• GRE scores (a copy may be sent to the department too; minimum, an official result needs to be sent to Graduate School)
• 3 letters of recommendation are required for all doctoral applicants. ALL LETTERS MUST BE CONFIDENTIAL AND SUBMITTED ACCORDINGLY THROUGH THE GRADUATE SCHOOL APPLICATION SYSTEM.

Financial Aid from the Program
Internal assistantships, fellowships or other funding packages require a departmental application, starting Fall 2010, and must be completed every semester in order to have funding renewed. Completion of the application does not guarantee renewal. Check the program Web site or ask the program contact for details.

PhD in Learning, Teaching and Curriculum with Emphasis in Art Education
The MU Art Education PhD program prepares individuals for research and teacher education careers in higher education and for leadership positions in various educational settings. The program offers opportunities to expand a teaching repertoire and research current topics in art education as well as to develop expertise in conceptualizing, conducting and reporting research in the arts arena.

The individual and a faculty committee develop an individualized program of study based upon a candidate’s background, experiences, and professional goals. The majority of MU PhD graduates take positions in Colleges of Education or Fine Arts in Art and Art Education at universities or colleges. However, some graduates move into administrative and supervisory positions at art museums, and arts agencies.

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Ph.D in Learning, Teaching and Curriculum (http://gradschool.missouri.edu/academics/programs/learning-teaching-curriculum/doctorate.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria.
Complete admission requirements (http://education.missouri.edu/LTC/prospective_students/how_to_apply.php) for the Master’s program.

• Completion of an appropriate Bachelor’s degree with a GPA of 3.0 or better.
• Completion of an appropriate master’s degree with a GPA of 3.0 or better.
• A minimum of three letters of recommendation.
• Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant’s professional aspirations.
• GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
• For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.
PhD in Learning, Teaching and Curriculum with Emphasis in Early Childhood Education

The faculty and students in early childhood education work closely together. The newly renovated Townsend Hall makes dialogue and consultation easy. Each doctoral student who is a GTA/GRA has office space, a computer, and access to state-of-the-art technology in the Reflector. Faculty and students share ideas and learn from one another. Your faculty advisor has the strongest interest in your professional/personal growth, but each early childhood faculty member will be a valued part of your community.

Goals of the PhD Program

These goals are achieved through a combination of course-work, internships, and authentic experiences with research, development, and teacher education.

- Understand the depth and breadth of the field of early childhood education in terms of research, curriculum, policy, teacher development and student learning;
- Develop, carry out, and report independent research in some area of early childhood education;
- Become outstanding teachers/advisors of college students;
- Understand the role of service in the university setting and learn how memberships in organizations can lead to a service agenda.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum and the minimum requirements of the Graduate School. Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria.

Completion of an appropriate Bachelor’s degree with a GPA of 3.0 or better.

Completion of an appropriate master’s degree with a GPA of 3.0 or better.

A minimum of three letters of recommendation.

Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant’s professional aspirations.

GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)

For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program.

Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Elementary Education

Would you like to become a district coordinator for Elementary Education or a professor of Elementary Education? You can participate in advanced research-based courses in literacy/reading, mathematics education, science education, and social studies education. In addition, you will be mentored to teach at the university level and to conduct publishable research. The majority of Ed.D. students in elementary education move into administrative roles at the district or state level. The majority of Ph.D. students in elementary education move on to take positions at universities or colleges. This program offers 72-hours beyond the bachelor’s degree.

Goals of the Doctoral Programs

Prepares students to:

- Understand the depth and breadth of the fields of literacy, mathematics education, social studies education, and science education in terms of research, curriculum, policy, teacher development and student learning;
- Develop, carry out, and report independent research in some area of elementary education;
- Become outstanding teachers/advisors of college students;
- Understand the role of service in the university setting and begin those memberships in organizations that can lead to a service agenda.

These goals are achieved through a combination of course-work, internships, and authentic experiences with research, development, and teacher education.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum and the minimum requirements of the Graduate School. Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria.

Completion of an appropriate Bachelor’s degree with a GPA of 3.0 or better.

For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program.
Admission requirements will be based upon the following criteria. Complete admission requirements (http://education.missouri.edu/LTC/prospective_students/how_to_apply.php) for the Master’s program.

- Completion of an appropriate Bachelor’s degree with a GPA of 3.0 or better.
- Completion of an appropriate master’s degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant’s professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in English Education

The English Education area gives students a strong background in reading and writing pedagogy, adolescent literature, and media literacy. We also emphasize lesson planning, curriculum creation and teaching, classroom management, diversity and social equity.

We prepare candidates to be English teachers and follow the guidelines of National Council of Teachers of English (NCTE), as well as those of the National Middle School Association (NMSA).

In order to earn a PhD in English Education, a minimum of 72 semester hours beyond the bachelor’s degree is required.

**Study Plan:**

- English Education ..................................................33-36 semester hours
- Support Area I: ..................................................12-15 semester hours
- Support Area II: ..................................................12-15 semester hours
- Research Methodology .....................................12-15 semester hours
- Dissertation ..........................................................9 semester hours

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (http://gradschool.missouri.edu/academics/programs/learning-teaching-curriculum/doctorate.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.
**PhD in Learning, Teaching and Curriculum with Emphasis in Mathematics Education**

The MU Ph.D. program in Mathematics Education is designed to prepare individuals for careers in higher education and leadership positions in a variety of educational settings. The program aims to enhance student knowledge about the field of mathematics education and develop expertise in conceptualizing, conducting and reporting research studies. Programs of study are individually planned with a faculty committee, and are based upon candidate’s background, experiences, and professional goals. The majority of our graduates take positions in Colleges of Education or Departments of Mathematics at universities or colleges. However, some graduates move into administrative and supervisory roles at district or state levels.

Detailed information about all of the elements of the program can be found in the MU Mathematics Education Ph.D. Program: Faculty and Student Handbook (http://education.missouri.edu/LTC/mathematics/files/math_ed_handbook.pdf).

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Ph.D in Learning, Teaching and Curriculum (http://gradschool.missouri.edu/academics/programs/learning-teaching-curriculum/doctorate.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (http://education.missouri.edu/LTC/prospective_students/how_to_apply.php) for the Master’s program.

- Completion of an appropriate Bachelor’s degree with a GPA of 3.0 or better.
- Completion of an appropriate master’s degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation; three letters.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant’s professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

**PhD in Learning, Teaching and Curriculum with Emphasis in Music Education**

The doctorate in music education, offered through the College of Education’s Department of Learning, Teaching and Curriculum (http://education.missouri.edu/LTC/music/music_program.php) (LTC), is fully accredited by the National Association of Schools of Music. This degree is designed to prepare students for careers in higher education as music education teacher/researchers, as ensemble conductors with a strong commitment to music education teaching and research, or as master teachers or music supervisors in the K-12 system. Applicants must be certified music teachers, with a bachelor’s or master’s degree in music education, or present evidence of equivalent experience. Individuals with music teaching experience in higher education but without music teaching experience in elementary or secondary schools are eligible for admission, but are required to complete field experiences in elementary and secondary schools prior to taking comprehensive examinations.

This program is “research-intensive,” and students are expected to complete four to five research courses, read past and current research, assist and eventually collaborate with faculty and peers on research projects, develop the ability to translate research findings to classroom applications, and ultimately achieve independence as a researcher. Within the general framework, the PhD program is relatively flexible and individualized for each student. The degree requires 72 hours beyond the bachelor’s degree. Specific coursework is planned by the doctoral student and the four- to five-member doctoral committee to meet the student’s individual needs and future goals. The committee must be chaired by a music education faculty member who is a member of the LTC Doctoral Faculty, and at least 2 members must be members of the LTC Doctoral Faculty and one must be from the School of Music. Students may choose two support areas, one comprising 12 hours and one comprising 9 (each may include 3 hours from the master’s degree work), one of which is in music and the other in either a second area of music or a related field. The support-area courses are not prescribed, but are selected in consultation with a faculty member in that area, who often serves as a doctoral committee member. In addition to the coursework requirements, students must complete one “research internship” and one “teaching internship,” which may or may not be attached to credit hours. These are faculty-supervised experiences designed to help prepare the students with skills they will need to enter the professoriate.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Ph.D in Learning, Teaching and Curriculum (http://gradschool.missouri.edu/academics/programs/learning-teaching-curriculum/doctorate.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.
Admission requirements will be based upon the following criteria. Complete admission requirements (http://education.missouri.edu/LTC/prospective_students/how_to_apply.php) for the Master’s program.

• Completion of an appropriate Bachelor’s degree with a GPA of 3.0 or better.
• Completion of an appropriate master’s degree with a GPA of 3.0 or better.
• A minimum of three letters of recommendation; three letters.
• Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant’s professional aspirations.
• GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
• For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Reading Education

The Doctoral Program in Literacy Education is designed to prepare individuals for careers in higher education and leadership positions in a variety of educational settings. Besides enhancing students’ knowledge of literacy education, students develop expertise in conceptualizing, conducting and reporting research studies.

Programs of study are individually planned with a faculty committee. Recommendations include the following:

I. Literacy Education Core (18+ hours)

A. Foundations (9-12 hours)
• Theoretical Foundations of Literacy
• Whole Language Curriculum or Talk in the Curriculum
• History of Literacy or Issues and Trends of Literacy Education
• Linguistics, Sociolinguistics, Psycholinguistics

B. Concentration (9-12 hours)
Declared area of interest or specialization selected in consultation with advisor. Possible areas of specialization include:
• Early Literacy
• Children’s Literature
• Linguistics and Literacy
• Literacy in a Digital World
• Literacy for Special Needs Children
• Other

II. Professional Education Core (12 hours, 3 hours from each category)

A. Humanistic Dimensions of Education
• Social and Philosophical Aspects of Teaching
• Sociology of the Classroom
• Issues in Education and Human Development: Historical and Philosophical
• Multicultural Dimensions of Education

B. Psychological Foundations of Education
• Psychological Foundations of Education
• Human Learning
• Human Cognition
• Applications of Computer Based Systems to Educational Settings
• Instructional Programs for Young Children
• Parents, the School, and the Community

III. Research Core (12 hours of the following or equivalent courses)

• Quantitative Methods in Educational Research I
• Quantitative Methods in Educational Research II
• Qualitative Methods of Educational Research I
• Qualitative Methods of Educational Research II

IV. Teaching and Research Internships (0-6 hours)
To be negotiated with advisor to meet your professional goals

V. Electives (0-12+ hours)
Select courses within or outside the College of Education that will help focus and support your research interests (with committee approval). Or take a concentrated set of 9-12 hours as a minor

VI. Dissertation (12 hours)
Includes proposal approval, Institutional Review Board Approval, approval from participants, write up, and oral defense

Doctoral Regulations:
Minimum total semester hours: 72 beyond the baccalaureate degree
Minimum semester hours 8000-level or above: 15 exclusive of research, problems, and independent study experiences

PREREQUISITES:
• Introduction to Statistics (or equivalent)
• Foundations of Educational Psychology (or equivalent)

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (http://gradschool.missouri.edu/academics/programs/learning-teaching-curriculum/doctorate.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.
Admission requirements will be based upon the following criteria. Complete admission requirements (http://education.missouri.edu/LTC/prospective_students/how_to_apply.php) for the Master’s program.

- Completion of an appropriate Bachelor’s degree with a GPA of 3.0 or better.
- Completion of an appropriate master’s degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation; three letters.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant’s professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Science Education

The doctoral program emphasizes science education research and culminates with a dissertation project completed under the supervision of a science education faculty member. The program requires coursework (http://education.missouri.edu/LTC/science/Doctoral_course_reqs.php) in science education, science content, educational foundations, and educational research.

The Science Education Ph.D. requires a minimum of 82 semester hours beyond the Bachelor’s degree (the Master’s degree can be counted toward this total). The Science Education Ph.D. program includes three emphasis areas:

1. Elementary Science Education
2. Middle / Secondary Science Education
3. College Science Teaching

Each emphasis area requires coursework (http://education.missouri.edu/LTC/science/Doctoral_course_reqs.php) in science education, science content, and educational research as well as teaching and research experiences.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (http://gradschool.missouri.edu/academics/programs/learning-teaching-curriculum/doctorate.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (http://education.missouri.edu/LTC/prospective_students/how_to_apply.php) for the Master’s program.

- Completion of an appropriate Bachelor’s degree with a GPA of 3.0 or better.
- Completion of an appropriate master’s degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant’s professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Social Studies Education

The Ph.D. in Social Studies Education at the University of Missouri provides increased opportunities for its graduates to assume leadership roles in a variety of academic, knowledge-driven, and/or governmental and politically-based institutions and organizations. The core of the Ph.D. experience lies in scholarship and in the process by which graduate students transition from being knowledge-consumers to knowledge-producers. Hence, the doctoral experience involves a journey of personal growth and development, which leads the graduate student towards a deeper sense of the self and towards crafting a personal agenda for scholarship in the social studies field.

The Culture of the Social Studies Education Doctoral Program

Unique among graduate programs, the social studies doctoral students and faculty form a community of learners and employ democratic practices to shape the direction of the community, its scholarship, and future coursework. As a result, in dialogue with faculty members, doctoral students help co-direct the structure of their Ph.D. experience. This occurs in two ways. First, doctoral students have flexibility in much of the design of their own coursework, research endeavors, and scholarship. Second, in community with the other doctoral students and faculty members, doctoral students vote on coursework requirements, expectations for the program, and program goals.
An important aspect of forming this community of learners involves identifying and clarifying the academic and research interests of its members. As a result, the current doctoral students have established four research clusters, or areas that describe their often overlapping research interests in the social studies education field. At this time, these clusters include the following:

- **Social Studies Teacher Education for Social Justice**: Addressing issues of citizenship, diversity, and social justice in teacher education.
- **Multicultural and Global Education**: Preparing teachers and students to address local, national, and global concerns of culture, environment, and the socio- and geopolitical landscape in education.
- **Social Studies Curriculum and Instruction**: Confronting persistent issues in social studies curriculum and teaching, including official and master narratives, teaching methodologies, assessment, technology, and student engagement in the classroom.
- **Educational Policy and Politics Affecting Social Studies Teaching**: Investigating the power structures, political dynamic, curriculum control, and educational policy and system structure influence social studies education and teaching.

These research clusters not only clarify and support doctoral students in team-oriented scholarship, but also inform social studies faculty on which courses to offer and what kinds of research opportunities to promote. Research clusters are reviewed and revised on a yearly basis. Because admission into the doctoral program also includes membership into our community of learners, we recommend that individuals interested in applying for the Social Studies Education doctoral program at the University of Missouri demonstrate research interests that align with one or more of these research clusters.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum and the minimum requirements of the Graduate School. Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria:

- Completion of an appropriate Bachelor’s degree with a GPA of 3.0 or better.
- Completion of an appropriate master’s degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation; three letters.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant’s professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.
Middle School Education

Dr. Wendy Sims, Director of Teacher Education
Department of Learning, Teaching and Curriculum
202 Townsend Hall
573-882-0560
TeacherEducation@missouri.edu

Professional education coursework is delivered by four departments within the College of Education, namely, Learning, Teaching and Curriculum; Special Education; Educational Leadership and Policy Analysis; and Educational, School and Counseling Psychology.

Faculty

Associate Professor Emeritus M. Volkmann*
Emeritus Research Professor D. A. Grouws*
Associate Teaching Professor A. Barbis*, L. Kingsley*, J. Ostrow*
Assistant Teaching Professor A. Ashcraft*, L. Neier*, R. Jackson
Assistant Clinical Professor A. Waldron**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BSEd in Middle School Education (p. 441)
  • with emphasis in Language Arts (p. 444)
  • with emphasis in Mathematics (p. 442)
  • with emphasis in Science (p. 442)
  • with emphasis in Social Studies (p. 442)

The requirements for the Bachelor of Science in Education are specified in three areas: University general education, professional education and a teaching major. All students preparing to be teachers in early childhood, elementary, special education, middle or secondary schools, regardless of the major field, are required to complete the University general education program. Students transferring from other institutions are required to fulfill the equivalencies of these courses.

Graduate

The Middle School Education Program at the University of Missouri includes degree programs that focus on preparing graduates to teach in grades 5-9. The College of Education does not currently offer a graduate degree specifically in Middle School Education. However, we do offer Masters (M.Ed.) and doctorates (Ph.D) in the following areas.

• Math
• English/Language Arts
• Science
• Social Studies
• Art
• Music

We also offer a graduate degree in “Reading/Literacy Education” at the M.Ed., Ed.S., Ed.D. and Ph.D. levels.

You can find out more about the programs by going to http://education.missouri.edu/academics/graduate_studies/index.php.

Undergraduate

BSEd in Middle School Education

Major Program Requirements

The BSEd in Middle School Education is offered in four emphasis areas: Language Arts (p. 441), Math (p. 442), Science (p. 442), and Social Studies (p. 442). Students must choose one of the emphasis areas to earn the BSEd. Students must complete all university, general education, and content requirements in addition to the degree requirements. Please meet with a Mizzou Ed Academic Advisor (https://education.missouri.edu/undergraduate/advising/advisors.php) to discuss degree requirements and to create a semester plan.

As Mizzou Ed continues to implement the new Missouri Standards for the Preparation of Educators mandated by the Department of Elementary and Secondary Education (DESE), curriculum changes will be required that must be met in order to complete your degree and earn teacher certification. Those changes may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

Semester Plan

This degree does not currently have a sample semester plan. Please schedule an appointment with an academic advisor to discuss courses.

BSEd in Middle School Education with Emphasis in Language Arts

Major Program Requirements

Students must complete all university (p. 19), general education (p. 20), and content requirements in addition to the degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

As Mizzou Ed continues to implement the new Missouri Standards for the Preparation of Educators mandated by the Department of Elementary and Secondary Education (DESE), curriculum changes will be required that must be met in order to complete your degree and earn teacher certification. TeacherEducation@missouri.edu

Professional education coursework is delivered by four departments within the College of Education, namely, Learning, Teaching and Curriculum; Special Education; Educational Leadership and Policy Analysis; and Educational, School and Counseling Psychology.

Faculty

Associate Professor Emeritus M. Volkmann*
Emeritus Research Professor D. A. Grouws*
Associate Teaching Professor A. Barbis*, L. Kingsley*, J. Ostrow*
Assistant Teaching Professor A. Ashcraft*, L. Neier*, R. Jackson
Assistant Clinical Professor A. Waldron**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BSEd in Secondary Education (p. 443)
  - with emphasis in Art Education (p. 443)
  - with emphasis in Biology (p. 444)
  - with emphasis in Chemistry (p. 444)
  - with emphasis in Earth Science (p. 444)
  - with emphasis in General Science (p. 444)
  - with emphasis in Language Arts (p. 444)
  - with emphasis in Mathematics Education (p. 444)
  - with emphasis in Music Education (p. 445)
  - with emphasis in Physics (p. 445)
  - with emphasis in Social Studies (p. 445)

The requirements for the Bachelor of Science in Education are specified in three areas: University general education (p. 20), professional education and a teaching major. All students preparing to be teachers in early childhood, elementary, special education, middle or secondary schools, regardless of the major field, are required to complete the University general education (p. 20) program. Students transferring from other institutions are required to fulfill the equivalencies of these courses.

Graduate

The Secondary Education Program at the University of Missouri includes degree programs that focus on preparing graduates to teach in grades 9-12. The College of Education does not currently offer a graduate degree specifically to Secondary Education. However, we do offer Masters (M.Ed.) and doctorates (Ph.D) in the following areas.

- Math
- English/Language Arts
- Science
- Social Studies
- Art
- Music

We also offer a graduate degree in “Reading/Literacy Education” at the M.Ed., Ed.S., Ed.D, and Ph.D. levels.

You can find out more about the programs by going to http://education.missouri.edu/academics/graduate_studies/index.php.

Undergraduate

BSEd in Secondary Education

Major Program Requirements

The BSEd in Secondary Education is offered in ten emphasis areas: Biology, Chemistry, Earth Science, General Science, Language Arts, Mathematics Education, Music Education, Physics, and Social Studies. Students must choose one of the emphasis areas to earn the BSEd. Students must complete all university, general education, and content requirements. In addition to the degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

As Mizzou Ed continues to implement the new Missouri Standards for the Preparation of Educators mandated by the Department of Elementary and Secondary Education (DESE), curriculum changes will be required that must be met in order to complete your degree and earn teacher certification. Those changes may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

Semester Plan

This degree does not currently have a sample semester plan. Please schedule an appointment with an academic advisor to discuss courses.

BSEd in Secondary Education with Emphasis in Art Education

The Undergraduate Art Education Program is currently suspended due to low enrollment. The University of Missouri and MU College of Education remain committed to art education and will continue to provide a post-baccalaureate certification program, master’s degree and doctoral in art education. BA and BFA candidates may acquire art teaching certification by completing the art education requirements not already completed in the BA or BFA programs. In addition, students must complete all university (p. 19), general education (p. 20) and content requirements. In

Special Education

Our mission is to prepare educators to work with children, youth and adults with disabilities to be academically and socially successful life-long learners. The department offers comprehensive degree programs that blend pedagogy and practices across developmental, specific content, and exceptionality to prepare educators to work with individuals at-risk and those with disabilities. In addition, the department offers comprehensive programs within exceptionalities, curriculum development for learners with disabilities, policy, and research across the lifespan.

About Special Education Graduate Programs

We strive to prepare educators to assist children, youth and adults with disabilities to be academically and socially successful life-long learners. Our faculty are consistently recognized — internationally and across the U.S. — for their individual and collaborative teaching and research excellence. The department’s unique mix of faculty expertise areas creates a wide range of opportunities for students and researchers.
Special Education hosts or co-hosts several state and federally supported training, demonstration and research projects, including the following three centers that focus on facilitating positive developmental outcomes for children and youth with disabilities:

• Center for School-Wide Positive Behavioral Supports
• Center for Adolescent Research in Schools
• Thompson Center for Autism and Neuro-developmental Disorders

Areas of Study

Students pursuing a master’s degree may pursue course work in autism, behavior disorders, early-childhood special education, general special education (cross categorical), gifted education, learning disabilities or learning and instruction.

Doctoral student may study in areas such as administration and supervision of special education, behavior disorders, early-childhood special education, general special education (cross categorical), learning disabilities or developmental disabilities (cognitive impairments).

Careers

Undergraduate and graduate programs prepare teachers and leadership personnel in the field of special education. Program graduates assume roles as teachers in a variety of educational settings, as consulting teachers, college professors, researchers, school administrators and leaders in state and federal governmental agencies. Programs meet students’ needs and interests within the framework of the requirements of each specific degree and state certification guidelines.

Undergraduate

BSEd in Special Education

Major Program Requirements

Students are required to select the emphasis area in Cross Categorical Special Education (p. 447) for this degree. Refer to the emphasis area for degree requirements.

Semester Plan

For a sample plan of study refer to the semester plan designed for the emphasis in Cross Categorical Special Education (p. 447).

BSEd in Special Education with Emphasis in Cross Categorical Special Education

Major Program Requirements

Students must complete all university (p. 19), general education (p. 20), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

As Mizzou Ed continues to implement the new Missouri Standards for the Preparation of Educators mandated by the Department of Elementary and Secondary Education (DESE), curriculum changes will be required that must be met in order to complete your degree and earn teacher certification. Those changes may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

About Special Education’s Master ‘s Degrees

The Master of Arts program emphasizes research and requires 33 hours. MA candidates must follow graduate school guidelines with respect to timeliness and committee formations and complete a thesis.

The Master of Education program requires 33 hours and a comprehensive examination or project.

Admission Criteria

Fall deadline: July 1
Spring deadline: November 1
Summer deadline: April 1
Minimum GPA: 3.0/4.0
Minimum TOEFL scores:
- Internet-based test (iBT): 80
- Paper-based test (PBT): 550
Minimum preferred GRE scores:
- When did you take the GRE? On or After August 1, 2011: 291 (V 150 + Q 141) / Analytic Writing 3.5
- Prior to August 1, 2011: 900

Faculty selection committees review applications for admission into the various graduate programs. Factors considered in the graduate student review process include previous academic course work and performance, GRE scores, letters of recommendation from professors or professional supervisors and relevant professional work experiences. The letter of intent is evaluated for advising purposes and is an indication of the applicant’s motivation, professionalism and writing competencies. Interviews with faculty are often arranged as part of the admissions review process.

Required Application Materials

To the Graduate School:
- All required Graduate School documents

To the Special Education Program:
- Departmental application
- Letter of intent and professional goals
- 2 letters of recommendation (form provided by department)
Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Degree Completion

The MA program emphasizes research and requires 33 hours. MA candidates must follow Graduate School guidelines with respect to timeliness and committee formations and complete a thesis.

Retention

To remain in good standing in the master’s program and earn a master’s degree, each student must earn and maintain an overall grade point of 3.0 or higher in all required and elective course work each semester. If student’s GPA falls below 3.0 for any semester, they will be dropped from the degree program. If students receive a grade of “C” in any core or required course, remedial activities will be required. Students must also complete course work assigned a grade of “I” prior to the end of the following semester.

Satisfactory Progress

For information on general progress guidelines and the dismissal policy, see the Special Education site.

MA in Special Education with Emphasis in Behavior Disorders

Degree Requirements

Coursework and practica in MU’s Behavioral Disorders Program focus on the preparation of high quality teachers for students with behavioral disorders. MU prepares teachers for a variety of delivery settings, including general education classrooms as well as resource and self-contained classes from kindergarten through 12th grade.

The program is grounded in the MOSTEP Quality Indicators, the DESE Cross-Categorical Competencies, the standards of the Council for Exceptional Children, relevant research pertaining to best practice, significant field work and a problems-based approach to content.

The M.A. in Behavioral Disorders emphasizes applied knowledge to prepare special educators to work directly with children and youth across a variety of settings.

A minimum of 30 semester credit hours must be completed in fulfillment of degree requirements.

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Special Education program (http://gradschool.missouri.edu/academics/programs/special-education) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

1. A completed baccalaureate degree.
2. Graduate grade point average above 3.0 (on a 4.0 scale) or higher in the last 60 hours of undergraduate coursework.
3. GRE scores taken within the last five years. For GRE scores taken on or after August 1, 2011, they should reflect a preferred combined score of 291 or better on the Verbal Reasoning and Quantitative Reasoning sections and Analytical Writing score of 3.5 or better. For GRE scores taken prior to August 1, 2011, they should reflect a preferred combined score of 900 or better on the Verbal Reasoning and Quantitative Reasoning sections.
4. A minimum of two letters of recommendation (http://education.missouri.edu/SPED/prospective-students/Letter%20of%20Recommendation%20Form.doc), which on the whole, clearly reflect professional success and predict academic success at the graduate level.
5. Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant’s professional aspirations.
6. For students whose native language is not English, a score of 100 of better on the TOEFL or a grade band score of 7 or better on the IELTS taken within the past two years. Ideally, the TOEFL or IELTS will be taken 6-9 months prior to the term in which the student wishes to start their program. International students who have completed (within the last two years) one year of college-level full-time study in a country where English is the native language may waive the TOEFL requirement if they meet all the conditions.
7. Students may be required to complete an interview with special education faculty.
8. Students must complete all graduate school and program application materials by the deadline posted each term.

MA in Special Education with Emphasis in Curriculum Development for Exceptional Students

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Special Education program (http://gradschool.missouri.edu/academics/programs/special-education) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.
MA in Special Education with Emphasis in Early Childhood Special Education

Degree Requirements
The Early Childhood Special Education (ECSE) Program is a graduate program that provides students with the necessary experiences and information to work with young children, both typically developing and those with disabilities, and their families in a variety of settings, including both home and school. The program also focuses on working effectively with families and children from a variety of cultures and how to provide intervention in a culturally consistent manner.

The Masters program in ECSE is 30 credit hours. In the campus program there are six required courses. Additional coursework is negotiated with the advisor. The online program coursework is set and can be found at Mizzou Online (http://online.missouri.edu/degreeprograms/ed-specialeducation).

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Special Education program (http://gradschool.missouri.edu/academics/programs/special-education) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). MA in Special Education with Emphasis in General

This program is no longer active/available.

MA in Special Education with Emphasis in Learning Disabilities

Degree Requirements
A Master’s degree with an emphasis in Learning Disabilities may be earned in conjunction with certification to teach in the state of Missouri. Although the state no longer offers certification in the area of learning disabilities, certification in cross-categorical special education can be obtained, along with a Master’s degree in Learning Disabilities, through supplemental coursework. Coursework and practica in the LD program focus on the preparation of high quality teachers for students with a range of learning and behavioral needs. Graduates may work in a variety of service delivery settings, including general education classes as well as resource and self-contained classes from kindergarten through 12th grade. A minimum of 30 semester credit hours must be completed in fulfillment of degree requirements.

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Special Education program (http://gradschool.missouri.edu/academics/programs/special-education) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). MEd in Special Education with Emphasis in Autism

Degree Requirements

This program prepares personnel to effectively implement evidenced based practices for students along the full continuum of autism spectrum disorders (ASD). The MU Autism Master's program prepares personnel to effectively implement evidenced based practices for students along the full continuum of autism spectrum disorders (ASD). The program enables special educators to integrate all areas of curriculum to effectively assess and develop social competence benchmarks for students with ASD. The College of Education’s Special Education program delivers curriculum and practica in collaboration with the Thompson Center for Autism and Neurodevelopmental Disorders (http://thompsoncenter.missouri.edu). A minimum of 30 semester credit hours must be completed in fulfillment of degree requirements. The MEd in Autism is also available online through MU Direct (http://mudirect.missouri.edu/degprog/autism).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (http://gradschool.missouri.edu/academics/programs/special-education) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

1. A completed baccalaureate degree.
2. Graduate grade point average above 3.0 (on a 4.0 scale) or higher in the last 60 hours of undergraduate coursework.
3. GRE scores taken within the last five years. For GRE scores taken on or after August 1 2011, they should reflect a preferred combined score of 291 or better on the Verbal Reasoning and Quantitative Reasoning sections and Analytical Writing score of 3.5 or better. For GRE scores taken prior to August 1 2011, they should reflect a preferred combined score of 900 or better on the Verbal Reasoning and Quantitative Reasoning sections.
4. A minimum of two letters of recommendation (http://education.missouri.edu/SPED/prospective-students/Letter%20of%20Recommendation%20Form.doc), which on the whole, clearly reflect professional success and predict academic success at the graduate level.
5. Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant’s professional aspirations.
6. For students whose native language is not English, a score of 100 of better on the TOEFL or a grade band score of 7 or better on the IELTS taken within the past two years. Ideally, the TOEFL or IELTS will be taken within the past two years, one year of college-level full-time study in a country where English is the native language may waive the TOEFL requirement if they meet all the conditions.
7. Students may be required to complete an interview with special education faculty.
8. Students must complete all graduate school and program application materials by the deadline posted each term.

MEd in Special Education with Emphasis in Behavior Disorders

Degree Requirements

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (http://gradschool.missouri.edu/academics/programs/special-education) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

Coursework and practica in MU's Behavioral Disorders Program focus on the preparation of high quality teachers for students with behavioral disorders. MU prepares teachers for a variety of delivery settings, including general education classrooms as well as resource and self-contained classes from kindergarten through 12th grade.

The program is grounded in the MOSTEP Quality Indicators, the DESE Cross-Categorical Competencies, the standards of the Council for Exceptional Children, relevant research pertaining to best practice, significant field work and a problems-based approach to content.

The M.Ed. in Behavioral Disorders emphasizes applied knowledge to prepare special educators to work directly with children and youth across a variety of settings.

A minimum of 30 semester credit hours must be completed in fulfillment of degree requirements.

Admissions

1. A completed baccalaureate degree.
2. Graduate grade point average above 3.0 (on a 4.0 scale) or higher in the last 60 hours of undergraduate coursework.
3. GRE scores taken within the last five years. For GRE scores taken on or after August 1 2011, they should reflect a preferred combined score of 291 or better on the Verbal Reasoning and Quantitative Reasoning sections and Analytical Writing score of 3.5 or better. For GRE scores taken prior to August 1 2011, they should reflect a preferred combined score of 900 or better on the Verbal Reasoning and Quantitative Reasoning sections.
4. A minimum of two letters of recommendation (http://education.missouri.edu/SPED/prospective-students/Letter%20of%20Recommendation%20Form.doc), which on the whole, clearly reflect professional success and predict academic success at the graduate level.
5. Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant’s professional aspirations.

6. For students whose native language is not English, a score of 100 of better on the TOEFL or a grade band score of 7 or better on the IELTS taken within the past two years. Ideally, the TOEFL or IELTS will be taken 6-9 months prior to the term in which the student wishes to start their program. International students who have completed within the last two years, one year of college-level full-time study in a country where English is the native language may waive the TOEFL requirement if they meet all the conditions.

7. Students may be required to complete an interview with special education faculty.

8. Students must complete all graduate school and program application materials by the deadline posted each term.

MEd in Special Education with Emphasis in Combined Early Childhood and Autism

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (http://gradschool.missouri.edu/academics/programs/special-education) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MEd in Special Education with Emphasis in Cross Categorical, Certification

Degree Requirements

MU’s cross-categorical disabilities program is tailored to graduate students who are receiving initial and secondary certification in cross-categorical special education. Upon completion of the degree, graduates are certified to teach students with mild disabilities (i.e., learning disabilities, emotional/behavior disorders, mental retardation) and are certified to teach all grades K-12.

In addition to enrolling in courses to fulfill general certification requirements, students are required to take graduate coursework (30 hours) in the area of cross-categorical disabilities.

The coursework represents a broad scope of content including language development, assessment, advanced behavior management, vocational education, collaboration and consultation, literacy instruction, mathematics instruction, research, and trends and issues in special education. In addition to the above requirements, students in the cross-categorical program also need to take a 3-hour characteristics of students with cross-categorical disabilities course and a 4-hour strategies for students with cross-categorical disabilities course.

To enhance the generalization of critical skills and knowledge to the classroom setting, students are also required to take two practica concurrent with the characteristics and methods courses that include field experiences and applications of key concepts. Students are required to have their practica represent the range of grade levels for which they will be responsible. More specifically, if their first practicum was in an elementary setting, then their second will be in a middle school, junior high or high school setting or vice versa.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (http://gradschool.missouri.edu/academics/programs/special-education) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

1. A completed baccalaureate degree.

2. Graduate grade point average above 3.0 (on a 4.0 scale) or higher in the last 60 hours of undergraduate coursework.

3. GRE scores taken within the last five years. For GRE scores taken on or after August 1, 2011, they should reflect a preferred combined score of 291 or better on the Verbal Reasoning and Quantitative Reasoning sections and Analytical Writing score of 3.5 or better. For GRE scores taken prior to August 1, 2011, they should reflect a preferred combined score of 900 or better on the Verbal Reasoning and Quantitative Reasoning sections.

4. A minimum of two letters of recommendation (http://education.missouri.edu/SPED/prospective-students/Letter%20of%20Recommendation%20Form.doc), which on the whole, clearly reflect professional success and predict academic success at the graduate level.

5. Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant’s professional aspirations.

6. For students whose native language is not English, a score of 100 of better on the TOEFL or a grade band score of 7 or better on the IELTS taken within the past two years. Ideally, the TOEFL or IELTS will be taken 6-9 months prior to the term in which the student wishes to start their program. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MEd in Special Education with Emphasis in Early Childhood Special Education

The Early Childhood Special Education (ECSE) Program is a graduate program that provides students with the necessary experiences and information to work with young children, both typically developing and those with disabilities, and their families in a variety of settings, including both home and school. The program also focuses on working effectively with families and children from a variety of cultures and how to provide intervention in a culturally consistent manner.

The Masters program in ECSE is 30 credit hours. In the campus program there are six required courses. Additional coursework is negotiated with the advisor. The online program coursework is set and can be found at Mizzou Online (http://online.missouri.edu/degreqprograms/ed-specialeducation).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (http://gradschool.missouri.edu/academics/programs/special-education) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). 7. Students may be required to complete an interview with special education faculty.

8. Students must complete all graduate school and program application materials by the deadline posted each term.

MEd in Special Education with Emphasis in Gifted Education

Degree Requirements

Online Degree Only.

The Gifted Education Master’s Program (MEd) is a graduate level program designed to provide candidates with advanced preparation in gifted education methodology and practices. Candidates become equipped with the knowledge and skills necessary to work with children and youth in the field of gifted education. The program meets Missouri Department of Education (DESE) academic requirements for Missouri Gifted Certification. This program is offered through Mizzou Online (http://online.missouri.edu/degreqprograms/ed-gifted).

Applicants who are accepted into the master’s program will participate in a 30-hour online degree program with 15 hours of gifted education courses and 15 hours of core course work. Courses are selected to provide educators with skills and knowledge in current learning theory and to translate this knowledge into practical strategies and techniques for use in the classroom.

The 15 hours of gifted focus courses include content covering, nature and needs of gifted students, curriculum methods, differentiated curriculum, assessment and evaluation, and gifted practicum. The 15 hours of core course work in this program include study in learning theory, research with exceptional children, instructional technology, instructional leadership, and instructional strategies.
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (http://gradschool.missouri.edu/academics/programs/special-education) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. 8. Students must complete all graduate school and program application materials by the deadline posted each term.

MEd in Special Education with Emphasis in Learning Disabilities

Degree Requirements

A Master’s degree with an emphasis in Learning Disabilities may be earned in conjunction with certification to teach in the state of Missouri. Although the state no longer offers certification in the area of learning disabilities, certification in cross-categorical special education can be obtained, along with a Master’s degree in Learning Disabilities, through supplemental coursework. Coursework and practica in the LD program focus on the preparation of high quality teachers for students with a range of learning and behavioral needs. Graduates may work in a variety of service delivery settings, including general education classes as well as resource and self-contained classes from kindergarten through 12th grade. A minimum of 30 semester credit hours must be completed in fulfillment of degree requirements.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (http://gradschool.missouri.edu/academics/programs/special-education) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Plan of Study

The EdD program requires 72 hours beyond the requirements of the master’s degree.

Qualifying Exam

Doctoral students must successfully pass a qualifying exam. This is given to assess the student’s current knowledge of the field, their ability to synthesize professional literature, engage in professional writing practices, and orally present/discuss key issues within the field. This process is conducted by three faculty members and may be used to help define the student’s plan of study.

Comprehensive Exam and Dissertation

Doctoral students must complete comprehensive exams, which have a written and oral component, which is constructed and evaluated by the student’s doctoral committee in order to advance to “candidacy” status. A minimum of six hours of 9090 Research is required for the doctoral program in completion of the dissertation.

Satisfactory Progress

For information on general progress guidelines and the dismissal policy, see the Special Education site.

EdD in Special Education with Emphasis in Administration and Supervision of Special Education

Faculty selection committees review applications for admission into the various graduate programs. Factors considered in the graduate student review process include previous academic course work and performance, GRE scores, letters of recommendation from professors or professional supervisors and relevant work experiences. The letter of intent is evaluated for advising purposes and is an indication of the applicant’s motivation, professionalism and writing competencies. Interviews with faculty are often arranged as part of the admissions review process.

requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

PhD in Special Education with Emphasis in Behavior Disorders

Degree Overview and Requirements

The Doctorate of Philosophy program in Behavior Disorders supports advanced instruction and research in Behavior Disorders. Candidates complete individualized programs of study to meet their learning objectives and prepare for further research in the field. The candidate will build on prior graduate coursework through special education doctoral coursework, specified behavior disorders coursework, and dissertation preparation and defense. Students meeting entrance criteria will be conditionally admitted to the program, assigned an advisor, and expected to enroll in designated requisite coursework.

1. After completion of 9 credit hours, including 3 credits of quantitative methods plus 6 credits of special education doctoral core coursework, students must pass a qualifying examination to be fully admitted into the department.

2. Upon successful completion of the qualifying examination, students form a program committee and develop a program plan. The committee shall consist of four or more graduate faculty members (at least three from within the department and at least one from outside the department). The program plan will delineate coursework and competency activities to meet department requirements.

3. Once the majority of course-work and competencies are completed (80-90%), students will be required to pass a comprehensive examination to advance to candidacy.

4. Upon successful completion of the comprehensive examination, students will form a dissertation committee and develop a research proposal. The dissertation committee may be the same as the program committee or may change based on the need to include faculty members with specific areas of expertise. Once all committee members approve the proposal, students can begin implementation of the dissertation study.

5. Upon completion of the study, students must submit a written draft to the dissertation committee and orally defend their work.

6. Students will graduate only after all dissertation committee members approve the written dissertation and oral defense.

7. Students must also comply with all College of Education and Graduate School guidelines.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Special Education program (http://gradschool.missouri.edu/academics/programs/special-education/doctorate.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

Admissions to Doctoral programs in Special Education will be based upon the following criteria:

1. Graduate grade point average above 3.5 and a preferred combined score of 297 or better on the Verbal Reasoning and Quantitative Reasoning sections and Analytical Writing score of 4.0 or better on the GRE taken on or after August 1, 2011. For GRE scores taken prior to August 1, 2011, they should reflect a preferred combined score of 1000 or better on the Verbal Reasoning and Quantitative Reasoning sections.

2. A minimum of three years full-time appropriate teaching or professional experience in pre K - 12 or other direct services with persons with disabilities.

3. A minimum of three letters of recommendation, which on the whole, clearly reflect professional success and predict academic success at the advanced graduate level.

4. Statement of purpose indicating clearly that the proposed doctorate is appropriate to the applicant’s professional aspirations.

5. For students whose native language is not English, a score of 100 of better on the TOEFL or a grade band score of 7 or better on the IELTS taken within the past two years. Ideally, the TOEFL or IELTS will be taken 6-9 months prior to the term in which the student wishes to start their program.

6. An interview may be required by the admissions committee.

7. Confer or correspond with one of the special education faculty members in the proposed area of concentration prior to submitting an application. This contact is ultimately a requirement for admission.

All requirements implicit in the above statement must be completed before consideration of an applicant for admission. The department cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of all applicants. It is the responsibility of this committee to exercise professional judgment related to the criteria which applicants must meet in order to be considered for admission to the program. The committee frequently must use its judgment to discern from among a number of applicants those individuals who are judged to have the greatest potential for program success and ultimate contribution to the profession. Membership in under-represented groups will be a special consideration with regards to admission by the committee.

PhD in Special Education with Emphasis in Curriculum Development for Exceptional Students

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Special Education program (http://gradschool.missouri.edu/academics/programs/special-education/doctorate.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

PhD in Special Education with Emphasis in Early Childhood Special Education

Degree Overview and Requirements

The Doctorate of Philosophy program in ECSE supports advanced instruction in Early Childhood Special Education. Candidates will develop a program to meet their learning and research goals in the field of Early Childhood Special Education.

1. After completion of 9 credit hours, including 3 credits of quantitative methods plus 6 credits of special education doctoral core coursework, students must pass a qualifying examination to be fully admitted into the department.
2. Upon successful completion of the qualifying examination, students form a program committee and develop a program plan. The committee shall consist of four or more graduate faculty members (at least three from within the department and at least one from outside the department). The program plan will delineate coursework and competency activities to meet department requirements.
3. Once the majority of course-work and competencies are completed (80-90%), students will be required to pass a comprehensive examination to advance to candidacy.
4. Upon successful completion of the comprehensive examination, students will form a dissertation committee and develop a research proposal. The dissertation committee may be the same as the program committee or may change based on the need to include faculty members with specific areas of expertise. Once all committee members approve the proposal, students can begin implementation of the dissertation study.
5. Upon completion of the study, students must submit a written draft to the dissertation committee and orally defend their work.
6. Students will graduate only after all dissertation committee members approve the written dissertation and oral defense.
7. Students must also comply with all College of Education and Graduate School guidelines.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Special Education program (http://gradschool.missouri.edu/academics/programs/special-education/doctorate.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

Admissions to Doctoral programs in Special Education will be based upon the following criteria:

1. Graduate grade point average above 3.5 and a preferred combined score of 297 or better on the Verbal Reasoning and Quantitative Reasoning sections and Analytical Writing score of 4.0 or better on the GRE taken on or after August 1, 2011. For GRE scores taken prior to August 1, 2011, they should reflect a preferred combined score of 1000 or better on the Verbal Reasoning and Quantitative Reasoning sections.
2. A minimum of three years full-time appropriate teaching or professional experience in pre K - 12 or other direct services with persons with disabilities.
3. A minimum of three letters of recommendation, which on the whole, clearly reflect professional success and predict academic success at the advanced graduate level.
4. Statement of purpose indicating clearly that the proposed doctorate is appropriate to the applicant’s professional aspirations.
5. For students whose native language is not English, a score of 100 or better on the TOEFL or a grade band score of 7 or better on the IELTS taken within the past two years. Ideally, the TOEFL or IELTS will be taken 6-9 months prior to the term in which the student wishes to start their program.
6. An interview may be required by the admissions committee.
7. Confer or correspond with one of the special education faculty members in the proposed area of concentration prior to submitting an application. This contact is ultimately a requirement for admission.

All requirements implicit in the above statement must be completed before consideration of an applicant for admission. The department cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of all applicants. It is the responsibility of this committee to exercise professional judgment related to the criteria which applicants must meet in order to be considered for admission to the program. The committee frequently must use its judgment to discern from among a number of applicants those individuals who are judged to have the greatest potential for program success and ultimate contribution to the profession. Membership in under-represented groups will be a special consideration with regards to admission by the committee.

PhD in Special Education with Emphasis in General

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Special Education program (http://gradschool.missouri.edu/academics/programs/special-education/phd.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. PhD in Special Education with Emphasis in Learning Disabilities

Degree Overview and Requirements

The Doctorate of Philosophy program in Learning Disabilities supports advanced instruction in Learning Disabilities. Candidates will develop a program to meet their learning and research goals in the field of Learning Disabilities.

1. Students meeting entrance criteria will be conditionally admitted to the program, assigned an advisor, and expected to enroll in designated requisite coursework.
2. After completion of 9 credit hours, including 6 credits of special education doctoral course work, students must pass a qualifying examination to be fully admitted into the department.
3. Upon successful completion of the qualifying examination, students form a program committee and develop a program plan. The committee shall consist of four or more graduate faculty members (at least three from within the department and at least one from outside the department). The program plan will delineate coursework and competency activities to meet department requirements.
4. Once the majority of course-work and competencies are completed (80-90%), students will be required to pass a comprehensive examination to advance to candidacy.
5. Upon successful completion of the comprehensive examination, students will form a dissertation committee and develop a research proposal. The dissertation committee may be the same as the program committee or may change based on the need to include faculty members with specific areas of expertise. Once all committee members approve the proposal, students can begin implementation of the dissertation study.
6. Upon completion of the study, students must submit a written draft to the dissertation committee and orally defend their work.
7. Students will graduate only after all dissertation committee members approve the written dissertation and oral defense.
8. Students must also comply with all College of Education and Graduate School guidelines.

Admissions

Additional Minors and Certificates

- Education

**Graduate Certificates**
- Certificate in Education Policy (p. 461)
- Certificate in Elementary Mathematics Specialist (p. 461)
- Certificate in Higher and Continuing Education Administration (p. 461)
- Certificate in Multicultural Education (p. 462)
- Certificate in Positive Psychology (p. 463)
- Certificate in Qualitative Research (p. 463)
- Certificate in Teaching English to Speakers of Other Languages (p. 464)

**Graduate Minors**
- Minor in Multicultural Psychology (p. 464)

**Graduate Certificate in Education Policy**

**Contact Information**
Educational Leadership and Policy Analysis
202 Hill Hall
573-882-8221
http://education.missouri.edu/ELPA/program_areas/degree_pages/policy_studies_certificate.php

Through an interdisciplinary partnership among Education, Law, and Public Policy scholars, our Education Policy Graduate Certificate serves to develop critical leaders, policymakers, and scholars who demonstrate excellence in implementing and analyzing policy. A carefully planned set of courses will provide students with the knowledge, skills, and tools to answer tough policy questions facing our society, for instance: How do we address the rising costs of higher education? Segregated schooling? Undocumented immigrant students? Families who speak languages other than English?

The Education Policy Graduate Certificate will provide students with:

- **Knowledge** that they can apply to the study of education policy within their major discipline or their work in policy settings;
- **Skills** in analyzing education policy issues, i.e., understanding differing values, political and economic arguments, costs/benefits, and policy processes;
- **Conceptual tools** to use in understanding and resolving issues faced in educational policy development and implementation.

**Foundations - Students choose 1 of the following:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

</tr>
</tbody>
</table>

After coursework is complete, students will develop a mini-portfolio to demonstrate their learning.

Applications accepted anytime. For more information about this graduate certificate, contact the ELPA Department by phone at 573-882-8221 or by e-mail at elpagrad@missouri.edu

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/education-policy-graduate-certificate/ed-policy-ge/Gedt.html

**Graduate Certificate in Elementary Mathematics Specialist**

The EMS graduate certificate program includes five integrated mathematics content/pedagogy courses, each with an attached internship and two leadership development courses (total of 24 credits). The program is designed for inservice K-6 teachers interested in pursuing advanced learning experiences and training to increase their knowledge and skill to teach or lead others in teaching mathematics in elementary classrooms. That is, the program is designed for teachers currently working full time. The courses will be offered over a 2-year cycle beginning in the Fall semester (6 semesters of part-time student effort).

For information about certificate, contact Dr. Barbara Reys:
Phone: 573-882-4406
Address: 121 F Townsend
e-mail: reysb@missouri.edu

**Graduate Certificate in Higher and Continuing Education Administration**

**Contact Information**
Department of Educational Leadership and Policy Analysis
202 Hill Hall
573-882-8221
Due to multiple and growing demands upon the academy for quality control, accountability, and productivity, administration of higher education has become increasingly complex. The Graduate Certificate in Higher and Continuing Education Administration is designed to address the need for enhanced understanding of the higher education institutional context and for improved skills in areas required for effective administration of the higher education enterprise.

The Graduate Certificate in Higher and Continuing Education Administration is designed to provide students with an overview of higher education administration and governance, and with some technical knowledge about various aspects of administration, e.g., finance, law, policy.

## Graduate Certificate in Multicultural Education

This certificate will provide the requisite awareness, knowledge and skill to effectively work with students and families from diverse cultural backgrounds and is ideal for teachers, counselors and administrators in P-12 school settings. By creating this online certificate, Mizzou is working to increase the number of qualified teachers and other school personnel who can serve diverse populations and prepare all students to function more effectively in society. The 12 hour certificate can be completed entirely online, but some students may choose electives that are offered on campus.

Certificate web site: Multicultural Education Graduate Certificate. (http://online.missouri.edu/degreeprograms/ed-multicultural)

### Certificate Details

#### Core courses

The foundation of the certificate starts with the following two courses (6 credit hours).

- Diversity Issues in School Mental Health
- Diversity and Multiculturalism II: Practical Applications

#### Electives

Students complete two courses (6 credit hours).

- African American Education: Historic and Current Issues
- Gay, Lesbian and Bisexual Issues in the Schools
- Immigrant Issues in Education

### How To Apply

Certificate program admission requirements will be the same as those for the Office of Graduate Studies. (http://gradstudies.missouri.edu/admissions/eligibility-process/degree-certificate-seeking-applicants/admission-process)

- Grade point average of B or better in the last 60 hours of undergraduate education for applicants with less than a master's degree.
- Submit the Office of Graduate Studies online application (https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=umc-grad).
- Upload unofficial transcripts when using the Office of Graduate Studies online application system.
- Two letters of recommendation.
- GRE scores are NOT required.

### Application Deadline

None. Rolling admission.

### Financial Aid

To receive financial aid, students must be admitted to the graduate certificate program. Financial aid is generally available to eligible students who are fully accepted into the program and who carry a course load of at least four credit hours per semester.

## Graduate Certificate in Online Educator

The Online Educator Graduate Certificate Program will equip individuals with the knowledge and skills needed to design and provide effective online learning experiences including:

- Designing online learning activities and assessments for meaningful learning
• Designing, facilitating, and evaluating online discussions
• Promoting student engagement and motivation in online learning environments
• Understanding unique characteristics of online learning environments
• Selecting appropriate technology tools and learning objects to support online learners
• Using Learning Management Systems to support and deliver online learning
• Seeking for and evaluating Internet-based information and resources that can be used to enhance online learning
• Organizing course materials in an online format

Graduate Certificate in Positive Psychology

This online 15-credit hour graduate certificate in positive psychology from Mizzou’s Department of Educational, School, and Counseling Psychology (ESCP) is designed for individuals seeking a program that emphasizes applied interventions and theory in building thriving individuals, families, communities and organizations. Combining 21st century psychology and several ancient philosophies, contemporary positive psychology is focused on advancement of the individual and their collective well-being.

The program will provide you with a thorough understanding of the science of well-being and flourishing that will allow you to be more effective in your professional and personal life. Individuals may use this graduate certificate for personal enrichment or to increase their professional marketability across many career paths such as life/career coaching, teaching, managing, and organizational consulting.

Note: This graduate certificate does not provide counselor certification.

**Graduate Certificate in Teaching English to Speakers of Other Languages**

The Graduate Certificate in Teaching English to Speakers of Other Languages (TESOL) prepares English language teachers, English language program administrators, language testers, and educational materials writers to work in contexts where English is a foreign language (EFL contexts). The objectives of the certificate are to develop professionals with a) knowledge of the structure of the English language; b) an understanding of how languages are used and learned; and c) skills in designing and implementing pedagogical tasks to facilitate language learning. The certificate consists of 18 graduate credit hours divided among five core courses and one elective course.

**Graduate Minor in Multicultural Psychology**

As we enter the new millennium, the U.S. population is becoming more multiracial, multietnic, and multilingual. Some estimate that by the year 2020, racial and ethnic minorities will become the numerical majority. This demographic shift has already occurred in specific contexts, such as K-12 schools in Los Angeles. Applied psychologists and educators have begun to develop competency standards for professionals to provide culturally relevant and effective services to our ever-changing population. In fact, multiculturalism has been identified as the fourth focus in counseling psychology. The purpose of the graduate minor in multicultural psychology and education would be to (a) expose graduate students to the growing theoretical and empirical research completed in the fields of multicultural psychology and education, (b) help graduate students develop multicultural competencies in research and practice, and (c) provide graduate students with training necessary to meet the psychological and educational demands of diverse populations.

**The requirements for the minor are listed below.**

- A minimum of 12 credit hours
- 9 credit hours must be taken as a graduate student at the University of Missouri
- No more than 6 credit hours should be listed in the masters or doctoral planner. That is, a maximum of 6 hours can overlap between the courses applied to the Minor in Multicultural Psychology and the courses applied toward a masters or doctoral degree.
- A minimum of 9 credit hours must be 8000 or above (graduate level)
- 6 credit hours must be taken within the core area with a foci on racial and ethnic minorities (see listing below)
- 3 credit hours must be taken in the auxiliary area (see listing below)
- 3 credit hours must be taken in the skills area (see listing below)

**Core Courses**

Must complete at least 6 credit hours from the following courses with a main emphasis on race/ethnicity in psychology and/or education

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

</table>

II. Applied Multicultural Skills

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 8943</td>
<td>Practicum in Multicultural Counseling Interventions</td>
<td>3</td>
</tr>
</tbody>
</table>

Pre-approved Multiculturally-designated applied course (e.g. counseling practica, teaching practica, group counseling practica)

Applied experience via community outreach programs, work placements in agencies, or extended volunteer experiences in community agencies.
Multicultural Competency Portfolio to demonstrate awareness, knowledge and skill competencies, as approved by a Center Director.

Consultation courses in organization or systemic changes including applied consultation activities, as pre-approved by a Center Director.

* The scope and quality of the research project is expected to be of such a caliber that it could be submitted to a refereed journal in the student’s discipline. The research project must be on a multicultural-related topic (i.e. issues related to race, sexual orientation, gender, and international concerns). Successful completion of this requirement will consist of approval of the project from a Director of the Center for Multicultural Research, Training and Consultation, or have an ESCP faculty affiliated with the Center on the committee with at least one committee member having expertise in multicultural issues.

^ The person must demonstrate competencies in working with diverse populations (with an emphasis on racial and ethnic minority populations).
College of Engineering

Administration
Robert W. Schwartz, Interim Dean
W1025 Lafferre Hall
(573) 882 4375
schwartzrob@missouri.edu

When engineering classes at the University of Missouri began in 1849, a strong tradition was born that continues to grow. Today, the College of Engineering includes the first electrical engineering department established west of the Mississippi River and the only industrial engineering program in Missouri. The college offers fully accredited degree programs in biological, chemical, civil, computer, electrical, industrial and mechanical engineering, along with computer science and information technology. All programs offer both undergraduate and graduate degrees. Naval Science is under the academic administration of the college as well. The hallmark of the College of Engineering is excellence in teaching and scholarly pursuits.

Mission
The College of Engineering will continuously improve the quality of its primary areas of responsibility—teaching, research and service. In so doing, the College:

• Provides engineering students and practicing professionals with the expertise and new knowledge required to solve society’s complex technological problems
• Develops and utilizes enabling technologies for teaching, research, service and outreach
• Prepares students and practicing professionals to compete in a global economy
• Instills students with a commitment to life-long learning

Undergraduate

• Admissions (p. 466)
• Graduation Requirements (p. 468)
• Academic Regulations (p. 468)
• Student Services (p. 469)

Admissions

Direct Freshman Admission to Engineering
Entering freshmen are expected to have completed 17 units of approved high school course work (in grades 9-12), including 4 units in English, 4 in mathematics and 3 in science with laboratory. Mathematics should include 2 units of algebra, 1 unit of plane and solid geometry (combination course), and 1/2 unit of trigonometry. Additional senior mathematics is recommended.

For direct admission to the College of Engineering, the applicant must meet the qualifications listed below (these numbers are subject to change).

• ACT-Math of at least 24 AND
• ACT-Composite of at least 24 OR high school class rank in the upper 25 percent

The average ACT scores for first-time freshmen admitted to the College of Engineering for fall 2011 were ACT-Composite 28.1, ACT-Math 28.5 and ACT-English 27.4.

Pre-Engineering Program (PEP)
Freshmen who do not meet the criteria for direct admission to the College of Engineering are admitted initially into the Pre-Engineering Program. Although admitted to the College of Arts and Science, each PEP student receives advising by an engineering advisor.

PEP reduces freshman pressures while preserving alternatives. Because PEP students are enrolled in the College of Arts and Science, degree options in the College of Arts and Science are available to those who may decide to change their focus from engineering.

Most first-semester PEP students enroll in one preparatory math course and three courses in the College of Arts and Science, which count in both the engineering and arts and science degree programs. The prime objective is to strengthen math preparation sufficiently for success in engineering.

PEP students are eligible to transfer to the College of Engineering when they meet the following requirements:

• Satisfactory completion of 24 credits
• GPA of 2.0 or higher both Cumulative and last graded term
• A grade of C- or better in MATH 1500 Analytic Geometry and Calculus I or, for Information Technology students, MATH 1400 Calculus for Social and Life Sciences I
• Academic good standing

Declared and Undeclared Status
Freshmen engineering students will start in an undeclared status unless they meet criteria for direct departmental admission (see criteria below). Students admitted to the College of Engineering in undeclared status will work to complete a foundational curriculum consisting of math, science, and engineering courses. Upon completion of the foundational curriculum students will apply for entrance to available degree programs. The specific standards and capacity vary among the degree programs as necessary to align enrollments with educational resources.

* Additional students may be admitted to the departments based on core GPA and department capacity.
** Students who were probationary direct admits will return to "undeclared engineering" if they receive a B or lower in any of the listed core courses.

Undeclared students should discuss course selection with the academic advisor each semester to keep options open among departmental curricula.

To transfer from one department to another, students must submit an application to the new department. Admittance to the new department will be based upon the student’s academic performance and departmental capacity. Students who transfer must satisfy the specific degree requirements of the new department.

Engineering Dean’s Scholars Program

The purpose of the Engineering Dean’s Scholars Program is to recognize, mentor and train the highest-achieving students in scholarship and leadership. Engineering Dean’s Scholars participate in the Engineering Scholars Freshman Interest Group (FIG) which will be housed in Hudson or Gillett Residence Hall. Faculty-scholar lunches are held several times during the semester to allow the scholars to meet with engineering faculty and to learn about the engineering profession and undergraduate research opportunities.

Scholars participate in leadership or mentoring activities during their sophomore, junior and senior years. Examples of such activities include serving as engineering ambassadors or peer advisors for an engineering FIG. Students chosen for peer advisor positions have their room and board covered in exchange for their services.

Engineering Dean’s Scholars are awarded a $1000 scholarship in addition to the $2000 Engineering Achievement Award and any other scholarships awarded. The Dean’s Scholarship is renewable for up to eight semesters with 3.5 cumulative GPA at the end of each spring semester.

Students who have ACT math and composite scores of 32 and a high school rank in the top 10 percent of their class will be sent applications upon admission. Students who are close to these criteria may request an application by contacting the engineering dean’s office at the address below. Consideration of students who do not meet the suggested minimum criteria will be contingent upon available space in the program. Applications are due February 1st.

Mizzou Engineering Dean’s Scholars Program

W1025 Lafferre Hall
University of Missouri
Columbia, MO 65211
Transfer Students

Students wishing to transfer to MU from an accredited college or university are subject to University regulations described in this catalog. The MU College of Engineering cooperates with many colleges through articulation agreements that help pre-engineering students transfer to MU with maximum ease and minimum loss of credits. A student may take the first two years at the participating school and then transfer to MU for the junior and senior years in engineering. After the program is completed, the student is awarded a BS degree in the chosen engineering field.

Transfer students may be admitted to the College as undeclared or may start with a departmental affiliation. Eligibility to enter the College with a departmental affiliation is based upon the student’s previous academic performance and department capacity.

Transfer students who enter the College as undeclared, are required to submit an application to enter a degree program. Admittance to the degree program is based upon previous academic performance and department capacity.

To be recommended for the BS degree from the College of Engineering, a student transferring from an accredited institution must complete at least 30 upper-level credits in the degree program at a UM System campus. At least 21 of the 30 credits must be upper-level engineering courses approved by the department awarding the degree.

A student transferring with senior standing from another UM System campus must complete the last 15 credits in residence on the campus where the degree program is located. Twelve of these 15 credits must be in engineering and approved by the department awarding the degree.

Any student whose enrollment in any college-level academic program resulted in dismissal, departure or who are on probation will not be admitted to the College of Engineering.

International Admission

Admission of international students is determined on an individual basis by a committee of representatives from the Admissions Office and the College of Engineering.

Before registering for classes at the University, international students must take the MU English Language Test, developed for international students. Students passing the test are eligible to take ENGLISH 1000 and any other required English courses.

International students whose test scores indicate that additional English training is needed, including those with transferred English credit, are required to register for an English-language support class. The course, developed for international students, should be taken during the first semester of enrollment. This course does not count toward graduation credit, but regular attendance is required and failure to attend will result in dismissal. The English-language support class taken must be satisfactorily completed before the student can enroll in ENGLISH 1000. Students not satisfactorily completing the class in the first semester of enrollment must re-enroll in the second semester. If the student does not satisfactorily complete the English-language support class in the second term of enrollment, the student will not be permitted to re-enroll in the College of Engineering.

60 Credit Hour Rule

To remain in the College of Engineering, students must be admitted to an Engineering degree program by the end of the semester when their total credit hours earned are equal to or greater than 60. Students not admitted by 60 credit hours will become ineligible to remain in the College of Engineering and must transfer to another MU school or college in order to remain a student at the University of Missouri. Transfer students who enter the College of Engineering with 60 or greater credit hours will be given one semester to gain admittance to a degree program. If not admitted to a degree program after one semester, they will become ineligible to remain in the College of Engineering. If more than one semester is needed to complete the courses required to enter a degree program, a waiver may be granted at the discretion of the college. If students are pre-enrolled for the following term at the time they become ineligible to remain in the College of Engineering, all Engineering courses will be administratively dropped.

Graduation Requirements

The curriculum provides a solid foundation of mathematics and physical sciences followed by the application of these sciences in engineering specialties. The balance of the curriculum encompasses communication skills, English, social sciences and humanities courses.

Many freshmen are eligible to start with calculus. However, some can profit from additional pre-calculus preparation, which is an addition to the undergraduate curricula.

Students should access the engineering web site (http://engineering.missouri.edu) for details regarding social and behavioral sciences and humanities and fine arts requirements.

In addition to the University’s general education and graduation requirements, the departments in the College of Engineering may require further specific courses to better equip students to perform in their chosen fields of study.

While many students complete the BS degree program in four years, some may find it advisable to extend the curriculum in order to carry lighter semester loads, add preparatory courses or compensate for part-time work.

GPA Requirements for Graduation from the College of Engineering

- GPA of record of at least 2.0
- GPA of at least 2.0 in all engineering courses offered by one of the four campuses of the UM System. “Engineering courses” include all courses that are offered through the College of Engineering or its equivalent on the four campuses, or that have “Engineering” in the curricular designator. Only the last grade in a repeated course will be used in the calculation.

Academic Regulations

Degree with Honors Requirements

Latin Honors are granted to students who meet the following cumulative GPA requirements:

<table>
<thead>
<tr>
<th>Latin Honor</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>summa cum laude</td>
<td>3.9</td>
</tr>
</tbody>
</table>

University of Missouri
magna cum laude  3.7
cum laude  3.5

**Departmental Honors**

The college maintains an undergraduate honors program to further challenge those who have established a minimum GPA of 3.0 at the beginning of the junior year. A comparable grade point average is required of transfer students. The program leads to an undergraduate honors thesis on a research or advanced design project, provides for additional curricula flexibility and contains features that ease the transition to graduate school.

Opportunities available to honors students include:

- More personal attention from an honors advisor
- Independent study or undergraduate research with a senior faculty member whose specialty interests the honors candidate

A student who successfully completes the engineering honors program, including the independent project, will be designated an “Honors Scholar in Engineering.” Interested students should contact their departmental office.

Qualified engineering students are also welcome to join the programs of the Honors College and may enroll in various honors courses and honors sections of regular courses.

**Courses in Basic Skills**

No basic skills courses may be taken to fulfill graduation requirements.

**Curriculum of Record**

The curriculum of record is the curriculum a student must satisfy to meet graduation requirements. For students who maintain continuous, full-time enrollment, the curriculum of record is the one approved by the College of Engineering at the time the student achieves upper-division status in the discipline of choice. For others, the curriculum of record is decided by the department faculty.

**Academic Probation and Dismissal**

1. A student whose term and cumulative UM GPA are 2.0 or higher is in good academic standing. A “term” is defined as a semester or summer session.
2. A student will be placed on academic probation if while in good academic standing the student has a term GPA less than 2.0 but equal to or greater than 1.0.
   - While on academic probation, a student must enroll in and complete each semester at MU at least 12 credits of course work necessary for the degree. Courses taken through MU’s Mizzou Online (self-paced) count as part of these 12 credits. Part-time students must enroll in at least as many credits each semester as the college governing part time enrollment.
   - A student will be removed from probation at the end of the term when the term and cumulative GPA are 2.0 or higher, provided the student completed 12 or more hours applicable toward the degree.
   - A student will be continued on probation if while on probation the student has a term GPA greater than or equal to 2.0, but whose cumulative GPA is below 2.0.
3. A student will be dismissed from the College of Engineering if the student:
   - Receives a term GPA of less than 1.0
   - Receives a term GPA of less than 2.0 while on probation.
   - Fails to complete at least 12 credit hours toward their Engineering degree program while on academic probation.

4. **Readmission:**
   - If the appeals committee allows a student to re-enroll, it may set conditions such as courses to be taken, minimum grades, total hours, etc to which the student must adhere.
   - A student who has been dismissed for academic reasons may be readmitted upon a successful appeal to the academic appeals committee of the college. Students who are subject to dismissal (IE) and who wish to appeal their case for continuation must write an appeal letter and submit it to the academic appeals committee.
   - Similarly, students who wish to re-enroll in the college of Engineering after having been out of school as a result of a dismissal must write a letter of appeal to the College of Engineering academic appeals committee requesting readmission.
   - Letter of appeal may be addressed to: Engineering Academic Appeals Committee, W1025 Lafferre Hall, University of Missouri, Columbia, MO 65211. A personal visit with the director of undergraduate studies of the students department and advisor before appealing by letter is often helpful, both to the student and to the committee.
   - The primary concern of the appeals committee is the likelihood of future success. Accordingly, any appeal should include an explanation for past poor performance and reason for expecting better in the future.

5. A student who has been twice dismissed will normally be ineligible for readmission.

**Satisfactory/Unsatisfactory Grading Option**

Under Satisfactory/Unsatisfactory (S/U) grading, an S is assigned for a grade in the A, B or C range, and a U is assigned for a grade in the D range or for an F. Neither an S nor a U will be calculated into a student’s grade point average. A student enrolled in the College of Engineering may not take any math, science or engineering course that counts toward degree requirements under the S/U grading option, unless the course is only offered S/U. In addition, any course specifically required (by course number) in the curriculum may not be taken S/U. This includes ENGLISH 1000 or ENGLISH 1000H. The 18 credits taken to fulfill the University general education distribution requirement may be taken S/U.

**Restrictions**

- First-semester freshmen are ineligible to take any course S/U unless it is only offered S/U.
- Only one course per semester may be taken S/U.
- Students on academic probation are not allowed to take any course S/U.
- To be eligible for the Dean’s List each term, a student must complete 12 graded credits (S/U courses are not considered “graded”).

**Student Services**

**Advising**

Each student in the College of Engineering is assigned an advisor who assists the student in reaching academic and professional goals.
Students are encouraged to meet with their advisors as often as needed. Engineering students have advising holds placed on their accounts each semester and must meet with their advisor to have the hold lifted in order to enroll each semester.

Diversity in Engineering Program

The Diversity in Engineering Program (DEP) supports increased enrollment and graduation rates among students from underrepresented minority groups in the College of Engineering. The DEP office provides student programming designed to create a user-friendly environment for students pursuing a degree in engineering from the University of Missouri. This effort includes models for successful outreach, recruitment, early research experience, counseling, undergraduate retention, academic enrichment, mentoring and information about graduate study. DEP provides a support network between students, faculty, and staff to ensure academic success through programming ranging from free tutoring to time management and study skills sessions. Career information sessions, résumé review, and mock interviews are also provided to ensure professional preparedness. DEP also offers outreach opportunities for students to interact with the local community that include tutoring, mentoring, and giving presentations to local elementary, junior high and high school students.

Learning Communities

The college cosponsors several living/learning options for engineering students. The college believes that an environment conducive to the formation of networks, with aspects of social and academic interaction, enhances the retention and ultimate success of students in the engineering curriculum. Students selecting these options generally earn higher grades and are more likely to graduate than the average engineering student.

The Engineering Learning Community (ELC) is a special co-ed environment that offers engineering majors a full range of academic support and activities. ELC allows engineering students to live together, study together and have fun together. Freshman Interest Groups (FIGs) support incoming freshmen. Members of a FIG are co-enrolled in three courses during the first semester of the freshman year with a group of up to 20 students. Each community has its own computer lab, peer tutors, study groups and quiet hours.

Professional Engineering Registration

The revised statutes of Missouri (Section 327.221) require that each applicant for registration as a professional engineer in Missouri must be a graduate of and hold a degree in engineering in a curriculum accredited by the Accreditation Board for Engineering and Technology. The MU undergraduate programs in biological, chemical, civil, computer, electrical, industrial and mechanical engineering, and computer science at MU are so accredited.

Senior students are strongly encouraged to take the Fundamentals of Engineering Exam leading to the Fundamentals in Engineering (FE) status as a first step toward registration.

The MU undergraduate programs in biological, chemical, civil, computer, electrical, industrial and mechanical engineering, and computer science are accredited by the Engineering Commission of ABET, www.abet.org (http://www.abet.org).

Naval Reserve Officers Training Corps (NROTC)

NROTC was established in 1926 to offer college students the necessary naval science courses to qualify for commissions in the Navy or Marine Corps Reserve. Today, NROTC is one of the primary accession sources of officers for the Navy and Marine Corps.

Scholarship NROTC midshipmen incur no military obligation during their freshman year. This allows students to get a better understanding and appreciation of the life of a Navy or Marine Corps officer. Navy NROTC graduates incur a minimum five years military obligation. Marine NROTC graduates incur a minimum four year military obligation. The two-year NROTC program is designed for transfer students and for MU students who did not participate in NROTC during the first two years. MU also offers a Minor in Naval Science (p. 530).

Navy students should major in a technical course of study while marine students may major in any course of study leading to a baccalaureate degree. Academic credit for naval science courses is accepted toward a baccalaureate degree by most MU schools and colleges. Midshipmen take one naval science course for credit each semester, which provides education and training in various aspects of the Navy or Marine Corps. Associated with each course is a leadership laboratory. NROTC activities include water survival, self-defense, physical fitness, orienteering, aviation, nuclear power indoctrination, pistol/rifle marksmanship and a variety of field trips. Upon graduation, midshipmen are commissioned as Ensigns in the Navy or Second Lieutenants in the Marine Corps.

For additional information, contact:

Graduate

The University of Missouri began offering engineering classes in 1849. By 1877, a College of Engineering was established and by the 1890’s, students could pursue master’s and doctoral degrees. Today, the College offers graduate degrees in nine disciplines to 500+ domestic and international students.

Graduate engineering programs include

- Biological Engineering
- Chemical Engineering
- Civil & Environmental Engineering
- Computer Science
- Electrical & Computer Engineering
- Industrial Manufacturing & Systems Engineering
- Information Technology
- Mechanical & Aerospace Engineering
- MU Informatics Institute
- Nuclear Engineering

Mizzou engineering sustains a variety of research centers, programs, groups and facilities along with other departmental groups that are designated as areas of exemplary expertise and success. The college contributes significantly to MU’s overall annual research and development
spending. The College also offers exceptional business opportunities to corporations, small businesses and start-ups.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.
Biological Engineering

J. Tan, Chair
College of Engineering
College of Agriculture, Food and Natural Resources
215 Agricultural Engineering Building
(573) 882-7044
TanJ@missouri.edu

Recognizing the immense promise of bioengineering and the unique position of Mizzou for a strong bioengineering program, the College of Agriculture, Food and Natural Resources (CAFNR) and the College of Engineering (CoE) joined forces to form the Department of Bioengineering* (BE).

Bioengineering unites existing faculty and infrastructure from both colleges. CoE contributes biomedical engineering capabilities while CAFNR brings strengths in bioprocess and bioenvironmental engineering.

*The Department of Biological Engineering became Bioengineering in 2013. Courses and degree programs are still listed as Biological Engineering at this time.

Faculty

Primary Faculty

Assistant Professors C. Costello, H. Hunt*, F. M. Pfeiffer*

Affiliated Faculty

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Biological engineering is a science-based engineering discipline that integrates engineering and biological sciences in one curriculum. The MU biological engineering program is a broadly-based curriculum that prepares students for careers in three areas:

- Biomedical engineering (including pre-medicine)
- Bioprocess engineering
- Bioenvironmental engineering

Biological engineering graduates are hired by biotechnology, medical, pharmaceutical, food and agricultural companies, and by government agencies. Some attend graduate and medical schools. Graduates are well prepared to take the Fundamentals of Engineering exam during their senior year, which is the first step toward obtaining a Professional Engineer license.

The Bachelor of Science with a major in Biological Engineering (BS BE) program at MU is accredited by the Engineering Commission of ABET, www.abet.org (http://www.abet.org). The biological engineering curriculum was developed to meet the mission, program objectives and student outcomes described below.

Mission and Objectives

The department mission is to educate biological engineers to integrate engineering and biological sciences in the contexts of health, sustainability and environmental stewardship, thus preparing them for productive careers characterized by continual professional growth.

Program Educational Objectives

The undergraduate program leads to a Bachelor of Science degree in Biological Engineering, producing graduates who will, within 3-5 years:

1. Show proficiency in engineering analysis, design and development.
2. Interact effectively with life science and other professionals.
3. Integrate biological and engineering sciences for the design and development of innovative systems and processes for improved health, bio-resource utilization, and environmental protection.
4. Exhibit professionalism as they continually add value to their chosen field of endeavor.
5. Succeed in advanced study in engineering, medicine or veterinary medicine, if pursued.

Student Outcomes

By the time of graduation, Biological Engineering students will possess:

a. An ability to apply knowledge of mathematics, science and engineering;

b. An ability to design and conduct experiments, as well as to analyze and interpret data;

c. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;

d. An ability to function on multi-disciplinary teams;

e. An ability to identify, formulate and solve engineering problems;

f. An understanding of professional and ethical responsibility;

g. An ability to communicate effectively;
**Undergraduate**

**BSBE in Biological Engineering**

**Major Program Requirements**

The curriculum encompasses basic sciences, social and behavioral sciences, humanities and fine arts, engineering sciences and topics, and program core courses. The core courses cover topics of biological engineering principles and design. In a capstone design course, each student completes a design project under the direction of a faculty advisor. Technical electives allow students to place emphasis on biomedical, bioprocess or bioenvironmental engineering. The requirements listed below are in addition to University general education (p. 20) requirements.

Total Credits: 126

Graduate

MS in Biological Engineering

Admission Contact Information
256 William Stringer Wing
Columbia, MO 65211-5160
573-882-4113

Admission Criteria
- Fall deadline: N/A
- Minimum GPA: 3.0 in the last 60 hours
- BS in engineering from an accredited university or equivalent experience
- Minimum Academic IELTS score:

<table>
<thead>
<tr>
<th>Item</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>OVERALL</td>
<td>6.0</td>
</tr>
</tbody>
</table>

- Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

- Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal + Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>
<td>1100</td>
<td>4.0</td>
</tr>
<tr>
<td>On or After August 1, 2011</td>
<td>301</td>
<td>4.0</td>
</tr>
</tbody>
</table>

Required Application Materials
Prospective students first contact the BE department to receive instructions on the documents needed for a complete application packet.

To the Graduate School:
- All required Graduate School documents
- Official transcripts
- TOEFL scores
- GRE scores

To the Master’s BE Program:
256 William Stringer Wing
Columbia, MO 65211-5160
573-882-4113

Financial Aid from the Program
Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Graduation Requirements: Master of Science and Master of Engineering in Biological Engineering
Students without a BS in engineering will be required to complete additional courses in mathematics, basic sciences and engineering science. Students with engineering degrees other than biological engineering should meet certain proficiency requirements.

The Biological Engineering Program requires a minimum of 36 semester hours beyond the baccalaureate degree for the ME and MS non-thesis (MSNT) degrees and a minimum of 30 semester hours for the MS thesis (MST) degree. If approved by the student’s Master’s Program Committee, this may include up to six hours of graduate credit transferred from another university or from another campus of the MU system.

In general, the Graduate School does not accept correspondence or extension course credit earned at any other campus. However, a student may take up to eight hours of correspondence courses that are authorized for graduate credit and offered through Mizzou Online. Courses to be taken for graduate credit must be approved by the Graduate Dean, and the enrollment form has a place designated for the Graduate Dean’s signature. See online.missouri.edu for more information on distance education opportunities.

As a minimum, the Master’s Program of Study should include the following:

BIOL_EN 8402 Research Methods (2 s.h.)
BIOL_EN 8087 Seminar in Biological Engineering (1 s.h.)
Statistics (3 credits)
BIOL_EN 8990 Masters Thesis Research in Biological Engineering (3 credits maximum for ME and MSNT degrees and 6 credits minimum for MST degree)
Two to four 8000 level courses (two for MST degree, three for MSNT degree and four for ME degree), at least 6 credit hours must come from Biological Engineering. Readings or Problems cannot be used to satisfy this requirements.
Additional hours may come from Biological Engineering courses numbered 7000 or above or courses from other MU departments numbered 7000 or above. Classes chosen to fill the plan of study may include those needed to fulfill proficiency areas if they are taken for graduate credit. Other courses should be chosen to strengthen the student’s ability to do research in their specific area.

**PhD in Biological Engineering**

**Admission Contact Information**
256 William Stringer Wing; Columbia, MO 65211-5160
573-882-4113

**Admission Criteria**
- Fall deadline: N/A
- Minimum GPA: 3.0
- BS and MS in engineering from an accredited university or equivalent experience. In rare instances, an exceptional student will be allowed to study for the PhD without first completing an MS degree.
- Minimum Academic IELTS scores:

<table>
<thead>
<tr>
<th>Item</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>OVERALL</td>
<td>6.0</td>
</tr>
</tbody>
</table>

- Minimum TOEFL scores:

<table>
<thead>
<tr>

<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

- Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal + Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>
<td>1100</td>
<td>4.0</td>
</tr>
<tr>
<td>On or After August, 2011</td>
<td>301</td>
<td>4.0</td>
</tr>
</tbody>
</table>

**Required BE Doctoral Degree Application Materials**
Prospective students first contact the BE department to receive instructions on the documents needed for a complete application packet.

To the Graduate School:
- All required Graduate School documents
- Official transcripts
- TOEFL scores
- GRE scores

To the BE Program:
256 William Stringer Wing

**Financial Aid from the Program**
Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

**Degree Requirements Doctoral Degree in Biological Engineering**
Within the first year in the program, each PhD student must pass a qualifying examination before continuing enrollment. The exam is designed to test the student’s ability to undertake advanced learning and carry out independent research. A doctoral candidate must complete a minimum of 72 credit hours of course work beyond the BS degree with a minimum of fifteen hours (exclusive of research, problems or independent study courses) at the 8000 (graduate) level, including at least three BE courses. In addition, there will be a minimum of one hour of Seminar (BIOL_EN 8087) and research (BIOL_EN 9990) may not exceed 28 hours of the total 72 hours required in the PhD Program of Study. The courses and research plan must be approved by the doctoral program committee. The student is required to pass a comprehensive examination, which includes both written and oral components. The student must demonstrate his or her ability for in-depth research by presenting and successfully defending a dissertation embodying the results of original research. A foreign language is not required.
Chemical Engineering

Baolin Deng, Chair
College of Engineering
W2033 Laffer Hall
(573) 882-4877
winkler@missouri.edu
http://engineering.missouri.edu/chemical/

Chemical Engineering at the University of Missouri focuses on education and research involving industrial chemicals, materials, environmental, and life-science processes. We aim to be a reservoir of talent for the research, design, and management of complex process challenges. The Department strives to provide its faculty and students with an environment for research, learning, and professional growth.

The faculty of the MU Department of Chemical Engineering prepares its students for careers in a broad range of fields and to assume leadership roles in society through a well-rounded general and rigorous technical education. The technical curriculum challenges students with a broad education in Chemical Engineering theory and practice, and to improve their skills in problem solving, critical thinking, and appreciation of the relationship between technology and society. Innovative development and use of technology facilitates both research and teaching, creating a diverse, learning environment.

MU Chemical Engineering program aims to develop versatile professionals who can excel in a variety of career environments. Our curriculum is focused on the basic sciences, engineering topics, and problem solving and design. A flexible program offering environmental, material, and biochemical options allows our graduates to move into non-traditional careers as well as traditional chemical engineering. Additionally, we build teamwork and design skills by integrating team design projects, laboratories, and reports into our curriculum.

Faculty

Adjunct Professor J. M. Gahi**, S. J. Lombardo**
Associate Professor P. C. H. Chan*, D. G. Retzloff*, Y. Xing*
Adjunct Associate Professor W. A. Jacoby**
Assistant Professor S. Baker**, M. Bernards**
Associate Teaching Professor M. A. Myers
Research Assistant Professor V. Likholetov

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BSChE in Chemical Engineering (p. 477)
  • with emphasis in Biochemical (p. 478)
  • with emphasis in Environmental (p. 478)
  • with emphasis in Materials (p. 479)

Advising and Scholarship Information Contact
Paul Chan

The educational objectives of the Chemical Engineering program at the University of Missouri are to prepare graduates who, after the first five years of their professional career, have:

1. Established themselves as practicing professionals through increased responsibilities beyond their original entry-level position, or if engaged in post-baccalaureate study are making timely progress towards an advanced degree;
2. Continuing education through special training, professional licensure, or additional certifications; and
3. Participation in professional extension through mentorship, community activities, and/or serving local/national professional societies.

Some of our graduates work in the traditional areas of chemical engineering such as the petroleum and chemical industries. Many graduates practice their profession in the areas of microelectronics, pharmaceuticals, materials, polymers, environmental protection, consumer products, or as managers in business, government careers, and engineering consultants. Still others use the chemical engineering degree as a foundation for pursuing advanced studies in medicine, law, business, or the basic sciences.

Exploratory Course

A student wanting to explore chemical engineering as a major should take CH_ENG 1000 Introduction to Chemical Engineering.

Graduate

• MS in Chemical Engineering (p. 479)
• PhD in Chemical Engineering (p. 480)

Department of Chemical Engineering

Director of Graduate Studies: David G. Retzloff

About Chemical Engineering

Established in 1906, MU Chemical Engineering has a long standing commitment to provide quality undergraduate and graduate education. Our department serves the discipline well by providing state of the art research in many cutting edge fields including batteries, biochemical engineering, biomaterials, carbon, ceramics, catalysis, corrosion, electrochemistry, environmental sciences, ionic liquids, materials science, computational modeling & simulation, nanomaterials, nuclear materials, polymers, separations, solar energy, and surface science.

Career Opportunities

The Chemical Engineering program develops versatile professionals who can excel in a variety of career environments. Our curriculum is focused on the basic and applied sciences, engineering topics, and problem solving and design. Our flexible program allows our graduates to move into traditional as well as non-traditional chemical engineering careers. Additionally, we build research and development skills by integrating research, scientific inquiry, and critical thinking into our curriculum.
Some of our graduates work in the traditional areas of chemical engineering such as the petroleum and chemical industries. Many graduates practice their profession in the areas of microelectronics, pharmaceuticals, materials, polymers, environmental protection, nuclear engineering, consumer products, or as managers in business, government careers, and engineering consultants. Still others enter into careers in academia.

**Faculty Research**

Currently active research areas include batteries, biochemical engineering, biomaterials, carbon, ceramics, catalysis, corrosion, electrochemistry, environmental sciences, ionic liquids, materials science, computational modeling and simulation, nanomaterials, nuclear materials, polymers, separations, solar energy, and surface science.

**Facilities and Resources**

There are excellent facilities for research students, including electron microscopy, ultra-high vacuum (UHV) surface science, atomic force microscopy, a heterogeneous catalysis and reaction kinetics laboratory, a heat and mass transport laboratory, an air pollution monitoring and control laboratory, a biochemical engineering laboratory, a computational laboratory, and a transport properties phenomena laboratory. Excellent library facilities provide the latest domestic and international journals specific to chemical engineering and physical sciences research.

**Internal Funding**

Research and teaching assistantships are available to qualified students for the entire year. The yearly stipend for graduate students ranges from $17,500 to $20,000, with a tuition waiver, depending on the student’s terminal degree. Assistantships also include a tuition waiver and health insurance. Academically qualified students may receive additional scholarship awards. Grant research assistantships and some industrial and Graduate School fellowships may also be available. Extremely well-qualified students may be eligible for the Robert and Dorcas Holtzsmith Graduate Fellowship.

RA and TA appointments allow for 12 credit hours of advanced study each semester. The applicant’s academic record and research potential determine the financial assistance offered. Students who receive financial assistance are expected to continue their appointment during the summer session as well, as these appointments are year long positions.

---

### Undergraduate

#### BSChE in Chemical Engineering

**Major Program Requirements**

Each graduate must complete the required curriculum designed to demonstrate knowledge and integration of chemical engineering science and practice using analytical, computational and experimental techniques. In addition, each graduate must have a comprehensive background in advanced chemistry. Graduates have a detailed working knowledge of the entire spectrum of chemical engineering activities.

All requirements listed below are in addition to University graduation requirements, including University general education (p. 20), and College of Engineering requirements. Students are also required to complete emphasis area requirements.

Graduate

MS in Chemical Engineering

Minimum Graduate School Requirements
- The student’s program must include a minimum of 30 hours of graduate credit beyond the bachelor’s degree (or its equivalent).
- At least 3 credits must be in 8000+ level courses, not including special readings, seminar, or research; and no more than 4-% of the total can be research-based.
- The candidate must have completed all graduate work attempted at MU with a GPA of 3.0 or better.
- Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of Chemical Engineering.
- Students must present a thesis
- Students must be enrolled.

Total Credits: 30
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the M.S. in Chemical Engineering program (http://gradschool.missouri.edu/academics/programs/chemical-engineering/master-of-science-in-chemical-engineering) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/apply). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

Application Deadlines

- Fall Deadline: March 15
- With change of degree within MU: May 15
- Spring Deadline: October 15
- With change of degree within MU: November 1

Required Application Materials

Chemical Engineering Program

- Résumé
- Transcript
- Statement of Purpose
- 3 Letters of Reference
- GRE scores (School Code: 6875; Dept. Code: 1001)
- TOEFL (if you are an international student)
- Any additional documents requested by the Graduate School

PhD in Chemical Engineering

Minimum Graduate School Requirements

- The student’s program must include a minimum of 72 hours of graduate credit beyond the bachelor’s degree (or its equivalent).
- At least 15 credits must be in 8000+ level courses, not including special readings, seminar, or research; and no more than 4-6% of the total can be research-based.
- The candidate must have completed all graduate work attempted at MU with a GPA of 3.0 or better.
- Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of Chemical Engineering.
- Students must present a dissertation
- Students must be enrolled.

Civil Engineering

J. Erik Loehr, Interim Chair
Department of Civil & Environmental Engineering
E2509 Lafferre Hall
(573) 882-6269
http://engineering.missouri.edu/civil/

Civil engineering is about community service, development, and improvement. Civil engineers are involved in all levels of the planning, design, construction, and operation of facilities essential to modern life, ranging from infrastructure development and maintenance, waste disposal, transit systems, water supply and treatment systems, and offshore energy exploration structures. Civil engineers are problem solvers, meeting the challenges of pollution, traffic congestion, drinking water supply and energy needs, national security, communication, urban redevelopment, and sustainable community planning.

Faculty

Assistant Teaching Professor E. C. Inniss**
Research Associate Professor Y. S. Xu
Adjunct Faculty D. P. Gwaze*, C. J. Nemmers* P.E., V. Pattarkine, R. Suramplai, C. Yarnell
Emeritus Faculty R. T. Douty, D. L. Guell

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BSCiE in Civil Engineering (p. 482)
The Department of Civil and Environmental Engineering offers a Bachelor of Science in Civil Engineering (BSCiE). Most graduates take the Fundamentals of Engineering Exam. Graduates are encouraged to become registered professional engineers and to continue their education throughout their careers.

Departmental Honors

Students who will graduate with a 3.0 GPA or higher are eligible for the College of Engineering honors program. Interested students should ask their advisor for details about this highly rewarding program that can include earning a salary for research performed under the guidance of a faculty member.

Educational Mission

The educational objectives of the Bachelor of Science in Civil Engineering describe the expected accomplishments of graduates during the first 5 to 6 years after graduation. It is expected that nearly all students completing the requirements of the Bachelor of Science in Civil Engineering will engage in the life-long learning necessary to advance professionally in the field of civil engineering and contribute to society and the profession through involvement in professional or other service activities.

It is expected that most graduates will

1. Enter the profession of civil engineering with proficiency in environmental engineering, geotechnical engineering, structural engineering, transportation engineering and water resources engineering. In doing so, these students will
   a. Take and pass the Fundamentals of Engineering exam
   b. Gain employment as an engineer-in-training
   c. Take and pass the Professional Engineers Exam, and
   d. Be licensed to practice engineering in one or more states

It is expected that some graduates will

1. Begin careers in civil engineering-related industries, especially construction and other careers not requiring professional licensure
2. Begin and complete graduate study in civil engineering at MU or other Carnegie doctoral extensive universities, and
3. Begin and complete graduate/professional study in other associated fields

The following list of outcomes describes what graduates are expected to know and to be able to do when they complete the program. At graduation, graduates will have:

a. Ability to apply knowledge of mathematics through differential equations, probability and statistics, calculus-based physics, geology and general chemistry to civil engineering problems
b. Ability to conduct laboratory experiments and to critically analyze and interpret experimental data related to soil mechanics, fluid mechanics and civil engineering materials
c. Ability to perform civil engineering design by means of design experiences integrated throughout the professional component of the curriculum
d. Ability to function on teams that must integrate contributions from different areas of civil engineering toward the solution of multidisciplinary projects
e. Ability to identify, formulate and solve civil engineering problems
f. Understanding of professional practice issues in civil engineering including professional and ethical responsibility, procurement of work, bidding vs. quality based selection processes, how design professionals and construction professions interact to construct a project and the importance of professional licensure and continuing education
g. Ability to write and speak effectively
h. The broad education necessary to understand the impact of civil engineering solutions in a global and societal context
i. Recognition of the need for, and an ability to engage in life-long learning
j. Knowledge of contemporary issues as they relate to civil engineering problems and solutions
k. Ability to use the techniques, skills and modern engineering tools necessary for civil engineering practice, particularly in areas
of environmental/water resources, geotechnical, structural and transportation engineering

Graduate

- MS in Civil Engineering (p. 483)
- PhD in Civil Engineering (p. 484)

Director of Graduate Studies: Zhiqiang Hu

About the Program

Civil engineering education at MU began in 1856 with the establishment of the first Chair of Civil Engineering. Graduate programs offered by the department prepare students for leadership positions in academia, research and advanced practice engineering careers. Major program areas include structural mechanics, structural engineering and materials, geotechnical and geoenvironmental engineering, environmental engineering, hydrology and water resources engineering and transportation engineering.

Areas of Study

Structural Mechanics, Structural Engineering and Materials. Study areas: fracture and failure of composites, model-based simulation, inelastic response of materials and structures, bridge engineering, linear and nonlinear structural dynamics, explosion resistant structural design, timber engineering, microstructure of porous materials, concrete and aggregate durability, advanced fiber reinforced composites for construction and nondestructive structural health evaluation.

Environmental Engineering. Study areas: water pollution control, water purification, wastewater treatment, the disposal of residues from these processes and hazardous and solid waste management. Other areas of research include the application of physical, chemical and microbiological principles to design of water supply systems, pollution control facilities and contaminant transport through soils, membrane processes and environmental nanotechnology.

Geotechnical and Geoenvironmental. Study areas: strength, deformation and flow properties of earthen materials and application of this understanding to foundation engineering, slope stability analyses, earth structures design, pavement design and performance, and geoenvironmental challenges. Research areas include: unsaturated soil mechanics, soil improvement techniques, geosynthetics, landfills and waste containment, stabilization and maintenance of earth slopes, in situ soil cleanup technologies, geotechnical earthquake engineering, nondestructive geophysical technologies for subsurface applications, satellite – and ground-based remote sensing risk analysis and reliability-based design.

Transportation Engineering. Study areas: traffic engineering, intelligent transportation systems, highway safety, network modeling and simulation, geographic information systems, security and evacuations, transportation planning, traffic flow theory, highway design, intersection operations, bicycle and pedestrian facilities, infrastructure management, driver behavior, airport engineering, transportation legal issues, artificial intelligence and advanced computing applications in transportation.

Hydrology and Water Resources. Study areas: hydrologic, hydraulic, regulatory/public policy and geographic information system applications for transportation, surface water quality and storm water management and decision making.

Facilities and Resources

The department has laboratories for experimental research in structural engineering, materials, geotechnical and geoenvironmental engineering, environmental engineering, and transportation engineering.

Structural Testing. Several computer-controlled electrohydraulic testing machines and associated instrumentation are available in the high-bay structural engineering and materials engineering laboratories. The laboratories are serviced by a 5-ton overhead crane. An additional structural testing facility located south of the campus houses a 100-foot by 20-foot structural floor with anchor points on a 4-foot-square grid. This high-bay facility is serviced by a 10-ton overhead crane. There is also a materials laboratory for concrete mix design and evaluation.

Geotechnical Testing. The laboratories house state-of-the-art permeability, consolidation, triaxial, geosynthetics, soil dynamics and unsaturated soil mechanics testing equipment and is home to the Missouri Soil Characterization Laboratory. Additional laboratories include facilities and equipment for large-scale model testing of slopes, piles and other geotechnical systems, including a 10-acre geotechnical experiment site.

Environmental Labs. The laboratories are supplied with analytical equipment for the complete physical, chemical and microbiological analysis of water and waste water. Additional capacities include membrane fabrication and characterization facilities, and biological and chemical reactors for contaminant removal and/or degradation.

Transportation Laboratory. The laboratories include capabilities in advanced surveillance and video image processing, transportation modeling and simulation, Geographical Information Systems, traffic management and control, driver behavior, and safety.

Funding

In addition to fellowships supported by the National Science Foundation (NSF), the US Environmental Protection Agency, Federal Highway Administration and other governmental agencies, several graduate assistantships are available each year. The assistantships are primarily research appointments; however, the Department does make a limited number of teaching assistantship appointments. Most assistantships offer tuition waivers and health insurance.

Undergraduate

BSCiE in Civil Engineering

Major Program Requirements

Engineering topics start with basic computer and graphics courses. These are followed with basic engineering science courses, which ground the students in the fundamentals necessary for future course work and a sophomore design experience.

Engineering topics courses in the junior year provide students with the basic fundamentals in the areas of environmental engineering, geotechnical engineering, hydrology, water resources, structural engineering, transportation/traffic engineering, engineering economics,
and probability and statistics. Many of these topics courses contain elements of civil engineering design. Elective courses in the senior year enable students to specialize or obtain a broad educational background across the civil engineering discipline.

Design is integrated throughout the curriculum. The capstone design project is supplied by consultants or governmental agencies. The course requires working in teams, making oral and written presentations and completing a final design report. Oversight, interaction and evaluation are provided by practicing engineers from industry and governmental organizations.

In addition to the major core requirements, students must complete all University graduation requirements including University General Education Requirements, as well as all degree and college requirements.

**Major Core Requirements**

**Math**
- MATH 1500 Analytic Geometry and Calculus I
- MATH 1700 Calculus II
- MATH 2300 Calculus III
- MATH 4100 Differential Equations

**Basic Sciences**
- CHEM 1320 College Chemistry I
- GEOL 1150 Physical Geology for Scientists and Engineers
- PHYSICS 2750 University Physics I
- PHYSICS 2760 University Physics II
- or CHEM 1330 & CHEM 2100 College Chemistry II and Organic Chemistry I

**Engineering Topics-General**
- ENGINR 1100 Engineering Graphics Fundamentals
- ENGINR 1200 Statics and Elementary Strength of Materials
- ENGINR 2200 Intermediate Strength of Materials
- Select two of the following:
  - ENGINR 2100 Circuit Theory for Engineers
  - or BIOL_EN 4380 Applied Electronic Instrumentation
  - or CV_ENG 4610 Sensors and Experimental Stress Analysis
  - or CV_ENG 3200 Structural Analysis I
  - or CV_ENG 3312 Reinforced Concrete Design
  - or CV_ENG 3313 Structural Steel Design

**Civil Engineering Topics**
- CV_ENG 3010 Decision Methods for Civil Engineering Design
- CV_ENG 3100 Fundamentals of Transportation Engineering
- CV_ENG 3200 Fundamentals of Environmental Engineering
- CV_ENG 3300 Structural Analysis I
- CV_ENG 3312 Reinforced Concrete Design
- CV_ENG 3313 Structural Steel Design
- CV_ENG 3400 Fundamentals of Geotechnical Engineering
- CV_ENG 3600 Civil Engineering Materials
- CV_ENG 3700 Fluid Mechanics
- CV_ENG 3702 Hydrology
- CV_ENG 4980 Civil Engineering Systems Design
- CV_ENG Electives

**Advisor-approved electives**

**Semester Plan**

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.

Total Credits: 127

* Denotes General Education Requirements
** S BS = Social Behavior Science; HS FA = Humanities Studies/Fine Arts

**Graduate**

**MS in Civil Engineering**

Connie S. Taylor (taylorcs@missouri.edu)
Graduate Program Coordinator
Degree Requirements

A student’s program must include a minimum of 30 hours (transportation area) or 31 hours of graduate credit beyond the bachelor’s degree (or its equivalent). A total of 15 hours of the 30-hour minimum must be selected from courses at the 8000 or 9000 level. No more than 40 percent of the 30-hour credit requirement can be satisfied by a combination of special investigations, research (CV_ENG 8990), readings and/or problems courses. The student’s GPA must be 3.0 or greater. Students should consult with their academic advisor to ensure all requirements are satisfied.

Sample Plan of Study

- 8 or more courses (3 credit hours each) at the appropriate level
- Up to 6 hours of research (CV_ENG 8990)
- One or more 1-hour seminars associated with your specialty area (seminar is not required in all areas; see your academic advisor for details).

Thesis/Non-Thesis Requirements

All candidates for the Master of Science degree are required to complete a substantial independent effort reflecting some measure of creativity and/or originality and to produce evidence of such effort. A final oral examination is required of all master’s candidates. Approximately two weeks before this examination, a candidate must submit to an examining committee a thesis, a formal report or a design of professional quality applying the knowledge gained in course work to the solution of an engineering problem. Students who receive research appointments or traineeships are required to submit a thesis. Formal or design report is at the discretion of the adviser.

Academic credit allowed for this portion of a student’s program of study shall be for 3 credit hours for a report and 6 credit hours for a thesis.

Students who are funded as research assistants are expected to complete a thesis. The thesis (or dissertation) style should follow the recommendations in the publication “A Manual for Writers of Term Papers, Theses and Dissertations” by Kate L. Turabian, or other approved styles. (A copy of this publication is available at the CE Office for reference.)

Admissions

Priority admission and funding consideration are given to applications received by February 15/September 15. Applications submitted after February 15/September 15 will be considered, with preference going to those received by May 1/December 1. Prospective students applying after May 1/December 1 will be considered for fall/spring admission on a case by case basis.

Admission Criteria

- Minimum GPA: 3.0 in last 2 years of coursework. Note: Lower than 3.0 GPA requires special action and substantiation such as good test scores on the GRE or other recognized examinations.
- BS in engineering. Applicants with BS degrees in related fields may be considered for admission. If admitted, non-engineers are required to complete remedial courses as determined by their advisor and advisory committee.
- GRE test is required but no minimum score set. Typical acceptance scores: around 300 for Verbal + Quantitative and between 3.0 and 5.0 for Analytical.
- Minimum TOEFL scores: Internet-based test (IBT) 79, Paper-based test (PBT) 550
- Minimum Academic IELTS scores: OVERALL Score 6.0

Required Application Materials

Upload to the Graduate School:

- All required Graduate School documents
- 3 Letters of Recommendation
- At least two from faculty members who have taught or advised you
- GRE scores
- Résumé
- Statement of Purpose
  - See instructions (http://engineering.missouri.edu/civil/degree-programs/statement-of-purpose-guidelines)

Financial Aid from the Program

If you wish to be considered for financial aid, please complete the financial aid section of the departmental application.

PhD in Civil Engineering

Connie S. Taylor (TaylorCS@missouri.edu)
Graduate Program Coordinator
573-882-6269
573-882-4784 (fax)
http://engineering.missouri.edu/civil/

Degree Requirements

PhD programs are committee administered and tailored to fit the needs of each individual student. A minimum of 72 credit hours, including the credit hours taken during the MS program beyond the bachelor’s degree, are required. Students who received the MS degree from other than MU may transfer up to 30 hours of credit from their MS degree. The candidate must pass a comprehensive examination and submit and defend a dissertation at a final oral examination.

Residency Requirement

A student must complete at least two nine-hour semesters or three six-hour semesters in an 18-month period at MU. All courses taken to satisfy the residency requirement must be approved by the student’s doctoral program committee. Correspondence and off-campus courses may not be counted toward the residency requirements.

Qualifying for Candidacy

Students are accepted for advisement upon CE Graduate Admissions Committee review. Formal acceptance to the PhD program is based on a qualifying examination during the first year of post-master’s work.

The Qualifying Examination is required to determine the formal acceptance to candidacy for the Ph.D. degree and is based on a written and/or oral examination administered by faculty members in the student’s
area of concentration. The student, upon passing this examination, will be advised on the program of coursework that should be taken to prepare for the Ph.D. degree.

**Comprehensive Examination Process**

Candidacy for a doctoral degree is established by passing the comprehensive examination. The comprehensive examination includes written and oral sections and is completed as the candidate is completing the prescribed coursework to determine if the Ph.D. candidate is adequately prepared to conduct the doctoral research. This examination will focus on the coursework and/or research/proposal writing. The student may be advised to take some additional coursework. A written proposal of the research must be distributed to the student’s doctoral committee for review after which an oral presentation and examination on the proposed work will be administrated.

**Dissertation Requirements**

The third examination, called the *Defense of the Doctoral Dissertation*, is required to determine if the Ph.D. degree should be awarded on the basis of the research that is presented. The student must submit the written dissertation to the committee members at least two weeks prior to the exam. This is an oral examination that is administered by the Doctoral Committee.

Graduate students are required to submit one copy of their dissertation or thesis to the Graduate School, 210 Jesse Hall on a CD.

**Admissions**

**Application Deadlines**

Priority admission and funding consideration are given to applications received by February 15/September 15. Applications submitted after February 15/September 15 will be considered, with preference going to those received by May 1/December 1. Prospective students applying after May 1/December 1 will be considered for fall/spring admission on a case by case basis.

**Admission Criteria**

- **Minimum GPA:** 3.0 in last 2 years of coursework. Note: Lower than 3.0 GPA requires special action and substantiation such as good test scores on the GRE or other recognized examinations.
- **BS in engineering.** Applicants with BS degrees in related fields may be considered for admission. If admitted, non-engineers are required to complete remedial courses as determined by their advisor and advisory committee.
- **GRE test is required but no minimum score set.** Typical acceptance scores: around 300 for Verbal + Quantitative and between 3.0 and 4.0 for Analytical.
- **Minimum TOEFL scores:** Internet-based test (IBT) 80, Paper-based test (PBT) 550
- **Minimum Academic IELTS scores:** Overall Score 6.0

**Required Application Materials**

*To the Graduate School:*

- All required Graduate School documents

*To the Civil Engineering Program:*) Upload all of the following items to the Apply Yourself/Graduate School System. DO NOT send any hard copies to the Civil Engineering department.

- 3 Letters of Recommendation
- At least two from faculty members who have taught or advised you
- GRE scores
- Résumé
- Statement of Purpose
  - See instructions (http://engineering.missouri.edu/civil/degree-programs/statement-of-purpose-guidelines)

**Financial Aid from the Program**

If you wish to be considered for financial aid, please complete the financial section of the departmental application. Electronic submissions of all application materials are preferred; however, paper submittals will be accepted.
Computer Engineering

S. Kovalski, Interim Chair
College of Engineering
349 Engineering Building West
(573) 882-6387
kovaleskis@missouri.edu

The Department of Electrical & Computer Engineering is one of 9 academic departments within the College of Engineering at the University of Missouri. Established in 1884 as the first electrical engineering program in the nation, this ABET accredited program is now home to more than 300 undergraduate students, almost 150 graduate students and 21 faculty members.

Faculty

Assistant Professor M. Becchi**, T. Han*, C. Xiao*, A. Zare**
Associate Professor Emeritus R. W. Leavene Jr.*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

beattyt@missouri.edu

The Department of Electrical and Computer Engineering offers both the Bachelor of Science with a major in Electrical Engineering and the Bachelor of Science with a major in Computer Engineering. The undergraduate program in both degrees at the University of Missouri provides students with the requisite fundamentals in either discipline and prepares them for beginning practice in both the traditional and emerging fields of these disciplines. The degree programs are flexible 126-credit structures that provide the fundamentals of engineering, in addition to a thorough coverage of the major specialties within their respective fields. In addition, technical electives allow concentration in selected areas.

The ECE department emphasizes close interaction with industry. Industry engineers visit regularly and industry-sponsored student projects are provided to give extra dimension to the program.

Many students in the ECE department combine the electrical engineering major with the computer engineering major in a special 138-credit program. These students receive both the BS EE and BS COE degrees.

Students interested in interdisciplinary studies may use some electives to study business, premedicine, prelaw, and other areas. Students are able to choose from a wide variety of courses offered by other departments in the College of Engineering, as well as from other MU colleges, taking advantage of the multidisciplinary nature of the campus.

Commencing in the Fall Semester 2011, the Program Educational Objectives (PEOs) of the undergraduate program in Electrical Engineering at MU are to nurture graduates who:

• Communicate effectively, both in written reports and oral presentations.
• Analyze and design electrical systems effectively.
• Possess comprehensive problem-solving skills, including the ability to define problems and to evaluate alternative solutions.
• Work effectively in teams consisting of diverse cultures and disciplines.
• Are passionate about engineering, as demonstrated by their leadership, innovation, motivation, and interest in continuing education.

Commencing in the Fall 2011, the Program Educational Objectives (PEOs) of the undergraduate program in computer Engineering at MU are to nurture graduates who:

• Communicate effectively, both in written reports and oral presentations.
• Analyze and design electrical systems effectively.
• Possess comprehensive problem-solving skills, including the ability to define problems and to evaluate alternative solutions.
• Work effectively in teams consisting of diverse cultures and disciplines.
• Are passionate about engineering, as demonstrated by their leadership, innovation, motivation, and interest in continuing education.

Both the Bachelor of Science in Electrical Engineering (BS EE) and the Bachelor of Science in Computer Engineering (BS COE) require that students earn a 2.0 GPA or better in all courses that have an MU engineering prefix. All ECE courses require a grade of C or better in ECE prerequisites.

Engineering design in both the electrical engineering and computer engineering programs is provided through an integrated laboratory structure. Beginning with the first laboratory course in the fourth semester of each program, students have a significant design and laboratory experience in each semester of their respective programs.

In addition to the major core requirements, students must complete all University graduation requirements including University general education, as well as all degree and college or school requirements.

ECE Honors Program

The ECE Honors Program follows the general rules and philosophy of the College of Engineering Honors Program. Students may enter the program from the beginning of the junior year and must have a GPA of 3.0/4.0 at the start. Eligible students participate in the program by enrolling in ECE 4995 Undergraduate Honors Research in Electrical Computer Engineering for one to three credit hours, which replaces an equivalent number of hours of ECE technical electives.

The heart of the program is a research or advanced design project culminating in an undergraduate honors thesis. The project is conducted under the supervision of the honors advisor, who is an ECE faculty member selected by mutual agreement between the student and the
professor. Satisfactory completion of the project requires approval (signatures) of the honors thesis by both the honors advisor and an additional faculty member, who serves as second reader of the thesis. Students who complete the program and graduate with a GPA of at least 3.0 receive the designation “Honors Scholar in Engineering” at graduation and on their diploma.

Another valuable feature of the Honors Program is that participants may reduce the number of credit hours required for degree completion to the University minimum of 120 by substituting up to six hours of credit from graduate courses through dual (undergraduate/graduate) enrollment during the last four semesters of the undergraduate program and after completion of the honors project.

**Double Majors - Electrical Engineering and Computer Engineering**

Many students in the ECE department combine the BS in Electrical Engineering with the BS in Computer Engineering in a special 138-credit program. These students receive both the BS EE and BS CoE degrees.

Intelligent Systems. Basic and applied research in computational intelligence (neural networks, fuzzy systems, evolutionary computation, swarm intelligence), spatial reasoning for scene understanding and human/robot interaction, pattern recognition and automated decision making, eldercare technology, computer vision and image processing, human activity analysis, cognitive robotics, landmine and explosive detection.

Systems Modeling and Control. Control systems, computer process control, digital and sampled data control, robotics, system biology; biologically realistic modeling, computational, neuroscience, theoretical neuroscience, electrophysiology.

Nano and Micro Electronics. Nano/microelectromechanical systems (N/MEMS), micro sensors and actuators, High K dielectrics, nano structures, complex heterostructures (i.e. HEMTs, VCSELs, detectors, HBTs, etc), BioMEMS and biomedical microsystems.

Digital System and Circuit Design, Computer Process Control. Excellent computer equipment and other laboratory facilities are used for research sponsored by various government and industry sources. The ECE department is the home department of the following University centers: Center for Geospatial Intelligence, Center for Micro/Nano Systems and Nanotechnology, Center for Eldercare and Rehabilitation Technology, Center for Physical Electronics and Power Electronics, Center for Electromechanics and Energy Conversion, Interdisciplinary Center for Research in Earth Science Technologies, Institute for Computational Neurobiology.

Internal Funding

Teaching Assistantships

Teaching assistantships are normally awarded to qualified graduate students with appropriate communication skills who assist faculty members in various phases of instruction. International students may not be appointed to teaching assistantships in their first semester on campus. International students must pass a language screening test at a proper level to be eligible for the TA positions available.

Research Assistantships

Research assistantships are granted to students qualified for working with professors on particular research projects. The research assistants are selected by faculty members who have research funds to support graduate students. Therefore, students should contact the faculty members directly for the RA possibility.

Fellowships

The department faculty actively pursue funding for selected research fellowships. Available fellowship opportunities can be found by contacting the ECE Graduate Office. Additionally, a limited number of “Teaching Fellows” are awarded annually to outstanding PhD students, particularly for those preparing for academic careers. Details can be obtained from the ECE Graduate Office.

Undergraduate
BSCoE in Computer Engineering

Major Program Requirements

The computer engineering degree offers a balanced approach to both hardware and software, as well as other areas of engineering. Focused areas of work in additional hardware or software, communications, discrete and integrated electronics, and robotics are offered by the department. (Focus areas are not listed on transcripts or diplomas.)

Students must complete all university requirements, including general education (p. 20), and Department Level Requirements (p. 486), in addition to the degree requirements below.

Total Credits: 123

Graduate

MS in Computer Engineering

Admission

349 Engineering Building West, Columbia, MO 65211
Phone: 573-882-4436
Email: umcengregegradoff@missouri.edu
http://engineering.missouri.edu/ece/
To be accepted outright by the director of graduate studies (DGS), the student needs to have a BS degree in either Electrical Engineering or Computer Engineering in addition to meeting the above requirements. Students who meet the academic requirements but have degrees in other engineering or science disciplines can be accepted directly into the MS program by the graduate program committee (GPC). Such students are strongly encouraged to consult with the DGS or their advisor about appropriate bridge courses. Based on individual circumstances, students may be advised to register as an undeclared graduate student to fill in background course work prior to admission into the department.

Students who do not meet the above requirements may still be admitted on probation by the GPC if there are mitigating factors. Students admitted on probation must receive at least a 3.0 GPA for the first 12 hours of graded graduate coursework completed in their first two semesters. Failure to achieve this GPA will result in expulsion from the ECE MS program.

### Appeal Process

All students have the right to a timely formal appeal to the GPC. Upon receipt of an admission decision or disciplinary action, the student has 10 working days in which to request a formal appeal. The DGS will convene a meeting of the GPC, the student, and the student’s advocate (if appropriate) within 10 working days of receiving the request. The decision of the GPC at the hearing is final.

### Degree Requirements

To fulfill the requirements for the MS degree, the following rules apply:

- A candidate must complete 30 hours, including at least 12 hours of 8000-level graded course work (exclusive of ECE 8990 or ECE 8085 or ECE 8010 hours).
- At least six of these graded 8000 level course hours need to come from ECE.
- At least 15 hours of graded course work (total combination of 7000 and 8000 level courses, exclusive of ECE 8990, ECE 8085, or ECE 8010 hours) must be taken from the Electrical and Computer Engineering Department course offerings.
- A maximum of six hours of graduate credit may be transferred from another campus in the University of Missouri System or other university, while a maximum of eight hours of graduate credit may be used from a previous MU master's degree.
- At most, three hours of course work in supervised study (ECE 8010) may be taken during the MS program and they will be graded on an S/U basis.
- At least one course from each of three different emphasis areas must be taken; a minimum of two of the emphasis areas must be in Electrical and Computer Engineering. (Each ECE graduate course is designated to an emphasis area. Contact the ECE graduate office for a current list).
- A minimum of 3 hours to a maximum of 6 hours of research (ECE 8990) or problems (ECE 8085) are required, based on whether the student writes a master’s thesis or a master’s Report.
- The student’s cumulative GPA must be at least 3.0 to graduate.

The requirements for the MS degree must be met within an eight year period. Each candidate must pass a final oral examination to demonstrate mastery of the work included in the thesis or in a substantial independent project. These MS requirements apply to ECE graduate students first enrolled in MU ECE in the Fall semester 2007 or later. UM ECE graduate students enrolled prior to Fall semester 2007 may choose to follow the
MU ECE MS requirements that were in effect for their MU ECE graduate admission semester.

**Academic Probation**

A student whose GPA drops below 3.0 is automatically placed on academic probation. In such a case, the student has one semester to raise his or her cumulative GPA to 3.0. Failure to do so will result in expulsion from the program. Additionally, a student who receives the grade of “C” in 9 hours of coursework will be expelled. As with acceptance, students here also have a right to the same formal appeal process described above.

**Selection of an Advisor**

Students must choose an academic advisor who will then provide guidance for the selection of coursework, and in the choice and execution of a research question. The student’s academic advisor and the Director of Graduate Studies must approve all coursework used to satisfy the credit hour requirements for this degree. After performing satisfactorily for a minimum of one semester, the student, with the advisor’s assistance, completes the Program of Study form that outlines the plan of study for the student’s graduate program. M1 - Program of Study form.

The form is forwarded through the DGS to the Graduate School for approval. In the event that an advisor retires or leaves MU, he/she may continue to serve as the student’s main advisor unless there is written academic program policy prohibiting such an arrangement. If an advisor is unable or unwilling to continue to serve, the academic program, with the leadership of the DGS, will assist the student to ensure that a replacement is found.

The Program of Study form must be filed with the Graduate School by the end of the student’s second semester of enrollment. Upon approval of the program by the Graduate School, the student is a candidate for the degree. If changes must be made on a student’s Program of Study form, a Program of Study Substitution form is used.

**Thesis Option**

For students under the thesis option of the MS degree, i.e., students enrolling for ECE 8990, an M-2 Request for Thesis Committee form is required to be submitted for approval by the department DGS and the Graduate School by the end of the student’s second semester.

A thesis committee is composed of three members of the MU faculty: a major advisor from the academic program, a second reader from the academic program, and an outside reader who is a member of the graduate faculty from a different MU graduate program. Upon approval of the department DGS, the student may petition the Graduate School to allow a person who is not a member of the MU graduate faculty to serve as the third reader. The petition should include a written justification for such a request and a copy of the person’s curriculum vitae. The Graduate School maintains copies of curriculum vitae previously received and approved, and if such a request is anticipated, the student should contact the Graduate School to see if the curriculum vitae of a particular person is already on file. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date.

Information about submitting the thesis can be found in the Thesis and Dissertation Guidelines.

**Non-Thesis Option**

For students who enroll in ECE 8085 (Problems), a problem report rather than a thesis is required. The student is not required to submit the M-2 form (request for a thesis committee). Instead, the student must have the report approved by his or her advisor and two other members of the graduate faculty, forming the student’s Problem Committee. It is not required that a member outside of ECE be included, although it is permissible for such a member of the MU graduate faculty to be appointed. At least one of the three members must have a primary academic appointment in ECE. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date. At that time, an announcement is to be made to the department faculty and graduate students to allow them to attend the defense. The student must defend the problem report to the committee, and make any needed adjustments in format and corrections/clarifications based on input from the committee. A final copy of the problem report must be filed with the ECE graduate office.

**Report of the Master’s Examining Committee**

The purpose of the M-3 Report of the Master’s Examining Committee Form is to have an official record of the final examining process, whether it is a thesis defense or presentation of a report. The student’s committee will indicate on this form if the student has passed the final exam. This form must be submitted to the Graduate School by a deadline for the semester in which the students plan to graduate. For a report option, the 3rd reader of the committee may be from the student’s department. The form is due in the Graduate School two weeks prior to graduation.
Computer Science

Dong Xu, Chair

About Computer Science Programs

The Department of Computer Science is a fast-growing and research-active entity at the University of Missouri. In fact, it is the hub of all campus computer science activities that involve well established research programs in computational biology and bioinformatics, cyber-security, distributed and mobile computing, geospatial information mining and retrieval, intelligent systems, multimedia communications, large dataset scientific visualization, networking, spoken language processing and human-machine interfaces, wireless sensor networks, etc.

The Department offers masters, dual masters, and doctoral degrees. The graduate degree programs prepare prior recipients of four-year BS degrees in computer science or closely related areas for further study at the doctoral level or for successful careers as specialized computer professionals. The PhD programs are a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well as research and development in industrial, government, and nonprofit organization. Specialized training is available through close interaction with the faculty in their active research fields.

The faculty members of the Department of Computer Science participate in the full spectrum of undergraduate and graduate education. Graduate education, in addition to direct involvement in projects funded by the federal government and industries, places equal emphasis on interdepartmental and cross-college research. The aim is to produce computer scientists who can function well in interdisciplinary research teams. Close integration of research with education is an invariant goal in the department’s graduate programs. It emphasizes in-depth studies that can also be tailored to fit graduate students’ individual interests. Additionally, members of the department lead the University’s institutional efforts in developing infrastructure for bioinformatics, computational biology, and high-performance computing and networking. Our major research projects are heavily funded by both federal agencies and industries. While National Science Foundation (NSF), National Institute of Health (NIH), National Geospatial-Intelligence Agency (NGA), Department of Energy (DoE), and Department of Defense (DoD) are examples for federal funding, Microsoft and Monsanto are representatives for industrial funding.

Research facilities are well established around faculty members’ expertise in bioinformatics and computational biology, biological and biomedical image analysis, graphics, mobile computing, artificial intelligence, multimedia, networking, human-computer interaction, information management systems, and computer science foundations. These facilities are clustered in core laboratories for bioinformatics, multimedia and visualization, video processing, spoken-language processing, mobile networking and communications, wireless sensor networks, high-performance computing, cyber security, and medical informatics.

Careers

The graduate degree programs prepare prior recipients of four-year B.S. degrees in computer science or closely related areas for further study at the doctoral level or for successful careers as specialized computer professionals.

The Ph.D. programs are a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well as research and development in industrial, government, and nonprofit organization. Specialized training is available through close interaction with the faculty in their active research fields.

With foundations covered in algorithms, compilers, computational theories, database, networking, operating systems, programming languages and software engineering, the undergraduate and graduate programs are integrated over many application areas such as:

- cyber-security
- multimedia
- smartphone applications
- filming
- mobile and sensor networks
- information management systems
- bioinformatics and computational biology
- medical informatics

Research

This department is the hub of all campus computer science activities that involve well established research programs in:

- bioinformatics and computational biology
- graphics and image processing
- geospatial information mining and retrieval
- cyber-security
- multimedia communications and networking
- ambient intelligence and sensor networks
- mobile and distributed computing
- spoken language processing and human-machine interfaces, etc.

Additionally, members of the department lead the University’s institutional efforts in developing infrastructure for bioinformatics, computational biology and high-performance computing and networking.

Faculty

Assistant Professor P. Calyam**, R. Chadha**
Associate Teaching Professor D. Musser*
Adjunct Professor J. M. Keller**, S. Nair**, M. Skubic**
Adjunct Associate Professor G. DeSouza**, M. Popescu**
Adjunct Assistant Professor M. Becchi**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

- BS in Computer Science (p. 494)
- Minor in Computer Science (p. 496)

**Advising Contact**

jurczykm@missouri.edu

The Department of Computer Science offers a broad curriculum that spans the theory, design and applications of computing and information technology. The Bachelor of Science degree in Computer Science includes a strong component of mathematics and sciences along with more theoretical courses in computer science. The Bachelor of Science in Information Technology is application-oriented, and allows students to develop skills in database administration, cyber security, game development and film production. Computer Science and Information Technology minors are available.

**Graduate**

- MS in Computer Science (p. 496)
- PhD in Computer Science (p. 497)

**MS and PhD Admission Criteria**

Students applying to the CS graduate program must have a sufficient background in mathematics and computer science to be able to enroll in and perform satisfactorily in the CS courses numbered 7000 and above. Students applying for admission must fulfill the following minimum requirements that include material contained in specific CS courses or their equivalent taken at another institution. It is preferred that students have earned a BS degree in Computer Science. However, students from other disciplines meeting the minimum requirements will be considered for admission.

1. Proficiency in a procedural programming language equivalent to that gained by taking CMP_SC 1050 Algorithm Design and Programming I and CMP_SC 2050 Algorithm Design and Programming II. The preferred programming language is Java. This material includes fundamental algorithm design and data structures.
2. Three semesters of formal course work in Calculus (MATH 1500, MATH 1700 and MATH 2300 at MU).
5. Knowledge of computer system architecture equivalent to that contained in CMP_SC 2270 Introduction to Digital Logic and CMP_SC 3280 Computer Organization and Assembly Language.
6. Four courses with grades B or better equivalent to those defined as follows:
   a. CMP_SC 4050 Design and Analysis of Algorithms I
   b. CMP_SC 4320 Software Engineering I
   c. CMP_SC 4410 Theory of Computation I, CMP_SC 4430 Compilers I, or CMP_SC 4450 Principles of Programming Languages
   d. CMP_SC 4520 Operating Systems I
7. A GPA of at least 3.0 (A=4.0) for the last half of the undergraduate curriculum.
8. Acceptable Minimum GRE scores (taken within last 5 years): 25 percentile on the verbal part, 80 percentile on the quantitative part, and 4 on the analytical writing part.
9. For those not schooled in English as their native language, a recommended minimum TOEFL score (taken within last two years):

<table>

</thead>
<tbody>
<tr>
<td>IELTS</td>
<td>6.5-7.0</td>
</tr>
</tbody>
</table>

10. For admission into the PhD program, the student must have either:
   a. A Bachelor’s degree in Computer Science with a GPA of 3.4 (out of 4.), or
   b. An equivalent of a Master’s degree in Computer Science, or a closely related field, with a GPA of least 3.4 (out of 4.0).

**Application Procedures**

In order to be considered for admission in a particular semester we must receive all required paperwork by these deadlines:

**Fall admission:** Applications and all paperwork must be received by March 1st. NOTE: If applying for financial assistance in the department, applications and all paperwork must be received by January 15th.

**Spring admission:** Applications and all paperwork must be received by October 1st.

Application for admission involves submitting a formal application through the Graduate School’s Apply Yourself (http://gradschool.missouri.edu/admissions/apply) online application system. An application must be accompanied by an application fee. In addition, the applicant must have the following original paperwork sent directly from the originating institutions to the Graduate School:

- For admission into the PhD program, the student must have either:
  a. A Bachelor’s degree in Computer Science with a GPA of 3.4 (out of 4.), or
  b. An equivalent of a Master’s degree in Computer Science, or a closely related field, with a GPA of least 3.4 (out of 4.0).
University of Missouri

- Official transcripts from ALL institutions attended
- Official GRE score report from Educational Testing Service in New Jersey (and TOEFL or IELTS scores for international applicants)

The following supplemental materials must be uploaded in the online application:

- Your résumé
- A personal goal statement indicating why you feel prepared to pursue the degree program and why you want to pursue this degree
- Minimum course requirement form if you do not have a BS in computer science
- Three letters of recommendation from professors who know your abilities that must address your ability and readiness to pursue a graduate program in computer science (submitted by your references directly to your online application)
- Copies (unofficial) of all transcripts
- Copies of GRE results (and TOEFL or IELTS, if applicable).

Note: Copies of the required documents (transcripts, GRE scores, etc.) cannot be accepted in lieu of the official reports from the originating institutions. Copies of these records should be submitted for evaluation, but any decision on admission is non-binding until the official records have been received.

**Current/Former MU students:** All current and former MU students must meet the same requirements as external students and file one of the following forms (in lieu of an MU Application Form):

- Current Non-Degree Graduate Students: Change of Division, Degree, Program, Emphasis, or Advisor form,
- Current graduate students in another department: Change of Division, Degree, Program, Emphasis, or Advisor form (same as 1)
- Previous graduate students returning to same program: Re-Activation form.

Forms can be obtained from the Computer Science Graduate Advisor's office in 244 EBW or the Graduate School, 210 Jesse Hall.

### Degree Completion Requirements

Use the links at the top of the page to direct you to details on the requirements that must be completed in order to earn the respective graduate degrees from the CS department. The Master of Science degree program has both a thesis and a non-thesis option, which can be chosen by the student after consultation with their selected advisor.

### Credit toward a Second Master’s Degree

A student who has completed one Master's degree at MU or elsewhere may present, upon the recommendation of the student's advisor and approval by the Director of Graduate Studies and the Graduate School, a maximum of six hours of credit earned in the previous program toward a second Master's degree.

### Master of Engineering Degree

A student may also choose to complete a Master of Engineering (p. 508) degree. The requirements for the ME degree are the same as the MS CS with the following exceptions: 1) the student must complete at least 36 hours of graduate courses, 2) a minimum of 30 credit hours must be earned from UM System institutions, 3) at least 21 hours must be courses offered by the CS Department, 4) at least 15 hours must be 8000 level courses offered by CS Department (excluding CMP_SC 8085), 5) CMP_SC 8980, CMP_SC 8990 and CMP_SC 9990 may not be taken, 6) at most 3 hours of CMP_SC 8085 may be taken, 7) No final examination is required. Only the M1 Program of Study is submitted for this program. Master of Engineering, not Computer Science, is noted on the student's transcripts. The degree completion letter is tied to meeting the seminar attendance requirement (see M.S. Degree above). Entrance requirements for ME and MS degree are the same.

### Financial Aid

Teaching and research assistantships are available for qualified students in the graduate programs. The Department also offers fellowships (including Shumaker Bioinformatics Fellowships) to a limited number of new PhD students. In addition, there are other fellowships and scholarships available at the university level.

Teaching assistantships and research assistantships are available with tuition waivers in the Department. Requests for financial aid are examined at the same time as those for graduate admission, which are due before January 15 for fall semester and October 1 for spring semester.

### Student Group

The department's graduate enrollment is about 135, with approximately half enrolled in the PhD program. Advised by the Director of Graduate Studies, the CS Graduate Student Council is an active body that works with the department and provides social support as well as student input for the continuous improvement of the graduate programs in computer science.

### Undergraduate

#### BS in Computer Science

### Major Program Requirements

The Bachelor of Science with a major in Computer Science emphasizes the study of software systems and graphics, computational theories and algorithms, computer organization, networking and multimedia, and programming methodology. Students who complete the BS in Computer Science can work for government agencies, academic institutions, or private industry creating and applying new technologies to solve complex problems.

The BS degree requires the completion of the three-semester calculus sequence plus discrete math and statistics. A student who selects an appropriate additional math course as a technical elective and has at least 9 credits in math with appropriate grades at MU can earn a math minor.

The BS degree requires the completion of 126 credits. To graduate, a student must earn a 2.0 GPA or better in all CMP SCI/IT courses. A grade of C- or better is required in each CMP SCI course that is a prerequisite for a CMP SCI course that the student takes.

The Engineering Career Services Office, W1025 Lafferre Hall, can assist students in searching for employment opportunities upon graduation and for internship/co-op positions.

Course requirements listed here apply to students beginning as regular college freshmen in Fall 2015 or after. A student who started college before Fall 2015 and who has been continuously enrolled as a full-time
University of Missouri

student may be pursuing the previous program and should contact the
department for information on these degree requirements.

In addition to the major core requirements, students must complete all
University graduation requirements including University general education
(p. 20), as well as all degree and college or school requirements.

Major Core Requirements

Computer science courses

- **CMP_SC 1000** Introduction to Computer Science 1
- **CMP_SC 1050** Algorithm Design and Programming I 3
- **CMP_SC 2050** Algorithm Design and Programming II 3
- **CMP_SC 3050** Advanced Algorithm Design 3
- **CMP_SC 2270** Introduction to Digital Logic 3
- **CMP_SC 3280** Computer Organization and Assembly Language 3
- **CMP_SC 3330** Object Oriented Programming 3
- **CMP_SC 3380** Database Applications and Information Systems 3
- **CMP_SC 4050** Design and Analysis of Algorithms I 3
- **CMP_SC 4320** Software Engineering I 3
- **CMP_SC 4520** Operating Systems I 3
- **CMP_SC 4850** Computer Networks I 3
- **CMP_SC 4970** Senior Capstone Design I 3
- **CMP_SC 4980** Senior Capstone Design II 3

**CMP_SC courses chosen from the following list** 21

- **CMP_SC 2830** Introduction to the Internet, WWW and Multimedia Systems 1
- **CMP_SC 3530** UNIX Operating System 3
- **CMP_SC 3940** Internship in Computer Science 3
- **CMP_SC 4001** Topics in Computer Science 3
- **CMP_SC 4060** String Algorithms 3
- **CMP_SC 4070** Numerical Methods for Science and Engineering 3
- **CMP_SC 4085** Problems in Computer Science 3
- **CMP_SC 4270** Computer Architecture I 3
- **CMP_SC 4280** Network Systems Architecture 3
- **CMP_SC 4330** Object Oriented Design I 3
- **CMP_SC 4380** Database Management Systems I 3
- **CMP_SC 4410** Theory of Computation I 3
- **CMP_SC 4430** Compilers I 3
- **CMP_SC 4440** Malware Analysis and Defense 3
- **CMP_SC 4450** Principles of Programming Languages 3
- **CMP_SC 4610** Computer Graphics I 3
- **CMP_SC 4620** Physically Based Modeling and Animation 3
- **CMP_SC 4650** Digital Image Processing 3
- **CMP_SC 4670** Digital Image Compression 3
- **CMP_SC 4720** Introduction to Machine Learning and Pattern Recognition 3
- **CMP_SC 4730** Building Intelligent Robots 3
- **CMP_SC 4740** Interdisciplinary Introduction to NLP 3
- **CMP_SC 4750** Artificial Intelligence I 3
- **CMP_SC 4770** Introduction to Computational Intelligence 3
- **CMP_SC 4830** Science and Engineering of the World Wide Web 3
- **CMP_SC 4995** Undergraduate Research in Computer Science - Honors 3

**Related courses** 22

- MATH 1500 Analytic Geometry and Calculus I 5
- MATH 1700 Calculus II 5
- MATH 2300 Calculus III 3
- MATH 2320 Discrete Mathematical Structures 3
- STAT 4710 Introduction to Mathematical Statistics 3

**Technical elective** 3

**Science courses (choose one of the following four sequences)** 3

**Physics sequence:**

- (credit not given for both PHYSCS 1210 and PHYSCS 2750, or PHYSCS 1220 and PHYSCS 2760)

  - **PHYSCS 1210** College Physics I 8
  - **PHYSCS 1220** College Physics II 8

- **PHYSCS 2750** University Physics I 10
- **PHYSCS 2760** University Physics II 10

**Chemistry sequence:**

- **CHEM 1320** College Chemistry I 4
- **CHEM 1330** College Chemistry II 4

**Biology sequence:**

- **BIO_SC 1010** General Principles and Concepts of Biology 3
- **BIO_SC 1020** General Biology Laboratory 2

  Select one of the following:

  - **BIO_SC 1200** General Botany with Laboratory 2
  - **BIOCHM 2110** The Living World: Molecular Scale 2
  - **BIOCHM 2112** Biotechnology in Society 2
  - **ANTHRO 2050** Introduction to Biological Anthropology with Laboratory 2

  OR

  - **ANTHRO 2051** Introduction to Biological Anthropology & ANTHRO 2052 2
    - and Biological Anthropology Laboratory 2

- **BIO_SC 2100** Infectious Diseases 2
- **BIO_SC 2600** Ornithology 2
- **BIO_SC 3050** Genetics and Society 2
- **BIO_SC 3210** Plant Systematics 2

**Geology sequence:**

- **GEOL 1100** Principles of Geology with Laboratory 4
  - or **GEOL 1200** Environmental Geology with Laboratory 4

  Select one of the following:

  - **GEOL 2150** The Age of the Dinosaurs 4
  - **GEOL 2200** Oceanography 4
  - **GEOL 2300** Earth Systems and Global Change 4
  - **GEOL 2350** Historical Geology 4
  - **GEOL 2400** Surficial Earth Processes and Products with Laboratory 4

- **GEOL 3110** Geology of Missouri 4
  - & **GEOL 3115** Geology of Missouri Laboratory 4

**Additional courses to complete 12 credits in science**

- **ASTR 1010** Introduction to Astronomy 4
- **ASTR 1020** Introduction to Laboratory Astronomy 2

Any science course outside the student’s selected sequence.

Any biology, biochemistry, chemistry, geology, or physics courses beyond the levels listed above.

Other science courses pre-approved by the advisor.

Non-Science Electives 9
Students must complete 9 hours of non-science electives which include courses in business, education, or additional social, behavioral or humanities courses beyond what is required in those categories.

1 At least 15 credit hours of computer science electives must be numbered above 4000; one of the 4000-level courses must be CMP_SC 4410 or CMP_SC 4450. A maximum of 6 hours of IT courses can be taken as CS electives with the following stipulations: One 3000/4000 level INFOTC course (excluding INFOTC 4400 and INFOTC 4500) can be taken as a CMP_SC elective but it is counted as a lower level (below 4000) CMP_SC course. INFOTC 4400 and INFOTC 4500 are counted as CS 4000 level courses.

2 2000-level or above CMP_SC course or 4000-level MATH course, 2000-level or above engineering courses, MANGMT 3000, FINANC 3000 or other courses that meet prior approval of Computer Science advisor. An INFOTC course at the 2000 level or above can be taken. Students cannot take INFOTC 2810 or INFOTC 2910 as a technical elective if they have already taken CMP_SC 4850.

3 Including one of the two-semester sequences below. At least one of the courses must include a lab. Labs listed separately are not considered a second science course (for example, BIO_SC 1010 and BIO_SC 1020 equal one science course).

**Semester Plan**

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.

### MS in Computer Science

All students completing a master's degree must fulfill the following minimum requirements:

1. The student must earn a minimum of 30 credit hours of course work approved by the CS Department. This course work must include at least 15 credit hours of course work numbered 8000 or above (CMP_SC 8990 Research-Masters Thesis Computer Science credit is counted in the required 15 credit hours, but CMP_SC 8980 is not).
2. The overall GPA of course work taken as an enrolled graduate student must be at least 3.0 (out of 4.0).
3. Courses taken in other departments (up to 6 credit hours) will be considered for approval as part of a student's MS program. Written approval from faculty advisors or the Director of Graduate Studies is required prior to the student undertaking the coursework. Selected non-CS courses, such as IS_LT 7360 and IS_LT 7370, Intro and Intermediate Web Development, will not be counted. This policy takes effect in Spring 2015.
4. A 4000-level course listed in the minimum requirements for graduate admission cannot be taken at the equivalent 7000 level as part of the required hours for the MS, ME, or PhD programs.
5. Non-Thesis Option:
   - In order to complete the non-thesis option, the student must complete an independent project under a faculty advisor approved by the department. This project is carried out by enrolling in CMP_SC 8980 (Non-Thesis Research) for at least one hour of credit. This project is documented and presented to a faculty committee of at least three graduate faculty members and defended in a public defense as part of a final oral examination. The CMP_SC 8980 course grade is assigned by the student's faculty
PhD in Computer Science

All students completing a PhD degree must fulfill the following minimum requirements:

1. Complete all of the course work requirements of the Master’s degree in CS or have an MS degree in CS from another institution. The required 15 hours at the 8000 level must be regular courses not to include Research or Problems. The student must maintain an overall GPA of at least 3.4/4.0 in their graduate level course work (excluding Research and Problems courses).
2. Pass a qualifying examination* to be admitted to candidacy in the CS PhD program within three years of program enrollment.
3. Earn a minimum of 72 credit hours of course work and research past the student’s Bachelor’s degree.
4. Pass a comprehensive examination covering their areas of expertise within five years of program enrollment.
5. Complete a doctoral dissertation on a topic approved by the candidate’s advisory committee.
6. Defend the dissertation in a final oral examination.
7. Have at least one journal paper submitted, accepted or published, as approved by the advisor.
8. Present on a research topic as part of the CS Seminar Series at some point between passing the qualifying exam and the dissertation defense. This policy is effective for entering PhD students in Spring 2013 and after.
9. Seminar Attendance: The approval of the D4 form is tied to the attendance records for the department’s seminar series. PhD students are required to attend a total of at least twenty CS approved seminars including all CS Seminar Series presentations, Dr. Harrison’s Security Reading Group meetings, and others as announced. Master’s students who add the PhD program can apply up to ten seminars attended as part of their Master’s program toward the attendance requirement for doctoral students.
10. D Forms: After the successful completion of the Qualifying Examination - by or before the end of the third year in the program - the D1 Qualifying Exam Results and Doctoral Committee Approval form should be submitted to the Graduate School, followed by the D2 Plan of Study for the Doctoral Degree form. The D3 form Doctoral Comprehensive Examination Results is submitted when the student has completed the Comprehensive Exam. Graduate School policy requires the completion of the Comp Exam within five years of starting the PhD program. At least seven months must pass between the Comp Exam and the dissertation defense, which is followed by submission of the D4 Dissertation Defense form.
11. Annual Review Requirement of the Graduate School: All graduate students are required to complete the Annual Review Requirement by updating their information in the Graduate Student Progress System by the end of their second, fourth, etc. semesters of their program. The CS Department requires that this report be approved online by the student’s faculty advisor and a printed copy attached to each D form before being signed by the CS Director of Graduate Studies.

*Students cannot take CMP_SC 9990 before passing the PhD qualifying exam. Pre-Qual students should take CMP_SC 8990 for Research credit.
Electrical and Computer Engineering

S. Kovaleski, Interim Chair
College of Engineering
349 Engineering Building West
(573) 882-6387
KovaleskiS@missouri.edu

The Department of Electrical & Computer Engineering is one of 9 academic departments within the College of Engineering at the University of Missouri. Established in 1884 as the first electrical engineering program in the nation, this ABET accredited program is now home to more than 300 undergraduate students, almost 150 graduate students and 21 faculty members.

Faculty

Assistant Professor M. Becchi**, T. Han**, C. Xiao*, A. Zare**
Associate Professor Emeritus R. W. Leavene Jr.*

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

The University does not offer an undergraduate degree in the combined areas of Electrical and Computer Engineering. See Electrical Engineering (p. 502) and Computer Engineering (p. 486) for details on the undergraduate degree programs.

Graduate

- PhD in Electrical and Computer Engineering (p. 499)
349 Engineering Building West
Columbia, MO 65211
Phone: 573-882-4436
Email: umcengrecegradoff@missouri.edu
http://engineering.missouri.edu/ece/

Director of Graduate Studies: James Keller

The Department also offers an MS in Computer Engineering (p. 498), an MS in Electrical Engineering (p. 506), and the College offers an interdepartmental ME in Engineering with a focus in Computer and Electrical Engineering (p. 508).

Established in 1885, the Department of Electrical & Computer Engineering has a long tradition of excellence. Our classes are small with extensive design and laboratory experimentation. Research opportunities exist for both undergraduate and graduate students in Communication and Signal Processing, Physical Electronics, Intelligent Systems, Systems Modeling and Control, Nano and Micro Electronics, and Digital / Computer Systems.

Career Opportunities

Throughout the 20th century, the electrical engineering and computer engineering professions devised many of the innovations that dominated the technology landscape. In the 21st century, electrical and computer engineers will be at the forefront of a wide spectrum of technologies including nanotechnology, biotechnology, sensors, power generation, electric vehicles, and telecommunications.

Areas of Study

Communications and Signal Processing, Satellite remote sensing, geospatial intelligence, image/video processing, land-mine detection, speech signal processing, wireless communications, underwater communications.

Physical Electronics. Medical applications and advanced sterilization of food, water and products using pulsed power, pulsed power applications and research (MU Gigawatt Rep-rate Test Stand. Lasers, high voltage switching and power conditioning, high voltage pulse technology and plasmas with the 2.5 MV, 250 kA MU-Terawatt Test Stand), interesting plasma science applications, like high voltage accelerators to propel micro spacecraft, electromagnetic launchers, radio-frequency effects on electronics, power electronics, microwave photonics, electrooptics and photoconductive switches.

Intelligent Systems. Basic and applied research in computational intelligence (neural networks, fuzzy systems, evolutionary computation, swarm intelligence), spatial reasoning for scene understanding and human/robot interaction, pattern recognition and automated decision making, eldercare technology, computer vision and image processing, human activity analysis, cognitive robotics, landmine and explosive detection.

Systems Modeling and Control. Control systems, computer process control, digital and sampled data control, robotics, system biology; biologically realistic modeling, computational, neuroscience, theoretical neurosciences, electrophysiology.

Nanoelectronics and Microelectronics. Nano/microelectromechanical systems (N/ MEMS), micro sensors and actuators, High K dielectrics, nano structures, complex heterostructures (i.e. HEMTs, VCSELs, detectors, HBTs, etc), BioMEMS and biomedical microsystems.

Digital System and Circuit Design, Computer Process Control. Excellent computer equipment and other laboratory facilities are used for research sponsored by various government and industry sources. The ECE department is the home department of the following University centers: Center for Geospatial Intelligence, Center for Micro/Nano Systems and Nanotechnology, Center for Eldercare and Rehabilitation Technology, Center for Physical Electronics and Power Electronics, Center for Electromechanics and Energy Conversion, Interdisciplinary Center for Research in Earth Science Technologies, Institute for Computational Neuroscience.

Internal Funding

Teaching Assistantships

Teaching assistantships are normally awarded to qualified graduate students with appropriate communication skills who assist faculty
members in various phases of instruction. International students may not be appointed to teaching assistantships in their first semester on campus. International students must pass a language screening test at a proper level to be eligible for the TA positions available.

Research Assistantships
Research assistantships are granted to students qualified for working with professors on particular research projects. The research assistants are selected by faculty members who have research funds to support graduate students. Therefore, students should contact the faculty members directly for the RA possibility.

Fellowships
The department faculty actively pursue funding for selected research fellowships. Available fellowship opportunities can be found by contacting the ECE Graduate Office. Additionally, a limited number of “Teaching Fellows” are awarded annually to outstanding PhD students, particularly for those preparing for academic careers. Details can obtained from the ECE Graduate Office.

Graduate
PhD in Electrical and Computer Engineering

Admission Contact Information
349 Engineering Building West
Columbia, MO 65211

Email: umcengrecgradoff@missouri.edu

The ECE department offers the Doctor of Philosophy in Electrical and Computer Engineering.

Admission Criteria for the PhD Electrical or Computer Engineering
Deadline for Fall entrance: February 15
Deadline for Spring entrance: September 1

• Minimum GPA: 3.5 (with A = 4.0) in the last 60 hours of the MS graded coursework
• Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal</th>
<th>Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>

<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Listening</td>
<td>5.5</td>
</tr>
</tbody>
</table>

Hold the equivalent of a BS degree in electrical or computer engineering with an outstanding record, or holds the equivalent of an MS degree in electrical or computer engineering

Consideration in doctoral program admissions is given to the applicant’s grade trends, experience and maturity, and to the availability of expertise in areas of the applicant’s technical interest.

Required Application Materials

• Statement of Purpose (upload to the Supplemental information section of the application)
• Copies of your official transcripts (upload to the Educational History section of the application)
• Copies of your GRE scores (upload to the Test Information section of the application)
• Copies of your TOEFL or IELTS Scores (for non-native English speakers only) (upload to the Test Information section of the application)
• 3 letters of Recommendation (the department accepts electronic recommendations – in the recommendation section of the online application, enter the information for three recommenders. Each recommender will receive an email with instructions on how to complete the recommendation). The department does also accept hard copy letters of recommendation. The letters may be mailed to: Graduate School, 210 Jesse Hall, Columbia, MO 65211.

To the Graduate School:
Official Transcripts. The mailing address is: Graduate School, 210 Jesse Hall, Columbia, MO 65211.

Note: when registering for GRE or TOEFL exams, be sure to designate your program of interest at the University of Missouri-Columbia. MU’s Institutional Code is 6875 (no departmental code is necessary).

To be accepted outright by the director of graduate studies (DGS), the student needs to have an MS degree in either Electrical Engineering or Computer Engineering.

Students who meet the academic requirements but have degrees in other engineering or science disciplines can be accepted into the PhD program by the Graduate Program Committee (GPC).

Students who don’t meet the above requirements may still be admitted by the GPC if there are mitigating factors. Consideration in doctoral program admissions is given to the applicant’s grade trends, experience and maturity, and to the availability of expertise in areas of the applicant’s technical interest.

Outstanding BS students who meet the following requirements may be accepted directly for advisement in the department's doctoral program:

• Holds the equivalent of a BS degree in electrical or computer engineering
• GRE quantitative score of at least the 90th percentile
• TOEFL score of at least 550 paper-based. IELTS score: 5.5
• A 3.5 or better grad point average (A=4.0) in their undergraduate studies
• Submission of three letters of recommendation from persons familiar with the applicant’s engineering or related work
• Submission of a statement of research interests

Additional information can be obtained from the Graduate Division of the Department of Electrical and Computer Engineering, 349 Engineering Building West, Columbia, MO 65211, or via email: umcengrecegradoff@missouri.edu

Appeal Process

All students have the right to a timely formal appeal to the GPC. Upon receipt of an admission decision or disciplinary action, the student has 10 working days in which to request a formal appeal. The DGS will convene a meeting of the GPC, the student, and the student’s advocate (if appropriate) within 10 working days of receiving the request. The decision of the GPC at the hearing is final.

Transfer of Credit

The doctoral committee may recommend up to 30 hours of post-baccalaureate graduate credit from an accredited university be transferred toward the total hours required for the doctoral degree. It is the responsibility of the doctoral committee to determine the appropriateness of coursework for transfer credit. All requests for exceptions to this policy must be approved by the Dean of the Graduate School. This policy applies to students who begin their enrollment during the Fall Term 2006 and subsequent semesters.

(Note: The preceding represents a change in policy and becomes effective for graduate students beginning their doctoral programs during the Fall semester 2006. For students who began their doctoral programs prior to the fall 2006 semester, consult the appropriate catalog or the Graduate School for policies pertaining to transfer of credit.)

The committee may recommend that courses taken through MU’s Extension division be counted toward the credit hour requirement. Extension or correspondence course work from institutions other than MU may not be used to meet the total hours required for the doctoral degree.

Time Limits on Transfer Credits

All courses to be applied to the plan of study must be completed within 8 years of filing the plan.

Requirements to obtain the PhD degree in Electrical Engineering and Computer Engineering

1. The student must be qualified to be a PhD candidate.

   Students admitted with an MS degree must prove competency in a written qualifying examination conducted by a PhD qualifying committee within 3 semesters of admission.

   Students admitted directly from a BS degree program must complete the 24 hours of graded coursework requirements of the MS degree during the first two years of their program. This will prepare them for the PhD qualifying examination process, to be passed within 4 semesters after this requirement is satisfied, and will allow them to obtain an MS degree if a thesis or project report is completed and defended, consistent with MS requirements, or to obtain an ME degree once the course work requirement has been satisfied. A student may petition the faculty for an extension of the two year requirement.

2. A minimum of 72 semester hours beyond the BS are required by the Graduate School; the student’s doctoral program committee sets the total number of credit hours and specific courses to be completed as part of his/her PhD program. However, the Graduate School requires a minimum of 15 hours of 8000/9000 level classes to be taken at MU exclusive of research, problems, and supervised study.

3. The candidate must pass a written and oral comprehensive examination.

4. The student must complete a doctoral dissertation on a topic approved by his or her Doctoral Advisory Committee and defend the dissertation in an oral final examination.

These PhD requirements apply to ECE graduate students first enrolled in MU ECE in the Fall semester 2007 or later. UM ECE graduate students enrolled prior to Fall semester 2007 may choose to follow the MU ECE PhD requirements that were in effect for their MU ECE graduate admission semester.

Selection of an Advisor

The student selects an advisor or co-advisors, by mutual consent, from doctoral faculty members who are dissertation supervisors in the department or area program in which the major work is planned. In the event that an advisor retires or leaves MU, he/she may continue to serve as a student’s advisor unless there is written academic program policy prohibiting such an arrangement. If an advisor is unable or unwilling to continue to serve, the academic program, with the leadership of the director of graduate studies, will assist to ensure that a replacement is found.

Doctoral Degree Forms

By the end of the second semester of study at MU, a student should begin submitting degree program forms which will aid the academic program and the Graduate School in tracking the student’s progress toward degree completion. These forms include the following:

• D1 Qualifying Exam Results & Doctoral Committee Approval (http://gradschool.missouri.edu/forms-downloads/repository/d1.pdf)
  Submitted after passing qualifying exams

• D2 Plan of Study Form (http://gradschool.missouri.edu/forms-downloads/repository/d2.pdf)
  Submitted no later than the end of the student’s third semester.

• D3 Result of the Comprehensive Examination (http://gradschool.missouri.edu/forms-downloads/repository/d3.pdf)
  Submitted to the Graduate School within one month of exam completion

  Submitted by the Graduate School deadline for the semester in which the students plan to graduate.

• Change of Committee (http://gradschool.missouri.edu/forms-downloads/repository/cochform.pdf)

• Plan of Study Course Substitution Form (http://gradschool.missouri.edu/forms-downloads/repository/subform.pdf)

More information is available at: http://gradschool.missouri.edu/academics/graduation-requirements/doctoral-grad-requirements.php
Qualifying Examination/Process

To be officially admitted to the PhD program, the student must pass a qualifying examination/process. The student is given two opportunities to pass the Qualifying Examination with a score of 70% or above.

Qualifying Exam Rules

1. To be eligible to take the Qualifying Examination, graduate students must be accepted for advisement in the Ph.D. program. The examination must be passed before the end of his or her second year of advisement as a Ph.D. student. Each student may take the exam twice. Students who have been accepted into the PhD program with a BS degree must complete the 24 hours of graded coursework requirements of the MS degree during the first two years of their program. This will prepare them for the PhD qualifying examination process, to be passed within two years after the requirement is satisfied, and will allow them to obtain an MS degree if a thesis or project report is completed and defended, consistent with the MS requirements, or to obtain an ME degree once the course work requirement has been satisfied. A student may petition the faculty for an extension of the two year requirement.

2. All eligible students who intend to take the exam must complete the REQUEST FOR QUALIFYING EXAMINATION form and submit it to the ECE Graduate Office within four weeks after the start of the semester. At this time the student will be asked to select two of the seven topic areas over which he or she wishes to be examined. Only students on the approved lists will be allowed to take the exam. When a student submits the REQUEST FOR QUALIFYING EXAMINATION form, the Graduate Office will provide:
   a. The date, time and place of the examination;
   b. A reminder to bring their ID card to the exam.
   c. A copy of the Qualifying Examination Rules.
   d. A copy of the Guidelines For Qualifying Exam Committee.

3. The examination shall be prepared and administered during the 12th week of both the fall and winter semesters by the Qualifying Examination (QE) Committee. The ECE Graduate Committee currently serves as the QE Committee since it contains a representative from each of the 6 focus areas in the department. The Graduate Director will select the specific date, time and place of the exam at the beginning of each semester.

4. It shall be a written examination taken by all students desiring to qualify during the given semester.

5. The exam will contain five questions from each of the two areas selected by the student. Each student must select and answer five questions from this set, with no more than three questions from one area. The exam will be closed book, with two standard pages of notes, front and back, allowed. A book of mathematical tables will be provided by the department. The exam will last four hours.

6. The QE committee shall administer the examination and identify passing candidates. The ECE faculty as a whole have the responsibility to approve that action.

Qualifying Examination Guidelines

These guidelines have been prepared to help maintain consistency in the form and difficulty of the Department's qualifying examination.

1. The QE Committee shall consist of one faculty representative from each of the following topic areas, except Foundations:

   a. Communications and Signal Processing Area;
   b. Intelligent Systems Area;
   c. Physical and Power Electronics Area;
   d. System Modeling and Control;
   e. Micro/Nano Electronics;
   f. Digital/Computer Systems; and
   g. Applied Physics
   h. Foundations

2. The ECE graduate Committee serves as the QE Committee since it contains a representative from each research area. The ECE department chair appoints the Graduate Committee with input from the Graduate Director.

3. The faculty from each topic area will be responsible for maintaining a list of topics which constitute the core material an MS graduate should be expected to have mastered. The members of each group will be responsible for preparing questions for the exam covering topics from the list. For the major core focus area, questions will come from 4000/7000 – 8000 level courses. Questions for the topics in the Foundation area will be from a set of required 3000 level courses.

4. The QE Committee will solicit questions from the faculty groups, but the Committee will have the responsibility of combining these questions into a fair, comprehensive exam. The QE Committee member for each group will be responsible for coordinating his or her group. The representatives of each topic group shall call a meeting of all faculty from that group for the purpose of reviewing the exam questions to be submitted to the Qualifying Exam Committee. The group's submission must be approved by a majority vote of those present.

5. Solutions will be graded by faculty members who prepared the questions. The grading must be completed within two weeks after the exam. A guideline is that each question should be doable by a strong MS graduate in 40 to 45 minutes.

6. Solutions will be graded on a 100 point scale with 70 points as a minimum passing grade.

7. Each student's performance will be reviewed by the QE Committee and a majority vote of the QE Committee is required for passing.

8. The QE Committee must report the results of the exam to the ECE Faculty within four weeks of the exam.
Electrical Engineering

S. Kovaleski, Interim Chair
College of Engineering
349 Engineering Building West
(573) 882-6387
kovalesks@missouri.edu

The Department of Electrical & Computer Engineering is one of 9 academic departments within the College of Engineering at the University of Missouri.

Established in 1884 as the first electrical engineering program in the nation, this ABET accredited program is now home to more than 300 undergraduate students, almost 150 graduate students and 21 faculty members.

Faculty

Assistant Professor M. Becchi**, T. Han**, C. Xiao*, A. Zare**
Associate Professor Emeritus R. W. Leavene Jr.*

Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BSEE in Electrical Engineering (p. 505)

beattyt@missouri.edu

Students interested in interdisciplinary studies may use some electives to study business, premedicine, prelaw, and other areas. Students are able to choose from a wide variety of courses offered by other departments in the College of Engineering, as well as from other MU colleges, taking advantage of the multidisciplinary nature of the campus.

Commencing in the Fall Semester 2011, the Program Educational Objectives (PEOs) of the undergraduate program in Electrical Engineering at MU are to nurture graduates who:

- Communicate effectively, both in written reports and oral presentations.
- Analyze and design electrical systems effectively.
- Possess comprehensive problem-solving skills, including the ability to define problems and to evaluate alternative solutions.
- Work effectively in teams consisting of diverse cultures and disciplines.
- Are passionate about engineering, as demonstrated by their leadership, innovation, motivation, and interest in continuing education.

Commencing in the Fall 2011, the Program Educational Objectives (PEOs) of the undergraduate program in computer Engineering at MU are to nurture graduates who:

- Communicate effectively, both in written reports and oral presentations.
- Analyze and design electrical systems effectively.
- Possess comprehensive problem-solving skills, including the ability to define problems and to evaluate alternative solutions.
- Work effectively in teams consisting of diverse cultures and disciplines.
- Are passionate about engineering, as demonstrated by their leadership, innovation, motivation, and interest in continuing education.

Both the Bachelor of Science in Electrical Engineering (BS EE) and the Bachelor of Science in Computer Engineering (BS COE) require that students earn a 2.0 GPA or better in all courses that have an MU engineering prefix. All ECE courses require a grade of C or better in ECE prerequisites.

Engineering design in both the electrical engineering and computer engineering programs is provided through an integrated laboratory structure. Beginning with the first laboratory course in the fourth semester of each program, students have a significant design and laboratory experience in each semester of their respective programs.

In addition to the major core requirements, students must complete all University graduation requirements including University general education, as well as all degree and college or school requirements.

ECE Honors Program

The ECE Honors Program follows the general rules and philosophy of the College of Engineering Honors Program. Students may enter the program from the beginning of the junior year and must have a GPA of 3.0/4.0 at the start. Eligible students participate in the program by enrolling in ECE 4995 Undergraduate Honors Research in Electrical Computer Engineering for one to three credit hours, which replaces an equivalent number of hours of ECE technical electives.

The heart of the program is a research or advanced design project culminating in an undergraduate honors thesis. The project is conducted under the supervision of the honors advisor, who is an ECE faculty member selected by mutual agreement between the student and the
professor. Satisfactory completion of the project requires approval (signatures) of the honors thesis by both the honors advisor and an additional faculty member, who serves as second reader of the thesis. Students who complete the program and graduate with a GPA of at least 3.0 receive the designation “Honors Scholar in Engineering” at graduation and on their diploma.

Another valuable feature of the Honors Program is that participants may reduce the number of credit hours required for degree completion to the University minimum of 120 by substituting up to six hours of credit from graduate courses through dual (undergraduate/graduate) enrollment during the last four semesters of the undergraduate program and after completion of the honors project.

### Double Majors - Electrical Engineering and Computer Engineering

Many students in the ECE department combine the BS in Electrical Engineering with the BS in Computer Engineering in a special 138-credit program. These students receive both the BS EE and BS CoE degrees.

Graduate

- MS in Electrical Engineering (p. 506)
- 349 Engineering Building West
- Columbia, MO 65211
- Phone: 573-882-4436
- Email: umcengrecegradoff@missouri.edu
- http://engineering.missouri.edu/ece/

The Department also offers a PhD in Electrical and Computer Engineering (p. 499), and the College of Engineering offers an interdepartmental ME in Engineering with a focus in Computer or Electrical Engineering (p. 508).

Established in 1885, the Department of Electrical & Computer Engineering has a long tradition of excellence. Our classes are small with extensive design and laboratory experimentation. Research opportunities exist for both undergraduate and graduate students in Communication and Signal Processing, Physical Electronics, Intelligent Systems, Systems Modeling and Control, Nano and Micro Electronics, and Digital / Computer Systems.

Career Opportunities

Throughout the 20th century, the electrical engineering and computer engineering professions devised many of the innovations that dominated the technology landscape. In the 21st century, electrical and computer engineers will be at the forefront of a wide spectrum of technologies including nanotechnology, biotechnology, sensors, power generation, electric vehicles, and telecommunications.

Degrees Offered

At the University of Missouri, the Department of Electrical and Computer Engineering offers accredited programs of study leading to Bachelor of Science (BS), Master of Science (MS), and Doctoral (PhD) degrees.

Areas of study include

- Communications and Signal Processing, Satellite remote sensing, geospatial intelligence, image/video processing, land-mine detection, speech signal processing, wireless communications, underwater communications.
- Physical Electronics. Medical applications and advanced sterilization of food, water and products using pulsed power, pulsed power applications and research (MU Gigawatt Rep-rate Test Stand. Lasers, high voltage switching and power conditioning, high voltage pulse technology and plasmas with the 2.5 MV, 250 kA MU-Terawatt Test Stand), interesting plasma science applications, like high voltage accelerators to propel micro spacecraft, electromagnetic launchers, radio-frequency effects on electronics, power electronics, microwave photonics, electrooptics and photoconductive switches.

Intelligent Systems. Basic and applied research in computational intelligence (neural networks, fuzzy systems, evolutionary computation, swarm intelligence), spatial reasoning for scene understanding and human/robot interaction, pattern recognition and automated decision making, eldercare technology, computer vision and image processing, human activity analysis, cognitive robotics, landmine and explosive detection.

Systems Modeling and Control. Control systems, computer process control, digital and sampled data control, robotics, system biology; biologically realistic modeling, computational, neuroscience, theoretical neuroscience, electrophysiology.

Nano and Micro Electronics. Nano/microelectromechanical systems (N/ MEMS), micro sensors and actuators, High K dielectrics, nano structures, complex heterostructures (i.e. HEMTs, VCSELs, detectors, HBTs, etc), BioMEMS and biomedical microsystems.

Digital System and Circuit Design, Computer Process Control. Excellent computer equipment and other laboratory facilities are used for research sponsored by various government and industry sources. The ECE department is the home department of the following University centers: Center for Geospatial Intelligence, Center for Micro/Nano Systems and Nanotechnology, Center for Eldercare and Rehabilitation Technology, Center for Physical Electronics and Power Electronics, Center for Electromechanics and Energy Conversion, Interdisciplinary Center for Research in Earth Science Technologies, Institute for Computational Neurobiology.

Internal Funding

Teaching Assistantships

Teaching assistantships are normally awarded to qualified graduate students with appropriate communication skills who assist faculty members in various phases of instruction. International students may not be appointed to teaching assistantships in their first semester on campus. International students must pass a language screening test at a proper level to be eligible for the TA positions available.

Research Assistantships

Research assistantships are granted to students qualified for working with professors on particular research projects. The research assistants are selected by faculty members who have research funds to support graduate students. Therefore, students should contact the faculty members directly for the RA possibility.

Fellowships

The department faculty actively pursue funding for selected research fellowships. Available fellowship opportunities can be found by contacting the ECE Graduate Office. Additionally, a limited number of "Teaching Fellows" are awarded annually to outstanding PhD students, particularly for those preparing for academic careers. Details can obtained from the ECE Graduate Office.

Undergraduate
# BSEE in Electrical Engineering

## Major Program Requirements

The electrical engineering degree offers course work in all traditional areas of the electrical engineering field. Focused areas of work are offered in the areas of communications, digital systems, discrete and integrated electronics, electromagnetics, energy systems and power electronics, robotics and system control. (Focus areas are not listed on transcripts or diplomas).

Students must complete all university requirements (p. 19), including general education (p. 20), and degree requirements below.

### Major core requirements

### Total Credits: 126

---

**Graduate**
MS in Electrical Engineering

Master of Science in Electrical or Computer Engineering (MS)

Admission
349 Engineering Building West, Columbia, MO 65211
Phone: 573-882-4436
Email: umcengrecgradoff@missouri.edu
http://engineering.missouri.edu/ece/

Admission Criteria
Fall deadline: February 15
Spring deadline: September 1
Note: Applications received after these deadlines will be evaluated as time allows.
• Minimum GPA: 3.0 for the last 60 hours
• Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal</th>
<th>Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>
<td>80th percentile</td>
<td>will be considered</td>
<td></td>
</tr>
<tr>
<td>On or After August 1, 2011</td>
<td>80th percentile</td>
<td>will be considered</td>
<td></td>
</tr>
</tbody>
</table>

International applicants only:
• Minimum TOEFL scores:
  - Internet-based test (iBT)
  - Paper-based test (PBT)
  - 80 550
• Minimum Academic IELTS scores:

<table>
<thead>
<tr>
<th>Item</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Listening</td>
<td>5.5</td>

<tr>
<td>Writing</td>
<td>5.5</td>
</tr>
<tr>
<td>Speaking</td>
<td>5.5</td>
</tr>
</tbody>
</table>

Required Application Materials:
• Statement of Purpose (upload to the Supplemental information section of the application)
• Copies of your official transcripts (upload to the Educational History section of the application)
• Copies of your GRE scores (upload to the Test Information section of the application)
• Copies of your TOEFL or IELTS Scores (for non-native English speakers only) (upload to the Test Information section of the application)
• 3 letters of Recommendation (the department accepts electronic recommendations – in the recommendation section of the online application, enter the information for three recommenders. Each recommender will receive an email with instructions on how to complete the recommendation). The department does also accept hard copy letters of recommendation. The letters may be mailed to: Graduate School, 210 Jesse Hall, Columbia, MO 65211.

To the Graduate School:

Official Transcripts. The mailing address is: Graduate School, 210 Jesse Hall, Columbia, MO 65211.

Note: when registering for GRE or TOEFL exams, be sure to designate your program of interest at the University of Missouri – Columbia. MU’s Institutional Code is 6875 (no departmental code is necessary).

Admissions Criteria for the MS in Electrical or Computer Engineering
To be accepted outright by the director of graduate studies (DGS), the student needs to have a BS degree in either Electrical Engineering or Computer Engineering in addition to meeting the above requirements. Students who meet the academic requirements but have degrees in other engineering or science disciplines can be accepted directly into the MS program by the graduate program committee (GPC). Such students are strongly encouraged to consult with the DGS or their advisor about appropriate bridge courses. Based on individual circumstances, students may be advised to register as an undeclared graduate student to fill in background course work prior to admission into the department.

Students who do not meet the above requirements may still be admitted on probation by the GPC if there are mitigating factors. Students admitted on probation must receive at least a 3.0 GPA for the first 12 hours of graded graduate coursework completed in their first two semesters. Failure to achieve this GPA will result in expulsion from the ECE MS program.

Appeal Process
All students have the right to a timely formal appeal to the GPC. Upon receipt of an admission decision or disciplinary action, the student has 10 working days in which to request a formal appeal. The DGS will convene a meeting of the GPC, the student, and the student’s advocate (if appropriate) within 10 working days of receiving the request. The decision of the GPC at the hearing is final.

Degree Requirements
To fulfill the requirements for the MS degree, the following rules apply:
• A candidate must complete 30 hours, including at least 12 hours of 8000-level graded course work (exclusive of ECE 8990 or ECE 8085 or ECE 8010 hours).
• At least six of these graded 8000 level course hours need to come from ECE.
• At least 15 hours of graded course work (total combination of 7000 and 8000 level courses, exclusive of ECE 8990, ECE 8085, or ECE 8010 hours) must be taken from the Electrical and Computer Engineering Department course offerings.
• A maximum of six hours of graduate credit may be transferred from another campus in the University of Missouri System or other university, while a maximum of eight hours of graduate credit may be used from a previous MU master’s degree.
• At most, three hours of course work in supervised study (ECE 8085 or ECE 8990) may be taken during the MS program and they will be graded on an S/U basis.
• At least one course from each of three different emphasis areas must be taken; a minimum of two of the emphasis areas must be in Electrical and Computer Engineering. (Each ECE graduate course is designated to an emphasis area. Contact the ECE graduate office for a current list).
• A minimum of 3 hours to a maximum of 6 hours of research (ECE 8990) or problems (ECE 8085) are required, based on whether the student writes a master’s thesis or a master’s Report.
• The student’s cumulative GPA must be at least 3.0 to graduate.

The requirements for the MS degree must be met within an eight year period. Each candidate must pass a final oral examination to demonstrate mastery of the work included in the thesis or in a substantial independent project. These MS requirements apply to ECE graduate students first enrolled in MU ECE in the Fall semester 2007 or later. UM ECE graduate students enrolled prior to Fall semester 2007 may choose to follow the MU ECE MS requirements that were in effect for their MU ECE graduate admission semester.

Academic Probation
A student whose GPA drops below 3.0 is automatically placed on academic probation. In such a case, the student has one semester to raise his or her cumulative GPA to 3.0. Failure to do so will result in expulsion from the program. Additionally, a student who receives the grade of “C” in 9 hours of coursework will be expelled. As with acceptance, students here also have a right to the same formal appeal process described above.

Selection of an Advisor
Students must choose an academic advisor who will then provide guidance for the selection of coursework, and in the choice and execution of a research question. The student’s academic advisor and the Director of Graduate Studies must approve all coursework used to satisfy the credit hour requirements for this degree. After performing satisfactorily for a minimum of one semester, the student, with the advisor’s assistance, completes the Program of Study form that outlines the plan of study for the student’s graduate program. M1 - Program of Study form

The form is forwarded through the DGS to the Graduate School for approval. In the event that an advisor retires or leaves MU, he/she may continue to serve as the student’s main advisor unless there is written academic program policy prohibiting such an arrangement. If an advisor is unable or unwilling to continue to serve, the academic program, with the leadership of the DGS, will assist the student to ensure that a replacement is found.

The Program of Study form must be filed with the Graduate School by the end of the student’s second semester of enrollment. Upon approval of the program by the Graduate School, the student is a candidate for the degree. If changes must be made on a student’s Program of Study form, a Program of Study Substitution form is used.

Thesis Option
For students under the thesis option of the MS degree, i.e., students enrolling for ECE 8990, an M-2 Request for Thesis Committee form is required to be submitted for approval by the department DGS and the Graduate School by the end of the student’s second semester.

A thesis committee is composed of three members of the MU faculty: a major advisor from the academic program, a second reader from the academic program, and an outside reader who is a member of the graduate faculty from a different MU graduate program. Upon approval of the department DGS, the student may petition the Graduate School to allow a person who is not a member of the MU graduate faculty to serve as the third reader. The petition should include a written justification for such a request and a copy of the person’s curriculum vitae. The Graduate School maintains copies of curriculum vitae previously received and approved, and if such a request is anticipated, the student should contact the Graduate School to see if the curriculum vita of a particular person is already on file. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date.

Information about submitting the thesis can be found in the Thesis and Dissertation Guidelines.

Non-Thesis Option
For students who enroll in ECE 8085 (Problems), a problem report rather than a thesis is required. The student is not required to submit the M-2 form (request for a thesis committee). Instead, the student must have the report approved by his or her advisor and two other members of the graduate faculty, forming the student’s Problem Committee. It is not required that a member outside of ECE be included, although it is permissible for such a member of the MU graduate faculty to be appointed. At least one of the three members must have a primary academic appointment in ECE. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date. At that time, an announcement is to be made to the department faculty and graduate students to allow them to attend the defense. The student must defend the problem report to the committee, and make any needed adjustments in format and corrections/clarifications based on input from the committee. A final copy of the problem report must be filed with the ECE graduate office.

Report of the Master’s Examining Committee
The purpose of the M-3 Report of the Master’s Examining Committee Form is to have an official record of the final examining process, whether it is a thesis defense or presentation of a report. The student’s committee will indicate on this form if the student has passed the final exam. This form must be submitted to the Graduate School by a deadline for the semester in which the students plan to graduate. For a report option, the 3rd reader of the committee may be from the student’s department. The form is due in the Graduate School two weeks prior to graduation.
Engineering

Programs in Engineering are multi-department programs, and administered by the College of Engineering. Requirements are determined based on the specific area of interest. Options include a minor at the undergraduate level, and a master's degree at the graduate level.

College of Engineering
W1025 Lafferre Hall
Columbia, MO 65211
http://engineering.missouri.edu

Faculty

Instructor D. R. Huaco, R. T. Whelove

Please see the appropriate degree program pages for faculty information.

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• Minor in Engineering (p. 508)

Graduate

• ME in Engineering (p. 508)

The College of Engineering offers the Master of Engineering degree for graduate students interested in a terminal master’s degree, who have a demonstrated need for a professional, non-research degree in engineering, and have an academic interest in a specific focus area within engineering.

Several departments in the College of Engineering administers an ME degree focusing in that area.

Note: A focus area is not listed on the MU transcript. Hence the transcript and the diploma for any student completing an ME degree will only indicate Master of Engineering, with no designation of any specific department.

Minor in Engineering

The minor in engineering is designed for students majoring in disciplines such as physics, math, chemistry and computer science, but it is available to students in all disciplines. It consists of 18 or 19 hours of engineering courses as listed below.

Required Courses

Graduate

ME in Engineering

ME with a focus in Biological Engineering

Recognizing the immense promise of bioengineering and the unique position of MU for a strong bioengineering program, the College of Agriculture, Food and Natural Resources (CAFNR) and the College of Engineering (CoE) joined forces to form the Department of Biological Engineering (BE). BE unites existing faculty and infrastructure from both colleges. CoE contributes biomedical engineering capabilities while CAFNR brings strengths in bioprocess and bioenvironmental engineering. Biological engineering confers both masters and doctoral degrees to students who satisfy the general requirements of the Graduate School and the specific requirements for the masters degree and the doctoral degree of the Department of Biological Engineering.

ME with a focus in either Electrical or Computer Engineering

The ME degree is designed for entering master students interested in a terminal master’s degree, who have a demonstrated need for a professional, non research degree in engineering, and have a academic interest in the department. Please note that the official University transcript and diploma will only indicate Master of Engineering, with no designation of the focus area. The entrance requirements for the ME degree/Electrical and Computer Engineering Focus are the same as for the MS in Electrical Engineering and MS in Computer Engineering. Note: When registering for the GRE and TOEFL exams, be sure to designate the University of Missouri-Columbia and your program of interest as locations to receive the scores. MU’s Institutional Code for the GRE and TOEFL is: 6875.
ME with a focus in Industrial and Manufacturing Systems Engineering

The Master of Engineering (ME) degree is a non-research thirty-six-credit-hour program for U.S. students designed to be a terminal degree. The ME curriculum is based upon a seven-course core with the remaining 15 hours made up of courses appropriate to the student’s concentration area.

ME Entrance requirements

• GPA of 3.0 on 4.0 scale in the last 60 hours of the BS program
• Minimum GRE scores:

<table>

• 3 letters of recommendation
• statement of purpose
• transcripts

When registering for the GRE and TOEFL exams, be sure to designate the University of Missouri - Columbia and your program of interest as locations to receive the scores. MU’s institutional code for the GRE and TOEFL is 6875.

Graduation Requirements

An ME student must complete a minimum of 36 credit hours of graduate course work. At least 15 hours must be in 8000+ level courses and a minimum of 21 hours must be from the College of Engineering. The student must maintain at least a 3.0 cumulative gpa and complete the program in eight years. A project may be required by the advisor. For additional degree requirements based on the focus area, students should consult with the specific College of Engineering Department.

How to Apply

Applicants must concurrently apply to the MU Graduate School and the engineering department offering the focus area interest. Contact the department before applying for specific instructions.
Industrial Engineering

Luis G. Occeña, Chair
College of Engineering
E3437 Lafferre Hall
(573) 882-2692
http://engineering.missouri.edu/imse

Industrial and manufacturing systems engineering is a blending of natural sciences, engineering science, mathematics, computers, social science and management. This fusion of diverse skills allows industrial engineers to design and implement socio-technical systems - complex combinations of people and technology brought together to solve problems. With its diversity, industrial engineering is used in a wide variety of areas in both manufacturing and service industries.

Industrial engineers in a manufacturing organization address many issues including designing workplaces, considering not only the capabilities of machines, but also the physiological and psychological capabilities of humans. They may design computer-integrated manufacturing systems with robots and computer systems to control production or manage inventory and quality of complex products, determining plant and warehouse locations. They may also develop sales forecasts, evaluate proposals to produce new products and build new or improved production facilities.

The same skills used as an industrial engineer to design manufacturing systems are also useful in designing better systems to care for patients in hospitals, to facilitate the judicial process, to provide faster and more accurate mail distribution and to improve airline routing and reservation methods. In effect, the industrial engineer may be involved in the design of a range of systems that provide beneficial services at a cost that society can afford.

The department offers the Bachelor of Science with a major in Industrial Engineering (BSIE), and 5 year Industrial Engineering BSIE/MS and BSIE/MBA programs. The department also offers students the opportunity to obtain Lean Six Sigma Green Belt certification.

Faculty

Professor W. Jang*, C. M. Klein**, J. S. Noble**, B. Wu**
Associate Professor C. H. A. Chang*, L. G. Occeña**
Assistant Professor J. H. Kim, R. G. McGarvey

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BSIE in Industrial Engineering (p. 512)

Advising Contact
James S. Noble, Director of Undergraduate Studies

Scholarship Information Contact
Luis G. Occeña

Industrial engineering undergraduates complete a curriculum similar to all engineering students during the first two years. The objective of this curriculum is to give the student a rigorous foundation in mathematics, natural sciences, basic engineering sciences, applied probability and computer science, as well as a complementary and meaningful exposure to the humanities and social sciences.

In addition to the foundational courses, students gain knowledge of optimization methodologies, static and dynamic modeling. They also learn evaluation techniques for the modeling and evaluation of integrated systems of people, technology and information in the areas of strategic planning, production systems, control systems, quality systems, information systems, product and process design.

These fundamental skills provide the foundation from which students learn to develop systematic and integrated solution approaches to large-scale enterprise problems. In order to be successful as they begin their careers (or graduate study) students learn to communicate effectively in both oral and written forms, and become proficient in working in diverse teams of individuals.

Lastly, the curriculum prepares the student to practice in an ethical and professional manner, to serve as well as benefit from the engineering profession, and to continue the learning of and the contribution to the advancement of industrial and manufacturing systems engineering concepts.

Industrial engineering design experiences are integrated throughout the curriculum, many times in a team-based environment. Industrial engineering design is the process of developing and improving integrated systems that include people, materials, information, equipment and energy.

Educational Objectives

Graduates of the Department of Industrial and Manufacturing Systems Engineering (IMSE) at the University of Missouri are able to:

• Assess and create enterprise value through innovative structured problem solving, in order to make processes faster, more innovative, reliable or cost-efficient
• Analyze and design optimized solutions to systems of people, technology and information
• Provide leadership for and communicate effectively in a team-based environment in order to be agents of change in dynamically changing organizations

Educational Outcomes

All IMSE BSIE graduates should have:

• Foundational knowledge in mathematics, natural sciences, engineering sciences, applied probability, computer science, humanities and social science.
• ABET a) knowledge of math, science, engineering
• ABET h) understanding of global/societal context of engineering
• ABET j) knowledge of contemporary issues

• Optimization skill sets for modeling, optimization and evaluation of integrated systems of people, technology and information.
• ABET b) ability to design/conduct experiment; data analysis
• ABET k) ability to use techniques, skill and tools

• Problem-solving ability based upon knowledge and skills to develop integrated solutions to large-scale, socio-technical problems
• ABET c) ability to design integrated systems
• ABET e) ability to identify, formulate and solve IE problems
• ABET k) ability to use techniques, skill and tools
**IMSE 4310** requires students to obtain a GPA average of 2.5 or better in**Belt certification either during their degree program or after. Certification**

**Lean Six Sigma Green Belt Certification**

IMSE students have the opportunity to obtain a Lean Six Sigma Green Belt certification either during their degree program or after. Certification requires students to obtain a GPA average of 2.5 or better in IMSE 4110, IMSE 4310, and IMSE 4610, then they must successfully complete

**Graduate**

- MS in Industrial Engineering (p. 513)
- PhD in Industrial Engineering (p. 514)

**Industrial & Manufacturing Systems Engineering Graduate Programs**

**College of Engineering**

**Director of Graduate Studies:** Cheng-Hsiung A. Chang

**About IMSE**

The IMSE Honors Program follows the regulations and philosophy of the College of Engineering Honors Program, and as such is intended to encourage, facilitate and reward independent study by high-ability undergraduate students.

The heart of the program is an undergraduate honors project, undertaken and completed by the time of graduation while enrolling in 1 to 6 credits of IMSE 4995 Undergraduate Research Industrial Engineering - Honors. The academic credit for the honors project (1-6 credits in IMSE 4995 replaces an equivalent number of credits of IMSE or Technical electives. The project is conducted under the direction of an IMSE professor (honors advisor) who is selected by the student, with agreement by the professor. The project culminates in an honors thesis, which is read and approved by the honors advisor and then approved by the chair of the IMSE honors committee. A finished copy of the honors thesis, signed by the honors advisor and second reader, is required for satisfactory completion of the project.

**General Admission Guidelines**

Acceptance for advisement in the department’s graduate programs is available to students with an ABET accredited undergraduate engineering degree. Engineering graduates who have not taken linear programming, linear algebra, statistical quality control or engineering economic analysis must complete 12 hours of additional course work before graduation.

Students with baccalaureate degrees in mathematics, physics, chemistry or computer science may be accepted if they have completed 13 hours of calculus, three hours of differential equations and six hours of calculus-based probability and statistics. Several factors are considered in evaluating an applicant’s capability, such as overall GPA, grade trends and major area grades. In addition, each applicant is required to take the general test of the GRE and international students must take the TOEFL and TWE, or IELTS.

**Computing and Reference Materials**

The department has access to the University of Missouri System computing network and maintains its own computing facilities for
student use. Besides Ellis Library facilities, an excellent collection of mathematical, statistical and engineering books and reference materials are housed in the engineering library and the industrial and manufacturing systems engineering departmental library.

**Funding**

Fellowships, scholarships and teaching and research assistantships are available to qualified graduate students. These forms of financial assistance are supported by funds made available through state, federal and industrial graduate support programs and through research grants from various industrial and governmental agencies.

**Undergraduate**

**BSIE in Industrial Engineering**

**Major Program Requirements**

In addition to the major core requirements, students must complete all University graduation requirements (p. 19) including University general education (p. 20), as well as all degree and college or school requirements.

The Department of Industrial and Manufacturing Systems Engineering, in cooperation with the health services management program of the School of Medicine, offers a dual master’s degree program to prepare its graduates for careers in the design and administration of health-care delivery systems and organizations. The program was developed in recognition of the highly complex nature of health-care organizations. The program’s basic objective is to fuse competencies in health-service management and in health-systems design. The required courses in the industrial engineering program serve as the area of specialization in the health services management program, and the required courses in the health-services management program are used as electives in the industrial engineering program. As a result, it is possible for the student to earn an MHA in health-services management and an MS in industrial engineering simultaneously.

Application Deadlines
Applications accepted all year.
Fall decision dates: March 1
Spring decision date: September 1

Minimum Admission Criteria
- Minimum GPA: 3.0/4.0
- Test of Written English: (TWE) of 4.0 (international applicants only)
- Minimum Academic IELTS OVERALL score: 6.0; or Minimum TOEFL scores:
  - Internet-based test (iBT) 80
  - Paper-based test (PBT) 550
- Minimum GRE scores:
<table>

To the Graduate School:
- All required Graduate School documents
To the IMSE Graduate Program:
- 3 letters of recommendation
- Statement of Purpose
- Curriculum Vitae (CV)
- GRE scores

TA/RA Hiring
This academic department does not have any function of financial Aid. Rather, IMSE hires TA/RA automatically based on the department needs. No separate application or contacts are necessary; all top ranked applicants will be considered.

Degree Completion Requirements
The Master of Science in Industrial Engineering (MS) degree consists of two options: a 30-credit hour research oriented program requiring a thesis or a 30-credit hour application oriented program requiring a project report. The MS Industrial Engineering thesis option curriculum is built upon the choice of a concentration area around which students can mold their
overall academic effort including six hours of research. The three current focus areas are Operations Research and Statistics, Manufacturing/Production/Service Systems and Human and Enterprise Systems. Other focus areas are in development. The MS Industrial Engineering project option requires three hours of an approved project advised by a faculty member in lieu of a thesis, and one more course.

**PhD in Industrial Engineering**

**Admission Contact Information**
Jonni Sutton (suttonjo@missouri.edu)
E3437 Thomas and Nell Lafferre Hall; Columbia, MO 65211
573-882-2691

**About the Doctoral Degree**
Programs are individually tailored to meet students’ objectives and to culminate in an original research dissertation. The PhD builds upon the MS programmatic areas. The three current focus areas are Operations Research and Statistics, Manufacturing/Production/Service Systems and Human/Enterprise Systems. Other focus areas are in development. Fundamental IE knowledge in each is expected. The basic goals of the PhD program are to provide students with a solid understanding of the theoretical bases for the latest tools and techniques of systems analysis and design, an extensive experience in applying these analyses and design tools and techniques, and research experience in the development of new tools or applications of existing techniques to design or analyze problems.

**Application Deadlines**
Applications accepted all year.
Fall decision dates: March 1
Spring decision date: September 1

**Minimum Criteria to be Considered for Admission**
- Minimum BS GPA: 3.3/4.0; MS GPA: 3.5/4.0
- Minimum OVERALL IELTS scores: 6.0; or Minimum TOEFL scores:
  - Internet-based test (IBT) 80
  - Paper-based test (PBT) 550
- Minimum GRE scores:
  - Verbal + Quantitative

- Foreign Language: No foreign language is required in either program.
- Completed master’s thesis or equivalent (Non-thesis MS is not considered).
- Compatible research interests with a member of the IMSE faculty.
- BS in Math is very welcome in OR focus.

**Note:** Only highly qualified students are accepted for advisement in the PhD program. The faculty looks for excellence in undergraduate and graduate work, high GRE scores, thesis training, and strong indications of research potential.

**Notification**
This department does not use “rolling admission.” Applicants will be notified within a month after decision date.

**Required Application Materials**

*To the Graduate School:*
- All required Graduate School documents

*To the IMSE Graduate Program:*
- 3 letters of recommendation
- Statement of Purpose
- Curriculum Vitae (CV)
- GRE scores
- English thesis or draft (in PDF file or hard copy)

**TA/RA Hiring**
This academic department does not have any function of financial Aid. Rather, IMSE hires TA/RA automatically based on the department needs. No separate application or contacts are necessary; all top ranked applicants will be considered.

**Degree Completion Requirements**
The granting of a PhD requires completion of five major requirements:

1. A qualifying examination,
2. A course of study (Study Plan),
3. Comprehensive examination,
4. Acceptance of dissertation proposal, and
5. Final public defense of the completed dissertation.
Information Technology

Dong Xu, Chair
College of Engineering
201 Engineering Building West
(573) 884-1887
engineering.missouri.edu/cs

The information technology (IT) degree program was launched in 2005 with a gift from AT&T/SBC. IT students collaborate with students from other disciplines to create software applications, produce videos and films and use technology to solve a wide range of complex problems. The program proves attractive to students because of its distinguished faculty and state-of-the-art facilities that greatly exceed what is available at competing institutions.

This degree program is offered by the Computer Science Department within the College of Engineering. Career opportunities include database administration, web design, cyber security, game development, film production, and more.

Graduate

While the College of Engineering does not offer a graduate degree specifically in Information Technology, it does offer a number of graduate degrees in closely related areas such as Computer Science (p. 493), and Computer Engineering (p. 488). There is a Master of Engineering degree through the department. The University also offers a number of information technology degrees in its other Colleges, and through interdisciplinary programs such as Health Informatics (p. 689), Health Administration (p. 688), or Informatics (p. 693) or Information Science and Learning Technology (p. 406).

A joint degree program administered through the School of Engineering and the Crosby MBA Program is available for students who wish to earn a Bachelor of Science in Information Technology (BS IT) and a Master of Business Administration (MBA) (p. 333). Individuals interested in pursuing engineering and business will find that this program provides them with a valuable set of skills to excel in this rapidly growing field. If earned separately, the BS IT degree would take four years and the MBA degree would take two years. The dual degrees may be completed in five years assuming normal progress toward each degree.

Or you may browse a complete list of degree options (p. 5) at the University of Missouri.

Undergraduate

BS in Information Technology

Major Program Requirements

To receive the Bachelor of Science Degree in Information Technology, the candidate must successfully complete 126 semester hours of credit including the following distribution: Computer Science (CMP SC) course requirements - 55 hours of CMP SC/INFOTC core courses, 12 hours of related math and business courses, 9-12 hours of science, 15-22 hours of courses in a possible minor and any remaining hours for elective courses. General education courses include English 1000, 9 hours of Social/Behavioral Sciences and 9 hours of Humanities/Fine Arts.

Information Technology students must earn a C-range grade or better in all INFOTC/CMP SC courses that are prerequisites for other INFOTC/ CMP SC courses that the student takes. To graduate, a student must earn a cumulative UM grade point average of 2.0 or better and a 2.0 grade point average or better in all CMP SC/INFOTC courses.

The Engineering Career Services Office, W1025 Lafferre Hall, can assist students in searching for employment opportunities and for internship/co-op positions.

These course requirements apply to students beginning full-time Fall 2015 or after.

In addition to the major core requirements, students must complete all University graduation requirements including University general education, as well as all degree and college or school requirements. See course descriptions for prerequisites.

BS in Information Technology with Emphasis in Information Systems

Major Program Requirements

Students are no longer being accepted into this emphasis area. Students should refer to the degree requirements for the BS in Information Technology (p. 515).

BS in Information Technology with Emphasis in Media Technologies

Major Program Requirements

Students are no longer being accepted into this emphasis area. Students should refer to the degree requirements for the BS in Information Technology (p. 515).
Semester Plan
A sample plan of study has not been designed for this emphasis.
Students should refer to the semester plan for the BS in Information Technology (p. 515), or contact the academic department for assistance with academic planning.

BS in Information Technology with Emphasis in Networks and Wireless Technologies

Major Program Requirements
Students should refer to the degree requirements for the BS in Information Technology (p. 515).

Semester Plan
A sample plan of study has not been designed for this emphasis.
Students should either refer to the semester plan for the BS in Information Technology (p. 515), or contact the academic department for assistance with academic planning.

Minor in Information Technology
A minor in Information Technology is offered through the College of Engineering. To obtain a minor, a student must complete courses in a sequence approved by the Department of Computer Science. The student must earn a 2.0 GPA in all courses counting toward the minor. At least 9 hours must be taken in residence at MU. A total of 15 credit hours are required.

The following courses are required for sequence one. At least 9 hours must be at the 2000 level or above. For other possible sequences, contact the department.

2 Prerequisite: INFOTC 3640
The Department of Mechanical and Aerospace Engineering is one of 9 academic departments within the College of Engineering at the University of Missouri. Established in 1891, this ABET accredited program is home to more than 800 total undergraduate and graduate students and about 27 faculty.

Faculty

Assistant Professor J. Lin*, M. Maschmann**, J. McFarland
Teaching Associate Professor G. L. Solbrekken**
Teaching Assistant Professor S. Naz**
Research Professor V. Gruzdev, X. Han, N. Kim, L. Chen, C. Wilson
Research Assistant Professor H. Chen, J. Shi,
Resident Instructor R. T. Whelove
Professor Emeritus W. L. Carson*, R. C. Duffield, A. D. Krawitz*, R.C. Warder, D. E. Wollersheim*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BSME in Mechanical Engineering (p. 520)
- with emphasis in Aerospace Engineering (p. 521)

Advising and Scholarship Contact
Gary L. Solbrekken, Undergraduate Director
solbrekkenp@missouri.edu
Kathy Appuhn-Hodges, Advisor
hodgeske@missouri.edu

The Department of Mechanical and Aerospace Engineering prepares students for productive careers in mechanical engineering related disciplines. The program focuses on instruction in the thermal and mechanical systems areas as defined by the Accreditation Board for Engineering and Technology (ABET). To support that mission, the Department has been divided into the focus areas of Design and Manufacturing, Dynamics and Controls, Materials, and Thermal and Fluid Sciences. (NOTE: Focus areas are not listed on transcripts or diplomas.) The department endeavors to present a strong experimental program through laboratory experiences to expose undergraduate students to modern instrumentation and measurement methodologies. Students work in well-equipped laboratories in design optimization, engineering computation, fluid power dynamics and control, materials, structural dynamics, measurement and instrumentation, laser processing, heat transfer and fluid dynamics, stress measurement and nondestructive evaluation.

The MU Mechanical Engineering program offers a Bachelor of Science in Mechanical Engineering (BSME) and prepares students for practice of the profession in industry or government or for further study toward other degrees such as the JD, MD, MS and PhD.

Mission Statement

The mission of the Mechanical and Aerospace Engineering Department is to:

Prepare our students for successful careers in the mechanical engineering profession, conduct high quality and innovative research, and serve the community and industry providing educational and research resources.

Program Educational Objectives

The educational objectives of the undergraduate program in Mechanical Engineering are to produce graduates who (during the first several years following graduation)

- are able to apply the analytical, experimental, and computational techniques to solve engineering problems associated with the design and manufacture of devices, machines and systems (a,b,e,k);
- are able to synthesize and analyze integrated thermal/fluid and mechanical systems (a,c,e,k);
- are able to communicate effectively and work collaboratively on multidisciplinary teams (d,g);
- contribute to society and the profession through professional activities, and understand the impact of engineering solutions on a diverse and global society and their professional and ethical responsibility (f,h,j);
- engage in life-long learning necessary to advance professionally through continued education and training (a,h,i,j);
- succeed in graduate studies in mechanical engineering or a related field if pursued (a-k).

Note: letter(s) in parentheses indicates ME Program Outcome(s).

Program Outcomes

Students from the Mechanical Engineering program will attain (by the time of graduation):

a. an ability to apply knowledge of mathematics, science, and engineering

a1. a knowledge of chemistry and calculus-based physics with depth in at least one;

a2. an ability to apply advanced mathematics through multivariate calculus and differential equations;

a3. familiarity with statistics, linear algebra, and numerical methods;
Double Majors and Dual Degrees

Dual majors and dual degrees are possible at the undergraduate level. These could lead to degrees in the College of Engineering and the College of Arts and Sciences or the College of Agriculture. Dual enrollments could also lead to two engineering majors within the College of Engineering. Any of these dual enrollments would add to the traditional 126-credit undergraduate degree program. Consult with the directors of undergraduate studies of the departments involved for further information.

MAE Honors Program

The MAE Honors Program follows the general rules, regulations and philosophy of the College of Engineering Honors Program, and as such is intended to encourage, facilitate and reward independent study by high-ability undergraduate students.

The heart of the program is an undergraduate honors project, undertaken and completed by the time of graduation while enrolling in 1 to 6 credits of MAE 4995 Undergraduate Honors Research Mechanical & Aerospace Engineering. The academic credit for the honors project (1-6 credits in MAE 4995 replaces an equivalent number of credits of technical or MAE elective. The project is conducted under the direction of an MAE professor (honors advisor) who is selected by the student, with agreement by the professor. The project culminates in an honors thesis, which is read and approved by the honors advisor and then approved by the chair of the MAE honors committee. A finished copy of the honors thesis, signed by the honors advisor and second reader, is required for satisfactory completion of the project.

Academic Qualifications for the Honors Program

In the case of a transfer student, transferred credit plus MU credit must average 3.0/4.0. A student is typically eligible for the honors program at the junior year of their undergraduate program.

The successful honors scholar is given a degree of flexibility in the program of study. Additionally, honors scholars may reduce the credits required for degree completion to the University minimum (i.e., 120 credits) by substituting graduate course credits through dual enrollment (undergraduate/graduate at MU) during the last two semesters of the undergraduate program.

Honors students must maintain and graduate with a 3.0 overall GPA.

In the case of a transfer student, transferred credit plus MU credit must average 3.0/4.0. A student is typically eligible for the honors program at the junior year of their undergraduate program.

The successful honors scholar is given a degree of flexibility in the program of study. Additionally, honors scholars may reduce the credits required for degree completion to the University minimum (i.e., 120 credits) by substituting graduate course credits through dual enrollment (undergraduate/graduate at MU) during the last two semesters of the undergraduate program.

Graduate

Director of Graduate Studies: Frank Feng

About Mechanical & Aerospace Engineering

Like markets merging together to create a global economy, this decade has approached the exciting frontier of joint research. The marriage of Mechanical Engineering to related fields has contributed to a new “Interdisciplinary Era”. In meeting the challenges brought on by this co-operative approach to engineering, the Department of Mechanical & Aerospace Engineering (MAE) at the University of Missouri has broadened its scope in both education and research while maintaining strengths in the fundamental disciplines: Dynamics & Control, Design & Manufacturing, Materials & Solids and Thermal & Fluid Science Engineering. Such well-established academic traditions in the undergraduate and graduate curriculum as well as nationally renowned research programs are the basis for MAE having become the largest department in the College of Engineering at MU. An equally important aspect contributing to the quality of the MAE department is the aggressive pursuit of funding, by our faculty, to establish nationally recognized research programs. Well-earned support through sizable funding from both federal agencies and industry are valuable resources in the promotion of our graduate research and undergraduate teaching.

Career Opportunities

Graduate programs are planned to prepare students for advanced professional engineering careers. In recognition of the broad nature of the field of mechanical and aerospace engineering, considerable latitude in programs is encouraged so students may prepare for employment in industry, education and government. The usual purpose of a PhD program is to prepare a person for a career in research or teaching. The program is oriented toward research culminating in a dissertation suitable for publication.
Areas of Study

A student may pursue an area of concentration selected from AI/expert systems, automation, bioengineering, combustion, control, creep and plasticity, design optimization, numerical methods, computational fluid dynamics, fracture mechanics, heat transfer, interactive computer graphics, laser diagnostics, manufacturing systems, materials science, mechanical syntheses, mechatronics, mechanics, parallel computation, residual stress, robotics, thermal systems design and management and ultrasonic nondestructive evaluation.

Licensure

Information on degree requirements for engineering licensure is detailed under Professional Engineering Registration.

Facilities and Equipment

The department has several specialized laboratories in aerosol mechanics, combustion, computer control, creep and fracture mechanics, fluid mechanics and heat transfer, manufacturing, materials science and structural dynamics.

Besides the modern instrumentation and equipment normally found in well-equipped mechanical and aerospace engineering laboratories, the department has, or has access to, such specialty items as MTS and Instron material and structural test equipment, wind tunnels, X-ray and a scanning electron microscope facility, computer control systems, a scanning laser vibrometer, a microscope heat transfer and electronic coding laboratory, an experimental stress laboratory, a fluid power laboratory and the university research reactor.

Information Technology and Computing

A combination of the campus Division of Information Technology and the Engineering Technical Services (ETS) provided advanced engineering computation for College of Engineering faculty and students. CAD/CAM and graphics are the primary emphasis, although artificial intelligence, multiple high-level programming languages and computational and simulation libraries also are available.

The College of Engineering operates one high performance enterprise server, two super minicomputers and 17 HP workstations. The ETS also provides hardware/software support, locally, to nine College of Engineering departments and their affiliated research centers. These units are networked via Ethernet to the superminicomputers operated by the College of Engineering.

The Division of IT operates two remote terminal sites in the Engineering Buildings East. The University also supports an extensive computer system consisting of IBM mainframe computers, remote terminal sites, and PC and Macintosh labs throughout the campus.

Financial Aid from the Program

Admission decisions to the graduate program are made without considerations of a student’s financial need. Once admitted, a student may be considered for fellowships, research assistantships (RAs) and teaching assistantships (TAs). Awarding of fellowships is initiated by the department. RAs are awarded by individual faculty members. A student may apply by contacting faculty members directly. Application forms for TAs are available in the department office. International students are not eligible for TAs in their first semester of study. For specific departmental requirements, please refer to the MAE Graduate Handbook. Please see the department website for information on how to contact the professors individually about research assistantships offered.

Undergraduate

BSME in Mechanical Engineering

Major Program Requirements

The MAE curriculum allows students to transfer among departments during the first two years. Students concentrate on departmental requirements during the junior year. The senior year includes three MAE electives that allow students to develop individual study programs. This enables students to complete a traditional program or create their own with special emphasis on system design, materials, manufacturing, energy systems, controls, or aerospace.

Experience in design is integrated throughout the required courses in the curriculum and culminates in the capstone design sequence. The capstone design experience integrates earlier technical work with economic, safety and environmental considerations. The projects are primarily obtained from industrial or private business clients. The presentations of project results are made to a review panel consisting of members of the faculty, the MAE Industrial Advisory Council and representatives of the client firms.

Major Core Requirements

In addition to the University general education and graduation requirements, the Department of Mechanical and Aerospace Engineering requires the following courses:

### BSME in Mechanical Engineering with Emphasis in Aerospace Engineering

#### Major Program Requirements

The MAE curriculum allows students to transfer among departments during the first two years. Students concentrate on departmental requirements during the junior year. The senior year includes three MAE electives that allow students to develop individual study programs. This enables students to complete a traditional program or create their own with special emphasis on system design, materials, manufacturing, energy systems, controls, or aerospace.

Experience in design is integrated throughout the required courses in the curriculum and culminates in the capstone design sequence. The capstone design experience integrates earlier technical work with economic, safety and environmental considerations. The projects are primarily obtained from industrial or private business clients. The presentations of project results are made to a review panel consisting of members of the faculty, the MAE Industrial Advisory Council and representatives of the client firms.

#### Options

The senior year includes three MAE electives that allow students to develop individual study programs. This enables students to complete a traditional program or create their own program with special emphasis on system design, materials, manufacturing, energy systems or controls.

An Aerospace Emphasis area is available to students wanting to pursue careers in the aerospace industry. Completing the aerospace emphasis requires taking at least three senior MAE 4000+ electives from a selection of available courses. These can be chosen from the broad areas of structures/materials, thermal/propulsion, aerodynamics/fluids, flight mechanics/dynamics/controls, and design. Upon completion of the appropriate coursework, an Aerospace Emphasis is shown on the students transcript.

An entrepreneurship option may be added by taking and in the sixth and seventh semesters before the . These three courses combine to give the student a fundamental understanding of entrepreneurial methods. This option will add credits to the degree program.

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.

#### Semester Plan

A sample plan of study has not been designed for this major. Students should either refer to the plan designed for the BSME in Mechanical Engineering or contact the academic department for assistance with academic planning.

#### Graduate
MS in Mechanical and Aerospace Engineering

Application Deadline for all applicants
Fall deadline: May 31
Spring deadline: October 31
Summer deadline: April 30

Admission Criteria
• BS in same or closely related field
• Minimum GPA: 3.0 during last 2 years
• Minimum GRE Score: 298 combined score on Verbal and Quantitative sections
• Minimum TOEFL score: 61 Effective July 1, 2015 must have score of 80
• Minimum academic IELTS overall score: 5.5

Note: Lower GPAs require special action and substantiation, such as good test scores on the GRE or other recognized examinations.

How to apply to the MAE master’s program:
Step 1: All documents should be uploaded directly in ApplyYourself. Mailing in documents may delay your application process.
Step 2: Required documents:
• Official Transcripts (all Universities and Colleges attended)
• TOEFL/IELTS score - sent to University by ETS (Institution Code 6875 Department Code 1502)
• 3 letters of recommendation - uploaded in ApplyYourself
• GRE score - sent to us by ETS (Institution Code 6875 Department Code 1502)
• Statement of Objectives - one page letter telling about yourself and the area you will study if accepted
• CV/Résumé

Contact:
Mechanical & Aerospace Engineering, Graduate Admissions
ATTN: Marilyn Estes Nevels
E2413 Lafferre Hall, Columbia, MO 65211
Questions: 573-884-8610

Plan of Study
A plan of study is developed by the student and the advisor, subject to approval. The minimum degree requirement is 30 hours with a minimum of 18 hours at the 8000 level. Included within the 30 hours must be a special project report or thesis. A special project consists of three to five hours of MAE problems.
Alternatively, programs directed toward a thesis shall include three to eight hours of MAE 8990 (Research). A thesis or a report is approved by designated faculty committees and is deposited in the department libraries.
Passing the MS final committee fulfills the degree requirements.

PhD in Mechanical and Aerospace Engineering

Application Deadlines for all Applicants
Fall deadline: May 31
Spring deadline: October 31
Summer deadline: April 30

Admission Criteria
• Minimum GPA: 3.0
• Strong record in the MS program
• Minimum GRE score: 298 combined score on Verbal and Quantitative sections
• Minimum TOEFL score: 61
• Minimum Academic IELTS Overall score: 5.5

Note: Doctoral degree program applicants are closely and individually reviewed.

How to apply to the MAE doctoral program:
Step 1: All documents should be uploaded directly in ApplyYourself. Mailing in documents may delay your application process.
Step 2: Required documents:
• Official Transcripts (all Universities and Colleges attended)
• TOEFL/IELTS score - sent to MAE Department by ETS (Institution Code 6875 Department Code 1502)
• 3 letters of recommendation (preferably from MS advisor and 2 other letters) - uploaded in ApplyYourself
• GRE score - sent to MAE Dept by ETS (Institution Code 6875 Department Code 1502)
• Statement of Objectives - one page letter telling about yourself and the area you will study if accepted
• CV/Résumé

Contact:
Mechanical & Aerospace Engineering, Graduate Admissions
ATTN: Marilyn Estes Nevels
E2413 Lafferre Hall, Columbia, MO 65211
Questions: 573-884-8610

Degree Requirements
A minimum of 72 semester hours are required including the credit hours taken during the MS program. Students who received the MS degree...
from other than MU may transfer a maximum of 30 hours from their MS
course work.

A doctoral student must satisfy a special requirement, either proficiency
in foreign languages or a collateral field. The collateral field requires a
minimum of nine hours of course work in one area other than MAE.

Plan of Study

The PhD candidate plans a plan of study and research under the
immediate supervision of an advisor and in close cooperation with the
doctoral program committee approved by the dean of the Graduate
School upon the department’s recommendation.

Qualifying Examination

A qualifying examination is given soon after the student begins doctoral
study. Successful completion of this examination is a prerequisite to
formal acceptance into the PhD program.

Students with an MS from MU or another accredited U.S. engineering
program will be exempt from the qualifying examination if their MS GPA
and total GRE scores satisfy a departmental exemption rule. See http://
engineering.missouri.edu/mae/degree-programs/phd-mae/ for more
information.

Comprehensive Examination &
Dissertation

A comprehensive examination is given after all course work and language
or collateral requirements have been satisfied. Upon completion of the
plan of study and research a final examination, essentially a defense of
the dissertation, is administered.
Nuclear Engineering

About the Nuclear Engineering Program

The Nuclear Engineering Program at University of Missouri was established in 1964 and conferred its first Master of Science degree in that same year.

Undergraduate students may pursue an academic minor in nuclear engineering (a baccalaureate degree is not offered at this time).

The master’s program is designed for those entering students with a B.S. degree in engineering or in chemistry or physics. Students from other fields will be considered on an individual basis. Those students who have attained a B.S. degree in nuclear engineering may be given revised curricula depending on their backgrounds and the requirements of the specific program in which they are enrolled.

The Ph.D. program is typically tailored to fit the academic needs and research goals of our students. The graduate certificates provide students and working professionals with the opportunity to develop unique skills and expertise for jobs in the areas of nuclear material protection, control and accountability.

Faculty

Associate Professor S. Kovaleski, J. Kwon, K. Trauth*, R. Winholz

Assistant Professor M. Bernards

Assistant Teaching Professor G. Solbrekken

Assistant Teaching Professor S. Naz

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- Minor in Nuclear Engineering (p. 525)

While MU does not offer undergraduate degrees specifically in nuclear engineering, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Engineering, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

- MS in Nuclear Engineering (p. 525)
  - with emphasis in Environmental and Regulatory Compliance (p. 525)
  - with emphasis in Health Physics (p. 526)
  - with emphasis in Materials (p. 526)
  - with emphasis in Medical Physics (p. 526)
  - with emphasis in Thermal Hydraulics (p. 526)
- PhD in Nuclear Engineering (p. 526)
  - with emphasis in Environmental and Regulatory Compliance (p. 527)
  - with emphasis in Materials (p. 527)
  - with emphasis in Thermal Hydraulics (p. 527)

- Graduate Certificate in Nuclear Engineering (p. 527)
- Graduate Certificate in Nuclear Safeguards Science and Technology (p. 528)

About the Nuclear Science Engineering Program

The Nuclear Engineering Program at University of Missouri was established in 1964 and conferred its first Master of Science degree in that same year. Educational programs are closely connected with the research foci of participating faculty members. The master’s program is designed for those entering students with a B.S. degree in engineering or in chemistry or physics. Students from other fields will be considered on an individual basis. Those students who have attained a B.S. degree in nuclear engineering may be given revised curricula depending on their backgrounds and the requirements of the specific program in which they are enrolled. The Ph.D. program is typically tailored to fit the academic needs and research goals of our students. The graduate certificates provide students and working professionals with the opportunity to develop unique skills and expertise for jobs in the areas of nuclear material protection, control and accountability.

Illustrative Areas of Study

Course topics include nuclear materials management, aerosol mechanics, reactor safety analysis, nuclear energy conversion, reactor physics, reactor design, nondestructive testing and measurement, radiative heat transfer, neutron spectrometry, neutron and gamma ray transport, neutron activation analysis, nuclear waste management, nuclear plasma research, health physics, magnetic resonance imaging, radiation therapy and alternative and renewable energy concepts.

Students Admitted in 2012 and Earlier

For nuclear engineering students admitted in 2012 and earlier (i.e., to the Nuclear Science Engineering Institute), the contact is

Undergraduate
Minor in Nuclear Engineering

The Minor in Nuclear Engineering is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related disciplines who are interested in nuclear power.

The minor requires a minimum of 15 credits of course work. As background preparation, the minor requires math through differential equations and two semesters of calculus-based physics.

Required courses:
- ENGINR 2300  Engineering Thermodynamics 3
- NU_ENG 4315  Energy Systems and Resources 3
- NU_ENG 4346  Introduction to Nuclear Reactor Engineering I 3
- NU_ENG 4391  Nuclear Radiation Detection 3
- or CHEM 4600  Introduction to Radiochemistry with Lab 3

Select one additional course from the list below:
- NU_ENG 2201  Topics in Nuclear Engineering 3
- NU_ENG 4303  Radiation Safety 3
- NU_ENG 4330  Science and Technology of Terrorism and Counter Terrorism 3
- NU_ENG 4353  Introduction to Fusion 3
- ECE 7550  Introduction to Plasmas 3

MS in Nuclear Engineering

Admission Criteria

- Minimum TOEFL scores:
  - Internet-based test (iBT) 61 Effective July 1, 2015 must have score of 80
  - Paper-based test (PBT) 500 Effective July 1, 2015 must have score of 80
- Minimum GRE score: none set
- Minimum GPA: 3.0 during last 2 years
- Undergraduate degree (with a strong math and physics background) in an engineering field, physics, biology, chemistry or mathematics from an accredited institution.

Required Application Materials

To the Graduate School
All required Graduate School documents
- 3 letters of recommendation and the online recommendation form from previous instructors or technical employers who are familiar with the student’s qualifications for graduate study, submitted directly online through the application. (If the student is applying to the PhD program, one of these letters must be from the MS advisor.)
- Statement of Purpose (uploaded via online application)

To the Nuclear Engineering Program
- Official GRE score report (Use Department Code 1609)

Degree Completion Requirements

The nuclear engineering master’s degree program requires 31 hours, including a research project or thesis. The requirements are based on the assumption that the student is entering graduate study with a bachelor’s degree in engineering from an ABET-accredited school. An original research project is required either in the form of a three-credit master’s project or a six-credit master’s thesis. Typical time-to-degree completion for the master’s degree is 18 months.

MS in Nuclear Engineering with Emphasis in Environmental and Regulatory Compliance

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nuclear Engineering program (http://gradschool.missouri.edu/academics/programs/nuclear-engineering/masters.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

engineering.missouri.edu/nuclear/

Application Deadlines

Fall deadline: March 1
Spring deadline for International students: September 1
Spring deadline for Domestic Students: October 1
Applications received after those time frames will be reviewed for acceptance only as time permits.

Admission Criteria

- Minimum TOEFL scores:
  
<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>61</td>
<td>500</td>
</tr>
</tbody>
</table>

- Minimum GRE score: none set
- Minimum GPA: 3.0 during last 2 years
• Undergraduate degree (with a strong math and physics background) in an engineering field, physics, biology, chemistry or mathematics from an accredited institution.

Required Application Materials

To the Graduate School

• All required Graduate School documents
• 3 letters of recommendation and the online recommendation form from previous instructors or technical employers who are familiar with the student's qualifications for graduate study, submitted directly online through the application. (If the student is applying to the PhD program, one of these letters must be from the MS advisor.)
• Statement of Purpose (uploaded via online application)

To the Nuclear Engineering Program

• Official GRE score report (Use Department Code 1609)

Qualifying Examination

The PhD program is a research program and is tailored to meet specific educational needs. To qualify for the research phase of the PhD program, the student must pass a comprehensive, multi-part qualifying examination, usually administered during the first semester of study for the PhD.

PhD Plan of Study

If the student is entering the PhD program, the planned course of study will be individually evaluated by the nuclear engineering faculty. A comprehensive examination covering the student's dissertation topic is required at least seven months before anticipated graduation. The PhD degree is a research degree, with a suitable dissertation topic to be chosen in the respective field and usually requires 24 classroom credits of advanced courses beyond the MS degree and 18 credits of research. Typical time-to-degree completion for the PhD degree is three years past the MS degree.

Graduate Certificate in Nuclear Engineering

Eligibility & Mission

The objective of the graduate certificate in Nuclear Engineering is to provide graduate students and professional, non-degree students from various engineering and science departments at MU with a unique opportunity to develop expertise in nuclear engineering that will enhance their job opportunities in the nuclear field.

Requirements for Graduate Certificate in Nuclear Engineering

Students will be required to take the 12 credit hours of coursework from the Nuclear Engineering (NE) degree program curriculum. Co-
The graduate certificate program serves degree-seeking graduate students and also functions as a stand-alone graduate certificate program for professional, non-degree-seeking students. Both degree-seeking and non-degree-seeking students will be required to take four specific classes (12 credit hours) involving nuclear science, policy and safeguards. The student must complete a Change of Academic Program form to enter the program. The student must also complete the “Course of Study for Graduate Certificate” form, which must be approved by NSEI before taking any courses. Without this prior approval, the NSEI has the authority to deny the certificate.

For MU students, a maximum of 6 credit hours may be counted for both degree course credit within their department and the Graduate Certificate in Nuclear Safeguards. However, total credit hours needed to complete their degrees need not exceed departmental or Graduate School requirements (see the Graduate School catalog for additional information contact Dr. Gahl)

**Nuclear Safeguards Science and Technology Certificate Plan of Study**

Four specific classes, comprising 12 hours of course credit, are required for a student to receive this graduate certificate in nuclear safeguards:

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/nuclear-safeguards-graduate-certificate/nu-safe-ge/Gedt.html
Additional Minors and Certificates

- Engineering

**Undergraduate Minors**
- Minor in Aerospace (p. 529)
- Minor in Computational Neuroscience (p. 529)
- Minor in Engineering Energy (p. 530)
- Minor in Medical/Health Physics (p. 530)
- Minor in Naval Science (p. 530)
- Minor in Radioenvironmental Sciences (p. 530)

**Graduate Certificates**
- Certificate in Energy Efficiency (p. 530)
- Certificate in Sustainable Energy and Policy (p. 531)

**Undergraduate Minor in Aerospace**

**Purpose**
- To provide a fundamental grounding in aerospace engineering
- To prepare students to be competitive for positions in aerospace-oriented industries

Students will take courses from the 4 fundamental areas of aerospace engineering:
- aerodynamics
- aerospace structures
- flight mechanics
- propulsion

**To Apply**
- Meet with your advisor sophomore/junior year to plan minor courses into your schedule.
- Complete the necessary course work (at least 18 credit hours)
- Submit the application below in the semester before you are graduating.
- It will then appear on your diploma.

**Required Course Work**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

**Minor in Computational Neuroscience**

Computational neuroscience is becoming an important tool for neuroscientists to understand how complex brain circuits work, for example, what causes post-traumatic stress disorder. This intersection of engineering and neuroscience is allowing great advances in health care, manufacturing and communication.

**Required for all students:**

<table>
<thead>

Seminar for Undergraduates | 1 |
Minors and Specializations

Minor in Engineering Energy

Energy engineering requires many different types of engineers, and this minor lets you choose from several different tracks to fit your career interests. The minor requires completion of 18 credit hours between the core and the tracks.

Required Core Courses:
- ENGINR 2100 Circuit Theory for Engineers 3
- or ECE 2100 Circuit Theory I 3
- MAE 2300 Thermodynamics 3
- or CH_ENG 3261 Chemical Engineering Thermodynamics I 3
- ECE 4470 Sustainable Electrical Energy Resources 3
- IMSE 2710 Engineering Economic Analysis 3

Electric Utility Generation Track
- ECE 3470 Introduction to Power Engineering 3
- ECE 3510 Electromagnetic Fields 3
- MAE 4320 Design of Thermal Systems 3
- MAE 4660 Vibration Analysis 3
- ECE 4410 Power Electronics I 4
- CV_ENG 4250 Environmental Regulatory Compliance 3

Electric Utility Transmission & Distribution Track
- ECE 3470 Introduction to Power Engineering 3
- ECE 3510 Electromagnetic Fields 3
- ECE 4410 Power Electronics I 4
- CV_ENG 4250 Environmental Regulatory Compliance 3

Energy Infrastructure and Efficiency Track
- MAE 4320 Design of Thermal Systems 3
- MAE 4340 Heating and Air Conditioning 3
- MAE 4660 Vibration Analysis 3
- MAE 4290 Welding Engineering 3
- CV_ENG 4250 Environmental Regulatory Compliance 3

Energy Storage Track
- ECE 4001 Topics in Electrical and Computer Engineering 3-4
- ECE 4410 Power Electronics I 4
- CH_ENG 4464 Electrochemical Reaction Engineering Science 3

Minor in Medical/Health Physics

The Minor in Medical/Health Physics is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in the nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related discipline who are interested in the biological effects of radiation and radioactive materials.

The minor requires a minimum of 15 credits of course work. As background preparation, the student must have had the prerequisites of a minimum of college algebra and two semesters of college physics.

Required courses:
- NU_ENG 4303 Radiation Safety 3
- NU_ENG 4328 Introductory Radiation Biology 3
- NU_ENG 4391 Nuclear Radiation Detection 3
- or CHEM 4600 Introduction to Radiochemistry with Lab 3

Select additional courses from the below options:
- BIOL_EN 4570 Fluorescent Imaging 3
- BIOCHM 3630 General Biochemistry 3
- CHEM 4170 Medicinal Chemistry 3
- CHEM 4280 Environmental Chemistry 3
- CHEM 4300 Fundamentals of Physical Chemistry 3
- CHEM 4319 Physics and Chemistry of Materials 3
- CHEM 4329 Radiopharmaceuticals in Nuclear Medicine 3
- CHEM 4379 Nuclear Forensic Analysis 3
- CHEM 4379 Particulate Systems Engineering 3
- CHEM 4391 Nuclear Radiation Detection 3
- CHEM 4600 Introduction to Radiochemistry with Lab 3
- CV_ENG 3200 Fundamentals of Environmental Engineering 4
- CV_ENG 4220 Hazardous Waste Management 3
- CV_ENG 4250 Environmental Regulatory Compliance 3

Doctoral Program

Graduate Certificate in Energy Efficiency

To achieve the goal of energy efficiency, we need to educate engineers in basics of energy with emphasis on industrial production process, the buildings housing these manufacturing systems, and in other energy consuming systems. The Graduate Certificate in Energy Efficiency is a stand-alone certificate open to both degree seeking and non-degree seeking students.
Core Course (required)

<table>
<thead>
<tr>
<th>Course</th>

<td>Test and Evaluation of Electrochemical Devices</td>
<td>3</td>
</tr>
<tr>
<td>CH_ENG 7464</td>
<td>Electrochemical Reaction Engineering Science</td>
<td>3</td>
</tr>
</tbody>
</table>

Other courses may be in development for this certificate program

* Students may not use MAE 7355 to fulfill both the Graduate Certificate in Energy Efficiency and the Graduate Certificate in Sustainable Energy and Policy (p. 531).

Graduate Certificate in Sustainable Energy and Policy

To achieve the goal of reliable and sustainable energy, we need to educate engineers in basics of energy with emphasis on renewable energy, sustainable practices in manufacturing that are informed by new technology, and impact of energy usage on society, economy and the environment. The Graduate Certificate in Sustainable Energy and Policy will give students a broad view of energy engineering, energy economics and policy, and sustainability. The certificate is a stand-alone certificate open to both degree seeking and non-degree seeking students.

umcshpadvising@missouri.edu

The School of Health Professions is Missouri’s only state-supported health professions school on a campus with an academic health center. It is uniquely positioned to educate highly qualified health care professionals committed to fulfilling the mission of improving society through education, service and discovery in diagnostic, medical imaging, and rehabilitation sciences. The school is credited with establishing the nation’s first baccalaureate degree program in respiratory therapy and the first master’s degree program in diagnostic medical ultrasound. Its six departments and eight accredited academic programs have long and distinguished histories. Graduates of the School of Health Professions are nationally recognized leaders in their fields.

The school offers undergraduate degrees with majors in Athletic Training, Communication Science and Disorders, Diagnostic Medical Ultrasound, Health Sciences, Occupational Therapy, Respiratory Therapy, Radiologic Sciences with emphasis in Radiography or Nuclear Medicine Technology, and Clinical Laboratory Sciences with an emphasis in Medical Technology. The school offers graduate degrees in Communication Science and Disorders with an emphasis in Speech-Language Pathology, Diagnostic Medical Ultrasound, Occupational Therapy and Physical Therapy.

Students gain valuable experience by participating in nationally recognized service centers including The Adult Day Connection, The Health Connection, the Speech and Hearing Clinic, Robert G. Comb’s Language Preschool and more than eight hundred fieldwork sites.

Undergraduate

- Admissions (p. 532)
- Exploratory Courses (p. 532)
- Required Entry Level Courses (p. 532)
- School of Health Professions Scholars Guaranteed Admission Program (SHarP Scholars) (p. 533)
- International Admissions (p. 533)
- Academic Regulations (p. 533)
- Enrolling in Other Institutions Simultaneously (p. 534)
- Advising (p. 534)
- Career Placement (p. 534)

Admissions

Undergraduate students are enrolled in the School of Health Professions for academic advisement in order to complete University general education (p. 20) and prerequisite courses. Students will be advised by faculty of the department in which they have declared a major, or by an advisor in the Student Services Office. Students should contact the SHP Advising Office to ensure satisfactory progress toward completion of the prerequisites.

Admission to the University and to the School of Health Professions as a pre-professional student does not constitute admission as a candidate for most Bachelor of Health Science degree programs. Pre-professional students are admitted to candidacy for the BHS only when they have been selected to participate in the professional component of a program. Application deadlines and requirements vary for each program (an application is not required for the health sciences programs). Students are strongly encouraged to seek advising to ensure they are making satisfactory progress towards pre-requisites, MU General Education (p. 20), and program requirements.

Exploratory Courses

The School of Health Professions offers introductory courses and experiences to provide information about career opportunities in these areas. These courses are listed below:

- HLTH_SCI 1000 Introduction to the Health Professions 3
- NUCMED 1000 Orientation to Nuclear Medicine 1
- OC_THR 1000 Introduction to Occupational Therapy 1
- PH_THR 1000 Introduction to Physical Therapy 1
- RS_THR 1000 Introduction to Respiratory Therapy 1
- DMU 1000 Introduction to Diagnostic Medical Ultrasound 1
- C_S_D 1000 Introduction to Communication Science and Disorders 1
- CL_L_S 1000 Orientation to Clinical Laboratory Science 1

Required Entry-level Courses

To be admitted into or continue in the School of Health Professions, all students with 55 or more credits must have completed MATH 1100 and ENGLISH 1000, or their equivalents, with grades in the C range or higher.

While completing prerequisite requirements, students must make formal application for admission to the professional component of the program of their choice. Enrollment is limited and is governed by program admission committees. Application to the professional component is also required for transfer students.

In addition to academic record, attributes such as interpersonal skills, motivation, attitude, interest, commitment and knowledge of the field are considered in selecting students to participate in the professional phase of any program. Applicants may also be evaluated on school and college aptitude tests, pattern of academic achievement, verbal expression, extracurricular activities and motivation demonstrated by employment and volunteer activities.

To achieve the goals of diversity and equal opportunity, the School of Health Professions encourages the participation of minority students in its programs.

The application deadlines for the professional component of each program are shown below.

School of Health Professions Scholars Guaranteed Admission Program (SHarP Scholars)

Eligibility Requirements for the SHarP Scholar’s Program:
- Minimum 30 composite ACT score (1330 SAT).
- Top 10% high school (HS) rank at the time of application.
- Performance in college courses completed prior to HS graduation will be considered by the admissions committee.
- Completed applications must be submitted by March 1st during the senior year in high school or November 15th during the freshman year at MU.
- Four (4) hours of clinical observation in the discipline of choice (documented on the SHarP application). All applications must include recommendations from a high school teacher and from a high school counselor or principal.

** Students who are accepted as SHarP Scholars may also have to complete additional application requirements prior to entering their professional program. Specific program requirements are communicated to students upon acceptance as SHarP Scholars.

Application materials are available in the School of Health Professions Student Services Office and on the school’s website (http://shp.missouri.edu).

Students accepted as SHarP Scholars who maintain participant status at MU are guaranteed admission into one of the following degree programs:

- Athletic Training
- Clinical Laboratory Sciences with an emphasis in Medical Technology
- Communication Science and Disorders (BHS program only)
- Occupational Therapy
- Diagnostic Medical Ultrasound
- Master of Public Health Program (upon completion of the Health Sciences BHS degree)
- Radiologic Sciences, with emphasis in Radiography or Nuclear Medicine Technology
- Respiratory Therapy
- Physical Therapy (Doctor of Physical Therapy program, upon completion of a baccalaureate degree)

International Admissions

Students whose native language is not English should contact the School of Health Professions for requirements.

Prerequisite Curriculum Requirements

See the degree requirements in the following pages for specific course requirements in the various programs. The student is responsible for meeting graduation requirements for the program and the University.

Graduation Requirements

In addition to degree and major requirements, students must complete university graduation requirements (p. 19), which include university general education (p. 20) requirements.

Degree Core Requirements

The Bachelor of Health Science degree is granted to candidates who have successfully fulfilled all didactic and clinical requirements of the program as described for each area, in addition to all University requirements (p. 19), including University general education (p. 20) requirements.

In addition to the academic and clinical education requirements of a program, students must possess and exhibit those personal qualities and characteristics that are associated with patient welfare and professional trust. These elements are a part of the overall evaluation process for the professional phase of each program. Should it be determined that these qualities are not present in sufficient degree or that a student does not demonstrate satisfactory growth and progress in these areas, the student is subject to dismissal from the program.

Degree with Honors Requirements

To earn Latin Honors in the School of Health Professions, a student must meet the following requirements:

- 50 graded MU undergraduate credits
- At least a 3.0 MU cumulative GPA
- MU cumulative GPA equal to or greater than 3.5 or
- last 50 graded credits at MU equal to or greater than 3.5
- GPA for each level

<table>

Academic Regulations

Time Limits on Credits Earned

Contact each department for information on time limits.

Credits by Examination

Students with previous training or experience may be allowed to earn advanced-standing credit through challenge or equivalency evaluation in certain programs. Contact the Health Professions Student Affairs Office for information pertaining to the awarding of credit for these exams.

Maximum Credits Enrolled

A student may not enroll for more than 17 credits in a term without permission from the associate dean.
Independent Study
Students must receive prior approval before enrolling in independent study courses.

Satisfactory/Unsatisfactory Grades
A student wishing to enroll in a course on an S/U basis must receive permission from the faculty advisor in his or her department and from the SHP Advising Center.

Enrolling in Other Institutions Simultaneously
Students must receive approval from the SHP Advising Center before enrolling simultaneously at another institution.

Advising
Students may be assigned a faculty advisor in their program of study or a professional academic advisor in the Office of Student Services.

Students should select an area of interest prior to completing the first two years of college. To assist with career decisions, the School of Health Professions offers introductory courses and experiences to provide information and career opportunities in these areas.

Career Placement
Graduates of programs in the School of Health Professions are highly recruited and frequently hired prior to receiving degrees. The Career Services office in the School of Health Professions offers résumé, cover letter and personal statement review, mock interviews, and workshops to enhance students' career development. Students are encouraged to seek out and use the Career Services office early in their undergraduate career.

Graduate
The School of Health Professions offers a wide variety of programs of study for students interested in careers in healthcare. At the graduate level, we offer degrees in:

• Communication Science and Disorders
• Occupational Therapy
• Physical Therapy
• Clinical and Diagnostic Sciences

The Graduate School confers an interdisciplinary Master's of Public Health (MPH) degree. The MPH is available in two emphasis areas: Health Promotion and Policy or Veterinary Public Health. This public health coursework reflects the University of Missouri’s strength in the health professions, social work, nursing, medicine, veterinary medicine, and arts and sciences.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.
Athletic Training

Program Director:
David “DC” Colt, EdD, ATC, LAT

Athletic training is a health care profession in which the Athletic Trainer assumes responsibility for the overall health care of the athletic population, particularly having an integral role in the prevention, recognition, care and rehabilitation of athletic injuries. Athletic Trainers have been employed in traditional settings including high schools, colleges, universities, professional sports teams, hospitals, and rehabilitation clinics. The practice of athletic training also includes, but is not limited to, physicians’ offices, corporate and industrial institutions, the military and the performing arts. Regardless of the practice setting, Athletic Trainers practice athletic training (or provide athletic training services) according to educational preparation and state practice act.

The Department of Physical Therapy, Athletic Training Program offers a Bachelor of Health Science (BHS) degree in Athletic Training.

Disclaimer: The Athletic Training Program at the University of Missouri is NOT accredited by the Commission on Accreditation of Athletic Training Education (CAATE). Only graduates of CAATE accredited programs are eligible to sit for the Board of Certification exam. The program is anticipating submission of application for accreditation and subsequent site visit for accreditation in the Spring 2016. Application and site visitation for accreditation does not guarantee accreditation.

Faculty
Associate Teaching Professor, D. Colt
Assistant Teaching Professor, K. Belmore, S. Wehring
Adjunct Faculty, J. Artioli, D. Belmore, C. Hairston

Undergraduate
• BHS in Athletic Training (p. 535)

Graduate
While MU does not offer graduate degrees specifically in athletic training, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Undergraduate

BHS in Athletic Training

Major Program Requirements

The Athletic Training Program consists of a one-year pre-professional phase followed by a three-year professional phase. Athletic Training is a professional program requiring secondary admission and a clinical education component. Clinical education experiences are completed at locations on and off campus during the three-year professional phase. All required Athletic Training courses have a minimum grade requirement.

Students earning the BHS-AT degree must complete all university requirements, including general education, in addition to the below degree requirements.

Total Credits: 120

*The Freshman year is considered “pre-professional.” Students apply into the “professional” portion of the program during the Freshman year. All students applying into the “professional” portion of the program must meet the minimum requirements for application into the BHS in Athletic Training degree program.*
Clinical and Diagnostic Sciences

The Clinical and Diagnostic Sciences BHS is made up of five programs; Clinical Laboratory Sciences, Diagnostic Medical Ultrasound, Nuclear Medicine, Radiological Science, and Respiratory Therapy.

Clinical Laboratory Science Program
School of Health Professions
605 Lewis Hall
(573) 882-8011 and (573) 884-1847
Director: Steven Starr

Clinical laboratory scientists are skilled, certified professionals trained in the theoretical and practical aspects of clinical laboratory medicine – chemistry, hematology, microbiology, immunology, molecular pathology, and blood banking. Clinical Laboratory Scientists have various levels of responsibility - as staff technologists, research technologists, supervisors, managers, or educators -- and can work in a variety of settings, including hospitals, clinics, laboratories, and research centers. Approximately 60 to 70 percent of all medical decisions regarding a patient’s diagnosis and treatment, as well as their hospital admission and discharge, are based upon laboratory test results obtained by Clinical Laboratory Scientists.

The Clinical Laboratory Science (CLS) program at MU is a unique collaboration with the University of Nebraska Medical Center in Omaha. The CLS program includes three years of prerequisite coursework, requiring 16 hours of both Biology and Chemistry, and 11 months in the clinical phase of the CLS program. The clinical year begins during the third week of May, with 11 weeks of coursework and clinical lab rotations in a dedicated summer student lab facility at the University of Nebraska’s Medical Center in Omaha. After the initial 11 weeks in the program, CLS students return to Columbia and complete their clinical laboratory rotations at one of three clinical sites, which include the University of Missouri Hospital and Clinics, Boyce and Bynum Pathology Laboratories, and Harry S. Truman Memorial Veteran’s Hospital.

Students graduate with a Bachelor of Health Science degree in Clinical and Diagnostic Sciences with emphasis in Clinical Laboratory Science from the University of Missouri with a Certificate in Medical Technology from the University of Nebraska Medical Center.

Diagnostic Medical Ultrasound Program
School of Health Professions
406 Lewis Hall
(573) 884-2994
Director: Moses Hdeib

The Diagnostic Medical Ultrasound (DMU) Program in the School of Health Professions (http://shp.missouri.edu) at the University of Missouri (http://www.missouri.edu) offers a Bachelor of Health Science (BHS) in Diagnostic Medical Ultrasound. The DMU Program is a 35-40 hours per week, 52 weeks per year Clinical Education Program. The DMU program has over 25 clinical sites through the state of Missouri in which students are placed during their clinical training.

Nuclear Medicine Program
School of Health Professions
605 Lewis Hall
(573) 884-7843
Director: Glen Heggie

The nuclear medicine technologist is concerned with the use of radioactivity for patient diagnosis, monitoring of treatment and in some cases the treatment itself. The nuclear medicine technologist uses radioactive compounds to perform body function studies, produce images of internal organs and analyze biological specimens.

Nuclear Medicine uses extremely small amounts of radioactive compounds in order to image and assess the function and state of health of many of the body’s internal organs, and to treat some forms of cancer. It is a multidisciplinary field dependent upon contributions from Physics, Chemistry and Medicine. This highly sophisticated discipline is at the forefront of discovering and understanding the complex physiologic processes of our bodies. This discipline is of enormous importance to medical specialties such as Cardiology (heart), Neurology (nervous system), Oncology (cancer), Orthopedics (bone), Endocrinology (hormone system), Hematology (blood), Nephrology (kidney), and Pulmonology (lung).

Radiological Science Program
School of Health Professions
607 Lewis Hall
(573) 884-2623
Director: Patricia Tew

Radiographers are highly skilled health professionals who work closely with physicians and specialize in the use of x-rays. They provide patient services using a variety of imaging modalities. In addition to conventional x-ray procedures, the radiographer also works with computerized axial tomography (CT), magnetic resonance imaging (MRI), cardiovascular-interventional technology, mammography, bone densitometry, and quality management.

Established in 1960, the Radiography Program is the only baccalaureate level program at a public institution of higher education in Missouri. This discipline provides preparation for leaders in the field by offering a Bachelor of Health Science degree. Graduates have demonstrated their superior achievement through their performance on national certifying examinations with a 100% overall pass rate. After graduating from the program, students may choose to do an additional clinical externship in computerized tomography or magnetic resonance imaging, which will lead to a certificate of completion and eligibility to take the national certifying examination in that area.

Mission Statement:

The primary mission of the radiography program is to prepare highly competent, registry eligible professionals in the medical imaging sciences. Our program and curriculum are designed to provide an educational foundation for the advancement into leadership and managerial positions within medical imaging, as well as providing an environment where scholarly activity, professional development, and service are expectations. Our curriculum enables successful graduates to readily interact with a variety of health care and science related fields.

Respiratory Therapy Program
School of Health Professions
617 Lewis Hall
(573) 882-9722
Program Director: Monica Schibig

The University of Missouri Respiratory Therapy Program was established in 1967. The program is credited to be among the country’s first baccalaureate degree programs in Respiratory Therapy. The University of Missouri’s Respiratory Therapy program prepares graduates for the Advanced Practitioner level, Registered Respiratory Therapist (RRT) and students graduate with a Bachelor of Health Science in Respiratory Therapy.
The Mission of the University of Missouri Respiratory Therapy Program is to coordinate superior classroom, laboratory, and clinical experiences to prepare advanced Respiratory Care Practitioners, develop learners who will effectively engage in professional leadership roles, and provide an environment where research and service are expectations.

**Faculty**

**Clinical Laboratory Science Program**
- Clinical Professor  G. D. Heggie*
- Clinical Instructor  S. Starr

**Diagnostic Medical Ultrasound Program**
- Clinical Professor  M. M. Hdeib*
- Clinical Associate Professor  D. W. Clem*, E. M. Hdeib*
- Clinical Assistant Professor  S. Anderson*, K. Merideth*

**Nuclear Medicine Program**
- Clinical Professor  G. D. Heggie*
- Assistant Clinical Professor  M. Feldman

**Radiological Sciences Program**
- Clinical Associate Professor  C. Allen
- Clinical Assistant Professor  M. Sebacher, P. Tew

**Respiratory Therapy**
- Clinical Professor  G. D. Heggie*
- Associate Clinical Professor  K. S. Moss*, M. A. Schibig
- Assistant Clinical Professor  L. M. Lair, J. L. Keely, S. W. Parker
  
  * Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

  ** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

- BHS in Clinical and Diagnostic Sciences
  - with emphasis in Clinical Laboratory Science (p. 538)
  - with emphasis in Diagnostic Medical Ultrasound (p. 539)
  - with emphasis in Nuclear Medicine (p. 540)
  - with emphasis in Radiography (p. 542)
  - with emphasis in Respiratory Therapy (p. 543)

**Future Certification and Careers**

Upon successfully completing the requirements of the DMU Program, MHS Graduates will be eligible to apply to the American Registry of Diagnostic Medical Sonographers (ARDMS) for registry in Abdomen, Obstetrics and Gynecology, Vascular Technology and Cardiac Ultrasound.

**Financial Aid**

Please contact the financial aid office. Some programs require an application and extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

**Undergraduate**

**BHS in Clinical and Diagnostic Sciences**

Please refer to the emphasis area pages for degree requirements:
- Clinical Laboratory Science (p. 538), Diagnostic Medical Ultrasound (p. 539), Nuclear Medicine (p. 540), Radiography (p. 542), Respiratory Therapy (p. 543).

**BHS in Clinical and Diagnostic Sciences with Emphasis in Clinical Laboratory Science**

**Major Program Requirements**

Students must complete all university requirements (p. 19), including general education (p. 20), in addition to the degree requirements below.

Professional Certification: Upon completion of the program, students are eligible to take the Medical Technology Licensure examination given by the American Society for Clinical Pathology (ASCP).

**Clinical and Diagnostic Sciences**

School of Health Professions
409 Lewis Hall
(573) 884-2994
Director: Moses Hdeib

The Master of Health Science in Clinical and Diagnostic Sciences is offered by the School of Health Professions, Department of Clinical and Diagnostic Sciences. The Clinical and Diagnostic Program (DMU) is a 35-40 hours per week, 52 weeks per academic year clinical education program.
BHS in Clinical and Diagnostic Sciences with Emphasis in Diagnostic Medical Ultrasound

Major Program Requirements

The Diagnostic Medical Sonographer uses high-frequency sound waves to perform a variety of diagnostic examinations. The sonographer performs an essential role in the process of data gathering and synthesis required to reach a diagnosis. Ultrasound is a profession requiring a high degree of independence, skill, judgment and knowledge. Sonographers work in hospitals, clinics, private physician offices and other medical facilities performing examinations in their areas of specialization. The Diagnostic Medical Ultrasound (DMU) Program offers multiple educational options. Any student interested in applying to the DMU Program should seek advisement as soon as possible to assure that all general education and prerequisite courses including the criteria for application have been completed.

Students must complete the courses listed below in addition to degree and university requirements (p. 19), which include university general education (p. 20) requirements.

BHS in Clinical and Diagnostic Sciences with Emphasis in Nuclear Medicine

Major Program Requirements

The nuclear medicine technologist is concerned with the use of radioactivity for patient diagnosis, monitoring of treatment and in some cases the treatment itself. The nuclear medicine technologist uses radioactive compounds to perform body function studies, produce images of internal organs and analyze biological specimens.

The curriculum incorporates the fundamentals needed for specialization as a nuclear medicine professional. Accreditation of the program is granted by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology.
The following are MU courses. Students transferring from other institutions should contact the program director to select appropriate prerequisite courses for admission. Students must complete these courses in addition to major, degree and University requirements (p. 19), including University general education (p. 20) requirements.

### Emphasis Core Requirements

#### Prerequisites to the nuclear medicine emphasis

**Total Credits: 123**
BHS in Clinical and Diagnostic Sciences with Emphasis in Radiography

Major Program Requirements

Radiographers are highly skilled health professionals who work closely with physicians specializing in the use of x-rays. They provide patient services using a variety of imaging modalities such as general x-ray, computed tomography, magnetic resonance imaging, mammography, interventional radiography, and bone densitometry. The radiographer must apply the principles of radiation protection, must be competent in the use and maintenance of delicate equipment and must have the ability to deal with patients and medical professionals.

Accreditation of the program is granted by:

Students transferring from other institutions should contact the program director to select appropriate prerequisite courses for admission. Students must complete these courses in addition to major, degree and University requirements (p. 19), including University general education requirements (p. 20).

BHS in Clinical and Diagnostic Sciences with Emphasis in Respiratory Therapy

Major Program Requirements

Respiratory care is a diverse, growing, health profession with extensive patient contact, often with the critically ill. Respiratory therapists administer prescribed respiratory care and life support to patients with deficiencies and abnormalities of the cardiopulmonary system. They work in many settings requiring a considerable degree of independent clinical judgment under the direct or indirect supervision of a physician.

The two-year, professional phase of the program begins the summer semester of the junior year. Students complete lecture and laboratory courses designed to develop knowledge and skills necessary for application to the clinical settings. Required courses in management, research, respiratory physiology and pharmacology, pathology and cardiology are integrated with the respiratory therapy curriculum. The final semester of the program consists entirely of clinical externships and online coursework. Students may select affiliated hospitals outside the Columbia area for this clinical experience or remain in Columbia. The MU RT program has a satellite campus at Mercy Hospital in St. Louis, Missouri.

Accreditation of the program is granted by the Commission on Accreditation for Respiratory Care (CoARC) www.coarc.com (http://www.coarc.com).

The following are MU courses. Students transferring from other institutions should contact the program director to select appropriate courses for admission. Students must complete the courses listed below in addition to degree and University requirements, which include University general education requirements.

Total Credits: 135
Professional Credentialing / Licensure

After graduation, students are eligible to take the credentialing exams offered by the National Board for Respiratory Care. Graduates will also be required to apply for licensing in the state in which they choose to work.

Graduate

MHS in Clinical and Diagnostic Sciences

Degree Requirements
Graduate students must maintain a 3.0 grade point average in all courses required for the degree. Failure to achieve a semester cumulative grade point average of 3.0 in required courses will result in delay of graduation or dismissal from the program. Students are expected to maintain full-time enrollment in the sequenced curriculum and complete the degree requirements as outlined in the course of study.

Admission Contact Information
Dr. Moses Hdeib hdeibm@health.missouri.edu
406 Lewis Hall
Columbia, MO 65211
573-884-2994

Admission Criteria
Deadline for spring entrance: December 1

• Minimum TOEFL scores:
  The minimum TOEFL score for the Diagnostic Medical Ultrasound Program is 100 in the new scoring model. This is equivalent to a paper-based score of 600. Test of Written English (TWE) - 4.5
• Minimum GRE score: check with Program Director of Graduate Studies
• Undergraduate GPA minimum: 3.00 (A=4.0) for the last 60 hours of college work

Potential applicants who have all the prerequisites for admission to the program should submit their application early (before November) in the fall of the academic year in order to be considered for early acceptance with start in the following spring semester. Please contact the director of graduate studies.

Required Application Materials
To the Graduate School:
• All required Graduate School documents
• GRE scores

To the Diagnostic Medical Ultrasound Program:
• Departmental Application
• Transcripts

Communication Science and Disorders includes the study of normal language, speech and hearing across the life span, as well as communication disorders that result from biological, environmental and behavioral factors. Communication Science and Disorders includes the professions of speech-language pathology and audiology.

Speech-language pathologists evaluate the speech and language of children and adults to determine whether problems exist in such areas as voice, articulation, fluency and receptive or expressive language. They also plan and carry out programs for the treatment of these problems. Audiologists evaluate hearing, identify hearing loss and participate in the rehabilitation of persons with hearing impairments.

The professions of speech-language pathology and audiology require master’s or doctoral degrees. Acceptance to an undergraduate program does not guarantee acceptance to a graduate program. Refer to the Graduate Catalog for information about the MHS and PhD degrees (p. 546).

Faculty

Associate Professor J. C. Goodman**, S. A. Wagovich**
Assistant Professor M. Dietrich**, M. Fagan**, E. S. Kelley*, M. Kuruvilla*
Associate Clinical Professor D. R. Fritz, B. A. McLay*
Assistant Clinical Professor L. B. Lawrence*, M. A. Scheneman
Clinical Instructor L. M. Frye, G. Hull, G. Nolan
Research Associate Professor Emerita L. S. Day*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BHS in Communication Science and Disorders (p. 547)

Graduate

• MHS in Communication Science and Disorders (p. 548)
  • with emphasis in Speech-Language Pathology (p. 548)

About Communication Science and Disorders

The field of Communication Science and Disorders, or CSD, encompasses the related but distinct disciplines of speech-language pathology (SLP), audiology and speech, language, and hearing sciences (SLHS). Speech-language pathologists and audiologists are professionals educated in human communication and its disorders. Speech-language pathologists diagnose and treat disorders such as delayed language development, stuttering, articulation and voice problems. Audiologists specialize in the prevention, identification, assessment and rehabilitation of hearing disorders. Speech, language, and hearing scientists are professionals concerned with exploring trends in the communication sciences, as well as developing strategies for improving or adding to the knowledge base within the fields of speech-language pathology and audiology.

MU established its first independent master’s and doctoral programs in speech-language pathology and audiology in the 1940s. The MU master’s degree program in speech-language pathology has been continuously accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology since 1966. An active local chapter of the National Student Speech Language Hearing Association is sponsored by the program.

The master’s degree prepares students for national certification in speech-language pathology and for professional clinical practice in both health care and educational settings. The doctoral degree involves a program of research and advanced study beyond the clinical master’s degree in preparation for a career in research and college teaching or administration.

Career Opportunities

A wide variety of work settings are available to speech-language pathologists and audiologists. Possibilities range from hospitals, clinics, and rehabilitation centers to schools, colleges and universities, government agencies, and private practice. Speech, language, and hearing scientists work primarily in colleges and universities, research labs and government agencies. Professional certification in speech-language pathology and audiology is awarded by the American Speech-Language-Hearing Association (ASHA). The master’s degree, which is the entry-level degree for speech-language pathologists, typically takes two years beyond the undergraduate degree. Additional prerequisite coursework is required for students with undergraduate degrees outside the field. Students wishing to pursue a career in audiology will need to attend a program that offers clinical a doctorate in audiology (AuD), the entry-level degree for audiologists.

Facilities and Resources

The department uses many cooperative facilities in Columbia, both on and off the MU campus, as clinical and scientific resources. Among these are the University Hospitals and Clinics, Rusk Rehabilitation Center, Ellis Fischel Cancer Center, Truman Memorial Veterans Hospital, Adult Day Connection, Assistive Technology Evaluation Center, Thompson Center for Autism and Neurodevelopmental Disorders, and Columbia Public Schools.

Other cooperative facilities are available both within and outside the State. The department operates the MU Speech and Hearing Clinic, a diagnostic and treatment center serving individuals with communication disorders from the campus and the community, the MU Robert G. Combs
Language Preschool, and the Accent Modification and Pronunciation Program. In addition, there are many research opportunities for students in the laboratories of individual faculty where they may gain experience with sophisticated equipment for research and clinical evaluation in normal and disordered speech, language, and hearing. A master’s thesis option is available to students interested in conducting research.

**Funding**

All graduate students are considered for available scholarships, fellowships, work-study grants, traineeships and graduate teaching and research assistantships.

**Undergraduate**

**BHS in Communication Science and Disorders**

**Major Program Requirements**

Students are required to apply to the Communication Science and Disorders major. Applications into the BHS program are considered once a year, and they must be submitted by February 1 of the student's sophomore year. (Note: Later applications will be considered if open seats remain in the upcoming junior class.) Applicants must have completed at least 42 hours of college credit before applying, and students who are admitted must have completed 60 hours of college credit before beginning coursework as Communication Science and Disorders majors. A minimum GPA of 2.75 on a four-point scale and a composite score of 22 or above on the ACT are required for acceptance into the BHS program. Meeting the minimum criteria and declaring a major of pre-Communication Science and Disorders do not guarantee acceptance into the program.

In addition to university (p. 19), college and degree requirements, including university general education (p. 20), students must complete the following:

**Major core requirements**

- **ENGLISH 1000** Exposition and Argumentation
- **COMMUN 1200** Public Speaking
- **PSYCH 1000** General Psychology
- **PSYCH 2410** Developmental Psychology
- **MATH 1100** College Algebra
  
or **MATH 1160** Precalculus Mathematics
- **STAT 1200** Introductory Statistical Reasoning
  
or **STAT 1300** Elementary Statistics
  
or **ESC_PS 4170** Introduction to Applied Statistics

**Social Sciences Requirement**

- **HIST 1100** Survey of American History to 1865
  
or **HIST 1200** Survey of American History Since 1865
  
or **POL_SC 1100** American Government

**Biological Science Requirement**

Select one of the following:

- **BIO_SC 1010 & BIO_SC 1020** General Principles and Concepts of Biology and General Biology Laboratory
- **BIO_SC 1500** Introduction to Biological Systems with Laboratory

**Physical Science Requirement**

- **PHYSICS 1150** Concepts in Physics
  
-or **PHYSICS 1210** College Physics I
  
-or **CHEM 1100** Atoms and Molecules with Lab

**Humanities Electives**

- **HIST 1100, 1200, or POL_SC 1100**

**Communication science and disorders courses**

- **C_S_D 1060** Human Language
- **C_S_D 2120** Survey of Communication Disorders
- **C_S_D 3010** American Phonetics
- **C_S_D 3020** Normal Language Development
- **C_S_D 3210** Anatomy and Physiology of the Speech Mechanism
- **C_S_D 3220** Speech Acoustics
- **C_S_D 3230** Hearing Science
- **C_S_D 4020** Language Disorders in Children
- **C_S_D 4030** Language Disorders of Adults
- **C_S_D 4320** Disorders of Phonology and Articulation
- **C_S_D 4210** Fluency Disorders
- **C_S_D 4220** Voice Disorders
- **C_S_D 4330** Introduction to Audiology
- **C_S_D 4430** Neurophysiology for Speech, Language, and Hearing
- **C_S_D 4900** Clinical Observation in Communication Disorders

**Semester Plan**

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.

**University of Missouri**

547
MHS in Communication Science and Disorders

Plan of Study

MHS candidates are required to complete a minimum of 48 semester hours in graduate-level courses with grades of B- or higher. No fewer than 24 hours must be earned in 8000/9000-level course work offered by the program. A maximum of 9 hours in clinical practicum courses may be counted toward the 48-hour requirement.

Thesis Option

The student may choose the thesis option for the master’s degree; work toward the thesis may count for up to six semester hours of credit.

Prerequisite Coursework

All applicants to the MHS program in Communication Science and Disorders with an emphasis in Speech-Language Pathology must have completed, or be in the process of completing, standard prerequisite course work in CSD. Any prospective applicant with an undergraduate degree in a major field other than Communication Science and Disorders should contact the Department prior to submitting an application to the MHS program. Prerequisite course work must be approved by the CSD Director of Graduate Studies prior to application. Many options exist for completing prerequisite course work nationwide. Please contact the Department for more information.

Examination

During the final semester of course work, we expect master’s degree candidates to achieve a passing score on the PRAXIS II Examination in Speech-Language Pathology. This exam serves as the comprehensive examination for the degree. See the program’s online Graduate Student Handbook for additional information.

Admission Contact Information

Julie Aston mucsdc@missouri.edu
301 Lewis Hall; Columbia, MO 65211

<tr>
<td>On or After August 1, 2011</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Required Application Materials

All applicants to the MHS program in Communication Science and Disorders with an emphasis in Speech-Language Pathology must apply through the Communication Sciences and Disorders Centralized Application Service (CSDCAS) at www.csdcas.org. The CSDCAS Applicant Portal Link will open on September 27, 2015 to begin accepting applications for the 2016-17 academic year. Additional information may be found on the MHS Admissions (http://shp.missouri.edu/csd/admission.php#mhs) web page.

Personal interviews may be requested.

Students who are accepted into the MHS program and commit to attending the University of Missouri will be required to complete the MU Graduate School’s online application which includes an additional fee. Information will be provided when admission is offered.

Admission Process

The current graduate admission process in Speech-Language Pathology is highly competitive nationwide. All MHS admission decisions are made by the Departmental Graduate Admissions Committee.

Financial Aid from the Program

All applicants accepted for admission to the MHS program will be considered for departmental financial aid.

MHS in Communication Science and Disorders with Emphasis in Speech-Language Pathology

The Master of Health Science (MHS) degree program prepares students for professional practice in speech-language pathology. Students in this program receive a strong academic and clinical background in current theory and application in the field of communication disorders from faculty who are committed to excellence in teaching and who are involved in clinical and basic research. Candidates for the MHS degree must complete a minimum of 48 credit hours of graduate coursework plus at least 375 hours of clinical practicum that is supervised by certified clinical faculty. In addition to the MU Speech and Hearing Clinic, the city of Columbia and surrounding communities in mid-Missouri provide for a wide range of clinical practicum opportunities as well as a diverse client
population. Students who wish to may also pursue clinical practicum experiences in other geographical locations during their final semester in the program. A thesis option is also available for students interested in research and/or further study toward the Doctor of Philosophy degree.

The MHS degree in CSD typically takes students two full years to complete if their baccalaureate degree is in communication science and disorders. If their undergraduate study was in another field, the degree program requires at a minimum 30 additional credit/semester hours of prerequisite coursework. This coursework may be completed through any college or university that offers an undergraduate degree in CSD and must include courses in both basic communication sciences and some communication disorders. It is recommended that the student have their prerequisite coursework approved by the Department’s graduate program director prior to application to the MHS degree program. Applicants do not have to complete all prerequisite coursework before applying or starting in the MHS program. All students must have successfully completed a baccalaureate degree (in some field) before beginning the MHS program in Communication Science and Disorders. For more information, contact the Department at mucsd@health.missouri.edu.

MHS graduates are required to meet all academic and clinical requirements for the Certificate of Clinical Competence (CCC) awarded by the American Speech-Language Hearing Association (ASHA). A passing score of 600 on the PRAXIS II Speech-Language Pathology examination is required for graduation from the MHS program in CSD. In addition to serving as the comprehensive examination for masters candidates in CSD, the PRAXIS II is also required for the Certificate of Clinical Competence, for Missouri professional licensure, and for Missouri school certification as a speech language specialist. For over 20 years, 100% of all graduates from MU’s CSD program have passed this national exam and our mean and median scores are significantly higher than the national averages. In addition, graduates of the program have enjoyed excellent job opportunities upon graduation, with many having more than one job offer before finishing their masters program.

The CSD MHS program at MU is fairly small and selective. Students benefit from a very low student-faculty ratio, close supervision in the MU Speech and Hearing Clinic, and a challenging yet supportive learning environment. Faculty in CSD are easily accessible, and strong student-faculty relationships are easily developed.

The CSD department welcomes all visitors interested in meeting our faculty and students and touring our facilities. If you would like to visit, we recommend that you schedule an appointment by calling the Department office at 573-882-3873 or e-mailing us at mucsd@health.missouri.edu.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MHS in Communication Science and Disorders (http://gradschool.missouri.edu/academics/programs/communication-science-and-disorders/master-of-health-science-emphasis-in-speech-language-pathology.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.
The Department of Health Sciences (DHS) is part of the School of Health Professions (SHP), which serves the citizens of Missouri through its outstanding research, community service clinics, and the education of students in the areas of health literacy and health promotion. Faculty in DHS teach courses for the Bachelor of Health Sciences program and are actively involved in a wide range of interdisciplinary research. Our faculty provide expertise in several domains including Public health, Psychology, Sociology, Medical Anthropology, Education, and Social Work. Faculty research covers a wide range of topics including health promotion, health communication, decision support, health disparities for disadvantaged groups, access to healthcare, and suicide prevention. Our research also spans a number of substantive areas including Autism Spectrum Disorders, breast cancer, HIV/AIDS, aging, and adolescent health.

Students can only earn the BHS concurrently with the Masters of Occupational Therapy (p. 553).

Students can only earn the BHS concurrently with the Doctor of Physical Therapy (p. 556).

Faculty

- Associate Professor E. Schatz*
- Associate Clinical Professor R. Hogan
- Associate Teaching Professor D. Hume*, M. Kuhnert
- Assistant Clinical Professor K. Flynn Peters
- Assistant Teaching Professor B. Blackburn, R. Bowman, C. Orbann, D. Gerhart

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BHS in Health Science (p. 550)
The Department of Health Sciences’ BHS in Health Science degree program is for students who wish to enter non-clinical health careers such as medical case management, corporate wellness, human services, medical sales, pharmaceutical manufacturing and distribution, and more. Graduates of the BHS degree program may also be qualified to enter either graduate or professional health science programs such as Physical Therapy, Health Administration and Public Health. The Health Science program requires physical, biological, behavioral and social sciences to provide students with an education in foundational sciences, human function, health research, service and policy.

The department offers the Bachelor of Health Science in Health Science (BHS).

Departmental Requirements

Courses may be delivered using traditional or distance delivery methods. The Health Science degree program credits must include a minimum of 120 university-level credit hours including: General education requirements comprise a minimum of 42 credit hours; Health Science core requirement comprise a minimum of 20 credit hours; Health Science approved elective courses comprise a minimum of 18 credit hours; general electives fulfilling the student’s concentration area comprise the remaining 40 credit hours.

Students are required to file a graduation plan for the Health Science degree by the time they have completed 60 university-level credit hours, including all MU and transfer credits. Students should meet with their academic advisor to discuss the graduation plan, and then file their plan prior to early registration for the fall and spring semesters. Students who transfer from another institution or another school/college at MU with 60 or more hours must file their graduation plan within the first semester of enrollment in the Health Science program.

Residency Requirement

There is a residency requirement for Health Science majors. Students must complete, at minimum, their last 30 hours of coursework for the degree as declared Health Science majors in the School of Health Professions. Students must be in the Health Science major at the beginning of a semester to include the hours in the residency requirement. Residency requirement hours for students transferring into the major during the semester will begin the following semester.

Admission to the BHS in Health Science

The BHS in Health Science program does not require an application. Students may declare their major in the BHS program by indicating the program on the MU application (for new students), filling out a transfer of division form (for current MU students), or indication of their intention to declare a health science major to their academic advisor (for current SHP students). There is a 2.0 MU cumulative and term GPA requirement to declare a major in Health Science. The cumulative GPA is calculated on all MU and transfer coursework. Students must maintain the 2.0 GPA, term and cumulative, to remain in the Health Science program. Students who fail to achieve that GPA may stay in the program for two probationary semesters. If the 2.0 term or cumulative GPA is not achieved after two probationary semesters, students must transfer out of the Health Science program.

Graduate

While MU does not offer graduate degrees specifically in health sciences, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Undergraduate

BHS in Health Science

Major Program Requirements

- Students must maintain the 2.0 GPA, term and cumulative, to remain in the Health Sciences program. Students who fail to achieve a 2.0 GPA may stay in the program for two probationary semesters,
and if they fail to earn a 2.0 term or cumulative GPA after the two probationary semesters, students must transfer out of the Health Sciences program.

- All required core and elective coursework for the BHS in Health Sciences program, including requirements outside the department, must be completed with a grade of C- or higher.
- Students may repeat a core required course one time.
- Students must complete all university requirements, including general education (p. 20), and Departmental Requirements (p. 550), in addition the degree requirements below.
- Students may only repeat a core required course one time.

**Capstone Requirement**

The BHS capstone is comprised of two courses: HLTH_SCI 4975 and HLTH_SCI 4985. HLTH_SCI 4975 offers ways to complete the capstone experience through internships. The internship will be approved by the internship advisor and faculty internship coordinator. Students may find their own internship experience or work with the course instructor/ internship advisor and faculty internship coordinator. Students may repeat an approved study abroad program

**Humanities and Fine Arts (9 or more credits required from 2 different areas)**

12 or more credits of a single foreign language may be used to fulfill this requirement

**Distribution of Content:**

Students must have at least one 2000 level or above course in two of three areas:

1. Biological/Physical/Mathematical Science
2. Behavioral/Social Science
3. Humanities/Fine Arts

**BHS Electives**

Students must complete 18 hours of approved elective courses. At least 9 credit hours must be from 3000/4000 level courses. Students must complete course work in at least two out of these three thematic areas: Social/Behavioral; Medical/Biological; Administrative/Leadership.

**Semester Plan**

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.

Total Credits: 120

* Denotes elective coursework. These specific courses are not required, though the credit hours are required to teach the University requirement of 120 total hours.

^ BIO_SC 1500: Intro Biological Systems with Lab can be taken in lieu of BIO_SC 1010 and BIO_SC 1020.

# Denotes Health Sciences elective coursework. These specific courses will count towards the 18 hours required for completion of the Health Science Degree program.
Occupational Therapy

Department of Occupational Therapy
School of Health Professions
801B Clark Hall
Columbia, Missouri 65211
(573) 882-3988

Advising Contact
MUOT@health.missouri.edu

Scholarship Information Contact
MUOT@health.missouri.edu

Occupational therapists are skilled health professionals who provide services to infants, children, adults and older persons experiencing physical, emotional or mental limitations in performing everyday activities. The department’s philosophy supports a holistic model that emphasizes empowerment and the mind, body, spirit. The curriculum focuses on the value of occupation in relationship to health and wellness. The department’s mission is to produce competent practitioners who can meet the challenges and changes occurring in institutions, community-based programs and educational settings in both urban and rural areas of Missouri.

Occupational therapists are employed in public and private schools, hospitals, rehabilitation centers, mental health facilities, nursing homes, home health agencies, community health programs and industry. As independent health practitioners, they are also involved in business, working with disability claims, in work-hardening programs and wellness/health promotion, or as proprietors of their own therapy services. Occupational therapists also work as educators, administrators, consultants and researchers.

The department offers a Bachelor of Health Science in Occupational Therapy (BHS) followed by the entry level master degree (MOT). To become a registered therapist the master degree is required.

Department accreditation is granted by the Accreditation Council for Occupational Therapy Education of the American Occupational Therapy Association, 4720 Montgomery Lane, Bethesda, MD 20814-3425, (301) 652-2682.

573-882-3988; FAX 573-884-2610
http://shp.missouri.edu/ot/

The School of Health Professions offers an entry level master’s degree in occupational therapy. Students apply to the Department of Occupational Therapy as an undergraduate, receive a Bachelor of Health Sciences in Occupational Therapy (BHS-OT) and continue on to graduate level courses. Student with completed bachelor degree at time of application to the program may opt to take all program courses at graduate level. Graduate courses are only offered to students enrolled in the program. The degree program is approved to meet accreditation requirements requiring a graduate degree. Contact the Department of Occupational Therapy for more information regarding the degree.

Accreditation & Certification

The Department of Occupational Therapy is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association, 4720 Montgomery Lane, Bethesda, MD, 20814-3425, (301) 652-2682.

Graduates are eligible to sit for the national certification examination administered by the National Board for Certification in Occupational Therapy (NBCOT), Inc. 12 South Summit Ave., Suite 100, Gaithersburg, MD 20877-4150, telephone (301) 990-7979; Fax (301) 869-8492.

Financial Aid from the Program

Check the School of Health Professions website at http://shp.missouri.edu for scholarship information.

Undergraduate

BHS in Occupational Therapy

Major Program Requirements

The professional degree program requires three years of course work after completion of all prerequisites and university general education requirements. Six months of field experiences in affiliated clinical and community-based sites, must be completed within 24 months after required didactic courses.

Students with a bachelor’s degree must complete the prerequisite courses and meet the university and OT admission requirements.

The following are MU courses. Students transferring from other institutions should seek advisement from the school and OT advisors and select appropriate prerequisite courses for admission. Medical terminology proficiency and 30 hours of observation is required. In addition to university, college and degree requirements, students must complete the following:

MOT in Occupational Therapy

Requirements for Masters Degree in Occupational Therapy

The Department of Occupational Therapy offers the Master of Occupational Therapy degree as the terminal degree of the program. All students must complete the prerequisite courses and meet the admission requirements to apply. The occupational therapy graduate courses include a minimum of 34 credits beyond the bachelor’s degree in OT. The masters degree is required to become certified and licensed to practice as an Occupational Therapist.

Leanna Garrison, Department Manager
809 Clark Hall; Columbia, MO 65211
573-884-2113

Admission Criteria

Application Deadline for Summer entrance: December 31

- Minimum MAT score: none set
- Undergraduate GPA: 3.3 or higher (4.0=A)
- Minimum TOEFL scores:
  - Internet-based test (iBT)
    - 61 Effective July 1, 2015 must have score of 80
  - Paper-based test (PBT)
    - 500 Effective July 1, 2015 must have score of 550
- Completion of all undergraduate/OT prerequisites
- 30 hours of occupational therapy observation
- 20 hours of volunteering
- Completion of all required application materials
- Acceptance to program

Required Application Materials

To the Graduate School:

- All required Graduate School documents (only for degreed students opting to take courses at graduate level)

Required Application Materials to the Program (Occupational Therapy):

- Go to http://shp.missouri.edu/ot/ for departmental application forms (available Oct. 1-Dec. 31)
- Observation Forms, Volunteer Forms, supplemental fee
Physical Therapy

K. Gibson, Chair
Department of Physical Therapy
School of Health Professions
801 Clark Hall
(573) 882-7103
Fax: (573) 884-8369
mushppt@missouri.edu
http://shp.missouri.edu/pt/

Physical Therapy involves the evaluation and treatment of physical disability and pain that may result from injury, disease or developmental disability. Prevention of disability and public education are also roles of the physical therapist. Physical therapists use tests and measurements to assess body system dysfunction and determine diagnosis and treatment. Daily living skills, including work, are also addressed.

The University of Missouri offers a Doctor of Physical Therapy degree. No master’s degree or terminal undergraduate degree in Physical Therapy are available.

Admissions

Doctor of Physical Therapy Program, Regular Admissions

Most students admitted to the Doctor of Physical Therapy program will have a baccalaureate degree. Students who are interested in pursuing application to the Doctor of Physical Therapy program are encouraged to work on an undergraduate degree that will allow them to fulfill application requirements.

Doctor of Physical Therapy Program, Early Admissions

Admission to the Doctor of Physical Therapy program may be available to a small group of students who have completed at least 90 credit hours, completed at least six full-time semesters of residential course work, all MU general education requirements and have shown excellent academic progress. Students who gain early admission to the Doctor of Physical Therapy program will be awarded the Bachelor of Health Science in pre-professional physical therapy upon completing one year of coursework in the physical therapy program.

Information regarding the admissions procedures and curriculum for the Doctor of Physical Therapy (p. 556) program can be found on the graduate tab.

Students who enter the MU Physical Therapy program will complete a Doctor of Physical Therapy (DPT) degree program.

Careers

The DPT degree is an entry-level clinical degree that prepares the student to enter the field of physical therapy as a general practitioner with a background in musculoskeletal, neuromuscular, cardiovascular/pulmonary and integumentary systems.

Financial Aid from the Program

Students may apply for scholarships during the professional phase of the program. Check the program website or ask the program contact for availability and details.

Undergraduate

BHS in Pre-Professional Physical Therapy

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Graduate

DPT in Physical Therapy

Degree Requirements

All students admitted must maintain a 3.0 grade point average with no grade below C (2.0) in courses required for the degree. Failure to achieve a semester or professional cumulative grade point average of 3.0 in required courses will result in probation or dismissal from the program. Students are expected to maintain full-time enrollment in the curriculum and complete the degree requirements as outlined in the course of study. Any exception must be approved by departmental faculty. Students must
demonstrate the personal behaviors and characteristics associated with optimal patient welfare and professional trust.

Prerequisites for the Doctoral Degree

Note: The DPT program accepts students to begin the professional program only for summer terms, which begin in June.

Admission to the DPT program is available through regular admission (applicants will have a bachelor’s degree prior to beginning the professional program) or through an early admission option that allows students to enter the professional program with 90 credit hours.

Regular applicants must have at least a 3.0 GPA in the core required courses and the cumulative GPA in the last 60+ credit hours.

On-campus interviews are required for admission to the professional program.

Students who enter without a bachelor’s degree must have satisfied the MU general education and graduation requirements and taken two Writing Intensive courses at MU. These applicants must possess a 3.5 GPA.

Applicants are notified of the selection committee’s decision by March.

All students are strongly encouraged to contact the School of Health Professions Student Affairs Office for advisement and planning well in advance of application.

Admission to the program is selective.

Plan of Study

The professional program is offered in sequential blocks and requires full-time enrollment for three academic years (including two summer sessions), beginning in the summer session following acceptance. The curriculum contains foundational and clinical sciences combining traditional lectures and course work, laboratory sessions, problem-based learning classes and clinical education. More than 200 clinical sites in Missouri and beyond are available for supervised clinical education.

A graduate must pass the National Physical Therapy Examination to receive a license to practice in the United States. The program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). Graduates are eligible for licensure anywhere in the United States.

The College of Human Environmental Sciences addresses human needs and enhances individual and family life in a diverse and global society by conducting advanced research, preparing professionals and providing outreach.

The college is unique among its peers in its comprehensive use of professional advisory boards, whose members are leaders in business, government, education and the social services. These experts provide guidance and support from their specialized fields to students and faculty and contribute powerful perspectives to curriculum development.

Undergraduate

- Admissions (p. 558)
- Advising (p. 558)
- Career Services (p. 558)

Admissions
Undergraduate students may enter the College of Human Environmental Sciences as freshmen. Some programs have requirements beyond those of the University. An entering freshman has the first year to explore the departments and the college as well as the combinations of subject areas for positions in fields such as education, health and welfare, business, industry and government.

All freshmen entering the College of Human Environmental Sciences enroll in GN_HES 1100 Introduction to Human Environmental Sciences or SOC_WK 1110 Introduction to the Social Work Major. These courses emphasize career decision-making, provide an orientation to the campus and the college, and bring into focus the role of a professional in the improvement of the quality of life in the near environment.

Transfer Student Application

Human Environmental Sciences
Students in another MU school or college, or from another UM System campus, must have a cumulative GPA and term GPA of 2.0 or better to be eligible for admission to the College of Human Environmental Sciences. For students who transfer to the UM System from another institution and then apply for transfer into the college, transcripts are re-evaluated by the college to determine what courses will apply to the degree.

A student ineligible to enroll in another school or college may not enroll in the College of Human Environmental Sciences during the period of ineligibility. An appeal for admission may be made after the period of ineligibility is over.

School of Social Work
Undergraduate students who have been admitted to the University after attending another college may request a social work major. Those who have completed more than 55 credits need a GPA of 2.5 or higher on all college work attempted.

Advising
Professional advising staff in the Student Services Office assists the students in planning their college programs.

Students earning credit from another institution will have a transfer equivalencies form completed by faculty for course work in their professional program. Transfer work is evaluated by the Office of Admissions. The HES Office of Student Services determines how transferred courses fit into a particular degree program.

It is the student’s responsibility to initiate a graduation check to be certain that all requirements are met. An application for graduation should be submitted to the HES Student Services Office the semester preceding graduation. The application is available online at: http://hes.missouri.edu/students_evalforgrad.html

Career Services
Career services cover a spectrum of career programs. These include business, education and agriculture career services offices on the campus. The Student Services Office and individual advisers provide information regarding procedures. Career exploration and preparation information may be obtained in the Career Center.

Graduate
The College of Human Environmental Sciences (HES) addresses human needs and enhances individual and family life in a diverse and global society by conducting advanced research. HES faculty have earned national and international research reputations while building programs that are valued by private citizens, government, business and industry, and human services agencies. The College has more than 400 graduate students enrolled in a variety of master’s and doctoral degrees. Graduate certificates and online study are other academic options in several disciplinary areas.

Architectural Studies
Human Development & Family Studies
Nutrition & Exercise Physiology
Personal Financial Planning
Textile & Apparel Management

Social Work

The School of Social Work (http://ssw.missouri.edu), housed within the College, offers a CSWE accredited Master of Social Work (MSW) Program that prepares competent, effective and ethical social work professional leaders for social change. The PhD program prepares students as educators and researchers with knowledge and skills to inform policy making, program development and evaluation, and research on clinical practice issues.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column. For a look at the College’s online graduate degree programs, see Mizzou Online.
Architectural Studies

R. B. Tofle, Chair
College of Human Environmental Sciences
137 Stanley Hall
(573) 882-7224
http://arch.missouri.edu

The department promotes connections between people and place and between interior design and architecture with the intention of preparing our graduates to become lifelong designers of the built environment.

Architectural Studies utilizes the arts and the sciences to understand, create, and enhance physical environments for people. Our work can be placed between the world of physical realities and the imaginary.

The Department of Architectural Studies offers a Bachelor of Science in Human Environmental Sciences with emphasis areas of either Interior Design (p. 563) or Architectural Studies (p. 562). Through teaching, research, and service, faculty and students conduct systematic inquiry into 1) the design process, 2) its products, 3) the interaction between people and the built environment, and 4) the implications of digital technologies for the above. The program advances the interdisciplinary interaction between interior design, architecture, the human sciences and aesthetics to improve quality of life for the public good.

Assistant Professor Emeritus P. Hildebrand

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BSHES in Architectural Studies (p. 562)
  • with emphasis in Architectural Studies (p. 562)
  • with emphasis in Interior Design (p. 563)
• Minor in Architectural Studies (p. 565)

The Program

Connecting people and place / interior design and architecture

Our mission is to promote connections between people and place and between interior design and architecture with the intention of preparing our graduates to become lifelong designers of the built environment.

Through teaching, research, and service, faculty and students conduct systematic inquiry into 1) the design process, 2) its products, 3) the interaction between people and the built environment, and 4) the implications of digital technologies for the above. The program highlights research as it advances the interdisciplinary interaction between interior design, architecture, the human sciences and aesthetics to improve quality of life for the public good.

See Professional Development: Undergraduates (http://arch.missouri.edu/resources_pd.html) for career opportunities.

Coursework

Course work includes six studios and coursework centering on the synthesis of functional, technological, aesthetic and symbolic attributes of interior design and architecture emphasizing physical environments that support human needs and aspirations.

Minor

Architectural Studies students may receive a minor in Entrepreneurship with required courses in Architectural Studies, an internship, and an additional 4 credits of specified coursework. See Undergraduate Minor in Entrepreneurship (p. 720) for more information.

Online Study

Students may receive a Minor in Architectural Studies (http://arch.missouri.edu/academics_minor.html) with 15 credits. See the guidelines for the General Studies (http://online.missouri.edu/degreeprograms/generalstudies/details.aspx) or Interdisciplinary Studies (http://online.missouri.edu/degreeprograms/interdisciplinary-studies/details.aspx) Online Bachelors’ Degree for a Component area in Architectural Studies.

Admission to Professional Program

Study Sequence

Students apply for admission to the professional program studio sequence required for undergraduate majors. Portfolio review and applications are submitted in May of each year. Application forms with deadlines are available from the department and at the department website. Admittance decisions are based on:

1. Review of design work submitted in a portfolio, which should include:
   • Satisfactory completion of ARCHST 1200 Architectural Drafting and Working Drawings
   • Satisfactory completion of 2-dimensional design coursework from: ARCHST 1100 Visual Design OR ART_GNRL 1030 Basic 2-D Design
   • Satisfactory completion of ART_DRAW 1050 Drawing I
2. Overall grade point average (including transfer courses), grades received in courses completed, and ACT scores (or equivalent for transfer students)
3. Enrollment capacity (approximately 40 students)

Admission to the professional program studio sequence will enable enrollment in ARCHST 2811 Studio I.

Laptop Computer Requirements

A laptop computer is required when admitted to the professional program studio sequence. See department website for recommended specifications.

Academic Advising Contact

Victoria Shahan
106 Gwynn Hall
Online Study
On-campus and distance-learners are taught by the same accomplished professors. This is a fully integrated model of online instruction with established quality. The Department of Architectural Studies offers 100% online graduate education:

- Master of Arts (http://arch.missouri.edu/academics_masters.html#page_MA) in the major area of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html).
- Master of Science (http://arch.missouri.edu/academics_masters.html#page_MS) in the major area of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html).
- Doctor of Philosophy (http://arch.missouri.edu/academics_phd.html) in HES and in the major area of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html).
- Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) as stand-alone coursework or as part of a masters or doctorate.
- Stand-alone courses for non-degree (http://gradschool.missouri.edu/admissions/eligibility-process/non-degree-applicants) graduate students. Students select online courses from an extensive menu for professional advancement. Up to 12 credit hours of graduate credit taken as a non-degree graduate student may be applied to a graduate degree program upon approval of the academic program if the student is accepted.

Graduate courses are delivered as:

- Asynchronous or Synchronous. Asynchronous coursework is completed independently according to the provided schedule. Synchronous courses will include real-time discussion during arranged weekly class periods.
- Semester-based or self-paced online.

See Mizzou Online http://online.missouri.edu/course-search/ for a complete listing of online course offerings and enrollment procedures. Transfer of credit (http://arch.missouri.edu/academics_transfer.html) to a degree program is allowed with the approval of the student’s advisor, approval of the director of graduate studies, and MU Office of Graduate Studies.

Architectural Studies Graduate Degrees
Graduate students select one of two areas of emphasis: 1) Environment and Behavior studies with a creative project leading to an MA degree and with research leading to the MS and PhD degrees OR 2) Design with Digital Media studies leading to the MA, MS and PhD degrees. The graduate program builds on Architectural Studies course work and a core of courses in design theory, research methods, graduate seminars, research and readings in digital media and environment and behavior.

Design Research Concentration
The Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) is developed for

- Designers engaged in architecture, interior design, graphic, or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry -- Healthcare IT companies, Engineering etc.
BSHES in Architectural Studies with Emphasis in Architectural Studies

The Program

The Architectural Studies emphasis prepares students at the undergraduate level for application to professional architecture programs as well as for professional roles in the design and construction industry.

Following their undergraduate education, students interested in becoming a licensed architect continue their education and complete a Masters of Architecture degree (M Arch) in other architectural programs. Alumni are admitted to many highly ranked graduate programs throughout the U.S.

Missouri residents may benefit from the Reciprocity Agreement with the University of Kansas. Out-of-state tuition is waived for Missouri residents when enrolled in the M Arch program as a first professional architecture degree. The M Arch is completed in 2 calendar years (based on portfolio and GPA) at KU. Students are encouraged to stay in communication with graduate schools as requirements change.

Students in the architectural studies program benefit from the enriched academic research environment and the emphasis on the thinking and making of physical environments that address the needs and aspirations of people. The program strives to blur the boundaries between architecture and interior design by stressing the inside experience of people in buildings.

Coursework

Students complete University of Missouri general education coursework that includes physics and calculus. Professional design coursework is in the following content areas: basic creative development, design planning and analysis, design communication, technical knowledge, history of art/architecture/interiors, business, and design theory.

Studio Description

It is the design studio setting where learning by doing is experienced and realized. The studio is a collaborative and cooperative learning environment emphasizing personal intellectual development as well as content learning. Course work includes six studios and coursework centering on the synthesis of functional, technological, social, aesthetic and symbolic attributes architecture that support human needs and their aspirations.

We emphasize a quest for artistic beauty, use, and techniques based on precision, truthfulness and sincerity. We believe that good design bonds among the pleasure of beauty, stimulation of the mind, and reasoned adaptation to existing conditions. In the studio, students address life’s complexities and contradictions in order to create physical spaces that surpass their visual compositions, creating magical mediating structures that evoke in the act of occupying and inhabiting matter, gravity and light to enhance life.

Solving practical problems, studio experiences emphasize: recognizing the contextual relationship of the setting, the building, and its systems; understanding of regulations that govern professional practice; researching users’ needs; applying historical precedent; demonstrating technical knowledge in communicating ideas; developing business

BSHES in Architectural Studies

Graduate Program Requirements

The academic program should be developed in consultation with an advisor by the end of the first full semester or at the successful conclusion of at least nine credit hours. See MU Graduate Studies (http://gradstudies.missouri.edu) website for guidelines and requirements regarding course work and role of committee. Students are required to self-report academic performance, degree program milestones and related achievements in scholarship, research and creative work on an annual basis. Students complete this Annual Report (http://gradstudies.missouri.edu/academics/progress/graduate-student-progress-system.php) at an online Graduate Student Progress System (https://gps.missouri.edu).

Financial Aid from the Program

Limited teaching and/or research assistantships and scholarships are available to graduate students. GTA appointments are available to resident graduate students and are based on the match between the department’s needs and candidate’s background. See Financial FAQs (http://arch.missouri.edu/academics_faqgrad.html) on department web site.

Undergraduate

BSHES in Architectural Studies

Major Program Requirements

The BSHES in Architectural Studies connects interior design, architecture, the human sciences and aesthetics to improve quality of life. Students are engaged in the processes, procedures, observations, and techniques of design.

The BSHES is offered with two emphasis area options: Interior Design and Architectural Studies. Both emphasis areas focus on the development of environmental designs for human living, work, and leisure. The Interior Design emphasis results in a terminal bachelor’s degree accredited by the Council of Interior Design Accreditation (CIDA). The Architectural Studies emphasis is a pre-architecture bachelor’s degree or pre-professional option and students continue their education with the M Arch to become practicing architects.

Some courses in the Professional Program area double count for General Education (p. 20) requirements. See degree information at the emphasis level.

Semester Plan

Refer to the Semester Plans at the emphasis level.

• Business and market professionals to advance understanding of design research for marketing.

The Design Research concentration can be taken as independent coursework for professional advancement or applied to a Masters (30 cr) or PhD program. Four courses comprise the concentration:

• ARCHST 7961 Design Research and Service Design (3 credits)
• ARCHST 7963 Human Factors Research for Design (3 credits)
• ARCHST 7962 Information Visualization and Visual Analytics (3 credits)
• ARCHST 7964 Design Thinking and Creative Process (3 credits)

• Business and market professionals to advance understanding of design research for marketing.

The Design Research concentration can be taken as independent coursework for professional advancement or applied to a Masters (30 cr) or PhD program. Four courses comprise the concentration:

• ARCHST 7961 Design Research and Service Design (3 credits)
• ARCHST 7963 Human Factors Research for Design (3 credits)
• ARCHST 7962 Information Visualization and Visual Analytics (3 credits)
• ARCHST 7964 Design Thinking and Creative Process (3 credits)
and professional skills; and creating responsible environmental design solutions.

Degree Requirements

### Basic Creative Development
- **ARCHST 1100**: Visual Design 9
- **ARCHST 2315**: Introduction to Building Systems Laboratory 1
- **ARCHST 2316**: Advanced Building Systems Lab (or a 3D art course) 2
- **ARCHST 3100**: Color and Light 3

### Design Planning and Analysis
- **ARCHST 2811**: Studio I 4
- **ARCHST 3182**: Studio II 4
- **ARCHST 3860**: Human Factors Programming 3
- **ARCHST 4823**: Architectural Studio III 4
- **ARCHST 4824**: Architectural Studio IV 4
- **ARCHST 4815**: Construction Documents and Building Information Modeling Studio 4
- **ARCHST 4860**: Programming for Thesis Design Studio 1
- **ARCHST 4990**: Thesis Design Studio 4

### Design Communication
- **ART_DRAW 1050**: Drawing I 3
- **ARCHST 1200**: Architectural Drafting and Working Drawings 3
- **ARCHST 2230**: Design Communication I 3
- **ARCHST 3230**: Advanced Design Communication Using BIM 3

### Technical Knowledge
- **ARCHST 2220**: Introduction to CAD 3
- **ARCHST 2310**: Building Systems 3
- **ARCHST 4320**: Materials, Methods and Products 3
- **ARCHST 4323**: Sustainable Technologies and Systems 3
- **ARCHST 4333**: Compliance and Specifications 3
- **MATH 1400**: Calculus for Social and Life Sciences I 3
- **PHYSICS 1210**: College Physics I 4

### History of Art, Architecture and Interiors
- **ARCHST 4430**: Guiding Design with Historic Preservation 3
- **ARCHST 4435**: History of the Designed Environment to 1750 3
- **ARCHST 4440**: Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution 3

### Business
- **ARCHST 4710**: Design Business Practices 3

### Design Theory
- **ARCHST 1600**: Fundamentals of Environmental Design 3
- **ARCHST 2100**: Understanding Architecture and the American City 3
- **ARCHST 2620**: People, Places and Design 3
- **ARCHST 3600**: Environmental Analysis 3

### Electives - to equal 125 credit minimum for the program

## Semester Plan

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.

## BSHES in Architectural Studies with Emphasis in Interior Design

### The Program

The Interior Design program is a four-year, professional baccalaureate program accredited by the Council for Interior Design Accreditation (CIDA). The program’s mission is to provide academic training with high-quality educational experiences to prepare students for their successful careers as interior designers. Its purpose is to improve quality of life and protect human health, safety, and welfare through the design of the interior environment.

The interior design program prepares students for entry-level interior design practice in a multi-faceted profession in which creative and technical solutions are applied to achieve the interior environment. The NCIDQ definition (http://www.ncidqexam.org/about-interior-design/definition-of-interior-design) clarifies the scope of the services and tasks of the profession. Curriculum incorporates signature characteristics of interior design such as furniture, fixtures, and equipment, color, and interior materiality.

Our program enhances interior design education because of the enriched academic research environment and the emphasis on the thinking and making of interior spaces. Our interior design program stresses that it is...
the inside of buildings and those experiences that help to create peoples’ individual meaning in life.

Coursework

Students complete University of Missouri general education coursework and professional Interior design coursework in the following content areas: basic creative development, design planning and analysis, design communication, technical knowledge, history of art/architecture/interiors, business, and design theory.

Studio Description

It is the design studio setting where learning by doing is experienced and realized. The studio is a collaborative and cooperative learning environment emphasizing personal intellectual development as well as content learning. Course work includes six studios and coursework centering on the synthesis of functional, technological, social, aesthetic and symbolic attributes of interior design that support human needs and their aspirations.

We emphasize a quest for artistic beauty, use, and techniques based on precision, truthfulness and sincerity. We believe that good design bonds among the pleasure of beauty, stimulation of the mind, and reasoned adaptation to existing conditions. In the studio, students address life’s complexities and contradictions in order to create physical interior spaces that surpass their visual compositions, creating magical mediating structures that evoke in the act of occupying and inhabiting matter, gravity and light to enhance life.

Solving practical problems, studio experiences emphasize: recognizing the contextual relationship of the setting, the building, and its systems to the interior; understanding of regulations that govern professional practice; researching users’ needs; applying historical precedent; demonstrating technical knowledge in communicating ideas; developing business and professional skills; and creating responsible environmental design solutions.

For exceptional students, with consent of instructor and department approval, additional course work in the department may be selected.

**Online Minor in Architectural Studies**

Complete the [Apply for HES Minor form](http://arch.missouri.edu/academics_online.html). See Online Study and Degrees (http://arch.missouri.edu/academics_online.html) in Architectural Studies for a listing of online courses currently open for registration. ArchSt1600 may be substituted with another online course for MizzouOnline students.

**Online and Resident General Education Courses**

Courses meeting MU General Education (http://generaleducation.missouri.edu/courses) requirements (e.g., Humanities, Behavioral Science, and Social Science) are indicated.

**MA in Architectural Studies**

**Master of Art**

The creative, project-based, MA plan of study is often undertaken in preparation for careers in the design professions and education, as well as in the advertising and entertainment industries. The project is conducted in the area of design with digital media using high-end computer software. The culmination of the degree is a professionally reviewed, visual project.

**Environment and Behavior Studies Emphasis**

The Environment and Behavior Studies focuses on the multifaceted relationships between people and their physical, social, and cultural environments. Environment-behavior research explores a variety of environments, linking them to a range of behavioral concerns. This program is suitable for persons who seek careers in research, consulting, and/or teaching in design disciplines.

**Current study areas in environment and behavior include:**

- Design Education
- Learning Environments for Design
- Social and Cultural Bases of Design
- History of the Designed Environment
- Design Planning and Analysis
- Aesthetics of Design
- Universal Design/Accessibility
- Environment and Aging
- Housing, Neighborhood Design, and Sustainability
- Facility Management and Design
- Programming, Design and Post-Occupancy Evaluation

Contact Dr. Newton D’souza (http://arch.missouri.edu/faculty_dsouza.html) for more information about the department’s graduate program or the emphasis in environment and behavior.

**Design with Digital Media Emphasis**

Design with Digital Media, as an integral part of the design process, focuses on graphic ideation and the application of computer technology for architecture, interior design and related disciplines. This program of study has an emphasis on design with digital media leading to the MA degree.

**Current study areas in the digital media program include:**

- Design computing and cognition
- Design process using digital media and creativity research
- Virtual reality (VR) and augmented reality (AR) technologies for design visualization
- Advanced visualization technologies for environment-behavior simulation
- Building Information Modeling (BIM)
- Building Simulation
- Human-computer interaction aspects of digital tools for design

The culmination of the degree is a written and/or visual project employing computer applications for design methods. Applicants interested in the
Design with Digital Media option should contact the coordinator of Design with Digital Media Dr. Bimal Balakrishnan (http://arch.missouri.edu/faculty_balakrishnan.html) for course content and research proposals.

Design Research Concentration

A Design Research concentration is offered for:

- Designers engaged in interior design, architecture, graphic or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry -- Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

The course work for the concentration is applied to the program of study. For specifics, see Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) on department web site.

Admission Contact

Dr. Newton D’souza (dsouzan@missouri.edu)
137 Stanley Hall; Columbia, MO 65211
573-882-7496

Admission Criteria

Fall deadline: January 15
Minimum GPA: 3.0
Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>61</td>
<td>500</td>
</tr>
</tbody>
</table>

Required Application Materials

Apply online to the Office of Graduate Studies (http://gradstudies.missouri.edu) with the following:

- Application statement of graduate goals and educational objectives discussing which of the department’s emphasis areas is of interest; intentions regarding MA or MS; and request for a specific advisor.
- 3 letters of recommendation (excluding MU Architectural Studies faculty).
- Graduate School application.
- For MA applicants only, a link to a personal web site or electronic portfolio of images and/or publications should be included with application materials. (Do not mail originals.)

MA in Architectural Studies with Emphasis in Design with Digital Media

MU’s Design with Digital Media program attracts a diverse group of talented, intellectually engaged graduate students for interdisciplinary and trans-disciplinary exploration in the digital arts. The curriculum enables students to investigate innovative approaches to contemporary theory and practice, and fosters both individual inquiry and high-level collaboration. The primary objective of the program is to prepare creative critical thinkers to become leaders in their fields.

Structured to promote thought and work that crosses traditional lines between disciplines, the Digital + Media curriculum challenges students to consider non-standard approaches to the computer as a creative and expressive medium. Study of technology, art and design is balanced with inquiry grounded in conceptual, critical, social, cultural and historical considerations.

Design with Digital Media, as an integral part of the design process, focuses on graphic ideation and the application of computer technology for architecture, interior and related disciplines. This program of study has an emphasis on design with digital media leading to the MA degree.

Current study areas in the digital media program include:

- Design computing and cognition
- Design process using digital media and creativity research
- Virtual reality (VR) and augmented reality (AR) technologies for design visualization
- Advanced visualization technologies for environment-behavior simulation
- Building Information Modeling (BIM)
- Building Simulation
- Human-computer interaction aspects of digital tools for design

See resources in our immersive visualization lab, the ilab (http://arch.missouri.edu/resources_ilab.html), and the ilab web site. (http://arch.missouri.edu/ilab)

The culmination of the degree is a written and/or visual project employing computer applications for design methods. Applicants interested in the Design with Digital Media option should contact the coordinator of Design with Digital Media, Dr. Bimal Balakrishnan (http://arch.missouri.edu/faculty_balakrishnan.html), for course content and research proposals.

Admissions

Applicants are required to meet the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

MA in Architectural Studies with Emphasis in Environment and Behavior

The Environment and Behavior Studies focus is on the multifaceted relationship between people and their physical, social and cultural environments. Environment-behavior research explores a variety of environments, linking them to a range of behavioral concerns. This program is suitable for persons who seek careers in research, consulting, and/or teaching in architecture, interior design, and other environmental design disciplines.

A design project leads to the MA degree.
Emphasis areas in environment and behavior include:

- Design Education
- Social and Cultural Bases of Design
- History of the Designed Environment
- Design Planning and Analysis
- Interior Design Systems
- Universal Design/Accessibility
- Environment and Aging
- Quality of Life and Design
- Housing, Neighborhood Design, and Sustainability
- Programming, Design and Post-Occupancy Evaluation
- Facility Management and Design

Contact Dr. Newton D’Souza (http://arch.missouri.edu/faculty_dsouza.html) for more information about the Department’s Graduate program or the emphasis in environment and behavior.

Admissions

Applicants are required to meet the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

MS in Architectural Studies

Master of Science

The design and research-based MS plan of study is often undertaken in preparation for professional practice or preparation for the doctoral degree. The project is conducted in emphasis areas as described below. Within each of these emphases, specific course work is selected based on subject matter, the type of design project and its research application.

Research is conducted in one of two emphasis areas — design with digital media or environment and behavior studies. Within each emphasis area, specific course work is selected based on subject matter and the type of research method selected — quantitative, qualitative or a combination of both methods. The culmination of the degree is the written research thesis and a final oral examination by an approved faculty committee.

Environment and Behavior Studies Emphasis

The Environment and Behavior Studies emphasis area focuses on the multifaceted relationships between people and their physical, social, and cultural environments. Environment-behavior research explores a variety of environments, linking them to a range of behavioral concerns. This program is suitable for persons who seek careers in research, consulting, and/or teaching in architecture, interior design, and related environmental design disciplines.

Current study areas in environment and behavior include:

- Design Education
- Social and Cultural Bases of Design
- History of the Designed Environment
- Design Planning and Analysis
- Aesthetics of Design
- Universal Design/Accessibility
- Environment and Aging
- Housing, Neighborhood Design, and Sustainability
- Programming, Design and Post-Occupancy Evaluation
- Facility Management and Design

Contact Dr. Newton D’Souza (http://arch.missouri.edu/faculty_dsouza.html) for more information about the department’s graduate program or the emphasis in environment and behavior.

Design with Digital Media Emphasis

Design with Digital Media, as an integral part of the design process, focuses on graphic ideation and the application of computer technology for architecture, interior design and related disciplines.

Current study areas in the digital media program include:

- Design computing and cognition
- Design process using digital media and creativity research
- Virtual reality (VR) and augmented reality (AR) technologies for design visualization
- Advanced visualization technologies for environment-behavior simulation
- Building Information Modeling (BIM)
- Building Simulation
- Human-computer interaction aspects of digital tools for design

The culmination of the degree is a written and/or visual project employing computer applications for design methods. Applicants interested in the Design with Digital Media option should contact the coordinator of Design with Digital Media Dr. Bimal Balakrishnan (http://arch.missouri.edu/faculty_balakrishnan.html) for course content and research proposals.

Design Research Concentration

The Design Research Concentration can be applied toward the program of study. The concentration is of interest to:

- Designers engaged in interior design, architecture, graphic or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry -- Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

For more information, see Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) on the department’s web site.

Admission Contact

Dr. Newton D’souza (dsouzan@missouri.edu)

137 Stanley Hall; Columbia, MO 65211
Current study areas in the digital media program include:

- Design computing and cognition
- Design process using digital media and creativity research
- Virtual reality (VR) and augmented reality (AR) technologies for design visualization
- Advanced visualization technologies for environment-behavior simulation
- Building Information Modeling (BIM)
- Building Simulation
- Human-computer interaction aspects of digital tools for design

See resources in our immersive visualization lab, the ilab (http://arch.missouri.edu/resources_ilab.html), and the ilab web site. (http://arch.missouri.edu/ilab)

The culmination of the degree is a written and/or visual project employing computer applications for design methods. Applicants interested in the Design with Digital Media option should contact the coordinator of Design with Digital Media, Dr. Bimal Balakrishnan (http://arch.missouri.edu/faculty_balakrishnan.html), for course content and research proposals.

Admissions

Applicants are required to meet the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, please refer to the degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

**MS in Architectural Studies with Emphasis in Environment and Behavior**

The Environment and Behavior Studies focus is on the multifaceted relationships between people and their physical, social and cultural environments. Environment-behavior research explores a variety of environments, linking them to a range of behavioral concerns. This program is suitable for persons who seek careers in research, consulting, and/or teaching in architecture, interior design, and other environmental design disciplines.

A design project leads to the MS and PhD degrees.

**Emphasis areas in environment and behavior include:**

- Design Education
- History of the Designed Environment
- Design Planning and Analysis
- Interior Design Systems
- Universal Design/Accessibility
- Environment and Aging
- Quality of Life and Design
- Health Care Design
- Housing, Neighborhood Design, and Sustainability
- Organizational Systems and Design
- Facility Management and Design
- Programming, Design and Post-Occupancy Evaluation

Contact Dr. Newton D'Souza (http://arch.missouri.edu/faculty_dsouza.html) at dsouzan@missouri.edu for more information about the Department's Graduate program or the emphasis in environment and behavior.

Admissions

Applicants are required to meet the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, please
refer to the degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

A registered dietitian (RD) or registered dietitian nutritionist (RDN) has completed education and training established by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) (http://www.eatrightacend.org/ACEND). In order to be eligible to become a RD/ RDN, one must complete required coursework and supervised practice from an ACEND accredited dietetics program and pass the national Registration Examination for Dietitians. The RD/RDN holds a minimum of a bachelors degree. It has been proposed that in 2024 the profession of dietetics will become masters entry-level.

The department offers a Bachelor of Human Environmental Sciences in Nutritional Sciences with an emphasis in Medical Dietetics, followed by entry into the Masters of Science in Dietetics.

Faculty

Associate Professor S. Ball**, S. Gable**, P. S. Hinton**, C. A. Peterson**
Assistant Professor H. Leidy**, V. Vieira-Potter*, J. Padilla*
Teaching Associate Professor D. E. Brigham*
Teaching Assistant Professor M. Raedeke*, L. Hudson*, J. Schnell*, D. Smith
Joint Faculty M. J. Petris**, L. Pulakat**, R. S. Rector**
Extension Faculty J. Brit-Rankin*, C. Gabel, S. Mills-Gray
Professor Emeritus R. P. Dowdy*, L. Hillman*, P. M. Landhuis*, M. McDonald, B. L. O’Dell, T. R. Thomas*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

The College of Human Environmental Sciences offers a bachelors degree in BSHES in Nutritional Sciences with a emphasis in Medical Dietetics.

Only students who successfully complete prerequisites, have been admitted to the Coordinated Program and completed all undergraduate requirements for the Coordinated Program will receive this emphasis area for the bachelor’s degree. The completion of this bachelor’s degree only does not allow the student to be eligible to take the national Registration Examination for Dietitians. Furthermore, it is not a didactic program in dietetics. No verification statement is given after completion of only the bachelor’s degree. Students who receive this degree emphasis and are in good academic standing will transition seamlessly to the Coordinated Program’s fifth year master’s program.

Application requirements to the CP are posted each year on the department’s webpage at http://ns.missouri.edu/ Applications are due in January. To be eligible to apply, the applicants must have a minimum 3.2 GPA and have completed or be able to complete the first four semesters of courses listed under the course requirements for dietetics (http://hes.missouri.edu/documents/degree_sheets/nep/Dietetics.pdf) (nutrition and foods). The student must be enrolled in or already have completed NEP 2340 and BIOCHM 3630 at the time the CP application is submitted. Students must achieve a final course grade of B- or better in both, or equivalent transfer course approved by faulty. Failure to meet the criteria may result in forfeiture of a space in the Coordinated Program.

BSHES in Nutritional Sciences - Medical Dietetics (Nutrition and Food) (p. 596)

Graduate

• MS in Dietetics (p. 570)

The College of Human Environmental Sciences offers a Master of Science degree in Dietetics. This degree is only for students accepted in the Coordinated Program in Dietetics. See BSHES in Nutritional Sciences with emphasis in Medical Dietetics (http://catalog.missouri.edu/undergraduategraduate/collegeofhumanenvironmentalsciences/nutritionalsciences/bshes-nutritional-science-emphasis-medical-dietetics) for application information and criteria. The Coordinated Program is a five year program, in which student’s receive a bachelor’s in year four and a master’s degree in year five. The required supervised practice occurs in years 3-5. An MS in Dietetics will occur in year five. After acceptance to the Coordinated Program, students must successfully complete their BS, MS and all supervised practice within the Coordinated Program, in order to receive their verification statement. The verification statement is required for eligibility to take the national Registration Examination for Dietitians.

Requirements for program continuation during the master’s year will be posted on the Nutrition and Exercise Physiology website (http://ns.missouri.edu).

Graduate

MS in Dietetics

Degree Requirements

The Coordinated Program in Dietetics requires a minimum of 30 hours of graduate courses in the program. Students must maintain a 3.0 GPA.
Sample Plan of Study

The following courses are required for this degree. Changes in course requirements may occur, as the program is required to meet the accreditation standards.

Total Credits: 149

Thesis/Non-Thesis Requirements

This is a professional program and will not require a Thesis, but will require a comprehensive exam.

Admissions

The College of Human Environmental Sciences offers a Master of Science degree in dietetics. This degree is only for students accepted in the Coordinated Program in Dietetics. See BSHES in Nutritional Sciences with emphasis in Medical Dietetics (p. 596) for application information and criteria. The Coordinated Program is a five year program, in which student’s receive a bachelor’s in year four and a master’s degree in year five. The required supervised practice occurs in years 3-5. An MS in Dietetics will occur in year five. After acceptance to the Coordinated Program, students must successfully complete their BS, MS and all supervised practice within the Coordinated Program, in order to receive their verification statement. The verification statement is required for eligibility to take the national Registration Examination for Dietitians. Requirements for program continuation during the master’s year will be posted on the Nutrition and Exercise Physiology website (http://ns.missouri.edu).

*Extension Faculty* J. Britt-Rankin*, C. Gabel, S. Mills-Gray

*Professor Emeritus* R. P. Dowdy*, L. Hillman*, P. M. Landhuis*, M. McDonald, B. L. O’Dell, T. R. Thomas*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

While MU does not offer undergraduate degrees specifically in exercise physiology, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

**Graduate**

- PhD in Exercise Physiology (p. 572)

---

**About the Program**

The **Exercise Physiology PhD program** is designed to provide advanced training in both the basic and applied aspects of exercise, physical activity and physical inactivity. Currently, the research focus is to examine the mechanisms by which physical activity levels and/or exercise modulate risk and development of obesity, type 2 diabetes, and overall metabolic and cardiovascular diseases using both animal models and human subjects, and to be able to translate the findings into the clinical or applied setting. Graduate students will receive training in laboratory research, seminar preparation, scientific writing, problem solving and grant writing. Graduate studies at the University of Missouri offer the advantage of interdisciplinary exercise research that is facilitated with numerous collaborations at the many research centers at MU. In addition, the Exercise Physiology research program collaborates closely with other units on campus including the Department of Biomedical Sciences in the Vet School, and the Departments of Internal Medicine and Medical Pharmacology and Physiology in the School of Medicine among others.

The **Exercise Physiology Graduate Program offers a PhD degree**. This exercise physiology degree is designed to prepare students for careers in exercise physiology or exercise physiology/nutrition. The curriculum has a scientific basis with core courses in exercise physiology, nutrition, biochemistry, and physiology. Teaching and research assistantships are available on a competitive basis.

**Graduate**

**PhD in Exercise Physiology**

**Degree Requirements**

The PhD program requires a minimum of 72 hours beyond the bachelor's degree. A committee of 4 faculty members must approve all graduate courses, including those from other universities. The graduate course work includes 15 hours in exercise physiology, plus coursework in physiology, nutrition and biochemistry. Research requirements include NEP 7500 (9 hours of research projects) and NEP 9090 (12 hours dissertation). One semester of teaching experience is required, as is participation on a major external grant proposal. NEP 8850 Advanced Exercise Physiology A is used as your competency course and the student must earn a B or better. If the student has a similar course in their transfer courses from a masters, then another course will be used - this must be approved by the graduate director and committee.

Note: Specific Masters courses (36 hours maximum) may be counted on the doctoral program at the discretion of the student’s committee (3 members in dept., 1 member outside). Target ~ 72 hours beyond B.S.)

**Sample Plan of Study**

Because students in the PhD program are from a wide variety of circumstances, and pursue the PhD at different paces, a sample plan of study is not easily produced. Students are encouraged to work out their plan of study with their advisor.

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Exercise Physiology (http://gradschool.missouri.edu/academics/programs/exercise-physiology/phd-in-exercise-physiology.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you applied.

**Exercise and Physiology Program Applicants** must have a 3.00 undergraduate GPA, a 3.5 graduate GPA and meet the minimum GRE scores to be admitted. TOEFL scores are required from international applicants. Specific information can be found on the department website: http://ns.missouri.edu/grad_admission.html

Complete instructions for applying to the program can be found on the programs website: http://ns.missouri.edu/graduate_apply.html

**Qualifying Process**

NEP 8850 Advanced Exercise Physiology is used as your competency course and the student must pass with the grade of B or better. If the student comes in with a master’s course similar to NEP 8870, then another course can be used as the competency course and will be approved by the committee and graduate director (e.g. NEP 8870 Exercise Metabolism).

**Comprehensive Examination Process**

Candidacy for a doctoral degree is established by passing the comprehensive examination. The comprehensive examination includes written and oral sections and is completed as the candidate is completing the prescribed coursework.

**Dissertation Requirements**

The dissertation must be written on a subject approved by the candidates doctoral program committee, must embody the results of original and significant investigation and must be the candidates own work. All dissertation defenses shall be open to the general faculty. For the dissertation to be successfully defended, the student’s doctoral committee must vote to pass the student on the defense with no more than one dissenting or abstaining vote.

Curators Professor Emerita M. Coleman**
Professor Emerita K. Thornburg*

Dean and Professor Emeritus S.R. Jorgensen*
* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BSHES in Human Development and Family Studies (p. 576)
  - with emphasis in Child Development and Education (p. 576)
  - with emphasis in Child Life Specialist (p. 577)
  - with emphasis in Early Childhood Education in a Mobile Society (p. 578)
  - with emphasis in Family and Consumer Sciences Education (p. 579)
  - with emphasis in Family and Lifespan Development (p. 579)
- Minor in Human Development and Family Studies (p. 580)

The Department of Human Development and Family Science (HDFS) combines basic understanding of human development with preparation for professional service to individuals and families. Career opportunities are primarily found in human service agencies serving children, adolescents, older adults, parents and families. The human development and family studies major also prepares the student for graduate study in HDFS and related fields.

The department offers the BS HES with a major in Human Development and Family Science. The student working with children and/or adults is encouraged to maximize the resources offered by the family. The student concerned with the quality of family life must also recognize the intricate spiral of changing needs in the developing individual. Students in the HDFS major must select one of the emphasis areas listed above. (Note: Emphasis areas appear on transcripts but not on diplomas.)

Graduate

- MA in Human Development and Family Studies (p. 581)
  - with emphasis in Early Childhood Development (p. 582)
  - with emphasis in Family and Community Services (Great Plains IDEA) (p. 582)

Master’s Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master’s degree is as follows:

- Family Studies: 36 hours
- Child Life: 30 (fast track) or 36 hours
- Early Childhood: 36 hours
- Life Span: 36 hours
- Human Services Administration: 36 hours
- Gerontology: 36 hours
- Youth Development: 36 hours
- Family and Community Services: 36 hours
- Dual MSorMA/JD: approximately 113 hours

About the PhD

The Department of Human Development and Family Science PhD degree prepares students for careers in research, college or university teaching, or leadership positions in public and private human service institutions.

PhD Plan of Study

Students selecting the doctoral degree work with members of their doctoral committee to create an individualized plan of study tailored to their specific research interests. Over the course of their degree program, all doctoral students will complete coursework in theory, research methods, HDFS content, statistics, and a collateral area. (The collateral area consists of 9-15 credit hours taken in other academic units to complement and enhance their studies in HDFS). In addition, all doctoral students are required to enroll in six credit hours of research practicum, three credit hours of teaching practicum, and a minimum of 12 credit hours of research for their dissertation. A sample plan of study can be found on the HDFS website (http://hdfs.missouri.edu/).

About the Online Certificate Programs

The Department of Human Development and Family Science offers four online graduate certificates with specialization in youth development, gerontology, and geriatric care management.

Note: Courses taken for any of the above certificate programs may be applied toward the related online MA degrees in youth development and gerontology. Up to 12 credits of coursework from the courses taken for any of the certificate programs may be applied toward their related online MA degrees described above.

For more information please follow the link to the certificate of interest (p. 620).

Undergraduate

Areas of Study

On-campus students selecting the MA or MS degree may specialize in family studies, child life, early childhood development, life span development, family mediation, human services program (emphasis in administration or policy), or a dual-degree program in HDFS and the School of Law. Online students may select an MA specializing in gerontology, youth development, or family and community services.

Child Development Laboratory Courses such as H_D_FS 3500, H_D_FS 3700, and H_D_FS 4971 have prerequisites and require the consent of the instructor. Students must have full HDFS status. Because enrollment is limited, students must see the HDFS advisor to be placed on the waiting list a minimum of two semesters before anticipated enrollment. Students in Family and Lifespan Development may substitute another practicum experience with consent of department advisor.

In addition to the required courses, the degree program is completed with courses selected from within the department, from other areas in the College of Human Environmental Sciences, and from the social sciences and allied professional fields such as education, recreation, business and health. For some students, courses in the arts, humanities, or biological sciences may be appropriate.

Background Checks, Health Screenings and Other Required Elements:

It is essential that HDFS majors develop professional relationships with vulnerable populations, thus during the course of the degree program and prior to beginning any practical or clinical education experience, students are required to:

- pass multiple criminal background checks
- pass mandatory drug screens
- pass other qualification checks required by the practical or clinical education sites
- provide proof of health insurance coverage
- provide proof of required immunizations
- provide proof of student professional liability insurance coverage

The student is responsible for all costs incurred with these requirements. Failure to provide appropriate documentation, or pass required checks prior to the beginning of practical or clinical experiences may result in dismissal from the degree program in HDFS.

BSHES in Human Development and Family Studies with Emphasis in Child Development and Education

Major Program Requirements

This emphasis is designed to prepare graduates for positions of responsibility and leadership in public and private preschool programs, child-care centers, infant-care programs, after-school programs and other educational and social service settings that serve families and children. Additional job opportunities include group homes, shelters, child care and provider training agencies, Parents as Teachers, and YMCA/YWCA.

The general goal of the emphasis area is to provide instruction and experience to help students gain competence in working with young children and their families. The emphasis is on understanding human development, with primary focus on child development, early childhood education, and children’s relationships with family members. Attention is also devoted to the development of working relationships with professional colleagues and community workers.

Students must complete all university requirements (p. 19), including general education (p. 20), in addition to the degree requirements below.

Total Credits: 123-127

**BSHES in Human Development and Family Studies with Emphasis in Child Life Specialist**

**Major Program Requirements**

This emphasis prepares graduates to provide for the social-emotional needs, and support the optimum growth and development of children and their families in a variety of health care settings. Child life specialists use therapeutic play, psychological preparation, and coping skills interventions to help reduce the anxiety and stress related to illness, disability, hospitalization and medical procedures. Through a family-centered care approach, they provide parents and other family members reassurance and emotional support, help them understand children's psychosocial needs, and provide tools to help them minimize psychological trauma.

Courses focus on understanding normal and exceptional child and family development, effective methods of working with children and families, as well as integration of theory and research into hands-on clinical practice experiences (evidence-based practice). Students who successfully complete the degree program should be well prepared to take the Child Life Professional Certification Exam presented by the Child Life Council Certifying Committee. The student’s last semester is spent outside Columbia in a 480-600 clock-hour (minimum) clinical internship in a pediatric hospital setting.

This academic emphasis requires that students successfully complete child life volunteer, practicum, and clinical internship experiences to attain this degree, as well as be eligible to take the national Child Life Certification Exam to obtain the CCLS credential. Clinical education sites require that students provide proof of health insurance, up-to-date immunizations, and student professional liability insurance. Students must also pass mandatory drug screens, criminal background checks, and any other required qualification checks prior to beginning any clinical education experience in child life.

Failure to provide appropriate documentation, or pass drug screens and criminal background checks prior to the beginning of these experiences may result in dismissal from the child life degree program in HDFS. The student is responsible for all costs incurred with these qualification checks.

Students must complete all university requirements (p. 19), including general education (p. 20), in addition to the degree requirements below. All courses in sections A-B below are required.

* Student must earn 2.00 (C) or better in course.

** Students are admitted to H_D_FS 4130 on a competitive, space-available basis. Interview applications are considered the semester before the student wishes to take H_D_FS 4130. Student must have attained a 3.2 CUM GPA to be eligible to interview, in addition to completing coursework requirements. See advisor for more information.

*** Students are admitted to H_D_FS 4993 after successful completion of H_D_FS 4130 (grade of 3.2 or higher). Students must be selected by hospitals outside of Columbia through a student-initiated competitive application process.

**** Should be completed prior to end of sophomore year.

BSHES in Human Dev. & Family Studies with Emphasis in Early Childhood Education in a Mobile Society

This online bachelor’s of science degree prepares students to work in the field of early childhood education. Upon completion of the program, you will be qualified to work in various early education and care settings serving children from birth through eight years in a wide variety of community and military settings, including early education centers and preschools, family and home care settings, Head Start and Early Head Start programs, and before/after school programs, to name a few.

This program emphasizes the following areas

- Child development, growth, and learning
- Early education curricula and frameworks
- Learning activities, technology use, and other experiences for young children
- Family and community influences on children
- Challenges facing families in today’s world
- Assessment of children and environments
- Professional and ethical standards
- Hands-on experiences and clinical practice

This new online BS HES degree program is offered by Human Development and Family Science faculty in conjunction with other university partners as part of the Great Plains IDEA. Interested applicants will apply for admission to this program through the undergraduate admissions office at the University of Missouri and to the Department of Human Development and Family Science. Courses will be taught by University of Missouri faculty and by scholars from other Great Plains IDEA institutions, including Iowa State University, Michigan State University, Oklahoma State University, South Dakota State University,
Texas Tech University, and University of Nebraska-Lincoln. Your degree will be awarded by the University of Missouri.

**Total Credits: 120**

**Applying**

To be admitted, you must already have completed at least 30 credits general education requirements earning at least a 2.5 grade point average (GPA). These hours must include a Human Lifespan Development course or equivalent.

For information about applying to this program, visit Mizzou Online (http://online.missouri.edu/degreeprograms/human-development/early-care-education/howtoapply.aspx).

**Contact Information**

Please contact the Human Environmental Sciences Student Services office at HESstudentservices@missouri.edu or Ehren Oncken, the undergraduate enrollment counselor at Mizzou Online, at (800) 609-3727, with questions about this program.

**BSHES in Human Development and Family Studies with Emphasis in Family and Consumer Sciences Education**

**Major Program Requirements**

This emphasis prepares graduates for certification to teach family and consumer sciences from birth to grade 12 in public schools. The program combines courses in the human sciences with courses in teacher preparation from the College of Education. This academic emphasis requires that students successfully complete field experiences and a student teaching internship. Public schools require that students provide proof of up-to-date immunizations and professional liability insurance. Criminal background checks and other qualifications may be required depending on the school.

Due to changes from the Missouri Department of Elementary and Secondary Education (DESE) that affect certification beginning in 2017, new students are not being accepted into this program at this time.

**Semester Plan**

There is not a semester plan built for this emphasis area.

**BSHES in Human Development and Family Studies with Emphasis in Family and Lifespan Development**

*Some exceptions are made

- Minimum GPA: 3.0 for last 60 hours
- Required Application Materials for Campus Programs (submitted online via the apply yourself system)
- Application form
- 3 letters of recommendation from people who can speak to applicant’s potential to do graduate work (e.g., professors, advisors).
- Personal statement
- Résumé or Curriculum Vitae
- Official Transcripts

Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master’s degree is as follows:

- Family Studies: 36 hours
- Child Life: 30 (fast track) or 36 hours
- Early Childhood: 36 hours
- Life Span: 36 hours
- Family Mediation: 36 hours
- Human Services: 36 hours
- Gerontology: 36 hours
- Youth Development: 36 hours
- Family and Community Services: 36 hours
- Dual MSorMA/JD: approximately 113 hours Research

Master’s of Arts students may complete a comprehensive exam, an internship H_D_FS 8972 for up to six credit hours, or, for on-campus students only, a project (H_D_FS 8090), for up to six credit hours. The project option is no less scholarly than a thesis, but usually has an applied focus. For instance, a project may involve designing a program and developing curriculum materials (e.g., instructional videotapes, websites, resource manuals). Internships are often conducted off-campus and must be negotiated with the student’s advisor and approved by the student’s faculty committee. Students completing the comprehensive exam option must take additional elective course credit. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student’s program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department’s description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).
Time Limits for Masters’ Degree Completion

Students working toward the master's degree have 5 years from the semester the first course is taken in which to complete all degree requirements. Extensions for one additional year to complete the degree may be granted with submission of a detailed plan for completion, including a timetable. Students must be making progress toward completion when they apply for the extension. A maximum of two extensions may be granted.

Background Checks, Health Screenings and Other Required Elements:

It is essential that HDFS majors develop professional relationships with vulnerable populations, thus during the course of the degree program and prior to beginning any practical or clinical education experience, students are required to:

- pass multiple criminal background checks
- pass mandatory drug screens
- pass other qualification checks required by the practical or clinical education sites
- provide proof of health insurance coverage
- provide proof of required immunizations
- provide proof of student professional liability insurance coverage

The student is responsible for all costs incurred with these requirements. Failure to provide appropriate documentation, or pass required checks prior to the beginning of practical or clinical experiences may result in dismissal from the degree program in HDFS.

MA in Human Development and Family Studies with Emphasis in Early Childhood Development

The Early Childhood Development program is planned for students who wish to focus their professional preparation on children as they develop, influence, and are influenced by a variety of environments.

1. Statistics and research methods (6 hours)
   - H_D_FS 8200 Research Methods in Human Development and Family Studies

2. Core content (24 hours)
   a. Family functioning and human development (12 hours)
      - H_D_FS 8640 Family Interaction
      - H_D_FS 8012 Family Dynamics and Intervention
      - H_D_FS 8210 Theories of Human Development
      - H_D_FS 8420 Cognitive Development
      - H_D_FS 8440 Social and Emotional Development
   b. Electives* (12 hours)
      - H_D_FS 7257 Aging and the Family
      - H_D_FS 7300 Black Families
      - H_D_FS 7610 Stress and Resilience in Families
      - H_D_FS 7630 The Process of Divorce

      - H_D_FS 7720 Child and Family Advocacy
      - H_D_FS 8220 Family Theories

MA in Human Development and Family Studies with Emphasis in Family and Community Services (Great Plains IDEA)

The mission of the new Human Development and Family Studies Master’s degree emphasis in Family and Community Services (Great Plains IDEA) may be summed up in three words – Understand, Deliver, Manage. The goal of the new Family and Community Services (Great Plains IDEA) online MA option in Human Development and Family Studies is to create alumni capable of understanding family, interpersonal, and community dynamics in order to help individuals and their families through education, resource management, and effective service delivery. In addition, graduates of this degree option will acquire knowledge and skills in program and agency management.

The Family and Community Services (Great Plains IDEA) MA emphasis consists of 36 credit hours, including the 10 core courses shown below. For the remaining 6 credits students may choose from: (a) 6 credits of electives and a capstone examination, (b) 3 credits of electives and internship for 3 credits, or (c) 6 credits of an internship. Elective courses will be offered annually. Exams and internships will include an
For admission requirements, refer to the Graduate School’s website for the minimum qualifications for the degree program (http://gradschool.missouri.edu/academics/programs) and the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

**MA in Human Development and Family Studies with Emphasis in Family Studies**

1. Statistics and research methods (6 hours)
   - H_D_FS 8200 Research Methods in Human Development and Family Studies

*Or any advisor approved graduate level course

### 5. Independent effort (3-6 hours)

- H_D_FS 8970 Research in Human Development and Family Studies
- H_D_FS 8972 Internship in Human Development and Family Studies

For admission requirements, refer to the Graduate School’s website for the minimum qualifications for the degree program (http://gradschool.missouri.edu/academics/programs) and the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

MA in Human Development and Family Studies with Emphasis in Youth Development

An estimated 17,000 organizations (e.g., 4-H, Boys and Girls Clubs, Boys Scouts and Girls Scouts) currently serve more than 30 million young people, and national trends are moving away from focusing on problems and behavior correction, instead favoring a positive approach that focuses on developing the strengths of youth. The 36 credit master’s degree program (MA) consists of 9 required core courses (25 credits), 5-11 credits of electives, and either a comprehensive exam or an internship experience totaling 2-6 credits. Core courses offered within the program include eight 3-credit courses and a 1-credit professional-development seminar.

**Required:**

- H_D_FS 7231 Foundations of Youth Development (1)
- H_D_FS 8234 Adolescents and their Families (3)
- H_D_FS 8235 Administration and Program Management (3)
- H_D_FS 8236 Federal and State Policies that Impact Youth Development (3)
- H_D_FS 8237 Youth Cultures and the Cultures of Youth (3)
- H_D_FS 8239 Community Youth Development (3)
- H_D_FS 8240 Youth Development (3)
- H_D_FS 8232 Youth Professionals as Consumers of Research (3)
- H_D_FS 8238 Program Design, Implementation and Evaluation (3)

Comprehensive Exam 
OR 
H_D_FS 8972 Internship in Human Development and Family Studies (2-6)

**Suggested Electives**: 

- H_D_FS 7001 Topics in Human Development and Family Studies: Substance Use (3)
- H_D_FS 7001 Topics in Human Development and Family Studies: Global Perspectives (3)

*Or Any Adviser-Approved Course

**NOTE:** Up to 6 credits can be transferred from other graduate programs if the courses are deemed relevant by your advisor.

For admission requirements, refer to the Graduate School’s website for the minimum qualifications for the degree program (http://gradschool.missouri.edu/academics/programs) and the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master’s degree is as follows:

- Family Studies: 36 hours
- Child Life: 30 (fast track) or 36 hours
- Early Childhood: 36 hours
- Life Span: 36 hours
- Family Mediation: 36 hours
- Human Services: 36 hours
- Gerontology: 36 hours
- Youth Development: 36 hours
- Family and Community Services: 36 hours
- Dual MSorMA/JD: approximately 113 hours Research

Master’s of Science students must complete a thesis (H_D_FS 9090). Students who wish to pursue the thesis must petition the department’s graduate faculty for approval. The thesis requires testing a hypothesis or exploring a research question. Student will submit and orally defend the thesis to their committee. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Research

Based on their chosen degree option and whether they are pursuing the MS or MA degree, master’s students may write a thesis (H_D_FS 9090), complete a project (H_D_FS 8090), or do an internship (H_D_FS 8972) for up to six credit hours. The thesis requires testing a hypothesis or exploring a research question. The project option is no less scholarly than a thesis, but usually has an applied focus. For instance, a project may involve designing a program and developing curriculum materials (e.g., instructional videotapes, websites, resource manuals). Internships are often conducted off-campus and must be negotiated with the student’s advisor and approved by the student’s faculty committee. Students who wish to pursue the thesis option must petition the department’s graduate faculty for approval. Students completing a thesis earn a Master of Science degree. Those completing a project or internship earn the Master of Arts. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student’s program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department’s description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Time Limits for Masters’ Degree Completion

Students working toward the master’s degree have 5 years from the semester the first course is taken in which to complete all degree requirements. Extensions for one additional year to complete the degree may be granted with submission of a detailed plan for completion, including a timetable. Students must be making progress toward completion when they apply for the extension. A maximum of two extensions may be granted.

Human Environmental Sciences

Human Environmental Sciences Extension Specialist

A student who plans to be an extension specialist may choose a subject-matter area of interest. In addition, a master’s degree in a subject-matter area generally is required in Missouri.

The student must fulfill the requirements for the chosen major while pursuing the extension objective. Additional electives can be chosen from such areas as adult education, communications and the social sciences.

Millsap Professor G. Carlo**
Assistant Teaching Professor M. Goldschmidt*, S. L. Green-Ivey, F. Palermo*
Assistant Research Professor M. Herzog*
Curator’s Professor Emerita M. Coleman**
Professor Emeritus R. Helmick*, K. Thornburg*
Instructor R. Law, AFC
Associate State Personal Finance Specialist B. Procter, L. Schrader, A. Zumwalt

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in human environmental sciences, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

• PhD in Human Environmental Sciences (p. 588)
  • with emphasis in Architectural Studies (p. 588)
  • with emphasis in Human Development and Family Studies (p. 589)
  • with emphasis in Personal Financial Planning (p. 590)
  • with emphasis in Textile and Apparel Management (p. 591)

137 Stanley Hall
882-7224

Director of Graduate Studies: Sandy Rikoon

PhD in Human Environmental Sciences

Students are required to pick an emphasis area to obtain the PhD in Human Environmental Sciences. Please see the individual emphasis degree requirement pages (p. 588) for more information.

PhD in Human Environmental Sciences with Emphasis in Architectural Studies

The Program

The Doctor of Philosophy (PhD) degree is designed for individuals who are interested in acquiring the knowledge and skills that are needed to conduct substantive, innovative, and original research that contributes to the theoretical and methodological foundation of architecture and interior design, and the dissemination of this research through teaching, publication, and practice. To this end, the curriculum is structured so that students move gradually from overview of architectural research to the identification and pursuit of major and minor areas of specialization and, finally, to highly specialized original dissertation research. This framework promotes stimulating intellectual discourse among individuals with varying research philosophies and interests.

Both faculty and students interact within this framework to develop an enhanced understanding of how specialized research contributes to the definition and evolution of an improved theoretical and methodological basis for architectural studies.

Doctoral study in Architectural Studies, College of Human Environmental Sciences, is research-based and expands knowledge in the “major” areas of either environment and behavior or design with digital media. The major area is defined as that area of specialization in the doctoral program within which the student is expected to write his/her dissertation.

Students will choose a “supportive cognate area” which is intended to reinforce the development of an understanding of the discipline. Supporting cognate area courses are selected from a broad spectrum of disciplines providing students with the opportunity to design an individualized program of study that capitalizes on their unique interests and talents.

A Design Research concentration is offered for:
• Designers engaged in interior design, architecture, graphic or interaction design who require applied research skills from companies/organizations.
• Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry -- Healthcare IT companies, Engineering etc.
• Business and market professionals to advance understanding of design research for marketing.

The course work for the concentration is applied to the program of study.

Degree Requirements

The University of Missouri requires a minimum of 72 semester hours beyond the baccalaureate degree for the PhD. Coursework from the Design Research concentration can be applied to the program of study.
The doctoral program committee provides departmental approval of the student’s plan of study (Form D-2), a list of the courses and the credit to be earned in each of them, which will, when completed:

- Prepare the student for research or scholarly investigation in the chosen field of study.
- Satisfy the credit-hour and residency requirement of the department.
- Satisfy any special requirements (collateral field, other special research skills) imposed by the department.
- Satisfy the Graduate School’s requirement for a minimum of 15 hours of course work at the 8000/9000 level (exclusive of research, problems and independent study experiences).

The committee also recommends to the vice provost/dean, as part of the plan of study, any request for transfer of graduate credit. The student must substantially complete the course work outlined in the plan of study to the satisfaction of the doctoral program committee and the Graduate School before being declared ready for the comprehensive examination.

The research-based plan of study leads to the written doctoral dissertation. The dissertation is distinctive because it demonstrates the ability to conceive of and execute scholarly research, and it makes a contribution of new knowledge to the discipline. Research is conducted in one of the two interest areas — environment and behavioral studies (http://arch.missouri.edu/academics_ebs.html) or design with digital media (http://arch.missouri.edu/academics_ddm.html). Specific course work is chosen based on subject matter and the type of research method selected— quantitative, qualitative or a combination of both.

PhD students must complete a final oral examination by an approved faculty committee and submit a presentation proposal at a professional conference or a manuscript in a professional journal.

In order to pass examination, and thus qualify as the basis for the award of the PhD degree, the dissertation should have the following attributes:

- It demonstrates authority in the candidate’s field and shows evidence of command of knowledge in relevant fields;
- It shows that the candidate has a thorough grasp of the appropriate methodological techniques and an awareness of limitations;
- It makes a distinct contribution to knowledge because of the originality of the approach and/or interpretation of the findings and, in some cases, the discovery of new facts;
- It demonstrates an ability to communicate research findings effectively in the professional arena and in an international context;
- It is a careful, rigorous and sustained piece of work demonstrating that a research “apprenticeship” is complete and the holder should be admitted to the community of scholars in the discipline.

### PhD in Human Environmental Sciences with Emphasis in Human Development and Family Studies

**Admission Criteria**

Fall deadline: December 15
Spring deadline: November 1
Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (IBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>61 Effective July 1, 2015 must have score of 80</td>
<td>500 Effective July 1, 2015 must have score of 550</td>
</tr>
</tbody>
</table>

Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal + Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>
<td>50th percentile</td>
<td>50th percentile</td>
</tr>
<tr>
<td>On or After August 1, 2011</td>
<td>50th percentile</td>
<td>50th percentile</td>
</tr>
</tbody>
</table>

- Some exceptions are made.
- Minimum GPA: 3.0 for last 60 hours

### Required Application Materials

Submit via the apply yourself system

- Application form
- 3 letters of recommendation from people who can speak to applicant’s potential to do graduate work (e.g., professors, advisors).
- GRE score (and TOEFL score for international applicants)
Plan of Study

Students selecting the doctoral degree work with members of their doctoral committee to create an individualized plan of study tailored to their specific research interests. Over the course of their degree program all doctoral students are required to enroll in six credit hours of research practicum, three credit hours of teaching practicum, and complete coursework in theory, research methods, statistics, and their collateral area. In addition, all doctoral students complete a minimum of 12 credit hours of research for their dissertation. A sample plan of study can be found on the HDFS website (http://hdfs.missouri.edu/).

Qualifying Process for Doctoral Students

To be officially admitted to the HDFS doctoral program, students generally must have completed a master’s degree in HDFS or a related field, although exceptions are granted.

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student’s program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department's description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

PHD Comprehensive Matriculation Exam

The comprehensive exam consists of two parts. Part I involves an in-house written and oral examination over

1. theory, methods, and statistics,
2. the student’s area of specialization and core content, and
3. the student’s collateral area.

The advisor is responsible for collecting questions from all five committee members, constructing the exam, and getting approval for the final version of the exam from available committee members. It is expected that the written exam will take the student no longer than 8 hours (e.g., two half-days or one full day) to complete. The written exam will be assessed by the committee and the student will meet with the committee for an oral defense of the written exam. If this part of the exam is passed the student moves to Part II of the comprehensive exam, which involves writing a grant pre-proposal and, if approved, a full grant proposal as outlined in the HDFS Graduate Handbook. For a detailed description of the comprehensive exam timeline please refer to the Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Admission to Candidacy

After students pass Parts I and II of the comprehensive examination, they complete the D3 form to apply to the Division of Graduate Studies for admission to doctoral candidacy. Following admission to candidacy, students complete a prospectus for the dissertation project. The prospectus includes a pertinent review of the literature, statement of the problem, the purpose of the proposed study, description of the research design, and discussion of the specific means by which the data will be analyzed. Subsequently, the dissertation committee will meet to evaluate, request revisions to, and approve the student’s dissertation prospectus.

Time Limits on Degree Completion

A graduate degree represents current knowledge of the field as of the date the degree is granted. Limitations have therefore been set regarding the number of years to finish the degree. Doctoral students have 6 years in which to complete degree requirements. The clock starts the semester that the first class beyond the master’s degree is taken. The comprehensive exam must be completed no later than by the end of the fourth year of study. HDFS doctoral students have only three years after passing the comprehensive examination to complete the doctoral degree.

Petitions for Extension

On petition of the candidate, an extension of 1 year may be granted by the HDFS graduate faculty. The student may petition for no more than two one-year extensions. Therefore, a doctoral student may have no more than 5 years, including two one-year extensions, to complete the doctoral degree after passing the comprehensive exam. On petition of the candidate and the candidate’s department, an extension of this time limit may be granted by the Graduate School.

PhD in Human Environmental Sciences with Emphasis in Personal Financial Planning

College of Human Environmental Sciences
239 Stanley Hall
573-882-9343
http://pfp.missouri.edu/

The doctoral program is designed to develop skill in the evaluation and generation of research that advances the disciplines engaged in Personal Financial Planning, such as Personal Finance, Family Economics, Consumer Economics, Corporate Finance, Law, among others. This program prepares students for careers in university research and teaching, government, Extension, or public policy evaluation.

Application Deadlines

Fall deadline: February 1
Spring deadline: October 1

Admission Criteria

• Minimum TOEFL scores (for ESL applicants only):

<table>

<td>3.0</td>
</tr>
</tbody>
</table>

Required Application Materials

To the Graduate School:
• All required Graduate School documents
• Statement of professional objectives (upload to application)
• Departmental application (upload through the Graduate School application or send directly to department)
• Three letters of recommendation (upload preferred, or send directly to department)
• Official transcripts from every college or university you have attended
• GRE Scores
• Latest vitae or résumé
• TOEFL scores if international student
• A digital design portfolio if pursuing design research

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

University. The catalog provides a complete list of these degree options (p. 5).

Graduate

• MS in Nutrition and Exercise Physiology (p. 592)
  • with emphasis in Exercise Physiology (p. 592)
  • with emphasis in Nutritional Sciences (p. 593)

MS in Nutrition and Exercise Physiology

The MS is Nutrition and Exercise Physiology has two emphasis areas. Please see the emphasis area pages in Nutritional Sciences (p. 593) and in Exercise Physiology (p. 592) for degree information.

MS in Nutrition and Exercise Physiology with Emphasis in Exercise Physiology

About the Program

The graduate program in Nutrition and Exercise Physiology is designed to provide advanced training in both the basic and applied aspects of exercise, physical activity and physical inactivity. Currently, the research focus is to examine the mechanisms by which physical activity levels and/or exercise modulate risk and development of obesity, type 2 diabetes, and overall metabolic and cardiovascular diseases using both animal models and human subjects, and to be able to translate the findings into the clinical or applied setting. Graduate students will receive training in laboratory research, seminar preparation, scientific writing, problem solving and grant writing. Graduate studies at the University of Missouri offer the advantage of interdisciplinary exercise research that is facilitated by numerous collaborations at the many research centers at MU. In addition, the Exercise Physiology research program collaborates closely with other units on campus including the Department of Biomedical Sciences in the Vet School, and the Departments of Internal Medicine and Medical Pharmacology and Physiology in the School of Medicine among others.

Exercise physiology faculty seek to develop new knowledge in the area of exercise training, exercise metabolism, and obesity. The current focus of the program is physical inactivity, exercise and nutrition strategies for weight management and the prevention of lifestyle related diseases. The mission of the Exercise Physiology Graduate Program is to train graduate students who will provide professional leadership and research developments in areas of human health and sports conditioning.

The curriculum has a scientific basis with core courses in exercise physiology, nutrition, biochemistry, and physiology. Exercise physiology research emphasizes human studies, but other exercise models are available on campus, including the pig (Vet. Biomedical Sci.) and the rat (Medical School and VA).

Degree Requirements

Students in Nutrition and Exercise Physiology emphasis will choose between two options for final completion: thesis or internship. The

Undergraduate

While MU does not offer undergraduate degrees specifically in exercise physiology, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the

\[ \text{University of Missouri} \]
course curriculum will be the same for both options. Students will complete a minimum of 36 credits of graduate coursework beyond the bachelor’s degree. For a full explanation of the thesis/non-thesis options, see section below on Thesis/Non-Thesis Requirements (p. 593) or view the information on the programs website: http://ns.missouri.edu/exphyma.html.

Prerequisites courses for the program are a B or better in General Chemistry, Physiology, Human Anatomy, Kinesiology and Physiology of Exercise. Biochemistry, Organic Chemistry and Nutrition are recommended.

Select to give 36 hours total

### Thesis/Non-Thesis Requirements

1. **Internship Option**

This option is oriented toward improving a practitioner’s professional proficiency in the applied aspects of exercise physiology. The program of study will include courses and learning experiences that will develop the student’s knowledge in the theoretical aspects of exercise physiology. They will be required to complete an approved internship (300 hours minimum) which will provide them with experience in an applied or clinical setting. The student is responsible for identifying and securing the internship. Students selecting this option will graduate with the some preparation for credentialing from organizations including the American College of Sports Medicine (ASCM) and the National Strength and Conditioning Association (NSCA). Completion of this degree as well as obtaining certification will prepare students for careers such as registered clinical exercise physiologists, strength and conditioning coaching, personal trainer or wellness coach, health/fitness instructor, as well as in other health professions.

2. **Thesis Option**

This option is research-oriented, focusing on designing and conducting research in exercise physiology. The program of study will include courses and learning experiences that will maximize a student’s progress in developing lab skills and critical thinking that will enable the student to continue his/her education in a research-oriented area. The thesis option requires a minimum of 36 hours of graduate credit. A written thesis, based upon original research, that is the student’s own work and that demonstrates a capacity for research and independent thought is required. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

### Admissions

**Exercise Physiology Program Applicants** must have a 3.0 undergraduate GPA and competitive GRE scores to apply. **TOEFL scores are required** from international applicants. Entering MS students are expected to have a B or better in undergraduate training in biology, chemistry, anatomy/physiology, and exercise physiology. It is also advantageous to have nutrition, biochemistry and organic chemistry, but not required. Courses should be taken at an accredited institution.

Applications to our graduate programs should be **submitted by December 30th**. While applications received after that date will still be considered, there is no guarantee that we will have space for additional students. Admission at the beginning of spring semester is possible, but limited.

### Minimum TOEFL Scores

Complete instructions on the application process can be found on the programs website: http://ns.missouri.edu/graduate_apply.html

### MS in Nutrition and Exercise Physiology with Emphasis in Nutritional Sciences

**About the Program**

The Nutritional Sciences Graduate Program provides training in the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition: general research skills; structure and biochemical and metabolic
functions of nutrients and other dietary constituents; food, diets, and supplements; nutritional status assessment; nutrition and disease; nutrition interventions and policies; and analytical skills. Graduate students also receive training in laboratory research, seminar preparation and delivery, scientific writing, problem solving and research grant writing. Graduate study in Nutritional Sciences at the University of Missouri offers the advantage of interdisciplinary nutrition research that is facilitated via the many research centers at MU, including Food for the 21st Century (F21C), the Botanical Center, the Life Sciences Center and MU Nutritional Center for Health (MUNCH). The graduate program is administered by the Department of Nutrition and Exercise Physiology in association with the College of Human Environmental Sciences, the College of Agriculture, Food and Natural Resources, and the School of Medicine.

Degree Requirements

The program consists of a total of 30 hours of credit beyond the bachelor’s degree, of which 15 credits must be at the 8000 or 9000 level; no more than 40 percent of the 30-hour credit requirement can be satisfied by a combination of special investigations, Research, Readings and/or Problems courses. The master of science degree is awarded in part for the completion of a thesis. The thesis is based upon original research, that is student’s own work and that demonstrates a capacity for research and independent thought is required. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

The minimum department course requirements for the master of science degree are:

<table>
<thead>

</tbody>
</table>

Thesis/Non-Thesis Requirements

The M.S. program in Nutritional Sciences only offers a thesis option.

Students earning this degree must provide a written thesis, based upon original research, that is student’s own work and that demonstrates a capacity for research and independent thought. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

Undergraduate
• BSRES in Nutritional Sciences (p. 596)
  • with emphasis in Medical Dietetics (p. 596)
  • with emphasis in Nutrition and Fitness (p. 597)
  • with emphasis in Nutritional Sciences (p. 598)
• Minor in Nutritional Sciences (p. 599)

The program leading to the BS in Human Environmental Sciences with a major in Nutritional Sciences offers designated emphasis areas in medical dietetics, nutrition and fitness, and nutritional sciences. Two minors are available: a Nutrition minor and a Wellness minor. The Nutrition Minor is intended for students majoring in food science, biological sciences, biochemistry, health sciences or related fields and the Wellness Minor is intended for both non-science and science students interested in course work focused on empowering them to make informed decisions related to lifelong personal nutrition and exercise choices. The department administers graduate programs in nutrition and exercise physiology, nutritional sciences and exercise physiology.

Students who want to explore the major can take NEP 1034 Nutrition, Current Concepts and Controversies or NEP 1340 Introduction to Exercise and Fitness or NEP 1XXX Careers in Exercise Science.

The department has a set GPA requirement for students entering each program. The specific requirements can be found on our department website http://ns.missouri.edu

Medical Dietetics - This is a Professional Coordinated Program. Admission is competitive and application requirements include a minimum cumulative grade point average of 3.2 on a 4.0 scale and completion of NEP 2340 and BIOCHM 3630 (or in progress at the time of application). Admission into the Coordinated Program is limited to 15 students per year. The professional program requires three years of course work after completion of all prerequisites and university general education requirements. Only students who successfully complete prerequisites, have been admitted to the Coordinated Program and completed all undergraduate requirements for the Coordinated Program will receive this emphasis area for the bachelor’s degree. The completion of this bachelor’s degree only does not allow the student to be eligible to take the national Registration Examination for Dietitians. Furthermore, it is not a didactic program in dietetics. No verification statement is given after completion of only the bachelor’s degree. Students who receive this degree emphasis and are in good academic standing will transition seamlessly to the Coordinated Program’s fifth year master’s program.

Nutrition and Fitness - students may transfer into the program as pre-N&F, but will be unable to take the upper level courses until they advance into the program. To advance, a student must earn a minimum 2.65 CUM GPA after 30 credit hours, including completion of CHEM 1320, BIO_SC 1010/BIO_SC 1020 or BIO_SC 1500, MATH 1100 or equivalent, NEP 1340 and Physiology (MPP 3202 or MPP 3333/ MPP 3337) or Anatomy (PTH AS 2201). These classes require a C or better.

Nutritional Sciences (pre_Med) - After the first semester, students who transfer into the Nutritional Sciences Program are required to have a minimum GPA of 2.65 and be enrolled in at least one required biology, chemistry, physics, or biochemistry course to be eligible.
Graduate

Information on our graduate degrees can be found under the following listings:
Nutrition Area Program (p. 707) (PhD)
Nutrition and Exercise Physiology (p. 592) (MS)
Dietetics (p. 570)
Exercise Physiology (p. 572) (PhD)
The catalog provides a complete list of degree options (p. 5) at the University of Missouri.

Undergraduate

BSHES in Nutritional Sciences

Major Program Requirements

The BSHES in Nutritional Sciences is offered with three emphasis options: Medical Dietetics, Nutrition and Fitness, and Nutritional Sciences. All degree requirements are listed at the emphasis level.

Semester Plan

Refer to the Semester Plans in the emphasis areas.

BSHES in Nutritional Sciences with Emphasis in Medical Dietetics

Major Program Requirements

The College of Human Environmental Sciences offers a bachelor's degree in BSHES in Nutritional Sciences with a emphasis in Medical Dietetics. Only students who successfully complete prerequisites, have been admitted to the Coordinated Program and complete all undergraduate requirements for the Coordinated Program will receive this emphasis area for the bachelor's degree. The completion of this bachelor's degree only does not allow the student to be eligible to take the national Registration Examination for Dietitians. Furthermore, it is not a didactic program in dietetics. No verification statement is given after completion of only the bachelor's degree. Students who receive this degree emphasis and are in good academic standing will transition seamlessly to the Coordinated Program's fifth year master's program.

The professional program requires three years of course work after completion of all prerequisites and university general education requirements. Students accepted into the Coordinated Program will receive academic course work with supervised practice in healthcare and other practice settings. Admission into the 3-5th year, coordinated piece of the program, is limited to a maximum of 15 students per year.

Application requirements to the CP are posted each year on the department's webpage at http://ns.missouri.edu/ . Applications are due in January. To be eligible to apply, the applicants must have a minimum 3.2 GPA and have completed or be able to complete the first four semesters of courses listed below. The student must be enrolled in or already have completed NEP 2340 and BIOCHM 3630 at the time the CP application is submitted. Students must achieve a final course grade of B- or better in both, or equivalent transfer course approved by faulty. Failure to meet the criteria may result in forfeiture of a space in the Coordinated Program.

The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics. For additional information, please go to http://ns.missouri.edu/ .

Students must complete all university requirements, including general education (p. 20), in addition to the degree requirements below.

BSHES in Nutritional Sciences with Emphasis in Nutrition and Fitness

Major Program Requirements

Graduates of this program are prepared for employment in fitness and community nutrition or to continue in graduate studies in a variety of areas, including exercise science. Many students move into the health professions fields from this degree or seek out additional certifications. This is a rapidly expanding area with opportunities in corporate and commercial industries, government and non-profit sectors. Typical employment responsibilities include fitness assessment, nutrition education, health and wellness, exercise supervision and program administration. Students also use this degree as a base to apply to programs in Physical Therapy, Occupational Therapy, Physicians Assistant or Graduate School.

Students desiring to declare Nutrition and Fitness as a major are required to have earned a minimum overall GPA of 2.65, including completion of the following courses or their equivalents with a minimum grade of “C”:

- BIO_SC 1010 & BIO_SC 1020 General Principles and Concepts of Biology and General Biology Laboratory
- BIO_SC 1500 Introduction to Biological Systems with Laboratory
- CHEM 1320 College Chemistry I
- MATH 1100 College Algebra
- MPP 3202 Elements of Physiology
- NEP 1340 Introduction to Exercise and Fitness
- PTH_AS 2201 Human Anatomy Lecture

Prior to achieving these requirements, students will be considered “Pre-Nutrition and Fitness” and are not eligible to take upper-level Nutrition and Fitness courses. Students must complete all university requirements (p. 19), including general education (p. 20), in addition to the degree requirements below.
Science Foundation

| BIO_SC 1010 | General Principles and Concepts of Biology | 5 |
| & BIO_SC 1020 | General Biology Laboratory | 3 |
| or BIO_SC 1500 | Introduction to Biological Systems with Laboratory | 3 |
| BIOCHM 3630 | General Biochemistry | 3 |
| CHEM 1320 | College Chemistry I | 4 |
| CHEM 2030 | Survey of Organic Chemistry | 3 |
| CHEM 2130 | Organic Laboratory I (recommended) | 2 |
| MPP 3202 | Elements of Physiology | 5 |
| PTH_AS 2201 | Human Anatomy Lecture | 3 |
| PTH_AS 2203 | Human Anatomy Laboratory (recommended) | 2 |
| STAT 1200 | Introductory Statistical Reasoning | 3 |
| or STAT 1300 | Elementary Statistics | 3 |
| or STAT 1400 | Elementary Statistics for Life Sciences | 3 |
| or ESC_PS 4170 | Introduction to Applied Statistics | 3 |

Emphasis Core Requirements

**Nutritional Sciences**

| NEP 2340 | Human Nutrition I | 3 |
| NEP 2450 | Nutrition Throughout the Life Span | 3 |
| NEP 4360 | Nutritional Assessment | 3 |
| NEP 4970 | Nutrition Capstone: Sports Nutrition | 2 |

**Exercise Physiology**

| HTH_PR 4250 | Human Kinesiology | 3 |
| NEP 1001 | Topics in Nutritional Sciences (Career Exploration in Exercise Science (assigned number pending)) | 1 |
| NEP 1340 | Introduction to Exercise and Fitness | 3 |
| NEP 3001 | Topics in Nutritional Science (Physical Activity Through the Lifespan (assigned number pending)) | 3 |
| NEP 3800 | Prevention and Care of Athletic Injury | 3 |
| NEP 4200 | Sports Performance and Conditioning | 3 |
| NEP 4850 | Physiology of Exercise | 3 |
| NEP 4860 | Exercise Prescription | 3 |

**Supporting Area**

Choose 9 hours from selected courses in curriculum and instruction, education and counseling psychology, nutrition and exercise physiology, human development and family studies or sociology. 

**Electives to equal 120 credit minimum**

Organic chem lab, anatomy lab and internships are available and highly recommended.

**BSHES in Nutritional Sciences with Emphasis in Nutritional Sciences**

**Major Program Requirements**

This program of study provides a strong foundation in science with a focus on human nutrition. Graduates are prepared for advanced study in human nutrition, medicine, dentistry or other health-related careers. This program is an excellent choice for pre-dental or pre-medicine students.

To transfer into the nutritional sciences program after their first semester on campus, students are required to have a minimum overall GPA of 2.65 and be enrolled in at least one required biology, chemistry, physics, or biochemistry course or one required NEP course.

Students must complete all university requirements (p. 19), including general education (p. 20), in addition to the degree requirements below.

Total Credits: 118-122

Minor in Nutritional Sciences

The minor in nutritional sciences is intended for students majoring in
biological sciences, biochemistry, health and exercise sciences or related
fields.

Minor core requirements consist of a minimum of 15 hours of nutrition
(not exercise/fitness) courses, including NEP 2340: Human Nutrition I
(this class is only offered in the spring semester) plus 12 hours from the
list of approved nutrition courses.

Minor core requirements
NEP 2340 Human Nutrition I 3
Select 12 credits from the following approved nutrition courses: 12
NEP 1310 Food and Cultures of the World (spring/summer)
NEP 2222 Landscape of Obesity (spring)
NEP 2380 Diet Therapy for Health Professionals (fall, spring, summer)
NEP 2450 Nutrition Throughout the Life Span (spring)
NEP 2460 Eating Disorders (fall)
NEP 3131 International Nutrition and Exercise Physiology (intersession)
NEP 4330 Human Nutrition II Laboratory (fall)
NEP 4340 Human Nutrition II Lecture (fall)
NEP 4360 Nutritional Assessment (fall)
NEP 4370 Nutrition Therapy I (spring)
NEP 4380 Nutrition Therapy II (fall)
NEP 4590 Community Nutrition (summer)

Admissions  
To be admitted to the Personal Financial Planning emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.5, based on at least 50 credits attempted. The Financial Counseling professional program of the department requires a 2.25 cumulative GPA, based on at least 50 credits attempted. Personal Financial Management Services requires a cumulative GPA of at least a 2.0, based on at least 50 credits attempted. All student must have a C (2.0) or better in FINPLN 2183 and FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program, regardless of emphasis area.

Faculty  
Associate Professor D. L. Sharpe**, R. O. Weagley**, R. Yao**  
Assistant Professor M. Guillemette*

Director of Graduate Studies: Rui Yao, PhD, CFP

Individuals and families today bear an ever-growing responsibility for achieving and sustaining financial and economic success across their life span. Never has there been a greater need for well-trained professionals who can help individuals and families make informed and effective financial and economic decisions. In addition, research that helps to evaluate and recommend public policies that influence the economic opportunities and futures of individuals and families is in high demand.

Graduate course work in Personal Financial Planning at the University of Missouri analyzes household and consumer economic conditions and behavior, evaluating the interrelationships between households and markets with a focus on improving social policy. Students’ programs are designed to develop professional competencies and interests. A resident doctoral and two masters programs are available. Online graduate offerings may be viewed at http://pfp.missouri.edu/graduate_distance.html.

Certification Information

Degrees registered with the Certified Financial Planner Board of Standards Inc. include: a graduate Certificate in Personal Financial Planning and an Applied Master’s Degree.
Financial planning course work could also be completed as a doctoral program that is registered with the Certified Financial Planner Board of Standards Inc.

Financial Aid

If you wish to be considered for internal assistantships, fellowships or other funding packages, check the program website or contact the director of graduates studies, Rui Yao (yaor@missouri.edu) for details.

Faculty Areas of Study

Students have opportunity to work closely with department faculty who are widely recognized professionals in various aspects of personal financial planning and consumer and family economics. Faculty research interests cover a broad spectrum of financial and economic issues, including, but not limited to college savings and affordability, retirement savings, health care financing, risk analysis, labor supply and household production choices, consumer behavior, consumer expenditure patterns, consumer credit use, insurance demand, and low-income financial literacy. More information is available at: http://pfp.missouri.edu/research.html.

A sample plan of study has not been designed for this major. Students should contact the academic department for assistance with academic planning.

BSHES in Personal Financial Planning with Emphasis in Financial Counseling

Major Program Requirements

This emphasis prepares students to be financial counselors. Financial counselors require expertise in a variety of financial counseling and planning strategies, therefore students take a mix of classes in financial counseling, financial planning, human development and family studies (HDFS) and social work. This emphasis satisfies the academic requirements for the Accredited Financial Counselor (AFC) designation and allows the graduate to sit for the AFC exam, which is offered by the Association for Financial Counseling and Planning Education (AFCPE). Graduates must complete education requirements, pass the AFC exam, obtain professional experience and agree to adhere to the AFCPE code of ethics before being able to use the AFC mark.

Students must complete all university requirements, including general education (p. 20), major core requirements and social and behavioral sciences requirements (p. 601), in addition to the degree requirements for the professional specialization below.

BSHES in Personal Financial Planning with Emphasis in Personal Financial Management Services

Major Program Requirements

This emphasis prepares students for entry into a variety of positions that require expertise in the management of individual and family financial resources, combined with a specialized focus in a supportive area of study. Positions are available in a wide array of occupations and corporations.

Students must complete all university requirements, including general education (p. 20), major core requirements and social and behavioral sciences requirements (p. 601), in addition to the degree requirements for the professional specialization below.

Professional specialization electives

These courses are selected by students from a list of approved courses to complement their degree. Suggested tracks are provided below. Each track represents nine of the eighteen required professional electives. Contact the Student Services Office of the College of Human Environmental Sciences or your departmental advisor to focus your additional credits in a specific area. (NOTE: Tracks will not appear on diploma or transcript.)

Graduate

MS in Personal Financial Planning

Degree Information

Resident Master of Science (thesis option)

The thesis-based Master of Science program requires a minimum of 30 hours. Course work focuses on critical analysis of the interaction of the household sector with the markets for labor, consumer goods and financial products. Emphasis is placed on developing analytical skills. Course work culminates in a master’s thesis.

Five-Year Bachelor of Science/Master of Science Option

The curriculum of this 150-Hour Program provides students with a comprehensive background in financial planning procedures and practice, meeting the Certified Financial Planner Board of Standards’ education requirement, allowing a student to sit for the CERTIFIED FINANCIAL PLANNER™ exam. Coursework encompasses root disciplines of economics, mathematics, and statistics and focuses on the interaction between the household and the financial sector. Students will acquire a broad background in business related courses, as well as skills in communication, professional practice, and use of computer information systems.

Applied Master of Science (non-thesis option)

The Applied Master of Science is a 36-hour program. Course work is designed to complete the education required to sit for the national CERTIFIED FINANCIAL PLANNER™ exam and to broaden the practitioner’s understanding of the various factors that can affect and enhance a client’s financial security and economic well-being. Coursework culminates in a creative component, providing students an opportunity to integrate theory and practice in exploring or resolving issues related to personal financial planning.

- This degree is also available via distance education through the Great Plains IDEA group. Note, the Great Plains IDEA (http://www.hsidea.org/programs/fsf) degree option also requires 36 hours to
complete. Please see http://pfp.missouri.edu/graduate_distance.html for more information.

Application Deadlines

Fall deadline: February 1
Spring deadline: October 1
*Exceptions will be considered on a case by case basis

Admission Criteria

- Minimum TOEFL scores (for ESL applicants only):
  - Internet-based test (iBT) 80
  - Paper-based test (PBT) 550
  - We also accept IELTS scores

MS in Personal Financial Planning

With Emphasis in Personal Financial Planning

Degree Requirements

Sample Plan of Study

Each student’s plan of study will vary to some degree, depending on the specific program and the student’s background, needs, and career plans. Please review the Resident Research and Policy Master’s Degree Program Handbook (http://pfp.missouri.edu/documents/graduate/RP_MS_handbook.pdf) or the Resident Applied Master’s Degree Program Handbook (http://pfp.missouri.edu/documents/graduate/Applied_MS_handbook.pdf).

Thesis/Non-Thesis Track

The resident Research and Policy Master of Science track prepares students for college teaching, consumer research positions, social service agencies, extension or other adult education programs, financial services institutions, consumer journalism and other positions in business, the public sector and not-for-profit institutions. Studies culminate in a research-based thesis that may either have a theoretical or applied focus.

This masters degree also prepares students for subsequent work on a doctoral degree.

Acceptance to this program requires GRE or GMAT scores that meet department standards. This program requires a minimum of 30 hours to complete.

The resident Applied Master of Science is for students who view the MS as their terminal degree and plan to work as a financial services professional following graduation. The Applied MS focuses on understanding issues and solving practical problems in the financial services industry. An industry-relevant capstone research project, rather than a thesis, is required for graduation.

Acceptance to this program requires GRE or GMAT scores that meet department standards. The Applied Master’s program is a non-thesis 36-hour program. This program is registered with the Certified Financial Planner Board of Standards, Inc. and is designed to prepare students to sit for the CFP® exam.

Download the Resident Applied Master’s Degree Program Handbook. (http://pfp.missouri.edu/documents/graduate/Applied_MS_handbook.pdf)

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Personal Financial Planning program (http://gradschool.missouri.edu/academics/programs/personal-financial-planning/masters.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

Graduate Certificate in Personal Financial Planning

The Personal Financial Planning Certificate is an 18 hour non-degree, post-baccalaureate program designed to prepare students to sit for the national CERTIFIED FINANCIAL PLANNER™ exam.

Program applicants must have completed a bachelor’s degree. Completing the Personal Financial Planning Certificate satisfies the Certified Financial Planner Board of Standard’s education requirement, which is one of four requirements leading to approval to use the CFP® designation. The other three requirements are passing the national exam, meeting an experience requirement and agreeing to adhere to the CFP® code of ethics. The CERTIFIED FINANCIAL PLANNER™ designation is widely recognized as the premier professional designation in the personal financial management services industry. (This certificate is also available via distance education through the Great Plains IDEA group. Please see http://pfp.missouri.edu/graduate_distance.html for more information.)

### Elective Courses

Since the Personal Financial Planning Certificate is a registered program under the oversight of a professional organization granting a professional designation, all courses are required. Electives may be taken as part of the Applied Master of Science (non-thesis options), the Master of Science (thesis option) and the doctoral programs.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BSW in Social Work (p. 607)
- Minor in Social Work-Gerontology (p. 609)

The Bachelor of Social Work (BSW) Program is a professional program that prepares you for immediate entry into direct human service professional positions, graduate-level education, and life-long learning. BSW-level social workers assist individuals, families, small groups, organizations, and communities to effectively resolve problems, deal with their relationships, and function optimally within their environment. The program provides an educational experience that prepares graduates for a diverse range of career choices and pathways.

The Bachelor of Social Work (BSW) professional program is built upon a rigorous liberal arts foundation that prepares students for general practice in social work. Within this framework, students are prepared to apply a configuration of knowledge, values and skill to a variety of individual, family and community problems to effect positive change.

The School of Social Work is accredited by, and a charter member of, the Council on Social Work Education. BSW students and graduates are eligible for membership in the National Association of Social Workers.

Departmental Honors

Candidates for departmental Honors must be students in the BSW professional program with a 3.5 or higher GPA. The student must complete honors designated sections of SOC_WK 4951 Research for Social Work Practice, SOC_WK 4952 Research Methods for Social Work, and SOC_WK 4971 Undergraduate Field Practicum - Honors section.

- To be considered the applicant must have Senior level status.
- The student must submit his/her application.
- The student must submit a personal statement from outlined questions presented by the BSW Faculty.
- Students are rated by Faculty and accepted or denied based upon the presented information.
- The BSW Field Instructor, Faculty and Student identify early the Field Placement site, Learning Agreement that he/she will complete while in their field placement. The Learning Agreement will identify strategic research information that the student will compile for the agency to utilize in the future.
- The student will complete these outlined research criteria within the 400 clock hours learning plan for his/her field placement.

Career Opportunities

Jobs in social work are expected to grow faster than average into the 21st century. Through social work’s unique person-in-environment focus, BSW graduates are prepared to work effectively with individuals, families, small groups, communities and organizations.

Graduates are employed in many different settings, including nursing homes, hospices, hospitals, home care agencies, family service agencies, children and youth services, aging services, residential treatment programs, domestic violence shelters, criminal justice agencies, schools, and legal services agencies.

Graduation Requirements

A minimum of 120 credits with a GPA of 2.5 is required for graduation. The requirements include liberal arts foundation courses, professional
BSW core courses and general electives. Students are allowed only two grades of a C+ in the professional program.

The Professional BSW core consists of 46 credits. BSW core courses are offered only once each year in sequence and require three semesters to complete. In the third semester of the BSW core, each student will participate in a social service agency for a 400 hour supervised field instruction.

Admission to the School of Social Work

Students in good academic standing with fewer than 55 hours may declare a social work major. Students are required to complete a range of courses in liberal arts as foundation to the BSW professional program and as electives.

Admission to the BSW professional program is competitive. In the spring, students may apply for fall admission to the BSW professional social work program if they meet the following criteria:

1. At least 42 credits completed (second semester sophomore status) by the application deadline and
2. 55 credits expected before the beginning of the first semester (fall) of the BSW foundation curriculum
3. Minimum 2.5 cumulative GPA required
4. Completion of required liberal arts prerequisite courses (denoted with *) with minimum grades in "C" range or higher.
   - Anthropology* (student's choice) (Recommend ANTHRO 1300, ANTHRO 1350, ANTHRO 2030)
   - BIO_SC 1010*
   - College Algebra*
   - COMMUN 1200*
   - Economics (macro or micro)*
   - ENGLSH 1000*
   - History* (HIST 1100, HIST 1200, HIST 1400, HIST 2440, HIST 2210) and Political Science* (POL_SC 1100, POL_SC 2100)

About the School of Social Work

For over ninety years, social work education has been offered to students at Missouri’s premier public institution. The school is proud of its grass roots history: an early pioneer of social work education in 1906, a founding member of the original accrediting body for social work education in 1919, an institution advancing research and scholarship throughout the 20th century, and, finally, to its role as an innovator in doctoral education, with a nationally distinctive PhD program emphasizing state social policy.

The mission of the MU School of Social Work is to promote leadership for social and economic justice by preparing students for professional excellence and leadership in practice, research, and policy. Within the context of a land grant institution, the mission of the School of Social Work reflects the University of Missouri’s tightly interlocked missions of teaching, research, outreach, and economic development.

Careers

The nation faces a critical shortage of qualified personnel who possess the rigorous research skills needed to develop, plan, and evaluate social work interventions and the structure of social services. The Master of Social Work (MSW) Program prepares graduates in professional social work practice within the areas of Advanced Clinical Social Work Practice or Policy, Planning and Administration in Human Services. Doctoral programs in social work are the major resource for social work researchers and scholars. The rapid growth and development in new social work undergraduate and graduate programs throughout the country has also increased the demand for doctoral social work faculty. In recent years, there have been 400-500 doctoral faculty vacancies advertised annually in schools of social work, while the number of graduates has remained at 250-300 per year, with one hundred of those graduates seeking non-academic positions.

Undergraduate

BSW in Social Work

Major Program Requirements

Required Entry-Level Courses: Specific liberal arts requirements for graduation are listed below (* denotes a prerequisite course to the BSW professional program that must be completed before beginning social work core courses).

Students must complete all university requirements (p. 19), including general education (p. 20), in addition to the degree requirements below.

Degree Core Requirements

Writing intensive classes
**Writing intensive classes**

- **Humanities (grades must be in the “C” range or higher)**
  - COMMUN 1200 Public Speaking 3
  - PHIL 1000 General Introduction to Philosophy 3
  - PHIL 1100 Introduction to Ethics 3
  - PHIL 1200 Logic and Reasoning 3

**Science and Math Reasoning Proficiency (grades must be in the “C” range or higher)**

- BIO_SC 1010 General Principles and Concepts of Biology 3
- or BIO_SC 1500 Introduction to Biological Systems with Laboratory 3

**College Algebra (grades must be in the “C” range or higher)**

- MATH 1100 College Algebra 3

**Social science (grades must be in the “C” range or higher)**

- Economics (micro or macroeconomics) * 3
- Anthropology (student’s choice) (Recommend 1300, 1350, 2030) * 3
- History * 3
- Political Science * 3

*One course from either history or political science must meet the state government requirement; may be satisfied by

- POL_SC 1100 American Government 3
- or POL_SC 2100 State Government 3
- HIST 1100 Survey of American History to 1865 3
- HIST 1200 Survey of American History Since 1865 3
- HIST 1400 American History 3
- HIST 2210 Twentieth Century America 3
- HIST 2440 History of Missouri 3
- HIST 4000 Age of Jefferson 3
- HIST 4220 U.S. Society Between the Wars 1918-1945 3
- HIST 4230 Our Times; United States Since 1945 3

**Behavioral science (grades must be in the “C” range or higher)**

- SOCIO 1000 Introduction to Sociology * 3
- or RU_SOC 1000 Rural Sociology 3
- PSYCH 1000 General Psychology * 3
- SOCIO 3310 Social Psychology 3
- or PSYCH 2310 Social Psychology 3
- SOC_WK 2220 Human Behavior and the Environment (WI) 3
- SOC_WK 3320 Understanding Personality in a Social Context 3

**Cultural, ethnic and racial diversity (6 hours)**

- Recommend SW 2000 (Social Justice); See others on Blackboard List

**Electives to reach 120 credits**

---

1. Students accepted into the professional BSW program must take SOC_WK 2220, SW 4770, SOC_WK 4951, and SW 4952 which are all designated “WI.” No additional “WI” courses are required.

2. Humanities include art and music history and appreciation classes, classical studies courses, foreign civilization courses, literature courses in English or other languages and religious studies courses. Applied art and music performance courses do not count toward the humanities requirement. Students are urged to check with their advisor before selecting courses.

3. One course in humanities or biological, physical or mathematical sciences must be at the 2000 level or higher.

4. Two courses that reflect the cultural diversity of our society; often selected from social work, sociology, anthropology, peace studies, English, foreign civilizations, religious studies and human development and family studies, black studies and women and gender studies. SOC_WK 2000 Exploration in Social and Economic Justice, is strongly preferred as one of the courses. Students are urged to check with their advisor before selecting courses.

5. In addition to the above liberal arts requirements and the 46-credit Professional BSW Core (inclusive of SOC_WK 2220), students select electives to reach the total credit requirement. SOC_WK 1115 Social Welfare and Social Work is strongly recommended.

---

### Capstone Requirements

All students accepted into the professional BSW program must take

- SOC_WK 4971 Undergraduate Field Practicum and SOC_WK 4970 Senior Professional Seminar as their capstone experience.

### Basic Skills Credit Limitations

No more than 4 credits may be taken from “skills” courses to count toward the required 120 credits. More skill classes may be taken, but will be in excess of the 120 credits. Examples of skills courses are applied art and music performance classes, computer skills, self-defense and first aid.

### Semester Plan

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.
The Undergraduate Gerontology Minor is designed to provide students with an entry level of knowledge in the field of gerontology. The minor will give participants expanded knowledge in providing services to older adults and their families. The focus of the Gerontology Minor is to build a skill set in understanding the basic foundations of scientific information centered around the process of aging.

The minor is also designed to prepare you with strengths and weaknesses of the aging population, provides an introduction related to paradigms shifts in social, economic and political views, outlines aging as diversity within the population subset to understand impact of power, gives awareness of the effect of death, grief, and loss, explores life skills factors of development, as well as becoming knowledgeable regarding policy, systems, and ethical decision factors of the aging population.

In obtaining the Gerontology Minor you will incur skills that build awareness to aging demographics trends in relationship to retirement, employment, health care, abuse and neglect, accessibility, and shaping life experiences to age successfully.

The minor coursework will allow you to gain further confidence to assist older adults in meeting their needs, where they are in their environment.

### Admission Requirements:

A student must be admitted into the University of Missouri systems seeking to obtain a Bachelor’s Degree from a declared academic major. To obtain the Gerontology Minor he/she must complete the minimum 15 credit hours as outlined above from the two designated areas.

A minimum grade of "C-" in "required" or "optional" coursework is needed to qualify for the minor. Students seeking approval regarding the Minor may file them in 723 Clark Hall. To obtain additional assistance in outlining the Minor in ways that it will correlate with career major he/she may contact the Director of Undergraduate Studies and the Student Service Coordinator.

### Graduate

#### MSW in Social Work

**Admission Contact Information**

Crystal Null (nullc@missouri.edu)
725 Clark Hall; Columbia, MO 65211
573-884-9385
http://ssw.missouri.edu/msw.html

The University of Missouri’s Master of Social Work (MSW) Program prepares competent, effective and ethical social work professional leaders for social change. The MSW Program emphasizes a commitment to enhancing human well-being by alleviating social problems, embracing diversity and promoting social and economic justice with systems of all sizes through advanced clinical social work practice and policy planning and administration in human services. The MSW program prepares students to promote social and economic justice that responds to the broad economic, social, and cultural needs of the public and private. The MSW Program is fully accredited by the Council on Social Work Education, of which the School of Social Work is a charter member.

#### Financial Aid from the Program

Scholarship opportunities are available for full-time and part-time program applicants who meet the early application deadline. A separate Scholarship Application is available on the department website. Submission of the Scholarship Application is due by early application deadline.
Application Deadlines
Fall deadline: January 15
Spring deadline: September 15
Summer deadline: January 15

Admission Criteria
- Minimum GPA: 3.0
- Bachelor’s degree from an accredited college or university with the applicant’s undergraduate transcript reflecting a sound liberal arts foundation, including courses in the humanities, as well as in the social and behavioral sciences.
- All International students must submit Internet-based (iBT) TOEFL scores or IELTS scores. No waivers will be given.

Minimum iBT TOEFL scores:

<table>

<td>8.0</td>
</tr>
</tbody>
</table>

Prerequisites
All MSW applicants must complete an approved college level statistics course with a grade of C- or higher before they will be accepted to enroll in the MSW program. SOC_WK 4310 is the recommended course for University of Missouri students. The following University of Missouri courses are also approved and may be taken in lieu of SOC_WK 4310: STAT 1200, STAT 1400, STAT 2500, and ESC_PS 4170. Statistics courses completed at other academic institutions may substitute for University of Missouri statistic courses, pending submission of official transcript and approval by the MSW Program Director. Completion of the statistics course prior to application submission is preferred and strongly recommended. If an applicant is enrolled in a statistics course at the time of application and accepted into the MSW Program, the acceptance will be “pending successful completion of the approved statistics class”.

Note: Priority admission deadline for Regular Standing Applicants: January 15. A student qualifies for Regular Standing Admission if s/he has an undergraduate degree in any field other than Social Work. Any applicant who applies after the priority deadline will be considered on the rolling admission cycle until April 15.

Note: Priority admission deadline for Advanced Standing applicants: January 15 (for summer admission), September 15 (for spring admission). An applicant qualifies for Advanced Standing admission if they have a bachelor’s degree in Social Work earned within the last seven (7) years. Any Advanced Standing applicant who applies after the priority deadline of January 15 for summer admission will be considered on a rolling admission cycle until April 15. Any Advanced Standing applicant that applies after the priority deadline of September 15 for spring admission will be considered on a rolling admission cycle until November 15.

Read more about Regular vs. Advanced Standing below.

Required Application Materials
To the Graduate School:
- All required Graduate School documents

To the MSW Program:
- Personal statement (see department instruction)
- Résumé/CV
- Three letters of reference from persons who can address the applicant’s intellectual ability and interpersonal skills, potential for graduate education, and potential for professional social work practice through observation in an educational or work (paid or volunteer) setting. Letters of reference should not be submitted from friends or family
- Unofficial transcripts
- Advanced standing students only: the most recent copy of your field evaluation (see department instruction)

Plans of Study
Preparation for professional leadership encompasses two major components:

Foundation
Develops knowledge and skills related to social interaction, human development, community dynamics, social policy and societal values applicable to generalist social work practice.

** SOC_WK 7000 is in the process of being added to the course catalog for fall 2015.
SOC_WK 7760 is in the process of a name change to Social Justice Seminar for fall 2015.

Concentrations
The MSW program offers two concentrations: Advanced Clinical Practice and Policy, Planning and Administration (PP&A). Within these concentrations, students have the opportunity to create a plan of study based on their individual interests and professional goals. Decisions regarding their chosen concentration are made by students in consultation with faculty advisors. A brief description of the two concentrations is as follows:

Advanced Clinical Social Work Practice: includes strategies of clinical intervention with socially and economically disadvantaged individuals,

Concentrations

<table>
<thead>
<tr>

Elective (must be graduate level) * 3
Elective (must be graduate level) * 3
Elective (must be graduate level) + 3
SOC_WK 7780 Fundamentals of Social Work Administration 3
SOC_WK 7820 DSM V and Psychopathology: A Social Work Perspective 3
SOC_WK 7920 Advanced Foundations of Human Behavior for Administrators 3
SOC_WK 8350 Management of a Social Agency 3
SOC_WK 8970 Professional Practice Seminar I 3
SOC_WK 8971 Graduate Field Practicum II 12

Total Credits 39

* Elective courses offered will vary from year to year.
+ The fourth elective course is only required for regular standing students.

**Course Format**

On Campus MSW Program courses are primarily offered in-person. A few foundation, concentration & elective courses are offered online through Blackboard, learning management system licensed to the University of Missouri for online courses.

The Online MSW program is designed for part-time study with two courses, typically 6 credit hours of course work, per semester. All courses are offered online through Blackboard with the exception of the practicum, which requires 680 hours of supervised work at an approved agency.

**Regular Standing: Non-Social-Work Bachelor’s**

The regular 60-credit hour degree is appropriate for students who have undergraduate degrees other than accredited social work degrees. The school admits full-time and part-time students to the regular 60-credit hour program at the beginning of the fall semester only.

**Advanced Standing: Bachelor’s in Social Work (BSW)**

Students who have graduated within the past seven years from a baccalaureate social work program accredited by the Council on Social Work Education may be eligible for the Advanced Standing Program, which is an accelerated 39-credit hour degree.

**Starting Dates**

On-campus students admitted to the Regular Standing Program are admitted in fall semester (full-time or part-time study). On-campus students admitted to the Advanced Standing Program are admitted either in the spring or summer session. On-campus Advanced standing students in the policy, planning and administration concentration must enter in the spring semester. Online students admitted to the Regular Standing Program are admitted for fall semester (part-time) in even numbered years and online students admitted to the Advanced Standing Program are admitted for fall semester (part-time) in odd numbered years.

**Length of Study & Satisfactory Progress**

Full-time Regular Standing students take 15 credits each semester and graduate in two years (4 semesters of study). Full-time Advanced Standing students take 3-5 classes each semester (9-15 credits) and graduate in 12-17 months (3 semesters of study). Part-time Regular Standing students take 2-3 classes (6-9 credits) every semester, including summer, and graduate in three years (9 semesters of study). Part-time Advanced Standing students take 2-3 classes (6-9 credits) every semester, including summer, and graduate in two years (6 semesters of study). All students are full-time during their last semester while completing block placement. All students must complete at least eight hours per academic year to maintain a satisfactory rate of progress.

**PhD in Social Work**

**Admission Contact Information**

Shannon Mezzanotte (mezzanottes@missouri.edu)
724 Clark Hall; Columbia, MO 65211
573-884-1438

**About the Program**

The Doctor of Philosophy (PhD) program in social work focuses on research that informs social welfare policy and practice. It is designed to prepare scholars for research, teaching and program development positions in academic and professional social work practice and policy settings.
Financial Aid from the Program

Scholarship opportunities are available for full-time program applicants who meet the application deadline. Graduate teaching and research assistantships are also often available. Some forms of support require additional forms from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission Criteria

Early priority fall deadline: Midnight October 31
Rolling admission fall deadline: Midnight January 15
• Minimum GPA: 3.0; 3.5 in graduate study
• Minimum TOEFL scores:
<table>
<thead>
<tr>
<th>Internet-based test (IBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>80</td>
</tr>
<tr>
<td></td>
<td>550</td>
</tr>
</tbody>
</table>
• An MSW or related master’s is required. Applicants without the MSW must take a minimum of 12 credit hours of MSW course work. This requirement may be waived for applicants with additional graduate work.
• Minimum of two years post-master’s practice experience encouraged.
Note: These criteria are used flexibly to assess the applicant’s potential for study and research in this program.

Required Application Materials

To the Graduate School:
• All required Graduate School documents
To the Director of the Doctoral Program in Social Work (either via the grad schools online application system or mailed in hard copy):
• Cover letter
• Three letters of recommendation
• Résumé
• Writing proficiency sample
• Personal statement
• A personal interview is required, and if possible, will be arranged at MU. A Skype interview may be utilized in some cases.

Plan of Study

The PhD program is available to both persons with a Masters of Social Work (MSW) degree and those with other master’s degrees. The curriculum consists of a minimum of 51 post MSW semester credit hours or, for applicants without an MSW, 63 hours. The curriculum is divided among three distinct but highly interrelated elements designed to complement one another in assisting students to achieve the competencies expected of a graduate of this program. A core of social work courses provides the foundation in the traditions and knowledge in the profession and exposure to state-of-the-art research and techniques for the 21st century. Electives from the broad spectrum of social and behavioral sciences offering available through MU departments provide students with the opportunity to design an individualized plan of study that capitalizes on their unique interests and talents. A strong regimen of research methodology, theory, and policy analysis are designed to prepare students for use of both current and emerging methods of scientific inquiry.

Graduate Certificate in Gerontological Social Work

The Graduate Certificate in Gerontological Social Work at the University of Missouri is designed to expand the pool of professionals who are qualified to work in settings with older adults and their families. The certificate focuses on practice strategies of social work intervention from micro, mezzo, and macro perspectives.

This certificate will be available to students enrolled in the MU School of Social Work master’s program as part of their graduate training as well as a stand-alone certificate to graduate level clinical social work practitioners and graduate level policy and administration social work practitioners who wish to augment their knowledge and skills in this area. Approval of the MSW Program Director and Committee, and Director of the Graduate certificate in Gerontological Social Work is required for admission to the certificate program.

Participants in the Gerontological Social Work Certificate program build awareness and expertise for work in settings that serve older adults and their families. Participants are trained in micro, mezzo, macro and clinical strategies known to be effective in work with older adults and their families. An interdisciplinary, multi-level emphasis will be provided in the program since a large component of elder care is the coordination and management of services provided by various disciplines. Course work will utilize a bio-psycho-social-cultural perspective emphasizing the ecological perspective, Lawton’s theory of environmental press, resiliency, and the functional age model of family work. In addition, students will build awareness of aging policies and services, and policies that impact persons with disabilities and women.

As a result of earning the Gerontological Social Work Graduate Certificate, practicing MSW’s or Post-MSW degree practitioners can expect enhanced employability due to the development of new skills that respond to growing societal need. Current MSW students benefit from the graduate certificate by completing a concentrated course of study on a population group and obtaining specialty training with population/services needing graduate level social workers.

Because all of the Gerontological Social Work Graduate Certificate courses fulfill other requirements of our MSW program, a current MSW student can conveniently earn the Gerontological Social Work Graduate Certificate while completing their MSW. No additional coursework is required.

The Gerontological SW Grad Certificate consists of 12 credit hours.

Students will choose from a variety of acceptable interdisciplinary courses for fourth class

During the final semester of the MSW Program, the full-time block practicum experience 40 hours/week (680 total hours) is arranged at a setting where students will gain skills practicing with older adults. The Director of Field in conjunction with the Director of the Graduate Certificate in Gerontological Social Work works with students to choose a practicum setting that fits SSW requirements and student interests. Practicing MSWs only complete 12 hours of coursework and are not required to complete an additional practicum experience.

For additional information about the Graduate Certificate in Gerontological Social Work, please contact Dr. Colleen Galambos at galambosc@missouri.edu.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/gerontological-social-work-graduate-certificate/gerontol-sw-ge/Gedt.html

Graduate Certificate in Military Social Work

The School of Social Work offers graduate certificates in Military Social Work and in Gerontological Social Work.

The Graduate Certificate in Military Social Work is designed to expand the pool of professionals who are qualified to work in settings with military personnel, veterans, and their families. The Certificate focuses on clinical practice strategies of social work intervention with military personnel and their families to improve the mental health and health of this population.

This certificate is available both to students enrolled in the MU School of Social Work Masters of Social Work (MSW) Program as part of their graduate training as well as a stand-alone entity to civilian graduate level clinical social work practitioners who wish to augment their knowledge and skills in this area. Only Clinical MSWs and MSW Clinical students will be accepted to the Military SW Graduate Certificate Program. Approval of the MSW Program Director is required for admission into the graduate certificate program.

Because all of the Military Social Work Graduate Certificate courses fulfill other requirements of our MSW program, a student can conveniently earn the Military SW Graduate Certificate while completing their MSW. No additional coursework is required.

The Military SW Grad Certificate consists of 12 credit hours.

Faculty

Professor P. S. Norum**
Associate Professor J. Ha-Brookshire**, J. Parsons**
Assistant Professor K. Morris*, S. Southworth*
Instructor K. McBee-Black*

Professor Emeritus K. G. Dickerson, L. E. Wilson**
Associate Professor Emeritus B. Dillard**, J. H. Pry

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BSHES in Textile and Apparel Management (p. 615)
• Minor in Textile and Apparel Management (p. 618)

The Department of Textile and Apparel Management is a global leader focusing on the apparel and textile supply chain. TAM’s award-winning faculty is internationally recognized. TAM prepares students for a wide variety of career options such as merchandising, buying, sourcing, product development, technical design, e-retailing or retail operations. The curriculum focuses on leadership, the global supply chain, sustainability, creativity/innovation and technology. Through course work, field study experiences, internships, leadership conferences and student organizations, TAM students develop the marketing and management skills they need to be a top recruit for industry positions.

Students who major in Textile and Apparel Management may choose from several options and tracks:
• Apparel Marketing and Merchandising
• Apparel Product Development
• International Apparel Marketing and Merchandising
• International Apparel Product Development

These tracks are designed to provide students with knowledge and skills necessary to function in the global textile and apparel industry. (Note: Tracks do not appear on transcripts or diplomas). Students majoring in Textile and Apparel Management are required to take a set of core courses (p. 615). Students may not take departmental courses using the Pass/Fail grading option. In addition to college and department requirements, students must meet all University graduation requirements (p. 19) including University general education (p. 20).

Students who want to explore Textile and Apparel Management may take the following classes:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>T_A_M 1200</td>
<td>Basic Concepts of Apparel Design and Production</td>
<td>3</td>
</tr>
<tr>
<td>T_A_M 1300</td>
<td>Softgoods Retailing</td>
<td>3</td>
</tr>
<tr>
<td>T_A_M 2200</td>
<td>Science of Textiles</td>
<td>3</td>
</tr>
<tr>
<td>T_A_M 2400</td>
<td>Global Consumers</td>
<td>3</td>
</tr>
</tbody>
</table>

Graduate

• MA in Textile and Apparel Management (p. 618)
• MS in Textile and Apparel Management (p. 619)

The College also offers a PhD in Human Environmental Sciences with an emphasis Textile and Apparel Management (p. 591).

http://tam.missouri.edu/

Director of Graduate Studies: Jung Ha-Brookshire

Graduate programs in textile and apparel management offer the following areas of study: apparel manufacturing management; apparel marketing and merchandising; e-commerce, supply chain management, economic/trade issues related to domestic and global textile and apparel industry; historical and cultural aspects textiles and dress; and consumer marketplace concerns.

Careers

Career opportunities for graduates exist in many areas, such as higher education, industry analysis, museums, product development, production management and cooperative extension.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Undergraduate
BSHES in Textile and Apparel Management

Major Program Requirements

There are four tracks available in Textile and Apparel Management: (1) Apparel Marketing and Merchandising, (2) International Apparel Marketing and Merchandising, (3) Apparel Product Development, or (4) International Apparel Product Development. These tracks are designed to provide students with knowledge and skills necessary to function in the global textile and apparel industry. (Note: Tracks do not appear on transcripts or diplomas.) Students majoring in TAM may not take departmental courses using the Pass/Fail grading option. In addition to college requirements, students must meet all University graduation requirements. Some courses in the Professional Program are allowed to double count for General Education requirements, (p. 20). This program can be completed in 120 hours. The following courses are required of all students majoring in Textile and Apparel Management (TAM).

Minor in Textile and Apparel Management

An undergraduate minor in Textile and Apparel Management is available for students pursuing a major in other departments. Students who wish to complete a minor should declare the minor by completing the form at http://hes.missouri.edu/students_minorapp.html. A minimum of 18 credit hours is required with at least six hours at the 2000 level or above. Prerequisites for all courses must be met, or the student must have the permission of the instructor.

Required Courses:

| T_A_M 1200 | Basic Concepts of Apparel Design and Production | 3  |
| or T_A_M 1300 | Softgoods Retailing | 3  |
| T_A_M 2200 | Science of Textiles | 3  |

Select 12 hours from list below in consultation with a TAM Advisor:

Apparel Industry Studies

| T_A_M 2400 | Global Consumers | 3  |
| T_A_M 3200 | Softgoods Quality Evaluation | 3  |
| T_A_M 4110 | Global Sourcing | 3  |
| T_A_M 4400 | The Clothing/Textile Consumer: Research and Analysis | 3  |
| T_A_M 4549 | International Experiential Learning in Textiles and Apparel | 1-99 |
| T_A_M 4949 | Field Training in Textiles and Apparel Management | 1-99 |
| T_A_M 4998 | Experiential Learning in Textiles and Apparel | 1-3 |

Historical/Behavioral Studies in Dress

| T_A_M 2500 | Social Appearance in Time and Space | 3  |
| T_A_M 3510 | History of Western Dress | 3  |
| T_A_M 3520 | 19th and 20th Century Western Dress | 3  |

Apparel Merchandising & Retailing

| T_A_M 2300 | Retail Finance and Merchandise Control | 3  |

MA in Textile and Apparel Management

Admission Contact Information
Leona Nichols (nicholslm@missouri.edu)

Additional Minors and Certificates

- HES

**Undergraduate Minors**
- Minor in Financial Literacy for Helping Professionals (p. 620)
- Minor in Social Justice (p. 620)
- Minor in Wellness (p. 621)

**Graduate Certificates**
- Certificate in Financial and Housing Counseling (p. 621)
- Certificate in Geriatric Care Management (p. 621)
- Certificate in Gerontology (p. 621)
- Certificate in Youth Development Program Management and Evaluation (p. 622)
- Certificate in Youth Development Specialist (p. 622)

**Undergraduate**

**Minor in Financial Literacy for Helping Professionals**

The School of Social Work has collaborated with Personal Financial Planning department within the College of Human Environmental Sciences to develop a minor in Financial Literacy for Helping Professionals. As front line helping professionals encounter clients who face challenging economic situations, skills in addressing those challenges and knowledge of foundational personal finance information will aid in helping clients. Knowledge of predatory lending practices, social welfare policy designed to help the working and non-working poor, and tax strategies to enhance financial situations will be addressed. This minor hopes to embrace the imperative need to educate our graduates on the role of financial literacy for those professionals who will serve others.

Students who complete the financial literacy minor may not refer to themselves as BSW-level social workers upon graduation. Fifteen credits are required to complete the financial literacy minor.

Select one of the following:
- SOC_WK 2000 Exploration in Social and Economic Justice
- SOC_WK 4710 Social Justice and Social Policy

Total Credits 15

* Completion of these two courses, as well as the proposed curriculum for the minor, will allow the student to sit for the Accredited Financial Counselor Exam.

**Minor in Social Justice**

The social justice minor is designed to give non-social work majors the opportunity to develop knowledge and understanding about social justice in the person-environment context. Social justice involves the idea that in a perfect world all citizens would have identical social benefits, protections and opportunities regardless of their backgrounds and membership in diverse groups. Recognizing that the world is not perfect, the primary goals for the minor in social justice are to enhance sensitivity to vulnerable and at-risk populations, to provide opportunity for critical review of social policies and the allocation of societal resources and to stimulate interest in advocacy and the planned change process.

Students who complete the social justice minor may not refer to themselves as BSW-level social workers upon graduation.

A minimum of 15 credits, comprised of the courses below, is required to complete the social justice minor.

Note: Satisfactory completion (as defined by C range grade or above) of Microeconomics and College Algebra is required. Satisfactory completion (as defined by C range grade or above) of each required course is necessary in order to attain this minor. This minor is available to students regardless of major.

The student must have an overall GPA requirement of 2.5 to apply for the minor.

This minor is available to students regardless of academic major. A student must complete the application minor information and submit to Student Service Coordinator (http://ssw.missouri.edu/faculty_freelin.html) in Clark Hall for approval. The student must be graduating from a distinct discipline to be eligible for the minor. The minor will be added to the student’s myZou record upon completion to be given simultaneously with the degree.

**Support Process:** The student may meet with the Director of Undergraduate Studies and the Student Service Coordinator (http://ssw.missouri.edu/faculty_freelin.html) for advising regarding the Financial Literacy for Helping Professionals minor.

**Application for the Financial Literacy for Helping Professionals Minor**
Minor in Wellness

The Wellness Minor is intended for both non-science and science students interested in course work focused on empowering them to make informed decisions related to lifelong personal nutrition and exercise choices.

Core requirements consist of a minimum of 15 hours of nutrition and exercise/fitness courses.

To apply for the Wellness Minor, use the online application form (<http://hes.missouri.edu/students_minorapp.php>) available on the Human Environmental Sciences Student Services website.

Graduate Certificate in Financial and Housing Counseling

The purpose of the Financial and Housing Counseling Certificate is to develop a student’s financial and housing counseling skills and to prepare a student to sit for the Accredited Financial Counselor and Certified Housing Counselor exam offered through the National Association for Financial Planning and Counseling Education. Students with this background would be equipped to provide professional assistance in debt counseling, financial management, and housing finance to those in need. Typical clients would include those with low levels of income and resources, disaster recovery, and military personnel dealing with financial and housing issues related to deployment, relocation.

This certificate is offered as part of the Family Financial Planning programs in the Great Plains Interactive Distance Education Alliance. More information is available at <http://www.gpidea.org/index.html?page=majorsDegreesCourses.html&anchor=programAnchor1>.

Graduate Certificate in Geriatric Care Management

The Geriatric Care Management certificate is a web-based, four course certificate designed for those who provide independent case management services to elder Americans or who wish to do so in the future. The certificate provides an educational credential in addition to preparing students to sit for certification examinations given by national credentialing organizations.

About the School

The world’s first School of Journalism was established in 1908 at the University of Missouri to strengthen the effectiveness of public communication in a democratic society. The school’s first dean, Walter Williams (who went on to become president of the University in 1930) wrote the Journalist’s Creed, which stresses the profession’s rights and responsibilities as a public trust.

The faculty is committed to educating students in the responsibilities and skills of the professional journalist. It also has a broader commitment to advance the profession of journalism through scholarly research, analysis and criticism and through special programs to serve practitioners. The school also prepares students for careers in corporate communication through its strategic communication emphasis area. Students in that area typically pursue careers in advertising or public relations or in strategic communication, a combination of those fields.

The Missouri Method assures a journalism student will graduate with a broad, liberal education essential for a journalist whose work may span many segments of today’s complex society. In addition to a liberal arts education, students complete practical laboratory work in a variety of settings, including a public radio station, a commercial daily newspaper and a network-affiliated television station. The school offers the Bachelor of Journalism, Master of Arts and Doctor of Philosophy degrees, along with cooperative programs with other divisions in the University. It was the first school in the world to offer all three of those degrees.

The Accrediting Council on Education in Journalism and Mass Communication has accredited the undergraduate program and a professional master’s degree.

Undergraduate

• Admissions (p. 623)
• Special Programs (p. 624)
• Academic Regulations (p. 625)
• Advising (p. 626)
• Opportunities for Graduate Study on MU Campus (p. 626)

Admissions

Students must be admitted to the School of Journalism to pursue the Bachelor of Journalism degree. Students are admitted in one of two categories:

Directly Admitted Students

A freshman applicant will be directly admitted to the School of Journalism if he or she meets standard MU admissions requirements and any one of the following three criteria:

• Ranks in the top 10 percent of the student’s high school class.
• Scores 29 or higher on the ACT Composite.
• Scores 1290 or higher on the math-verbal portions of the SAT.

Pre-Journalism A&S Students

Students accepted by MU who do not meet one of the criteria for direct admission are admitted as pre-Journalism students in the College of Arts and Science and apply for admission to Journalism as the student is completing the fifth journalism course, which is either JOURN 2100-News or JOURN 2150-Fundamentals of Multimedia Journalism. That usually occurs in the second semester of the sophomore year as the student is completing 60 credits and all other requirements.

NOTE: All undergraduate admissions to MU are handled by the Office of Undergraduate Admissions, not the School of Journalism, and no exceptions are made to the standards for direct admission to Journalism. A student either meets one of the admissions standards or does not. There is no appeals process for direct admission.

However, once accepted to MU as a pre-Journalism student, the student may continue to take the ACT or SAT to try to improve his or her score. If the student receives the necessary score for direct admission, once the score is received by the Admissions Office the student may request a change of admissions status. The new test score must be received by the Admissions Office at least one month before the student is to begin classes at MU. Similarly, a student who was admitted outside the top 10 percent of his or her class but who subsequently achieves top 10 percent standing at the end of the senior year of high school may request a change of admissions status. No change is possible later than one month before the student begins classes at MU.

Differences in the Admission Categories

Directly admitted students have several advantages over students admitted as pre-Journalism students in the College of Arts and Science. Directly admitted students:

• Advance automatically to upper-class status in Journalism if they maintain a cumulative UM GPA of record of 3.0 or higher upon completion of 60 credit hours and fulfill all other requirements.
• Are guaranteed admission to the upper-class interest area of their choice provided they maintain a cumulative UM GPA of record of 3.0 or higher.

To continue to enjoy these benefits, directly admitted students are expected to maintain a UM cumulative GPA of 3.0 or higher. Students whose GPA fall below 3.0 after completion of 60 credit hours lose these benefits and will transition to another academic unit.

Unlike directly admitted students, pre-Journalism students:

• Are not guaranteed to advance to upper-class status in Journalism if they maintain a cumulative UM GPA of record of 3.0 or higher upon
completion of 60 credit hours and after fulfilling all other requirements. Students in this category are accepted on a space-available basis. However, to date no one who has earned a 3.0 cumulative GPA or higher has been rejected, and space has been available. The School merely reserves the right to reject students due to potential program space limitations.

- Are not guaranteed an interest area of choice even with a cumulative GPA of record of 3.0 or higher. Admission to the interest area of choice is dependent upon space availability. To date, no one with a 3.0 GPA or higher has been denied admission into their area of choice.

The School of Journalism is eager to accept hard-working pre-Journalism students who have demonstrated the necessary aptitude and drive to be successful in the upper division interest areas of the program.

**Admission to Upper-Division Interest Area**

As noted above, directly admitted students who maintain a UM GPA of record of 3.0 or higher and complete the necessary coursework are automatically admitted to upper-division status and their interest area of choice upon completion of 60 credits and other requirements for upper-division status.

Students who do not meet the criteria for direct admission and directly admitted students who have not maintained a cumulative UM GPA of record of 3.0 or higher must appeal for upper-division status upon completion of 60 credit hours and fulfillment of all other requirements for upper-division status. A Faculty Appeal Committee in each emphasis area will review applications for admission, and admission will be by interest area based on space available in the respective program.

GPA alone will **not** be used to evaluate the application appeals from pre-Journalism students and directly admitted students with UM GPAs below 3.0. In addition to GPA, the committees will consider a student’s stated desire to work in the fields of journalism or strategic communication, demonstrated commitment to journalism or strategic communication (as evidenced by work with student or professional media, high school activities or participation in journalism student groups), needs of the profession, etc. For example, it is possible for a student with a 2.87 GPA who has demonstrated strong commitment to the field to be selected over one with a 2.95 GPA who has shown no similar commitment. Students applying through this process must submit a letter of purpose stating a case for admission to an interest area. The letter should not exceed two pages.

The School will attempt to match interests of students applying through the appeal process with openings in the School’s various academic disciplines. The School does not guarantee first choice of interest area to students admitted through this process. It may be necessary from time to time to limit enrollment in high-demand areas.

Students who are rejected twice for upper-division status through this process must transfer to another MU academic division and will no longer be considered Journalism or pre-Journalism students. If, however, a student subsequently spends a semester taking non-journalism courses and raises his or her cumulative GPA of record above 3.0, the student may reapply. No such application will be accepted after a student has completed 70 or more hours of college credit.

**Transfer Student Admissions Standards**

Transfer students are admitted to upper-division status in Journalism when they complete 60 credit hours, fulfill all prerequisites and establish a cumulative GPA of record of at least 3.0. Completion of all pre-interest course requirements is required for transfer students to qualify for admission. Students who plan to major in Journalism are encouraged to transfer to MU after taking a maximum of 30 credit hours elsewhere.

Transfer students who have completed 60 credit hours and the necessary coursework but who do not have a 3.0 UM GPA of record must provide an appeal packet to a faculty interest area committee. Criteria used in evaluating these applications are similar to those for pre-Journalism applicants and direct admits who do not achieve a 3.0 GPA. The Admissions Committee will review the student’s GPA of record as well as a student’s stated desire to work in the fields of journalism or strategic communication, demonstrated commitment to journalism or strategic communication (as evidenced by work with student or professional media, high school or community college activities, or participation in journalism student groups), needs of the profession, etc. A transfer student in this category also must submit a letter of purpose stating a case for admission to an interest area. The letter should not exceed two pages.

**Transfer Credit**

The Office of Undergraduate Admissions, 230 Jesse Hall, determines transfer equivalencies for the University, including the School of Journalism. Transfer students from other accredited schools and colleges in Missouri should check the MU website to see how coursework will transfer to MU or contact the Office of Admissions. Students should also contact an advisor to see how these courses would apply toward a degree at MU. The School of Journalism can accept up to six journalism credit hours from other accredited journalism programs or from Missouri colleges with which the School of Journalism has working agreements.

Current Missouri journalism students may not transfer journalism courses from other institutions. Many communications courses are similarly rejected and may not be used toward graduation requirements even as electives. Some other courses may not count toward the degree.

**International Admission**

A minimum score of 100 (internet), 600 (paper) or 250 (computerized) on the Test of English as a Foreign Language (TOEFL) is required for all pre-Journalism and Journalism students whose native language is other than English. Alternatively, students may take the International English Language Testing System (IELTS) exam: overall-7.0, no band score below-6.0.

**Special Programs**

The School of Journalism attracts some of the best students at MU. The School encourages high-ability students to enroll in the MU Honors College (http://honors.missouri.edu) and take honors courses whenever possible. Such courses are taught by some of MU’s best professors. The School recognizes incoming high-ability students with two special designations and the following benefits:

**Journalism Scholars Program**

**Qualifications:** Any incoming freshman journalism major who has a composite ACT score of 29 or higher (or 1290 or higher on the combined math and verbal portions of the SAT) and who ranks in the top 10 percent of his or her high school graduating class qualifies for:

- Direct admission to the Missouri School of Journalism
- Designation as a Missouri Journalism Scholar
• Student’s who are eligible for the Honor’s College are automatically accepted into the Journalism Scholars program

Benefits:
• The opportunity to participate in a Freshman Interest Group designed exclusively for Journalism students, space permitting
• Special advisement and programs directed by the school of Journalism’s associate dean for undergraduate studies and administration
• Regular meetings with various members of the journalism faculty
• Space permitting, assignment to residence halls set aside for Journalism Scholars
• The opportunity to participate in many on-campus journalism events, and journalism clubs and organizations
• Social activities planned exclusively for Journalism Scholars

The Walter Williams Scholars Program
The highest-achieving Journalism Scholars win separate designation as Walter Williams Scholars. The Walter Williams Scholars program is named in honor of the school’s founding dean, a Missouri newspaper publisher who went on to become president of the University of Missouri. Qualifications: To win acceptance into the exclusive circle of top Walter Williams scholars, incoming freshmen must earn an ACT composite score of 33 or higher (1440 or higher on the SAT). They also must rank in the top 20 percent of the high school class (if the school ranks) or must have maintained a high school GPA of at least 3.25 on a 4.0 scale. Admission is by invitation only.

Benefits:
Walter Williams Scholars are also Journalism Scholars and have all of the rights and privileges enjoyed by that group. Additional benefits include:
• Placement in a special Freshman Interest Group, space permitting
• Assigned individual faculty mentors
• A $1,000 scholarship that can be used for study abroad or in our New York or Washington programs. The scholarship can be used at any time before graduation
• Automatic admission to the one-year BJ/MA program at the School of Journalism, which allows students to complete their graduate degree in one year rather than two. Admission is contingent upon the following criteria:
  • Maintenance of a 3.25 GPA in your journalism coursework and for your cumulative average, throughout you undergraduate career
  • Submission of a complete MA application, including payment of the application fee, and with two (out of three) of your letters of recommendation from journalism faculty. You do not need to take the GRE. Details can be found on the Master’s Application Checklist: http://journalism.missouri.edu/programs/masters/admissions/

Academic Regulations
Dual-Degree - Bachelor of Arts/Bachelor of Journalism
To receive two bachelor’s degrees, a Bachelor of Arts and a Bachelor of Journalism, a student must complete a minimum of 132 credits and complete all of the specific requirements for both degrees. Normally, a minimum of one additional semester is required for both degrees.

Each candidate for a dual degree is assigned an advisor in the School of Journalism and in the additional academic unit.

Science and Agricultural Journalism
The College of Agriculture, Food and Natural Resources, in cooperation with the School of Journalism, offers an inter-divisional Bachelor of Science degree in Science and Agricultural Journalism. This is not considered a dual degree. For more information, see the College of Agriculture, Food and Natural Resources (p. 33) in this catalog.

Credit Restrictions
Students may enroll in a maximum of 10 journalism credits each semester without permission from the associate dean for undergraduate studies.

Capstone Course
All students must complete a capstone course during their last 45 hours of study. Each interest area provides a course(s) to fulfill this university requirement.

Independent Study
Mizzou Online offers a variety of courses that can be taken on your own through correspondence or online. Many of the courses can be used to satisfy degree requirements. Students may enroll themselves for as many as 3 hours per semester of online semester based or self-paced (9 months) courses. Any more than 3 hours per semester will have to be approved by an academic advisor.

Standards for Academic Performance
The School of Journalism is a challenging and rigorous environment in which students are expected to maintain high standards of academic achievement. In general, the faculty expects each student to maintain a GPA of 3.0 or higher to be considered in good standing. The academic standing guidelines are categorized by completed credit hours. Each category has a specific requirement to ensure students are making progress to achieving a 3.0 GPA. The credit hour classifications include University of Missouri courses, transfer courses, advanced placement credit and other credits by examination. While the credit hours from all of these sources are included in the following categories, only the grades in courses completed in the University of Missouri system will be computed for GPA purposes.

Students who do not meet the following standards will be dismissed from the School of Journalism and will not be permitted to re-enroll.

0-29 credit hours
A student admitted directly to the School of Journalism as a freshman must maintain a cumulative MU GPA of at least 2.5.

30-69 credit hours
A student admitted directly to the School of Journalism as a freshman must maintain a cumulative MU GPA of at least 2.75.

70 credit hours
Students with 70 or more credit hours who have not been admitted to their interest area will be dismissed from the School of Journalism.

Minimum Grade in Journalism Courses
Students must repeat any required journalism course in which they do not earn a grade of C- or higher. A student who fails to achieve a C- or better during the second attempt will be permanently dismissed from the School of Journalism for lack of acceptable progress.
Students may be readmitted only with the consent of the faculty chair of the student’s interest area and the associate dean for undergraduate studies. Before recommending approval for the student to re-enroll, the faculty chair will consult with the instructor or instructors of record in the required course to determine the likelihood of that student passing the course on the third attempt. The faculty chair will make a recommendation to the associate dean, who shall make the final decision to readmit or deny admission to the School of Journalism.

Satisfactory/Unsatisfactory Courses

Students have the option to enroll in courses on a satisfactory/unsatisfactory basis instead of a traditional letter grade basis. A maximum of one non-journalism course per semester may be taken on a satisfactory/unsatisfactory basis. A satisfactory grade is defined as equivalent to the letter grade of C- or higher.

Journalism courses are not usually graded on a satisfactory/unsatisfactory basis. If a required course, or a course being used to satisfy a specific requirement, is taken in this manner the School of Journalism will compute it in the GPA as a “C.”

Probation, Suspension and Dismissal

First Time Freshmen

GPA is between 0.50 – 1.99
First semester freshman journalism students are placed on final probation when their first term GPA is between 0.50 and 1.99. Students may remain on final probation no more than one term. They regain good standing when their term and cumulative GPAs are 2.0 or higher.

GPA is below 0.50
First semester freshman journalism students are dismissed and become ineligible to enroll for a period of one calendar year when their first term is below 0.50.

All Students

Probation
Journalism students are placed on probation when either their journalism major course, term or cumulative GPA falls below 2.0. Students may remain on probation no more than one term. They regain good standing when their journalism major course, term and cumulative GPAs are 2.0 or higher.

Suspension
Students are suspended and become ineligible to enroll for a period of one regular semester when their journalism major course, term or cumulative GPA is below 1.5, when they pass less than one-half of their work in any term or when they are on probation and their term GPA is 2.0 or lower.

Dismissal
Students are dismissed and become ineligible to enroll for a period of one calendar year when their journalism major course, term or cumulative GPA is below 1.0, when they pass less than one-fourth of their work in any term or when they fail to perform their academic duties. Students may be placed on academic probation and may be declared ineligible to enroll if they neglect their academic duties.

Excessive Incomplete Grades
A student may be placed on probation, suspended or dismissed for excessive incompletes at the discretion of the associate dean for undergraduate studies. In such cases, the associate dean shall set a time limit for successful completion of all the courses in which the student has an incomplete. The time limit will not exceed one calendar year from the scheduled completion of the course and may be of shorter duration. The associate dean also may place limitations on the number of additional credits hours in which the student may enroll until the incomplete grades are resolved. If the student fails to finish the required courses within the time limit set by the associate dean, the student is subject to dismissal.

Readmission
A student who has been declared ineligible to enroll may be readmitted only on the approval of the dean of the school or college in which the student desires to enroll. As a condition of readmission, the dean may set forth stipulations with regard to minimum standards of academic work that must be maintained by the student. If the student, after readmission, again becomes ineligible to re-enroll, his or her ineligibility normally is considered permanent.

Ethics of Journalism

The School of Journalism is committed to the highest standards of academic and professional ethics and expects its students to adhere to those standards. Students should be familiar with the Code of Ethics of the Society of Professional Journalists and adhere to its restrictions. Students are expected to observe strict honesty in academic programs and as representatives of school-related media. Should any student be guilty of plagiarism, falsification, misrepresentation or other forms of dishonesty in any assigned work, that student may be subject to a failing grade from the instructor and such disciplinary action as may be necessary under university regulations.

Non-Journalism Majors
Students from other divisions with junior or higher standing may take non-laboratory courses in journalism without being admitted to the school. Permission of the journalism academic unit is required. Courses directly related to the skills in the media are usually not open to students while they are undergraduates in other disciplines. Students from other schools or colleges admitted to journalism courses are expected to meet the course prerequisites and grade point averages required of students in the School of Journalism.

Advising

Students directly admitted to Journalism as freshmen have a full-time academic advisor in the school.

Pre-Journalism students receive academic advising from the College of Arts and Science. Students admitted to an interest area in the school have a full-time academic advisor in the school and a faculty advisor from their selected emphasis area. Students are expected to seek the advice of the academic advisor in the selection of courses. The faculty advisor provides career counseling and specific journalism related issues.

The school provides advising worksheets so that students can maintain a record of academic course work. The worksheets are used by the student and advisor to plan the student’s program. Students are responsible for determining an appropriate schedule of courses each semester; however, the course schedule should be approved by the student’s advisor. The responsibility for meeting admission and graduation requirements rests with the student.

Opportunities for Graduate Study on MU Campus

The five-year combined bachelor/master degree program was designed for students in the Missouri School of Journalism who desire a graduate education after the undergraduate program is complete. Students in
the program complete requirements as outlined for the Bachelor of Journalism degree and then spend one more year (approximately 12 months) to earn a master’s degree. The program requires students to carry an intensive load (12-15 credits) each semester. Course work in the program builds on the undergraduate program and enhances student’s skills and understanding of the chosen area of journalism. At the present time, areas include strategic communication, newspaper design, broadcast management, computer-assisted reporting and magazine areas such as magazine writing and magazine design.

Graduate

About Our Graduate Programs

The University of Missouri’s School of Journalism is the recognized leader for graduate study in journalism and strategic communication, having awarded the first master’s and doctoral degrees in journalism in 1921 and 1934, respectively.

The Missouri Method is the time-honored process of journalism and strategic communication education: Graduate students gain valuable research-based, managerial experience while honing tactical skills. We operate the only network affiliate (NBC) television station in the country used to train journalism students. We publish a community daily newspaper (not a campus paper), and we operate four major web sites, a local magazine and an international magazine. Students also may train at our campus-based NPR affiliate. Our strategic communication students design media campaigns for local and national clients. Examples: Our students have created advertising and public relations campaigns for Nokia, Apple, Dr Pepper, Anheuser-Busch, Duncan Hines, DuPont, Dow Chemical, Kinko’s, Eastman Kodak and many other leading international brands. Graduate studies in CAFNR are taking an innovative, high-tech approach to traditional agriculture, food and natural resources.

Our students are highly engaged with expert faculty mentors who are impacting the future with findings on health breakthroughs, sustainable agriculture techniques and food safety. Prospective students are able to choose from a range of academic programs consistently recognized for excellence.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

We operate educational programs in Washington, D.C., New York, and Brussels where many of our students carry out their capstone projects or do research. We also partner with educational programs around the world.

Our 80+ faculty members have earned impressive credentials from years of working in journalism and strategic communication. School resources include an extensive journalism library and Freedom of Information Center, Center for Advanced Social Research, and the Stephenson Research Center, named for the late William Stephenson, known globally as the inventor of Q-methodology.
Journalism

The world’s first School of Journalism was established in 1908 at the University of Missouri to strengthen the effectiveness of public communication in a democratic society. The school’s first dean, Walter Williams (who went on to become president of the University in 1930) wrote the Journalist’s Creed, which stresses the profession’s rights and responsibilities as a public trust.

The faculty is committed to educating students in the responsibilities and skills of the professional journalist. It also has a broader commitment to advance the profession of journalism through scholarly research, analysis and criticism and through special programs to serve practitioners. The school also prepares students for careers in corporate communication through its strategic communication emphasis area. Students in that area typically pursue careers in advertising or public relations or in strategic communication.

The Missouri Method assures a journalism student will graduate with a broad, liberal education essential for a journalist whose work may span many segments of today’s complex society. In addition to a liberal arts education, students complete practical laboratory work in a variety of settings, including a public radio station, a commercial daily newspaper and a network-affiliated television station. The school offers the Bachelor of Journalism, Master of Arts and Doctor of Philosophy degrees, along with cooperative programs with other divisions in the University. It was the first school in the world to offer all three of those degrees.

The Accrediting Council on Education in Journalism and Mass Communication has accredited the undergraduate program and a professional master’s degree.

Approved Emphasis Areas.

Option must do so within accrediting guidelines and within one of the six robust offerings of more than 100 courses. Students who pursue this a student can design his or her program by selecting from the School's and with the approval of the associate dean for undergraduate studies, Individually Designed Interest Area. Working with three faculty members, To ensure maximum flexibility for students, the School also offers an The degree is still awarded under the appropriate Emphasis Area.

Interdisciplinary Programs, those that cross traditional media boundaries or depend on skills-based coursework from other MU divisions, are assigned to one of the School’s Faculties as indicated.

Degree with Honors Requirements

Graduation with honors is based on the grade point average during the final 60 graded credits in residence. Cum laude requires 3.5, magna cum laude 3.7, and summa cum laude 3.9. The student must have a minimum of 60 credits in residence at MU to be considered for graduation with honors. The School computes the grades to three decimal points and does not round up. A student must request consideration for graduation with honors when applying for graduation.

Kappa Tau Alpha is a journalism honorary society that accepts the top 10 percent of each graduating class. Qualifying students are sent a letter with details about the society and are recognized at the journalism graduation ceremony.

Individually Designed Interest Area

Students who cannot find a match with one of the existing Interest Areas may work with the faculty to construct a tailored Interest Area to meet their educational objectives. To do this, students work with a faculty mentor and at least two other faculty members to design a course plan using existing courses in the School of Journalism, relevant courses outside the School and no more than six credits of Problems, Topics or Communications Practice courses. The student will enroll and be granted a degree in the emphasis area that aligns with their faculty mentor. Students are not able to tailor an Interest Area in Strategic Communication due to the large volume of enrollment. Students wishing to pursue an individually designed Interest Area should start by seeing a journalism advisor in 76 Gannett Hall.

Electives to Achieve the Interest Area’s Goal

The student must complete 16 hours of elective journalism courses mutually agreed to in advance by the student and the three supervising faculty members. These courses must form a coherent plan that leads to competency in the targeted area of expertise and must fit within one of the approved Emphasis Areas of the School.

<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students pursuing this interest area should choose from among the School’s available capstone courses to find one that best meets the model’s objectives. In the absence of a clear choice, JOURN 4990: Journalism and Democracy, is recommended. Students also are required to complete an upper-division Writing Intensive (WI) course. Some capstones carry WI designation. Others may be found in the journalism curriculum or outside the school.</td>
<td></td>
</tr>
</tbody>
</table>
Approval Procedure

Students who wish to construct a special interest area must submit a program proposal form before completing 70 total credits. After meeting with the three faculty members chosen to oversee progression through the program, the student will submit the form - complete with the signatures of the student and the three supervising faculty members - to the Associate Dean for Undergraduate Studies. The student must gain approval of the tailored program from the associate dean before beginning the program.

Total Credits for the Degree and their Breakdown

Students pursuing a tailored program must complete 120 credits to include:

- Completion of all Pre-Interest courses
- 44-48 journalism credits
- minimum of 72 non-journalism credits

Graduate

- MA in Journalism (p. 639)
  - with emphasis in Health Communication (p. 640)

Master’s Programs

There are two options available for Master’s Programs in Journalism. Students who wish to pursue a traditional on-campus experience, should refer to the MA in Journalism page (p. 639). The above emphasis areas are not available for on-campus students. Students may also wish to pursue the online Master’s program. Online students have the option of obtaining an MA in Journalism with any of the emphasis areas listed above.

About Journalism’s Graduate Degree Programs

The Missouri School of Journalism awarded the first master’s and doctoral degrees in journalism in 1921 and 1934, respectively. The master’s and doctoral programs at the School enjoy superb reputations, both among scholars and among practitioners in news, advertising, public relations and strategic communication.

For the master’s program, Missouri Journalism offers a complete set of real-media experiences. We operate the only network affiliate (NBC) television station in the country used to train journalism students. We publish a community daily newspaper (not a campus paper), and we operate several major web sites, a local magazine and an international magazine. Students also may train at our campus-based NPR affiliate.

Our strategic communication students design media campaigns for local and national clients through our two student-run advertising agencies, MOJO Ad and Adzou. Our students have created advertising and public relations campaigns for Nokia, Apple, Dr Pepper, Anheuser-Busch, Duncan Hines, DuPont, Dow Chemical, Kinko’s, Eastman Kodak and many other leading international brands.

We operate educational programs in Washington, D.C., New York, and Brussels where many of our students carry out their capstone projects or do research. We also partner with educational programs around the world.

Graduate Minor in Law and Conflict Resolution

This program is for journalism doctoral students who are interested in teaching and researching in journalism, law and conflict resolution in a school of journalism or communication department. For details, refer to the Graduate Minor in Law and Conflict Resolution (p. 645).

Facilities and Resources

A variety of special facilities and resources are available to help students meet their educational objectives. These include the Columbia Missourian, a general circulation daily newspaper with full-leased wires of The Associated Press and The New York Times Service; KOMU-TV, an NBC affiliate; KBIA-FM, a National Public Radio station; MOJO Ad and Adzou advertising agencies; and Vox magazine, a weekly city magazine.

All provide students the opportunity for hands-on learning under faculty supervision and to conduct applied research.

The Journalism Library subscribes to more than 125 newspapers and magazines worldwide and catalogs more than 40,000 volumes. Many more resources are available in electronic format.

The State Historical Society of Missouri, located on-campus, has an extensive collection of state newspapers dating from 1808.

The Freedom of Information Center maintains a day-to-day study of the actions by government, media and society affecting the movement of information.

The national headquarters of Investigative Reporters and Editors and the National Institute for Computer Assisted Reporting provide educational services to reporters, editors and others interested in investigative journalism.

The Association of Health Care Journalists is headquartered at Missouri and is dedicated to advancing public understanding of health care issues. Its mission is to improve the quality, accuracy and visibility of health care reporting, writing and editing.

The Center on Religion & the Professions works to improve religious literacy among professionals, to help them serve a diverse public. As America grows more religiously diverse, professionals need to better understand the religious traditions and beliefs of the public they serve. CORP’s interdisciplinary, practical and applied work centers on that mission. Founded in 2003 with a grant from The Pew Charitable Trusts, the Center is one of Pew’s 10 Centers of Excellence. CORP is affiliated with Religion Newswriters Association.

The American Society of News Editors focuses on leadership development and journalism-related issues. Founded in 1922 as a nonprofit professional organization, ASNE promotes fair, principled journalism, defends and protects First Amendment rights, and fights for freedom of information and open government.

Founded in 2003 with a generous gift from the Donald W. Reynolds Foundation, the Reynolds Journalism Institute is committed to developing
and testing new ways to improve journalism through new technology and improved processes.

Special Events
Each year the school sponsors the Missouri Honor Medal Award program, which brings contemporary leaders in mass communications to the campus. The school also directs a number of professional development and awards programs, including the international competition for the best Pictures of the Year.

Honor Society
Kappa Tau Alpha, national honor society for scholarship in journalism, founded at the university in 1910, has its headquarters in the school.

Funding
An array of competitively awarded fellowships, assistantships, scholarships and other financial aid opportunities are available.

Undergraduate

BJ in Journalism

Major Program Requirements
The Bachelor of Journalism degree requires 120 credits.

To obtain the Bachelor of Journalism degree, a student must:

• Complete all Pre-Interest area requirements
• Be admitted to an interest area within the school
• Complete all interest area requirements
• Earn a cumulative GPA of at least 2.0 for all work taken while in the School of Journalism and a GPA of at least 2.0 for all Journalism courses
• Complete all University graduation requirements (http://catalog.missouri.edu/academicdegreerequirements/universityrequirements), including University General Education (http://catalog.missouri.edu/academicdegreerequirements/ generaleducationrequirements) requirements

Upper Level Non-Journalism Electives from the areas below: 29

(Must be numbered 3000 or above or General Honors courses numbered 2000H or above)

Area 1 3

Students choose from one of these areas: Anthropology, Astronomy, Biology, Chemistry, Computer Science, Geology, Mathematics, Physics, Psychology, Sociology or Statistics.

Area 2 6

Students choose from the following areas: Black Studies, Economics, Geography, History, Peace Studies, Political Science, or Women’s and Gender Studies.

Area 3 6

Students choose from the following areas: Architectural Studies, Art, Classical Humanities, Classics, Communication*, English, Film Studies*, French, German, Hebrew, Italian, Japanese, Korean, Latin, Music, Philosophy, Portuguese, Religious Studies, Russian, Spanish or Theatre.

Area 4 14

Non-Journalism courses.

(Students in Strategic Communication must complete three hours of Marketing courses in addition to MRKTNG 3000.)

• Some courses are prohibited for the bachelor of journalism. See the list of course exceptions for more information. Students should consult with their assigned academic advisor if they have questions regarding courses in these areas.

Flexible Credits
Students can take up to 4 additional credits of journalism (JOURN) electives in their interest area in place of Area 4.

General Electives
Electives necessary to complete a minimum of 72 credits of non-journalism classes and 120 total credits. Any course acceptable to the School of Journalism is allowed.

International Journalism Interest Area
The next generation of journalism students must be equipped to work in a global environment. This interest area is designed to capitalize on Missouri’s international reputation and its international resources by placing under one umbrella the school’s existing Study Abroad opportunities, its internationally focused media and multimedia projects with global partners. Students in this interest area may take courses within any of the existing or prospective areas to complement their international interests. This degree is granted in the student’s emphasis area of choice (Convergence Journalism, Magazine Journalism, Photojournalism, Print and Digital News or Radio-TV Journalism) but is administered by the School’s Global Programs Office. Interest Areas do not appear on Transcripts or Diplomas. Emphasis areas appear only on transcripts.

Journalism Study Abroad 6
It is recommended that the student study abroad in the second semester of their junior year or the first semester of their senior year.

Required Journalism Electives vary by specific interest area track.

Semester Plan

A semester plan is not currently available. Please see your advisor for more information.

BJ in Journalism with Emphasis in Convergence Journalism

Major Program Requirements

All Convergence Interest Areas teach multimedia storytelling by having students take the three core convergence classes, JOURN 4804 Convergence Reporting, JOURN 4806 Convergence Editing and Producing; and the capstone, JOURN 4992 Reporting, Editing and Marketing of Converged Media. Students are able to specialize by taking classes from selected requirements and electives.

Students must complete all university requirements, including general education, in addition to the degree requirements below.

Emerging Media Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

The journalism industry is constantly changing as it discovers new ways of covering the news and new technologies to deliver it. This interest area is for the student who wants to learn and work with some of the latest developments in journalism. Classes in this area provide a wide range of opportunities from content creation and Web and application development to classes working with content created by other journalists. This program of study is primarily for students interested in the intersection of journalism and digital technologies. Administered by the Convergence Faculty.

Multimedia Producing Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

The focus of this Interest Area is planning and producing content across medium platforms. A student in this area will have the knowledge and skills to work in traditional newsrooms, Web-only newsrooms, non-traditional news organizations and other growing media areas. A student choosing this path is one who is less interested in a traditional reporting track and is more interested in working with content created by others. Administered by the Convergence Faculty.

Convergence Photojournalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

This course of study is for those interested in communicating largely through photography and other visual mediums. Skills acquired include documentary photography, lighting and studio techniques, and photo editing with both still and moving images. Students build an appreciation for and understanding of visual communication and can expand into illustrative graphics, video and multimedia management. Students are prepared for careers as photojournalists for print and online publications and as freelancers. Administered by the Convergence Faculty.

Classes

Entrepreneurial Journalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

More and more of today’s journalism students will go to work in non-traditional news organizations, start their own businesses or freelance. Students in this Interest Area will learn about current markets in journalism and what audiences want. They also will study the relative marketability of content. Students will learn the market value of their own work, how to build their own brands and how to market. Administered by the Convergence Faculty.

Convergence Television Reporting Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

This Interest Area is for the student wanting to work largely in television reporting. This area includes a wide range of reporting classes and producing/management classes, giving the student a sense of television work both as a reporter and as a behind-the-scenes producer. Several courses offered provide the opportunity for training in media management. Administered by the Convergence Faculty.

Semester Plan

There are currently not any semester plan available for the Interest Areas under Convergence Journalism. Please see advisor for more information.
Magazine Publishing and Management Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

This interest area is directed to students who hope to become leaders in the field of magazine publishing and management. Course requirements and electives are designed to give an overview of all aspects of magazine publishing, both print and digital. Theoretical courses in law, business and management as applied to publications complement skills classes in reporting, writing, editing and design. Administered by the Magazine Journalism Faculty.

Journalism Electives 11

Magazine Writing Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

This interest area is for students who want to be magazine writers. The foundation of longform or literary writing is solid reporting, and students must learn the basics of information gathering, interviewing and reporting first. From there, students will explore narrative storytelling tools: character, dialogue, voice, structure, scene construction, exposition, and detail and description. This interest area emphasizes revision and the analysis of contemporary magazine writing. Administered by the Magazine Journalism Faculty.

Semester Plan

There are currently not any semester plan available for the Interest Areas under Magazine Journalism. Please see advisor for more information.

BJ in Journalism with Emphasis in Photojournalism

Major Program Requirements

Students must complete all university requirements (p. 19), including general education (p. 20), in addition to the degree requirements below.

Photojournalism Interest Areas

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.
This Interest Area educates students in the history, theory and skills of photojournalism, including still and moving images, as well as audio. Also covered are the principles and practice of visual editing and design for print and online. Photojournalism students learn to create truly integrated multimedia projects, incorporating audio, video and stills into compelling visual story-telling projects. The program’s essential element remains understanding the power of image, and it embraces all the new technologies in presentation. Students are prepared for careers as photojournalists for print and online publications and as freelancers. **Administered by the Photojournalism Faculty.**

**BJ in Journalism with Emphasis in Print and Digital News**

**Major Program Requirements**

Students must complete all university requirements (p. 19), including general education (p. 20), in addition to the degree requirements below.

**Print and Digital News Interest Areas**

**Business and Economics Journalism Interest Area**

*Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.*

This Interest Area is for journalism students interested in learning the skills of reporting business and economics news across platforms. It allows students to add a focus on economic, business and consumer reporting and emphasizes the use of financial data analysis in reporting. Similarly, it encourages students to take basic courses in other subject areas that will give them important skills, such as basic accounting, or advanced economics and finance. Students will gain the skills to work covering Wall Street, government economics, consumer and personal finance issues, and local business. A minor in Economics or Business is suggested. **Administered by the Print and Digital News Faculty.**

**Journalism Electives** 9

*Note: Students who want to do business reporting with KOMU must be in or have taken JOURN 4308 Broadcast News III

**News Reporting Interest Area**

*Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.*

This Interest Area provides the opportunity for reporting and writing across a variety of styles and platforms, including breaking news, enterprise and features. Stories are reported and produced using words, video, audio, graphics and more. The program of study prepares students for jobs in online media, and print publications such as newspapers,
magazines and nonprofit organizations. Administered by the Print and Digital News Faculty.

**News Reporting Interest Area Required Journalism Classes**

Select two of the following:

- JOURN 4450 News Reporting
- JOURN 4460 Advanced News Reporting
- JOURN 4804 Convergence Reporting

Select one of the following:

- JOURN 4406 News Editing
- JOURN 4806 Convergence Editing and Producing

**Required**

- JOURN 4400 Introduction to News Editing

**Journalism Electives**

**Science and Health Journalism Interest Area**

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

This Interest Area educates students in the skills and theory of journalistic coverage of the specialized fields of science, health, environment and engineering. The program prepares students for jobs as journalism professionals at newspapers, magazines, online publications and radio-television operations. Administered by the Print and Digital News Faculty. Students interested in science-, food- and environment-related topics may want to investigate the science and agricultural journalism program offered through the College of Agriculture, Food and Natural Resources.

**Science and Health Journalism Interest Area Required Journalism Classes**

Select one of the following:

- JOURN 4450 News Reporting
- JOURN 4804 Convergence Reporting

Select one of the following:

- JOURN 4406 News Editing
- JOURN 4408 Magazine Editing
- JOURN 4806 Convergence Editing and Producing

Select one of the following:

- JOURN 4460 Advanced News Reporting
- JOURN 4430 Computer-Assisted Reporting
- JOURN 4436 Investigative Reporting

**Required**

- JOURN 4416 Science, Health and Environmental Writing
- JOURN 4428 Health Reporting Skills
- JOURN 4400 Introduction to News Editing

Select one of the following:

- JOURN 4990 Journalism and Democracy
- JOURN 4992 Reporting, Editing and Marketing of Converged Media

**Journalism Electives**

**Sports Journalism Interest Area**

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

This Interest Area is for those interested in pursuing a career in sports journalism at any level. Covering sports today includes not only knowing the games but also knowing about the larger financial, legal and ethical issues in sports. Students in this interest area have an opportunity to work across media platforms to gain experience in covering games, finding in-depth issue and feature stories and covering breaking news in sports. Students choose a core course of study through a specific emphasis area (convergence journalism, magazine journalism, or print and digital news), then pick from a wide range of electives to round out their skills. Electives include everything from advanced reporting and editing to business journalism, to social media techniques and community outreach.

**Sports Journalism Interest Area Required Journalism Classes**

Select one of the following:

- JOURN 4450 News Reporting
- JOURN 4804 Convergence Reporting

Select one of the following:

- JOURN 4406 News Editing
- JOURN 4460 Advanced News Reporting
- JOURN 4500 Publication Design
- JOURN 4806 Convergence Editing and Producing

Select one of the following:

- JOURN 4410 Intermediate Writing
- JOURN 4814 Multimedia Sports Journalism

**Required:**

- JOURN 4422 Sports Journalism

Select one of the following:

- JOURN 4990 Journalism and Democracy
- JOURN 4992 Reporting, Editing and Marketing of Converged Media

**Journalism Electives**

**Watchdog Journalism Interest Area**

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

This Interest Area is for journalism students interested in learning the skills of investigative and computer-assisted reporting across platforms. It allows students to add a strong investigative-watchdog focus and emphasizes the use of data analysis in reporting. The program encourages students to develop a specialty area, such as covering health care or religion, but that is not required. Similarly, it encourages students to take basic courses in other subject areas that will give them important skills, such as introductory accounting (though again, this is not required). Students will gain the skills to work in computer-assisted reporting or investigative reporting. Administered by the Convergence Journalism, Magazine Journalism and Print and Digital News faculties.

**Watchdog Journalism Interest Area Required Journalism Classes**

Select one of the following:

- JOURN 4450 News Reporting
- JOURN 4804 Convergence Reporting

Select one of the following:

- JOURN 4460 Advanced News Reporting
- JOURN 4806 Convergence Editing and Producing

**Required:**

- JOURN 4430 Computer-Assisted Reporting
- JOURN 4436 Investigative Reporting
### Major Program Requirements

Students must complete all university requirements (p. 19), including general education (p. 20), in addition to the degree requirements below.

### Radio-Television Producing Interest Area

**Note:** Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

This interest area teaches students how to structure, write and build a newscast. Students will receive instruction in newsroom leadership and practice guiding a newscast to completion in the professional newsrooms and control rooms of KBIA Radio and KOMU-TV. Administered by the Radio-TV Faculty.

#### Radio-Television Producing Interest Area Required Journalism Classes

#### Radio-Television Reporting and Anchoring Interest Area

**Note:** Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

This Interest Area teaches students how to gather the information to write and edit stories for radio, television and the Internet. They also will learn on-air delivery techniques and receive instruction on how to deliver their journalism. They will do so in the professional newsroom settings of KBIA Radio and KOMU-TV. Administered by the Radio-TV Faculty.

#### Radio-Television Watchdog Journalism Interest Area

**Note:** Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

This interest area is for journalism students interested in learning the skills of investigative and computer-assisted reporting for radio and television news. Students choose their core course of study in radio-television journalism. The interest area builds student skills in investigative reporting and using data analysis in reporting. It also encourages, but does not require students to use elective coursework to develop a specialty area such as business news, health care or religion reporting. Through this interest area, students will gain the skills to work as an investigate reporter or producer in radio or television news. Administered by the Radio-TV Faculty.

International Strategic Communication Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

The next generation of strategic communication students must be equipped to work in a global environment. This interest area is designed to capitalize on Missouri’s international reputation and its international resources by placing under one umbrella the school’s existing Study Abroad opportunities, its internationally focused media and multimedia projects with global partners. Students in this area take Strategic Communication courses to complement their international interests. This degree is overseen by the Strategic Communication Faculty but is administered by the school’s Global Programs office.

BJ in Journalism with Emphasis in Strategic Communication

Major Program Requirements

Students must complete all university requirements (p. 19), including general education (p. 20), in addition to the degree requirements below.

Strategic Communication Interest Areas

Strategic Communication Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

This interest area educates students in the principles and practice of all communication designed to create a desired response from a given audience. It includes focused study and hands-on practice within the interest areas of Account Management, Art Direction, Copywriting, Digital Advertising, Media Planning, Public Relations, Research, Sports Entertainment and Promotion, and Video Promotional Content and prepares students for careers in these nine areas. Crossover between Entertainment and Promotion, and Video Promotional Content and Digital Advertising, Media Planning, Public Relations, Research, Sports interest areas of Account Management, Art Direction, Copywriting, audience. It includes focused study and hands-on practice within the all communication designed to create a desired response from a given

Semester Plan

There are currently not any semester plan available for the Interest Areas under Strategic Communication. Please see advisor for more information.

Minor in Journalism

Journalism Minor Policies and Procedures

The School of Journalism’s minor consists of 15 credit hours of journalism coursework. It is intended for students from other MU academic divisions who wish to broaden their understanding of the news media’s role in society. Courses for the minor are similar to MU’s broader liberal arts traditions and are not skills-oriented.

Admissions

All students are required to apply for the Journalism minor. To apply for a minor in Journalism, students must have completed 60 credit hours with a minimum UM system cumulative GPA of 3.0. An application form is
available from the Minor Coordinator in the Journalism Student Services Office, 76 Gannett Hall.

Students pursuing a Journalism major are ineligible for the Journalism minor program.

Transfer students may use up to three credit hours of approved Journalism transfer credit toward a Journalism minor.

Courses

JOURN 1000 The News Media: Journalism and Advertising in a Democratic Society is open to any student who is a non-journalism major in good academic standing. Pre-Journalism or Undeclared Journalism students who complete either JOURN 1100 Principles of American Journalism, JOURN 2000 Cross-Cultural Journalism, JOURN 2100 News or JOURN 2150 Fundamentals of Multimedia Journalism with a C- or better and then decide to minor within the School of Journalism must maintain a minimum cumulative GPA of 3.0 to be eligible to take additional 3000 or 4000 level Journalism courses. Students who decide to pursue the minor after completing JOURN 1100 are ineligible to take JOURN 1000. Journalism minors can take a maximum of 15 credit hours from the School of Journalism.

Select any combination from the following classes:

</tr>
</tbody>
</table>

* Permission number required. Submit request to the Journalism Minor Coordinator.

Registration

Students are permitted to self-enroll in JOURN 1000. Other courses are offered on a space-available basis and after the early registration period has ended. Students are required to submit a course preference list to the Journalism Minor Coordinator. If space is available, a permission number to enroll will be provided.

Academic Status

Students are subject to probationary or suspension status as determined by the student’s major division. Students must earn a minimum grade of C- in Journalism courses. Journalism courses may be repeated one time. Upon repeating a course, if a student fails to earn a C- or better, the student is no longer eligible for the Journalism Minor.

The journalism minor is awarded after the student completes 15 journalism credits and maintains a 3.0 minimum UM system GPA at the time of graduation.

Fees

School of Journalism course fees are applied to all Journalism courses.

Advising

Journalism minors are not assigned a faculty advisor or academic advisor within the School of Journalism. Academic advising occurs in the division of each student’s major. Students pursuing a Journalism minor are encouraged to consult with either the designated Minor Coordinator or with School of Journalism faculty on course-specific matters.

Graduate

MA in Journalism

Admission Contact Information

Journalism Graduate Studies
179 Gannett Hall
Columbia, MO 65211
573-882-4852
Email: jourgraduatestudies@missouri.edu

On-Campus Master’s Program: http://www.journalism.missouri.edu/graduate/masters/

Online Master’s Program: http://journalism.missouri.edu/programs/online/

About the Master of Arts

The program leading to the MA degree is designed to accommodate several objectives, including: comprehensive professional preparation for careers in the news media, mass communications and strategic communication; expansion of previous professional preparation and experience (e.g. newspaper editing) into a new area (e.g. broadcasting reporting); comprehensive academic preparation for careers in journalism and strategic communication teaching and research; and combinations of the three.

Degree Options

Program Models

Students choose from more than 20 program models, covering the full range of skills and media of journalism and strategic communication. Because the faculty periodically updates these models, students should visit the school’s Web site for the latest details. In addition to the course work in any model, students complete either a thesis or a professional project. Students who make progress on the degree requirements and maintain at least a B average each semester are considered to be in good standing.

Five-year Bachelor to Master Program

Another option for students who seek a master’s degree is the 5-year bachelor to master’s program (http://journalism.missouri.edu/programs/masters/models-and-programs/five-year-bjma-models). To be eligible for this option, students must have completed a bachelor’s degree in journalism from Missouri. Students following the 5-year plan are expected to carry 10-12 hours per semester and will graduate after completion of two semesters of course work and a third semester of project or thesis. Only graduates of Missouri Journalism’s undergraduate program are eligible for the BJ/MA program.
Joint Journalism and Law Programs
The School of Journalism and the School of Law have created joint programs (http://journalism.missouri.edu/programs/masters/models-and-programs/journalism-law-programs) that provide an opportunity to earn a MA in Journalism and either a JD or a LLM from Law. Students in the joint programs complete one of the journalism models and the course requirements for the law degree with a block of courses that are used for both degrees.

Dual-degree option with Masters of Public Health
The School of Journalism and the program in Public Health have created a dual-degree option (p. 713) that allows students to earn a journalism degree in reporting or strategic communication with an emphasis in public health. Students complete a block of courses in public health, as well as in journalism, and complete the dual degree with a public health internship and capstone, in which the focus is on journalism or strategic communication.

Distance Learning
Professional journalists or others who cannot travel to mid-Missouri to attend the on-campus program might consider doing their program in an online format. Health communication, interactive media, media management and strategic communication models are available through distance learning to applicants who have a minimum of three years professional journalism-related experience. Students in the online program are required to make two short visits, two to three days each, to campus during their program. Learn more about our online master’s programs here http://journalism.missouri.edu/graduate/online/.

Master’s Admission Criteria
On-Campus program deadlines:
Fall deadline: January 1
Spring deadline: September 1

• Minimum GPA: 3.0 in last 60 hours

Note: Deadlines are adhered to strictly, and no applicant is considered for admission until all required information is received.

Required Application Materials
To the Graduate School
All required Graduate School documents

To the Journalism Master’s Program:
Please upload the following application materials into the online Graduate School application in Apply Yourself:

• 3 essays as specified on Departmental application website
• Résumé
• Unofficial transcripts from all undergraduate institutions attended
• 3 letters of recommendation (use the online Graduate School application system)

Please submit official GRE scores to the Journalism Department using the GRE Department Code: 4503 and Institution Code: 6875.

Financial Aid from the Program
Limited fellowships, assistantships, scholarships and other financial aid opportunities are available. All applicants for admission are considered for any available funding. No separate application form is needed. Check the program Web site or ask the program contact for details.

Plan of Study
Two-year on-campus and online students are required to complete a minimum of 37 hours. Five-year BJ-MA students complete a minimum of 30 hours. For all graduate students, at least half of the credit hours must be at the 8000-level. Specific course requirements vary depending on the option selected.

Professional Project or Thesis
Students must enroll in either the Project Seminar or the Thesis Seminar in the semester prior to embarking on their professional project or thesis. These seminar courses guide students in developing proposals for their professional project or thesis. After proposal approval, students enroll in 8190, Area Problem (for projects) or 8090, Research (for thesis). Students earn nine credit hours for either the professional project or thesis research.

Students in any model may choose to complete the professional project or thesis off campus. The school operates a program in Washington D.C., which is supervised by a full-time faculty member. In the Missouri state capital the school has a program focusing on public affairs reporting in any medium. Other off-campus opportunities can be arranged.

Length of Study
The degree must be earned within eight years of beginning the program.

MA in Journalism with Emphasis in Health Communication

Degree Requirements
The Health Communication emphasis area is only available in the online MA program. This area, which includes a minimum of 37 credits to graduate, includes both required and elective courses. The electives may be courses from within the same area, from another area or transferred graduate hours from another accredited institution. For students with special needs, an individualized curriculum may be designed with the
student’s advisor, subject to approval of the associate dean for graduate studies.

Core Requirements

The program core is completed by all students:

<td>3</td>
</tr>
<tr>
<td>JOUR 8058</td>
<td>Communication in Media Organizations</td>
<td>3</td>
</tr>
</tbody>
</table>

Thesis/Non-thesis Requirements

Students may choose from two options: thesis or professional project. The thesis is an independent research study and is appropriate for students who may intend to pursue a doctorate. The professional project is appropriate for students who wish to work as professionals in the journalism industry.

To prepare for the capstone semester students will enroll in either JOUR 8100 MA Thesis Seminar, or JOUR 8098 MA Project Seminar, in the semester prior to their capstone. During the seminar students will form their faculty committee and develop and gain approval for their thesis or project proposal. Successful completion of the seminar is one of the prerequisites to beginning the capstone semester.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Journalism program (http://gradschool.missouri.edu/academics/programs/journalism) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MA in Journalism with Emphasis in Interactive Media

Degree Requirements

The Interactive Media emphasis area is only available in the online MA program. This area, which includes a minimum of 37 credits to graduate, includes both required and elective courses. The electives may be course from within the same area, from another area or transferred graduate hours from another accredited institution. For students with special needs, an individualized curriculum may be designed with the student’s advisor, subject to approval of the associated dean for graduate studies.

Core Requirements

About the Doctorate
The objective of the doctoral program is to develop an ability to conduct independent and advanced scholarly research and to integrate this skill with a depth of scholarship in journalism and mass communication. Although it is primarily a research degree, the PhD is designed to facilitate a variety of academic aims. Students must expand their intellectual horizons, gain a theoretical framework for examining and understanding communication and refine their own communication competencies.

Doctoral Admission Criteria
Fall deadline: December 15
Spring deadline: September 1

• Minimum Academic IELTS scores:

</tr>
</tbody>
</table>

• Minimum GPA: 3.0, undergraduate, 3.5, graduate

Applicants should have demonstrated interest, education or professional experience in journalism, advertising, public relations, mass communication or a related field. A degree (bachelor's or master's) in one of those fields or two years of full-time professional media experience is preferred. All required information must be received before the admission review can begin. Applicants may be required to participate in an interview with the doctoral faculty as part of the review process. Students who did not write a thesis in their master's program may be required to complete a project to demonstrate their ability to do independent research.

Deadlines for application are December 15 for fall entry and September 1 for spring. Deadlines are firm, and no applicant is considered for admission until all required information is received.

Required Application Materials
Upload the following application materials into the Graduate School's online application system:

• All required Graduate School documents
• Statement of Doctoral Objectives
• Résumé
• An abstract of your master's thesis (or thesis proposal, if your thesis is not yet complete)
• Unofficial transcripts
• 3 letters of recommendation (use the online Graduate School application system)

Financial Aid from the Program
Doctoral students are provided assistantship and scholarship support for a maximum of six terms (three years). Contact the department for details on this financial assistance.

Plan of Study
Doctoral study in journalism and mass communication is an interdisciplinary enterprise. The doctoral program is designed by the student in collaboration with the advisor and doctoral committee. Course selections are based on the intellectual requirements of the dissertation and the teaching areas the student wishes to pursue. No courses that focus primarily on professional skills may be counted toward the doctoral program, whether taken at the master's or the doctoral level. Courses from journalism should compose no more than two-thirds of the total credit.

Students must develop two research tools, pass qualifying and comprehensive examinations, submit and defend a dissertation, and satisfactorily meet all other requirements of the Graduate School. Doctoral Theory and Research I (JOURN 9000), Doctoral Theory and Research II (JOURN 9006), Doctoral Research Design (JOURN 9010) and Professional Development (JOURN 9087) are required of all PhD students.

Qualifying Examination
Students are admitted to the PhD program in journalism when they have passed Doctoral Research Design (qualifying examination), which must be taken the semester in which the student completes 18 hours. Graduate School regulations about comprehensive examinations, dissertations, plans of study, residency and other matters are specified in the Degree Requirements section of the catalog.

Foreign Language & Research Tool Requirements
Students are expected to have a background in a foreign language or to develop research tools. The language requirement may be met by three semesters of college-level foreign language courses or an equivalency acceptable to the doctoral faculty. At the discretion of the student's
doctoral committee and the associate dean for graduate studies, a second tool may be used to substitute for the language requirement.

There are four research tool options:

1. competency in a second foreign language. This may be satisfied by two years of college-level work recently passed with a grade of C or better or an acceptable ETS score. A foreign language is one that is non-native or not the primary language used in the student’s school system;
2. computer proficiency as evidenced by completion of two computer courses or an equivalency acceptable to the doctoral faculty;
3. two courses in statistics;
4. two 7000 or 8000-level research methods courses outside the School of Journalism.

A grade of A or B must be made in any course used for options 2, 3 or 4.

**Teaching**

Doctoral students who plan to teach will participate in a teaching program. Each student’s teaching skills will be evaluated in the first year of study, at which point planning for the student’s future teaching opportunities begins. Most students will serve as teaching assistants in such classes as JOURN 1100 or JOURN 2100 during their third semester in the program.

In the student’s fourth semester, he/she may have an additional teaching experience, either as a teaching assistant, co-instructor or instructor of record in a course. Depending on the student’s ability and desire, students might teach a course independently during later semesters.
Additional Minors and Certificates - Journalism

Graduate Minors

• Minor in Law and Conflict Resolution for Journalism Doctoral Students (p. 645)

Graduate

Graduate Minor in Law and Conflict Resolution for Journalism Doctoral Students

This program is designed for doctoral students who are interested in teaching and researching in journalism and law and conflict resolution in a school of journalism or communication department. Under the program, students may receive the Minor upon completion of at least 15 credits at the Law School, including both core courses and at least 9 credits of electives. The Minor will appear on the student’s transcript.

Required Core Courses

LAW 5450 Conflict and Conflict Management 3
LAW 5760 Media Law 3
or JOURN 8038 Seminar in Communications Law

Electives

Students may take any available course at the Law School in satisfying this requirement. Actual course offerings and availability vary by semester, and enrollment is subject to professor approval. The following courses are ones that are expected to be generally available. They are grouped by tracks to help students more quickly identify areas of specific interest, and to develop deeper concentrations in desired areas. However, students may take any of the courses in meeting the elective requirement for the Minor. Students should consult with a member of the School of Law faculty or administration about which Law School courses or sequences may be most appropriate to the student’s curricular needs.

General Electives

JOURN 7718 Law and the Justice System 3
JOURN 7720 Internet Law 3
JOURN 8046 Controls of Information 3
BUS_AD 7330 Business Law/Regulation 2-3

Electives - Track 1: Civil Rights and International Law

LAW 5220 Constitutional Law 1-4
LAW 5240 Criminal Procedure 1-3
LAW 5350 Arbitration 1-3
LAW 5380 Bioethics Seminar 1-3
LAW 5410 Children and the Law 1-3
LAW 5415 Constitutional and Civil Rights Litigation 1-3
LAW 5435 Comparative Law 1-3
LAW 5525 Education Law 1-3
LAW 5530 Elder Law 1-3
LAW 5540 Employment Discrimination 1-3
LAW 5565 European Union Law 1-3
LAW 5575 Family Law 1-3

Electives - Track 2: Business Law

Those students who anticipate covering general business issues as working journalists, or who anticipate careers in media management and strategic communication should consider these courses. LAW 5395 is recommended and is often a prerequisite for other courses.

LAW 5340 Antitrust Law 1-3
LAW 5350 Arbitration 1-3
LAW 5365 Bankruptcy 1-3
LAW 5375 Basic Federal Income Taxation 1-4
LAW 5395 Business Organizations 1-4
LAW 5455 Copyright Law 1-3
LAW 5467 Internet Law and Practice 1-3
LAW 5540 Employment Discrimination 1-3
LAW 5640 Intellectual Property 1-3
LAW 5695 Labor Law 1-3
LAW 5795 Modern Payment System 1-3
LAW 5810 Negotiation 1-3
LAW 5820 Patent Law and Policy 1-3
LAW 5880 Sales and Leases of Goods 1-3
LAW 5890 Securities Regulation 1-3
LAW 5905 Sports Law 1-3
LAW 5920 Trademark Law 1-3
LAW 5940 White Collar Crime 1-3

Electives - Track 3: General Law

The following courses permit students a wide range of options for exposure to law, and also permit further emphasis in civil justice, criminal justice, environmental, health care and international law, depending upon student needs and preferences.

LAW 5010 Civil Procedure I 1-3
LAW 5015 Civil Procedure II 1-3
LAW 5220 Constitutional Law 1-4
LAW 5240 Criminal Procedure 1-3
LAW 5260 Evidence 1-4
LAW 5310 Administrative Law 1-3
LAW 5320 Advanced Legal Research 1-2
LAW 5350 Arbitration 1-3
LAW 5530 Elder Law 1-3
LAW 5545 Environmental Law 1-3
LAW 5575 Family Law 1-3
LAW 5615 Health Care Law: The Doctor-Patient Relationship 1-3
LAW 5700 Land Use Controls 1-3
LAW 5720 Law and Literature 1-3
LAW 5725 Law and Social Sciences 1-3
LAW 5745 Legislation 1-3

LAW 5750 Local Government Law 1-3
LAW 5780 Mental Disability and the Law 1-2
LAW 5865 Religious Liberty and Church-State Relations 1-3

School of Nursing

Administration

Judith F. Miller, Dean
Roxanne McDaniel, Associate Dean for Academic Affairs
Vicki Conn, Associate Dean for Research

Office of Student Affairs
S235 Nursing School Bldg.
(573) 882-0277

The nursing program at MU began in 1901 with the establishment of Parker Memorial Hospital Training School. Today, the Sinclair School of Nursing is committed to promoting, maintaining and improving health and health-care delivery in Missouri and worldwide through nursing education, research and service. Nursing faculty combine research and education to offer students hands-on experience in the art and science of nursing.

The School of Nursing is approved by the Missouri State Board of Nursing and has national accreditation.

The undergraduate program is approved by the Missouri State Board of Nursing. The Baccalaureate Program at the University of Missouri is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Undergraduate

• Admissions (p. 647)
• Advising (p. 648)
• Health Care (p. 648)

Admissions

Traditional BSN Option

The freshman and sophomore years are designated as the “pre-nursing” years. The junior and senior years are designated as the “clinical nursing major” years. Pre-nursing students apply for admission to the clinical major during the last semester of general education and prerequisite coursework. Students are admitted to the clinical nursing major on a competitive and space-available basis when prerequisite courses have been completed. Any student who is a Nursing Scholar is guaranteed admission into the clinical nursing major. Please see the Nursing and/or Honor’s College websites for eligibility information and application details.

Each student’s application is reviewed systematically and considered holistically for each admission period. The School values MU’s Commitment to Diversity and the call of the American Nurses Association that the nursing workforce should reflect the diversity of the population. The School is also committed to rural health care and to educating nurses for practice in rural Missouri. Therefore, the School seeks to ensure that the student body includes persons from rural Missouri and persons of backgrounds that are underrepresented in the nursing workforce.

Clinical application and admission criteria include:

• Successful completion of all general education and prerequisite coursework prior to beginning clinical coursework;
• Satisfactory grades from biology, chemistry, and two of the three advanced lab sciences (microbiology, anatomy, physiology) to be eligible to apply for the clinical nursing major;
• Minimum cumulative grade-point average of 3.0 (on a 4.0 scale) for all college/university courses;
• Competitive grade-point average in nursing prerequisite courses;
• Minimum GPA of 3.0 for any nursing prerequisite courses;
• Evidence of capacity to uphold the practice standards and ethical codes of the nursing profession; and
• Evidence of motivation toward a nursing career

RN to BSN Option

The RN to BSN online option is for registered nurses who have earned a diploma or associate degree in nursing with a cumulative GPA of a 2.8 of higher and seek a bachelor’s degree in nursing. RN to BSN courses are offered via the Internet with limited trips to campus for some nursing course.

RN to BSN registered nurse applicants must meet the same admission standards described above for the Traditional BSN Option. They must be currently licensed to practice nursing (or eligible for licensure) in Missouri or another state. Completion of the program includes 120 credit hours. The length of the program varies, depending on equivalent prerequisite courses completed and choice of part-time or full-time enrollment.

BSN Accelerated Option

The BSN Accelerated Option is a 15 month program designed for individuals who hold a non-nursing degree at the baccalaureate level or higher.

Students are admitted to the Accelerated BSN Option based on the following criteria:

• A baccalaureate or higher degree from an accredited college or university.
• Two letters of reference from individuals that can attest to the student’s motivation and ability to complete a course of intensive study.
• Statement of career goals
• Description of the applicant’s view of nursing as a profession.
• A personal interview.
• Evidence of academic achievement of a 3.0 cumulative GPA or higher on a 4.0 scale on undergraduate degree.
• Completion of prerequisite courses with a minimum of a C or better
• Evidence of potential and motivation for nursing.
• Evidence of prior work success and/or ability to handle a fast-paced academic program.

A Bachelor of Science (BSN) degree is awarded at graduation, and the graduate may be eligible to take the licensing examination to become a registered nurse (RN).

Transfer Students

Students transferring to MU from another accredited institution of higher education or other schools and colleges within the University are subject to the regulations established by the MU Faculty Council concerning transfer of credit.

For more information regarding the transfer guidelines for the School of Nursing, call (573) 882-0277. Prior to admission, transfer students must have the following:

• Appropriate GPA for credit hours attempted, 3.0 cumulative GPA or higher
• Approval from the associate dean's office

Transfer students must apply for admission through the MU Admissions Office.

International Students

In addition to the admission criteria described above, international students must meet the following criteria:

• Test of Written English (TWE) score of 4 or higher
• Test of Spoken English (TSE) score of 50 or higher
• TOEFL score of 600 (paper-based) or 250 (computer-based) or 100 (internet-based)
• English Language Support Program Test taken with success

Advising

The academic advisor’s office is in room S235 of the School of Nursing Building, (573) 882-0277. In addition, each clinical nursing major is assigned a faculty advisor who is available for consultation about academic or professional matters.

Health Care

Nursing students participate in a variety of on- and off-campus educational experiences. The School of Nursing does not assume responsibility for health-care expenses incurred in either setting. Students assume responsibility for all health care for illness and injury, including emergency treatment. Student Health is located at University Physicians Medical Building, 1101 Hospital Drive, (573) 882-7481. For additional information, visit their web site at http://studenthealth.missouri.edu/.

Graduate

Nursing Graduate Programs

Sinclair School of Nursing
S235 Sinclair School of Nursing Building
573-882-0277
http://nursing.missouri.edu/

About the Sinclair School of Nursing

Nursing was an integral part of the Parker Memorial Hospital Training School, which served as the university’s first hospital in 1901. Although a nursing program was not officially established until 1920 within the School of Medicine, MU graduated its first nursing class in 1904. Sixteen years later, the Curators approved a Graduate Nursing designation. Today, the Sinclair School of Nursing provides a rich and rewarding learning environment for our students. Our faculty includes knowledgeable and skillful teachers, respected scholars and researchers in the nursing profession, and experienced, caring practitioners. The master’s program is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Technology Requirements

• Student will require a computer with a video card (responsibility of the student).
• Computer plus laptop is ideal for clinical courses and on-campus sessions.
• For home: 384K minimum download/upload speed; a business connection best for quality. If using satellite or wireless – connection delays may be a problem and you are expected to find a site near your home to make connection for classes.
• For work: firewalls need to be evaluated, conducive location when at work – not interfering with work.
• Quality – testing (initial, and 30 minutes before classes and as needed)
• Logitech camera (webcam)
• Headset with microphone or speakers and microphone.
• Windows XP or newer, with 1GB RAM, 80GB Hard Drive, 2.0Ghz or better processor (Core 2 Duo -Dual Core preferred).
• Microsoft Office – latest version (to purchase)
• Endnote (to purchase)
• E-mail capabilities
• Functional Anti-Virus Software (example: Norton-Symantec/McAfee) (software)

Career Preparation

The DNP program prepares nurses to develop clinical programs based on the latest evidence. The student will choose an area of study (Adult or Pediatric CNS, FNP, PNP, or FMHNP) on which to focus their clinical practice. Successful completion of the program prepares nurses for an advanced clinical practice in primary care, hospital and community settings as well as leadership roles in practice settings and clinical faculty positions.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.
Nursing

The school offers a baccalaureate program that prepares students for the general practice of nursing, a master’s degree program that prepares advanced-practice nurses and a doctoral degree program. The continuing education program serves practicing nurses throughout the state to update and increase nursing knowledge and skills.

The graduate of the baccalaureate program is a generalist in the practice of nursing, able to design, implement and evaluate nursing systems for individuals, families and small groups. As a generalist, the graduate uses a general concept of nursing as a framework for integrating and organizing specific knowledge in nursing, the sciences and the humanities. Graduates begin their professional careers with a focused nursing perspective and, along with other professional health providers, assume responsibility for meeting the health needs of our society.

Faculty

Assistant Professor T. Bloom**, U. Jefferson*, K. Lane**, T. Ruppar**, A. Vogelsmeier**
Associate Teaching Professor J. E. Bostick*, S. Farrah, D. Gayer*, J. Sherman*
Assistant Teaching Professor K. Bowman*, M. Butler, R. Harris*, L. Kuensting*, G. M. Oliver*, D. Pennington*
Adjunct Associate Professor C. Brooks
Adjunct Assistant Professor C. Crumley*, M. Goedert*, K. Metcalf-Wilson*, C. Stowe-Byrd*, C. S. Ulbrich*
Adjunct Instructor M. Creger, W. Evans, L. Hathaway, G. Kelly, L. Phillips, S. Revelle, J. Welborn, C. Yonkman
Teaching Professor L. Miller*
Associate Research Professor B. Wakefield**
* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Faculty Member - membership is required to teach clinical courses.

Undergraduate

• BSN in Nursing (p. 651)

Academic Regulations

Credit by Examination

RN to BSN and Accelerated BSN students may earn advanced-standing credit in some courses by satisfactorily completing examinations. Those who elect not to take the examinations or who fail to achieve satisfactory results are required to enroll in the courses. The cumulative grade point average is not affected by examination results. A student who has a record of enrollment in a support course with a grade lower than C is not eligible later for credit on the basis of an examination covering the same subject.

The student may acquire advanced standing by taking subject CLEP examinations in university general education courses and required support courses. If no CLEP examination is offered, department examinations may be available. More information on CLEP examinations is available through MU Testing Services.

Distance Education Courses

Certain courses offered by the Mizzou Online (self-paced) may be applied toward degree requirements. Courses such as literature, advanced psychology or sociology may be taken through independent study. Students should not expect to begin nor continue work on independent study courses during the regular semester except by special permission of the associate dean and then only when carrying less than a full course load in residence.

Progression Criteria

Pre-nursing Years

• Satisfactory academic standing requires a minimum semester GPA of 2.0 and a cumulative GPA at or above the standards listed below:

<table>
<thead>
<tr>
<th>Class</th>
<th>Semester</th>
<th>Credits</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>1st semester</td>
<td>1-15 credits</td>
<td>2.8</td>
</tr>
<tr>
<td>Freshman</td>
<td>2nd semester</td>
<td>16-30 credits</td>
<td>3.0</td>
</tr>
<tr>
<td>Sophomore</td>
<td>3rd semester</td>
<td>31-45 credits</td>
<td>3.0</td>
</tr>
<tr>
<td>Sophomore</td>
<td>4th semester</td>
<td>46-60 credits</td>
<td>3.0</td>
</tr>
</tbody>
</table>

• A grade of C or better is required for anatomy, biology, chemistry, ENGLSH 1000, human development, microbiology, nutrition, psychology, nursing courses and Writing Intensive courses. A grade of “C-” or better is required in algebra or statistics. A grade of “F” is unacceptable for any course.

• Students may repeat a course in which an unsatisfactory grade was earned. If less than a C is earned on repetition of a course, students are ineligible to continue enrollment in the School of Nursing.

• Students who are in the traditional BSN option and withdraw in good standing for any reason must contact the Associate Dean for readmission.

Clinical Nursing Years

• Progression into the next semester’s nursing courses is contingent on the completion, with a grade of C or better, of all of the previous semester’s courses.

• A satisfactory academic standing for clinical students is a minimum semester GPA and cumulative GPA of 2.0.

• A grade of C or better is required for all nursing courses. One repetition of a course is permitted, but requires ap-proval of SAP committee. Students who earn less than a C on repetition of a nursing course are ineligible to continue enrollment in the School of Nursing.

• Students in the clinical nursing phase who withdraw in good standing for any reason must contact the Associate Dean for readmission.

Probation and Academic Dismissal

The faculty of the School of Nursing has established criteria governing nursing probation and dismissal.
Pre-nursing Years

- Students who do not meet the requirements set forth in the progression criteria are placed on academic probation. They must attain the cumulative grade point average required for their classification, as outlined previously, within two semesters or they are ineligible to re-enroll in the School of Nursing, and must transfer divisions.
- A student whose semester GPA falls below 1.0 is ineligible to re-enroll at MU for the period of one year.

Clinical Nursing Years

- A student who does not meet the requirements set forth in progression criteria is placed on academic probation.
- A student on academic probation must obtain a cumulative GPA of 2.0 within two semesters or is ineligible to re-enroll in the School of Nursing.
- Students who have been dismissed may reapply through the established admissions procedure for all students and petition the Faculty Assembly Student Admissions and Progression Committee. Students who are readmitted are guided by the rules in operation for the class they join.
- A student in the clinical nursing phase who has been dismissed from the School of Nursing for a second time may not reapply for admission.

Additional Requirements

Students in the clinical phase of the degree requirements must be prepared to provide their own transportation to clinical agencies. In addition, they must meet the following requirements:

- Valid CPR certificate
- yearly TB tests
- Hepatitis B series
- School of Nursing medical form showing current immunizations
- Negative drug screen
- Criminal background check

Practicums

Clinical practicums (patient/client care) are an integral part of the curriculum. Students have the opportunity to practice in a variety of health care and related agencies, including:

- University of Missouri Health Care
- Boone Hospital Center
- Truman Veterans Hospital
- Fulton State Hospital
- Mid-Missouri Mental health Center
- Multiple county and city health departments
- Long-term care facilities
- Day-care centers
- Schools (K-12)

Licensure by the Missouri State Board of Nursing

On receipt of the Bachelor of Science in Nursing degree, students may be eligible to take the NCLEX examination for licensure as registered nurses. The Missouri State Board of Nursing grants a license to practice to persons who meet the policies and regulations contained within the Nursing Practice Act, Chapter 335.011 to 335.096.

Graduate

- MS in Nursing (p. 652)
  - with emphasis in Adult Health Clinical Nurse Specialist (p. 653)
  - with emphasis in Adult Mental Health Nurse Practitioner (p. 653)
  - with emphasis in Advanced Public Health Nurse (p. 653)
  - with emphasis in Advanced Public Health/School Health Nurse (p. 653)
  - with emphasis in Family Mental Health Nurse Practitioner (p. 653)
  - with emphasis in Family Nurse Practitioner (p. 654)
  - with emphasis in Leadership in Nursing and Health Care Systems (p. 654)
  - with emphasis in Nurse Educator (p. 654)
  - with emphasis in Pediatric Clinical Nurse Specialist (p. 655)
  - with emphasis in Pediatric Nurse Practitioner (p. 655)
- PhD in Nursing (p. 660)
- DNP in Nursing Practice (p. 655)
  - with emphasis in Adult-Gerontology Clinical Nurse Specialist (p. 656)
  - with emphasis in Family Nurse Practitioner (p. 657)
  - with emphasis in Family Psychiatric and Mental Health Nurse Practitioner (p. 658)
  - with emphasis in Nurse Leadership and Innovations in Health Care (p. 658)
  - with emphasis in Pediatric Clinical Nurse Specialist (p. 659)
  - with emphasis in Pediatric Nurse Practitioner (p. 660)

About the Sinclair School of Nursing

Sinclair School of Nursing
S235 Sinclair School of Nursing Building
573-882-0277
http://nursing.missouri.edu/

Nursing was an integral part of the Parker Memorial Hospital Training School, which served as the university's first hospital in 1901. Although a nursing program was not officially established until 1920 within the School of Medicine, MU graduated its first nursing class in 1904. Sixteen years later, the Curators approved a Graduate Nursing designation. Today, the Sinclair School of Nursing provides a rich and rewarding learning environment for our students. Our faculty includes knowledgeable and skillful teachers, respected scholars and researchers in the nursing profession, and experienced, caring practitioners. The master's and Doctor of Nursing Practice (DNP) program is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Facilities and Resources

Graduate students in the School of Nursing have access to all campus libraries and the various services they provide. The School of Nursing building is adjacent to University Hospital and Clinics, MU Psychiatric Center and Ellis Fischel Cancer Center. Women and Children's Hospital is located nearby. A variety of learning experiences also are available
at other hospital and health and social service agencies in and around Columbia.

**Career Opportunities**

Nursing is a professional career for those who would like to combine the following words in any number of ways: Servant leadership, challenge, advanced nursing skills, caring, science, and meaningful work. Graduates of our program work in a variety of settings - from hospital inpatient units and hospital based clinics, to community health centers, private practices, and schools, to areas of research and teaching.

**Funding**

Financial assistance is available as scholarships, fellowships, assistantships and traineeships.

**Undergraduate**

**BSN in Nursing**

**Major Core Requirements**

The completion of all requirements for graduation is the responsibility of the student. The Bachelor of Science in Nursing (BSN) is granted to candidates who have satisfactorily completed all of the following requirements:

- Completion of all foundational and clinical nursing courses
- Minimum cumulative GPA of 2.0
- No more than 30 credits through independent study or extension courses
- Completion of all University graduation requirements

**Pre-Nursing requirements**

Curriculum is based on prerequisite of one year of high school biology with lab and grades of C or better. The student must meet all University general education requirements.

**General courses**

^ Denotes Degree Program Requirements
** If taking a Foreign Language for humanities credit, you will complete the sequence of foreign language courses that could total 13 hours.

**NOTE:** Third Year and Fourth Year curriculum subject to change.

## Graduate

### MS in Nursing

#### About

Students in the distance mediated Master’s of Science program obtain advanced nursing preparation in one of two areas:

- Nursing Education (http://nursing.missouri.edu/academics/master-of-science/areas/nurse-educator.php)
- Leadership in Nursing and Healthcare Systems (http://nursing.missouri.edu/academics/master-of-science/areas/leadership.php)

#### Degree Requirements

A minimum of 30 hours beyond the bachelor’s degree is required. Students must take a minimum of 15 hours of 8000-9000 level course work. No more than forty percent of the total required credit hours may be problems, readings and research hours. For example, in a 38-hour master’s degree program, 15 hours may be from problems, readings and research hours.

To satisfy requirements for the MS, a student must:

- Complete an approved plan of study with a cumulative GPA of 3.0
- Successfully defend a written thesis or complete the Master’s Exam
- Complete the program within a five-year period

Because the program is distance-mediated, students are required to obtain the required computer technology for successful participation in distance-mediated courses (see Mizzou Online Computer Requirements (http://online.missouri.edu/prepare/computer.aspx)).

### Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing Master’s webpage (http://nursing.missouri.edu/academics/master-of-science/areas-of-study.php).

#### Thesis/Non-Thesis Requirements

Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of the work included in the course of study offered for the degree. This requirement may be fulfilled by completion of a thesis or Master’s Exam (MS exam).

#### Thesis Option

The Master’s Thesis (NURSE 8090) requires the student to use the research process to discover and/or further develop new knowledge applicable to nursing practice. After completion of the research project, a formal written report using Graduate School guidelines and the American Psychological Association Manual, 6th edition is required. In the final semester, the student must successfully present (defend) the thesis. Three members of the student’s committee must sign the Report of the Master’s Degree Examining Committee (pdf) (M-3), http://gradschool.missouri.edu/forms-downloads/repository/m3.pdf, which is then forwarded through the academic program’s director of graduate studies to the Graduate School by the semester deadline. Details about the thesis option can be found on the School of Nursing Master’s Student Handbook (http://nursing.missouri.edu/handbooks).

#### Non-Thesis Option

In the School of Nursing, the Master’s Examination (MS exam) consists of a paper that should reflect the graduate student’s grasp and synthesis of the clinical and theoretical knowledge gained in the course of study. The MS exam is offered on a pass/fail basis. Students are required to discuss the focus of their MS exam early in their master’s program with their faculty advisor. The Critical Review of the Literature master’s exam is offered for the degree. This requirement may be fulfilled by completion of the thesis option can be found on the School of Nursing Master’s Student Handbook (http://nursing.missouri.edu/handbooks).

#### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (http://nursing.missouri.edu/apply/master-of-science) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

* Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in Massachusetts. You may find more information at this link: http://online.missouri.edu/about/stateauthorization.aspx.

**Deadline for Summer entrance:** February 1

### Admission Contact Information

http://nursing.missouri.edu/
MS in Nursing with Emphasis in Adult Health Clinical Nurse Specialist

As of February 1, 2011, the MU Sinclair School of Nursing no longer accepts applications for the master’s Adult Health CNS and Pediatric CNS programs. After this date, students should apply to the Doctor of Nursing Practice (DNP) program.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (http://gradschool.missouri.edu/academics/programs/nursing/masters.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MS in Nursing with Emphasis in Adult Mental Health Nurse Practitioner

As of March 1, 2012, the MU Sinclair School of Nursing no longer accepts applications for the master’s Adult Mental Health Nurse Practitioner program. After this date, students should apply to the Doctor of Nursing Practice (DNP) program.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (http://gradschool.missouri.edu/academics/programs/nursing/masters.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MS in Nursing with Emphasis in Advanced Public Health Nurse

As of March 1, 2012, the MU Sinclair School of Nursing no longer accepts applications for the master’s Advanced Public Health Nurse program. After this date, students should apply to the Doctor of Nursing Practice (DNP) program.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (http://gradschool.missouri.edu/academics/programs/nursing/masters.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MS in Nursing with Emphasis in Family Mental Nurse Practitioner

As of February 1, 2011, the MU Sinclair School of Nursing no longer accepts applications for the master’s Family Psychiatric & Mental Health Nurse Practitioner program. After this date, students should apply to the Doctor of Nursing Practice (DNP) program.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (http://gradschool.missouri.edu/academics/programs/nursing/masters.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.
MS in Nursing with Emphasis in Family Nurse Practitioner

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (http://gradschool.missouri.edu/academics/programs/nursing/masters.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MS in Nursing with Emphasis in Leadership in Nursing and Health Care Systems

Area of Study Information

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (http://gradschool.missouri.edu/academics/programs/nursing/masters.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

MS in Nursing with Emphasis in Pediatric Clinical Nurse Specialist
As of February 1, 2011, the MU Sinclair School of Nursing no longer accepts applications for the master’s Adult Health CNS and Pediatric CNS programs. After this date, students should apply to the Doctor of Nursing Practice (DNP) program.

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (http://gradschool.missouri.edu/academics/programs/nursing/masters.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

MS in Nursing with Emphasis in Pediatric Nurse Practitioner
As of February 1, 2011, the MU Sinclair School of Nursing no longer accepts applications for the master’s Pediatric Nurse Practitioner area of study. After this date, students should apply to the Doctor of Nursing Practice (DNP) program.

Our PNP area of study is a cooperative effort with the three University of Missouri campuses-Columbia, Kansas City and St. Louis. This cooperation allows for the delivery of pediatric nurse practitioner education using the expertise from each campus.

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (http://gradschool.missouri.edu/academics/programs/nursing/masters.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

DNP in Nursing Practice
About
The DNP program at Mizzou prepares leaders in the advanced nursing practice roles of Pediatric & Adult-Gerontology Clinical Nurse Specialist, (http://nursing.missouri.edu/academics/dnp/areas/adult-gerontology-and-pediatric-cns.php) Family Nurse Practitioner (http://nursing.missouri.edu/academics/master-of-science/areas/family-nurse-practitioner.php), Pediatric Nurse Practitioner (http://nursing.missouri.edu/academics/master-of-science/areas/pediatric-np.php), Family Psychiatric & Mental Health Nurse Practitioner (http://nursing.missouri.edu/academics/master-of-science/areas/mental-health-fmhnlp.php) and Leadership and Innovation in Health Care (http://nursing.missouri.edu/academics/dnp/areas/leadership.php). Our program strengths include a strong clinical focus and a well-developed trajectory for the development of clinical scholarship. Unique aspects of our program are a focus on rural and underserved populations and the opportunity for students to select electives in family dynamics, financial management, nursing education, or symptom management. Successful completion of the program prepares nurses for an advanced clinical practice in primary care, hospital and community settings as well as leadership roles in practice settings and clinical faculty positions.

Degree Requirements
The DNP in nursing requires a minimum of 72 credits beyond the baccalaureate degree. Of the 72 hours, 36.5 credits must be completed at the University of Missouri.

Ultimately, the student, in collaboration with their DNP residency committee, determines the student’s plan of study and total credit hours necessary to adequately prepare the student to successfully complete their DNP residency project.

Upon admittance to the program, the following must be completed by the student and documentation of these items must be submitted before registering for coursework:

- Current required immunizations
- Satisfactory criminal background check
- Satisfactory drug screen
- Current CPR certification
- Proof of undisciplined nursing licensure

To ensure that your computer is set up and ready to begin your online course, your computer must comply with the Mizzou Online Computer Requirements webpage.

DNP students are required to spend one week on campus the first summer of enrollment and during their last semester of enrollment. All clinical courses will have required on-campus days that range from one to four days during the semester (see required On Campus dates (http://nursing.missouri.edu/academics/master-of-science/on-campus-dates.php)).
Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing DNP webpage (http://nursing.missouri.edu/academics/dnp/areas-of-study.php).

Doctor of Nursing Practice Residency Project Requirements

The DNP Residency Project is an in-depth, evidence-based practice change project that will focus on a theoretically and clinically relevant problem impacting a rural or other underserved population or critical healthcare system need. Specifics of the DNP Residency Project can be found the in the Sinclair School of Nursing DNP Student Handbook (http://nursing.missouri.edu/handbooks).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Doctor of Nursing Practice program (http://nursing.missouri.edu/apply/dnp) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.*

* Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in several states. You may find more information at this link: http://online.missouri.edu/about/stateauthorization.aspx.

Application Deadlines: November 1 (for early acceptance) and March 1

**Total Credits: 74.5-77**

**Total Clinical Hours: 1110-1260***

* On-campus visits required with specialty clinical courses.

# Nursing course electives from which to choose:

- NURSE 7750 Physical Function and Older Adults
- NURSE 7751 Psychosocial Function and Older Adults
- NURSE 8010 Family Dynamics and Intervention
- NURSE 8720 Symptom Management in Acute and Chronic Illness
- NURSE 8854 Teaching Strategies in Nursing
- NURSE 8864 Curriculum Development in Nursing
- NURSE 8820 Health Care Financial Management

Additional interdisciplinary online elective choices can be found in the areas of geriatric care management, gerontology, grantsmanship, health ethics, health informatics, multicultural education, online education, public health, and youth development (see http://online.missouri.edu/degreeprograms/degrees.aspx).

*** Reflects minimum required DNP clinical and project hours. Additional clinical hours may be required based on specialty, annual portfolio evaluation, and complexity of DNP clinical residency project.

### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the DNP in Nursing Practice (http://gradschool.missouri.edu/academics/programs/nursing/dnp.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

**DNP in Nursing Practice with Emphasis in Nurse Leadership and Innovations in Health Care**

### Area of Study Information

PhD in Nursing

About the PhD Program
The PhD program prepares scholars to conduct original research, thereby; advancing the body of knowledge that guides nursing practice and contributes to improving population health and healthcare systems. Successful completion of the program prepares graduates for college or
University of Missouri faculty positions as well as leadership roles in nursing, health care, industry, and governmental agencies.

The MU Sinclair School of Nursing (MUSSON) offers a challenging and yet enriching PhD program with two options.

- **Distance-Mediated PhD Program Option**: PhD coursework may be accessed online through the Distance-Mediated PhD program option by learning over the World Wide Web using the Blackboard learning platform. This option also requires a 5 Day On Campus visit (held on the University campus) the first summer of enrollment and 3-4 Day On Campus Intensives every April until coursework is completed (see [PhD On Campus Dates](http://nursing.missouri.edu/academics/phd/on-campus-dates.php)). Because the program is distance-mediated, students are responsible for obtaining the required technology for synchronous participation in asynchronous distance-mediated courses (see [Computer Requirements](http://online.missouri.edu/prepare/computer.aspx)).

- **International Residential PhD Option**: Through the International Residential PhD option, international students attend the MU campus hybrid classes in Columbia, Missouri. The International Residential PhD student attends the hybrid classes in person, while the Distance-Mediated student cohort participates electronically. International Residential PhD students may also enroll in traditional residential course offerings through the MU Sinclair School of Nursing and the rest of the MU campus. Students in the International Residential PhD option must enroll in 4 credits during their first summer and maintain full-time status by enrolling in 9 credits each fall and spring term thereafter. Of the credits each term, at least 6 credits must be either traditional face-to-face or hybrid coursework in order to qualify for and retain the F-1 student visa status. The remaining 3 credits each term may be taken 100% on-line.

The PhD curriculum and program requirements are the same whether you choose the Distance-Mediated PhD option or the International Residential PhD option. Only the method of course delivery varies.

**Degree Requirements**

The PhD in Nursing at MU requires a minimum of 72 credit hours beyond the baccalaureate degree. Students entering with a master's degree can transfer a maximum of 30 credits. A minimum of 42 credit hours must be completed at the University of Missouri. There are two curricular options (http://nursing.missouri.edu/academics/phd/curriculum): (a) post-baccalaureate (BS-PhD) and (b) post-master's (MS-PhD). For both options, the doctoral curriculum is divided into three categories:

- **Nursing and Health Care Content areas** - Minimum of 20 credit hours (theory analysis and development, specialty area applied sciences, substantive science seminars, and education courses, as well as teaching practicum experiences)

- **Research and Inquiry** - Minimum of 40 credit hours (philosophy of science, statistics and measurement, qualitative and quantitative methods courses, research practicum experiences as well as dissertation research)

- **Collateral area** - Minimum of 6 - 12 credit hours (coursework taken outside the School of Nursing that helps to support the dissertation research topic).

**Sample Plan of Study**

Sample plans of study for both the BS-PhD and the MS-PhD can be found on the School of Nursing PhD Curriculum webpage (http://nursing.missouri.edu/academics/phd/curriculum). Ultimately, the doctoral program committee, in collaboration with the student, determines the student’s plan of study and total credit hours necessary to adequately prepare the student to successfully complete their dissertation research.

**Qualifying Process**

To be officially admitted to the PhD program, the student must pass a qualifying examination or process. Students admitted with a master’s degree have completed the qualifying process.

Students admitted with a bachelor’s degree are admitted to the PhD program on a provisional basis. Following successful completion of a qualifying process, bachelor’s prepared students will be granted admission to the PhD program. To fully qualify for the PhD program, BSN-to-PhD students must earn at least a grade of B in the following:

- NURSE 7100 Theoretical Basis for Advanced Nursing
- NURSE 7150 Research Basis for Advanced Nursing
- A three-hour graduate-level statistics course
- Nine credits in nursing applied sciences

The student initiates the qualifying process by enrolling in three credits of N8900 Research Practicum with a member of their BSN-PhD program committee. The student is officially admitted to the PhD program following approval of the written report and oral presentation for N8900 by the BSN-PhD Program Committee.

**Comprehensive Examination Process**

Through the PhD Comprehensive Examination process, the student demonstrates his/her ability to address the theoretical, methodological and substantive issues of his/her field of study. The examination tests the breadth and depth of knowledge and the ability to integrate ideas across substantive areas. The student must be enrolled to take this examination and it may be administered only when MU is officially in session. The student is not allowed to sit for the doctoral comprehensive examination until the last semester of course work or when course work is substantially completed, all incomplete grades are satisfied, and the PhD Competencies are met.

The Comprehensive Exam, which is prepared by the student's PhD program committee, has a written component followed by an oral section. The written component of the examination is completed at home or another site of the student’s selection during five consecutive days. The oral defense is a two-hour examination by the PhD program committee. The two sections of the examination must be completed within one month. The student is expected to complete the Comprehensive Examination within five (5) years of enrollment in the PhD program and it must be completed at least seven (7) months before the final defense of the doctoral dissertation. Additional details of the process can be found on the School of Nursing PhD Comprehensive Exam webpage (http://nursing.missouri.edu/academics/phd/comprehensive-exam.php).

**Dissertation Requirements**

The culmination of the PhD degree is the completion of a written doctoral dissertation. The dissertation must:

- Be written on a subject approved by the candidate's doctoral dissertation committee
- Embody the results of original and significant investigation
- Be the candidate’s own work.
Within the MU Sinclair School of Nursing, the PhD Dissertation process consists of:

- Development of a dissertation proposal
- Approval of the proposal by the doctoral dissertation committee
- Approval of the research project by the Health Sciences Institutional Review Board
- Ethical conduct of the research project
- Writing the doctoral dissertation
- Public defense of the doctoral dissertation
- Approval of the dissertation by the candidate’s doctoral dissertation committee
- Submission of the written doctoral dissertation in an approved format.

Students have five (5) years from completion of the PhD Comprehensive Exam to complete the doctoral dissertation. Additional details of the process can be found on the School of Nursing PhD Dissertation webpage (http://nursing.missouri.edu/academics/phd/dissertation).

Admissions

February 1 is the application deadline for the School of Nursing PhD program.

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Sinclair School of Nursing PhD program (http://nursing.missouri.edu/apply/phd) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

* Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in Massachusetts. You may find more information at this link: http://online.missouri.edu/about/stateauthorization.aspx.

Graduate Certificate in Adult-Gerontology Clinical Nurse Specialist

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

For admission requirements, refer to the Graduate School’s website for the minimum qualifications for the degree program (http://gradschool.missouri.edu/academics/programs) and the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/adult-gerontology-clinical-nurse-specialist-certificate/adult-gerontology-ge/Gedt.html

Graduate Certificate in Adult Health Clinical Nurse Specialist

The Post-Master’s Certificate Program at the MU Sinclair School of Nursing enables nurses with a master’s degree to expand their knowledge and scope of practice in one or more specialty areas. Adult Health CNs are clinical experts in the diagnosis and treatment of illness, and delivery of evidence-based nursing interventions for adults and older adults across the care continuum from wellness through acute care. Additionally, CNSs are experts in executing delegated medical regimes associated with the diagnosis and treatment of disease for a specialty population. A CNS may be unit-based or have agency-wide responsibilities for a patient population. The CNS has a unique APRN role to integrate care across the continuum and through three spheres of influence: direct patient/client care, nurses & nursing practice, and systems and organizations (APRN Joint Dialogue Group, 2008). Thus, in addition to direct patient/client care, key elements of CNS practice are to create environments through mentoring and system changes that empower nurses to develop caring, evidence-based practices. Accordingly, CNSs are involved in developing staff education as well as safety and quality improvement activities. Certificate is available via online learning.

For more information about certificate, contact:
Office of Student Affairs
Sinclair School of Nursing
S235 School of Nursing
Columbia, MO 65211

Graduate Certificate in Family Mental Health Nurse Practitioner

Advanced practice nurses are traditionally prepared at the graduate level in a specific clinical area. The specialty area may be identified in terms of population (e.g. pediatrics or adults), and/or type of problem (e.g. mental health). The advanced practice nurse is directly accountable for clinical judgments which includes independent and interdependent decision making. Holders of this certificate provide primary mental health care at an advanced level to individuals of all ages and families. Includes
differential diagnosis and management of psychiatric & mental health disorders, medication management, and psychotherapeutic interventions. Certificate is available via online learning.

**Graduate Certificate in Pediatric Clinical Nurse Specialist**

The Post-Master’s Certificate Program at the MU Sinclair School of Nursing enables nurses with a master’s degree to expand their knowledge and scope of practice in one or more specialty areas. Pediatric CNSs are clinical experts in the diagnosis and treatment of illness, and delivery of evidence-based nursing interventions for children, adolescents and their families across the care continuum from wellness through acute care. Additionally, CNSs are experts in executing delegated medical regimes associated with the diagnosis and treatment of disease for a specialty population. A CNS may be unit-based or have agency-wide responsibilities for a patient population. The CNS has a unique APRN role to integrate care across the continuum and through three spheres of influence: direct patient/client care, nurses & nursing practice, and systems and organizations (APRN Joint Dialogue Group, 2008). Thus, in addition to direct patient/client care, key elements of CNS practice are to create environments through mentoring and system changes that empower nurses to develop caring, evidence-based practices. Accordingly, CNSs are involved in developing staff education as well as safety and quality improvement activities. Certificate is available via online learning.

For information about certificate, contact:

Harry S Truman School of Public Affairs

Established by the University of Missouri Board of Curators in May 2001, the Harry S Truman School of Public Affairs is dedicated to the advancement of study and practice of governance in the state, nation and world. The School offers graduate degrees and certificates in the theory and practice of public and nonprofit management, public policy, and organizational change.

In keeping with Truman’s legacy, TSPA has numerous international linkages. Truman School students and alumni have served as Peace Corps volunteers, United Nations interns, in the US State Department, other national consulates or embassies in Washington, and international non-government organizations (NGOs) such as the Red Cross/Red Crescent. Truman School faculty members participate in international projects in Europe, Asia, Africa, and South America. Scholars from Europe, Asia, and other parts of the world regularly visit the Truman School, helping to inform curriculum and classroom discussions.

Undergraduate

The School of Public Affairs currently offers academic pursuits solely at the graduate level.

Graduate

The Harry S Truman School of Public Affairs offers master’s and doctoral degrees in the theory and practice of public and nonprofit management, public policy, and organizational change. MPA students are prepared for careers in a new public service that spans government, nonprofit, and private sectors. PhD students are trained for careers in academic and research institutions.

Graduate Degrees
Master of Public Affairs (p. 667) (MPA)
Doctor of Philosophy in Public Affairs (p. 668) (PhD)

Cooperative Dual Degrees
Master of Public Affairs and Juris Doctorate
Master of Public Affairs and Master of Public Health

Graduate Certificates:
Grantsmanship Graduate Certificate (p. 670)
Nonprofit Management Graduate Certificate (p. 670)
Organizational Change Graduate Certificate (p. 671)
Public Management Graduate Certificate (p. 671)
Science and Public Policy Graduate Certificate (p. 671)

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

About the Study of Public Affairs

The Harry S Truman School of Public Affairs offers certificates, master’s and doctoral degrees in the theory and practice of public and nonprofit management, public policy, and organizational change. MPA students are prepared for careers in a new public service that spans government, nonprofit, and private sectors. PhD students are trained for careers in academic and research institutions.

Faculty

Professor Emeritus G. B. Adams**
Professor of Professional Practice S. Allcorn
Associate Professor B. Curs, C. Heflin**, S. Holan, L. Keiser**, C. Koedel, B. Naughton,
Associate Professor Emeritus C. L. Sampson*
Research Professor B. Dabson
Associate Research Professor J. Scott**
Assistant Research Professor C. Fulcher*
Assistant Teaching Professor E. Gustafson, A. Hull

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in public affairs, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

• MPA in Public Affairs (p. 667)
• PhD in Public Affairs (p. 668)

MU Truman School of Public Affairs students study with outstanding faculty, who are talented teachers as well as active, nationally recognized scholars. Policy forums, round-tables with policy makers, lectures by distinguished visiting scholars, and research symposia also enrich student learning. Small classes taught both on campus and in Jefferson City, the state’s capital, make for a lively learning environment. The Truman School MPA program provides a balance of public service values, interpersonal and analytic skills, and a thorough knowledge of administrative and policy processes.

Degree Requirements

Consisting of 45 hours of graduate work, the MPA program includes a core (27 hours), an area of specialization (15 hours) and an internship (3 hours). The areas of specialization are Nonprofit and Public Management, and Public Policy.

Students with significant public service experience may have some courses waived, making the MPA program 33 hours for them. The MPA’s Mid-Career option is available to students with 3-5 years of public service experience.

Specialization

Specialization
Internship
During the summer after their first year in the program, students without significant public sector work experience are required to complete a public service internship. Interns apply what they have learned during the first year in the program, plus they gain practical experience that enables deeper learning during second-year classes.

Application and Admission Information
Admission to the Master of Public Affairs Program
Ms. Nicole Harris, Assistant Program Director for Student Services
101 Middlebush Hall, Columbia, Missouri 65211
573-884-1656
Truman@missouri.edu

Admission Criteria
Fall deadline: Priority admission and funding consideration are given to applications received by January 15. Applications submitted after January 15 will be considered, with preference going to those received by May 1. Prospective students applying after May 1 will be considered for fall admission on a case by case basis.

Spring deadline: Priority admission consideration is given to applications received by November 15.

Assistantship/Fellowship deadline: January 15
• Minimum GPA: 3.0 in last 60 hours
• Minimum TOEFL scores:
  • iBT: 80
  • CBT: 213
  • PBT: 550
• Minimum preferred GRE scores:
  • Prior to August 2012: 1000 (combined)
  • After August 2012: 300 (combined)

Admission to the MPA program is competitive and open to students holding baccalaureate degrees from accredited institutions and meeting admissions standards of the Truman School of Public Affairs and the Graduate School.

Required Application Materials
To the Graduate School:
• All required Graduate School documents
To the Truman School MPA Program:
• 3 letters of recommendation (at least two academic)
• GRE score report (GRE alternatives accepted: LSAT and GMAT scores will be considered)
• Résumé
• Statement of interest
• Unofficial transcripts

Financial Aid From the Program
To be considered for funding from the Truman School (including a Graduate Research Assistantship and scholarships), please arrange to have all of your application materials submitted by the January 15 deadline and include a GRA application (http://catalog.missouri.edu/undergraduategraduate/trumanschool/publicaffairs/publicaffairs/mpa-public-affairs/GRA_Skills_Set.docx) in your supplemental application materials. Contact the Truman School at (573) 884-1656 or visit http://truman.missouri.edu/degrees-programs/funding for more details.

PhD in Public Affairs
PhD Contact: Dr. Colleen Heflin
(573) 882-4398
heflincm@missouri.edu

About the PhD Program in Public Affairs
The Harry S Truman School of Public Affairs at the University of Missouri offers an interdisciplinary PhD in Public Affairs that prepares graduates for careers in universities, colleges and applied research settings in the public, private and nonprofit sectors. Students complete core sequences in public policy and management as well as research methods, and specializations tailored to students’ research interests.

PhD Acceptance
The Harry S Truman School of Public Affairs PhD is an academic and research-oriented degree in public affairs. Applicants without previous coursework in public affairs (public management and policy) are required to complete up to 18 hours of foundation coursework.

Acceptance Criteria
In making its decision, the PhD committee considers:
• The applicant’s record of academic achievement (Applicants typically have undergraduate GPAs higher than 3.0, and graduate GPAs higher than 3.5.)
• The quality of the written statement explaining why the applicant wants to pursue the degree
• The quality of the applicant’s writing sample
• Evaluations contained in letters of recommendation
• Acceptable performance on the Graduate Record Examination (GRE). Applicants typically have combined scores of 310 or higher.
• Results of a personal interview with the applicant in person or by telephone
• Other factors bearing upon the candidate’s potential for success

Application Procedure
1. Applications for the PhD program are accepted for fall entrance only. For a prospective student’s application to be complete, the Truman School must receive all required materials by January 15.
2. Applicants are required to upload application materials to the MU Graduate School Application for Admission.
3. Official transcripts must be mailed to the Graduate School and FRE/TOEFL scores directed to institution code 6875.

Required Application Materials
A student’s application is complete when all of the following materials have been received. The Truman School’s downloadable checklist contains more information on the following required application materials:
• University of Missouri Graduate School application (application fee required)
• Statement of interest
• Curriculum vitae/Résumé
• Writing sample
• Personal data sheet
• Three letters of recommendation
• Unofficial undergraduate and graduate transcripts
• Official Graduate Record Examination (GRE) score report (must be sent by ETS)
• Official TOEFL score report (must be sent by ETS; required of applicants whose native language is not English)

Entrance Exams
• The Graduate Record Examination (GRE) is required of all applicants.
• Applicants whose native language is not English must achieve a score of 625 (107 iBT) in the Test of English as a Foreign Language (TOEFL).
• Use the following codes to submit test scores to the Truman School:
  • University of Missouri-Columbia Institution Code: 6875
  • Truman School Department Code: 4801

Cost of Attendance and Financial Aid
Prospective students should visit the University of Missouri Graduate School financial information and support web page for current information about tuition and fees. The University’s Office of Student Financial Aid provides information about other types of aid students can obtain, including federally financed student loans. Financial aid applications are due by January 15.
Additional Minors and Certificates - Public Affairs

Graduate Certificates

- Certificate in Global Public Affairs (p. 670)
- Certificate in Grantsmanship (p. 670)
- Certificate in Nonprofit Management (p. 670)
- Certificate in Organizational Change (p. 671)
- Certificate in Public Management (p. 671)
- Certificate in Science and Public Policy (p. 671)

Graduate Certificate in Global Public Affairs

The graduate certificate in Global Public Affairs includes 12 credit hours of coursework plus an international public affairs experience. The required course provides students with the comparative institutional and economic foundations to understand the complexities of governance and policymaking internationally. The three elective courses, selected in consultation with the director of the Global Public Affairs certificate, allow students to delve deeply into specific realms of global policy or governance. The international experience component can be satisfied through an approved public affairs related internship or study abroad course. Students with substantial international public affairs experience prior to entering the certificate program should consult with the certificate director. International students automatically satisfy this experiential requirement through their study in the U.S.

Required Course

| Course in Comparative Governance (in development) | 3 |

Take three of the following:

| PUB_AF 8630 | Organizational Change in a Community and Global Context | 3 |
| PUB_AF 8850 | Policies and Institutions of the European Union | 3 |
| PUB_AF 8860 | International Comparative Rural Policy | 3 |

Total Credits: 12

Graduate Certificate in Grantsmanship

Harry S Truman School of Public Affairs
101 Middlebush Hall
573-884-1656

The Truman School offers one of the few completely online grant writing certificate programs in the country, making it easy to fit classes into a busy schedule. Students will learn to write grant proposals and manage grant funded programs effectively. Learn winning grant writing techniques and proper grant management with this four-course graduate certificate in grantsmanship. Our program is well suited for a variety of audiences, including community-based professionals in nonprofit organizations, state and local government and educators in K-12 settings. Graduate and post-doctoral students and young faculty members who are seeking to become more competitive in research careers dependent on external funding will find this certificate to be useful.

Eligibility

Students do not need to be enrolled in a graduate degree program at MU to participate in the program.

Plan of Study

Students must complete 12 credit hours to receive the certificate.

Required Courses

| PUB_AF 8830 | Grant Writing I | 3 |
| PUB_AF 8831 | Grant Writing II | 3 |
| PUB_AF 8832 | Sponsor Relationships | 3 |
| PUB_AF 8833 | Grant Award Management | 3 |

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/grantsmanship-graduate-certificate/grants-ge/Gedt.html

Graduate Certificate in Nonprofit Management

Harry S Truman School of Public Affairs
101 Middlebush Hall
573-884-1656

The graduate certificate in nonprofit management provides students with the managerial, fiduciary, and analytical tools necessary for leadership of nonprofit entities. The goal is to develop and hone skills that can be used to achieve organizational missions uniquely aimed at serving the interests of the community.

Eligibility

Students do not need to be enrolled in a graduate degree program at MU to participate.

Careers

As one of the fastest growing sectors in today’s economy, nonprofit organizations have undergone a professionalization in management, with board members changing their orientation from one of personal networks to a bottom-line, information-based outlook. Successful nonprofit organizations today thrive on their ability to compete effectively in the marketplace, read community needs and priorities, and deliver appropriate services within budget.

Plan of Study for the Nonprofit Management Certificate

Students must complete 12 credit hours to receive the certificate.

Required Courses

| PUB_AF 8520 | Human Resources Management and Development in Public and Nonprofit Sector | 3 |
Graduate Certificate in Public Management

Harry S Truman School of Public Affairs
101 Middlebush Hall
573-884-1656
http://truman.missouri.edu/degrees-programs/certificates

The graduate certificate in public management encompasses administrative skills for ethical, effective leadership and management roles in the public service. Students completing this graduate certificate will be well positioned to begin or advance a public service career with many expecting to pursue management careers in state and local governments.

Eligibility
Students do not need to be enrolled in a graduate degree program at MU to participate.

Plan of Study
Students must complete 12 credit hours to receive the certificate.

Elective Course

The fourth course is an elective chosen in consultation with the certificate coordinator from among the courses offered by the Truman School or by another graduate unit at MU.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/public-management-graduate-certificate/pub-mgmt-ge/Gedt.html

Graduate Certificate in Science and Public Policy

Harry S Truman School of Public Affairs
101 Middlebush Hall
573-884-1656
http://truman.missouri.edu/degrees-programs/certificates

The public policy specialization offers students a strong foundation in the skills necessary to work effectively in the policy environment. Students in the public policy specialization learn theories of the policy process, quantitative and qualitative research methods to analyze policy, and program evaluation. Students also have the opportunity to gain expertise in specific policy areas including education policy, environmental policy, health policy, social policy, and regional development policy.

Eligibility
Students do not need to be enrolled in a graduate degree program at MU to participate in the program. Some prerequisite courses may be necessary for students without prior coursework in statistical or economics analysis.
Plan of Study

Students must complete 12 credit hours to receive the certificate.

Elective Course

The third and fourth courses are electives chosen in consultation with the certificate coordinator from among the courses offered by the Truman School or by another graduate unit at MU.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/science-and-public-policy-graduate-certificate/sci-pub-pol-ge/Gedt.html
Interdisciplinary Academic Programs

MU offers a number of academic degree programs that are planned, administered and taught collaborative by faculty from numerous disciplines. Those interdisciplinary programs are enumerated in this section of the catalog.
Biomedical Sciences

The study of biomedical sciences includes the major disciplines of:

- anatomy (gross or microscopic)
- physiology/pharmacology (molecular, cellular and integrative)
- biochemistry/molecular biology
- endocrinology
- toxicology

Specific areas of interest are exercise biology including cardiac, vascular and muscle biology; cardiovascular biology including neuroendocrine regulation; membrane transport biology including cystic fibrosis and cardiac disease; and reproductive biology including environmental estrogen toxicities and developmental processes.

All of the biomedical sciences degrees at MU are at the graduate level, and within two very distinct programs. See the Graduate tab for details on these options.

For undergraduate students interested in studying biomedical sciences, there are more than two dozen courses taught at the undergraduate level. See the Courses tab for details on these options.

Adjunct Associate Professor G. S. Johnson*, G. E. Rottinghaus*
Clinical Associate Professor I. A. Constantinescu, B. L. Frapper*
Assistant Teaching Professor D. Cross, M. C. Kuehl-Kovarik**
Research Professor S. Yang**

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
- **Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in biomedical sciences, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

Biomedical Sciences Area Program Degrees

- MS in Biomedical Sciences with emphasis in Biomedical Sciences (p. 675)
- PhD in Biomedical Sciences (p. 678)

Biomedical MS Degrees with Veterinary Medicine Emphasis Areas

- MS in Biomedical Sciences with emphasis in Comparative Medicine (post DVM degree only) (p. 676)
- MS in Biomedical Sciences with emphasis in Pathobiology (p. 677)
- MS in Biomedical Sciences with emphasis in Veterinary Medicine and Surgery (p. 677)
An Array of Biomedical Degrees Offered

The University of Missouri offers several degree program options in Biomedical Sciences:

• The Biomedical Sciences Area Program offers a master’s program in basic biomedical sciences and a PhD area program. Dual biomedical-DVM degrees are other options. Students in the Biomedical Sciences Area Program do not have to be enrolled in the College of Veterinary Medicine.

• The Graduate School also confers three MS degrees related to veterinary biomedical sciences. Available emphasis areas are (a) comparative veterinary medicine, (b) pathobiology and (c) veterinary medicine and surgery. Generally, applicants to these biomedical degree programs are concurrently enrolled in College of Veterinary Medicine or have previously earned a Doctorate in Veterinary Medicine (DVM).

Additional Program Options

Pathobiology

The Pathobiology Area Program offers a PhD in Pathobiology (p. 710).

DVM/Graduate degree in Biomedical Sciences

The Biomedical Sciences graduate programs enable veterinary medical students to pursue studies in the basic biomedical discipline of their choice for a PhD or MS degree while enrolled in the College of Veterinary Medicine. The program is designed to prepare students for advanced professional careers in universities and colleges, research institutes and industrial research.

With consent of the student’s graduate program committee, courses from the professional curriculum (which includes a major portion of the core curriculum) can be accepted toward the graduate degree.

Master of Science: The MS/DVM program enables veterinary medical students to complete a master’s degree while enrolled in the College of Veterinary Medicine. The program allows qualified students to seek in-depth involvement in the basic biomedical discipline of their choice. Six hours of 9090 Research that result in an original thesis are required. Financial support may be provided to VM2-4 students through teaching assistantships in gross anatomy laboratory (V_BSCI 5500 Veterinary Anatomy with Laboratory).

Doctor of Philosophy: The PhD/DVM program requires a minimum of 30 credit hours of 9090 Research culminating in completion of original research and defense of a written dissertation.

Major biomedical disciplines include anatomy of domestic species (gross or microscopic); physiology/pharmacology (molecular, cellular and integrative); biochemistry/molecular biology; endocrinology; and toxicology. Specific areas of interest are exercise sciences; cardiovascular and neurosciences; muscle biology; membrane transport biology; reproductive biology; and developmental toxicology.

Graduate

MS in Biomedical Sciences with Emphasis in Biomedical Sciences

Director of Graduate Studies Dr. Douglas Bowles
Biomedical Sciences Area Program
W111 Veterinary Medicine Building
1600 Rollins Road
Columbia, MO 65211
573-882-7305
http://www.dbms.missouri.edu/

About the Program

The MS program in Basic Biomedical Sciences provides in-depth training to prepare scientists in interdisciplinary basic research (molecular, cellular, organ and integrative). Departmental faculty members represent diverse Medical-related basic science disciplines that provide a unique opportunity for biomedical research training. Core courses include physiology, cell biology and an introduction to research methodology. The multidisciplinary focus of the program is also emphasized in the candidate’s MS program committee.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission Criteria

• Fall deadline: January 15
• Spring deadline: September 15
• Summer deadline: Not Applicable
• Minimum TOEFL scores:
  Internet-based test (iBT) Paper-based test (PBT)
  100 600
• Minimum GRE scores:
  When did you take the GRE? Verbal + Quantitative
  Prior to August 1, 2011 100 3.5
  On or After August 1, 2011 300 3.5
• Minimum GPA: 3.0
• Required prerequisite courses: Biology (10 hrs), Physics (3 hrs), Biochemistry (3 hrs), Chemistry (10 hrs), Calculus (3 hrs)

NOTE: The GRE requirement may be waived for applicants with an MD or DVM. Prerequisite courses may be completed during the master’s program.

Required Application Materials

To the Graduate School:
• All required Graduate School documents

To the Biomedical Sciences MS Program:
The University of Missouri Comparative Medicine Program provides advanced graduate training to veterinarians who wish to pursue careers in comparative medicine. Trainees may combine one year of residency training in clinical, administrative and diagnostic laboratory animal medicine with two or more years of research training. Alternatively, trainees with experience in laboratory animal medicine, comparative pathology or related disciplines may begin research training at the time of admission. Training is designed to prepare individuals for a variety of careers including comparative medicine research and laboratory animal medicine/collaborative research. Students may either pursue an MS or PhD. Research opportunities are available in several areas including infectious disease, molecular biology, mouse biology, genetics, microbiota, biomedical engineering, cancer and cardiovascular physiology. Resources available include the University of Missouri Office of Animal Resources (OAR), the Laboratory of Infectious Disease Research (LIDR), Mutant Mouse, Rat and Swine Resource and Research Centers and IDEXX-Bioresearch, an internationally known research animal diagnostic laboratory.

Programmatic Strengths

- The opportunity for comparative studies in a joint veterinary and human medical environment
- The multidisciplinary nature of the faculty participating in the training program
- The potential to couple training in research with residency training in laboratory animal medicine, comparative pathology, diagnostics, and training toward board certification
- Strong research resources including AAALAC-accredited research animal facilities, a full-service, internationally-recognized research animal diagnostic laboratory, a BSL-3 infectious disease research facility and NIH-funded research resource centers for mice, rats and swine
- A long history of successful training in comparative medicine

Class Size & Resources

Typically there are 10-12 postdoctoral trainees in the program at a given time. Networking and sharing of experiences and cooperation among trainees is an important factor in the success of the program.

Admission Criteria

- Fall deadline: N/A
- DVM or equivalent from an accredited college of veterinary medicine or successful completion of the foreign equivalency examination and approval by the Comparative Medicine Program faculty
- Meet standards for admission to the Graduate School

Required Application Material

To the Graduate School:

- All required Graduate School documents

To the CMP Postdoctoral MS Program:

- For combined residency/degree positions, the CMP uses the Veterinary Internship & Residency Matching Program – see virmp.org (http://virmp.org) for details.

Degree Requirements

The CMP emphasizes comparative medicine research training and includes graduate course work. Research training is performed under an established investigator in one of several life science departments on the MU campus. Recommended graduate courses include pathology of laboratory animals, methodology of animal experimentation, biology of laboratory animals, laboratory animal resource management, grant and manuscript writing for biomedical researchers, laboratory and project management, biomedical ethics and seminars. Elective courses frequently taken by trainees include basic and advanced courses in immunology, molecular biology, physiology, reproductive biology and/or disease pathogenesis. Research typically deals with the application of an animal model in the investigation of human diseases or the study of naturally occurring diseases of laboratory animals. Requirements for elective course work, residency and teaching experience are determined.

MS in Biomedical Sciences with Emphasis in Comparative Medicine (post DVM)

Admission Contact Information

Director of Graduate Studies Craig Franklin, DVM, PhD

About This Degree

The University of Missouri Comparative Medicine Program provides advanced graduate training to veterinarians who wish to pursue careers in comparative medicine. Trainees may combine one year of residency training in clinical, administrative and diagnostic laboratory animal medicine with two or more years of research training. Alternatively, trainees with experience in laboratory animal medicine, comparative pathology or related disciplines may begin research training at the time of admission. Training is designed to prepare individuals for a variety of careers including comparative medicine research and laboratory animal medicine/collaborative research. Students may either pursue an MS or PhD. Research opportunities are available in several areas including infectious disease, molecular biology, mouse biology, genetics, microbiota, biomedical engineering, cancer and cardiovascular physiology. Resources available include the University of Missouri Office of Animal Resources (OAR), the Laboratory of Infectious Disease

Programmatic Strengths

- The opportunity for comparative studies in a joint veterinary and human medical environment
- The multidisciplinary nature of the faculty participating in the training program
- The potential to couple training in research with residency training in laboratory animal medicine, comparative pathology, diagnostics, and training toward board certification
- Strong research resources including AAALAC-accredited research animal facilities, a full-service, internationally-recognized research animal diagnostic laboratory, a BSL-3 infectious disease research facility and NIH-funded research resource centers for mice, rats and swine
- A long history of successful training in comparative medicine

Class Size & Resources

Typically there are 10-12 postdoctoral trainees in the program at a given time. Networking and sharing of experiences and cooperation among trainees is an important factor in the success of the program.

Admission Criteria

- Fall deadline: N/A
- DVM or equivalent from an accredited college of veterinary medicine or successful completion of the foreign equivalency examination and approval by the Comparative Medicine Program faculty
- Meet standards for admission to the Graduate School

Required Application Material

To the Graduate School:

- All required Graduate School documents

To the CMP Postdoctoral MS Program:

- For combined residency/degree positions, the CMP uses the Veterinary Internship & Residency Matching Program – see virmp.org (http://virmp.org) for details.

Degree Requirements

The CMP emphasizes comparative medicine research training and includes graduate course work. Research training is performed under an established investigator in one of several life science departments on the MU campus. Recommended graduate courses include pathology of laboratory animals, methodology of animal experimentation, biology of laboratory animals, laboratory animal resource management, grant and manuscript writing for biomedical researchers, laboratory and project management, biomedical ethics and seminars. Elective courses frequently taken by trainees include basic and advanced courses in immunology, molecular biology, physiology, reproductive biology and/or disease pathogenesis. Requirements for elective course work, residency and teaching experience are determined.
with the student’s advisory committee. Trainees also participate in
teaching and instructional programs offered to veterinary students and
research personnel.

**Written Scholarly Work**
The MS degree requires the completion of a significant first author
manuscript suitable for publication in a refereed journal, or an approved
equivalent scholarly effort.

**Residency**
For trainees enrolled in the combined graduate/residency program,
residency rotations are performed during the first year of training and
research training occurs in years two and three.
Residency rotations include:

- clinical medicine and animal resource management in the Office of
  Animal Resources (OAR)
- colony management, diagnostic, comparative and research pathology
  in the Mutant Mouse Regional Resource Center (MMRRC) and Rat
  Resource and Research Center (RRRC)

**Moving to a PhD Program**
Trainees desiring to change to a PhD program have the opportunity to do
so in a variety of programs including the Pathobiology Area Program.

**MS in Biomedical Science with Emphasis in Pathobiology**

Contact: Anne Chegwidden
College of Veterinary Medicine
201 Connaway Hall
Columbia, MO 65211

chegwiddena@missouri.edu
http://vpbio.missouri.edu/training_programs.html

**About the Program**
The College of Veterinary Medicine offers a Master of Science degree in
biomedical sciences with a specialization in veterinary pathobiology
and/or laboratory animal medicine, which is administered through the
Department of Veterinary Pathobiology. The degree requires 30 credit
hours of work including courses, seminars, research, and problems
courses. The program includes research in a particular field and defense
of a thesis which embodies the results of this work. Certain areas of
emphasis require submission of a formal master's thesis while others
require preparation of a publishable manuscript.

**PhD in Pathobiology**
For admission information about the doctorate of philosophy (PhD) in
Pathobiology, refer to Pathobiology Area Program in this catalog.

**Admission Criteria**
Fall deadline: n/a

- Minimum TOEFL score (when appropriate):
  - Internet-based test (IBT)
    - 61 Effective July 1, 2015 must have score of 80
    - GRE scores required
    - Undergraduate GPA of last 60 credits of undergraduate work: 3.0
    - Designated faculty mentor
    - Professional students with a DVM degree may be eligible to waive the
      GRE
  - Paper-based test (PBT)
    - 500 Effective July 1, 2015 must have score of 550

**Required Application Materials**

To the Graduate School:
- All required Graduate School documents

To the Veterinary Pathobiology Program:
- 3 letters of recommendation (can be submitted through the Graduate
  School's online application as well)
- GRE scores
- Mentor letter of support

**MS in Biomedical Science with Emphasis in Veterinary Medicine and Surgery**

Contact: Connie Sievert
College of Veterinary Medicine
Department of Veterinary Medicine and Surgery
A-384 Clydesdale Hall
573-882-1807
http://www.cvm.missouri.edu/VMS/index.htm

**About the Program**
The College of Veterinary Medicine, through the Department of
Veterinary Medicine and Surgery, offers graduate work leading to the
master of science degree in veterinary biomedical sciences with an
emphasis in veterinary medicine and surgery. In addition, faculty within
the department offer supervision for doctoral and postdoctoral study
and research. Many but not all graduate students in this area of study
combine their graduate degree training with clinical residency programs
leading to board certification in some specialty field within veterinary
medicine.

**Types of Study**
The program provides advanced training in anesthesiology, comparative
cardiology, equine, food animal and companion animal medicine and
surgery, neurology, oncology, comparative ophthalmology, radiation
oncology, radiology, nutrition, and theriogenology among other areas.

**Resources and Facilities**
Graduate students have ready access to clinical patients, medical
records and facilities of the Veterinary Medical Teaching Hospital to aid
them in clinical research. The college has its own library. More detailed
information regarding the emphasis area of veterinary medicine and
surgery can be found at the website http://www.cvm.missouri.edu/VMS/
index.htm
Admission Criteria

Fall deadline: n/a

- Completion of a bachelor's or professional degree
- Identification of a mentor with graduate faculty standing within the Department of Veterinary Medicine and Surgery
- Identification of funding (with advice of mentor) for the period of research and study
- Minimum TOEFL score (when appropriate):

<table>
<thead>
<tr>
<th>Test Type</th>
<th>Score</th>

</tr>
<tr>
<td>Paper-based test (PBT)</td>
<td>550</td>
</tr>
</tbody>
</table>

- Minimum GRE score: none

The majority of MS students within our program are completing specialty residency training programs in some field of veterinary medicine simultaneously with the MS degree. Admission to these programs generally precedes admission to our graduate programs. The GRE requirement may be waived for exceptional students by the Veterinary Medicine and Surgery Departmental Research and Graduate Studies Committee. Applicants may be asked to strengthen any deficiencies in prerequisites to the chosen area of concentration through enrollment in a post- or non-degree graduate student program.

Required Application Materials

To the Graduate School:
- All required Graduate School documents

To the Veterinary Medicine and Surgery Emphasis Program:
- GRE scores

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Degree Requirements

Advisors and the Advisory Committee

Formulating a plan of study is the joint responsibility of the student, the advisor and the student’s advisory committee. An advisory committee of at least three faculty members should be chosen during the first semester of enrollment. The advisory committee offers guidance and is responsible for approving a definitive plan of study.

The advisory group should consist of the major advisor and appropriate faculty members from the department, and at least one other member from another department within the college or university. Members of this committee may be recommended later for appointment to the examining committee. Members of the final examination committee should be chosen in the same manner as the advisory committee.

Publications

A thesis reporting the results of original research is required of all candidates. A scientific paper based on the thesis research must be submitted to a refereed journal.

PhD in Biomedical Sciences

Director of Graduate Studies Dr. Douglas Bowles
Biomedical Sciences Area Program
W111 Veterinary Medicine Building
1600 Rollins Road
Columbia, MO 65211
573-882-7305
http://www.dbms.missouri.edu/

About the Doctoral Degree Program

The Biomedical Sciences Area PhD is a multidisciplinary program that integrates molecular, cellular and systemic biology within the context of biomedical research. The program provides the student with the background to investigate questions relevant to the Medical sciences at the integrative, molecular or cellular level and to relate the findings to mammalian physiology. Training in both fundamental and state-of-the-art research methodologies help students develop the skills necessary for competitive biomedical research. The program is administered through the Department of Biomedical Sciences (College of Veterinary Medicine) that has research faculty representing a diversity of medical-related basic science disciplines, including anatomy, biochemistry, histology, pathology, molecular biology, physiology, pharmacology and toxicology. The program offers a rich environment for graduate study and a unique opportunity for training scientists in comprehensive interdisciplinary research.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission Criteria

- Fall deadline: December 15
- Spring deadline: September 15
- Summer deadline: Not Applicable
- Minimum TOEFL scores:

</table>

- Minimum GPA: 3.0
- Required prerequisite courses: Biology (10 hrs), Physics (3 hrs), Biochemistry (3 hrs), Chemistry (10 hrs), Calculus (3 hrs)

NOTE: The GRE requirement may be waived for applicants with an MD or DVM.

Degree Requirements

To attain the PhD degree, 72 hours of graduate credit must be completed:
15 hours or more at the 8000/9000 level (exclusive of research, problems and independent study courses)

The core curriculum includes:
• physiology (10 credit hours)
• biochemistry/cell biology or histology (4 or 5 credit hours, respectively)
• multidisciplinary approaches to biomedical research (2 credit hours)
• departmental seminar (2 credit hours)

Minimum of 1 additional 7000-level course in each of the following areas:
• molecular biology
• cellular biology
• integrative biology

**Rate and Quality of PhD Progress**

A grade of 3.0 or better is required in the core curriculum and serves in lieu of a qualifying examination for the degree. The choice of additional courses will be made individually by the student in consultation with his/her advisor and doctoral program committee. Following completion of the plan of study, candidates for the PhD degree must pass a comprehensive examination designed by the doctoral program committee that reflects an understanding of the multidisciplinary approach to biomedical research. The PhD candidate is evaluated semiannually by a faculty committee to ensure a satisfactory rate of progress as defined by timely completion of core courses and productivity in research activities as stipulated by the student’s doctoral program committee. The PhD candidate must carry out original research culminating in a written dissertation, present the dissertation work at a departmental seminar and defend it in an oral examination given by the doctoral program committee. The program for the PhD degree must be completed within five years of passing the comprehensive examination.
Clinical and Translational Science

From Particles to Populations
The University of Missouri Institute for Clinical and Translational Science transforms discoveries made in laboratories across MU into community-based products, services and practices for the state and nation. The institute (ICATS) is the focal point of MU's efforts to develop clinical and translational science programs that improve health through better research, education and public service.

Few universities share MU's potential for saving lives through research. With more than 1,000 biomedical scientists and engineers — all on one campus — MU focuses its research on the deadliest diseases, such as cancer and cardiovascular disease, and the most vulnerable patients, including children and the elderly.

Faculty
Faculty for Clinical Translational Sciences teach across multiple disciplines. A complete listing of faculty can be found here (p. 1499).

Undergraduate
While MU does not offer undergraduate degrees specifically in Clinical and Translational Science program, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

Dispute Resolution Field
DR professionals work in many different areas. To illustrate, the Association for Conflict Resolution has sections dealing with commercial, community, consumer, court, criminal justice, education, environmental / public policy, family, health care, international, ombudsman, online disputes, organizational conflict management, spirituality, training, and workplace issues.

Faculty
Associate Professor C. Conklin*, D. Crouch*, S. I. Strong*
Adjunct Assistant Professor J. Levin*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate
While MU does not offer undergraduate degrees specifically in dispute resolution, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate
• LL.M in Dispute Resolution (p. 681)

About the Dispute Resolution Program
Students in the Master of Laws (LL.M.) dispute resolution program have a unique opportunity to gain a deeper understanding of theoretical, policy, design and ethical issues in dispute resolution. They study with leading dispute resolution scholars who generate important academic work influencing dispute resolution theory and practice around the world. Small class sizes create a close community with faculty and students.

Our program blends theoretical analysis, practitioner skills, and systems design work in courses usually limited to LL.M. students. Our diverse student body — by age, race, nationality, legal background — enriches the level of discussion, inside and outside the classroom.

The LL.M. meets the needs of those with backgrounds as advocates, neutrals, law-trained court administrators and government agency personnel, among others.

Admission Requirements
Applicants must have completed the first degree in law (JD, LLB or equivalent) required for law practice or law teaching in the country in which law studies were pursued. Note: U.S. applicants must have satisfied the JD requirements of an ABA-accredited law school. In exceptional cases, U.S. applicants may be admitted if they have satisfied the JD requirements of a non-ABA-accredited law school.

• Applicants may be admitted without a JD degree if they have a bachelor’s degree and substantial experience in dispute resolution.
• Applicants must possess a minimum 2.5 (A = 4.0) grade point average in their law program, and a 3.0 GPA for work completed in any additional graduate or advanced degree program.
• Applicants must be able to start the program in the fall semester (which begins in mid-August). New students are not admitted in the spring or summer semesters.

LLM in Dispute Resolution

Program of Study
The LL.M. program requires 24 credit hours of study. A minimum of 12 credits are required courses in dispute resolution and the remaining 12 credits are electives. Students choose electives according to their interests. With approval of the director of the LL.M. Program, students can apply six (6) credits of graduate-level courses outside the Law School toward the LL.M. graduation requirements.

Students studying full-time can complete degree requirements within one academic year. Part-time students in a continuous course of study can complete the program within two academic years.

Tailoring the Program

In addition to the recommended electives outlined above, the MU Law School offers courses in many areas. Refer to the Courses tab above for course descriptions. Please note: Every effort is made to teach each of these courses every year, but the ability to offer them depends on faculty availability and budget constraints.

Some of the concentrated areas in the J.D. curriculum include:

- Business Planning/Corporations
- E-commerce
- Employment
- Environmental Law
- Family
- Governmental Processes
- Healthcare
- International Law
- Normative Theory and Diversity
- Tax
- Trial Practice
Genetics Area Program

241 Engineering West
Columbia, MO 65211
573-882-9007
877-GENE-PHD (877-436-3743)
http://www.gap.missouri.edu/
Email: gap@missouri.edu

The Genetics Area Program (GAP) is an interdisciplinary PhD program that will prepare you for a research or teaching career in genetics. As genetic analysis is used in all aspects of biological research, our Program has integrated the efforts of approximately 60 life sciences faculty into one of the strongest training programs at MU.

The curriculum provides broad, individualized training tailored to your career objectives.

Faculty

*Assistant Professor* M. Garcia**, S. Sarafianos
*Adjunct Professor* H. B. Krishnan*
*Adjunct Associate Professor* M. D. McMullen**
*Adjunct Assistant Professor* S. Flint-Garcia**

*Research Professor* G. Hagen*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in the genetics area program, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

• PhD in Genetics Area Program (p. 683)

About the Program

We believe that an understanding of genetics is essential in solving global problems such as famine, environmental degradation and disease.
• Broad background in biology

Note: Deficiencies in the subjects listed can be remedied after admission.

**Required Application Materials**

*To the Graduate School:*

• All required Graduate School documents

*To the Genetics Area Program:*

Genetics Area Program application (download form from website)

• GRE scores
• TOEFL scores (international applicants)
• 3 letters of recommendation (use provided form)
• Personal statement

**Degree Completion Requirements**

The minimum requirements for the PhD degree are:

• advanced courses in genetics, biochemistry and molecular biology
• regular participation in the genetics area seminar program
• successful completion of a comprehensive examination
• at least one semester of teaching in a genetics course
• 3 seminar presentations
• research, dissertation and oral defense

These are beyond the Graduate School's requirements. Others are determined in consultation between the student and faculty advisor.

Academic programs at MU in the area of Health Administration are offered through the Department of Health Management and Informatics (HMI) in the School of Medicine.

Health Management and Informatics
CE 707 Clinical Support and Education Building, DC006.00
One Hospital Drive
(573) 882-6178
http://www.hmi.missouri.edu/

Department of Health Management and Informatics

The HMI Department develops, translates, and disseminates knowledge, innovations, and evidence-based solutions to improve health management and informatics performance in complex health systems. HMI advances the health of Missouri’s communities, the nation, and international partners by:

- Creating a culture of collaborative relationships in research, education, and service to generate innovative ideas and solutions;
- Providing professional health management and informatics education and fostering lifelong learning;
- Delivering technical assistance and consultation by partnering with health, human service, and policy-making organizations; and
- Developing innovative commercial products and services for health-and education-related application

Degrees & Certificates Offered

The HMI Department offers the following degrees and graduate certificate programs:

- Master of Health Administration (executive and residential cohort)
- Master of Science in Health Informatics (executive and residential cohort)
- Dual Master of Health Administration and Master of Science in Health Informatics (executive and residential cohort)
- Graduate Certificate in Health Informatics (executive and residential cohort)
- Graduate Certificate in Health Ethics (100% online format available)

Residential Master of Health Administration students may also pursue a dual MBA, MS in Industrial Engineering, or JD degree. Some students choose to complete an additional Master’s degree, such as the MPA or MPH, concurrently with the MHA degree.

Faculty

Professor E. J. Simoes**
Associate Professor S. A. Boren**, J. Kapp**, N. Khatri**, M. Popescu**, I. Yoo*
Assistant Professor M. S. Kim**
Associate Professional Practice Professor W. Wells*
Associate Research Professor J. Jackson-Thompson*
Associate Teaching Professor W. Phillips**
Assistant Research Professor E. Leary*, G. F. Petroski*, I. Zachary*
Assistant Teaching Professor P. Alafaireet**
Instructor B. Hensel*
Clinical Instructor D. Moxley*

Adjunct Assistant Professor K. Bopp*, D. Nelson*, C. Schmaltz*
Adjunct Clinical Instructor M. Harris*
Adjunct Instructor K. Clements*, J. Kaplan*, R. Sommer*, T. Weatherford*

Professors Emeriti G. D. Brown*, L. L. Hicks**, D. Wakefield**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

Undergraduate students who are eligible for dual enrollment may, with permission, register for Graduate level HMI courses. For more information on dual enrollment, please see http://registrar.missouri.edu/policies-procedures/dual-enrollment.php.

While MU does not offer undergraduate degrees specifically in health administration, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

- MHA in Health Administration (p. 686)

About the Master of Health Administration

The graduate program in Health Services Management prepares professionals to meet critical and complex challenges in leadership and improvement in organizations and systems throughout the health industry. The program provides recognized national and global leadership in health management education.

The program is competency-based and distinctively equips graduates for success through (a) providing solid grounding in professional and operational knowledge and skills, (b) integrating health informatics throughout the health services management curriculum, and (c) incorporating overarching complex systems context and analytical approaches.
The residential and executive master’s degrees launch and advance patient-centered, improvement-oriented, financially-responsible, and ethically-grounded careers in evidence-based health services management.

The program admits diverse cohorts of students from Missouri, other states, and other nations. During the admissions process, the program seeks learners with strong academic records, maturity, motivation, leadership capabilities, and career potential. Primary post-graduation placement organizations include health systems, hospitals, academic medical centers, physician group practices, surgery centers, information technology companies, consulting firms, government agencies, insurance entities, and other points of health services delivery.

Whereas the residential master’s degree format is a traditional on-campus residential program, the executive master’s degree is offered in a hybrid model featuring both on-campus and distance learning. In both formats, emphasis is on fostering an individualized and collaborative culture of learning, mentoring, and professional development among students, faculty, staff, alumni, and other practitioners. The intent is to prepare students to enable transformational leadership and improve patient care quality, safety, value, and overall level of population health.

Established in 1965, the program is a member of the Association of University Programs in Health Administration (AUPHA) and has been accredited since 1968 by the Commission on Accreditation of Healthcare Management Education (CAHME), formerly Accrediting Commission on Education for Health Services Administration (ACEHSA).

Both executive and residential students may pursue the MHA degree jointly with the MS in Health Informatics degree. Residential students may also pursue a dual MBA, MS in Industrial Engineering, or JD degree, or complete an additional Master’s degree, such as a MPA or MPH, concurrently with the MHA program.

## Graduate

### MHA in Health Administration

#### About the MHA

The HMI Department’s MHA degree is designed for students from a range of educational backgrounds and provides the knowledge and skills necessary to function effectively as a healthcare executive. The curriculum includes such competency areas as health systems operations, organization theory, information management, financial management, strategic planning and marketing, human resource management, health economics, managerial epidemiology, leadership, and ethics. By combining basic and advanced course work with an internship and executive management study (an applied management study that replaces a thesis), the student may develop expertise in a focused area. Professional elective course selection is a mutual decision between the student and advisor, and in all cases, the intent is to tailor the degree program to the student’s interests. The goal of the graduate program in health services management is to prepare professionals for leadership roles in health administration. Students develop an excellent applied knowledge in such areas as clinical decision support systems, risk assessment and management, clinical outcomes assessment, managing interdisciplinary teams and integrated health systems.

#### Degree Requirements

The residential MHA degree requires a total of 54 credit hours, which includes 39 hours of core coursework, three credit hours earned for a required 12-week summer internship, a three-credit hour capstone group management project, and nine credit hours of professional electives. Students must maintain a minimum 3.0 cumulative MU graduate grade point average to earn the Master’s degree.

The professional elective requirement, which comprises three courses, allows MHA students the opportunity to concentrate in a particular area of study if they choose. They may take courses in health informatics or health ethics within the HMI Department, pursue graduate certificates in areas such as health informatics, public health, or geriatric care management, or complement their MHA coursework with classes in business administration, public administration, industrial engineering and public health, to name a few.

MHA students must complete a 12-week administrative internship at an approved integrated managed care system, group practice, hospital or other healthcare organization under the guidance of a qualified preceptor (often an HMI alumnus/a). The internship is designed to incorporate the academic training students receive in their first year of the master’s degree with practical applications within the host site. The students receive hands-on exposure to health care management in a real-world environment and experience first-hand the dynamics of a career in health care. The intern should have the opportunity to observe their mentor and other professionals in the work environment, as well as opportunities to discuss their experiences.

Specific general skills to be developed include:
- Leadership
- Strategic decision making
- Project management
- Teamwork

HMI’s executive-in-residence works with each student individually to place him or her at an internship site. For a list of recent internship placements, please see http://hmi.missouri.edu/prospective/educational_partners.html.

Thesis/Non-Thesis Requirement

- improvement of patient experience of wait times in the Orthopaedic Clinic at the Missouri Orthopaedic Institute
- surgical site infection reduction informed by NSQIP resources for UMHC
- system-wide urinary catheter reduction for UMHC
- improving screening and follow-up for students with substance use and/or mood disorders at MU Student Health

Financial Aid

Applicants to the Residential MHA cohort who wish to be considered for financial assistance from the HMI Department should apply by March 1, the priority deadline. Those who apply by the deadline and meet academic requirements (see Admissions Requirements section below) will be considered for available scholarships and assistantship positions. All financial assistance is awarded on the basis of merit, availability of funding, and alignment of student and faculty research interests and skills. Further information about costs, financial aid, and external scholarship opportunities is available on the HMI Department’s website at: http://hmi.missouri.edu/prospective/financial_aid.html.

Executive students who are not Columbia, MO residents and who apply for financial aid through MU’s Office of Student Financial Aid are eligible for travel budgets to help offset travel costs for on-campus weekends. Students who are MU employees are eligible for a tuition reduction through MU’s Educational Assistance program.

Executive MHA Degree

In addition to the residential (on-campus) MHA, the degree is offered in an alternative format to healthcare professionals who have significant clinical or administrative experience in health care. HMI accepts an executive MHA cohort to begin in January of each year. The Executive MHA combines monthly on-campus weekend sessions, independent study, and online interaction in an innovative two-year course of study, and requires 42 credit hours of health services management coursework. Students are required to complete a substantial independent research project, which they present during their oral comprehensive examination in their final semester. For additional information about the Executive MHA, please visit http://hmi.missouri.edu/prospective/emha_description.html, or call the Student Recruitment Specialist at (573) 884-0698.

Admissions Requirements

Deadline for Fall entrance: Rolling; priority deadline is March 1

A minimum of a baccalaureate degree from an accredited institution

Undergraduate GPA: 3.0 during the last 60 hours of undergraduate course work and any subsequent graduate course work

Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (IBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>100</td>
<td>603</td>

- In lieu of GRE, minimum GMAT score: 50th percentile. HMI also accepts LSAT and MCAT scores.

The Health Management and Informatics Department recruits and accepts qualified applicants regardless of race, sex, age, physical ability, or national origin.

Required Application Materials

Master’s program applicants should apply online through the Office of Graduate Studies application system (http://gradschool.missouri.edu/admissions/apply). When completing the online application, you will have an opportunity to upload/attach additional documents. Please include the following documents:

- an updated résumé or curriculum vitae;
- a personal essay that:
  - outlines your professional plans and career objectives;
  - explains how you became interested in health services management/health informatics and how your prior training and experience would help your career;
  - includes specific issues and problems in health care you consider challenging and why;
  - indicates if you intend to apply to the traditional (residential) on-campus degree program or the distance education (executive) format.

Depending upon your situation, you will also be required to submit other documentation and in some cases complete prerequisite courses. Below is a checklist to help make sure your application is complete:

- an updated résumé or curriculum vitae;
- a personal essay that:
  - outlines your professional plans and career objectives;
  - explains how you became interested in health services management/health informatics and how your prior training and experience would help your career;
  - includes specific issues and problems in health care you consider challenging and why;
  - indicates if you intend to apply to the traditional (residential) on-campus degree program or the distance education (executive) format.
• **Admissions Criteria** (make sure you meet all minimum requirements)
• **Request to re-enroll form** (for previously admitted students only)
• **Official transcripts** of all coursework from all colleges, technical schools and/or universities attended
• **Three letters of recommendation** (submitted through the Graduate School application system [http://gradschool.missouri.edu/admissions/apply](http://gradschool.missouri.edu/admissions/apply))
• **Letter of support** from your employer. (Executive Students only)
• **Official GRE/GMAT score report** (Residential Students only)
• **Official TOEFL report** (for international applicants only - have official results sent to us: institution code is 6875, our department code is 25 - minimum score of 100 on the Internet-based exam required)
• **Prerequisites** - links to information about prerequisites for each degree program are available at [http://hmi.missouri.edu/prospective/rmha_description.html](http://hmi.missouri.edu/prospective/rmha_description.html)

Degree Programs

- Bachelor of Science in Health Informatics and Bioinformatics
- Bachelor of Science in Health Ethics (100% online format)

Undergraduate

HMI offers two health informatics courses that are cross-levelled: HMI 4420/7420 - Fundamentals of Bioinformatics and HMI 4440/7440 - Health Information Technology. Undergraduate students may enroll in the 4400-level sections of these classes for Undergraduate credit. Undergraduate students who are eligible for dual enrollment may, with permission, take courses through HMI for Graduate credit. For more information on dual enrollment, please see http://registrar.missouri.edu/policies-procedures/dual-enrollment.php.

While MU does not offer undergraduate degrees specifically in Health Informatics, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

- MS in Health Informatics and Bioinformatics (p. 690)
  - with emphasis in Bioinformatics (p. 691)
  - with emphasis in Health Informatics (p. 692)
- Graduate Certificate in Health Informatics (p. 692)

About the Master of Science in Health Informatics and Bioinformatics

The Master of Science in Health Informatics and Bioinformatics program prepares professionals to meet critical and complex challenges in applying information technology within the health industry. It provides recognized national and global leadership in health informatics education.

The residential master’s degree prepares students for careers in developing and evaluating clinical information systems, data and...
knowledge management, decision support, and doctoral study in health informatics. The executive master’s degree advances the careers of physicians, managers, nurses, information system designers, consultants, entrepreneurs, and others committed to the application of information technology for improving the quality, safety, and efficiency of health services.

The program admits diverse cohorts of students from Missouri, other states, and other nations. During the admissions process, the program seeks learners with strong academic records, maturity, motivation, leadership capabilities, and career potential. Primary post-graduation placements include doctoral programs, health systems, hospitals, academic medical centers, physician group practices, outpatient facilities, information technology companies, consulting firms, government agencies, insurance entities, and other points of health services delivery.

Whereas the residential master’s degree format is a traditional on-campus residential program, the executive master’s degree is offered in a hybrid model featuring both on-campus and distance learning. In both formats, emphasis is on fostering an individualized and collaborative culture of learning, mentoring, and professional development among students, faculty, staff, alumni, and other practitioners. The intent is to prepare students to enable transformational leadership and improve patient care quality, safety, value, and overall level of population health.

Graduate

MS in Health Informatics and Bioinformatics

Degree Requirements
The residential MS in Health Informatics (MSHI) curriculum requires 36 credit hours of course work, which include foundational coursework in health information technology as well as health services management. Prior coursework in computer science is not required. Residential MSHI students have the option to complete a 12-week internship during the summer following their first year, although it is not required for the degree. HMI's executive-in-residence will work with HI students who wish to complete an internship to find an appropriate placement. For a list of recent internship placements, please see http://hmi.missouri.edu/prospective/educational_partners.html.

The MSHI curriculum integrates learning across computer science, health informatics, and health services management, and also develops students' research interests. Those with excellent academic records are encouraged to pursue a PhD degree in Informatics. Students must maintain a minimum 3.0 cumulative MU graduate grade point average to earn the Master’s degree. Individuals with three or more years of professional experience are encouraged to apply for admission to the Executive MSHI cohort (please see information below).

Total Credits: 36

Thesis/Non-Thesis Requirement
Residential MSHI students have the option to complete a formal Master’s thesis, which must be submitted to the Office of Graduate Studies. Students who choose not to complete a thesis must complete a substantial independent research project. All MSHI students must present their thesis or independent research during their oral comprehensive examination in their final semester.

Financial Aid

Applicants to the Residential MSHI cohort who wish to be considered for financial assistance from the HMI Department should apply by March 1, the priority deadline. Those who apply by the deadline and meet academic requirements (see Admissions Requirements section below) will be considered for available scholarships and assistantship positions. All financial assistance is awarded on the basis of merit, availability of funding, and alignment of student and faculty research interests and skills. Further information about costs, financial aid, and external scholarship opportunities is available on the HMI Department’s website at: http://hmi.missouri.edu/prospective/financial_aid.html.

Executive students who are not Columbia, MO residents and who apply for financial aid through MU’s Office of Student Financial Aid are eligible for travel budgets to help offset travel costs for on-campus weekends. Students who are MU employees are eligible for a tuition reduction through MU’s Educational Assistance program.
Executive MSHI Program

In addition to the residential (on-campus) mode, the MSHI degree is offered in an alternative format for professionals who have significant experience in health informatics. HMI accepts an Executive MSHI cohort to begin in January of each year. The executive MSHI combines three on-campus weekend sessions per semester with independent study and online interaction in an innovative two-year course of study, and requires 33 credit hours of health informatics coursework. Students must complete a substantial independent research project, which they present during their oral comprehensive examination in their final semester. For additional information about the Executive MSHI degree, including a sample plan of study, please visit http://hmi.missouri.edu/prospective/emshi_description.html or call the Student Recruitment Specialist at (573) 884-0698.

**About the Graduate Certificate in Health Informatics**

The Graduate Certificate in Health Informatics offered by the Department of Health Management and Informatics provides learners with the skills necessary to participate in the selection, use, and evaluation of information technology applications throughout the health services industry. The certificate program is designed for students, physicians, nurses, managers, information system designers, consultants, and others committed to the application of information technology for improving the quality, safety, and efficiency of health services.

Students may pursue the HI Certificate in either the residential or executive format. Students who wish to pursue only the HI Certificate must apply to the HMI Department and the Office of Graduate Studies for admission to the Graduate Certificate program. Students enrolled in the MHA degree program may earn a HI Certificate in addition to their Master’s degree. The HI Certificate requires the completion of the following four courses (a total of 12 credit hours):

- **HMI 7430** Introduction to Health Informatics 3
- **HMI 8435** Information Security, Evaluation and Policy 3
- **HMI 8443** Enterprise Information Architecture 3
- **HMI 8571** Decision Support in Health Care Systems 3

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/health-informatics-graduate-certificate/health-info-ge/Gedt.html
Informatics

Academic doctoral programs at MU in the area of Informatics are coordinated through the Informatics Institute.

muiigraduateprogram@missouri.edu
241 Engineering Building West
Columbia, MO 65211-2060
573-882-9007
http://muii.missouri.edu/

About the Informatics Institute (MUII)

Building on a tradition of outstanding informatics education and research at Missouri, the MU Informatics Institute is comprised of over 40 faculty from 15 different departments and 8 schools/colleges, including the Colleges of Agriculture, Food, and Natural Resources; Arts & Sciences; Education; Engineering; Veterinary Medicine; School of Health Professions; Medicine; and Nursing. The Institute offers emphasis areas in bioinformatics and health informatics, along with a concentration area in geoinformatics. Each emphasis area and concentration area stress skill sets and research appropriate to the subfield within the broad area of informatics. A core curriculum provides all students with a foundation of knowledge and tools in biology, computer sciences, health systems, and statistics, after which they complete further coursework in their chosen area. The integrated program assures broad exposure to the field and fosters new insights and innovative research concepts.

Faculty

**Associate Research Professor** J. Jackson-Thompson (http://muii.missouri.edu/people/profile.php?id=4331)**

**Associate Teaching Professor** W. Phillips (http://muii.missouri.edu/people/profile.php?id=12)**

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
- Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in informatics, the University does offer baccalaureate opportunities in a number of related areas. Many successful informatics students have received bachelor’s degrees in Geography, Computer Science, Statistics, Business, Biology, and Biochemistry before starting their doctorate.

In addition, MUII offers several service courses designed for upper-level undergraduates and master’s students to expose students to the fundamentals of bioinformatics.

Graduate

- PhD in Informatics (p. 694)
- with emphasis in Bioinformatics (p. 695)
- with emphasis in Health Informatics (p. 695)

Emphasis Areas & Concentration Areas

MUII offers a doctoral degree (PhD) in two emphasis areas: bioinformatics and health informatics (http://muii.missouri.edu/current_students/program_of_study.php). In addition, students may also opt for a doctoral degree with a concentration area in geoinformatics. Students with areas of interests outside of informatics may also wish to pursue a collaborative degree program between MUII and other degree programs. The purpose of the collaborative degree program is to allow students the opportunity to obtain advanced degrees in fields that complement the study of informatics and expand the student’s knowledge and applicability.

MUII students may also select the collaborative degree between the Master of Public Health program and MUII PhD in Informatics program. Students must be accepted by both MUII and the MPH program to be eligible. Upon completion of the PhD requirements for the Informatics Institute and degree requirements for the MPH in Health Promotion and Policy with focus on Informatics, students will receive both the PhD in Informatics and MPH degrees. For a full list of courses for the MPH in Health Promotion and Policy with Focus on Informatics, please visit the MPH program website (http://publichealth.missouri.edu/).
Resources and Facilities

To support the Big Data research and training programs of Informatics Institute, in 2014 the institute secured a National Science Foundation Major Research Instrumentation (MRI) grant to acquire high performance computing (HPC) equipment for data-intensive applications with hybrid cloud computing needs. The equipment ($880,000) is comprised of 89 nodes: (i) 56 16-core CPU nodes, each with 128 GB RAM, (ii) 2 high-memory nodes, each equipped with 4 8-core CPUs and 1TB RAM (one node)/512GB RAM (one node), (iii) 15 K20 nodes, each equipped with an Nvidia K20 (Kepler) 2,496-core GPU, 2 six-core Xeon E5 processors and 64 GB RAM, (iv) 15 Xeon Phi nodes, each equipped with an Intel Xeon Phi 5110P coprocessor, 2 six-core Xeon E5 processors and 64 GB RAM, and (v) a head node for the cluster. The basic CPU nodes allow supporting traditional MPI, MapReduce, and Spark applications; high-memory nodes are currently required by next generation sequence analyses, and hybrid (Nvidia K20 and Intel Xeon Phi) nodes accommodate existing and new informatics applications accelerated on many-core devices. Intel Phi coprocessors particularly satisfy the requirements of users that need to port existing applications written with traditional parallel programming models (such as OpenMP, MPI and Intel TBB) to many-core processors, without investing the significant development time required for implementation in environments such as CUDA and OpenCL.

Faculty Areas of Research Interest

Faculty research covers a wide range of interests including structural bioinformatics, systems biology, cancer informatics, chemical informatics, epigenomics, phenomics, text mining & understanding, electronic health records, evidence-based medicine, personalized medicine, human-computer interactions in health care, consumer informatics, patient safety, public health informatics, geospatial informatics, information retrievals, biomedical data mining & knowledge discovery, and machine learning. For a list of faculty members and their research areas, please visit our web page. (http://muii.missouri.edu/people/faculty.php)

Internal Funding

Fellowships and research/teaching assistantships are available for highly qualified applicants. Application information is available on the Institute’s website (http://muii.missouri.edu/prospective_students/financial_support.php).

Graduate

Admission Criteria

Fall deadline: The deadline for Fall admission is March 1. However, to be considered for departmental and Graduate School fellowships and assistantships, applications should be submitted by January 15th.
• Students must submit and defend a dissertation describing the results of successful and original research in one of the branches of informatics.
• To show research progress, students are expected to be working toward presenting at conferences and publishing in peer-reviewed journals based on their informatics research.

**PhD in Informatics with Emphasis in Bioinformatics**

This emphasis area is no longer accepting applications. For information on Informatics, please refer to the PhD in Informatics page (p. 694).

**PhD in Informatics with Emphasis in Health Informatics**

This emphasis area is no longer accepting applications. For information on Informatics, please refer to the PhD in Informatics page (p. 694).
Medical Pharmacology and Physiology

Pharmacology and Physiology
School of Medicine
MA415 Medical Sciences Building
573-882-4957
http://medicine.missouri.edu/mpp/

The joining of these two disciplines provides a powerful way to address modern questions of biology. The department offers MS and PhD degree programs in Pharmacology and Physiology. These programs are designed to prepare students for rewarding teaching and/or research careers in academia, government or the pharmaceutical and biotechnical industries.

Faculty

**Assistant Professor** C. Baines, T. Domeier*, M. Krenz**, L. Polo-Pareda**, J. Smith, G. Sowa**, M. Thakkar**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in medical pharmacology and physiology, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

- MS in Medical Pharmacology and Physiology (p. 697)
- PhD in Medical Pharmacology and Physiology (p. 697)

Monica Elliott
School of Medicine
MA415 Medical Sciences Building
573-882-4957
http://medicine.missouri.edu/mpp/

The joining of these two disciplines provides a powerful way to address modern questions of biology. The department offers MS and PhD degree programs in Pharmacology and Physiology. These programs are designed to prepare students for rewarding teaching and/or research careers in academia, government or the pharmaceutical and biotechnical industries.

Pharmacology

Pharmacology is a basic medical science that deals with actions of drugs, hormones and neurotransmitters on living processes. Knowledge based on the results of pharmacological research leads to increased effectiveness and safety in the treatment of diseases in man and animals. Pharmacology is different from pharmacy, which is a profession concerned with the preparation and dispensing of drugs.

Physiology

The discipline of Physiology focuses on understanding the integrative function of living organisms from the molecular to the organismal level. As such, physiological research addresses how genes, organelles, cells, tissues and organs are integrated to accomplish the complex functions of living organisms. From a medical prospective, understanding normal function is a prerequisite to understanding disease.

Areas of Study

Regardless of their final degree objectives, students admitted into the departmental graduate programs will participate in a core curriculum during the first year and choose a specific tract leading to either a degree in Pharmacology or in Physiology following successful completion of the first year. The department also offers specially designed curriculum for individuals interested in a combined MD/graduate degree or who have previous relevant medical education.

Departmental Research

The departmental faculty has expertise in a variety of mammalian systems, with emphases in cardiovascular and endocrine physiology and molecular and cellular pharmacology. Individual labs utilize a number of different experimental models ranging from the whole animal studies to cellular, subcellular, biochemical and modern molecular approaches. Human research is also emphasized.

Research problems under current investigation include microvascular control of blood flow; modulation of vascular function by the extracellular matrix; role of the microcirculation in inflammation and diabetes; mechanisms involved in angiogenesis membrane regulation and ion transport; barriers separating circulating blood and tissue; energetics and metabolism of vascular smooth and cardiac muscle; electrophysiology of isolated cardiac vascular smooth muscle and endothelial cells; exercise physiology and regulation of contractile protein functions; and hormonal induction of genetic transcription, intracellular signaling mechanisms and genetic regulation of cell proliferation, cell cycle, cell differentiation and apoptosis; and the pathogenetic mechanisms of alcohol on liver cells.

Partnerships

Cooperative interactions exist with other clinical and basic science departments in the School of Medicine as well as with the Truman Veterans Hospital, the Dalton Cardiovascular Research Center, the College of Veterinary Medicine, Nutrition and Exercise Department and various campus-wide programs in Molecular Biology and Food for the 21st Century. The cooperative research atmosphere encourages staff
and students to work across departmental lines and provides a unique opportunity for interdisciplinary training of the students.

**Teaching Experience**

In addition to course work and research training, all graduate students are required to participate as teaching assistants in laboratory or lecture instruction offered by the department. Such experience enhances the students’ presentation and teaching skills, contributes to their professional maturity, and reinforces a sense of collegiality between students and faculty.

**Financial Aid from the Program**

Financial support in this program for qualified graduate students is available from several sources. Students also may be eligible for institutional teaching and research assistantships. In addition, there are a number of fellowship awards from the Graduate School and the campus-wide Life Science Program available on a competitive basis through nominations by the Department.

Deadlines for these fellowships are January to mid-February each year. Applicants do not directly apply for these fellowships. Rather the department applies on behalf of successful applicants for admission. Therefore a prospective candidate should submit an application for admission to the department in the preceding fall. Finally, some of our students are supported by research grants of individual faculty members or by predoctoral fellowships from extramural sources.

**Graduate**

**MS in Medical Pharmacology and Physiology**

**Admission Contact Information**
Monica Elliott
MA415 Medical Sciences Bldg, DCO63.00
Columbia, MO 65211
573-882-4957

**Application Deadlines**
Fall deadline: January 7
Spring deadline: September 15

**Admission Criteria**

- Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>61 Effective July 1, 2015 must have score of 80</td>
<td>500 Effective July 1, 2015 must have score of 550</td>
</tr>
</tbody>
</table>

- Minimum IELTS overall academic score: 5.5
- Minimum GPA: 3.0 in the last 60 hours
- Bachelor’s degree in chemistry, biology, pharmacy or related areas from an accredited college
- Background in biology and chemistry and an understanding of mathematics and physics
- Course work in biochemistry and physiology is highly recommended.
- Previous lab or research experience preferred

Students are usually admitted to begin their program in the Fall semester, but applications for admission in other semesters will be considered on a space-available basis. Women and minorities are encouraged to apply.

Students with an appropriate educational background are encouraged to apply for entrance into the PhD program. A master’s degree is not a prerequisite for admission to the doctoral program. The department will consider applications for the MS degree programs from U.S. citizens but PhD degree students will be given priority consideration for financial support. Deficiencies in course work may be remedied during the first years of the graduate program.

**Required Application Materials**

To the Graduate School:
- All required Graduate School documents

To the Medical Pharmacology & Physiology Program:
- Departmental application
- Personal statement
- Transcripts
- 3 letters of recommendation (use form provided). The letters should be written by individuals knowledgeable of the student’s academic capability.
- Official GRE & TOEFL scores

**Degree Requirements**

To satisfy requirements for the MS degree, a student must complete the professional plan of study with an average grade of B or better and pass an oral examination over an acceptable master’s thesis. Candidates also must comply with other regulations governing master’s degrees.

**Length of Study**

MS degree students should normally complete their studies and thesis project within 2-3 years of admission to the degree program.

**PhD in Medical Pharmacology and Physiology**

**Admission Contact Information**
Monica Elliott
MA415 Medical Sciences Bldg, DCO63.00
Columbia, MO 65211
573-882-4957

*To the Medical Pharmacology & Physiology Program:*

• Departmental application
• Personal statement
• Transcripts
• 3 letters of recommendation (use form provided). The letters should be written by individuals knowledgeable of the student’s academic capability.
• Official GRE & TOEFL scores

**Plan of Study**

The PhD plan of study includes at least two years of basic and advanced courses in physiology and/or pharmacology, as well as courses in cell and molecular biology. The students also will be trained in conducting physiological and pharmacological research in the laboratory of individual faculty members during the first year.

**Qualifying Examination Policy**

The department does not require a formal qualifying examination. Successful completion of the core curriculum and satisfactory performance in conducting scientific research and teaching will qualify students for continuation in the PhD program.

**Choosing a Track and Mentor**

The student will choose a dissertation mentor at or before the end of the first year and decide whether they wish to pursue the doctoral program in Pharmacology or Physiology.

**Comprehensive Examination**

All PhD program students must pass a comprehensive examination before the end of the first semester of the third year of enrollment. The usual format of the comprehensive exam includes the writing and oral defense of a research proposal outside of the student’s dissertation research area.

**Dissertation**

Each student must then carry out a dissertation research project, original in nature, which is expected to contribute significant new knowledge to the area of study. To facilitate this process, each student submits a dissertation research proposal within six months of passing the comprehensive examination.

**Oral Defense**

Finally, all PhD candidates must pass an oral defense of the dissertation and comply with all university and departmental regulations governing the PhD degree.

**Length of Study**

The doctoral program normally requires four to five years beyond the baccalaureate degree.
Microbiology

School of Medicine
M616 Medical Sciences Building
573-882-8152
http://medicine.missouri.edu/mmi/

The Department of Molecular Microbiology and Immunology at the University of Missouri School of Medicine has three primary missions: to foster cutting-edge research on biomedically relevant problems in microbiology, immunology, and virology; to educate strong, independent research scientists; and to provide knowledge-based service to the state, nation and international communities.

Molecular Microbiology and Immunology has a long history of providing graduate and postgraduate education in basic principles of microbiology and immunology, as well as research training opportunities in the laboratories of established scientists with diverse research interests. Faculty expansion has provided new curricular offers with flexibility for personalized scholarly pursuits built in. The breadth of research training includes faculty laboratories in the School of Medicine (http://medicine.missouri.edu), the Bond Life Sciences Center (http://bondlsc.missouri.edu) and the College of Veterinary Medicine (http://vetmed.missouri.edu).

The Department of Molecular Microbiology & Immunology (MMI), in partnership with the faculty from the Department of Veterinary Pathobiology (VPB), offers a comprehensive graduate program, Molecular Pathogenesis and Therapeutics Graduate Program (MPT), leading to the Doctor of Philosophy (PhD) degree. Strong scientific interactions among faculty from these and other academic units across campus illustrate the importance of scientific collaborations not only in meeting the research challenges in microbiology and immunology, but also in providing a strong academic environment for the training of the next generation of scientists and educators in these disciplines. The faculty in this training program have achieved international recognition for their scientific contributions and expertise, with their research efforts published in top tier research journals and funded through stringent peer-reviewed federal grants. Many of these investigators serve on scientific review committees for these funding agencies.

This program provides individualized training that is strongly oriented toward basic research in molecular and cellular biology, microbiology, pathogenesis, immunology and host-parasite interactions. MMI offers under the program name of Molecular Pathogenesis and Therapeutics Graduate Program (MPT):

• PhD in Microbiology (Medicine)
• Cooperative Degrees: MD/PhD in Microbiology (Medicine)

Faculty

Molecular Microbiology and Immunology

Associate Professor J. F. Cannon**, M. Johnson**, D. R. Lee**, S. Liu**, S. Sarafianos**
Assistant Professor M. R. Baldwin*, M. A. Daniels**, H. Guo **, E. Teixeiro-Pernas**

Assistant Teaching Professor J. L. Furrer
Veterinary Pathobiology

Associate Professor D. Anderson**, M. J. Calcutt**

Jointly appointed to Molecular Microbiology and Immunology

Professor J. D. Wall**
Associate Professor U. Atasoy**, D. Cornelison**, B. Hahm**
Assistant Professor P. Brown**, S. C. McKarns**

Graduate and postgraduate education programs offer the basic principles of microbiology, pathogenesis, and immunology as well as research training opportunities in the laboratories of established scientists with diverse research interests.

Undergraduate

While the University of Missouri does not offer an undergraduate degree specifically in molecular microbiology and immunology, undergraduates are able to take basic courses offered by Molecular Microbiology and Immunology in the areas of microbiology, immunology and virology. MU does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. To name a few, Biological Sciences, Biochemistry, Pre-Med, Nursing, and Health Professions. The catalog provides a complete list of these degree options (p. 5).

Graduate

• MS in Microbiology (p. 700)
• PhD in Microbiology (p. 700)

School of Medicine
M616 Medical Sciences Building
573-882-8152
http://medicine.missouri.edu/mmi/

The Departments of Molecular Microbiology & Immunology (MMI), in partnership with the faculty from the Department of Veterinary Pathobiology (VPB), offers a comprehensive graduate program, Molecular Pathogenesis and Therapeutics Graduate Program (MPT), leading to the Doctor of Philosophy (Ph.D.) degree. The Molecular Pathogenesis and Therapeutics Graduate Program is built around scholarly activities with three important missions: cutting-edge research programs to address relevant biomedical problems in microbiology, pathogenesis, and immunology, a graduate training program to educate strong, independent research scientists, and a commitment to provide knowledge-based service to the state, national and international communities that will improve global understanding of the microbial world, infectious diseases and host immunity to infection. Graduate (and postgraduate) education programs offer the basic principles of microbiology, pathogenesis, and immunology as well as research training opportunities in the laboratories of established scientists with diverse research interests.
Faculty Research

The program is equipped to support a wide range of research activities at the cutting edge of our diverse science. Faculty research activities focus on key problems in pathogenic microbiology, immunology, molecular biology, genetics, therapeutics, and virology.

Research Facilities and Resources

The research environment at MU with Colleges of Medicine, Veterinary Medicine, Agriculture, Engineering, and Arts and Sciences on one comprehensive campus fosters the development of interdisciplinary scientific interactions that enhance both research and training opportunities for faculty and students alike. The Bond Life Sciences Center represents such an interdisciplinary research enterprise and houses investigators from multiple colleges and departments, including MMI and VPB. Critical to the Molecular Pathogenesis and Therapeutics Graduate Program interests in infectious diseases, pathogenesis, therapeutics, and immunity research, the recent construction of an NIH-funded Laboratory for Infectious Disease Research provides modern BSL3/ABSL3 containment research space and animal holding facilities for the investigation of highly infectious organisms and human select agents. This resource, and the Molecular Pathogenesis and Therapeutics Graduate Program's partnership with the Midwest Regional Center for Excellence in Biodefense and Emerging Infectious Disease Research, centered at Washington University in St. Louis, position MU in the national network of infectious disease research and training efforts. Please visit the MMI Web site (http://medicine.missouri.edu/mmi) for additional information on MMI's access to state of the art facilities.

Career Opportunities

Graduates completing this training are prepared to pursue challenging and rewarding professional careers that involve research and teaching at supervisory levels in both the academic and private sectors.

Research & Teaching Assistantships

Students in the doctoral program are awarded research assistantships. Research assistants work with faculty members to obtain practical experience in carrying out research proposals through the collection of research data and writing research reports. All students in the graduate program are required to participate as teaching assistants for two semesters during their studies.

If you are interested in a the Molecular Pathogenesis Graduate Program, please see the "Degrees, Majors (Degree Programs), Emphasis Areas, Minors and Certificate (p. 5)" page for the Ph.D. in Microbiology.

Graduate

MS in Microbiology

Thesis/Non-Thesis Requirements

Minimum requirements by the Graduate School (http://gradschool.missouri.edu/academics/graduation-requirements/masters-grad-requirements.php).

Students must make the degree change from the intended PhD to a Masters with the Graduate School and follow the minimum requirements set by the Graduate School. The Molecular Pathogenesis and Therapeutics Graduate Program requires all Masters students to provide a written thesis as well as present it orally in a public seminar.

Admissions

The Molecular Pathogenesis and Therapeutics Graduate Program does not accept Masters seeking applicants into the program.

PhD in Microbiology (MED)

Program Overview

The Molecular Pathogenesis and Therapeutic Graduate Program (MPT) was collaboratively designed by the Department of Molecular Microbiology & Immunology (MMI) and the Department of Veterinary Pathobiology (VPB). The MPT Graduate Program offers a comprehensive graduate program leading to the Doctor of Philosophy (Ph.D.) degree. This program provides individualized training that is strongly oriented toward basic research in molecular and cellular biology, microbial pathogenesis, immunology and host-parasite interactions. Graduates completing this training are prepared to pursue challenging and rewarding professional careers that involve research and teaching at supervisory levels in both the academic and private sectors.

Graduate students entering into the program should be highly motivated toward a career in research in microbiology. They must have, as a minimum, a baccalaureate degree with an undergraduate record showing superior performance in introductory and advanced coursework in prerequisite subjects (biology, chemistry, physics, and mathematics). They must have taken the Graduate Record Examination and should have superior scores. Additionally, international applicants will require demonstration of English fluency via TOEFL scores. Letters of recommendation from individuals who are qualified to judge should clearly indicate aptitude for, and dedication to, a career in science.

The MMI and VPB Departments are central components of an interdisciplinary campus eminence program in molecular biology, which also involves molecular biologists in biochemistry and biological sciences as well as many other University departments. Program core facilities provide cell culture and immunology services, DNA sequence analysis, micro array analysis, protein structural analysis, transgenic animals, protein expression, proteomics, electron microscopy and molecular cytology.

Program Degree Options

The Doctor of Philosophy (Ph.D.) Degree

The program involves (i) a course of study which includes required and elective course work, (ii) participation in programmatic seminars and journal clubs, (iii) training in teaching through participation in laboratory courses for undergraduates, (iv) a comprehensive examination designed to evaluate a student’s ability to propose and experimentally evaluate a significant scientific question, and (v) the successful completion of a creative and original scholarly research project.

Degree Options

Ph.D. Degree

On average, the graduate degree program will require four to six years of full-time effort, although this may vary depending on the ability and previous experience of the individual student. A Master’s Degree is not a prerequisite for the Ph.D. degree.
Laboratory rotations will approximately adhere to the following schedule:

- **Laboratory environment in which they will evolve.**
- **Possible to research activities within the Program and to the experimental personnel.** The program is designed to expose students as quickly as possible to research activities within the Program and to the experimental personnel. The program is designed to expose students as quickly as possible to the laboratory environment in which they will evolve.
- **Stimulate a direct interaction between students, faculty and other program personnel.** A program leading to the combined Ph.D./M.D. degrees can be designed for students who are admitted to the Medical School and to the MPT Graduate Program. It is anticipated that these students will fulfill their first two years of Medical School PBL academic requirements before entering the MPT Graduate Program for the research-oriented Ph.D. degree. All coursework, TA responsibilities, rotations, comprehensive examinations, and research requirements are the same as for any other graduate student. Dual degree students will be encouraged to complete research rotations during the summer semesters of their two years of medical curriculum so that a dissertation research project can be initiated immediately upon entering the Ph.D. program. Typically, clinical responsibilities for the M.D. will be completed after fulfillment of the requirements for the Ph.D.
- **Third laboratory rotation the graduate student selects a mentor.** Mentor selection is a mutual agreement between the student and the mentor. The Master's Committee should consist of at least four faculty members including the mentor. At least three of the faculty members should be from the MPT Graduate Program and at least one faculty member from outside of the advisor’s primary department.
- **Laboratory rotations**
  - All new graduate students admitted into the MPT Graduate Program are required to perform the three rotations with different faculty advisors, prior to each rotation to determine the appropriate laboratory and rotation advisor. Laboratory rotations expose graduate students to research activities within the Program and to the experimental laboratory environment in which they will evolve. Prior to finishing the third laboratory rotation the graduate student selects a mentor. Mentor selection is a mutual agreement between the student and the mentor. Once the mentor has been selected, the student will perform his or her doctoral research under the guidance of the mentor in his/her lab.
  - **Laboratory Rotation Schedule**
    - The MPT Graduate Student Laboratory Rotation Program represents a vehicle to introduce the research laboratory to incoming students and to stimulate a direct interaction between students, faculty and other program personnel. The program is designed to expose students as quickly as possible to research activities within the Program and to the experimental laboratory environment in which they will evolve.

## Degree Requirements

All students in the program are supported by a stipend (currently $25,000 per year pre- and post-comprehensive exams [taken during 3rd year]) plus tuition costs and basic medical insurance.

### Laboratory Rotations

A program leading to the combined Ph.D./M.D. degrees can be designed for students who are admitted to the Medical School and to the MPT Graduate Program. It is anticipated that these students will fulfill their first two years of Medical School PBL academic requirements before entering the MPT Graduate Program for the research-oriented Ph.D. degree. All coursework, TA responsibilities, rotations, comprehensive examinations, and research requirements are the same as for any other graduate student. Dual degree students will be encouraged to complete research rotations during the summer semesters of their two years of medical curriculum so that a dissertation research project can be initiated immediately upon entering the Ph.D. program. Typically, clinical responsibilities for the M.D. will be completed after fulfillment of the requirements for the Ph.D.

### The Master of Science (M.S.) Degree

Admission to the MPT program as a Masters student is not an option, students are accepted with the intent that they will fulfill the PhD requirements. Only under unforeseen circumstances such as illness, a change in academic interest, or other personal reason, a student is allowed to transfer to the M.S. degree. Requirements are the same as for doctoral candidates, though successful completion of a comprehensive examination is not a requirement for the Master’s candidate. Students, opting for a M.S. degree, must complete a research project and write and defend a Master’s thesis in front of their Master’s committee. The Master’s Committee should consist of at least four faculty members including the mentor. At least three of the faculty members should be from the MPT Graduate Program and at least one faculty member from outside of the advisor’s primary department.

### Degree Requirements

All students in the program are supported by a stipend (currently $25,000 per year pre- and post-comprehensive exams [taken during 3rd year]) plus tuition costs and basic medical insurance.

### Laboratory Rotations

All new graduate students admitted into the MPT Graduate program are required to complete three laboratory rotations starting in the Fall semester and concluding in mid-January before the Spring semester begins. Students will meet with the Director of Graduate Studies prior to each rotation to determine the appropriate laboratory and rotation advisor. Laboratory rotations expose graduate students to research activities within the Program and to the experimental laboratory environment in which they will evolve. Prior to finishing the third laboratory rotation the graduate student selects a mentor. Mentor selection is a mutual agreement between the student and the mentor. Once the mentor has been selected, the student will perform his or her doctoral research under the guidance of the mentor in his/her lab.

### Laboratory Rotation Schedule

The MPT Graduate Student Laboratory Rotation Program represents a vehicle to introduce the research laboratory to incoming students and to stimulate a direct interaction between students, faculty and other program personnel. The program is designed to expose students as quickly as possible to research activities within the Program and to the experimental laboratory environment in which they will evolve.

Laboratory rotations will approximately adhere to the following schedule:

- **Summer Research Experience** - Start of Summer semester (usually 1st Monday in June) - July 31st
- **1st Rotation** - August 24th - October 2nd
- **2nd Rotation** - October 5th - November 13th
- **3rd Rotation** - November 16th - January 15th (this allows limited time off for holidays and final exams)

These dates will change from year to year depending on the start date of the Fall semester and will be set by the Director of Graduate Studies. **With permission of Director of Graduate Studies, Executive Committee, and Department Chairs**

Students who wish to enter the program early at the beginning of the summer semester preceding their first academic semester may do so, if financial resources are available. However, this will be considered a “summer research experience” with one of the faculty members but not an official rotation. This summer research experience should begin no earlier than June 1 and no later than the first day of the Summer semester, and should end on August 15th. This student will still be required to perform the three rotations with different faculty advisors, starting in the fall. The student would then be able to select one of those advisors including the “summer research experience” advisor as his or her doctoral advisor. **Students engaging in the "summer research experience" will register for 4 credit hrs of Micro 9085 Problems (Rotations) for the summer semester and will need to be on campus by the beginning of the MU summer semester (usually first Monday in June).**

### Required Courses for Graduate Students in Program

**Fall semester, 1st year (all required):**

- Micro 7101 Structure and Synthesis of Macro Molecules (2 credit hrs.)
- Micro 7303 Fundamental Virology (2 credit hrs.)
- Micro 7304 Immunology (2 credit hrs.)
- Micro 7404 Bacterial Pathogenesis (2 credit hrs.)
- Micro 8050 Graduate Student Survival Skills (1 credit hr.)

**Three of the following courses (only one of these may be an approved elective):**

- Micro 9407 Advanced Immunology (4 credit hrs.; offered Spring semesters of even years only)
- Micro 9432 Molecular Biology II (4 credit hrs.; offered every Spring semester).
- Micro 9449 Infection and Immunity (4 credit hrs.; offered every Fall semester).
- Micro 9001 Topics in Microbiology (4 credit hr.; every other Spring semester- currently offering Advanced Virology-section 01 and Advanced Bacterial Pathogenesis-section 02)

**Approved 9/9000 current literature-based elective (3-4 credit hrs.)**

**8000/9000-level electives:** The DGS and the Curriculum Committee must approve these courses. They should also be approved by the student’s doctoral committee (examples of courses still needing approval are given below):

- V_PBio 8436 Pathogenic Mechanisms in Veterinary Pathobiology (3 hours)
- Bio SC 8350 Advanced Cell Biology (3 hours)
- Bio SC 8320 Developmental Genetics (3 hours)
- Bio SC 8440 Integrative Neuroscience I (3 hours)
- Bio SC 8442 Integrative Neuroscience II (3 hours)
• MPP 9426 Transmembrane Signaling (4 hours)
• MPP 9435 Skeletal Muscle (3 hours)
• V_P BIO 8641 Introduction to Research Ethics (1 credit hr.; every Spring semester)
• MICROB 9087 Seminar in Microbiology (required to take this 4 times: 2nd-5th years) (1 credit hr.; every Spring semester)
• MICROB 9403 Advanced Medical Microbiology (credit for teaching) (2 credit hrs.; every semester)

Other duties

• Act as a teaching assistant (TA) in MICROB 2800 or MICROB 3200 for two semesters (to be completed during the first two years, but not during the Fall semester of the first year).
• Attend Program seminars (any invited speakers and student seminars) on Wednesdays at 1:15 pm usually in Monsanto Auditorium in the Bond LSC; attendance will be taken; enroll in MICROB 8907 Seminar in Microbiology for 1 credit hr. in the Spring semesters of years 2-5.

You will need to give a seminar during those years as well, and your grade will be determined by attendance and your presentation.

• English-Language Proficiency Requirements for International Students

Any graduate student who completed primary and secondary education (equivalent of K-12 in the U.S.) in a country where English is not the primary language is required to pass the Speaking Proficiency English Assessment Kit (SPEAK) test conducted through the Office of Graduate Studies. International graduate students must receive a level 2 or higher on their language assessment to meet the requirements to TA. If they receive a score below 2 additional courses may be recommended for the student to increase their language skills before their English language is reassessed.

ONITA training is offered during the week preceding the Fall and Spring semester. The training is required for all new international graduate students before the first semester of teaching or assisting with teaching at MU.

Credit Hour Requirements:

The Graduate School requires 72 hours of advanced study to be completed for the Ph.D. degree. A minimum of 15 hours of 8000-level course work, not including MICROB 9085 Problems in Microbiology and MICROB 9090 Research in Microbiology, at most, four hours of MICROB 9087 Seminar in Microbiology can count toward this requirement.

Full-time Student Enrollment

Graduate student full-time enrollment statutes pre-comprehensive exam:

• 9 credit hours for fall and spring, 4 credit hours for summer.

Graduate student full-time enrollment statutes post-comprehensive exam:

• 2 credit hours for fall and spring, 1 credit hour for summer.

Requirements for Qualifying and Comprehensive Exam

Each student will be required to master two phases of the curriculum, qualifying and advanced, designed to achieve the educational objectives described above. The MPT Graduate Program Curriculum Committee makes decisions regarding additions or changes to the basic curriculum. Due to the changing environment in this field of research, the MPT Graduate Program curriculum may be subject to change.

Qualifying Phase

A required basic series of courses are designed to establish a foundation in bacterial pathogenesis (MICROB 7404), virology (MICROB 7303), and immunology (MICROB 7304).

Advanced Phase

It is expected that combinations of advanced courses in molecular biology of eukaryotes (MICROB 9432), virology (MICROB 9407), and bacterial pathogenesis (MICROB 9404) will comprise the core curriculum, although alternative courses may be prescribed by the Graduate Student Advisory Committee and by Doctoral committees based upon individual student needs. Satisfactory performance is defined as a grade of B or above in these 8000/9000 level courses. Unsatisfactory performance(s) must be corrected according to the recommendations of the Graduate Student Advisory Committee. Such recommendations may include retaking the course(s), additional examinations, or dismissal from the Graduate Program.

Goals and Purpose of Qualifying and Comprehensive Exams

Qualifying Exam

The goal of this exam is to determine whether the student is qualified to enroll in advanced graduate courses as well as intellectually prepared to perform research in this program. Passage of the four fundamental required courses implemented in Fall 2013 will constitute passage of the qualifying exam. The guidelines for this process are covered in greater detail in Section VI.

Comprehension Exam

The purpose of the comprehensive exam is to certify that the student has sufficient scientific knowledge (from the course work) and research insight to advance to candidacy for the Ph.D. This knowledge and insight are examined in this program through the student writing and orally defending an NIH-style research grant proposal. This examination will be administered after the completion of required course work but prior to the end of the student’s third year in the program for students entering the MPT Graduate Program before 2014 or prior to the end of the fall semester of the third year for students entering in 2014 and thereafter. The guidelines for this process are covered in greater detail in Section VII.

PhD Dissertation Guidelines

The final education requirement for the Ph.D. degree is the written and oral presentation of a novel and creative piece of scholarly research that represents new information and significantly advances knowledge in that field of research. The dissertation project must be approved by the student’s doctoral committee and should demonstrate the student’s scientific maturity and ability to write in a scholarly fashion. At the
completion of the dissertation research, the student will present his/her research findings in a public seminar for program faculty and personnel and will defend the project before his/her doctoral committee. The project will be detailed in a formal written thesis that conforms to Office of Graduate Studies guidelines with respect to format. Approval of the scientific content of the thesis is the responsibility of each doctoral committee and requires the signature of each committee member, with no more than one dissenting or abstaining vote. The evaluation will consider the following guidelines with respect to thesis content.

a. Introduction – The manuscript should describe pertinent background material that establishes the foundation for the overall thesis proposed as well as the specific research questions being addressed and the significance of this project with respect to the field.

b. Materials and Methods – The thesis should describe in detail the experimental protocols used in the study; where applicable, references to published protocols should be made, but modifications to such procedures should be defined. The methods may be presented as a component of each Results chapter, or may be combined into a single, separate chapter.

c. Results – Presentation of the data accumulated during the study that is relevant to the thesis being examined and the conclusions reached. The data should be presented in chapter format, with each chapter devoted to particular questions relative to the overall thesis. Since students are encouraged to publish their work during their graduate studies, these chapters may represent those publications (however, the student must be responsible for the writing and presentation of this work in the thesis).

d. Discussion – While each chapter presenting research data may contain a discussion of those specific data, the thesis should be concluded with a summary discussion that presents the student’s overall conclusions about the study and the relevance of this work to the field as a whole. This summary provides the student an opportunity for knowledgeable speculation as to the significance of the work and its impact on the field.

Program of Study
The program involves satisfactory completion of a minimum of 72 hours of graduate study as well as completion of original research and a thesis, which demonstrates research competence. Of the 72 hours graduate credit, 15 hours must be in courses numbered 8000/9000 (excluding research and problems courses, but including up to 4 credit hours of seminar courses).

More information at the MPT Graduate Handbook (http://medicine.missouri.edu/mmi/mpt/mpt-resources)

Admission

Admission Contact Information
Jana Clark
Department of Molecular Microbiology and Immunology
M616 Medical Science Building
Columbia, MO 65212
573-882-3938
mmi@missouri.edu

The Departments of Microbiology and Immunology in the School of Medicine and Veterinary Pathobiology in the College of Veterinary Medicine have combined, Molecular Pathogenesis and Therapeutics Graduate Program (MPT), to offer a graduate program designed to prepare students for an advanced professional career in microbiology and immunology. Emphasis is placed on developing outstanding students for productive supervisory roles in universities and colleges, industry, government and research institutes. Enrollment is limited to those students who show evidence of potential for research.

Application Deadline
Fall deadline: January 15

Admission Criteria

- Minimum TOEFL scores:
  - Internet-based test (IBT) Paper-based test (PBT)
  - 92 580

- Minimum GRE scores:
  - Verbal + Quantitative Analytical
  - 300 3.0

- Minimum GPA: 3.0
- Bachelor’s degree from an accredited college or university
- Courses in the following: biology; advanced courses in biochemistry and/or molecular biology are highly desirable; chemistry (quantitative or organic); physics; mathematics

The PhD degree is offered only to students who demonstrate a high level of specialized knowledge and clear evidence of research potential.

Required Application Materials

To the Office of Graduate Studies:

- All required Office of Graduate Studies (https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=umc-grad) documents
- TOEFL score (if international applicant)

To the Molecular Pathogenesis and Therapeutics Graduate Program:

- Departmental application (https://mmi.missouri.edu/apps/grad_app)
- 3 letters of recommendation from individuals competent to comment on the applicant’s potential for graduate work
- GRE scores
- Personal statement
- Copy of TOEFL scores (if international applicant)

Research & Teaching Assistantships

Students in the doctoral program are awarded research assistantships. Research assistants work with faculty members to obtain practical experience in carrying out research proposals through the collection of research data and writing research reports. All students in the graduate program are required to participate as teaching assistants for two semesters during their graduate studies.

Degree Completion Requirements

To be accepted for candidacy into the PhD program in microbiology & immunology, all applicants must perform satisfactorily in a core curriculum that includes advanced-level courses in the sub disciplines
of immunology, molecular biology and microbial pathogenesis. Under the
guidance of a doctoral program committee, a course of study is
individually designed to fit each student’s academic background,
experience and objectives. Interdisciplinary courses in biochemistry,
molecular and cellular biology and genetics provide breadth and balance
in the program and enhance the student’s research abilities. In addition,
the PhD program consists of the following:

- Practical experience in teaching
- Successful completion of a comprehensive examination that tests the
  student’s ability to develop an original scientific hypothesis and devise
  a feasible research plan that will test the hypothesis.
- A demonstration of research and writing ability by completing a
  scholarly dissertation on an approved research problem that results in
  the contribution of significant new knowledge. The final examination
  primarily covers this dissertation research.

University of Missouri Graduate School Application:

“You can apply to the University of Missouri, Office of Research and
Graduate Studies (http://gradstudies.missouri.edu) or directly to the MPT
Program Application (http://medicine.missouri.edu/mmi/mpt/application)
and your application will receive equal attention. However, if you apply
through the MPT Program Application and are accepted by the MPT
Admissions Committee you will ultimately have to complete the Graduate
School application before you can be formally admitted to the program.
Applicants will not be registered with University of Missouri, Office of
Research and Graduate Studies (http://gradstudies.missouri.edu) until they have completed the graduate school
application and paid the graduate school application fee.”

Applicants who are in the United States and reviewed favorably by the
Graduate Admissions Committee will be invited to visit the University of
Missouri for an interview for which the program defrays expenses. This
visit provides an excellent opportunity for the prospective student to meet
the faculty members, talk and interact with our current students, view the
University of Missouri-Columbia and the Molecular Pathogenesis and
Therapeutics Graduate Program, and experience Columbia, Missouri.

All application materials are filed alphabetically under the family name as
indicated by the applicant on the International Student Application form.
It is important that all supporting documents use the same name and
spelling as the International Student Application so they can be quickly
matched up to complete the application file.

You may either print the completed online application form or the PDF
version of the form off and mail to:

Jana Clark, Business Support Staff II
Department of Molecular Microbiology & Immunology
M616 Medical Sciences Building
Columbia, MO 65212

Or e-mail the saved pdf to mmi@missouri.edu

Neuroscience

About the Program

One of the most exciting and dynamic fields of modern science worldwide is neuroscience, the study of how the nervous system is organized and how it functions. The field of neuroscience encompasses many disciplines, including biology, biochemistry, computer sciences, electrical engineering (neural modeling of neural networks and biomedical instrumentation), neurology, neurosurgery, pharmacology, physics, physiology, psychology, psychiatry, and radiology. Neuroscientists have advanced our understanding of nervous system development, neural function, injuries of the nervous system, and disease processes. At MU, neuroscientists investigate the molecular and cellular organization of the nervous system, the structure and function of neural systems (including vision and hearing), behaviors generated by the nervous system, and neurological diseases and disorders. Students interested in the program are encouraged to contact members of the faculty directly by phone or e-mail, or visit the Interdisciplinary Neuroscience Program website.

Career Opportunities

MU’s Interdisciplinary Neuroscience Program offers talented graduate students a chance to train for a career in one of the most exciting fields of modern science. Most of our students pursue research and teaching careers in basic neuroscience departments at prestigious research universities. Others opt for challenging and rewarding positions in applied fields, such as drug research or neurodiagnostic technology. Whatever their ultimate goals, the graduate neuroscientists who are trained at MU gain a solid understanding of the nervous system and of the experimental methods by which this knowledge is acquired.

Plan of Study

Typical undergraduate majors that constitute preparation for graduate work in neuroscience include, but are not limited to, biochemistry, engineering, biology, computer science, chemistry, physics, neurobiology, physics and psychology.

After completing comprehensive course work in molecular, cellular, systems and behavioral neuroscience, graduate students join a research laboratory and work with other lab personnel to master the relevant technical skills and theoretical concepts in their chosen field. Students in the Interdisciplinary Neuroscience Program have the opportunity to present their findings at lab meetings, seminars, journal club sessions, and both national and international professional scientific conferences.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

- Bachelor’s degree or its equivalent

**Graduate Certificate in Neuroscience**

The purpose of this certificate is to provide formal recognition to post-baccalaureate students who are taking neuroscience courses and conducting research in neuroscience laboratories. This stand-alone certificate would allow post-baccalaureate students to have a specific, formal indication of their advanced studies and would be very beneficial to students who are considering applying to graduate degree programs or health sciences programs, such as medical or dental school.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/neuroscience-graduate-certificate/neurosci-ge/Gedt.html
Graduate

PhD in Nutrition Area Program

About the Program

The Nutrition Area Program provides training in the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition: general research skills; structure and biochemical and metabolic functions of nutrients and other dietary constituents; food, diets, and supplements; nutritional status assessment; nutrition and disease; nutrition interventions and policies; and analytical skills. Graduate students also receive training in laboratory research, seminar preparation and delivery, scientific writing, problem solving and research grant writing. Graduate study in nutritional sciences at the University of Missouri offers the advantage of interdisciplinary nutrition research that is facilitated via the many research centers at MU, including Food for the 21st Century (F21C), the Botanical Center, the Life Sciences Center and the MU Nutritional Center for Health (MUNCH).

Nutrition is, by definition, an applied and multi-disciplinary science that integrates other disciplines such as biochemistry, physiology, biology, psychology, sociology, and economics. A primary research focus in the department of Nutrition and Exercise Physiology is the role of diet in the prevention and treatment of chronic diseases that are prevalent in the United States today: obesity, the metabolic syndrome, diabetes, immune disorders, neurodegenerative diseases, and osteoporosis. Specific dietary components being studied for their role in human health include protein, calcium, vitamin D, copper, iron, omega-3 fatty acids, and nutraceuticals. Another important research area is the determinants of eating behavior, including neuro-psychological, sociologic, and economic factors. Investigative approaches include epidemiology, clinical trials, human studies, experimental and transgenic animal models, and cultured cell models.

Statistics

Work out specific courses with advisor

A total of 72 hours beyond the bachelor’s degree, including but not limited to courses from the emphasis areas are required; courses from the Masters degree may be counted at the discretion of the student’s committee. At least 15 of the 72 hours must be at the 8000/9000 level (exclusive of research, problems and independent study experiences). Graduate students may elect to take suggested courses from the following emphasis areas: Human/Clinical Nutrition, Public Health Nutrition, Behavioral Science, Food Science and Biochemistry/Cell Physiology. A list of possible courses that fall within these areas

Undergraduate

While MU does not offer undergraduate degrees specifically in the nutrition area program, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

• PhD in Nutrition Area Program (p. 707)
can be found on the department website: http://ns.missouri.edu/graduate_phd.html.

Sample Plan of Study

Because students in the PhD program are from a wide variety of circumstances, and pursue the PhD at different paces, a sample plan of study is not easily produced. Students are encourage to work out their plan of study with their advisor.

Qualifying Process

Nutritional Sciences Program Applicants must pass a Qualifying Exam before a student is officially admitted to the doctoral program. The Qualifying Exam should be completed by the end of the second semester (D1 form should be filed with the Graduate School). The Qualifying Exam consists of a knowledge-based written exam and an oral exam.

Comprehensive Examination Process

A doctoral student must successfully complete the comprehensive examination within a period of three (3) years beginning with the first semester of enrollment as a PhD student. In addition, the program for the doctoral degree must be completed within three (3) years of passing the comprehensive examination. Time spent in the armed services will not count toward the six (6)-year limit (See Graduate School Active Duty Policy). For any extension of either of these time limitations, the student must petition their faculty advisor/mentor and the academic program's director of graduate studies in writing during the semester prior to reaching the time limitation. The director of graduate studies will notify the advisor in writing of the decision. The two sections of the examination must be completed within one month. A report of this decision (pdf) (http://gradschool.missouri.edu/forms-downloads/repository/d3.pdf), carrying the signatures of all members of the committee, must be sent to the Graduate School and the student no later than two weeks after the comprehensive examination is completed.

Dissertation Requirements

The dissertation must be written on a subject approved by the candidate's doctoral program committee, must embody the results of original and significant investigation and must be the candidate’s own work. All dissertation defenses shall be open to the general faculty. For the dissertation to be successfully defended, the student’s doctoral committee must vote to pass the student on the defense with no more than one dissenting or abstaining vote.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Nutritional Sciences (http://gradstudies.missouri.edu/academics/programs/nutrition) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you applied. Specific information can be found on the department website: http://ns.missouri.edu/grad_admission.html

Nutritional Area Program PhD Applicants are expected to have undergraduate training (lecture and laboratory courses) in general and organic chemistry and biology, a two-semester course in biochemistry, and an upper-level human nutrition course. They must have an average of B or better in science courses (chemistry, biology, physics, biochemistry, mathematics, etc.) taken at an accredited institution and must provide GRE scores. TOEFL scores are required for all international applicants.

Deadline for Applications is December 30th. While applications received after that date will still be considered, they will not be eligible for all fellowships.

**Pathobiology Area Program**

College of Veterinary Medicine
201 Connaway Hall
Columbia, MO 65211
573-884-2444

**About the Pathobiology Area Program**

The Pathobiology Area Program is university-wide and is staffed by faculty from the College of Veterinary Medicine (Veterinary Pathobiology, Veterinary Medicine and Surgery), School of Medicine (Pathology and Anatomical Science, Molecular Microbiology and Immunology, Biochemistry), College of Arts and Science (Biological Sciences), and College of Agriculture, Food and Natural Resources (Biochemistry, Animal Sciences).

**Note:** The master of science program in biomedical sciences (p. 677), with an emphasis in veterinary pathobiology, is listed separately in this catalog but shares the pathobiology doctoral courses and faculty list.

**Faculty**

**McKee Endowed Professor** G. Stewart

**Associate Clinical Professor** L. Berent*, D. Kim, T. Reilly**, C. Vogelweid*, M. Whitney

**Associate Research Professor** A. Ray

**Professor Emeritus** C. A. Carson

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

While MU does not offer undergraduate degrees specifically in pathobiology, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

**Graduate**

• PhD in Pathobiology Area Program (p. 710)

**Director of Graduate Studies:**

**About the Program**

The Pathobiology Area Program is university-wide and is staffed by faculty from the College of Veterinary Medicine (Veterinary Pathobiology, Veterinary Medicine and Surgery), School of Medicine (Pathology and Anatomical Science, Molecular Microbiology and Immunology, Biochemistry), College of Arts and Science (Biological Sciences), and College of Agriculture, Food and Natural Resources (Biochemistry, Animal Sciences).

**Note:** The master of science program in biomedical sciences (p. 677), with an emphasis in veterinary pathobiology, is listed separately in this catalog but shares the pathobiology doctoral courses and faculty list.

**Financial Aid from the Program**

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. In this program, various stipends are available, including teaching and research assistantships and postdoctoral fellowships. Check the program Web site or ask the program contact for details.

**Career Preparation**

Graduate training relates to the major departmental thrust — application of advanced biotechnology to solving today’s most perplexing agricultural, biomedical and companion animal questions. The faculty in the Pathobiology Area Program consists of scientists engaged in a wide variety of research programs supported by grants and contracts from government, foundations and private industry.

The Pathobiology Program is designed to prepare students for advanced professional careers in universities and colleges, research institutes, public health, hospital laboratories and industrial research. The broad scope of the program and its organization across departments creates an atmosphere for meaningful interdisciplinary dialogue between graduate students and faculty. Furthermore, it increases availability of advisors, committee members, facilities and equipment for doctoral candidates. A PhD candidate may choose a plan of research to take advantage of a wide range of interests and specialties in pathology and microbiology.

**Facilities and Resources**

Facilities are available that are suitable for advanced research in pathology, microbiology and molecular biology. A wide range of equipment for advanced molecular biological procedures is available. BSL-3 biocontainment facilities are available.

**Areas of Study**

Toxicology, environmental toxicology, comparative medicine, epidemiology and pathogenesis of avian and mammalian diseases (companion animal, food-producing animal and spontaneous disease of laboratory animals), molecular biology, ultrastructure, parasitology, DNA and RNA analysis, biomechanics, physiology, pathophysiology, oncology, bioinformatics, diagnostic anatomic pathology, veterinary neuropathology, pathology of infectious disease, quantitative pathology, molecular genetics, domestic animal genomics, bacteriology/mycology, virology, cell biology, genomics, and antimicrobial resistance.

</tbody>
</table>

Minimum undergraduate GPA for last 60 credits: 3.0
Designated faculty mentor
Professional students with a DVM degree may be eligible to waive the GRE.

Required Application Materials

To the Graduate School:
All required Graduate School documents

To the Pathobiology Area Program:
3 letters of recommendation (can be submitted through the Graduate School’s online application as well)
GRE scores (required)
Mentor letter of support

Plan of Study

Most of the student’s program and examining committees shall be from the Area Program faculty. Under the guidance of a program committee, a course of study is individually designed to fit each student’s academic background, experience and objectives. Courses may be chosen from one or more departments, as decided by the student in conjunction with the student’s mentor/committee, but shall constitute a definite plan of education for research or scholarly investigation in some particular aspect of microbiology, pathology, or comparative medicine. The final examination covers mainly the dissertation.

Degree Requirements

Research is the foundation of graduate and postdoctoral study and students within the Pathobiology Area Program can expect to spend 75 percent of their time engaged in research activities. The PhD degree requires 72 credit hours of work including a minimum of 15 credits of upper-level graduate course work exclusive of research credits. The student must pass a written and/or oral comprehensive examination in the area of study and write, present and defend a dissertation that embodies the results of original and significant investigation by the candidate. Up to 30 hours of post-baccalaureate credit from an accredited institution may be transferred toward the doctoral degree.

Interdisciplinary Area of Pathobiology

The Department of Veterinary Pathobiology in the College of Veterinary Medicine, along with the Department of Pathology and Anatomical Sciences in the School of Medicine and faculty from many other departments throughout the University, offer a PhD degree through the Pathobiology Area Program.

Prospective students must have a solid background in the life sciences, with advanced level experience in microbiology, immunology, genomics, molecular biology, cell biology, pathology, and/or biology.

Research experience at the undergraduate and/or master’s level is also desirable.

The Pathobiology Area Program is designed to prepare students for advanced professional careers in universities and colleges, research institutes, public health, hospital laboratories and industrial research. The broad scope of the program and its organization across departments creates an atmosphere for meaningful interdisciplinary dialogue between graduate students and faculty. A PhD candidate may choose a plan of research to take advantage of a wide range of interests and specialties in pathology and microbiology. Facilities are available that are suitable for advanced research in pathology, microbiology, and molecular biology. A wide range of equipment for advanced molecular biological procedures is available. Various stipends are available, including teaching and research assistantships and postdoctoral fellowships.

Faculty members of the Program guide the selection of coursework and the development of a dissertation project. A list of doctoral faculty eligible to supervise PhD students is available here (http://www.cvm.missouri.edu/AreaPatho).

For additional information regarding mentorship specifically in the Department of Pathology and Anatomical Sciences program, please contact:

About Pathology and Anatomical Sciences

The Department of Pathology and Anatomical Sciences in the School of Medicine, along with the department of Veterinary Pathobiology in the College of Veterinary Medicine, offers a PhD degree through the Pathobiology Area Program. Faculty also participate in other doctoral programs such as the Integrative Neuroscience Program, Genetics Area Program, and Molecular Pharmacology and Physiology. The MS degree is designed primarily to prepare students for supervisory roles in basic-science and clinical laboratories, and to offer greater in-depth study in pathology and anatomical sciences concurrent with studies leading to the PhD and/or MD degree.

Faculty

Professor G. E. Davis, W. J. Krause**, J. H. Miles, G. Y. Sun, C. V. Ward**
Associate Professor E. H. Adelstein*, A. A. Diaz-Arias*, E. A. Ingram, R. Mitra*
Lecturer D. L. Dufeau, R. H. Dunn, S. D. Maddux*
Clinical Instructor J. Jones, D. V. Shin
Clinical Professor D. C. Miller*, M. Petrides*
Associate Clinical Professor A. D. Havey*
Assistant Clinical Professor M. Esebua, S. R. Frazier, C. C. Stacy*, M. X. Wang*
Associate Research Professor R. R. Little
Assistant Research Professor J. Cui
Adjunct Professor M. J. Ravosa**, M. S. Stack**
Associate Professor Emeritus L. E. Spollen

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in pathology and anatomical sciences, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Application Deadline

Fall entrance: Inquire with Director of Graduate Studies

Admission Criteria

• Admission to candidacy in the master’s program is limited to those who hold at least a baccalaureate degree from an accredited college or university.
• Preference will be given to students with a college GPA of 3.5 or higher
• Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal + Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>
<td>N/A</td>

</tr>
<tr>
<td>On or After August 1, 2011</td>
<td>325</td>
<td>N/A</td>
</tr>
</tbody>
</table>
Required Application Materials to the Graduate School:

- All required Graduate School documents

Degree Completion Requirements

Each candidate for the master’s degree is required to complete a minimum of 30 semester hours at the 8000 or 9000 level and maintain a B or better GPA in graduate course work, with no more than 12 hours of research, problems, seminars or special investigations.

Candidates also must satisfactorily complete a thesis. A candidate is expected to demonstrate knowledge of clinical and/or research techniques and to defend the thesis.

Faculty members advise students regarding their program of study and thesis research. A list of graduate faculty eligible to supervise MS students is available on the departmental website.

Required courses and those of special interest should complement the student’s academic background and career objectives. The MS degree is designed primarily to prepare students for supervisory roles in basic-science and clinical laboratories, and to offer greater in-depth study in pathology and anatomical sciences concurrent with studies leading to the PhD and/or MD degree.

Admission to candidacy in the master’s program is limited to those who hold at least a baccalaureate degree from an accredited college or university.

Preference will be given to students with a college GPA of 3.5 or higher, GRE scores (verbal + analytical) over 325, and strong letters of recommendation.

Required courses and those of special interest should complement the student’s academic background and career objectives.
Public Health

Two Different Public Health Degree Options

The University of Missouri offers two different degree programs in the area of public health: the Master of Public Health, and a Master of Science in Public Health.

- The Graduate School confers the Master of Public Health (MPH) degree. The MPH Program has two emphasis areas Health Promotion and Policy or Veterinary Public Health; dual degrees with Public Affairs, Journalism, and Veterinary Medicine; and a graduate certificate. This public health coursework reflects the University of Missouri's strength in the health professions, social work, nursing, medicine, veterinary medicine, and arts and sciences. The MPH is a course of study appropriate for students with a wide variety of undergraduate degrees including social work, political science, biology, and communication.

- A Master of Science in Public Health (post-doctorate) is offered by the Department of Family and Community Medicine in the College of Medicine. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents, and licensed to practice in a primary care specialty.

MPH in Public Health

MPH Application and Admission Information

Admission Contact Information
MPH Program (mumphprogram@missouri.edu)
802 Lewis Hall
The Master of Public Health (MPH) is the standard professional degree recognized throughout the world for public health practice. The MPH program at the University of Missouri trains practitioners, teachers, researchers, and administrators to plan, implement, and evaluate programs aimed at enhancing health in human populations through organized effort on the local, state, and national level.

All public health students are educated in the core domains of public health and participate in a supervised internship in a public health agency. The combination of course work and practical experience produces individuals who are highly qualified to enter the public health workforce.

The MPH curriculum is drawn from a variety of collaborating academic programs and units. Public health coursework reflects the University of Missouri’s strength in the health professions, social work, journalism, public affairs, nursing, medicine, veterinary medicine, and arts and sciences.

## Degrees

The MPH is available in two emphasis areas:

- Health Promotion and Policy ([http://publichealth.missouri.edu/programs_health_promo_pol.php](http://publichealth.missouri.edu/programs_health_promo_pol.php))
- Veterinary Public Health ([http://publichealth.missouri.edu/programs_vet_pub_health.php](http://publichealth.missouri.edu/programs_vet_pub_health.php))

### Four dual degrees are also offered:

- MPH/Doctor of Veterinary Medicine ([http://publichealth.missouri.edu/programs_mphdvm.php](http://publichealth.missouri.edu/programs_mphdvm.php))
- MPH/Master of Public Affairs ([http://publichealth.missouri.edu/programs_mphmpa.php](http://publichealth.missouri.edu/programs_mphmpa.php))
- MPH/Master of Arts, Journalism ([http://publichealth.missouri.edu/programs_mphma.php](http://publichealth.missouri.edu/programs_mphma.php))
- MPH/Master of Social Work ([http://ssw.missouri.edu/msw_dual.html](http://ssw.missouri.edu/msw_dual.html))

### Thesis Option

The Masters Thesis Research (P_HLTH 8090) requires independent research aimed at discovery and/or development of elements or relationships derived from a public health theory. A formal written report using guidelines established by the MU Graduate School is required. Masters Thesis Research enables the student to use the research process in a systematic inquiry of elements and relationships within public health theory. MU Graduate School Guidelines for the Thesis Process is available at: [http://gradschool.missouri.edu/academics/thesis-dissertation/process/index.php](http://gradschool.missouri.edu/academics/thesis-dissertation/process/index.php).

The Master’s Thesis Project provides students with the opportunity to:

- generate a research question within a theory,
- formulate and implement a research design, and
- make recommendations for replication, revisions, or future investigations.

### Application Deadlines

- Fall semester: June 1
- Spring semester: October 1

### Admission Criteria

**Minimum TOEFL scores:**

<table>
<thead>
<tr>
<th>Internet-based test (IBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

- Minimum Academic IELTS overall score: 6.0
- Minimum GRE score: not set
- Minimum GPA: 3.0 in last 60 hours of undergraduate coursework

### Required Application Materials

For more information to apply click here ([http://publichealth.missouri.edu/apply.php](http://publichealth.missouri.edu/apply.php)).

### MPH in Public Health with Emphasis in Health Promotion and Policy

This program combines a thorough knowledge of behavior change theory and program planning and evaluation with valuable knowledge of how policy decisions are influenced and made. Particularly attractive to students with undergraduate degrees in psychology, social work, political science, communications and other related fields. For more information about this program, please visit: [http://publichealth.missouri.edu/programs_health_promo_pol.php](http://publichealth.missouri.edu/programs_health_promo_pol.php).

For admission requirements, refer to the Graduate School’s website for the minimum qualifications for the degree program (http://gradschool.missouri.edu/academics/programs) and the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

**Graduate Certificate in Public Health**

**Financial Aid from the Program**

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

**Admission**

Students wishing to pursue a Graduate Certificate in Public Health should complete the MU Graduate School’s online application (standardized test scores are not required). Certificate candidates must provide the MPH Program’s Personal Data Sheet and official transcripts to the MPH Program.

**About the Certificate**

This 12-credit-hour program provides students with the core public health education that they need to enhance their professional knowledge. The certificate program includes the following courses:

- Principles of Public Health
- An approved Health Statistics course
- Human Health and the Environment, Social and Behavioral Sciences in Public Health or Epidemiology
- One approved elective

**Applying to the Graduate Certificate Program**

Students who complete the Graduate Certificate in Public Health with a minimum grade of B in each of the four courses will be recommended for admission to the Master of Public Health (MPH) program should they wish to continue their studies. The course credits earned for the graduate certificate will be credited toward the MPH degree. To apply click here ([http://publichealth.missouri.edu/apply.php](http://publichealth.missouri.edu/apply.php)).

Federal Gainful Employment disclosure information for this Graduate Certificate is available at [http://gradschool.missouri.edu/academics/programs/public-health-graduate-certificate/pub-health-ge/Gedt.html](http://gradschool.missouri.edu/academics/programs/public-health-graduate-certificate/pub-health-ge/Gedt.html)

**MS in Public Health: Family and Community Medicine**

**Plan of Study**

The graduate program leading to the master of science includes a combination of course work, research and field experience. Courses cover areas such as research methods, epidemiology, biostatistics and learning theory.

The program requirements include 30 hours of graduate course work and the completion of scholarly project.

**Admissions**

**Admission Contact Information**

Ashley Granger  
One Hospital Dr,  
M224 Medical Sciences Building, DCO32.00  
573-884-7060

The Department of Family and Community Medicine has responsibilities for teaching, research and service activities covering the spectrum from primary medical care to community medicine. This graduate degree program is designed to prepare primary care physicians to work in an academic setting as faculty members with responsibilities for patient care, teaching, research, and scholarly endeavors. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents and licensed to practice in a primary care specialty.
Application Deadline
Deadline for Fall entrance: Call for deadline dates

Admission Criteria
• Board-certified/board-eligible primary care physicians

Required Application Materials
To the Graduate School:
All required Graduate School documents
To the Program (call for application):
• 3 letters of recommendation
• Departmental application
• Personal statement
• CV or résumé
• Verification from medical school and residency program
• Official transcripts

Financial Aid from the Program
Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.
Social Work/Public Health

Students can earn a Master of Social Work (http://ssw.missouri.edu/msw.html) (MSW) and a Master of Public Health (http://publichealth.missouri.edu) (MPH) with an emphasis in Health Promotion and Policy (http://publichealth.missouri.edu/programs_health_promo_pol.php). Graduates of the dual degree will be well-positioned to find employment as a health policy advocate, health agency administrator or in an integrated behavioral health setting as a care managers, health coach, patient advocate, counselor, or team leader. Students pursuing dual degrees must be independently admitted to each program. Only Regular Standing (http://ssw.missouri.edu/msw_options.html) (RS), full-time MSW students (both clinical or PP&A concentration) will be admitted to the program.

The dual degree reduces total student credit hours by 24-27 credits and reduces the length of study by one academic year. If completed separately, students would be required to complete 105 credit hours (60 credit hours for RS MSW; 45 credit hours for MPH). Students completing both degrees will be required to complete 78-81 credit hours, with 51-54 of those being discipline specific (18 MPH and 33 [PP&A]- 36 [Clinical] MSW) and 27 credits shared between the two programs. Students will complete the both degree programs in 7 semesters, including one summer session. Please see our sample plans of study (http://ssw.missouri.edu/msw_studyplans.html#dual).

Students will apply separately to each program and be admitted to both programs before they are accepted as a dual degree student. Students may apply at any point before beginning graduate school or during the first year of either program. MPH students applying for the MSW program (http://ssw.missouri.edu/mswapp.html) must submit their MSW application no later than April 15th (http://ssw.missouri.edu/msw_deadlines.html#dual) of their first year of study but early application submission is encouraged. MSW students applying for the MPH program must submit their MPH application (http://publichealth.missouri.edu/apply_mph.php) by December 1st of their first year. Once accepted into both programs, the student must complete the Intent to Complete MSW/MPH Dual Degree form (http://ssw.missouri.edu/docs/msw/dualDegree.pdf).

The advisor for the MSW/MPH Dual Degree program participants will be a faculty member with a joint appointment in both the MSW and MPH Programs. If a faculty member with a joint appointment is not available for advising, the student will be appointed a separate advisor for both degree programs. In cases where student difficulties are experienced that require advisory services other than that available from the advisor, the School of Social Work’s formal student advisory process will be followed.

Up to eight hours of transfer credit (http://ssw.missouri.edu/msw_coursecredit.html#dual) may be applied as follows: to one of the two degree programs, or divided between the two degree programs per the advisor(s) and program directors’ decision. The eight hours of transfer credit will not be applied separately to each degree program.

Credit requirements, shared hours, and curriculum focus conform to the requirements of the MU Graduate School, the national accrediting body for graduate education in public health (CEPH), and the national accrediting body for graduate education in social work (CSWE). The capstone and internship will satisfy the requirements of both programs and will focus on the intersection of subject matter between social work and public health.

Faculty

Faculty for the Social Work/Public Health dual degree are housed in other departments.

Undergraduate

While MU does not offer undergraduate degrees specifically in social work/public health, the University does offer a dual graduate degree in the subject, as well as baccalaureate, master’s and doctoral degree opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

- MSW/MPH in Social Work/Public Health with emphasis for Public Health in Health Promotion and Policy (p. 717)

The MSW/MPH in Social Work and Public Health will provide the student with solid preparation in each discipline, as well as a deeper understanding of the ways in which the two disciplines overlap through shared coursework. Graduates of the dual degree will be well-positioned to find employment as a health policy advocate, health agency administrator or in an integrated behavioral health setting as a care manager, health coach, patient advocate, counselor, or team leader.

Students will apply for admission separately to each program.

**Total Credits: 60-73.5**

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MSW in Social Work program (http://gradschool.missouri.edu/academics/programs/social-work/masters.php), the requirements of the MPH in Public Health program (http://publichealth.missouri.edu/apply.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.
Additional Minors and Certificates  
- Interdisciplinary Academic Programs

**Undergraduate Certificates**
- Certificate in Digital Global Studies (p. 719)
- Certificate in Environmental Studies (p. 719)
- Certificate in General Honors (p. 720)

**Undergraduate Minors**
- Minor in Entrepreneurship (p. 720)

**Graduate Certificates**
- Certificate in Autism and Neurodevelopmental Disorders (p. 723)
- Certificate in Center for the Digital Globe (p. 723)
- Certificate in Community Processes (p. 725)
- Certificate in Conservation Biology (p. 725)
- Certificate in European Union Studies (p. 726)
- Certificate in Global Public Health (p. 726)
- Certificate in Health Ethics (p. 726)
- Certificate in Life Science Innovation and Entrepreneurship (p. 727)
- Certificate in Society and Ecosystems (p. 728)

**Graduate Minors**
- Minor in Ancient Studies (p. 728)
- Minor in College Teaching (p. 729)
- Minor in Gerontology Studies (p. 730)
- Minor in International Development (p. 730)

**Undergraduate Certificates**

**Certificate in Digital Global Studies**

This certificate is designed to prepare students in any discipline for our new global reality and equip them with the knowledge and skills needed to be successful in today’s highly competitive global job market. All current MU undergraduate students in any discipline are eligible to participate.

The structure of the certificate includes two required core courses (honors eligible), two elective courses, and an experiential learning component. Below are the details on the required courses (more cross-listed options will be added).

A list of approved options for the electives is available online at: http://cig.missouri.edu/globalconnect/electives.html.

The experiential learning component varies depending on the student’s field of study and interest, but an emphasis on global relations, cultural awareness, or media technology is required. This component could be study abroad, service learning, internship, etc. with an MU Center or an outside local, national or international organization.

For additional information about the certificate, contact: Professor Monika Fischer, Certificate Director

**Certificate Requirements**

- 6 hours of Natural or Social Dimension courses, which are listed below.
- 3 hours of AG_EC 2070 or NAT_R 2160
- 6 hours of upper level 2000+ environmental-focused courses. For course options, visit https://omd.missouri.edu/?q=env-st-cert/index.

- **Natural Dimensions Track for Non-Science Majors (6 hours minimum)**
  - **AG_S_M 1040** Physical Principles for Agricultural Applications 3
  - **AG_S_M 2320** Internal Combustion Power 3
  - **AG_S_M 2220** Agricultural/Industrial Structures 3
  - **ATM_SC 1050** Introductory Meteorology 3
  - **GEOG 2610** Climate, Landforms and Vegetation: Introduction to Physical Geography 3
  - **CHEM 1100** Atoms and Molecules with Lab 3
  - **GEOG 1200** Environmental Geology with Laboratory 4
  - **GEOG 2300** Earth Systems and Global Change 3
  - **GEOG 2450** Global Water Cycle 3
  - **GEOG 2600** Mineral and Energy Resources of the Earth 3
  - **NAT_R 1060** Ecology and Conservation of Living Resources 3
  - **PLNT_S 2254** Landscape Design 3
  - **PEA_ST 2810** Case Studies in an Inter/Multicultural World 3
  - **ATM_SC 1050** Atmospheric Science 3
  - **GEOG 2610** Climate, Landforms and Vegetation: Introduction to Physical Geography 3
  - **GEOG 2610** Climate, Landforms and Vegetation: Introduction to Physical Geography 3
  - **GEOG 2610** Climate, Landforms and Vegetation: Introduction to Physical Geography 3
  - **GEOG 2610** Climate, Landforms and Vegetation: Introduction to Physical Geography 3
  - **GEOG 2610** Climate, Landforms and Vegetation: Introduction to Physical Geography 3
  - **GEOG 2610** Climate, Landforms and Vegetation: Introduction to Physical Geography 3

**Certificate in Environmental Studies**

Office of Multidisciplinary Degrees
114 Switzler Hall
(573)882-6060
https://omd.missouri.edu/?q=env-st-cert/index

The Environmental Studies Certificate is 15 credit hours minimum of coursework focused on environmental topics. It is available to all MU majors, but because the certificate’s goal is to create a complementary educational experience, students need to select coursework outside of their major.

There are two tracks for the certificate: Natural Dimensions for non-science majors and Social Dimensions for science majors. In general, students with majors in Business, Humanities, Journalism, Social or Behavioral Sciences, Mathematics, or non-science Education majors will pursue the Natural Dimensions track, while students with majors in Natural Sciences, Engineering, or science Education will pursue the Social Dimensions track.

**Certificate Requirements**

- 3 hours of AG_EC 2070 or NAT_R 2160
- 6 hours of upper level 2000+ environmental-focused courses. For course options, visit https://omd.missouri.edu/?q=env-st-cert/index.

- **Natural Dimensions Track for Non-Science Majors (6 hours minimum)**
  - **AG_S_M 1040** Physical Principles for Agricultural Applications 3
  - **AG_S_M 2320** Internal Combustion Power 3
  - **AG_S_M 2220** Agricultural/Industrial Structures 3
  - **ATM_SC 1050** Introductory Meteorology 3
  - **GEOG 2610** Climate, Landforms and Vegetation: Introduction to Physical Geography 3
  - **CHEM 1100** Atoms and Molecules with Lab 3
  - **GEOG 1200** Environmental Geology with Laboratory 4
  - **GEOG 2300** Earth Systems and Global Change 3
  - **GEOG 2450** Global Water Cycle 3
  - **GEOG 2600** Mineral and Energy Resources of the Earth 3
  - **NAT_R 1060** Ecology and Conservation of Living Resources 3
  - **PLNT_S 2254** Landscape Design 3

**Certificate in Conservation Biology**

Office of Multidisciplinary Degrees
114 Switzler Hall
(573)882-6060
https://omd.missouri.edu/?q=env-st-cert/index

The Conservation Biology Certificate is 12 credit hours minimum of coursework focused on conservation biology. It is available to all MU majors, but because the certificate’s goal is to create a complementary educational experience, students need to select coursework outside of their major.

There are two tracks for the certificate: Natural Dimensions for non-science majors and Social Dimensions for science majors. In general, students with majors in Business, Humanities, Journalism, Social or Behavioral Sciences, Mathematics, or non-science Education majors will pursue the Natural Dimensions track, while students with majors in Natural Sciences, Engineering, or science Education will pursue the Social Dimensions track.

**Certificate Requirements**

- 3 hours of AG_EC 2070 or NAT_R 2160
- 6 hours of upper level 2000+ environmental-focused courses. For course options, visit https://omd.missouri.edu/?q=env-st-cert/index.

- **Natural Dimensions Track for Non-Science Majors (6 hours minimum)**
  - **AG_S_M 1040** Physical Principles for Agricultural Applications 3
  - **AG_S_M 2320** Internal Combustion Power 3
  - **AG_S_M 2220** Agricultural/Industrial Structures 3
  - **ATM_SC 1050** Introductory Meteorology 3
  - **GEOG 2610** Climate, Landforms and Vegetation: Introduction to Physical Geography 3
  - **CHEM 1100** Atoms and Molecules with Lab 3
  - **GEOG 1200** Environmental Geology with Laboratory 4
  - **GEOG 2300** Earth Systems and Global Change 3
  - **GEOG 2450** Global Water Cycle 3
  - **GEOG 2600** Mineral and Energy Resources of the Earth 3
  - **NAT_R 1060** Ecology and Conservation of Living Resources 3
  - **PLNT_S 2254** Landscape Design 3
be effectively integrated into their course schedules along with other courses required for their intended major. An advisory committee will be appointed to make administrative decisions related to the minor (course additions/deletions). The members will be recommended by deans of the participating schools and colleges. Primary responsibility for student advising falls within the home college of the student OR in the unit where students claim the minor (e.g., Arts and Sciences students).

The minor consists of 16 credit hours. Students must complete coursework in management, creativity, and innovation, as well as in a workshop series that represents a common learning experience for all MU entrepreneurship minors. Three hours of coursework is required in each area, and a one hour experiential seminar course. Students must select the final three hours to complete the minor from approved courses in one of the pillars. Each of the academic units that offer the minor recommend a set of courses, which are referred to as tracks. Details on those tracks are below.

**Certificate in General Honors**

Students who complete 20 or more honors credit hours and have a 3.3 MU GPA may graduate with general honors. The General Honors Certificate is noted on a student’s final transcript. Up to six hours of departmental honors courses, six hours of transfer honors courses, and six hours of Learning by Contract courses may be used toward the 20 hours. In order to receive honors credit for an honors designated course, you must earn a “C” or better.

Upon completion of the 20 hours of honors course work, students must apply for their honors certificate. Graduating students must apply for their honors certificate by mid-semester to graduate with general honors and to have the notation on their transcript.

For additional information on the certificate, contact:

MU Honors College
211 Lowry Hall
Columbia, MO 65211
phone: 573-882-3893
fax: 573-884-5700

**Minor in Entrepreneurship**

The undergraduate minor in entrepreneurship is built upon three pillars: development of creativity, opportunity for innovative action, and management of entrepreneurial enterprises. It is available to students in the College of Agriculture, Food and Natural Resources (CAFNR); the College of Business (BUSI); and the College of Human Environmental Sciences (HES); School of Journalism (JOURN).

Students who wish to complete the minor are encouraged to declare their intention as soon as possible. This allows the required courses to
This seminar gives students exposure to a variety of experiences including lectures, networking with entrepreneurs, and participant observation.

**BUSI Track**

**Course 1: Management of Entrepreneurial Organizations & Enterprises**
- AG_EC 3283 Fundamentals of Entrepreneurship 3
- MANGMT 4700 Principles of Entrepreneurship 3

**Course 2: Development of Creativity**
Classes in the following areas are accepted: art, music, theater, textile and apparel management, architectural studies, human and family development, and engineering.
- ARCHST 1600 Fundamentals of Environmental Design 3
- ART_GNRL 1010 Introduction to Art 3
- ENGLISH 1510 Creative Writing: Introduction to Fiction 3
- H_D_FS 3510 Curriculum and Activities for the Early Childhood Setting 3
- IMSE 4550 Computer Aided Design and Manufacturing 4
- MUSIC_NM 1211 Fundamentals of Music I 2
- T_A_M 3210 Computer Aided Design 3
- THEATR 2200 Introduction to Performance Studies 3

**Course 3: Organizational & Business Fundamentals**
- MANGMT 3000 Principles of Management 3

**Course 4: Entrepreneurial Individualized Perspective**
- MANGMT 3540 Introduction to Business Law 3

**Course 5: Practicum Capstone**
- FINPLN 4993 Internship in Personal Financial Planning 1-99
- JOURN 4992 Reporting, Editing and Marketing of Converged Media 3
- MANGMT 4730 New Business Planning and Management 3
- SOCIOL 4942 Service Learning in Sociology 3
- T_A_M 4949 Field Training in Textiles and Apparel Management 1-99

**PLUS 1: Experiential Seminar**
- MANGMT 4185 Problems in Management 1

This seminar gives students exposure to a variety of experiences including lectures, networking with entrepreneurs, and participant observation.

**HES Track**

**Course 1: Management of Entrepreneurial Organizations & Enterprises**
- AG_EC 3283 Fundamentals of Entrepreneurship 3
- MANGMT 4700 Principles of Entrepreneurship 3

**Course 2: Development of Creativity**
- ARCHST 1100 Visual Design 3
- ARCHST 1600 Fundamentals of Environmental Design 3
- ARCHST 3100 Color and Light 3
- T_A_M 1200 Basic Concepts of Apparel Design and Production 3
- T_A_M 2380 Integrated Apparel Design and Production I 3
- T_A_M 2480 Apparel and Textile Presentation Techniques 3
- T_A_M 2580 Digital Textile and Apparel Applications 3
- T_A_M 3380 Integrated Apparel Design and Production II 3
- T_A_M 4480 Creativity and Problem Solving 3
- H_D_FS 3510 Curriculum and Activities for the Early Childhood Setting 3

**Course 3: Organizational & Business Fundamentals**
- ARCHST 2100 Understanding Architecture and the American City 3
- ARCHST 4430 Guiding Design with Historic Preservation 3
- H_D_FS 4570 Development and Administration of Child Services Programs 3
- FINPLN 3283 Financial Planning: Computer Applications 3
- FINPLN 4382 Financial Planning: Risk Management 3
- FINPLN 4383 Financial Planning: Investment Management 3
- T_A_M 1300 Softgoods Retailing 3
- T_A_M 2300 Retail Finance and Merchandise Control 3
- T_A_M 3700 MultiChannel Retailing in the Digital World 3

**Course 4: Entrepreneurial Individualized Perspective**
- ARCHST 4940 Internship in Environmental Design 1-99
- H_D_FS 4993 Internship in Human Development and Family Studies 1-99
- FINPLN 4993 Internship in Personal Financial Planning 1-99
- T_A_M 4949 Field Training in Textiles and Apparel Management 1-99

**Course 5: Practicum Capstone**
- ARCHST 4990 Thesis Design Studio 4
- H_D_FS 4570 Development and Administration of Child Services Programs 3
- FINPLN 4389 Financial Planning: Capstone 3
- T_A_M 4980 Apparel Production Management 4
- T_A_M 4990 Retail Marketing and Merchandising 3

**PLUS 1: Experiential Seminar**
- MANGMT 4185 Problems in Management 1

This seminar gives students exposure to a variety of experiences including lectures, networking with entrepreneurs, and participant observation.

**JOURN Track**

**Course 1: Management of Entrepreneurial Organizations & Enterprises**
A course designed to help students develop and understand the principles of entrepreneurship.
- AG_EC 3283 Fundamentals of Entrepreneurship 3
- MANGMT 4700 Principles of Entrepreneurship 3

**Course 2: Development of Creativity**
The following sample courses are available only to upper-level journalism majors who have taken the required prerequisite coursework.
- JOURN 4418 Critical Reviewing 3
JOURN 4420 Editorial Writing 3
JOURN 4500 Publication Design 3
JOURN 4502 Multimedia Planning and Design 3
JOURN 4508 Information Graphics 3
JOURN 4550 Basic Photography and Photo Editing 3
JOURN 4554 Visual Editing for Multimedia 3
JOURN 4556 Fundamentals of Photojournalism 3
JOURN 4558 Advanced Techniques in Photojournalism 3
JOURN 4560 Staff Photomontage 3
JOURN 4564 Micro-Documentary Photojournalism and Videography 3
JOURN 4662 Global News Across Platforms 3
JOURN 4700 Participatory Journalism 3
MANGMT 4710 The Entrepreneurial Process 3

Course 3: Organizational & Business Fundamentals 3

Students must take one course to develop a background in one of the general functions of a new business.

Recommended Courses:
JOURN 4734 Journalism and Chaos: How to Understand and Cover 21st Century Business Models 3
ACCTCY 2010 Introduction to Accounting 3
AG_EC 3224 New Products Marketing 3
MANGMT 3000 Principles of Management 3
MANGMT 4730 New Business Planning and Management 3
FINANC 2000 Survey of Business Finance 3
T_A_M 4100 Electronic Commerce Applications 3

Course 4: Opportunity for Innovative Experience and Action 3

Students take an internship that offers an opportunity to develop experience in innovation or students take an additional course 3 (management) or course 2 (creativity).

Recommended Courses:
JOURN 4940 Internship in Journalism 1-6
JOURN 4736 Changing Media Business Models 3

Course 5: Practicum Capstone 3

A capstone experience that requires students to synthesize entrepreneurial courseworks or provides them with an opportunity for experiential learning toward an innovative outcome.

Recommended Courses:
JOURN 4734 Journalism and Chaos: How to Understand and Cover 21st Century Business Models 3
MANGMT 4720 Experiential Entrepreneurship (pending approval) 3
MANGMT 4730 New Business Planning and Management 3
INFOTC 4500 Team-Based Mobile Device Application Development 3
JOURN 4974 Advanced Internet Applications for Radio/TV News 3
JOURN 4992 Reporting, Editing and Marketing of Converged Media 3
JOURN 4994 Magazine Publishing 3

PLUS 1: Experimental Seminar 1

In their last year of study, students take a (1 hour) experiential seminar that involves interacting with the on-campus offices that work with start-ups, innovators and entrepreneurs.

Recommended Courses:
MANGMT 4185 Problems in Management 1

JOURN Strategic Communication Track

Course 1: Management of Entrepreneurial Organizations & Enterprises 3
A course designed to help students develop and understand the principles of entrepreneurship.

Recommended Courses:
AG_EC 3283 Fundamentals of Entrepreneurship 3

Course 2: Development of Creativity (within the major requires pre-reqs/consent of instructor) 3

Recommended Classes:
JOURN 4208 Strategic Writing II ((copywriters))
JOURN 4228 Strategic Design and Visuals II ((art directors))

Course 3: Organizational & Business Fundamentals 3
A course designed to develop a background in one of the general functions of a new business.

Recommended Classes:
ACCTCY 2010 Introduction to Accounting 3

Course 4: Opportunity for Innovative Experience and Action 3

Students take an internship that offers an opportunity to develop experience in innovation or students take an additional course 3 (management) or course 2 (creativity).

Recommended Classes:
JOURN 4734 Journalism and Chaos: How to Understand and Cover 21st Century Business Models 3

Course 5: Practicum Capstone 3

Experimental learning courses, where the student and the supervisor create an opportunity for innovative output.

Recommended Classes:
JOURN 4734 Journalism and Chaos: How to Understand and Cover 21st Century Business Models 3

PLUS 1: Experimental Seminar 1

In their last year of study, students take a (1 hour) experiential seminar that involves interacting with the on-campus offices that work with start-ups, innovators and entrepreneurs.

Recommended Courses:
MANGMT 4185 Problems in Management 1
Global Communication - Whether from the perspective of journalism, technologies, and particularly the Internet, are their function as worldwide global communication must demonstrate a working understanding of how digital technologies work. Instead, the students must demonstrate the Certificate to learn about the field, perhaps leading to further graduate study and an advanced academic degree.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/autism-neurodevelopmental-disorders-graduate-certificate/autism-ge/Gedt.html

Graduate Certificate in Center for the Digital Globe

The Center for the Digital Globe graduate certificate is a 12 credit hour interdisciplinary program established by the College of Business, School of Journalism, School of Law and the Department of Textile and Apparel Management in the College of Human Environmental Sciences. The Center for the Digital Globe offers two graduate certificate options. The requirements for each are outlined below.

Stand-Alone Certificate (For non-degree graduate students and students completing professional degrees) OR Graduate-Degree-Dependent Certificate (For students completing a graduate degree)

I. CDIG STAND-ALONE CERTIFICATE
(For non-degree graduate students and students completing professional degrees)

The Center for the Digital Globe, established by the College of Business, School of Journalism, School of Law and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers a 12 credit hour interdepartmental certificate to non-degree graduate students and professional students of the University of Missouri. The prerequisite for the stand-alone certificate is a baccalaureate degree. The certificate program supplants the students’ studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students’ successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization. Students receiving the stand-alone certificate will have demonstrated competencies in:

Technology - Students need not have achieved mastery of specific engineering, programming or application skills. Instead, the students must demonstrate a working understanding of how digital technologies function.

Global Communication - One of the primary characteristics of digital technologies, and particularly the Internet, are their function as worldwide communications media. Whether from the perspective of journalism, business or the law, the impact of these new communications channels has been substantial. Students should achieve an understanding of how new media are different from print or broadcast media and the consequences of those differences.

Business - Students should be well grounded in the principles, opportunities and ethical uses of electronic commerce and its impact on journalism, law and commercial practices.

Culture and Society - Digital media raise recurrent questions which call for political and social solutions. Students should be able to understand the broader issues raised by technological change and be prepared to take positions of leadership as such issues present themselves. Examples of such issues are questions of globalization, political boundaries, access, ownership and uses of information, marketing, etc. To achieve the goals of the certificate and assure its value to students, the University and prospective employers or donors, the certificate program enjoys certain characteristics. Perhaps most fundamental is the interdisciplinary nature of the program. While each department has the capability of offering a course emphasis, track or intra-departmental certificates to students in the area of technology and commerce, one of the fundamental concepts underlying the Center is the value and necessity of approaching these issues from the perspective of various disciplines. With these principles in mind, the program has been designed to assure that the interdisciplinary character of the course of work will be emphasized. The required course work compels students to come together for an interdisciplinary introduction to their studies and permits them to work separately and within their respective disciplines for further study. Students come together for a concluding experience that involves working collectively through a case study.

Academic Requirements for the Stand-Alone Certificate:

Eligibility:
Prerequisite for the stand-alone certificate is a baccalaureate degree. Professional students who are pursuing the stand-alone certificate must dually enroll in the Graduate School, be admitted to the CDIG Graduate Certificate Program and receive graduate credit for their 12 semester hours of stand-alone certificate courses. Others seeking this certificate who are not professional students and have not been admitted to Graduate School must also apply and be admitted to the CDIG Graduate Certificate Program. Apply online at the following web site: https://app.applyyourself.com/?id=umc-grad

SPECIAL NOTE FOR LAW STUDENTS: No more than six non-Law credits may count toward the JD degree.

Credits required for the Stand-Alone Certificate:
At least 12 eligible credit hours, consisting of an introductory, interdisciplinary course (MANGMT 8100), 6 credit hours in two or more eligible graduate courses, and a concluding seminar/research project course (JOURN 8052). The course of work for graduate certificate students is more specifically described as:

1. MANGMT 8100 Exploring the Digital Globe, 3 credits (offered fall semesters). This inter-departmental course introduces students to the impacts of technological change and globalization from the perspective of business, law and journalism. Students are introduced to electronic commerce, digitization and globalization to prepare them to respond to the challenges of the digital globe. Students do not acquire specific technological skills; they acquire a working understanding of how digital technologies function. The course is taught by faculty from the journalism, business and law schools, and from the Department of Textile and Apparel...
Management of the College of Human Environmental Sciences. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.

2. 6 credits of graduate course work - The courses taken to satisfy this requirement are those that have been approved by the Center’s faculty in consultation with the academic programs that offer the courses. The approved courses are graduate level courses that address one or more of the competencies specified above. See the Center for the Digital Globe’s graduate courses web page http://cdig.missouri.edu/coursesgrad.html for a list of approved courses that meet this requirement.

3. JOURN 8052 Case Studies in the Digital Globe, 3 credits (offered fall and winter semesters). The course is designed to further develop the levels of understanding and skills obtained in previous course work. In this class, students will achieve a better understanding of how new media are different from print or broadcast media and the consequences of those differences. Students are introduced to the principles, opportunities and ethical use of electronic commerce. Students critically analyze issues raised by technological change, including globalization, political boundaries, access, ownership and uses of information, marketing, etc. As with the introductory class, this course is taught by faculty from a variety of departments. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.

4. Grades - Students must maintain a minimum grade of 3.0 or equivalent in each course to receive credit toward completion of the certificate.

Stand-Alone Certificate Requirements Summary and Final Application for Certificate

To be eligible for the stand-alone certificate in the Center for the Digital Globe, students are required to take four courses for graduate credit: two courses offered through Center for the Digital Globe and two electives. The required courses are MANGMT 8100 Exploring the Digital Globe and JOURN 8052 Case Studies in the Digital Globe. The two electives should be determined in consultation with the student’s CDiG affiliated advisor. To receive the certificate upon completion of the program, students must also print and fill out the Application for a Graduate Certificate Form located on the Graduate School web site: http://gradschool.missouri.edu/forms-downloads/repository/cert-plan.pdf The form asks for a list of courses taken by the student to fulfill the certificate requirements. The form must be signed by the student, the CDiG executive director and the graduate dean. For students completing a professional degree, a copy of the student’s approved degree program must be attached to the certificate application form when submitting it for the CDiG executive director’s approval. The form then must be submitted to the Graduate School, 210 Jesse Hall.

II. CDiG GRADUATE DEGREE DEPENDENT CERTIFICATE (for students completing a graduate degree)

The Center for the Digital Globe, established by the College of Business, School of Journalism, School of Law and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers a 12 credit hour interdepartmental certificate to graduate students of the University of Missouri. The certificate program supplements the students’ graduate studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students’ successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization. Students receiving the graduate degree dependent certificate will have demonstrated competencies in:

Technology - Students need not have achieved mastery of specific engineering, programming or application skills. Instead, the students must demonstrate a working understanding of how digital technologies function.

Global Communication - One of the primary characteristics of digital technologies, and particularly the Internet, are their function as worldwide communications media. Whether from the perspective of journalism, business or the law, the impact of these new communications channels has been substantial. Students should achieve an understanding of how new media are different from print or broadcast media and the consequences of those differences.

Business - Students should be well grounded in the principles, opportunities and ethical uses of electronic commerce and its impact on journalism, law and commercial practices.

Culture and Society - Digital media raise recurrent questions which call for political and social solutions. Students should be able to understand the broader issues raised by technological change and be prepared to take positions of leadership as such issues present themselves. Examples of such issues are questions of globalization, political boundaries, access, ownership and uses of information, marketing, etc.

To achieve the goals of the certificate and assure its value to students, the University and prospective employers or donors, the certificate program enjoys certain characteristics. Perhaps most fundamental is the interdisciplinary nature of the program. While each department has the capability of offering a course emphasis, track or intra-departmental certificates to students in the area of technology and commerce, one of the fundamental concepts underlying the Center is the value and necessity of approaching these issues from the perspective of various disciplines. With these principles in mind, the program has been designed to assure that the interdisciplinary character of the course of work will be emphasized. The required course work compels students to come together for an interdisciplinary introduction to their studies and permits them to work separately and within their respective disciplines for further study. Students come together for a concluding experience that involves working collectively through a case study.

Academic Requirements for the Graduate Degree Dependent Certificate

Graduate degree seeking students who want to pursue a Center for the Digital Globe Certificate must complete a Change of Program Form and be formally admitted to the certificate program. Print the Change of Program Form located on the Graduate School web site: http://gradschool.missouri.edu/forms-downloads/repository/变更-degree.pdf. See your graduate faculty advisor to process the form.

SPECIAL NOTE: No more than six of the twelve credits necessary for the CDiG Graduate Degree Dependent Certificate may count toward the graduate degree.

Eligibility: Students who have completed their baccalaureate studies and are enrolled in a master’s, doctoral or professional program and working toward a graduate degree at the University of Missouri.

Credits: At least 12 eligible credit hours, consisting of an introductory, interdisciplinary course (MANGMT 8100), 6 credit hours in two or more eligible graduate courses, and a concluding seminar/research project
course (JOURN 8052). The course of work for certificate students is more specifically described as:

1. MANGMT 8100 Exploring the Digital Globe, 3 credits (offered fall semesters). This inter-departmental course introduces students to the impacts of technological change and globalization from the perspective of business, law and journalism. Students are introduced to electronic commerce, digitization and globalization to prepare them to respond to the challenges of the digital globe. Students do not acquire specific technological skills; they acquire a working understanding of how digital technologies function. The course is taught by faculty from the journalism, business and law schools, and from the Department of Textile and Apparel Management of the College of Human Environmental Sciences. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.

2. 6 credits of graduate course work - The courses taken to satisfy this requirement are those that have been approved by the Center’s faculty in consultation with the academic programs that offer the courses. The approved courses are graduate level courses that address one or more of the competencies specified above. See the Center for the Digital Globe’s graduate courses page http://cdig.missouri.edu/coursesgrad.html for a list of approved courses to meet this requirement.

3. JOURN 8052 Case Studies in the Digital Globe, 3 credits (offered fall and winter semesters). The course is designed to further develop the levels of understanding and skills obtained in previous course work. In this class, students will achieve a better understanding of how new media are different from print or broadcast media and the consequences of those differences. Students are introduced to the principles, opportunities and ethical use of electronic commerce. Students critically analyze issues raised by technological change, including globalization, political boundaries, access, ownership and uses of information, marketing, etc. As with the introductory class, this course is taught by faculty from a variety of departments. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.

4. Grades: Students must maintain a minimum grade of 3.0 or equivalent in each course to receive credit toward completion of the certificate.

Graduate Degree Dependent Certificate Summary and Final Application for Certificate

To be eligible for the graduate degree dependent certificate in the Center for the Digital Globe, students are required to take four courses: two courses offered through Center for the Digital Globe and two electives. The required courses are MANGMT 8100 Exploring the Digital Globe and JOURN 8052 Case Studies in the Digital Globe. The two electives should be determined in consultation with the student’s graduate advisor.

SPECIAL NOTE: No more than six of the twelve credits necessary for the CDIG Graduate Degree Dependent Certificate may count toward the graduate degree. To receive the certificate upon completion of their program, students must print and fill out the Application for a Graduate Certificate Form located on the Graduate School web site: http://gradschool.missouri.edu/forms-downloads/repository/cert-plan.pdf The form asks for a list of courses taken by the student to fulfill the certificate requirements. The form must be signed by the student, the CDIG executive director and graduate dean. A copy of the student’s approved graduate degree program must be attached to the certificate application form when submitting it for the CDIG executive director’s approval. The form then must be submitted to the Graduate School, 210 Jesse Hall.

FOR ADDITIONAL INFORMATION:

See the Center for the Digital Globe web site for further program details, including contact information, courses, affiliated faculty list, etc.

Graduate Certificate in Community Processes

The Graduate Certificate in Community Processes offers graduate students and professionals a unique opportunity to develop expertise in how spatial and relational communities function in today’s society: their processes for forming, for maintaining the community and for achieving community objectives. A vital part of the certificate is acquiring applied skills in community facilitation processes or community analytical processes.

For more information please contact:
Dr. Judith Stalman
231 Gentry Hall
phone: 573-882-6455
email: stallmannj@missouri.edu

Graduate Certificate in Conservation Biology

A certificate in Conservation Biology from the University of Missouri shows that you have interdisciplinary coursework and experience not already met by any single degree program at MU. As Conservation Biology is an interdisciplinry science the curriculum for our certificate provides coursework and experience beyond what is offered in a single degree program. The interdisciplinary nature of the curriculum is designed to help you reach a higher level of competence in conservation biology.

To accomplish this goal, the program has 2 required components:

1. Interdisciplinary coursework that includes at least one course each from the categories of Natural Sciences, Techniques and Policy/Social Sciences with at least 3 credits are from outside your degree program. A list of approved courses (http://gradstudies.missouri.edu/academics/programs/conservation-biology-graduate-certificate) is available on the Conservation Biology website.
• Ph.D. students: 15 credit hours of coursework at the 7000, 8000 or 9000 level, 12 of which may overlap with the degree course of study
• M.S./M.A. students: 12 credit hours of coursework at the 7000, 8000 or 9000 level, all of which may overlap with the degree course of study
• Coursework must include one course each from the following areas: Science, Techniques and Policy (See approved course list)

1. Practical experience through an internship that falls outside your discipline
   • 160 hours of an internship exploring an area complementary to the student’s conservation career goals
   • Designed and completed under the guidance of a mentor other than your major advisor
   • Results in a tangible product (e.g. paper, publication, presentation)

Specialization Courses

The rest of the hours should come from courses that have a strong EU focus

For more information contact Fritz Cropp at the Transatlantic Center (http://eu.missouri.edu).

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/european-union-graduate-certificate/eu-ge/Gedt.html

Graduate Certificate in Global Public Health

The Graduate Certificate in Global Public Health includes 15 credit hours of course work and a required international public health experience and may be taken independently or combined with an MPH. Course credits earned for the Graduate Certificate may also be credited toward the MPH degree. It is recommended that Graduate Certificate students start with Interdisciplinary Perspectives in Global Health, which is offered every semester in varying formats.

Required Courses:

<table>
<thead>
<tr>

Graduate Certificate in Health Ethics

The Health Ethics Certificate program is ideal for both students and working professionals such as physicians, nurses, healthcare administrators, and those serving on hospital ethics committees or considering such health ethics issues in their daily employment. The certificate program will help the learner develop an understanding of the ethical issues related to health and healthcare and will foster skill in analyzing and resolving ethical problems and conflicts in the healthcare environment.

The Department of Health Management and Informatics offers the Graduate Certificate in Health Ethics in partnership with the MU Center for Health Ethics. The Certificate may be completed completely online or through articulation with residential professional coursework. While there are multiple educational offerings that may result in certificate acquisition, students must complete a minimum of 12 credit hours from the below approved list:

Required Courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HMI 7564</td>
<td>Health Ethics Theory</td>
<td>3</td>

<td>Problems in Medical Ethics</td>
<td>5</td>
</tr>
</tbody>
</table>

• Course work: Assigned readings will serve as a platform for case discussion and dialogue about contemporary ethical and policy concerns in health care. Particular areas of emphasis will include end of life care, the Philosophy of Medicine, ethical theory, shared-decision making models, patient rights and consent. Students will meet weekly with faculty at the Center for Health Ethics for a minimum of 2 hours to review assigned readings as well as articles related to the student’s area of interest.
• Scholarship: There will be opportunities to do and assess skills in detailed case analysis and presentation. Readings and theoretical research will culminate in a serious academic product such as a poster, presentation, essay or publication, on a topic of interest related to clinical ethics and/or health care policy. The intensity of the experience will be dependent on the interests of the student.
• Clinical: Students will work directly with a clinical ethicist and the consult service to field ethics consultation requests, including participation in clinical ethics consults. The student should be
prepared to carry the ethics consultation pager a minimum of two weeks during a four week elective. The student will be required to attend the Clinical Ethics Committee meeting or work with the course directors to identify an equivalent experience, such as the Patient Rights and Organizational Ethics Committee, or the Palliative Care Committee meetings. Off campus experiences will also be encouraged when available.

Graduate Certificate in Life Science Innovation and Entrepreneurship

Overview

A certificate in Life Science Innovation and Entrepreneurship at the University of Missouri will broaden the training of graduate and professional students from the fields of business, engineering and medicine, among others. A collaborative program among MU’s Trulaske College of Business, College of Engineering and School of Medicine, the program will prepare participants for a wider range of employment opportunities and provide core skills for entrepreneurial endeavors.

Interdisciplinary Curriculum

Through an interdisciplinary approach, the program will allow MU graduate and professional students to receive training to translate life science discoveries into products and services that will improve health. The program will require completion of three three-hour core curriculum courses designed to cover the life cycle of a translational science/business venture, as well as elective courses for a total of 12 hours of course credit. The three-course sequence will be augmented by elective courses that round out the educational needs of particular students.

Program Objectives

• Know and understand the life sciences industry well enough to be familiar with terms, trends, issues, and industry culture in order to be able to recognize needs that may be commercially viable.
• Know and understand the three disciplines represented by the courses such that they are able to assess the commercial viability of a life sciences technological innovation.
• Know how to commercialize new life science discoveries into products and services to improve health in humans and/or animals.

Course Content

School of Medicine

• Nature of discovery
• Protecting intellectual property
• Reimbursement models in health care
• Life science methods and research tools
• Research with industry partners

College of Engineering

• Identification of clinical needs
• Concept screening and selection
• Regulatory pathways and the FDA
• Patents and intellectual property basics
• Design and prototypes

Trulaske College of Business

• Commercialization process
• Market assessment and competitive landscape
• Technology transfer, licensing, and startups
• Sources of capital
• Business plan and market strategy

Admission Requirements

The only prerequisite for the first course in the sequence will be good standing in a graduate/professional program or the consent of the instructor on a case-by-case basis.

Graduate Certificate in Society and Ecosystems - Interdisciplinary

Contact
Sandy Rikoon, Ph.D.
Coordinator Society and Ecosystems Program
200 A Gentry Hall
University of Missouri-Columbia
Columbia, MO 65211
Telephone: 573-882-0861
Email: rikoonj@missouri.edu

Goals
Understanding the complex and dynamic interactions between human activities and natural ecosystems is essential for achieving sustainable development. Developing this understanding in the next generation of scientists, educators and resource management professionals is the primary goal of the University of Missouri’s interdisciplinary graduate certificate program in Society and Ecosystems.

The Society and Ecosystems Program (SEP) is a unique interdisciplinary program that prepares students for careers with private and public organizations through advanced graduate level training and research. The certificate program is designed for students with undergraduate-graduate training in agriculture, biology, business administration, economics, engineering, fisheries and wildlife, forestry, geography, geology, rural sociology and related disciplines. Students who are in a graduate or professional program in their area of specialization take two integrated courses and complete a thesis or dissertation that applies more than one discipline. The program is designed to enhance the student’s familiarity with disciplinary and interdisciplinary concepts and principles from the social and natural sciences and humanities.

The goal of the program is to develop critical thinking and analytical skills related to:

- sustainable natural resource and environmental management and planning,
- dynamic interactions between social, economic and ecological systems,
- quantitative-qualitative analysis of individual and social behavior,
- cultural interpretations of natural resource and environmental issues, and
- application of knowledge gained in the above areas to the evaluation of public policy.

Admission
Admission to the SEP is open to students who have been admitted to a graduate or professional program in the University of Missouri-Columbia, have undergraduate-graduate training in natural and social sciences, and have interest in interdisciplinary studies. Persons interested in the SEP should contact the Coordinator.

Curriculum
Students must be enrolled in a regular academic department and working toward completion of a graduate degree in a natural resource-related discipline. All students are required to take the following core courses: a) six credits from a department/unit other than the one in which the student is enrolled, b) a three-credit interdisciplinary course on the human dimensions of ecosystem management, and c) three credits of a research seminar in Society and Ecosystems.

The interdisciplinary course examines the sociocultural, economic, ethical and biophysical aspects of ecosystem management with emphasis on the human dimension. It is normally taken during the student’s first year. The primary objective of this course is to develop a student’s appreciation of a) major issues in the society-ecosystems nexus, b) roles of various disciplines in understanding and resolving socioeconomic-ecological issues, and c) systems analysis. A course requirement is for students to work in multidisciplinary teams to evaluate human effects on and responses to global warming, loss of biodiversity, water pollution, and other contemporary natural-environmental resource issues.

The research seminar exposes students to interdisciplinary research on the interactions between social, economic and ecological systems. Emphasis is placed on the impacts of economic activity, population growth, technology and public policy on the functioning and resilience of ecological systems, and how ecological systems support socioeconomic development at the local, regional and global scales. Speakers for the research seminar include faculty, students, visiting scholars, and private and public officials. Students are expected to present their thesis or dissertation research at the research seminar. Thesis and dissertation research must be conducted on a topic related to the interactions between society and ecosystems. Students completing the SEP receive a certificate in Society and Ecosystems. Recognition of the certificate appears on the student’s transcript.

Advisory Committee
The student’s plan of study and research topic are selected in collaboration with an advisory committee established in accordance with the requirements of the student’s department/unit and the Graduate School. The advisory committee includes at least one faculty member affiliated with the SEP. Graduate school permission is required in cases where it is highly desirable for the three faculty members comprising a masters student’s advisory committee to be from different departments/units.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/society-and-ecosystems-graduate-certificate/sco-eco-sys-ge/Gedt.html

Graduate Minor in Ancient Studies

Interdisciplinary Minor within the College of Arts and Science http://ancientstudies.missouri.edu/index.shtml

About the Minor
The Ancient Studies program, created in 1968, is shared among the faculty from six departments at the University of Missouri. This minor provides an opportunity for students to diversify their curriculum and to perceive their field in a broader context than is possible within a departmental program. Students in this program select about one quarter of the total courses from among a variety of courses designated by the participating departments.
A student pursuing a graduate degree in Anthropology, Art History and Archaeology, Classical Studies, History, Philosophy or Religious Studies may elect an Ancient Studies minor at either the M.A. or Ph.D. level. The Department of Classical Studies offers graduate work leading to the master of arts degree in classical languages with emphasis on Latin, Greek or both classical languages. The PhD degree in classical studies requires work in both Greek and Latin.

Contact Information

Department of Anthropology
1205 University Avenue, University Place, Room 1110

Faculty

Curators’ Professor M. Smith

Associate Professor S. Langdon, L. Okamura, D. Schenker, D. Hooley, R. Marks, J. McGlew, A. Mori, M. Rautman, D. Trout, B. Wallach

Assistant Professor N. DesRosiers, R. Foley, R. Gregory, D. Kelley

Assistant Teaching Professor M. Barnes

Professor Emeritus W. R. Biers, W. Bondeson, J. H. Kullge

Admissions

Ancient Studies Program Requirements

1. Admission into one of the following graduate departments: Anthropology, Art History and Archaeology, Classical Studies, History, Philosophy or Religious Studies.

2. Fulfillment of all the requirements of the major department. The master’s degree may be completed within approximately two years; the doctorate normally requires three years of course work beyond the master’s level.

3. The minor consists of additional courses to be selected from Ancient Studies courses outside the student’s major department; it usually constitutes about one-quarter of the graduate course work. For recognition of the minor, students should apply formally to the current chair of the Ancient Studies Committee.

a. For the M.A. degree, a minimum of 9 hours from at least two departments.

b. For the Ph.D. degree, a minimum of 24 hours (including the work for the M.A.) from at least two departments outside the student’s home department. These must include at least one course on the 7000-level in each of the two departments.

To the University

General admission and degree requirements for the Graduate School are determined by the Graduate Faculty Senate. However, admission to the Graduate School does not in itself entitle a student to candidacy for an advanced degree. A student must also be accepted for advisement by the faculty of a department or area. Departments and areas establish admission standards that, in many cases, exceed the minimum requirements of the Graduate School. Admission to the Graduate School is based on three considerations:

- an official transcript showing that the applicant has earned a baccalaureate, DVM, MD or JD degree equivalent to that granted by MU,
- a grade point average of B or better in the last 60 hours of undergraduate courses and
- Official GRE results

To the Ancient Studies Program

Candidates must have earned a bachelor’s degree in an appropriate field; preference is usually given to students who intend to continue their work for a PhD. An application, including a completed MU Graduate School application form, transcript and GRE scores, should be made directly to the department in which the student wishes to study. It must be accompanied by three letters of recommendation concerning the student’s academic ability, a copy of a recent term paper, and a short statement from the applicant that sets out professional goals and reasons for pursuing the Ancient Studies minor. Inquiries may be addressed to the directors of graduate studies at the appropriate department.

Financial Support

The Ancient Studies Committee is able to award one fellowship (renewable for four further years) to a doctoral student entering from a University other than MU. In addition, applicants may be eligible for fellowships administered by the Graduate School, including the Gus T. Ridgel Fellowships for Minority Americans. In addition to a stipend, University fellowships include exemption from resident and non-resident educational fees. Some individual departments also offer fellowships, scholarships and other financial assistance for graduate students, including teaching and research assistantships. For information concerning financial aid, write directly to the directors of graduate studies in the department to which you are applying. Financial aid deadlines are frequently earlier than the deadline for applications for admission.

In addition to the materials for admission to the Ancient Studies program, applicants for financial support must submit a separate letter to the department applying for fellowship or assistantship support.

Graduate Minor in College Teaching

Approximately 75 percent of faculty positions in the United States are at institutions where the importance of teaching and professional service is equal to or greater than the emphasis on research. The Minor in College Teaching, available to all MU graduate degree-seeking students, demonstrates your preparation as an effective teacher to potential employers.
The Minor in College Teaching (MCT) requires 9 credit hours. This includes a 3-hour core course, a teaching practicum, plus 3-6 elective hours. It is highly recommended that students enroll in ED_LPA 9456, but it is not a requirement.

Core Required Courses - students must complete one of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>

Graduate Minor in Gerontology Studies

The graduate minor in gerontology consists of nine to 15 hours of aging-related course work approved as a graduate minor by the student’s department/discipline. The MU Interdisciplinary Center on Aging will collaborate and provide assistance to both the student and his or her advisor. Twenty-three courses in more than 10 disciplines can be supplemented by independent and topics courses. Mentoring from experienced researchers on interdisciplinary research teams contributes to the learning curve of students specializing in aging studies. More than 40 teams are located throughout the university. Students are encouraged to contact the Interdisciplinary Center on Aging for help connecting with these productive groups of scholars.

For additional information, contact:
MU Interdisciplinary Center on Aging
M245A Medical Sciences Building
Columbia, MO 65212
phone: 573-884-3337
e-mail: aging@missouri.edu
website: http://medicine.missouri.edu/aging/home.html

Graduate Minor in International Development

The requirements for acceptance and completion of work for the minor are as follows:

1. The student must be enrolled as a master’s or PhD candidate in good standing at MU.
2. A formal request to be included in the minor must be made in advance of taking courses, to the director, Associate Professor Corinne Valdivia, 214D Mumford Hall. This request should be approved by the student’s advisor. A copy will be sent to the Graduate School.

3. Once the student is admitted to the minor, s/he should seek advisement from the director and his/her advisor concerning which courses to take. The plan of study must be submitted to the Graduate School no later than the semester before graduation.

4. The student must satisfactorily complete a total of twelve credit hours in courses dealing with Third World Development. At least six of the twelve hours must be taken in at least two departments outside the student’s home department.

5. Foreign language courses are not required, but students who are not fluent in a second language are strongly encouraged to take intensive language courses to develop competency. Credit for language courses does not count toward the twelve hours of credit required for the minor.

6. When the required twelve hours of credit are completed from approved courses, the student’s advisor should inform the director, who will in turn inform the policy committee which governs the operation of the minor. This should be done in advance of the student’s orals to give members of the policy committee an opportunity to sit in on the examining committee if they so desire.

7. The certificate is only awarded after all departmental and Graduate School requirements for the advanced degree have been satisfied. An overall grade point average of 3.0 is required for the twelve hours within the minor.

Honors College

The Honors College is a community of motivated and high-achieving students from all the undergraduate colleges at the University of Missouri. It offers an innovative and dynamic curriculum that encourages in-depth study in traditional fields of learning as well as other kinds of intellectual inquiry, including interdisciplinary and experiential learning. The College fosters scholarly engagement through research opportunities, study abroad, service learning, internships, and other experiences that expand learning beyond the classroom. Students receive personalized advising through a team of professionally trained advisors.

The Honors College gives honors students maximum flexibility to serve their individual interests. Honors courses, taught by many of the university’s best professors, encourage close interaction between students and faculty and allow students to experience a small-college atmosphere within a large, research university.

Opportunities in the Honors College are described below.

Honors Curriculum

Honors courses fall into 3 categories:

1. Courses offered through individual departments. These include special topics courses and honors sections of regularly offered courses.
2. Courses offered through the Honors College.
3. Research and other independent-study types of courses, offered both through departments and the Honors College.

Honors courses offered through the Honors College include the following:

- Humanities Series. This series of four, historically-organized courses provides an interdisciplinary perspective on art, art history, literature, music, philosophy, and religion.
- Human Sciences Series. This series of four, thematically-based courses provides an interdisciplinary perspective on the behavioral and social sciences, including cultural geography, economics, family studies, history, psychology, and sociology.
- Science series. This series of two, thematically-based courses provides an interdisciplinary, hands-on laboratory approach to science for non-science majors. It is designed to introduce students to the methods, range, and big ideas of science.
- Honors Discussion Groups and Seminars. These are small and informal courses typically focused on a special topic.
- Career Explorations Courses. These lower-level courses are designed to introduce students to different career choices in fields like Journalism, Medicine and Health, and Law.
- Honors Tutorials. These upper-level courses are informal discussion groups of 2-5 students and a faculty member. Tutorials focus on special topics that change from semester to semester, depending on which faculty members are offering them. They are based on the Oxford-style of learning, with heavy emphasis on conversation and in-depth investigation.
- Honors Independent Study Courses. These courses provide honors students with an opportunity to study topics (typically of the student’s choosing) with a faculty member.
- Honors Colloquia. These courses focus on interdisciplinary topics and typically adopt a more flexible and experimental approach to teaching.
- Honors Preceptorships. These courses provide honors students with an opportunity to conduct specialized research with a faculty member.
- Honors by Contract. This arrangement allows honors students to take a non-honors course for honors credit by completing additional or alternative work. To do an Honors by Contract, students must enter into a contractual agreement with a professor, approved by the director and associate directors of the Honors College. Contractual forms are available online.
- Honors Credit Via Graduate Course Work

More information on honors courses can be found on the website (honors.missouri.edu).

Special Programs and Services

Advising. The Honors College offers one-on-one academic advising for all honors students. Through its Medopp office, it also offers specialized advising for students planning a career in medicine, dentistry, optometry, podiatry or physician assistant. MedOpp advising provides students with a comprehensive program that includes a variety of services to guide students through the academic and application process necessary to become a health professional.

Honors Housing. The Honors Learning Community fosters a living and learning space that fosters intellectual and social stimulation and encourages residents to succeed academically and socially during their time at the University of Missouri.

Service Learning. The Honors MU Community Engagement Project is a service-learning outreach program designed to assist members of the community and offer honors students problem-solving and leadership experiences. Service projects include mentoring at-risk adolescents, working with low-income pre-school children, and investigating and providing service for local public health agencies. Students perform community service, participate in a seminar, and complete research projects.

Honors College Admissions

Incoming Freshmen

Incoming freshmen may apply for automatic admission to the Honors College upon submission of an application, if they satisfy any one of the following three criteria:

- An ACT score of 31 (SAT 1360) AND either a top 15% class rank or a high school Core or Enhanced Core GPA of 3.58
- An ACT score of 30 (SAT 1330) AND either a top 10% class rank or a high school Core or Enhanced Core GPA of 3.74
- An ACT score of 29 (SAT 1290) AND either a top 5% class rank or a high school Core or Enhanced Core GPA of 3.91

Incoming freshmen who do not meet both of the admission criteria are required to submit an essay as part of their application. Essays are evaluated on an individual basis. Specific information
Transfer Students
Transfer Students are eligible for admission to the Honors College if they have completed at least 30 credit hours of college credit at an accredited institution and have achieved a GPA of 3.7 or above. If you meet these criteria, please fill out the online application (http://honors.missouri.edu/future_students/application.php). The cumulative GPA, for the purpose of applying to the Honors College, is the calculated average of transfer work from all institutions the student has attended.

Current MU Students
Current students are eligible for admission to the Honors College if they are an MU student who has completed at least 12 credit hours and achieved a cumulative MU GPA of 3.7 or higher. Students who meet these criteria must fill out the online application (http://honors.missouri.edu/future_students/application.php).

Program Requirements

Maintaining Honors Eligibility

GPA Requirement
To retain membership in the Honors College, students must maintain an MU cumulative GPA of 3.5 or above. Students with an MU cumulative GPA below 3.5 will receive a warning letter the first semester in which this occurs. Students with an MU cumulative GPA below 3.5 for a second consecutive semester will no longer be members of the Honors College. Students wishing to reapply to the Honors College must meet the eligibility requirements for current MU students (see above).

Participation Requirement
Students who join the Honors College as first-year students will be required to complete two honors courses per year for their first two years at MU. All honors courses will count toward this requirement, including honors-designated courses, and Honors Learning-by-Contract. MU students who join the Honors College in their sophomore year and transfer students who are admitted with sophomore standing will be required to complete two courses in their first year of Honors College membership. MU students who join the Honors College after their second year and transfer students who are admitted with junior or senior standing are exempt from the participation requirement.

Honors Certificate Requirements
Students who complete 20 or more hours of courses for honors credit and maintain a 3.5 cumulative GPA (as calculated after final grades are posted at the end of the semester in which the student is graduating) are eligible to graduate with an Honors Certificate. In addition to General Honors and Departmental Honors course credits, the 20 hours may include up to 6 hours of honors transfer credit, 8 hours of Learning-by-Contract credit, and 8 hours of approved graduate credit (form required) (http://honors.missouri.edu/students/graduate_credit_form.pdf). Students must achieve a minimum letter grade for each course: a C or better for regular honors classes or a B or better for Learning-by-Contract courses and Honors Credit via Graduate Course Work. Students must apply for the Honors Certificate by completing the application (http://honors.missouri.edu/students/certificate_application.php). In order to participate in the Honors Convocation, students must apply no later than the end of the third week of classes in their final semester. For more information, see the Application for Graduation with the Honors Certificate (http://honors.missouri.edu/students/certificate_application.php).

University Honors Designation
Students who complete the Honors Certificate and a qualified departmental honors program will be eligible for this designation, which will be noted on their permanent transcript. See your department or the Honors College for information about departmental honor programs.

Faculty
There are faculty from all disciplines who teach Honors College courses.
School of Law

203 Hulston Hall
Columbia, MO 65211-4190
phone: 573-882-6042
fax: 573-882-4984
web: http://law.missouri.edu

Welcome to the University of Missouri School of Law's online catalog for the 2015-2016 academic year.

Information in this searchable, interactive catalog is current as of May 2015. The next catalog will be made available in May 2016. In the interim, changes to the law school curriculum will be made on our website (http://law.missouri.edu).

Use the search box above or click on the left hand menus to navigate through the catalog. There is also a PDF version available through the “Print Options” link above.

Broken links inside the law school’s online catalog may be reported by contacting umclawweb@missouri.edu. (umclawweb@missouri.edu)

The University of Missouri School of Law offers a collegial environment, reinforced by a small student body and a low faculty-student ratio. The intimacy of this setting, coupled with reasonable cost, consistently high bar passage rates, a network of alumni around the globe and access to top scholars in the legal world, make the School of Law one of the best values in the nation.

Mission Statement

The MU School of Law aspires to be the school of choice for outstanding students, both from Missouri and other states. As a national leader in the field of dispute resolution, we seek to complement a strong traditional curriculum with an orientation toward lawyering as a problem-solving endeavor. We strive to foster a diverse faculty of nationally recognized scholars who are committed to effective teaching, and to attract a student body with diverse experiences and views. We also strive to offer an intellectually rigorous and collegial environment for the study of law. Furthermore, we seek to graduate well-rounded lawyers who are sensitive to ethical issues, prepared to serve clients, and ready to be leaders in promoting justice.

Academics

Known worldwide for its Center for the Study of Dispute Resolution, the School of Law's curriculum combines both traditional law school classes with an appreciation of the many dispute resolution techniques in which lawyers engage and includes a certificate program in the rapidly developing area of dispute resolution.

Mizzou Law students are required to complete 89 hours of law school classes in order to graduate. Following the prescribed first year, students are required to take Constitutional Law, Evidence, Criminal Procedure and Professional Responsibility. Several clinical and externship programs are available to upper level students, along with skills training in trial practice, negotiation, interviewing and counseling. The curriculum couples courses traditionally tested on the bar examination so that the law school can continue its long tradition of success on bar examinations nationwide, with cross disciplinary dual degree and certificate programs in several other areas. As a result, the law school's curriculum is appealing not only to those who want to engage in the traditional practice of law, but also to those who want to use their law degree as a stepping stone into other disciplines.

Faculty

Full Time Faculty

Adjunct Faculty

Professor Emeritus

The catalog also has a cumulative listing of all faculty at the University of Missouri (p. 1499) that includes information on the faculty member’s highest degree attained.

Detailed faculty profiles for the School of Law faculty is also available at http://law.missouri.edu/faculty/directory/.

Academic Policies

Below is a listing of policies that only apply to students in the School of Law. Be sure to also check the listing of the University’s Academic Policies (p. 753) for policies that apply to all students.

The policies and procedures of the MU School of Law are revised on a regular basis. Provisions regarding such policies and procedures
Curriculum

Juris Doctor (JD)

The Juris Doctor (J.D.), or “law degree,” is a three year post-baccalaureate program. Students must complete 89 credit hours of law courses roughly one-half of which are required courses.

Upon favorable recommendation of the Faculty of Law, the degree of Juris Doctor will be conferred upon a student who:

1. Has pursued in residence the full-time study of law for at least three academic years (or the equivalent), two of which must have been completed in this School. A full-time student is one who is registered for credit in 12 or more hours in a semester or six or more hours in a summer session. A student registered for less than 12 hours in a semester or less than six in two summer sessions, will receive proportional residence credit. The maximum number of residency credits obtainable in any one summer session shall be seven, provided that for purposes of accelerated graduation (in less than three academic years) no more than twelve residency credits may be obtained in summer sessions.

2. Has received a passing grade in all required courses, except required courses which have been waived.

3. Has received passing grades in law courses aggregating at least 89 credits and has a numerical grade point average of at least 77.5; and

4. Has received an undergraduate degree before or concurrently with his or her graduation from law school.

[Note: The summer school residency provisions allow a student to combine two six-hour summer sessions or a seven-hour summer session with a five-hour summer session and obtain the equivalent of a full semester’s residency credit.]

Completion of a Writing Requirement for students who first matriculated in or after Fall 2006

1. Every J.D. student must complete a rigorous upper-level writing experience in either the second or third year of study.

2. A “rigorous writing experience” means an experience that culminates in an individually authored paper of at least 20 pages (double-spaced), based on independent research, through a process that includes preparation of a substantial draft, review and feedback by a faculty member, and revision of the draft.

3. Any of the following activities may satisfy the upper-level writing requirement, provided that the activity meets the definition of a “rigorous writing experience” in the individual case:
   a. completion of any course designated as a writing course,
   b. completion of a writing section attached to a traditional course,
   c. completion of an independent research project under L5875 Research, or
   d. membership on one of the journals of the University of Missouri School of Law.

4. A “designated writing course” is one in which all students complete a rigorous writing experience as defined in section (2) above and in which, in lieu of a final examination, a substantial portion of the final grade for the course is based on that writing.

5. In every case, the supervising full-time faculty member must certify that the writing requirement has been satisfied before a notation will be made in the student’s record.

6. As stated in the Student Handbook, “grading is done anonymously in all classes where it is possible.” With the exception of Independent Research, if grading is to be done otherwise than anonymously, the syllabus shall so state.

Professional Perspectives Requirement

1. As lawyers, each of you will be required to complete a required number of Continuing Legal Education requirements each year.
2. As law students at MU, you have a similar requirement.
3. You MUST complete a certain number of Professional Perspective hours each year to be eligible to graduate from this law school.
4. Professional Perspective’s hours are designed to further your legal knowledge by presenting you with information about current legal events; from current practitioners, including judges; and about other legal or legally-related matters. These hours are also designed to present you with needed information about career planning, the job market, and placement;
   a. As a result, matters counting for Professional Perspectives credit are broken into two categories:
   b. Professional Perspectives are those programs that give students a new or different prospective on the law or its practice;
   c. Career Component credits are those programs that give students information about career planning and placement;
   d. Any program approved for credit will designate the category applicable to that program;
5. Matters qualifying for Professional Perspectives credit will appear on the School of Law Calendar. It is your responsibility to select the events you wish to attend, within the guidelines set out below;
6. Many programs sponsored by the School of Law automatically qualify for Professional Perspectives credit. When listed on the law school calendar, qualifying programs are so designated.
7. Programs sponsored by student or other groups may qualify for Professional Perspectives credit, but ONLY if an application for credit is filed, in advance, of the event, with the Associate Dean. Application forms are available in the Dean’s Office.
8. In every event for which Professional Perspectives credit is offered MUST be overseen by a responsible person who agrees to maintain an attendance record for that event.
9. Because Professional Perspectives credit is required, it is an event for which attendance counts. As a result, please note that it is an offense under the Honor Code to misrepresent one’s own or another attendance or absence from such an event. This would include signing in for an event and then leaving before the conclusion of that event.
10. The Professional Perspectives requirement for each class of students is as follows:
   a. For First Year Law Students:
      i 1 Professional Perspectives program in the fall semester;
      ii 1 Career Component program in the fall semester;
      iii 1 Professional Perspectives program in the winter semester;
      iv 1 Career Component program in the winter semester;
   b. For Second and Third Year Law Students:
      i 2 Programs each semester;
      ii At least two of the programs during the year MUST be for general Professional Perspectives credit;
      iii At least one program during the year MUST be for the Career Component credit.

The above checklist (http://catalog.missouri.edu/schooloflaw/jurisdoctor/Degree_Requirements_Checklist.pdf) is also available in PDF.

Certificates & Emphasis

JD Certificates
- Graduate Certificate in Dispute Resolution (p. 737)
- Graduate Certificate in Electronic, Commercial and Intellectual Property Law (p. 737)
- Graduate Certificate in Taxation (p. 737)

JD Emphasis Areas
- Emphasis in Criminal Justice (p. 736)
- Emphasis in Tax Law (p. 736)

Experiential Opportunities

The School of Law recognizes the importance of providing students with opportunities to apply the knowledge they receive in the classroom in “real-life” situations. Over their course of study, students have the opportunity to enroll in clinical programs or practicums in criminal prosecution, family violence, mediation, the state legislature, landlord/tenant law and the wrongly convicted. Additional details are available from the School of Law at http://law.missouri.edu/skills/.

In addition to these clinical opportunities, students can participate in our extensive externship program. In this program, students work under the supervision of a lawyer or judge in a public law office, government agency or not for profit organization or for an attorney in private practice engaged in pro bono work. Additional details are available from the School of Law at http://www.law.missouri.edu/academics/externships.html.

Juris Doctor with Emphasis in Criminal Justice

Criminal Justice Concentration
The Criminal Justice Concentration is designed for two groups of students: those who are considering beginning their legal careers as prosecutors or criminal defense counsel and those who may not have an express interest in criminal practice, but who are nonetheless seeking a course of study structured to provide training in the range of skills necessary to the practice of law in most substantive areas – particularly including legal analysis, factual investigation, counseling, negotiation and the persuasive arts employed in written and oral advocacy.

Additional details and a list of courses satisfying the Criminal Justice Concentration requirements are available from the School of Law here (http://www.law.missouri.edu/academics/certificates/criminal.html).

Juris Doctor with Emphasis in Tax Law

Tax Law Concentration

The Tax Law concentration is designed to provide each student in the concentration basic education in both general skills and subject-matter specific knowledge and provide each student with an opportunity to bring the entire skill set to bear in a capstone experience designed to teach integrated legal problem-solving. Completion of a concentration should improve the overall preparedness of graduates by conferring entry-level
competence to begin practicing law with appropriate supervision in the concentration’s subject matter area or practice setting.

Additional details and a list of courses satisfying the Tax Law Concentration requirements are available from the School of Law here (http://www.law.missouri.edu/academics/certificates/tax.html).

**Graduate Certificate in Dispute Resolution**

**MU Certificate in Dispute Resolution**

Clients and society today need and expect much more than traditional advocacy from their lawyers. Modern lawyers need to be able to address legal problems in ways that accommodate a variety of needs, goals and values, in addition to vindicating legal rights. As a result, today’s lawyer must have the knowledge, skills and perspectives not only to advocate in the courtroom, but to participate in such processes as client counseling, negotiation, mediation, arbitration and creative problem-solving.

The MU Certificate in Dispute Resolution is designed to foster such learning in students by providing the opportunity to work with some of the nation’s leading dispute resolution scholars and practitioners. The MU School of Law has been ranked No. 1 in dispute resolution by U.S. News and World Report since 1999, and has more full-time faculty specializing in dispute resolution than any other law school.

This certificate program will give students an advantage in addressing the complex challenges of today’s legal environment.

**Requirements**

To receive a Certificate in Dispute Resolution from the MU School of Law, a J.D. student must take at least 10-11 credit hours of dispute resolution courses approved by the Law School. Eight of those credit hours are required core program courses and provide students with a basic understanding of the theory, skills and practice of dispute resolution. Students must take at least 2-3 additional elective hours from among the courses approved for the Certificate program.

Additional details and a list of courses satisfying the certificate requirements are available from the School of Law at http://www.law.missouri.edu/academics/certificates/resolution.html.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/dispute-resolution-graduate-certificate/dispute-resolution-ge/Gedt.html

**Graduate Certificate in Electronic, Commercial and Intellectual Property Law**

This certificate program is not currently offered. A variety of other certificates, concentrations and dual-degree programs are offered at the Law School. Information available at https://nextcatalog.missouri.edu/schooloflaw/additionalacademicprograms/.

**Graduate Certificate in Taxation**

This certificate program is not currently offered. A variety of other certificates, concentrations and dual-degree programs are offered at the Law School. Information available at https://nextcatalog.missouri.edu/schooloflaw/additionalacademicprograms/.

**Master of Laws (LLM)**

The Master of Laws degree is offered through a joint effort of the Graduate School and the School of Law. For detailed information on this program, consult the Dispute Resolution (p. 681) page.

**Additional Academic Programs - Law**

Students in the School of Law have a wide variety of additional academic options before them, including a number of other degree and certificate programs available at the University of Missouri that can make a good accompaniment to the J.D. Below is a description of some of those options.

**Certificates**

- Center for the Digital Globe (p. 737)
- European Union (p. 737)

**Dual/Concurrent Degrees**

- Business Administration (Masters) (p. 738)
- Economics (Masters) (p. 738)
- Educational Leadership & Policy Analysis (Masters) (p. 738)
- Health Administration (Masters) (p. 738)
- Human Development & Family Studies (Masters) (p. 738)
- Journalism (Masters) (p. 738)
- Journalism (Doctorate) (p. 738)
- Library & Information Science (Masters) (p. 738)
- Public Affairs (Masters) (p. 738)

**Certificates:**

**Center for the Digital Globe (Certificate)**

The Center for the Digital Globe (http://cdig.missouri.edu) (CDiG), established by the College of Business, School of Journalism, School of Law, and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers an interdepartmental certificate to graduate students of the University of Missouri-Columbia. The certificate program supplements the students’ graduate studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students’ successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization.

**European Union (Certificate)**

Designed to complement existing degrees, the Graduate Certificate Program (p. 726) consists of 12 credit hours of study to be completed in a variety of settings over four semesters. A portion of the coursework takes place via the electronic classroom, allowing students to pursue their Certificate while maintaining work responsibilities or completing other degree programs. Students typically begin their studies during the winter semester, though the program is flexible to accommodate different scheduling needs.
Dual/Concurrent Degrees:

Business Administration (Masters)

Students completing the Law and Business course of study will be eligible to receive the JD degree from the School of Law and the MBA degree from the School of Business. This course of study may be completed in four years. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MBA degree.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mba-business.shtml.

Economics (Masters)

The Department of Economics and the School of Law offer an integrated program in which students may obtain both an MA degree in economics and a JD degree from the School of Law. Although an MA degree in economics normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-economics.shtml.

Educational Leadership & Policy Analysis (Masters)

With and Emphasis in Higher Education

The College of Education’s Department of Educational Leadership & Policy Analysis and the School of Law offer an integrated program in which students may obtain both an MA degree in higher education with a concentration in general higher education administration and a JD degree from the School of Law. Although an MA degree in higher and continuing education normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-educational.shtml.

Health Administration (Masters)

Students completing this course of study will be eligible to receive the JD degree from the School of Law and the MHA degree from the Health Management and Informatics graduate program. This course of study may be completed in four years and an additional summer session. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MHA degree.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mha-health-admin.shtml.

Human Development & Family Studies (Masters)

The Department of Human Development and Family Studies and the School of Law offer an integrated program in which students may obtain both a JD degree from the School of Law and an MS or MA degree in Human Development and Family Studies. Although a Master’s degree normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mams-human-dev.shtml.

Journalism (Masters)

The School of Journalism and the School of Law offer an integrated program in which students may obtain both an MA degree in journalism and a J.D. degree in law. This program is especially suitable for students interested in enhancing their competencies, qualifications, and career options through the successful completion of two complementary professional programs. Although an MA degree in journalism normally requires two years of study, and a J.D. requires three, many students will be able to complete the full program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-journalism.shtml.

Journalism (Doctorate)

The University of Missouri-Columbia School of Journalism and School of Law offer an integrated program for students seeking both a Ph.D. degree in journalism and a J.D. degree in law. Students should consider this program if they are interested in teaching or in senior-level practice or policy work in either of these fields, nationally or internationally. Although a Ph.D. degree in journalism normally requires three years of study, and a J.D. requires three, students may be able to complete the full program in as few as five years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/phd-journalism.shtml.

Library & Information Science (Masters)

The School of Information Science and Learning Technologies (SISLT) and the School of Law offer an integrated program in which students may obtain both an MA degree in library and information science from SISLT and a JD degree from the School of Law. Although an MA degree in Information Science and Learning Technology with an emphasis in Library and Science normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mls-library.shtml.

Public Affairs (Masters)

Students completing the required course of study will be eligible to receive the JD degree from the School of Law and the MPA degree from the Harry S Truman School of Public Affairs. The course of study may be completed in four years. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MPA degree. Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mpa-public-admin.shtml.
School of Medicine

The MD degree is achieved after a four-year course of study. Please visit the School of Medicine website for information about the admissions process: http://medicine.missouri.edu/admissions/

The curriculum at the University of Missouri School of Medicine emphasizes clinical reasoning, self-directed learning, collaborative learning and early clinical experiences. It integrates the basic sciences and clinical reasoning. In years 1 and 2, emphasis is placed on small group learning with some lectures. Courses are not department or discipline based.

During the third year, seven core clerkships are required in Family Medicine, Internal Medicine, Neurology, Obstetrics and Gynecology, Pediatrics, Psychiatry and Surgery. It is during these core clerkships that students learn the fundamentals of good patient care and faculty are assessing that students are competent upon completion of the clerkship. These clinical experiences must be under the supervision of Columbia-based School of Medicine faculty or community faculty appointed through the School of Medicine. All students may take up to three core clerkships developed and approved by School of Medicine departments through the University of Missouri School of Medicine Rural Track Clerkship (http://medicine.missouri.edu/ahec/rural-track.php) program.

During the fourth year, three one-month clinical selectives, four one-month general electives and a one-month Advanced Biomedical Sciences are required. A minimum of four courses must be taken under the supervision of Columbia-based School of Medicine faculty or community faculty as follows: Students must take two of the three required clinical selectives under the supervision of Columbia-based School of Medicine faculty or community faculty appointed through the School of Medicine. One of the required selectives must be a surgical selective, one must be a medical selective and the third can be either a surgical or medical selective. Certain clinical experiences such as the Indian Health Service and designated rural community selectives approved by the department education director are considered under the supervision of Columbia-based School of Medicine faculty and will meet the requirement for one of the two clinical selectives. The third clinical selective may be taken at a site approved by the department, the advisor and the Office of Medical Education. Fourth year Rural Track (http://medicine.missouri.edu/ahec/rural-track-elective.php) elective courses approved at designated Rural Track training sites are considered to be under the supervision of Columbia-based School of Medicine faculty.

For more information about the School of Medicine, call (573) 882-9219. http://medicine.missouri.edu

Patient Based Learning

First and Second Years

Years one and two consists of four 9-week blocks. Each block has two components: Basic Science/Patient Based Learning (BSci/PBL) and Introduction to Patient Care (IPC).

BSci/PBL

In this component, students work through one authentic clinical case each week in small groups of students with a faculty facilitator. The facilitator is not a content expert, but rather guides the group as they work through the case seeking a diagnosis and patient care plan. BSci/PBL cases guide learning and the application of basic science concepts in clinical scenarios. A few basic lectures and laboratory experiences teach concepts that supplement the cases. BSci/PBL features about 10 hours of patient-based learning with about 10 hours of traditional teaching such as lectures each week.

IPC

Themes change with each block and focus on clinical skills, including history taking and physical examination, psychosocial issues and increasing the students' understanding of epidemiology, diagnostic tests and psychopathology. The primary learning strategies also emphasize small-group learning with supporting lectures and laboratory experiences.

ACE (Ambulatory Care Experience)

ACE is required during blocks 2 through 4 of the first year and elective during the second year. During the ACE each student spends half a day twice a month with a role-model faculty or community physician-preceptor.

Advanced Physical Diagnosis (APD)

APD is required during the second year. Students are assigned to a clinician mentor for the entire academic year. Times and frequency of meetings are at the discretion of the faculty member and the students; however, it is recommended that they meet at least twice each month. The emphasis of this APD experience is on history and physical exam skills and clinical reasoning. Successful completion of APD is required for advancing to the core clerkships.

Contemplating Medicine Patients, Self and Society (COMPASS)

This is a longitudinal small group course. Faculty facilitated small group sessions occur throughout all 4 years; addressing topics related to professional formation.

Independent Learning

Two half days each week are protected time for independent or student-directed learning; no faculty-initiated activities may be scheduled.

Clerkships

Year three includes seven clerkships (http://medicine.missouri.edu/education/clerkships.html) in Family Medicine, Internal Medicine, Neurology, Obstetrics and Gynecology, Pediatrics, Psychiatry, and Surgery. During these core clerkships, students learn the fundamentals of good patient care, and faculty assesses student competencies. Clerkships must be supervised by Columbia-based School of Medicine faculty or community faculty appointed through the School of Medicine. Students may take up to three clerkships at designated community sites as part of the MU Rural Track Clerkship Program (http://www.muahec.missouri.edu/rural-track.php).

Students have the opportunity to learn about common illnesses and abnormalities in children. Emphasis also is placed on the importance of preventive and developmental aspects of child care. Lectures and case presentations correlate with the clinical experiences.

Family and Community Medicine Clerkship - F_C_Md 6001

Core learning experiences take place in ambulatory clinic settings. Students work with experienced clinicians and senior residents, spending time in University teaching practices and in community-based practices. Students also may spend time seeing patients in emergency room, hospital, nursing home settings and taking call with residents and practicing physicians. A high volume of patients of all ages with a wide range of problems is encountered. Many patients will have undifferentiated problems.

Internal Medicine Clerkship - IN_MED 6002

Students spend eight weeks on the internal medicine inpatient service at University Hospital and Harry S. Truman Veterans Hospital where they learn to care for adult patients with acute and chronic illnesses. Teaching emphasizes the principles of differential diagnosis and problem solving as well as the integration of basic science information into the art of patient care. Students also gain clinical experience in medical interviewing and physical examination.

Obstetrics/Gynecology Clerkship - OB_GYN 6004

Students rotate on the obstetric service, the gynecology service and the gynecologic oncology service, seeing a broad range of patients in both inpatient and outpatient settings. In addition, they attend lectures and interactive case presentations.

Neurology Clerkship - NEUROL 6003

Students see patients with neurological disorders in the outpatient clinics, in hospital settings, and on consultation services.

Psychiatry Clerkship - PSCHTY 6005

Students see patients with psychiatric disorders in the outpatient clinics, in hospital settings and on consultation services.

Surgery Clerkship - SURGERY 6006

Emphasis is placed on the diagnosis and treatment of disorders requiring surgical intervention. Each student has a faculty mentor-advisor, attends faculty discussion sessions that cover objectives in the required textbooks and takes call under the supervision of surgical residents. Students are assigned patients from all surgical specialties, participate in preoperative examinations and evaluations, assist during surgical procedures and follow the postoperative management process.

Patient-Centered Care Objective Structured Clinical Evaluation (PCC-OSCE)

A PCC-OSCE will be administered at the end of the third year to assess a student’s ability to provide patient-centered care. Successful completion is required for graduation. Describe more here??

Contemplating Medicine Patients, Self and Society (COMPASS)

This is a longitudinal small group course. Faculty facilitated small group sessions occur throughout all 4 years; addressing topics related to professional formation.

Electives

The fourth year (http://medicine.missouri.edu/education/electives.html) consists of three one-month advanced clinical selectives (sub-internships), in the core disciplines, four one-month general electives, and a one-month Advanced Biomedical Sciences (ABS) course. One of the advanced selectives must be in a surgical area and one must be in a medical area. A minimum of four fourth-year courses (including 2 advanced selectives) must be taken under the supervision of Columbia-based School of Medicine faculty.

The fourth year consists of two groups of advanced selectives and general electives.

Advanced Clinical Selectives

Three advanced clinical selectives from the core disciplines of child health, family medicine, internal medicine, neurology, obstetrics and gynecology, psychiatry and surgery are required. Each selective is four weeks in length. One must be in a surgical area and one must be in a medical area. Advanced clinical selectives build on the knowledge and skills acquired during third-year core clerkships. Students are expected to assume more responsibility for patient care than in the core blocks.

Advanced Basic Science Selectives

Advanced basic science selectives revisit the biomedical sciences in the context of a patient, disease, diagnosis or problem. Four options are available. Students may:

- Search and analyze the literature, integrate and evaluate data, produce a paper or presentation
- Conduct original research with mentors from the basic or clinical sciences
- Attend a series of graduate-level lectures and discussions of current literature
- Function as co-tutors for PBL, attend tutor preparation sessions and write a PBL case

General Electives

Sixteen weeks of general electives are required. Off-site experiences are available but must be approved by the appropriate department.

For more information on fourth year course offerings, please refer to the Senior Rotation Catalog. This catalog contains descriptions of all senior rotations offered at the University of Missouri - Columbia School of Medicine, as well as information concerning enrollment for rotations.

Contemplating Medicine Patients, Self and Society (COMPASS)
This is a longitudinal small group course. Faculty facilitated small group sessions occur throughout all 4 years; addressing topics related to professional formation. Fourth year students complete a required COMPASS capstone assignment.

**USMLE**

The United States Medical Licensing Examination (USMLE) (http://www.usmle.org) is a three-step examination for medical licensure in the United States and is sponsored by the National Board of Medical Examiners® (NBME) (http://www.nbme.org) and the Federation of State Medical Boards (FSMB) (http://www.fsmb.org). The USMLE assesses a physician's ability to apply knowledge, concepts, and principles, and to demonstrate fundamental patient-centered skills that are important in health and disease and that constitute the basis of safe and effective patient care.

All medical students are required to take Step 1 at the end of the second year of medical school and must pass it prior to beginning the fourth year.

All medical students are also required to pass Step 2 Clinical Knowledge (CK) and Step 2 Clinical Skills (CS) prior to graduation.

Step 3 is typically taken after the first year of residency.
College of Veterinary Medicine

The college was established in 1946. It offers a four-year professional program leading to the Doctor of Veterinary Medicine (DVM) degree. Applicants generally have a B.S. or B.A. degree but can be admitted with 2-3 years of undergraduate experience.

The Pre-Veterinary Medical Scholars and AgScholars programs provide early assurance of admission to the MU College of Veterinary Medicine upon satisfactory completion of undergraduate and program requirements. Students work with advisors in the college, and they observe veterinarians at work as part of the program. Students with a minimum ACT score of 30 or an equivalent SAT score are eligible to apply for the Pre-Vet Scholars Program. The required minimum ACT score for the AgScholars Program is 27 and applicants must have demonstrated experience in livestock production and health. Once at Mizzou, scholars must meet program minimum standards, including maintaining a 3.3 cumulative GPA. For more information, call the College of Veterinary Medicine at 573-884-6435.

In addition to the professional program, on-line biomedical science courses available to undergraduate and graduate students are listed in this catalog. These can be used to fulfill the requirements of a Certificate in Biomedical Science, for a licensed veterinary technician to complete a baccalaureate degree or to earn a Master’s degree in Biomedical Sciences.

The college also provides diagnostic and patient care services for animals. The CVM has a national reputation for excellent student-to-instructor ratio and state-of-the-art facilities. The college also offers post-graduate training to interns, residents in various specialties and graduate students.

For more information about the College of Veterinary Medicine, call (573) 882-9594.

Faculty

Department of Biomedical Sciences: http://biomed.missouri.edu/faculty-and-staff/

Department of Veterinary Medicine and Surgery: http://www.vms.missouri.edu/faculty.html

Department of Veterinary Pathobiology: http://vpbio.missouri.edu/faculty.html

Academic Policies

Below is a listing of policies that apply only to students admitted to the College of Veterinary Medicine. The full CVM student handbook can be found at: http://www.cvm.missouri.edu/stuhandbook.htm

CVM students must also abide by the University’s Academic Policies that apply to all students.

The policies and procedures of the MU College of Veterinary Medicine are revised on a regular basis. Provisions regarding such policies and procedures contained on our website are subject to change without notice. If you have questions or note errors or omissions, please contact the College. All statements concerning requirements, prerequisites, conditions or other matters are for informational purposes only, and are subject to change without notice. They are not to be regarded as offers to contract.

DVM in Veterinary Medicine

The DVM degree is achieved after a four-year course of study. Applicants generally have a B.S. or B.A. degree but can be admitted with 2-3 years of undergraduate experience. http://cvm.missouri.edu/prospective.htm

At the University of Missouri, the first two years are largely spent in classrooms and laboratories with the second two years devoted primarily to clinical study in the MU Veterinary Medical Teaching Hospital.

The curriculum at the MU College of Veterinary Medicine is designed to provide students with the knowledge and technical skills necessary to be competent entry-level veterinarians. We prepare our students for general veterinary practice, for entry into graduate or specialty training programs and with the background necessary for careers in regulatory medicine.

In the first two years, all students follow the same schedule, and courses must be successfully completed in sequence. In the final two years of the professional program, the student must successfully complete the required and elective clinical rotations to fulfill graduation requirements.

To receive the DVM degree, students must pass all courses. In addition to passing examinations, attendance and participation in all lectures, laboratories and clinical exercises is required. The doctor or veterinary medicine degree is awarded after successful completion of the professional program.

Curriculum

Objectives and Summary of the Professional Curriculum

The primary objective of the CVM curriculum is to provide students with the knowledge and technical skills necessary to be competent entry level veterinarians. We prepare our students for general veterinary practice, for entry into graduate or specialty training programs, or for careers in regulatory medicine. The overall objective of the first two years of the curriculum is to provide students with a solid foundation in basic biomedical sciences. The courses in the preclinical professional curriculum include anatomy, physiology, cell and molecular biology, pathology, pharmacology, microbiology, virology, and toxicology. The fundamentals of the clinical disciplines are also taught during this time and include anesthesiology, clinical pathology, radiology, public health, medicine and surgery.

The organizational scheme of the professional curriculum differs from that of other schools in that the first two academic years are divided into eight-week instructional periods and our academic year runs from August through June. The students have a summer break between the first and second years and second and third years of instruction that is approximately seven weeks in duration. The overall objective of the clinical curriculum is to solidify basic knowledge and practice clinical skills in the VMTH, VMDL, and external preceptorships. This portion of the curriculum is organized into 12 clinical blocks that begin in October of the third year of professional instruction. These clinical blocks are six to eight weeks in duration and may be divided into 1, 2, or 3 clinical courses. The required clinical rotations are listed below and organized by duration:

Required Clinical Rotations

Full Block Rotations: Food Animal Medicine and Surgery; Equine Medicine and Surgery; Small Animal Community Practice and Shelter Medicine; Diagnostic Pathology and Special Species Medicine.

Third Block Rotations: Theriogenology; Ophthalmology; Small Animal Internal Medicine; Small Animal Emergency and Critical Care; Oncology; Soft Tissue Surgery; Orthopedic Surgery; Neurology and Neurosurgery

Hall Block Rotations: Clinical Radiology; Clinical Anesthesia

Note that students are required to complete four credit hours (four weeks) of external evaluated preceptorships as part of the required curriculum. Students also select 10 credit hours of elective rotations (cardiology, nutrition, production medicine, special imaging, etc.). In addition to required and elective blocks, students are allotted two blocks as “free time.” Most students utilize their free time to study for licensing examinations, complete preceptorships at practices, or interview with prospective employers. A total of 166 semester credit hours are required for graduation. Most students accumulate a higher number of credit hours as a result of enrollments in extra didactic or clinical elective courses.

**Preceptorships**

Missouri students are encouraged to use free blocks as preceptorships to increase exposure to veterinary practice and to meet the requirements of the Missouri Veterinary Medical Practice Act. The University of Missouri College of Veterinary Medicine does not have the authority to approve the use of student free block time or the veterinarians with whom they gain experience.

Available Preceptorships may be found at: [https://cvmsecure.missouri.edu/vdb/preceptorships.php](https://cvmsecure.missouri.edu/vdb/preceptorships.php)

Preceptorship requirements and forms required by the Missouri State Veterinary Medical Board can be found at their website: [http://pr.mo.gov/veterinarian.asp](http://pr.mo.gov/boards/veterinary/VetSupervisionChart.pdf)

The level of supervision required by preceptors is detailed at: [http://pr.mo.gov/boards/veterinary/VetSupervisionChart.pdf](http://pr.mo.gov/boards/veterinary/VetSupervisionChart.pdf)
The Missouri State Veterinary Medical Board preceptorship form may be found at: http://pr.mo.gov/veterinarian-application-forms.asp

Licensing Examination

Professional Licensing Information

In addition successfully completing a professional veterinary education, most states require state and national licensing examinations to meet requirements to practice. Please visit the National Board of Veterinary Medical Examiners (NBVME (http://www.nbvme.org)) and the American Association of Veterinary State Boards (AAVSB (http://www.aavsb.org)) websites for further information.
About MU

Our mission

Our distinct mission, as Missouri’s only state-supported member of the Association of American Universities, is to provide all Missourians the benefits of a world-class education enriched by service and global interaction. We are stewards and builders of a priceless state resource, a unique physical infrastructure and scholarly environment in which our tightly interlocked missions of teaching, research, service and economic development work together on behalf of all citizens. Students work side by side with some of the world’s best faculty to advance the arts and humanities, the sciences and the professions. Scholarship and teaching are driven by a sense of public service — the obligation to produce and disseminate knowledge that will improve the quality of life in the state, the nation and the world.

We are MU — Missouri’s Flagship University

We are a diverse group of students, faculty and staff who value the excitement and learning that come from interaction among people with richly different backgrounds and ideas.

We challenge talented undergraduates to stretch their minds and imaginations with the unique strengths of a major research university. Our students experience an interwoven web of learning experiences — in classrooms, in residence hall learning communities, and in collaborative research and creative, artistic and service projects with faculty.

We develop the world leaders of tomorrow through rigorous graduate and professional programs across the broadest range of disciplines offered on a Missouri campus.

We ensure improving the quality of MU through a financial model that supplements taxpayer support with rational tuition and student aid, public-private partnerships and aggressive fundraising. Our responsible fiscal planning assures both excellence and access for all well-prepared students, regardless of socioeconomic status.

We live and work in a community of scholars. We treasure our core values of respect, responsibility, discovery and excellence.

As a 21st century land-grant university, we are an economic engine for Missouri. We generate businesses and jobs by creating and disseminating the knowledge that fuels the new economy.

We use our unique intellectual resources to improve the civic, economic, health and educational well-being of Missourians from all walks of life and all corners of the state. We are committed to improving the quality of life of students and their families and communities through the creative and performing arts and the application of new knowledge.

Accreditation

The University of Missouri is accredited by the Higher Learning Commission. Various schools, colleges and departments are also accredited by their respective professional associations and accrediting agencies.

Agriculture Food & Natural Resources

Society for American Foresters’ Accreditation/Forestry
Council on Accreditation Parks Recreation & Tourism (CoAPRT)

Arts & Science

American Chemical Society/Chemistry
American Psychological Association/Clinical Psychology Training Program
National Association of Schools of Music/Music

Trulaske College of Business

AACSB International Business Accreditation

Education

Teacher Education Accreditation Council (TEAC)
American Psychological Association (Counseling Psychology)
Missouri Department of Elementary & Secondary Education (MDESE)
American Psychological Association Accreditation/School Psychology
American Psychological Association Accreditation/Counseling Program

Engineering

ABET - Engineering
ABET - Computer Science
Commission on the Accreditation of Medical Physics Education Programs - NSEI

Health Professions

Accreditation Council for Occupational Therapy (ACOTE)/PT
Commission on Accreditation in Physical Therapy Education/PT
Council on Academic Accreditation/Audiology & Speech Lang Pathology (CAA)
Commission on Accreditation for Respiratory Care (CoARC)
Commission on Accreditation of Allied Health Education Programs (CAAHEP)/Diagnostic Med Sonography
Commission on Accreditation of Allied Health Education Programs (CAAHEP)/radiography program
Council on Education for Public Health Joint Review Committee on Education in Radiologic Technology

Human Environmental Sciences

Accreditation Council for Education in Nutrition & Dietetics (ACEND)
Commission on Accreditation (COA) (Social Work)
Council on Social Work Education/Social Work
Council for Interior Design Accreditation (CIDA) /Architectural Studies

Journalism

Accrediting Council on Education in Journalism & Mass Communications

Law School

American Bar Association

Nursing

Commission on Collegiate Nursing Education (CCNE)
The Campus

Students
- Students come from all 50 states and more than 100 countries. The diversity of backgrounds, opinions and lifestyles improves the overall quality of the student experience.
- The university has more than 27,000 undergraduate students who choose courses from a broad range of academic disciplines.
- The university also has more than 7,000 graduate and professional students enrolled in more than 90 different degree programs. The professional schools include more than 1,200 students in law, medicine and veterinary medicine.
- MU is nationally recognized for its Freshman Interest Groups, where students with shared academic interests live in the same residence hall and often attend classes together. These communities provide a strong academic and social foundation for freshmen, as well as increased faculty involvement with students.

The Campus
- The University of Missouri prides itself on respecting the past while embracing the future. The 1.262-acre Mizzou campus is a testament to that belief. From the six Ionic Columns that adorn Francis Quadrangle to the Memorial Union Tower that honors fallen soldiers to the MU Student Center completed in 2010, every piece of campus represents equally the heart and soul of what it means to be a Tiger.
- The campus is also a living museum with hundreds of plant species from all over the world that make up the Mizzou Botanic Garden. The garden features over 42,000 plants and invites a stroll through more than 170 years of history as MU was transformed into the global university it is today. National magazines and newspapers consistently rank Columbia, among the top cities in the nation for its excellent quality of life.

Alumni

There are more than 260,000 living alumni worldwide. Many continue to support the University through membership in the Mizzou Alumni Association.

University of Missouri Board of Curators

Notifications

All statements in this catalog are announcements of present policies only, and are subject to change without notice. They are not to be regarded as offers to contract. If you have questions or note errors or omissions, please contact the Office of the University Registrar (http://registrar.missouri.edu). Below is additional information for items on which the University is required to make available.

Accommodations for Students with Disabilities

The University of Missouri complies with the American with Disabilities Act and other applicable laws and regulations. If you have a disability and need accommodations, please contact Disability Services, S5 Memorial Union, Voice (573) 882-4696, TTY (573) 882-8054, or e-mail disabilityservices@missouri.edu as soon as possible so that appropriate arrangements can be made. For more information please visit the website at http://disabilityservices.missouri.edu. If you need this information in an alternative format (Braille, large print, or digital format), Disability Services can provide assistance.

Complaint Resolution

The University of Missouri desires to resolve student grievances, complaints and concerns in an efficient, fair and amicable manner. For details on procedures to file a complaint, please refer to the section on Complaint Resolution at http://financialaid.missouri.edu/consumer-information-disclosures/index.php.

Equity in Athletics Disclosure Act

The University of Missouri complies with the Equity in Athletics Disclosure Act of 1994, Section 360B of Pub. L. 103-382. This act and accompanying federal regulations require that certain information with regard to intercollegiate athletics, including operation expenses, revenue, salaries and participation rates, be made available to current and prospective students and the public. This report is available from the Department of Intercollegiate Athletics at (573) 882-6501.

Family Education Rights and Privacy Act (FERPA)

The University of Missouri policies and procedures adhere to this federal law. Students have the right to restrict the release of directory information. Directory information for MU is defined as: a student’s name, address, telephone listing, e-mail address, major field of study, student level, dates of attendance, degrees and awards received, enrollment status in any past and present semester (i.e. full/part-time), and the most recent previous educational agency or institution attended by the student.

To restrict this information, students should change their privacy settings in myZou or contact the Office of the University Registrar-Registration, 125 Jesse Hall. For the full policy, go to http://registrar.missouri.edu/policies/ferpa.php.

Note: University of Missouri students can grant other users direct authorized online access to their student information in myZou, which may include academic information (including, but not limited to grades), account information, directory information and financial aid. See http://registrar.missouri.edu/registration-adddrop/additional-authorized-access.php for more information. The University does not release grades to parents unless the student specifically authorizes it in writing in the Office of the University Registrar or a parent shows proof that the student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954. “Parent” means a parent of a student and includes a natural parent, a guardian, or an individual acting as a parent in the absence of a parent or guardian.

Nondiscrimination

The University of Missouri does not discriminate on the basis of race, color, religion, sex, sexual orientation, national origin, age, disability, protected veterans. Any person having inquiries concerning the University of Missouri compliance with implementing Title VI of the Civil Rights Act of 1964, Title IV of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, or other civil rights laws should contact the Assistant Vice Chancellor, Human Resources Services, University of Missouri, 130 Heinkel Building, Columbia, MO 65211, (573) 882-4256, or the Assistant Secretary for Civil Rights, US Department of Education.

Oak Ridge Associated Universities (ORAU) Consortium

Since 1981, students and faculty of the University of Missouri have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 96 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one
month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at http://www.orau.org/orise/educ.htm, or by calling either of the contacts below.

ORAU’s Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU’s members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact:

Robert V. Duncan
Vice Chancellor for Research
ORAU Councilor for University of Missouri
Monnie E. Champion
ORAU Corporate Secretary (865-576-3306); or
Visit the ORAU Home Page (http://www.orau.org)

State of Missouri Registration for Professional Engineers

The Revised Statutes of Missouri (Section 327.221) require that “all applicants for registration as a professional engineer in the State of Missouri after Jan. 1, 1977, be a graduate of and hold a degree in engineering in a curriculum accredited by the Accreditation Board for Engineering and Technology (ABET).” All MU undergraduate engineering bachelor’s-level programs are so accredited. Applicants who receive advanced degrees in MU’s engineering programs but who do not have a bachelor’s degree in an accredited engineering program are not eligible for registration in Missouri. Candidates for a graduate degree (MS or PhD) in engineering who want to establish eligibility for registration should consult with their academic program chair about a plan of study that also will lead to a bachelor’s degree in an ABET-accredited program. Further information about professional engineering registration may also be obtained from the Missouri Board for Architects, Professional Engineers and Land Surveyors, P.O. Box 184, Jefferson City, MO 65102.

Veteran Access, Choice and Accountability Act of 2014, Section 702

The University is compliant with the requirements of PL 113-146 the Veteran Access, Choice and Accountability Act of 2014, Section 702. Section 702 targets educational assistance through ensuring in-state tuition/in-district rates to uniformed services veterans and their qualified dependents covered under this Section.

These new requirements will ensure that our Nation’s recently discharged Veterans, and their eligible family members, will not have to bear the cost of out-of-state charges while using their well-deserved education benefits.

The following individuals shall be charged the in-state/in-district rate, or otherwise considered a resident, for tuition purposes:

- A Veteran using educational assistance under either chapter 30 (Montgomery G.I. Bill – Active Duty Program) or chapter 33 (Post-9/11 G.I. Bill), of title 38, United States Code, who lives in the State of Missouri while attending a school located in the State of Missouri (regardless of his/her formal State of residence) and enrolls in the school within three years of discharge from a period of active duty service of 90 days or more.

- Anyone using transferred Post-9/11 GI Bill benefits (38 U.S.C. § 3319) who lives in the State of Missouri while attending a school located in the State of Missouri (regardless of his/her formal State of residence) and enrolls in the school within three years of the transferor’s discharge from a period of active duty service of 90 days or more.

- A spouse or child using benefits under the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. § 3311(b)(9)) who lives in the State of Missouri while attending a school located in the State of Missouri (regardless of his/her formal State of residence) and enrolls in the school within three years of the Service member’s death in the line of duty following a period of active duty service of 90 days or more.

- Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the same school. The person so described must have enrolled in the school prior to the expiration of the three year period following discharge or death described above and must be using educational benefits under either chapter 30 or chapter 33, of title 38, United States Code.

A Statement of Values

The University of Missouri, as the state’s major land-grant university, honors the public trust placed in it and accepts the associated accountability to the people of Missouri for its stewardship of that trust. Our duty is to acquire, create, transmit, and preserve knowledge, and to promote understanding.

We the students, faculty, and staff of MU hold the following values to be the foundation of our identity as a community. We pledge ourselves to act, in the totality of our life together, in accord with these values.

Respect

Respect for one’s self and for others is the foundation of honor and the basis of integrity. A hallmark of our community is respect — for the process by which we seek truths and for those who engage in that process. Such respect is essential for nurturing the free and open discourse, exploration, and creative expression that characterize a university. Respect results in dedication to individual as well as collective expressions of truth and honesty. Respect is demonstrated by a commitment to act ethically, to welcome difference, and to engage in open exchange about both ideas and decisions.

Responsibility

A sense of responsibility requires careful reflection on one’s moral obligations. Being responsible imposes the duty on us and our university to make decisions by acknowledging the context and considering consequences, both intended and unintended, of any course of action. Being responsible requires us to be thoughtful stewards of resources — accountable to ourselves, each other, and the public we serve.

Discovery

Learning requires trust in the process of discovery. Discovery often fructifies existing world views and requires acceptance of uncertainty and ambiguity. Therefore, the university must support all its members in
this lifelong process that is both challenging and rewarding. As we seek
greater understanding and wisdom, we also recognize that knowledge
itself has boundaries — what we know is not all that is.

Excellence

We aspire to an excellence that is approached through diligent effort,
both individual and collective. Pursuing excellence means being satisfied
with no less than the highest goals we can envision. Pursuing excellence
involves being informed by regional, national, and global standards,
as well as our personal expectations. We recognize and accept the
sacrifices, risks, and responsibilities involved in pursuing excellence, and
so we celebrate each other’s successes. We commit ourselves to this
process in an ethical and moral manner.

These statements are mere words until we integrate them as values
in our individual lives and reflect them in our institutional policies and
practices. We pledge ourselves to make them effective in the very fabric
of our lives, our community, and all our relationships with others, thereby
enhancing the development of individuals and the well-being of society.

Undergraduate Academic Assessment Goals
All undergraduate students are required to participate in the University’s processes/program for assessing student learning in general education and in the major fields. The purpose of assessment at MU is to provide faculty and administrators with the information they need to ensure high levels of student learning. The key goal is to improve how and what students learn in their programs and to increase how much they learn. At
the same time, the process provides documentation of student learning to help programs and the University meet external requirements, including those of accreditation organizations.

Faculty members develop assessment strategies specific to each degree program and conduct assessments at appropriate points in their students’ undergraduate careers. Each program at the University has defined learning objectives for their students that form the basis of assessments. Students participate in assessments of discipline-specific learning objectives and of learning objectives aligned with the University’s learning objectives for all students.

In order to meet the needs of the people of the State of Missouri, the nation and the global society, the University of Missouri shall provide its baccalaureate graduates with a sound intellectual foundation in the liberal arts and sciences and in the student’s chosen major fields of study. Toward that end, in addition to having every bachelor’s degree recipient fulfill appropriate course work requirements for general education and for degree programs, MU strives to have all students achieve the following goals:

**Goal 1: Graduates of MU will be able to identify and evaluate new information in light of previous knowledge.**

MU graduates will be able to:

- Identify issues and problems important to society, define their scope, and identify information needed to address them.
- Find existing sources of information on a topic.
- Evaluate the accuracy, validity, and reliability of information presented in a wide variety of media.
- Conduct appropriately focused library, field or laboratory research.
- Analyze and synthesize information gathered, demonstrating strategic and logical reasoning skills.
- Demonstrate understanding of costs, benefits, and/or consequences of proposed resolutions of issues and problems important to society.
- Organize information, data and ideas for further analysis and/or presentation.

**Goal 2: Graduates of MU will possess the knowledge, abilities, and skills necessary to communicate effectively.**

MU graduates will be able to:

- Communicate information to a variety of audiences and purposes.
- Revise and edit their presentations to improve clarity and accuracy.
- Engage in the healthy and positive exchange of ideas.
- Apply communication skills in furthering their post-MU careers.
- Use multiple formats and technologies to communicate ideas effectively.

**Goal 3: Graduates of MU will possess the knowledge, abilities, and skills necessary to serve society responsibly.**

MU graduates will be able to:

- Understand the duties of being a responsible citizen.
- Identify and analyze the requisite behaviors for carrying out their academic and professional lives with integrity.
- Work collaboratively with others where appropriate.

**Goal 4: Graduates of MU will possess knowledge to observe and critically analyze the diverse human experience.**

MU graduates will be able to:

- Engage in life-long learning.
- Appreciate fine art and literature.
- Understand the contributions of diverse groups and experiences to life at the individual, community, national, and the world levels.
- In addition, some students will be required to take standardized tests in their major field and/or for general education.

**University General Education Assessment**

Each year, a sample of seniors will participate in a University general education assessment examination known as the CAAP Exam, which addresses University general education competencies of MU students in the areas of mathematics, science reasoning, reading, writing and critical thinking.

**Major Field Assessment**

Prior to graduation, all seniors will participate in assessment of their mastery of course work in their major field. The assessment program is determined by the faculty of each department to measure the extent to which students are achieving instructional goals and outcomes for graduates in that field. The methods of assessment are appropriate to the educational goals for students in their respective major fields. Information on subject field assessment is included with the college and school sections of this catalog. Methods may include:

- Nationally-normed examinations
- Portfolio review
- Performance review
- Capstone project
- Faculty-developed exit examinations
- Exit interviews University

**University Organization**

The largest academic units at the University of Missouri are its colleges and schools. Each college and school may consist of smaller units called departments. Some colleges have divisions within them as well, which are a collection of departments within a college or school. By long tradition, some of the smaller units are also called schools.

The academic year is divided into two 16 week semesters (fall and spring) and one 8 week summer semester. The January intersession is considered part of the spring semester for registration and financial aid purposes. The May intersession is considered part of the summer session.

**Academic Programs and Degree Structure**

To earn a degree from the University of Missouri, students must complete all University, college and/or school, departmental and major requirements. In some cases, the major requirements may include emphasis areas and/or minors. In other cases, there may be options or tracks, which do not appear on transcripts.
Academic Policies

The academic rules and regulations of the University of Missouri are published online in the Collected Rules and Regulations of the University of Missouri and the MU Faculty Council Academic Regulations (http://facultycouncil.missouri.edu/handbook/intro.html). The following are selected policies and procedures. Many are summarized as a guide for students. Students needing additional information on academic regulations in specific colleges and schools may obtain this information from their deans' offices.

If a policy is only applicable to certain students and not all students, this is indicated with one of the following codes. Else the policy is applicable to all University of Missouri students.

(G) policy applicable to Graduate students only
(L) policy applicable to Law students only
(U) policy applicable to Undergraduate students only
(V) policy applicable to Veterinary Medicine students only

Absences

Students are expected to attend all scheduled class sessions. A student who does not complete assigned academic work because of absence from class is responsible for making up that work in accordance with instructions provided by the faculty member consistent with any policy established by the faculty of the respective department, school or college. A school or college faculty, a department faculty, a course director or an individual instructor may establish attendance standards and will determine whether a student will be permitted to make up work missed as a result of absence(s). There is no dean’s excuse or official absence. (See Satisfactory Academic Progress Policy for Financial Aid Eligibility [http://financialaid.missouri.edu/eligibility/satisfactory-academic-progress.php]).

However, a student, who is also a member of a national guard, Federal Emergency Management Agency or military reserve unit and is called to active duty while the University is in session, will be permitted to make up work missed as a result of such absences for up to two weeks of absences, provided that to do so does not require the instructor to engage in individualized tutorial work with the student. Recognizing that some students have contractual obligations to the University, while others are participating in intercollegiate events at the behest of their departments, faculty are encouraged to make accommodations for absences incurred because of these responsibilities. In enforcing their absence policy, it is recommended that faculty give due consideration to the important role that extracurricular activities play in the development of students, as well as to the benefits they provide to both our university and community.

Students must notify instructors of any scheduled absences within the first two weeks of the semester. In the case of later qualifying events, the instructor must be informed two weeks prior to those events. Instructors are encouraged to advise students of their absence policy at the beginning of the semester.

Academic Dishonesty

Academic honesty is essential to the intellectual life of the University. Thus, academic dishonesty, such as cheating and plagiarism, is a basis for disciplinary action. In all cases of academic dishonesty, the faculty member makes an academic judgment about the student’s grade on that work and in that course and reports all incidents to the provost for disciplinary action.

Academic honesty is fundamental to the activities and principles of the University. All members of the academic community must be confident that each person’s work has been responsibly and honorably acquired, developed, and presented. Any effort to gain an advantage not given to all students is dishonest whether or not the effort is successful. The academic community regards academic dishonesty as an extremely serious matter, with serious consequences that result from probation to expulsion. When in doubt about plagiarism, paraphrasing, quoting or collaboration, consult the course instructor. Refer to the Collected Rules and Regulations, Section 200.010, Standard of Conduct (http://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.010_standard_of_conduct), and Section 200.020, Rules of Procedures in Student Conduct Matters (http://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.020_rules_of_procedures_in_student_conduct_matters) for more specific details. (The Collected Rules are available on the University of Missouri System web site.) According to the UM Rules of Procedures in Student Conduct Matters, when they suspect that academic dishonesty has occurred, faculty members have an obligation to report an incident to the Office of the Vice Provost for investigation.

Academic Progress (G)

Measuring Graduate Student Progress

Annual Requirement: Review of Graduate Student Progress

Since 2006, the Graduate School has required that all graduate students file an annual report on their academic performance, degree program milestones, and related academic/scholarly/research/creative achievements. Faculty mentors (advisors) are required to review their advisees’ annual reports to assess if their advisees are making satisfactory progress toward degree completion. In some cases, the director of graduate studies and/or department chair also reviews the students’ annual reports and faculty member responses.

Each division/area/department degree program must inform all students of the annual progress reporting requirement. This includes printed, published or electronic materials provided to graduate students (e.g., handbooks, orientation materials, guidelines, web site.)

Graduate Student Progress System (gsps.missouri.edu)

The Graduate Student Progress System (GSPS) is a web-based reporting system where students document their progress toward degree completion. All graduate students (i.e., in all disciplines) are required to submit an annual progress report by starting/updating a GSPS record. Faculty members use the GSPS to review students’ annual reports, assess their progress and provide feedback to the students.

At a minimum, students are required to report on academic progress, completion of required forms, award and honors, conferences, presentations, publications, service activities, creative activities, employment, funding activity, and job placement. Academic program faculty or administrators may require additional indicators of performance or achievement to accommodate the unique needs of their programs. Additional information on measuring graduate student progress is at http://gradschool.missouri.edu/policies/satisfactory-progress.php.

Probation and Termination Dismissal

In addition to dismissal for failure to meet the usual examination and grade requirements, departments and graduate degree-granting area programs have the right to place on probation and, after at least 30 days of probation, to dismiss from their program any graduate student who is deemed to be making insufficient academic progress or whose work is not of the quality required. The faculty advisor or academic program chair must inform the Graduate School as soon as the student is notified and the probationary period begins. The dismissal may occur at any time during a student’s work toward a graduate degree.

For additional information on satisfactory progress, probation, termination, extension and appeals go to the Extension and Appeals of Satisfactory Progress Infractions section of this policy manual (click here to go to that section), or go to the web page version of the catalog, found at http://gradschool.missouri.edu/academics/progress/probation-termination.php.
Extension and Appeals of Satisfactory Progress Infractions

The progress of each graduate student is evaluated annually by the student’s advisor and/or director of graduate studies (DGS). The definition of “satisfactory progress” and procedures for its verification may vary among departments/programs. If a department/program has instituted timelines that differ from those applying generally to graduate students (see below), these timelines should be made available to students from their entrance into the graduate degree program. If a student is authorized to diverge from progress timelines established by either the department/program or the Graduate School, this fact should be documented in written form and endorsed by the student’s advisor and DGS.

Progress Toward Degree

Full-time students (those taking 9 hours or more per semester) should follow the time frames associated with degree programs discussed in the Graduate Policy Manual under Master’s Degrees and Doctoral Degrees. They must submit required forms on time and maintain a grade point average of 3.0 or better. Furthermore, they must successfully undergo their departments’ annual review processes.

Part-time students should file a timeline for successful degree completion with their departments and the Graduate School. This timeline should be endorsed by the director of graduate studies and a prospective advisor by the end of the first calendar year of admission into the department/program. When these timelines conflict with time to degree guidelines laid out in the Graduate Policy Manual’s sections on master’s and doctoral degrees, they must receive the endorsement of the dean of the Graduate School.

Distinction Between Requests for Extension and Appeals

A “Request for an Extension” and an “Appeal” are distinct processes for dealing with problems related to “satisfactory progress.” A “Request for Extension” is the appropriate course of action when a student has failed to meet satisfactory progress provisions of the Graduate School. The “Appeal Process” should be followed when a department/program has dismissed a student after the required probationary period.

Academic Progress (L)

Annual Review of Students’ Progress (Applicable to LLM Students)

The progress of each graduate student will be evaluated annually by the Director of the LL.M. Program.

For students who first enrolled in the LL.M. Program after January 1, 2001, the following are the standards of “satisfactory progress” in the LL.M. Program, subject to individual exceptions for good cause as approved by the Director of the LL.M. Program. Normally, students should complete all degree requirements within three (3) years of enrollment. By the end of the first year of enrollment, students must have completed at least eight (8) credits that satisfy requirements for the LL.M. degree. By the end of the second year of enrollment, students must have completed at least sixteen (16) credits that satisfy requirements for the LL.M. degree. By the end of the third year of enrollment, students must have completed at least twenty-four (24) credits that satisfy requirements for the LL.M. degree. Time spent in the armed services will not count toward the period for completing the degree requirements.

For students who first enrolled in the LL.M. Program before January 1, 2001, to achieve “satisfactory progress,” students must complete an average of at least four (4) credits for every academic year since their initial enrollment in the LL.M. Program.

The Graduate School will be informed of all students who are not making satisfactory progress. When there is a question as to whether satisfactory progress is being made, the Director of the LL.M. Program will write to the student and recommend a face-to-face meeting with the student. If there is disagreement, the Director of the LL.M. Program will ask the student to submit a separate letter to him or her. Copies of both letters will be made available to the student, maintained in a departmental file, and forwarded to the Graduate School.

If difficulties persist and the Director of the LL.M. Program determines that probation is appropriate, the Director will notify the student in writing of the probationary period, which may be from 30 days to a full semester. The probation letter will state explicitly that the student is on departmental probation and state precisely what must be accomplished and by what date in order to enable the student to return to good standing in the Program and be removed from probation. Within ten (10) working days of receipt of the probation letter, the student may submit a written request for a review of this decision by the LL.M. Admissions Committee, which may affirm or revise the probation letter or determine that probation is not appropriate.

If the student does not comply with the conditions of probation, a letter signed by Director of the LL.M. Program will be sent to the student (with a copy to the Graduate School) with notification of dismissal from the LL.M. Program. Within ten (10) working days of receipt of the probation letter, the student may submit a written request for a review of this decision by the LL.M. Admissions Committee, which may affirm or revise the notification of dismissal or determine that dismissal is not appropriate (with a copy to the Graduate School). The Graduate School sends the official notice of dismissal from the Program.

A student may appeal a dismissal decision to the Graduate Faculty Senate only after completing the Program’s appeal process. The full text of the Dismissal Policy and Appeals Process for Graduate Students (http://gradschool.missouri.edu/academics/progress/requests-for-extensions-appeals.php) can be found in the Graduate School Catalog on its web site.

Academic Renewal (U)

Students who are returning to the University of Missouri to pursue an undergraduate degree after an extended absence may request permission to remove one or more complete academic terms from future degree and GPA considerations.

Eligibility

To be eligible for academic renewal consideration, students must meet these requirements:

- Students must not have enrolled as degree-seeking at the University of Missouri for four or more consecutive years.
- Students must not have graduated from the University of Missouri-Columbia.
- Students must either:
Any beginning student admitted to the University of Missouri who does not meet the minimum entrance standards as specified in the Faculty Handbook, Article II, Admissions, Advanced Standing, and Classification will enter on scholastic probation and will have one semester in which to remove probation.

**Ineligible to enroll**

Students whose term GPA falls below 1.0 are ineligible to re-enroll. Students on probation must establish a 2.0 cumulative GPA within two successive terms of enrollment; otherwise they are ineligible to enroll.

In the application of the foregoing rules, the dean or faculty committee of the division concerned will determine how an incomplete grade in a course will be considered in determining a student’s academic standing. A student who has been ineligible to enroll for a period of one year may be readmitted only upon the approval of the dean of the school or college in which the student desires to enroll. If a readmitted student again becomes ineligible to enroll, his or her ineligibility is normally considered permanent. These regulations are the prescribed minimal standards but do not limit the authority of the faculty of any school or college to adopt and enforce additional regulations affecting students enrolled therein.

**Advanced Standing - Credit by Exam (U)**

MU offers the opportunity for advanced credit by examination to any student with fewer than 90 credits. Credit may be awarded, but no grades or honors points are recorded. General eligibility to receive advanced standing at MU does not guarantee its applicability to a degree program. A student who has received credit for any portion of a lower level course will not receive advanced standing credit for that same course. More information can be found at [http://admissions.missouri.edu/apply/ap-ib-and-college-credits/index.php](http://admissions.missouri.edu/apply/ap-ib-and-college-credits/index.php). The programs described below are used to award credit.

**Advanced Placement Program**

The Advanced Placement Program of the College Board is accepted by MU. The examinations are prepared and graded by national committees, and the results are furnished to MU on request of the student. Students who receive a sufficiently high score are eligible for college credit. Students should contact their academic units if they have questions.

**College Level Examination Program**

The College Level Examination Program of the College Board provides general examinations and subject examinations. Credit may be awarded for CLEP subject exams only. Credit must be applicable in students’ programs of study. (Refer to the appropriate section in this catalog for the school or college, or contact the academic unit to ascertain the specific limitations for CLEP examinations.)

**Credit by Examination for Mathematics Courses**

It is possible to receive credit in the following math courses by passing the appropriate examination:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1100</td>
<td>College Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1140</td>
<td>Trigonometry</td>
<td>2</td>
</tr>
<tr>
<td>MATH 1160</td>
<td>Precalculus Mathematics</td>
<td>5</td>
</tr>
<tr>
<td>MATH 1360</td>
<td>Geometric Concepts</td>
<td>3</td>
</tr>
</tbody>
</table>
To inquire about these examinations, contact either the Group Testing Program, 220 Parker Hall, (573) 882-4801, or the departmental representative on testing for advanced placement. Credit for a course by examination is not available to students who have essentially covered the material of the course in college or university courses.

### Departmental Examinations

Departmental examinations are limited to students with fewer than 90 credits and with no official record of previous enrollment in the course(s) in which credit is to be received.

Departmental examinations are comparable to final examinations given in the various courses offered on campus. The examinations are objective or essay formats and are prepared and graded by the faculty of the department concerned and MU Testing Services. Arrangements for departmental examinations should be made through Testing Services. (Also see the College of Arts and Science information on departmental exams (p. 131).)

### International Baccalaureate

MU recognizes the International Baccalaureate Program. Students may receive credit and/or advanced standing for proficiency on the higher-level subject examinations. No credit is granted for subsidiary-level examinations.

### Additional College Course Work

MU recognizes college course work completed before high school graduation if the college attended provides an official transcript of the course work.

### Freshman Placement Tests

Placement in English is based on ACT score in English. Math placement is based on ALEKS Exam score or prior course credit. (See mathplacement.missouri.edu for more details)

### Subject Examinations

Subject examinations are limited to students with fewer than 90 credits. The subject examinations are generally accepted by most schools and colleges but may not be considered for credit in all degree programs.

### Application for Degree

Students should contact their academic unit at least a full semester before they anticipate graduating to complete the appropriate steps and paperwork to apply for receiving their degree. The University does not automatically anticipate or calculate who will be degree candidates each term.

### Attendance (L)

#### Policies & Rules — Attendance

Law Schools approved by the American Bar Association must adopt, publish and adhere to a written policy requiring regular class attendance.

The rules below implement this requirement at MU, and were adopted by the faculty on January 23, 2015:

1. **Class Attendance**
   - a. Attendance is expected, in accordance with the ABA standards.
   - b. Administration of the attendance policy lies with the individual instructor for each course.
   - c. The individual instructor determines the number and nature of absences from each course for an excess of which sanctions may be imposed, as well as the sanctions which will be imposed, up to and including dismissal from the course.
   - d. If the instructor intends to attach a formal sanction (grade reduction or dismissal from the course) to inadequate attendance, he/she must announce to the class in writing at the beginning of the course what the rules governing attendance in that course will be, with appropriate provision for notice to late enrolliers.
   - e. A student who is in danger of accumulating excessive absences must be given notice by the instructor in advance of the absence which will give rise to a significant sanction (major grade reduction or dismissal from the class).

2. **Appeals**
   - A student who is dropped from a course for excessive absences may meet with the Dean and request reversal of the decision. Such a student may seek the assistance of the Grievance Committee of the Student Bar Association in support of the request. A final decision on the appeal rests in the discretion of the Dean.

### Auditing a Course (Hearer)

Students who wish to obtain knowledge from a course, but do not need or want the credit for graduation, may enroll in the course(s) as auditors/hearers.

- Hearers receive no credit toward a degree and an H grade appears on the transcript.
- Students pay standard fees for the course(s).
- Students’ academic advising unit must approve and change their registration status (hearer vs. credit) after the expiration of two weeks following the first day of classes in regular session or the equivalent thereof in a shorter session. See the University Registrar’s website at http://registrar.missouri.edu/academic-calendar.php for deadlines for each semester.
- Students who fail to meet class requirements may be dropped from the course by their academic advising unit upon request of their instructor and with the dean’s stamp.
- Normally, a hearer will attend the course on a regular basis; either the department or an individual instructor will stipulate the requirements for enrollment in a course as a hearer.

### Catalog Editions (Which catalog applies to whom?)

These policies concern the application of the University of Missouri’s graduation, divisional and departmental degree requirements. MU
students' academic requirements for graduation are typically met as follows:

University general education and other University-wide policies:

- Students must complete the graduation requirements in effect for the term that they first enroll at MU or they may choose those in effect for the term that their degree is awarded with the agreement of their academic unit.
- This policy applies to newly admitted freshmen as well as transfer students.
- Students who have a lapse in enrollment must meet the degree requirements in effect at the time the students are readmitted to MU.

Divisional, departmental and other degree requirements:

- Students must meet the specified divisional, departmental and major requirements for the degree(s) that were in effect when they were admitted as degree seeking to the program or may choose those in effect for the term in which they will graduate, with the agreement of their division or department.
- Students who have a lapse in enrollment must meet the standards of the degree requirements in effect when they return to MU.

After consulting with an advisor, students may appeal. Requests for exceptions to the above policy may be made to the academic dean for the academic unit in which the student is enrolled. Some academic units may have unique “grandfathering” policies that apply to changes in their programs and that supersede this policy. Students should consult with an advisor in all cases.

Class Cancellation Guidelines

Refer to the the MU Faculty Council on University Policy regarding class cancellation guidelines (http://facultycouncil.missouri.edu/handbook/class-cancellation).

Completion of a Course

A course is considered complete if the student earns a grade of A, B, C, D, F or U, and the “+” or “-” sign, if appropriate, or S for the course. A course in which the student receives a grade of W, NR, or I is not considered a completed course.

- The faculty of the division concerned will determine how the grade of I in a course and a grade in a repeated course will be considered in determining a student’s academic standing. However, for financial aid purposes the grade of I is not considered a completed course and a repeated course will be counted as additional credits attempted.
- The dean of the relevant division may, after consulting with relevant faculty, waive any of the regulations governing a student’s eligibility to re-enroll. However, the Financial Aid Advisory Committee shall have authority concerning students’ satisfactory progress toward their educational objectives and eligibility to receive federal, state and institutional student financial aid.

Computer Policies (L)

Acceptable Use Policy

- Priority use of lab computing equipment is for academic rather than recreational purposes. If you are asked to relinquish use for this reason, your compliance is expected and appreciated.
- Computing at MU is a community enterprise serving academic, administrative and research needs. Please conserve resources by carefully managing your e-mail, data, web files, and printing.
- Users will respect copyright, slander, libel, anti-discrimination and other appropriate laws as well as the security and proper functioning of the campus network.
- MU is committed to privacy and will not routinely inspect the contents of your computer files.
- MU provides uncensored access to materials on the campus network or the Internet unless those materials violate federal or state laws.

For more detailed information on current acceptable use guidelines, or to report a potential violation, view MU’s Acceptable Use Policy (http://www.umsystem.edu/ums/rules/collection_rules/facilities/ch110/110.005_acceptable_use_policy).

Law School Computer Lab Polices

- Limited Access to the Law School Computer Lab - In order to use the computer lab you must be a current MU law student. Access to the computer lab is a privilege and is not transferable to non-law students. You may not let your family use the lab for any purpose.
- Computer Availability and Priority of Use - Computers in back of the lab are available during regular library service hours on a first-come, first-served basis. Computer training classes held in the front room of the lab take priority over individual use. An ADA workstation is available in Room 119 of the lab. Students who require access to this equipment in order to be able to access library resources have priority. All decisions as to the use of the computers are at the discretion of the Library Director, the Associate Director, or the Automation Librarian.
- Copyright and Licensing Restrictions - The user is responsible for observing all copyright laws. The software and documentation made available in the lab is for use only in the lab and is not to be duplicated for use elsewhere. Duplicating a copyrighted program or documentation is illegal and is an Honor Code violation. Any use of computer-assisted legal research databases (Westlaw and Lexis) is for academic purposes only. Terms of use are governed by individual subscriber agreements for each system.
- Assumption of the Risk - The MU Law Library and MU School of Law make no guarantee with respect to any equipment, programs, or other materials in the computer lab. The entire risk as to the quality and performance of the computer equipment, programs, and documentation is with the user. The lab is not responsible for loss of data due to faulty programs or equipment.
- Data Storage - Users may not store their files on the hard drives of the individual workstations or on the law school’s network. Users may not save their personal settings on individual workstations.
- Reporting Equipment Problems - Report any PC or printer problem, such as paper jams, toner replacement, backed-up print jobs, etc. to the User Support Analyst, student lab assistant, or reference office. Do not attempt to fix any lab equipment on your own. Lab supplies (paper reams, toner etc.) are to be handled by staff only.
- Food, Drink and Tobacco are not allowed in the lab.
- Lab Phones and Help Desk - Lab phones are for staff use only. Public telephones are available in the student area of the subplaza.

Failure to observe lab policies and directions from library staff regarding proper lab use may result in restriction or revocation of computer access, or in termination, academic probation, or prosecution under federal or state law.
Course Repeat Policy

The course repeat policy will not be applied automatically to a student’s GPA. After completing the second attempt of a course, a student must submit a request for GPA adjustment form to the University Registrar’s Office 125 Jesse Hall.

When the grade received in an initial attempt, for an undergraduate course at University of Missouri-Columbia, or any University of Missouri System Campus, is a “C-“, “D+“, “D“, “D-“, “F“ or “WF“, the grade will be replaced in the calculation of the GPA by the grade received in any second attempt of the same course at the University of Missouri-Columbia (unless the repeat grade is an I or W). All grades received in second and subsequent attempts will be included in GPA calculations.

No more than 15 semester hours will be dropped from the calculation of the student’s GPA. All attempts of a given course will appear on the official transcript with the grade(s) earned. The transcript will have an explanation that the GPA is calculated using all grades earned in a course except the initial attempt when a course has been repeated. This policy is effective with course work where the initial enrollment and completion of the course was fall semester 2000 and thereafter.

Any course being repeated may not be taken on an S/U basis. This policy does not imply a guarantee that openings will be available in courses if and when students wish to retake them, and instructors will not ordinarily know whether a student is enrolled in a course for the second time. When a course is repeated, all applicable tuition and required fees apply.

Degree credit may be earned only once for a particular course unless a department or division has, in other policies, allowed for multiple credit from that course.

Students are strongly encouraged to visit with an advisor to determine whether re-enrollment is advisable (certain department or divisional policies may be important in this connection). Further, students should be aware that repeating a course may have an impact on financial aid, insurance, entrance to professional schools, participation in athletics, immigration status, and other non-academic matters.

The academic status of a student in a given semester will not change as a result of repeating a course.

The policy is applicable to undergraduate students only.

Clarifying comments

Students should not re-enroll in a course for which they have been assigned a grade of “I”.

Students may not apply the course repeat policy to courses once they have graduated. This also applies to students who are seeking a second undergraduate degree.

For the purposes of this policy, an undergraduate course is any course an undergraduate student attempts for undergraduate credit regardless of the course level. A student may not apply the course repeat policy to a course repeated as an undergraduate student for graduate credit.

If the department or course number has changed since the student completed the first attempt of a course, the department offering the course will verify that the subsequent course is substantially the same and the course repeat policy may apply. If the initial course is a cross-listed course, a student may apply the course repeat policy if the student subsequently completes the cross-listed course offered by the alternate department.

Courses for which a NR, W or a grade of I are assigned are not considered attempts since no final grade has been recorded.

If the initial attempt of a course contained an attribute such as; honors, writing intensive, math reasoning proficiency, service learning, or computer proficiency, the second attempt is not required to contain the same course attribute for the purpose of the course repeat policy. Students should be aware that if the second course does not have the same attribute as the initial course they will no longer be allowed to count the initial attribute toward any graduation requirement.

Grades of C or greater may not be repeated under the course repeat policy because these grades are considered acceptable work and would not prevent a student from graduating from MU.

Students may replace the grade earned from the course at the University of Missouri-Columbia or any other University of Missouri campus with a grade earned in an equivalent course at University of Missouri-Columbia campus. Courses for which a W or a grade of I are assigned are not considered attempts since no final grade has been recorded.

Course-Load Rules (L)

The maximum number of hours permitted for a semester is seventeen, and seven for a summer session, unless the Associate Dean for Academic Affairs approves a heavier load. The minimum number of hours permitted for a semester in order to be considered a full-time student is twelve. There is no minimum for the summer session.

Credit for Non-Law Courses (L)

Law students are permitted to take up to a total of three hours of courses for Law School credit in other schools of the University during law school. Please note that because you are listed at “primary degree program-Law” with the University, you will be charged the same per credit hour rate for ANY non-law courses that applies to law courses (NOT the undergraduate or graduate per credit hour rate). This does not apply to students officially enrolled in a dual degree program.

1. These credits are taken on an S/U basis and are subject to the following regulations:
   a. The course must be at the graduate level (numbered 7000-9999).
   b. The course must be related to the student’s study and future practice of law.
   c. The semester hours of the non-law course will be counted in the student’s total number for the semester, and the student may not (without permission) take any more than a combined total of sixteen hours in a regular semester, or seven in a Summer Session.
   d. Students wishing to take a non-law course for law credit MUST request approval of the course in writing prior to enrolling in the course. The request should be given to the
Deficient Academic Performance (V)

Mid-course/rotation grade warnings must be issued to students if they are not achieving at least a “C” grade average. The notice should be copied to the Associate Dean for Academic Affairs.

A student who receives a grade of “F” in any required or elective course of the professional curriculum will be dismissed.

No more than 9 total semester credit hours of “D” grades may be accumulated prior to graduation. Greater than 9 semester credit hours of “D” grades will result in dismissal from the CVM. If readmitted, any subsequent “D” grades will again result in dismissal from the CVM.

NOTE: These regulations were adopted by faculty action August 4, 1983. They are subject to change by faculty action. Revised in 1986, 2002, 2009, 2011 and 2012.

Disability Accommodations (L)

It is the policy and practice of the University of Missouri School of Law to comply with the Americans with Disabilities Act, Section 504 of the Rehabilitation Act, and state and local requirements regarding students and applicants with disabilities. No individual shall be discriminated against by the University of Missouri School of Law because of a disability, nor shall any qualified individual with a disability be denied access to or participation in Law School services, programs, or activities because of the disability. The School of Law is committed to providing reasonable accommodations for individuals with disabilities, though the School is not required to make accommodations that are unduly burdensome or that fundamentally alter the nature of the program.

Students who have been accepted for admission are advised in their acceptance letter to contact the Associate Dean for Academic Affairs as soon as possible regarding disabilities that might require accommodation. Continuing students who believe they have acquired or developed a disability should also contact the Associate Dean as soon as possible. Early identification of disabilities is necessary to allow adequate time to evaluate documentation and to coordinate accommodations required. The accommodation process takes some time, so the Law School may be unable to grant last-minute requests for accommodation.

Academic Dismissal and Readmission

If a student who is academically dismissed raises a previously undisclosed disability as a basis for academic difficulty, the burden will be on the student to explain why the disability was not previously brought to the attention of the administration, to explain why accommodations were not requested or why those provided were not adequate, and to demonstrate that the disability was the cause of the dismissal.

Readmission requests should be directed to the Associate Dean for Academic Affairs. The Associate Dean will forward the request to the Law School’s Standards & Readmissions Committee which acts on the requests. For further information on the readmission process, please see the Student Handbook.

Bar Examination

Law students with disabilities who believe they will require accommodations in taking the bar examination should inquire early in their legal education as to what will be necessary to obtain accommodations. Information on how to contact bar examiners in all states is available from the Office of Career Services. Many state boards of bar examiners will request that the law school provide information on
accommodations provided during law school upon a written release from
the student.

**Career Services**

The Office of Career Development and Student Services provides
assistance to all students and does not discriminate on the basis of
disability. Students who believe that an employer working through Career
Development and Student Services has discriminated on the basis of
disability should bring their concerns to the attention of the Associate
Dean for Career Development and Student Services.

**Grievances**

If a student who requests accommodations from the School of Law
believes that he/she has been discriminated against on the basis of his/
her disability, the student should bring this matter to the attention of
the Associate Dean for Academic Affairs. The Associate Dean and the
Disability Center will attempt to resolve the matter and will communicate
disability.

Grievances filed with the ADA Coordinator must be in writing and must be
filed within two weeks of the date the Associate Dean communicated the
decision to the student.

**Confidentiality**

Information related to a student’s disability is treated as confidential
information under applicable federal, state and university laws.

**Dismissal**

A dean may at any time, and following such procedures as are
reasonable, dismiss a student from a class or from a school or college for
failure to perform academic duties.

In addition, the director of the Student Health Center (http://
studenthealth.missouri.edu) has the authority to exclude a student from
classes and other University exercises and activities because of exposure
to a communicable or contagious disease, or to require a student to
withdraw from the University at any time if the student has a medical
condition constituting a hazard to themselves, other students or the
campus community.

Adapted from the Faculty Handbook.  (http://faculty.council.missouri.edu/
handbook/article-3)

**Dismissal and Probation (L)**

**A. Rules for Dismissal and Probation**

1. For purposes of this section (Policies & Rules – Dismissal and
Probation)
   a. “First year” consists of that series of semesters or summer
      sessions, or both, at the end of which a student first receives
      grades in courses aggregating not less than 24 hours.
   b. “Semester” means either the fall or spring semester.
      The summer session is considered to be part of the next
      succeeding semester for the purpose of computing semester
grade point averages.

2. A student is dismissed:

 a. at the end of the student’s
    i. first semester if the student’s cumulative grade point
       average is equal to or less than 76.399; or
    ii. second semester if the student’s grade point average for
        that semester is equal to or less than 76.399
    iii. first year if the student’s cumulative grade point average
         is equal to or less than 76.399; or

 b. at the end of any semester after the student’s first year if the
   student’s grade point average for that semester is equal to or
   less than 76.399; or

 c. at the end of any semester during which the student has been
   on probation if the student’s grade point average for that
   semester is equal to or less than 77.499; or

 d. at the end of any semester during which the student has been
   on probation if the student’s grade point average for that
   semester is
      i. not sufficient to raise his or her cumulative grade point
         average to an average greater that 77.499 if continued
         in future semesters until the remaining requirements for
         graduation have been satisfied; or
      ii. is less than the semester or cumulative grade point
          average which was imposed upon the student as a
          condition of probation or readmission;

 e. at the end of any semester prior to the completion of the
   student’s first year if
      i. the student has received grades in at least two sessions
         and
      ii. has received grades in at least 12 hours of coursework;
         and
      iii. has a cumulative grade point average of equal to or less
          than 76.399;

 f. at the end of that semester where the student has a
   cumulative grade point average equal to or less than 77.499
   after completing 89 or more hours of course work.

3. A student is placed or continued on probation:

 a. at the end of the student’s first year if the student’s cumulative
    grade point average is greater than 76.399 but equal to or
    less than 77.499; or

 b. at the end of any semester after the student’s first year, if the
    student’s grade point average for that semester is greater than
    76.399 but equal to or less than 77.499; or

 c. a student who is on probation will be continued on probation
    if the student’s cumulative grade point average is equal to
    or less than 77.499, but the semester grade point average
    is sufficient to raise his or her cumulative grade point
    average to a cumulative grade point average greater than
    77.499 if continued in future semesters until the remaining
    requirements for graduation have been satisfiated.

4. Any first year student who does not achieve a grade point average
   greater than 77.499 in the fall semester will be required to take the
   course in Legal Reasoning during the second semester. Students
   who are required to take the course in Legal Reasoning under
   this provision will drop one of their courses. The course to be
dropped will be decided in consultation with the Associate Dean for
Academic Affairs.
5. A student ceases to be on probation at the end of a semester when the student’s cumulative grade point average and grade point average for that semester are both greater than 77.499.

6. After the first semester of the first year, a student is in “good standing” at the School of Law if the student’s cumulative GPA is greater than 76.399. Thereafter, a student is in good standing when both the student’s current semester and overall GPA are greater than 77.499.

**B. Rights of Students Petitioning for Readmission**

Students who petition the Law School for readmission following academic dismissal have the following rights:

1. Fair notice of the time and place of the meeting.
2. To submit any supporting written material to the Faculty Readmissions Committee and/or to the Faculty at large in advance of the meeting, or to present such material at the meeting.
3. To appear personally at the meeting and make a presentation of reasonable duration.
4. To be accompanied by a person of their own choosing.
5. To be informed promptly following the meeting of the Committee’s recommendation or decision, or the Faculty’s decision.

**C. Readmission Procedures**

1. Readmission Procedures for students dismissed at the end of the first semester under Rule 2.a.1
   
a. A student dismissed at the end of the student’s first semester whose grade point average for the first semester is equal to or less than 75.299 will not be permitted to attend law school for the succeeding spring semester. Such student will be permitted to enroll for the next fall semester provided the student gives notice of his or her intention to enroll by April 15 of the semester following the student’s dismissal. A student so re-enrolling will retake all the first year courses, and will be required to obtain a grade point average greater than 77.499 for the repeated semester. If the student fails to obtain this grade point average, the student will be dismissed. At its discretion, the Faculty Readmissions Committee may require readmitted students or students on probation to drop one or more of their courses.

b. A student dismissed at the end of the student’s first semester whose grade point average is greater than 75.299 and equal to or less than 76.399 may apply for readmission for the spring semester. Such student may not attend classes unless he or she has filed a written petition for readmission within the time limits indicated in the letter of dismissal issued by the School of Law. To qualify for readmission, an applicant for readmission must show: (1) that the applicant’s poor academic performance was the result of facts other than intellectual inability to perform satisfactory law school work; (2) that these factors will not continue to impair the applicant’s performance in the future; and (3) that there is reasonable probability that the applicant’s grade point average can be raised to the graduation level by the time 89 credits have been accumulated.

c. A petition for readmission by a student who has been dismissed shall be heard by the Faculty Readmissions Committee. A quorum of the Faculty Readmissions Committee, for purposes of deciding petitions for readmission, shall consist of one less than all voting members. If the Committee’s decision is unfavorable against readmission, or if the Committee’s decision is favorable for readmission but not unanimous, the petition shall be referred to the Faculty at large. If the Committee’s decision is unfavorable against readmission, but not unanimous, the petition shall be referred to the faculty at large for decision.

d. A student who petitions for readmission has the right to appear personally before the Faculty Readmissions Committee and, if allowed under these rules, the Faculty at large. The student may be summoned to appear before either group by making a personal appearance or by supplying answers to written questions. (See above for a full statement of rights of petitioners.)

e. A student who has been dismissed for scholastic reasons and whose readmission is approved will be on probation and subject to such conditions as may be imposed. The conditions below will apply unless varied by the Faculty or Faculty Readmissions Committee.

f. It is the policy of the Faculty Readmissions Committee to make decisions on readmission prior to the end of the summer term for those students who are dismissed at the end of the spring semester and who may be enrolled in the summer term. Therefore, the readmission decision will not be delayed until summer grades are received.

**D. Standard Conditions for Law Students Readmitted after Scholastic Dismissal, and for Law Students on Probation**

Students who are readmitted or are on probation are subject to the following conditions as well as any specific conditions stated in the readmission action:

a. They will continue on academic probation until achieving academic good standing, which requires a cumulative grade point average greater than 77.499.

b. Students placed on probation at the end of the Fall semester of their first year, will be required to take the course in Legal Reasoning (5090) (http://www.law.missouri.edu/academics/curriculum.html#5090) during the second semester. At its discretion,
the Faculty Readmissions Committee may require such students to drop one or more of their courses.

c. until such time as they achieve a cumulative grade point average greater than 77.499, they must maintain a semester grade point average as set out in the readmission action. If no semester grade point average was specified, the student must maintain a semester grade point average sufficient to raise the student’s grade point average to a cumulative grade point average greater than 77.499 by the time the other requirements for graduation are completed.

d. their schedule of courses must be approved by the Associate Dean for Academic Affairs, and the dropping of any course during the semester must also be approved by the Associate Dean for Academic Affairs. In general, students will be required to take required courses before electives and take graded courses rather than pass-fail courses.

e. during any session in which they are enrolled, they will not engage in any employment for compensation or spend a substantial amount of time on extra-curricular activities without the prior written approval of the Associate Dean for Academic Affairs. “Substantial amount of time on extra-curricular activities” is interpreted by the Standards and Readmissions committee to include participation in any internal or external competition sponsored by the Board of Advocates as well as any position of leadership on any student board or organization.

f. Unless exempted by the Faculty Readmissions Committee, they are not allowed to take the following courses:

* Externship
* Independent Research
* Courses taught outside Law School for Law School credit (e.g. graduate courses)
* Courses taught by adjuncts
* Seminars, except students classified as third-year students
* Participation in any Study-Abroad Programs
* Clinics or clinic-related courses including Criminal Prosecution Clinic, Clinical Skills, Entrepreneurship Clinic, Family Violence Clinic, Innocence Project, Legislative Practicum, Landlord/Tenant Practicum, Veterans Clinic

PLEASE NOTE that the Committee cannot exempt students from prohibitions regarding courses that are imposed by external sources such as Supreme Court rule or ABA accreditation requirements.

### Drug and Alcohol Policy

**Drug Free Schools & Community Act**

Pursuant to the Drug-Free Schools and Communities Act Amendments of 1989, the University of Missouri is required to establish a drug and alcohol prevention program for its students and employees. Following is a description of the University of Missouri-Columbia’s program. A biennial review of this program will be done to determine its effectiveness, to implement changes to the program if they are needed and to ensure that the University’s disciplinary sanctions are consistently enforced.

A reference listing of MU resources for alcohol and other drug educational prevention efforts, counseling, and referral are listed below. Please feel free to contact any of the offices listed for more information.

#### Standards of conduct

University of Missouri-Columbia regulations prohibit the unlawful possession, use, distribution, and sale of alcohol and illicit drugs by University students and their guests and for employees on University-owned or controlled property and at University-sponsored or supervised activities.

#### University Discipline

Violation of these University regulations can result in disciplinary action up to and including expulsion for students and discharge for employees.

#### Legal sanctions

Local, state and federal laws also prohibit the unlawful possession, use, distribution, and sale of alcohol and illicit drugs. Criminal penalties for violation of such laws range from fines up to $20,000 to imprisonment for terms up to and including life.

#### Health risks

Specific serious health risks are associated with the use of alcohol and illicit drugs. Some of the major risks are listed below. For more information contact the Wellness Resource Center in G202 MU student Center or at www.wellness.missouri.edu.

**Alcohol and Other Depressants (barbiturates, sedatives, and tranquilizers)**

Addiction; accidents as a result of impaired ability and judgment; overdose when used with other depressants; damage to a developing fetus; heart and liver damage.

**Marijuana**

Impair short-term memory, thinking, and physical coordinations. Can cause panic reaction and increase the risk of lung cancer and emphysema. Can interfere with judgment, attention span concentration, and overall intellectual performance. Impairs driving ability. May cause psychological dependence and compromise the immune system.

**Cocaine**

Addiction, cardiovascular system damage including heart attack, brain damage, seizures, lung damage, severe depression, paranoia, psychosis. Similar risks are associated with other stimulants, such as speed and uppers.

**Nicotine**

Tobacco smoke contains thousands of chemical compounds, many of which are known to cause cancer. Nicotine, which is a central nervous system stimulant, produces and increase in heart and respiration rates, blood pressure, adrenaline production and metabolism. People can rapidly become physically and psychologically dependent on tobacco. Compromises the immune system.

**Inhalants**

Inhalants are a diverse group of chemicals that easily evaporate and can cause intoxication when their vapors are inhaled. Most inhalants are central nervous system depressants. Use of these drugs slows down many body functions. High doses can cause severe breathing failure and
sudden death. Chronic abuse of some of these chemicals can lead to irreversible liver damage and other health problems.

Resources

Wellness Resource Center - (Campus Alcohol and Drug Abuse Prevention Office)

Alcohol and other drug abuse prevention programs, speakers, peer educators, and referral services and research. Provides educational brochures and other printed materials and houses a large resource library of books, brochures, videos and other materials on a variety of wellness issues including alcohol and other drugs of wellness. Provides BASICS (Brief Alcohol Screening Intervention for College Students) workshops and individual assessments for students caught in violation of alcohol or drug policies or individual sessions for students who would like their alcohol or drug use evaluated.

- MUSWA (MU Student Wellness Advocates): ADAPT (Alcohol and Drug Abuse Prevention Team)/PAWS (Peers Advocating Wellness solutions) and PASS (Peers Advocating Smoke-free Solutions)
- Sober In College (SIC): SIC is for students in recovery and students who want to live a sober lifestyle. Sponsors 12 step meetings.
- GAMMA (Greens Advocating the Mature Management of Alcohol) is composed of Greek students who are interested in issues related to responsible alcohol use.
- Active Minds: Students working to de-stigmatize mental health issues and increase help seeking skills.

Counseling Center (http://counseling.missouri.edu)
573-882-6601
This center provides individual counseling, and group counseling.

Student Health Center (http://studenthealth.missouri.edu)
573-882-7481
This center offers medical services and individual consultation.

University Police crime prevention unit (http://www.mupolice.com/cp)
573-884-7809
This unit provides alcohol- and drug-awareness presentations as well as printed and video resources.

Dual Enrollment

Dual Enrollment for Senior Undergraduates

Beginning Fall 2012, qualified undergraduate students will be eligible to enroll in up to 12 hours of graduate credit during the last 30 hours of their undergraduate program. The eligibility requirements are listed below.

Eligibility Requirement

With the approval of the undergraduate advisor, the undergraduate divisional dean, the Director of Graduate Studies, and the Graduate Dean, eligible seniors may dually enroll as an undergraduate for up to 12 semester hours of graduate credit. To qualify, seniors must:

1. Rank in the upper half of their class.
2. Have a B average in the most recent 45 semester hours of credit.
3. Be within 30 hours of completing graduation requirements for the first bachelor's degree.

Note: Graduate degree programs may establish their own policies with regard to enrollment in and the applicability of senior dual enrollment credits.

Dual enrollment forms (http://gradschool.missouri.edu/forms-downloads/repository/dual-enrollment.pdf) (PDF) must be completed and approved by the Graduate School prior to registering for the graduate level courses.

This program also is available to seniors in other Missouri colleges. Additional information may be obtained from the Graduate School.

Undergraduate/Law Enrollment (90-Credit Program)

With prior written approval, select undergraduate MU Arts and Science students may have up to 30 credits in courses from the School of Law, which are acceptable to the faculty of the College of Arts and Science, applied toward a Bachelor of Arts degree. This combined curriculum enables students to obtain both the Bachelor of Arts (BA) and the Juris Doctor (JD) degrees in six years.

Other university divisions, and some colleges and universities other than MU, accept the Juris Doctorate in lieu of the fourth year of college and award a baccalaureate degree upon graduation from MU’s Law School. Students interested in this program should check with the dean of their college early in their undergraduate careers to ensure compliance with all requirements.

The undergraduate degree is a requirement for the Juris Doctor degree. Students entering law school under this combined degree program must make arrangements with their undergraduate schools to complete all requirements for their undergraduate degree.

Students with Bright Flight or MU awarded scholarships, such as Curators, Excellence, and Diversity, may use these awards in the law school. Check with the Office of Financial Aid.

Please note: While not a problem in the state of Missouri, prior to participating in the 90-credit program, students should determine whether participation would adversely affect admission to the bar in the jurisdiction in which they expect to practice. Some states will not admit to their bar persons with fewer than 14 semesters of university work or who did not have their bachelor’s degree before entering law school.

Enrollment Requirements (G)

Enrollment Requirements for Master’s and Educational Specialist Degree Candidates

After completing courses, students expecting to take examinations, present a thesis, manuscript, project, or portfolio must be enrolled when that activity occurs. If a master’s and educational specialist candidate only needs to take exams or defend a thesis or project, the candidate can enroll for “Graduate Examination” hours in myZou. Registration in the “Graduate Examination” does not count toward enrollment certification. Students enrolled in the “Graduate Examination” would not be considered full-time or part-time. If students need to use the library or computers on campus, they should enroll in at least one hour of regular credit hour instead of “Graduate Examination”.

Additional information may be obtained from the Graduate School.
Enrollment Requirements for Doctoral Candidates

Candidacy for a doctoral degree is established by passing the comprehensive examination. Status as a continuous enrollment doctoral student begins the term after the term in which the comprehensive exam was successfully completed. The continuous enrollment requirement is met by enrolling in 2 hours each spring and fall semester and 1 hour each summer semester.

Important Note on Graduate Examination Registration and Financial Aid

Students with financial aid should check with the Student Financial Aid office before registering for the Graduate Examination option. Failure to do so could cause serious consequences for the student's financial aid status.

Important Note for International Students regarding Graduate Examination Registration and Your Visa Status

International students must check with the International Center before registering for the Graduate Examination option. Failure to do so could cause serious consequences for the student's visa status.

Examinations (U)

Evening examinations

If a conflict arises between a group evening examination and a regularly scheduled class, the regularly scheduled class has priority. The instructor giving the group evening examination is responsible for scheduling a makeup examination at a mutually convenient time for both the student and the instructor.

Classes, Exams and Finals

For the schedule of evening exams and finals week schedule, refer to the Class, Exams and Finals (http://registrar.missouri.edu/academic-calendar) on the University Registrar’s website.

Credits by Examination

Examinations (L)

Policies Related to Final Examinations

1. The examination schedule is specified by the Associate Dean of Academic Affairs.
2. All students should arrive and be settled in the examination room 15 minutes prior to the scheduled beginning of the examination.
3. Arrivals after the examination begins should report immediately to Room 203, Hulston Hall.
4. The “Instructions” page of any examination is reserved for all special instructions for the examination. This includes:
   a. the length of the examination
   b. any special instructions for collaboration or material to be used during the examination
   c. any special instructions for turning in the examination or parts thereof
   d. any other general instructions not a substantive part of the exam itself
5. Each student will have a different number on each examination. A three-part, perforated slip printed with a number on each of the three parts will be distributed to each student at the time of the examination. The student will complete each portion of the exam number slip and tear off the bottom part for his/her records. (If more than one bluebook is used for any one examination, the student will carefully number the extra book(s) with the assigned number.)
   a. notify students to complete the exam slip on the front of the bluebook
   b. check the exam slips against the class roster at the conclusion of the exam (any portion of the exam slip that contains the student’s name is removed by the law school staff before the exam is given to a faculty member)
   c. collect all copies of the examination itself - all copies of the exam must be turned in with the exam answer
8. Examinations are scheduled in rooms that accommodate the taking of that examination. A list of the examination rooms is posted in various places in the law school prior to the last day of classes. This list specifies the place at which examinations will be picked up and which examination rooms are typing rooms.
9. Examinations are distributed in the rooms scheduled and in no other rooms.
10. Students may work on their examinations in assigned rooms only and in designated computer rooms. It is the responsibility of the student to return the completed examination to the place where it is to be picked up, at or before the time scheduled for the end of the examination.
11. A student who chooses to leave a designated examination room is responsible for returning their examination to the designated place at or prior to the end of the examination period.
12. Earplugs are permitted in any exam room.
13. The items below are NOT permitted in any examination room, unless SPECIFICALLY authorized by the “Instructions” at the beginning of the written examination, or specifically permitted pursuant to the law school policy relative to exams on computer. These items should not be brought into the exam room. If they are, they MUST be turned into the proctor PRIOR TO THE START OF THE EXAMINATION. The proctor will keep these items until the examination has concluded:
   a. any special instructions for collaboration or material to be used during the examination
   b. any special instructions for turning in the examination or parts thereof
   c. any other general instructions not a substantive part of the exam itself
   d. any other general instructions not a substantive part of the exam itself
a. cellular or other telephones
d. any device that allows for the recording of data, or the playing of recorded data, including, but not limited to iPods, MP3 players, CD players, DVD players, cassette players or recorders
e. The devices above should not be brought into the examination room. The person administering the exam in each room will, however, have a box to collect any such device while the exam is being taken.

14. Smoking is NEVER permitted in any examination room.
15. Examinations are distributed by the proctor unless the professor elects to do so. Upon receipt of an examination, each student places their initials beside their names on the class roll. The proctor writes the time the examination begins and ends on the blackboard.

16. Students in the authorized examination rooms are given a ten-minute warning prior to the end of the examination period. The warning is given by the proctor unless the instructor elects to do so. Once the ten-minute warning is given, no student may leave the examination room. Students shall remain quietly seated.

17. The examination ends at the earliest of the following:
   a. the time written on the blackboard by the proctor or at the conclusion of the time designated on the examination. In some rooms, a law school staff member may say "Stop," but the failure to so indicate does not allow a student to continue to write after the time limit has expired. No writing whatsoever is permitted after the exam ends.
   b. the time a student submits a written examination to the proctor collecting exams and leaves the immediate line of sight of that proctor. Whether such a student has left the immediate line of sight of the proctor is a question left to the discretion of the proctor, it being recognized that as more students turn in exams, the sight line of the proctor will be decreased.
   c. The time a student taking an exam on computer submits their exam and exits from the exam writing software.

18. When the examination period ends, students who have not earlier completed the examination go to the place announced for examination pickup and hand to the proctor the examination, bluebooks and/or answer sheet and all scratch paper, used and unused. The material is checked at that time to be sure exam numbers are on each examination, bluebook and/or answer sheet and then placed in receptacles provided for that purpose. Students should not walk away until the proctor has confirmed they have all materials.

19. At the conclusion of each examination, each student again places their initials by their name on the class roll. The proctor checks to be sure all examinations and materials that should be returned are returned.

Externships (V)

Students from other colleges of veterinary medicine desiring an externship or participation in one or more instructional periods of the segmented curriculum must be accepted by the section/department involved. The University of Missouri will not provide insurance coverage for any externship.

Students from colleges with animal health technician training programs desiring an internship in the Veterinary Medical Teaching Hospital will be considered upon proper application through the director of that program. They must be enrolled in and paying fees at their college, be evaluated by their director in consultation with the involved departmental unit during the externship period while allowing full utilization of their expertise in the Teaching Hospital operation. http://www.vms.missouri.edu/vet_tech_int_prog.html (CVM Executive Committee, 1986)

Final Examination Week (V)

The College of Veterinary Medicine, University of Missouri-Columbia, does not schedule “final examination week” for those courses included in the professional veterinary curriculum. Instead, classes will be scheduled through the last day of any regular session (term). Final grades will be submitted to the Dean’s Office so they can be filed with the Office of Academic Affairs as specified in the faculty handbook, i.e., “within 2 days, except Sunday, after the end of the examination period”. The “end of the examination period” will be interpreted as the time and date when the “semester (or session) closes”. (General Faculty meeting minutes, 10-9-73). Changes in examinations can be scheduled as outlined in the Student Handbook.

Full-time/Part-time Status

Undergraduate students who register for fewer than 12 hours and graduate students who register for fewer than nine hours during the fall or spring semesters will be considered as enrolled part time. Undergraduate students may not enroll in a program part time without the express permission of the academic advising unit of the school or college in which the student is, or plans to be, enrolled.

• A full-time undergraduate student is enrolled in at least 12 semester hours during the fall and spring semesters, or an equivalent number of hours during the summer session.
• A three-quarters-time undergraduate student is enrolled in at least nine semester hours during the fall and spring semesters, or an equivalent number of hours during the summer session.
• A half-time undergraduate student is enrolled in at least six semester hours during the fall and spring semesters, or an equivalent number of hours during the summer session.

Full-time enrollment for graduate and professional students:

• Graduate student — nine hours
• Law student — 12 hours
• Medical student — 14 hours
• Veterinary medicine student — 12 hours

Grades

GPA of Record

The grade point average for any period is obtained by dividing the quality points earned by the total number of credits for which the student was enrolled during that period. Grades of S, U, H, W, NR, or I are not included in determining the grade point average.
The undergraduate CUM GPA is the University of Missouri GPA, which will include all grades, credits, and honor points attempted at any University of Missouri campus, including all grades and credits. In computing the undergraduate GPA the grade points assigned to students’ transfer work are the grade points that would have been assigned if the courses had been taken on the University of Missouri System campus, including any adjustments made under policies related to course repeats and/or Academic Renewal/Forgiveness.

**GPA Calculator Web Site**

To calculate a grade point average, go to the GPA Calculator Web Site at http://registrar.missouri.edu/grades-calculators/gpa-calculator.php

**Plus-Minus Grading System**

The purpose of the grading system is to provide a framework in which the faculty can report evaluation of student performance and achievement. For undergraduates, all teachers are expected to use the grading scale approved by the faculty. This precludes any department or unit from opting to use a modification of the scale.

The A through F grading system is appropriate for those subjects and situations that allow discrimination in quality of achievement and performance. The S/U grading system is more appropriate for students wishing to take elective courses in a subject matter field in which they will be competing with majors, for mastery learning situations, and for courses graded primarily on the basis of attendance.

Grades carrying credit are: A+/-, B+/-, C+/-, D+/-, and S. Grades calculated in the grade point average are A+ (4.00), A (4.00), A- (3.7), B+ (3.3), B (3.00), B- (2.7), C+ (2.3), C (2.00), C- (1.7), D+ (1.3), D (1.00), D- (0.7), and F (0). The grades of S, U, NR, and W are not incorporated in the grade point average.

Students must have a cumulative GPA of 2.00 to remain in good academic standing.

All regulations currently applicable on a course-by-course basis and currently tied to a specific letter grade would be interpreted to mean a specific letter grade range. Hence, if a student must achieve a C in one course in order to proceed to another course, under the plus-minus grading system, that student must achieve a grade in the “C range,” which would include the grade of C-.

All regulations currently tied to a specific grade average are interpreted to mean the numerical average currently associated with that specific grade. Hence, the required “C average or better” on all courses is a “2.00 average or better.”

The grade of S (on S/U basis) is defined as equivalent to the letter grade of C- or higher.

**Satisfactory/Unsatisfactory Grading System**

Students may elect to take courses under the S/U (pass/fail) grading system in several MU colleges and schools. Before electing to take a course on a pass/fail basis, the student should evaluate the advantages and disadvantages of the S/U grading system. The S/U grading status is indicated in the appropriate column on the registration or add/drop form. Students may change to or from the S/U status only through the tenth day of classes in a semester.

In general, the teacher of a course does not know which students, if any, are enrolled on the S/U system, and a grade of A+/+, B+/-, C+/-, D+/- or F for each student is reported to the Office of the University Registrar. The Office of the University Registrar staff members ascertain which students are enrolled on the S/U system and assign a grade of U to those reported for grades of D+/- or F, and a grade of S for those reported A+/+, B+/- or C+/-. Grades of S and U are not included in the computing of grade point averages.

Enrollment in courses under the S/U system is subject to the following restrictions by the University faculty:

- Students cannot change from one grading system to the other after the tenth day of classes in the fall or spring semesters, or the equivalent thereof in a shorter session.
- Students cannot elect to enroll in more than one course on an S/U basis in a given semester. This excludes courses taught only with the S/U grading system.
- First-semester freshmen and students on scholastic probation are not eligible to enroll in courses on an S/U system. This excludes courses taught only with the S/U grading system.
- A+, B+/-, and C+/- grades are recorded on the transcript as an S. S grades are not included in the semester or cumulative grade point average on the transcript. Full credit is earned for courses completed with a grade of S.
- D+/- and F grades are recorded on the transcript as a U. U grades are not included in the semester or cumulative grade point average on the transcript and no academic credit is awarded for courses completed with a grade of U.
- Courses completed with a grade of S may be accepted in an area of concentration only with the prior approval of the area advisor.

Courses completed with a grade of S may constitute no more than 20 percent of the total credits for the baccalaureate degree.

- Taking S/U courses may affect eligibility for Latin or other graduation honors for undergraduate students. Contact the academic advising unit for information.
- Some specified courses may not be taken on S/U basis to meet graduation or degree program requirements. Contact the academic advising unit for S/U approval.

**Selecting Grading Options (S/U vs. A through F)**

Students must choose to change their grading option no later than after the expiration of two weeks following the first day of classes in regular session or the equivalent thereof in a shorter session. Students’ academic advising unit must approve and change their grading option in myZou for the change to become official. See the University Registrar’s website at http://registrar.missouri.edu/academic-calendar/ for deadlines for each term.

**How Dropping/Withdrawing from a Class Affects the GPA**

Students may drop a course through the end of the business day of the fifth week or the 25th class day of the semester. It will have no effect on the grade point average. After the 25th class day, the signature of the course instructor and/or dean of the academic unit is required. After the last day to drop, students are withdrawing from a course if they choose to leave the course. Students may withdraw from a course through the end of the business day of the 10th week or 50th class day of the semester. At this point a grade of W for withdraw is recorded if the student was
passing at the time of withdrawal. If the student was failing at the time of withdrawal, the course grade is F. The instructor determines which grade to assign. A W grade does not affect the grade point average, while a grade of F does. The grade generally will not appear until all grades for the course are submitted at the end of the semester.

Grades for Students Who Officially Withdraw from the University

No grade will be assigned to a student who officially drops prior to the 26th day of the fall or spring semester or an equivalent period in a summer session (other non-standard classes are also adjusted accordingly).

Students who officially withdraw from a standard 16-week course on or after the 26th day may be required to obtain the signature of the course instructor on the Course Withdrawal Form, available from the academic advising unit. This will inform the student of the grade (W or F) that will be submitted to the Office of the University Registrar at the end of the semester. A grade of F is assigned if the student is judged to be failing at the time of the withdrawal and will be calculated into the grade point average. Once the course withdrawal form is completed, students should return the form to their academic advising unit to obtain the dean’s signature (stamp of approval) on an add/drop form. The add/drop form is submitted to 125 Jesse Hall for processing.

Dropping or withdrawing from all classes for a term is considered withdrawing from the University. If done after the first day of standard classes the student remains eligible to pre-register for the following term. If a term elapses (other than summer) between enrollments, the student must apply for readmission. NOTE: Refund dates are different for withdrawal dates. (See Withdrawal from the University section on the University Registrar’s website: http://registrar.missouri.edu/policies-procedures/withdrawal-university.php.)

Grade Appeal

Guidelines for grade changes are as follows:

- Students who believe that they have been graded unfairly or incorrectly should see the course instructor.
- If still dissatisfied, the student may appeal to the chair of the department. (If the course has a large number of sections, it may have a course director. If so, the student should see the director before appealing the grade to the department chair.)
- The chair of the department will conduct an investigation. The chair cannot substitute his or her judgment for that of the instructor concerning the quality of the student’s work.
- If the instructor of the course is the department chair, the dean of the school or college will handle grade appeals.
- No one may substitute personal judgment for that of the instructor concerning the quality of the student’s work. However, mathematical or mechanical errors in scoring examinations may be corrected.
- No grade shall be otherwise changed unless there is clear, convincing and unequivocal evidence that it was a direct result of arbitrary and capricious conduct by the instructor.

Incomplete Grades (Grade of I)

Whenever students cannot be assigned a grade at the end of a course in which they have been enrolled because their work is for good reason incomplete, the instructor will postpone the grades, reporting I grades to the University Registrar.

An I grade may be assigned only when:

1. The completed portion of the student’s work in the course is of passing quality AND
2. There is such evidence of hardship as to make it unjust to hold the student to the limits previously fixed for the completion of the work.

Each department of the schools and colleges maintains a record of I grades in courses of that department. (Exemptions are made for research courses and problems courses related to research assignments.) This record, kept in the electronic student information system, will include:

- The name of the student
- The course number, title and credits
- Semester and year of enrollment
- A brief statement of the reason for delaying the grade
- An adequate guide for the removal of the I grade along with a suggested final grade in the event of the departure or extended absence of the instructor from the campus

An undergraduate student who receives an I grade must complete the course requirements either:

1. within one year from the date it was recorded (unless the course is numbered 4950-4959 or 4995), OR
2. before the date of graduation (whichever comes first).

When an incomplete is satisfactorily resolved, the faculty member responsible for the grade change will notify the University Registrar of the revised grade.

Otherwise, the University Registrar will remove the I and record a grade of F in classes graded A-F or a grade of U in classes graded S/U. Any student planning to graduate with an unresolved I grade should be aware that translation to an F could drop the GPA below the requirements for graduation. As with any academic deficiency, the low GPA would delay the student’s graduation until all requirements for graduation are met.

Note:

- A grade of I is not figured into the grade point average.
- Students should not re-enroll in a course for which they have been assigned a grade of I.
- For further information, see the Faculty Handbook, Academic Regulations (http://facultycouncil.missouri.edu/handbook/intro.html).
- Exceptions to unresolved incomplete grades changing to an F are as follows:
  - Courses taken for graduate level credit
  - Courses taken prior to Fall 2003
  - Undergraduate research, honors research or problems courses that are approved for multiple terms of continuous research
- Grades of I and the reason for the delay of grade may also be entered directly into myZou.

Questions may be directed to the Office of the University Registrar, (573) 882-4249.
Unassigned or Erroneous Grades

To correct a grade erroneously reported, proper notification is sent from instructors and their department chairs to the Office of the University Registrar on a form provided for that purpose.

Note: Grade corrections must be processed within one year of the original reporting date.

In situations when there is a failure to record a grade on the official grade sheet, the University Registrar will record a NR (not reported) and send a written notification of this action to the faculty member and relevant department chair. The faculty member is responsible for submitting a corrected entry. After 12 months NR will change to an F.

For graduate and professional students, the NR grade will remain on the transcript until a letter grade is submitted. If a letter grade is not submitted, an NR can remain on the student’s record indefinitely and will not convert to an F.

No student may be re-examined for the purpose of changing a grade after a final grade has been reported to the University Registrar. For further information see the Faculty Handbook, Academic Regulations (http://facultycouncil.missouri.edu/handbook/intro.html). Questions may be directed to the Office of the University Registrar, (573) 882-4249.

Grades & Credits (G)

Grading Scale

Graduate students’ grades in all courses counting toward an advanced degree may be reported as: A +/-, B +/-, and C +/- . Faculty members are not required to use a plus/minus grading scale; that decision should be based on the faculty member’s evaluation of student performance and/or polices of their academic program.

Grade point averages are calculated as: A+ (4.0), A (4.0), A- (3.7), B+ (3.3), B (3.0), B- (2.7), C+ (2.3), C (2.0), and C- (1.7).

The Graduate School considers grades of C+, C and C- as passing grades; however, grades in the C range may not be acceptable for specific programmatic requirements and may result in the student being unable to maintain a 3.0 cumulative average. No D grade may be awarded to a graduate student, and a grade of F means the work has not satisfied the minimum requirements of the course. W denotes withdrawn passing and does not affect a student’s grade point average.

S/U Grading

Graduate students may be graded satisfactory/unsatisfactory (S/U) in graduate-level courses only when those courses are designated as “graded on S/U basis only” in the online Schedule of Courses available through myZou.

Incompletes

An incomplete grade (I) may be recorded when the student’s work is incomplete but otherwise worthy of credit, or when the instructor is unable to assign a grade at the end of the semester. The student must finish this work (Problems and Research courses exempted) within the next calendar year of residence.

If the work is not completed after one calendar year, the request to change an “I” grade will require an accompanying letter of justification from the instructor. Although grades of “I” do not automatically convert to an “F” if not completed, academic programs or the instructor may establish conditions or regulations pertaining to “I” grades that are more stringent.

Unreported Grades: NR

When grades are not reported by the instructor, these “Blank Grades” will be recorded as “NR” (Not Recorded). The NR designation will remain on the student’s transcript until a letter grade is submitted. If a letter grade is not submitted, the NR can remain on the student’s record indefinitely and will not revert to an “F”.

Grade Changes by Faculty

Faculty members may change grades within the policies set by the faculty. Grade Change Forms, available from the faculty member’s academic unit, must be completed, signed and submitted to the Office of the University Registrar - Records Dept., 126 Jesse Hall.

Graduate-Level Credit

No graduate credit is given for courses numbered below 7000. Graduate students taking 7000-level courses that are cross-leveled with 4000-level courses will be given additional course requirements in order to warrant graduate credit received for those courses. Courses at 8000/9000 level are primarily for graduate credit, 8090/9090 research (8990/9990 Research for Engineering students) is reserved for master’s and doctoral degree students working on a thesis or dissertation.

Grade Point Average

A graduate student’s grade point average is based on the student’s entire graduate record at MU. To remain in good standing, a graduate student must maintain a cumulative GPA of 3.0 or better.

GPA and Probation

At the end of each semester, graduate students with a cumulative GPA below 3.0 are placed on probation. If at the end of the following semester the cumulative GPA is 3.0 or better, the probationary status is removed. A student on probation failing to raise the cumulative GPA to 3.0 may, on the recommendation of the department or area program, be allowed a second probationary semester. A student is subject to dismissal upon failure to raise the cumulative GPA to 3.0 by the end of the second probationary semester, or at any time a semester/term or cumulative GPA falls below 2.0. Note: Summer session is not counted as a semester.

GPA and Graduation

To graduate, a student must have an overall GPA of 3.0 in all graduate courses taken at MU and not just those courses listed on a plan of study.

For more information on grading, credit and related policies go to http://gradschool.missouri.edu/academics/progress/grading-credit.php.

Grades & Ranks (L)

Class Rankings

At the end of each semester, students are included in the first year, second year or third year class lists and are given a class rank based on their position in their class list. Classes are ranked by expected date of graduation.
When calculating the class rankings for the first year and second year classes, summer grades are included in the rankings for the following Fall semester.

The graduating class ranking is determined as of the end of the summer semester and includes all students graduating within the academic year (preceding fall and spring semesters and current summer session).

**Rules for Determining Class Levels**

In order to register for courses students are assigned a class level. Those class levels are determined as follows:

1. **First Year Students**: A student who has received 24 hours or less of law school grades;
2. **Second Year Students**: A student who has between 25 and 56 (inclusive) of law school grades;
3. **Third Year Students**: A student who has received more than 56 hours of law school grades;
4. **Law School Grades**: As used herein, "law school grades" means grades counting towards credit at the School of Law. Failing grades do not count as "law school grades;"
5. **Effect of Summer School**: The determination of class level is made ONLY at the conclusion of the fall and spring semesters. A student's class level will NOT therefore change at the end of summer school;
6. **Exceptional Circumstances**: In cases of students in unusual situations, including, for example part-time or unusually heavy or light-load semesters, a determination will be made on the basis of dividing the student's law school career into relatively equal periods for the first, second and third years.

**Computation of Grade Point Average (GPA)**

Grade point averages are based only on law school courses taken at this school and only upon "graded courses." For the purpose of computing grade point averages a "graded course" is one which is graded on the 65-100 scale.

A grade point average is obtained as follows:

1. The "grade points" for a graded course are obtained by multiplying the numerical grade for the course by the credit hours for the course.
2. The "grade point average" is obtained by dividing the total grade points for all graded courses by the total number of hours for all graded courses.

In computing grade point averages, all graded courses are included. When a course is repeated, the grade and hours for both takings are included in computing cumulative grade point averages subject to the following exception:

A student who is required to repeat a course will have his or her cumulative grade point average computed as follows: If the grade on the repeated course is 81 or higher, neither the hours nor the grade for the previous taking of the course will thereafter be used in the computation of the student's cumulative grade point average.

The earlier grade will, however, remain on the transcript.

Grade point averages are computed for each student by semester, year, and cumulatively. The fall semester grade point average includes the courses taken in the fall semester and courses taken in the preceding summer session. The yearly grade point average is based upon courses taken during a student's first, second and third years.

**Course Repeat Policy**

The School of Law’s Standards and Readmissions committee has adopted the following course repeat policy:

1. Students who petition the Standards Committee for readmission may be required to repeat any or all courses previously completed;
2. Students who achieve a grade in a course above the graduating average are not eligible to repeat that course;
3. Students who achieve a passing grade in a course that is below the graduating average are eligible to petition the Standards Committee for permission to repeat the course. The Standards Committee may grant such petition based on exceptional circumstances;
4. Students who fail a non-required course are eligible to petition the Standards Committee for permission to repeat the course. The Standards Committee may grant such petition based on exceptional circumstances.
5. Students who fail a required course are required to repeat that course, unless, in exceptional circumstances, repeating the course is waived.

Note: When a course is repeated only the hours for one taking may be credited toward meeting the graduation requirement of having passed 89 hours, without regard to how the course is treated for computing grade point averages.

**Dean's List**

A student qualifies for inclusion on the Dean's List with a semester average greater than 85.999.

**Good Standing**

After the first semester of the first year, a student is in "good standing" at the School of Law if the student's cumulative GPA is greater than 76.399. Thereafter, a student is in "good standing" at the School of Law when both the student's current semester and overall GPA are greater than 77.499.

**Grades and Grading**

The grades recorded in the School of Law are the official grades and the determination of grade point averages and satisfaction of law school requirements is based on the grades recorded in the School of Law.

Grades are recorded in the School of Law as numerical grades ranging from 65 through 100 or, where authorized, by the letters “S” (Satisfactory) and “U” (Unsatisfactory). The grades of S and of 70 through 100 are passing grades and carry course credit. The grades of U and of 65 through 69 are failing grades and carry no course credit. A 70 is the lowest passing grade and a cumulative grade point average greater than 77.499 is the minimum required for graduation.

With the exception of Independent Research, and any of the activities that satisfy the writing requirement, if grading is to be done other than anonymously, the syllabus shall so state. Professors do not know the names of students until after grades are turned in to the Dean's Office. Professors may not obtain the names of students prior to assigning a class rank order for grades. The rank order may not be changed after the names are known.

**Explanation of the Grading Scale**

(http://law.missouri.edu/students/pdf/gradingscale.pdf) (PDF)
Grades from myZou

Students may obtain their grades from MyZou. In addition to the student’s PawPrint, when checking grades for only one course, students must know the course number.

Student Honors

J.D. Degree Cum Laude

Any student with a graduating grade point average greater than 96.999 is eligible for the designation of Juris Doctor Summa Cum Laude upon graduation.

Any student with a graduating grade point average within the top 7% of the graduating class is eligible for the designation of Juris Doctor Magna Cum Laude.

Any student with a graduating grade point average within the top 12% of the graduating class is eligible for the designation of Juris Doctor Cum Laude.

Order of the Coif

The Order of the Coif is a national law school honor society, founded for the purpose of encouraging legal scholarship and of advancing the ethical standards of the legal profession. It has established chapters in the leading law schools of the country. Its members are selected by the faculty from the top ten percent of the graduating class and rank highest in scholarship and whose achievements as students make them worthy of this distinction. Selections are made after sixth semester grades and rankings have been determined. To be eligible for membership in the Order of Coif students must complete 75% of their law studies in graded courses. Starting in 2014, transfer students will be considered as having completed their first year of law studies in graded courses for purposes of calculating the 75% of coursework in graded courses requirement.

Order of the Barristers

The Order of the Barristers is a national law school honor society founded for the purpose of promoting legal advocacy and of advancing the ethical standards of the legal profession. Members are selected based upon participation and excellence in the advocacy programs of the School of Law.

Graduate Academic Minors (G)

Non-designated minors

Non-designated minors consist of course work constituting a unified plan of study that includes a minimum of nine hours of graduate course work. These minors should be listed on a student’s plan of study; however, they are not listed on a student’s transcript.

Obtaining approval for a minor

Both designated and non-designated minors must be approved by the student’s major advisor, the student’s academic program director of graduate studies, and the Office of Graduate Studies.

In addition, the inclusion and completion of a designated minor must be approved by the director of graduate studies (or academic program chair/program director) of the academic program or interdisciplinary group offering the minor. Designated minors are listed on a student’s transcript.

Graduate Assistants and Fellows (G)

Graduate Assistantships

Graduate assistantships give students opportunities for professional experience, academic training and financial support while pursuing advanced degrees. Specific assignments vary by type of assistantship. Graduate assistantships generally entail 10-20 hours of work per week (.25 to .50 full-time exempt). Students who hold graduate assistantships are discouraged from working more than 20 hours per week for more than one semester during the period of the assistantship.

Fellowships

Fellowships are a type of aid granted to graduate students to help support their education. Some fellowships include a tuition waiver or a payment to the university in lieu of tuition. Most fellowships include a small stipend to cover living expenses. Unlike a loan, a fellowship is a form of gift aid and does not have to be repaid. However, fellowships may be taxable and reportable to the Internal Revenue Service. No service or work requirement is associated with a fellowship.

Assistantship and Fellowship Policies

The complete set of policies regarding graduate assistantships and fellowships may be found on the Graduate School’s website (http://gradschool.missouri.edu/policies/graduate-assistantships-fellows.php).

Graduate Certificates

A graduate certificate is not a graduate degree. Rather, it is a document verifying the successful completion of a specified group of course. Certificates are intended to help students acquire (or enhance) discipline-related knowledge and skills. Upon completion of a designated set of courses and other requirements, the name of the graduate certificate will appear on the student’s official University of Missouri Transcript.

To accommodate a variety of learners’ needs, MU offers two types of graduate certificate programs:

• Stand-alone graduate certificates allow individuals to earn graduate credit hours without having to enroll in a specific degree program. Prospective students have an option to apply for graduate study as a Certificate-Seeking Student only. Degree seeking students may also pursue this type of certificate as complementary to (or independent of) their graduate degree program.

• Degree-dependent graduate certificates are designed for degree-seeking students only. Further, the students must be enrolled in the particular degree program offering the certificate. In other words, this type of certificate is intended for degree seeking students who wish to pursue specialized courses or related, complementary study.

Federal Disclosure Requirements for Stand Alone Graduate Certificates

“Final regulations published in the Federal Register on October 29, 2010, require institutions to report certain information about students who enrolled in Title IV eligible educational programs that lead to gainful employment in a recognized occupation (GE programs). These regulations also provide that institutions must disclose to prospective students certain information about the institution’s GE programs.

Finally, the new regulations require institutions to notify the Department if they wish to add an additional GE Program to its list of Title IV eligible
programs. All of these requirements are effective July 1, 2011. The Secretary published additional regulations related to the program eligibility metrics that will be calculated for gainful employment programs in the Federal Register on June 13, 2011.”

Source: Federal Student Aid, see http://www.ifap.ed.gov/GainfulEmploymentInfo/index.html

At the University of Missouri, the Graduate School's Stand Alone certificates are subject to federal Gainful Employment disclosure requirements. A disclosure form for each Stand Alone certificate may be found in the last section of this catalog and on our web site.

Certificate Admission Information

Stand-Alone Certificate Applicants. All students enrolled in a stand-alone graduate certificate program will be classified as Graduate Certificate-seeking graduate students. As such, to qualify for admission, they must have successfully completed the baccalaureate degree at an accredited college/university. Specific graduate certificate programs may have admission standards that exceed those for post-baccalaureate graduate students. New graduate applicants wishing to pursue a stand-alone certificate only should complete the Graduate School's online application for admission and meet the Graduate Faculty Senate’s minimum admission requirements for all programs.

Degree-Dependent Certificate Applicants

New applicants applying for a degree program should complete the Graduate Studies’ online application for admission for the degree program. Once enrolled at MU, the Application for Graduate Change of Division, Program, Degree Emphasis or Advisor Form (pdf) should be completed to add a graduate certificate.

Financial Aid

Check eligibility on both types of certificates Degree-dependent graduate certificate programs are federal financial-aid-eligible. Students only enrolled in stand-alone graduate certificates are potentially eligible for federal financial aid. Read our disclosure pages to learn more about the costs (tuition & fees); time needed to complete the certificate; and future placement (e.g., degree programs, jobs) of certificate holders. Next, check with MU Student Financial Aid Office to determine eligibility. Students enrolled only in a stand-alone graduate certificates are not eligible for scholarships, fellowships, assistantships, tuition waivers, etc. from the Office of Graduate Studies or University of Missouri.

Stand-Alone Certificate Admission Requirements for Non-Degree Seeking Students

A non degree-seeking student who is admitted into a stand-alone certificate program will be officially classified as “certificate-seeking” graduate student. To be admitted, the student must have successfully completed a baccalaureate degree at an accredited college/university. Specific graduate certificate programs may have admission standards that exceed those for post-baccalaureate graduate students. Transfer credit for stand-alone certificate seekers. A maximum of three graduate credit hours which correspond directly to the MU graduate certificate program course requirements may be used as transfer credit from another university to satisfy the requirements for the certificate program. An original transcript from the other university, verifying graduate credit received for the requested hours of transfer credit, must be submitted to the Graduate School when the Plan of Study form is submitted. Please refer to the certificate program’s site for certificate policy updates.

Credit Hours Necessary for Certificate Completion

Graduate certificates vary in completion requirements, including the minimum credit hours. Please refer to the certificate program’s site for credit hour requirements.

Up to 12 hours of graduate credit earned for graduate certificate may be applied to degree requirements for a graduate degree upon approval of the degree program.

Grievances (L)

The School of Law is a charter member of the Association of American Law Schools. Information on the AALS may be found at their web page http://www.aals.org/.

The School of Law is fully accredited by the American Bar Association. Questions regarding ABA accreditation may be directed to the Office of the Consultant on Legal Education, American Bar Association, 321 N. Clark Street, 21st Floor, Chicago, IL 60654-7597, (312) 988-6738.

Student complaints implicating compliance with the standards imposed by the American Bar Association Section on Legal Education and Administration to the Bar shall be filed in writing with the Associate Dean for Academic Affairs, or if the complaint involves the person serving in that capacity, with the Dean of the Law School. The complaint shall include the date on which the complaint is being filed; the name and address of the complainant; and a description of the complaint. The description of the complaint shall include a description of the accreditation standard which the law school’s action or inaction implicates. The Associate Dean for Academic Affairs (or the Dean of the Law School) will investigate the complaint and respond to the complainant in writing within 30 calendar days from receiving the complaint. The response will indicate whether the Law School has taken any corrective action, or if not, the reasons for not taking any action.

Students who have a grievance not implicating the ABA accreditation standards may file it with the Student Bar Association, which has a Grievance Committee that meets periodically with the Dean or Associate Dean.

Holds

There are several types of holds, which are restrictions that may block registration. Students are notified on myZou if they have a hold. They should go to the office indicated on the individual hold to resolve the hold.

Honors Recognition (V)

Each student graduating from the College of Veterinary Medicine and whose cumulative grade point average (G.P.A.) in the professional curriculum is within the range listed below will be designated, as indicated on the diploma, to graduate with honors:

- G.P.A. 3.9–4.0 summa cum laude
- G.P.A. 3.8–3.89 magna cum laude
- G.P.A. 3.7–3.79 cum laude

(General Faculty meeting minutes, 10-10-74)
Late Registration

A student cannot register in classes offered by any school or college after one week following the first day of classes in a regular semester or the equivalent period of time for other sessions or classes. Class session meeting dates may be found in the class details on myZou (http://myzou.missouri.edu).

A late registration fee equal to the tuition for one undergraduate credit hour will be assessed starting the first day of classes for the regular session for the term.

Exceptions to this rule are enrollments in class sections of graduate exam, internships, problems, research and special readings.

Leave of Absence (G)

Key Terms

Leave of Absence

The student anticipates a need to discontinue enrollment for one or more semesters.

Active Duty Leave or Withdrawal

Students who are members of the US Military (e.g., Reserve or National guard) may be called into active duty by the government. As a result of the assignment, the student may need to request an active duty leave or may decide to withdraw from the University.

Contact Advisor and Director of Graduate Studies

Students considering a leave of absence that will result in a break in enrollment of one or more semesters must first contact their graduate advisor and the academic program’s director of graduate studies to inform them of their intent, the reason requesting leave and the expected duration.

Letters to the Office of Graduate Studies

After approval of the leave at the academic program level, the director of graduate studies and the student will submit letters to the associate vice chancellor for graduate studies. The DGS letter will verify that the academic program has been informed and that a leave of absence has been approved. The letter from the student will provide an explanation for the request as well as the anticipated departure and return date.

Resolving Financial Support Responsibilities

It will be the responsibility of students to resolve all issues pertaining to their support (e.g., research or teaching assistantship, scholarship) with their advisor or other relevant authority before departure. These issues include the date when support will be terminated and whether or under what conditions the student will be reinstated for support upon their return.

Notification for Re-Entry

Before the completion of the Leave of Absence, the student must notify the academic program’s director of graduate studies and the Office of Graduate Studies so that the re-entry process can be initiated.

Contact with the University During Leave

Students on a Leave of Absence may not make significant use of University resources and services or engage in significant consultation with the faculty.

Extension of Degree Time, Continuous Enrollment

Time spent on leave does not automatically extend limits for completion of the graduate degree but can be considered in a request for an extension.

Doctoral students who are required to maintain continuous enrollment may petition for an exception to this policy while they are on an approved Leave of Absence.

International Students

International students in F-1 and J-1 non-immigrant status must also obtain authorization from the International Center before the initiation of a Leave of Absence and before returning to campus to ensure compliance with current SEVIS regulations and visa restrictions.

F-1 and J-1 students approved for a leave of absence may not remain in the United States during the leave period unless authorized by the International Center. For students who must depart the United States, leave periods exceeding five months will necessitate updated student immigration documentation for re-entry.

All international students considering a leave of absence should meet with an international student advisor to determine the appropriate steps to safeguard their immigration status.

Military - Active Duty (Voluntary or Involuntary))

Enrolled students called into active service in the armed forces of the United States prior to the completion of the semester, whether voluntarily or involuntarily, but not including active service for training, shall be eligible for either of the options listed as follows: NOTE: Students must choose either option 1 or 2

Students taking distance / online classes who reside in states other than Missouri where a conflicting law may require other options than listed below will be given the accommodations required by that law when the student provides documentation of the law’s existence and proof of its applicability to him/her. Please note: Students who are enrolled at the University of Missouri and reside in a state outside of Missouri should review the information below related to unique military deployment benefits:

State of Iowa “Code Section 261.9(1)"g” (https://www.iowacollegeaid.gov/content/postsecondary-registration-iowa-code-chapter-261b-additional-requirements/#codes)

Option 1 - Withdrawal from all courses for semester

They may choose to withdraw from all classes. In such cases, a student may request either:

1. That the official transcript indicate the courses from which he or she has withdrawn, the date of withdrawal and the reason for withdrawal. Students choosing this option will have their tuition
and fee charges and their student financial aid eligibility calculated effective with their official withdrawal date.

2. Or the student may request that all courses for that semester be expunged from the student’s academic record. Students taking this option will receive a complete refund of all educational and incidental fees paid by the student for enrollment for that semester. However, students who have received federal, state or institutionally funded financial aid must return all aid disbursed to them for the semester.

NOTE: Students must see their Academic Advising Unit to withdraw and return the form to Office of the University Registrar, 125 Jesse Hall.

Refunds will not be immediately available. Refunds are based on your last method of payment (i.e. credit card, check, etc). Refund checks will be sent to your mailing address unless a forwarding address is left with the University.

Option 2 - Receive Incompletes in all courses for the semester

The student may choose to receive an incomplete in all courses not yet completed for the semester. In that case the following rules apply:

- The student must complete all course work for the semester to the satisfaction of the instructor(s), and the time a student spends on active military duty shall not be counted against time allowed for the completion of an “Incomplete” grade.

- I to F policy: Students called to active military duty will be exempted from the one-year automated changes of I to F grades for the term of deployment and the year prior to deployment. In accordance with State statute, students may complete work upon their return from duty or may choose to maintain the I grade. Therefore, I grades for students called to active military duty will remain listed as “I” until a change of grade is submitted by the faculty member, or indefinitely, if so desired by the student.

- NR to F Policy: Military duty will be exempted from the one-year automated changes of NR to F grades for the term of deployment and the year prior to deployment. In accordance with State statute, students may choose to maintain the NR grade. Therefore, NR grades for students called to active military duty will remain listed as “NR” indefinitely, if so desired by the student.

Upon completion of all course work for the semester, the student may choose either to:

1. Have the grade earned for the course and have the “Incomplete” expunged from his or her official record

OR

2. Have the “Incomplete” grade remain as the final grade with reason for the “Incomplete” noted on his or her official record

NOTE: No refunds will be given for option 2.

Residential life: Residential life will be contacted and informed of your intent to exit the University. Room, board and social fees will be prorated and applied to your University student account based on the effective date of your official check out from the residence hall or other University accommodations.

Financial Aid: The Office of Student Financial Aid will be informed of your student status and your official withdrawal date and may make adjustments according to federal, State of Missouri and institutional guidelines.

Scholarships: Scholarships may or may not be applicable upon the student’s return to the University. For example, Section 41.948.2, RSMo, provides that if a student has been awarded a scholarship to be used to pursue an academic program in any higher education institution in Missouri and he or she is not able to complete the term for which the scholarship was granted, the student shall be awarded that scholarship at any subsequent academic term provided the student returns to the academic program at the same institution at the beginning of the next academic term after the completion of active military service. If a student has any scholarships or other aid or award, he or she should contact the issuer to determine whether it will be applicable on his or her return and whether he or she will need to satisfy any other conditions.

Contact:
Office of the University Registrar
125 Jesse Hall
The University of Missouri - Columbia
Columbia, MO 65211
Office: (573) 882-7881
Fax: (573) 884-4530

The Office of the University Registrar will require the following information:

- A copy of your military orders, as soon as possible
- Forwarding Address
- Name, address and phone number of a contact or your representative
- Your name as it is on MU records
- MU ID number
- Which option student wishes to choose for classes

This information may be brought to 125 Jesse Hall or faxed to (573) 884-4530.

Re-admission of previously enrolled students

Undergraduate students who are returning to MU after an absence of at least one semester must complete a request for re-admission for undergraduate studies (http://admissions.missouri.edu/apply/re-admission) and return it to the Office of Admissions, 230 Jesse Hall, Columbia, MO 65211-1300 or fax to 573-882-7887.

Degree-seeking graduate students who are returning to MU after an absence of at least two semesters must complete a graduate school re-activation form (PDF) (http://gradschool.missouri.edu/forms-downloads/repository/reenroll.pdf) and return it directly to the academic program for approval. Post-baccalaureate (non-degree seeking) graduate students should return the completed form to the Graduate Admissions Office, 210 Jesse Hall, Columbia, MO 65211-1160 or fax it to 573-884-5454.

View Missouri Revised Statutes Chapter 41 (41.948) (http://www.moga.mo.gov/statutes/C000-099/0410000948.HTM). This policy is implemented to assure that students called to active duty prior to the end of a term receive fair and just treatment, both financially and academically.

Contact the Office of the University Registrar-Registration for more information at 573-882-7881.
Name Changes

Policy Related to Changing Names for Students at the University of Missouri

The student must submit one of the legal documents listed below under “Proof of legal change to new name.”

The document submitted must have date of birth, a photograph and a signature. If you have multiple documents that prove your legal name change, please bring copies of the documents along with the name change form (http://registrar.missouri.edu/forms/name-change.pdf) to the Office of the University Registrar (http://registrar.missouri.edu/contact).

Proof of legal change to new name:

1. current, government-issued ID card such as a driver’s license, military ID, passport
2. current, valid Social Security card with new name
3. federally recognized Indian tribe’s enrollment card or a US Bureau of Indian Affairs identification card containing the new name, the signature and photograph of the individual
4. certified copy of a court order or a marriage certificate or a dissolution decree reflecting the new name in full

NOTE: Students may abbreviate their middle name(s) without documentation. Documentation is required if a student is adding or deleting a middle name or changing an initial to a name.

Non-Degree Graduate Study (G)

The Non-Degree Graduate Student Program allows post-baccalaureate students to complete graduate courses without being formally accepted into a degree-granting program. Many students use this enrollment option to explore a discipline, take courses for career advancement, prepare for application to a graduate degree program, or as personal enrichment.

Once enrolled, the non-degree graduate student may take undergraduate- or graduate-level courses but hours earned are not credit toward a graduate degree. However, if the student is later admitted to a graduate-granting program, up to 12 hours of earned graduate credit may be applied toward a graduate degree program, at the discretion of the faculty in the admitting academic program.

Students admitted under the non-degree seeking status have access to MU libraries, museums, laboratories, and recreational and athletic facilities.

Note: To manage course enrollment, some academic programs may limit available courses to non-degree graduate students. Contact the academic program in which you wish to take courses for more information.

Eligibility

Applicants who hold a baccalaureate degree or its equivalent from a U.S. university or a university in which instruction is in the English language may be admitted to MU as non-degree graduate students.

International Student Eligibility

International students residing in the United States who do not satisfy the above requirement and are seeking admission as post-baccalaureate graduate students must provide evidence of proficiency in English. Either a minimum score on the TOEFL or IELTS or a minimum of 24 semester credit hours in which the student maintains a 2.0 GPA (A=4.0) in a degree program in which English was the primary language is required. The minimum required TOEFL score for entrance to the Graduate School is 500 paper-based, 61 internet-based. The Graduate School also accepts a 5.5 Academic IELTS score for admission to the Graduate school. Please consult your academic program of interest to determine if it requires higher TOEFL or IELTS scores for admission.

The University of Missouri will not issue I-20s to international students so that they may enter the United States to become non-degree graduate students.

Tuition and Fees

Non-degree graduate students must pay graduate educational and student activities fees regardless of whether they take graduate or undergraduate courses.

Financial Aid

Non-degree graduate students are not eligible to receive federal financial aid or veteran’s benefits or to hold campus-sponsored assistant ships.

How to Apply for On-Campus Non-Degree Study

• Complete and submit the Graduate School Application (https://app.applyyourself.com/AY ApplicantLogin/fl_AplicantLogin.asp?id=umc-grad). The Graduate School encourages applicants to use the online application. The submission of a hard-copy application (PDF) (http://gradschool.missouri.edu/forms-downloads/repository/gradapp.pdf) will slow the application review process.

• Submit the application fee, (http://gradschool.missouri.edu/admissions/eligibility-process/non-degree-applicants/application-fee.php) which is $55 (US) for domestic applicants and $75 (US) for nonresident international applicants. You can pay the fee online through the Graduate School’s online application.

• Official transcripts or mark sheets must be sent directly from each university or college you have attended to the Graduate Admission Office, 210 Jesse Hall, Columbia, MO 65211. Transcripts/mark sheets for all baccalaureate degrees or their equivalents and any additional degrees must be sent. At this time, the Graduate School only accepts hard copies of transcripts. All transcripts/mark sheets become the property of MU.

• Standardized test scores, such as the GRE, are not required for non-degree graduate applicants. See below for the transfer and use policies for non-degree courses taken at MU.

How to Apply for Online Non-Degree Study

If you are planning to take course work online or at a distance, please contact Mizzou Online (http://online.missouri.edu) about course offerings and registration. The application process is different for online-only students.

Maintaining Good Standing

Non-degree graduate students must maintain a 3.0 GPA. If the cumulative GPA is less than 3.0, the student will be given one automatic probationary semester. If, after one semester of probation, the student’s
cumulative GPA does not reach 3.0, the student may be granted a second probationary semester following a successful written petition made directly to the associate vice chancellor for graduate studies. (Summer sessions are not counted as probationary semesters.) If the student fails to achieve a cumulative GPA of 3.0 following the second probationary semester, the student will be made ineligible to enroll as a non-degree or degree-seeking graduate student. If at any time a student’s term or cumulative GPA falls below 2.0, the student will be ineligible to enroll as a non-degree or degree-seeking graduate student.

Switching Student Status from “Non-Degree” to “Degree-Seeking”

Non-degree graduate students who want to earn a graduate degree (master’s, doctoral or educational specialist) must:

1. Submit official scores, if required by the degree program of interest (http://gradschool.missouri.edu/academics/programs), from an appropriate graduate admission examination (GRE, GMAT, MAT). The scores must be sent directly from the examination service to Graduate Admissions, 210 Jesse Hall, Columbia, MO 65211.
2. Meet Graduate School admission requirements (http://gradschool.missouri.edu/admissions/eligibility-process).
3. Apply directly to the degree program of interest using a Change of Degree form (PDF) (http://gradschool.missouri.edu/forms-downloads/repository/change-degree.pdf).

Posthumous Degree Awarding (G)

Honoring Deceased Graduate Students

The following policies and procedures apply in instances in which a graduate student dies before being awarded a degree.

Student Completed All Degree Requirements

If the student has completed all degree requirements, the college or school’s representative (dean, assistant/associate dean or director) will contact the Office of the Provost and the Associate Vice Chancellor for Graduate Studies to nominate the individual to receive a posthumous degree.

The diploma for the degree that the student was pursuing will be prepared in the same manner as if the student had lived. This diploma may be presented to the family of the deceased in a special ceremony, at Commencement or in whatever manner is deemed appropriate.

Student Did Not Yet Complete Degree Requirements

If the student had not completed degree requirements but was making satisfactory progress at the time of death, a dean’s certificate honoring the student can be provided by the appropriate academic unit(s). These certificates may be designed and presented in a manner that is fitting to the circumstances.

* In some instances, presentation of the degree or certificate to family members may be made at a remembrance ceremony.

Refund of Fees Policy

Exceptions to published tuition and required fees assessment policy and charges

1. The Office of the University Registrar and the vice provost for enrollment management are charged with considering and approving exceptions to published tuition and required fees assessment policy.
2. Any change in assessment can be adjusted or pro-rated only to a rate already established in the published university tuition and required fees schedule.
3. Only tuition required related to a student’s assessment for registration in credit hours are covered by these guidelines. Other required fees such as those for residence halls, the bookstore, etc. need to be directed to departments responsible for assessment of those required fees.
4. Grade assignments and other academic issues are not within the scope of these procedures and should be addressed to the dean of the college or school in which the student is enrolled for further direction.

Initial appeal by a student

1. An appeal and all pertinent written documentation must be submitted in writing within 90 calendar days of notification of assessment, adjustment or refund. In cases of incapacitation, exceptions may be made on a case-by-case basis.

Minimally, each written appeal must be dated and include the student name, address and phone number, student number, signature of the student, statement describing specifically what is being requested and for what term, statement of any extenuating circumstances, and why the request should be honored.

2. All appeals must be submitted to the Office of the University Registrar, 125 Jesse Hall. Appeals must meet one or more of the following criteria to be considered and approved:
   a. Written documentation of an illness, accident, injury or situation that could not be influenced, planned for, or prevented by the student or the institution and which subsequently caused a change in the student’s enrollment, thus changing the assessment. This provision specifically excludes conditions or chronic illnesses that remain static and are known to the student at the time of enrollment.
   b. Written documentation of substantiated circumstances involving deadlines where a student has in good faith relied on information provided by a named University official, or the official’s interpretation of the text of a University document or publication, and was consequently misled or mistaken about its terms.
   c. In individual cases and when it is in the best interest of the student and the institution, the University registrar or his/her designated assistant registrar may grant an exception that is not deemed to be served appropriately by the exception criteria stated elsewhere in this document.

3. Decisions will address only whether an adjustment of charges will be made. Grade assignments and other academic issues are not within the scope of these procedures and should be addressed to the dean of the college or school. Record changes, such as requests to withdraw, drop, add or enroll for courses in a term that
Students called to active military duty

Enrolled students called into active service in the armed forces of the United States prior to the completion of the semester, whether voluntarily or involuntarily, but not including active service training, and unable to complete their course work, shall be eligible for two options. The options are implemented to assure that students called to active duty prior to the end of a term receive fair and just treatment, both financially and academically. Contact the Office of the University Registrar at 573-882-7881 for more detailed information.

Students called to jury duty

Full refunds (100 percent) of required tuition and any applicable required fees for all credit hours from which a student withdraws, when following University procedures announced by the provost.

Residency (L)

The School of Law residency rules satisfy the requirements of the American Bar Association and the Association of American Law Schools. The purpose of the residency requirements is to assure that the study of law will be spread evenly over a minimum period of six semesters or the equivalent.

The rules regarding the size of a student’s course load -- the number of hours a student enrolls in for a given semester -- and residency rules -- are not the same.

The residency requirement means that students may not graduate in less than six semesters or the equivalent. Most students attend law school for six semesters. However, some students plan to graduate after only five semesters by attending summer school. Students who plan to attend summer school for two years and graduate a semester early should visit with the Associate Dean for Academic Affairs concerning their summer course load requirements.

For residency purposes a minimum load of twelve hours is required for a semester. Thus, each student generally needs at least twelve hours each semester to meet residency requirements. For purposes of accelerated graduation, the law school’s residency rules require students to take a minimum of five hours in one summer session and combine it with another summer session of no less than seven hours. Two summer sessions of six hours each serve the same purpose. This approach gives students five semesters of at least twelve hours and two combined summers of twelve hours, which satisfies our residency requirements. If fewer hours are taken in a summer session, they may not be used toward residency for the purpose of accelerated graduation.

However, a student may combine any summer hours with an appropriate number of hours in a regular semester in order to fulfill a twelve hour semester residency requirement if they should fall below twelve hours during a semester for some reason. Students completing more than twelve hours in a semester may not use surplus hours over twelve toward residency in any other session; hence the three surplus hours from a fifteen hour semester cannot be added to a subsequent nine hour semester to give residency for two semesters. On the other hand, a nine hour semester can be combined with a three hour summer session to give residence for one semester.

In cases of extreme hardship the Faculty may make a slight variance in the residency requirements, but cannot go below the standards set by the American Bar Association and the Association of American Law Schools.

Revision of Records

The Committee for Revision of Records reviews petitions from students asking for changes to their academic records. Students should discuss the petition process with their advisor before appealing to the committee to verify that changes are warranted and will benefit the student.
Instructions for completing petition to the committee

Students must:

• Obtain forms from the appropriate school or college advising office and discuss their case with their advisor.

• Complete the forms, being as thorough and specific as possible. You must sign and date the petition(s).

• Leave the petition with the class instructor, who will forward it to the department chairperson. The chairperson will return it to the dean’s office, which will send it to the Office of the University Registrar. Signatures of the instructor, department chairperson and dean must be obtained before the committee will consider the petition.

• Provide specific dates if requesting to backdate a withdrawal from the University. A separate form is required for each class.

• Supply documentation or evidence to support the petition. For example, if a student has a medical justification, please supply the medical certification form. Obtain forms from the academic units.

General guidelines

• The committee cannot change a grade given by an instructor. If a student disagrees with a grade, they must contact their instructor and then follow the appropriate appeals process. An instructor cannot change a letter grade to “W” unless a withdrawal has been approved.

• If the committee approves a requested change and additional charges apply, payment must be made before the transcript changes.

• The committee reviews all complete petitions, and its decisions are based on the information presented. Decisions are communicated in writing to the student. If the petition is approved, a transcript reflecting any changes will be included.

• The committee cannot grant refund appeals. Students must complete a refund appeal form (PDF) (http://registrar.missouri.edu/forms/refund-appeal-form.pdf).

The committee is composed of faculty appointed by the chancellor. Members are anonymous and students are not allowed to communicate directly with them. Forward questions to Victor Price at PriceV@missouri.edu.

Student Conduct (L)

The academic life of students at the MU School of Law is governed by a Code of Honor that has been adopted by the Faculty and the Student Bar Association.

Students should note that they generally will be required to report any Honor Code violation on state bar application forms.

The Honor Code is available at http://www.law.missouri.edu/students/policies/conduct.html.

Incidents involving bias or harassment can be reported through the MU Equity Office. Information is available at http://equity.missouri.edu/bias-reporting/.

Student Employment (L)

No student shall work more than 20 hours per week in a semester where s/he is enrolled as a full-time first year law student (hereinafter “the 1L 20-hour rule”).

The 1L 20-hour rule does not apply to the period between semesters, or the summer (unless the student is enrolled in summer school full-time) or to any break during the semester (e.g., spring or Thanksgiving breaks).

Student Files (V)

The following policy relates to compliance with the Family Educational Rights and Privacy Act Amendment to the Elementary and Secondary Education Act of 1974:

1. Each student requesting permission to examine his/her file will be referred to the Associate Dean for Academic Affairs or his or her designate.

2. Each student must provide proof of:
   a. Current student status at the University of Missouri (or, if during an academic recess, attendance during the past academic session).
   b. Identity. They must provide some identification which allows visual comparison of person’s appearance with a photograph on an item such as a driver’s license or student identification card.

3. If the above conditions are met and permission is granted, a student will be allowed to examine their entire student record. This must be affected only in an office occupied by one of the assistants in the Dean’s Office.

4. Copies of any item in the student’s folder except for transcripts or letters of recommendation and/or evaluation will be provided at cost. In such cases the sum of 25 cents per page must be collected before any copies are provided.

5. A student must not, under any circumstances, be left alone with the folder.

6. A record will be placed in the student’s folder stating the date and time that such examination occurred. It should be initialed and dated by the Associate Dean for Academic Affairs or his or her designate. (CVM Executive Committee, 1986)

Student Level (U)

Students are assigned to a particular class level based upon the number of credits they have completed in accordance with the following limitations:

<table>
<thead>
<tr>
<th>Class</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>0 to 29 credits</td>
</tr>
<tr>
<td>Sophomore</td>
<td>30 to 59 credits</td>
</tr>
<tr>
<td>Junior</td>
<td>60 to 89 credits</td>
</tr>
<tr>
<td>Senior</td>
<td>90 or more credits</td>
</tr>
</tbody>
</table>

For registration purposes, student level will be determined by earned credits plus those credits in progress at MU. Undergraduate students pursuing degree programs at other institutions who enroll at MU as visiting students will generally be considered as freshmen, non-degree students. They are not assigned to a school or college. This applies to students who enroll under agreements with the Mid-Missouri Associated Colleges and Universities as well as those from other colleges and universities.
Testing Out of Courses (V)

For professional courses cross-listed as undergraduate or graduate courses, students may opt out of the course during the professional curriculum if the following conditions are met. The student took the course within three years, received an A or B in a course, and received instructor permission to waive the course.

Veterinary students are charged a flat rate per academic semester and testing out of a course will not result in a prorated tuition rate.

Theses and Dissertations: Submission Deadline, Review and Public Disclosure (G)

Formatting the Thesis

A thesis, when required for a master’s program, must be written on a subject approved by the candidate’s advisory committee. The thesis must be the student’s own work and must demonstrate a capacity for research and independent thought. Refer to the Master’s Degree section for details.

Thesis formatting guidelines may be found at http://gradstudies.missouri.edu/policies/thesis-dissertation/guidelines/. Students must follow the style manual recommended by their academic program. All work must be properly cited and permission to use copyrighted materials must be obtained prior to submission.

Formatting the Dissertation

A dissertation is required for the PhD and EdD degrees and must be written on a subject approved by the candidate’s advisory committee. The dissertation must include the results of original and significant investigation, and it must be the candidate’s own work. Refer to the Doctoral Degree section for details.

Dissertation formatting guidelines may be found at http://gradstudies.missouri.edu/policies/thesis-dissertation/guidelines/. Students must follow the style manual recommended by their academic program. All work must be properly cited and permission to use copyrighted materials must be obtained prior to submission.

About Third-Party Copyright

If your work contains material that has been copyrighted by another party, you may need to seek permission to use the material in your thesis or dissertation. Examples of materials for which you would need to seek copyright permission include but are not limited to: third-party software, images, graphics, large portions of text and maps. If copyright permission is needed, you must submit written approval for the use of the copyrighted material along with your thesis or dissertation.

Substituting for Copyrighted Materials in Theses and Dissertations

The Office of Graduate Studies encourages students to seek permission to use copyrighted material in their theses and dissertations. Your work is published after it is submitted in approved form to the Office of Graduate Studies, and it will be available to audiences who wish to know more about the subject you investigate. The more full and complete the thesis or dissertation, the better the experience for your reader and therefore the better the response to the fruits of your hard work. However, if you are unable or unwilling to obtain copyright permission for some of the materials in your research, you may substitute for the copyrighted material as described below.

Acceptable substitutions include:

- Redrawing or tracing of maps, images, graphics, etc.
- References to URLs, printed documents, or physical locations where the copyrighted material can be found.

A student whose thesis or dissertation has had copyrighted material removed prior to submission must have his or her advisor sign a document reading:

[Student’s name] has removed copyrighted material from the copy of the thesis or dissertation submitted to the Office of Graduate Studies for electronic publication. I certify that:

- I approve the thesis or dissertation in this form;
- The student has presented accurate information as to where the removed, copyrighted material can be found.

Advisor’s name (signature line) Date (date line)

Submission Deadline for a Thesis or Dissertation Following Committee Approval

Each semester the Graduate School establishes semester deadlines for the Report of the Examining Committee (master’s & EdS students), Report Dissertation Defense (doctoral students), and submission of theses, dissertations and supplemental materials. Those deadlines may be found on the Office of Graduate Studies’ page.

http://gradstudies.missouri.edu/about/news-events/events/index.php

After successful defense of the thesis or dissertation, students must comply with their academic program’s and/or the International Center’s enrollment requirements.

Generally, based upon input from the thesis/dissertation committee, a student may make corrections to a thesis/dissertation. The student will prepare the final document and supplemental materials in the required format (http://gradschool.missouri.edu/policies/thesis-dissertation/) and submit everything to the Graduate School by the semester deadline. In the event the student misses the current semester deadline, the student is required to submit the final dissertation or thesis by the end of the following semester after a successful defense. If an extension is needed, the student’s advisor and program’s DGS must submit a request for an extension letter to the associate vice chancellor for graduate studies.

Submission Requirements and Forms

A thesis or dissertation must be presented before the deadline to the Office of Graduate Studies on a high-quality CD. The thesis or dissertation must be contained in a Portable Document Format (PDF) file (http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/technology-ch7.php), with the appropriate margins and formatting. Additional electronic files must be included (http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/supplements-cd-ch4.php) on the CD as PDF documents with the appropriate file name. If all files will not fit on one CD, a DVD or multiple CDs may be used, as long as no single file is split between CDs.
Additional Documents that Accompany the Electronic Submission

Several other documents must be submitted electronically or on CD, including the original signed Approval of the Committee page, paper copies of the Short Academic Abstract and Title Page, fees forms, release forms, and copyright agreement forms. Some forms are required on paper. See http://gradstudies.missouri.edu/academics/thesis-dissertation/diss-thesis-guideline/supplemental-paper-materials/index.php for more information.

Review of Theses and Dissertations by the Graduate School

Before a manuscript can be accepted for publication in scholarly journals, it is examined by editorial board members, for conformance to specific format style guidelines in addition to validity of content. In much the same manner, MU Graduate Studies’ staff, acting as an editorial board, reviews every submitted thesis and dissertation for conformance to University guidelines. Failure to meet the appropriate standards will result in the rejection of your work.

Copies of Theses and Dissertations

The MU library catalogs all thesis and dissertations in the Merlin system. To locate a thesis or dissertation go to the MOSpace repository.

Specific Questions about MU Theses or Dissertations?

Specific questions should be directed to the academic advising staff of the Office of Graduate Studies, 210 Jesse Hall, (573) 882-9575 or 1-800-877-6312.

Thesis and Dissertation Research Must be Open to Public Disclosure

Students are prohibited from using research (data, results, methods or other content) in their theses or dissertations that could restrict subsequent publication or public disclosure of these documents.

Examples of restricted information include classified or proprietary materials. It is important to note that these restrictions do not apply to non-thesis or non-dissertation research that is approved by the student’s advisor and allowed by University of Missouri policies. Questions regarding the applicability of this policy to thesis or dissertation content should be referred to the Office of Graduate Studies.

Transfer Admission from Other AVMA Accredited Schools (V)

Transfer students entering into the professional curriculum from other AVMA accredited veterinary schools: applications will be referred to the Committee on Admissions and Scholarship for recommendation to the Dean. Each case shall be handled on an individual basis. (CVM Executive Committee, 1986)

Transfer Credit and Degree Applicability

- Transfer from a Regionally Accredited Missouri College (p. 780)
- Transfer from a Community College (p. 780)
- Transfer Within the UM Systems (p. 781)
- Military Transfer Credits (p. 781)
- Transfer Students and University General Education Requirements (p. 781)

Credits and Transfers

After students are admitted to the University of Missouri (MU), an admissions evaluator will evaluate whether any college credit earned elsewhere is transferable to MU. Coursework being transferred from schools outside of Missouri may need faculty review, which can delay the evaluation process.

- Advanced Placement (http://admissions.missouri.edu/apply/ap-ib-and-college-credits/advanced-placement-program.php) credit is only awarded based on official score reports sent to MU directly from the College Board, and not based on scores reported on transcripts.
- Dual credit (http://admissions.missouri.edu/apply/ap-ib-and-college-credits/dual-credit.php) must be evaluated by Admissions prior to being awarded.
- All courses transferring from community colleges will transfer as lower-division credit.
- For details on course equivalences for most school in Missouri and for select out-of-state institutions, check MU’s transfer course equivalencies which can be accessed from the myZou log-in page (http://myzou.missouri.edu) and then clicking on Transfer Course Equivalency. Students interested in seeing how transfer courses might apply toward MU degree requirements can go online to transfer.org (https://www.transfer.org/uselect/login.htm) to enter course data, review equivalencies, and produce an unofficial degree audit.
- The Mizzou Connection Program (http://admissions.missouri.edu/apply/transfer/mizzou-connection) is available for students wishing to transfer from Moberly Area Community College of MU.
- Advanced standing credit in a foreign language awarded by previous institutions will not transfer to MU. It can be requested after you have successfully completed a course at MU at or above that level.
- Military veterans may be awarded some credit if the meet certain criteria (http://admissions.missouri.edu/documents/military-credit.pdf).

Generally, coursework completed at a regionally accredited institution and oriented toward a baccalaureate degree will be accepted if each grade is C or better. Generally, the following types of credit are exceptions that are excluded from transferable courses: Technical, vocation or remedial courses; Courses not intended for a baccalaureate degree and/or terminal vocational degree or certificate program; Courses from non-regionally accredited institutions, though there is an appeal process.

Questions should be directed to the MU Office of Admissions (http://admissions.missouri.edu).

Transfer from a Regionally Accredited Missouri College

Students may transfer more than 64 credit hours of lower division courses from either Missouri associate degree-granting or baccalaureate degree-granting institutions. Any additional lower division course credits above 64 credit hours will be accepted in transfer if the credits are applicable to the baccalaureate degree or are prerequisites for an upper division course in the major, in accordance with the Missouri Coordinating Board’s policy.
Transfer from a Community College

Community college courses can only have transferable equivalents at the 1000 or 2000 level. At no time can a community college course be the equivalent of a University of Missouri-Columbia course of 3000 or greater.

If a 2000 level course title from a community college is similar to a 3000 level title on this campus, that course can be an elective in that department at the 2000 level. Individual schools and colleges can waive the requirement for a student to take a course with similar or same title on this campus, however there will be no direct transfer equivalency.

If a college or department wants to accept a course from a community college as an equivalency to a course numbered 3000 or greater, they need to give that course a new number of less than 3000.

Courses from a community college can account for six of the last 36 credits, but only for students who have general education or other 1000-2000 level courses remaining for their degree. (The University is not prohibited from accepting community college credit for juniors and seniors if it is at the 1000-2000 level.)

Students may transfer more than 64 credit hours for lower division courses from either Missouri associate degree-granting or baccalaureate degree-granting institutions. Any additional lower division course credits above 64 credit hours will be accepted in transfer if the credits are applicable to the baccalaureate degree or are prerequisites for an upper division course in the major, in accordance with the Missouri Coordinating Board's Handbook.

For additional information, contact the college or school from which the degree is sought or see Credits and Transfers (http://admissions.missouri.edu/apply/transfer/credits-and-transfers.php) information from the MU Office of Admissions (http://admissions.missouri.edu).

Articulation Agreements

Contact departmental advisors for information on articulation programs and agreements.

Associate of Arts Degree

An Associate of Arts degree (AA) is a two-year program that indicates the completion of a student’s lower-division education. It also is a specific transfer degree for entry, at the junior level, into the general range of baccalaureate degree programs offered by the University.

Students transferring to MU from a regionally-accredited Missouri college or university with an AA degree and a certified 2.0 GPA will be accepted with junior standing. They will also have completed lower-division, general education requirements if the AA degree consisted of at least 60 credits of college-level work. These 60 credits must include completion of an institutionally-approved, general-education program of not fewer than 39 credits.

Students holding the AA degree are admissible to MU, but are not necessarily admissible to specific programs. Some of the specific programs with specialized lower-division requirements are the colleges of Business, Education, Human Environmental Sciences and the schools of Health Professions, Journalism, Nursing and Social Work. The transfer requirements for all academic units may be found in this catalog on the degree specific pages. Students applying with an AA degree from another state will have their courses reviewed for equivalency on an individual basis.

Associate of Science Degree

An Associate of Science degree (AS) is a specialized degree intended for transfer into a specific, preprofessional program. Junior standing is guaranteed to the transfer student only if curricular details have been agreed on by MU and the institution granting the AS. Students who receive a specialized AS degree do not automatically qualify for junior standing in all MU programs. To enroll in some degree programs, students may have to take additional, general-education courses.

Students without Associate Degrees

Students transferring without associate degrees must meet regular MU transfer admission standards.

Transfer within the UM System

Students may transfer among campuses within the University of Missouri System. University of Missouri Policy states that "Any course that leads to an undergraduate degree on any campus of the University of Missouri shall be accepted in transfer toward the same degree on each campus of the University offering said degree." Students transferring within the UM system are still required to satisfy the course and residency requirements of the campus from which they wish to graduate. Grades, including D and F grades, and grade points earned will also transfer and be included in the cumulative UM grade-point-average.

For more information contact the following offices:
University of Missouri - Columbia, Office of Admissions, 800-225-6075, mu4u@missouri.edu
University of Missouri - Kansas City, Registration & Records Office, 816-235-1125, registrar@umkc.edu
Missouri University of Science and Technology, Registrar's Office, 573-341-4181, registrar@mst.edu
University of Missouri - St. Louis, Office of the Registrar, 314-516-5545, registration@umsl.edu

Military Transfer Credits

Military veterans, with at least two years of honorable service are allowed to transfer military course credit. The transcript coursework must have been accredited by the American Council of Education (ACE). Veterans are advised to contact University Admissions regarding specific transfer credit policies. An exception to current transfer credit policies is that military veterans be allowed a maximum of 9 hours credit as general electives. This policy began with military veterans enrolled for the Fall 2010 semester.

Transfer Students and University General Education Requirements

All University, general-education requirements are considered completed for students who transfer to MU with an AA degree from a regionally-accredited Missouri institution. Transfer credits for other students are evaluated on a course-by-course basis. All students must complete University graduation requirements beyond the University general education requirements.

NOTE: Many departments, degrees and majors have more specific requirements for foundation course work in addition to the University, general-education requirement. However, the reverse is not true. Departments or academic units may not have fewer general education requirements than described by the University general education requirements. Careful planning will allow students to simultaneously meet
To the Director of the LL.M. Program and include the following:

J.D. degree program or equivalent. A written request must be submitted.

Work closely related to the student's work in the LL.M. Program and were earned within four (4) years prior to initial enrollment in the LL.M. Program may approve application of credits earned within four (4) years prior to initial enrollment.

Normally, the Director of the LL.M. Program must approve the course in advance of the student's work. In unusual situations, the Director of the LL.M. Program may approve application of credits earned within four (4) years prior to initial enrollment.

With approval of the Director of the LL.M. Program, students may apply to the LL.M. Program for the JD graduation requirements of MU School of Law, on the following conditions:

1. No more than 31 semester credits may be so applied. Grades in courses taken at other law schools are reflected in the transcript. However, those grades do not calculate in the student's grade point average.
2. The law school at which the credits are earned must be, at the time of the student's work there, approved by the American Bar Association.
3. The Associate Dean for Academic Affairs must approve, in advance of the student's work, the particular law school and the course of study the student will pursue there.

**Credit Toward LL.M. Requirements for Non-Law Courses/Transfer Credit**

With approval of the Director of the LL.M. Program, students may apply to the LL.M. Program for the JD graduation requirements up to six (6) graduate credits of university or college courses from outside the MU School of Law. This limit includes independent study courses supervised by faculty in units other than the School of Law. Credit toward the LL.M. degree for a non-law school course will be granted only under the following conditions:

- The course must be a graduate-level course and clearly marked as such on the transfer transcript complete with credit hours and a grade. If taken at the University of Missouri-Columbia, it must be numbered 5000 or above.
- The transfer coursework is from a regionally accredited institution in the U.S. or an overseas institution that is recognized by its country’s Ministry of Education as a graduate degree-granting institution.
- The course must involve at least 14 class-hours per credit (based on 50-minute class-hours).
- The course must be related to the student’s program of study. Students must submit a copy of the course syllabus if possible.
- The semester hours of the non-law school course will be counted in the student's total number for the semester.
- The grade must be B or higher.
- The transfer coursework is not online, extension or correspondence credit.

Normally, the Director of the LL.M. Program must approve the course in advance of the student's work. In unusual situations, the Director of the LL.M. Program may approve application of credits earned within four (4) years prior to initial enrollment in the LL.M. Program if the credits were for work closely related to the student's work in the LL.M. Program and were taken for graduate credit. Credits will not be applied from the student's J.D. degree program or equivalent. A written request must be submitted to the Director of the LL.M. Program and include the following:

(a) Institution, course name, number, and instructor;
(b) Description how the course relates to the student's program of study.

MU requires that 30 of a student's last 36 credits must be MU course work. Mizzou Online Self-Paced courses authored by MU faculty are acceptable as are courses offered for credit through Mizzou Online.

(NOTE: This policy has replaced the requirement for courses to be taken "in residence.")

**Visiting Graduate Student Program (G)**

Effective Fall 2011, the UM Visiting Graduate Student Program replaces the UM Traveling Scholars Program. The UM Visiting Graduate Student Program offers eligible graduate students a streamlined process for applying and registering for graduate courses on other UM campuses. To participate in the UM System Visiting Graduate Student Program, a graduate student must be a degree-seeking graduate student and in good-standing on the home campus and host campus.

To apply for this program, a “UM System Visiting Graduate Student Application” should be completed and submitted to the home campus Graduate office for certification, at least two weeks before the beginning of the semester. The graduate student’s home campus Graduate office will review the form; if approved, the home campus Graduate office will transmit the approved form to the host campus Graduate office. The host campus will notify the student when they are eligible to register for courses.

All course fees are paid to the host campus. Graduate students should contact their home campus Financial Aid office for more information on financial aid.

International (non-U.S. citizen) students should consult the International student office on their home campus to determine eligibility for this program.

Important Points:

- No application fee is required for this program.
- The home campus determines maximum enrollment requirements and the transferability of courses taken at other UM campuses. At MU, all courses taken in UM Visiting Graduate Student Program will be considered “transfer courses” and are subject to MU’s graduate course transfer policies.
- Visiting UM Graduate Students are subject all host campus registration requirements and restrictions.
- To officially transfer courses from the host campus to the home campus, students must order an official transcript from the host campus and comply with the home campus’s transfer policies and processes.

**Withdrawing from a Course**

If a student wishes to drop a course after the last day to drop a course without a grade, the process is referred to as “withdrawing” from a course. To withdraw from a course, students must begin in their academic advising unit. Following the approval from the academic advising unit, the student takes the form for processing to the Office of the University Registrar, 125 Jesse Hall. The process must be completed by the end of the business day of the Monday of the last week of classes.

MU System Visiting Graduate Student Program (G)

Effective Fall 2011, the UM Visiting Graduate Student Program replaces the UM Traveling Scholars Program. The UM Visiting Graduate Student Program offers eligible graduate students a streamlined process for applying and registering for graduate courses on other UM campuses. To participate in the UM System Visiting Graduate Student Program, a graduate student must be a degree-seeking graduate student and in good-standing on the home campus and host campus.

To apply for this program, a “UM System Visiting Graduate Student Application” should be completed and submitted to the home campus Graduate office for certification, at least two weeks before the beginning of the semester. The graduate student’s home campus Graduate office will review the form; if approved, the home campus Graduate office will transmit the approved form to the host campus Graduate office. The host campus will notify the student when they are eligible to register for courses.

All course fees are paid to the host campus. Graduate students should contact their home campus Financial Aid office for more information on financial aid.

International (non-U.S. citizen) students should consult the International student office on their home campus to determine eligibility for this program.

Important Points:

- No application fee is required for this program.
- The home campus determines maximum enrollment requirements and the transferability of courses taken at other UM campuses. At MU, all courses taken in UM Visiting Graduate Student Program will be considered “transfer courses” and are subject to MU’s graduate course transfer policies.
- Visiting UM Graduate Students are subject all host campus registration requirements and restrictions.
- To officially transfer courses from the host campus to the home campus, students must order an official transcript from the host campus and comply with the home campus’s transfer policies and processes.

**Withdrawing from a Course**

If a student wishes to drop a course after the last day to drop a course without a grade, the process is referred to as “withdrawing” from a course. To withdraw from a course, students must begin in their academic advising unit. Following the approval from the academic advising unit, the student takes the form for processing to the Office of the University Registrar, 125 Jesse Hall. The process must be completed by the end of the business day of the Monday of the last week of classes.
or prior to completing the final in a self-paced course. See Academic Policies: Grades (p. 766) for more information on withdrawing from a course.

**NOTE:** Students may not withdraw from all courses or their last course via myZou after the tenth day prior to the start of the semester or term. This must be done in the academic advising unit.

## Withdraw from the University

### From the Term

A student who wishes to withdraw from the Term (University) must process the appropriate Term Withdraw Form (http://registrar.missouri.edu/policies-procedures/withdrawal-university.php) (PDF). Dropping all classes is considered a withdrawal from the Term (University) and must be initiated in the students academic school or college and completed by the end of the business day of the Monday of the last week of classes or prior to completing the final in a self-paced course. Finals are not included as part of the term for this purpose.

Withdrawal forms will normally be dated according to the date the request was first received with the following exception: When health or other critical circumstances constitute the reason for withdrawal, the dean may designate an earlier date to which academic rules will apply.

### Withdraw from the University (L)

Formal withdrawal from MU is arranged through the Graduate School using a Notice of Withdrawal form that is signed by the Director of the LL.M. Program and the Dean of the Graduate School. If the student is making a C or better at withdrawal time, a grade of W is recorded. If the student is doing failing work at withdrawal time, a grade of F is recorded. Students are responsible for notifying their instructors of their intention to withdraw and for determining if their work qualifies for a W grade. Students who leave MU without filing a formal withdrawal are given a grade of F in all courses. If the reason is so urgent that an official withdrawal cannot be obtained, the student should notify the LL.M. Program as soon as possible and officially request to be withdrawn.

### Withdraw from the University (V)

An individual will be withdrawn from the university if they drop prior to the 2nd block of classes held during that semester. If the withdrawal occurs during the first three weeks of the first block of the semester, all courses are "dropped" and will be removed from the transcript. No grades will be assigned. If the withdrawal occurs during the first block but after the first 3 weeks the student will be withdrawn from the courses and grades of W or F will appear on the transcript. A notice of withdrawal form may be used for this purpose and individual classes do not have to be detailed on an Add/Drop form.

If the student completes the first block of courses and then subsequently is either dismissed or chooses to not continue in the remaining enrollment blocks the student will not be withdrawn from the university but instead will be either dropped or withdrawn from individual courses depending on when during the block the student chooses to drop.

**Example 1:**

Student A completes Block 1 and is dismissed from the university. The courses from Block 1 will remain on the transcript with grades but the student will be dropped from all subsequent terms since the student never attended those courses. The courses for the remaining blocks will be removed from her record, i.e. dropped.

**Example 2:**

Student B completes Block 1 and in the 4th week of Block 2 becomes ill and needs to withdraw. The courses from Block 1 will be posted with the grades she earned. The courses from Block 2 will also remain on the transcript with grades of either W or F.

**Example 3:**

Student C does not enroll in any courses for Block 1. During the first week of the 2nd block the student decides to withdraw. The student would be withdrawn from the university and because the withdraw occurred within the first 3 weeks of the first block in which she was enrolled the courses would be dropped and therefore be removed from the transcript.
# Course Numbering System

<table>
<thead>
<tr>
<th>Course</th>
<th>Number</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basic skills courses</td>
<td>0000-0999</td>
<td>Courses that do not count toward degree requirements—primarily used for skill development. May NOT be cross listed or cross level.</td>
</tr>
<tr>
<td>Freshmen-level courses</td>
<td>1000-1999</td>
<td>Entry-level courses that have only skill development courses for course prerequisites. (Test scores, etc. are acceptable prerequisites.) Considered lower-division. Community college courses will be considered equivalent to this level. May NOT be listed as cross level with 5000-8999.</td>
</tr>
<tr>
<td>Sophomore-level courses</td>
<td>2000-2999</td>
<td>Intended primarily for second-year or sophomore students who have the essential prerequisites or background. Considered lower-division. Community College courses will be considered equivalent to this level as well. May NOT be listed as cross level with 5000-8999.</td>
</tr>
<tr>
<td>Junior/Senior-level courses (Upper Division)</td>
<td>3000-3999</td>
<td>Upper-division courses that may NOT be listed as cross level with 5000-8999. Intended primarily for third and fourth-year (juniors and seniors) students who have the essential prerequisites or background. Often restricted to students admitted to junior-level entry degree programs.</td>
</tr>
<tr>
<td>Junior/Senior-level courses (Upper Division)</td>
<td>4000-4999</td>
<td>Upper-division courses that may be listed as cross level with 5000-7999. Intended primarily for juniors and seniors. Note special sub-ranges for capstone, research and departmental honors courses.</td>
</tr>
<tr>
<td>Undergraduate Research courses</td>
<td>4950-4959</td>
<td>Upper-division, undergraduate research courses</td>
</tr>
<tr>
<td>Capstone courses</td>
<td>4970-4990</td>
<td>Courses that are both capstone and departmental honors courses</td>
</tr>
<tr>
<td>Capstone/Honor courses</td>
<td>4991</td>
<td></td>
</tr>
<tr>
<td>Capstone/Reading courses</td>
<td>4992</td>

<td>4993</td>
<td></td>
</tr>
<tr>
<td>Capstone/Research courses</td>
<td>4994</td>
<td></td>
</tr>
<tr>
<td>Extended Research &amp; Departmental Honors</td>
<td>4995</td>
<td>Multiple term duration courses based on research</td>
</tr>
<tr>
<td>Departmental Honors courses</td>
<td>4996-4999</td>
<td>Used only for departmental honors courses. Include Dept. Honors in title or course description. No “H” is listed after the catalog number.</td>
</tr>
<tr>
<td>Professional-level courses</td>
<td>5000-6999</td>
<td>Professional-level courses for Law, Vet. Med and Medicine. Generally, not for undergraduate credit. May be listed as cross-level with 4000-4999 courses.</td>
</tr>
<tr>
<td>Beginning Graduate courses</td>
<td>7000-7999</td>
<td>Graduate-level courses for beginning and mid-level graduate students primarily. Generally not for undergraduate credit, but may be listed as cross-level with 4000-4999 courses.</td>
</tr>
</tbody>
</table>
Mid-level Graduate courses 8000-8999 Graduate-level courses intended primarily for mid-and upper-level graduate students. Not for undergraduate credit. May NOT be listed as cross-level with 4000-4999 courses.

Upper-level Graduate courses 9000-9999 Graduate-level courses intended primarily for upper-level graduate students. Not for undergraduate credit. May NOT be listed as cross-level with 4000-4999 courses.

“H” after a number indicates that it is an Honors course, approved by the Honors College for use toward Honors Certificate or University Honors. Not applicable to courses only designated for departmental honors.

Undergraduate Topics Courses

Final two digits represent the distribution category within the University requirements.

Guidelines for Cross-Listed and Cross-Level Courses

* Approved by Faculty Council February 13, 2003

Per the faculty approved policies, only 4000 and 7000 level courses may be cross-level listed. Courses that are cross-listed should be from different departments, but cover the same content, with matching course descriptions.

Cross-Listed Courses must:

• Be at the same level
• Cover the same content

Cross-Listed Courses may:

• Meet different general education requirements (i.e. social science for one and humanities for another)
• Not have the exact same number, but it is preferred that they do
• Have different additional fees. However, students may need to enroll in a specific course to meet a requirement and may or may not be allowed to substitute the cross-listed course to avoid the fee. There are limits on enrollment and space may not be available in the non-fee course or section.
• Exceptions: Fine art and music “skills” classes such as painting or drawing may have different levels meeting in the same room at the same time, such as 1000, 2000, etc. with the instructor requiring the appropriate additional quality and/or quantity of work for the respective level.

Cross-Level Courses:

• Only 4000 and 7000-level courses may be cross-level listed.
• The 7000-level course must require work appropriate for graduate credit and be approved as such by the Graduate Faculty Senate.
• Exceptions: Fine art and music “skills” classes such as painting or drawing may have different levels meeting in the same room at the same time, such as 1000, 2000, etc. with the instructor requiring the appropriate additional quality and/or quantity of work for the respective level.

Courses that are not cross-level may not meet in the same room at the same time or near each other at the same time so that they attempt to “get around” this rule.
The abbreviations listed below are used in course descriptions. They may be called Curriculum Designators.

</table>
Glossary

Below are definitions of academic terms used throughout the University catalog. Additional terms used at MU can be found in the Mizzou Glossary. (http://glossary.missouri.edu)

Academic Action: Students who do not meet requirements for University academic standing requirements are subject to academic action, such as being placed on probation or being declared ineligible to enroll, which is often called dismissal. NOTE: Academic units may have more restrictive standards. (Also refer to Academic Standing and Satisfactory Progress for additional policy information.)

Academic Plan: A primary field of specialized study also referred to as a degree program or major.

Academic Program: The academic organization to which a student applies, is admitted, and ultimately graduates. These will, in most cases, correspond to schools and colleges.

Academic Progress for Financial Aid: Federal regulations require the University of Missouri to establish, publish, and apply standards of satisfactory academic progress (SAP) for financial aid eligibility. For detailed criteria, please visit Student Financial Aid's website (http://financialaid.missouri.edu/eligibility/satisfactory-academic-progress.php).

Academic Sub-plan: An emphasis area or concentration within a specific academic plan.

Academic Unit: Colleges and schools are approved to offer degree programs or oversee degree or non-degree programs approved by the state Coordinating Board of Higher Education. Because the organization of these units varies across the campus, these entities are referred to as academic units, or AUs for short.

Applied Course: A course that is focused on the personal practice of the subject matter. Applied courses are typically found in music, art, and courses preparing for certain vocations.

Audit: A method of taking a course in which a student receives no grade or credit. Sometimes referred to as Hearer. See Academic Policies: Auditing a Course(Hearer (p. 757)).

Basic Skills Courses: Basic skills courses are considered remedial or preparatory for college level course work that follows. Credit hours for basic skills courses do apply toward minimums required for financial aid and grades earned in these courses show on the transcript and are averaged into the cumulative grade point average. However, credit hours earned in basic skills courses do NOT apply to the minimum number of hours required for a degree.

Capstone Experience: An academic activity that integrates general knowledge with the specialized knowledge each student has developed in the major area and, when appropriate, the related field.

Certificate: A program of study that requires completion of a minimum of 12 credits. It can be part of a degree program, may be completed in addition to a degree program, or may stand-alone. Officially approved Certificates are listed on transcripts.

Commencement: A ceremony in which students are recognized for degree completion. In May and December, each MU school and college holds commencement ceremonies for graduates, during which students walk across the stage and are recognized individually. Ceremonies are not held for summer session graduates; however, these students are invited to participate in May or December commencements.

Consent Required: Courses that require the permission of the instructor, department or division. Also referred to as permission required.

Corequisite: A course or requirement that must be met prior to or concurrent with enrolling in a course. Exceptions may be made with permissions.

Core Requirements: The basic, required courses or standards that students must meet for a given major, degree, minor, emphasis or concentration.

Course Components: A portion or part, (i.e. subset) of a course.

• Lecture/Standard (LST): Faculty delivered instruction to multiple students often in, but not always, a classroom setting. A lecture or standard class is the primary portion of the course that is often delivered face to face, but does not have to be. It may be presented on-line or via other delivery methods. While it is usually presented in a small or large group setting led by a faculty member the course might also be very interactive and include group activities. It may be offered in a traditional lecture format, a seminar format, sections with group interaction, etc.

• Discussion (DIS): A small group that meets to discuss topics introduced in a related lecture to supplement the instruction and allow for discussion.

• Lab (LAB): A class or the “practice” portion of a course in which experimentation, class projects or other exercises or skills conjunction with material presented, are performed.

• Individual Study (IST): One-on-one instruction allowing for greater individualized learning and self direction. Individual study may be directed studies that are based upon an agreed upon topic between instructor and student. Titles may include but are not limited to research, problems and readings.

• Lesson (LES): Typically a musical or other performance art instruction delivered one-on-one or in a small group.

• Studio (STU): Hands-on, interactive, project-oriented instruction that is delivered one-on-one or in a small group. May apply to art, architectural studies, textile and apparel management, broadcast media, film creation, and communication instruction.

• Exam-only (EXM): Graduate student enrollment required to complete the final, comprehensive examination.

• Internship/Externship (IXT): Provides opportunity for students to gain experience in their field outside the classroom. Instruction is hands-on, experimental learning that may require additional research and written assignments. Titles may include, but are not limited to, preceptorships, clinical, practicums.

• Field Study (FLD): Off-campus, hands-on instruction directed by a faculty member with one or more students. Typically part of science and social science, as well as some humanities instruction.

Credit by Exam: Credit earned by passing advanced-standing examinations in a subject-matter field. Examinations can include: departmental exams, CLEP subject-matter exams and International Baccalaureate and Advance Placement exams given by the College
Entrance Examination Board of Princeton, N.J. See Academic Policies: Advanced Standing - Credit By Exam. (p. 756)

Credit: The following applies to MU courses, regardless of mode of delivery. One credit represents approximately three hours of a student’s time each week for one semester. This may mean one hour in lecture or standard classroom instruction, in addition to two hours spent in preparation. According to State of Missouri policy, a credit hour is a permanently transcribed instructional activity in which one semester credit hour shall consist of a minimum of 750 minutes (for example, 15 weeks x 50 minutes per week) of classroom experiences, such as lecture, discussion, or similar instructional approaches, or a minimum of 1,500 minutes of such experiences as laboratory, studio or equivalent experiences. Both of the above are exclusive of registration and final examination time. Greater amounts of supervised practicum or internship instruction are normally required to be the equivalent of one credit. (Also referred to as Units.)

Cross-level Course: A cross-level course is a course offered at both the undergraduate and the graduate level. Undergraduate students enroll in a course numbered in the 4000 range and graduate students enroll in a course numbered in the 7000 range. Lectures and discussions may be held jointly, but different graduate level work will be required of students in the 7000-level courses. (They are also referred to as combined sections.)

Cross-listed Course: A course that is considered the same as, and often may meet with a section of, another course with a different curricular abbreviation and possibly a different course number. (They are also referred to as combined sections.)

Curriculum: An organized program of study arranged to provide integrated cultural or professional education.

Curriculum Designator (Subject Area): A specific area of instruction within an academic organization. These are the subject matter headings that appear in the Course Catalog and the Schedule of Classes.

Dean’s Signature: The dean’s signature is the mark of approval for certain academic actions, such as approvals to withdraw at certain points in the term. Usually a “dean’s signature” refers to a stamped signature from the academic advising office within the academic unit. A dean’s signature may also be the signature of the dean or associate dean of the college or school. When instructions indicate that a student should obtain a dean’s signature for approval of a process, students should first inquire in the academic advising office for their degree program.

Degree: A formal award or title conferred upon an individual for the completion of a program or courses of study.

Degree Audit Report: MU uses a degree audit system called DARS for short, which tracks degree programs. Many academic units and departments use these reports to assist in advising students. Students may look at their own DARS reports using myZou.

Degree Program: A primary field of specialized study also referred to as a major or academic plan.

Discipline: A branch of learning or field of study (e.g., mathematics, history or psychology).

Dual Degree (undergraduate): A student may be granted two baccalaureate degrees if all requirements for both degrees have been met and the student has completed at least 12 semester hours of course work beyond that required for the first degree. See Faculty Handbook (http://facultycouncil.missouri.edu/handbook/article-9.html)

Emphasis Area: A sub-area of specialized study within a major that has been formally approved. Emphasis areas are printed on students’ transcripts.

General Education (University): The MU Faculty has developed a comprehensive program of University general education course work that equips students with the skills, knowledge and foundations in the disciplines required of all informed citizens. All MU students must satisfy University general education requirements as a part of their undergraduate degrees. See General Education Requirements. (p. 20)

GPA of Record: The GPA stands for grade point average. A GPA of record is the official GPA. See Academic Policies: Grades. (p. 766)

Graded Course: A course in which credit is awarded if successfully completed. A course in which a student has enrolled as a “Hearer/Auditor” is not regarded as a graded course for that student.

Grading Basis: The grading system used to assign a grade. See Academic Policies: Grades (p. 766).

Graduation: Graduation is the completion of all degree requirements, as recorded on the official transcript, and the conferring of a diploma.

Honors Course-Departmental: See Academics at MU: Course Numbering section (p. 784). Catalog number is not followed by an “H”.

Honors Course-General: A course limited to honors-eligible students. Course has been approved by Honors college for use towards Honors Certificate or University Honors. Catalog number is followed by an “H”.

Honors Eligibility: See Undergraduate/Graduate: Honors College (p. 732) for more information.

Instructional Mode: The dominant delivery method of instruction of the class content.

• Traditional (TR): No online technology used -- content is delivered in writing or orally. May have a video of the class that is used during the initial delivery and viewed later. Course attributes should indicate this.

• Web Facilitated (WF): Includes face-to-face instruction. Includes those courses in which zero to 29 percent of the content is delivered online. May have a video of the class that is used during the initial delivery and viewed later. Course attributes should indicate this.

• Blended class instruction (BL): Defined as having between 30 percent and 80 percent of the course content delivered online. It is sometimes called hybrid.

• On-line (OL): A course where most or all (80% or greater) of the content is delivered online. Typically these sections have no face-to-face meeting, but there may be some or face-to-face exams, etc.

• E-Learning (EL): A course where 100% of the content is delivered online. (May have proctored exams)

Interdisciplinary: A course of study that combines two or more academic disciplines.

Location: An indication of where a student is taking a course for billing and informational purposes.

Lower Division: Undergraduate courses numbered less than 3000.

Major: A primary field of specialized study also referred to as a degree program or academic plan.

Minor: A secondary field of specialized study that does not lead to a degree. A minor will be noted on the transcript by not on the diploma.
**Mizzou Online**: Mizzou Online partners with academic units to develop, market, and deliver programs and courses designed for distance students.

**Mizzou Online-Self Paced**: Students may enroll in self-paced, online courses year-round, (minimum six weeks, maximum nine months) and complete coursework at their own pace. Students with 60 or more approved credit hours may complete a bachelor of general studies degree online.

**Mizzou Online-Semester Based**: Semester-based courses have specific start and end dates and follow the University semester calendar. Students participate with other students and instructors in the courses and have assignment due dates and deadlines. Enrollment periods are the same as campus sections.

**myZou**: MU's online student information system.

**Option**: A track or other portion of a major that may be required or optional. A separate designation is not made on the transcript or diploma for an option or track.

**Prerequisite**: A course or requirement that must be met prior to enrolling in a course. Exceptions may be made with permissions.

**Readmission**: See Admissions Office (http://admissions.missouri.edu/apply/re-admission) for information on the readmission process and standards.

**Recommended course**: A course that is beneficial or preferred for the student to have taken before enrolling in a subsequent course. It is a strong suggestion, but not a requirement.

**Registration**: The act of enrolling in classes for a given semester or term. At the University of Missouri, registration refers to the process in which students select course work for a term and, reserve spaces (enroll) in the courses in the University’s computer system. This may be done through myZou.

**Repeat for Credit**: Courses that may be taken more than once for credit (e.g., music performance courses.)

**Satisfactory Progress towards degree**: The time progression in meeting the requirements of the student's established educational objective, typically, the completion of a degree program. Satisfactory progress is based on two concepts:

- Minimum number of credits completed expressed as a percentage of total credits attempted
- Maximum time to complete the degree as expressed by a total number of credits attempted

The term may also refer to financial aid requirements. See Financial Aid (http://financialaid.missouri.edu).

**Second Undergraduate Degree**: Some academic units will admit students who have already earned one undergraduate degree to pursue a different degree program. Ordinarily students who enroll for a second degree are expected to meet requirements in place at the time of beginning work of the second degree instead of requirements in place at the beginning of work on the first degree.

**Sequence of Courses**: Two or three closely related courses that must be taken in specified order.

**Session**: A class scheduling/enrollment control time period within an academic term.

**Student Center (myZou)**: The page in myZou where a student can view a synopsis of all their information. (i.e. schedule, service indicators, enrollment dates, financial information.)

**Student Level**: Students are assigned to a particular class level based upon the number of credits they have completed. (i.e. freshmen, sophomore, junior and senior.) See Academic Policies: Student Level (p. 778).

**Track**: An option or other portion of a major that may be required or optional. A separate designation is not made on the transcript or diploma for an option or track.

**Upper Division**: Undergraduate courses numbered 3000-4000.

**Variable Credit (Units)**: For some courses, the student may choose the number of credits.

**Waive**: To waive a requirement is to set it aside without credit. In other words, if a requirement is waived for a student that student does not have to meet the requirement, but no credit hours are earned. For example, an international student pursuing a BA degree in the College or Arts and Science has the foreign language requirement waived but will not receive academic credit for his/her native language.
Course Offerings

A

- Accountancy (ACCTCY) (p. 794)
- Aerospace Studies (AERO) (p. 798)
- Agricultural Economics (AG_EC) (p. 799)
- Agricultural Ed Leadership (AG_ED_LD) (p. 805)
- Agricultural Systems Management (AG_S_M) (p. 808)
- Agriculture, Food and Natural Resources (AFNR) (p. 812)
- Anesthesiology (ANESTH) (p. 814)
- Animal Science (AN_SC) (p. 814)
- Anthropology (ANTHRO) (p. 821)
- Arabic (ARABIC) (p. 833)
- Art-Ceramics (ART_CERM) (p. 849)
- Art-Drawing (ART_DRAW) (p. 849)
- Art-Fibers (ART_FIBR) (p. 851)
- Art-Graphic Design (ART_GRDN) (p. 854)
- Art-Painting (ART_PNT) (p. 855)
- Art-Photography (ART_PHOT) (p. 856)
- Art-Printmaking (ART_PRNT) (p. 857)
- Art-Sculpture (ART_SCUL) (p. 857)
- Astronomy (ASTRON) (p. 858)
- Athletic Training (ATHTRN) (p. 859)
- Atmospheric Science (ATM_SC) (p. 861)

B

- Biochemistry (BIOCHM) (p. 864)
- Biological Engineering (BIOL_EN) (p. 869)
- Biological Sciences (BIO_SC) (p. 875)
- Biomedical Sciences (BIOMED) (p. 885)
- Black Studies (BL_STU) (p. 888)
- Business Administration (BUS_AD) (p. 896)

C

- Chemical Engineering (CH_ENG) (p. 897)
- Chemistry (CHEM) (p. 902)
- Child Health (CH_HTH) (p. 907)
- Chinese (CHINSE) (p. 909)
- Civil Engineering (CV_ENG) (p. 911)
- Classical Humanities (CL_HUM) (p. 924)
- Classics (CLASS) (p. 928)
- Clinical and Diagnostic Sciences (CDS) (p. 930)
- Clinical Laboratory Sciences (CL_L_S) (p. 931)
- Communication (COMMUN) (p. 932)
- Communication Science And Disorders (C_S_D) (p. 938)
- Computer Science (CMP_SC) (p. 943)

D

- Dermatology (DERM) (p. 952)
- Diagnostic Medical Ultrasound (DMU) (p. 953)
- Digital Storytelling (DST) (p. 957)

E

- Economics (ECONOM) (p. 957)
- Education Honors (EDUC_H) (p. 964)
- Educational Leadership and Policy Analysis (ED_LPA) (p. 965)
- Educational, School and Counseling Psychology (ESC_PS) (p. 971)
- Electrical And Computer Engineering (ECE) (p. 983)
- Emergency Medicine (EMR_ME) (p. 996)
- Engineering (ENGINR) (p. 996)
- English (ENGLISH) (p. 998)
- English Language Support Program (ELSP) (p. 1016)
- Environmental Science (ENV_SC) (p. 1016)
- Environmental Studies (ENV_ST) (p. 1019)

F

- Family And Community Medicine (F_C_MD) (p. 1019)
- Film Studies (FILM_S) (p. 1022)
- Finance (FINANC) (p. 1027)
- Fisheries And Wildlife (F_W) (p. 1031)
- Food Science (F_S) (p. 1036)
- Forestry (FOREST) (p. 1041)
- French (FRENCH) (p. 1045)

G

- General Human Environmental Sciences (GN_HES) (p. 1051)
- General Studies (G_STDY) (p. 1051)
- Geography (GEOG) (p. 1051)
- Geology (GEOG) (p. 1059)
- German (GERMAN) (p. 1065)
- Graduate School (GRAD) (p. 1071)
- Greek (GREEK) (p. 1072)

H

- Health Management and Informatics (HMI) (p. 1074)
- Health Professions (HTH_PR) (p. 1077)
- Health Sciences (HLTH_SCI) (p. 1078)
- Hebrew (HEBREW) (p. 1080)
- History (HIST) (p. 1080)
- Honors-General (GN_HON) (p. 1098)
- Hospitality Management (HSP_MGMT) (p. 1101)
- Human Development And Family Studies (H_D_FS) (p. 1105)

I

- Industrial And Manufacturing Systems (IMSE) (p. 1117)
- Information Science And Learning Technologies (IS_LT) (p. 1122)
- Information Technology (INFOTC) (p. 1128)
- Integrative Neuroscience (NEUROSCI) (p. 1129)

Accountancy (ACCTCY)

ACCTCY 2010: Introduction to Accounting
Introduction to accounting for non-business majors. Emphasis on introducing students to business operations, as well as preparing and using management information and financial accounting information for business decisions (does not count as either ACCTCY 2036 or ACCTCY 2037).

Credit Hours: 3

ACCTCY 2026: Accounting I
An introduction to the field of accounting, this course covers the fundamentals of financial accounting. Business students at UMC must have advisor’s approval. Credit may not be earned for both ACCTCY 2026 and ACCTCY 2036. Course only offered through the Mizzou Online (self paced).

Credit Hours: 3
Prerequisites: Sophomore Standing

ACCTCY 2027: Accounting II
This course covers the fundamentals of managerial accounting and additional topics in financial accounting. Business students at UMC must have advisor’s approval. Credit may not be earned for both ACCTCY 2027 and ACCTCY 2037. Course only offered through Mizzou Online (self paced).

Credit Hours: 3
Prerequisites: ACCTCY 2026

ACCTCY 2036: Accounting I
First half of two-part course focusing on the business environment and the use of managerial and financial accounting information for decision making in various business settings. Emphasizes use of accounting information by internal and external users.

Credit Hours: 3
Prerequisites: sophomore standing in Accounting or Business, 3.3 or higher GPA. Honors eligibility required

ACCTCY 2037: Accounting II
Continuation of Accountancy 2036H.

Credit Hours: 3
Prerequisites: C or better ACCTCY 2136H. Honors eligibility required

ACCTCY 2136H: Honors Accounting I
First part of two-part course focusing on the nature and use of managerial and financial accounting information for decision making in various business settings. Emphasizes use of accounting information by internal and external users.

Credit Hours: 3
Prerequisites: Sophomore standing in Accounting or Business, 3.3 or higher GPA. Honors eligibility required

ACCTCY 2137H: Honors Accounting II
Continuation of Accountancy 2136H.

Credit Hours: 3
Prerequisites: ACCTCY 2036 or ACCTCY 2136H or ACCTCY 2026

ACCTCY 2258: Computer-Based Data Systems
Introduces the computer as a tool in the efficient operation of a business. Skills developed in the course include electronic information retrieval, information analysis using a spreadsheet, what-if analysis macro development, and information presentation. In addition, computer components, data storage, networks, and information technology are discussed.

Credit Hours: 3

ACCTCY 3326: Financial Accounting Theory and Practice I
Institutional structure, conceptual framework, and reporting standards and practices of financial accounting, with special emphasis on accounting for assets.

Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027. Restricted to Accountancy Majors

ACCTCY 3328: Accounting Information Systems

Credit Hours: 3
Prerequisites: ACCTCY 2258. Restricted to Accountancy Majors

ACCTCY 3346: Financial Accounting Theory and Practice II
Continuation of Accountancy 3326, with special emphasis on income recognition and accounting for liabilities and ownership equity.

Credit Hours: 3
Prerequisites: ACCTCY 3326. Restricted to Accountancy Majors

ACCTCY 3347: Cost and Managerial Accounting
Activity based and traditional job order and process cost systems for service, merchandising, and multinational manufacturing companies; Cost accounting techniques and procedures for financial reporting by multinational companies. Strategic focus to management accounting measurement and reporting. Standard costs and variances, capital budgeting.

Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027 and ACCTCY 2258. Restricted to Accountancy Majors
ACCTCY 4000: Accountancy Professional Speakers and Symposia
(cross-leveled with ACCTCY 7000). This non-credit course, recommended for all accountancy majors, will provide exposure to issues in the accounting profession through professional speaker series and symposia. Components will include the Dawdy Speaker Series, Orin Ethics Symposium, and Symposia delivered by accounting firms and/or professional accounting organizations.

Credit Hours: 0
Prerequisites: ACCTCY 2036, ACCTCY 2037, and ACCTCY 2258; Accountancy Majors. This will be a non-credit, non-billed, no hours course.

ACCTCY 4301: Topics in Accounting
Independent investigations, reports on approved topics.

Credit Hour: 1-3
Prerequisites: instructor’s consent

ACCTCY 4353: Introduction to Taxation
(cross-leveled with ACCTCY 7353). Introduction to the structure and conceptual foundation of the U.S. federal income tax system for individual taxpayers. Topics include income recognition, deductions, property transactions, trusts, and family wealth planning. This course also introduces students to legal tax research and preparation of individual income tax returns.

Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027. Restricted to accountancy majors only

ACCTCY 4356: Financial Accounting Concepts
(cross-leveled with ACCTCY 7356). Current issues in the financial reporting of business corporations to external parties.

Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027 or ACCTCY 7310. Not open to accountancy majors

ACCTCY 4365: Governmental Accounting and Budgeting
(cross-leveled with ACCTCY 7365). Introduction to government and not-for-profit accounting. Concepts and principles of fund accounting, budgeting, auditing, and financial reporting in government and not-for-profit entities.

Credit Hours: 3
Prerequisites: ACCTCY 3326. Restricted to Accountancy Majors

ACCTCY 4373: Taxation of Business Entities
The course focuses on federal tax laws related to various business entities which include (C Corporations, Partnerships and S Corporations) and their owners. We will follow the life cycle of these business entities and discuss the tax issues involved with the formation, operation, distribution to owners, liquidations, and sales of interest to other owners of each type of business entity. Graded on A-F only. Prerequisites: ACCTCY 4353 or ACCTCY 7353

Credit Hours: 3

ACCTCY 4384: Auditing Theory and Practice I
(cross-leveled with ACCTCY 7384). Introduction to the auditing profession, assurance function, and generally accepted standards for conducting audits.

Credit Hours: 3
Prerequisites: ACCTCY 3328 and ACCTCY 3346. Restricted to Accountancy Majors

ACCTCY 4940: Professional Accounting Internship
(cross-leveled with ACCTCY 7940). Provides full-time professional accounting work experience of at least eight weeks duration. Graded on S/U basis only.

Credit Hour: 3-6
Prerequisites: Completion of first 105 hours of 150-hour accountancy curriculum (or equivalent) and consent of Internship Coordinator

ACCTCY 7000: Accountancy Professional Speakers and Symposia
(cross-leveled with ACCTCY 4000). This non-credit course, recommended for all accountancy majors, will provide exposure to issues in the accounting profession through professional speaker series and symposia. Components will include the Dawdy Speaker Series, Orin Ethics Symposium, and Symposia delivered by accounting firms and/or professional accounting organizations. Graded on S/U basis only.

Credit Hours: 0
Prerequisites: ACCTCY 2036, ACCTCY 2037, and ACCTCY 2258; Accountancy Majors. This will be a non-credit, non-billed, no hours course.

ACCTCY 7310: Accounting for Managers
Introduction to understanding how accounting information is used to help make informed decisions in various business settings. Includes an introduction to basic financial and management accounting concepts and procedures.

Credit Hours: 3
Prerequisites: MBA or MSPA candidate, or departmental consent

ACCTCY 7353: Introduction to Taxation
(cross-leveled with ACCTCY 4353). Introduction to the structure and conceptual foundation of the U.S. federal income tax system for individual taxpayers. Topics include income recognition, deductions, property transactions, trusts, and family wealth planning. This course also introduces students to legal tax research and preparation of individual income tax returns.

Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027. Restricted to accountancy majors only

ACCTCY 7356: Financial Accounting Concepts
(cross-leveled with ACCTCY 4356). Current issues in the financial reporting of business corporations to external parties. Not open to accountancy majors.

Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027 or ACCTCY 7310
ACCTCY 7365: Governmental Accounting and Budgeting
(cross-leveled with ACCTCY 4365). Introduction to government and not-for-profit accounting. Concepts and principles of fund accounting, budgeting, auditing, and financial reporting in government and not-for-profit entities.
Credit Hours: 3
Prerequisites: ACCTCY 3326. Restricted to Accountancy Majors

ACCTCY 7384: Auditing Theory and Practice I
(cross-leveled with ACCTCY 4384). Introduction to the auditing profession, assurance function, and generally accepted standards for conducting audits.
Credit Hours: 3
Prerequisites: ACCTCY 3328 and ACCTCY 3346. Restricted to Accountancy Majors

ACCTCY 7940: Professional Accounting Internship
(cross-leveled with ACCTCY 4940). Provides full-time professional accounting work experience of at least eight weeks duration. Graded on S/U basis only.
Credit Hour: 3-6
Prerequisites: Completion of undergraduate portion of 150 hour program (or equivalent) and consent of Internship Coordinator

ACCTCY 8358: Systems Analysis and Design
Modern information systems analysis and design, focusing on business process modeling.
Credit Hours: 3
Prerequisites: ACCTCY 2258
Recommended: CMP_SC 1001 or CMP_SC 1050

ACCTCY 8363: Multi-Jurisdictional Tax
This course takes a practical approach to exploring multistate and international tax concepts by focusing on tax issues that can arise as a company expands from a single business location into a multinational corporation. Part 1 of this course focuses on the economic, political, and constitutional constraints imposed on state and local taxation, including the due process clause, the commerce clause and state uniformity and equality clauses. Part 2 of the course includes a survey of state and local taxes, with a particular emphasis on the imposition of sales and use taxes and the allocation and apportionment of state income taxes. Part 3 of the course surveys principals of international taxation, including U.S. taxation of the foreign investments or activities of U.S. taxpayers (outbound) and U.S. taxation of the U.S. activity or investments of foreign taxpayers (inbound).
Credit Hours: 3
Prerequisites: ACCTCY 4353

ACCTCY 8373: Taxation of Corporations and Shareholders
Life cycle of a corporation including formations, operations, distributions, and liquidations of corporations.
Credit Hours: 3
Prerequisites: ACCTCY 4353 or ACCTCY 7353

ACCTCY 8383: Taxation of Flow-Through Entities
This course covers formations, operations, distributions, and liquidations of partnerships and S-Corporations. Course graded on A-F basis only.
Credit Hours: 3
Prerequisites: ACCTCY 4353 or ACCTCY 7353

ACCTCY 8393: Taxation of Trust, Gifts and Estates
This course covers two main topics. Students are introduced to the construction, operation and income taxation of trusts. After this portion of the course students will learn about the gift tax consequences of completed exchanges. Finally, students will learn the basic rules regarding the estate tax. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ACCTCY 4353 or ACCTCY 7353

ACCTCY 8401: Topics in Accounting
Independent investigations, reports on approved topics.
Credit Hour: 1-3
Prerequisites: instructor's consent

ACCTCY 8404: Internal Auditing
This course covers the concepts, practices, and application of internal audit activities. The course will review the entire internal audit process including annual audit and engagement planning, fieldwork, reporting, and management communication. Other topics including internal controls, enterprise risk management, and key behavior skills will be discussed. The Professional Practices Framework and industry best practices will be incorporated throughout the semester. This course will prepare students for entry-level internal audit positions. Graded A-F only.
Credit Hours: 3
Prerequisites: ACCTCY 3346 and ACCTCY 4384 OR ACCTCY 7384

ACCTCY 8408: Advanced Accounting Information Systems
Emerging concepts and technologies in accounting information systems, with an emphasis on E-Business.
Credit Hours: 3
Prerequisites: ACCTCY 3328

ACCTCY 8414: Information Systems Assurance and Control
A combination of control theory, concept application, demonstration of actual practice, and student research to develop an understanding of the concepts and practices used in the design, development or assurance of information systems (IS) controls.
Credit Hours: 3
Prerequisites: ACCTCY 3328, and ACCTCY 4384 OR ACCTCY 7384

ACCTCY 8419: International Accounting
Introduction to accounting regulations and practices outside of the U.S., accounting regulations for foreign registrants on the NYSE and NASDAQ, international accounting standards and international management control issues. Review of cultural frameworks; transfer pricing methods and international accounting standards.
Credit Hours: 3
Prerequisites: ACCTCY 3346 and ACCTCY 3347
ACCTCY 8423: Tax Research and Planning
Applied tax research using print and electronic data bases; heuristic biases in tax judgments; responsibilities of professional tax practices.
Credit Hours: 3  
Prerequisites: ACCTCY 8373 (or concurrent enrollment in ACCTCY 8373)

ACCTCY 8424: Fraud Examination
A study of the methods and techniques of fraud examination, particularly with regard to frauds perpetrated by the company against the public. The ethical and professional standards that underlie the accountant's responsibility for fraud detection and prevention are emphasized. Graded on A-F basis only.
Credit Hours: 3  
Prerequisites: ACCTCY 4384 or ACCTCY 7384

ACCTCY 8425: Accounting for Governments and Other NonProfit Entities
Role of accounting information in planning, managing, and controlling nonbusiness organizations; reporting to external parties; concepts of governmental auditing.
Credit Hours: 3  
Prerequisites: ACCTCY 4365 or ACCTCY 7365 or instructor's consent

ACCTCY 8428: Data Warehousing and Data Mining
Enterprise-wide view of data and transaction processing. Concepts and techniques of data warehousing and data mining of business-critical data.
Credit Hours: 3  
Prerequisites: ACCTCY 3328 or departmental consent

ACCTCY 8434: Applications of Auditing Concepts
Application of auditing concepts and techniques in various phases of audit engagements.
Credit Hours: 3  
Prerequisites: ACCTCY 4348

ACCTCY 8436: Financial Accounting Theory and Practice III
Continuation of Accountancy 3346. Addresses a series of special financial accounting topics including income taxes, pensions, leases, business combinations, consolidated statements, and foreign currency translation.
Credit Hours: 3  
Prerequisites: ACCTCY 3346

ACCTCY 8437: Strategic Cost Analysis
Analysis to support organizational strategy including cost management, performance evaluation, and control of responsibility centers.
Credit Hours: 3  
Prerequisites: ACCTCY 3347, MATH 1320 and STAT 3500, or the equivalent

ACCTCY 8438: Forensic Accounting
Coverage of forensic accounting processes and tools used in the detection and prevention of fraud against the company. Topics include skimming, cash larceny, check tampering, billing schemes and others. An emphasis of the course will be upon the use of computer aids. Graded on A-F basis only.
Credit Hours: 3  
Prerequisites: ACCTCY 3328, ACCTCY 4384 or ACCTCY 7384

ACCTCY 8444: Advanced Audit
The Advanced Auditing course helps students develop a better understanding of the audit environment and gives them the opportunity to gain hands-on experience planning for an audit engagement, performing test work, and completing an audit engagement. The course also addresses additional topics not covered in detail in the Audit Theory and Practice I course, including inventory observation, legal liability issues faced by auditors today, the regulatory environment, professional responsibilities of auditors, preparing appropriate documentation for audit engagements, providing required communications to clients, and performing Single Audits. The course is designed to encourage open discussions of cases and current issues and provide learning opportunities for the students. The class meetings and assignments are designed to improve the student's critical thinking skills, communication skills, and team-building skills.
Credit Hours: 3  
Prerequisites: ACCTCY 4384 or ACCTCY 7384

ACCTCY 8446: Application of Financial Accounting Pronouncements
Development, content and application of authoritative pronouncements in financial accounting. Problems and case studies.
Credit Hours: 3  
Prerequisites: ACCTCY 8436

ACCTCY 8448: Emerging Issues in Accounting Information Systems
Current developments in the implementation of accounting information systems. Topics may vary.
Credit Hours: 3  
Prerequisites: ACCTCY 8408

ACCTCY 8450: Accounting and Strategic Business Analysis
Capstone course in the Master of Accountancy program. Emphasis on case analysis to develop critical thinking and analytical skills in the use of accounting reports for broad-based business analysis.
Credit Hours: 3  
Prerequisites: ACCTCY 3346 or equivalent

ACCTCY 8453: Taxes and Business Strategies
This class examines the role taxes in business decisions. The analysis involved considers 1) tax consequences of all parties to a transaction, 2) both explicit and implicit taxes, and 3) tax as well as non-tax costs.
Credit Hours: 3
ACCTCY 8456: Corporate Governance
Corporate governance has taken on new prominence in light of the accounting scandals of the early 2000’s (e.g., Enron) and the new regulatory regime of Sarbanes-Oxley. As a result, corporations, investors, auditors, and others are paying more attention to corporate governance. This course will familiarize students with corporate governance mechanisms and how they interact with financial reporting. This course should appeal to students pursuing careers in auditing, finance, management, as well as anyone seeking a deeper understanding of relations between financial reporting and corporate governance.
Credit Hours: 3
Prerequisites: ACCTCY 8436

ACCTCY 9090: Research in Accounting
Each student is under direction and guidance of an accountancy professor in writing a dissertation. Periodic seminars discuss research projects. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: doctoral candidacy and instructor’s consent

ACCTCY 9401: Doctoral Research Problems in Accounting
Independent investigations, reports on approved topics. Restricted to Doctoral level students only
Credit Hour: 1-3
Prerequisites: instructor’s consent and director’s consent

ACCTCY 9444: Seminar in Auditing Research
The economic role of auditing; the audit process; audit reports and the consequences of auditing on financial statements; new audit directions and perspectives.
Credit Hours: 3
Prerequisites: doctoral candidacy or instructor’s consent

ACCTCY 9455: Seminar in Governmental and Nonprofit Accounting
Critical review of the governmental and nonprofit accounting research literature, with emphasis on auditing issues and research methods.
Credit Hours: 3
Prerequisites: doctoral candidacy or instructor’s consent. ACCTCY 4384 or ACCTCY 7384 and ACCTCY 4365 or ACCTCY 7365

ACCTCY 9457: Quantitative Methods in Accounting
Application of mathematics and statistics to managerial and financial accounting problems.
Credit Hours: 3
Prerequisites: ACCTCY 3347, MATH 1300 and MATH 1320 and STAT 3500, or instructor’s consent

ACCTCY 9460: Research Methods in Accounting
Application of research methods to the investigation of current accounting issues. A research paper is required.
Credit Hours: 3
Prerequisites: doctoral candidacy or instructor’s consent

ACCTCY 9466: Seminar in Financial Accounting Research
Theory of financial accounting and regulated disclosure; empirical tests of financial accounting theory, with emphasis on the nature of the research question addressed, and the method used to address the research question.
Credit Hours: 3
Prerequisites: doctoral candidacy or instructor’s consent

ACCTCY 9467: Seminar in Behavioral Accounting Research
Critical review of the Behavioral accounting research literature with emphasis issues and research methods.
Credit Hours: 3
Prerequisites: doctoral candidacy and instructor’s consent

ACCTCY 9468: Seminar in Information Systems Research
Overview of research related to advanced systems and how accounting information is processed, with emphasis on current issues and research methods.
Credit Hours: 3
Prerequisites: doctoral candidacy or instructor’s consent

Aerospace Studies (AERO)

AERO 1100: The Foundations of the United States Air Force
Introduces the Air Force and Air Force ROTC. Topics include professional appearance, military customs and courtesies, core values, equal opportunity and treatment, officer opportunities, group leadership problems. Applies communicative skills. Leadership lab.
Credit Hours: 2

AERO 1200: The Foundations of the United States Air Force
Continues the introduction to the Air Force and Air Force ROTC. Topics include Air Force origins, organizations, major commands, installations, sister services (Army and Navy), group leadership problems. Applies communicative skills. Leadership lab.
Credit Hours: 2

AERO 2100: The Evolution of USAF Air and Space Power
A survey course designed to facilitate the transition from Air Force ROTC cadet to Air Force ROTC officer candidate. Explores Air Force heritage, Air Force leaders and Air Power doctrine. Applies communicative skills. Leadership lab.
Credit Hours: 2

AERO 2200: The Evolution of USAF Air and Space Power
Continues the examination of air and space power from the Vietnam era through the present. Topics include the Vietnam War, the Persian Gulf War, and overseas contingency operations. Applies communicative skills. Leadership lab.
Credit Hours: 2

AERO 3100: Air Force Leadership Studies
An integrated leadership and management survey course emphasizing development of the individual as an Air Force leader. Special topics
include situational leadership, principle centered leadership, corrective supervision and counseling. Leadership lab.

Credit Hours: 3

AERO 3200: Air Force Leadership Studies
Air Force leadership principles are examined from the foundation developed in AERO 3100. Ethical decision making, personal core values, and character development are discussed. Military evaluation systems are outlined. Leadership lab.

Credit Hours: 3

AERO 4100: National Security Affairs/Preparation for Active Duty
Examines the national security process, regional studies, Air Force and joint doctrine. Special topics include the military as a profession and civilian control of the military. Continued emphasis on communicative skills. Leadership lab.

Credit Hours: 3

AERO 4200: National Security Affairs/Preparation for Active Duty
Examines civilian control of the military, officership, the military justice system, and current issues affecting military professionalism. Continued refinement of communicative skills. Leadership laboratory.

Credit Hours: 3

Agricultural Economics (AG_EC)

AG_EC 1010: Introduction to Agribusiness Management
Management concepts and techniques. Coordination of business activity, motivation, and decision-making approaches used by industry leaders in global food chain. Unique aspects of managing enterprises in the agriculture-food sector.

Credit Hour: 1

AG_EC 1011: Survey of Global Agribusiness
Economic, social and political forces and trends and the impact on U.S. and global agribusinesses. Global production, consumption trade, and investment patterns in agriculture-food sector. Developing management strategy in changing economic political environment.

Credit Hour: 1

AG_EC 1041: Applied Microeconomics
Introduction to the microeconomic principles and their application to decision-making in agribusinesses. Consumer decision analysis, producer goals and optimization and the market environment where they meet and trade. Applications to current issues. Students who complete AG_EC 1041 may not have credit for ECONOM 1014.

Credit Hours: 3

AG_EC 1042: Applied Macroeconomics
Introduction to macroeconomic principles and their application to agriculture-food sector and natural resource issues. Using macroeconomic principles in decision making and in evaluating national and regional economic problems and issues. Students who complete AG_EC 1042 may not have credit for ECONOM 1015.

Credit Hours: 3

AG_EC 2070: Environmental Economics and Policy
(same as ENV_ST 2070). Examines current environmental and natural resource issues using a systems perspective and key economic concepts. Explores connections between the environment and the economy based on problems at the local, national, and international levels.

Credit Hours: 3
Prerequisites: ENGLSH 1000 and sophomore standing

AG_EC 2123: Quantitative Applications in Agricultural Economics
Familiarize students with the use of calculus and other quantitative tools in developing and analyzing fundamental economic concepts.

Credit Hours: 3
Prerequisites: AG_EC 1041 and MATH 1400

AG_EC 2156: Introduction to Environmental Law
Environmental issues from a legal perspective, using current controversies from both the USA and other countries. Major environmental laws dealing with water, air, noise, endangered species, waste disposal, and land use.

Credit Hours: 3

AG_EC 2183: The Agricultural Marketing System
Analysis of marketing systems that transforms agricultural products into food products. Examines functions and institutions in marketing and distributing food from both micro and macro perspectives.

Credit Hours: 3
Prerequisites: AG_EC 1041, AG_EC 1042 and ENGLSH 1000

AG_EC 2223: Agricultural Sales
Principles of salesmanship in agricultural input and output markets; buyer motivations; time and territory management; communication models and techniques; planning and executing sales calls; after-sale service.

Credit Hours: 3
Prerequisites: AG_EC 1041

AG_EC 2225: Statistical Analysis

Credit Hours: 3
Prerequisites: AG_EC 1041 and MATH 1100

AG_EC 2940: Practicum in Agricultural Economics
Off-campus integrated working and learning experience for departmental majors and minors. Application of economic concepts in business or government. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: 6 credit hours Agricultural Economics, 3 credits communications, and 30 total University credits

AG_EC 3150: International Agribusiness
This course covers the primary factors that shape the business environment for food and agricultural firms conducting business across

</table>
AG_EC 3294: Agricultural Marketing and Procurement
Content of course focuses on marketing issues in the agriculture supply chain. Topics covered include price discovery, basis, futures/options, contracting, logistics, and management decision making.
Credit Hours: 3
Prerequisites: AG_EC 2183 and AG_EC 2225

AG_EC 3295: Real Money: Speculative Trading for Beginners
Familiarize students with the learning components of commodity future/option trading. Students learn through involvement by investing in a commodity pool and trading futures/options. Students apply both fundamental and technical analysis. Students taking this course are required to invest from $100 to $300 in $100 increments.
Credit Hours: 3
Prerequisites: AG_EC 2183, AG_EC 3294 or instructor's consent

AG_EC 3296: In the Money with Options Trading
This online course focuses on learning the basics of trading options market contracts. Students will be investing/contributing members of the University of Missouri Educational Marketing Club. Students will be introduced to principles of price forecasting using technical and fundamental analysis and will study a variety of trading strategies.
Credit Hours: 2
Prerequisites: AG_EC 3294, AG_EC 3295

AG_EC 3297: Technical Trading Tactics
Learn the tactics of technical trading through student investment and commodity futures contracts. Technical Trading Tactics will provide students with tools to support trade recommendations based on technical analysis. Each student invests real money as a learning incentive and will complete one trade recommendation during the course.
Credit Hour: 1
Prerequisites: AG_EC 3294, AG_EC 3295, instructor's consent

AG_EC 3321: Economic History of Agriculture
Emphasizes Europe and U.S. historical interpretation; usefulness in evaluating present and probable future developments in agriculture.
Credit Hours: 3
Prerequisites: AG_EC 1041

AG_EC 3383: Rural Entrepreneurship II
Rural Entrepreneurship II is designed for students that realize they need to create their own career or opportunity if they want to return to their rural community and for students who would like to better understand how to create that option in their career choice set.
Credit Hours: 3
Prerequisites: AG_EC 1041, AG_EC 3283 and ACCTCY 2036

AG_EC 4110: In-Service Course in Agricultural Economics
A. Profit Maximizing Principles B. Farm Planning C. Farm Records and Analysis D. Business Management E. Using Computers in Farm Management Decision Making. Basic principles of farm management. Applications of principles and subject matter in successful classroom presentation primarily for high school teachers. Course is offered in sections A-E as listed, for 2 hours each.
Credit Hour: 2-10
Prerequisites: 10 hours credit in Agricultural Economics, including AG_EC 3260, or instructor's consent

AG_EC 4230: Understanding the Agricultural Policy Process
The goal of this course is to prepare students for a career in agricultural policy and will build the skill set needed in the agricultural policy environment.
Credit Hours: 3
Prerequisites: AG_EC 3230 and instructor's consent

AG_EC 4251: Agricultural Prices
(cross-leveled with AG_EC 7251). Variations in prices of agricultural products; underlying factors.
Credit Hours: 3
Prerequisites: AG_EC 1041, AG_EC 1042, AG_EC 2123 and AG_EC 2225 or STAT 2500

AG_EC 4295: Agricultural Risk Management
This class will examine the range of risks business face and explore ways of characterizing and evaluating those risks.
Credit Hours: 3
Prerequisites: AG_EC 2183 and AG_EC 2225 or instructor's consent

AG_EC 4301: Topics in Agricultural Economics
Current and new topics not currently offered in applied and/or theoretical areas in Agricultural Economics.
Credit Hour: 1-6

AG_EC 4301H: Topics in Agricultural Economics
Current and new topics not currently offered in applied and/or theoretical areas in Agricultural Economics.
Credit Hour: 1-6
Prerequisites: honors eligibility required

AG_EC 4310: Local Economic Analysis
Economic based theory, including multipliers and how local economies are affected by external events. Methods for local economic analysis: trends, location quotients, shift-share, and retail analyses.
Credit Hour: 1
Prerequisites: junior standing

AG_EC 4340: Rural Real Estate Appraisal
Principles, techniques, practices of rural real estate appraisal. Field trips.
Credit Hours: 3
Prerequisites: AG_EC 3260

AG_EC 4356: Environmental Law and Policy
Legislative, administrative, and common law dealing with the environment. Introduces the fundamental concepts and classic issues underlying the body of law and policy dealing with the environment.
Includes air and water quality, endangered species preservation, land use, and waste disposal.

Credit Hours: 3
Prerequisites: senior or graduate standing. For non-law students
Recommended: AG_EC 2156, AG_EC 3256 or AG_EC 3257

**AG_EC 4940: Internship Experiences in Agricultural Economics**
Combines study, observation, and employment in a public agency or private firm in marketing, farm management, or credit. Staff supervision and evaluation. Reports required. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: 2.5 GPA; 75 hours of course work and instructor’s consent

**AG_EC 4962: Planning the Farm Business**
(cross-leveled with AG_EC 7962). Economic analysis and planning of the farm business and its organization. Applications of computerized management techniques to farm business including resource acquisition, tax management, enterprise analysis, and business analysis through farm records and budgets.

Credit Hours: 3
Prerequisites: AG_EC 3260 or AFNR 1111 or equivalent

**AG_EC 4971: Agribusiness Management Strategy**
Analysis of industry forces in agriculture and food sector. Assessing risks and firms’ capabilities. Development of firm’s competitive strategy, including vertical integration, diversification, international business option, and financial planning and performance measurement.

Credit Hours: 3
Prerequisites: AG_EC 2183, AG_EC 3282, AG_EC 3286, and ENGLISH 1000

**AG_EC 4972: Agri-Food Business and Cooperative Management**
(cross-leveled with AG_EC 7972). Risk management in the global agrifood chain, including managing the unique uncertainties of biological production processes, global market analysis, and government intervention, of risk management tools and institutions unique to strategic decision making in agribusiness and cooperative firms.

Credit Hours: 3
Prerequisites: AG_EC 2183, AG_EC 3256, AG_EC 3286 and AG_EC 4971

**AG_EC 4983: Strategic Entrepreneurship in Agri-Food**
Strategic entrepreneurship is the search for opportunities to generate income streams from innovation, development of new markets, and altering the rivalry positions in existing markets.

Credit Hours: 3
Prerequisites: AG_EC 3257, AG_EC 3282, AG_EC 3283, and AG_EC 3383; senior standing

**AG_EC 4990: Economic Analysis of Policy & Regulation**
(cross-leveled with AG_EC 7990). Apply economic concepts and tools to analyze the policy-making process and the implications of policy for individuals, firms, markets and society. Policy topics include, among other things, agricultural support programs, environmental policy, international trade, international development, and agribusiness regulation.

Credit Hours: 3
Prerequisites: AG_EC 2225, AG_EC 3230 or AG_EC 3251, and senior standing
Recommended: ECONOM 4351

**AG_EC 4995: Economics of Agricultural Production and Distribution**
Applies economic principles to agricultural production including price theory, linear programming and uncertainty.

Credit Hours: 3
Prerequisites: ECONOM 3251, STAT 1400 or equivalent

**AG_EC 7110: In-Service Course in Agricultural Economics**
A. Profit Maximizing Principles B. Farm Planning C. Farm Records and Analysis D. Business Management E. Using Computers in Farm Management Decision Making. Basic principles of farm management. Applications of principles and subject matter in successful classroom presentation primarily for high school teachers. Course is offered in sections A-E as listed, for 2 hours each.

Credit Hour: 2-10
Prerequisites: graduate standing and 10 hours credit in Agricultural Economics, including AG_EC 3260, or instructor's consent

**AG_EC 7251: Agricultural Prices**
(cross-leveled with AG_EC 4251). Variations in prices of agricultural products; underlying factors.

Credit Hours: 3
Prerequisites: AG_EC 1041, AG_EC 1042, AG_EC 2123 and AG_EC 2225 or STAT 2500

**AG_EC 7295: Agricultural Risk Management**
This class will examine the range of risks businesses face and explore ways of characterizing and evaluating those risks.

Credit Hours: 3
Prerequisites: AG_EC 2183 and AG_EC 2225 or instructor’s consent

**AG_EC 7301: Topics in Agricultural Economics**
Current and new topics not currently offered in applied and/or theoretical areas in Agricultural Economics.

Credit Hour: 1-6

**AG_EC 7310: Local Economics Analysis**
Economic based theory, including multipliers and how local economies are affected by external events. Methods for local economic analysis: trends, location quotients, shift-share, and retail analyses. On-line course.

Credit Hour: 1

**AG_EC 7340: Rural Real Estate Appraisal**
Principles, techniques, practices of rural real estate appraisal. Field trips.

Credit Hours: 3
Prerequisites: AG_EC 3260
AG_EC 7356: Environmental Law and Policy
Legislative, administrative, and common law dealing with the environment. Introduces the fundamental concepts and classic issues underlying the body of law and policy dealing with the environment. Includes air and water quality, endangered species preservation, land use, and waste disposal.

Credit Hours: 3
Prerequisites: For non-law students. Recommended AG_EC 2156, AG_EC 3256 or AG_EC 3257

AG_EC 7940: Internship Experiences in Agricultural Economics
Combines study, observation, and employment in a public agency or private firm in marketing, farm management, or credit. Staff supervision and evaluation. Reports required. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: 2.5 GPA; 75 hours of course work and instructor's consent

AG_EC 7962: Planning the Farm Business
(cross-leveled with AG_EC 7962). Economic analysis and planning of the farm business and its organization. Applications of computerized management techniques to farm business including resource acquisition, tax management, enterprise analysis, and business analysis through farm records and budgets.

Credit Hours: 3
Prerequisites: AG_EC 3260 or AFNR 1111 or equivalent

AG_EC 7971: Agribusiness Management Strategy
Analysis of industry forces in agriculture and food sector. Assessing risks and firms capabilities. Development of firm’s competitive strategy, including vertical integration, diversification, international business option, and financial planning and performance measurement.

Credit Hours: 3
Prerequisites: AG_EC 2183, AG_EC 3282, AG_EC 3286, ENGLISH 1000

AG_EC 7972: Agri-Food Business and Cooperative Management
(cross-leveled with AG_EC 7972). Risk management in the global agrifood chain, including managing the unique uncertainties of biological production processes, global market analysis, and government intervention, of risk management tools and institutions unique to strategic decision making in agribusiness and cooperative firms.

Credit Hours: 3
Prerequisites: AG_EC 2183, AG_EC 3256 and AG_EC 3286

AG_EC 7990: Economic Analysis of Policy and Regulation
(cross-leveled with AG_EC 4990). Apply economic concepts and tools to analyze the policy-making process and the implications of policy for individuals, firms, markets and society. Policy topics include, among other things, agricultural support programs, environmental policy, international trade, international development, and agribusiness regulation.

Credit Hours: 3

AG_EC 7995: Economics of Agricultural Production and Distribution
Applies economic principles to agricultural production including price theory, linear programming and uncertainty.

Credit Hours: 3
Prerequisites: ECONOM 3251, STAT 1400 or equivalent

AG_EC 8001: Advanced Topics in Economics

Credit Hours: 3

AG_EC 8010: Research Methodology
Students explore the roles of theory and methods in economics research, develop a program of research, and critique published research. Students also study the scientific methods and the research process, including problem definition, research design, data collection and analysis, and generalization.

Credit Hours: 3

AG_EC 8024: Advanced Production Economics
Production function analyses and advanced theory of the firm as applied to agricultural production problems. Concepts of input demand, production supply, quality, time and technology, dynamic analysis and production under uncertainty.

Credit Hours: 3
Prerequisites: MATH 1500, AG_EC 4995; ECONOM 8451; STAT 4510 or ECONOM 8472

AG_EC 8050: Economics of Institutions and Organizations
This course expands upon the fundamental principles of neo-classical economics by relaxing traditional behavioral and informational assumptions and by introducing the importance of transaction costs and institutions for economic analysis.

Credit Hours: 3

AG_EC 8060: Mathematical Modeling for Social Scientist
Introduction to mathematical programming, emphasizing problem formulation and solution interpretation. Computer applications are stressed.

Credit Hours: 3
Prerequisites: STAT 4510

AG_EC 8085: Masters Problems in Agricultural Economics
Supervised study, research in specialized phases of agricultural economics.

Credit Hour: 1-99

AG_EC 8087: Seminar in Agricultural Economics
Lectures, reports on economic problems in agriculture.

Credit Hour: 1

AG_EC 8090: Masters Thesis Research in Agricultural Economics
Independent investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.
AG_EC 8210: Theory of Markets
Development of theories of monopolistic, monopolistic competition; application to agricultural markets. Market structure influence on price, nonprice competition in buying, selling of farm products and inputs.
Credit Hours: 3
Prerequisites: ECONOM 7351

AG_EC 8350: Regional Development Issues and Analysis
(same as PUB_AF 8350). Examines theories of regional growth and development and methods for analysis with applications to current policy issues. Topics include firm location, new economic geography and agglomeration theory, clusters, human capital, migration, social capital, tax and development incentives, and sustainable regional development.
Credit Hours: 3
Prerequisites: ECONOM 7351 or PUB_AF 8190 or equivalent

AG_EC 8410: Natural Resource and Environmental Economics
Contemporary natural resource/environmental problems; natural resource capacity, alternative economic theories, property rights, externalities, market failures, efficient use of exhaustible and renewable resources, and economics of environmental pollution.
Credit Hours: 3
Prerequisites: ECONOM 7351

AG_EC 8430: International Agricultural Development Policy
An analytical review of economic policies directed toward stimulating agricultural development in the world’s low income countries.
Credit Hours: 3
Prerequisites: ECONOM 7351 and ECONOM 7353

AG_EC 8448: Society and Ecosystems Research Seminar
(same as RU_SOC 8448 and NAT_R 8448). This seminar, capstone for the Graduate Certificate Program in Society and Ecosystems, exposes students to interdisciplinary research on interactions between social, economic and ecological systems.
Credit Hours: 3

AG_EC 8450: Masters Non Thesis Research
Independent investigation of advanced nature. Report required.
Credit Hour: 1-6

AG_EC 8520: Economics of Transaction and Contracting
This course focuses on the economic incentives underlying transaction relationships and develops and implements a framework for analyzing contract documents governing various kinds of transactions.
Credit Hours: 3

AG_EC 8610: Economic and Sociological Approaches to Collective Action
(same as RU_SOC 8610). This course identifies analytical and methodological tools, including rational choice and social capital, to deal with practical problems of collective action in: agricultural cooperatives, rural community development, political interest groups and other mutuals.
Credit Hours: 3
Prerequisites: AG_EC 7972

AG_EC 8680: International Comparative Rural Policy
(same as PUB_AF 8860). Compares the rural policy objectives and implementation strategies of various countries, and assesses these policies in terms of economic, social, environmental outcomes and their implications for international relations. Includes 2-weeks of study Abroad. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: instructor’s consent

AG_EC 9001: Advanced Topics in Economics II
Credit Hours: 3

AG_EC 9040: Advanced Microeconomics Theory and Applications I
First semester course that rigorously examines the microeconomic theory of producer and consumer behavior, combined with applications of the theoretical concepts to empirical economic research on agricultural, business, development, and environmental issues. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: AG_EC 9040

AG_EC 9085: Doctoral Problems in Agricultural Economics
Supervised study, research in specialized phases of agricultural economics.
Credit Hour: 1-99
Prerequisites: instructor’s consent

AG_EC 9090: Doctoral Dissertation Research in Agricultural Economics
Independent investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.
Credit Hour: 1-99

AG_EC 9220: Advanced Price Analysis
Applies economic theory and quantitative methods to analyze agricultural price issues. Examines problem formulation, estimation, and model evaluation applied to demand and supply situations.
Credit Hours: 3
Prerequisites: ECONOM 8451 or ECONOM 8472; STAT 4510
AG_EC 9230: Welfare and Consumption Economics
Introduces welfare economic principles; application to problems of resource allocation. Appraises economic policies, programs; consumers’ choice; measurement of consumption; living standards; household decisions and markets relation.

Credit Hours: 3
Prerequisites: ECONOM 8451 or instructor’s consent

AG_EC 9265: Food, Agricultural and Rural Policy
Application of welfare economics theory to food, agricultural and rural development policy analysis. Historical perspective and economics analysis of contemporary issues in national and international policy and institutions.

Credit Hours: 3
Prerequisites: ECONOM 7351 and AG_EC 9230

AG EC 9320: Regional Economic Theory and Methods
Theory of spatial economics: Central place theory, spatial labor markets, location theory, social accounting matrices, input-output, computable general equilibrium, geographic information systems and regional econometric models.

Credit Hours: 3
Prerequisites: ECONOM 7351, ECONOM 7353, and matrix algebra

AG EC 9475: Econometrics I
Emphasis is given to special estimation problems which occur in integrating the theory with various types of economic data.

Credit Hours: 3

AG_EC 9476: Econometrics II
(same as ECONOM 9476).

Credit Hours: 3

AG EC 9510: Economics of Agribusiness Firm
This course builds on transaction cost-based theories and tools to study the economic underpinnings of intra-firm organization, firm boundaries, and the structure of inter-firm transactions.

Credit Hours: 3
Prerequisites: AG_EC 8050

AG EC 9520: Economics of Agribusiness Markets
Relationships of neoclassical and new institutional economics to designing organizational strategy and structure. Internal coordination and structure, organizational boundaries, and competitiveness and sustainability of food system organizations.

Credit Hours: 3
Prerequisites: AG_EC 8050

Agricultural Ed & Leadership (AG_ED_LD)

AG_ED_LD 1000: Orientation to Agricultural Education and Leadership
Overview of the discipline of agricultural education including: career opportunities, certification requirements, professional development, and current issues.

Credit Hour: 1

AG_ED_LD 2220: Verbal Communication in Agriculture, Food and Natural Resources
Application of verbal communication skills used in the dissemination of information related to agriculture, food, and natural resource topics. Acquisition of interpersonal communication skills and small group, impromptu and professional presentation skills.

Credit Hours: 3
Prerequisites: Restricted to College of Agriculture, Food and Natural Resources students only during Early Registration

AG_ED_LD 2250: Introduction to Leadership
Overview of basic leadership principles and theories, including, but not limited to: personal leadership development, characteristics of effective leaders, leadership styles, ethics as a leader and leadership obstacles.

Credit Hours: 3

AG_ED_LD 2260: Team and Organizational Leadership
Principles and practices in planning, developing, conducting, and evaluating leadership programs for agricultural groups. The course focuses on helping students better understand themselves and others, improving group communications; becoming effective leaders and members of groups; improving leadership and personal development skills; assessing leadership situations, determining and administering appropriate leadership strategies, and evaluating results.

Credit Hours: 3

AG_ED_LD 2270: Leadership Development in Youth Organizations
This course focuses on how to develop leadership in youth through participation in a youth organization. In particular, this course explores youth development, how to develop leadership through youth organizations and their activities, and organizational structures.

Credit Hours: 3

AG_ED_LD 2271: Early Field Experience
This field experience is designed for students to explore the role of being a school-based agricultural educator. In particular, students will experience the total agricultural education program with a focus on youth organizations.

Credit Hour: 1
Prerequisites: AG_ED_LD 2270 or concurrent enrollment

AG_ED_LD 3085: Problems in Agricultural Education and Leadership
Supervised and independent study of problems and issues in Agricultural Education and Leadership at the undergraduate level.

Credit Hour: 1-99
Prerequisites: instructor’s consent
AG_ED_LD 3320: Metal Fabrication and Laboratory Management
Application of metal fabrication skills, including cutting, bending, and welding, using a variety of processes. Operations of hand tools and power equipment used in project construction. Also includes laboratory management, instructional strategies, and assessment techniques related to secondary agriculture programs.

Credit Hours: 3
Prerequisites: junior standing

AG_ED_LD 3776: Litton Leadership Scholars
The Litton Leadership Scholars class focuses on developing students as leaders. Through leadership coursework, field-based mentorship and self-reflection, students will practice and develop exemplary leadership skills. Students will have an opportunity to spend time with industry leaders, expand their personal growth boundaries and develop their unique leadership style. Graded on A-F basis only.

Credit Hour: 1-2
Prerequisites: Students will engage in an interview process to be selected for the Litton Leadership Scholars program

AG_ED_LD 4001: Topics in Agricultural Education and Leadership
Courses on specialized topics offered on a trial basis until the course has been assigned a course number.

Credit Hour: 1-3

AG_ED_LD 4087: Internship Seminar in Agricultural Education and Leadership
Seminar focused on the problems of practice and developing skills needed for a career in teaching agriculture at the secondary level. The core of the seminar is on coordinating experiential learning and leadership development activities, managing the complete program, and professional development.

Credit Hours: 3
Corequisites: AG_ED_LD 4995

AG_ED_LD 4310: Intracurricular Program Management in Agricultural Education
This course explores the philosophical foundations and current structures of secondary Agricultural Education Programs. Students will learn how to plan, supervise, and evaluate the intracurricular components within Agricultural Education programs.

Credit Hours: 3
Prerequisites: junior standing

AG_ED_LD 4320: Methods of Teaching I
(cross-leveled with AG_ED_LD 7320). Investigations into the teaching and learning process which including lesson planning, direct instruction methods, and assessment.

Credit Hours: 3
Prerequisites: junior standing; acceptance into Phase II of Teacher Development Program or instructor’s consent

AG_ED_LD 4321: Field Experience I
A field-based experience that examines the integration of Supervised Agricultural Experience and Career Development Events into the secondary agriculture curriculum. Investigates the use of advisory committees and graduate follow-up data in curriculum planning. Graded on S/U basis only.

Credit Hour: 1
Corequisites: AG_ED_LD 4320

AG_ED_LD 4330: Methods of Teaching II
Further investigations into the teaching and learning process which includes methods beyond direct instruction, classroom and behavior management, and curricular design.

Credit Hours: 3
Prerequisites: AG_ED_LD 4320; acceptance into Phase II of Teacher Development Program or instructor’s consent

AG_ED_LD 4331: Field Experience II
A field-based experience that provides students with comprehensive experience directed toward learning, teaching, and assessment in secondary agriculture programs. Graded on S/U basis only.

Credit Hour: 1
Corequisites: AG_ED_LD 4330

AG_ED_LD 4340: Designing and Delivering Educational/Leadership Programs
Overview of theory and practice in communicating and facilitating adult and youth training/leadership programs in communities and organizations. Including: communicating program design, methods of communicating for different contexts, marketing programs, and evaluating programs.

Credit Hours: 3
Prerequisites: junior standing or instructor’s consent

AG_ED_LD 4993: Internship in Agricultural Education and Leadership
Field-based learning experience that combines study, observation, and employment with an agricultural business, industry or government agency in the area of education, training, and development. Individual internship plans are developed by a student, faculty supervisor, and an industry cooperator.

Credit Hour: 1-4
Prerequisites: departmental consent

AG_ED_LD 4995: Student Teaching Internship in Agriculture
A field-based learning experience that combines observation and practice in a secondary/adult agriculture program. The purpose of the internship is to provide an opportunity to apply teaching and learning concepts in a practical context.

Credit Hour: 1-12
Prerequisites: departmental consent
AG_ED_LD 7087: Internship Seminar in Agricultural Education and Leadership
Seminar focused on the problems of practice and developing skills needed for a career in teaching agriculture at the secondary level. The core of the seminar is on coordinating experimental learning and leadership development activities, managing the complete program, and professional development.
Credit Hours: 3
Corequisites: AG_ED_LD 4995

AG_ED_LD 7310: Intracurricular Program Management in Agricultural Education
This course explores the philosophical foundations and current structures of secondary Agricultural Education Programs. Students will learn how to plan, supervise and evaluate the intracurricular components within Agricultural Education Programs.
Credit Hours: 3

AG_ED_LD 7320: Methods of Teaching I (cross-leveled with AG_ED_LD 7320). Investigations into the teaching and learning process which includes lesson planning, direct instruction methods, and assessment.
Credit Hours: 3
Prerequisites: acceptance into the Teacher Certification option

AG_ED_LD 7330: Methods of Teaching II
Further investigations into the teaching and learning process which includes methods beyond direct instruction, classroom and behavior management, and curricular design.
Credit Hours: 3
Prerequisites: acceptance into Teacher Certification option and AG_ED_LD 4320 or AG_ED_LD 7320

AG_ED_LD 7340: Designing and Delivering Educational/Leadership Programs
Overview of theory and practice in communicating and facilitating adult and youth training/leadership programs in communities and organizations. Including: communicating program design, methods of communicating for different contexts, marketing programs, and evaluating programs.
Credit Hours: 3
Prerequisites: AG_ED_LD 2220 or equivalent

AG_ED_LD 7350: Inservice Course in Agricultural Education and Leadership
Professional development course which focuses on enhancing the technical, administrative, or management skills of agricultural educators.
Credit Hour: 1-99

AG_ED_LD 8080: Creative Component in Agricultural Education and Leadership
Independent original work that culminates in a scholarly project, document or presentation. Graded on S/U basis only.
Credit Hour: 1-3
Prerequisites: instructor’s consent

AG_ED_LD 8085: Problems in Agricultural Education and Leadership
Credit Hour: 1-99
Prerequisites: instructor’s consent

AG_ED_LD 8087: Seminar in Agricultural Education and Leadership
Seminar in Agricultural Education and Leadership.
Credit Hour: 1-99

AG_ED_LD 8090: Thesis Research in Agricultural Education and Leadership
Independent research activities by a master’s student that culminates in a thesis. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor’s consent

AG_ED_LD 8210: History and Leadership of the Land Grant University
Historical overview of the evolution and development of land-grant colleges. Students examine early public mandates and evaluate education, research, public service developments and new initiatives needed for Land Grant universities to effectively serve society.
Credit Hours: 2

AG_ED_LD 8250: Leadership Theory and Application
Survey of concepts, theories and practices of leadership, personal development and group dynamics. Exploration of leadership traits and models with a focus upon how they apply to Agricultural Education.
Credit Hours: 3

AG_ED_LD 8330: Advanced Methods of Teaching
Explores the principles and psychological aspects of teaching and learning; teaching strategies, methods, and techniques; evaluating student learning; motivating students; and personal teacher behaviors that influence learning.
Credit Hours: 3

AG_ED_LD 8340: Student and Teacher Development in Agricultural Education and Leadership
Examines planning and supervising career exploration, experiential learning, and leadership development activities of secondary agriculture students. The professional development of the secondary agriculture teacher is also examined.
Credit Hours: 3
Prerequisites: AG_ED_LD 4310 or equivalent

AG_ED_LD 8350: College Teaching of Agriculture, Food and Natural Resources
A course designed to assist current or future college faculty who wish to improve their teaching skills. Topics include theories, principles and practices associated with effective teaching and learning in higher education.
Credit Hours: 3
AG_ED_LD 8351: Induction Year Teaching I
Continuing education course for the professional development of first-year teachers of agriculture. The course focuses on the pedagogical knowledge, skills, and attitudes and managerial skills needed by beginning teachers of agriculture.
Credit Hour: 1-2

AG_ED_LD 8352: Induction Year Teaching II
Continuing education course for the professional development of second-year teachers of agriculture. The course is a continuation of AG_ED_LD 8351 and focuses on the pedagogical knowledge, skills, and attitudes and managerial skills needed by beginning teachers of agriculture.
Credit Hour: 1-2
Prerequisites: AG_ED_LD 8351

AG_ED_LD 8410: Philosophical Foundations of Agricultural Education and Leadership
Overview of the history and philosophical development of agricultural education and leadership as a discipline. Philosophers, policy makers, movements, trends, and legislation that has influenced agricultural education. Current issues and future trends impacting the field. Graded on A-F basis only.
Credit Hour: 1-3

AG_ED_LD 8430: Evaluation of Educational Programs
(same as RU_SOC 8430). Examines program evaluation concepts, principles, and models; and identifies major steps in planning, conducting, and reporting results of evaluation objects.
Credit Hours: 3

AG_ED_LD 8510: Research Methods and Design
(same as RU_SOC 8510). A foundations course on quantitative research methodology and design principles for investigating problems in social and behavioral sciences. A focus is on the language of research, purposes, validity threats, and data collection methods. Graded on A-F basis only.
Credit Hours: 3

AG_ED_LD 8520: Preparing Manuscripts for Publication
An introduction to planning, preparing, and submitting research based articles for publication in professional journals and research proceedings.
Credit Hour: 1

AG_ED_LD 8530: Grant Proposal Writing
Preparation of proposals designed to solicit grant funding to support teaching, research or outreach programs. Emphasis on proposal development, identifying funding sources, and proposal review processes.
Credit Hours: 2

AG_ED_LD 8540: Methods of Qualitative Research
(same as RU_SOC 8540). Overview of philosophies, approaches toward, design, data collection, analysis and reporting of qualitative research.
Credit Hours: 3

AG_ED_LD 8995: College Teaching Practicum
Learning experience that combines the study, observation, and practice of teaching university-level courses in food, agriculture and/or natural resources under the supervision of teaching mentors. Graded on S/U basis only.
Credit Hours: 3

AG_ED_LD 9090: Doctoral Research in Agricultural Education and Leadership
Independent research activities by a doctoral student that culminates in a dissertation or other scholarly work. Graded on S/U basis only.
Credit Hours: 1-99
Prerequisites: instructor’s consent

AG_ED_LD 9410: Foundations and Practices of Teacher Education
Foundations and practices of teacher preparation programs including student selection and advisement, licensure requirements, accreditation, curriculum, clinical and field experiences, supervision, evaluation and research.
Credit Hours: 3
Prerequisites: Doctoral student or instructor’s consent

AG_ED_LD 9510: Data Collection, Analysis and Interpretation
(same as RU_SOC 9510). A quantitative methods course in measurement, data collection and analysis related to social and behavioral science research. An applied approach is taken on instrumentation and analyzing data using descriptive and inferential statistics. Practical skills in data manipulation using SPSS are developed. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: AG_ED_LD 8510 or RU_SOC 8510 or instructor’s consent

Agricultural Systems Management (AG_S_M)

AG_S_M 1002: Topics in Agricultural Systems Management-Biological/Physical/Math
Current and new technical developments in agricultural systems management.
Credit Hours: 3
Prerequisites: 6 hours in AG_S_M or instructor’s consent

AG_S_M 1020: Introduction to Agricultural Systems Management
Introductory course that acquaints students with the general technical areas of Agricultural Systems Management. A systematic problem-solving approach is applied to problems derived from each of the technical areas within Agricultural Systems Management.
Credit Hours: 3
AG_S_M 1040: Physical Principles for Agricultural Applications
Introductory survey course to help students: formulate problems; understand units/accuracy; learn basic definitions; understand simple machines, power transmission, fluid statics, electricity, heat-flow, and temperature/moisture relationships.

Credit Hours: 3
Prerequisites: MATH 1120

AG_S_M 1120: Agricultural/Industrial Materials and Processes
Structure and properties of manufacturing materials; conditioning and machining materials; assembling processes; finishing processes; automation of manufacturing systems.

Credit Hours: 3

AG_S_M 2002: Topics in Agricultural Systems Management-Biological/Physical/Math
Current and new technical developments in agricultural systems management.

Credit Hours: 3
Prerequisites: 6 hours in AG_S_M or instructor’s consent

AG_S_M 2020: Environmental Ethics in Agriculture

Credit Hours: 3
Prerequisites: ENGLISH 1000 and sophomore standing

AG_S_M 2220: Agricultural/Industrial Structures
A building science course looking at construction materials, structural component selection, ventilation, moisture control and energy use. Math reasoning proficiency course.

Credit Hours: 3
Prerequisites: MATH 1100
Recommended: AG_S_M 1040, or instructor’s consent

AG_S_M 2320: Internal Combustion Power
Basic internal combustion engine principles, mechanisms, combustion cycles, fuels, fuel injection, electrical systems, engine testing.

Credit Hours: 3
Prerequisites: AG_S_M 1040

AG_S_M 2340: Pesticide Application Equipment
Principles of pesticide application; sprayer hydraulics and spray atomization; calibration; mixing calculations and compatibility of tank mixes; personal and environmental protection; pesticide labels and regulations. Students earn their private applicators license.

Credit Hours: 3
Prerequisites: MATH 1100 or instructor’s consent

AG_S_M 2345: Chemical Application Systems
Systems, components and operation practices used in the chemical application industry. Liquid and granular application systems and respective components will be studied along with procedures for minimizing drift, system calibration, recommended maintenance, and off-season storage procedures.

Credit Hour: 2-3
Prerequisites: MATH 1100 or equivalent

AG_S_M 2360: Fluid Power
Basic power hydraulic theory. Hydraulic systems, components and circuits. Math reasoning proficiency course.

Credit Hours: 3
Prerequisites: MATH 1100 and sophomore standing

AG_S_M 3350: Problems in Agricultural Systems Management
Supervised independent study at the undergraduate level.

Credit Hour: 1-5
Prerequisites: instructor’s consent

AG_S_M 4020: Agricultural Safety and Health
Analysis, organization and implementation of agriculture safety and health programs. Physical and economic impact of accidents, standards and liabilities. Role of man in the man-machine system.

Credit Hours: 3
Prerequisites: junior or senior standing or instructor’s consent

AG_S_M 4120: Advanced Agricultural/Industrial Materials and Processes
(cross-leveled with AG_S_M 7120). Primarily for students majoring in agricultural education. Applies shop principles to the design and construction of projects.

Credit Hour: 2-3
Prerequisites: instructor’s consent

AG_S_M 4140: Electricity: Wiring and Equipment
Home and agricultural electricity; emphasis on proper selection and use of electrical wiring materials and equipment. Basic electrical theory.

Credit Hours: 3
Prerequisites: MATH 1100 and junior standing or instructor’s consent

AG_S_M 4145: Sensors and Control Systems for Agri-Industries
This course helps one understand sensors including performance, data acquisition systems and selection. In addition, introduction to programmable logic controllers, ladder-rung diagram programming, fluid flow rate, and associated analysis is discussed.

Credit Hours: 2
Prerequisites: AG_S_M 1040 and AG_S_M 4140; junior standing required

AG_S_M 4150: Biorenewable Systems Technology
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change,
feedstock production, processes, products, co-products, economics, transportation and logistics, and marketing.

Credit Hours: 3
Prerequisites: MATH 1100, CHEM 1100 and AG_EC 1041 or equivalent

AG_S_M 4220: Material Handling and Conditioning
(cross-leveled with AG_S_M 7220). Principles required for processing and handling food and feed materials; selection of machines; analysis and development of systems for processing and handling grain and bulk material.

Credit Hours: 3
Prerequisites: MATH 1100, AG_S_M 1040 and junior standing

AG_S_M 4225: Preservation of Grain Quality
Principles and management for grain quality preservation. Grain drying and grain storage. Psychrometrics. Fan and airflow. Grain handling methods and system planning. Grain quality measurement and end-use value analysis.

Credit Hours: 2
Prerequisites: MATH 1100 or equivalent

AG_S_M 4320: Agricultural Equipment and Machinery
Operation of agricultural machinery. Selection and management of equipment.

Credit Hours: 3
Prerequisites: AG_S_M 1040 and junior standing

AG_S_M 4330: Principles for Food Processing
(same as F_S 4330; cross-leveled with AG_S_M 7330). Introduction to basic engineering concepts used to process raw materials. Principle topics include energy and material balance, fluid flow, heat transfer, refrigeration and freezing, and preservation.

Credit Hours: 3
Prerequisites or Corequisites: Instructor's Consent
Prerequisites: MATH 1100, AG_S_M 1040 or PHYSCS 1210

AG_S_M 4350: Problems in Agricultural Systems Management
Supervised independent study at the undergraduate level.

Credit Hour: 1-5
Prerequisites: instructor's consent

AG_S_M 4360: Precision Agriculture Science and Technology
(same as PLNT_S 4360 and SOIL 4360; cross-leveled with AG_S_M 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

Credit Hours: 3
Prerequisites: SOIL 2100, PLNT_S 2110 or instructor's consent

AG_S_M 4365: Machinery Management Using Precision Agriculture Technology
Planters, combines, fertilizer application equipment, and sprayer management along with GPS technologies are the focus of the course. One will learn how to manage these tools efficiently and accurately. Valuable precision agriculture management skills emphasized.

Credit Hours: 3
Prerequisites: Junior standing required; Prefer AG_S_M 4360

AG_S_M 4366: Data Management and Analysis Using Precision Agriculture Technology
Course begins with a section on how to minimize errors while collecting spatial datasets. Datasets may include yield data, soil chemical and physical properties with real-time sensors, and soil nutrient data from grids or management zones. The course then continues with a section regarding data analytical techniques such as interpolation. The second half of the course will focus on writing prescriptions based on actual data obtained from industry leader experts. This portion of the course will integrate industry experts as well as hardware/software tools. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: AG_S_M 4360, AG_S_M 4365, instructor consent or equivalent

AG_S_M 4368: Profit Strategies Using Precision Agriculture Technology
(cross-leveled with AG_S_M 7368). Course begins with section on how Precision Agriculture Technology can be used to benefit a farm’s financial sustainability. Discussion of various types of farm operations and currently available Precision Agriculture Technology that is already developed and in use will be examined. The course continues by considering cost factors that create barriers for farm operators to adopt Precision Agriculture. The second half of the course will focus on developing a plan to implement various technologies into an existing farm operation and draft a business plan for cost, equipment, and transition the farm into using the following types of technologies, GPS, GIS, VRA, RS, RTK and other types of tracking and monitoring systems. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: AG_S_M 4360, AG_S_M 4365, instructor consent, or equivalent

AG_S_M 4370: In-Service Course Agriculture System Management-Farm Power and Machinery
A. Farm Power and Machinery B. Farm Buildings and Conveniences C. Soil and Water Management D. Rural Electrification and Processing E. Agricultural Construction and Maintenance Basic principles relating to agricultural systems management. Applies principles and subject matter in successful classroom presentation at the high school level.

Credit Hour: 1-8
Prerequisites: 10 credits from Agricultural System Management courses; a B.S. degree in Agriculture or instructor’s consent

AG_S_M 4390: Optimization and Management of Food and Agricultural Systems
(same as F_S 4390 and HSP_MGMT 4390). This course is designed to introduce the student to the concept of layers and interacting systems
within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.

**Credit Hours:** 3  
**Prerequisites:** MATH 1100

**AG_S_M 4420: Surface Water Management**  
Topics include hydrology; soil erosion precautions; elementary surveying; selection and layout of ponds, terraces and water control structures.  
**Credit Hours:** 3  
**Prerequisites:** MATH 1100 and junior standing

**AG_S_M 4440: Water Quality and Pollution Control**  
Applies scientific principles to a variety of water quality problems arising from activities associated with nonpoint pollution, agricultural chemicals, land disposal of wastes, on-site sewage disposal and individual drinking water systems.  
**Credit Hours:** 3  
**Prerequisites:** MATH 1100 and junior standing

**AG_S_M 4460: Irrigation and Drainage**  
Soil, water, plant relationships. Selection and layout of irrigation and drainage systems.  
**Credit Hours:** 3  
**Prerequisites:** AG_S_M 4420 or instructor's consent

**AG_S_M 4940: Agricultural Systems Management Internship**  
Problem course following prior approved internship work experience. Problem selected by internship company representative, faculty problem advisor and student. Supervised by faculty problem advisor and presented in technical report form.  
**Credit Hour:** 2-5

**AG_S_M 4970: Agricultural Systems Management - Capstone**  
Capstone course required of Agricultural Systems Management majors. Team project involving extensive use of the students education, oral presentations and comprehensive written reports are required. Class experiences include but may not be limited to system selection and comparison, replacement and operating cost calculations, life cycle costing, and business feasibility analysis.  
**Credit Hours:** 3  
**Prerequisites:** Senior Standing

**AG_S_M 7001: Topics in Agricultural Systems Management**  
Initial offering of a course in a specific subject matter area related to Agricultural Systems Management. The course is offered when proposed by a faculty member in that area of expertise.  
**Credit Hours:** 3

**AG_S_M 7020: Agricultural Safety and Health**  
Analysis, organization and implementation of agriculture safety and health programs. Physical and economic impacts of accidents, standards and liabilities. Role of man in the man-machine system.  
**Credit Hours:** 3

**AG_S_M 7085: Problems in Agricultural Systems Management**  
Supervised individual study at the graduate level.  
**Credit Hour:** 1-99

**AG_S_M 7120: Advanced Agricultural/Industrial Materials and Processes**  
(cross-leveled with AG_S_M 4120). Primarily for students majoring in agricultural education. Applies shop principles to the design and construction of projects.  
**Credit Hours:** 2-3  
**Prerequisites:** instructor's consent

**AG_S_M 7140: Electricity: Wiring and Equipment**  
Home and agricultural electricity; emphasis on proper selection and use of electrical wiring materials and equipment. Basic electrical theory.  
**Credit Hours:** 3

**AG_S_M 7220: Material Handling and Conditioning**  
(cross-leveled with AG_S_M 4220). Principles required for processing and handling food and feed materials; selection of machines; analysis and development of systems for processing and handling grain and bulk materials.  
**Credit Hours:** 3  
**Prerequisites:** MATH 1100 and AG_S_M 1040

**AG_S_M 7320: Agricultural Equipment and Machinery**  
Operation of agricultural machinery. Selection and management of equipment.  
**Credit Hours:** 3  
**Prerequisites:** AG_S_M 1040

**AG_S_M 7340: Agricultural Mechanization Systems**  
**Credit Hours:** 3

**AG_S_M 7360: Precision Agriculture Science and Technology**  
(same as PLNT_S 7360 and SOIL 7360; cross-leveled with AG_S_M 4360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.  
**Credit Hours:** 3

**AG_S_M 7365: Machinery Management Using Precision Agriculture Technology**  
This course focuses on agricultural equipment that is commonly used in conjunction with GPS technology. Planters, combines, fertilizer application equipment and sprayer application equipment are commonly equipped with GPS equipment to control and record operational parameters. These parameters focus around the equipments geographic
location and can be recorded simultaneously with the volume of product
applied and weather information (wind, temperature, humidity, etc.). GPS
guidance is one of the main technologies to be studied throughout this
course. The management of this equipment and the GPS technologies
used to control and record this information is the focus of the course.

Credit Hours: 3
Recommended: AG_S_M 7360

AG_S_M 7370: In-Service Course Agriculture Systems Management-
Farm Power and Machinery
A. Farm Power and Machinery B. Farm Buildings and Conveniences C.
Soil and Water Management D. Rural Electrification and Processing E.
Agricultural Construction and Maintenance Basic principles relating to
agricultural systems management. Applies principles and subject matter
in successful classroom presentation at the high school level.

Credit Hour: 1-8
Prerequisites: 10 credits from Agricultural Systems Management
courses; a B.S. degree in Agriculture or instructor's consent

AG_S_M 7390: Optimization and Management of Food and
Agriculture Systems
(same as F_S 7390 and HSP_MGMT 7390). This course is designed to
introduce the student to the concept of layers and interacting systems
within an operation and the analytical methods of modeling and
simulation to make effective management decisions for optimal system
design and function.

Credit Hours: 3
Prerequisites: instructor's consent

AG_S_M 7420: Surface Water Management
Topics include hydrology; soil erosion precautions; elementary surveying;
selection and layout of ponds, terraces and water control structures.

Credit Hours: 3
Prerequisites: MATH 1100

AG_S_M 7440: Water Quality and Pollution Control
Applies scientific principles to a variety of water quality problems arising
from activities associated with nonpoint pollution, agricultural chemicals,
land disposal of wastes, on-site sewage disposal and individual drinking
water systems.

Credit Hours: 3
Prerequisites: MATH 1100

AG_S_M 7460: Irrigation and Drainage
Soil, water, plant relationships. Selection and layout of irrigation and
drainage systems.

Credit Hours: 3
Prerequisites: AG_S_M 4420 or instructor’s consent

AG_S_M 8085: Problems in Agricultural Systems Management
Supervised individual study at the graduate level.

Credit Hours: 3

AG_S_M 8090: Thesis Research in Agricultural Systems
Management
Independent investigation to be presented as a thesis. Graded on a S/U
basis only.

Credit Hour: 1-99

AG_S_M 8142: Agricultural Energy Efficiency
The study of the efficient use of energy concerning the planning,
economics, and finance of efficient technology for livestock, crops,
farm buildings including alternative energy resources, and associated
environmental systems.

Credit Hours: 3
Prerequisites: AG_S_M 4140 or consent of instructor

AG_S_M 8340: Agricultural Mechanization Systems
Review of current literature. Case study of mechanization systems.
Computer analysis of management alternatives.

Credit Hours: 3

AG_S_M 9090: Thesis Research in Agricultural Systems
Management
Independent investigation to be presented as a thesis. Graded on a S/U
basis only.

Credit Hour: 1-99

Agriculture, Food and Natural
Resources (AFNR)

AFNR 1101: Special Topics in Agriculture
Selected topics not offered in other courses.

Credit Hour: 1-3
Prerequisites: instructor’s consent

AFNR 1111: Computing and Information Systems I
Provide students with a basic understanding of microcomputer usage,
electronic communications, and use of the internet. Topics include
operating systems, word processing, database management systems,
spreadsheets, electronic mail, online library searches, and the World
Wide Web.

Credit Hours: 3

AFNR 1115: Foundations for College Success
An investigation of principles and practices associated with academic
success and the interpersonal challenges encountered in collegiate life.
Learning preferences, time investment, study skills, degree requirements,
and personal development opportunities available in the College and
across campus are explored. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: freshman standing

AFNR 1120: Computing and Information Technology
Provides students with a basic understanding of computer usage,
electronic communications and use of the internet. Topics include
understanding of operating systems, word processing, and presentation media.

Credit Hours: 2
Prerequisites: Restricted to freshmen and sophomores

AFNR 2115: College to Career: Strategies for Success
Systematic approach to self-assessment, career research and exploration, goal-setting and implementation of a career development plan. Students will learn specific skills, research knowledge and lifelong career management techniques.

Credit Hour: 1

AFNR 2120: Working with Data Using Excel
Provide students with a basic understanding of computer usage and spreadsheet applications.

Credit Hour: 1

AFNR 2150: Agricultural Travel Course
General travel course designed to broaden the perspective of agricultural students. Cost of course is borne by the student. Prerequisites: one course in each of the following areas: agricultural economics, animal science, plant science, and instructor’s consent.

Credit Hour: 1-99

AFNR 2190: International Agriculture and Natural Resources
This course is designed to provide students with an introduction into the agriculture/natural resources of the host country. Activities may include course work at an international institution, professional and personal development and special projects. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-15
Prerequisites: instructor’s and student’s advisor consent

AFNR 2191: International Agriculture and Natural Resources - Humanities
This course is designed to provide students with an introduction to valuing and appreciating the culture and philosophy entrenched in the host country’s civilization through the examination of its arts, culture, language and history. May be repeated for credit. Selected sections of the course may be offered on A-F or S/U basis only.

Credit Hour: 1-6
Prerequisites: student’s advisor or consent of instructor

AFNR 2192: International Agriculture/Natural Resources-Social Science
This course is designed to provide students with an examination of the social sciences of the host country; including the sociology, psychology, economics, government, and history of the country; including the dynamics of urban and rural communities. May be repeated for credit. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-6
Prerequisites: student’s advisor and instructor’s consent

AFNR 2215: Introduction to the Theory and Practice of Sustainable Agriculture
This experiential course provides an overview of the theoretical and practical principles of sustainable agriculture by exploring the holistic nature of sustainable agriculture, and analyzing agriculture systems based on their impact on the environment, economy and community.

Credit Hours: 3

AFNR 3115: Lifelong Career Management and Success Strategies
Systematic approach to understanding the importance of effective leadership in the professional world, obtaining transferable skills necessary in the work force, and understanding important aspects that allow one’s career to grow over the course of one’s professional life. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: junior standing or higher

AFNR 3215: Community Food Systems
Essential concepts in research, implementation and understanding of community food systems and macro-level global trends in food production and distribution will be discussed. Students will examine the social, economic and health implications of conventional and alternative food systems.

Credit Hours: 3
Prerequisites: AFNR 2215

AFNR 3315: Advanced Practices in Sustainable Agriculture
Course furthers students’ understanding of sustainable production systems with an emphasis on stewarding natural resources (soil, water, biodiversity and energy) while maintaining and economically profitable enterprise that provides for a good quality of life.

Credit Hours: 3
Prerequisites: AFNR 2215 and Junior standing
Recommended: SOIL 2100, PLNT_S 2110 or AN_SCI 1065 or AN_SCI 2175

AFNR 4001: Topics in Agriculture-General
Topics in Agriculture-General

Credit Hour: 1-99

AFNR 4972: Capstone Project in Agriculture, Food and Natural Resources
A culminating learning experience focused on student’s area of concentration that requires the application of knowledge and skills taught in the undergraduate curriculum. The capstone project comprises independent, original work culminating in a scholarly project, written document, and/or presentation. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: Junior standing and instructor’s consent

AFNR 4993: Internship in Agriculture, Food and Natural Resources
Field-based learning experience combining the study, observation, and employment with a business, organization, or governmental agency. The internship provides opportunities to apply skills, concepts and theories about agriculture, food and natural resources in a practical context.
The student intern, internship supervisor, and university coordinator will develop an individualized internship plan. May be repeated for credit. Some sections may be graded on either an A-F or S/U basis only.

Credit Hour: 1-6
Prerequisites: junior standing and instructor's consent

AFNR 7190: International Agriculture/Natural Resources
This course is designed to provide students with an introduction into the agriculture/natural resources of the host country. Activities may include course work at an international institution, professional and personal development and special projects. Selected sections of the course may be offered on A-F or S/U basis only.

Credit Hour: 1-9
Prerequisites: advisor and instructor's consent

Anesthesiology (ANESTH)

ANESTH 6203: ABS Anesthesiology Research
ABS Anesthesiology Research
Credit Hour: 5-10

ANESTH 6205: ABS Anesthesiology Research and Review
ABS Anesthesiology Research and Review
Credit Hour: 5-10

ANESTH 6400: Anesthesiology
Goals/Objectives: The goals are providing students with opportunities to: 1. Understand the anesthetic state (e.g., the inability of a person to protect themselves from the environment; concomitant and common depression of other systems of the body other than the nervous system). 2. Learn how to think and react quickly and correctly in times of stress. 3. Develop knowledge and skill at maintaining artificial ventilation and circulation. 4. Develop technical skills (e.g., insertion of endotracheal tubes, intravenous catheters). 5. Understand the rationale behind the choice of an anesthetic agent or technique. 6. Learn the function of an anesthesiologist as a perioperative physician and pain consultant. 7. Learn about the specialty of anesthesiology as a possible future career.
Notes: Curriculum: Direct participation in anesthetic evaluation and administration for surgical procedures is combined with close individual supervision. Attendance at weekly teaching conferences is expected. Each student will follow a patient pre, intra, and post operatively and write a case presentation. Interblock: First consideration given to students interested in anesthesia as a career choice; honors considered only with documentation of participation and completion of a research project related to anesthesia. Evaluations: Evaluations are compiled from daily encounter cards completed by anesthesia providers, a written paper that discusses one patient's anesthetic, and a 50 question written examination at the end of the rotation.

Credit Hour: 5

Animal Science (AN_SCI)

AN_SCI 1001: Topics in Animal Science
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

Credit Hour: 1-4
Prerequisites: departmental consent

AN_SCI 1011: Animal Science
Principles of animal science including importance of animal agriculture, genetics, anatomy, physiology and nutrition.

Credit Hours: 3

AN_SCI 1011H: Animal Science - Honors
Principles of animal science including importance of animal agriculture, genetics, anatomy, physiology and nutrition.

Credit Hours: 3
Prerequisites: Honors eligibility required

AN_SCI 1012: Introduction to Captive Wild Animal Management
(same as F_W 1012). General introduction to housing, husbandry, behavior, genetics, nutrition, reproduction, animal health, and disease control of native and exotic species in zoological parks and other animal conservation facilities; emphasizes the role of captive animals in wildlife conservation. Graded on A-F basis only.

Credit Hours: 3

AN_SCI 1013: Biotechnology in Animal Agriculture
Concepts, discoveries, and applications of biotechnology ranging from the discovery of brewing and baking to animal cloning and genetic engineering are covered. Students will acquire a foundation to understand how biotechnology affects agriculture and our everyday lives. Graded on A-F basis only.

Credit Hours: 3

AN_SCI 1065: Animal Science Laboratory Practicum
An introductory course in skill related to the care and management of livestock and poultry plus a section dealing with meats and a section dealing with research methods. Students will be expected to participate in hands-on learning development of fundamental skills and animal husbandry. This class will include one 3 hour lab and 1 hour DIS per week.

Credit Hours: 2

AN_SCI 1001: Topics in Animal Science
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

Credit Hour: 1-4
Prerequisites: departmental consent

AN_SCI 2085: Problems in Animal Science
Library and laboratory study of assigned problems in animal breeding, nutrition, physiology or production and management. Planning, conduction and reporting to be in consultation with instructor.
AN_SCI 2095: Equine Behavior and Training
Students learn the psychology and ethology of equine behavior and how it relates to training. The use and proper fitting of equipment is taught and students learn to teach horses to perform the basic movements needed prior to advancing to specialized training.

Credit Hours: 3
Prerequisites: AN_SCI 2095 and instructor’s consent

AN_SCI 2110: Global Animal Agriculture
Animal Agriculture as influenced globally by political, religious cultural, economic and climatic factors.

Credit Hours: 2
Prerequisites: sophomore standing

AN_SCI 2111: Sophomore Seminar: Societal Issues Facing Animal Agriculture
Course designed to introduce students to key issues facing animal agriculture. Assignments focus on reading current publications associated with issues affecting the animal agriculture industry. Graded on A-F basis only.

Credit Hours: 3

AN_SCI 2114: Live Animal and Meat Evaluation
(same as F_S 2114). The composition and quality meat produced from food animals is the driving component of livestock economic value. This course will teach the principles and procedures involved in evaluation, grading, selection, and economic value of meat animals and poultry and the carcasses they produce. This course is an excellent introduction and (or) prerequisite for all livestock production courses and will provide a baseline of information for students interested in livestock or meat judging.

Credit Hours: 3
Prerequisites: ENGLSH 1000

AN_SCI 2115: Livestock Judging
Comparative judging and evaluation; various classes of farm animals; particular reference to utility. Reference reading; illustrated lectures.

Credit Hours: 3
Prerequisites: AN_SCI 1065

AN_SCI 2131: Dairy Products Evaluation
(same as F_S 2131.) Sensory Evaluation and judging of dairy products.

Credit Hours: 2

AN_SCI 2135: Horse Selection and Evaluation
Techniques of selecting and evaluating horses based on conformation and performance characteristics. Effects of conformation on soundness. Includes learning to organize observations on the relative merits of a group of horses into an oral presentation.

Credit Hours: 2
Prerequisites: AN_SCI 1065

AN_SCI 2140: Companion Animals
(same as BIOMED 2140). Focus on companion dog, cat, and horse owners concerns re: health zoonoses, legal responsibilities, inbreeding, choice of breeds, behavioral problems and loss of companion animals.

Credit Hours: 3
Prerequisites: sophomore standing

AN_SCI 2165: Introduction to Ruminant Livestock Production
This is an introductory theory course which provides fundamental understanding of ruminant livestock - beef cattle and diary cattle, production, management and associate industries. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 1065

AN_SCI 2175: Introduction to Monogastric Production
Introductory course which provides fundamental understanding of hogs, horses and poultry. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 1065

AN_SCI 2195: Equine Facility Management and Marketing
Focuses on learning equine facility management through student care and management of the University’s equine facility and breeding herd. Students also learn handling techniques for a wide variety of horses and gain experience in general equine facility maintenance. Students will be responsible for marketing horses sold in the annual MU online horse auction. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 2135 and instructor’s consent. Cannot be taken at the same time as AN_SCI 2095

AN_SCI 3001: Topics in Animal Science
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

Credit Hour: 1-4
Prerequisites: department consent

AN_SCI 3085: Problems in Animal Science
Current problems in animal breeding, nutrition, livestock production and management, meats. Assigned topics. In some cases student may undertake a project by outlining objectives, planning work, keeping records and summarizing results in written report. Some sections may be graded either on S/U or A-F basis only.

Credit Hour: 1-6
Prerequisites: instructor’s consent

AN_SCI 3190: Study Abroad: International Meat, Dairy and Enology
(same as F_S 3190). This study abroad course introduces students to the meat, dairy and wine industries in Germany or in New Zealand (destinations are on a rotational basis). Students will visit small, medium and large-scale producers and learn about differences in comparisons to the US industries. May be repeated once for credit.
AN_SCI 3212: Principles of Animal Nutrition
The purpose of this course is to teach students the essential nutrients for animal life and to understand the basic principles of nutrition. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: instructor's consent

AN_SCI 3213: Genetics of Agricultural Plants and Animals
(same as PLNT_S 3213). Concepts of molecular, transmission, and population and quantitative genetics. Special emphasis given to breeding and biotechnological applications in plant and animal agriculture.
Credit Hours: 3
Prerequisites: 1 course in biochemistry or at least 4 hours of chemistry and MATH 1100 or equivalent

AN_SCI 3214: Principles of Meat Science
(same as F_S 3214). Study of the principles involved in the conversion of living animals to meat and by-products; efficient utilization of meat as a food.
Credit Hours: 3
Prerequisites: one course in Biology

AN_SCI 3231: Principles of Dairy Foods Science
(same as F_S 3231). Technology, chemistry and microbiology related to milk and its transformation into fluid milk products, fermented dairy foods and spreads. (2 hours of lecture and two hours of laboratory per week.)
Credit Hours: 3
Prerequisites: One course in Chemistry or Biological Sciences

AN_SCI 3232: Animal Feeds and Feeding
Description of feed ingredients, formulation of diets, and animal feeding management.
Credit Hours: 3
Prerequisites: AN_SCI 3212 and MATH 1100 or equivalent

AN_SCI 3255: Physiology of Domestic Animals Laboratory
This laboratory course covers the basic concepts of physiology as related to domestic animals.
Credit Hours: 2
Prerequisites: BIO_SC 1010 and BIO_SC 1020 or BIO_SC 1500; CHEM 1310 and CHEM 1320; AN_SCI 3254 or equivalent

AN_SCI 3275: Meat Animal Evaluation
Meat animal evaluation highlights the relationships and limitations that exist when evaluating market and breeding animals and develops an appreciation for carcass excellence as it relates to production, merchandising and consumption. Some travel time and commitments will be necessary.
Credit Hours: 2
Prerequisites: AN_SCI 2114 and AN_SCI 2115

AN_SCI 4001: Topics in Animal Science
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.
Credit Hour: 1-4
Prerequisites: instructor's consent

AN_SCI 4312: Monogastric Nutrition
(same as NEP 4020; cross-leveled with AN_SCI 4312 and NUTRIT 7020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: AN_SCI 3212

AN_SCI 4314: Physiology of Reproduction
(cross-leveled with AN_SCI 7314). Principles of animal reproduction with emphasis on endocrine control of reproductive processes.
Credit Hours: 3
Prerequisites: AN_SCI 3254 and BIO_SC 1500 or equivalent; or AN_SCI 3254 as a co-requisite and instructor’s consent

AN_SCI 4314H: Physiology of Reproduction - Honors
Principles of animal reproduction with emphasis on endocrine control of reproductive processes. Honors eligibility required
Credit Hours: 3
Prerequisites: AN_SCI 3254 and BIO_SC 1500 or equivalent; or AN_SCI 3254 as a co-requisite and instructor’s consent. Honors eligibility required

AN_SCI 4323: Applied Livestock Genetics
Genetic principles applied to improvement of farm animals. Covers selection, prediction of genetic merit and mating systems. Math Reasoning Proficiency Course.
Credit Hours: 2
Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500 and MATH 1100
AN_SCI 4324: Genomics of Plants and Animals
Analysis of organisms at the level of the complete genome sequence. Covers genome sequencing, assembly and annotation, as well as functional, evolutionary and computational genomics.
Credit Hours: 2
Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500, MATH 1100, AN_SCI 3213 / PLNT_S 3213 or equivalent

AN_SCI 4332: Ruminant Nutrition
(cross-leveled with AN_SCI 7332). Physiology, chemistry, microbiology and pathology of ruminants. Emphasizes the digestion, absorption, metabolism and utilization of nutrients.
Credit Hours: 3
Prerequisites: AN_SCI 3212

AN_SCI 4344: Processing Muscle Foods
(same as F_S 4344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility.
Credit Hours: 3
Prerequisites: One Chemistry course

AN_SCI 4354: Physiology and Biochemistry of Muscle as Food
(same as F_S 4354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.
Credit Hours: 3
Prerequisites: BIO_SC 1010 or equivalent or AN_SCI 3214 or instructor’s consent

AN_SCI 4384: Reproductive Management
Reproductive management of cattle, swine and sheep; estrous synchronization; artificial insemination; embryo development and transfer; assisted reproductive technologies.
Credit Hours: 3
Prerequisites: senior standing and AN_SCI 4314 and instructor’s consent

AN_SCI 4377: Horse Production
(cross-leveled with AN_SCI 7977). Systems of horse production: breeding, feeding and management of horses.
Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor’s consent

AN_SCI 4910: Senior Seminar in Captive Wild Animal Management
(same as F_W 4910). Investigates key issues in captive wild animal management, focusing on the role of animal caretakers in addressing the issues. Students are required to formulate informed opinions regarding these topics and communicate effectively about the subject matter. Graded A-F only.
Credit Hour: 1
Prerequisites: AN_SCI 1012 or F_W 1012 or instructor’s consent; junior or senior standing

AN_SCI 4940: Internship in Animal Science & Technology
Off-campus training to develop technical skills and understanding of an area of animal science. Written reports required. Graded on an S/U basis only.
Credit Hour: 1-12
Prerequisites: instructor’s consent

AN_SCI 4950: Undergraduate Research in Animal Science
Individually directed field or laboratory research culminating in a poster or oral presentation for upper-class students under faculty supervision.
Credit Hour: 1-3
Prerequisites: At least sophomore standing or instructor’s consent

AN_SCI 4975: Beef Production and Management
(cross-leveled with AN_SIC 7975). Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle.
Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2165 and AN_SCI 3212, and AN_SCI 3232 or instructor’s consent

AN_SCI 4976: Dairy Production
Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects.
Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2165, AN_SCI 3212, and AN_SCI 3232 or instructor’s consent

AN_SCI 4977: Horse Production
(cross-leveled with AN_SCI 7977). Systems of horse production: breeding, feeding and management of horses.
Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor’s consent

AN_SCI 4973: Molecular and Cellular Techniques in Animal Science
A directed research project that employs current molecular and cellular technologies. Students will generate experimental data, analyze the data and draft a research report in the format of a scientific paper.
Credit Hours: 4
Prerequisites: an introductory course in biology and a course in organic chemistry, at least junior standing and instructor’s consent

AN_SCI 4970: Undergraduate Research in Animal Science
Individually directed field or laboratory research culminating in a poster or oral presentation for upper-class students under faculty supervision.
Credit Hour: 1-3
Prerequisites: At least sophomore standing or instructor’s consent

AN_SCI 4976: Dairy Production
Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects.
Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2165, AN_SCI 3212, and AN_SCI 3232 or instructor’s consent

AN_SCI 4977: Horse Production
(cross-leveled with AN_SCI 7977). Systems of horse production: breeding, feeding and management of horses.
Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor’s consent

| AN_SCI 4978 | Swine Production | Systems of pork production: breeding, feeding, management of commercial and purebred swine.  
Credit Hours: 3  
Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent |
| AN_SCI 7332 | Ruminant Nutrition | (cross-leveled with AN_SCI 4332). Physiology, chemistry, microbiology and pathology of ruminants. Emphasizes the digestion, absorption, metabolism and utilization of nutrients.  
Credit Hours: 3  
Prerequisites: AN_SCI 3212 |
| AN_SCI 4979 | Poultry Production | (cross-leveled with AN_SCI 7979). Principles of housing systems, nutrition, management, business and production of commercial chickens and turkeys.  
Credit Hours: 3  
Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent |
| AN_SCI 7344 | Processing Muscle Foods | (same as F_S 7344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility.  
Credit Hours: 3  
Prerequisites: one Chemistry course |
| AN_SCI 7001 | Topics in Animal Science | Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.  
Credit Hour: 1-4  
Prerequisites: instructor's consent |
| AN_SCI 7312 | Monogastric Nutrition | (same as NUTRIT 7020 and NEP 7020; cross-leveled with AN_SCI 4312 and NEP 4020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.  
Credit Hours: 3  
Prerequisites: AN_SCI 3212 |
| AN_SCI 7314 | Physiology of Reproduction | (cross-leveled with AN_SCI 4314). Principles of animal reproduction with emphasis on endocrine control of reproductive processes.  
Credit Hours: 3  
Prerequisites: AN_SCI 3254 and BIO_SC 1500 or equivalent; or AN_SCI 3254 as a co-requisite and instructor's consent |
| AN_SCI 7323 | Reproductive Management | Reproductive management of cattle, swine and sheep; estrous synchronization; artificial insemination; embryo development and transfer; assisted reproductive technologies.  
Credit Hours: 3  
Prerequisites: AN_SCI 4314 and instructor's consent |
| AN_SCI 7354 | Physiology and Biochemistry of Muscle as Food | (same as F_S 7354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.  
Credit Hours: 3  
Prerequisites: BIO_SC 1010 or equivalent or AN_SCI 3214 or instructor's consent |
| AN_SCI 7347 | Environmental Physiology | Principles of environmental physiology and animal adaptation with emphasis on mechanisms of temperature regulation and related nutritional and metabolic-hormonal functions.  
Credit Hours: 3  
Prerequisites: AN_SCI 3254 or equivalent |
| AN_SCI 7975 | Beef Production and Management | (cross-leveled with AN_SCI 4975). Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle.  
Credit Hours: 3  
Prerequisites: AN_SCI 1065, AN_SCI 2165 and AN_SCI 3212 or instructor's consent |
| AN_SCI 7976 | Dairy Production | Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects.  
Credit Hours: 3  
Prerequisites: AN_SCI 1065, AN_SCI 2165, AN_SCI 3212 and AN_SCI 3232 or instructor’s consent |
AN_SCI 7977: Horse Production
(cross-leveled with AN_SCI 4977). Systems of horse production: breeding, feeding and management of horses.
Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent

AN_SCI 7978: Swine Production
Systems of pork production: breeding, feeding, management of commercial and purebred swine.
Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent

AN_SCI 7979: Poultry Production
(cross-leveled with AN_SCI 4979). Principles of housing systems, nutrition, management, business and production of commercial chickens and turkeys.
Credit Hours: 3
Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent

AN_SCI 8085: Problems in Animal Science
Advanced independent studies in fields not directly related to thesis or non-thesis degree research program. May be graded on S/U or A-F basis only.
Credit Hour: 1-6
Prerequisites: instructor's consent

AN_SCI 8087: Seminar in Animal Science
Critical consideration of research and other selected subjects in animal breeding, animal nutrition, reproductive physiology, growth and development and livestock production and management.
Credit Hour: 1

AN_SCI 8090: Thesis Research in Animal Science
Investigations in animal breeding, animal nutrition, reproduction physiology, growth and development livestock production and management. Graded on a S/U basis only.
Credit Hour: 1-99

AN_SCI 8413: Reproductive Biology Seminar
Presentation and discussion of selected topics from all phases of reproductive biology. Open to qualified students of graduate standing in the field of Reproductive Biology.
Credit Hour: 1

AN_SCI 8414: Meat Quality
(same as F_S 8414). Discussion of factors affecting meat quality in beef, pork, lamb and poultry. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: AN_SCI 3214 or equivalent

AN_SCI 8415: Survey of Epigenetics
This course will introduce graduate students to the basic concepts in epigenetics, including DNA methylation, histone modifications, epigenetic modifiers/transacting factors, non-coding RNAs, genomic imprinting, and dosage compensation. The courses designed to be a combination of lectures, paper discussions, and research talks by invited faculty speakers from across campus.
Credit Hours: 3
Prerequisites: instructor's consent

AN_SCI 8420: Endocrinology
Hormones of pituitary and endocrine glands; special reference to influence on growth, reproduction, milk secretion.
Credit Hours: 3
Prerequisites: AN_SCI 7314 or equivalent

AN_SCI 8424: Meat Investigations
(same as F_S 8424). Discussions of scientific literature and hands-on experimentation with research techniques customarily used in the field of meat science. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: F_S 3214 /AN_SCI 3214 or equivalent; instructor's consent

AN_SCI 8430: Introduction to Bioinformatics Programming
This course provides the basics of programming and database development to students in the life sciences who have little prior programming experience. It covers Unix/Linux, Perl, MySQL, the relational database design process, and common data formats used in genome informatics. Students will learn how programming skills can enhance their ability to analyze large biological datasets, and will gain hands on experience with examples focused on genomics and bioinformatics. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: Instructor's consent
Recommended: Undergraduate or graduate course in Genetics

AN_SCI 8431: Nutritional Biochemistry of Lipids
(Same as NEP 8310 and NUTRIT 8310). Current concepts in the nutritional regulations of lipid metabolism. Emphasis on integrating information and interpreting current research data.
Credit Hours: 3
Prerequisites: BIOCHM 4270 and BIOCHM 4272

AN_SCI 8438: Nutrient Regulation of Gene Expression
(Same as NUTRIT 8438, NEP 8438 and BIOCHM 8438). This second semester of the graduate nutritional sciences core curriculum will cover nutritional biochemistry of minerals and on research literature, with an emphasis on in-depth coverage of several minerals that illustrate emerging themes in mineral nutritional biochemistry and nutrient regulation of gene expression. The course will be taught in tutorial format.
Credit Hours: 3
Prerequisites: BIOCHM 4270 and BIOCHM 4272 and 1st semester Graduate Nutrition core curriculum
AN_SCI 8441: Livestock Production and Management Research Methods
Techniques of experimentation, with application to livestock production and management. Exercises in methods of planning, conducting, analyzing, evaluating and reporting research.
Credit Hours: 3
Prerequisites: STAT 4530/STAT 7530 or equivalent or instructor’s consent

AN_SCI 8443: Functional Genomics of Mammalian Genomes: Focus on Microarray
The curriculum covers methods for functional genomics. It explores experimental designs, data filtering, ANOVA analysis, power calculations, clustering and classification systems, and functional annotation of genes through lectures, and bioinformatics and regular laboratories. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: BIO_SC 4974 and BIO_SC 4374 or equivalent courses, Anova analysis course (STAT 7530) or equivalent experience in using Anova analysis

AN_SCI 8447: Recent Advances in Environmental and Endocrine Physiology
Seminar. Presentation, discussion, and critical evaluation of current status of selected topics in environmental and endocrine physiology.
Credit Hour: 1
Prerequisites: AN_SCI 3254 or equivalent

AN_SCI 8450: Research in Animal Science
Research in Animal Science
Credit Hour: 1-99

AN_SCI 8472: Amino Acid Metabolism
An in-depth study of amino acid metabolism and their relationship to animal nutrition.
Credit Hours: 2
Prerequisites: BIOCHM 4270 and BIOCHM 4272

AN_SCI 8633: Molecular and Network Evolution
(same as BIO_SC 8633). Evolution of biological macromolecules and networks, including sequence analysis algorithms and theory, phylogenetics, gene duplication, genome evolution, principles of biological networks. Development of computational skills emphasized.
Credit Hours: 3
Prerequisites: Instructor’s consent required

AN_SCI 8725: Science Outreach: Public Understanding of Science
(same as BIO_SC 8725, PHYSCS 8350 and LTC 8725). Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.
Credit Hour: 1-2

AN_SCI 9001: Topics in Animal Science
Credit Hour: 1-99

AN_SCI 9090: Dissertation Research in Animal Science
Investigations in animal breeding, animal nutrition, livestock production and management. Dissertation required. Graded on a S/U basis only.
Credit Hour: 1-99

AN_SCI 9423: Genetics of Populations
Introduction to quantitative genetics with application to animal and plant breeding.
Credit Hours: 4
Prerequisites: STAT 4530 or STAT 7530

AN_SCI 9432: Ruminant Nutrition
(same as NUTRIT 8320). Physiology, chemistry, microbiology, pathology of ruminants. Emphasizes digestion, absorption, metabolism, utilization of nutrients. Lecture, laboratory, assigned readings.
Credit Hours: 3
Prerequisites: AN_SCI 4332/AN_SCI 7332 or equivalent and BIOCHM 4270

AN_SCI 9433: Gamete and Embryo Development
A classical and molecular approach to spermatogenesis, oogenesis, fertilization and preimplantation development in the domestic species.
Credit Hours: 3
Prerequisites: AN_SCI 4314/AN_SCI 7314 or BIO_SC 4984 or equivalent

AN_SCI 9434: Gonadal Function
(same as BIOMED 9434).
Credit Hours: 3
Prerequisites: AN_SCI 4314, biochemistry or cell biology and AN_SCI 8420

AN_SCI 9435: Placentation
Provide students with current and in-depth information about the mechanisms involved in placental development and how the placenta (and placental products) influence maternal physiology - both locally at the placenta-uterine interface and systemically. All course topics will be covered in a comparative cross-species approach whenever possible. Emphasis will be placed on the most recent literature regarding the interactions taking place between the placenta and maternal system and how these interactions lead to the eventual birth of live young.
Credit Hours: 3
Recommended: It is preferred that students take AN_SCI 9433 prior to this class, but this is not an absolute requirement

AN_SCI 9441: Bioenergetics
(same as NUTRIT 8400). Energetic interactions of animals and their physical and nutritional environments.
Credit Hours: 3
Prerequisites: instructor’s consent
AN_SCI 9442: Vitamins and Minerals
Designed to provide students with an understanding of the chemical, metabolic, and functional role of vitamins and minerals in nutrition. While the primary focus will be on animals, comparative aspects to human nutrition will be discussed.
Credit Hours: 4
Prerequisites: AN_SCI 3212, BIOCHM 4270 or equivalent

ANTHRO 1004: Topics in Anthropology - Social Science
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 1005: Topics in Anthropology - Humanities
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 1060: Human Language
(same as LINGST 1060, C_S_D 1060 and ENGLSH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data with some attention to application of linguistic study to other disciplines.
Credit Hours: 3

ANTHRO 1150: Introduction to Folklore Genres
(same as ENGLSH 1700). Course focus is on genres of folklore in both historic and contemporary contexts, as well as in people's daily lives. Genres include narrative, proverbs, oral poetry and rhyme, riddles, jokes, legends, epics, material culture and intangible expressive culture. Graded on A-F basis only.
Credit Hours: 3

ANTHRO 1200: Significant Discoveries of Archaeology
Detailed consideration of approximately 20 archaeological discoveries and conclusions, from the field and the laboratory, which have been of surpassing importance for an understanding of human origins, behavior, culture and past experiences on earth.
Credit Hours: 3

ANTHRO 1300: Multiculturalism: An Introduction
Examines contemporary multiculturalism (and its origins) globally; introduces key concepts; uses diverse, extended cross-cultural and American examples; and emphasizes complexity of cultures, practicality of issues, and change.
Credit Hours: 3

ANTHRO 1350: Deviance: A Cross-Cultural Perspective
Cross-cultural studies of problem behavior with emphasis on violence, suicide, sexual misconduct, drug use and mental disorder.
Credit Hours: 3

ANTHRO 1500: Monkeys, Apes and Humans
For those with little or no background in anthropology. Surveys the ecology and behavior of major nonhuman primate groups, and how these relate to the evolution of human behavior.
Credit Hours: 3
ANTHRO 2001: Topics in Anthropology-General
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 2002: Topics in Anthropology-Biological/Physical/ Mathematics
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 2003: Topics in Anthropology - Behavioral
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 2004: Topics in Anthropology - Social Science
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 2005: Topics in Anthropology - Humanities
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hour: 1-3

ANTHRO 2020: Fundamentals of Archaeology with Laboratory
Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. The lab involves hands-on experience with archaeological materials. No credit for both ANTHRO 2020 and ANTHRO 2021.
Credit Hours: 4
Recommended: sophomore standing

ANTHRO 2021: Fundamentals of Archaeology
Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. No credit for both ANTHRO 2020 and ANTHRO 2021.

Credit Hours: 3
Recommended: sophomore standing

ANTHRO 2022: Fundamentals of Archaeology Lab
Involves hands-on experience with archaeological materials. No credit given to students who have taken ANTHRO 2020.
Credit Hour: 1
Prerequisites: must have completed ANTHRO 2021

ANTHRO 2030: Cultural Anthropology
Analysis of human cultures with emphasis on both constant and variable factors at different levels of social complexity; contact between cultures, and cultural influences on individual behavior.
Credit Hours: 3
Recommended: Sophomore standing

ANTHRO 2040: Anthropological Linguistics
(same as LINGST 2040). Language in relation to other aspects of human behavior. Introduction to description and analysis of the basic units of language. Emphasis on non-Indo-European and preliterate languages.
Credit Hours: 3
Recommended: Sophomore standing

ANTHRO 2050: Introduction to Biological Anthropology with Laboratory
A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. Three hours lecture and two hours lab. No credit for both ANTHRO 2050 and ANTHRO 2051. Math Reasoning Proficiency Course.
Credit Hours: 5
Prerequisites: MATH 1100
Recommended: sophomore standing

ANTHRO 2051: Introduction to Biological Anthropology
A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. No credit for both ANTHRO 2050 and ANTHRO 2051.
Credit Hours: 3
Recommended: Sophomore standing

ANTHRO 2052: Biological Anthropology Laboratory
Laboratory exercises dealing with human genetics, non-human primates, the human fossil record, and human variation. Credit not given for students who have taken ANTHRO 2050. Math Reasoning Proficiency Course.
Credit Hours: 2
Prerequisites: ANTHRO 2051 (or equivalent) and MATH 1100

ANTHRO 2100: Indigenous Religions
(same as REL_ST 2100). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.
ANTHRO 2100H: Indigenous Religions - Honors
(same as REL_ST 2100H). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.
Credit Hours: 3
Prerequisites: Honors eligibility required

ANTHRO 2150: Introduction to Folklore Field Research
(same as ENGLISH 2700). Course will focus on the specifics of how to identify, collect, preserve and document folklore within communities.
Credit Hours: 3
Prerequisites: ENGLISH 1000

ANTHRO 2215: World Archaeology
Major events in cultural evolution such as control of fire, invention of ceramic and metallurgical technologies, colonization of Australia and the Americas, development of agriculture, and emergence of complex sociopolitical organization are described in all regions of the world.
Credit Hours: 3
Recommendation: Sophomore standing

ANTHRO 2300: Anthropology of War
Anthropological approaches to tribal and modern war; theories of war's origins; relation to ecology, economy, gender, belief systems, politics; transformation of tribal warfare by state expansion; peace.
Credit Hours: 3
Recommendation: Sophomore standing

ANTHRO 2340: Hunters and Gatherers
Exploration of how different hunter-gatherer groups interact with their physical and social environment. Topics include food acquisition, allocation of labor, reproduction and family life, and deciding where to live and when to move.
Credit Hours: 3
Recommendation: Sophomore standing

ANTHRO 2500: Primate Anatomy and Evolution
This course will explore why primates (and humans) are built the way they are, how they evolved, and what their anatomy tells us about their biology. We will cover basic primate anatomy and ecology, and then survey the fossil record of primate evolution.
Credit Hours: 3
Recommendation: Sophomore standing

ANTHRO 2520: Forensic Anthropology
This course will introduce students to how biological anthropologists apply expertise in human osteology, skeletal variation and plasticity, skeletal pathology, body decomposition, and archaeological recovery of evidence to medicolegal investigations.
Credit Hours: 3
Recommendation: Sophomore standing

ANTHRO 2570: Parents and Offspring
A comparative investigation of the evolution of parental behaviors and family interactions in humans and other primates.
Credit Hours: 3
Recommendation: Sophomore standing

ANTHRO 2580: Evolution of Human Sexuality
Biological and cultural aspects of human reproduction are examined from the perspective of evolutionary and ecological theory.
Credit Hours: 3
Recommendation: Sophomore standing

ANTHRO 2800: Introduction to Field Methods in Archaeology
Techniques of field research and laboratory analysis through field experience.
Credit Hours: 1-6
Prerequisites: ANTHRO 2020 or ANTHRO 2021 or instructor's consent

ANTHRO 2825: Analyzing Artifacts
A brief introduction to the main methods used to analyze artifacts.
Credit Hours: 3

ANTHRO 2950: Research Skills in Anthropology
Participation in faculty research activities. Course coordinator matches students with participating faculty. Three hours of research activities per week per credit hour. May be repeated to a maximum of nine hours.
Credit Hours: 1-3
Prerequisites: Instructor's consent

ANTHRO 3001: Topics in Anthropology - General
Problems, topics, issues, or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 3002: Topics in Anthropology-Biological/Physical/Mathematics
Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 3003: Topics in Anthropology - Behavioral Science
Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 3004: Topics in Anthropology - Social Science
Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.
Credit Hours: 3
ANTHRO 3005: Topics in Anthropology - Humanities
Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 3150: American Folklore
(same as ENGLISH 3700). Regional and ethnic American folklore, with emphasis on analysis of folklore in context. Book reports and two analytical papers based on student field research required.
Credit Hours: 3

ANTHRO 3340: Human Nature
We will investigate the topic of human nature, asking such questions as: What are we like? Why do we behave the way we do? Are we inherently selfish or social? Do we have a unitary "self" or are we made up of many (and sometimes contradictory) selves? Is there a single "human" nature or are there distinct "male" and "female" natures? Does human nature vary across cultures? Insights come from fields ranging from genetics to literature. The concept of "human nature" is fiercely contested and debated both within and between academic disciplines. We will be focusing on the scientific study of human nature, seeking naturalistic explanations by formulating and testing hypotheses. In particular, we will use evolutionary theory to unify explanations from disparate disciplines like biology, psychology, and anthropology. In each class, we will discuss one specific topic like sex or violence and seek to make sense of it from both the proximate level (what triggers the behavior and how does it develop?) and the ultimate level (why and how did our evolutionary history imbue us with the capacity?). Graded on A-F basis only.
Credit Hours: 3

ANTHRO 3340H: Human Nature - Honors
(same as GN_HON 3241H). We will investigate the topic of human nature, asking such questions as: What are we like? Why do we behave the way we do? Are we inherently selfish or social? Do we have a unitary "self" or are we made up of many (and sometimes contradictory) selves? Is there a single "human" nature or are there distinct "male" and "female" natures? Does human nature vary across cultures? Insights come from fields ranging from genetics to literature. The concept of "human nature" is fiercely contested and debated both within and between academic disciplines. We will be focusing on the scientific study of human nature, seeking naturalistic explanations by formulating and testing hypotheses. In particular, we will use evolutionary theory to unify explanations from disparate disciplines like biology, psychology, and anthropology. In each class, we will discuss one specific topic like sex or violence and seek to make sense of it from both the proximate level (what triggers the behavior and how does it develop?) and the ultimate level (why and how did our evolutionary history imbue us with this capacity?). Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Honors eligibility required

ANTHRO 3380: Native American Religions
(same as REL_ST 3380). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts.
Credit Hours: 3

ANTHRO 3380H: Native American Religions - Honors
(same as REL_ST 3380H). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts.
Credit Hours: 3
Prerequisites: Honors eligibility required

ANTHRO 3470: Culture as Communication
(same as COMMUN 3470, LINGST 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction.
Credit Hours: 3

ANTHRO 3490: Indian Cinema
(same as AR_H_A 3790, S_A_ST 3490 and FILM_S 3490). Indian Cinema provides an overview of the key genres and themes of Indian film, including Bollywood, art cinema/parallel cinema, Indian regional cinemas, and diasporan cinema. The course combines film studies, anthropological, historical, and visual culture analyses to provide a holistic view of Indian culture and society through cinema.
Credit Hours: 3
Prerequisites: Sophomore standing or higher

ANTHRO 3540: Human Biology and Life History
A general survey of human biology, focusing on the development of the individual from infancy to adult and the biology of human populations.
Credit Hours: 3
Prerequisites: one course in Anthropology or Biological Sciences

ANTHRO 3560: Plagues and Peoples
Overview of the ecology of human host-pathogen interactions and the influence of human culture on the transmission and spread of infectious diseases through time and in different environments.
Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent

ANTHRO 3600: North American Indian Culture
Comparative study of American Indians north of Mexico, emphasizes eastern United States.
Credit Hours: 3

ANTHRO 3610: Peoples of Canada
This course provides an anthropological approach to the culture and peoples of Canada. The course will include in depth studies of several First Nations People, Quebec, various recent immigrant populations, and the modern popular culture of Canada.
ANTHRO 3650: Aztec, Maya, and Inca Civilization
Origin of native Americans and development of American civilizations emphasizing Aztecs, Mayas, and Incas; rise of these civilizations known from archaeology, early European and early native American accounts, and the condition of the descendants today.

Credit Hours: 3
Prerequisites: sophomore standing

ANTHRO 3660: Peoples of the Andes
Archaeological and linguistic prehistory set the stage for the clash of Iberian and indigenous peoples whose descendants make up the Andean countries. Ethnographic studies provides a basis for their understanding.

Credit Hours: 3
Prerequisites: sophomore standing

ANTHRO 3680: Plants and People in Native America
Explores the present and past interactions between people and the plant world, covering use of plants as foods, medicines, and in rituals, and reviewing the origin of major food plants.

Credit Hours: 3
Prerequisites: sophomore standing

ANTHRO 3700: Cultures of Europe
Examines ethnic, linguistic, and folk cultural backgrounds of contemporary Europe and the articulation of local sociocultural units with national society and culture.

Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent

ANTHRO 3780: Cultures of Southeast Asia
Survey of peoples and cultures of Southeast Asia; topics include regional geography and prehistory, European colonialism, economic and social organization, religious practices, changing status of women, urban and rural poverty, and environmental transformations.

Credit Hours: 3

ANTHRO 4001: Topics in Anthropology-General
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4003: Topics in Anthropology - Behavioral Science
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4004: Topics in Anthropology - Social Science
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4005: Topics in Anthropology - Humanities
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4150: Special Themes in Folklore
Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. May be repeated for a maximum of six hours with department’s consent.

Credit Hours: 3
Prerequisites: junior standing

ANTHRO 4160: Themes in African Diaspora Folklore
Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. ANTHRO 4150 and ANTHRO 4160 may be repeated for a maximum of six hours with instructor’s consent.

Credit Hours: 3

ANTHRO 4200: Environment and Archaeology
Study of Quaternary environments and cultural systems. Focuses on North American records emphasizing climate and biologic components of regional ecosystems; regional environmental reconstruction.

Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2021 or instructor’s consent

ANTHRO 4240: History of Archaeology
Growth of archaeology worldwide since AD 1700. Emphases include intellectual and theoretical developments, field and laboratory techniques, and major figures in the history of the discipline.

Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2021 or instructor’s consent

ANTHRO 4280: Archaeology of Religion
Intensive study of the states of religious ideas and religious behavior in a specified cultural area. May be repeated for a maximum of six hours with department’s consent.

Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2021 or instructor’s consent

ANTHRO 4280: Archaeology of Religion
Intensive study of the states of religious ideas and religious behavior in a specified cultural area. May be repeated for a maximum of six hours with department’s consent.

Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2021 or instructor’s consent
to examine past religious behavior, rituals, religious practitioners, cosmogonical constructs, worldview and ideology in the Americas.

Credit Hours: 3  
Prerequisites: ANTHRO 2020 and/or REL_ST 2100

ANTHRO 4300: Comparative Social Organization  
Cross-cultural comparison, analysis of social structures. Role of kinship, age, sex, locality, economics, religion and other factors in determining relationships between individuals and groups cross-culturally.

Credit Hours: 3  
Prerequisites: ANTHRO 2030 or instructor's consent

ANTHRO 4320: Ecological and Environmental Anthropology  
Cultural anthropological approaches to human-environment interaction; cultural adaptations to diverse environments; theoretical developments and current issues; cultural, social, and historical contexts of natural resource use.

Credit Hours: 3  
Prerequisites: junior or senior standing or instructor’s consent

ANTHRO 4340: Cultural Evolution and Change  
(cross-leveled with ANTHRO 7340). Alternative hypotheses about the relationship between culture and evolution are evaluated in light of ethnographic evidence.

Credit Hours: 3  
Prerequisites: ANTHRO 2030 or instructor’s consent

ANTHRO 4350: Psychological Anthropology  
Examines cross-cultural approaches to the study of perception, cognition, and personality; methods for gathering and validating data; examples from non-Western societies.

Credit Hours: 3  
Prerequisites: ANTHRO 2030 or instructor’s consent

ANTHRO 4360: Medical Anthropology  
Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. Several non-Western health care systems are studied in detail.

Credit Hours: 3  
Prerequisites: junior or senior standing or instructor’s consent

ANTHRO 4370: Anthropology of Gender  
(same as WGST 4370). The Anthropology of Gender introduces the student to the variation in the relationships between male and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

Credit Hours: 3

ANTHRO 4380: Anthropological Theories of Religion  
(same as REL_ST 4380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology, and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today.

Credit Hours: 3  
Prerequisites: ANTHRO 2030, ANTHRO 2100 or REL_ST 2100, or instructor’s consent

ANTHRO 4400: Language and Culture  
(same as LINGST 4400). Interrelations between language, thought, culture, and society; role of language in cognition; methods and concepts of linguistics in cultural analysis.

Credit Hours: 3  
Prerequisites: ANTHRO 2040 or LINGST 2040 or instructor’s consent

ANTHRO 4412: Gender, Language, and Communication  
(same as COMMUN 4412 and LINGST 4412). Relationship among gender, language, nonverbal communication, and culture.

Credit Hours: 3  
Prerequisites: junior standing or departmental consent

ANTHRO 4420: Historical Linguistics  
(same as LINGST 4420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.

Credit Hours: 3  
Prerequisites: junior or senior standing or instructor’s consent

ANTHRO 4500: Human Origins  
(cross-leveled with ANTHRO 7500). History and theory in the study of human paleontology.

Credit Hours: 5  
Prerequisites: ANTHRO 2050 or ANTHRO 2052 or instructor’s consent

ANTHRO 4520: Functional Morphology of the Human Skeleton  
(cross-leveled with ANTHRO 7520). This course will explore human functional morphology in a broad sense, i.e. will investigate how the form of various bodily systems influences their function and vice versa. In addition, the course is explicitly evolutionary in perspective; after the basic anatomy and function of a specific bodily region is introduced, we will cover how this functional unit has changed over the course of human evolutionary history. Lastly, we will be using the knowledge gained in lecture and from the text to critically analyze examples of research in human functional morphology. Graded on A-F basis only.

Credit Hours: 3

ANTHRO 4540: Human Biological Variation  
Human biological variation both among and within living populations. Evolutionary, genetic, ecological, demographic and especially cultural factors which contribute to biological variation.

Credit Hours: 3  
Prerequisites: ANTHRO 2050 or ANTHRO 2051 or BIO_SC 1010 and MATH 1100 or MATH 1120
ANTHRO 4580: Evolutionary Medicine
Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class.
Credit Hours: 3
Prerequisites: lower level course in Biology or Biological Anthropology, junior or senior standing or instructor's consent

ANTHRO 4600: Ethnographic Studies of Selected Cultures
Specific content varies with student interest, faculty availability. Will concentrate on peoples and cultures of one area such as East Asia, South Asia, Africa, North America, Mesoamerica, Oceania, Europe. Amplifies ethnographic knowledge gained in lower-level survey courses.
Credit Hours: 3
Prerequisites: junior standing or instructor's consent

ANTHRO 4620: North American Archaeology
Ancient peoples and development of American Indian culture.
Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2021 or instructor's consent

ANTHRO 4640: Prehistory of the Greater Southwest
The course will introduce students to the archaeology of aboriginal peoples of the American Southwest and northwestern Mexico. The emphasis will be on prehistoric culture development from the Paleoindians to the arrival of the Spanish. Ethnographic and modern peoples will be discussed as well.
Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2021

ANTHRO 4650: Prehistory of Mesoamerica
Archaeology and prehistory of Mesoamerica (Mexico and Northern Central America). Emphasis on archaeological evidence for development of human societies from late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s.
Credit Hours: 3

ANTHRO 4670: Archaeology of South America
Development of culture in South America from the Pleistocene to European contact.
Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2021, or junior or senior standing

ANTHRO 4680: Cultures and Peoples of the Amazon
Ethnographic survey of indigenous Amazonian cultures.
Credit Hours: 3
Prerequisites: Junior standing required

ANTHRO 4720: Mesolithic, Neolithic, and Bronze Age Archaeology
Analysis of both hunter-gatherer and food-producing prehistoric sociocultural systems in western Eurasia and adjacent areas from the end of the Pleistocene until the development of iron metallurgy. Includes the symbolic material of these periods.
Credit Hours: 3
Prerequisites: junior or senior standing or instructor's consent

ANTHRO 4740: Celtic and Iron Age Archaeology
Analysis of the pre-and protohistoric sociocultural systems of the Celts and other iron-using tribal cultures of western Eurasia from the inception of an iron based technology until the full historic period. Includes the symbolic material of these cultures.
Credit Hours: 3
Prerequisites: junior or senior standing or instructor's consent

ANTHRO 4770: Asiatic Prehistory
Prehistory and early cultures of Asia excluding the Near East. Emphasis on Northern Asia, China, Japan, South and Southeast Asia and Oceania.
Credit Hours: 3
Prerequisites: junior or senior standing or instructor's consent

ANTHRO 4790: Culture and Society in South Asia
(same as S_A_ST 4790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include cast, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian diaspora.
Credit Hours: 3
Prerequisites: junior standing

ANTHRO 4800: Field Methods in Archaeology
Techniques of archaeological excavation; field surveying, recording, care and interpretation of materials.
Credit Hour: 1-8
Prerequisites: ANTHRO 2800 or equivalent

ANTHRO 4810: Paleoethnobotany
Application of ethnobotanical approaches in archaeology; techniques to recover and interpret floral remains (macroremains, phytoliths, pollen); research questions in ethnobotany; integration of ethnobiological and archaeological data. Critique of original works in the field emphasized.
Credit Hours: 3
Prerequisites: junior or senior standing or instructor’s consent

ANTHRO 4820: Zooarchaeology
Survey of specialized techniques for archaeological faunal analysis, including zooarchaeological sampling, taphonomy, study of paleoecology, and recognition of domestication.
Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2022 or instructor’s consent
ANTHRO 4826: Stone Artifact Analysis
Theory, methods, and techniques of studying lithic artifacts and deriving culturally meaningful interpretations. Emphasizes flaked artifacts. Includes physical examination, manufacture and experimentation with stone tools.
Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2022 or instructor’s consent

ANTHRO 4828: Archaeological Analysis of Ceramics
To introduce students to the basic methods and concepts used in the archaeological analysis of pottery. By the end of the semester students will understand the various ways that pottery is created and how archaeologists can use ceramics to gain insights into everything from the organization of craft production to trade to symbolism.
Credit Hours: 3
Prerequisites: ANTHRO 2020 and/or ANTHRO 2022

ANTHRO 4830: Ethnographic Methods
Relation of problems to techniques; surveys techniques of gathering data; discusses their limitations and potentials.
Credit Hours: 3
Prerequisites: ANTHRO 2030 or instructor’s consent

ANTHRO 4840: The Comparative Method in Anthropology
(cross-leveled with ANTHRO 7840). Comparative methods provide common ground for uniting bio-cultural anthropologists, archaeologists, and evolutionary biologists together in the investigation of human variation across time and space. It is an exciting time for comparative anthropology with the emergence of a large number of open-access databases covering many realms of biological, cultural, and linguistic variation. This class addresses many research opportunities that are opened up by these large collaborative efforts. Objectives are to develop research questions of interest to students, compile comparative databases necessary to answer those questions, and learn tools and software relevant for running analyses. Graded on A-F basis only.
Credit Hours: 3

ANTHRO 4850: Practical Phonetics for Fieldwork
(same as LINGST 4850). Self-paced course using computer and tape recorded lessons from world’s languages. Teaches practical articulatory and transcription phonetics. Weekly meeting with instructor to monitor progress, resolve questions.
Credit Hours: 3
Prerequisites: junior standing or instructor’s consent

ANTHRO 4860: Techniques in Linguistic Analysis
(same as LINGST 4860). Problems in analyzing data from various languages.
Credit Hours: 3
Prerequisites: introductory course in Linguistics or instructor’s consent

ANTHRO 4870: Field Methods in Linguistics
(same as LINGST 4870 and ENGLSH 4670). Intensive training in collection and analysis of data taken from a native speaker of non-Indo-European language.
Credit Hours: 3
Prerequisites: Anthropology majors only with junior or senior standing; Honors level GPA, instructor’s consent

ANTHRO 4880: Demographic Anthropology
The major topics considered in this course are basic demographic analysis, including life tables, models for population growth and stable population theory; fertility analysis; disease and fertility; disease in human populations; and paleodemography. Math Reasoning Proficiency Course.
Credit Hours: 3
Prerequisites: MATH 1100 or MATH 1120 and junior or senior standing or instructor’s consent

ANTHRO 4885: Anthropological Genetics
Population genetics theory and methods applied to human and primate evolution and variation.
Credit Hours: 3
Prerequisites: ANTHRO 2050 or ANTHRO 2051 and ANTHRO 2052, or BIO_SC 1500, or instructor’s consent

ANTHRO 4890: Human Skeletal Identification and Analysis
Students interested in archaeology, physical anthropology, and law enforcement will learn human osteological methods of analysis applied to bioarchaeological problems and modern forensic techniques for personal identification.
Credit Hours: 5
Prerequisites: ANTHRO 2050 or ANTHRO 2052 or instructor’s consent

ANTHRO 4894: Skeletal Biology
This course is designed to provide students advanced and in-depth training in skeletal biology. Basic bone biology will be studied and advanced methods of skeletal analysis applicable to forensic anthropology and bioarchaeology will be explored.
Credit Hours: 3
Prerequisites: ANTHRO 4890 or equivalent background in osteology and/ or anatomy

ANTHRO 4940: Internship in Anthropology
Students will work for a semester in a community-based organization (NGO, nonprofit, for profit, or governmental). They will conduct a research study in coordination with that agency. Upon completion of the research study, students will prepare a final report to be given to the agency and turned in for course credit. The course coordinator will help students identify and make contact with interested organization and oversee their progress during the internship. Graded on S/U basis only.
Credit Hour: 3-6
Prerequisites: ANTHRO 4890 or equivalent background in osteology and/or anatomy

ANTHRO 4950H: Honors Research in Anthropology
Individual study and research leading to Honors in Anthropology. In consultation with instructor, student works on Honors Thesis. May be repeated for up to 6 credit hours.
Credit Hours: 3
Prerequisites: Anthropology majors only with junior or senior standing; Honors level GPA, instructor’s consent
ANTHRO 4950: Undergraduate Research in Anthropology
Advanced research approved by and under the direction of a departmental faculty member.

Credit Hour: 2-8
Prerequisites: junior or senior standing and instructor’s consent

ANTHRO 4960: Undergraduate Readings in Anthropology
Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.

Credit Hour: 1-99
Prerequisites: two courses in Anthropology and instructor’s consent

ANTHRO 4990: Capstone Seminar in Anthropology
Readings, discussions, and problems in the integration of the subfields of anthropology through theory and examples.

Credit Hours: 3
Prerequisites: Anthropology major and senior standing, or instructor’s consent

ANTHRO 7001: Topics in Anthropology-General
Problems, topics, issues, or review of research; experimental development of new contact areas. Specific content varies depending on needs of faculty or students and will be announced in advance.

Credit Hours: 3

ANTHRO 7150: Special Themes in Folklore
(same as ENGLISH 7700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. May be repeated for a maximum of six hours. Instructor’s consent for repetition.

Credit Hours: 3

ANTHRO 7160: Themes in African Diaspora Folklore
(same as ENGLISH 7710 and BL_STU 7710). Intensive study in a selected area of African Diaspora folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature; or the folklore of a particular group. ENGLISH 7700 and ENGLISH 7710 may be repeated for a maximum of six hours with instructor’s consent.

Credit Hours: 3

ANTHRO 7200: Environment and Archaeology
Study of quaternary environments and cultural systems. Focuses on North American records emphasizing climate and biologic components of regional ecosystems; regional environmental reconstruction.

Credit Hours: 3

ANTHRO 7240: History of Archaeology
Growth of archaeology worldwide since AD 1700. Emphasis include intellectual and theoretical developments, field and laboratory techniques, and major figures in the history of the discipline.

Credit Hours: 3

ANTHRO 7280: Archaeology of Religion
(Same as REL_ST 7280) This course examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmological constructs, worldview and ideology in the Americas.

Credit Hours: 3
Prerequisites: ANTHRO 2020 and/or REL_ST 2100

ANTHRO 7300: Comparative Social Organization
Cross-cultural comparison, analysis of social structures. Role of kinship, age, sex, locality, economics, religion and other factors in determining relationships between individuals and groups cross culturally.

Credit Hours: 3

ANTHRO 7320: Ecological and Environmental Anthropology
Cultural anthropological approaches to human-environment interaction; cultural adaptations to diverse environments; theoretical developments and current issues; cultural, social, and historical contexts of natural resource use.

Credit Hours: 3

ANTHRO 7340: Cultural Evolution and Change
(cross-leveled with ANTHRO 4340). Alternative hypotheses about the relationship between culture and evolution are evaluated in light of ethnographic evidence.

Credit Hours: 3

ANTHRO 7350: Psychological Anthropology
Examines cross-cultural approaches to the study of perception, cognition, and personality; methods for gathering and validating data; examples from non-Western societies.

Credit Hours: 3

ANTHRO 7360: Medical Anthropology
Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. Several non-Western health care systems are studied in detail.

Credit Hours: 3

ANTHRO 7370: Anthropology of Gender
(Same as WGST 7370) The Anthropology of Gender Introduces the student to the variation in the relationships between males and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

Credit Hours: 3

ANTHRO 7380: Anthropological Theory of Religions
(Same as REL_ST 7380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today.
ANTHRO 7400: Language and Culture
(same as LINGST 7400). Interrelations between language, thought, culture, and society; role of language in cognition; methods and concepts of linguistics in cultural analysis.
Credit Hours: 3

ANTHRO 7412: Gender, Language, and Communication
(same as COMMUN 7412 and LINGST 7412). Relationship among gender, language, nonverbal communication, and culture.
Credit Hours: 3

ANTHRO 7420: Historical Linguistics
(same as LINGST 7420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.
Credit Hours: 3

ANTHRO 7500: Human Origins
(cross-leveled with ANTHRO 4500). History and theory in the study of human paleontology.
Credit Hours: 5

ANTHRO 7520: Functional Morphology of the Human Skeleton
(cross-leveled with ANTHRO 4520). This course will explore human functional morphology in a broad sense, i.e. will investigate how the form of various bodily systems influences their function and vice versa. In addition, the course is explicitly evolutionary in perspective; after the basic anatomy and function of a specific bodily region is introduced, we will cover how this functional unit has changed over the course of human evolutionary history. Lastly, we will be using the knowledge gained in lecture and from the text to critically analyze examples of research in human functional morphology. Graded on A-F basis only.
Credit Hours: 3

ANTHRO 7540: Human Biological Variation
Human biological variation both among and within living populations. Evolutionary, genetic, ecological, demographic and especially cultural factors which contribute to biological variation.
Credit Hours: 3

ANTHRO 7580: Evolutionary Medicine
Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class.
Credit Hours: 3

ANTHRO 7600: Ethnographic Studies of Selected Cultures
Specific content varies with student interest, faculty availability. Will concentrate on peoples and cultures of one area such as East Asia, South Asia, Africa, North America, Mesoamerica, Oceania, Europe. Amplifies ethnographic knowledge gained in lower-level survey courses.
Credit Hours: 3

ANTHRO 7620: North American Archaeology
Ancient peoples and development of American Indian culture.
Credit Hours: 3

ANTHRO 7640: Prehistory of the Greater Southwest
The course will introduce students to the archaeology of aboriginal peoples of the American southwest and northwestern Mexico. The emphasis will be on prehistoric culture development from the Paleoindians to the arrival of the Spanish. Ethnographic and modern peoples will be discussed as well.
Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2021

ANTHRO 7650: Prehistory of Mesoamerica
Covers the archaeology and prehistory of Mesoamerica (Mexico and Northern Central America). Emphasis on archaeological evidence for development of human societies from late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s.
Credit Hours: 3

ANTHRO 7670: Archaeology of South America
Development of culture in South America from the Pleistocene to European contact.
Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2021 or graduate standing

ANTHRO 7680: Cultures and Peoples of the Amazon
Ethnographic survey of indigenous Amazonian cultures
Credit Hours: 3

ANTHRO 7700: Old World Prehistory
Beginnings of culture in the old world through the early Iron Age.
Credit Hours: 3

ANTHRO 7720: Mesolithic, Neolithic, and Bronze Age Archaeology
Analysis of both hunter-gatherer and food-producing prehistoric sociocultural systems in western Eurasia and adjacent areas from the end of the Pleistocene until the development of iron metallurgy. Includes the symbolic material of these periods.
Credit Hours: 3

ANTHRO 7740: Celtic and Iron Age Archaeology
Analysis of the pre-and protohistoric sociocultural systems of the Celts and other iron-using tribal cultures of western Eurasia from the inception of an iron based technology until the full historic period. Includes the symbolic material of these cultures.
Credit Hours: 3
ANTHRO 7770: Asiatic Prehistory
Survey of the prehistory and early cultures of Asia excluding the Near East. Emphasis on Northern Asia, China, Japan, South and Southeast Asia and Oceania.
Credit Hours: 3

ANTHRO 7790: Cultures and Society in South Asia
(same as S_A_ST 7790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include cast, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian Diaspora.
Credit Hours: 3

ANTHRO 7800: Field Methods in Archaeology
Techniques of archaeological excavation; field surveying, recording, care and interpretation of materials.
Credit Hour: 1-8

ANTHRO 7810: Paleoethnobotany
Application of ethnobotanical approaches in archaeology; techniques to recover and interpret floral remains (macroremains, phytoliths, pollen); research questions in ethno-botany; integration of ethnobiological and archaeological data. Critique of original works in the field emphasized.
Credit Hours: 3

ANTHRO 7820: Zooarchaeology
Survey of specialized techniques for archaeological/faunal analysis, including zoo archaeological sampling, taphonomy study of paleoecology, and recognition of domestication.
Credit Hours: 3

ANTHRO 7826: Stone Artifact Analysis
Theory, methods, and techniques of studying lithic artifacts and deriving culturally meaningful interpretations. Emphasizes flaked artifacts. Includes physical examination, manufacture and experimentation with stone tools.
Credit Hours: 3

ANTHRO 7828: Archaeological Analysis of Ceramics
To introduce students to the basic methods and concepts used in the archaeological analysis of pottery. By the end of the semester students will understand the various ways that pottery is created and how archaeologists can use ceramics to gain insights into everything from the organization of craft production to trade to symbolism.
Credit Hours: 3
Prerequisites: ANTHRO 2020 and/or ANTHRO 2022

ANTHRO 7830: Ethnographic Methods
Relation of problems to techniques; surveys techniques of gathering data; discusses their limitations and potentials.
Credit Hours: 3

ANTHRO 7840: The Comparative Method in Anthropology
(cross-leveled with ANTHRO 4840). Comparative methods provide common ground for uniting bio-cultural anthropologists, archaeologists, and evolutionary biologists together in the investigation of human variation across time and space. It is an exciting time for comparative anthropology with the emergence of a large number of open-access databases covering many realms of biological, cultural, and linguistic variation. This class addresses many research opportunities that are opened up by these large collaborative efforts. Objectives are to develop research questions of interest to students, compile comparative databases necessary to answer those questions, and learn tools and software relevant for running analyses. Graded on A-F basis only.
Credit Hours: 3

ANTHRO 7850: Practical Phonetics for Fieldwork
(same as LINGST 7850). Self-paced course using computer and tape recorded lessons from world’s languages. Teaches practical articulatory and transcription phonetics. Weekly meeting with instructor to monitor progress, resolve questions.
Credit Hours: 3

ANTHRO 7860: Techniques in Linguistic Analysis
(same as LINGST 7860). Problems in analyzing data from various languages.
Credit Hours: 3

ANTHRO 7870: Field Methods in Linguistics
(same as LINGST 7870 and ENGLSH 7670). Intensive training in collection and analysis of data taken from a native speaker of non-Indo-European language.
Credit Hours: 4
Prerequisites: 6 hours of Linguistics and instructor’s consent

ANTHRO 7880: Demographic Anthropology
The major topics considered in this course are basic demographic analysis, including life tables, models for population growth and stable population theory; fertility analysis; disease and fertility; disease in human populations; and paleodemography.
Credit Hours: 3

ANTHRO 7885: Anthropological Genetics
Population genetic theory and methods applied to human and primate evolution and variation.
Credit Hours: 3
Prerequisites: ANTHRO 2050 and ANTHRO 2052 or BIO_SC 1500

ANTHRO 7890: Human Skeletal Identification and Analysis
Students interested in archaeology, physical anthropology, and law enforcement will learn human osteological methods of analysis applied to bioarchaeological problems and modern forensic techniques for personal identification.
Credit Hours: 5
ANTHRO 7894: Skeletal Biology
This course is designed to provide students advanced and in-depth training in skeletal biology. Basic bone biology will be studied and advanced methods of skeletal analysis applicable to forensic anthropology and bioarchaeology will be explored.
Credit Hours: 3

ANTHRO 7940: Internship in Anthropology
Students will work for a semester in a community-based organization (NGO, nonprofit, for profit, or governmental). They will conduct a research study in coordination with that agency. Upon completion of the research study, students will prepare a final report to be given to the agency and turned in for course credit. The course coordinator will help students identify and make contact with interested organization and oversee their progress during the internship. Graded on S/U basis only.
Credit Hours: 3-6
Prerequisites: coordinator’s consent

ANTHRO 7950: Introduction to Post-Graduate Anthropology
How to succeed in graduate school and profession, and who is MU Anthropology. Introduces skills for success in graduate school, describes attributes of a professional anthropologist and how to find a job. Handouts and readings supplement discussions. Graded on S/U basis only.
Credit Hour: 1

ANTHRO 7960: Graduate Readings in Anthropology
Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.
Credit Hour: 1-99
Prerequisites: instructor’s consent

ANTHRO 7990: Non Thesis Research in Anthropology
Original research not leading to the preparation of a thesis or dissertation.
Credit Hour: 1-99
Prerequisites: instructor’s consent

ANTHRO 8001: Topics in Anthropology-General
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and is announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 8010: History of Anthropology I
Development of anthropological theories, methods, perspectives, major figures and contributions in cultural and linguistic subfields.
Credit Hours: 3

ANTHRO 8020: History of Anthropology II
Development of anthropological theories, methods, perspectives, major figures and contributions in archaeology and biological anthropology.
Credit Hours: 3

ANTHRO 8090: Masters Thesis Research in Anthropology
Advanced work leading to thesis. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: consent of major advisor

ANTHRO 8157: Seminar in Folklore
(same as ENGLISH 8700 and REL_ST 8700). Roots of folklore scholarship and methodology; their evolution in modern approaches to the study of oral, traditional, verbal genres; and their performance in natural folk groups. May repeat to twelve hours with departments consent.
Credit Hours: 3

ANTHRO 8187: Seminar in Ecological Adaptation
Relationships and interactions between humans and their environments, with emphasis on the physical and cultural adaptations to environment. May be repeated to 9 hours maximum.
Credit Hours: 3

ANTHRO 8257: Seminar in Ethnohistory
Introduction to the uses of historical documents and historical methods in anthropological research. May be repeated to 6 hours maximum.
Credit Hours: 3

ANTHRO 8287: Seminar in Theory and Methods in Archaeology
Application of theory and conceptual frameworks to archaeological studies drawn from both Old and New Worlds. May be repeated to 6 hours maximum.
Credit Hours: 3

ANTHRO 8357: Seminar in Psychological Anthropology
Focuses on developments in psychological anthropology, cross-cultural psychology. Special attention on cognition, perception, socialization, personality assessment, psycho-cultural change, psycho-linguistics, psychometrics, within cross-cultural contexts. May be repeated to 6 hours maximum.
Credit Hours: 3

ANTHRO 8387: Seminar in Health Anthropology
We survey the field of health behaviors from an anthropological perspective. We ask, what are health behaviors? and what models have social scientists proposed to account for such actions? May be repeated to 6 hours maximum.
Credit Hours: 3

ANTHRO 8487: Seminar in Anthropological Linguistics
(same as LINGST 8487). Topics: Ethnolinguistics, linguistic prehistory, pidgin and Creole languages, linguistic theories and cultural and cultural analysis. French structural anthropology. May be repeated for 9 hours maximum.
Credit Hours: 3

Prerequisites: instructor’s consent
ANTHRO 8587: Seminar in Physical Anthropology
Readings and discussion concerning current problems in human and nonhuman primate evolution, with emphasis on taxonomy, morphology, and behavior. May be repeated to 9 hours maximum.

Credit Hours: 3

ANTHRO 8687: Seminar in Cultural Dynamics
Focuses on geographical, topical, and/or theoretical developments within cultural anthropology. May be repeated to 6 hours maximum.

Credit Hours: 3

ANTHRO 8787: Seminar in Old World Archaeology
Intensive studies in application of anthropological concepts to problems in Old World archaeology and prehistory. May be repeated to 9 hours maximum.

Credit Hours: 3

ANTHRO 8857: Scientific Writing in Anthropology
Students will be taught to construct research papers that reflect logic, organization, and clarity. Topics covered include outline preparation, syntax, punctuation, sentence construction, and correct reference citation.

Credit Hours: 3

ANTHRO 8887: Seminar in Anthropological Methods
Focuses on specific methods/techniques for collecting and analyzing data in archaeological, biological, linguistic, and/or cultural anthropology. May be repeated to 6 hours maximum.

Credit Hours: 3

ANTHRO 8888: Analyzing Anthropological Data I
Provides students with the conceptual and analytic tools necessary to conduct and evaluate the analysis of anthropological data. Examples gleaned from archaeology, bioanthropology, ethnography, and linguistics will provide a broad perspective of the application and utility of the various methods discussed.

Credit Hours: 3

ANTHRO 8889: Analyzing Anthropological Data II
This course introduces a variety of conceptual tools and advanced quantitative methods that anthropologists use to analyze their data. It includes an introduction of common software packages used to manipulate and analyze anthropological data.

Credit Hours: 3

Prerequisites: ANTHRO 8888 or grad-level intro stats or instructor's consent

ANTHRO 8960: Graduate Readings in Anthropology
Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.

Credit Hour: 1-99

Prerequisites: instructor's consent

ANTHRO 8987: Seminar in Formal Anthropological Research Design
Methods of fitting statistical and formal research designs to quantitative and qualitative data discussed and illustrated, with research by participants. May be repeated to 9 hours maximum.

Credit Hours: 3

Prerequisites: introductory course in statistics

ANTHRO 8990: Non Thesis Research in Anthropology
Original research not leading to the preparation of a dissertation.

Credit Hour: 1-99

Prerequisites: consent of major advisor

ANTHRO 9090: Doctoral Dissertation Research in Anthropology
Advanced work leading to dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: consent of major advisor

Arabic (ARABIC)

ARABIC 1100: Elementary Arabic I
For beginners with no prior knowledge of Arabic. An elementary level course designed to facilitate student's acquisition of basic proficiency in communication within culturally significant contexts. Students learn Modern Standard Arabic language skills in an environment integrating interactive video and classroom instruction.

Credit Hours: 6

ARABIC 1200: Elementary Arabic II
This course builds upon the foundation established in ARABIC 1100. Greater emphasis is placed on oral and written expression. Cultural issues are explored in an environment integrating interactive video and classroom instruction.

Credit Hours: 6

ARABIC 2005: Undergraduate Topics in Arabic - Humanities
Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent.

Credit Hour: 1-3

Prerequisites: sophomore standing or instructor’s consent

ARABIC 2130: Intermediate Arabic
Builds on students' knowledge of Elementary Arabic by investing in four language skills of listening, speaking, reading, and writing. Course is culturally oriented and considers various social, political, and religious forces to play in Arab world. Offers a unique blend of modern standards and colloquial Arabic. Enables students to develop listening comprehension, initiate and sustain conversations on daily-life topics, read texts on familiar topics, and write informal essays on topics, and write informal essays on topics connected to daily life.

Credit Hours: 3

Prerequisites: ARABIC 1200 or equivalent
Architectural Studies (ARCHST)

ARCHST 1005: Topics in Architectural Studies - Humanities
Organized study of selected topics in architectural studies. Particular topic and earnable credit may vary by semester. May be repeated for credit up to 6 credit hours.

Credit Hours: 1-99
Prerequisites: instructor’s consent

ARCHST 1100: Visual Design
Design study as an introduction to basic design and visual composition with application to creating two- and three-dimensional abstract and/or functional design work. Studio exercises expressed through drawings and abstract models, using various media.

Credit Hours: 3

ARCHST 1200: Architectural Drafting and Working Drawings
Beginning drafting including equipment and materials; lettering; floor plans, sections, elevations; orthographic and axonometric drawings; working drawings; and details.

Credit Hours: 3

ARCHST 1600: Fundamentals of Environmental Design
Survey of the architectural environment emphasizing design fundamentals such as use, aesthetics, stability of structures and human relationships with places and time.

Credit Hours: 3
Prerequisites: ENGLISH 1000

ARCHST 2005: Topics in Architectural Studies - Humanities
Organized study of selected topics in architectural studies. Particular topic and earnable credit may vary by semester. May be repeated for credit up to 6 credit hours.

Credit Hour: 1-99
Prerequisites: instructor’s consent

ARCHST 2085: Problems in Architectural Studies
Supervised independent work.

Credit Hours: 3
Prerequisites: instructor’s consent

ARCHST 2100: Understanding Architecture and the American City
Analysis of the American city and its architecture.

Credit Hours: 3

ARCHST 2210: Understanding Visualization for Animated Films
Provides a critical overview of design and visualization techniques in animated film making. Emphasizes the role of built environment and spatial design features.

Credit Hours: 3

ARCHST 2220: Introduction to CAD
Introduction to computer-aided drafting and design with AutoCad software. Emphasis will be placed on development of skills and problem solving related to the professions of environmental and interior design.

Credit Hours: 3
Prerequisites: ARCHST 1200 or instructor consent

ARCHST 2230: Design Communication I
Beginning studio course in techniques and conventions of graphic communication as an aid in the design process for interior designers.

Credit Hours: 3
Prerequisites: ARCHST 1100, ARCHST 1200, and ART_DRAW 1050

ARCHST 2310: Building Systems
Integrated building systems: structure, construction, technology, comfort; including voice-data communication, safety, floor, wall, ceiling, mechanical, electrical, and plumbing systems; and project estimating.

Credit Hours: 3
Prerequisites: ARCHST 1200, MATH 1100 or MATH 1120

ARCHST 2315: Introduction to Building Systems Laboratory
Building system renovations, materials, processes, finishes, and applications testing: furniture design, fabrication, finishing, lighting, concrete and masonry, wood and steel light framing construction, and mock-up fabrication and testing. All equipment training and safety is covered in this introductory course.

Credit Hour: 1

ARCHST 2316: Advanced Building Systems Lab
Advanced exposure to building system renovations, materials, processes, finishes, and applications testing: furniture design, fabrication, finishing, lighting, concrete and masonry, wood and steel light framing construction, and mock-up fabrication and testing. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: ARCHST 2315

ARCHST 2620: People, Places and Design
Understanding human behavior and interaction with environments; the influence of architectural design on built places. Practical application for design.

Credit Hours: 3

ARCHST 2811: Studio I
Application of basic design and composition to built form. Studio exercises in two and three dimensions using various media relating to usable spaces. Formation of design concept, development of form and space, and application in built environment.

Credit Hours: 4
Prerequisites: ARCHST 1100, ARCHST 1200, ART_DRAW 1050 and admission to Studio Sequence in Architectural Studies
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
<th>Credit Hours</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARCHST 3100</td>
<td>Color and Light</td>
<td>The theory, application, and specification of color and light for interior and architectural design. Includes assigned lab exercises for color and light portfolio.</td>
<td>3</td>
<td>3.0 credit visual literacy coursework Architectural Studies, Art, Art History or equivalent</td>
</tr>
<tr>
<td>ARCHST 3182</td>
<td>Studio II</td>
<td>Application of basic design principles to built forms and functional spaces. Identification and manipulation of elements of design, understanding spatial relationships between human body and spatial enclosures related to built forms. Spatial organization and familiarity with role of immediate context.</td>
<td>4</td>
<td>ARCHST 2811</td>
</tr>
<tr>
<td>ARCHST 3230</td>
<td>Advanced Design Communication Using BIM</td>
<td>Advanced course in techniques and conventions of computer aided design (CAD) and Building Information Modeling (BIM) for contemporary design process.</td>
<td>3</td>
<td>ARCHST 2230</td>
</tr>
<tr>
<td>ARCHST 3371</td>
<td>Design Resource Management</td>
<td>Field experience (5 hours per week) in organization and management of resources used by interior designers, including references, product information, and samples of materials and finishes.</td>
<td>1</td>
<td>restricted to Architectural Studies students only</td>
</tr>
<tr>
<td>ARCHST 3600</td>
<td>Environmental Analysis</td>
<td>Discover through analytical methods of primary organizational factors which operate in a building and reveal the preoccupations of designer. Analytical approach investigates design principles by means of dissection.</td>
<td>3</td>
<td>ARCHST 1600</td>
</tr>
<tr>
<td>ARCHST 3860</td>
<td>Human Factors Programming</td>
<td>Design Programming for Human Factors using a Case Study.</td>

</tbody>
</table>
ARCHST 4435: History of the Designed Environment to 1750
An in-depth study of the designed environment including interiors, architecture, art, and the decorative arts within the major historical periods and cultural context from prehistory to the Industrial Revolution.
Credit Hours: 3
Prerequisites: ARCHST 2100 or ARCHST 1600

ARCHST 4440: Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution
Analysis of historical exemplars of architecture, interiors and furniture design offering strategies for approaching contemporary design problems. Covers design precedents from industrial revolution to contemporary design.
Credit Hours: 3
Prerequisites: ARCHST 2100 or ARCHST 1600

ARCHST 4550: Visual Presentation for Design
Emphasizes principles and techniques for effective visual design presentation. Focuses on concepts of design, layout, storytelling, critiques, and hands on exercise.
Credit Hours: 3

ARCHST 4555: Recent Trends
Upper-division students seeking additional knowledge in specific subject matter areas including digital media software.
Credit Hour: 1-99

ARCHST 4630: Shaping Human Settlements
Review classic designs and designers, key concepts and enduring issues of community design within the overall framework of environmental design.
Credit Hours: 3
Prerequisites: junior standing

ARCHST 4660: Housing Concepts and Issues
Evaluate housing policies, regulations, codes, programs; global and ecological perspectives of environment and behavior; historic preservation; financial issues; trends and projections.
Credit Hours: 3
Prerequisites: junior standing

ARCHST 4700: Place-Making in Community Design
Ideologies, case studies and participatory methods on place-making in community design. Use processes to design a place-making scheme in actual community project.
Credit Hours: 3
Prerequisites: junior standing

ARCHST 4710: Design Business Practices
Analysis of the basic professional, human, and business skills necessary for the successful design practice. Pre- or Co-requisites of Studio IV and anticipated graduation during final academic year.
Credit Hours: 3

ARCHST 4760: Healthcare Facilities Design
(cross-leveled with ARCHST 7760). Health care facilities design and planning course provides an in-depth investigation of best practice examples. Design and research methods include evidence-based design, simulation, and space syntax analysis leading to high-performance healthcare design. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: senior standing or instructor’s consent

ARCHST 4813: Interiors Studio III
Spatial morphology, organization pattern, construction methods, materials, systems, and processes and integration with total design processes. Space planning and spatial manipulation in response to social, environmental, functional, and aesthetics specific to interiors.
Credit Hours: 4
Prerequisites: instructor’s consent required
Corequisites: ARCHST 3182 and ARCHST 3230

ARCHST 4814: Interiors Studio IV
Continuation of ARCHST 4813. Manipulation of form and space responding to programmatic functions and activities, and constraints imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space to multiple-function layered spaces--both vertically and horizontally.
Credit Hours: 4
Prerequisites: ARCHST 4813

ARCHST 4815: Construction Documents and Building Information Modeling Studio
Studio of how materials, systems, and assemblies reinforce and extend intentions of designers. Course teaches strategies and techniques for integration and coordination of the building components and details in construction documents and building information modeling.
Credit Hours: 4
Prerequisites or Corequisites: ARCHST 4814 or ARCHST 4824

ARCHST 4823: Architectural Studio III
Continuation of ARCHST 3182. Spatial morphology, organization pattern, construction methods, materials, systems, and processes and integration with total design process. Space planning and spatial manipulation in response to social, environmental, functional, and aesthetics specific to architecture.
Credit Hours: 4
Prerequisites: ARCHST 3182; ARCHST 3230

ARCHST 4824: Architectural Studio IV
Continuation of ARCHST 4823. Manipulation of form and space responding to programmatic functions and activities, and constraints imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space to multiple-function layered spaces - both vertically and horizontally.
Credit Hours: 4
Prerequisites: ARCHST 4823
ARCHST 4860: Programming for Thesis Design Studio
Develop written comprehensive program for thesis design studio project. Supervised by student-selected committee -- one departmental thesis advisor and at least one additional faculty member.

Credit Hour: 0-1
Prerequisites: ARCHST 3860 and ARCHST 4814 or ARCHST 4824

ARCHST 4940: Internship in Environmental Design
Field experience in design under professional and educational supervision. Graded on S/U basis only.

Credit Hour: 1-99
Prerequisites: instructor's consent

ARCHST 4960: Readings in Architectural Studio
Readings in recent research materials.

Credit Hour: 1-99

ARCHST 4961: Design Research and Service Design
(cross-leveled with ARCHST 7961). Provides an overview of applied research methods for design and development of products, services and environments. Introduces human-centered approach to design research and Communication of research findings to informed design concepts.

Credit Hours: 3
Prerequisites: senior standing and instructor's consent

ARCHST 4962: Information Visualization and Visual Analytics
(cross-leveled with ARCHST 7962). Foundation for information visualization and deals with external representation and interactive manipulation of information, data or artifacts using digital tools to enhance communication, analytical reasoning and decision-making.

Credit Hours: 3
Prerequisites: senior standing and instructor's consent

ARCHST 4963: Human Factors Research for Design
(cross-leveled with ARCHST 7963). Investigate effect of people's physical psychological, social functions in environments of differing scales. Use research techniques of photo-interviewers, mapping, and user analysis to develop an appropriate program for redesign.

Credit Hours: 3
Prerequisites: ARCHST 3860 or instructor's consent

ARCHST 4964: Design Thinking and Creative Process
(cross-leveled with ARCHST 7964). Analysis of how designers think, solve design problems, and engage in the creative process. Includes design methods, design cognition computations, and design protocol studies.

Credit Hours: 3
Prerequisites: ARCHST 4813 or ARCHST 4823 or instructor's consent

ARCHST 4990: Thesis Design Studio
Capstone experience on a single comprehensive project. Objective is to enable synthesis of previous course work by addressing a design problem defined in ARCHST 4860.

Credit Hours: 4
ARCHST 7325: Energy-Efficient Building Design
This course is a broad study of energy use and energy-efficient strategies for buildings. The course will cover the fundamentals of climate-based design, energy-efficient heating/cooling/daylighting strategies, alternative energy systems applicable to buildings, energy auditing/modeling/verification, applicable building energy codes, and high performance building technologies. Recommended for graduate students with undergraduate degrees and experience in engineering, architecture, and/or building science.
Credit Hours: 3

ARCHST 7333: Compliance and Specifications
Application of laws, codes, regulations, standards in specifying for life safety, barrier-free and universal design, lighting, human factors, and contract documents.
Credit Hours: 3
Prerequisites: T_A_M 2100 and MATH 1100 or MATH 1120

ARCHST 7355: Recent Trends in Digital Media I
Recent Trends in Digital Media I
Credit Hour: 2-4

ARCHST 7410: History of the Designed Environment to 1750
An in-depth study of the designed environment including housing interiors, and furniture of the major historical periods from prehistory to the Industrial Revolution.
Credit Hours: 3
Prerequisites: AR_H_A 1110 and AR_H_A 1120

ARCHST 7411: Study Abroad in Architectural History
Discovery of historic architecture through on-site tour of timeless cities and places. May be repeated for credit.
Credit Hour: 1-99
Prerequisites: instructor's consent

ARCHST 7420: History of the Designed Environment after 1750
An in-depth study of the designed environment, including housing, interiors, and furniture of the major historical periods from the Industrial Revolution to today.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or AR_H_A 1120

ARCHST 7430: Guiding Design with Historic Preservation
(cross-leveled with ARCHST 4430). Approaches to historic preservation; historic roots of architecture and interiors; regulations and design guidelines governing intervention; assessing significance of historic properties.
Credit Hours: 3
Prerequisites: American History or Government or Art History or instructor's consent

ARCHST 7440: Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution
Analysis of historical exemplars of architecture, interiors and furniture design offering strategies for approaching contemporary design problems. Covers design precedents from industrial revolution to contemporary design.
Credit Hours: 3

ARCHST 7450: Visual Presentation for Design
Emphasizes principles and techniques for effective visual design presentation. Focuses on concepts of design, layout storytelling, critiques and hands on exercises.
Credit Hours: 3

ARCHST 7550: Recent Trends in Environmental Design
Upper-division students seeking additional knowledge in specific subject matter areas including digital media software.
Credit Hour: 1-99

ARCHST 7620: Environment and Behavior
Evaluate relationships between human behavior and environmental design. Survey of environment and behavior theoretical foundations examining how these concepts translate into a more responsive theory of design.
Credit Hours: 3

ARCHST 7630: Shaping Human Settlements
Review classic designs and designers, key concepts and enduring issues of community design within the overall framework of environmental design.
Credit Hours: 3

ARCHST 7640: Physical Function and Older Adults
(same as F_C_MD 7750, HMI 7750, H_D_FS 7750, NURSE 7750, P_HLTH 7750, and SOC_WK 7752). This course takes an interdisciplinary approach to understanding and improving the physical function and independence of older adults and explores approaches to alleviate disabling conditions that interfere with physical function and quality of life in old age. Graded on A-F basis only.
Credit Hours: 3

ARCHST 7650: Psychosocial Function and Older Adults
(same as F_C_MD 7751, HMI 7751, H_D_FS 7751, NURSE 7751, P_HLTH 7751 and SOC_WK 7751). This course takes an interdisciplinary approach to understanding the psychosocial function of older adults and explores approaches to alleviate disabling conditions that interfere with psychosocial function and quality of life in old age. Graded on A-F basis only.
Credit Hours: 3

ARCHST 7660: Housing Concepts and Issues
Evaluate housing policies, regulations, codes, programs; global and ecological perspectives of environment and behavior; historic preservation; financial issues; trends and projections.
ARCHST 7700: Place-Making in Community Design
Ideologies, case studies and participatory methods on place-making in community design. Use processes to design a place-making scheme in actual community project.
Credit Hours: 3

ARCHST 7710: Design Business Practices
Analysis of the basic professional, human, and business skills necessary for the successful design practice. Prerequisites or Corequisites of Studio IV and anticipated graduation during final academic year.
Credit Hours: 3

ARCHST 7760: Healthcare Facilities Design
Health care facilities design and planning course provides an in-depth investigation of best practice examples. Design and research methods include evidence-based design, simulation, and space syntax analysis leading to high-performance healthcare design. Graded on A-F basis only.
Credit Hours: 3

ARCHST 7815: Studio V
A continuation of previous studio with emphasis on digital media.
Credit Hours: 4

ARCHST 7840: Graduate Design Studio
Advanced graduate level design experience emphasizing project complexity, design skill refinement, and optional development of thesis project strategies.
Credit Hours: 3
Prerequisites: instructor’s consent

ARCHST 7961: Design Research and Service Design
(cross-leveled with ARCHST 4961). Provides an overview of applied research methods for design and development of products, services and environments. Introduces human-centered approach to design research and communication of research findings to inform design concepts.
Credit Hours: 3

ARCHST 7962: Information Visualization and Visual Analytics
(cross-leveled with ARCHST 4962). Foundation for information visualization and deals with external representation and interactive manipulation of information, data or artifacts using digital tools to enhance communication, analytical reasoning and decision-making.
Credit Hours: 3

ARCHST 7963: Human Factors Research for Design
(cross-leveled with ARCHST 4963). Investigate effect of people’s physical psychological, social functions in environments of differing scales. Use research techniques of photo-interviewers, mapping, and user analysis to develop an appropriate program for redesign.
Credit Hours: 3

ARCHST 7964: Design Thinking and Creative Process
(cross-leveled with ARCHST 4964). Analysis of how designers think, solve design problems, and engage in the creative process. Includes design methods, design cognition and computations, and design protocol studies.
Credit Hours: 3

ARCHST 8001: Topics in Environmental Design
Selected current topics in field of interest.
Credit Hour: 1-99

ARCHST 8050: Research Methods in Environmental Design
A comparative study of quantitative and qualitative methods in environmental design with emphasis on research results and analyses. Lectures and seminar discussions.
Credit Hours: 3
Prerequisites: 12 hours advanced design

ARCHST 8085: Problems in Environmental Design
Credit Hour: 1-99
Prerequisites: 4000-level course in field of problem and instructor’s consent

ARCHST 8090: Master’s Research in Environmental Design
Independent research leading to a creative project. Graded on S/U basis only.
Credit Hour: 1-99

ARCHST 8230: Computer Graphic Application for Design II
Creative computer graphic modeling, rendering and animation projects related to the academic background and interests of individual students. May be repeated to 6 hours maximum.
Credit Hours: 3

ARCHST 8233: Graduate Design Communication II
Advanced studio in techniques and conventions of graphic communication as aides in the design process.
Credit Hours: 3
Prerequisites: ARCHST 7232 or advisor’s consent
### ARCHST 8600: Graduate Environmental Analysis
Analysis of design principles and organizational factors operating in a building by means of dissection. Volumetric disposition, circulation pattern, axes, structural system, materials, purpose, and symbolism.

**Credit Hours:** 3

### ARCHST 8630: Philosophy of Environmental Design Research
Formal environmental design theory concerning historical precedents, current aesthetic trends, and design processes. Assignments investigate philosophical influences, architectonic vocabularies, and communication of idea and artifact. May be repeated up to 12 credit hours.

**Credit Hours:** 3

### ARCHST 8650: Theories in Architectural and Interior Design
Architectural and interior design theory is explored as a field of inquiry. Students become familiar with a theoretical framework that is sensitive to the play between the principles of a building (what it is as a design) and the circumstances of a building (what it becomes to be).

**Credit Hours:** 3

### ARCHST 8820: Graduate Digital Design Studio
Graduate level design experience emphasizing project complexity, design skill refinement, and use of digital media for design representation.

**Credit Hour:** 1-99

### ARCHST 8830: Digital Design Studio II
Advanced graduate level design experience emphasizing design, documentation, and representation using digital media. Optional development of graduate thesis project may be scheduled in this studio.

**Credit Hours:** 4

### ARCHST 8840: Graduate Design Studio
Advanced graduate level design experience emphasizing project complexity, design skill refinement, and optional development of thesis project strategies.

**Credit Hour:** 1-99

**Prerequisites:** instructor’s consent

### ARCHST 8850: Seminar in Environmental Design
Reports, discussion of recent work in area of concentration.

**Credit Hour:** 1-4

### ARCHST 8870: Environment and Behavior II
Synthesis of environment and behavior themes in design research and application to professional practice. Research on socio-behavioral phenomena, user groups, places. Emphasis on integrated interactive character of elements.

**Credit Hours:** 3

### ARCHST 8950: Qualitative Research Methods
Explores qualitative research methods as foundation for subsequent study. Focuses on qualitative research of the built environment. Course may be repeated for credit.

**Credit Hours:**

### ARCHST 8960: Readings in Environmental Design
Readings in recent research materials.

**Credit Hour:** 1-99

**Prerequisites:** ARCHST 4960 or ARCHST 7960

### ARCHST 8990: Thesis Project Proposal
The formal opportunity to express the intent and scope of the thesis project.

**Credit Hour:** 1

**Prerequisites:** instructor’s consent

### ARCHST 9001: Topics in Environmental Design
Selected current topics in field of interest.

**Credit Hour:** 1-99

### ARCHST 9085: Problems in Environmental Design

**Credit Hour:** 1-99

**Prerequisites:** 4000-level course in field of problem and instructor’s consent

### ARCHST 9090: Doctoral Research in Environmental Design
Independent research leading to thesis or dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

### ARCHST 9555: Recent Trends in Environmental Design
For students seeking additional knowledge and understanding in specific subject matter areas.

**Credit Hour:** 1-99

### ARCHST 9900: Dissertation Proposal
A formal dissertation proposal is written and presented to the dissertation committee for approval.

**Credit Hour:** 1

**Prerequisites:** instructor’s consent

### ARCHST 9995: Pilot Project for Dissertation
Working with advisor, student proposes, conducts, and reports the findings from a pilot study germane to the dissertation topic in preparation for the dissertation research.

**Credit Hour:** 1-99

**Prerequisites:** instructor’s consent

## Art History And Archaeology (AR_H_A)

### AR_H_A 1005: Undergraduate Topics in Art History and Archaeology- Humanities
Special studies in Art History and Archaeology.

**Credit Hour:** 1
AR_H_A 1010: Introduction to Museum of Art and Archaeology, UMC
This course is a brief introduction to the Museum of Art and Archaeology on Francis Quadrangle. Special attention will be given to the history of the Museum, to its operation and to its collection. Guest lecturers from the Museum will provide first hand accounts of their contributions to the day-to-day operations of the Museum and to the academic mission of the University.
Credit Hour: 1

AR_H_A 1020: Giotto and the Arena Chapel
This course is a brief introduction to one of the major monuments of western art, the Area (or Scrovegni) Chapel of Giotto di Bondone. Special attention will be given to stories about him by Renaissance authors.
Credit Hour: 1

AR_H_A 1030: Early Works of Michelangelo
This course is a brief introduction to the life and work of Michelangelo. Special attention will be given to his early works and to stories about him, especially those by Giorgio Vasari in his Lives of the Artist, Florence, 1568.
Credit Hour: 1

AR_H_A 1040: Rembrandt
This course is a brief introduction to the life and work of the seventeenth-century Dutch painter Rembrandt van Rijn. Special attention is give to the appreciation of his art by his contemporaries.
Credit Hour: 1

AR_H_A 1105: Undergraduate Topics in Art History and Archaeology
Special studies in Art History and Archaeology.
Credit Hours: 3

AR_H_A 1110: Ancient and Medieval Art
Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe.
Credit Hours: 3

AR_H_A 1110H: Ancient & Medieval Art - Honors
Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe.
Credit Hours: 3
Prerequisites: Honors eligibility required

AR_H_A 1120: Renaissance through Modern Art
Introductory survey of architecture, sculpture and painting of Europe and America from the Renaissance to Modern times.
Credit Hours: 3

AR_H_A 1120H: Renaissance through Modern Art - Honors
Introductory survey of architecture, sculpture and painting of Europe and America from the Renaissance to Modern times.
Credit Hours: 3
Prerequisites: Honors eligibility required

AR_H_A 1230: Introduction to Asian Arts
(same as HIST 1820, REL_ST 1820, S_A_ST 1152). This course is an introduction to the literature and visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.
Credit Hours: 3

AR_H_A 2005: Topics Art History and Archaeology - Humanities
Study of special topics in Art History and Archaeology.
Credit Hour: 1-3

AR_H_A 2150: The Art of the Book
Introduction to the illustrated book as a locus of artistic style, cultural currency, and visual literacy.
Credit Hours: 3

AR_H_A 2230: Introduction to the Arts of Islam
Architecture, decorative arts and painting of the Muslim world from the seventh to the 19th century. The formation of Islamic art and its relationships with religion, philosophy and symbolism.
Credit Hours: 3

AR_H_A 2410: Ancient Technology
Engineering, architecture, and military technology in the ancient world.
Credit Hours: 3

AR_H_A 2720: African-American Visual Culture
(Same as BL_STU 2720) This course introduces students to African-American art history, visual culture, and material culture in the cultural, political, and historical contexts. Specific focuses may include Harlem Renaissance, the Black Arts Movement, and other topics.
Credit Hours: 3

AR_H_A 2830: American Art and Architecture
Architecture, sculpture, painting of America from 17th century to present day.
Credit Hours: 3

AR_H_A 2850: Introduction to Visual Culture
Introduction to the problems of understanding, analyzing, and writing about visual culture.
Credit Hours: 3

AR_H_A 2860: The Lives of Objects
Introduction to the problems of understanding, analyzing and writing about art history and material culture.
Credit Hours: 3

AR_H_A 2940: Archaeological Methods
Methods of excavating various types of sites; recording, preserving their materials.
Credit Hour: 2-6
Prerequisites: instructor’s consent

AR_H_A 2960: Special Readings in Art History and Archeology
Independent readings and research selected in consultation with supervisory faculty.
Credit Hour: 1-3
Prerequisites: instructor’s consent

AR_H_A 3005: Topics in Art History and Archaeology- Humanities
Selected studies in various facets of art history and archaeology.
Credit Hour: 1-3
Prerequisites: AR_H_A 1110, AR_H_A 1120, AR_H_A 2830 as appropriate

AR_H_A 3005H: Topics in Art History and Archaeology- Humanities - Honors
Selected studies in various facets of art history and archaeology.
Credit Hour: 1-3
Prerequisites: AR_H_A 1110, AR_H_A 1120, AR_H_A 2830 as appropriate. Honors Eligibility Required

AR_H_A 3010: Study Abroad in Art History and Archaeology
Instruction in art history, architecture, or archaeology takes place in a foreign country or countries. Trips are led and taught by University of Missouri faculty.
Credit Hour: 3-6
Prerequisites: sophomore standing or higher and departmental consent

AR_H_A 3120: Art and Gender in Antiquity
Comparative survey of art and archaeology in Egypt, Greece, and Rome to understand how societies constructed gender through material resources and how cultural perceptions of gender affected individual lives and behaviors. Emphasis on research methods and evaluation of sources.
Credit Hours: 3

AR_H_A 3210: Near Eastern and Egyptian Art and Archaeology
General survey of material culture of the Near East and Egypt from the earliest times to the early Iron Age.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3310: Greek Art and Archaeology
General survey of material culture in Greece from earliest times to the Hellenistic period.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3410: Roman Art and Archaeology
General survey of material culture in the Roman world from earliest times through the 3rd century.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3510: Byzantine and Islamic Art and Archaeology
General survey of the visual world of the Middle Ages in southwest Asia and the east Mediterranean, from late antiquity through the rise of the Ottoman empire.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3520: Early Medieval Art and Archaeology
An investigation of the arts of western Europe during the first millennium, when the unifying traditions of Rome were transformed by the diverse cultures of her Northern neighbors.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3530: Late Medieval Art
General survey of European art and architecture from the 11th through the 14th centuries.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3550: Italian Renaissance Art
General survey of the architecture, painting and sculpture of Italy from the 14th through the 16th century.
Credit Hours: 3
Prerequisites: AR_H_A 1110 or AR_H_A 1120 or equivalent

AR_H_A 3560: Northern Renaissance Art
General survey of northern European art and architecture from the late 14th through the late 16th century.
Credit Hours: 3
Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3570: Baroque Art
General survey of 17th century European architecture, painting and sculpture.
Credit Hours: 3
Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3720: Cities in the Western Imagination
Interdisciplinary introduction to the forms, functions, and meanings of cities in Europe and the Americas from ancient to modern times; plans and predictions for the future also considered. Emphasis is placed on cities as fields for imaginative activity on the part of those who have designed, built, used, and interpreted them.
Credit Hours: 3
AR_H_A 3730: Eighteenth Century European Art  
General survey of 18th-century European painting, sculpture and architecture.  
Credit Hours: 3  
Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3740: Nineteenth Century European Art  
General survey of 19th-century European painting, sculpture and architecture.  
Credit Hours: 3  
Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3750: Modern Art in Europe and America  
General survey of international directions in painting, sculpture, and architecture from 1885 to ca. 1940.  
Credit Hours: 3  
Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3760: Contemporary Art  
General survey of painting, sculpture, and architecture from the Second World War to the present.  
Credit Hours: 3  
Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3775: The Ancient World on Film  
(same as CL_HUM 3775 and FILM_S 3775) This course explores how classical antiquity has been represented in twentieth and twenty-first century film, with particular emphasis on the ways in which ancient narratives and iconography have been appropriated by filmmakers to address contemporary cultural issues.  
Credit Hours: 3  
Prerequisites: Prior 2000 level coursework in Classical Humanities, Art History and Archaeology, or Film Studies. Instructor’s consent required

AR_H_A 3780: Architecture in Film  
(same as FILM_S 3780) Filmmakers use architecture to convey meaning on symbolic, psychological, and ideological levels. Using architectural history and theory, in conjunction with weekly film screenings from a variety of genres, this course explores how architecture operates within film.  
Credit Hours: 3

AR_H_A 3785: Arts and Artists on Film  
(same as FILM_S 3785) This course explores representations of art and artists in film, including documentary films, fictionalized films, and films made by artists.  
Credit Hours: 3

AR_H_A 3790: Indian Cinema  
(same as ANTHRO 3490, S_A_ST 3490 and FILM_S 3490). Indian Cinema provides an overview of the key genres and themes of Indian film, including Bollywood, art cinema/parallel cinema, Indian regional cinemas, and diasporan cinema. The course combines film studies, anthropological, historical, and visual culture analyses to provide a holistic view of Indian culture and society through cinema.  
Credit Hours: 3  
Prerequisites: Sophomore standing or higher

AR_H_A 3830: American Art and Culture, 1500-1820  
General survey of American visual culture - painting, sculpture, architecture-between 1500 and 1820.  
Credit Hours: 3  
Prerequisites: AR_H_A 1120 or AR_H_A 2830 or equivalent

AR_H_A 3840: American Art and Culture, 1820-1913  
General survey of American visual culture - painting, sculpture, architecture, photography - between 1820-1913.  
Credit Hours: 3  
Prerequisites: AR_H_A 1120 or AR_H_A 2830 or equivalent

AR_H_A 3850: American Art and Culture, 1913-Present  
General survey of American visual culture - painting, sculpture, architecture, photography, advertising, film, new media - between 1913 and the present.  
Credit Hours: 3  
Prerequisites: AR_H_A 1120 or AR_H_A 2830 or equivalent

AR_H_A 4005: Topics in Art History and Archaeology-Humanities  
Special studies in art history/archaeology; covers subjects not included in regularly offered courses.  
Credit Hour: 1-99  
Prerequisites: instructor’s consent

AR_H_A 4120: Women, Art and Society  
(same as WGST 4120). Analysis of the careers and works of women artists, and images of women (by female and male artists), in selected eras.  
Credit Hours: 3  
Prerequisites: instructor’s consent

AR_H_A 4320: Archaeology of the Aegean Bronze Age  
Analysis of the material culture of Greek prehistoric civilizations from 3000 to 1000 B.C.  
Credit Hours: 3

AR_H_A 4340: Greek Architecture  
Survey of the art of building in the Aegean and Classical world from earliest times to the Hellenistic period.  
Credit Hours: 3  
Prerequisites: instructor’s consent

AR_H_A 4350: Greek Pottery  
Examination of pottery and vase painting with an emphasis on production, iconography, and social context.  
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4360: Greek Sculpture
Survey of sculptor’s art in Aegean and Classical world from earliest times to Hellenistic period.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4420: Minor Arts of Antiquity
Discussion of selected minor arts and crafts of the Greco-Roman world.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4440: Roman Architecture
The history of Roman architecture, origin and development of forms and techniques, major monuments in Rome and its provinces through the 3rd century after Christ.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4460: Roman Sculpture
The origins and development of sculpture in the Roman Republic and the Roman Empire.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4490: Late Antique Art and Archaeology
Exploration of the material culture of the Mediterranean world from the 3rd century to Iconoclasm.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4510: Byzantine Art and Archaeology
(cross-leveled with AR_H_A 7510). Exploration of the material culture of the east Mediterranean between the 6th and 15th centuries.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4520: Art of the Dark Ages
Survey of the visual arts of western Europe during the period of migrations, from the fall of Rome to the Carolingian renovation of the 9th century.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4530: Romanesque Art and Architecture
(cross-leveled with AR_H_A 7530). Exploration of topics in the art and architecture of Europe from the 10th through the 12th centuries.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4540: Gothic Art and Architecture
(cross-leveled with AR_H_A 7540). Exploration of topics in the art and architecture of the 12th through the 14th century.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4620: Michelangelo and the High Renaissance
Sculpture, architecture, paintings, and drawings of Michelangelo in the context of his times.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4630: The Renaissance Artist
Lectures, readings, discussions and a research paper related to the Renaissance artist. Focus will be on representations of the artist in art and literature from ca. 1300 to ca. 1650.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4640: Renaissance and Baroque Architecture
Problems in European architectural history from the 15th through the 18th century.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4650: Venetian Painting
Survey of Venetian Painting from the 14th through the 18th century.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4660: Art and Ideas in the Northern Renaissance
(cross-leveled with AR_H_A 7660). Discussion of selected topics in painting and sculpture and their artistic and cultural relationships from the 14th through the 16th century in northern Europe.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4670: Baroque Figural Arts
Painting and sculpture of Italy in the 17th century.
Credit Hours: 3
Prerequisites: instructor’s consent

AR_H_A 4710: The Arts of the Rococo
This course explores European Art from approximately 1710 to 1770, focusing on art associated with two different social sectors: The early modern aristocratic court culture whose artistic predilections had formed the European norm, and the increasingly powerful merchant classes whose newfound wealth enabled new artistic genres and styles to proliferate. Our inquiry begins with an exploration of the rococo as an ornamental style; we examine its origins in Italian garden architecture and subsequent transformation into a decoration for both French palatial interiors and German Churches. We then launch a succession of case studies of important artists, media, and objects in order to assess the varied ways that diverse social identities were reflected through the
periods’ art an architecture. Students will pursue a research topic on rococo art for their semester project.

**Credit Hours:** 3  
**Prerequisites:** AR_H_A 3730; instructor’s consent

---

**AR_H_A 4720: Revolution and Romanticism: Art C. 1800**
This course examines European art from circa 1780 to 1820, focusing on art made in conjunction with the major events of the French Revolution, its aftermath, and its global repercussions.

**Credit Hours:** 3  
**Prerequisites:** AR_H_A 3730 or AR_H_A 3740; instructor’s consent. May be repeated for credit

---

**AR_H_A 4730: Realism Through Post-Impressionism**
Styles and issues in nineteenth-century art.

**Credit Hours:** 3  
**Prerequisites:** instructor’s consent

---

**AR_H_A 4740: Modern Architecture**
Problems in the history of architecture from the late 18th century to the present.

**Credit Hours:** 3  
**Prerequisites:** instructor’s consent

---

**AR_H_A 4750: Contemporary World Architecture**
This course will study key themes, events, and figures in architectural theory and practice from around the world since the 1960s. As with any course treating such a large body of material, this one will be selective topical rather than comprehensive in nature. The format will include lectures, discussions based on reading, writing, and research assignments, films, and field trips. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** AR_H_A 1120; instructor’s consent

---

**AR_H_A 4760: Modern Sculpture**
Sculpture in Europe and the U.S. ca. 1880 to the present, with special emphasis on changing definitions of the medium.

**Credit Hours:** 3  
**Prerequisites:** instructor’s consent

---

**AR_H_A 4780: Advanced Course in Contemporary Art**
Topics in European and American painting and sculpture after 1950.

**Credit Hours:** 3  
**Prerequisites:** instructor’s consent

---

**AR_H_A 4820: American Material Culture**
An exploration of American material culture from a multidisciplinary perspective.

**Credit Hours:** 3  
**Prerequisites:** instructor’s consent

---

**AR_H_A 4840: American Architecture**
An exploration of architecture and urbanism from the colonial period to the present.

---

**AR_H_A 4960: Special Readings in Art History and Archaeology**
Independent readings and research selected in consultation with supervisory faculty.

**Credit Hour:** 1-3  
**Prerequisites:** instructor’s consent

---

**AR_H_A 4970: Capstone: Art History and Archaeology**
Students will write an expanded, guided research paper. The Capstone student will consult on a regular basis with the professor responsible for the course and will make an oral presentation of the paper in the course. Must be taken in conjunction with a 4000-level Art History and Archaeology course.

**Credit Hour:** 1  
**Prerequisites:** instructor’s consent

---

**AR_H_A 4980: Internship**
A one-semester or full summer intensive internship for departmental majors with specific projects and responsibilities to be arranged by the student in cooperation with a faculty member and an appropriate agent of the museum involved. May be taken as an elective only. May be repeated for a maximum of 6 hours credit.

**Credit Hours:** 3  
**Prerequisites:** instructor’s consent

---

**AR_H_A 4996: Honors Proseminar I**
Research methods, bibliography, use and criticism of source material.

**Credit Hours:** 3  
**Prerequisites:** instructor’s consent

---

**AR_H_A 4999: Honors Reading and Research I**
Individual research projects in preparation of senior thesis.

**Credit Hours:** 3  
**Prerequisites:** AR_H_A 4996 and instructor’s consent

---

**AR_H_A 7005: Topics in Art History and Archaeology**
Special studies in art history or archaeology; covers subjects not included in regularly offered courses.

**Credit Hour:** 1-99  
**Prerequisites:** instructor’s consent

---

**AR_H_A 7120: Women, Art and Society**
(same as WGST 7120). Analysis of the careers and works of women artists, and images of women (by female and male artists), in selected eras.

**Credit Hours:** 3  
**Prerequisites:** instructor’s consent

---

**AR_H_A 7130: Museum Studies**
Functions and history of museums and interrelations among departments, including those of director, curator, registrar, education, conservation, and marketing. Topics include acquisitions policies; public outreach;
role of architecture; and philosophical and legal issues pertaining to administration of museums.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**AR_H_A 7170: Historic Preservation**  
(same as HIST 7450). Survey of the historic preservation movement and techniques by faculty and guest speakers active in the field.

**Credit Hour:** 3-9  
**Prerequisites:** instructor's consent

**AR_H_A 7320: Archaeology of the Aegean Bronze Age**  
Analysis of the material culture of Greek prehistoric civilizations from 3000 to 1000 B.C.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**AR_H_A 7340: Greek Architecture**  
Survey of the art of building in the Aegean and Classical world from earliest times to the Hellenistic period.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**AR_H_A 7350: Greek Pottery**  
Examination of pottery and vase painting with an emphasis on production, iconography, and social context.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**AR_H_A 7360: Greek Sculpture**  
Survey of sculptor's art in Aegean and Classical world from earliest times to Hellenistic period.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**AR_H_A 7420: Minor Arts of Antiquity**  
Discussion of selected minor arts and crafts of the Greco-Roman world.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**AR_H_A 7440: Roman Architecture**  
The history of Roman architecture, origin and development of forms and techniques, major monuments in Rome and its provinces through the 3rd century after Christ.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**AR_H_A 7460: Roman Sculpture**  
The origins and development of sculpture in the Roman Republic and the Roman Empire.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**AR_H_A 7490: Late Antique Art and Archaeology**  
Exploration of the material culture of the Mediterranean world from the 3rd century to Iconoclasm.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**AR_H_A 7510: Byzantine Art and Archaeology**  
(cross-leveled with AR_H_A 4510). Exploration of the material culture of the east Mediterranean between the 6th and 15th centuries.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**AR_H_A 7520: Art and Archaeology of Early Medieval Europe**  
(cross-leveled with AR_H_A 4520). Exploration of the material culture of western Europe from the 5th century to c. 1000.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**AR_H_A 7530: Romanesque Art and Architecture**  
(cross-leveled with AR_H_A 4530). Exploration of topics in the art and architecture of Europe from the 10th through the 12th centuries.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**AR_H_A 7540: Gothic Art and Architecture**  
(cross-leveled with AR_H_A 4540). Exploration of topics in the art and architecture of the 12th through the 14th century.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**AR_H_A 7620: Michelangelo and the High Renaissance**  
Sculpture, architecture, paintings, and drawings of Michelangelo in the context of his times.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**AR_H_A 7630: The Renaissance Artist**  
Lectures, readings, discussions and a research paper related to the Renaissance artist. Focus will be on representations of the artist in art and literature from ca. 1300 to ca. 1650.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**AR_H_A 7640: Renaissance and Baroque Architecture**  
Problems in European architectural history from the 15th through the 18th century.

**Credit Hours:** 3  
**Prerequisites:** departmental consent

**AR_H_A 7650: Venetian Painting**  
Survey of Venetian painting from the 14th through the 18th century.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

AR_H_A 8110: Introduction to Graduate Study
Research methods, bibliography, use and criticism of source material. Required of graduate students in Art History and Archaeology who have not had AR_H_A 4996.
Credit Hour: 3
Prerequisites: instructor's consent

AR_H_A 8120: Theories and Methodologies in Art History and Archaeology
Literature of art and archaeology in terms of works of leading European and American art historians, archaeologists.
Credit Hour: 3
Prerequisites: instructor's consent

AR_H_A 8130: Museum Studies Seminar
Appropriate means for care and display of artifacts. Topics include: accessioning, cataloging, retrieval of information, and laws and ethics of collecting; the museum environment and its monitoring; condition reports, shipping and storage, and conservation. Field trips.
Credit Hour: 3
Prerequisites: instructor's consent

AR_H_A 8140: Art Theory and Criticism
Theoretical and critical literature of art from earliest times to the present.
Credit Hour: 3
Prerequisites: instructor's consent

AR_H_A 8170: Historic Preservation Seminar
Research techniques to solve research problems and conduct field recording in historic preservation, material culture, historic architecture, and cultural heritage studies.
Credit Hour: 3
Prerequisites: instructor's consent

AR_H_A 8320: Seminar in Greek Art and Archaeology
Special subjects of study assigned for individual research; discussion of reports by seminar members.
Credit Hour: 1-99
Prerequisites: instructor's consent

AR_H_A 8420: Seminar in Roman Art and Archaeology
Special subjects of study assigned for individual research; discussion of reports by seminar members.
Credit Hour: 1-99
Prerequisites: instructor's consent

AR_H_A 8440: Ancient/Medieval Topography
(same as CLASS 8440). Descriptive and historical analysis of a selected city or site. Subject varies.
Credit Hour: 1-99
Prerequisites: instructor's consent

AR_H_A 8490: Seminar in Late Antique Art and Archaeology
Special subjects of study assigned for individual research; discussion of reports by seminar members.
Credit Hours: 3
Prerequisites: AR_H_A 7490 or equivalent

AR_H_A 8520: Seminar in Medieval Art and Archaeology
Specific subjects of study will be assigned to students for presentation in relation to broader questions of the cultural/historical phenomena of the time, from ca 700 to ca 1400.
Credit Hour: 1-99
Prerequisites: instructor's consent

AR_H_A 8620: Seminar in Renaissance Art
Special subjects of study assigned for Northern or Southern Renaissance for individual research, discussion of reports by seminar members.
Credit Hours: 3
Prerequisites: instructor's consent

AR_H_A 8710: Seminar in 18th Century Art
Special subjects of study in 18th century art assigned for individual research; reports to be presented and discussed by seminar members.
Credit Hour: 1-99
Prerequisites: instructor's consent

AR_H_A 8720: Seminar in 19th Century Art
Special subjects of study in 19th century art assigned for individual research; reports to be presented and discussed by seminar members.
Credit Hour: 1-99
Prerequisites: instructor's consent

AR_H_A 8740: Seminar in Modern Architecture
Special subjects of study assigned for individual research; discussion of reports by seminar members.
Credit Hour: 1-99
Prerequisites: instructor's consent

AR_H_A 8800: Seminar in American Art
Special subjects of study assigned for individual research; discussion of reports by seminar members.
Credit Hour: 1-99
Prerequisites: instructor's consent
AR_H_A 9080: Readings for PhD Dissertation in Art History and Archaeology
Reading, critical evaluation of literature of special fields of art history and/or archaeology.
Credit Hour: 1-99
Prerequisites: instructor's consent

AR_H_A 9090: Doctoral Dissertation Research in Art History and Archaeology
Individual research leading to preparation of the Ph.D. dissertation. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent

Art-Ceramics (ART_CERM)

ART_CERM 2100: Beginning Ceramics
Exploration of ceramic art as an expressive, communicative medium. Study of ceramic design, technique and historic and contemporary models within the context of the creative process. Group critiques, slides, demonstrations. Expendable materials fee.
Credit Hours: 3
Prerequisites: instructor's consent

ART_CERM 3100: Intermediate Ceramics
Continuation of ART_CERM 2100 with emphasis on wheel throwing and the vessel format. Further exploration of glazing and firing techniques. Group and individual critiques, demonstrations, slide lectures and visiting artists. Expendable materials fee.
Credit Hours: 3
Prerequisites: instructor's consent

ART_CERM 4100: Advanced Ceramics
Continuation of ART_CERM 3100. Includes advanced problems in firing, clay and glaze technology, forming and ornamentation. Payment of expendable materials fee required. May be repeated to 15 hours maximum.
Credit Hours: 3
Prerequisites: instructor's consent

ART_CERM 4110: Ceramics Sculpture
Sculptural forms constructed of slabs, coils and wheel-thrown elements. Payment of expendable materials expense is required. May be repeated to 18 hours maximum.
Credit Hours: 3
Prerequisites: ART_CERM 4100

ART_CERM 4185: Problems in Ceramics
Graduate level work in ceramics.
Credit Hour: 1-3
Prerequisites: ART_CERM 7100 and ART_CERM 7110 and departmental consent

ART_CERM 7100: Graduate Ceramics
Advanced study of ceramic technology and design concepts with emphasis on directed development of individual work. Payment of expendable materials fee required. May be repeated to 18 hours maximum.
Credit Hours: 3
Prerequisites: ART_CERM 4100

ART_CERM 7110: Graduate Ceramic Sculpture
Directed development of individual work. Payment of expendable materials expense is required. May be repeated to 18 hours maximum.
Credit Hours: 3
Prerequisites: ART_CERM 4100

ART_CERM 7185: Problems in Ceramics
Graduate level work in ceramics.
Credit Hour: 1-3
Prerequisites: ART_CERM 7100 and ART_CERM 7110 and departmental consent

ART_CERM 8100: Graduate Ceramics II
Continuation of ART_CERM 7100. Repeatable to 15 hours.
Credit Hours: 3
Prerequisites: ART_CERM 7100 or equivalent

Art-Drawing (ART_DRAW)

ART_DRAW 1050: Drawing I
An introduction to visual hierarchy, composition, and pictorial space in drawing. Emphasis on linear perspective and the language of light and shadow using black and white media (graphite, charcoal and/or conte crayon). Development of skills and concepts in drawing based on historical models, lectures, demonstrations and critiques. Expendable materials fee required.
Credit Hours: 3

ART_DRAW 2200: Drawing II
An introduction to drawing systems, problem solving and study of the proportions of the human form. Development of skills and concepts in drawing based on historical and contemporary models, lectures, demonstrations and critiques. Expendable materials fee required.
Credit Hours: 3
Prerequisites: ART_DRAW 1050

ART_DRAW 2210: Beginning Color Drawing
Theory and practice in the use of pastel working from stilllife, landscape, and portrait. Expendable materials fee required.
Credit Hours: 3
Prerequisites: ART_DRAW 1050

ART_DRAW 2210: Beginning Color Drawing
Theory and practice in the use of pastel working from stilllife, landscape, and portrait. Expendable materials fee required.
Credit Hours: 3
Prerequisites: ART_DRAW 1050

ART_DRAW 3200: Drawing III
Development of drawing techniques with an emphasis on materials and methods. Emphasis in conceptual and formal skills based on contemporary and historical models. May be repeated to 15 hours maximum. Expendable materials fee required.
Credit Hours: 3
**ART_DRAW 3210: Intermediate Color Drawing**
Continuation of ART_DRAW 2210 with emphasis on design and organization. Expendable materials fee required.

**Credit Hours:** 3  
**Prerequisites:** ART_DRAW 1050 and ART_DRAW 2200

---

**ART_DRAW 3220: Anatomical Drawing**
Anatomical structure of human figure as it relates to art. Drawing from live model; emphasis on gross anatomy as defined by skeletal and muscular structure. Expendable materials fee required.

**Credit Hours:** 3  
**Prerequisites:** ART_DRAW 1050 and either ART_DRAW 2200 or instructor's consent

---

**ART_DRAW 3230: Beginning Illustration**
An introduction to visual problem solving from initial concept through final execution. Emphasis in drawing and painting skills and exploration of mixed media techniques including drawing from the model. Graded on A-F basis only. Expendable materials fee.

**Credit Hours:** 3  
**Prerequisites:** ART_DRAW 1050 and ART_DRAW 2200

---

**ART_DRAW 4200: Drawing IV**
This course will provide an intensive experience in the development of a portfolio of artwork. Students will explore the connections between their work and contemporary art. May be repeated 3 times. Expendable Materials Fee Required.

**Credit Hours:** 3  
**Prerequisites:** ART_DRAW 1050, ART_DRAW 2200 and ART_DRAW 3200

---

**ART_DRAW 4210: Advanced Color Drawing**
Continuation of ART_DRAW 3210 with emphasis on the expressive properties of color in figural compositions. Repeatable to 15 hours. Expendable materials fee required.

**Credit Hours:** 3  
**Prerequisites:** ART_DRAW 1050, ART_DRAW 2210 and ART_DRAW 3210

---

**ART_DRAW 4220: Advanced Anatomical Drawing**
Continuation of ART_DRAW 3220 with emphasis on formal analysis of the figure in drawing based on superficial and deep anatomical structure. May be repeated to 15 hour maximum. Expendable materials fee required.

**Credit Hours:** 3  
**Prerequisites:** ART_DRAW 1050 and ART_DRAW 3220

---

**ART_DRAW 4230: Advanced Illustration**
Further development of conceptual problem solving skills and technical proficiency through self generated assignments. Emphasis is placed on portfolio development by exploring sequential and narrative themes. Topics include contract, copyrights, and the art of freelancing. Students are advised to take the course a minimum of two times. May be repeated to 15 hours maximum. Expendable materials fee required.

**Credit Hours:** 3  
**Prerequisites:** ART_DRAW 1050, ART_DRAW 2200 and ART_DRAW 3230

---

**ART_DRAW 4285: Problems in Drawing**
Credit Hour: 1-3  
**Prerequisites:** departmental consent

---

**ART_DRAW 7200: Graduate Drawing: Studio Practice and Critique**
Drawing with emphasis on individual creative expression. May repeat to 15 hours maximum. Expendable materials fee required.

**Credit Hours:** 3  
**Prerequisites:** ART_DRAW 4210 and instructor's consent

---

**ART_DRAW 7285: Problems in Drawing**
Credit Hour: 1-3  
**Prerequisites:** ART_DRAW 7200 and departmental consent

---

**ART_DRAW 8200: Graduate Drawing: Advanced Studio Practice and Critique**
Continuation of ART_DRAW 7200. Repeatable to 15 hours.

**Credit Hours:** 3  
**Prerequisites:** ART_DRAW 7200 or equivalent

---

**ART_DRAW 8210: Graduate Color Drawing II**
Continuation of ART_DRAW 7210. Repeatable to 15 hours.

**Credit Hours:** 3  
**Prerequisites:** ART_DRAW 7210 or equivalent

---

**ART_DRAW 8270: Graduate Drawing - Theory and Context**
Contextualizing artwork in culture, history, and theory. May be repeated to 18 hours for credit. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Graduate Art Majors

---

**ART_DRAW 8285: Problems in Drawing II**
Advanced independent studio practice including critical evaluation of student’s creative work. Individual study in drawing is to be proposed by the student and approved by the instructor. The student will meet on a regular basis with the instructor to review student progress. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1-3  
**Prerequisites:** for students with strong preparation in Art; departmental consent; ART_DRAW 7285
### Art-Fibers (ART_FIBR)

**ART_FIBR 2300: Beginning Fibers**  
Exploration of various fiber and media including papermaking, weaving, surface design and sculptural techniques. Expendable materials fee required.  
**Credit Hours:** 3  
**Prerequisites:** ART_FIBR 1030

**ART_FIBR 3300: Intermediate Fibers**  
Continuation of ART_FIBR 2300 with emphasis on utilizing acquired technical processes in loom and off weaving, paper making and surface design and a means of developing visual statements. Expendable materials fee required.  
**Credit Hours:** 3  
**Prerequisites:** ART_FIBR 2300

**ART_FIBR 4300: Advanced Fibers**  
Exploration of aesthetic concepts, development of personal style and instruction in advanced fiber techniques within medium selected by student. Expendable materials fee required. May repeat to 15 hours maximum.  
**Credit Hours:** 3  
**Prerequisites:** ART_FIBR 3300 or approved equivalents

**ART_FIBR 4385: Problems in Fibers**  
**Credit Hour:** 1-3  
**Prerequisites:** departmental consent

**ART_FIBR 7300: Graduate Fibers**  
Advanced technical and aesthetic study in medium of choice with emphasis on development of the individual student’s ideas and goals. Expendable materials fee required. May repeat to 15 hours maximum.  
**Credit Hours:** 3  
**Prerequisites:** ART_FIBR 4300

**ART_FIBR 7385: Problems in Fibers**  
**Credit Hour:** 1-3  
**Prerequisites:** ART_FIBR 7300 and departmental consent

**ART_FIBR 8300: Graduate Fibers II**  
Continuation of ART_FIBR 7300. Repeatable to 15 hours.  
**Credit Hours:** 3  
**Prerequisites:** ART_FIBR 7300 or equivalent

### Art-General (ART_GNRL)

**ART_GNRL 1010: Introduction to Art**  
Basic practice in drawing, painting, design. Exploratory course for beginners. Non-majors only.  
**Credit Hours:** 3

**ART_GNRL 1020: Appreciation of Art**  
Illustrated discussion with examples from varied historic and contemporary art fields on nature of art, functions, methods of creative expression. One section is writing intensive each semester and the other is NON writing intensive each semester.  
**Credit Hours:** 3  
**Prerequisites:** ENGLISH 1000 may be required on some sections

**ART_GNRL 1030: Basic 2-D Design**  
Basic study of line, shape and texture; their use and control according to the basic variables and the principles of design. Two dimensional exercises employing a variety of tools and materials.  
**Credit Hours:** 3

**ART_GNRL 1040: Basic 3-D Design**  
A foundational course designed to familiarize students with the elements and principles of three-dimensional design as well as some of the materials, tools, processes and techniques used in the creation of sculptural art. Study and development of formal aesthetic ideas, conceptual vocabulary and technical skills is emphasized. Expendable materials fee required.  
**Credit Hours:** 3

**ART_GNRL 2000: Color Theory**  
An investigation of various color systems and their application to art.  
**Credit Hours:** 3

**ART_GNRL 2001: Topics in Art**  
Special studies in studio art; covers subjects not included in regularly offered courses. Topics course are repeatable for up to 6 credits per individual topic.  
**Credit Hour:** 1-3  
**Prerequisites:** instructor’s consent

**ART_GNRL 2001H: Topics in Art - Honors**  
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.  
**Credit Hour:** 1-3  
**Prerequisites:** instructor’s consent. Honors eligibility required

**ART_GNRL 2005: Topics in Art - Humanities**  
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.  
**Credit Hour:** 1-3  
**Prerequisites:** Instructor’s consent

**ART_GNRL 2005H: Topics in Art - Humanities - Honors**  
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.
Credit Hour: 1-3
Prerequisites: Instructor’s consent. Honors eligibility required

**ART_GNRL 2020: International Summer Study Abroad**
A four-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at schedule critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated once for credit.
Credit Hours: 4
Prerequisites: Instructor’s consent

**ART_GNRL 2030: Context and Culture**
The purpose of this course is to give journalism students a framework for engaging with the visual arts, with a focus on the 20th century and today. Our goal is to conduct a foundation for thinking, talking and writing about the visual arts, especially works and movements that might be challenging for the novice to understand.
Credit Hours: 3
Prerequisites: instructor’s consent

**ART_GNRL 2030H: Context and Culture - Honors**
The purpose of this course is to give journalism students a framework for engaging with the visual arts, with a focus on the 20th century and today. Our goal is to conduct a foundation for thinking, talking and writing about the visual arts, especially works and movements that might be challenging for the novice to understand.
Credit Hours: 3
Prerequisites: instructor’s consent. Honors eligibility required

**ART_GNRL 3001: Topics in Art**
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.
Credit Hour: 1-3
Prerequisites: junior standing and instructor's consent

**ART_GNRL 3001H: Topics in Art - Honors**
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.
Credit Hour: 1-3
Prerequisites: Instructor’s consent. Honors eligibility required

**ART_GNRL 3005H: Topics in Art - Humanities Honors**
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.
Credit Hour: 1-3
Prerequisites: Instructor’s consent. Honors eligibility required

**ART_GNRL 3005: Topics in Art - Humanities**
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.
Credit Hour: 1-3

**ART_GNRL 3020: International Summer Study Abroad**
A four-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at scheduled critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated once for credit.
Credit Hours: 4
Prerequisites: Instructor’s consent

**ART_GNRL 3030: Undergraduate Internship in Art**
Special learning situations not covered by coursework. Credit standards pre-arranged with dept. Limit on total hours of problems courses applies.
Credit Hour: 1-3
Prerequisites: Junior standing and departmental consent. Open only to Art and Art Education majors

**ART_GNRL 4001: Topics in Art**
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.
Credit Hour: 1-3
Prerequisites: consent of instructor

**ART_GNRL 4001H: Topics in Art - Honors**
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.
Credit Hour: 1-3
Prerequisites: Instructor’s consent, honors eligibility required

**ART_GNRL 4005H: Topics in Art - Humanities Honors**
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.
Credit Hour: 1-3
Prerequisites: Instructor’s consent. Honors eligibility required

**ART_GNRL 4005: Topics in Art - Humanities**
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.
Credit Hour: 1-3
Prerequisites: Instructor’s consent

**ART_GNRL 4030: Video Art and the Moving Image**
Video as a fine art form intersection sculpture, performing arts, doc filmmaking, pop culture and the Internet. Theoretical and historical knowledge is integrated with studio practice. Students create video works in Final Cut Pro demonstrating technical ability and aesthetic vision. May be repeated for credit.
Credit Hours: 3
Prerequisites: Instructor’s consent
### ART_GNRL 4040: 2-D Portfolio Development
This course will provide an intensive experience in the development of a portfolio of personal work outside the traditional media boundaries. Students will explore media relevant to their particular needs and begin to explore the connections between their work and contemporary art and culture through readings, discussions and critiques. Expendable Materials Fee Required. May be repeated 1 credit hours. Prerequisites: 3000-level or above course in one of the following media areas: Drawing, Painting or Printmaking. Junior Standing and instructor’s consent required.

**Credit Hours:** 3

### ART_GNRL 4050: Performance Art
(cross-leveled with ART_GNRL 7050) This studio art course will survey the practices and theory in Performance Art, its trends intersecting with visual and media-based art, experimental theater, music, and dance. Often a non-interpretative performance genre, Performance Art blurs the edges between art and life, performer/s and audience, with the lived experience and the body’s relationship to environment and time as a continuous undercurrent. In this course we will look at several areas in which performance is engaged: performance and the object, performance and the mediated body, performance and language and performance and alternative environments. These will be considered via the spectrum of practice from private ritual to public presentation and the possibilities of solo and collaborative work. Studio and theoretical explorations will be conducted through presentations, performance exercises and projects, readings, discussion and critique. Graded on A-F basis only.

**Credit Hours:** 3

### ART_GNRL 4975: Senior Seminar in Art
A capstone course for the undergraduate art degree with emphasis on the production of a written statement relating to the students’ visual research.

**Credit Hours:** 3

**Prerequisites:** senior standing and ENGLSH 1000

### ART_GNRL 4976: Design - Senior Seminar
Capstone for undergraduate art students who are interested in graphic design. Emphasis placed on research and writing about the theory and practice of design. All students will participate in a final, formal portfolio review with outside evaluators.

**Credit Hours:** 3

**Prerequisites:** senior standing and ENGLSH 1000

### ART_GNRL 7000: Graduate Art - Studio Practice and Critique
Art studio practice emphasis on individual creative expression. Course may be repeated for up to 15 credit hours. Expendable materials fee required. Graded on A-F basis only. Prerequisites: Graduate Art Major

**Credit Hours:** 3

### ART_GNRL 7001: Topics in Art
Special studies in studio art at the graduate level; covers subjects not included in regularly offered courses. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** instructor’s consent

### ART_GNRL 7005: Topics in Art - Humanities
Special studies in graduate level studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topics.

**Credit Hour:** 1-3

**Prerequisites:** instructor’s consent

### ART_GNRL 7020: International Summer Study Abroad
A four-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at scheduled critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated for credit.

**Credit Hours:** 4

### ART_GNRL 7030: Video Art and the Moving Image
Video as a fine art form intersecting sculpture, performing arts, doc filmmaking, pop culture and the Internet. Theoretical and historical knowledge is integrated with studio practice. Students create video works in final Cut Pro demonstrating technical ability and aesthetic vision. May be repeated for credit.

**Credit Hours:** 3

### ART_GNRL 7050: Performance Art
(cross-leveled with ART_GNRL 4050) This studio art course will survey the practices and theory in Performance Art, its trends intersecting with visual and media-based art, experimental theater, music, and dance. Often a non-interpretative performance genre, Performance Art blurs the edges between art and life, performer/s and audience, with the lived experience and the body’s relationship to environment and time as a continuous undercurrent. In this course we will look at several areas in which performance is engaged: performance and the object, performance and the mediated body, performance and language and performance and alternative environments. These will be considered via the spectrum of practice from private ritual to public presentation and the possibilities of solo and collaborative work. Studio and theoretical explorations will be conducted through presentations, performance exercises and projects, readings, discussion and critique. Graded on A-F basis only.

**Credit Hours:** 3

### ART_GNRL 7085: Problems in Art
Individual study in a subject area to be proposed by the student and approved by the instructor. The student will meet periodically on a regular basis with the instructor to review progress on the work assigned. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** for students with strong preparation in Art; departmental consent

### ART_GNRL 8000: Graduate Art - Advanced Studio Practice and Critique
Continuation of ART_GNRL 7000. Art studio practice with emphasis on individual creative expression. Course may be repeated for up to 15 credit hours. Expendable materials fee required. Graded on A-F basis only. Prerequisites: Graduate Art Major

**Credit Hours:** 3
ART_GNRL 8001: Topics in Art
Special studies in graduate level studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.
Credit Hour: 1-3
Prerequisites: instructor's consent

ART_GNRL 8005: Topics in Art - Humanities
Special studies in graduate level studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.
Credit Hour: 1-3
Prerequisites: instructor's consent

ART_GNRL 8020: International Summer Study Abroad
A four week study abroad in studio art with required participation in scheduled excursion to art-related sites. Students create original art for review at schedule critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated once for credit. Graded on A-F basis only.
Credit Hours: 4

ART_GNRL 8070: Graduate Art - Theory and Context
Contextualizing artwork in culture, history, and theory. May be repeated up to 18 hours for credit. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Graduate Art standing

ART_GNRL 8090: MFA Thesis Exhibition Documentation
Preparation of materials deemed necessary to document in a permanent form the thesis exhibition. Credit will be granted upon the satisfactory completion of the document, which will be retained by the Department of Art. Required of all MFA candidates. Graded on S/U basis only.
Credit Hour: 1

ART_GNRL 9010: Graduate Studio Seminar
Practical and philosophical concerns of the visual artist. Mandated for all MFA candidates.
Credit Hour: 1

Art-Graphic Design (ART_GRDN)

ART_GRDN 1400: Beginning Digital Imaging
Class will cover the basic tools used in digital imaging software. A variety of different software may be offered. Course may be repeated for up to 3 hours with the consent of instructor. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: basic understanding of the Macintosh computer

ART_GRDN 2400: Advanced Digital Imaging
Class will cover the basic tools used in digital imaging software. A variety of different software may be offered. Course may be repeated for up to 3 hours with the consent of instructor. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: ART_GRDN 1400, and a basic understanding of the Macintosh computer

ART_GRDN 2410: Graphic Design I
Emphasis on developing a design language and vocabulary. Projects explore visual images in two-dimensional space, each one focusing on a specific set of relationships. Introduction to methodological and research practices for designers. Payment of expendable materials fee is required.
Credit Hours: 3
Prerequisites: ART_GRDN 1030, ART_GRDN 1040 and ART_DRAW 1050

ART_GRDN 2420: Graphic Design II
Introduction to the discipline, function and tradition of typography. Topics include evolution and anatomy of typography, communication, legibility/readability, language sequence and information hierarchy. Course concludes with portfolio review for admission into Graphic Design III.
Payment of expendable materials fee is required.
Credit Hours: 3
Prerequisites: ART_GRDN 2410

ART_GRDN 2430: Introduction to Calligraphy
Technical and historical instruction on five calligraphic alphabets. Application of hand lettering to both two and three-dimensional design projects. Emphasis placed on both technical mastery of letters and creative expression in projects.
Credit Hours: 3
Prerequisites: ART_GNRL 1030 and ART_DRAW 1050 or instructor's consent

ART_GRDN 3410: Graphic Design III
Digital media and motion graphics are explored through the development of interactive presentations and web site design. Students experiment with the computer as a medium for delivery of communication. New, practical and conceptual skills will be discussed in order to develop meaningful, interactive user experiences. Payment of expendable materials fees is required.
Credit Hours: 3
Prerequisites: ART_GRDN 2420 and successful completion of the graphic design portfolio review

ART_GRDN 3420: Graphic Design IV
Goal directed graphic design problem solving stressing the integration of theory and practical applications while sharpening conceptual, computer, and research skills. Topics include current design theory, advanced typographic study, production methods and design/client interaction.
Payment of expendable materials fee is required.
Credit Hours: 3
Prerequisites: ART_GRDN 3410
ART_GRDN 3430: Advanced Calligraphy
Technical and historical instruction to calligraphic alphabets including Uncial, Fraktur, Copperplate and Neuland. Application of hand lettering in two and three-dimensional design projects. Emphasis placed on both mastery of letters and creative exploration in projects.
Credit Hours: 3
Prerequisites: ART_GRDN 2430

ART_GRDN 3440: Packaging Design
This course will look at the discipline of packaging design from a three-dimensional perspective. By gaining an understanding of the materials and processes that relate to packaging, students will develop a selection of packaging solutions for a variety of different clients. Payment of expendable material fee is required.
Credit Hours: 3
Prerequisites: Successful completion of the graphic design portfolio review and/or instructor’s consent

ART_GRDN 3441: The History of Graphic Design
Broad overview of the history of graphic design. Topics will range from the history of printing, the beginnings of the profession, major movements and developments to the practice of design. Also looks at how the history of design and printing apply to today’s visual communication.
Credit Hours: 3
Prerequisites: instructor’s consent

ART_GRDN 3442: Design for Corporate Identity and Branding
Planning, strategy, and design of the visual components necessary to create a corporate identity. Course will focus on how cohesive design programs function across various mediums and engage specific audiences. Payment of expendable materials fees is required.
Credit Hours: 3
Prerequisites: Successful completion of the graphic design portfolio review and/or instructor’s consent

ART_GRDN 3443: Letterpress
This course is about creating conceptual design solutions using the letterpress printing process. Projects are very broad, conceptual and highly individual with the opportunity to explore letterpress printing processes using several different presses and printing techniques. Each project will require a limited edition print run. Repeatable to 9 hours.
Credit Hours: 3
Prerequisites: Instructor’s consent

ART_GRDN 4410: Graphic Design V
Directed research, study and critical analysis in graphic design. Emphasis placed on research, writing, problem solving, aesthetic perception, conceptual thinking skills and technical proficiency. Students will focus on portfolio preparation and are advised to take the course a minimum of two times. May be repeated to 15 hours maximum. Payment of expendable materials fee is required.
Credit Hours: 3
Prerequisites: ART_GRDN 3420

ART_GRDN 4485: Problems in Graphic Design
Credit Hour: 1-3
Prerequisites: ART_GRDN 4410, and departmental consent

ART_GRDN 4996: Imprint - Design Practicum
Class operates as professional design studio doing work for university, local and regional clients. Focus on client/designer relationships, contracts and teamwork. Students passing with grade in A range will graduate with departmental honors. May be repeated for credit.
Credit Hours: 3
Prerequisites: Admission based on GPA (3.3 in art courses) and portfolio review; junior standing

ART_GRDN 7400: Graduate Graphic Design
Graduate level work in graphic design. Emphasis on self-directed research and critical analysis. Students are encouraged to focus on conceptual development of their design work. Instruction is tailored to the student’s individual investigations. Repeatable to 15 hours maximum.
Credit Hours: 3
Prerequisites: instructor’s consent

ART_GRDN 7485: Problems in Graphic Design
Graduate level work in graphic design.
Credit Hour: 1-3
Prerequisites: ART_GRDN 4410 and departmental consent

ART_GRDN 8400: Graduate Graphic Design II
Continuation of ART_GRDN 7400. Repeatable to 15 hours.
Credit Hours: 3
Prerequisites: ART_GRDN 7400 or equivalent

Art-Painting (ART_PNT)

ART_PNT 2500: Beginning Painting
Introduces primary techniques of painting. Emphasis on conceptualization of visual perception (understanding how we see) and the creative processes (understanding how we create). Sections either in oil or acrylic; contact instructor. Expendable material fee required.
Credit Hours: 3

ART_PNT 2510: Beginning Watercolor Painting
Theory, practice of painting in water color from still life, landscape, figure. Expendable materials fee required.
Credit Hours: 3

ART_PNT 3500: Intermediate Painting
Continuation of ART_PNT 2500 with the addition of portrait painting. Expendable materials fee required.
Credit Hours: 3
Prerequisites: ART_PNT 2500
ART_PNT 3510: Intermediate Watercolor Painting
Continuation of ART_PNT 2510. Theory and practice of painting in watercolor. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_PNT 2510

ART_PNT 4500: Advanced Painting
Advanced problems in oil and acrylic painting. May be repeated to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_PNT 3500

ART_PNT 4510: Advanced Watercolor Painting
(cross-leveled with ART_PNT 7510). Advanced problems in watercolor. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_PNT 3510

ART_PNT 4585: Problems in Painting
Credit Hour: 1-3
Prerequisites: ART_PNT 4500 and departmental consent

ART_PNT 7500: Graduate Painting: Studio Practice and Critique
Advanced study. Emphasis on individual creative expression. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3
Prerequisites: graduate Art major

ART_PNT 7510: Graduate Watercolor Painting

Credit Hours: 3
Prerequisites: ART_PNT 4510

ART_PNT 7585: Problems in Painting
Credit Hour: 1-3
Prerequisites: ART_PNT 7500 and departmental consent

ART_PNT 8500: Graduate Painting: Advanced Studio Practice and Critique
Continuation of ART_PNT 7500. Repeatable to 15 hours.

Credit Hours: 3
Prerequisites: ART_PNT 7500 or equivalent

ART_PNT 8510: Graduate Watercolor Painting
Continuation of ART_PNT 7510. Repeatable to 15 hours.

Credit Hours: 3
Prerequisites: ART_PNT 7510 or equivalent

ART_PNT 8570: Graduate Painting - Theory and Context
Contextualizing artwork in culture, history, and theory. Repeatable to 18 hours for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Graduate Art standing

ART_PNT 8585: Problems in Painting II
Advanced independent studio practice including critical evaluation of student's creative work. Individual study in painting is to be proposed by the student and approved by the instructor. The student will meet on a regular basis with the instructor to review student progress. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: For students with strong preparation in Art; departmental consent; ART_PNT 7585

Art-Photography (ART_PHOT)

ART_PHOT 2600: Beginning Photography
Introduction to photography within an art context; digital workflow including use of camera, software, and digital output methods; and a survey of both contemporary and historical topics related to visual and conceptual concerns. Digital camera with RAW capability and manual aperture + shutter controls required. DSLR recommended. Payment of expendable materials fee required.

Credit Hours: 3
Recommended: ART_GNRL 1030, ART_GNRL 1040, ART_DRAW 1050

ART_PHOT 3600: Intermediate Photography
Continuation of ART_PHOT 2600 with emphasis utilizing acquired technical process to facilitate use of the camera as a means of developing awareness of immediate environment and the capabilities of Photography as a communicative, documentary, and expressive medium. Payment of expendable material fee is required.

Credit Hours: 3
Prerequisites: ART_PHOT 2600 or approved equivalent and consent required

ART_PHOT 4600: Advanced Photography
Exploration of aesthetic concepts, development of personal vision, and instruction in advanced technical process including fine B&W printing, negative and positive color, large format, zone system, and portfolios and book design to facilitate critical observation and personal expression through the medium of Photography. Payment of expendable materials fee is required. May repeat to 15 hours maximum.

Credit Hours: 3
Prerequisites: ART_PHOT 2600 and ART_PHOT 3600 or approved equivalents, and consent required

ART_PHOT 4685: Problems in Photography
Supervised research in creative photography.

Credit Hour: 1-3
Prerequisites: ART_PHOT 4410 and departmental consent
ART_PHOT 7600: Graduate Photography
Advanced technical study with emphasis on development of the individual student’s creative ideas. Payment of expendable materials expense is required. May repeat to 15 hours maximum.

Credit Hours: 3
Prerequisites: ART_PHOT 3600 and consent required

ART_PHOT 7685: Problems in Photography
Supervised research in creative photography.

Credit Hour: 1-3
Prerequisites: ART_PHOT 4410

ART_PHOT 8600: Graduate Photography II
Continuation of ART_PHOT 7600. Repeatable to 15 hours.

Credit Hours: 3
Prerequisites: ART_PHOT 7600 or equivalent

Art-Printmaking (ART_PRNT)

ART_PRNT 2700: Beginning Printmaking
Introductory Relief, Intaglio and Lithography techniques in color and black and white including woodcut, linocut reduction, etching; aquatint, dry point, photo mechanics and pronto plate lithography. May be repeated to six hours maximum. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_GNRL 1030 or one semester of Drawing

ART_PRNT 2730: Serigraphy
Introduces methods, materials, and techniques of printmaking with the silk screen. Payment of expendable materials expense is required. May repeat to 6 hours maximum.

Credit Hours: 3
Prerequisites: ART_GNRL 1030 or one semester of Drawing

ART_PRNT 3700: Intermediate Printmaking
Continuing work in litho, intaglio, relief or serigraphy. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_PRNT 2700 and/or instructor’s consent

ART_PRNT 4700: Advanced Printmaking
Advanced study in relief, intaglio, lithographic and/or serigraphy printmaking with emphasis on individual creative expression. May be repeatable to 15 hours. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_PRNT 3700 and/or consent required

ART_PRNT 4785: Problems in Printmaking
Credit Hour: 1-3
Prerequisites: departmental consent

ART_PRNT 7700: Graduate Printmaking
Graduate level study in relief, intaglio or lithographic printmaking with emphasis on individual creative expression. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_PRNT 4700

ART_PRNT 7785: Problems in Printmaking
Credit Hour: 1-3
Prerequisites: ART_PRNT 7700 and departmental consent

ART_PRNT 8700: Graduate Printmaking II
Continuation of ART_PRNT 7700. Repeatable to 15 hours.

Credit Hours: 3
Prerequisites: ART_PRNT 7700 or equivalent

Art-Sculpture (ART_SCUL)

ART_SCUL 2800: Beginning Sculpture
Principles of sculptural organization, figure studies, modeling techniques, simple plaster casting. Payment of expendable materials expense is required.

Credit Hours: 3
Prerequisites: ART_GNRL 1030 or ART_DRAW 2200

ART_SCUL 2810: Experimental Media I
Ordering and structuring materials into compositional forms, using various media, traditional as well as new. Subject matter will vary each semester.

Credit Hours: 3
Prerequisites: ART_DRAW 2200 or instructor’s consent

ART_SCUL 2820: Beginning Welding And Casting
This course is intended to foster critical thinking, creative problem solving, and cultural/visual literacy through the introduction of sculptural welding and metal casting techniques. Projects will address the sculptural methods of manipulation, addition, and substitution as well as the principles of three-dimensional design. Students will become conversant with MIG and gas welding as well as centrifugal and ceramic shell casting. The relationship of form and content will be discussed during class critiques. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ART_GNRL 1040 or permission of instructor

ART_SCUL 3800: Intermediate Sculpture
Continuation of ART_SCUL 2800. Introduction to carving techniques. Payment of expendable materials expense is required.

Credit Hours: 3
Prerequisites: ART_SCUL 2800

ART_SCUL 3810: Experimental Media II
Continuation of ART_SCUL 2810.

Credit Hours: 3
Prerequisites: ART_SCUL 2810
ART_SCUL 4800: Advanced Sculpture
This course will build skills acquired in ART_SCUL 3800. Includes welding, casting, carving and assemblage with emphasis on the development of a personal visual language. May repeat to 15 hours maximum.
Credit Hours: 3
Prerequisites: ART_SCUL 3800

ART_SCUL 4810: Experimental Media III
Continuation of ART_SCUL 3810. May repeat to 15 hours maximum.
Credit Hours: 3
Prerequisites: ART_SCUL 3810

ART_SCUL 4885: Problems in Sculpture
Credit Hour: 1-3
Prerequisites: departmental consent

ART_SCUL 7800: Graduate Sculpture
Payment of expendable materials expense is required. May repeat to 15 hours maximum.
Credit Hours: 3

ART_SCUL 7810: Experimental Media IV
Advanced study of compositional organization at the graduate level. May repeat to 9 hours maximum.
Credit Hours: 3
Prerequisites: ART_SCUL 4810

ART_SCUL 7885: Problems in Sculpture
Credit Hour: 1-3
Prerequisites: ART_SCUL 7800 and departmental consent

ART_SCUL 7880: Graduate Sculpture II
Continuation of ART_SCUL 7800. Repeatable to 15 hours.
Credit Hours: 3
Prerequisites: ART_SCUL 7800 or equivalent

Astronomy (ASTRON)

ASTRON 1010: Introduction to Astronomy
Survey of methods of astronomy; description of the solar system, stellar astronomy, structure of the galaxy and the universe. Three hours of lecture and one hour of lab per week (scheduled by the instructor). Satisfies physical science laboratory requirement. Laboratory section: Survey of astronomical methods, instruments, observations and measurement techniques.
Credit Hours: 4
Prerequisites: high school algebra and plane geometry, or MATH 1100 or MATH 1120, or equivalent

ASTRON 1020: Introduction to Laboratory Astronomy
Laboratory supplement to Astronomy 1010. Satisfies physical science laboratory requirement. Survey of astronomical methods, instruments, observations and measurement techniques.
Credit Hours: 2
Prerequisites: high school algebra and geometry

ASTRON 3010: Introduction to Modern Astrophysics
(same as PHYSCS 3010). Elements of stellar, and galactic astrophysics. Interpretation of observations and physical conditions of various astronomical objects including stars, gaseous nebulae and, galaxies.
Credit Hours: 3
Prerequisites: PHYSCS 2760

ASTRON 4020: Astrophysical Techniques
(same as PHYSCS 4020). Elements of modern astronomical instruments, observations and analysis, with the emphasis in the optical regime. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: PHYSCS 2760

ASTRON 4180: Solar System Science
(same as PHYSCS and GEOL 4180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.
Credit Hours: 3
Prerequisites: MATH 1700, PHYSCS 1220 or PHYSCS 2760 or instructor's consent

ASTRON 4250: Stellar Astrophysics
(same as PHYSCS 4250). Basic astrophysics of stable and unusual stars, stellar systems. Investigates stellar dimensions, radiation, spectra, energy, evolution, populations; interstellar medium, stellar motions and aggregation.
Credit Hours: 3
Prerequisites: PHYSCS 3150 or concurrently or instructor's consent

ASTRON 4350: Galactic Astronomy
(same as PHYSCS 4350). Observational properties of normal galaxies and clusters of galaxies, Seyfert and emission-line structure and dynamics of galaxies; interacting galaxies, quasi-stellar objects. Introduction to cosmology.
Credit Hours: 3
Prerequisites: PHYSCS 3010, PHYSCS 4140 or instructor's consent

ASTRON 4360: Extragalactic Astronomy
(same as PHYSCS 4360). This course introduces students to the most basic knowledge of extragalactic astronomy, starting from Milky Way and extending to the most distant universe. Topics covered will include galaxy morphology and classification, groups and clusters of galaxies, active galactic nuclei, and galaxy formation and evolution.
Credit Hours: 3
Prerequisites: PHYSCS 2760
ASTRON 4460: Interstellar Medium
(same as PHYSCS 4460). The course discusses observational properties and physical and chemical processes occurring in the interstellar medium. Topics include interstellar diffuse and molecular clouds, HII regions, dust grains, interstellar chemistry, star formation, supernova remnants, and interstellar shock waves.

Credit Hours: 3
Prerequisites: PHYSCS 1220 or PHYSCS 2760

ASTRON 4550: Cosmochemistry
(same as PHYSCS 4550). Cosmic dust, stardust, spectra, energy, interstellar medium, meteorites, astromineralogy.

Credit Hours: 3
Prerequisites: PHYSCS 2760 or PHYSCS 1220; instructor’s consent

ASTRON 4950: Undergraduate Research in Astronomy
Special studies in astronomy; covers subjects not included in courses regularly offered.

Credit Hour: 1-99
Prerequisites: instructor’s consent

ASTRON 4960: Senior Thesis in Astronomy
Special studies for senior undergraduate students in astronomy. The course requires an oral or poster presentations, or faculty-guided writing of a senior thesis involving independent research.

Credit Hours: 3
Prerequisites: instructor’s consent and 3 units of ASTRON 4950. Departmental consent required for repetition

ASTRON 7020: Astrophysical Techniques
(same as PHYSCS 7020; cross-leveled with ASTRON 4020). Elements of modern astronomical instruments, observations and analysis, with the emphasis in the optical regime. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PHYSCS 2760

ASTRON 7180: Solar System Science
(same as PHYSCS 7180 and GEOL 7180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.

Credit Hours: 3
Prerequisites: PHYSCS 1220 or PHYSCS 2760 or instructor’s consent

ASTRON 7360: Extragalactic Astronomy
(same as PHYSCS 7360). This course introduces students to the most basic knowledge of extragalactic astronomy, starting from Milky Way and extending to the most distant universe. Topics covered will include galaxy morphology and classification, groups and clusters of galaxies, active galactic nuclei, and galaxy formation and evolution.

Credit Hours: 3
Prerequisites: PHYSCS 2760

ATHTRN 1100: Athletic Training Skills I
Introduction to athletic training skills. Clinical observation hours required. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Restricted to Pre-Athletic Training majors only

ATHTRN 1200: Athletic Training Skills II
Continuation of athletic training skills. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Pre-Athletic Training majors; Completion of ATHTRN 1100 with minimum grade of B-

ATHTRN 2001: Topics in Athletic Training
Organized study of selected topics in Athletic Training. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-15
Prerequisites: Instructor’s consent

ATHTRN 2100: Principles and Fundamentals of Athletic Training
Introduces students to the common principles and fundamentals associated with the profession of athletic training. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 2250 with a minimum grade of B-

ATHTRN 2150: Athletic Training Practicum I
The first in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; ATHTRN 1100, ATHTRN 1200, and ATHTRN 2100

ATHTRN 2250: Athletic Training Practicum II
The second in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 2150 with minimum grade of B-

ATHTRN 2500: Elementary Human Anatomy
Analysis of the structure and function of cells, tissue, and organ systems. Emphasis is placed on the muscular, skeletal, and nervous systems as they relate to human movement. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Pre-Athletic Training majors only

ATHTRN 2600: Human Physiology
Investigation into the structure, function, physiology, and biochemistry of the cardiovascular, lymphatic, respiratory, digestive, urinary, endocrine, and reproductive systems. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors only; Completion of ATHTRN 2500 with a minimum grade of C

ATHTRN 3100: Mental Health in Athletic Training
Study of psychosocial strategies, mental health referral policies and clinical application to athletic training. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; PSYCH 1000

ATHTRN 3150: Athletic Training Practicum III
The third in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors only; Completion of ATHTRN 2250 with a minimum grade of B-

ATHTRN 3200: Therapeutic Modalities
Study of therapeutic modalities utilized in the treatment and rehabilitation of athletic injuries. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 2250 with a minimum grade of B-

ATHTRN 3250: Athletic Training Practicum IV
The fourth in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 3150 with a minimum grade of B-

ATHTRN 3300: Injury Assessment I
A systematic approach to injury evaluation of the lower extremity and spine. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 2100 with a minimum grade of B- and ATHTRN 2500 with a minimum grade of C

ATHTRN 3400: Injury Assessment II
A systematic approach to injury evaluation of the upper extremity, spine and head. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 3300 with a minimum grade of B-

ATHTRN 3500: Rehabilitation of Athletic Injuries
Study of rehabilitation principles and techniques used to return active individuals to their sport/activity. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 3200 with a minimum grade of B-

ATHTRN 3600: Administration of Athletic Training
Examines the organizational and administrative aspects of Athletic Training. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors

ATHTRN 3800: General Medical Conditions
Examination of illness and disease found within the athletic population. Course graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors only, Completion of ATHTRN 3150 with a minimum grade of B-

ATHTRN 4150: Athletic Training Practicum V
The fifth in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 3250 with a minimum grade of B-
ATHTRN 4250: Athletic Training Practicum VI
The sixth in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 4150 with a minimum grade of B-

ATHTRN 4500: Nutrition for Athletic Performance and Rehabilitation
Nutritional study examining how nutrition impacts sports performance. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 4150 with a minimum grade of B-

ATHTRN 4970: Seminar in Athletic Training
Capstone senior athletic training course. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 4150 with a minimum grade of B-

Atmospheric Science (ATM_SC)

ATM_SC 1050: Introductory Meteorology
(same as GEOG 1050). Physical processes of atmosphere in relation to day-to-day changes in weather.

Credit Hours: 3

ATM_SC 2100: Introduction to Atmospheric Science
Physical process of the atmospheric and climate system will be related to day-to-day weather changes. Students will be introduced to the laws of motion and thermodynamics that govern motions in geophysical fluid. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MATH 1160 or concurrent enrollment in MATH 1500

ATM_SC 2150: Natural Hazards
A survey of natural hazards, including severe thunderstorms, tornadoes, flooding, tropical storms, ocean movements, earthquakes, Tsunamis, volcanoes, asteroids, solar weather, managing risk and human impacts. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ATM_SC 1050 or equivalent or instructor’s consent

ATM_SC 2720: Weather Briefing
Student participation in daily discussions of current weather patterns and forecasts and their applications to weather sensitive activities including aviation, agriculture and industry.

Credit Hour: 1
Prerequisites: ATM_SC 1050

ATM_SC 2792: Weather Communication
Methods of surface and upper air weather observation. How such data are distributed to users in the meteorological community is also addressed. Prerequisites: ATM_SC 1050; sophomore standing or instructor’s consent

ATM_SC 3000: Independent Study in Atmospheric Science
Independent study of a topic dealing with meteorological theory or application of meteorological science to the solution of relevant problem.

Credit Hour: 1-3
Prerequisites: upper-level standing, ATM_SC 1050 or equivalent, and instructor’s consent

ATM_SC 3600: Climates of the World
(same as GEOG 3600). A study of the world distribution of climates based on "cause and effect" relationships. Special attention is given to the impacts of climate on humanity.

Credit Hours: 3
Prerequisites: ATM_SC 1050 or equivalent or graduate standing

ATM_SC 4001: Topics in Atmospheric Science
Development of theory and applications for selected topics in atmospheric science.

Credit Hour: 1-99
Prerequisites: junior standing and instructor’s consent

ATM_SC 4110: Broadcast Meteorology I
An introduction to broadcast meteorology including the business of media, use of meteorological data to produce a forecast, and television and radio presentation skills. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: ATM_SC 1110, ATM_SC 2720, or equivalents
Corequisites: ATM_SC 4710. Restricted to Atmospheric Science majors or instructor’s consent

ATM_SC 4310: Atmospheric Thermodynamics
Thermodynamics of dry and moist air, atmospheric hydrostatics, convection, and development of the fundamental equations of geophysical fluid dynamics.

Credit Hours: 4
Prerequisites: ATM_SC 1050, MATH 1700 (C or better), and one physics course

ATM_SC 4320: Atmospheric Dynamics
Dynamics and kinematics of atmospheric flow. Manipulation of fundamental equations, numerical modeling of atmosphere.

Credit Hours: 4
Prerequisites: ATM_SC 4310 or ATM_SC 7310

ATM_SC 4350: Mesoscale Meteorology and Dynamics
Survey of mesoscale phenomena, observing systems, analysis techniques, and modeling. Topics include fronts, jet streaks, gravity waves, organized convection, tornadoes, and severe local storm forecasting and structure.

Credit Hours: 3
Prerequisites: ATM_SC 4720 or ATM_SC 7720 and MATH 2300
ATM_SC 4400: Micrometeorology
Study of transport processes in the surface boundary layer. Important applications in pollution will be discussed.
Credit Hours: 3
Prerequisites: ATM_SC 4310 or PHYSCS 2760, MATH 2300

ATM_SC 4500: Advanced Meteorological Observation and Instrumentation
Automated weather observation and instrumentation used in networks of remote automated weather stations. Emphasis on electronic instrumentation, datalogger programming, data collection and data management, generating dynamic reports on the World Wide Web. May be repeated for credit.
Credit Hours: 3
Prerequisites: ATM_SC 1050

ATM_SC 4510: Remote Sensing for Meteorology and Natural Resources
Principles of remote sensing with emphasis on the properties of atmosphere and the earth’s surface from airborne and satellite sensors. The techniques for using geosynchronous and orbiting satellite platforms for assessing weather and natural resource features.
Credit Hours: 3
Prerequisites: ATM_SC 1110, MATH 1500, junior standing or instructor's consent

ATM_SC 4520: Environmental Biophysics
(same as GEOG 4520). Students will learn techniques and principles used to describe the microenvironment of living organisms and use quantitative expressions to estimate missing values, and mass transfer laws to estimate flux of energy, water and gas.
Credit Hours: 3
Prerequisites: College Physics and Calculus I

ATM_SC 4550: Atmospheric Physics
Physics of atmospheric nucleation-condensation, cloud droplet and precipitation formation, associated electrical phenomena, radiation transfer and remote sensing.
Credit Hours: 3
Prerequisites: 1 year of college Physics and MATH 1700

ATM_SC 4590: Radar Meteorology
Course concerns the theory and application of radar in meteorology. May be repeated for credit.
Credit Hours: 3
Prerequisites: ATM_SC 1110, MATH 1700, PHYSCS 2750

ATM_SC 4650: Long-Range Forecasting
Physical-dynamical principles of long-range forecasting from a month to a year. Empirical and numerical approaches in forecast practice.
Credit Hours: 3
Prerequisites: ATM_SC 4050 or ATM_SC 7050 or ATM_SC 3600

ATM_SC 4710: Synoptic Meteorology I
Meteorological Data. Basic techniques for surface and upper air analysis, using selected examples of weather patterns.
Credit Hours: 4
Prerequisites or Corequisites: one physics course
Prerequisites: ATM_SC 1050, MATH 1700 (C or better)

ATM_SC 4720: Synoptic Meteorology II
Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research.
Credit Hours: 4
Prerequisites: ATM_SC 4710 or ATM_SC 7710

ATM_SC 4730: Advanced Forecasting Laboratory
Advanced principles of weather forecasting will be addressed via online electronic modules and weekly laboratory exercises. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ATM.SC 4710 or ATM.SC 7710, ATM.SC 4720 or ATM.SC 7720, MATH 2300

ATM_SC 4800: Numerical Methods in Atmospheric Science and Natural Resources
Examines numerical methods used in solving differential equations, filtering data sets, and Fourier decomposition of discrete data sets.
Credit Hours: 3
Prerequisites: Math through Calculus III or senior standing

ATM_SC 4949: Internship in Meteorology
Practical professional work experience with professional or scientific meteorologists in off-campus work environment. Graded on S/U basis only.
Credit Hours: 1-6
Prerequisites: junior standing, 12 hours Atmospheric Science

ATM_SC 4950: Undergraduate Research in Atmospheric Science
Research apprenticeship with a faculty mentor. Students are expected to develop initial concept for the research, design experiments, collect data, and analyze data with faculty input, oversight, and guidance.
Credit Hours: 1-4
Prerequisites: STAT 1400, MATH 1500, 10 hours of Atmospheric Science and instructor's consent

ATM_SC 4990: Daily Analysis and Forecast Interpretation
A Capstone experience. In depth daily analysis and interpretation by students of the current and forecast states of the atmosphere. Discussions of implications to specific weather sensitive activities.
Credit Hours: 3
Prerequisites: senior or graduate Atmospheric Science major

ATM_SC 7001: Topics in Atmospheric Science
Development of theory and applications for selected topics in atmospheric science.
Credit Hour: 1-99
Prerequisites: instructor’s consent

ATM_SC 7085: Problems in Atmospheric Science
Independent study by graduate students in atmospheric science.
Credit Hour: 1-99

Prerequisites: ATM_SC 7085: Problems in Atmospheric Science
Independent study by graduate students in atmospheric science.
Credit Hour: 1-99

ATM_SC 7310: Atmospheric Thermodynamics
Thermodynamics of dry and moist air, atmospheric hydrostatics, convection, and development of the fundamental equations of geophysical fluid dynamics.
Credit Hours: 4
Prerequisites: ATM_SC 1050, MATH 1700 (C or better), and one physics course

ATM_SC 7320: Atmospheric Dynamics
Dynamics and kinematics of atmospheric flow. Manipulation of fundamental equations, numerical modeling of atmosphere.
Credit Hours: 4
Prerequisites: ATM_SC 4310 or ATM_SC 7310

ATM_SC 7350: Mesoscale Meteorology and Dynamics
Survey of mesoscale phenomena, observing systems, analysis techniques, and modeling. Topics include fronts, jet streaks, gravity waves, organized convection, tornadoes, and severe local storm forecasting and structure.
Credit Hours: 3
Prerequisites: ATM_SC 4720 or ATM_SC 7720 and MATH 2300

ATM_SC 7400: Micrometeorology
Study of transport processes in the surface boundary layer. Important applications in pollution will be discussed.
Credit Hours: 3
Prerequisites: ATM_SC 4050 or ATM_SC 7050

ATM_SC 7550: Atmospheric Physics
Physics of atmospheric nucleation-condensation, cloud droplet and precipitation formation, associated electrical phenomena, radiation transfer and remote sensing.
Credit Hours: 3
Prerequisites: 1 year of college Physics and MATH 1700

ATM_SC 7590: Radar Meteorology
Course concerns the theory and application of radar in meteorology. Graduate students will be required to conduct an independent research project using radar, in addition to the undergraduate requirements for the class. May be repeated for credit.
Credit Hours: 3
Prerequisites: ATM_SC 4050 or ATM_SC 7050 or ATM_SC 3600

ATM_SC 7650: Long-Range Forecasting
Physical-dynamical principles of long-range forecasting from a month to a year. Empirical and numerical approaches in forecast practice.
Credit Hours: 3
Prerequisites or Corequisites: one physics course
Prerequisites: ATM_SC 4710 or ATM_SC 7710

ATM_SC 7800: Numerical Methods in Atmospheric Science and Natural Resources
Examines numerical methods used in solving differential equations, filtering data sets, and Fourier decomposition of discrete data sets.
Credit Hours: 3
Prerequisites: Math through Calculus III

ATM_SC 8001: Topics in Atmospheric Science
Development of the theory with its application for selected topics in atmospheric science.
Credit Hours: 3

ATM_SC 8090: Masters Research in Atmospheric Science
Original investigation in atmospheric science in support of a master’s thesis. Graded on S/U basis only.
Credit Hour: 1-99
ATM_SC 8400: Atmospheric General Circulation
Comprehensive review of dynamical theories of general circulation with intensive discussion of current problems.
Credit Hours: 3
Prerequisites: ATM_SC 4320 or ATM_SC 7320

ATM_SC 8450: Tropical Meteorology
Study of the synoptic and dynamic character of the atmosphere in the tropical regions, including an examination of the general circulation and tropical storms.
Credit Hours: 3
Prerequisites: ATM_SC 4710 or ATM_SC 7710, ATM_SC 4720 or ATM_SC 7720 and MATH 2300; instructor’s consent. Graded on A-F basis only

ATM_SC 8500: Radiation in the Atmosphere
Physics of solar and infrared radiative transfer in the atmosphere, including energy conversion effects, atmospheric optics, and photochemical processes.
Credit Hours: 3
Prerequisites: one year College Physics and MATH 1700

ATM_SC 8550: Nowcasting
Students will learn the science of nowcasting through the study of the various methods used and apply their knowledge in the design of the elements of a nowcast system and practical nowcasting exercises.
Credit Hours: 3
Prerequisites: ATM_SC 8500, instructor’s consent

ATM_SC 8600: Advanced Climate Dynamics
Study of global climate; application of large scale atmospheric dynamics; conservation of various forms of energy, climatic evaluation, large scale climatic modification.
Credit Hours: 3
Prerequisites: ATM_SC 4320 or ATM_SC 7320 and ATM_SC 8400 or ATM_SC 3600

ATM_SC 9001: Topics in Atmospheric Science
Development of the theory with its application for selected topics in atmospheric science.
Credit Hour: 1-99

ATM_SC 9085: Problems in Atmospheric Science
Independent study by graduate students in atmospheric science.
Credit Hour: 1-99

ATM_SC 9087: Seminar in Atmospheric Science
Seminar in Atmospheric Science.
Credit Hour: 1-99

ATM_SC 9090: Doctoral Research in Atmospheric Science
Original investigation in atmospheric science in support of a doctoral dissertation. Graded on S/U basis only.

ATM_SC 9300: Introduction to Chaos Theory
Atmospheric predictability and related topics are examined as they relate to governing equations of motion and their non-linear solutions.
Credit Hours: 3
Prerequisites: ATM_SC 4320 or ATM_SC 7320, MATH 4100

ATM_SC 9350: Advanced Dynamic Meteorology
Application of perturbation dynamics, advanced dynamics, and numerical methods to study of atmospheric circulations.
Credit Hours: 3
Prerequisites: ATM_SC 4320 or ATM_SC 7320

ATM_SC 9590: Advanced Applications of Weather Radar
This course will investigate quantitative uses of weather radar data that go beyond standard reflectivity and velocity image interpretation, particularly those that use new techniques such as dual-polarization. Students will develop methods to analyze and display meteorological radar data. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Instructor’s consent
Recommended: MATH 1700, PHYSCS 2760, INFOTC 1040 or equivalent, ATM_SC 4590

ATM_SC 9700: Advanced Synoptic Meteorology
Detailed examination of vertical motions, their forcing, and how each is diagnosed (quasigeostrophic theory, the Trenberth approximation, Q-vectors). Current issues in synoptic meteorology and operational forecasting are discussed.
Credit Hours: 3
Prerequisites: ATM_SC 4720 or ATM_SC 7720

ATM_SC 9712: Convection and Lightning
Cumulus convection and cloud physics topics that will facilitate a deeper understanding of cloud electrification and lightning production are studied. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ATM_SC 4710 or ATM_SC 7710, ATM_SC 4720 or ATM_SC 7720, MATH 2300; instructor’s consent

ATM_SC 9800: Numerical Weather Prediction
Examination of finite difference and objective analysis techniques, basic physical concepts, and parameterization of physical processes. Experience with a range of models (1-D cloud to operational PE models) stressed.
Credit Hours: 3
Prerequisites: instructor’s consent

Biochemistry (BIOCHM)

BIOCHM 1090: Introduction to Biochemistry
Fundamental concepts in biochemistry and molecular biology: structure function relationships, reactivity, thermodynamics, gene expression.
Professional skills for biomedical careers. Primarily for freshman and sophomore biochemistry majors. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** MATH 1100; departmental consent  
**Recommended:** Concurrent enrollment in CHEM 1320

---

**BIOCHM 1094: Introductory Biochemistry Laboratory**

Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes, PCR and cloning. Graded on A-F basis only.

**Credit Hours:** 2  
**Corequisites:** concurrent enrollment in BIOCHM 1090 required.  
**Departmental Consent Required**

---

**BIOCHM 2110: The Living World: Molecular Scale**

Survey of modern biochemistry and biotechnology. Structure and function of DNA, proteins, lipids and carbohydrates. The role of biopolymers in life processes and everyday living is emphasized.

**Credit Hours:** 3  
**Prerequisites:** for non-Biochemistry majors only

---

**BIOCHM 2112: Biotechnology in Society**

Biotechnology in a social context covers three areas: introduction to terminology and concepts, specific biotechnological applications to modern problems, and ethical questions.

**Credit Hours:** 3  
**Prerequisites:** for non-biochemistry majors only

---

**BIOCHM 2480: Introduction to Macromolecular Structure and Function**

The function of biochemical macromolecules is directly related to their structure. The three-dimensional structures of proteins, nucleic acids, polysaccharides and membranes are each explored in the context of their functions and their microenvironments within living organisms. Graded on A-F basis only.

**Credit Hours:** 2  
**Prerequisites:** CHEM 2100  
**Corequisites:** CHEM 2110

---

**BIOCHM 2484: Macromolecular Techniques Laboratory**

The laboratory experiments include DNA isolation, DNA cloning, PCR, plasmid transformation, protein expression, affinity-tagged chromatography, SDS-polyacrylamide gel electrophoresis, enzyme isolation, enzyme assay, buffer preparation, and Michaelis-Menten kinetics. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** sophomore standing; Biochemistry majors only. Honors eligibility required

---

**BIOCHM 3630: General Biochemistry**

Survey of biochemistry; static/dynamic aspects of carbohydrates, lipids, proteins, nucleic acid. Discussion of metabolic pathways, energy production, and metabolic regulatory mechanism.

**Credit Hours:** 3  
**Prerequisites:** CHEM 2050

---

**BIOCHM 4001: Topics in Biochemistry**

Experimental courses; highly specialized topics taught infrequently or courses taught by visiting professors.

**Credit Hour:** 1-99

---

**BIOCHM 4120: Medicinal Plant Science**

Presentation of core topics, including an overview of plant groups with medicinal properties, botanical nomenclature, important biochemical pathways, exposure to journals, texts, and online databases that facilitate evidence-based research involving medicinal plants. Content of worldwide application. Has an international flavor. The course facilitates students to be independent learners and critical thinkers in this important knowledge area (of value to diverse academic backgrounds). The important role of collaborative inter-disciplinary studies will also be emphasized. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** CHEM 1100 or CHEM 1320  
**Recommended:** BIO_SC 1200 or BIO_SC 1500 or BIOCHM 1090

---

**BIOCHM 4270: Biochemistry**

First semester of comprehensive biochemistry course: metabolic pathways, amino acids/proteins, carbohydrates, lipids, nucleic acids, kinetics, energy requirements, metabolic regulation in living cells.

**Credit Hours:** 3  
**Prerequisites:** C- or higher in BIOCHM 4270

---

**BIOCHM 4272: Biochemistry**

Second semester of a comprehensive biochemistry course, including metabolism of carbohydrates, fatty acids, steroids, amino acid synthesis and metabolism, molecular genetics, hormones, photosynthesis and integrated metabolism.

**Credit Hours:** 3  
**Prerequisites:** C- or higher in BIOCHM 4270

---

**BIOCHM 4300: Physical Chemistry of Biological Systems**

To present fundamental principles of physical chemistry in the context of the structure and function of biological macromolecules. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Biochemistry BIOCHM 4270 or concurrent enrollment
BIOCHM 4376: Computer Assisted Sequence Analysis and Molecular Modeling
Employs the use of computer-based interactive molecular graphics and sequence analysis software to analyze the three dimensional structures of macromolecules.

Credit Hours: 3
Prerequisites: CHEM 2110

BIOCHM 4385: Problems in Biochemistry
Credit Hour: 1-3
Prerequisites: departmental consent

BIOCHM 4460: Cancer Biology
(same as BIO_SC 4460). Cancer, cell biology, genetics, biochemistry.

Credit Hours: 3
Prerequisites: BIOCHM 4272, BIO_SC 2300 and BIO_SC 2200

BIOCHM 4510: Single Molecule Biophysics
(same as PHYSCS 4510; cross-leveled with BIOCHM 7510). The course provides an overview of the biophysics of enzymes, nucleic acids and the cytoskeleton. Topics covered will include diffusion, molecular motors, polymerization and the cytoskeleton and the polymer properties of nucleic acids and microtubules.

Credit Hours: 3
Prerequisites: PHYSCS 2760

BIOCHM 4940: Internship in Biochemistry
Field-based learning experience combining study, observation, and employment with a business, organization, or governmental agency. The internship provides opportunities to apply skills, concepts and theories about biochemistry in a practical context. The student intern, internship supervisor, and university coordinator will develop an individualized internship plan. Graded on S/U basis only.

Credit Hour: 1-6
Prerequisites: junior standing; instructor’s consent

BIOCHM 4950: Undergraduate Research in Biochemistry
Individually directed laboratory research for upperclass students under faculty supervision.

Credit Hour: 1-3
Prerequisites: departmental consent

BIOCHM 4964: Industrial Internship with ABC Laboratories
This 5-credit course is a school and field-based learning experience combining the study, observation, and employment with ABC Laboratories in Columbia, MO. The internship provides opportunities to apply skills, concepts and theories about biochemistry and analytical chemistry in a practical context. The purpose of the internship experience is to provide the intern with the opportunity to develop knowledge and skills deemed desirable for a career in the biotechnology industries. During the time indicated in this agreement for the internship experience, the intern is expected to become a productive employee of ABC Laboratories. This course will provide technical instruction on commonly used laboratory skills and instrumentation at the University of Missouri followed by technical instruction on software and instrumentation at ABC Laboratories. After the training period, the interns will have the opportunity to work at ABC Laboratories full time for the summer.

Credit Hours: 5
Prerequisites or Corequisites: BIOCHEM 4272, CHEM 3200
Prerequisites: BIOCHM 1090, BIOCHM 2484, BIOCHM 4270

BIOCHM 4970: Senior Seminar in Biochemistry
Problem-based course on fundamental concepts of biochemistry. Requires written and oral presentations. One of two capstone courses required for biochemistry majors. Corequisites: BIOCHM 4974

Credit Hour: 1

BIOCHM 4974: Biochemistry Laboratory
Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes. One of two capstone courses required for biochemistry majors.

Credit Hours: 5
Prerequisites: BIOCHM 4272 or concurrent enrollment in BIOCHM 4272
Corequisites: BIOCHM 4970

BIOCHM 4996H: Honors Research in Biochemistry
Laboratory research for upper level honors students in consultation with Biochemistry faculty.

Credit Hour: 2-3
Prerequisites: Honors eligibility required

BIOCHM 7085: Problems in Biochemistry
Problems in Biochemistry.

Credit Hour: 1-6
Prerequisites: Consent of Director of Graduate Studies required

BIOCHM 7110: Maps in Medicine Summer Institute
Lab/lecture course in which high school teachers gain knowledge of two innovative, inquiry-based programs, Mapping Health and Mapping Cell Fate, that focus on influenza and developmental biology and Missouri science standards for biology and health. Graded on S/U basis only.

Credit Hours: 2
Prerequisites: departmental consent

BIOCHM 7270: Biochemistry
First semester of comprehensive biochemistry course: metabolic pathways, amino acids/proteins, carbohydrates, lipids, nucleic acids, kinetics, energy requirements, metabolic regulation in living cells.

Credit Hours: 3
Prerequisites: CHEM 2110

BIOCHM 7272: Biochemistry
Second semester of a comprehensive biochemistry course, including metabolism of carbohydrates, fatty acids, steroids, amino acid synthesis and metabolism, molecular genetics, hormones, photosynthesis and integrated metabolism.

Credit Hours: 3
Prerequisites: BIOCHM 7270
BIOSCM 7274: Biochemistry Laboratory
Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; radiisotope tracers in metabolism; isolation, purification and kinetics of enzymes.
Credit Hours: 5
Corequisites: concurrent enrollment in BIOSCM 7270

BIOSCM 7376: Computer Assisted Sequence Analysis and Molecular Modeling
This course uses advanced computer graphics and computational techniques to analyze protein and nucleic acid sequences and their three-dimensional structures.
Credit Hours: 2
Prerequisites: CHEM 2110

BIOSCM 7510: Single Molecule Biophysics
(same as PHYSCS 7510; cross-leveled with BIOSCM 4510). The course provides an overview of the biophysics of enzymes, nucleic acids and the cytoskeleton. Topics covered will include diffusion, molecular motors, polymerization and the cytoskeleton and the polymer properties of nucleic acids and microtubules.
Credit Hours: 3
Prerequisites: PHYSCS 2760

BIOSCM 7978: Cancer Biology
(same as BIO_SC 7978). The course will cover major molecular and cellular aspects of cancer. Students will read original research articles, present overviews and lead class discussions.
Credit Hours: 3
Prerequisites: BIOSCM 4270, BIO_SC 2300 and BIO_SC 4976

BIOSCM 8060: Ethical Conduct of Research
(same as BIO_SC 8060). Discussion of ethical issues in biological research, including the rules and conventions for appropriate research conduct. Graded on S/U basis only.
Credit Hour: 1

BIOSCM 8090: Research in Biochemistry
Research in biochemistry for qualified students, with counsel of faculty. Includes preparation of dissertation. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: Consent of Director of Graduate Studies required

BIOSCM 8120: Advanced Medicinal Plant Science
Presentation of core topics in pharmacognosy, including an overview of plant groups with medicinal properties, essentials of botanical nomenclature, Overview of pharmacological activities of plant-sourced products and evidence-based research, phytochemical variation and significance, important biochemical pathways, origins of secondary metabolites, some major groups of phytochemicals, observations on economic and social trends in the use of medicinal plant products in developed and developing countries, overview of modern technology, high throughput screening, bioinformatics. Considerable exposure to key articles in journals, based on internationally accepted text (Trease & Evans), exposure to online databases - all sources of information that facilitate evidence-based research involving medicinal plants. Content of world-wide application. Has considerable international flavor and directly applicable to medicinal flora world-wide. The course facilitates students to be independent learners and critical thinkers in this important knowledge area (of value to diverse academic backgrounds). The important role of collaborative inter-disciplinary studies is also emphasized. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CHEM 1100 or CHEM 1320 or BIOSCM 1090 and BIO_SC 1200 or BIO_SC 1500 or the equivalent of these courses for non-MU students
Recommended: A Freshman level course in the Life Sciences or General Botany will also be advantageous but not essential

BIOSCM 8240: Introduction to Graduate Biochemistry I
Introduction to biochemistry for life science graduate students. Core course for Biochemistry students. Structures and interactions of biological macromolecules including thermodynamics, binding, enzyme action and biological membranes as well as techniques of analysis and structure determination.
Credit Hours: 4
Prerequisites: Undergraduate organic chemistry plus undergraduate biochemistry or molecular biology, their equivalent or permission of instructor

BIOSCM 8260: Macromolecular Systems Integration
To introduce graduate students to biochemistry at the graduate level with particular emphasis on genomics/gene expression and replication; proteomics/cell signaling and metabolism. Course graded on A-F basis only.
Credit Hours: 4
Prerequisites: BIOSCM 8240

BIOSCM 8360: Nutritional Biochemistry of Carbohydrates
(same as NUTRIT 8360 and NEP 8360). Current concepts with in-depth coverage of selected examples of key regulatory steps controlling carbohydrate metabolism; emphasizing molecular mechanisms. Based entirely on research literature and taught in a tutorial format.
Credit Hours: 3
Prerequisites: BIOSCM 8260

BIOSCM 8362: Introduction to Plant Metabolism
(same as PLNT_S 8362 and BIO_SC 8362). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant metabolism. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: BIOSCM 7272

BIOSCM 8365: Introduction to Molecular Cell Biology
(same as BIO_SC 8365 and PLNT_S 8365). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research
### BIOCHM 8390: Molecular Biology of Mineral Nutrition
(same as NUTRIT 8390 and NEP 8390). Current concepts of metal ion transport, intracellular metal trafficking and metal-dependent regulation of gene expression. Based entirely on research literature and taught in a tutorial format.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 7272 and a 4000-level nutrition course

### BIOCHM 8430: Physical Biochemistry
Physical concepts underlying a variety of physical chemical methods as they apply to biochemical research.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 7272 and CHEM 3300

### BIOCHM 8432: Enzymology and Metabolic Regulation
A basic introduction to the study of enzymes and their role in intermediary metabolism. Topics include enzyme kinetics, mechanisms of enzymatic catalysis and control of metabolic pathways.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 7272

### BIOCHM 8438: Nutrient Regulation of Gene Expression
(same as AN_SC 8438, NUTRIT 8438, and NEP 8438). Current concepts with in-depth coverage of several minerals that illustrate themes in molecular mineral nutrition. Based entirely on research literature and taught in a tutorial format.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 7272 and a 4000-level nutrition course

### BIOCHM 8450: Rotation Research
Introductory laboratory research. Graded on A-F basis only. Normally 1 hour per advisor per semester, two-1 hour sections can be taken per semester.

**Credit Hour:** 1-2

### BIOCHM 9001: Topics in Biochemistry
Experimental courses, highly specialized topics taught infrequently or courses taught by visiting professors.

**Credit Hour:** 1-9

### BIOCHM 9085: Problems in Biochemistry
Problems in Biochemistry

**Credit Hour:** 1-6

### BIOCHM 9087: Seminar in Biochemistry
Review of current literature; individual presentation of research or classical science topics.

**Credit Hour:** 1

### BIOCHM 9090: Research in Biochemistry
Research in biochemistry for qualified students, with counsel of faculty. Includes preparation of dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

### BIOCHM 9430: Molecular Biology I
(same as MICROB 9430). Detailed examination of current fundamental concepts of molecular genetics of bacteria, bacteriophages and yeast. Experimental approaches to analysis of the physical structures of genomic nucleic acids, the biochemistry and genetics of mutations, replication, gene transfer and gene expression will be examined in depth from reports in the current literature.

**Credit Hours:** 4

### BIOCHM 9432: Molecular Biology II
(same as MICROB and BIO_SC 9432) Detailed experimental analysis of eukaryotic cellular and molecular biology relevant to cellular and viral gene expression, post-transcriptional and post-translational modifications and genome replication. Models for developmental genetic analysis and genetic determinants controlling developmental processes utilizing the current literature will be examined.

**Credit Hours:** 4

### BIOCHM 9462: Hormone Action
A lecture course with weekly assigned readings. Topics will include: a description of selected polypeptide, steroid and other hormones and their biological effects; receptors; second messengers; protein phosphorylation in hormone mediation; growth factors; cellular oncogenes.

**Credit Hours:** 2  
**Prerequisites:** BIOCHM 7272

### BIOCHM 9466: Plant Biochemistry
Emphasizes biochemistry unique to plants; biochemical events plants share with other organisms discussed, compared. Photosynthesis, metabolism, composition, compartmentation, regulation of biochemical events included.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 4270

### BIOCHM 9468: Molecular Biology of Plant Growth and Development
(same as BIO_SC 9468). Molecular biology of plant hormones, signal transduction, environmental signals.

**Credit Hours:** 3

### BIOCHM 9470: Analytical Biochemistry--Chromatography
Principles, experimental design, capabilities, limitations, and applications of the general field of chromatography of biologically important molecules. Eight (2-hour) lectures, eight (4-hour) labs. Four weeks.

**Credit Hours:** 2
BIOCHM 9472: Analytical Biochemistry--Mass Spectrometry
Instrumentation, fragmentation mechanisms, interpretation of spectra, combined gas chromatography--mass spectrometry. Eight (2-hour) lectures, eight (4-hour) labs.
Credit Hours: 2

Biological Engineering (BIOL_EN)

BIOL_EN 1000: Introduction to Biological Engineering
For first semester engineering students. Develop appreciation for professional engineering. Students will participate with senior design students to conceptualize a case-study problem.
Credit Hour: 1-2

BIOL_EN 2000: Professional Development in Engineering
A review of professional opportunities, registration, ethics, and societies.
Credit Hour: 1-2
Prerequisites: sophomore standing

BIOL_EN 2080: Introduction to Programming for Engineers
This course teaches how to write scientific programs for analysis of data and simulation of physical phenomena using Matlab. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MATH 1500

BIOL_EN 2180: Engineering Analysis of Bioprocesses
Material and Energy Balances. Integrating principles of physics, chemistry and mathematics to analyze steady state and transient biological/biomedical processes. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MATH 1700, CHEM 1320, PHYSCS 2750

BIOL_EN 3001: Topics in Biological Engineering
Current and new technical developments in biological engineering.
Credit Hours: 3
Prerequisites: instructor’s consent

BIOL_EN 3050: Environmental Control for Biological Systems
Systems for controlling the physical environments (heat, moisture, light, contaminating organism, chemicals) for plant and animal systems including livestock, aquacultures, crops and agricultural products.
Credit Hours: 3
Prerequisites: ENGINR 2300 and MATH 4100

BIOL_EN 3070: Biological Fluid Mechanics
Basic principles of fluid mechanics applied to transport processes in biological systems. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: PHYSCS 2750 and MATH 1700

BIOL_EN 3075: Introduction to Materials Engineering
Course covers concepts and techniques in materials engineering from an engineering design perspective, materials requirements for design, and fundamentals; intended for undergraduate engineering students. Graded on A-F basis only. Prerequisites: MATH 2300, ENGINR 1200, ENGINR 2200;
Credit Hours: 3
Corequisites: One of the following BIOL_EN 3180, CH_ENG 3261, MAE 4231, MAE 4300, or instructor consent

BIOL_EN 3170: Biomaterials
Engineering sciences and design will be leverage for the study and design of biomaterials. Understanding the structure-property relationship between biomaterials and tissue will be addressed for implant design.
Credit Hours: 3
Corequisites: BIOL_EN 2180, ENGINR 2200 or instructor’s consent

BIOL_EN 3180: Heat and Mass Transfer in Biological Systems
Principles of heat and mass transfer and their applications in biomedical, bioenvironmental, and bioprocessing engineering.
Credit Hours: 3
Prerequisites or Corequisites: ENGINR 2300 or CH_ENG 3261
Prerequisites: BIOL_EN 2180

BIOL_EN 4001: Topics in Biological Engineering
Current and new technical developments in biological engineering.
Credit Hours: 3
Prerequisites: instructor’s consent

BIOL_EN 4070: Bioelectricity
Application of engineering approaches to understand bioelectricity at the cellular level including the equivalent circuit of cell membranes and the electronic design of patch-clamp amplifiers.
Credit Hours: 3
Prerequisites: PHYSCS 2760 and BIOL_EN 3180 or instructor’s consent

BIOL_EN 4080: Engineering Computation
An introduction to numerical methods relevant to biological engineering in the context of scientific computing. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MATH 4100

BIOL_EN 4085: Problems in Biological Engineering
Supervised independent study at the undergraduate level.
Credit Hour: 1-5
Prerequisites: instructor’s consent

BIOL_EN 4150: Soil and Water Conservation Engineering
(Same as CV_ENG 4710). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor’s consent
BIOL_EN 4160: Food Process Engineering
Study of transport phenomena and unit operations in food processing systems. Emphasis on fluid flow and heat transfer in food processing, preservation processes, refrigeration, freezing, psychrometrics, and dehydration.
Credit Hours: 3
Prerequisites: BIOL_EN 3180 or instructor's consent

BIOL_EN 4170: Biomaterials Interfaces of Implantable Devices
Surface structures and properties to improve biocompatibility will be studied. Engineering sciences and design will be leverage in the design of an improved biocompatible surface.
Credit Hours: 3
Prerequisites: BIOL_EN 3170 or instructor's consent

BIOL_EN 4231: Transport Phenomena in Materials Processing
(same as MAE 4231). Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Graded on A-F basis only.
Credit Hours: 3
Prerequisites or Corequisites: MAE 3200, MAE 3400 (or permission of instructor); and MATH 4100

BIOL_EN 4250: Irrigation and Drainage Engineering
Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage.
Credit Hours: 3
Prerequisites: CV_ENG 3700 or MAE 3400 or BIOL_EN 2180

BIOL_EN 4260: Food Process Engineering II
Continuing study of transport phenomena and unit operations in food processing systems. Emphasis on fluid food evaporation concentration food dehydration, contact equilibrium processes and mechanical separation processes.
Credit Hours: 3
Prerequisites: BIOL_EN 4160 or instructor's consent

BIOL_EN 4270: Design of Experiments and Statistical Quality Control for Process Engineers
(same as CH_ENG 4370). A practical statistical tool box for experimenters including comparison of process means, effects of variables, design and interpretation of factorial experiments, and statistical quality control.
Credit Hours: 3
Prerequisites: experience with Excel or instructor's consent

BIOL_EN 4280: Survey of Bioengineering Techniques
Laboratory techniques to train students in Bioelectricity, Biomechantronics, Bioenvironment, Biomaterials, Biophotonics, Bioprocessing. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: senior standing

BIOL_EN 4310: Feedback Control Systems
(same as ECE 4310). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: MATH 4100 and junior/senior standing. May be repeated for credit

BIOL_EN 4315: Introduction to Bioprocess Engineering
(same as CH_ENG 4315). This general introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 for Biological Engineering students or CH_ENG 2225 for Chemical Engineering students or instructor's consent

BIOL_EN 4316: Biomass Refinery Operations
(same as CH_ENG 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CH_ENG 2225 for Chemical Engineering students or instructor's consent

BIOL_EN 4350: Watershed Modeling Using GIS
(same as CV_ENG 4720). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP. Procedures for model calibration/sensitivity data analysis.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor's consent

BIOL_EN 4370: Orthopaedic Biomechanics
(same as V_M_S 4370) Engineering sciences will be leverage to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ENGINR 1200, BIOL_EN 3170, instructor's consent required

BIOL_EN 4380: Applied Electronic Instrumentation
(cross-leveled with BIOL_EN 7380). Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning, computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems.
Credit Hours: 4
Prerequisites: BIOL_EN 2080 and PHYSCS 2760
BIOL_EN 4420: Introduction to Biomedical Imaging
(same as PHYSCS 4420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasound, MRI and Optical Imaging, as well as recent developments in biomedical imaging.
Credit Hours: 3
Prerequisites: PHYSCS 2760

BIOL_EN 4470: Biomolecular Engineering and Nanobiotechnology
Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: senior/graduate standing or instructor's consent

BIOL_EN 4480: Physics and Chemistry of Materials
(same as PHYSCS 4190 and CHEM 4490 and NU_ENG 4319). Physics and Chemistry of Materials is a 3 credit hours undergraduate/graduate level course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid term and one final exam. Graduate students will submit a term paper.
Credit Hours: 3
Prerequisites: PHYSCS 2760/CHEM 1320 or equivalent/prior approval by instructor

BIOL_EN 4550: Design of Livestock Waste Management Systems
Development and application of design criteria to the design of agricultural waste management facilities.
Credit Hours: 3
Prerequisites: CHEM 1310 and CV_ENG 3700, MAE 3400 or instructor's consent

BIOL_EN 4570: Fluorescent Imaging
Principles and applications of fluorescent imaging. The course covers: Image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; molecular and cellular fluorescent imaging.
Credit Hours: 3
Prerequisites: BIO_SC 1500 and BIOL_EN 2180 or instructor's consent

BIOL_EN 4575: Computational Neuroscience
(same as BIO_SC and ECE 4580). An interdisciplinary course with a strong foundation in quantitative science for students in biological-behavioral sciences. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: BIO_SC 1010, BIO_SC 1500; MATH 1500

BIOL_EN 4580: Mechanical Systems Engineering
Fundamentals and applications of prime movers and power transmissions for the design of engineering systems.
Credit Hours: 3
Prerequisites: Thermodynamics course, Fluid Mechanics course
Corequisites: ENGINR 2100 or BIOL_EN 4380 or instructor's consent

BIOL_EN 4670: Photonics and Nanotechnologies in Optical Biosensors
Latest applications of photonics and nanotechnologies in optical biochemical sensors will be reviewed. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: PHYSCS 2760

BIOL_EN 4770: Biomedical Optics
Essential concepts and methods for applying optical techniques to biomedical diagnosis and therapy will be covered with major application examples being discussed.
Credit Hours: 3
Prerequisites: PHYSCS 2760 and BIOL_EN 3180; or instructor's consent

BIOL_EN 4870: Molecular and Cell Mechanics
Application of mechanics and engineering principles to biological systems at the cellular and molecular levels. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: PHYSCS 2760 and BIOL_EN 3180; or instructor's consent

BIOL_EN 4940: Engineering Internship
Problem course following prior approved work experience. Problem selected by internship company representative, faculty problem adviser and student. Supervised by faculty problem advisor and presented in engineering report form.
Credit Hour: 2-5
Prerequisites: advisor's consent

BIOL_EN 4980: Biological Engineering Design
Capstone design course for the Biological Engineering major. Design of biological system devices or processes.
Credit Hours: 3
Prerequisites: senior standing or instructor's consent

BIOL_EN 4990: Undergraduate Research in Biological Engineering
Supervised independent study at the undergraduate level.
Credit Hour: 1-5
Prerequisites: instructor's consent

BIOL_EN 4995: Undergraduate Honors Research in Biological Engineering
Open only to honor students in Biological Engineering. Independent investigation in biological engineering to be presented as a thesis.
Credit Hour: 1-5
Prerequisites: advisor's consent

BIOL_EN 7001: Topics in Biological Engineering
Study of advanced developments in biological engineering.
Credit Hour: 1-3

BIOL_EN 7070: Bioelectricity
Application of engineering approaches to understand bioelectricity at the cellular level including the equivalent circuit of cell membranes and the
electronic design of patch-clamp amplifiers. Prerequisites: PHYSICS 2760 and BIOL_EN 3180 or instructor’s consent

**Credit Hours:** 3

**BIOL_EN 7080: Engineering Computation**
An introduction to numerical methods relevant to biological engineering in the context of scientific computing.

**Credit Hours:** 3

**Prerequisites:** MATH 4100

**BIOL_EN 7150: Soil and Water Conservation Engineering**
(same as CV_ENG 7710). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.

**Credit Hours:** 3

**Prerequisites:** BIOL_EN 2180 or CV_ENG 3200, or instructor’s consent

**BIOL_EN 7160: Food Process Engineering**
Study of transport phenomena and unit operations in food processing systems. Emphasis on fluid flow and heat transfer in food processing, preservation processes, refrigeration, freezing, psychrometrics, and dehydration.

**Credit Hours:** 3

**Prerequisites:** BIOL_EN 3180 or instructor’s consent

**BIOL_EN 7170: Biomaterials Interfaces of Implantable Devices**
Surface structures and properties to improve biocompatibility will be studied. Engineering sciences and design will be leverage in the design of an improved biocompatible surface.

**Credit Hours:** 3

**Prerequisites:** BIOL_EN 3170 or instructor’s consent

**BIOL_EN 7213: Transport Phenomena in Materials Processing**
(same as MAE 7231). Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MAE 3200, MAE 3400, MAE 4300 or equivalent; and MAH 4100

**BIOL_EN 7250: Irrigation and Drainage Engineering**
Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage.

**Credit Hours:** 3

**Prerequisites:** CV_ENG 3700 or MAE 3400 or BIOL_EN 2180

**BIOL_EN 7260: Food Process Engineering II**
Continuing study of transport phenomena and unit operations in food processing systems. Emphasis on fluid food evaporation concentration food dehydration, contact equilibrium processes and mechanical separation processes.

**Credit Hours:** 3

**Prerequisites:** BIOL_EN 7160 or instructor’s consent

**BIOL_EN 7270: Design of Experiments and Statistical Quality Control for Process Engineers**
(same as CH_ENG 7270). A practical statistical tool box for experimenters including comparison of process means, effects of variables, design and interpretation of factorial experiments, and statistical quality control.

**Credit Hours:** 3

**Prerequisites:** experience with Excel or instructor’s consent

**BIOL_EN 7310: Feedback Control Systems**
(same as ECE 7310). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Graded A-F only. May be repeated for credit.

**Credit Hours:** 4

**Prerequisites:** MATH 4100

**BIOL_EN 7315: Introduction to Bioprocess Engineering**
(same as CH_ENG 7315). This general introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analysis proceed through the use of mass balances, energy balances, and empirical or theoretical models.

**Credit Hours:** 3

**Prerequisites:** BIOL_EN 2180 (for biological engineering students) or CH_ENG 2225 (for chemical engineering students) or instructor’s consent

**BIOL_EN 7316: Biomass Refinery Operation**
(same as CH_ENG 7316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.

**Credit Hours:** 3

**Prerequisites:** BIOL_EN 2180 or CH_ENG 2225 or instructor’s consent

**BIOL_EN 7350: Watershed Modeling Using GIS**
(same as CV_ENG 7720). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP, Procedures for model calibration/sensitivity data analysis.

**Credit Hours:** 3

**Prerequisites:** BIOL_EN 2180 or CV_ENG 3200 or instructor’s consent

**BIOL_EN 7370: Orthopaedic Biomechanics**
(same as V_M_S 7370). Engineering sciences will be leverage to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGINR 1200 and BIOL_EN 3170, instructor’s consent required

**BIOL_EN 7380: Applied Electronic Instrumentation**
(cross-leveled with BIOL_EN 4380). Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning,
computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems.

**Credit Hours:** 4  
**Prerequisites:** BIOL_EN 2080, PHYSCS 2760

---

**BIOL_EN 7420: Introduction to Biomedical Imaging**  
(same as PHYSCS 7420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasound, MRI and Optical Imaging, as well as recent developments in biomedical imaging, as well as recent developments in biomedical imaging.

**Credit Hours:** 3  
**Prerequisites:** PHYSCS 2760

---

**BIOL_EN 7470: Biomolecular Engineering and Nanobiotechnology**  
Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.

**Credit Hours:** 3

---

**BIOL_EN 7480: Physics and Chemistry of Materials**  
(same as PHYSCS 7190 and NU_ENG 7319 and CHEM 7490). Physics and Chemistry of Materials is a 3 credit hours undergraduate/graduate level course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper.

**Credit Hours:** 3  
**Prerequisites:** PHYSCS 2760 / CHEM 1320 or equivalent/prior approval by instructor

---

**BIOL_EN 7550: Design of Livestock Waste Management Systems**  
Development and application of design criteria to the design of agricultural waste management facilities.

**Credit Hours:** 3  
**Prerequisites:** CHEM 1310 and CV_ENG 3700, MAE 3400 or instructor's consent

---

**BIOL_EN 7570: Fluorescent Imaging**  
Principles and applications of fluorescent imaging. The course covers: Image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; molecular and cellular fluorescent imaging. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 1500 and BIOL_EN 2180 or instructor's consent

---

**BIOL_EN 7575: Computational Neuroscience**  
(Same as BIO_SC 7580 and ECE 7580). An interdisciplinary course with a strong foundation in quantitative science for students in biological-behavioral science. Graded on A-F basis only.

**Credit Hours:** 4  
**Prerequisites:** BIO_SC 1010, BIO_SC 1500; MATH 1500

---

**BIOL_EN 7580: Mechanical Systems Engineering**  
Fundamentals and applications of prime movers and power transmissions for the design of engineering systems.

**Credit Hours:** 3  
**Prerequisites:** Thermodynamics course, Fluid Mechanics course  
**Corequisites:** ENGINR 2100 or BIOL_EN 7380 or instructor's consent

---

**BIOL_EN 7670: Photonics and Nanotechnologies in Optical Biosensors**  
Latest applications of photonics and nanotechnologies in optical biochemical sensors will be reviewed. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** PHYSCS 2760

---

**BIOL_EN 7770: Biomedical Optics**  
Essential concepts and methods for applying optical techniques to biomedical diagnosis and therapy will be covered with major application examples being discussed.

**Credit Hours:** 3  
**Prerequisites:** PHYSCS 2760 and BIOL_EN 3180; or instructor's consent

---

**BIOL_EN 8001: Advanced Topics in Biological Engineering**  
Study of advanced developments in biological engineering.

**Credit Hour:** 1-3

---

**BIOL_EN 8087: Seminar in Biological Engineering**
