To learn to focus on physical diagnosis skills. CURRICULUM: Preceptorship with a pediatric subspecialist for four weeks will include inpatient and outpatient service activities.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6433: Child Health Sports Medicine
Child Health Sports Medicine
Credit Hours: 5

CH_HTH 6434: Child Adolescent Medicine
Goals/Objectives: To teach 4th year students the intricacies of care of the adolescent patient. Specifically, the rotation will address the adolescent interview, important considerations in the adolescent "check-up", and managing the varied problems in adolescents, from attention deficit disorder to eating disorders and gynecological issues. The student will leave the rotation with a better understanding of the care of adolescents.
CURRICULUM: These objectives will be met in the following manner: 1) Student will actively participate in adolescent medicine clinic with both clinical attendings. He/she will be responsible for the initial evaluation of the patients in the clinic, will actively participate in clinical decision-making, and will be responsible for helping with patient write-ups and referral letters (at the discretion of the attending). The student will be expected to function on an extem level, following up on laboratory evaluations and checking in with patients seen, when needed. 2) The student will participate in the adolescent interview practice sessions with the interact teen theatre with the residents on the rotation. This process will help to improve interviewing skills with adolescents. 3) The student will be responsible for helping with any inpatient care, including consultations and/or admissions. 4) The student will be asked to identify particular areas of interest to be used as topics for interactive discussion with one of the attendings or for a short paper.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6435: Ped Renal and Rheumatology
4th year elective for renal/rheumatology rotation, four weeks.
Credit Hours: 5
Prerequisites: 3rd year Pediatrics/Child Health or Internal Medicine rotation

CH_HTH 6706: Internal Medicine Hematology and Medical Oncology
Rural Elective
The student will work as part of a team providing hands-on clinical services in a rural outpatient setting. Students will participate in daily morning report and other didactic sessions provided by the rotation site. Students will learn using a variety of evidence-based resources, direct observations and demonstration.

Credit Hours: 5
Prerequisites: CH_HTH 6002; restricted to medical students only

CH_HTH 6725: Developmental Pediatrics - Rural
Rural developmental pediatrics general elective.
Credit Hours: 5
Prerequisites: CH_HTH 6000; Restricted to fourth year medical students

CH_HTH 6726: Child Health Rural Elective
Students will enhance their knowledge about patient-centered care of children through active participation in a primarily outpatient clinical experience. Limited inpatient experience may be offered as well.
Credit Hours: 5
Prerequisites: CH_HTH 6000; restricted to medical students only

CH_HTH 6825: General Child Health - Inpatient
Goals/Objectives: To provide additional experience in general pediatrics in inpatient care. CURRICULUM: The student will function as a
member of the house staff team assuming many of the roles of the first year resident in patient care. This includes working up of patient’s management plans, rounding, staffing, conferences, etc. Night coverage with supervision is included.

Credit Hours: 5  
Prerequisites: Child Health Clerkship

CH_HTH 6826: General Child Health - Outpatient  
Goals/Objectives: To provide additional experience in general pediatrics in outpatient care. CURRICULUM: The student will function as a member of the healthcare team. This includes taking histories, performing physical exams, and working up patient management plans. This may require working evening clinic and Saturday clinic in addition to regular daytime clinics.

Credit Hours: 5  
Prerequisites: Child Health Clerkship

CH_HTH 6827: Neonatology/Neonatal Intensive Care Unit  
Goals/Objectives: To gain experience: 1) in the evaluation, diagnosis, and management of sick newborns, and 2) in the performance of specialized procedures necessary for ICU care. CURRICULUM: The student will function as a first-year house officer, with his/her own neonatal ICU patients for initial work-up and management, under the supervision of the PL-2 or PL-3 and attending staff. (rotation at Columbia Regional Hospital)

Credit Hours: 5  
Prerequisites: Child Health Clerkship

CH_HTH 6828: Pediatric Intensive Care Unit  
Goals/Objectives: 1) To provide the student with the initial approach and management of children requiring care in the Pediatric Intensive Care Unit. 2) To provide the student with the basics of airway management in children. 3) To provide the student with an understanding of the preoperative assessment with preparation of pediatric patients. 4) To provide the student with an introduction to the perioperative management of common pediatric surgical problems. CURRICULUM: Students in this elective will spend time in both the Pediatric ICU and the operating rooms. They will be required to participate in daily rounds in the PICU and follow the medical/surgical patients admitted to the PICU.

Credit Hours: 5  
Prerequisites: Child Health Clerkship

CH_HTH 6829: Pediatric Neurology  
Pediatric Neurology

Credit Hours: 5

Chinese (CHINSE)  

CHINSE 1100: Elementary Chinese I  
For beginners with no prior knowledge of Chinese. Five hours of classroom instruction, with one hour lab work weekly.

Credit Hours: 6

CHINSE 1200: Elementary Chinese II  
Five hours of classroom instruction, with one hour lab work weekly.

Credit Hours: 6  
Prerequisites: C- or better in CHINSE 1100 or equivalent

CHINSE 2001: Undergraduate Topics in Chinese-General  
Organized study of selected topics. Subjects and credits may vary from semester to semester.

Credit Hours: 1-3

CHINSE 2005: Undergraduate Topics in Chinese - Humanities  
Organized study of selected topics. Subjects and credits may vary from semester to semester. No knowledge of Chinese required. No language credit.

Credit Hours: 1-3

CHINSE 2100: Everyday Spoken Chinese Level I  
Reinforces and extends ability to use Chinese language for spoken communication. Studies situation-specific Chinese in real-life situations. Intended to supplement, not replace, Chinese language courses taught on MU campus.

Credit Hours: 3  
Prerequisites: CHINSE 1200. Restricted to students enrolled in MU China Study Abroad

CHINSE 2160: Intermediate Chinese I Conversation and Composition  

Credit Hours: 3  
Prerequisites: C- or better in CHINSE 1200 or equivalent

CHINSE 2310: Chinese Civilization I  
Survey of Chinese culture and arts. No knowledge of Chinese is required. No foreign language credit.

Credit Hours: 3

CHINSE 2330: Chinese Language and Culture  
Presents information about the development of Chinese language over time, the variety of dialects spoken in China, and around the world. Explores relationship between Chinese language and culture. Considers different genres of Chinese literature. Visits to sites significant to development of Chinese language and literature. Introduction to calligraphy and basic daily Chinese.

Credit Hours: 3

CHINSE 3005: Topics in Chinese - Humanities  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hours: 1-3  
Prerequisites: sophomore standing and instructor’s consent

CHINSE 3085: Problems in Chinese  
Supervised study in Chinese language and/or culture.
Prerequisites: Must be enrolled in MU China Study Abroad; sophomore standing required. Honors eligibility required.

CHINSE 3200: Chinese Traditions and Global Integration (in translation)
Studies Chinese fiction from 1920s to 1990s. Preceded by a brief historical survey of Chinese literature. Analyzes works by authors like Lu Xun, Ba Jin, Lao She, Wang Meng and many others of the younger generation. Readings and lectures in English.
Credit Hours: 3

CHINSE 3400: Negotiating Chinese Culture
As political, business, religious, and personal encounters between Chinese and Americans increase, so also does the need for competence in negotiating these cross-cultural interactions. Whether hosting Chinese guests, visiting China for business or as a scholar, or simply trying to understand current events, a clear understanding of cultural differences and similarities can be quite valuable. Students will be introduced to multiple perspectives on American and Chinese cultural differences along with narratives of cross-cultural experiences. Course addresses issues related to American and Chinese cross-cultural communication in five spheres of interaction: political, religious, business, interpersonal, and education. Through related readings, discussions, and structured conversations with Chinese, students will explore how this information and a deeper understanding of Chinese and American culture can be applied to more fruitful and positive cross-cultural interactions in multiple contexts.
Credit Hours: 3

CV_ENG 1000: Introduction to Civil Engineering
Introduces various aspects of Civil Engineering practice. May be repeated one time for credit.
Credit Hour: 1

CV_ENG 1001: Experimental Course
For freshman-level students. Content and number of credit hours to be listed in Schedule of Courses.
Credit Hour: 1-99

CV_ENG 2001: Experimental Course
For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.
Credit Hour: 1-99

**CV_ENG 2080: Introduction to Dynamics**
Basic fundamentals of particle and rigid body dynamics; energy and momentum methods.

**Credit Hours:** 3

**Prerequisites:** ENGINR 1200

---

**CV_ENG 3001: Fundamental Topics in Civil Engineering**
Special engineering topics for undergraduate students.

**Credit Hour:** 1-3

**Prerequisites:** instructor’s consent

---

**CV_ENG 3010: Decision Methods for Civil Engineering Design**
Essential features of civil engineering including the design process, design teams, experimental and computational tools, engineering economy, communication skills, and ethical considerations.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in ENGLISH 1000

**Corequisites:** ENGINR 1200

---

**CV_ENG 3050: Introduction to Geographic Information Systems GIS**
(same as GEOG 3040) Introduces theory, concepts and techniques related to the creation, manipulation, processing, and basic analysis of spatial data using GIS. Data management, current data models. GIS applications and course topics are reinforced through hands-on computer laboratory exercises.

**Credit Hours:** 3

**Prerequisites:** sophomore standing or instructor’s consent

---

**CV_ENG 3100: Fundamentals of Transportation Engineering**
Covers fundamentals of transportation engineering including geometric design, traffic engineering, pavements, and planning.

**Credit Hours:** 4

**Prerequisites:** grade of C- or better in ENGINR 1100

**Corequisites:** CV_ENG 3010

---

**CV_ENG 3200: Fundamentals of Environmental Engineering**
Fundamentals of water quality engineering and water resources, water and wastewater treatment, solid and hazardous and radioactive waste management, air pollution, environmental regulation, and environmental ethics.

**Credit Hours:** 4

**Prerequisites:** grade of C- or better in CHEM 1320 or equivalent

**Corequisites:** CV_ENG 3010

---

**CV_ENG 3250: Pollutant Fate and Transport**
(same as ENV_SC 3250). Introduction to concepts governing pollutant fate and transport in the environment, including pollutant interactions within and migration through environmental systems, as well as analytical techniques and tools necessary to quantify conditions and movement.

**Credit Hours:** 3

**Prerequisites:** ENV_SC 1100 or SOIL 2100 or CV_ENG 3200; and CHEM 1320; or instructor’s permission

---

**CV_ENG 3300: Structural Analysis I**
Analysis of statically determinate beams, frames; shear and moment diagrams; influence line diagrams; beam deflections. Analysis of statically indeterminate structures; moment distribution; energy methods. Introduction to matrix analysis.

**Credit Hours:** 4

**Prerequisites:** grade of C- or better in ENGINR 1200 and ENGINR 2200

---

**CV_ENG 3312: Reinforced Concrete Design**
Basic principles of reinforced concrete design. Design of beams for flexure and shear; design of short and slender columns. Prerequisites: CV_ENG 3300;

**Credit Hours:** 3

**Corequisites:** CV_ENG 3600

---

**CV_ENG 3313: Structural Steel Design**
Basic principles of structural steel design. Design of beams, axially loaded members, columns, and bolted and welded connections.

**Credit Hours:** 3

**Corequisites:** CV_ENG 3300 and CV_ENG 3600

---

**CV_ENG 3400: Fundamentals of Geotechnical Engineering**
Detailed study of physical and mechanical properties of soil governing its behavior as an engineering material.

**Credit Hours:** 4

**Prerequisites:** grade of C- or better in ENGINR 2200 and GEOL 1150

---

**CV_ENG 3400: Fundamentals of Geotechnical Engineering**
Introduction to composition, structure, properties, behavior, and selection of civil engineering materials. Prerequisites: grade of C- or better in ENGINR 2200 or instructor’s consent;

**Credit Hours:** 4

**Corequisites:** CV_ENG 3010

---

**CV_ENG 3700: Fluid Mechanics**
Statics and dynamics of fluids, principles of continuity, momentum and energy, pipe flow.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better PHYSCS 2750

---

**CV_ENG 3702: Hydrology**
Fundamental concepts of hydrology in engineering; quantitative estimation of stream-flow magnitude and frequency; and open channel flow considerations from stream-flow. Fluid Mechanics lab with lab reports.

**Credit Hours:** 4

**Prerequisites:** grade of C- or better MATH 2300 and CV_ENG 3200 and CV_ENG 3700

---

**CV_ENG 3701: Topics in Civil Engineering**
Study of current and new technical developments in civil engineering.

**Credit Hour:** 1-3

**Prerequisites:** instructor’s consent
CV_ENG 4006: Digital Computer Applications in Engineering
Use of digital computer for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, differentiation, and differential equations. Prerequisites: MATH 2300
Credit Hours: 3

CV_ENG 4008: Risk and Reliability for Civil Engineers
This course focuses on how to use probability and statistics to quantify uncertainties and consider risks when making civil engineering decisions and designing civil engineering systems.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3010 or other introductory probability/statistics course

CV_ENG 4080: Advanced Surveying
Celestial observations for determination of position; state coordinate systems, precise surveys, introduction to geodetic surveys, principles of photogrammetry. Theory of optical surveying instruments.
Credit Hours: 3
Prerequisites: MATH 1500

CV_ENG 4085: Problems in Civil and Environmental Engineering
Directed investigation of civil engineering.
Credit Hours: 2-4
Prerequisites: instructor’s consent

CV_ENG 4100: Traffic Engineering
Characteristics and studies associated with highway traffic. Capacity analysis and evaluation of freeways, rural highways, and urban streets. Traffic signal control and coordination.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4102: Infrastructure Management
Civil infrastructure condition assessment, performance modeling, deterioration processes and models, maintenance and rehabilitation strategies, management techniques, data analysis, management systems, financing, case studies, emerging technologies.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4104: Pavement Materials and Design
Properties of materials used in roads, airports and other pavement construction. Design methods for rigid and flexible pavements.
Credit Hours: 3
Prerequisites: grade of C- or better in ENGINR 2200

CV_ENG 4106: Intelligent Transportation Systems
This is an introductory course in Intelligent Transportation Systems (ITS). Topics include the theory of transportation networks and systems optimization, current implementations of ITS, and practical issues and implications of ITS.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4108: Bicycle and Pedestrian Transportation
This course teaches how to integrate pedestrian and bicyclist accommodations into the planning and design of transportation facilities. Topics include bicyclist safety, accommodation at intersections, traffic calming techniques and facility design.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4110: Transportation Simulation
Theory and application of simulation in transportation engineering.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4120: Airport Engineering
Airport systems planning, design, and management.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4125: Transportation Legal Issues
This course discusses some of the legal issues that transportation engineers encounter throughout the course of their careers.
Credit Hours: 3
Prerequisites: CV_ENG 3010

CV_ENG 4130: Transportation Safety
This course is an introduction to transportation safety. The focus will be on surface transportation. The student is expected to analyze safety data and to devise engineering solutions to safety problems.
Credit Hours: 3
Prerequisites: CV_ENG 3010

CV_ENG 4145: Civil and Environmental Engineering Legal Issues
Discussion of legal issues facing civil engineers including right of way, risk and liability, environment, financing public works, contracting and ethics.
Credit Hours: 3
Prerequisites: CV_ENG 3010

CV_ENG 4155: Transportation Geography
(same as GEOG 4850). Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.
Credit Hours: 3
CV_ENG 4175: The Geospatial Science in National Security
(Same as GEOG 4130). This course explores the critical contribution of
the geospatial sciences in the collection processing, visualization and
analysis of geospatial information related to national security. May be
repeated for credit.
Credit Hours: 3
Prerequisites: junior standing or above required; instructor’s consent

CV_ENG 4185: Location Analysis/Site Selection
(same as GEOG 4740). An overview of location analysis in regional
planning and spatial decision support, this course focuses on the use of
Geographic Information Science (GIS) and location analysis methods in
addressing regional service needs. Maybe be repeated for credit.
Credit Hours: 3

CV_ENG 4190: Infrastructure Project Development
Students will learn how the key elements of major civil engineering
infrastructure projects fit together. The course will focus on the horizontal
integration of: financing - planning - environment - right of way - design -
construction - operations - maintenance. Engineering is important but so
are a lot of other things. Graded on A-F basis only. Prerequisites: junior
standing
Credit Hours: 3

CV_ENG 4200: Remote Sensing of the Environment
Principles, characteristics and applications of remote sensing in
engineering, geosciences, agriculture and environmental projects. Topics:
basic concepts, photographic, thermal multispectral and microwave
systems, satellite remote sensing and digital image processing.
Credit Hours: 3
Prerequisites: junior standing

CV_ENG 4210: Solid Waste Management
Engineering principles involved in generation, handling, collection,
transport, processing, and disposal of solid wastes, resource recovery
and reuse, legislation on solid wastes and groundwater contamination
problems.
Credit Hours: 3
Prerequisites: junior standing

CV_ENG 4220: Hazardous Waste Management
(same as CH_ENG 4220). Engineering principles involved in handling,
collection, transportation, processing and disposal of hazardous wastes,
waste minimization, legislation on hazardous wastes and groundwater
contamination.
Credit Hours: 3

CV_ENG 4230: Introduction to Water Quality
Methods for determining and characterizing water quality, effects of
pollution on streams and lakes, and an introduction to engineered
systems for the distribution, collection and treatment of water and
wastewater.
Credit Hours: 3

Prerequisites: junior standing

CV_ENG 4232: Water and Wastewater Treatment Facilities
Physical, chemical, and biochemical processes for treating drinking water
supplies and wastewaters (domestic and industrial), with emphasis on
planning and design of such facilities.
Credit Hours: 3
Prerequisites: CV_ENG 4230 or CV_ENG 7230 or instructor’s consent

CV_ENG 4240: Water Quality Analysis
Chemical, physical and biological methods for analysis of streams,
lakes, wastewaters and water supplies and their use in water quality
management.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 4230 or instructor’s
consent

CV_ENG 4250: Environmental Regulatory Compliance
(cross-leveled with CV_ENG 4250). Systems of water law; provisions
of major federal environmental laws and regulations; development of
regulations at the federal, state, and local levels; regulatory frameworks;
permits; and enforcement.
Credit Hours: 3

CV_ENG 4260: Environmental Public Policy
Engineering and economic aspects of environmental policy. Basic
understanding of environmental statutes and case law.
Credit Hours: 3

CV_ENG 4270: Environmental Engineering Microbiology
Theory and application of fundamental principles of microbiology,
ecology, and aquatic biology of the microorganisms of importance to
sanitary engineers.
Credit Hours: 3
Prerequisites: senior standing or instructor’s consent

CV_ENG 4285: Pollution Prevention: Applied Engineering for
Sustainable Business Practices
Identify, analyze and solve energy, water and raw materials inefficiencies
common to industrial processes and facilities. Graded on A-F only basis.
Credit Hours: 3
Prerequisites: PHYSCS 2760, MATH 2300, CHEM 1320, ENGINR 2300
or equivalent. Restricted to Juniors and Seniors

CV_ENG 4290: Wastewater Treatment and Process Design
Selection and use of wastewater and sludge treatment processes,
disposal methods, sustainable wastewater treatment including anaerobic
treatment of wastewater reuse.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3200. Instructor’s
consent required
CV_ENG 4300: Advanced Structural Steel Design
(cross-leveled with CV_ENG 7300). Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3313

CV_ENG 4302: Prestressed/Advanced Reinforced Concrete
Credit Hours: 3
Corequisites: CV_ENG 3312

CV_ENG 4310: Structural Design and Analysis
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 4300

CV_ENG 4320: Energy Methods in Mechanics
Variational mechanics including practical examples. Topics include calculus of variation of boundary value problems, energy methods such as Ritz and Galerkin methods, approximate solutions methods such as the finite element and finite difference, and eigenvalue problems.
Credit Hours: 3
Prerequisites: senior or graduate standing required

CV_ENG 4330: Structural System Design
Design of buildings in steel and reinforced concrete, including estimation of loads and design of gravity and lateral force resisting systems.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3312 and CV_ENG 3313

CV_ENG 4350: Matrix Methods of Structural Analysis
An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the STRUDL and NASTRAN programs to three dimensional structures.
Credit Hours: 3
Prerequisites: senior standing; grade of C- or better in CV_ENG 3300

CV_ENG 4360: Bridge Engineering
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3312 and CV_ENG 3313

CV_ENG 4404: Geotechnical Earthquake Engineering
This course provides an introduction to geotechnical aspects of earthquake engineering. Topics include: basic seismology, seismic hazard analysis, dynamic soil properties, site response analysis and soil liquefaction.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3400 or instructor's consent

CV_ENG 4406: Geotechnics of Landfill Design
This course will focus on geotechnical and construction aspects in the analysis, design and construction of waste containment facilities (landfills) including expansions of existing facilities.
Credit Hours: 3
Prerequisites: instructor's consent

CV_ENG 4410: Foundation Engineering
Subsurface exploration. Design of basic foundation structures, shallow foundations, retaining walls, deep foundations.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3400

CV_ENG 4412: Applied Geotechnical Engineering
Study of concepts, theories, and design procedures for modern earthwork engineering including: compaction and densification of soils and soil improvement, seepage and drainage, slope stability and performance, and earth retaining structures.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3400

CV_ENG 4500: Introduction to Construction Management
Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques.
Credit Hours: 3
Prerequisites: junior standing

CV_ENG 4600: Advanced Mechanics of Materials
(same as MAE 4600; cross-leveled with CV_ENG 7600 and MAE 7600). Analysis of more complicated problems in stresses, strains.
Credit Hours: 3
Prerequisites: grade of C- or better in ENGINR 2200

CV_ENG 4610: Sensors and Experimental Stress Analysis
Sensors and instrumentation for stress analysis, mechanical measurement and health monitoring of civil structures. Application and design of data acquisition systems, basic digital signal processing. Electronics and instrumentation circuits.
Credit Hours: 3
Prerequisites: grade of C- or better in ENGINR 2200 and PHYSCS 2760
CV_ENG 4660: Vibration Analysis
(same as MAE 4660). Vibration theory with application to mechanical systems.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 2080 and MATH 4100

CV_ENG 4692: Introduction to Structural Dynamics
Theory of structural response to dynamic loads. Computation of dynamic response of structures to dynamic loads like blast and earthquake. Modal analysis and single degree of freedom methods will be covered.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3300

CV_ENG 4700: Hydraulics of Open Channels
Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3700

CV_ENG 4703: Applied Hydrology
Modern methods of applied hydrologic analysis and synthesis of hydrologic records.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3700 and CV_ENG 3702 or instructor’s consent

CV_ENG 4710: Soil and Water Conservation Engineering
(same as BIOL_EN 4150). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor’s consent

CV_ENG 4720: Watershed Modeling Using GIS
(same as BIOL_EN 4350). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP, Procedures for model calibration/sensitivity data analysis.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor’s consent

CV_ENG 4792: Analysis of Water-Resource Systems
Applies hydrology, hydraulic and sanitary engineering, and economics to water-resource design problems considering man and his environment. Uses methods of systems analysis.
Credit Hours: 3
Prerequisites: instructor’s consent

CV_ENG 4980: Civil Engineering Systems Design
Design of civil engineering systems.
Credit Hours: 3
Prerequisites: senior standing in Civil Engineering at the University of Missouri-Columbia or written consent of Chairman

CV_ENG 4990: Undergraduate Research in Civil and Environmental Engineering
Independent investigation or project in Civil Engineering. May be repeated to 6 hours.
Credit Hour: 1-4
Prerequisites: senior standing in Civil and Environmental Engineering and instructor’s consent

CV_ENG 4995: Research in Civil & Environmental Engineering - Undergraduate Honors
Independent project, supervised by the honors advisor, to be presented as a formal written report.
Credit Hour: 1-3
Prerequisites: participation in the Civil and Environmental Engineering Departmental Honors Program

CV_ENG 7001: Topics in Civil Engineering
Study of current and new technical developments in civil engineering.
Credit Hour: 1-3
Prerequisites: instructor’s consent

CV_ENG 7002: Analysis of Civil Engineering Decisions
Formulates and analyzes probabilistic models of civil engineering systems and their environment. Elementary theory of decision making under uncertainty. Application to selected civil engineering problems.
Credit Hours: 3

CV_ENG 7003: Optimization of Civil Engineering Systems
Automated design techniques such as linear, nonlinear, and dynamic programming; gradient and random searching. Civil engineering applications emphasized throughout.
Credit Hours: 3

CV_ENG 7004: Engineering Administration
Cash flow analysis, financial analysis, managerial accounting and cost control, budgeting, organizational structure and behavior.
Credit Hours: 3
Prerequisites: MATH 1300 or MATH 1500, or instructor’s consent

CV_ENG 7006: Digital Computer Applications in Engineering
Use of digital computer for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, differentiation, and differential equations.
Credit Hours: 3
Prerequisites: MATH 2300

CV_ENG 7007: Quality Management in Civil Engineering
Quantitative and qualitative quality planning and analysis concepts, including statistical tools and total quality management techniques, control, measurement and assessment. Graded on A-F basis only.
Credit Hours: 3
**CV_ENG 7008: Risk and Reliability for Civil Engineers**  
This course focuses on how to use probability and statistics to quantify uncertainties and consider risks when making civil engineering decisions and designing civil engineering systems.

**Credit Hours:** 3  
**Prerequisites:** grade of C- or better in CV_ENG 3010 or other introductory probability/statistics course

---

**CV_ENG 7080: Advanced Surveying**  
Celestial observations for determination of position; state coordinate systems, precise surveys, introduction to geodetic surveys, principles of photogrammetry. Theory of optical surveying instruments.

**Credit Hours:** 3  
**Prerequisites:** CV_ENG 2090 and MATH 1500

---

**CV_ENG 7082: Property Boundary Location**  
Principles of real property ownership, deeds, property boundary surveying, legal principles of original and retracement surveys Missouri statutes and regulations affecting surveying, GLO corner restoration and re-establishment.

**Credit Hours:** 3  
**Prerequisites:** ENGINR 1500 and CV_ENG 2090

---

**CV_ENG 7100: Traffic Engineering**  
Characteristics and studies associated with highway traffic. Capacity analysis and evaluation of freeways, rural highways, and urban streets. Traffic signal control and coordination.

**Credit Hours:** 3  
**Prerequisites:** grade of C- or better in CV_ENG 3100

---

**CV_ENG 7102: Infrastructure Management**  
Civil infrastructure condition assessment, performance modeling, deterioration processes and models, maintenance and rehabilitation strategies, management techniques, data analysis, management systems, financing, case studies, emerging technologies.

**Credit Hours:** 3  
**Prerequisites:** grade of C- or better in CV_ENG 3100

---

**CV_ENG 7103: Planning and Geometric Design of Highways**  
Techniques of highway planning in rural and urban areas. Design of the visible elements of highways.

**Credit Hours:** 3  
**Prerequisites:** grade of C- or better in CV_ENG 3100

---

**CV_ENG 7104: Pavement Materials and Design**  
Properties of materials used in roads, airports and other pavement construction. Design methods for rigid and flexible pavements.

**Credit Hours:** 3  
**Prerequisites:** grade of C- or better in ENGINR 2200

---

**CV_ENG 7106: Intelligent Transportation Systems**  
This is an introductory course in Intelligent Transportation Systems (ITS). Topics include the theory of transportation networks and systems optimization, current implementations of ITS, and its practical issues and implications of ITS.

**Credit Hours:** 3  
**Prerequisites:** grade of C- or better in CV_ENG 3100

---

**CV_ENG 7108: Bicycle and Pedestrian Transportation**  
This course teaches how to integrate pedestrian and bicyclists accommodations into the planning and design of transportation facilities. Topics include, including pedestrian and bicyclist safety, accommodation at intersections, traffic calming techniques and facility design.

**Credit Hours:** 3  
**Prerequisites:** grade of C- or better in CV_ENG 3100

---

**CV_ENG 7109: Urban Development and Planning**  
Introduction to planning processes; procedures and forces that shape urbanization.

**Credit Hours:** 3

---

**CV_ENG 7110: Transportation Simulation**  
Theory and application of simulation in transportation engineering.

**Credit Hours:** 3  
**Prerequisites:** C- or better in CV_ENG 3100

---

**CV_ENG 7120: Airport Engineering**  
Airport systems planning, design, and management.

**Credit Hours:** 3  
**Prerequisites:** C- or better in CV_ENG 3010

---

**CV_ENG 7125: Transportation Legal Issues**  
This course discusses some of the legal issues that transportation engineers encounter throughout the course of their careers.

**Credit Hours:** 3  
**Prerequisites:** CV_ENG 3010

---

**CV_ENG 7130: Transportation Safety**  
This course is an introduction to transportation safety. The focus will be on surface transportation. The student is expected to analyze safety data and to devise engineering solutions to safety problems.

**Credit Hours:** 3  
**Prerequisites:** CV_ENG 3010

---

**CV_ENG 7145: Civil and Environmental Engineering Legal Issues**  
Discussion of legal issues facing civil engineers including right of way, risk and liability, environment, financing public works, contracting and ethics.

**Credit Hours:** 3  
**Prerequisites:** CV_ENG 3010

---

**CV_ENG 7155: Transportation Geography**  
(same as GEOG 7850. Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.)
CV_ENG 7165: Geographic Information Systems I
Introduces concepts of computer analysis of geographic data and emphasizes the techniques for handling geographic data. Application of computer-based GIS systems in coursework.

Credit Hours: 3
Prerequisites: instructor's consent; GEOG 2840

CV_ENG 7175: The Geospatial Sciences in National Security
(Same as GEOG 7130). This course explores the critical contribution of the geospatial sciences in the collection, processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.

Credit Hours: 3
Prerequisites: instructor's consent

CV_ENG 7185: Location Analysis/Site Selection
(Same as GEOG 7740). An overview of location analysis in regional planning and spatial decision support, this course focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. May be repeated for credit.

Credit Hours: 3

CV_ENG 7190: Infrastructure Project Development
Students will learn how the key elements of major civil engineering infrastructure projects fit together. The course will focus on the horizontal integration of: financing - planning - environment - right of way - design - construction - operations - maintenance. Engineering is important but so are a lot of other things. Graded on A-F basis only.

Credit Hours: 3

CV_ENG 7200: Remote Sensing of the Environment
Principles, characteristics and applications of remote sensing in engineering, geosciences, agriculture and environmental projects. Topics: basic concepts, photographic, thermal multispectral and microwave systems, satellite remote sensing and digital image processing.

Credit Hours: 3

CV_ENG 7210: Solid Waste Management
Engineering principles involved in generation, handling, collection, transport, processing, and disposal of solid wastes, resource recovery and reuse, legislation on solid wastes and groundwater contamination problems.

Credit Hours: 3

CV_ENG 7220: Hazardous Waste Management
(same as CH_ENG 7220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination.

Credit Hours: 3

CV_ENG 7230: Introduction to Water Quality
Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineered systems for the distribution, collection and treatment of water and wastewater.

Credit Hours: 3

CV_ENG 7232: Water and Wastewater Treatment Facilities
Physical, chemical, and biochemical processes for treating drinking water supplies and wastewaters (domestic and industrial), with emphasis on planning and design of such facilities.

Credit Hours: 3
Prerequisites: CV_ENG 4230 or CV_ENG 7230 or instructor's consent

CV_ENG 7240: Water Quality Analysis
Chemical, physical and biological methods for analysis of streams, lakes, wastewaters and water supplies and their use in water quality management.

Credit Hours: 3
Prerequisites: C- or better in CV_ENG 4230 or instructor's consent

CV_ENG 7250: Environmental Regulatory Compliance
(cross-leveled with CV_ENG 4250). Systems of water law; provisions of major federal environmental laws and regulations; development or regulations at the federal, state, and local levels; regulatory frameworks; permits; and enforcement.

Credit Hours: 3

CV_ENG 7260: Environmental Public Policy
Engineering and economic aspects of environmental policy. Basic understanding of environmental statutes and case law. Graded on A-F basis.

Credit Hours: 3

CV_ENG 7270: Environmental Engineering Microbiology
Theory and application of fundamental principles of microbiology, ecology, and aquatic biology of the microorganisms of importance to sanitary engineers.

Credit Hours: 3

CV_ENG 7290: Wastewater Treatment and Process Design
Selection and use of wastewater and sludge treatment processes, disposal methods, leading to rational design of overall wastewater treatment systems. Sustainable wastewater treatment including advanced processes in nutrient removal, anaerobic treatment for wastewater reuse. Graded on A-F basis only.

Credit Hours: 3

CV_ENG 7300: Advanced Structural Steel Design
(cross-leveled with CV_ENG 4300). Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections.

Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3313
**CV_ENG 7302: Prestressed/Advanced Reinforced Concrete**

**Credit Hours:** 3
**Corequisites:** CV_ENG 3312

---

**CV_ENG 7310: Structural Design and Analysis**

**Credit Hours:** 3
**Prerequisites:** grade of C- or better in CV_ENG 4300

---

**CV_ENG 7320: Energy Methods in Mechanics**
Design of building structures and bridges in steel and reinforced concrete using case studies.

**Credit Hours:** 3
**Prerequisites:** grade of C- or better in CV_ENG 3300

---

**CV_ENG 7330: Structural System Design**
Design of buildings in steel and reinforced concrete, including estimation of loads and design of gravity and lateral force resisting systems.

**Credit Hours:** 3
**Prerequisites:** grade of C- or better in CV_ENG 3312 and CV_ENG 3313

---

**CV_ENG 7350: Matrix Methods of Structural Analysis**
An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the STRUDL and NASTRAN programs to three dimensional structures.

**Credit Hours:** 3
**Prerequisites:** grade of C- or better in CV_ENG 3300

---

**CV_ENG 7360: Bridge Engineering**

**Credit Hours:** 3
**Prerequisites:** Grade of C- or better in CV_ENG 3312 and CV_ENG 3313

---

**CV_ENG 7404: Geotechnical Earthquake Engineering**
This course will provide an introduction to topics relating to geotechnical aspects of earthquake engineering. Topics to be covered include; basic seismology, seismic hazard analysis, dynamic soil properties, site response analysis and soil properties, site response analysis and soil liquefaction. Graded on A-F basis only.

**Credit Hours:** 3
**Prerequisites:** Grade of C- or better in CV_ENG 3400 or instructor’s consent

---

**CV_ENG 7406: Geotechnics of Landfill Design**
This course will focus on geotechnical and construction aspects in the analysis, design and construction of waste containment facilities (landfills) including expansions of existing facilities.

**Credit Hours:** 3
**Prerequisites:** instructor’s consent

---

**CV_ENG 7410: Foundation Engineering**
Subsurface exploration. Design of basic foundation structures: shallow foundations, retaining walls, deep foundations.

**Credit Hours:** 3
**Prerequisites:** Grade of C- or better in CV_ENG 3312 and CV_ENG 3313

---

**CV_ENG 7412: Applied Geotechnical Engineering**
Study of concepts, theories, and design procedures for modern earthwork engineering including; compaction and densification of soils and soil improvement, seepage and drainage, slope stability and performance, and earth retaining structures.

**Credit Hours:** 3
**Prerequisites:** grade or C- or better in CV_ENG 3400

---

**CV_ENG 7500: Introduction to Construction Management**
Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques.

**Credit Hours:** 3

---

**CV_ENG 7510: Construction Methods and Equipment**
Selection and use of construction equipment, planning construction operations, equipment economics and operations analyses.

**Credit Hours:** 3
**Prerequisites:** MATH 1300 or MATH 1500, or instructor’s consent

---

**CV_ENG 7560: Advanced Mechanics of Materials**
(same as MAE 7600; cross-leveled with CV_ENG 4600 and MAE 4600). Analysis of more complicated problems in stresses, strains.

**Credit Hours:** 3
**Prerequisites:** grade of C- or better in ENGINR 2200

---

**CV_ENG 7610: Sensors and Experimental Stress Analysis**
Sensors and instrumentation for stress analysis, mechanical measurement and health monitoring of civil structures. Application and design of data acquisition systems, digital signals and basic digital signal processing. Electronics and instrumentation circuits.

**Credit Hours:** 3
**Prerequisites:** Grade of C- or better in ENGINR 2200 and PHYSCS 2760

---

**CV_ENG 7660: Vibration Analysis**
(same as MAE 7660). Vibration theory with application to mechanical systems.

**Credit Hours:** 3
**Prerequisites:** grade of C- or better in MAE 2600 and MATH 4100

**CV_ENG 7692: Introduction to Structural Dynamics**
Theory of structural response to dynamics loads. Computation of dynamic response of structures to dynamic loads like blast and earthquake. Modal analysis and single degree of freedom methods will be covered. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in CV_ENG 3300

**CV_ENG 7700: Hydraulics of Open Channels**
Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves.

**Credit Hours:** 3

**Prerequisites:** graduate standing and Grade of C- or better in CV_ENG 3700

**CV_ENG 7702: Pipeline Engineering**
Theoretical and practical aspects of pipeline engineering including pipeline transport of natural gas and various solids such as coal, sand and solid wastes.

**Credit Hours:** 3

**Prerequisites:** CV_ENG 3700 and MAE 3400

**CV_ENG 7703: Applied Hydrology**
Modern methods of applied hydrologic analysis and synthesis of hydrologic records.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV_ENG 3700 and CV_ENG 3702, or instructor’s consent

**CV_ENG 7710: Soil and Water Conservation Engineering**
(same as BIOL_EN 7150). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.

**Credit Hours:** 3

**Prerequisites:** BIOL_EN 3200 or CV_ENG 3200 or instructor’s consent

**CV_ENG 7720: Watershed Modeling Using GIS**
(same as BIOL_EN 7350). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP. Procedures for model calibration/sensitivity data analysis.

**Credit Hours:** 3

**Prerequisites:** BIOL_EN 2180 or CV_ENG 3200 or instructor’s consent

**CV_ENG 7792: Analysis of Water-Resource Systems**
Applies hydrology, hydraulic and sanitary engineering, and economics to water-resource design problems considering man and his environment. Uses methods of systems analysis.

**Credit Hours:** 3

**Prerequisites:** instructor’s consent

**CV_ENG 8001: Advanced Topics in Civil Engineering**
New and current technical developments in civil engineering.

**Credit Hour:** 1-3

**Prerequisites:** CV_ENG 4006 or equivalent

**CV_ENG 8002: Directed Reading In Civil Engineering**
Faculty supervised readings course.

**Credit Hour:** 1-3

**CV_ENG 8085: Problems in Civil Engineering**
Supervised investigation in civil engineering to be presented in the form of a report.

**Credit Hour:** 1-6

**CV_ENG 8087: Seminar in Civil Engineering**
Review of research in progress. Research techniques.

**Credit Hour:** 1

**CV_ENG 8100: Transportation Planning and Models**
Regional and metropolitan transportation studies; land use, traffic generation, distribution and assignment models.

**Credit Hours:** 3

**Prerequisites:** CV_ENG 4002 or CV_ENG 4003

**CV_ENG 8106: Advanced Intelligent Transportation Systems**
This course is intended to be an introductory course in Intelligent Transportation Systems (ITS). This course includes the background of ITS, current implementations, sample deployments, and practical issues and implications.

**Credit Hours:** 3

**Prerequisites:** CV_ENG 4106

**CV_ENG 8110: Theory of Traffic Flow**
Scientific approach to study of traffic phenomena with emphasis on applications. Deterministic and stochastic models of traffic flow; optimization of intersection controls; computer simulation of traffic problems.

**Credit Hours:** 3

**Prerequisites:** CV_ENG 4002 or instructor’s consent

**CV_ENG 8120: Traffic Control Engineering**
Information retrieval and analysis of human and vehicular characteristics; roadway element; system control and optimization of highways, intersections; planning and design of new traffic facilities including ways, terminals.

**Credit Hours:** 3

**Prerequisites:** CV_ENG 3100 or equivalent

**CV_ENG 8130: Land Use Planning**
Case study of site planning using systems analysis; feasibility for development or redevelopment; restraints imposed by political, social and economic conditions on land use activity as related to urban and regional relationships.

**Credit Hours:** 3

**Prerequisites:** CV_ENG 4106
CV_ENG 8140: Highway Transportation
Economics of transportation on highways. Comparison of vehicle operation costs. Project studies of highway problems in general.
Credit Hours: 3
Prerequisites: CV_ENG 4103 or equivalent

CV_ENG 8150: Transportation Networks
This course presents techniques used in equilibrium analysis of transportation networks. The details of traffic assignment algorithms will be discussed along with theory and practical algorithms.
Credit Hours: 3

CV_ENG 8187: Seminar in Transportation Engineering
Review of research in progress in the area of transportation engineering.
Credit Hour: 1

CV_ENG 8200: Water Quality Modeling
Derivation and application of models for describing oxygen budget, nutrient exchange, and biological productivity in streams, lakes and estuaries.
Credit Hours: 3
Prerequisites: CV_ENG 7230

CV_ENG 8208: Finite Element Methods
(same as MAE 8280). The concepts and fundamentals of the finite element method with applications to problems in solid and fluid mechanics.
Credit Hours: 3
Prerequisites: MAE 4280

CV_ENG 8210: Groundwater Pollution Evaluation and Modeling
Fundamentals of groundwater hydraulics and groundwater contamination. Use and development of computer models to simulate flow and pollutant transport.
Credit Hours: 3
Prerequisites: CV_ENG 3700, MATH 4100, or instructor’s consent

CV_ENG 8215: Environmental Transport Phenomena
Fundamental processes that control the transport of constituents substances in fluids, and the implications of these processes for a variety of important applications in natural and engineered systems.
Credit Hours: 3

CV_ENG 8220: Advanced Hazardous Waste Treatment Processes
Course includes some introductory materials about hazardous waste regulations followed by advanced treatment methods such as air stripping, soil-vapor extraction, chemical oxidation, membrane processes, in-situ and ex-situ biotreatment methods, solidification and thermal processes.
Credit Hours: 3
Prerequisites: CV_ENG 4220

CV_ENG 8225: Aquatic Chemistry
Principles of chemical thermodynamics and equilibrium applied to processes in natural water and wastewater treatment systems. Emphasis on quantitative analyses of acid/base, complexation/dissociation, precipitation/dissolution, and reduction/oxidation reactions. Graded on A-F basis only.
Credit Hours: 3

CV_ENG 8230: Unit Process Laboratory
Studies chemical and physical relationships as applied to unit processes of water and wastewater.
Credit Hours: 3

CV_ENG 8240: Physiochemical Treatment Processes
Fundamental principles, analysis and modeling of physical and chemical processes for water and wastewater treatment.
Credit Hours: 3

CV_ENG 8250: Biochemical Treatment Processes
Biochemical principles, kinetic models and energy considerations in the design of biological wastewater treatment processes.
Credit Hours: 3

CV_ENG 8260: Environmental Biotechnology
Major biochemical reactions relevant to environmental engineering. Theory and application of fundamental principles of attached and suspended microbial growth and process engineering for sanitary engineering and biodegradation.
Credit Hours: 3
Prerequisites: CV_ENG 8250 or instructor’s consent

CV_ENG 8270: Design of Water and Wastewater Treatment Facilities
Development of design criteria and their application to the design of water and wastewater treatment facilities.
Credit Hours: 3

CV_ENG 8280: Engineering Aspects of Water Quality
Theoretical aspects of biological, chemical, physical processes; applications in water, wastewater, industrial-waste treatment processes, natural water systems; chemical equilibria, flow models; reaction kinetics on process design, pollutants.
Credit Hours: 3
Prerequisites: CV_ENG 4230 or instructor’s consent

CV_ENG 8287: Seminar in Environmental Engineering
Review of research in progress in the area of environmental engineering.
Credit Hour: 1

CV_ENG 8290: Environmental Practicum
Application of advanced analysis and design techniques to practical problems in environmental engineering. Collaborative group investigations that may include experimental and computer-aided studies. No more than 6 practicum hours may be applied toward the MS degree. Graded on A-F basis only.
**Credit Hour:** 2-4  
**Prerequisites:** graduate standing in Civil Engineering

**CV_ENG 8303: Behavior of Reinforced Concrete Members**  
**Credit Hours:** 3  
**Prerequisites:** CV_ENG 8310, CV_ENG 8331

**CV_ENG 8311: Nondestructive Evaluation Engineering**  
This course will present the interaction of nondestructive evaluation (NDE) technologies and engineering decision-making. Theory and application NDE technologies will be presented in the context of the engineering analysis required to effectively utilize the technologies. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** CV_ENG 8310, CV_ENG 8321

**CV_ENG 8312: Advanced Structural Analysis**  
**Credit Hours:** 3

**CV_ENG 8313: Random Vibration**  
Analysis of random vibrations including topics in stationary, ergodic and nonstationary random processes, with application to single-degree of freedom, discrete and continuous mechanical systems.  
**Credit Hours:** 3  
**Prerequisites:** CV_ENG 8314

**CV_ENG 8314: Numerical Methods in Engineering**  
Classification and numerical solution of engineering problems--ordinary and partial differential equations, algebraic equations. Includes initial, boundary, eigen- and characteristic-value problems. Prerequisites: MATH 4100  
**Credit Hours:** 3

**CV_ENG 8320: Continuum Mechanics**  
(same as MAE 8320). Introductory course in the mechanics of continuous media. Basic concepts of stress, strain, constitutive relationships; conservation laws are treated using Cartesian tensor notation. Examples from both solid and fluid mechanics investigated.  
**Credit Hours:** 3  
**Prerequisites:** CV_ENG 3700, MATH 7100, ENGINR 2200

**CV_ENG 8322: Structural Analysis**  
**Credit Hours:** 3

**CV_ENG 8330: Theory of Elasticity**  
**Credit Hours:** 3

**CV_ENG 8332: Design of Special Structures Systems**  
Reviews current trends in design of structural systems and components. Critical evaluation of recent code modifications. Application to design of light gauge metal structures, lateral bracing systems, curved beams and panel systems.  
**Credit Hours:** 3  
**Prerequisites:** CV_ENG 8310 or CV_ENG 8331

**CV_ENG 8340: Theory of Plates and Shells**  
**Credit Hours:** 3

**CV_ENG 8342: Space Mechanics**  
Rigid body dynamics analysis of satellites, space vehicles. Trajectories, time of flight optimization.  
**Credit Hours:** 3  
**Prerequisites:** MAE 3600 or equivalent, and MATH 4100

**CV_ENG 8350: Theory of Elastic Stability**  
**Credit Hours:** 3

**CV_ENG 8360: Theory of Plasticity**  
**Credit Hours:** 3  
**Prerequisites:** CV_ENG 8330 or instructor’s consent

**CV_ENG 8372: Reinforced Concrete Theory and Design**  
Advanced design of reinforced concrete structures; review of standard codes and specifications and their influence.  
**Credit Hours:** 3  
**Prerequisites:** CV_ENG 4350 or equivalent

**CV_ENG 8380: Nonlinear Mechanical Analysis**  
Analysis of behavior of nonlinear mechanical systems. Nonlinear phenomena of importance in mechanical design.  
**Credit Hours:** 3  
**Prerequisites:** MAE 3600 or equivalent and MATH 4100
CV_ENG 8382: Dynamical Theory
Engineering principles and application in mathematical expression of energy, force, inertia system.
Credit Hours: 3
Prerequisites: MAE 3600 or equivalent and MATH 4100

CV_ENG 8387: Seminar in Structural Engineering
Review of research in progress in the area of structural engineering.
Credit Hour: 1

CV_ENG 8389: Advanced Topics Structural Analysis
Credit Hours: 3
Prerequisites: CV_ENG 4350

CV_ENG 8390: Advanced Topics Structural Analysis
Credit Hours: 3
Prerequisites: MAE 2600 and MATH 4100 or MATH 7100

CV_ENG 8392: Dynamics of Structures
(same as MAE 8392). Study of the dynamic behavior of structures. Analysis of equivalent lumped parameter systems for the design of structures in a dynamic environment.
Credit Hours: 3
Prerequisites: MAE 2600 and MATH 4100 or MATH 7100

CV_ENG 8402: Advanced Shear Strength of Soils
Theoretical soil mechanics as applied to solution of specific engineering problems.
Credit Hours: 3

CV_ENG 8403: Consolidation and Settlement
Settlement of soil. Theory of Consolidation, consolidation testing, settlements of earth fills and embankments, stress distribution in soils, elastic settlement, bearing capacity of shallow foundations, shallow foundations design.
Credit Hours: 3
Prerequisites: CV_ENG 3400

CV_ENG 8404: Seepage in Soils
General principles that govern flow of water through soils and specific procedures for analysis and design of filtration and drainage media in geotechnical and geoenvironmental applications.
Credit Hours: 3
Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8406: Unsaturated Soil Mechanics
Fundamental principles governing the strength, deformation, and fluid flow behavior of multiphase porous media. Includes specific procedures for analyzing, measuring and modeling strength, hydraulic conductivity, and suction characteristics of unsaturated soil.
Credit Hours: 3
Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8407: Soil Behavior
Detailed study of composition, fabric, and geotechnical and hydrologic properties of soils that consist partly or wholly of clay. Emphasizes physico-chemical factors governing volume change and shear strength. Expansive clay behavior is examined in detail.
Credit Hours: 3
Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8408: Soil Dynamics
Cover topics relating to the response of soils to dynamic loading. Topics to be covered include: lab and field methods, cyclic soil models, foundation vibrations, and wave propagation through soil. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CV_ENG 3400 and instructor's consent

CV_ENG 8410: Advanced Foundation Engineering
Foundation design beyond simple spread footings, special footings and beams on an elastic foundations, mat foundations, pile foundations - static capacity, lateral loads, buckling, dynamic analysis load tests, pile groups, drilled piers.
Credit Hours: 3
Prerequisites: CV_ENG 4410

CV_ENG 8412: Stability and Performance of Earth Slopes
Principles, mechanics and procedures for analyzing the stability of earth slopes and landfills under short-term, long-term, rapid drawdown, and earthquake conditions.
Credit Hours: 3
Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8413: Design and Analysis of Earth Retaining Structures
General principals and specific procedures for analysis and design of earth retention systems including consideration of soil-structure interaction.
Credit Hours: 3
Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8420: Advanced Geotechnics
Advanced study of specific geotechnical engineering topics. Topics may include: Environmental Geotechnics, Landfill Design, Geosynthetics, Laboratory Testing, and Case History. May be repeated for credit when topics vary.
Credit Hours: 3
Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8487: Seminar in Geotechnical Engineering
Review of research in progress in the area of geotechnical engineering.
Credit Hour: 1

CV_ENG 8510: Construction Engineering
Selection and layout of construction plant. Design and construction of formwork, falsework, cofferdams, conveyors and other temporary structures used by contractors.
CV_ENG 8520: Construction Productivity
Work improvement techniques in the construction industry reviewed and applied to local construction site. Construction safety influenced by supervisors and managers studied in detail. Declining productivity in the construction industry evaluated and solutions considered.

Credit Hours: 3  
Prerequisites: CV_ENG 4510 or equivalent

CV_ENG 8530: Construction Project Management

Credit Hours: 3

Prerequisites: CV_ENG 4500

CV_ENG 8540: Construction Administration
Organization, management, engineering, business, and legal problems in the construction industry. Purchasing, bonding, insurance, financing, labor relations, and contract administration.

Credit Hours: 3

Prerequisites: CV_ENG 4500

CV_ENG 8610: Materials and Measurement
About 25% of the course is devoted to the physical measurement of strain, force, displacement and motion. Remainder of course is devoted to advanced study of the behavior of steel and concrete with emphasis on brittle fracture in steel.

Credit Hours: 3

Prerequisites: CV_ENG 3600 or equivalent

CV_ENG 8620: Advanced Dynamics
(same as MAE 8620). Fundamental principles of advanced rigid body dynamics with applications. Special mathematical techniques including Lagrangian and Hamiltonian methods.

Credit Hours: 3

Prerequisites: CV_ENG 2080 and MATH 4100

CV_ENG 8630: Vibrations of Distributed Parameter Systems
(same as MAE 8630). Vibration analysis of strings, cables, bars, rods, shafts, beams, membranes, plates, circular rings, frames; free and forced oscillation; miscellaneous loading; various boundary conditions; effect of damping; energy methods; method of difference equations.

Credit Hours: 3

Prerequisites: CV_ENG 4660

CV_ENG 8710: Advanced Hydraulic Engineering
Unsteady flow in pipes and open channels is studied using the method of characteristics and finite difference equations. Hydraulic transient in pipe networks due to valve adjustments, pump startup and pump power failure are analyzed. Control of transient using surge tanks and air chambers is included.

Credit Hours: 3  
Prerequisites: CV_ENG 4610 or equivalent

CV_ENG 8720: Hydrotechnical Practicum
Application of advanced analysis and design techniques to practical problems in hydrotechnical engineering. Collaborative group investigations that may include experimental and computer aided studies. No more than 6 practicum hours may be applied toward the MS degree. Graded on A-F basis only.

Credit Hours: 2-4

Prerequisites: graduate standing in Civil Engineering

CV_ENG 8730: Fundamentals of Fluid Mechanics
Treatment of fundamental concepts and theories in fluid mechanics at a level suitable for beginning graduate students.

Credit Hours: 3

Prerequisites: CV_ENG 3700

CV_ENG 8740: Hydrodynamics
Special topics in potential theory and conformal mapping.

Credit Hours: 3

CV_ENG 8750: Wind Engineering
Study of wind effects on the safety of engineering structures, air pollution and building energy consumption, and the use of wind.

Credit Hours: 3

Prerequisites: CV_ENG 3700

CL_HUM 1050: Greek and Latin in English
A survey of the influence of Greek and Latin upon English literary, scientific, technical, legal and medical vocabulary. Emphasis is upon building competency with complex English words while studying the cultural influence of the classical languages on modern vocabulary.

Credit Hours: 2-4

Prerequisites: graduate standing in Civil Engineering
CL_HUM 1060: Classical Mythology
Myths of Greece and Rome in literature and art.
Credit Hours: 3

CL_HUM 1060H: Classical Mythology - Honors
Myths of Greece and Rome in literature and art.
Credit Hours: 3
Prerequisites: Honors eligibility required

CL_HUM 2005: Topics in Classical Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-99

CL_HUM 2100: Greek Culture
Survey of Greek life and thought. Principal developments in literature, the arts, politics, religion and philosophy, and their influence on Western civilization.
Credit Hours: 3

CL_HUM 2100H: Greek Culture - Honors
Survey of Greek life and thought. Principal developments in literature, the arts, politics, religion and philosophy, and their influence on Western civilization.
Credit Hours: 3
Prerequisites: Honors eligibility required

CL_HUM 2200: Roman Culture
Survey of Roman life and thought. Principal developments in literature, the arts, politics, religion, philosophy, and private life, and their influence on Western Civilization.
Credit Hours: 3

CL_HUM 2300: Greek Classics in Translation
Reading in translation and critical study of the most important literary works of the ancient Greek World.
Credit Hours: 3

CL_HUM 2300H: Greek Classics in Translation
Reading in translation and critical study of the most important literary works of the ancient Greek world.
Credit Hours: 3
Prerequisites: Honors eligibility required

CL_HUM 2400: Roman Classics in Translation
Reading in translation and critical study of the most important literary works of the ancient Roman world.
Credit Hours: 3

CL_HUM 2940: Service Learning in Classical Studies
Students provide enrichment programming on the Ancient World at various Columbia Public School sites. Participants must be Classical Studies majors or minors. Graded on A/F basis only. Does not meet Arts and Science general education requirements.
Credit Hour: 1
Prerequisites: instructor’s consent required

CL_HUM 3000: Foreigners and Dangerous Women in Greek and Latin Literature
(same as PEA_ST 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.
Credit Hours: 3

CL_HUM 3000H: Foreigners and Dangerous Women in Greek and Latin Literature - Honors
(same as PEA_ST 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.
Credit Hours: 3
Prerequisites: Honors eligibility required

CL_HUM 3005: Topics in Classical Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-99
Prerequisites: CL_HUM 1060, any CL_HUM 2000 course, or instructor’s consent

CL_HUM 3005H: Topics in Classical Humanities - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-99
Prerequisites: CL_HUM 1060, any CL_HUM 2000 course, or instructor’s consent. Honors eligibility required

CL_HUM 3050: Philosophy Before Socrates
A study of the origin of philosophical thinking in the Ancient Greek world. Topics to be explored include the nature of reality and our knowledge of it, the structure and constituents of the cosmos, human excellence and its relation to morality, political power, and happiness.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course or instructor’s consent

CL_HUM 3050H: Philosophy Before Socrates - Honors
A study of the origin of philosophical thinking in the Ancient Greek world. Topics to be explored include the nature of reality and our knowledge of it, the structure and constituents of the cosmos, human excellence and its relation to morality, political power, and happiness.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course or instructor’s consent. Honors eligibility required
CL_HUM 3100: The Age of Pericles
A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course, or instructor’s consent

CL_HUM 3100H: The Age of Pericles - Honors
A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course, or instructor’s consent. Honors eligibility required

CL_HUM 3150: The Age of Augustus
Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course, or instructor’s consent

CL_HUM 3150H: The Age of Augustus - Honors
Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course, or instructor’s consent. Honors eligibility required

CL_HUM 3200: Power and Oratory in Ancient Greece
Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course

CL_HUM 3200H: Power and Oratory in Ancient Greece - Honors
Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course.
Honors eligibility required

CL_HUM 3225: Roman Comedy, Wit and Humor
Study of works illustrating the comedy, wit and humor of the Romans: readings in comedies of Plautus and Terence, Catullus, Ovid’s Metamorphoses, Petronius’ Satyricon, Martial, Juvenal and Macrobius.

Credit Hours: 3
Prerequisites: CL_HUM 1060, any Classical Humanities 2000 level course or instructor’s consent

CL_HUM 3250: Greek and Roman Epic
A study of the major representatives of the ancient epic genre. Readings will include Homer’s Iliad and Odyssey, Apollonius’ Argonautica, Vergil’s Aeneid.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent

CL_HUM 3250H: Greek and Roman Epic - Honors
A study of the major representatives of the ancient epic genre. Readings will include Homer’s Iliad and Odyssey, Apollonius’ Argonautica, Vergil’s Aeneid.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent. Honors eligibility required

CL_HUM 3300: Greek Drama
Reading and interpretation of Greek tragedies and comedies in translation.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent

CL_HUM 3300H: Greek Drama - Honors
Reading and interpretation of Greek tragedies and comedies in translation.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent. Honors eligibility required

CL_HUM 3350: Advanced Mythology
Interpretation of selected classical myths and their influence on later literature and art.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent

CL_HUM 3350H: Advanced Mythology - Honors
Interpretation of selected classical myths and their influence on later literature and art.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent. Honors eligibility required

CL_HUM 3400: Murder and Mayhem: Images of Justice in Classical Antiquity
Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and courts, techniques of persuasion.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent
CL_HUM 3400H: Murder & Mayhem: Images of Justice in Classical Antiquity - Honors
Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and courts, techniques of persuasion.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3450: Greek and Roman Characters and Ideals
Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

CL_HUM 3450H: Greek and Roman Characters and Ideals - Honors
Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3550: War and Democracy in Late 5th c. BCE Athens
(same as PEA_ST 3550). Explores the discourse on war and peace in Athenian texts and art that survives from the last quarter of the 5th century B.C.E. This was a period of relentless warfare: the Athenians were fighting the Spartans, Sparta's allies, unaligned cities and several of their own subject states.
Credit Hours: 3
Prerequisites: any 2000 level Classical Humanities course

CL_HUM 3600: The Ancient Novel
Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

CL_HUM 3600H: The Ancient Novel - Honors
Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3650: Paganism and Christianity
A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent

CL_HUM 3650H: Paganism and Christianity - Honors
A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3700: Women in the Ancient World
Using classical literary texts as the central focus this course examines the role of women: the conflict inherent in their obligations and their identity in the context of these obligations.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

CL_HUM 3700H: Women in the Ancient World - Honors
Using classical literary texts as the central focus this course examines the role of women: the conflict inherent in their obligations and their identity in the context of these obligations.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3750: Classics in a Cross-Cultural Context
The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

CL_HUM 3750H: Classics in a Cross-Cultural Context - Honors
The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3775: The Ancient World on Film
(same as AR_H_A 3775 and FILM_S 3775). This course explores how classical antiquity has been represented in twentieth and twenty-first-century film, with particular emphasis on the ways in which ancient narratives and iconography have been appropriated by filmmakers to address contemporary cultural issues.
Credit Hours: 3
Prerequisites: Prior 2000 level coursework in Classical Humanities, Art History and Archaeology, or Film Studies. Instructor's consent required

CL_HUM 3800: Sports and Spectacles in Greco-Roman Antiquity
Investigates athletic display in ancient Greek and Roman culture, from its earliest representations in Greek literature to the massive spectacles of the Roman empire, with an emphasis on the intersections between sport and spectacle and other areas of ancient cultural life.
Credit Hours: 3
Prerequisites: CL_HUM 1060 and CL_HUM 2100 or CL_HUM 2200.

Instructor’s consent required

CL_HUM 4005: Topics in Classical Humanities

Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: Any Classical Humanities 2000 level course or instructor’s consent

CL_HUM 4100: Greece: From the Bronze Age to the Byzantine Empire

Study abroad in Greece, in conjunction with the MU International Center. Immersion in the physical and intellectual heritage of ancient Greece; emphasis on cross-disciplinary, on-site learning and the intersections among ancient, Byzantine, and modern Greece. Application required. Graded on A/F basis only.

Credit Hours: 6

Prerequisites: Any 2000 level or higher course in the Department of Classical Studies (courses on similar subjects in other departments accepted as equivalent); 2.75 overall GPA, Instructor’s Consent, and Application through MU International Center required. Participants chosen by instructor.

CL_HUM 4100H: Greece: From the Bronze Age to the Byzantine Empire - Honors

Study abroad in Greece, in conjunction with the MU International Center. Immersion in the physical and intellectual heritage of ancient Greece; emphasis on cross-disciplinary, on-site learning and the intersections among ancient, Byzantine, and modern Greece. Participants chosen by instructor. Graded on A/F basis only. Application required.

Credit Hours: 6

Prerequisites: Any 2000 level or higher course in the Department of Classical Studies (courses on similar subjects in other departments accepted as equivalent); 2.75 overall GPA, Instructor’s Consent, and Application through MU International Center required. Honors eligibility required

CL_HUM 4500: Greek and Roman Religion

(same as REL_ST 4500). Survey of religious development among the Greeks and Romans.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or AR_H_A 1110 or HIST 1520; sophomore standing

CL_HUM 4500H: Greek and Roman Religion - Honors

(same as REL_ST 4500). Survey of religious development among the Greeks and Romans.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or AR_H_A 1110 or HIST 1520; sophomore standing. Honors eligibility required

CL_HUM 4550: Literature and Culture of the Hellenistic Age

A survey of the literature and culture of the Hellenistic Age.

Credit Hours: 3

Prerequisites: any Classical Humanities 2000 level course, or instructor’s consent

CL_HUM 4550H: Literature and Culture of the Hellenistic Age - Honors

A survey of the literature and culture of the Hellenistic Age.

Credit Hours: 3

Prerequisites: any Classical Humanities 2000 level course, or instructor’s consent. Honors eligibility required

CL_HUM 4600: The Classical Tradition

Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times.

Credit Hours: 3

Prerequisites: any Classical Humanities 2000 level course or instructor’s consent

CL_HUM 4600H: The Classical Tradition - Honors

Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times.

Credit Hours: 3

Prerequisites: any Classical Humanities 2000 level course or instructor’s consent. Honors eligibility required

CL_HUM 4650: The World of Late Antiquity

A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity’s development and the transformation of the classical heritage.

Credit Hours: 3

Prerequisites: any Classical Humanities 2000 level or instructor’s consent

CL_HUM 4650H: The World of Late Antiquity - Honors

A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity’s development and the transformation of the classical heritage.

Credit Hours: 3

Prerequisites: any Classical Humanities 2000 level or instructor’s consent. Honors eligibility required

CL_HUM 4770: Oral Tradition

(same as ENGLSH 4770). Study of verbal art from living oral traditions (e.g. Native American and African American) and important literary works with roots in oral tradition (e.g. the Bible, the Iliad and Odyssey, and Beowulf).

Credit Hours: 3

Prerequisites: junior standing and instructor’s consent

CL_HUM 4770H: Oral Tradition - Honors

(same as ENGLSH 4770). Study of verbal art from living oral traditions (e.g. Native American and African American) and important literary works with roots in oral tradition (e.g. the Bible, the Iliad and Odyssey, and Beowulf).

Credit Hours: 3
Prerequisites: junior standing and instructor’s consent. Honors eligibility required

CL_HUM 4970: Capstone in Classical Humanities
Culminating course in the study of Greek and Roman literature and Classical Culture. Required for Classical Humanities majors in first term of senior year.
Credit Hours: 3
Prerequisites: instructor’s consent
Recommended: for Classical Humanities double-majors

CL_HUM 4970H: Capstone in Classical Humanities- Honors
Culminating course in the study of Greek and Roman literature and Classical Culture. Required for Classical Humanities majors in first term of senior year.
Credit Hours: 3
Prerequisites: instructor’s consent; Honors eligibility required
Recommended: for Classical Humanities double-majors

CL_HUM 7005: Topics in Classical Humanities
Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-99
Prerequisites: any Classical Humanities 3000 level course or instructor’s consent

CL_HUM 7550: Literature and Culture of the Hellenistic Age
A survey of the literature and culture of the Hellenistic Age. Graded on A-F basis only.
Credit Hours: 3

CL_HUM 7650: The World of Late Antiquity
A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity’s development and the transformation of the classical heritage.
Credit Hours: 3

Classics (CLASS)

CLASS 4100: History of the Greek and Latin Languages
(same as LINGST 4130). Evolution of classical languages and their relationship to each other.
Credit Hours: 3

CLASS 4205: Topics in Classical Studies
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.
Credit Hour: 1-99

CLASS 4300: Introduction to Text Criticism and Paleography
Latin and/or Greek textual criticism and paleography, using manuscript facsimiles at the University library.
Credit Hours: 3
Prerequisites: 2 years of Greek or Latin or equivalent

CLASS 4400: Ancient Pastoral
Reading and interpretation of pastoral poetry and prose in Greek and Latin; emphasis on Theocritus, Virgil, and Longus.
Credit Hours: 3
Prerequisites: 2 years each of Greek and Latin

CLASS 4700: Advanced Study in the Teaching of the Classics
Credit Hours: 3
Prerequisites: classroom teaching experience or chairman’s consent

CLASS 4960: Special Readings in Classical Studies
Readings in authors and texts not covered in other courses.
Credit Hour: 1-3
Prerequisites: departmental consent

CLASS 4970: Capstone in Classical Languages
Culminating course in the study of Greek and Roman literature and Classical culture. Required for Greek, Latin, and Classical Languages majors in first term of senior year.
Credit Hours: 3
Prerequisites: 2 years classical Greek, or Latin, or equivalent; junior standing; departmental consent
Recommended: for double-majors

CLASS 4970H: Capstone in Classical Languages
Culminating course in the study of Greek and Roman literature and Classical culture. Required for Greek, Latin, and Classical Languages majors in first term of senior year. Recommended for double-majors.
Credit Hours: 3
Prerequisites: 2 years classical Greek, or Latin, or equivalent; junior standing; departmental consent. Honors eligibility required

CLASS 4995H: Honors Proseminar in Classical Studies
Limited to Honors undergraduates. To be taken in senior year. Integrated exploration of classical civilization. May repeat to 6 hours maximum.
Credit Hour: 3-6
Prerequisites: limited to Honors undergraduates, to be taken in senior year. Honors eligibility required

CLASS 7000: Introduction to Graduate Study in Classics
Required of all first-year graduate students.
Credit Hour: 1

CLASS 7100: History of the Greek and Latin Languages
(same as LINGST 7130). Evolution of classical languages and their relationship to each other.
Credit Hours: 3

CLASS 7205: Topics in Classical Studies
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.
Credit Hour: 1-99
CLASS 7300: Introduction to Text Criticism and Paleography
Latin and/or Greek textual criticism and paleography, using manuscript facsimiles at the University library.

Credit Hours: 3
Prerequisites: 2 years of Classical Languages or equivalent

CLASS 7400: Ancient Pastoral
Reading and interpretation of pastoral poetry and prose in Greek and Latin; emphasis on Theocritus, Virgil, and Longus.

Credit Hours: 3
Prerequisites: 2 years each of Greek and Latin

CLASS 7700: Advanced Study in the Teaching of the Classics

Credit Hours: 3
Prerequisites: classroom teaching experience or chairman's consent

CLASS 7960: Special Readings in Classical Studies
Readings in authors and texts not covered in other courses.

Credit Hour: 1-3
Prerequisites: graduate standing and classics/classical humanities; departmental consent; Greek--two years classical Greek or equivalent; Latin--two years Classical Latin or equivalent

CLASS 8085: Directed Readings in Classics
For graduate students to undertake special projects for graduate credit under the supervision of faculty.

Credit Hours: 3

CLASS 8090: Masters Research and Thesis in Classics
For graduate students studying for the MA and working on a thesis to receive credit for work directly related to the thesis. Graded S/U only.

Credit Hours: 3

CLASS 8440: Ancient/Medieval Topography
(same as AR_H_A 8440). Descriptive and historical analysis of selected city or site. Subject varies.

Credit Hour: 1-99
Prerequisites: instructor's consent

CLASS 9090: PhD Research and Thesis
Individual research in preparation for writing thesis and/or dissertation. Graded on a S/U basis only.

Credit Hour: 1-8

CLASS 9187: Seminar in Classical Mythology
Intensive study of classical mythology in origin, development, meaning and influence.

Credit Hours: 3
Prerequisites: instructor's consent

CLASS 9287: Seminar in the Hellenistic Age
Seminar in the Hellenistic Age

CLASS 9387: Seminar in Ancient Rhetoric and Oratory
Seminar in Ancient Rhetoric and Oratory

Credit Hours: 3

CLASS 9487: Seminar in Ancient Literary Criticism
Principles and theories of ancient Greek and Latin literary criticism, as developed in significant works on the subject.

Credit Hours: 3

CLASS 9587: Greco-Roman Didactic
Critical and comparative study of Greek and Latin didactic poetry with emphasis on major authors from Hesiod through the Augustan Age.

Credit Hour: 3-6

CLASS 9687: Seminar in Greco-Roman Religion
Seminar in Greco-Roman Religion

Credit Hours: 3

CLASS 9787: Seminar in Greco-Roman Satire and Social Criticism
Seminar in Greco-Roman Satire and Social Criticism

Credit Hours: 3

CLASS 9887: Seminar in the Age of the Antonines
Seminar in the Age of the Antonines

Credit Hour: 3-6

Clinical Laboratory Sciences (CL_L_S)

CLASS 1000: Orientation to Clinical Laboratory Science
The class is designed to give prospective Clinical Laboratory Science students clinical experience in the field of Clinical Laboratory Science. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: HLTH_SCI 1000

CLASS 4412: Clinical Laboratory Science Theory, Application and Correlation
Application, evaluation and correlation of laboratory procedures used in the diagnosis and treatment of common disease states. Opportunities for building critical thinking, problem solving, and leadership skills are provided in small group clinical case discussions. Course may be repeated for credit. Graded on A-F basis only.

Credit Hours: 5
Prerequisites: departmental consent, accepted into the Medical Technology Program

CL_L_S 4980: Clinical Lab Management II
Continuation of Clinical Lab Management I. Theory, practical application, and evaluation of laboratory management principles and associated models in compliance and regulatory issues, human resource management, method evaluation, professionalism and laboratory quality. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CL_L_S 4970 or departmental consent; accepted into the Medical Technology Program

Communication (COMMUN)

COMMUN 1200: Public Speaking
Principles, process of speech communication in small group and public speaking situations.

Credit Hours: 3

COMMUN 1200H: Public Speaking - Honors
Principles, process of speech communication in small group and public speaking situations.

Credit Hours: 3
Prerequisites: Honors eligibility required

COMMUN 2100: Media Communication in Society
An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society.

Credit Hours: 3
Prerequisites: freshman, sophomore or junior standing only

COMMUN 2100H: Media Communication in Society - Honors
An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society.

Credit Hours: 3
Prerequisites: freshman, sophomore or junior standing only. Honors eligibility required

COMMUN 2200: Video Workshop: Mizzou Network
A hands-on workshop; students will participate in all phases of video production (camera operations, directing, graphics, video replay, and live audio production and digital editing) in a variety of live sports Projects. There is no requirement of previous production experience or course work. Course may be repeated an additional two times for credit. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: restricted to Communication majors

COMMUN 2315: Basic Audio Production and Performance
Radio speaking in varied types of programs, console operations, tape editing, microphone techniques.

Credit Hours: 3
Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2701: Topics in Communication - General
Topics in Communication - General.

Credit Hours: 3
Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2703: Topics in Communication - Behavioral Science
Topics in Communication - Behavioral Science.

Credit Hours: 3
Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2705: Topics in Communication - Humanities/Fine Arts
Topics in Communication - Humanities/Fine Arts.

Credit Hours: 3
Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 3050: Survey of Communication Studies
A survey of four main areas of the field communication, interpersonal, organizational, political, and mass communication.

Credit Hours: 3
Prerequisites: May be restricted to Communications majors through early registration

COMMUN 3310: Message Design and Writing for the Media
Styles and functions of various script formats for radio, television productions.

Credit Hours: 3
Prerequisites: COMMUN 2100. May be restricted to Communication majors only during early registration

COMMUN 3315: Advanced Audio Production
The study and application of techniques applicable to radio, television, and multimedia production with an emphasis on digital audio workstation systems.

Credit Hours: 3
Prerequisites: COMMUN 2315. May be restricted to Communication majors only during early registration

COMMUN 3390: Digital Production I
Focus on building familiarity with video cameras, microphones, lighting, editing as well as the fundamentals of visual composition, (framing, camera angles, story boards, and ways to visualize information) and processes and procedures for producing and directing.

Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3395: Digital Production II
Focus on advanced production work; more elaborate projects including digital shorts, music videos, and short documentaries; advanced editing, storyboards, and emphasis on developing narrative structure.

Credit Hours: 3
Prerequisites: COMMUN 3390 or instructor’s consent. May be restricted to Communication majors only during early registration

COMMUN 3422: Communication Research Methods
Focuses on writing and administering surveys, conducting field research, and designing experimental studies.

Credit Hours: 3
Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3441: Nonverbal Communication
Analysis of form and content of nonverbal communication. Emphasis on role of nonverbal cues in interpersonal communication.

Credit Hours: 3
Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3461: Relational Communication
Analysis of communication influences on relational identities and development.

Credit Hours: 3
Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3470: Performance of Literature
(same as ENGLISH 3570 and THEATR 3200). Analysis and oral interpretation of literary works. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: sophomore standing

COMMUN 3471: Group Decision Making Processes
(same as PEA_ST 3521). Procedures and techniques for interpersonal communication and decision making in small groups.

Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3525: Conflict and Communication
Theory and analysis of communication in conflict situations across a variety of contexts.

Credit Hours: 3
Prerequisites: sophomore standing required. May be restricted to Communication majors only during early registration

COMMUN 3570: Performance of Literature
(same as ENGLISH 3570 and THEATR 3200). Analysis and oral interpretation of literary works. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: sophomore standing

COMMUN 3571: Group Decision Making Processes
(same as PEA_ST 3521). Procedures and techniques for interpersonal communication and decision making in small groups.

Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3575: Business and Professional Communication
Principles and practice of speech communication in business and professional settings. Emphasis on interviews, group conferences and personal presentations.

Credit Hours: 3
Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3576: Contemporary Issues in Mass Communication
Introduction to current issues and trends and relationship among the new technologies, policies, and potential impact on society.

Credit Hours: 3
Prerequisites: sophomore standing and COMMUN 2100. May be restricted to Communication majors only during early registration

COMMUN 3577: Crisis Communication
The theory and practice of corporate and political communication responses to crisis situations.

Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3580: Crisis Communication
The theory and practice of corporate and political communication responses to crisis situations.

Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3636: Contemporary Issues in Mass Communication
Survey of the theories of mass communication.

Credit Hours: 3
Prerequisites: COMMUN 2100 or senior standing. May be restricted to Communication majors only during early registration

COMMUN 3525: Conflict and Communication
Theory and analysis of communication in conflict situations across a variety of contexts.

Credit Hours: 3
Prerequisites: sophomore standing required. May be restricted to Communication majors only during early registration

COMMUN 3701: Topics in Communication-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

Credit Hours: 3
Prerequisites: COMMUN 1200, COMMUN 2100, May be restricted to Communication majors only during early registration

COMMUN 3703: Topics in Communication-Behavioral Sciences
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.
Credit Hours: 1-99
Prerequisites: junior standing and instructor’s consent, May be restricted to Communication majors only during early registration

COMMUN 3705: Topics in Communication-Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.
Credit Hours: 1-99
Prerequisites: junior standing and instructor’s consent. May be restricted to Communications majors only during early registration

COMMUN 3705H: Topics in Communication-Humanities - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.
Credit Hours: 1-99
Prerequisites: junior standing and instructor’s consent, departmental consent for repetition. May be restricted to Communications majors only during early registration

COMMUN 4395: Professional Seminar in Television Production
Application of principles to advanced television production, direction.
Credit Hours: 3
Prerequisites: COMMUN 3390 and instructor’s consent. May be restricted to Communication majors only during early registration

COMMUN 4412: Gender, Language, and Communication
(same as LINGST 4412 and ANTHRO 4412). Relationship among gender, language, nonverbal communication, and culture.
Credit Hours: 3
Prerequisites: junior standing or departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4415: Language and Discourse
(same as LINGST 4415). Analysis of the rules of social interaction and the functions of language in discourse.
Credit Hours: 3
Prerequisites: junior standing or departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4440: Ethical Issues in Communication
(same as PEA_ST 4440). Exploration and analysis of ethical dimensions intrinsic to human communication.
Credit Hours: 3
Prerequisites: junior standing or departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4473: Political Communication
Study of role and impact of communication in political campaigns; historical and contemporary study of influence by communication; case studies and practicum.
Credit Hours: 3
Prerequisites: junior standing or departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4474: Theory and Research in Persuasion
Studies the persuasive process, attitude formation, modification.
Credit Hours: 3
Prerequisites: junior standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 4476: Organizational Communication
Theories of communication systems and processes in organizational structures; study of communication behavior in formal and informal organizational settings.
Credit Hours: 3
Prerequisites: junior standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 4481: Principles of Rhetoric
Development of rhetoric from time of Corax with emphasis on Aristotle; derivation, application of standards for judging effectiveness in communication.
Credit Hours: 3
Prerequisites: COMMUN 1200, junior standing and departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4520: Family Communication
(same as H_D_FS 4680). Analysis of the functions and processes of communication within families.
Credit Hours: 3
Prerequisites: COMMUN 1200, junior standing and departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4530: Health Communication
A general overview of the impact of communication on health, including doctor/patient communication and health campaigns. Graded on A-F basis only.
Credit Hours: 3

COMMUN 4618: Television Program Analysis and Criticism
Development of critical viewing skills including analysis of program conventions, genres, and television aesthetics.
Credit Hours: 3
Prerequisites: junior standing. May be restricted to Communication Majors only during early registration

COMMUN 4628: Children, Adolescents and the Media
Focus on social scientific research concerning the mass media in the lives of children and adolescents. The course centers on media effects
literature and controversies relevant to child and adolescent media users. Course involves readings, lectures, discussions of theories, concepts, methods, and finding. We will also consider social implication and personal choices in media use. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: junior standing required

COMMUN 4638: New Technologies and Communication
Explores the social implications of new technologies designed for communication. Assumes basic computer knowledge.

Credit Hours: 3
Prerequisites: junior standing or instructor's consent. May be restricted to Communication Majors only during early registration

COMMUN 4701: Topics in Communication-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

Credit Hour: 1-99
Prerequisites: junior standing and instructor's consent. May be restricted to Communication majors only during early registration

COMMUN 4703: Topics in Communication-Behavioral Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

Credit Hour: 1-99
Prerequisites: junior standing and instructor's consent. May be restricted to Communication majors only during early registration

COMMUN 4705: Topics in Communication-Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

Credit Hour: 1-99
Prerequisites: junior standing and instructor's consent. May be restricted to Communication majors only during early registration

COMMUN 4940: Internship
Directed professional experience within and outside the University in communication-related fields or organizations. Graded on S/U basis only.

Credit Hour: 1-99
Prerequisites: Admission to department, junior standing, instructor's consent, 2.5 GPA

COMMUN 4950: Research Project
Student contributes to a research project with approved goals and a final written report. As part of the project, student will read articles in the communication research literature. Project can be independent or in conjunction with a faculty research project. Course may be repeated once for credit. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: COMMUN 3050; junior standing and instructor’s consent. Approval by a faculty member who will serve as project supervisor

COMMUN 4960: Directed Reading
Independent reading, reports.

Credit Hour: 1-99
Prerequisites: junior standing or instructor’s consent

COMMUN 4974: Senior Project
Integration and adaptation of communication theories to an applied communication problem. Required for all majors.

Credit Hours: 3
Prerequisites: admission to department, senior standing, and departmental consent

COMMUN 4975: Visual Literacy
Integration of theory and practice. The theoretical component of the class is grounded in the study of visual literacy and the practice component will focus on documentary filmmaking. May not be taken by graduate students. It is a capstone course for undergraduate students only.

Credit Hours: 3
Prerequisites: COMMUN 3390, senior standing; Admission to the department

COMMUN 4996H: Honors in Communication
Special work for Honors candidates in communication.

Credit Hour: 1-2
Prerequisites: instructor’s consent. Honors eligibility required

COMMUN 4997: Honors in Communication
Special work for Honors candidates in communication.

Credit Hours: 2

COMMUN 4997H: Honors in Communication
Special work for Honors candidates in communication.

Credit Hours: 1-2
Prerequisites: instructor’s consent. Honors eligibility required

COMMUN 7412: Gender, Language, and Communication
(same as LINGST 7412 and ANTHRO 7412). Relationship among gender, language, nonverbal communication, and culture.

Credit Hours: 3
Prerequisites: graduate standing or departmental consent
COMMUN 7473: Political Communication
Study of role and impact of communication in political campaigns; historical and contemporary study of influence by communication; case studies and practicum.
Credit Hours: 3
Prerequisites: graduate standing or departmental consent

COMMUN 7474: Theory and Research in Persuasion
Studies the persuasive process, attitude formation, modification.
Credit Hours: 3
Prerequisites: COMMUN 3576 and departmental consent

COMMUN 7476: Organizational Communication
Theories of communication systems and processes in organizational structures; study of communication behavior in formal and informal organizational settings.
Credit Hours: 3
Prerequisites: COMMUN 3571 or departmental consent

COMMUN 7481: Principles of Rhetoric
Development of rhetoric from time of Corax with emphasis on Aristotle; derivation, application of standards for judging effectiveness in communication.
Credit Hours: 3
Prerequisites: COMMUN 1200, and departmental consent

COMMUN 7520: Family Communication
(same as H_D_FS 7680). Analysis of the functions and processes of communication within families.
Credit Hours: 3

COMMUN 7530: Health Communication
A general overview of the impact of communication on health, including doctor/patient communication and health campaigns. Graded on A-F basis only.
Credit Hours: 3

COMMUN 7618: Television Program Analysis and Criticism
Development of critical viewing skills including analysis of program conventions, genres, and television aesthetics.
Credit Hours: 3
Prerequisites: instructor’s consent

COMMUN 7638: New Technologies and Communication
Explores the social implications of new technologies designed for communication. Assumes basic computer knowledge.
Credit Hours: 3

COMMUN 8001: Topics in Communication-General
Study of selected topics in Communication. Topic and credit may vary semester to semester. Repeatable upon consent of department.
Credit Hours: 3
Prerequisites: instructor’s consent

COMMUN 8085: Problems
Individual study not leading to thesis or dissertation.
Credit Hour: 1-99
Prerequisites: instructor’s consent

COMMUN 8090: Master’s Thesis Research in Communication
Research leading to thesis or dissertation. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor’s consent

COMMUN 8110: Introduction to Graduate Study in Communication
Orientation to the field. Introduction to research methods. Production of research proposal. Emphasizes scholarly style of writing.
Credit Hours: 3

COMMUN 8120: Seminar in Quantitative Methods in Communication
Quantitative methods of speech research.
Credit Hours: 3

COMMUN 8130: Topics in Qualitative Research Methods
Examination of assumptions and techniques of qualitative methods adopting an interpretive framework for analyzing communication phenomena. May be repeated for credit.
Credit Hours: 3

COMMUN 8140: Content Analysis
Methods of Content Analysis; including consideration of reliability, validity Computer content analysis, codebooks.
Credit Hours: 3

COMMUN 8150: Seminar in Television Criticism
Examination and application of various critical methodologies to television texts.
Credit Hours: 3

COMMUN 8160: Rhetorical Criticism
Principles, practice criticism (description, analysis, evaluation) of rhetorical artifacts.
Credit Hours: 3

COMMUN 8170: Seminar in Quantitative Methods in Communication II
The focus of this course will be the study and practice of various multivariate statistical methods commonly used in communication research. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: COMMUN 8120; instructor’s consent required
### COMMUN 8310: Seminar in Interpersonal Communication
Examines theory and research concerning face-to-face dyadic interactions. Emphasis on context of interpersonal communication events and processes of interactional management.

**Credit Hours:** 3

### COMMUN 8410: Seminar in Organizational Communication Theory
Exploration of the theoretical foundations of interpersonal communication in the organization, groups and team development, leadership, organizational decision making, motivation and power, bureaucracy, new information technologies, organizational effectiveness and the change process.

**Credit Hours:** 3

### COMMUN 8420: Seminar in Small Group Communication
Identifies and analyzes theories and variables which explain, predict, and/or influence small group communication.

**Credit Hours:** 3

### COMMUN 8510: Seminar in Mass Communication Theory
This course will offer graduate students a broad overview of extant theories employed in the study of mass communication and mass media effects. The class will focus on theories of society, theories of media, and the relationships between mass communication and culture. It will also focus on theories of media structures, media organizations, media content, audiences, and media effects.

**Credit Hours:** 3

### COMMUN 8610: Survey of Political Communication
Survey of theory and research on political communication; emphasis on messages and audience responses to messages.

**Credit Hours:** 3

### COMMUN 9050: Research
Completes comprehensive exams and writes a literature review.

**Credit Hour:** 1-9

### COMMUN 9090: Doctoral Dissertation Research in Communication
Research leading to thesis or dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

### COMMUN 9170: Research Practicum
Student conducts research under close supervision of faculty mentor. Goal: produce research report suitable for submission as convention paper, article, or book chapter. May be repeated once for credit.

**Credit Hours:** 3

**Prerequisites:** consent of mentor required; for advanced graduate students

### COMMUN 9250: Seminar in Communication Theory
Examines the nature of theory, the assumptions underlying theoretical approaches to communication, and surveys themes in contemporary communication theories.

**Credit Hour:** 1-6

**Prerequisites:** instructor's consent

### COMMUN 9310: Seminar in Family Communication
Examines research and theory of family communication; focus on family communication patterns and processes, emphasis on key conceptual, methodological and theoretical aspects of family communication scholarship and research on family forms, processes and outcomes. Graded on A-F basis only.

**Credit Hours:** 3

### COMMUN 9330: Topics in Interpersonal Communication
The course will review theory and research on topics related to the study of communication and interpersonal relationships. Subjects will rotate and include areas such as relational conflict, gender communication, nonverbal communication, intercultural communication, or interpersonal violence and communication.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

### COMMUN 9430: Topics in Organizational Communication
Examination of theory and research in selected areas of organizational communication. Topics vary by semester. Topics may include socialization, power, gender, emotions, and others. May be repeated for credit.

**Credit Hours:** 3

### COMMUN 9520: Seminar in Mass Media Effects
Explores current research in the processes and effects of mass communication. Readings pertain to the current social and psychological effects of media on viewers.

**Credit Hours:** 3

### COMMUN 9530: Topics in Mass Communication
Examination of theory and research in selected areas of media communication. Topics vary by semester. May be repeated for credit.

**Credit Hours:** 3

### COMMUN 9620: Political Campaign Debates
Theory and research on political campaign debates applied to analyses of candidate debates. Focus on primary and general presidential debates.

**Credit Hours:** 3

### COMMUN 9630: Political Advertising
Theory and research on political advertising applied to analyses of candidate advertisements. Focus on primary and general presidential television spots and web pages.

**Credit Hours:** 3

### COMMUN 9720: Seminar in Theories of Rhetoric and Criticism
Directed research on selected topics in rhetorical theory and criticism.

**Credit Hour:** 1-6

**Prerequisites:** instructor's consent

**C_S_D 1000: Introduction to Communication Science and Disorders**
Nature of communication and its development; types of speech, language and hearing disorders; professional preparation, settings, and work of speech-language pathologists and audiologists. Course graded on S/U basis only.

Credit Hour: 1

**C_S_D 1050: Signed English**
Introduction to the English-based sign system, Signed English, a system that has been developed to bridge the gap between English and American Sign Language. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Communication, Science and Disorder majors only during Early Registration

**C_S_D 1060: Human Language**
(same as ANTHRO 1060, LINGST 1060 and ENGLSH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data with some attention to application of linguistic study to other disciplines.

Credit Hours: 3

**C_S_D 1100: American Sign Language I**
Introduction to American Sign Language (ASL). Development of basic expressive and receptive skills in ASL, the manual alphabet, numbers, and signed vocabulary. Includes an overview of ASL syntax and grammar. Course graded on A-F basis only.

Credit Hours: 5

**C_S_D 1200: American Sign Language II**
This course is designed to increase students' understanding of American Sign Language. Students will increase their sign vocabulary, expressive and receptive skills, an understanding of ASL syntax and grammar. Graded on A-F basis only.

Credit Hours: 5
Prerequisites: Communication, C_S_D 1100 or equivalent

**C_S_D 2120: Survey of Communication Disorders**
Systematic survey of the disorders of speech, language and hearing.

Credit Hours: 3

**C_S_D 2150: American Sign Language III**
This course expands on vocabulary and signing skills developed in ASL II. Includes review of ASL grammar and extensive discussions of ASL linguistic structure and Deaf culture. Class is conducted entirely in ASL. Course graded on A-F basis only.

Credit Hours: 3
Prerequisites: C_S_D 1200 with minimum grade of C or instructor’s consent

**C_S_D 3010: American Phonetics**
(same as LINGST 3010). Analysis of production and acoustics of the sounds of speech with an emphasis on American English; practice in broad and narrow transcription using the International Phonetic Alphabet.

Credit Hours: 3

**C_S_D 3020: Normal Language Development**
(same as PSYCH 3810). Language development in children and changes in language processing during normal aging. Cognition and language; language learning processes; language sample analysis; relationship between spoken and written language.

Credit Hours: 3
Prerequisites: PSYCH 2410 or PSYCH 3140, or LINGST 4600

**C_S_D 3210: Anatomy and Physiology of the Speech Mechanism**
(same as LINGST 3210). Introduction to anatomical and functional aspects of the speech mechanism.

Credit Hours: 3
Prerequisites: Communication Science and Disorders majors only or instructor’s consent

**C_S_D 3220: Speech Acoustics**
(same as LINGST 3220). An introduction to the acoustic aspects of speech as they relate to the respiratory, phonatory, resonatory, and articulatory systems.

Credit Hours: 2
Prerequisites: Must be taken concurrently with C_S_D 3210; Communication Science and Disorders majors only or instructor’s consent

**C_S_D 3230: Hearing Science**
Introduction to the nature of sound and its measurement; anatomy and physiology of the auditory and vestibular systems; psychoacoustic methods and phenomena.

Credit Hours: 3

**C_S_D 4001: Topics in Communication Science and Disorders**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated with program consent.

Credit Hour: 1-99
Prerequisites: junior standing and instructor’s consent

**C_S_D 4020: Language Disorders in Children**
Overview of language disorders from early childhood through adolescence. Includes language disorders as primary disability and as secondary to other disabilities. Introduction to assessment and intervention.

Credit Hours: 3
Prerequisites: C_S_D 2120, C_S_D 3020, LINGST 4600.
Communication Science and Disorder majors only
C_S_D 4030: Language Disorders of Adults
Introduction to acquired adult language disorders. Review of neuroanatomy/physiology, etiology and symptomatology, with introduction to assessment and treatment procedures.

Credit Hours: 2
Prerequisites: C_S_D 2120, C_S_D 3020, C_S_D 4430, and LINGST 4600 or instructor's consent

C_S_D 4050: Clinical Applications of Sign Language
This course covers research, theory, and methods of using sign language to assist the communication of the Deaf, individuals with disabilities, and hearing learners. Use of sign language to improve literacy and classroom management will also be targeted. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C_S_D 1050 and C_S_D 1100 or equivalent. Instructor's consent required

C_S_D 4200: Professional Voice
Voice production, common voice problems and their causes; healthy vocal habits and techniques to achieve optimal voice. Communication Science and Disorders students may not take for graduate credit.

Credit Hours: 2

C_S_D 4210: Fluency Disorders

Credit Hours: 2
Prerequisites: C_S_D 2120, C_S_D 3210

C_S_D 4220: Voice Disorders
Introduction to voice disorders in children and adults. Includes overview of perceptual and instrumental assessment procedures and selected treatment approaches.

Credit Hour: 1
Prerequisites: C_S_D 2120, C_S_D 3010, C_S_D 3210, C_S_D 4430

C_S_D 4320: Disorders of Phonology and Articulation
Overview of disorders of use and production of speech sounds with an emphasis on developmental disorders. Introduction to assessment and treatment.

Credit Hours: 3
Prerequisites: C_S_D 2120, C_S_D 3010, C_S_D 3020, C_S_D 3210, C_S_D 4430

C_S_D 4330: Introduction to Audiology
Principles and techniques of audiological testing; etiologies of hearing impairment; current technologies in rehabilitation.

Credit Hours: 3
Prerequisites: C_S_D 3230; Communication Science and Disorders majors only

C_S_D 4330: Introduction to Audiology
Principles and techniques of audiological testing; etiologies of hearing impairment; current technologies in rehabilitation.

Credit Hours: 3
Prerequisites: C_S_D 3230; Communication Science and Disorders majors only or instructor's consent

C_S_D 4340: Aural Rehabilitation
Identification, evaluation, and management of problems associated with hearing impairment in both children and adults. Includes issues related to speech/language development, communication, education, and social factors.

Credit Hours: 2
Prerequisites: C_S_D 3230 and C_S_D 4330

C_S_D 4430: Neurophysiology for Speech, Language, and Hearing
Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.

Credit Hours: 3
Prerequisites: Communications Science and Disorders majors only or instructor's consent

C_S_D 4430: Neurophysiology for Speech, Language, and Hearing
Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.

Credit Hours: 3
Prerequisites: Communications Science and Disorders majors only or instructor's consent

C_S_D 4810: Psycholinguistics
(same as LINGST 4810). Examination of the knowledge and processes that underlie the human ability to produce and understand language.

Credit Hours: 3
Prerequisites: instructor's consent

C_S_D 4820: Speech Perception
(same as LINGST 4820). Selected topics in the perceptual processing of speech sounds and spoken language.

Credit Hours: 3
Prerequisites: instructor's consent

C_S_D 4830: Individual Differences in Language Processing
Examination of the normal variations exhibited across individuals in the acquisition, use, and representation of language. Also considered are individual differences seen in second language learning, the aging process, and language disorders.

Credit Hours: 2
Prerequisites: instructor's consent

C_S_D 4840: Language and Development in Infancy
Overview of theory and research on the foundations and development of language in infancy (0 to 2 years), with an emphasis on relevant, interrelated areas of development, individual differences, early recognition of delay, and assessment.

Credit Hours: 3
Prerequisites: senior standing required. Instructor's consent required

C_S_D 4900: Clinical Observation in Communication Disorders
Directed clinical observations designed to prepare the student for clinical practicum. Required for professional certification. Graded on a S/U basis only.

Credit Hours: 2
Prerequisites: senior standing and departmental consent. Communication Science and Disorders majors only

C_S_D 4945: Clinical Apprenticeship in Communication Disorders
Supervised observation and clinical experience in speech-language pathology for undergraduates.

Credit Hour: 1-3
Prerequisites: senior standing and departmental consent. Communication Science and Disorders majors only
C_S_D 4950: Research Apprenticeship
Research apprenticeship with a faculty member, assisting in the development and execution of research in communication processes and disorders. May be repeated to 6 hrs. maximum.

Credit Hours: 1-99
Prerequisites: instructor’s consent

C_S_D 4960: Directed Reading in Communication Science and Disorders
Independent reading; reports.

Credit Hours: 1-3
Prerequisites: instructor’s consent

C_S_D 4990: Honors Thesis
Individual honors thesis on a topic selected with a faculty advisor. Requires planning, conducting, and writing up a research project under the guidance of a faculty member. Successful completion of thesis and maintenance of 3.3 GPA, leads to degree with departmental honors. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Senior standing; 3.3 GPA; 3.5 GPA in Communication Science and Disorders courses; instructor’s consent. Restricted to Communication Science and Disorders students only

C_S_D 7001: Topics in Communication Science and Disorders
Study of selected topics in speech pathology/audiology. Topic and credit may vary from semester to semester. May be repeated for credit with instructor and departmental consent.

Credit Hour: 1-99
Prerequisites: instructor’s consent

C_S_D 7050: Clinical Applications of Sign Language
This course covers research, theory, and methods of using sign language to assist the communication of the Deaf, individuals with disabilities, and hearing learners. Use of sign language to improve literacy and classroom management will also be targeted. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C_S_D 1050 and C_S_D 1100 or equivalent. Instructor’s consent required

C_S_D 7085: Problems in Communication Science and Disorders
Individual study not leading to thesis or dissertation.

Credit Hour: 1-99
Prerequisites: instructor’s consent

C_S_D 7200: Professional Voice
Voice production, common voice problems and their causes; healthy vocal habits and techniques to achieve optimal voice. Communication Science Disorder students may not take for graduate credit.

Credit Hours: 2

C_S_D 7340: Aural Rehabilitation
Identification, evaluation, and management of problems associated with hearing impairment in both children and adults. Includes issues related to speech/language development, communication, education, and social factors.

Credit Hours: 3
Prerequisites: C_S_D 3230 and C_S_D 4330

C_S_D 7430: Neurophysiology for Speech, Language, and Hearing
Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.

Credit Hours: 3
Prerequisites: Communication Science and Disorders majors or instructor’s consent

C_S_D 7810: Psycholinguistics
(same as LINGST 7810). Examination of the knowledge and processes that underlie the human ability to produce and understand language.

Credit Hours: 3
Prerequisites: instructor’s consent

C_S_D 7820: Speech Perception
(same as LINGST 7820). Selected topics in the perceptual processing of speech sounds and spoken language.

Credit Hours: 3
Prerequisites: instructor’s consent

C_S_D 7830: Individual Differences in Language Processing
Examination of the normal variations exhibited across individuals in the acquisition, use, and representation of language. Also considered are individual differences seen in second language learning, the aging process, and language disorders.

Credit Hours: 2
Prerequisites: instructor’s consent

C_S_D 7840: Language and Development in Infancy
Overview of theory and research on the foundations and development of language in infancy (0 to 2 years), with an emphasis on relevant, interrelated areas of development, individual differences, early recognition of delay, and assessment.

Credit Hours: 3

C_S_D 8001: Topics in Communication Science and Disorders
Study of selected topics in speech pathology/audiology. Topic and credit may vary from semester to semester. May be repeated for credit with instructor and departmental consent.

Credit Hour: 1-99
Prerequisites: instructor’s consent, instructor’s

C_S_D 8020: Developmental Language Disorders

Credit Hours: 3
Prerequisites: C_S_D 3020, C_S_D 4020 and LINGST 7600 or equivalent, or instructor’s consent

C_S_D 8030: Acquired Language Disorders
Etiology, symptomatology, assessment and rehabilitation of acquired neurogenic communication disorders in aphasia, traumatic brain injury, dementia, and right-hemisphere syndrome.
Credit Hours: 3
Prerequisites: C_S_D 4030 and C_S_D 4430, or instructor’s consent

C_S_D 8050: Research in Communication Science and Disorders
Independent research leading to a report but not to a thesis or dissertation.
Credit Hour: 1-99
Prerequisites: instructor’s consent

C_S_D 8085: Problems in Communication Science and Disorders
Individual study not leading to thesis or dissertation.
Credit Hour: 1-99
Prerequisites: instructor’s consent

C_S_D 8087: Seminar: Contemporary Topics in Speech-Language Pathology
Advanced study involving critical literature review and research on selected topics in speech and language. May be repeated for up to 6 credits.
Credit Hour: 1-3
Prerequisites: instructor’s consent

C_S_D 8090: Research in Communication Science and Disorders
Research leading to thesis or dissertation.
Credit Hour: 1-99
Prerequisites: instructor’s consent. Graded on a S/U basis only

C_S_D 8150: Advanced Speech Science
Advanced exploration of the physiology of speech production and the corresponding acoustic characteristics of speech. Includes experience with pertinent laboratory instrumentation.
Credit Hours: 2
Prerequisites: C_S_D 3210 and C_S_D 3220

C_S_D 8200: Motor Speech Disorders
Review of neuroanatomic mechanisms underlying speech production; etiology, symptomatology, epidemiology, and prognosis of motor speech disorders resulting from acquired neurological damage. Emphasis on clinical assessment and rehabilitation procedures.
Credit Hours: 3
Prerequisites: instructor’s consent

C_S_D 8220: Disorders of Voice
Diagnosis and management of communicative disorders resulting from pathologies or abnormalities of the craniofacial structures and from pathologies or misuse of the phonatory systems.
Credit Hours: 2
Prerequisites: C_S_D 3210, C_S_D 4320 and C_S_D 4210 or instructor’s consent

C_S_D 8230: Dysphagia
Etiology, symptomatology, and epidemiology of acquired and developmental swallowing disorders (dysphagia). Emphasis on instrumental and non-instrumental methods for assessing and treating dysphagia.
Credit Hours: 3
Prerequisites: C_S_D 3210, C_S_D 4200, C_S_D 8200; or instructor’s consent

C_S_D 8240: Orofacial Anomalies
Credit Hour: 1
Prerequisites: C_S_D 3210, C_S_D 4320

C_S_D 8250: Clinical Methods in Speech-Language Pathology
An introduction to clinical procedures and evidence-based intervention methods relating to speech and language disorders. Topics include session design, data collection, measurement of progress, reporting of clinical results, and various treatment options. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: departmental consent

C_S_D 8260: Diagnosis in Speech-Language Pathology
General principles of diagnosis; specific diagnostic tools and procedures for various speech and language disorders.
Credit Hours: 3
Prerequisites: departmental consent

C_S_D 8320: Speech Sound Disorders
Principles of clinical assessment and treatment for speech sound disorders in children. Includes foundations in research on early speech sound acquisition, organic and developmental disorders, and treatment efficacy. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: C_S_D 3010 or equivalent or permission of instructor; departmental consent

C_S_D 8420: Reading and Language Disabilities in School-Age Children
Theories, research, and practice in reading development and disorders. Assessment and remediation of reading disabilities related to language disorders of various etiologies including developmental language disorders and head injury.
Credit Hours: 2
C_S_D 8430: Introduction to Augmentative and Alternative Communication
Students will learn the principles of AAC assessment, methods of intervention, and types of technology available for individuals unable to communicate fully through speech. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: C_S_D 4020 or C_S_D 8020

C_S_D 8500: Issues in Professional Practice
Organizational, inter-professional, economic, legal, and ethical aspects of delivering speech, language, and hearing services. Graded on A/F basis only.
Credit Hours: 2
Prerequisites: Motor Speech Disorders; Language Disorders in Children; Acquired Language Disorders; C_S_D 8020 and C_S_D 8030

C_S_D 8600: Clinical Language Analysis
This course provides a theoretical framework for understanding the morphology, semantics, syntax, and pragmatics of English as well as practice in the analysis of typical and atypical language samples. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: departmental consent required

C_S_D 8935: Clinical Practice in Audiology
Supervised practice in hearing screening, hearing conservation, and aural re/habilitation. May be repeated for credit. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: C_S_D 4945 or equivalent

C_S_D 8945: Clinical Practice in Speech-Language Pathology
Supervised clinical practice in speech pathology for graduate students. May be repeated for credit.
Credit Hour: 1-10
Prerequisites: C_S_D 9087: Seminar: Contemporary Topics in Speech-Language Pathology
Advanced study involving critical literature review and research on selected topics in speech and language. May be repeated for up to 6 credits.
Credit Hour: 1-3
Prerequisites: instructor’s consent

C_S_D 9090: Research in Communication Science and Disorders
Research leading to thesis or dissertation. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor’s consent

Computer Science (CMP_SC)

CMP_SC 1000: Introduction to Computer Science
This course introduces the Computer Science field, including the history of computers, career opportunities, and ethical/social issues. There will be lectures given by MU Computer Science faculty to discuss exciting fields as well as career advisement given by Computer Science industry representatives.
Credit Hour: 1
Prerequisites: Restricted to freshman/sophomore Computer Science/Information Technology majors

CMP_SC 1001: Topics in Computer Science
Topic and credit may vary from semester to semester. May be repeated upon consent of department.
Credit Hour: 1-99

CMP_SC 1050: Algorithm Design and Programming I
This course provides experience in developing algorithms, designing, implementing programs. Topics include syntax/semantics, flow control, loops, recursion, I/O, arrays, strings and pointers. Math Reasoning Proficiency Course.
Credit Hours: 3
Prerequisites: MATH 1100 or MATH 1160 or MATH 1500 (C- or better)

CMP_SC 2001: Topics in Computer Science
Topic and credit may vary from semester to semester. May be repeated upon consent of department.
Credit Hour: 1-99
Prerequisites: departmental consent

CMP_SC 2050: Algorithm Design and Programming II
A study of fundamental techniques and algorithms for representing and manipulating data structures. Topics include data abstraction, recursion, stacks, queues, linked lists, trees, efficient methods of sorting and searching, and Big-O analysis.
Credit Hours: 3
Prerequisites: CMP_SC 1050
CMP_SC 2111: Production Languages
The study of the syntax, semantics, and applications of one programming language suitable for large scale scientific or commercial projects, such as FORTRAN, COBOL, PL/1, C, or ADA. May be taken more than once for credit.

Credit Hour: 1-3
Prerequisites: CMP_SC 2050

CMP_SC 2270: Introduction to Digital Logic
Basic tools, methods and procedures to design combinational and sequential digital circuits and systems, including number systems, boolean algebra, logic minimization, adder design, memory elements, and finite state machine design.

Credit Hours: 3
Prerequisites: CMP_SC 1050

CMP_SC 2830: Introduction to the Internet, WWW and Multimedia Systems
This course will attempt to provide a comprehensive understanding of the evolution, the technologies, and the tools of the Internet. In particular, issues pertaining to the World Wide Web and Multimedia (HTML, CGI, Web based applications) will be discussed in detail.

Credit Hours: 3
Prerequisites: CMP_SC 2050

CMP_SC 3001: Topics in Computer Science
Current and new technical developments in computer science. May be repeated for 6 hours credit.

Credit Hour: 1-99
Prerequisites: departmental consent. For juniors and seniors

CMP_SC 3050: Advanced Algorithm Design
This class surveys fundamental algorithms and data structures that have wide practical applicability, including search trees and graph algorithms. Emphasis is placed on techniques for efficient implementation and good software development methodologies.

Credit Hours: 3
Prerequisites: CMP_SC 2050

CMP_SC 3280: Computer Organization and Assembly Language
Introduces computer architectures, programming concepts including parameter passing, I/O, interrupt handling, DMA, memory systems, cache, and virtual memory. Graded of A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 2270

CMP_SC 3330: Object Oriented Programming
This course focuses on object-oriented programming concepts: abstraction, polymorphism, encapsulation, inheritance, interfaces, abstract classes, files, streams, and object serialization. Topics such as GUI and event-driven programming are also tackled.

Credit Hours: 3
Prerequisites: CMP_SC 2050

CMP_SC 3380: Database Applications and Information Systems
Covers fundamental topics of database management systems (DBMS) and database-enabled applications. Topics include a brief history of secondary storage and databases, data modeling, introductory SQL, an overview of current database trends, and current popular database systems. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 2050

CMP_SC 3530: UNIX Operating System
Introduction to the UNIX operating system and its interfaces including the file system, shell, editors, pipes and filters, input/output system, shell programming, program development including C, and document preparation.

Credit Hours: 3
Prerequisites: Advanced C programming experience

CMP_SC 3940: Internship in Computer Science
Computer-related experience in business or industry jointly supervised by faculty and computer professionals. Students should apply one semester in advance for consent of the supervising professor. Graded on a S/U basis only.

Credit Hour: 1-3
Prerequisites: CMP_SC 2050

CMP_SC 4001: Topics in Computer Science
Topic and credit may vary from semester to semester. May be repeated upon consent of department.

Credit Hour: 1-99
Prerequisites: CMP_SC 2050

CMP_SC 4050: Design and Analysis of Algorithms I
This course reviews and extends earlier work with linked structures, sorting and searching algorithms, and recursion. Graph algorithms, string matching, combinatorial search, geometrical algorithms and related topics are also studied.

Credit Hours: 3
Prerequisites: CMP_SC 3050 and MATH 2320

CMP_SC 4060: String Algorithms
This course provides an introduction to algorithms that efficiently compute patterns in strings. Topics covered include basic properties of strings, data structures for processing strings, string decomposition, exact and approximate string matching algorithms. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 4050

CMP_SC 4070: Numerical Methods for Science and Engineering
Introduces basic numerical methods widely used by computer scientists/ engineers. Students will use the MATLAB platform to computationally solve problems, such as finding roots of nonlinear equations, solving systems of equations, fitting curves, solving ODEs, finding eigenvalues, etc.

Credit Hours: 3
Prerequisites: CMP_SC 2050, junior standing or instructor's consent.
Graded on A/F basis only

CMP_SC 4070: Numerical Methods for Science and Engineering
Introduces basic numerical methods widely used by computer scientists/ engineers. Students will use the MATLAB platform to computationally solve problems, such as finding roots of nonlinear equations, solving systems of equations, fitting curves, solving ODEs, finding eigenvalues, etc.

Credit Hours: 3
Prerequisites: CMP_SC 2050

Graded on A/F basis only
**CMP_SC 4085: Problems in Computer Science**
Independent investigation or project in Computer Science. May be repeated to up 6 hours.

**Credit Hours:** 1-6  
**Prerequisites:** senior standing in Computer Science

**CMP_SC 4270: Computer Architecture I**
Architectural features of high-performance computer systems including hierarchical and virtual memory, pipelining, vector processing and an introduction to multiple-processor systems.

**Credit Hours:** 4  
**Prerequisites:** CMP_SC 2270

**CMP_SC 4280: Network Systems Architecture**
(same as ECE 4280; cross-leveled with CMP_SC 7280), The course covers network systems (interconnects and switch fabrics, network considerations) and relevant networking applications at the network, transport and application layer. Prerequisites: ECE 3210 or CMP_SC 3280 and ECE 3220 or CMP_SC 2050

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2270

**CMP_SC 4320: Software Engineering I**
Overview of software life cycle, including topics in systems analysis and requirements specification, design, implementation testing and maintenance. Uses modeling techniques, project management, peer review, quality assurance, and system acquisition.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2050  
**Corequisites:** CMP_SC 3380

**CMP_SC 4330: Object Oriented Design I**
Building on a prior knowledge of program design and data structures, this course covers object-oriented design, including classes, objects, inheritance, polymorphism, and information hiding. Students will apply techniques using a modern object-oriented implementation language. Enrollment limited to undergraduate students only.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2050

**CMP_SC 4380: Database Management Systems I**
Fundamental concepts of current database systems with emphasis on the relational model. Topics include entity-relationship model, relational algebra, query by example, indexing, query optimization, normal forms, crash recovery, web-based database access, and case studies. Project work involves a modern DBMS, such as Oracle, using SQL.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 3380

**CMP_SC 4410: Theory of Computation I**
An introductory study of computation and formal languages by means of automata and related grammars. The theory and applications of finite automata, regular expressions, context free grammars, pushdown automata and Turing machines are examined. May not be counted toward Computer Science MS/PHD.

**Credit Hours:** 3  
**Prerequisites:** MATH 2320

**CMP_SC 4430: Compilers I**
Introduction to the translation of programming languages by means of interpreters and compilers. Lexical analysis, syntax specification, parsing, error-recovery, syntax-directed translation, semantic analysis, symbol tables for block structured languages, and run-time storage organization. May not be counted toward Computer Science MS/PHD.

**Credit Hours:** 3  
**Prerequisites:** MATH 2320

**CMP_SC 4440: Malware Analysis and Defense**
Malicious software or “malware” is a security threat. This course teaches students to understand the nature and types of viruses and how they are threats; teaches techniques used to prevent, detect, repair and defend against viruses and worms; teaches program binary examination tools to detect malicious code; and teaches ethical issues surrounding computer security violations.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 3280, ECE 3210 or equivalent

**CMP_SC 4450: Principles of Programming Languages**
An introduction to the structure, design and implementation of programming languages. Topics include syntax, semantics, data types, control structures, parameter passing, run-time structures, and functional and logic programming. May not be counted toward Computer Science MS/PHD.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2050

**CMP_SC 4520: Operating Systems I**
Basic concepts, theories and implementation of modern operating systems including process and memory management, synchronization, CPU and disk scheduling, file systems, I/O systems, security and protection, and distributed operating systems.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 3050 and MATH 1700

**CMP_SC 4610: Computer Graphics I**
Basic concepts, theories and implementation of modern operating systems including process and memory management, synchronization, CPU and disk scheduling, file systems, I/O systems, security and protection, and distributed operating systems.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 3050 and MATH 1500 or MATH 1300 and MATH 1400

**CMP_SC 4620: Physically Based Modeling and Animation**
This course introduces students to physically based modeling and animation methodology for computer graphics and related fields such as computer vision, visualization, biomedical imaging and virtual reality. We will explore current research issues and will cover associated computational methods for simulating various visually interesting physical phenomena. This course should be appropriate for graduate students in
all areas as well as advanced undergraduate students. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 4610, good knowledge of C or C++ programming, no physics background necessary

---

**CMP_SC 4650: Digital Image Processing**  
(same as ECE 4850) Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2050, STAT 4710 or instructor’s consent

---

**CMP_SC 4670: Digital Image Compression**  
(same as ECE 4675) Covers digital image formation, information theory concepts, and fundamental lossless and lossy image compression techniques including bit plane encoding, predictive coding, transform coding, block truncation coding, vector quantization, subband coding and hierarchical coding.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2050

---

**CMP_SC 4720: Introduction to Machine Learning and Pattern Recognition**  
(Same as ECE 4720) This course provides foundations and methods in machine learning and pattern recognition that address the problem of programming computers to optimize performance by learning from example data or expert knowledge. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2050 and STAT 4710 or instructor consent

---

**CMP_SC 4730: Building Intelligent Robots**  
(same as ECE 4340). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures. Prerequisites: junior standing and programming experience in one of the following programming languages: Basic, C, C++, or Java.

**Credit Hours:** 4

---

**CMP_SC 4740: Interdisciplinary Introduction to NLP**  
(same as LINGST 4740; cross-leveled with CMP_SC 7740). The goal of this course is to enable students to develop substantive NLP applications. Focus on current structural and statistical techniques for the parsing and interpretation of texts.

**Credit Hours:** 3  
**Prerequisites:** senior standing

---

**CMP_SC 4750: Artificial Intelligence I**  
Introduction to the concepts and theories of intelligent systems. Various approaches to creating intelligent systems, including symbolic and computational approaches, insight into the philosophical debates important to understanding AI.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 3050 and junior standing

---

**CMP_SC 4770: Introduction to Computational Intelligence**  
(same as ECE 4870). Introduction to the concepts, models and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization.

**Credit Hours:** 3

---

**CMP_SC 4830: Science and Engineering of the World Wide Web**  
This course will study the science and engineering of the World Wide Web. We will study the languages, protocols, services and tools that enable the web. Emphasis will be placed on basics and technologies.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2830

---

**CMP_SC 4850: Computer Networks I**  
Introduction to concepts and terminology of data communications and computer networking. Basic protocols and standards, applications of networking, routing algorithms, congestion avoidance, long-haul and local networks.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2270 and MATH 2320

---

**CMP_SC 4860: Network Security**  
Principles and practice of cryptography, network security, and computer system security. It includes symmetric and asymmetric cryptography, authentication, security applications such as secure email, IP security, Web security, and system security issues such as intruders, viruses, worms, Trojan horses, and firewalls. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 4850

---

**CMP_SC 4870: Wireless and Mobile Networks**  
Concepts and techniques in wireless and mobile networks: cellular concepts, wireless physical layer, wireless MAC protocol, mobility management, power management, wireless network security, wireless telecommunication system, wireless LAN, wireless ad hoc networking, wireless personal area network. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 4850

---

**CMP_SC 4970: Senior Capstone Design I**  
Design projects emphasizing team work, communication skills, and prototyping. Covers professional ethics, intellectual property/patenting, knowledge of engineering literature, safety, economic and environmental impact of technology. Essays, oral and written reports.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 4320 and senior standing

---

**CMP_SC 4980: Senior Capstone Design II**  
Course entails completion of CMP_SC 4970 design project. Design prototyping, testing, evaluation, presentation, and preparation of documentation.

**Credit Hours:** 2
Prerequisites: CMP_SC 4970

CMP_SC 4990: Undergraduate Research in Computer Science
Independent investigation or project in Computer Science.
Credit Hour: 0-6
Prerequisites: senior standing in Computer Science. May be repeated to 6 hours

CMP_SC 4995: Undergraduate Research in Computer Science - Honors
Independent investigation to be presented as an undergraduate honors thesis.
Credit Hour: 1-6
Prerequisites: honors student in Computer Science

CMP_SC 7001: Topics in Computer Science
Topic and credit may vary from semester to semester. May be repeated upon consent of department.
Credit Hour: 1-99

CMP_SC 7010: Computational Methods in Bioinformatics
(Same as INFOINST 7010) Introduces the fundamental concepts and basic computational techniques for mainstream bioinformatics problems. Emphasis will be placed on the computational aspect of bioinformatics, including formulation of a biological problem in a computable problem, design of scoring functions and algorithms, confidence assessment of prediction results and software development.
Credit Hours: 3
Prerequisites: CMP_SC 4050 and STAT 4710

CMP_SC 7050: Design and Analysis of Algorithms I
This course reviews and extends earlier work with linked structures, sorting and searching algorithms, and recursion. Graph algorithms, string matching, combinatorial search, geometrical algorithms and related topics are also studied. Cannot be counted toward CS MS/PHD.
Credit Hours: 3
Prerequisites: CMP_SC 3050 and MATH 2320

CMP_SC 7060: String Algorithms
