Recent investigations in biological engineering and related fields. Discussion of current literature; preparation and presentation of papers.

**Credit Hour:** 1

---

**BIOL_EN 8088: Advanced Seminar in Biological Engineering**  
Student presentation and discussion of topical research. May be repeated for credit.

**Credit Hour:** 1  
**Prerequisites:** BIOL_EN 8087 and BIOL_EN 8402 or instructor's consent

---

**BIOL_EN 8100: Design and Development of Biomedical Innovations**  
(Same as ENGINR 8100). This course takes students through the process of brainstorming and working out a solution to a medical need, and then producing a product. Outputs may include the development of a physical prototype through interactions with the College of Engineering rapid prototype facility. The course is one of a three-course set leading to a Graduate Certificate in Translational Science and Entrepreneurship. Graded on A-F basis only.

**Credit Hours:** 3
**Prerequisites:** Student must be enrolled in a graduate degree program and enrolled in a sequenced cohort group beginning with MPP 8000/BIOL_EN 8000 then MPP 8100/BIOL_EN 8100 then MANGMT 8200

---

**BIOL_EN 8150: Natural Systems for Wastewater Treatment**
Emphasis is on the design, management and biological performance of lagoons, overland flow systems and constructed wetland.

*Credit Hours: 3*

*Prerequisites: CV_ENG 7230 and BIOL_EN 7150 or instructor's consent*

---

**BIOL_EN 8170: Sensors and Biosensors**
The course covers basic principles of chemical and biological sensors, such as immobilization techniques, transducers (optical, electrical, etc.) and performance factors.

*Credit Hours: 3*

---

**BIOL_EN 8180: Numerical Methods in Engineering Research**
Numerical techniques and case studies in Biological Engineering. Topics include basic numerical methods, mathematical representation of data, matrix algebra, ordinary and partial differential equations.

*Credit Hours: 3*

*Prerequisites: MATH 4100*

---

**BIOL_EN 8230: Advanced Ceramic Materials**
(same as CH_ENG 8230 and MAE 8230). To provide an advanced level understanding between processing, properties, and microstructure of ceramic materials. Topics include crystallography, defect chemistry, transport properties, microstructure, and forming methods. Graded on A-F basis only.

*Credit Hours: 3*

---

**BIOL_EN 8250: Water Management Theory**
Advanced studies in erosion control, irrigation, and drainage. Water resources engineering.

*Credit Hours: 3*

*Prerequisites: MATH 1500, Computer Engineering and Computer Science course, SOIL 4307 or SOIL 7307 and Soil Conservation course*

---

**BIOL_EN 8270: Principles and Applications of Fluorescence**
Physical foundations of fluorescence, fluorophores, steady-state and lifetime measurements, and instrumentation. Applications in the life science from tissues staining to DNA probes. Graded on A-F basis only.

*Credit Hours: 3*

---

**BIOL_EN 8280: Advanced Biological Transport Processes**
Principles of fluid flow, heat transfer, and mass transfer applied to (a) understanding of how the human body functions (from the cellular up to the system level) and (b) designing biomedical devices. An independent project/case-study of a relevant research topic also required.

*Credit Hours: 3*

---

**BIOL_EN 8360: Food Extrusion**
Engineering principles and applications of single and twin screw food cooking extrusion systems. Modeling, control and optimization of extrusion systems. Dough rheology.

*Credit Hours: 2*

*Prerequisites: BIOL_EN 7260*

---

**BIOL_EN 8370: Materials Characterization Techniques**
Concepts and techniques in characterizing materials, including bulk and surface analyses. Techniques are presented in terms of use, sample requirements, and the engineering principles. Topics include: contact angle measurement, XPS, SEM, TEM, STM, AFM, XRD, and thermal analyses.

*Credit Hours: 3*

*Prerequisites: at least one undergraduate course in material science, engineer, or design*

---

**BIOL_EN 8380: Modeling and Identification of Engineering Systems**
Generalized description of engineering systems, bond graph modeling, system identification techniques, and neural network approaches.

*Credit Hours: 3*

*Prerequisites: MATH 4100*

---

**BIOL_EN 8402: Research Methods**
(same as F_S 8402). Review of literature; planning research projects; publication procedures.

*Credit Hours: 2*

---

**BIOL_EN 8470: Ultrasensitive Biodetection**
Multiplexing single-molecule, single-cell, nanobiotech analytical techniques to improve disease diagnosis, treatment, and understanding of biophenomena (membrane transport, gene expression, enzyme activities, cell communications). Graded A-F only.

*Credit Hours: 3*

*Prerequisites: Instructor's consent required*

---

**BIOL_EN 8570: Microscopic Imaging**
Advanced topics in microscopic imaging with focus on applications of molecular and cellular imaging using fluorescent microscopy.

*Credit Hours: 3*

*Prerequisites: BIOL_EN 7570 or instructor's consent*

---

**BIOL_EN 8670: Orthopaedic Failure Modes and Effect Analysis**
Engineering sciences will be leveraged provide a comprehensive study of failure modes and related effects for orthopaedic devices, orthopaedic tissue repair, and surgical interventions. Clinical case studies will be analyzed to introduce real world problems of orthopaedic failures. Graded on A-F basis only.

*Credit Hours: 3*

*Prerequisites: BIOL_EN 3170 or ENGINR 1200, BIOL_EN 4370 or BIOL_EN 7370 or instructor consent*

*Recommended: For department majors*
**BIOL_EN 8770: Photon Migration and Optical Imaging in Turbid Media**  
The essential concepts and techniques in optical imaging in turbid media will be covered including both forward problems and inverse reconstruction theories. Graded on A/F basis only.  
Credit Hours: 3  
Prerequisites: instructor’s consent

**BIOL_EN 8870: Molecular and Cell Mechanics**  
Application of mechanics and engineering principles to biological systems at the cellular and molecular levels. Graded on A/F basis only.  
Credit Hours: 3  
Prerequisites: ENGINR 2200

**BIOL_EN 8990: Masters Thesis Research in Biological Engineering**  
Independent investigation to be presented as a thesis. Graded on S/U basis only.  
Credit Hour: 1-99

**BIOL_EN 9990: Doctoral Dissertation Research in Biological Engineering**  
Independent investigation to be presented as a thesis. Graded on S/U basis only.  
Credit Hours: 3

---

**Biological Sciences (BIO_SC)**

**BIO_SC 1001: Topics in Biological Science - General**  
Selected topics not covered in current offerings. May not be used in partial fulfillment of requirements for a biological science in general education. May be graded on A-F or S/U basis.  
Credit Hour: 1-3

**BIO_SC 1002: Topics in Biological Sciences- Biological/Physical/Mathematics**  
Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.  
Credit Hour: 1-3

**BIO_SC 1010: General Principles and Concepts of Biology**  
Emphasizes connections and applications to society and the human condition, science literacy, and critical thinking skills. A discussion of general principles and fundamental concepts of living things. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.  
Credit Hours: 3  
Prerequisites: MATH 1100 or concurrent enrollment

**BIO_SC 1020: General Biology Laboratory**  
Laboratory exercises dealing with representative organisms and methods of modern biological sciences. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.

**BIO_SC 1030: General Principles and Concepts of Biology with Laboratory**  
Survey of general principles and basic concepts of life science, emphasizing applications to society and the human condition. Lectures address science literacy and critical thinking and laboratory exercises use representative organisms to complement lecture topics. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.  
Credit Hours: 5  
Prerequisites: MATH 1100 or concurrent enrollment

**BIO_SC 1060: Basic Environmental Studies**  
Considers the ecosystem, energy and biogeochemical cycles and population dynamics; relation of the environment to agriculture and technology, pollution, power and food production; politico-economic considerations; moral and ethical issues. For non-science majors.  
Credit Hours: 3

**BIO_SC 1100: Introductory Zoology with Laboratory** (same as F_W 1100). Introduces important principles and concepts of zoology. Emphasizes cell biology; evolution; genetics; ecology; structure, function, development of the organism.  
Credit Hours: 5

**BIO_SC 1200: General Botany with Laboratory**  
Introduction to study of plants. Emphasis on structure, growth, physiology, genetics and reproduction of plants.  
Credit Hours: 5

**BIO_SC 1400: Evolution for Everyone**  
This course will explore the application of evolutionary theory to modern human affairs. We will study the processes involved in evolution and investigate evolutionary interpretations of human social behavior (e.g., psychology, mate choice, economics, religion, and morality). No credit if student has received credit for BIO_SC 2060 or BIO_SC 4600.  
Credit Hours: 3

**BIO_SC 1500: Introduction to Biological Systems with Laboratory**  
Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology.  
Credit Hour: 3-5  
Prerequisites: MATH 1100 and high school chemistry

**BIO_SC 1500H: Introduction to Biological Systems with Laboratory Honors**  
Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology.
Credit Hour: 3-5
Prerequisites: MATH 1100 and high school chemistry. Honors eligibility required

BIO_SC 2001: Topics in Biological Sciences - General
Selected topics not covered in current offerings. May not be used in partial fulfillment of requirements for a biological science in general education. May be graded on A-F or S/U basis.
Credit Hour: 1-3

BIO_SC 2002: Topics in Biological Sciences - Biological/Physical/Mathematics
Selected topics not covered in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.
Credit Hour: 1-3
Prerequisites: a course in general biology

BIO_SC 2002H: Topics in Biological Sciences - Biological/Physical/Mathematics - Honors
Selected topics not covered in regularly offered courses.
Credit Hour: 1-3
Prerequisites: a course in general biology; Honors eligibility required

BIO_SC 2010: Undergraduate Seminar in Biological Sciences
Discussion and critical evaluation of current topics in biological sciences for intermediate-level students. Some sections may be graded on either A-F or S/U basis only.
Credit Hour: 1-3
Prerequisites: sophomore standing

BIO_SC 2020: How the Brain Works
Basic structure and function of the brain; left and right brain studies; gender differences; learning and memory; brain disorders.
Credit Hour: 1
Prerequisites: BIO_SC 1010

BIO_SC 2030: Life of the Cell
This course will help students understand basic concepts of biomolecular structure, cell organization, cell membranes, energy and metabolism, cellular communication, and cell division. This course is intended for non-science majors and may not be used to satisfy requirements for either a major or a minor in biological sciences.
Credit Hours: 3
Prerequisites: BIO_SC 1010

BIO_SC 2060: Community Biology
Principles of population biology, ecology, and evolution, including consideration of human impacts on biological communities and ecosystems.
Credit Hours: 3
Prerequisites: BIO_SC 1010 or equivalent. Not open to biology majors

BIO_SC 2100: Infectious Diseases
An introduction to the basic science of bacterial, viral, protozoan, fungal and helminth infections, including discussions of how illness has influenced or been affected by public policy and culture.
Credit Hours: 3
Prerequisites: BIO_SC 1010. Not open to Biology Majors

BIO_SC 2150: Genetic Diseases
This course will discuss the biological basis for genetic diseases, including inherited diseases and non-inherited diseases such as cancer. The units will include an introduction providing necessary background information, as section studying the technology used to study genetic diseases and several units discussing specific diseases and their impact on history and society. This course is intended for non-science majors. Cannot be used to satisfy degree requirements for biology major or biology minor.
Credit Hours: 3
Prerequisites: BIO_SC 1010

BIO_SC 2200: General Genetics
Principles of inheritance in plants and animals; structure and use of genetic material, transmission of genetic information, linkage, modification of genetic information, regulation of genetic activity, population genetics.
Credit Hours: 4
Prerequisites: BIO_SC 1500 and CHEM 1320 (or concurrent enrollment)

BIO_SC 2300: Introduction to Cell Biology
Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized.
Credit Hours: 4
Prerequisites: BIO_SC 2200

BIO_SC 2300H: Introduction to Cell Biology- Honors
Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized.
Credit Hours: 4
Prerequisites: BIO_SC 2200. Honors eligibility required

BIO_SC 2600: Ornithology
(same as F_W 2600). Structure, identification, habits, importance of regional birds. Field work, lectures, lab.
Credit Hours: 4
Prerequisites: 5 hours biology or instructor's consent

BIO_SC 2700: Ichthyology
(same as F_W 2700). A broad introduction to the biology and ecology of fishes. Emphasis will be placed on understanding the adaptations fishes exhibit to aspects of their environment. Includes lab.
Credit Hours: 4
Prerequisites: 8 hours biology or equivalent

</thead>
<tbody>
<tr>
<td>BIO_SC 2940</td>
<td>Internship in Biological Science</td>
<td>Work experience in a non-profit, for profit, or governmental organization relevant to the biological sciences. Intended for students doing internships in which independent research is less than 50% of the experience. Graded on S/U basis only.</td>
<td>1-3</td>
<td>junior standing, instructor’s consent, 12 hours of biological science</td>
</tr>
<tr>
<td>BIO_SC 2960</td>
<td>Readings in Biological Science</td>
<td>Supervised reading in biological literature. May be repeated up to six hours total credit. Selected sections of this course may be graded either on A-F or S/U basis only. May not be used in partial fulfillment of Arts and Science foundation requirement.</td>
<td>1-3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BIO_SC 2965H</td>
<td>Honors Readings in Biological Literature</td>
<td>Selected readings in biological literature for Honors, in consultation with instructor. May not be used in partial fulfillment of Arts and Science foundation requirement.</td>
<td>1-3</td>
<td>overall 3.3 GPA; instructor’s consent. Honors eligibility required</td>
</tr>
<tr>
<td>BIO_SC 3002</td>
<td>Topics in Biological Sciences- Biological/Physical/ Mathematics</td>
<td>Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.</td>
<td>1-3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>BIO_SC 3002H</td>
<td>Topics in Biological Sciences- Biological/Physical/ Mathematics - Honors</td>
<td>Selected topics not offered in regular curriculum.</td>
<td>1-3</td>
<td>Honors eligibility required</td>
</tr>
<tr>
<td>BIO_SC 3010</td>
<td>Professional Skills</td>
<td>This course will focus on application and interview skills for students interested in medical school. Graded on S/U basis only.</td>
<td>1</td>
<td>junior standing; 3.4 GPA; instructor’s consent. Restricted to biology majors</td>
</tr>
<tr>
<td>BIO_SC 3050</td>
<td>Genetics and Society</td>
<td>Introduction to genetics, emphasizing the impact of genetics on human society. Human evolution, molecular genetics, genetic engineering in medicine and agriculture. An intensive writing course.</td>
<td>3</td>
<td>a college science course or equivalent (advanced high school biology)</td>
</tr>
<tr>
<td>BIO_SC 3075</td>
<td>The Human Microbiome</td>
<td>This course examines the astonishing diversity and medical significance of the microbes that inhabit our bodies. Interactive discussions explore scientific and ethical dimensions of topics ranging from probiotics and &quot;poop transplants&quot; to the role of microbes in asthma and obesity.</td>
<td>3</td>
<td>BIO_SC 2200</td>
</tr>
<tr>
<td>BIO_SC 3210</td>
<td>Plant Systematics</td>
<td>Principles of classification of plants; survey of diversity in flowering plant families; identification of local flora; use of keys. Includes lab.</td>
<td>4</td>
<td>BIO_SC 2200 or BIO_SC 1500</td>
</tr>
<tr>
<td>BIO_SC 3250</td>
<td>Parasitology</td>
<td>Parasitism is considered as a fundamental type of interspecies interaction. Principles of parasitism as they apply to animals are presented with emphasis on parasite morphology, biology and host parasite relationships. Includes lab.</td>
<td>4</td>
<td>8 hours of Biological Science</td>
</tr>
<tr>
<td>BIO_SC 3260</td>
<td>Invertebrate Zoology</td>
<td>Structure, ecology and phylogeny of the invertebrate phyla. Includes lab.</td>
<td>4</td>
<td>BIO_SC 1100 or BIO_SC 1500</td>
</tr>
<tr>
<td>BIO_SC 3360</td>
<td>Herpetology</td>
<td>The biology, ecology, taxonomy, and distribution of amphibians and reptiles. Some Saturday field trips.</td>
<td>4</td>
<td>8 hours Biological Sciences or equivalent</td>
</tr>
<tr>
<td>BIO_SC 3400</td>
<td>Evolution and Ecology</td>
<td>Introduction to principles of evolution and ecology. Topics include natural selection, adaptation, phylogenetic analysis, human evolution, population growth and regulation, population interactions, ecosystem ecology, and human impacts on ecological processes. No credit for this course if either BIO_SC 3650 or BIO_SC 4600 already completed; may not co-enroll in this course and BIO_SC 4600.</td>
<td>3</td>
<td>BIO_SC 2200</td>
</tr>
<tr>
<td>BIO_SC 3510</td>
<td>Biology of Fungi</td>
<td>(same as PLNT_S 3510). The diverse roles of fungi in the biosphere will be explored by considering fungi we eat, fungi which destroy our food, fungi in folklore and fungi as global nutrient recyclers. Includes lab.</td>
<td>3</td>
<td>BIO_SC 1100, BIO_SC 1200, or BIO_SC 1500</td>
</tr>
<tr>
<td>BIO_SC 3650</td>
<td>General Ecology</td>
<td>Principles of populations, coevolution, density factors, competition; physical environment; concept of community, trophic structure, biotic</td>
<td>3</td>
<td>BIO_SC 1100, BIO_SC 1200, or BIO_SC 1500</td>
</tr>
</tbody>
</table>
succession; characterization of biomes, man in ecosystem. Biology majors having completed BIO_SC 3100: 2 hours credit.

Credit Hours: 5
Prerequisites: 10 hours in biology and junior standing

BIO_SC 3655: Tropical Ecology: Methods and Applications
Field study of tropical community; additional fee for transportation and accommodations required.
Credit Hours: 3
Prerequisites: BIO_SC 3100, BIO_SC 3650, BIO_SC 4600 or BIO_SC 4660

BIO_SC 3660: Mammalogy
(same as F_W 3660). Taxonomy, distribution, structure, habits, importance of mammals; emphasizes those of central United States. Includes lab.
Credit Hours: 4
Prerequisites: 8 hours of biology or instructor's consent

BIO_SC 3700: Animal Physiology
Introduces concepts of vertebrate organ function and homeostatic control emphasizing mammalian physiology. Some comparisons to function in other vertebrates and strategies for coping with environmental stresses introduced. Includes lab.
Credit Hours: 5
Prerequisites: BIO_SC 2300

BIO_SC 3710: Introductory Entomology
(same as PLNT_S 3710). Emphasizes the role insects play in the scheme of life. Topics include insect structure, development, diversity, ecology, communication and behavior, and management.
Credit Hours: 3
Prerequisites: BIO_SC 1200, or introductory Biological Sciences course

BIO_SC 3715: Insect Diversity
(same as PLNT_S 3715). Laboratory exercises emphasizing external insect anatomy, classification, and identification (to family level). Preparation of an insect collection is required.
Credit Hours: 2
Prerequisites: PLNT_S 3710 or BIO_SC 3710

BIO_SC 3750: General Microbiology
Principles of microbiology. Includes lab.
Credit Hour: 3-4
Prerequisites: BIO_SC 2200 and BIO_SC 2300 completed with C range grades

BIO_SC 3780: Genetics Laboratory
Experimental genetic studies of Drosophila, corn and microorganisms.
Credit Hours: 2
Prerequisites: C range grade or better in BIO_SC 2200 or instructor’s consent

BIO_SC 3790: Developmental Biology Laboratory
Laboratory studies of development in sea urchin, chicken and roundworm.
Credit Hours: 2
Prerequisites: BIO_SC 3800 or co-enrollment in BIO_SC 3800

BIO_SC 3800: Developmental Biology
Analysis of the molecular, genetic, cellular, and morphological processes responsible for phenotypic changes in developing organisms. A variety of experimental systems are discussed to identify common mechanisms used by developing organisms.
Credit Hours: 3
Prerequisites: BIO_SC 2200, BIO_SC 2300, CHEM 2100

BIO_SC 4002: Topics in Biological Science - Biological/Physical/ Mathematics
Selected topics not in regularly offered courses.
Credit Hour: 1-3
Prerequisites: instructor's consent and senior standing. May be repeated up to 2 times for credit

BIO_SC 4085: Problems in Biological Sciences
Individual supervised work to supplement regularly organized courses in biology; introduction to research. Selected sections of this course may be graded either on A-F or S/U basis only.
Credit Hour: 1-3
Prerequisites: junior standing and instructor's consent

BIO_SC 4100: Limnology
(same as F_W 4100). (lecture/lab: 4 hrs.; lecture only: 3 hrs.) Ecology of inland waters with emphasis on productivity.
Credit Hour: 3-4
Prerequisites: senior standing or BIO_SC 3650

BIO_SC 4300: Analysis of Biological Macromolecules
Theory/application of techniques used for characterization of proteins, nucleic acids; topics: sedimentation velocity; equilibrium; sucrose density gradients; electrophoresis; spectrophotometry.
Credit Hours: 3
Prerequisites: BIO_SC 2300 or BIOCHM 4270; MATH 1500 and one year Physics

BIO_SC 4310: Physics in Cell and Developmental Biology
(same as PHYSCS 4310). Discusses the role of physical mechanisms in specific cellular and developmental processes and phenomena, in particular those characterizing the embryonic stage of multicellular organisms. Each process and phenomenon is first described in biological terms and then within a physical model, with special emphasis on the interplay between the two descriptions.
Credit Hours: 3
Prerequisites: instructor's consent or PHYSCS 1220 or PHYSCS 2760 and BIO_SC 2300

</tbody>
</table>
BIO_SC 4952H: Honors Research in Biology
Continuation of research program. Successful completion requires public presentation and leads to degree with Honors in biological sciences. May be repeated for credit for maximum of 6 hours. Graded on A-F basis only.
Credit Hour: 1-3
Prerequisites: BIO_SC 4950H; overall GPA 3.3; instructor’s consent. Honors eligibility required

BIO_SC 4960: Special Readings in Biological Sciences
Independent readings and discussions of topics in biology selected in consultation with supervising faculty member. Selected sections of this course may be graded either on A-F or S/U basis only.
Credit Hour: 1-3
Prerequisites: senior standing in Biological Sciences and instructor’s consent

BIO_SC 4970: Neurobiology Laboratory
Laboratory experience with experimental neurobiology, with emphasis on neural networks, motor systems, and developmental neurobiology.
Credit Hour: 3
Prerequisites: BIO_SC 3700 or BIO_SC 4500 or instructor’s consent

BIO_SC 4974: Molecular Biology Laboratory
Emphasizes recently developed genetic and biochemical techniques; illustrates how they apply to contemporary problems in biological research.
Credit Hour: 3
Prerequisites: BIO_SC 2200, BIOCHM 4272 or concurrent registration in BIO_SC 4976

BIO_SC 4976: Molecular Biology
Molecular mechanisms of DNA replication, mutation, recombination and gene expression in prokaryotes, eukaryotes, and their viruses; gene fine structure; genetic engineering.
Credit Hour: 3
Prerequisites: BIO_SC 2200 and BIO_SC 2300

BIO_SC 4978: Cancer Biology
(same as BIOCHM 4978). The cellular and molecular basis of cancer, with emphasis on the application of genomics, proteomics, and genetic manipulations in model organisms to the study of cancer biology.
Credit Hour: 3
Prerequisites: BIO_SC 2200, BIO_SC 2300

BIO_SC 4980: Cellular Interactions in Health and Disease
The cell as a functional unit.
Credit Hour: 3
Prerequisites: 10 hours Biological Sciences and 5 hours Physics and 5 hours Organic Chemistry
Recommended: some background in Biochemistry and/or Molecular Biology

BIO_SC 4982: Human Inherited Diseases
Analysis of the molecular and cellular mechanisms underlying inherited diseases in humans. Topics include genetics of sex determination, metabolic disorders, cancer, blood groups, transplantation, AIDS.
Credit Hours: 3
Prerequisites: BIO_SC 2200 and BIO_SC 2300

BIO_SC 4983: Molecular Ecology
Application of molecular genetic techniques to topics in ecology and population biology such as sex ratios, dispersal, mating systems, biogeography and conservation genetics.
Credit Hours: 4
Prerequisites: BIO_SC 2200 or equivalent and BIO_SC 3650

BIO_SC 4984: Mammalian Reproductive Biology
Adult reproductive anatomy, physiology and behavior; gametogenesis and fertilization; placentaion; sexual differentiation; parturition; maternal behavior and lactation; puberty; reproductive aging; reproductive ecology.
Credit Hours: 3
Prerequisites: junior standing and 15 hours of Biological Sciences

BIO_SC 4986: Neurology of Motor Systems
Examination of the function of neural networks at all levels, from properties of single neurons to large collections of neural elements.
Credit Hours: 3
Prerequisites: BIO_SC 3700 or instructor’s consent

BIO_SC 4988: Nerve Cells and Behavior
The cellular basis of behavior. Molecular and cellular properties of nerve cells, as related to behavior, will be represented and discussed.
Credit Hours: 3
Prerequisites: BIO_SC 3700 or instructor’s consent

BIO_SC 4990: Vertebrate Histology and Microscopic Anatomy
Microscopic anatomy of vertebrate tissues and organs. Includes lab.
Credit Hours: 5
Prerequisites: junior standing
Recommended: BIO_SC 2300 and BIO_SC 3700, or equivalent

BIO_SC 4994: Senior Seminar
Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized sub disciplinary emphasis.
Credit Hour: 1-3
Prerequisites: Biological Sciences major, senior standing

BIO_SC 4994H: Senior Seminar - Honors
Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized sub disciplinary emphasis.
Credit Hour: 1-3
Prerequisites: Biological Sciences major, senior standing; Honors eligibility required
BIO_SC 7002: Topics in Biological Sciences
Advanced topics not in regularly offered courses. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 1-99
Prerequisites: instructor’s consent

BIO_SC 7100: Limnology
(same as F_W 7100). (lecture/lab: 4 hrs.; lecture only: 3 hrs.) Ecology of inland waters with emphasis on productivity.

Credit Hours: 3-4
Prerequisites: graduate standing or BIO_SC 3650

BIO_SC 7300: Analysis of Biological Macromolecules
Theory/application of techniques used for characterization of proteins and nucleic acids. Topics include sedimentation velocity; equilibrium; sucrose density gradients; electrophoresis; spectrophotometry. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BIO_SC 2300; BIOCHM 4270; MATH 1500; 1 year of physics

BIO_SC 7310: Physics in Cell and Developmental Biology
(same as PHYSCS 7310 and MPP 7300). Discusses the role of physical mechanisms in specific cellular and developmental processes and phenomena, in particular those characterizing the embryonic stage of multicellular organisms. Each process and phenomenon is first described in biological terms and then within a physical model, with special emphasis on the interplay between the two descriptions.

Credit Hours: 3
Prerequisites: instructor’s consent or PHYSCS 1220 or PHYSCS 2760 and BIO_SC 2300

BIO_SC 7320: Molecular Plant Physiology
(same as PLNT_S 7320; cross-leveled with BIO_SC 4320). Modern physiology of higher plants using common cultivated plants as examples. May be taken with or without laboratory.

Credit Hours: 3
Prerequisites: BIO_SC 1200 or BIO_SC 1500 and 5 hours Chemistry

BIO_SC 7328: Introductory Radiation Biology
(same as NU_ENG 7328, RADIOL 7328 and V_F_M 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

Credit Hours: 3
Prerequisites: Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor’s consent

BIO_SC 7350: Summer Institute in Biotechnology
Development of experiments in molecular genetics for use in high school biology laboratories. May be repeated for credit.

Credit Hours: 3
Prerequisites: instructor’s consent

BIO_SC 7374: Molecular Biology Laboratory
Emphasizes recently developed genetic and biochemical techniques; illustrates how they apply to contemporary problems in biological research.

Credit Hours: 3
Prerequisites: BIO_SC 2200, BIOCHM 4272 or concurrent registration in BIO_SC 4976

BIO_SC 7400: Plant Anatomy
(same as PLNT_S 7400). Comparative structure, growth of meristems; development, structure of important cell types, tissues systems; comparative anatomy of stem root, leaf. Emphasizes anatomy of gymnosperms, angiosperms. Includes lab. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BIO_SC 1200 or equivalent

BIO_SC 7490: Vertebrate Histology and Microscopic Anatomy
Microscopic anatomy of vertebrate tissues and organs. Graded on A-F basis only.

Credit Hours: 5
Prerequisites: BIO_SC 2300 and BIO_SC 3700, or equivalent

BIO_SC 7500: Neurobiology
Vertebrate and invertebrate neurobiology, including cell and molecular biology of the neuron, neurophysiology, neuranatomy, neuroethology and developmental biology. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BIO_SC 2300 or BIO_SC 3700

BIO_SC 7560: Sensory Physiology and Behavior
Basic principles of coding and integration of sensory stimuli; neural correlates of animal behavior; environmental influences on postnatal sensory development.

Credit Hours: 3
Prerequisites: BIO_SC 4500 or equivalent

BIO_SC 7580: Computational Neuroscience
(Same as BIOL_EN 7575 and ECE 7580). An interdisciplinary course with a strong foundation in quantitative sciences for students in biological and behavioral sciences and an introduction to experimental methods for students from quantitative sciences.

Credit Hours: 4
Prerequisites: BIO_SC 1010 or BIO_SC 1500, MATH 1500

BIO_SC 7640: Behavioral Biology
Comparative study of animal ethology. Principles of animal ethology illustrated in different animal phyla.

Credit Hours: 3
Prerequisites: BIO_SC 1500 and one additional upper-level course in Biological Sciences or Psychology

BIO_SC 7660: Plant Population Biology
Covers the ecological and evolutionary processes that influence the distribution and abundance of plant species. Topics include evolution
of life history schedules, gender evolution, population growth and
demography, competition, herbivory, plant-pollinator interactions, clonal
growth, and plant community structure.

**Credit Hours:** 4  
**Prerequisites:** 2 courses in Biological Sciences

---

**BIO_SC 7670: Avian Ecology**  
Advanced examination of ecological patterns in birds. Explores the environmental factors affecting the evolution of avian behavior, morphology, community structure and distribution.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 2060 or BIO_SC 3650; BIO_SC 2600

---

**BIO_SC 7976: Molecular Biology**  
Molecular mechanisms of DNA replication, mutation, recombination and gene expression in prokaryotes, eukaryotes, and their viruses; gene fine structure; genetic engineering.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 2200 and BIO_SC 2300

---

**BIO_SC 7978: Cancer Biology**  
(same as BIOCHM 7978). The course will cover major molecular and cellular aspects of cancer. Students will read original research articles, present overviews and lead class discussions.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 4270, BIO_SC 2300 and BIO_SC 4976 or equivalent

---

**BIO_SC 7980: Cellular Interactions in Health and Disease**  
Advanced discussion of topics in cell biology and genetics as they relate to health and disease. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** instructor’s consent

---

**BIO_SC 7982: Human Inherited Diseases**  
Advanced analysis of the molecular basis for genetic disorders in humans. Topics will include both Mendelian and complex traits with readings from the primary literature. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 2200 and instructor’s consent

---

**BIO_SC 7986: Neurology of Motor Systems**  
Examination of the function of neural networks at all levels, from properties of single neurons to large collections of neural elements. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 3700

---

**BIO_SC 7990: Non-thesis Research**  
Independent research not leading to a thesis.

**Credit Hour:** 1-99  
**Prerequisites:** instructor’s consent

---

**BIO_SC 8002: Topics in Biological Sciences- Biological/Physical/Mathematics**  
Advanced topics not in regularly offered courses.

**Credit Hour:** 1-99  
**Prerequisites:** instructor’s consent

---

**BIO_SC 8050: Professional Survival Skills**  
Introduction to resources, facilities, and communication skills for professional careers in biological sciences. Topics include computer resources, accessing scientific literature, making slides and figures, grantsmanship, resume preparation, manuscript review, and research presentation.

**Credit Hours:** 1

---

**BIO_SC 8060: Ethical Conduct of Research**  
(same as BIOCHM 8060). Discussion of ethical issues in biological research, including the rules and conventions for appropriate research conduct. Graded on S/U basis only.

**Credit Hour:** 1

---

**BIO_SC 8070: Professional Communication Development**  
The purpose of this course is to develop professional communication skills in students that are planning to attend (or are in their first year of) graduate training. Some sections may be offered with A-F or S/U grading option.

**Credit Hour:** 1

---

**BIO_SC 8080: Workshop in Area of Specialization**  
Intensive course in the theory and methodology of biological investigation. Conducted by visiting scientists. Offered in one or more specialized sections. May be repeated for credit.

**Credit Hour:** 1

---

**BIO_SC 8085: Problems in Biological Sciences**  
Research not expected to terminate in thesis, or individual advanced study in special subjects.

**Credit Hour:** 1-99  
**Prerequisites:** instructor’s consent

---

**BIO_SC 8087: Seminar**  
Current topics in the biological sciences. Open to all graduate students. Graded S/U basis only.

**Credit Hour:** 1

---

**BIO_SC 8090: Research in Biological Sciences**  
Research leading to thesis. Graded on S/U basis only.

**Credit Hour:** 1-99  
**Prerequisites:** instructor’s consent

---

**BIO_SC 8187: Seminar in Areas of Specialization**  
Offered each semester in one or more specialized sections followed by the topic title of the seminar. Graded on S/U basis only.
BIO_SC 8300: Advanced Plant Genetics
Genetic approaches to molecular and biochemical studies in maize, wheat, and Arabidopsis.
Credit Hours: 3
Prerequisites: General Genetics and course in Cell Biology or Plant Physiology

BIO_SC 8301: Fungal Genetics and Biology
Introduction to fungal research, with an emphasis on genetics, biochemistry, cell and molecular biology, and pathogenicity of fungi. Graded A-F only.
Credit Hours: 3

BIO_SC 8320: Developmental Genetics
An overview of various developing systems amenable to classical and molecular genetic analysis. Specific developmental phenomena will be introduced in particular model systems, with an emphasis on experimental approaches used to address the underlying mechanisms.
Credit Hours: 3
Prerequisites: BIO_SC 2200 and BIOCHM 7270, BIOCHM 7272, or equivalent

BIO_SC 8330: Stem Cell Biology
A comparative approach to stem cell biology, with emphasis on embryonic, neural and bone marrow-derived stem cells in rodents and humans. Ethical considerations associated with the use of stem cells to study development and repair mechanisms will also be addressed. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BIO_SC 2300

BIO_SC 8340: Advanced Microscopy Techniques
Electron microscopy and modern light microscopy techniques including epifluorescence, confocal fluorescence microscopy, low light video microscopy, differential interference optics, and computerized image analysis.
Credit Hours: 3
Prerequisites: BIO_SC 4990 or BIO_SC 8350 and instructor's consent

BIO_SC 8350: Advanced Cell Biology
Structure and function of membranes; cell ultrastructure; organellar function; cellular movement; microtubules; microfilaments; mitosis and meiosis.
Credit Hours: 3
Prerequisites: BIO_SC 2300; instructor's consent

BIO_SC 8352: Introduction to Plant Metabolism
A study of the molecular basis of cancer, including topics in tumor cell biology, interactions between cancer cells and normal cells, mechanisms of metastasis, and novel approaches to development of new chemotherapies.
Credit Hours: 3

BIO_SC 8450: Developmental Neurobiology
Credit Hours: 3
Prerequisites: BIO_SC 4500 or equivalent

BIO_SC 8460: Advanced Cancer Biology
A study of the molecular basis of cancer, including topics in tumor cell biology, interactions between cancer cells and normal cells, mechanisms of metastasis, and novel approaches to development of new chemotherapies.
Credit Hours: 3

BIO_SC 8505: Introduction to Plant Stress Biology
A study of information exchange and acquisition in organisms, with an emphasis on communication, orientation, and predator detection. The course will also examine the effects of biotic and abiotic factors on sensory systems.
Credit Hours: 2

<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
<th>Credit Hours</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO_SC 8600</td>
<td>Design of Ecological Experiments</td>
<td>Principles of experimental design in the context of ecological, behavioral, and evolutionary research.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>BIO_SC 8610</td>
<td>Current Concepts in Conservation Biology</td>
<td>Survey of current concepts in conservation biology literature. Discussions will provide students with an appreciation of the historical development of concepts, the interdisciplinary nature of conservation problems, and the research required for effective solutions.</td>
<td>2</td>
<td>STAT 1400</td>
</tr>
<tr>
<td>BIO_SC 8620</td>
<td>Phylogenetic Methods and Applications</td>
<td>A review of principles for constructing and testing phylogenies followed by a survey of methods for inferring ancestral characteristics and adaptive features in living species.</td>
<td>4</td>
<td></td>
</tr>
<tr>
<td>BIO_SC 8633</td>
<td>Molecular and Network Evolution</td>
<td>Evolution of biological macromolecules and networks, including sequence analysis algorithms and theory, phylogenetics, gene duplication, genome evolution, principles of biological networks. Development of computational skills emphasized.</td>
<td>3</td>
<td>BIO_SC 3650 or instructor’s consent</td>
</tr>
<tr>
<td>BIO_SC 8650</td>
<td>Ecological and Evolutionary Genomics</td>
<td>This course is designed to give a background in evolution and then explore an exciting new field: Ecological and evolutionary genomics. We will study genes that affect fitness and how whole genomes evolve. Graded on A-F basis only.</td>
<td>2</td>
<td></td>
</tr>
<tr>
<td>BIO_SC 8700</td>
<td>Ecological Genetics</td>
<td>Population genetics and evolutionary theory, with emphasis on studies of natural populations.</td>
<td>3</td>
<td>BIO_SC 2200, BIO_SC 3100 or BIO_SC 3650, and STAT 1400 or equivalent</td>
</tr>
<tr>
<td>BIO_SC 8720</td>
<td>Speciation</td>
<td>Advanced discussion of species concepts and the processes of formation of species.</td>
<td>3</td>
<td>BIO_SC 2200 and BIO_SC 4600</td>
</tr>
<tr>
<td>BIO_SC 8724</td>
<td>College Science Teaching</td>
<td>Study of learner characteristics, teaching strategies, and research findings related to teaching science at the post-secondary level.</td>
<td>4</td>
<td>MICROB 9430</td>
</tr>
<tr>
<td>BIO_SC 8725</td>
<td>Science Outreach: Public Understanding of Science</td>
<td>Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.</td>
<td>2</td>
<td></td>
</tr>
<tr>
<td>BIO_SC 8726</td>
<td>Integrating Science with Outreach</td>
<td>This course provides an opportunity for students to earn credit for outreach activities in the community. Students will capitalize on their area of study and scientific expertise in developing, implementing, and evaluating related outreach activities. May be repeated for credit.</td>
<td>1-6</td>
<td></td>
</tr>
<tr>
<td>BIO_SC 8730</td>
<td>Advanced Community Ecology</td>
<td>Detailed examination of new happenings in population and community ecology. Topics vary but will include species interactions, community structure, reproductive strategies.</td>
<td>3</td>
<td></td>

</table>
Biomedical Sciences (BIOMED)

BIOMED 1010: Biomedical Career Explorations
An introduction to the variety of career possibilities within the growing field of biomedical sciences. Graded on S/U basis only.
Credit Hour: 1

BIOMED 2001: Topics in Veterinary Biomedical Science
May be repeated 2 times for credit. Graded on A-F basis only.
Prerequisites: instructor’s consent
Credit Hour: 1-99

BIOMED 2085: Problems in Biomedical Research
Assignment of special Topics for Research training in biomedical research.
Credit Hour: 1-99
Prerequisites: instructor’s consent

BIOMED 2110: Biomedical Terminology
Life science etymology (Greek for "true meaning", means the study of word derivation) taught by classroom presentation and discussion. The course organization is based primarily on common themes of Greek and Latin terms along with historical reasons for current usage. The application of these terms is for all biomedical sciences and life sciences. Graded on A-F basis only.
Credit Hours: 3

BIOMED 2111: Veterinary Medical Terminology
Veterinary Medical Terminology is an extension of Biomedical Sciences 2110, Biomedical Terminology. The course organization is lecture, based primarily on domestic species and common themes of Greek and Latin terms. In addition, major veterinary medical eponyms, acronyms, and medical and surgical instruments are included. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: BIOMED 2110 or instructor’s consent

BIOMED 2120: Essentials of Animal Handling and Physical Restraint
Fundamentals of handling and physical restraint of domestic large and small animals, laboratory animals, and common non-domestic pets.
Graded on A-F basis only.
Credit Hours: 2

BIOMED 2140: Companion Animals
(same as AN_SCI 2140). Focus on companion dog, cat, horse owners concerns re: health, zoonoses, legal responsibilities, inbreeding, choice of breeds, behavioral problems and loss of companion animals.
Credit Hours: 3

BIOMED 2210: Microbiology for the Health Sciences
Introductory course for students in the applied health curricula. Presents biomolecules of life, enzyme interaction, physiology and structure of representative organisms. Emphasizes bacteria, viruses, fungi and protozoa of health significance. Graded on A-F basis only.
Credit Hours: 5
Prerequisites: CHEM 1100 or equivalent and instructor’s consent

BIOMED 2230: Animal Sanitation and Disease Prevention
Preventative measures for diseases and parasites of farm animals.
Credit Hours: 3

BIOMED 2235: Domestic Animal Behavior
An examination of the effects of domestication on the behavior of companion and food animal species. Comparisons to similar animals in feral or wild conditions will be made. The causes, development and potential treatments of abnormal behavior will also be examined. Graded on A-F basis only.
Credit Hours: 3

BIOMED 2420: Biology of Healthy Living
(same as PH_THR 2420 and NEP 2420). Biology of inactivity as a casual factor in chronic disease.
Credit Hours: 2

BIOMED 2940: Internship in Biomedical Sciences
Supervised work experience to develop technical skills and enhance student knowledge in an area of biomedical science. Not intended for more than 50% independent research. Graded on S/U basis only.
Credit Hours: 1-6
Prerequisites: sophomore standing and instructor’s consent

BIOMED 3000: Specialty Careers for Veterinary Technicians
Specialty careers for veterinary technicians are jobs which required knowledge and skills beyond those needed in primary care clinical veterinary practice. This course will explore veterinary technician specialties, the education required, and the advantages of advanced academic training. Course graded on A-F basis only.
Credit Hour: 1-6
Prerequisites: AAS degree in veterinary technology or instructors consent required

BIOMED 3001: Topics in Biomedical Sciences
Topics in Biomedical Sciences.
Credit Hour: 1-99

BIOMED 3085: Problems in Biomedical Science
Assignment of special topics for research training in biomedical research.
Credit Hour: 1-99
Prerequisites: DVM degree and instructor’s consent

BIOMED 3100: Biomedical Pathophysiology
Pathophysiology is the study of changes in the body resulting from disease. This course requires knowledge of normal anatomy and
An introductory examination of contemporary ethical issues related to biomedical science including animal welfare, agriculture, and cloning. Topics related to animal law issues will also be discussed.

Credit Hours: 3
Prerequisites: junior standing

BIOMED 3310: Equine Health Topics
An in-depth examination of equine disease and health topics that are pertinent to today's horse owner and veterinarian. The course will integrate horse management practices with disease recognition, control and prevention. Students will learn how to recognize problems and when to call a veterinarian. Emerging disease problems such as West Nile Virus will be examined as well as topics of continuing concern. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 4977 or equivalent or instructor's consent

BIOMED 3200: Comparative Microscopic Anatomy
The course will provide students with a background in the structure of body organs at the microscopic level. The material will emphasize structure-function relationship of cells and organs using material from diverse animal species, including human, that exemplify unique adaptations to environmental or physiological requirements.

Credit Hours: 3
Prerequisites: BIO_SC 1500 or equivalent

BIOMED 3201: Elements of Comparative Anatomy
This course is designed to give students an introduction to and appreciation for comparative anatomy of various species encountered in animal science, veterinary technology and veterinary medicine. Detailed and labeled photos of dissected specimens are used to aid instruction. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: five hours of biological science or zoology or equivalent or instructor's consent or an AAS degree in veterinary technology

BIOMED 3250: Parasitology
Parasitism is considered as a fundamental type of interspecies interaction. Identifying characteristics, life cycle, and resulting disease caused by the common parasites of domestic animals, common laboratory animals, selected wildlife, and humans are described. Special emphasis is given to parasites that can be transmitted from animals to man.

Credit Hours: 3
Prerequisites: AN_SCI 3254 or BIO_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructor's consent

BIOMED 3320: Comparative Hematology
Hematology is the study of blood cells in health and disease. Emphasis in this course is placed on the changes associated with disease. Transfusion medicine and coagulation disorders will also be included. Course graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 3254 or BIO_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructor's consent

BIOMED 3326: Comparative Pharmacology
An introduction to terminology used in pharmacology. Mechanisms of drug administration, absorption, distribution, metabolism, and excretion are described. Treatment modalities in animals and humans are compared. Basics of drug actions and the medicolegal aspects of pharmacology are discussed.

Credit Hours: 3
Prerequisites: an AAS degree in veterinary technology or AN_SCI 3254 or BIO_SC 3700, or equivalent, or instructor's consent

BIOMED 4001: Topics in Biomedical Sciences
Topics in Biomedical Sciences.
Credit Hour: 1-99

BIOMED 4010: Life Sciences Research: Models and Methods
A review of basic laboratory animal and non-animal research models and procedures commonly used in the life sciences area in academia and drug/chemical industry. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Biology or Cell Biology; junior standing required

BIOMED 4100: Veterinary Clinical Chemistry
This course is designed to hone the skills of the practicing veterinary technician, veterinary student, or veterinarian and assumes some basic knowledge of normal serum chemistry and urinalysis results. The review of normal will be minimal and emphasis will be placed on clinical serum chemistry and urinalysis findings associated with diseases. The graduate level course will include discussion of ancillary tests and more extensive case interpretations.

Credit Hours: 3
Prerequisites: An AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association accredited programs; Undergraduate physiology on mammals (AN_SCI 3254, BIO_SC 3700, or equivalent

Recommended: BIOMED 2110 and BIOMED 3200 or instructor's consent

BIOMED 4110: Veterinary Cytology
This course of Veterinary Cytology is designed to hone the skills of the practicing Veterinary Technician, Veterinary Student, or Veterinarian and assumes some basic knowledge of microscope usage and normal hematology. The review of normal cells will be minimal and emphasis will be placed on findings associated with inflammatory and neoplastic diseases. The graduate level course will include discussion of ancillary tests, special stains and treatment alternatives. The focus will be on canine and feline diseases but some common equine and bovine disease. Prerequisites: An AAS or equivalent
degree in veterinary technology from an American Veterinary Medical Association-accredited program, or instructor’s consent

Credit Hours: 2
Recommended: BIOMED 3200 and BIOMED 2110

BIOMED 4120: Principles of Toxicology
(cross-leveled with V_PBIO 7120). This course will provide an introduction to the general principles of toxicology, including the history and scope of the field; risk assessment and management; mechanisms of toxicology; the disposition of toxicants; non-target organ-directed toxicity; toxic responses of specific target organs; and various toxicological application, such as environmental toxicology.

Credit Hours: 3
Prerequisites: one year of college chemistry and biology, each or instructor’s consent

BIOMED 4200: Veterinary Public Health and Community Practice
Veterinary Public Health is the field of veterinary medicine that deals with food production and safety, zoonosis (animal to human) disease control, prevent and control of environmental contamination, and the role of animals in society. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 3254 or BIO_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructors consent

BIOMED 4210: Animal Issues in Disasters
(cross-leveled with V_PBIO 7210). This course describes the various aspects of responding to disasters that involve animals. Government involvement, legal requirements, effects on the human-animal bond, preparation for disasters of different kinds, and impacts on animal-related businesses will be discussed.

Credit Hour: 1
Prerequisites: an AAS in veterinary technology from an American Veterinary Medical Association accredited program, or equivalent training, or instructor’s consent

BIOMED 4300: Clinical Veterinary Neurology
Clinical veterinary neurology will review the neurologic examination, common neurologic diseases and techniques to properly care for the neurologic patient. The course organization is based primarily on neuroanatomic localization of disease. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: AAS in Veterinary Technology or BIOMED 3219 and 3100 or instructor’s consent; junior or senior standing

BIOMED 4320: Fundamentals of Small Animal Emergency and Critical Care
(cross-leveled with V_BSCI 7320). This course will provide students with the knowledge and skills to assist in small animal medical emergency and critical care facilities.

Credit Hours: 3
Prerequisites: An AAS in veterinary technology from an American Veterinary Medical Association accredited program, or equivalent training, or instructor’s consent

BIOMED 4333: Veterinary Cell Biology
(same as V_BSCI 5506). Course material stresses cell biology as related to animal health and medical issues. A comprehensive course overviewing molecular and biochemical issues of cell function especially as related to medicine and the underlying molecular causes of disease.

Credit Hours: 4
Prerequisites: BIO_SC 1500, or equivalent, 1 course in biochemistry or 4 credit hours in chemistry; or instructor’s consent

BIOMED 4400: Veterinary Surgical Nursing
Veterinary Surgical Nursing will enable the student to properly identify, care for, and maintain surgical equipment. The course will also prepare the student to learn surgical anatomy as well as the potential complications of common clinical setting surgeries. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BIOMED 2111, BIOMED 3219, and BIOMED 3100, or instructor’s consent

BIOMED 4410: Small Animal Physical Rehabilitation
This course will review the science of veterinary rehabilitation, assessment of rehabilitation patients, and the techniques used to treat these patients. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: AAS degree in veterinary technology or BIOMED 2110 or HTH_PR 2190 or equivalent, plus BIOMED 3219 or PTH_AS 2201 or equivalent, or instructor’s permission

BIOMED 4500: Equine Critical Care and Nursing
This course provides advanced information for veterinary technicians, veterinary assistants, and pre-veterinary students wishing to enhance and focus their understanding of equine critical care and nursing concepts. Course graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 2095 and AN_SCI 3254 or BIO_SC 3700 or equivalents, AAS or equivalent degree from AVMA-accredited program or instructor’s consent

BIOMED 4510: Equine Clinical Anatomy: Forelimbs
(cross-leveled with V_BSCI 7510). Basic foundation in selected aspects of equine clinical anatomy from veterinary technicians, pre-veterinary students, and other students wishing to enhance their understanding of anatomical structures of the horse’s forelimbs.

Credit Hour: 1
Prerequisites: five hours of biologic science or zoology, or equivalent, or instructor’s consent, or an AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association accredited program

BIOMED 4520: Equine Clinical Practice
This course is an introduction to a common medical conditions of the horse. Emphasis will be placed on the presenting complaint and the veterinarians approach to diagnosis, treatment, and prognosis.

Credit Hour: 1
Prerequisites: BIOMED 2110, BIOMED 2111 and AN_SCI 4977 or their equivalents, or an associate's degree in veterinary technology, or instructor's consent

BIOMED 4993: Internship in Veterinary Medical Technical Specialties
Supervised work experience in the MU Veterinary Medical Teaching Hospital of affiliated veterinary medical specialty practices or in MU laboratory animal facilities to develop technical skills and knowledge relevant to becoming a specialist in veterinary medical technology. A written report and oral presentation are required. Graded on S/U basis only.

Credit Hour: 1-6
Prerequisites: junior standing, an AAS degree from an AVMA accredited veterinary technical program or its equivalent, and instructor's consent

BIOMED 7010: Life Sciences Research: Models and Methods
(same as V_BSCI 7010). A review of basic laboratory animal and non-animal research models and procedures commonly used in the life sciences area in academia and drug/chemical industry. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Biology or Cell Biology

BIOMED 9090: Research - Biomedical Sciences
Research hours for BMS doctoral students continuous enrollment. Graded on S/U basis only.

Credit Hour: 1-99
Prerequisites: instructor’s consent

BIOMED 9434: Gonadal Function
(same as AN_SCI 9434). Survey of current and in-depth mechanisms involved in ovarian, testicular, and epididymal function. Emphasis will be given to comparative differences in gonadal functions among domestic animals.

Credit Hours: 3
Prerequisites: AN_SCI 4314 or equivalent, a course in endocrinology, and biochemistry or cell biology

Black Studies (BL_STU)

BL_STU 1100: Introduction to Swahili and African Culture
Introduction to Swahili and African Culture is a three credit hour course, which serves as a survey of an indigenous African language and the culture of East Africa. There are no prior requirements.

Credit Hours: 3

BL_STU 1250: World Theatre Workshop
(same as THEATR 1250). Provides a diverse ensemble of student performers, writers, and technicians with an intensive immersion in the process of theatrical production through the public presentation of dramatic literature that focuses on global issues of ethnicity and culture.

Credit Hours: 2

BL_STU 1410: African American History
(same as HIST 1410). Survey of social, political and economic development to the African American people in American life from 1619 to the present.

Credit Hours: 3

BL_STU 1500: The Black Woman in America
(same as WGST 1500). Review and critiques of a variety of materials about Black women from slavery to present. The course allows students to generate their own view about psychological, social and philosophical impact of the Black women’s struggle on all women.

Credit Hours: 3
Prerequisites: sophomore standing

BL_STU 1705: Introduction to Black Studies in Culture
Introduction to the concepts, terms, themes, and practices in the study of the African diaspora cultures, through readings in literature, music, and the arts that demonstrate concepts, terms, themes, and practices. Recommended for prospective Black Studies Majors. Program consent for repetition.

Credit Hours: 3

BL_STU 1720: African-American Theatre History
(same as THEATR 1720). A historical and critical analysis of the evolution of African American cultural performance in the American theatre and entertainment industry.

Credit Hours: 3

BL_STU 1790: History of Early Africa
(same as HIST 1790). This course introduces students to the early history of Africa. It focuses on political, social, economic and cultural developments based on primary and secondary sources available in print and online.

Credit Hours: 3

BL_STU 1800: History of Modern Africa
(same as HIST 1800). This course introduces students to the recent history of Africa. It provides them with an opportunity to understand the main challenges Africans faced since colonial times based on primary and secondary sources.

Credit Hours: 3

BL_STU 1810: History of South Africa
(same as HIST 1810). South African Society from the 16th century to the present with an emphasis on the last two centuries and the consolidation of the apartheid state.

Credit Hours: 3

BL_STU 2000: Black Studies
An interdisciplinary introduction to the basic concepts and literature in the disciplines covered by African-American studies. The role of historical, political, social, and economic forces in shaping cultural expression will be stressed.

Credit Hours: 2
BL_STU 2001: Undergraduate Topics in Black Studies-General
Organized study of selected topics. Subjects and credits may vary from semester to semester. Program consent for repetition.
Credit Hours: 1-3

BL_STU 2003: Undergraduate Topics in Black Studies-Behavioral Science
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.
Credit Hours: 3

BL_STU 2005: Topics in Black Studies - Humanities
Organized study of selected topics focusing on Black history and culture. Specific content may vary from semester to semester and will be announced in advance.
Credit Hours: 3

BL_STU 2150: African-American Cinema
(same as THEATR 2150). Study of the impact of cinema and the entertainment industry on the social perceptions of African-Americans and on African-American culture.
Credit Hours: 3

BL_STU 2200: Social Inequalities
(Same as SOCIOL 2200.) Survey of inequalities based upon criteria such as race, ethnicity, sex, age, religion and social class in contemporary societies. Focus on dynamics by which privilege and inequality are structured.
Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent

BL_STU 2210: The Black Americans
(same as SOCIOL 2210.) Analysis of history of blacks in the United States. Assessment of contemporary black community in terms of its institutions, style of life, patterns of work and intergroup relations.
Credit Hours: 3
Prerequisites: SOCIOL 1000 or equivalent or instructor's consent

BL_STU 2303: Studies in Black Relationships
This course examines constructions of Black American coupling and therefore, gender, race, sexuality, and class in the 20th and 21st centuries. Blackness has been and continues to be reconstructed via marriage, dating, and other forms of coupling. Emphasis will be placed on the role of socialization, institutions, mass media, myth, and individual and group practices. Students will have the opportunity to explore their own socialization and personal construction through assigned readings, self-reflection, experiential activities, and small group presentations.
Credit Hours: 3

BL_STU 2310: Literature of the African Diaspora
(Same as RM_LAN 2310) A postcolonial analysis of selected literary texts interpreting the African diaspora in the Americas.
Credit Hours: 3

BL_STU 2400: Introduction to African Diaspora Literature
(same as ENGLISH 2400). Introduces students to African Diaspora literature with an emphasis on literature written originally in English. No more than six hours may be taken in the Introduction to African Diaspora Literature series.
Credit Hours: 3
Prerequisites: ENGLISH 1000

BL_STU 2407: Introduction to African Diaspora Literature, 1603-17
(same as ENGLISH 2407). See BL_STU 2400 for course description.
Credit Hours: 3

BL_STU 2408: Introduction to African Diaspora Literature, 1789-1890
(same as ENGLISH 2408). See BL_STU 2400 for course description.
Credit Hours: 3

BL_STU 2409: Introduction to African Diaspora Literature, 1890-Present
(same as ENGLISH 2409). See BL_STU 2400 for course description.
Credit Hours: 3

BL_STU 2410: African American Women in History
(same as HIST 2410 and WGST 2410). African American Women in history is a topics course covering major issues affecting black women since their introduction into english-speaking North America to the present.
Credit Hours: 3

BL_STU 2450: Themes in the Geography of Africa South of the Sahara
(same as GEOG 2450). Major concepts of African geography in current and historical perspective. Case studies of major African countries.
Credit Hours: 3
Prerequisites: sophomore standing or one introductory Geography course

BL_STU 2500: Special Problems in Black Studies
Research apprenticeship with faculty member, assisting a faculty member in the development and execution of a research project. May be repeated for a maximum of six hours.
Credit Hour: 1-99
Prerequisites: sophomore standing, instructor’s consent

BL_STU 2501: Undergraduate Topics in Black Studies
Organized study of selected topics. Subjects and credit may vary from semester to semester. Program consent for repetition.
Credit Hour: 1-3
Prerequisites: sophomore standing
BL_STU 2570: Black Religion
A history of religion approach to the study of black religion which takes into consideration the unique past experiences of the African American community as it underwent the terror of forced migration, slavery, segregation, and discrimination.

Credit Hours: 3
Prerequisites: sophomore standing

BL_STU 2601: Languages of Africa
(same as ENGLISH 2601 and LINGST 2601). Introduction to the diversity of the 2000+ African languages, including first-hand experience exploring a few in detail with native speakers. Features of African languages are compared with others of the world. Political and social aspects of language in Africa are discussed.

Credit Hours: 3

BL_STU 2610: Islam and Black America
A historical survey of the origins, development and impact of the Black Islamic tradition.

Credit Hours: 3

BL_STU 2715: Studies in Black Culture
This course will survey selected forms of black cultural expression, from a range of U.S., Africa, and the African Diaspora cultures in various media including literature, music, film studies, as will as other related disciplines. Program consent for repetition.

Credit Hours: 3

BL_STU 2720: African-American Visual Culture
(Same as AR_H_A 2720) This course introduces students to African-American art history, visual culture, and material culture in their cultural, political, and historical contexts. Specific focuses may include the Harlem Renaissance, the Black Arts Movement, and other topics.

Credit Hours: 3

BL_STU 2904: Black Studies in Slavery and Freedom
(same as HIST 2904). This course provides study of historical background, economic, political and social implications of slavery and freedom in the African Diaspora (Americas, Africa, Europe, Asia) as well as the legal and extralegal struggles for and meaning of (global, local, and national) freedom.

Credit Hours: 3

BL_STU 2975: Theoretical Traditions in Blacks Studies - Culture
This course provides a broad understanding of the diverse theoretical traditions within the field of Black Studies, through a comparative examination of concepts, developments, and debates in humanities, including literature, languages, and music. Course graded on A-F basis only.

Credit Hours: 3

BL_STU 3001: Undergraduate Topics in Black Studies - General
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hours: 3
Prerequisites: Junior standing and/or BL_STU 2000

BL_STU 3003: Undergraduate Topics in Black Studies - Behavioral Sciences
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hour: 1-3
Prerequisites: Junior standing and/or BL_STU 2000

BL_STU 3004: Undergraduate Topics in Black Studies - Social Science
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hour: 1-3
Prerequisites: Junior standing and/or BL_STU 2000

BL_STU 3005: Undergraduate Topics in Black Studies - Humanities
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to six credit hours with program consent.

Credit Hours: 3
Prerequisites: Junior Standing and/or BL_STU 2000

BL_STU 3005H: Undergraduate Topics in Black Studies - Humanities - Honors
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to six credit hours with program consent.

Credit Hours: 3
Prerequisites: Junior Standing and/or BL_STU 2000. Honors eligibility required

BL_STU 3100: African American Psychology
(same as ESC_PS 3100 and PSYCH 3880). The research, theories, and paradigms developed to understand the attitudes, behaviors, and psychosocial realities of African-Americans are discussed.

Credit Hours: 3
Prerequisites: PSYCH 1000

(same as HIST 3200). Examines the dismantling of American apartheid and its transformation into a new racial control system. It also explores how and why the Civil Rights Movement was converted into a struggle for Black Power.
Credit Hours: 3

BL_STU 3230: Studies in Black Sexual Politics
Course explores Black transnational politics of sex/sexuality and examines the theoretical, historical, and socio-cultural context that race, gender, and sexuality are used as analytical concepts. Students learn a transdisciplinary approach and apply this newly acquired information to analyze shifts in the field of Black sexuality studies. May be repeated for credit.
Credit Hours: 3
Prerequisites: sophomores standing required

BL_STU 3303: Black Athletes
This course examines Black athletes in the 20th and 21st centuries. Emphasis will be placed on how Blacks entered competitive athletics and the role of racism and power, socialization, institutions, mass media, myth, and individual and group practices. Students will have the opportunity to explore their own socialization and personal construction through assigned readings, self-reflection, experiential activities, and small group presentations.
Credit Hours: 3

BL_STU 3400: Survey of African American Literature, Beginnings to 1900
(same as ENGLSH 3400). A survey of major authors and movements in African American literature from its beginnings to 1900.
Credit Hours: 3
Prerequisites: ENGLSH 1000

BL_STU 3410: Survey of African American Literature, 1900-Present
(same as ENGLSH 3410). A survey of major authors and movements in African American literature from 1900 to the present.
Credit Hours: 3
Prerequisites: ENGLSH 1000

BL_STU 3420: Periods and Genres in African Diaspora Literature
(same as ENGLSH 3420). Topic (e.g. Harlem Renaissance, African Diaspora Poetry) Announced at time of registration. No more than 6 hours may be taken in the Periods and Genres in African Diaspora Literature series.
Credit Hours: 3
Prerequisites: ENGLSH 1000

BL_STU 3427: Periods and Genres in African Diaspora Literature, 1603-1789
(same as ENGLSH 3427). See BL_STU 3420 for course description.
Credit Hours: 3

BL_STU 3428: Periods and Genres in African Diaspora Literature, 1789-1890
(same as ENGLSH 3428). See BL_STU 3420 for course description.
Credit Hours: 3

BL_STU 3429: Periods and Genres in African Diaspora Literature, 1890-Present
(same as ENGLSH 3429). See BL_STU 3420 for course description.
Credit Hours: 3

BL_STU 3590: Religious Biography: Black Religion
(same as HIST 3400). Studies black American religion through the biographies of representative and influential figures of the nineteenth and twentieth centuries, including Nat Turner, W.E.B Dubois, Marcus Garvey, M.L. King, and Malcolm X.
Credit Hours: 3

BL_STU 3624: Comparative Approaches to Black Studies in History
Comparative approach to the study of Black Diaspora history that focuses on the theory, method, structure, and application of modes of cultural production within the history of Black Diaspora cultures. Recommended for students with an interest in Black Studies or majors in the Humanities field. Program consent for repetition.
Credit Hours: 3

BL_STU 3625: Comparative Approaches to Black Studies in Culture
Comparative approach to the study of Black Diaspora cultures that focus on the theory, method, structure, and application of modes of cultural production within Black Diaspora cultures. Recommended for students with an interest in Black Studies or majors in the Humanities field. Course may be repeated for credit with consent of program.
Credit Hours: 3

BL_STU 3670: History of Black Nationalism in the United States
(same as HIST 3410). Examines the struggle of African Americans to construct autonomous institutions, to build all Black communities or to acquire an independent nation-state. We will study the ideology, structure, strategy and tactics.
Credit Hours: 3
Prerequisites: HIST 1410 or SOCIOL 2210

BL_STU 3703: Themes in Black Society
Examines various themes, issues, and perspectives in political science, psychology, sociology, and other related disciplines related to social and historical institutions in the U.S., Africa, and the African Diaspora. Recommended for Black Studies or Behavioral Science Majors. Program consent for repetition.
Credit Hours: 3

BL_STU 3705: Themes in Black Culture
Examines various themes, issues and perspective in literature, music, the arts, and other related disciplies related to social and historical institutions in the U.S., Africa, and the African Diaspora. Recommended for Black Studies Majors. Program consent required for repetition.
Credit Hours: 3

BL_STU 3800: Women in African History
(same as HIST 3800). Focuses on the varied and changing roles of women in sub-Saharan Africa from pre-colonial times to the present.
Credit Hours: 3  
Prerequisites: sophomore standing or instructor's consent

BL_STU 3850: Gender, Hip Hop, and the Politics of Representation
This class will examine gender in hip hop while exploring the intra- and interracial politics of representation among those of the hip hop generation.

Credit Hours: 3

BL_STU 3977: Black Studies Methodologies
Advanced research, writing, and application of knowledge and critical paradigms in Black Studies, through study of such topics as slavery, colonialism, urbanization and migration, environment, gender, race, identity, intellectual movements, cultural studies and popular culture. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BL_STU 2975

BL_STU 4000: Special Problems in Black Studies
Independent investigation leading to a paper or a project.

Credit Hour: 1-99
Prerequisites: junior standing, instructor's consent

BL_STU 4001: Undergraduate Topics in Black Studies-General
Organized study of selected topics. Subjects and credit may vary from semester to semester. Program consent for repetition.

Credit Hour: 1-3
Prerequisites: junior standing

BL_STU 4040: Houses Divided: Society and Politics in the Civil War Era
(Same as HIST 4040) Examines the sectional crisis, the Civil War and reconstruction through the lens of divided households. Considers the experience of soldiers and civilians, women and men, slaves and freepeople.

Credit Hours: 3

BL_STU 4130: African-American Politics
(Same as POL_SC 4130). Surveys political participation of African-Americans in American politics. Analyzes their public lives in the context of elections, behavior of political organizations, social movements, parties, and level of government.

Credit Hours: 3
Prerequisites: POL_SC 1100 and junior standing

BL_STU 4181: Themes in Literature by Women
(Same as WGST and ENGLSH 4181). Examines works by a number of women writers with particular attention to their sociopolitical context. May repeat to six hours with department's consent.

Credit Hours: 3
Prerequisites: junior standing

BL_STU 4200: African-American Religion
(Same as REL_ST 4210). Examines the organization of major African American Christian denominations, Islam and religious movements. Twentieth century issues will be discussed, including sexism, classism and homophobia in church communities.

Credit Hours: 3
Prerequisites: junior standing or instructor's consent

BL_STU 4210: Religion in Afro-American Literature
(Same as REL_ST 4220). Examination of Afro-American fiction, poetry and drama which present significant racial attitudes toward the Christian religion.

Credit Hours: 3
Prerequisites: sophomore standing

BL_STU 4220: Women, Development, and Globalization
(Same as SOCIOL 4230 and WGST 4230 and PEA_ST 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women’s strategies in defining and instituting programs to improve quality of life in communities.

Credit Hours: 3
Prerequisites: BL_STU 1332, BL_STU 2200; SOCIOL 2200, WGST 1332 or WGST 2010

BL_STU 4230: Women, Development, and Globalization
(Same as SOCIOL 4230 and WGST 4230 and PEA_ST 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women’s strategies in defining and instituting programs to improve quality of life in communities.

Credit Hours: 3
Prerequisites: BL_STU 1332, BL_STU 2200; SOCIOL 2200, WGST 1332 or WGST 2010

BL_STU 4235: Social Perspectives on Gender and Emotion
(Same as SOCIOL 4235 and WGST 4235: cross-leveled with BL_STU 4235). Examines theories of affect and emotions, the social contexts and the implications for human development and behavior, with special emphasis on sex, gender, race, class and culture. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: WGST 1332 or WGST 1360; SOCIOL 1360 or SOCIOL 2300; BL_STU 1332 or BL_STU 2200; junior standing

BL_STU 4270: African-Americans in the Twentieth Century
(Same as HIST 4270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.

Credit Hours: 3

BL_STU 4300: The Black Family: Past, Present & Future
(Same as H_D_FS 4300). Emphasis is on the unique social, economic, religious, educational and political environments that have affected the structure and function of the black family.

Credit Hours: 3
Prerequisites: junior standing

BL_STU 4303: Race, Class, Gender and U.S. Social Policy
Examines the causes and effects of the vast social and economic inequalities that exist between blacks and whites in US society, including the role federal, state and local government plays in creating and addressing these inequalities.

Credit Hours: 3

</tbody>
</table>
BL_STU 4489: Major African Diaspora Women Writers, 1890 to Present
(same as WGST 4489 and ENGLSH 4489). See BL_STU 4480 for course description.

Credit Hours: 3

BL_STU 4500: Special Problems in Black Studies
Independent project or paper, not leading to dissertation.

Credit Hour: 1-99
Prerequisites: program’s approval

BL_STU 4530: Caribbean Women Writers
Examines representative works by female authors from the Caribbean; primarily the English speaking islands. The depiction of Caribbean women will be a major consideration, as well as the unique qualities of Caribbean literature.

Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent

BL_STU 4640: African Politics
(same as POL_SC 4640). A general comparative course focusing on post-independent Africa. Theories and concepts related to decolonization, nationalism, democratization, and ethnicity; also institutional forms and organizations: political parties, parliaments, and executives.

Credit Hours: 3
Prerequisites: POL_SC 1100 and junior standing

BL_STU 4700: Race, Gender and Ethnicity in Higher Education
Historical relationships of race, gender, and ethnic issues in United States higher education. Issues include: theory and research of curriculum and teaching, diversity within the academy, and leadership, governance, and policy.

Credit Hours: 3

BL_STU 4804: Historical Studies of Black Women
This course offers a comprehensive examination of the origins, developments, and productions of the specified time period with emphases on black women as creative artists, activists, performers, musicians, and writers.

Credit Hours: 3

BL_STU 4877: Black Studies Abroad
This interdisciplinary study abroad course provides students with global experience within the African Diaspora, the opportunity to study in a foreign culture and augment their “global competencies” and course of study across the three Black Studies tracks-History, Culture and Society-as well as support their study and/or career development. Graded A-F basis only.

Credit Hours: 3

BL_STU 4972: Undergrad. Seminar in Black Studies: History of Race in the U.S.
Readings on problems in American history with reports and discussion on selected topics. Departmental consent for repetition up to a maximum of 6 hours.

Credit Hours: 3
Prerequisites: junior standing, fifteen hours or instructor’s consent

BL_STU 4977: Black Studies Capstone
This course is designed to permit students to integrate general and specialized knowledge within the three Black Studies tracks (History, Society, Culture) using an interdisciplinary approach. Topics vary according to instructor and core discipline. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BL_STU 2975 and BL_STU 3977; instructor’s consent

BL_STU 7004: Topics in Black Studies
Organized study of selected topics in Black Studies. Subjects and earnable credit may vary from semester to semester. Graded on A-F basis only.

Credit Hour: 1-99
Prerequisites: instructor’s consent

BL_STU 7230: Women, Development, and Globalization
(same as SOCIOL 7230; cross-leveled with BL_STU 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities.

Credit Hours: 3

BL_STU 7235: Social Perspectives on Gender and Emotion
(same as SOCIOL 7235 and WGST 7235). Examines theories of affect and emotions, the social contexts and the implications for human development and behavior, with special emphasis on sex, gender, race, class and culture. Graded on A-F basis only.

Credit Hours: 3
BL_STU 7270: African-Americans in the Twentieth Century  
(same as HIST 7270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.  
Credit Hours: 3

BL_STU 7300: The Black Family: Past, Present & Future  
(same as H_D_FS 7300). Emphasis is on the unique social, economic, religious, educational and political environments that have affected the structure and function of the black family.  
Credit Hours: 3

BL_STU 7400: Studies in African Diaspora Literature  
(same as ENGLSH 7400). Topics (e.g., African American Poetry, African Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in African Diaspora Literature series.  
Credit Hours: 3

BL_STU 7407: Studies in African Diaspora Literature, 1603 to 1789  
(same as ENGLSH 7407). See BL_STU 7400 for course description.  
Credit Hours: 3

BL_STU 7408: Studies in African Diaspora Literature, 1789 to 1890  
(same as ENGLSH 7408). See BL_STU 7400 for course description.  
Credit Hours: 3

BL_STU 7409: Studies in African Diaspora Literature, 1890 to Present  
(same as ENGLSH 7409). See BL_STU 7400 for course description.  
Credit Hours: 3

BL_STU 7410: Major Africana Diaspora Writers  
(same as ENGLSH 7410). An intensive study of selected writers of African Diaspora literature focusing on texts originally in English. No more than six hours may be taken in the Major Anglophone African Diaspora Writers series.  
Credit Hours: 3  
Prerequisites: instructor’s consent

BL_STU 7415: African Americans and American Justice  
(same as HIST 7415) This course provides opportunities to examine the judicial system and discuss selected court cases in which black men, women, or children were plaintiffs or defendants in local and national courts. Moreover, the readings will subject conventional wisdom about black Americans and the legal system to scrutiny while allowing students to “witness” the mechanics of the courts and to assess long and short range social, economic, and political implications for Americans, black and white.  
Credit Hours: 3

BL_STU 7417: Major African Diaspora Writers, 1603 to 1789  
(same as ENGLSH 7417). See BL_STU 7410 for course description.  
Credit Hours: 3

BL_STU 7418: Major Anglophone African Diaspora, 1789 to 1890  
(same as ENGLSH 7418). See BL_STU 7410 for course description.  
Credit Hours: 3

BL_STU 7419: Major African Diaspora Writers, 1890 to Present  
(same as ENGLSH 7419). See BL_STU 7410 for course description.  
Credit Hours: 3

BL_STU 7420: Africana Womanism  
(same as ENGLSH 7420). An intensive study of Africana Womanism, focusing on selected Africana women writers. May be repeated to six hours with departmental consent.  
Credit Hours: 3

BL_STU 7460: Economic Characteristics of the African American Experience  
(same as HIST 4460). Examines how economic considerations have influenced African American history from the transatlantic slave trade to the present.  
Credit Hour: 1  
Prerequisites: junior standing or instructor’s consent

BL_STU 7480: Major African Diaspora Women Writers  
(same as WGST 7480 and ENGLSH 7480). Study of selected African Diaspora women writers, focusing on texts originally in English. May be repeated for credit with departmental consent. Maximum of 6 hours for Black Studies 7180 and 7480.  
Credit Hours: 3

BL_STU 7487: Major African Diaspora Women Writers, 1603 to 1789  
(same as WGST 7487 and ENGLSH 7487). See BL_STU 7480 for course description.  
Credit Hours: 3

BL_STU 7488: Major African Diaspora Women Writers, 1789 to 1890  
(same as WGST 7488 and ENGLSH 7488). See BL_STU 7480 for course description.  
Credit Hours: 3

BL_STU 7489: Major African Diaspora Women Writers, 1890 to Present  
(same as WGST 7488 and ENGLSH 7488). See BL_STU 7480 for course description.  
Credit Hours: 3

BL_STU 7710: Themes in African Diaspora Folklore  
(same as ANTHRO 7160 and ENGLSH 7710.) Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. ENGLSH 7700 and ENGLSH 7710 may be repeated for a maximum of six hours with instructor’s consent.  
Credit Hours: 3
BL_STU 7810: African-American Religion
(same as REL_ST 7810). Examines the organization of major African American Christian denominations, Islam and religious movements. Twentieth century issues will be discussed, including sexism, classism and homophobia in church communities.

Credit Hours: 3

BL_STU 7877: Black Studies Abroad
This interdisciplinary study abroad course provides students with global experience within the African Diaspora, the opportunity to study in a foreign culture and augment their "global competencies" and course of study across the three Black Studies tracks - History, Culture, and Society - as well support their study and/or career development. Graded on A-F basis only.

Credit Hours: 3

BL_STU 8000: Independent Readings in Black Studies
Readings on selected topics in Black Studies, with emphasis on the implications of the interdisciplinary and intersecting areas of History, Society, and Culture. May be repeated to a maximum of six hours.

Credit Hours: 3

Prerequisites: Department Consent Required

BL_STU 8277: Race, Ethnicity, and Transnational Inequalities
(same as SOCIOL 8277). This graduate seminar examines the global contest of our radicalized modern world system. How do people develop and give meaning to race/ethnicity in different regions? Focus on the construction of bodies Creole identities, gender, sexualities, citizenships and immigration. Graded on A-F basis only.

Credit Hours: 3

BL_STU 8400: Seminar in African Diaspora Literature
(same as ENGLSH 8400). Topic (e.g., Autobiography, Black Women Writers) announced at time of registration. May be repeated to 12 hours with departmental consent.

Credit Hours: 3

BL_STU 8410: Seminar in African Diaspora Theory and Literature Criticism
(same as ENGLSH 8410). Modern and contemporary African Diaspora criticism and theory including diverse approaches to literary and cultural studies. May be repeated to 12 hours with departmental consent.

Credit Hours: 3

BL_STU 8415: Readings in African-American History
(Same as HIST 8415). Readings on selected topics in African-American history from 1619 to the present, with emphasis on conflicting interpretations. May be repeated to a maximum of six hours.

Credit Hours: 3

BL_STU 8416: Seminar in African-American History
(same as HIST 8416). Directed research in selected topics in African-American history. May be repeated to a maximum of six hours.

Credit Hours: 3

BL_STU 8901: Graduate Topics in Black Studies
Graduate seminar arranged by topics or themes related to Black Studies. Graded on A-F basis only.

Credit Hours: 3

Business Administration (BUS_AD)

BUS_AD 0593: Prague Study Abroad Pre-departure required on-Campus Information Session (GRAD)
Place holder Course for Pre-departure required on-Campus Information Session Zero credit and billing hours No Term Finalization

Credit Hours: 0

BUS_AD 0591: Bergamo Study Abroad Pre-departure required on-Campus Information Session (GRAD)
Place holder Course for Pre-departure required on-Campus Information Session Zero credit and billing hours No Term Finalization

Credit Hours: 0

BUS_AD 0592: Alicante Study Abroad Pre-departure required on-Campus Information Session (GRAD)
Place holder Course for Pre-departure required on-Campus Information Session Zero credit and billing hours No Term Finalization

Credit Hours: 0

BUS_AD 0585: South America Jan Intersession Pre-Departure required on-Campus Information (GRAD)
Place holder Course for required per-departure on campus information sessions Zero credit and billing hours. No Term Finalization.

Credit Hours: 0

BUS_AD 3500: Professional Development in Business
Provides an introduction to professional competencies important for success as a business professional. Includes the assessment, communication and development of competencies valued by employers.

Prerequisites: Upper level in the TCoB

Credit Hours: 3

BUS_AD 4500: Professional Development Program - Practicum
This course is designed to help students practice professional core competencies in the workplace. Students will secure a professional-level work experience and apply classroom knowledge and interpersonal skills. This course is a graduation requirement for students seeking the BSBA degree. Graded on S/U basis only.

Prerequisites: BUS_AD 3500

Credit Hours: 3

BUS_AD 7050: MBA Communications Practice
Special laboratory instruction in oral and written communication skills with an emphasis on business communications.
BUS_AD 7330: Business Law/Regulation
Legal aspects of employment, administrative regulation, corporate and noncorporate ownership structures, and legal issues involving business transactions.
Credit Hour: 1-3

BUS_AD 7340: Business Ethics and Leadership
Case studies, discussion, and readings used to integrate critical thinking about ethical issues into business decision. Development and application of ethical decision making frameworks.
Credit Hour: 1-3

BUS_AD 8001: Topics in Business Administration
Selected topics in administration offered on experimental basis.
Credit Hour: 1-99
Prerequisites: instructor’s consent

BUS_AD 8010: MBA Seminar
Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. May be repeated.
Credit Hour: 1-3
Prerequisites: MBA students only

BUS_AD 8020: MBA Seminar
Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. May be repeated.
Credit Hour: 1-3
Prerequisites: MBA students only

BUS_AD 8030: MBA Seminar
Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. Some sections may be graded A-F or S/U only. May be repeated.
Credit Hour: 1-3
Prerequisites: MBA students only

BUS_AD 8500: Business Problem Analysis: Field Project
Application of functional areas of business to real-world cases in business planning. Students will prepare and present business plan for an organization as a team project in a supervised experience.
Credit Hour: 1-3

BUS_AD 8600: Business Consulting
Students work in a team consulting capacity, with medium to large organizations, identifying and defining relatively complex and often ambiguous business problems such as needs assessment, quality management, systems management, policy/strategy formulation and similar areas.
Credit Hour: 1-3

BUS_AD 8730: International Study Abroad
Study abroad opportunities in one or more countries. Focuses on selected international business issues, cultural differences, and visiting businesses on-site. Graded on a S/U basis only. May be repeated as venues change.
Credit Hour: 2-3
Prerequisites: consent required

Chemical Engineering (CH_ENG)

CH_ENG 1000: Introduction to Chemical Engineering
Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations.
Credit Hours: 2
Prerequisites: MATH 1500, CHEM 1320, or concurrently

CH_ENG 1000H: Introduction to Chemical Engineering - Honors
Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations.
Credit Hours: 2
Prerequisites: MATH 1500, CHEM 1320, or concurrently. Honors eligibility required

CH_ENG 1320: Chemistry and Chemical Technology I
Covers fundamental principals of chemistry, gases, engineering materials, electrochemistry, and applications with instruction including numerical modeling. Graded on A/F basis only. May be repeated for credit.
Credit Hours: 3
Prerequisites: MATH 1500 or concurrent enrollment
Corequisites: MATH 1500

CH_ENG 1330: Chemistry and Chemical Technology II
Covers fundamentals principals of chemistry, gases, engineering materials, electrochemistry, and applications with instruction including numerical modeling. May be repeated for credit. Graded on A/F basis only.
Credit Hours: 3
Prerequisites: CH_ENG 1320 or CHEM 1320 and MATH 1500

CH_ENG 2001: Advanced Experimental Course
Content and number of credit hours to be listed in Schedule of Courses.
Credit Hour: 1-99
Prerequisites: sophomore standing

CH_ENG 2118: Introduction to Energy Technology and Sustainability
An introductory course on energy technology and those resources and practices that allow for sustainable commercialization. Graded on A/F basis only.
Credit Hours: 3
Prerequisites: sophomore standing in engineering

CH_ENG 2225: Mass and Energy Balance
Industrial stoichiometry, material and energy balances, thermodynamics, thermochemistry; related topics.
Credit Hours: 3
Prerequisites: PHYSCS 2750, CHEM 2100, or concurrently

CH_ENG 2226: Engineering Process Computations and Laboratory
Introduction to the effective use of computer software with emphasis on chemical engineering applications, which include solutions for systems of algebraic equations using matrix methods; solutions of ordinary differential equations and partial differential equations and visualization of those solutions; linear, multilinear, and nonlinear regression for data analysis; 2D and 3D plotting, symbolic calculations, process control simulations, and text processing.
Credit Hours: 3
Prerequisites or Corequisites: MATH 1700, CH_ENG 2225

CH_ENG 3234: Principles of Chemical Engineering I
Fluid flow, heat and mass transfer. A comprehensive treatment of the transport processes related to chemical engineering operations, with focus on both theory and applications.
Credit Hours: 4
Prerequisites: grade of C- or better in CH_ENG 2225

CH_ENG 3235: Principles of Chemical Engineering II
Separation processes in chemical engineering, including: Evaporation, absorption, distillation, extraction, leaching, membrane separation, and drying.
Credit Hours: 3
Prerequisites: CH_ENG 3234

CH_ENG 3243: Chemical Engineering Laboratory I
Laboratory study of some principal unit operations of chemical engineering.
Credit Hours: 3
Prerequisites or Corequisites: CH_ENG 2226 and CH_ENG 3235

CH_ENG 3261: Chemical Engineering Thermodynamics I
Study of thermodynamics, with particular reference to chemical engineering applications.
Credit Hours: 3
Prerequisites: grade of C or better in CH_ENG 2225

CH_ENG 3262: Chemical Engineering Thermodynamics II
Credit Hours: 3
Prerequisites: CH_ENG 3261

CH_ENG 3307: Chemical Process Safety and Professional Ethics
A course focused on important technical fundamentals of chemical process safety and their application including professional ethics considerations. Graded on A-F basis only.

CH_ENG 4001: Topics in Chemical Engineering
Current and new technical developments in chemical engineering.
Credit Hours: 3
Prerequisites: instructor's consent

CH_ENG 4085: Problems in Chemical Engineering
Directed study of chemical engineering problems.
Credit Hour: 2-4
Prerequisites: instructor's consent

CH_ENG 4220: Hazardous Waste Management
(same as CV_ENG 4220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous waste, waste minimization, legislation on hazardous wastes and groundwater contamination.
Credit Hours: 3
Prerequisites: CH_ENG 3234, CH_ENG 3261 or instructor's consent

CH_ENG 4226: Engineering Research Calculations and Reporting
Application and analysis of engineering calculations in MS Excel, Matlab, and project-specific software including applications of calculus, experiential learning, and supervised research. Must have research advisor define at least one experiment and review at least one report. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MATH 4100

CH_ENG 4230: Design of Experiments and Statistical Quality Control for Process Engineers
(same as BIOL_EN 4270). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control.
Credit Hours: 3
Prerequisites: experience with Excel or instructor's consent

CH_ENG 4306: Advanced Engineering Math
(same as NU_ENG 4306). Applies ordinary and partial differential equations to engineering problems; Fourier's series; determinants and matrices; Laplace transforms; analog computer techniques.
Credit Hours: 3
Prerequisites: MATH 4100
CH_ENG 4311: Chemodynamics
Environmental movement of chemicals in air, water, and soil; designed to introduce students to the basic principles and techniques useful for the prediction of the movement and fate chemicals in ecosystems.

Credit Hours: 3
Prerequisites: CH_ENG 3234 or instructor's consent

CH_ENG 4312: Air Pollution Control
Modeling of urban air pollution and control techniques. Topics treated are plume dispersion theories, photochemistry, methods of monitoring, methods of industrial abatement and legal aspects.

Credit Hours: 3
Prerequisites: CH_ENG 3234 or instructor's consent

CH_ENG 4315: Introduction to Bioprocess Engineering
(same as BIOL_EN 4315). This general introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models.

Credit Hours: 3
Prerequisites: BIOL_EN 2180 (for Biological Engineering students) or CH_ENG 2225 (for Chemical Engineering students) or instructor’s consent

CH_ENG 4316: Biomass Refinery Operations
(same as BIOL_EN 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.

Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CH_ENG 2225 (for Chemical Engineering students) or instructor’s consent

CH_ENG 4317: Chemical Processing in Semiconductor Device
This course covers the current plasma processing methods used to produce semiconductor devices with emphasis on memory devices. The physics and chemistry of how plasmas are formed, sustained and interact with the semiconductor wafers being processed. Plasma chemistry and the chemical reactions used in plasma etching are discussed.

Credit Hours: 3
Prerequisites: MATH 4100 or MATH 7100

CH_ENG 4318: Energy Technology and Sustainability
An introductory course on energy technology, resources, practices, and common calculations used for energy analysis. May be repeated for credit.

Credit Hours: 3
Prerequisites: at least one engineering thermodynamics course or a Physical Chemistry course or instructor’s consent

CH_ENG 4319: Introduction to Polymer Materials
An introduction to the structure and properties of polymers. Solution properties, molecular weight determination and rheological behavior are studied. Manufacturing and processing techniques are considered.

Credit Hours: 3

Prerequisites: CH_ENG 3262 and CHEM 2110

CH_ENG 4321: Introduction to Ceramics
Introductory course in ceramics materials, crystal structure, processes and properties. The course content and level of presentation would allow an entry level engineering to be conversant with the terminology and concepts of ceramic science and engineering.

Credit Hours: 3
Prerequisites: Chemistry and Physics

CH_ENG 4335: Transport Phenomena
Integrated study of momentum, heat and mass transport.

Credit Hours: 3
Prerequisites: CH_ENG 3235, and MATH 4100 or MATH 7100

CH_ENG 4345: Special Reading in Chemical Engineering
Individually supervised special reading leading to an engineering report.

Credit Hour: 2-5
Prerequisites: senior standing

CH_ENG 4363: Chemical Reaction Engineering and Technology
Reactor design and optimization; rate equations; thermal effects in reactor.

Credit Hours: 3
Prerequisites: CH_ENG 2226, CH_ENG 3235, or instructor’s consent

CH_ENG 4370: Process Control Methods and Laboratory
Stat-space modeling, simulation, and experimental validation; stability analysis; feedback design and experimental studies; methods for disturbance rejection.

Credit Hours: 3
Prerequisites: CH_ENG 2226

CH_ENG 4385: Chemical Engineering Design I
The course presents optimum design methods, cost estimation, material selection and other relevant areas for the design of chemical plants. In addition, chemical safety and risk assessment will be covered.

Credit Hours: 3
Prerequisites: CH_ENG 2226, CH_ENG 3235, CH_ENG 3262, PHYSCS 2760, CHEM 2110

CH_ENG 4464: Electrochemical Reaction Engineering Science
Phenomenological behavior of electrochemical processes (battery emphasis). Theoretical interpretations of diffusion and reaction processes including system modeling. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: A course in thermodynamics or physical chemistry; CH_ENG 3261 or MAE 2300 or CHEM 3310 or instructor’s consent

CH_ENG 4980: Process Synthesis and Design
Continuation of CH_ENG 4385: application of chemical analysis and modeling to a capstone design project.

Credit Hours: 3
Prerequisites: CH_ENG 4385
CH_ENG 4990: Undergraduate Research in Chemical Engineering
Directed study of chemical engineering problems.
Credit Hour: 2-4
Prerequisites: instructor's consent

CH_ENG 4995: Undergraduate Research in Chemical Engineering - Honors
Individual research for a senior thesis; research is supervised by the chemical engineering faculty. The thesis is to be defended before the departmental Honors committee.
Credit Hour: 3-6
Prerequisites: senior standing

CH_ENG 7001: Topics in Chemical Engineering
Current and new technical developments in chemical engineering.
Credit Hours: 3
Prerequisites: instructor's consent

CH_ENG 7220: Hazardous Waste Management
(same as CV_ENG 7220). Engineering principles involved in handling, collection transportation, processing and disposal of hazardous waste minimization, legislation on hazardous wastes and groundwater contamination.
Credit Hours: 3

CH_ENG 7226: Engineering Research Calculations and Reporting
Application and analysis of engineering calculations in MS Excel, Matlab, and project-specific software including applications of calculus, experiential learning, and supervised research. Must have research advisor define at least one experiment and review at least one report. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MATH 4100

CH_ENG 7270: Design of Experiments and Statistical Quality Control for Process Engineers
(same as BIOL_EN 7270). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control.
Credit Hours: 3
Prerequisites: experience with Excel or instructor's consent

CH_ENG 7311: Chemodynamics
Environmental movement of chemicals in air, water, and soil; designed to introduce students to the basic principles and techniques useful for the prediction of the movement and fate chemicals in ecosystems.
Credit Hours: 3
Prerequisites: CH_ENG 3234 or instructor's consent

CH_ENG 7312: Air Pollution Control
Modeling of urban air pollution and control techniques. Topics treated are plume dispersion theories, photochemistry, methods of monitoring, methods of industrial abatement and legal aspects.
Credit Hours: 3
Prerequisites: CH_ENG 3234 or instructor's consent

CH_ENG 7315: Introduction to Bioprocess Engineering
(same as BIOL_EN 7315). This General introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analysis proceed through the use of mass balances, energy balances, and empirical or theoretical models.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 (for biological engineering students) or CH_ENG 2225 (for chemical engineering students) or instructor's consent

CH_ENG 7316: Biomass Refinery Operation
(same as BIOL_EN 7316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CH_ENG 2225 or instructor's consent

CH_ENG 7317: Chemical Processing in Semiconductor Device
This course covers the current plasma processing methods used to produce semiconductor devices with emphasis on memory devices. The physics and chemistry of how plasmas are formed, sustained and interact with the semiconductor wafers being processed. Plasma chemistry and the chemical reactions used in plasma etching are discussed.
Credit Hours: 3
Prerequisites: MATH 4100 or MATH 7100

CH_ENG 7319: Introduction to Polymer Materials
An introduction to the structure and properties of polymers. Solution properties, molecular weight determination and rheological behavior are studied. Manufacturing and processing techniques are considered.
Credit Hours: 3
Prerequisites: CH_ENG 3262 and CHEM 2110

CH_ENG 7321: Introduction to Ceramic Material
Introductory course in ceramics materials, crystal structure, processes and properties. The course content and level of presentation would allow an entry-level engineer to be conversant with the terminology and concepts of ceramics science and engineering.
Credit Hours: 3
Prerequisites: Chemistry and Physics

CH_ENG 7335: Transport Phenomena
Integrated study of momentum, heat and mass transport.
Credit Hours: 3
Prerequisites: CH_ENG 3235, and MATH 4100 or MATH 7100

CH_ENG 7464: Electrochemical Reaction Engineering Science
Phenomenological behavior of electrochemical processes (battery emphasis). Theoretical interpretations of diffusion and reaction processes including system modeling. Graded on A-F basis only.
Credit Hours: 3
### Prerequisites:
A course in thermodynamics or physical chemistry; CH_ENG 3261 or MAE 2300 or CHEM 3310 or instructor's consent.

#### CH_ENG 7980: Synthesis and Design of Chemical Process
This is a heuristic-based design course intended to assist students in bringing together capabilities from previous courses. An emphasis is placed on the creation process of design. Graded on A-F basis only.

**Credit Hours:** 3

#### CH_ENG 8001: Advanced Topics in Chemical Engineering
**Prerequisites:** instructor’s consent

#### CH_ENG 8029: Advanced Plasma Processing
Concepts and techniques in novel plasma processing: plasma characteristics, plasma sputtering, plasma enhanced chemical vapor deposition (PECVD), plasma etching, plasma treatment, plasma fabrication of nano-structured materials and diamondlike films, biomedical applications.

**Credit Hours:** 3

#### CH_ENG 8085: Problems in Chemical Engineering
Supervised investigation in chemical engineering to be presented in the form of a report.

**Credit Hour:** 1-5

**Prerequisites:** instructor’s consent

#### CH_ENG 8087: Seminar in Chemical Engineering
Reviews investigations and projects of importance in chemical engineering.

**Credit Hour:** 1

#### CH_ENG 8230: Advanced Ceramic Materials
(same as BIOL_EN 8230 and MAE 8230). To provide an advanced level understanding between processing, properties, and microstructure of ceramic materials. Topics include crystallography, defect chemistry, transport properties, microstructure, and forming methods. Graded on A-F basis only.

**Credit Hours:** 3

#### CH_ENG 8230: Plasma Polymerization
Fundamental aspects of polymer formation in plasma state: gas ionization, reaction kinetics, plasma characteristics and operational parameters of plasma reactors. Properties of plasma - synthesized ultrathin films and their utilization also discussed.

**Credit Hours:** 3

**Prerequisites:** CH_ENG 4319 or instructor’s consent

#### CH_ENG 8337: Advanced Mass Transfer
Advanced study of mass transfer.

**Credit Hours:** 3

**Prerequisites:** CH_ENG 4336 or instructor’s consent

#### CH_ENG 8338: Analysis of Equilibrium Stage Processes
Advanced study of stage processes.

**Credit Hours:** 3

**Prerequisites:** CH_ENG 2226, CH_ENG 3235 and CH_ENG 3262

#### CH_ENG 8429: Membranes and Membrane Processes
Thermodynamics and mass transfer of membrane separation processes; Concentration-Driven Processes; Pressure-Driven Processes; Electromembrane Processes; Biological Membrane Processes; Membrane Polymers; Preparation of Membranes; Membrane Separation Application (potable and ultrapure water, effluent treatment, gas separations, electrochemistry, dialysis therapeutic, and other applications).

**Credit Hours:** 3

#### CH_ENG 8451: Advanced Chemical Engineering Thermodynamics I
Advanced thermodynamics; particular reference to its application to chemical engineering.

**Credit Hours:** 3

**Prerequisites:** CH_ENG 3262 or instructor’s consent

#### CH_ENG 8463: Chemical Reaction Engineering Science
Phenomenological behavior of catalysts. Theoretical interpretations for heterogeneous and homogeneous catalysts.

**Credit Hours:** 3

**Prerequisites:** CH_ENG 4363

#### CH_ENG 8471: Process Optimization Methods in Chemical Engineering
Steady-state and unsteady-state optimization techniques applied to chemical processes.

**Credit Hours:** 3

**Prerequisites:** CH_ENG 2226

#### CH_ENG 8990: Research-Masters Thesis in Chemical Engineering
Independent investigation in chemical engineering, to be presented as a thesis. Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** Masters candidate

#### CH_ENG 9990: Research-Doctoral Dissertation in Chemical Engineering
Independent investigation in chemical engineering, to be presented as a thesis. Graded on a S/U basis only. candidate

**Credit Hour:** 1-99

**Prerequisites:** Ph.D
Chemistry (CHEM)

CHEM 1000: Introductory Chemistry
Introductory course for students with no high school background in chemistry. Covers fundamental principles of scientific measurement, stoichiometry, solutions, basic atomic structure, gases. No credit if taken after CHEM 1100.

Credit Hours: 2
Prerequisites or Corequisites: MATH 1100 or MATH 1120

CHEM 1100: Atoms and Molecules with Lab
One-semester introduction to the basic concepts and important applications of chemistry. Satisfies A&S requirement for a laboratory science. No credit if taken after CHEM 1310.

Credit Hours: 3
Prerequisites: Honors eligibility required

CHEM 1100H: Atoms and Molecules with Laboratory - Honors
One-semester introduction to the basic concepts and important applications of chemistry. Satisfies A&S requirement for a laboratory science. No credit if taken after CHEM 1310.

Credit Hours: 3
Prerequisites: Honors eligibility required

CHEM 1320: College Chemistry I
First of two-course sequence emphasizing principles and applications of modern chemical sciences. Covers chemical nomenclature, stoichiometry, kinetic molecular theory, atomic structure, periodic properties, and molecular structure and bonding. Satisfies laboratory science requirement. Math Reasoning Proficiency Course.

Credit Hours: 4
Prerequisites: MATH 1100 or MATH 1120 or equivalent

CHEM 1320H: College Chemistry I - Honors
First of a two-course sequence emphasizing principles and applications of modern chemical sciences. Covers chemical nomenclature, stoichiometry, kinetic molecular theory, atomic structure, periodic properties, and molecular structure and bonding. Satisfies laboratory science requirement. Math Reasoning Proficiency Course.

Credit Hours: 4
Prerequisites: MATH 1100 or MATH 1120 or equivalent. Honors eligibility required

CHEM 1330: College Chemistry II
Continuation of CHEM 1320. Covers intermolecular forces, solutions, kinetics, acid-base chemistry, electrochemistry, nuclear chemistry, thermodynamics. Satisfies requirement for a laboratory science. May be taken concurrently with CHEM 2030 or CHEM 2100.

Credit Hours: 4
Prerequisites: grade of C- or better in CHEM 1320 or CHEM 1320H

CHEM 1330H: College Chemistry II- Honors
Continuation of CHEM 1320H. Covers equilibria, kinetics, electrochemistry, nuclear chemistry, thermodynamics. Satisfies requirement for a laboratory science. May be taken concurrently with CHEM 2030 or CHEM 2100.

Credit Hours: 4
Prerequisites: grade of C- or better in CHEM 1320 or CHEM 1320H.
Honors eligibility required

CHEM 1500H: Honors Intensive General Chemistry with Lab - Honors
A one-semester, intensive introduction to chemistry for honors-eligible students that takes the place of CHEM 1320, CHEM 1330. Four lectures and one 3-hour lab period per week. Math Reasoning Proficiency Course.

Credit Hours: 5
Prerequisites: honors eligibility, college algebra and one year of high school chemistry or instructor’s consent

CHEM 2030: Survey of Organic Chemistry
One-semester introduction to structure and bonding, functional group chemistry, principles of reactivity, reaction mechanisms, the molecules of life.

Credit Hours: 3
Prerequisites: Grade of C or better in CHEM 1320 or CHEM 1320H or equivalent. Recommended CHEM 1330, or CHEM 1330 concurrently

CHEM 2100: Organic Chemistry I
First course of a two-semester sequence. Structure and bonding; chemistry of hydrocarbons, alkyl halides, alcohols and ethers; reaction mechanisms; principles of reactivity and synthesis; IR and NMR spectroscopy. Only 1 hour credit if taken after CHEM 2030 or equivalent. Prerequisites: grade of C or better in CHEM 1320 or equivalent or CHEM 1330 concurrently.

Credit Hours: 3
Recommended: CHEM 1330

CHEM 2110: Organic Chemistry II
Continuation of CHEM 2100. Aromatic hydrocarbons, carbonyls, amines; chemistry of carbanions; reactions of polar double bonds; nucleic acids, proteins, carbohydrates and fats.

Credit Hours: 3
Prerequisites: grade of C or better in CHEM 2100 or equivalent, or departmental consent

CHEM 2130: Organic Laboratory I
Basic lab techniques, functional group manipulations, and short syntheses. Pre-lab and post-lab writing assignments. 1 hour recitation, 3 hours lab per week.

Credit Hours: 2
Recommended: Concurrent enrollment in CHEM 2110 or CHEM 2030. No credit for students who have previous organic laboratory credit

CHEM 2140: Organic Laboratory II
Continuation of CHEM 2130. Preparation and identification of organic compounds; application of instrumental techniques. 2 lab sessions, 1 recitation session per week.

Credit Hours: 2
Prerequisites: grade of C or better in CHEM 2110 and CHEM 2130 or equivalent
CHEM 2160H: Honors Organic Chemistry I - Honors
First course of a two-semester sequence. Similar to CHEM 2100 but with increased depth and breadth; emphasis on preparing science students for research and professional careers. 3 lectures, 1 discussion session per week.

Credit Hours: 4
Prerequisites: honors eligibility, grade of B or better in CHEM 1320 or equivalent

CHEM 2170H: Honors Organic Chemistry II with Lab - Honors
Continuation of CHEM 2160H; includes laboratory. Content and structure similar to CHEM 2110, but with increased depth and breadth.

Credit Hours: 5
Prerequisites: honors eligibility, grade of B or better in CHEM 2160H or instructor’s permission

CHEM 2190H: Honors Organic Chemistry Laboratory - Honors
Preparation and identification of organic compounds; multistep syntheses; application of instrumental techniques, including NMR, FTIR, MS and HPLC. 2 lab sessions, 1 discussion session per week.

Credit Hours: 2
Prerequisites: honors eligibility, grade of C or better in CHEM 2170H or equivalent

CHEM 2400: Fundamentals of Inorganic Chemistry with Lab
A systematic introduction with laboratory to inorganic and organometallic compounds, reactions, and periodic properties.

Credit Hours: 3
Prerequisites: grade of C or better in CHEM 1330

CHEM 2950: Undergraduate Research in Chemistry
A laboratory research project and/or preparation of compounds with a written final report. Cannot be substituted for other chemistry courses required for a B.S. or B.A. degree. No more than 6 hrs. total credit.

Credit Hour: 1-3
Prerequisites: sophomore standing, 2.75 GPA and/or instructor’s consent

CHEM 3200: Quantitative Methods of Analysis with Lab
Principles and practice of quantitative analysis, including the basic principles of modern instrumental methods.

Credit Hours: 4
Prerequisites: CHEM 1330 or CHEM 1500H

CHEM 3300: Fundamentals of Physical Chemistry
Survey of physical chemistry. Satisfies physical chemistry prerequisite for BIOCHM 8430.

Credit Hours: 3
Prerequisites: MATH 1700, a course in organic chemistry; PHYSICS 1210 and PHYSICS 1220 or PHYSICS 2175, or PHYSICS 2176 concurrently

CHEM 3310: Physical Chemistry I
Lecture only. Topics include the kinetic theory of gases, chemical kinetics, thermodynamics and chemical equilibrium.

Credit Hours: 3
Prerequisites: one semester organic chemistry and PHYSICS 2175, PHYSICS 2176 and MATH 2300, or MATH 2300 concurrently

CHEM 3330: Physical Chemistry II
Continuation of CHEM 3310. Lecture only. Covers wave mechanics, bonding, molecular spectroscopy and statistical mechanics.

Credit Hours: 3

CHEM 3340: Physical Chemistry Laboratory
Credit Hours: 3
Prerequisites: Grade of C or better in CHEM 3200; CHEM 3330 or CHEM 3330 concurrently

CHEM 3700: Undergraduate Seminar in Chemistry
Methods for locating and presenting chemical information, data analysis techniques, professional issues.

Credit Hours: 3
Prerequisites: CHEM 1330 or CHEM 1500H; CHEM 2100 or CHEM 2160H

CHEM 3800: Internship in Chemistry
Cannot be substituted for other chemistry courses required for B.S. or B.A. degree.

Credit Hour: 1-6
Prerequisites: departmental consent

CHEM 3940: Service-Learning in Chemistry
A service-learning community outreach program affording chemistry students with an opportunity to enhance their problem-solving skills. May be repeated once for credit. Satisfies no specific chemistry degree requirements, nor Arts and Science general education requirements. Graded on a S/U basis only.

Credit Hours: 2
Prerequisites: departmental consent

CHEM 4001: Topics in Chemistry - General
Organized study designed to broaden the knowledge base of students. Subjects on analytical, inorganic, organic and physical chemistry covered.

Credit Hour: 1-99
Prerequisites: departmental consent

CHEM 4003: Topics in Chemistry - Natural Science
Organized study designed to broaden the knowledge base of students. Subjects on analytical, inorganic, organic and physical chemistry covered.

Credit Hour: 1-99
Prerequisites: departmental consent

CHEM 4010: Advanced Chemistry Laboratory
Advanced methods for the synthesis and characterization of organic, inorganic, and organometallic compounds.

</table>
CHEM 7300: Intermediate Physical Chemistry
Treatment of atomic and molecular, structure and spectroscopy based on quantum concepts. Designed to provide a broad base of knowledge in these fundamental areas to beginning graduate students in chemistry.

Credit Hours: 3
Prerequisites: departmental consent

CHEM 7400: Inorganic Chemistry
Atomic and molecular structure, bonding, kinetics and mechanism, ligand field theory, coordination compounds, acids and bases.

Credit Hours: 3
Prerequisites: one semester Physical Chemistry, second semester concurrently

CHEM 7490: Physics and Chemistry of Materials
(same as NU_ENG 7319, PHYSCS 7190 and BIOL_EN 7480). Undergraduate/graduate level course offered every winter semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper.

Credit Hours: 3
Prerequisites: PHYSCS 2760 and CHEM 1320 or equivalent and instructor’s consent

CHEM 8003: Topics in Chemistry - Natural Science
Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department.

Credit Hour: 1-99
Prerequisites: instructor’s consent

CHEM 8020: Introduction to X-ray Crystallography
Designed for students in chemistry and related fields. Aimed at offering a practical understanding of single-crystal x-ray structural studies. Includes hands-on laboratory work (data collection and analysis).

Credit Hours: 3
Prerequisites: instructor’s consent

CHEM 8050: Non-Thesis Research in Chemistry
Does not lead to dissertation.

Credit Hour: 1-99

CHEM 8085: Topics in Chemistry
Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department.

Credit Hour: 1-99
Prerequisites: instructor’s consent

CHEM 8087: Seminar in Chemistry
Seminar in Chemistry

Credit Hour: 1

CHEM 8090: Thesis/Dissertation (pre-candidacy) Research in Chemistry
Research leading to thesis. Graded on a S/U basis only.

Credit Hour: 1-99

CHEM 8120: Physical Organic Chemistry I
Bonding theory, physical methods, absorption spectroscopy, conformational analysis, mechanism of reactions.

Credit Hours: 3

CHEM 8130: Physical Organic Chemistry II
Case studies and methods for determining organic reaction mechanisms.

Credit Hours: 3

CHEM 8150: Organic Reaction Mechanisms
Organic reaction mechanisms are discussed within a framework of structure-reactivity relationships. Particular attention directed to the chemistry of reactive intermediates and the application of stereochemical and molecular orbital concepts.

Credit Hours: 3
Prerequisites: 1 year of Organic Chemistry and Physical Chemistry

CHEM 8160: Organic Spectroscopy
Structural analysis of organic compounds involving problem solving using modern NMR, IR, UV-VIS, MS CD/ORD and other spectroscopic techniques.

Credit Hour: 1-99
Prerequisites: CHEM 3330 or equivalent or instructor’s consent

CHEM 8170: Applications of the Reactions of Organic Chemistry
Credit Hours: 3
Prerequisites: CHEM 8150

CHEM 8210: Analytical Measurement
Fundamental and applied aspects of scientific measurements. Topics include: Statistics, signal-to-noise, frequency analysis, sources of noise, digital and analog filtering, time vs. frequency domain measurements, Fourier transformation, sampling, convolution/deconvolution, autocorrelation and cross-correlation. Directed toward entering graduate students.

Credit Hours: 3

CHEM 8230: Separations and Chromatography
Classical and instrumental methods of separation: gas, paper, thin film, and column chromatography; ion exchange.

Credit Hours: 3

CHEM 8240: Mass Spectrometry
This course will cover various aspects of modern mass spectrometry. Topics will include instrumentation, theory, uses and interfaces to mass spectrometry. Graded on A-F basis only.

Credit Hours: 3

CHEM 8250: Analytical Spectroscopy
Selected topics dealing with recent advances in analytical chemistry.

Credit Hours: 3

<td>Continuation of CHEM 8250.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>CHEM 8280</td>
<td>Bioanalytical Chemistry</td>
<td>This course is aimed at introducing students to the instrumental and theoretical principles by which biological molecules are measured in vivo and in vitro. The course explores how protein, DNA and metabolite structures and quantities are determined in the laboratory with an emphasis on understanding historical methods up through cutting edge approaches in each field. The theory of measurement techniques, separation techniques and related instrumentation are explored in the context of understanding the chemical equilibria that govern each instance. Students will leave this course with a broad understanding for how many biological molecules are measured and what the limitations of various techniques may be. Graded on A-F basis only.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>CHEM 8285</td>
<td>Nanochemistry</td>
<td>Covers various aspects of nanochemistry. Topics include synthesis and characterization of nonmaterial, nanotoxicity, and catalysis. Graded on A-F basis only.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>CHEM 8300</td>
<td>Advanced Physical Chemistry</td>
<td>Advanced Physical Chemistry</td>
<td>3</td>
<td></td>

<tr>
<td>CHEM 8310</td>
<td>Quantum Chemistry</td>
<td>Introduction to formal quantum mechanical theory, quantum measurement, simple model problems having exact solutions, angular momenta, approximation methods (perturbation theory, variation principle, WKB), and the structure of many-electron atoms.</td>
<td>3</td>
<td>CHEM 3330 or equivalent or instructor’s consent</td>
</tr>
<tr>
<td>CHEM 8320</td>
<td>Chemical Kinetics</td>
<td>Factors affecting rates, orders and mechanisms of chemical reactions, with emphasis on current theories and experimental techniques.</td>
<td>3</td>
<td>CHEM 3330 or equivalent or instructor’s consent</td>
</tr>
<tr>
<td>CHEM 8330</td>
<td>Computational Chemistry</td>
<td>Theory and application of modern computational techniques (molecular mechanics, ab initio and semiempirical molecular orbital methods) for predicting the structures, energies, and properties of molecules and molecular systems.</td>
<td>3</td>
<td>CHEM 3330 or equivalent or instructor’s consent</td>
</tr>
<tr>
<td>CHEM 8340</td>
<td>Statistical Mechanics</td>
<td>Principles of statistical mechanics and their application to chemical systems; ensemble theory; condensed phases.</td>
<td>3</td>
<td>CHEM 3330 or equivalent or instructor’s consent</td>
</tr>
<tr>
<td>CHEM 8350</td>
<td>Magnetic Resonance</td>
<td>Basic principles of nuclear magnetic resonance (NMR) and electron spin resonance (ESR), nuclear spin relaxation, current experimental techniques and the application to studies of structures, dynamics and chemical analysis.</td>
<td>3</td>
<td>One year of organic chemistry, CHEM 3300 or equivalent</td>
</tr>
<tr>
<td>CHEM 8400</td>
<td>Inorganic Mechanisms</td>
<td>Experimental stoichiometry and rate law determination. Isotopic applications. Methods and results of fast reaction studies. Basic known inorganic mechanisms. Experimental methods of establishing mechanisms of reaction.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>CHEM 8410</td>
<td>Chemistry of the Main Group Elements</td>
<td>Descriptive inorganic chemistry of the main group elements. Textbook material extensively supplemented with information from the current chemical literature.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>CHEM 8420</td>
<td>Supramolecular Chemistry</td>
<td>The basics of supramolecular chemistry will be covered, including host-guest complexes, reorganization, complementarily, thermodynamic interactions, self assembly and biochemical, molecular device and crystal engineering applications. Graded on A-F basis only.</td>
<td>3</td>
<td>BS in Chemistry, Biochemistry or Chemical Engineering</td>
</tr>
<tr>
<td>CHEM 8430</td>
<td>Coordination Chemistry and Reactivity</td>
<td>The chemistry of the transition elements (d-block) and their reactivity will be discussed, including bonding, coordination numbers, oxidation states, and reactivity (kinetics). Graded on A-F basis only.</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>
Prerequisites: CHEM 4400 or equivalent; graduate standing in chemistry or instructor’s consent.

CHEM 8440: Inorganic Structural Methods
Chemical bonding, application of group theory, spectroscopy; diffraction as applied to structure determination; structural implications of dipole moment and magnetic susceptibility measurements.
Credit Hours: 3

CHEM 8450: Organometallics
Condensations effected by organometallics; dissolving metal reductions; sandwich compounds and related organotransition metal derivatives.
Credit Hours: 3

CHEM 8460: Solid State Chemistry
Credit Hours: 3

CHEM 8470: Actinide Chemistry
The course covers the inorganic and organometallic chemistry of the actinides. Graded on A-F basis only.
Credit Hours: 3

CHEM 8480: Chemistry of Nanomaterials
This course will cover several aspects of nanomaterials including synthesis and processing of small particles, as well as their characterization by crystallography, scanning tunneling microscopy magnetism, and other optical properties. Also studied will be the application of quantum confinement to the electronic and optical properties of nanomaterials and the development of photonic materials. The nanostructure of organic polymers, micelles, and the process of biomineralization to make organic-inorganic hybrid materials will also be discussed.
Credit Hours: 3

CHEM 8600: Radiochemistry and Detection with Lab
An introductory course in the applications of radionuclides in chemistry. Topics include radioactive decay, interactions of radiation with matter, radioactive tracers, and nuclear methods of analysis. Directed towards entering graduate students.
Credit Hours: 3

CHEM 8620: Nuclear Chemistry
Designed for graduate students in chemistry and related fields. Studies nuclear reaction and nuclear properties.
Credit Hours: 3
Prerequisites: CHEM 3300, MATH 2300 or instructor’s consent

CHEM 8630: Radiopharmaceutical Chemistry
The radiotracer concept, history of nuclear medicine, radionuclide production, organic and inorganic chemistry of radiopharmaceutical chemistry, and applications will be discussed. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: undergraduate organic and inorganic chemistry; graduate standing in chemistry or instructor’s consent

CHEM 8640: Biological Radiochemistry
Covers the interaction of radiation on biological material. The effects of radiation overdose is discussed along with the use of radiation in therapy. Graded on A-F basis only.
Credit Hours: 3

Child Health (CH_HTH)

CH_HTH 6000: Child Health Clerkship
Child Health Clerkship
Credit Hour: 6-10

CH_HTH 6010: Rural Child Health Clerkship
Rural Child Health Clerkship
Credit Hours: 6

CH_HTH 6100: Remediation 6000 Child Health Clerkship
Child Health Clerkship remediation.
Credit Hours: 6
Prerequisites: 6000 Child Health Clerkship, received unsatisfactory grade

CH_HTH 6221: Advanced Biomedical Science Medicine Problem Premature Infant
Advanced Biomedical Science Medicine Problem Premature Infant
Credit Hours: 5

CH_HTH 6223: ABS Child Health Research
ABS Child Health Research
Credit Hour: 5-10

CH_HTH 6225: ABS Child Health Research and Review
ABS Child Health Research and Review
Credit Hour: 5-10
CH_HTH 6425: Child Health Genetics
Goals/Objectives: To develop an understanding of medical genetics, including genetic diagnosis, cytogenetics, metabolic genetic diseases, teratology, and the genetics literature, and computer databases.
CURRICULUM: During the block, each student will see patients in consultation and in the genetics clinics (general genetics, metabolic, PKU, autism, Down Syndrome, outreach) where they will work up the patients and prepare a report and discussion of the diagnosis or diagnostic differential. Each student will also prepare a literature review around a specific patient or problem. For interested students, cytogenetics or metabolic problems are available. Prerequisites: Child Health clerkship
Credit Hours: 5

CH_HTH 6426: Child Health Infectious Disease
Child Health Infectious Disease
Credit Hours: 5

CH_HTH 6427: Pediatric Hematology/Oncology
Pediatric Hematology/Oncology
Credit Hours: 5

CH_HTH 6428: Pediatric Diabetes and Endocrinology
Goals/Objectives: 1) To understand the pathophysiology of endocrine and metabolic diseases in childhood. 2) To understand the fundamentals of growth processes in infancy, childhood, and adolescence.
CURRICULUM: The Department of Child Health has a large patient care and research program for children with diabetes mellitus. In addition, the Department has a busy general endocrinology program. Thus, students on the elective can participate in the care of patients with a wide spectrum of endocrine and metabolic diseases. Students can carry out specific clinical or laboratory projects relating to specific aspects of either diabetes or endocrine disease, deepen their understanding of pathophysiology of disease and gain a better understanding of the impact of a chronic disorder on the child and his/her family.
Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6429: Developmental Pediatrics
Developmental Pediatrics
Credit Hours: 5

CH_HTH 6430: Pediatric Cardiology
Goals/Objectives: Clinical and laboratory material is available to achieve the following objectives: 1) Develop skills in auscultation, resuscitation, treatment of congestive heart failure, and recognition of congenital heart disease in infants. 2) Adequate exposure to pediatric electrocardiography, echocardiography, cineangiography, and interpretation of cardiac catheterization data. 3) Proficiency in the management of postoperative cardio-vascular patients.
Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6431: Pediatric Pulmonology
Goals/Objectives: To gain experience in the treatment of asthma, bronchopulmonary dysplasia, cystic fibrosis, sleep disorders, and other respiratory diseases and to learn about pulmonary function testing in children.
Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6432: Pediatric Gastroenterology
Goals/Objectives: 1) Gain experience in GI diseases of children noting the difference and similarities with adult diseases. 2) To introduce the student to some of the most commonly encountered diagnoses in pediatrics and to its management. 3) To learn to focus on physical diagnosis skills. CURRICULUM: Preceptorship with a pediatric subspecialist for four weeks will include inpatient and outpatient service activities.
Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6433: Child Health Sports Medicine
Child Health Sports Medicine
Credit Hours: 5

CH_HTH 6434: Child Adolescent Medicine
Goals/Objectives: To teach 4th year students the intricacies of care of the adolescent patient. Specifically, the rotation will address the adolescent interview, important considerations in the adolescent “check-up”, and managing the varied problems in adolescents, from attention deficit disorder to eating disorders and gynecological issues. The student will leave the rotation with a better understanding of the care of adolescents. CURRICULUM: These objectives will be met in the following manner: 1) Student will actively participate in adolescent medicine clinic with both clinical attendings. He/she will be responsible for the initial evaluation of the patients in the clinic, will actively participate in clinical decision-making, and will be responsible for helping with patient write-ups and referral letters (at the discretion of the attending). The student will be expected to function on an extern level, following up on laboratory evaluations and checking in with patients seen, when needed. 2) The student will participate in the adolescent interview practice sessions with the interact teen theatre with the residents on the rotation. This process will help to improve interviewing skills with adolescents. 3) The student will be responsible for helping with any inpatient care, including consultations and/or admissions. 4) The student will be asked to identify particular areas of interest to be used as topics for interactive discussion with one of the attendings or for a short paper.
Credit Hours: 5

CH_HTH 6435: Ped Renal and Rheumatology
4th year elective for renal/rheumatology rotation, four weeks.
Credit Hours: 5
Prerequisites: 3rd year Pediatrics/Child Health or Internal Medicine rotation
CH_HTH 6706: Internal Medicine Hematology and Medical Oncology Rural Elective
The student will work as part of a team providing hands-on clinical services in a rural outpatient setting. Students will participate in daily morning report and other didactic sessions provided by the rotation site. Students will learn using a variety of evidence-based resources, direct observations and demonstration.

Credit Hours: 5
Prerequisites: CH_HTH 6002; restricted to medical students only

CH_HTH 6725: Developmental Pediatrics - Rural
Rural developmental pediatrics general elective.

Credit Hours: 5
Prerequisites: CH_HTH 6000; Restricted to fourth year medical students

CH_HTH 6726: Child Health Rural Elective
Students will enhance their knowledge about patient-centered care of children through active participation in a primarily outpatient clinical experience. Limited inpatient experience may be offered as well.

Credit Hours: 5
Prerequisites: CH_HTH 6000; restricted to medical students only

CH_HTH 6825: General Child Health - Inpatient
Goals/Objectives: To provide additional experience in general pediatrics in inpatient care. CURRICULUM: The student will function as a member of the house staff team assuming many of the roles of the first year resident in patient care. This includes working up of patient’s management plans, rounding, staffing, conferences, etc. Night coverage with supervision is included.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6826: General Child Health - Outpatient
Goals/Objectives: To provide additional experience in general pediatrics in outpatient care. CURRICULUM: The student will function as a member of the healthcare team. This includes taking histories, performing physical exams, and working up patient management plans. This may require working evening clinic and Saturday clinic in addition to regular daytime clinics.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6827: Neonatology/Neonatal Intensive Care Unit
Goals/Objectives: To gain experience: 1) in the evaluation, diagnosis, and management of sick newborns, and 2) in the performance of specialized procedures necessary for ICU care. CURRICULUM: The student will function as a first-year house officer, with his/her own neonatal ICU patients for initial work-up and management, under the supervision of the PL-2 or PL-3 and attending staff. (rotation at Columbia Regional Hospital)

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6828: Pediatric Intensive Care Unit
Goals/Objectives: 1) To provide the student with the initial approach and management of children requiring care in the Pediatric Intensive Care Unit. 2) To provide the student with the basics of airway management in children. 3) To provide the student with an understanding of the preoperative assessment with preparation of pediatric patients. 4) To provide the student with an introduction to the perioperative management of common pediatric surgical problems. CURRICULUM: Students in this elective will spend time in both the Pediatric ICU and the operating rooms. They will be required to participate in daily rounds in the PICU and follow the medical/surgical patients admitted to the PICU.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6829: Pediatric Neurology
Pediatric Neurology

Credit Hours: 5

Chinese (CHINSE)

CHINSE 1100: Elementary Chinese I
For beginners with no prior knowledge of Chinese. Five hours of classroom instruction, with one hour lab work weekly.

Credit Hours: 6

CHINSE 1200: Elementary Chinese II
Five hours of classroom instruction, with one hour lab work weekly.

Credit Hours: 6
Prerequisites: C- or better in CHINSE 1100 or equivalent

CHINSE 2001: Undergraduate Topics in Chinese-General
Organized study of selected topics. Subjects and credits may vary from semester to semester.

Credit Hour: 1-3

CHINSE 2005: Undergraduate Topics in Chinese - Humanities
Organized study of selected topics. Subjects and credits may vary from semester to semester. No knowledge of Chinese required. No language credit.

Credit Hour: 1-3

CHINSE 2100: Everyday Spoken Chinese Level I
Reinforces and extends ability to use Chinese language for spoken communication. Studies situation-specific Chinese in real-life situations. Intended to supplement, not replace, Chinese language courses taught on MU campus.

Credit Hours: 3
Prerequisites: CHINSE 1200. Restricted to students enrolled in MU China Study Abroad

CHINSE 2160: Intermediate Chinese I Conversation and Composition

Credit Hours: 3
Prerequisites: C- or better in CHINSE 1200 or equivalent
CHINE 2310: Chinese Civilization I
Survey of Chinese culture and arts. No knowledge of Chinese is required. No foreign language credit.

Credit Hours: 3

CHINE 2330: Chinese Language and Culture
Presents information about the development of Chinese language over time, the variety of dialects spoken in China, and around the world. Explores relationship between Chinese language and culture. Considers different genres of Chinese literature. Visits to sites significant to development of Chinese language and literature. Introduction to calligraphy and basic daily Chinese.

Credit Hours: 3
Prerequisites: Must be enrolled in MU China Study Abroad; sophomore standing required

CHINE 3001: Topics in Chinese - General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: Sophomore standing and instructor consent

CHINE 3005: Topics in Chinese - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Some sections may be graded on A-F or S/U basis only.

Credit Hour: 1-3
Prerequisites: sophomore standing and instructor’s consent

CHINE 3005H: Topics in Chinese - Humanities - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Some sections may be graded on A-F or S/U basis only.

Credit Hour: 1-3
Prerequisites: sophomore standing and instructor’s consent, Honors eligibility required

CHINE 3085: Problems in Chinese
Supervised study in Chinese language and/or culture.

Credit Hour: 1-3
Prerequisites: instructor’s consent

CHINE 3160: Intermediate Chinese II Conversation and Composition
Continuation of CHINE 2160. Introduces more complex grammatical constructions and extends ability to use those constructions for written and oral communication. Successful completion of course will enable students to communicate in Mandarin Chinese regarding everyday topics, with a vocabulary of just over 1900 words, and about 380 sentence patterns.

Credit Hours: 3
Prerequisites: C- or higher in CHINE 2160, or instructor’s consent

CHINE 3170: Everyday Spoken Chinese Level II
For students who have completed 18 credits college-level Chinese. Reinforces and extends ability to use Chinese language for Spoken communication. Class-time spent studying situation-specific Chinese in real-life situations. Intended to supplement, not replace, Chinese language courses taught on UMC campus.

Credit Hours: 3
Prerequisites: CHINE 3160 or consent of instructor. Restricted to students enrolled in the MU China Study Abroad

CHINE 3180: Advanced Chinese I
Improves vocabulary, listening, spoken and written Chinese Skills. Discusses basic cultural ideas. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C- or higher in CHINE 3160, or equivalent

CHINE 3300: Chinese Traditions and Global Integration
Focuses on developments in China’s International relations that have led to prominence on world stage, and the impact of modernization and integration into world community on China’s sense of national identity, shape of Chinese culture, and lives of the people. Visits to cultural and business sites, guest lectures, and conversations with Chinese people.

Credit Hours: 3
Prerequisites: Must be enrolled in MU China Study Abroad; sophomore standing required

CHINE 3300H: Chinese Traditions and Global Integration - Honors
Focuses on developments in China’s International relations that have led to prominence on world stage, and the impact of modernization and integration into world community on China’s sense of national identity, shape of Chinese culture, and lives of the people. Visits to cultural and business sites, guest lectures, and conversations with Chinese people.

Credit Hours: 3
Prerequisites: Must be enrolled in MU China Study Abroad; sophomore standing required. Honors eligibility required

CHINE 3310: Chinese Poetry
This is an introductory course to Chinese poetry, both classical and contemporary, in English. It will explore issues in the intercultural and interlingual interpretation of foreign literature through the study of Western translations of and scholarship on selected Chinese poets.

Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent

CHINE 3320: Modern and Contemporary Chinese Fiction (in translation)
Studies Chinese fiction from 1920s to 1990s. Preceded by a brief historical survey of Chinese literature. Analyzes works by authors like Lu Xun, Ba Jin, Lao She, Wang Meng and many others of the younger generation. Readings and lectures in English.

Credit Hours: 3
CHINSE 3400: Negotiating Chinese Culture
As political, business, religious, and personal encounters between Chinese and Americans increase, so also does the need for competence in negotiating these cross-cultural interactions. Whether hosting Chinese guests, visiting China for business or as a scholar, or simply trying to understand current events, a clear understanding of cultural differences and similarities can be quite valuable. Students will be introduced to multiple perspectives on American and Chinese cultural differences along with narratives of cross-cultural experiences. Course address issues related to American and Chinese cross-cultural communication in five spheres of interaction: political, religious, business, interpersonal, education. Through related readings, discussions, and structured conversations with Chinese, students will explore how this information and a deeper understanding of Chinese and American culture can be applied to more fruitful and positive cross-cultural interactions in multiple contexts.
Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent

CHINSE 3880: Contemporary Chinese Film
(same as FILM_S 3880). Introduces development of 20th century Chinese film and popular genres, including review of earlier times. Explores how present day Chinese understand their own history, and issues they face in drive toward modernization in a global context. Films and readings in English or with English subtitles. No previous knowledge of the culture or language required.
Credit Hours: 3
Prerequisites: sophomore standing

Civil Engineering (CV_ENG)

CV_ENG 1000: Introduction to Civil Engineering
Introduces various aspects of Civil Engineering practice. May be repeated one time for credit.
Credit Hour: 1

CV_ENG 1001: Experimental Course
For freshman-level students. Content and number of credit hours to be listed in Schedule of Courses.
Credit Hour: 1-99

CV_ENG 2001: Experimental Course
For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.
Credit Hour: 1-99

CV_ENG 2080: Introduction to Dynamics
Basic fundamentals of particle and rigid body dynamics; energy and momentum methods.
Credit Hours: 3
Prerequisites: ENGINR 1200

CV_ENG 3001: Fundamental Topics in Civil Engineering
Special engineering topics for undergraduate students.

CV_ENG 3100: Decision Methods for Civil Engineering Design
Essential features of civil engineering including the design process, design teams, experimental and computational tools, engineering economy, communication skills, and ethical considerations.
Credit Hours: 3
Prerequisites: grade of C- or better in ENGLISH 1000
Corequisites: ENGINR 1200

CV_ENG 3050: Introduction to Geographic Information Systems GIS
(same as GEOG 3040) Introduces theory, concepts and techniques related to the creation, manipulation, processing, and basic analysis of spatial data using GIS. Data management, current data models, GIS applications and course topics are reinforced through hands-on computer laboratory exercises.
Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent

CV_ENG 3010: Fundamentals of Transportation Engineering
Covers fundamentals of transportation engineering including geometric design, traffic engineering, pavements, and planning.
Credit Hours: 4
Prerequisites: grade of C- or better in ENGINR 1100
Corequisites: CV_ENG 3010

CV_ENG 3200: Fundamentals of Environmental Engineering
Fundamentals of water quality engineering and water resources, water and wastewater treatment, solid and hazardous and radioactive waste management, air pollution, environmental regulation, and environmental ethics.
Credit Hours: 4
Prerequisites: grade of C- or better in CHEM 1320 or equivalent
Corequisites: CV_ENG 3010

CV_ENG 3250: Pollutant Fate and Transport
(same as ENV_SC 3250). Introduction to concepts governing pollutant fate and transport in the environment, including pollutant interactions within and migration through environmental systems, as well as analytical techniques and tools necessary to quantify conditions and movement.
Credit Hours: 3
Prerequisites: ENV_SC 1100 or SOIL 2100 or CV_ENG 3200; and CHEM 1320; or instructor’s permission

CV_ENG 3300: Structural Analysis I
Analysis of statically determinate beams, frames; shear and moment diagrams; influence line diagrams; beam deflections. Analysis of statically indeterminate structures; moment distribution; energy methods. Introduction to matrix analysis.
Credit Hours: 4
Prerequisites: grade of C- or better in ENGINR 1200 and ENGINR 2200
CV_ENG 3312: Reinforced Concrete Design
Basic principles of reinforced concrete design. Design of beams for flexure and shear; design of short and slender columns. Prerequisites: CV_ENG 3300;
Credit Hours: 3
Corequisites: CV_ENG 3600

CV_ENG 3313: Structural Steel Design
Basic principles of structural steel design. Design of beams, axially loaded members, columns, and bolted and welded connections.
Credit Hours: 3
Corequisites: CV_ENG 3300 and CV_ENG 3600

CV_ENG 3400: Fundamentals of Geotechnical Engineering
Detailed study of physical and mechanical properties of soil governing its behavior as an engineering material.
Credit Hours: 4
Prerequisites: grade of C- or better in ENGINR 2200 and GEOL 1150

CV_ENG 3600: Civil Engineering Materials
Introduces composition, structure, properties, behavior, and selection of civil engineering materials. Prerequisites: grade of C- or better in ENGINR 2200 or instructor’s consent;
Credit Hours: 4
Corequisites: CV_ENG 3010

CV_ENG 3700: Fluid Mechanics
Statics and dynamics of fluids, principles of continuity, momentum and energy, pipe flow.
Credit Hours: 3
Prerequisites: grade of C- or better PHYSCS 2750

CV_ENG 3702: Hydrology
Fundamental concepts of hydrology in engineering; quantitative estimation of stream-flow magnitude and frequency, and open channel flow considerations from stream-flow. Fluid Mechanics lab with lab reports.
Credit Hours: 4
Prerequisites: grade of C- or better MATH 2300 and CV_ENG 3200 and CV_ENG 3700

CV_ENG 4001: Topics in Civil Engineering
Study of current and new technical developments in civil engineering.
Credit Hour: 1-3
Prerequisites: instructor’s consent

CV_ENG 4006: Digital Computer Applications in Engineering
Use of digital computer for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, differentiation, and differential equations. Prerequisites: MATH 2300
Credit Hours: 3

CV_ENG 4008: Risk and Reliability for Civil Engineers
This course focuses on how to use probability and statistics to quantify uncertainties and consider risks when making civil engineering decisions and designing civil engineering systems.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3010 or other introductory probability/statistics course

CV_ENG 4080: Advanced Surveying
Celestial observations for determination of position; state coordinate systems, precise surveys, introduction to geodetic surveys, principles of photogrammetry. Theory of optical surveying instruments.
Credit Hours: 3
Prerequisites: MATH 1500

CV_ENG 4085: Problems in Civil and Environmental Engineering
Directed investigation of civil engineering.
Credit Hour: 2-4
Prerequisites: instructor’s consent

CV_ENG 4100: Traffic Engineering
Characteristics and studies associated with highway traffic. Capacity analysis and evaluation of freeways, rural highways, and urban streets. Traffic signal control and coordination.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4102: Infrastructure Management
Civil infrastructure condition assessment, performance modeling, deterioration processes and models, maintenance and rehabilitation strategies, management techniques, data analysis, management systems, financing, case studies, emerging technologies.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4103: Planning and Geometric Design of Highways
Techniques of highway planning in rural and urban areas. Design of the visible elements of highways.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4104: Pavement Materials and Design
Properties of materials used in roads, airports and other pavement construction. Design methods for rigid and flexible pavements.
Credit Hours: 3
Prerequisites: grade of C- or better in ENGINR 2200

CV_ENG 4106: Intelligent Transportation Systems
This is an introductory course in Intelligent Transportation Systems (ITS). Topics include the theory of transportation networks and systems optimization, current implementations of ITS, and practical issues and implications of ITS.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3100
CV_ENG 4108: Bicycle and Pedestrian Transportation
This course teaches how to integrate pedestrian and bicyclist accommodations into the planning and design of transportation facilities. Topics include bicyclist safety, accommodation at intersections, traffic calming techniques and facility design.

Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4110: Transportation Simulation
Theory and application of simulation in transportation engineering.

Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4120: Airport Engineering
Airport systems planning, design, and management.

Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3010

CV_ENG 4125: Transportation Legal Issues
This course discusses some of the legal issues that transportation engineers encounter throughout the course of their careers.

Credit Hours: 3
Prerequisites: CV_ENG 3010

CV_ENG 4130: Transportation Safety
This course is an introduction to transportation safety. The focus will be on surface transportation. The student is expected to analyze safety data and to devise engineering solutions to safety problems.

Credit Hours: 3
Prerequisites: CV_ENG 3010

CV_ENG 4145: Civil and Environmental Engineering Legal Issues
Discussion of legal issues facing civil engineers including right of way, risk and liability, environment, financing public works, contracting and ethics.

Credit Hours: 3
Prerequisites: CV_ENG 3010

CV_ENG 4155: Transportation Geography
(same as GEOG 4850). Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.

Credit Hours: 3

CV_ENG 4175: The Geospatial Science in National Security
(Same as GEOG 4130). This course explores the critical contribution of the geospatial sciences in the collection processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.

Credit Hours: 3
Prerequisites: junior standing or above required; instructor’s consent

CV_ENG 4185: Location Analysis/Site Selection
(same as GEOG 4740). An overview of location analysis in regional planning and spatial decision support, this course focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. Maybe be repeated for credit.

Credit Hours: 3

CV_ENG 4190: Infrastructure Project Development
Students will learn how the key elements of major civil engineering infrastructure projects fit together. The course will focus on the horizontal integration of: financing - planning - environment - right of way - design - construction - operations - maintenance. Engineering is important but so are a lot of other things. Graded on A-F basis only. Prerequisites: junior standing

Credit Hours: 3

CV_ENG 4200: Remote Sensing of the Environment
Principles, characteristics and applications of remote sensing in engineering, geosciences, agriculture and environmental projects. Topics: basic concepts, photographic, thermal multispectral and microwave systems, satellite remote sensing and digital image processing.

Credit Hours: 3
Prerequisites: junior standing

CV_ENG 4210: Solid Waste Management
Engineering principles involved in generation, handling, collection, transport, processing, and disposal of solid wastes, resource recovery and reuse, legislation on solid wastes and groundwater contamination problems.

Credit Hours: 3
Prerequisites: junior standing

CV_ENG 4220: Hazardous Waste Management
(same as CH_ENG 4220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination.

Credit Hours: 3

CV_ENG 4230: Introduction to Water Quality
Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineered systems for the distribution, collection and treatment of water and wastewater.

Credit Hours: 3
Prerequisites: junior standing

CV_ENG 4232: Water and Wastewater Treatment Facilities
Physical, chemical, and biochemical processes for treating drinking water supplies and wastewaters (domestic and industrial), with emphasis on planning and design of such facilities.

Credit Hours: 3
Prerequisites: CV_ENG 4230 or CV_ENG 7230 or instructor’s consent
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
<th>Credit Hours</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>CV_ENG 4240</td>
<td>Water Quality Analysis</td>
<td>Chemical, physical and biological methods for analysis of streams, lakes, wastewaters and water supplies and their use in water quality management.</td>
<td>3</td>
<td>Prerequisites: grade of C- or better in CV_ENG 4230 or instructor’s consent</td>
</tr>
<tr>
<td>CV_ENG 4250</td>
<td>Environmental Regulatory Compliance</td>
<td>(cross-leveled with CV_ENG 4250). Systems of water law; provisions of major federal environmental laws and regulations; development of regulations at the federal, state, and local levels; regulatory frameworks; permits; and enforcement.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>CV_ENG 4260</td>
<td>Environmental Public Policy</td>
<td>Engineering and economic aspects of environmental policy. Basic understanding of environmental statutes and case law.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>CV_ENG 4270</td>
<td>Environmental Engineering Microbiology</td>
<td>Theory and application of fundamental principles of microbiology, ecology, and aquatic biology of the microorganisms of importance to sanitary engineers.</td>
<td>3</td>
<td>Prerequisites: senior standing or instructor’s consent</td>
</tr>
<tr>
<td>CV_ENG 4285</td>
<td>Pollution Prevention: Applied Engineering for Sustainable Business Practices</td>
<td>Identify, analyze and solve energy, water and raw materials inefficiencies common to industrial processes and facilities. Graded on A-F only basis.</td>
<td>3</td>
<td>Prerequisites: PHYSCS 2760, MATH 2300, CHEM 1320, ENGINR 2300 or equivalent. Restricted to Juniors and Seniors</td>
</tr>
<tr>
<td>CV_ENG 4290</td>
<td>Wastewater Treatment and Process Design</td>
<td>Selection and use of wastewater and sludge treatment processes, disposal methods, sustainable wastewater treatment including anaerobic treatment of wastewater reuse.</td>
<td>3</td>
<td>Prerequisites: grade of C- or better in CV_ENG 3200. Instructor’s consent required</td>
</tr>
<tr>
<td>CV_ENG 4300</td>
<td>Advanced Structural Steel Design</td>
<td>(cross-leveled with CV_ENG 7300). Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections.</td>
<td>3</td>
<td>Prerequisites: grade of C- or better in CV_ENG 3313</td>
</tr>
<tr>
<td>CV_ENG 4302</td>
<td>Prestressed/Advanced Reinforced Concrete</td>
<td>Principles of prestressing. Constituent materials, loading and allowable stresses. Working and ultimate stress analysis and design. Shear and torsion. Deflections. Prestress losses. Continuous beams. Composite beams. Compression members. Footings.</td>
<td>3</td>
<td>Prerequisites: grade of C- or better in CV_ENG 3400 or instructor’s consent</td>
</tr>
<tr>
<td>CV_ENG 4310</td>
<td>Structural Design and Analysis</td>
<td>Design and analysis of building frames and bridges in steel and concrete using case studies. Economic selection of structural type and material. Basic methods of analysis for statically indeterminate structures.</td>
<td>3</td>
<td>Prerequisites: grade of C- or better in CV_ENG 4300</td>
</tr>
<tr>
<td>CV_ENG 4320</td>
<td>Energy Methods in Mechanics</td>
<td>Variational mechanics including practical examples. Topics include calculus of variation of boundary value problems, energy methods such as Ritz and Galerkin methods, approximate solutions methods such as the finite element and finite difference, and eigenvalue problems.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>CV_ENG 4330</td>
<td>Structural System Design</td>
<td>Design of buildings in steel and reinforced concrete, including estimation of loads and design of gravity and lateral force resisting systems.</td>
<td>3</td>
<td>Prerequisites: grade of C- or better in CV_ENG 3312 and CV_ENG 3313</td>
</tr>
<tr>
<td>CV_ENG 4350</td>
<td>Matrix Methods of Structural Analysis</td>
<td>An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the STRUDL and NASTRAN programs to three dimensional structures.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>CV_ENG 4360</td>
<td>Bridge Engineering</td>
<td>Review of Highway Bridge Analysis and Design Fundamentals. Study of Influence Line Diagrams and Shear and Moment Envelopes; Design of Medium- and Short-Span Girder Bridges based on AASHTO LRFD specs.</td>
<td>3</td>
<td>Prerequisites: grade of C- or better in CV_ENG 3312 and CV_ENG 3313</td>
</tr>
<tr>
<td>CV_ENG 4404</td>
<td>Geotechnical Earthquake Engineering</td>
<td>This course provides an introduction to geotechnical aspects of earthquake engineering. Topics include: basic seismology, seismic hazard analysis, dynamic soil properties, site response analysis and soil liquefaction.</td>
<td>3</td>
<td>Prerequisites: grade of C- or better in CV_ENG 3400 or instructor’s consent</td>
</tr>
</tbody>
</table>
CV_ENG 4406: Geotechnics of Landfill Design
This course will focus on geotechnical and construction aspects in the analysis, design and construction of waste containment facilities (landfills) including expansions of existing facilities.
Credit Hours: 3
Prerequisites: instructor’s consent

CV_ENG 4410: Foundation Engineering
Subsurface exploration. Design of basic foundation structures, shallow foundations, retaining walls, deep foundations.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3400

CV_ENG 4412: Applied Geotechnical Engineering
Study of concepts, theories, and design procedures for modern earthwork engineering including: compaction and densification of soils and soil improvement, seepage and drainage, slope stability and performance, and earth retaining structures.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3400

CV_ENG 4450: Introduction to Construction Management
Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques.
Credit Hours: 3
Prerequisites: junior standing

CV_ENG 4600: Advanced Mechanics of Materials
(same as MAE 4600; cross-leveled with CV_ENG 7600 and MAE 7600). Analysis of more complicated problems in stresses, strains.
Credit Hours: 3
Prerequisites: grade of C- or better in ENGINR 2200

CV_ENG 4610: Sensors and Experimental Stress Analysis
Sensors and instrumentation for stress analysis, mechanical measurement and health monitoring of civil structures. Application and design of data acquisition systems, basic digital signal processing. Electronics and instrumentation circuits.
Credit Hours: 3
Prerequisites: grade of C- or better in ENGINR 2200 and PHYSCS 2760

CV_ENG 4660: Vibration Analysis
(same as MAE 4660). Vibration theory with application to mechanical systems.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 2080 and MATH 4100

CV_ENG 4692: Introduction to Structural Dynamics
Theory of structural response to dynamic loads. Computation of dynamic response of structures to dynamic loads like blast and earthquake. Modal analysis and single degree of freedom methods will be covered.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3300

CV_ENG 4700: Hydraulics of Open Channels
Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3700

CV_ENG 4703: Applied Hydrology
Modern methods of applied hydrologic analysis and synthesis of hydrologic records.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3700 and CV_ENG 3702 or instructor’s consent

CV_ENG 4710: Soil and Water Conservation Engineering
(same as BIOL_EN 4150). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor’s consent

CV_ENG 4720: Watershed Modeling Using GIS
(same as BIOL_EN 4350). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP, Procedures for model calibration/sensitivity data analysis.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor’s consent

CV_ENG 4792: Analysis of Water-Resource Systems
Applies hydrology, hydraulic and sanitary engineering, and economics to water-resource design problems considering man and his environment. Uses methods of systems analysis.
Credit Hours: 3
Prerequisites: instructor’s consent

CV_ENG 4980: Civil Engineering Systems Design
Design of civil engineering systems.
Credit Hours: 3
Prerequisites: senior standing in Civil Engineering at the University of Missouri-Columbia or written consent of Chairman

CV_ENG 4990: Undergraduate Research in Civil and Environmental Engineering
Independent investigation or project in Civil Engineering. May be repeated to 6 hours.
Credit Hour: 1-4
Prerequisites: senior standing in Civil and Environmental Engineering and instructor’s consent

CV_ENG 4995: Research in Civil & Environmental Engineering-Undergraduate Honors
Independent project, supervised by the honors advisor, to be presented as a formal written report.
Credit Hour: 1-3
Prerequisites: participation in the Civil and Environmental Engineering Departmental Honors Program

CV_ENG 7001: Topics in Civil Engineering
Study of current and new technical developments in civil engineering.
Credit Hour: 1-3
Prerequisites: instructor’s consent

CV_ENG 7002: Analysis of Civil Engineering Decisions
Formulates and analyzes probabilistic models of civil engineering systems and their environment. Elementary theory of decision making under uncertainty. Application to selected civil engineering problems.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3010 or other introductory probability/statistics course

CV_ENG 7003: Optimization of Civil Engineering Systems
Automated design techniques such as linear, nonlinear, and dynamic programming; gradient and random searching. Civil engineering applications emphasized throughout.
Credit Hours: 3
Prerequisites: MATH 1300 or MATH 1500, or instructor’s consent

CV_ENG 7004: Engineering Administration
Cash flow analysis, financial analysis, managerial accounting and cost control, budgeting, organizational structure and behavior.
Credit Hours: 3
Prerequisites: MATH 1300 or MATH 1500, or instructor’s consent

CV_ENG 7006: Digital Computer Applications in Engineering
Use of digital computer for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, differentiation, and differential equations.
Credit Hours: 3
Prerequisites: MATH 2300

CV_ENG 7007: Quality Management in Civil Engineering
Quantitative and qualitative quality planning and analysis concepts, including statistical tools and total quality management techniques, control, measurement and assessment. Graded on A-F basis only.
Credit Hours: 3

CV_ENG 7008: Risk and Reliability for Civil Engineers
This course focuses on how to use probability and statistics to quantify uncertainties and consider risks when making civil engineering decisions and designing civil engineering systems.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3010 or other introductory probability/statistics course

CV_ENG 7080: Advanced Surveying
Celestial observations for determination of position; state coordinate systems, precise surveys, introduction to geodetic surveys, principles of photogrammetry. Theory of optical surveying instruments.
Credit Hours: 3
Prerequisites: CV_ENG 2090 and MATH 1500
CV_ENG 7109: Urban Development and Planning
Introduction to planning processes; procedures and forces that shape urbanization.
Credit Hours: 3

CV_ENG 7110: Transportation Simulation
Theory and application of simulation in transportation engineering.
Credit Hours: 3
Prerequisites: C- or better in CV_ENG 3100

CV_ENG 7120: Airport Engineering
Airport systems planning, design, and management.
Credit Hours: 3
Prerequisites: C- or better in CV_ENG 3010

CV_ENG 7125: Transportation Legal Issues
This course discusses some of the legal issues that transportation engineers encounter throughout the course of their careers.
Credit Hours: 3
Prerequisites: CV_ENG 3010

CV_ENG 7130: Transportation Safety
This course is an introduction to transportation safety. The focus will be on surface transportation. The student is expected to analyze safety data and to devise engineering solutions to safety problems.
Credit Hours: 3
Prerequisites: CV_ENG 3010

CV_ENG 7145: Civil and Environmental Engineering Legal Issues
Discussion of legal issues facing civil engineers including right of way, risk and liability, environment, financing public works, contracting and ethics.
Credit Hours: 3
Prerequisites: CV_ENG 3010

CV_ENG 7155: Transportation Geography
(same as GEOG 7850). Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.
Credit Hours: 3

CV_ENG 7165: Geographic Information Systems I
Introduces concepts of computer analysis of geographic data and emphasizes the techniques for handling geographic data. Application of computer-based GIS systems in coursework.
Credit Hours: 3
Prerequisites: instructor's consent; GEOG 2840

CV_ENG 7175: The Geospatial Sciences in National Security
(Same as GEOG 7130). This course explores the critical contribution of the geospatial sciences in the collection, processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.
Credit Hours: 3
Prerequisites: instructor's consent

CV_ENG 7185: Location Analysis/Site Selection
(Same as GEOG 7740). An overview of location analysis in regional planning and spatial decision support. This course focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. May be repeated for credit.
Credit Hours: 3

CV_ENG 7190: Infrastructure Project Development
Students will learn how the key elements of major civil engineering infrastructure projects fit together. The course will focus on the horizontal integration of: financing - planning - environment - right of way - design - construction - operations - maintenance. Engineering is important but so are a lot of other things. Graded on A-F basis only.
Credit Hours: 3

CV_ENG 7200: Remote Sensing of the Environment
Principles, characteristics and applications of remote sensing in engineering, geosciences, agriculture and environmental projects. Topics: basic concepts, photographic, thermal multispectral and microwave systems, satellite remote sensing and digital image processing.
Credit Hours: 3

CV_ENG 7210: Solid Waste Management
Engineering principles involved in generation, handling, collection, transport, processing, and disposal of solid wastes, resource recovery and reuse, legislation on solid wastes and groundwater contamination problems.
Credit Hours: 3

CV_ENG 7220: Hazardous Waste Management
(same as CH_ENG 7220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination.
Credit Hours: 3

CV_ENG 7230: Introduction to Water Quality
Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineered systems for the distribution, collection and treatment of water and wastewater.
Credit Hours: 3

CV_ENG 7232: Water and Wastewater Treatment Facilities
Physical, chemical, and biochemical processes for treating drinking water supplies and wastewaters (domestic and industrial), with emphasis on planning and design of such facilities.
Credit Hours: 3
Prerequisites: CV_ENG 4230 or CV_ENG 7230 or instructor's consent
CV_ENG 7240: Water Quality Analysis
Chemical, physical and biological methods for analysis of streams, lakes, wastewaters and water supplies and their use in water quality management.
Credit Hours: 3
Prerequisites: C- or better in CV_ENG 4230 or instructor’s consent

CV_ENG 7250: Environmental Regulatory Compliance
(cross-leveled with CV_ENG 4250). Systems of water law; provisions of major federal environmental laws and regulations; development or regulations at the federal, state, and local levels; regulatory frameworks; permits; and enforcement.
Credit Hours: 3

CV_ENG 7260: Environmental Public Policy
Engineering and economic aspects of environmental policy. Basic understanding of environmental statutes and case law. Graded on A-F basis.
Credit Hours: 3

CV_ENG 7270: Environmental Engineering Microbiology
Theory and application of fundamental principles of microbiology, ecology, and aquatic biology of the microorganisms of importance to sanitary engineers.
Credit Hours: 3

CV_ENG 7290: Wastewater Treatment and Process Design
Selection and use of wastewater and sludge treatment processes, disposal methods, leading to rational design of overall wastewater treatment systems. Sustainable wastewater treatment including advanced processes in nutrient removal, anaerobic treatment for wastewater reuse. Graded on A-F basis only.
Credit Hours: 3

CV_ENG 7300: Advanced Structural Steel Design
(cross-leveled with CV_ENG 4300). Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3313

CV_ENG 7302: Prestressed/Advanced Reinforced Concrete
Credit Hours: 3
Corequisites: CV_ENG 3312

CV_ENG 7310: Structural Design and Analysis
Credit Hours: 3
Prerequisites: Grade of C- or better in CV_ENG 3400

CV_ENG 7320: Energy Methods in Mechanics
Design of building structures and bridges in steel and reinforced concrete using case studies.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3300

CV_ENG 7330: Structural System Design
Design of buildings in steel and reinforced concrete, including estimation of loads and design of gravity and lateral force resisting systems.
Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3312 and CV_ENG 3313

CV_ENG 7350: Matrix Methods of Structural Analysis
An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the STRUDL and NASTRAN programs to three dimensional structures.
Credit Hours: 3

CV_ENG 7360: Bridge Engineering
Credit Hours: 3
Prerequisites: Grade of C- or better in CV_ENG 3312 and CV_ENG 3313

CV_ENG 7404: Geotechnical Earthquake Engineering
This course will provide an introduction to topics relating to geotechnical aspects of earthquake engineering. Topics to be covered include: basic seismology, seismic hazard analysis, dynamic soil properties, site response analysis and soil properties, site response analysis and soil liquefaction. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Grade of C- or better in CV_ENG 3400 or instructor’s consent

CV_ENG 7406: Geotechnics of Landfill Design
This course will focus on geotechnical and construction aspects in the analysis, design and construction of waste containment facilities (landfills) including expansions of existing facilities.
Credit Hours: 3
Prerequisites: instructor’s consent

CV_ENG 7410: Foundation Engineering
Subsurface exploration. Design of basic foundation structures: shallow foundations, retaining walls, deep foundations.
Credit Hours: 3
Prerequisites: Grade of C- or better in CV_ENG 3400
**CV_ENG 7412: Applied Geotechnical Engineering**
Study of concepts, theories, and design procedures for modern earthwork engineering including: compaction and densification of soils and soil improvement, seepage and drainage, slope stability and performance, and earth retaining structures.

**Credit Hours:** 3  
**Prerequisites:** grade or C- or better in CV_ENG 3400

---

**CV_ENG 7500: Introduction to Construction Management**
Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques.

**Credit Hours:** 3

---

**CV_ENG 7510: Construction Methods and Equipment**
Selection and use of construction equipment, planning construction operations, equipment economics and operations analyses.

**Credit Hours:** 3  
**Prerequisites:** MATH 1300 or MATH 1500, or instructor's consent

---

**CV_ENG 7600: Advanced Mechanics of Materials**  
(same as MAE 7600; cross-leveled with CV_ENG 4600 and MAE 4600). Analysis of more complicated problems in stresses, strains.

**Credit Hours:** 3  
**Prerequisites:** grade of C- or better in ENGINR 2200

---

**CV_ENG 7610: Sensors and Experimental Stress Analysis**
Sensors and instrumentation for stress analysis, mechanical measurement and health monitoring of civil structures. Application and design of data acquisition systems, digital signals and basic digital signal processing. Electronics and instrumentation circuits.

**Credit Hours:** 3  
**Prerequisites:** Grade of C- or better in ENGINR 2200 and PHYSICS 2760

---

**CV_ENG 7660: Vibration Analysis**  
(same as MAE 7660). Vibration theory with application to mechanical systems.

**Credit Hours:** 3  
**Prerequisites:** grade of C- or better in MAE 2600 and MATH 4100

---

**CV_ENG 7692: Introduction to Structural Dynamics**
Theory of structural response to dynamics loads. Computation of dynamic response of structures to dynamic loads like blast and earthquake. Modal analysis and single degree of freedom methods will be covered. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Grade of C- or better in CV_ENG 3300

---

**CV_ENG 7700: Hydraulics of Open Channels**
Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves.

---

**CV_ENG 7702: Pipeline Engineering**
Theoretical and practical aspects of pipeline engineering including pipeline transport of natural gas and various solids such as coal, sand and solid wastes.

**Credit Hours:** 3  
**Prerequisites:** CV_ENG 3700 and MAE 3400

---

**CV_ENG 7703: Applied Hydrology**
Modern methods of applied hydrologic analysis and synthesis of hydrologic records.

**Credit Hours:** 3  
**Prerequisites:** grade of C- or better in CV_ENG 3700 and CV_ENG 3702, or instructor's consent

---

**CV_ENG 7710: Soil and Water Conservation Engineering**  
(same as BIOL_EN 7150). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.

**Credit Hours:** 3  
**Prerequisites:** BIOL_EN 3200 or CV_ENG 3200 or instructor's consent

---

**CV_ENG 7720: Watershed Modeling Using GIS**  
(same as BIOL_EN 7350). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP. Procedures for model calibration/sensitivity data analysis.

**Credit Hours:** 3  
**Prerequisites:** BIOL_EN 2180 or CV_ENG 3200 or instructor's consent

---

**CV_ENG 7792: Analysis of Water-Resource Systems**
Applies hydrology, hydraulic and sanitary engineering, and economics to water-resource design problems considering man and his environment. Uses methods of systems analysis.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

---

**CV_ENG 8001: Advanced Topics in Civil Engineering**
New and current technical developments in civil engineering.

**Credit Hour:** 1-3  
**Prerequisites:** CV_ENG 4006 or equivalent

---

**CV_ENG 8002: Directed Reading In Civil Engineering**
Faculty supervised readings course.

**Credit Hour:** 1-3

---

**CV_ENG 8085: Problems in Civil Engineering**
Supervised investigation in civil engineering to be presented in the form of a report.

**Credit Hour:** 1-6
CV_ENG 8087: Seminar in Civil Engineering
Review of research in progress. Research techniques.
Credit Hour: 1

CV_ENG 8100: Transportation Planning and Models
Regional and metropolitan transportation studies; land use, traffic generation, distribution and assignment models.
Credit Hours: 3
Prerequisites: CV_ENG 4002 or CV_ENG 4003

CV_ENG 8106: Advanced Intelligent Transportation Systems
This course is intended to be an introductory course in Intelligent Transportation Systems (ITS). This course includes the background of ITS, current implementations, sample deployments, and practical issues and implications.
Credit Hours: 3

CV_ENG 8110: Theory of Traffic Flow
Scientific approach to study of traffic phenomena with emphasis on applications. Deterministic and stochastic models of traffic flow; optimization of intersection controls; computer simulation of traffic problems.
Credit Hours: 3
Prerequisites: CV_ENG 4002 or instructor’s consent

CV_ENG 8120: Traffic Control Engineering
Information retrieval and analysis of human and vehicular characteristics; roadway element; system control and optimization of highways, intersections; planning and design of new traffic facilities including ways, terminals.
Credit Hours: 3
Prerequisites: CV_ENG 3100 or equivalent

CV_ENG 8130: Land Use Planning
Case study of site planning using systems analysis; feasibility for development or redevelopment; restraints imposed by political, social and economic conditions on land use activity as related to urban and regional relationships.
Credit Hours: 3
Prerequisites: CV_ENG 4106

CV_ENG 8140: Highway Transportation
Economics of transportation on highways. Comparison of vehicle operation costs. Project studies of highway problems in general.
Credit Hours: 3
Prerequisites: CV_ENG 4103 or equivalent

CV_ENG 8150: Transportation Networks
This course presents techniques used in equilibrium analysis of transportation networks. The details of traffic assignment algorithms will be discussed along with theory and practical algorithms.
Credit Hours: 3

CV_ENG 8187: Seminar in Transportation Engineering
Review of research in progress in the area of transportation engineering.
Credit Hour: 1

CV_ENG 8200: Water Quality Modeling
Derivation and application of models for describing oxygen budget, nutrient exchange, and biological productivity in streams, lakes and estuaries.
Credit Hours: 3
Prerequisites: CV_ENG 7230

CV_ENG 8208: Finite Element Methods
(same as MAE 8280). The concepts and fundamentals of the finite element method with applications to problems in solid and fluid mechanics.
Credit Hours: 3
Prerequisites: MAE 4280

CV_ENG 8210: Groundwater Pollution Evaluation and Modeling
Fundamentals of groundwater hydraulics and groundwater contamination. Use and development of computer models to simulate flow and pollutant transport.
Credit Hours: 3
Prerequisites: CV_ENG 3700, MATH 4100, or instructor’s consent

CV_ENG 8215: Environmental Transport Phenomena
Fundamental processes that control the transport of constituents substances in fluids, and the implications of these processes for a variety of important applications in natural and engineered systems.
Credit Hours: 3

CV_ENG 8220: Advanced Hazardous Waste Treatment Processes
Course includes some introductory materials about hazardous waste regulations followed by advanced treatment methods such as air stripping, soil-vapor extraction, chemical oxidation, membrane processes, in-situ and ex-situ biotreatment methods, solidification and thermal processes.
Credit Hours: 3
Prerequisites: CV_ENG 4220

CV_ENG 8225: Aquatic Chemistry
Principles of chemical thermodynamics and equilibrium applied to processes in natural water and water and wastewater treatment systems. Emphasis on quantitative analyses of acid/base, complexation/dissociation, precipitation/dissolution, and reduction/oxidation reactions. Graded on A-F basis only.
Credit Hours: 3

CV_ENG 8230: Unit Process Laboratory
Studies chemical and physical relationships as applied to unit processes of water and wastewater.
Credit Hours: 3
CV_ENG 8240: Physiochemical Treatment Processes  
Fundamental principles, analysis and modeling of physical and chemical processes for water and wastewater treatment.  
Credit Hours: 3

CV_ENG 8250: Biochemical Treatment Processes  
Biochemical principles, kinetic models and energy considerations in the design of biological wastewater treatment processes.  
Credit Hours: 3

CV_ENG 8260: Environmental Biotechnology  
Major biochemical reactions relevant to environmental engineering. Theory and application of fundamental principles of attached and suspended microbial growth and process engineering for sanitary engineering and biodegradation.  
Credit Hours: 3  
Prerequisites: CV_ENG 8250 or instructor's consent

CV_ENG 8270: Design of Water and Wastewater Treatment Facilities  
Development of design criteria and their application to the design of water and wastewater treatment facilities.  
Credit Hours: 3

CV_ENG 8280: Engineering Aspects of Water Quality  
Theoretical aspects of biological, chemical, physical processes; applications in water, wastewater, industrial-waste treatment processes, natural water systems; chemical equilibria, flow models; reaction kinetics on process design, pollutants.  
Credit Hours: 3  
Prerequisites: CV_ENG 4230 or instructor's consent

CV_ENG 8287: Seminar in Environmental Engineering  
Review of research in progress in the area of environmental engineering.  
Credit Hour: 1

CV_ENG 8290: Environmental Practicum  
Application of advanced analysis and design techniques to practical problems in environmental engineering. Collaborative group investigations that may include experimental and computer-aided studies. No more than 6 practicum hours may be applied toward the MS degree. Graded on A-F basis only.  
Credit Hour: 2-4  
Prerequisites: graduate standing in Civil Engineering

CV_ENG 8295: Environmental Regulatory Policy  
Discussion of the various policy aspects of environmental regulation: economic and non-economic impacts of degradation; risk assessment and management; distribution of environmental risks; regulatory tools; federal vs. state; disclosure; enforcement. Relation to environmental laws. Graded on A-F basis only.  
Credit Hours: 3  
Prerequisites: CV_ENG 4250 or CV_ENG 7250 or equivalent

CV_ENG 8303: Behavior of Reinforced Concrete Members  
Credit Hours: 3  
Prerequisites: CV_ENG 3312

CV_ENG 8311: Nondestructive Evaluation Engineering  
This course will present the interaction of nondestructive evaluation (NDE) technologies and engineering decision-making. Theory and application NDE technologies will be presented in the context of the engineering analysis required to effectively utilize the technologies. Graded on A-F basis only.  
Credit Hours: 3  
Prerequisites: PHYSCS 2760, ENGINR 1200, MATH 4100

CV_ENG 8312: Advanced Structural Analysis  
Credit Hours: 3

CV_ENG 8313: Random Vibration  
Analysis of random vibrations including topics in stationary, ergodic and nonstationary random processes, with application to single-degree of freedom, discrete and continuous mechanical systems.  
Credit Hours: 3  
Prerequisites: CV_ENG 4606

CV_ENG 8314: Numerical Methods in Engineering  
Classification and numerical solution of engineering problems--ordinary and partial differential equations, algebraic equations. Includes initial, boundary, eigen- and characteristic-value problems. Prerequisites: MATH 4100  
Credit Hours: 3

CV_ENG 8320: Continuum Mechanics  
(same as MAE 8320). Introductory course in the mechanics of continuous media. Basic concepts of stress, strain, constitutive relationships; conservation laws are treated using Cartesian tensor notation. Examples from both solid and fluid mechanics investigated.  
Credit Hours: 3  
Prerequisites: CV_ENG 3700, MATH 7100, ENGINR 2200

CV_ENG 8322: Structural Analysis  
Credit Hours: 3

<tbody>
<tr>
<td>CV_ENG 8332:Design of Special Structures Systems</td>
<td>Reviews current trends in design of structural systems and components. Critical evaluation of recent code modifications. Application to design of light gauge metal structures, lateral bracing systems, curved beams and panel systems.</td>
<td></td>
<td>3</td>
<td>CV_ENG 4310 or CV_ENG 4330</td>
</tr>
<tr>
<td>CV_ENG 8340:Theory of Plates and Shells</td>
<td>(same as MAE 8340). Rectangular and circular plates. Variational methods in the analysis of plates and shells. Plates of unusual shape. Shear deformation effects. Large deformation analysis. Analysis of cylindrical shells.</td>
<td></td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>CV_ENG 8342:Space Mechanics</td>
<td>Rigid body dynamics analysis of satellites, space vehicles. Trajectories, time of flight optimization.</td>
<td></td>
<td>3</td>
<td>MAE 3600 or equivalent, and MATH 4100</td>
</tr>
<tr>
<td>CV_ENG 8360:Theory of Plasticity</td>
<td>(same as MAE 8360). Plastic yield conditions and stress-strain relations. Behavior of elastic-perfectly plastic members. Plain strain in plastic members.</td>
<td></td>
<td>3</td>
<td>CV_ENG 8330 or instructor's consent</td>
</tr>
<tr>
<td>CV_ENG 8372:Reinforced Concrete Theory and Design</td>
<td>Advanced design of reinforced concrete structures; review of standard codes and specifications and their influence.</td>
<td></td>
<td>3</td>
<td>CV_ENG 4350 or equivalent</td>
</tr>
<tr>
<td>CV_ENG 8380:Nonlinear Mechanical Analysis</td>
<td>Analysis of behavior of nonlinear mechanical systems. Nonlinear phenomena of importance in mechanical design.</td>
<td></td>
<td>3</td>
<td>MAE 3600 or equivalent and MATH 4100</td>
</tr>
<tr>
<td>CV_ENG 8382:Dynamical Theory</td>
<td>Engineering principles and application in mathematical expression of energy, force, inertia system.</td>
<td></td>
<td>3</td>
<td>MAE 3600 or equivalent and MATH 4100</td>
</tr>
<tr>
<td>CV_ENG 8387:Seminars in Structural Engineering</td>
<td>Review of research in progress in the area of structural engineering.</td>
<td></td>
<td>1</td>
<td></td>

<tr>
<td>CV_ENG 8390:Advanced Topics Structural Analysis</td>
<td>Computer implementation and application of finite element analysis. Material and geometric nonlinearities. Plastic analysis of structures. Code provisions for analysis of seismic and wind loadings.</td>
<td></td>
<td>3</td>
<td>MAE 2600 and MATH 4100 or MATH 7100</td>
</tr>
<tr>
<td>CV_ENG 8392:Dynamics of Structures</td>
<td>(same as MAE 8392). Study of the dynamic behavior of structures. Analysis of equivalent lumped parameter systems for the design of structures in a dynamic environment.</td>
<td></td>
<td>3</td>
<td>MAE 3600 or equivalent and MATH 4100</td>
</tr>
<tr>
<td>CV_ENG 8402:Advanced Shear Strength of Soils</td>
<td>Theoretical soil mechanics as applied to solution of specific engineering problems.</td>
<td></td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>CV_ENG 8403:Consolidation and Settlement</td>
<td>Settlement of soil. Theory of Consolidation, consolidation testing, settlements of earth fills and embankments, stress distribution in soils, elastic settlement, bearing capacity of shallow foundations, shallow foundations design.</td>
<td></td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>CV_ENG 8404:Seepage in Soils</td>
<td>General principles that govern flow of water through soils and specific procedures for analysis and design of filtration and drainage media in geotechnical and geoenvironmental applications.</td>
<td></td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>CV_ENG 8406:Unsaturated Soil Mechanics</td>
<td>Fundamental principles governing the strength, deformation, and fluid flow behavior of multiphase porous media. Includes specific procedures for analyzing, measuring and modeling strength, hydraulic conductivity, and suction characteristics of unsaturated soil.</td>
<td></td>
<td>3</td>
<td>CV_ENG 3400 or instructor's consent</td>
</tr>
<tr>

<td>--------------------------------------</td>
</tr>
<tr>
<td>CV_ENG 8407</td>
<td>Soil Behavior</td>
<td>Detailed study of composition, fabric, and geotechnical and hydrologic properties of soils that consist partly or wholly of clay. Emphasizes physico-chemical factors governing volume change and shear strength. Expansive clay behavior is examined in detail.</td>
<td>3</td>
<td>CV_ENG 3400 or instructor’s consent</td>
</tr>
<tr>
<td>CV_ENG 8408</td>
<td>Soil Dynamics</td>
<td>Cover topics relating to the response of soils to dynamic loading. Topics to be covered include: lab and field methods, cyclic soil models, foundation vibrations, and wave propagation through soil. Graded on A-F basis only.</td>
<td>3</td>
<td>CV_ENG 3400 and instructor’s consent</td>
</tr>
<tr>
<td>CV_ENG 8410</td>
<td>Advanced Foundation Engineering</td>
<td>Foundation design beyond simple spread footings, special footings and beams on an elastic foundations, mat foundations, pile foundations - static capacity, lateral loads, bucklin, dynamic analysis load tests, pile groups, drilled piers.</td>
<td>3</td>
<td>CV_ENG 4410</td>
</tr>
<tr>
<td>CV_ENG 8412</td>
<td>Stability and Performance of Earth Slopes</td>
<td>Principles, mechanics and procedures for analyzing the stability of earth slopes and landfills under short-term, long-term, rapid drawdown, and earthquake conditions.</td>
<td>3</td>
<td>CV_ENG 3400 or instructor’s consent</td>
</tr>
<tr>
<td>CV_ENG 8413</td>
<td>Design and Analysis of Earth Retaining Structures</td>
<td>General principals and specific procedures for analysis and design of earth retention systems including consideration of soil-structure interaction.</td>
<td>3</td>
<td>CV_ENG 3400 or instructor’s consent</td>
</tr>
<tr>
<td>CV_ENG 8420</td>
<td>Advanced Geotechnics</td>
<td>Advanced study of specific geotechnical engineering topics. Topics may include: Environmental Geotechnics, Landfill Design, Geosynthetics, Laboratory Testing, and Case History. May be repeated for credit when topics vary.</td>
<td>3</td>
<td>CV_ENG 3400 or instructor’s consent</td>
</tr>
<tr>
<td>CV_ENG 8427</td>
<td>Seminar in Geotechnical Engineering</td>
<td>Review of research in progress in the area of geotechnical engineering.</td>
<td>1</td>
<td>CV_ENG 4660</td>
</tr>
<tr>
<td>CV_ENG 8510</td>
<td>Construction Engineering</td>
<td>Selection and layout of construction plant. Design and construction of formwork, falsework, cofferdams, conveyors and other temporary structures used by contractors.</td>
<td></td>
<td>CV_ENG 4510 or equivalent</td>
</tr>
<tr>
<td>CV_ENG 8520</td>
<td>Construction Productivity</td>
<td>Work improvement techniques in the construction industry reviewed and applied to local construction site. Construction safety influenced by supervisors and managers studied in detail. Declining productivity in the construction industry evaluated and solutions considered.</td>
<td>3</td>
<td>CV_ENG 4500</td>
</tr>
<tr>
<td>CV_ENG 8530</td>
<td>Construction Project Management</td>
<td>Cost analysis, estimating techniques. Time, cost, and quality control of construction projects. Recording/analyzing construction effort. Applications of crew balance, process charts, time-lapse motion pictures, operations research, and preplanning techniques to construction operations. Construction safety.</td>
<td>3</td>
<td>CV_ENG 4500</td>
</tr>
<tr>
<td>CV_ENG 8610</td>
<td>Materials and Measurement</td>
<td>About 25% of the course is devoted to the physical measurement of strain, force, displacement and motion. Remainder of course is devoted to advanced study of the behavior of steel and concrete with emphasis on brittle fracture in steel.</td>
<td>3</td>
<td>CV_ENG 3600 or equivalent</td>
</tr>
<tr>
<td>CV_ENG 8620</td>
<td>Advanced Dynamics</td>
<td>(same as MAE 8620). Fundamental principles of advanced rigid body dynamics with applications. Special mathematical techniques including Lagrangian and Hamiltonian methods.</td>
<td>3</td>
<td>CV_ENG 2080 and MATH 4100</td>
</tr>
<tr>
<td>CV_ENG 8630</td>
<td>Vibrations of Distributed Parameter Systems</td>
<td>(same as MAE 8630). Vibration analysis of strings, cables, bars, rods, shafts, beams, membranes, plates, circular rings, frames; free and forced oscillation; miscellaneous loading; various boundary conditions; effect of damping; energy methods; method of difference equations.</td>
<td>3</td>
<td>CV_ENG 4660</td>
</tr>
<tr>
<td>CV_ENG 8710</td>
<td>Advanced Hydraulic Engineering</td>
<td>Unsteady flow in pipes and open channels is studied using the method of characteristics and finite difference equations. Hydraulic transient in pipe networks due to valve adjustments, pump startup and pump power failure are analyzed. Control of transient using surge tanks and air chambers is included.</td>
<td>3</td>
<td>CV_ENG 4500</td>
</tr>
</tbody>
</table>
### CV_ENG 8720: Hydrotechnical Practicum
Application of advanced analysis and design techniques to practical problems in hydrotechnical engineering. Collaborative group investigations that may include experimental and computer aided studies. No more than 6 practicum hours may be applied toward the MS degree. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** CV_ENG 3720

### CV_ENG 8730: Fundamentals of Fluid Mechanics
Treatment of fundamental concepts and theories in fluid mechanics at a level suitable for beginning graduate students.

**Credit Hours:** 3  
**Prerequisites:** CV_ENG 3700 or equivalent

### CV_ENG 8740: Hydrodynamics
Special topics in potential theory and conformal mapping.

**Credit Hours:** 3

### CV_ENG 8750: Wind Engineering
Study of wind effects on the safety of engineering structures, air pollution and building energy consumption, and the use of wind.

**Credit Hours:** 3  
**Prerequisites:** CV_ENG 3700

### CV_ENG 8990: Research-Masters Thesis in Civil & Environmental Engineering
Independent investigation in the field of civil engineering to be presented in the form of a thesis. Graded on a S/U basis only.

**Credit Hour:** 1-99

### CV_ENG 9001: Advanced Topics in Civil Engineering - PhD
New and current technical developments in civil engineering. For PhD students.

**Credit Hour:** 1-4

### CV_ENG 9990: Research-Doctoral Dissertation Civil & Environmental Engineering
Independent investigation in the field of civil engineering to be presented in the form of a thesis. Graded on a S/U basis only.

**Credit Hour:** 1-99

### Classical Humanities (CL_HUM)

#### CL_HUM 1050: Greek and Latin in English
A survey of the influence of Greek and Latin upon English literary, scientific, technical, legal and medical vocabulary. Emphasis is upon building competency with complex English words while studying the cultural influence of the classical languages on modern vocabulary.

**Credit Hours:** 3

#### CL_HUM 1060: Classical Mythology
Myths of Greece and Rome in literature and art.

**Credit Hours:** 3

#### CL_HUM 1060H: Classical Mythology - Honors
Myths of Greece and Rome in literature and art.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

#### CL_HUM 2005: Topics in Classical Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-99

#### CL_HUM 2100: Greek Culture
Survey of Greek life and thought. Principal developments in literature, the arts, politics, religion and philosophy, and their influence on Western civilization.

**Credit Hours:** 3

#### CL_HUM 2100H: Greek Culture - Honors
Survey of Greek life and thought. Principal developments in literature, the arts, politics, religion and philosophy, and their influence on Western civilization.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

#### CL_HUM 2200: Roman Culture
Survey of Roman life and thought. Principal developments in literature, the arts, politics, religion, philosophy, and private life, and their influence on Western Civilization.

**Credit Hours:** 3

#### CL_HUM 2300: Greek Classics in Translation
Reading in translation and critical study of the most important literary works of the ancient Greek World.

**Credit Hours:** 3

#### CL_HUM 2300H: Greek Classics in Translation
Reading in translation and critical study of the most important literary works of the ancient Greek world.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

#### CL_HUM 2400: Roman Classics in Translation
Reading in translation and critical study of the most important literary works of the ancient Roman world.

**Credit Hours:** 3
CL_HUM 2940: Service Learning in Classical Studies
Students provide enrichment programming on the Ancient World at various Columbia Public School sites. Participants must be Classical Studies majors or minors. Graded on A/F basis only. Does not meet Arts and Science general education requirements.

Credit Hour: 1
Prerequisites: instructor’s consent required

CL_HUM 3000: Foreigners and Dangerous Women in Greek and Latin Literature
(same as PEA_ST 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.

Credit Hours: 3

CL_HUM 3000H: Foreigners and Dangerous Women in Greek and Latin Literature - Honors
(same as PEA_ST 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.

Credit Hours: 3
Prerequisites: Honors eligibility required

CL_HUM 3005: Topics in Classical Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99
Prerequisites: CL_HUM 1060, any CL_HUM 2000 course, or instructor’s consent

CL_HUM 3005H: Topics in Classical Humanities - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99
Prerequisites: CL_HUM 1060, any CL_HUM 2000 course, or instructor’s consent. Honors eligibility required

CL_HUM 3025: Ancient Western Philosophy
(same as PHIL 3000). Philosophical thought on nature, knowledge, the gods, human life and society, from Thales to Augustine. Emphasis on Plato and Aristotle. The relevance of the ancients to contemporary life.

Credit Hours: 3
Prerequisites: One course in Classical Humanities, sophomore standing, or instructor’s consent

CL_HUM 3050: Philosophy Before Socrates
A study of the origin of philosophical thinking in the Ancient Greek world. Topics to be explored include the nature of reality and our knowledge of it, the structure and constituents of the cosmos, human excellence and its relation to morality, political power, and happiness.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course or instructor’s consent

CL_HUM 3050H: Philosophy Before Socrates - Honors
A study of the origin of philosophical thinking in the Ancient Greek world. Topics to be explored include the nature of reality and our knowledge of it, the structure and constituents of the cosmos, human excellence and its relation to morality, political power, and happiness.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course or instructor’s consent. Honors eligibility required

CL_HUM 3100: The Age of Pericles
A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes.

Credit Hours: 3

CL_HUM 3100H: The Age of Pericles - Honors
A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course, or instructor’s consent

CL_HUM 3150: The Age of Augustus
Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius.

Credit Hours: 3

CL_HUM 3150H: The Age of Augustus - Honors
Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course, or instructor’s consent

CL_HUM 3150H: The Age of Augustus - Honors
Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius.

Credit Hours: 3

CL_HUM 3200: Power and Oratory in Ancient Greece
Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC.

Credit Hours: 3

CL_HUM 3200H: Power and Oratory in Ancient Greece - Honors
Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC.

Credit Hours: 3
Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course. Honors eligibility required
CL_HUM 3225: Roman Comedy, Wit and Humor
Study of works illustrating the comedy, wit and humor of the Romans: readings in comedies of Plautus and Terence, Catullus, Ovid’s Metamorphoses, Petronius’ Satyricon, Martial, Juvenal and Macrobius.
Credit Hours: 3
Prerequisites: CL_HUM 1060, any Classical Humanities 2000 level course or instructor’s consent

CL_HUM 3250: Greek and Roman Epic
A study of the major representatives of the ancient epic genre. Readings will include Homer’s Iliad and Odyssey, Apollonius’ Argonautica, Vergil’s Aeneid.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent

CL_HUM 3250H: Greek and Roman Epic - Honors
A study of the major representatives of the ancient epic genre. Readings will include Homer’s Iliad and Odyssey, Apollonius’ Argonautica, Vergil’s Aeneid.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent. Honors eligibility required

CL_HUM 3300: Greek Drama
Reading and interpretation of Greek tragedies and comedies in translation.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent

CL_HUM 3300H: Greek Drama - Honors
Reading and interpretation of Greek tragedies and comedies in translation.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent. Honors eligibility required

CL_HUM 3350: Advanced Mythology
Interpretation of selected classical myths and their influence on later literature and art.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent

CL_HUM 3350H: Advanced Mythology - Honors
Interpretation of selected classical myths and their influence on later literature and art.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent. Honors eligibility required

CL_HUM 3400: Murder and Mayhem: Images of Justice in Classical Antiquity
Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and courts, techniques of persuasion.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent

CL_HUM 3400H: Murder & Mayhem: Images of Justice in Classical Antiquity - Honors
Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and courts, techniques of persuasion.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent. Honors eligibility required

CL_HUM 3450: Greek and Roman Characters and Ideals
Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent

CL_HUM 3450H: Greek and Roman Characters and Ideals - Honors
Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women.
Credit Hours: 3
Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor’s consent. Honors eligibility required

CL_HUM 3550: War and Democracy in Late 5th c. BCE Athens
(same as PEA_ST 3550). Explores the discourse on war and peace in Athenian texts and art that survives from the last quarter of the 5th century B.C.E. This was a period of relentless warfare: the Athenians were fighting the Spartans, Sparta’s allies, unaligned cities and several of their own subject states.
Credit Hours: 3
Prerequisites: any 2000 level Classical Humanities course

CL_HUM 3600: The Ancient Novel
Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background.
Credit Hours: 3
Prerequisites: any 2000 level Classical Humanities course

CL_HUM 3600H: The Ancient Novel - Honors
Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background.
Credit Hours: 3
Prerequisites: any 2000 level Classical Humanities course. Honors eligibility required
**CL_HUM 3650: Paganism and Christianity**
A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events.

**Credit Hours:** 3  
**Prerequisites:** CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

---

**CL_HUM 3650H: Paganism and Christianity - Honors**
A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events.

**Credit Hours:** 3  
**Prerequisites:** CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

---

**CL_HUM 3700: Women in the Ancient World**
Using classical literary texts as the central focus this course examines the role of women: the conflict inherent in their obligations and their identity in the context of these obligations.

**Credit Hours:** 3  
**Prerequisites:** CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

---

**CL_HUM 3700H: Women in the Ancient World - Honors**
Using classical literary texts as the central focus this course examines the role of women: the conflict inherent in their obligations and their identity in the context of these obligations.

**Credit Hours:** 3  
**Prerequisites:** CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

---

**CL_HUM 3750: Classics in a Cross-Cultural Context**
The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures.

**Credit Hours:** 3  
**Prerequisites:** CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

---

**CL_HUM 3750H: Classics in a Cross-Cultural Context - Honors**
The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures.

**Credit Hours:** 3  
**Prerequisites:** CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

---

**CL_HUM 3800: Sports and Spectacles in Greco-Roman Antiquity**
Investigates athletic display in ancient Greek and Roman culture, from its earliest representations in Greek literature to the massive spectacles of the Roman empire, with an emphasis on the intersections between sport and spectacle and other areas of ancient cultural life.

**Credit Hours:** 3  
**Prerequisites:** CL_HUM 1060 and CL_HUM 2100 or CL_HUM 2200. Instructor's consent required

---

**CL_HUM 4005: Topics in Classical Humanities**
Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-99  
**Prerequisites:** Any Classical Humanities 2000 level course or instructor's consent

---

**CL_HUM 4100: Greece: From the Bronze Age to the Byzantine Empire**
Study abroad in Greece, in conjunction with the MU International Center. Immersion in the physical and intellectual heritage of ancient Greece; emphasis on cross-disciplinary, on-site learning and the intersections among ancient, Byzantine, and modern Greece. Application required. Graded on A/F basis only.

**Credit Hours:** 6  
**Prerequisites:** Any 2000 level or higher course in the Department of Classical Studies (courses on similar subjects in other departments accepted as equivalent); 2.75 overall GPA, Instructor’s Consent, and Application through MU International Center required. Participants chosen by instructor

---

**CL_HUM 4100H: Greece: From the Bronze Age to the Byzantine Empire - Honors**
Study abroad in Greece, in conjunction with the MU International Center. Immersion in the physical and intellectual heritage of ancient Greece; emphasis on cross-disciplinary, on-site learning and the intersections among ancient, Byzantine, and modern Greece. Participants chosen by instructor. Graded on A/F basis only. Application required.

**Credit Hours:** 6  
**Prerequisites:** Any 2000 level or higher course in the Department of Classical Studies (courses on similar subjects in other departments accepted as equivalent); 2.75 overall GPA, Instructor’s Consent, and Application through MU International Center required. Honors eligibility required

---

**CL_HUM 4500: Greek and Roman Religion**
(same as REL_ST 4500). Survey of religious development among the Greeks and Romans.

**Credit Hours:** 3  
**Prerequisites:** Prior 2000 level coursework in Classical Humanities, Art History and Archaeology, or Film Studies. Instructor's consent required

---

**CL_HUM 4500H: Greek and Roman Religion - Honors**
(same as REL_ST 4500). Survey of religious development among the Greeks and Romans.

**Credit Hours:** 3  
**Prerequisites:** CL_HUM 1060 or AR_H_A 1110 or HIST 1520; sophomore standing

</tbody>
</table>
CLASS 9187: Seminar in Classical Mythology
Intensive study of classical mythology in origin, development, meaning and influence.
Credit Hours: 3
Prerequisites: instructor’s consent

CLASS 9287: Seminar in the Hellenistic Age
Seminar in the Hellenistic Age
Credit Hour: 3-6

CLASS 9387: Seminar in Ancient Rhetoric and Oratory
Seminar in Ancient Rhetoric and Oratory
Credit Hours: 3

CLASS 9487: Seminar in Ancient Literary Criticism
Principles and theories of ancient Greek and Latin literary criticism, as developed in significant works on the subject.
Credit Hours: 3

CLASS 9587: Greco-Roman Didactic
Critical and comparative study of Greek and Latin didactic poetry with emphasis on major authors from Hesiod through the Augustan Age.
Credit Hour: 3-6

CLASS 9687: Seminar in Greco-Roman Religion
Seminar in Greco-Roman Religion
Credit Hours: 3

CLASS 9787: Seminar in Greco-Roman Satire and Social Criticism
Seminar in Greco-Roman Satire and Social Criticism
Credit Hours: 3

CLASS 9887: Seminar in the Age of the Antonines
Seminar in the Age of the Antonines
Credit Hour: 3-6

Clinical and Diagnostic Sciences (CDS)

CDS 2190: Medical Terminology
Medical terminology based on a word building system. This course is intended for students majoring in health professions, nursing and other helping professions, pre-med and biology.
Credit Hours: 3
Prerequisites: sophomore standing

CDS 3200: Essentials of Pathology
Provides basic foundation for understanding etiology of disease with emphasis on systemic pathology for non-medical students.
Credit Hours: 2

Prerequisites: general biology and one course in either physiology or anatomy

CDS 3460: Cardiovascular and Pulmonary Diagnostic Applications I
(same as RA_SCI 3460). Interdisciplinary small group, case-based study of common cardiovascular, pulmonary and other diseases. Pathophysiology, diagnosis and treatment from the perspective of allied health professionals. Emphasis on critical thinking, teamwork skills.
Credit Hours: 3
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program

CDS 4440: Organization and Administration
(same as RA_SCI 4440 and RS_THR 4440). Examines design and operation of allied health service departments and educational programs, including facilities, personnel procedures, record systems, ethics, medical-legal aspects, interdepartmental relations and curriculum development.
Credit Hours: 3

CDS 4460: Cardiovascular and Pulmonary Diagnostic Applications II
Interdisciplinary study of cardiac dysrhythmias, MI, stroke. Application of current American Heart Association Advanced Cardiac Life Support (AHA ACLS) algorithms. Successful completion of this course fulfills AHA ACLS Provider requirements.
Credit Hours: 3

CDS 4480: Clinical Ethics
(same as HLTH_SCI 4480). Exploration of bioethics issues in health care with emphasis on issues related to patient choice and provider responsibility. Topics include philosophical theories, principles and models for ethical and lawful decision making in healthcare. Prerequisites: Junior or Senior standing; Restricted to Health Science majors only
Credit Hours: 3

CDS 4500: Bioterrorism in Healthcare
This course will provide the student with an orientation the principles of disaster management in the community (both state and federal levels) and the acute care facility. Topics include biological agents, allocation of resources and ethical considerations.
Credit Hour: 1

CDS 4840: Asthma Education
This course will provide the student with a multi-faceted approach to caring for the patient with asthma. Topics include pathophysiology, pharmacology, patient/family education, patient assessment and management. Assists students to take the Asthma Educator Credentialing Exam. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: instructor’s consent

CDS 4955: Introduction to Research
An interdisciplinary course designed to promote undergraduate allied health research. Includes identifying and designing research problems
through formulating relevant questions, learning to systematically search for answers, and methods for searching the literature.

Credit Hours: 3

CDS 4985: Healthcare Organization and Leadership
(same as HLTH_SCI 4985). In this course, students will explore leadership principles as they relate to the student’s focus area, combining previous expertise in the field with an interdisciplinary perspective within the healthcare community. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HLTH_SC 2100; Senior standing

CDS 7840: Asthma Education
This course will provide the student with a multi-faceted approach to caring for the patient with asthma. Topics include pathophysiology, pharmacology, patient/family education, patient assessment and management. Assists students to take the Asthma Educator Credentialing Exam. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: instructor’s consent required

Clinical Laboratory Sciences
(CL_L_S)

CL_L_S 1000: Orientation to Clinical Laboratory Science
The class is designed to give prospective Clinical Laboratory Science students clinical experience in the field of Clinical Laboratory Science. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: HLTH_SCI 1000

CL_L_S 4412: Clinical Laboratory Science Theory, Application and Correlation
Application, evaluation and correlation of laboratory procedures used in the diagnosis and treatment of common disease states. Opportunities for building critical thinking, problem solving, and leadership skills are provided in small group clinical case discussions. Course may be repeated for credit. Graded on A-F basis only.

Credit Hours: 5
Prerequisites: departmental consent, accepted into the Medical Technology Program

CL_L_S 4414: Chemistry I
Introduction to theory, practical application, technical performance and evaluation of clinical chemistry laboratory procedures.

Credit Hour: 1-4
Prerequisites: departmental consent, accepted into the Medical Technology Program. May be repeated for credit. Graded on A-F basis only

CL_L_S 4415: Chemistry II
Advanced theory, practical application, technical performance and evaluation of clinical chemistry laboratory procedures.

Credit Hour: 1
Prerequisites: departmental approval, accepted into the Medical Technology Program

CL_L_S 4416: Clinical Hematology I
Introduction to the theory, practical application, technical performance and evaluation of hematological and coagulation procedures. Emphasis on correlations of clinical laboratory data with the diagnosis and treatment of anemia, leukemia, and bleeding/clotting disorders. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-4
Prerequisites: departmental consent, accepted into the Medical Technology Program

CL_L_S 4417: Clinical Hematology II
Advanced theory, practical application, technical performance and evaluation of hematological and coagulation procedures. Emphasis on the correlation of clinical laboratory data with the diagnosis and treatment of anemia, leukemia, and bleeding/clotting disorders. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: departmental consent, accepted into the Medical Technology Program

CL_L_S 4418: Clinical Microbiology I
Introduction to the theory, practical application, technical performance and evaluation of procedures for isolation, identification and susceptibility testing of infectious disease organisms in humans. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-4
Prerequisites: departmental approval, accepted into the Medical Technology Program

CL_L_S 4419: Clinical Microbiology II
Advanced theory, practical application, technical performance and evaluation procedures for isolation, identification and susceptibility testing of infectious disease in humans; bacteriology, mycology, parasitology, virology and serology and correlation of data with diagnosis and treatment. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: departmental approval, accepted into the Medical Technology Program

CL_L_S 4420: Clinical Immunology
Theory, practical application, and evaluation of immunological components: principles and methods used to assess immunologically-related disorders, including hypersensitivity reactions, autoimmune, immunoproliferative and immunodeficiency disorders, tumors and transplantations. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: departmental approval, accepted into the Medical Technology Program
**CL_L_S 4422: Immunohematology I**  
Introduction to the theory, practical application, technical performance and evaluation of blood bank procedures required for transfusion of blood and blood components and for handling and storage of blood and blood components.  
**Credit Hour:** 1-4  
**Prerequisites:** departmental approval, accepted into the Medical Terminology Program. May be repeated for credit. Graded on A/F basis only.

**CL_L_S 4423: Immunohematology II**  
Advanced theory, practical application, technical performance and evaluation of blood bank procedures required for transfusion of blood and blood components and for handling and storage of blood and blood components. May be repeated for credit. Graded on A-F basis only.  
**Credit Hours:** 2  
**Prerequisites:** departmental approval, accepted into the Medical Terminology Program

**CL_L_S 4424: Phlebotomy**  
Theory, practical application, technical performance and evaluation of procedures used in collecting, handling and processing blood specimens. May be repeated for credit. Graded on S/U basis only.  
**Credit Hour:** 1  
**Prerequisites:** departmental approval, accepted into the Medical Technology Program

**CL_L_S 4426: Body Fluid Analysis**  
Theory, practical application, technical performance and evaluation of procedures used in the analysis of urine and other body fluids, including cerebrospinal, synovial, serous, seminal, amniotic and feces. May be repeated for credit. Graded on A-F basis only.  
**Credit Hour:** 1  
**Prerequisites:** departmental consent, accepted into the Medical Technology Program

**CL_L_S 4970: Clinical Laboratory Management I**  
Theory, practical application and evaluation of laboratory management principles and associated models in communication, educational methodology, healthcare systems and financial resources. Opportunities for building critical thinking, problem-solving, and management/professional leadership skills are provided. May be repeated for credit. Graded on A-F basis only.  
**Credit Hours:** 2  
**Prerequisites:** departmental approval, accepted into the Medical Technology Program

**CL_L_S 4980: Clinical Lab Management II**  
Continuation of Clinical Lab Management I. Theory, practical application, and evaluation of laboratory management principles and associated models in compliance and regulatory issues, human resource management, method evaluation, professionalism and laboratory quality. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** CL_L_S 4970 or departmental consent; accepted into the Medical Technology Program

---

**Communication (COMMUN)**

**COMMUN 1200: Public Speaking**  
Principles, process of speech communication in small group and public speaking situations.  
**Credit Hours:** 3

**COMMUN 1200H: Public Speaking - Honors**  
Principles, process of speech communication in small group and public speaking situations.  
**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

**COMMUN 2100: Media Communication in Society**  
An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society.  
**Credit Hours:** 3  
**Prerequisites:** freshman, sophomore or junior standing only

**COMMUN 2100H: Media Communication in Society - Honors**  
An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society.  
**Credit Hours:** 3  
**Prerequisites:** freshman, sophomore or junior standing only. Honors eligibility required

**COMMUN 2200: Video Workshop: Mizzou Network**  
A hands-on workshop; students will participate in all phases of video production (camera operations, directing, graphics, video replay, and live audio production and digital editing) in a variety of live sports Projects. There is no requirement of previous production experience or course work. Course may be repeated an additional two times for credit. Graded on S/U basis only.  
**Credit Hour:** 1  
**Prerequisites:** restricted to Communication majors

**COMMUN 2315: Basic Audio Production and Performance**  
Radio speaking in varied types of programs; console operations, tape editing, microphone techniques.  
**Credit Hours:** 3  
**Prerequisites:** may be restricted to Communication majors only during early registration

**COMMUN 2701: Topics in Communication - General**  
Topics in Communication - General.  
**Credit Hours:** 3
Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2703: Topics in Communication - Behavioral Science
Topics in Communication - Behavioral Science.
Credit Hours: 3
Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2705: Topics in Communication - Humanities/Fine Arts
Topics in Communication - Humanities/Fine Arts.
Credit Hours: 3
Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 3050: Survey of Communication Studies
A survey of four main areas of the field communication, interpersonal, organizational, political, and mass communication.
Credit Hours: 3
Prerequisites: May be restricted to Communications majors through early registration

COMMUN 3310: Message Design and Writing for the Media
Styles and functions of various script formats for radio, television productions.
Credit Hours: 3
Prerequisites: COMMUN 2100. May be restricted to Communication majors only during early registration

COMMUN 3315: Advanced Audio Production
The study and application of techniques applicable to radio, television, and multimedia production with an emphasis on digital audio workstation systems.
Credit Hours: 3
Prerequisites: COMMUN 2315. May be restricted to Communication majors only during early registration

COMMUN 3390: Digital Production I
Focus on building familiarity with video cameras, microphones, lighting, editing as well as the fundamentals of visual composition, (framing, camera angles, story boards, and ways to visualize information) and processes and procedures for producing and directing.
Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3395: Digital Production II
Focus on advanced production work; more elaborate projects including digital shorts, music videos, and short documentaries; advanced editing, storyboards, and emphasis on developing narrative structure.
Credit Hours: 3
Prerequisites: COMMUN 3390 or instructor’s consent. May be restricted to Communication majors only during early registration

COMMUN 3422: Communication Research Methods
Focuses on writing and administering surveys, conducting field research, and designing experimental studies.
Credit Hours: 3
Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3441: Nonverbal Communication
Analysis of form and content of nonverbal communication. Emphasis on role of nonverbal cues in interpersonal communication.
Credit Hours: 3
Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3460: Organizational Advocacy
Theory and analysis of communication to promote organizational culture and image.
Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3460: Organizational Advocacy
Same as ANTHRO 3470, LINGST 3470. Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction.
Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3490: Mass Media Theory
Survey of the theories of mass communication.
Credit Hours: 3
Prerequisites: COMMUN 2100 or senior standing. May be restricted to Communication majors only during early registration

COMMUN 3525: Conflict and Communication
Theory and analysis of communication in conflict situations across a variety of contexts.
Credit Hours: 3
Prerequisites: sophomore standing required. May be restricted to Communication majors only during early registration

COMMUN 3561: Relational Communication
Analysis of communication influences on relational identities and development.
Credit Hours: 3
Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3570: Performance of Literature
(same as ENGLISH 3570 and THEATR 3200). Analysis and oral interpretation of literary works. Graded on A-F basis only.
Credit Hours: 3
**Prerequisites:** sophomore standing

**COMMUN 3571: Group Decision Making Processes**
(same as PEA_ST 3521). Procedures and techniques for interpersonal communication and decision making in small groups.

**Credit Hours:** 3

**Prerequisites:** sophomore standing. May be restricted to Communication majors only during early registration

---

**COMMUN 3572: Argument and Advocacy**
Critical analysis and production of argument emphasizing evidence, reasoning, and refutation.

**Credit Hours:** 3

**Prerequisites:** COMMUN 1200. May be restricted to Communication majors only during early registration

---

**COMMUN 3575: Business and Professional Communication**
Principles and practice of speech communication in business and professional settings. Emphasis on interviews, group conferences and personal presentations.

**Credit Hours:** 3

**Prerequisites:** sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

---

**COMMUN 3580: Crisis Communication**
The theory and practice of corporate and political communication responses to crisis situations.

**Credit Hours:** 3

**Prerequisites:** sophomore standing. May be restricted to Communication majors only during early registration

---

**COMMUN 3636: Contemporary Issues in Mass Communication**
Introduction to current issues and trends and relationship among the new technologies, policies, and potential impact on society.

**Credit Hours:** 3

**Prerequisites:** sophomore standing and COMMUN 2100. May be restricted to Communication majors only during early registration

---

**COMMUN 3701: Topics in Communication-General**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

**Credit Hours:** 3

**Prerequisites:** COMMUN 1200, COMMUN 2100, May be restricted to Communication majors only during early registration

---

**COMMUN 3703: Topics in Communication-Behavioral Sciences**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

**Credit Hours:** 1-99

**Prerequisites:** junior standing and instructor’s consent. May be restricted to Communication majors only during early registration

---

**COMMUN 3705: Topics in Communication-Humanities**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

**Credit Hours:** 1-99

**Prerequisites:** junior standing and instructor’s consent. May be restricted to Communications majors only during early registration

---

**COMMUN 3705H: Topics in Communication-Humanities - Honors**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hours:** 1-99

**Prerequisites:** junior standing and instructor’s consent, departmental consent for repetition. May be restricted to Communications majors only during early registration. Honors eligibility required

---

**COMMUN 4395: Professional Seminar in Television Production**
Application of principles to advanced television production, direction.

**Credit Hours:** 3

**Prerequisites:** COMMUN 3390 and instructor’s consent. May be restricted to Communication majors only during early registration

---

**COMMUN 4412: Gender, Language, and Communication**
(same as LINGST 4412 and ANTHRO 4412). Relationship among gender, language, nonverbal communication, and culture.

**Credit Hours:** 3

**Prerequisites:** junior standing or departmental consent. May be restricted to Communication majors only during early registration

---

**COMMUN 4415: Language and Discourse**
(same as LINGST 4415). Analysis of the rules of social interaction and the functions of language in discourse.

**Credit Hours:** 3

**Prerequisites:** junior standing and departmental consent. May be restricted to Communication majors only during early registration

---

**COMMUN 4440: Ethical Issues in Communication**
(same as PEA_ST 4440). Exploration and analysis of ethical dimensions intrinsic to human communication.

**Credit Hours:** 3

**Prerequisites:** junior standing or departmental consent. May be restricted to Communication majors only during early registration

---

**COMMUN 4473: Political Communication**
Study of role and impact of communication in political campaigns; historical and contemporary study of influence by communication; case studies and practicum.

**Credit Hours:** 3

**Prerequisites:** junior standing or departmental consent. May be restricted to Communication majors only during early registration

---

**COMMUN 4474: Theory and Research in Persuasion**
Studies the persuasive process, attitude formation, modification.

**Credit Hours:** 3
**Prerequisites:** junior standing and COMMUN 1200. May be restricted to Communication majors only during early registration

**COMMUN 4476: Organizational Communication**
Theories of communication systems and processes in organizational structures; study of communication behavior in formal and informal organizational settings.

**Credit Hours:** 3

**Prerequisites:** junior standing and COMMUN 1200. May be restricted to Communication majors only during early registration

**COMMUN 4481: Principles of Rhetoric**
Development of rhetoric from time of Corax with emphasis on Aristotle; derivation, application of standards for judging effectiveness in communication.

**Credit Hours:** 3

**Prerequisites:** COMMUN 1200, junior standing and departmental consent. May be restricted to Communication majors only during early registration

**COMMUN 4520: Family Communication**
(same as H_D_FS 4680). Analysis of the functions and processes of communication within families.

**Credit Hours:** 3

**Prerequisites:** junior standing or departmental consent. May be restricted to Communication majors only during early registration

**COMMUN 4530: Health Communication**
A general overview of the impact of communication on health, including doctor/patient communication and health campaigns. Graded on A-F basis only.

**Credit Hours:** 3

**COMMUN 4618: Television Program Analysis and Criticism**
Development of critical viewing skills including analysis of program conventions, genres, and television aesthetics.

**Credit Hours:** 3

**Prerequisites:** junior standing. May be restricted to Communication Majors only during early registration

**COMMUN 4628: Children, Adolescents and the Media**
Focus on social scientific research concerning the mass media in the lives of children and adolescents. The course centers on media effects literature and controversies relevant to child and adolescent media users. Course involves readings, lectures, discussions of theories, concepts, methods, and finding. We will also consider social implication and personal choices in media use. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** junior standing required

**COMMUN 4638: New Technologies and Communication**
Explores the social implications of new technologies designed for communication. Assumes basic computer knowledge.

**Credit Hours:** 3

**Prerequisites:** junior standing or instructor’s consent. May be restricted to Communication Majors only during early registration

**COMMUN 4701: Topics in Communication-General**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

**Credit Hour:** 1-99

**Prerequisites:** junior standing and instructor’s consent. May be restricted to Communication majors only during early registration

**COMMUN 4703: Topics in Communication-Behavioral Science**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

**Credit Hour:** 1-99

**Prerequisites:** junior standing and instructor’s consent. May be restricted to Communication majors only during early registration

**COMMUN 4705: Topics in Communication-Humanities**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

**Credit Hour:** 1-99

**Prerequisites:** junior standing and instructor’s consent. May be restricted to Communication majors only during early registration

**COMMUN 4707: Internship**
Directed professional experience within and outside the University in communication-related fields or organizations. Graded on S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** Admission to department, junior standing, instructor’s consent, 2.5 GPA

**COMMUN 4940: Research Project**
Student contributes to a research project with approved goals and a final written report. As part of the project, student will read articles in the communication research literature. Project can be independent or in conjunction with a faculty research project. Course may be repeated once for credit. Graded on A-F basis only

**Credit Hour:** 1-3

**Prerequisites:** COMMUN 3050; junior standing and instructor’s consent. Approval by a faculty member who will serve as project supervisor

**COMMUN 4950: Directed Reading**
Independent reading, reports.

**Credit Hour:** 1-99

**Prerequisites:** junior standing or instructor’s consent

**COMMUN 4974: Senior Project**
Integration and adaptation of communication theories to an applied communication problem. Required for all majors.

**Credit Hours:** 3

**Prerequisites:** admission to department, senior standing, and departmental consent
COMMUN 4975: Visual Literacy
Integration of theory and practice. The theoretical component of the class is grounded in the study of visual literacy and the practice component will focus on documentary filmmaking. May not be taken by graduate students. It is a capstone course for undergraduate students only.
Credit Hours: 3
Prerequisites: COMMUN 3390, senior standing; Admission to the department

COMMUN 4996H: Honors in Communication
Special work for Honors candidates in communication.
Credit Hour: 1-2
Prerequisites: instructor’s consent. Honors eligibility required

COMMUN 4997: Honors in Communication
Special work for Honors candidates in communication.
Credit Hours: 2

COMMUN 4997H: Honors in Communication
Special work for Honors candidates in communication.
Credit Hour: 1-2
Prerequisites: instructor’s consent. Honors eligibility required

COMMUN 7412: Gender, Language, and Communication
(same as LINGST 7412 and ANTHRO 7412). Relationship among gender, language, nonverbal communication, and culture.
Credit Hours: 3

COMMUN 7415: Language and Discourse
(same as LINGST 4415). Analysis of the rules of social interaction and the functions of language in discourse.
Credit Hours: 3
Prerequisites: departmental consent

COMMUN 7440: Ethical Issues in Communication
(same as PEA_ST 4440). Exploration and analysis of ethical dimensions intrinsic to human communication.
Credit Hours: 3
Prerequisites: graduate standing or departmental consent

COMMUN 7473: Political Communication
Study of role and impact of communication in political campaigns; historical and contemporary study of influence by communication; case studies and practicum.
Credit Hours: 3
Prerequisites: graduate standing or departmental consent

COMMUN 7474: Theory and Research in Persuasion
Studies the persuasive process, attitude formation, modification.
Credit Hours: 3
Prerequisites: COMMUN 3576 and departmental consent

COMMUN 7476: Organizational Communication
Theories of communication systems and processes in organizational structures; study of communication behavior in formal and informal organizational settings.
Credit Hours: 3
Prerequisites: COMMUN 3571 or departmental consent

COMMUN 7481: Principles of Rhetoric
Development of rhetoric from time of Corax with emphasis on Aristotle; derivation, application of standards for judging effectiveness in communication.
Credit Hours: 3
Prerequisites: instructor’s consent. Honors eligibility required

COMMUN 7520: Family Communication
(same as H_D_FS 7680). Analysis of the functions and processes of communication within families.
Credit Hours: 3

COMMUN 7530: Health Communication
A general overview of the impact of communication on health, including doctor/patient communication and health campaigns. Graded on A-F basis only.
Credit Hours: 3

COMMUN 7618: Television Program Analysis and Criticism
Development of critical viewing skills including analysis of program conventions, genres, and television aesthetics.
Credit Hours: 3
Prerequisites: instructor’s consent

COMMUN 7638: New Technologies and Communication
Explores the social implications of new technologies designed for communication. Assumes basic computer knowledge.
Credit Hours: 3

COMMUN 8001: Topics in Communication-General
Study of selected topics in Communication. Topic and credit may vary semester to semester. Repeatable upon consent of department.
Credit Hours: 3
Prerequisites: instructor’s consent

COMMUN 8085: Problems
Individual study not leading to thesis or dissertation.
Credit Hour: 1-99
Prerequisites: instructor’s consent

COMMUN 8090: Master’s Thesis Research in Communication
Research leading to thesis or dissertation. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor’s consent
COMMUN 8110: Introduction to Graduate Study in Communication  
Orientation to the field. Introduction to research methods. Production of research proposal. Emphasizes scholarly style of writing.  
**Credit Hours:** 3

COMMUN 8120: Seminar in Quantitative Methods in Communication  
Quantitative methods of speech research.  
**Credit Hours:** 3

COMMUN 8130: Topics in Qualitative Research Methods  
Examination of assumptions and techniques of qualitative methods adopting an interpretive framework for analyzing communication phenomena. May be repeated for credit.  
**Credit Hours:** 3

COMMUN 8140: Content Analysis  
Methods of Content Analysis; including consideration of reliability, validity, Computer content analysis, codebooks.  
**Credit Hours:** 3

COMMUN 8150: Seminar in Media Criticism  
Examination and application of various critical methodologies to media texts.  
**Credit Hours:** 3

COMMUN 8160: Rhetorical Criticism  
Principles, practice criticism (description, analysis, evaluation) of rhetorical artifacts.  
**Credit Hours:** 3

COMMUN 8170: Seminar in Quantitative Methods in Communication II  
The focus of this course will be the study and practice of various multivariate statistical methods commonly used in communication research. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** COMMUN 8120; instructor's consent required

COMMUN 8180: Seminar in Interpersonal Communication  
Examines theory and research concerning face-to-face dyadic interactions. Emphasis on context of interpersonal communication events and processes of interactional management.  
**Credit Hours:** 3

COMMUN 8410: Seminar in Organizational Communication Theory  
Exploration of the theoretical foundations of interpersonal communication in the organization, groups and team development, leadership, organizational decision making, motivation and power, bureaucracy, new information technologies, organizational effectiveness and the change process.  
**Credit Hours:** 3

COMMUN 8420: Seminar in Small Group Communication  
Identifies and analyzes theories and variables which explain, predict, and/or influence small group communication.  
**Credit Hours:** 3

COMMUN 8510: Seminar in Mass Communication Theory  
This course will offer graduate students a broad overview of extant theories employed in the study of mass communication and mass media effects. The class will focus on theories of society, theories of media, and the relationships between mass communication and culture. It will also focus on theories of media structures, media organizations, media content, audiences, and media effects.  
**Credit Hours:** 3

COMMUN 8610: Survey of Political Communication  
Survey of theory and research on political communication; emphasis on messages and audience responses to messages.  
**Credit Hours:** 3

COMMUN 9050: Research  
Completes comprehensive exams and writes a literature review.  
**Credit Hour:** 1-9

COMMUN 9090: Doctoral Dissertation Research in Communication  
Research leading to thesis or dissertation. Graded on a S/U basis only.  
**Credit Hour:** 1-99  
**Prerequisites:** instructor's consent

COMMUN 9170: Research Practicum  
Student conducts research under close supervision of faculty mentor. Goal: produce research report suitable for submission as convention paper, article, or book chapter. May be repeated once for credit.  
**Credit Hours:** 3  
**Prerequisites:** consent of mentor required; for advanced graduate students

COMMUN 9280: Seminar in Communication Theory  
Examines the nature of theory, the assumptions underlying theoretical approaches to communication, and surveys themes in contemporary communication theories.  
**Credit Hours:** 3

COMMUN 9310: Seminar in Family Communication  
Examines research and theory of family communication; focus on family communication patterns and processes, emphasis on key conceptual, methodological and theoretical aspects of family communication scholarship and research on family forms, processes and outcomes. Graded on A-F basis only.  
**Credit Hours:** 3

COMMUN 9330: Topics in Interpersonal Communication  
The course will review theory and research on topics related to the study of communication and interpersonal relationships. Subjects will rotate and include areas such as relational conflict, gender communication,
nonverbal communication, intercultural communication, or interpersonal violence and communication.

**Credit Hours:** 3  
**Prerequisites:** instructor’s consent

---

**COMMUN 9430: Topics in Organizational Communication**  
Examination of theory and research in selected areas of organizational communication. Topics vary by semester. Topics may include socialization, power, gender, emotions, and others. May be repeated for credit.

**Credit Hours:** 3

---

**COMMUN 9460: Topics in Political Communication**  
Examination of theory and research in selected areas of political communication. Topics vary by semester. Topics may include political polarization, political socialization, politics and the media, political advertising, politics and new media.

**Credit Hours:** 3

---

**COMMUN 9520: Seminar in Mass Media Effects**  
Explores current research in the processes and effects of mass communication. Readings pertain to the current social and psychological effects of media on viewers.

**Credit Hours:** 3

---

**COMMUN 9530: Topics in Mass Communication**  
Examination of theory and research in selected areas of media communication. Topics vary by semester. May be repeated for credit.

**Credit Hours:** 3

---

**COMMUN 9610: Seminar in Disaster, Crisis, and Risk**  
This course examines several lines of research from multiple disciplines that influence communication during disasters, crises, and emergencies. The course takes a phased approach to disasters, covers Federal government paradigms for disaster communication; crisis communication from an organizational and public relations perspective, risk perception, role of social media and emerging technologies in disasters, media coverage of disasters, and communication and recovery, resilience, and growth.

**Credit Hours:** 3

---

**COMMUN 9620: Political Campaign Debates**  
Theory and research on political campaign debates applied to analyses of candidate debates. Focus on primary and general presidential debates.

**Credit Hours:** 3

---

**COMMUN 9630: Political Advertising**  
Theory and research on political advertising applied to analyses of candidate advertisements. Focus on primary and general presidential television spots and web pages.

**Credit Hours:** 3

---

**COMMUN 9720: Seminar in Theories of Rhetoric and Criticism**  
Directed research on selected topics in rhetorical theory and criticism.

**Credit Hour:** 1-6  
**Prerequisites:** instructor’s consent

---

**Communication Science And Disorders (C_S_D)**

---

**C_S_D 1000: Introduction to Communication Science and Disorders**  
Nature of communication and its development; types of speech, language and hearing disorders; professional preparation, settings, and work of speech-language pathologists and audiologists. Course graded on S/U basis only.

**Credit Hour:** 1

---

**C_S_D 1050: Signed English**  
Introduction to the English-based sign system, Signed English, a system that has been developed to bridge the gap between English and American Sign Language. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Restricted to Communication, Science and Disorder majors only during Early Registration

---

**C_S_D 1060: Human Language**  
(same as ANTHRO 1060, LINGST 1060 and ENGLSH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data with some attention to application of linguistic study to other disciplines.

**Credit Hours:** 3

---

**C_S_D 1100: American Sign Language I**  
Introduction to American Sign Language (ASL). Development of basic expressive and receptive skills in ASL, the manual alphabet, numbers, and signed vocabulary. Includes an overview of ASL syntax and grammar. Course graded on A-F basis only.

**Credit Hours:** 5

---

**C_S_D 1200: American Sign Language II**  
This course is designed to increase students’ understanding of American Sign Language. Students will increase their sign vocabulary, expressive and receptive skills, an understanding of ASL syntax and grammar. Graded on A-F basis only.

**Credit Hours:** 5  
**Prerequisites:** Communication, C_S_D 1100 or equivalent

---

**C_S_D 2120: Survey of Communication Disorders**  
Systematic survey of the disorders of speech, language and hearing.

**Credit Hours:** 3

---

**C_S_D 2150: American Sign Language III**  
This course expands on vocabulary and signing skills developed in ASL II. Includes review of ASL grammar and extensive discussions of ASL.
linguistic structure and Deaf culture. Class is conducted entirely in ASL. Course graded on A-F basis only.

Credit Hours: 3
Prerequisites: C_S_D 1200 with minimum grade of C or instructor’s consent

C_S_D 3010: American Phonetics
(same as LINGST 3010). Analysis of production and acoustics of the sounds of speech with an emphasis on American English; practice in broad and narrow transcription using the International Phonetic Alphabet.

Credit Hours: 3

C_S_D 3020: Normal Language Development
(same as PSYCH 3810). Language development in children and changes in language processing during normal aging. Cognition and language; language learning processes; language sample analysis; relationship between spoken and written language.

Credit Hours: 3
Prerequisites: PSYCH 2410 or PSYCH 3140, or LINGST 4600

C_S_D 3210: Anatomy and Physiology of the Speech Mechanism
(same as LINGST 3210). Introduction to anatomical and functional aspects of the speech mechanism.

Credit Hours: 3
Prerequisites: Communication Science and Disorders majors only or instructor’s consent

C_S_D 3220: Speech Acoustics
(same as LINGST 3220). An introduction to the acoustic aspects of speech as they relate to the respiratory, phonatory, resonatory, and articulatory systems.

Credit Hours: 2
Prerequisites: Communication Science and Disorders majors only or instructor’s consent

C_S_D 3230: Hearing Science
Introduction to the nature of sound and its measurement; anatomy and physiology of the auditory and vestibular systems; psychoacoustic methods and phenomena.

Credit Hours: 3

C_S_D 4001: Topics in Communication Science and Disorders
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated with program consent.

Credit Hour: 1-99
Prerequisites: junior standing and instructor’s consent

C_S_D 4020: Language Disorders in Children
Overview of language disorders from early childhood through adolescence. Includes language disorders as primary disability and as secondary to other disabilities. Introduction to assessment and intervention.

Credit Hours: 3
Prerequisites: C_S_D 2120, C_S_D 3020, LINGST 4600. Communication Science and Disorder majors only

C_S_D 4030: Language Disorders of Adults
Introduction to acquired adult language disorders. Review of neuroanatomy/physiology, etiology and symptomatology, with introduction to assessment and treatment procedures.

Credit Hours: 2
Prerequisites: C_S_D 2120, C_S_D 3020, C_S_D 4430, and LINGST 4600 or instructor’s consent

C_S_D 4050: Clinical Applications of Sign Language
This course covers research, theory, and methods of using sign language to assist the communication of the Deaf, individuals with disabilities, and hearing learners. Use of sign language to improve literacy and classroom management will also be targeted. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C_S_D 1050 and C_S_D 1100 or equivalent. Instructor’s consent required

C_S_D 4200: Professional Voice
Voice production, common voice problems and their causes; healthy vocal habits and techniques to achieve optimal voice. Communication Science and Disorders students may not take for graduate credit.

Credit Hours: 2

C_S_D 4210: Fluency Disorders

Credit Hours: 2
Prerequisites: C_S_D 2120, C_S_D 3210

C_S_D 4220: Voice Disorders
Introduction to voice disorders in children and adults. Includes overview of perceptual and instrumental assessment procedures and selected treatment approaches.

Credit Hour: 1
Prerequisites: C_S_D 2120, C_S_D 3010, C_S_D 3210, C_S_D 4430

C_S_D 4320: Disorders of Phonology and Articulation
Overview of disorders of use and production of speech sounds with an emphasis on developmental disorders. Introduction to assessment and treatment.

Credit Hours: 3
Prerequisites: C_S_D 2120, C_S_D 3010, C_S_D 3020, C_S_D 4430, and LINGST 4600 or instructor’s consent

C_S_D 4330: Introduction to Audiology
Principles and techniques of audiological testing; etiologies of hearing impairment; current technologies in rehabilitation.

Credit Hours: 3
Prerequisites: C_S_D 2120, C_S_D 3020, C_S_D 4430, and LINGST 4600 or instructor’s consent

Communication Science and Disorders majors only
C_S_D 4340: Aural Rehabilitation
Identification, evaluation, and management of problems associated with hearing impairment in both children and adults. Includes issues related to speech/language development, communication, education, and social factors.

Credit Hours: 3
Prerequisites: C_S_D 3230 and C_S_D 4330

C_S_D 4430: Neurophysiology for Speech, Language, and Hearing
Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.

Credit Hours: 3
Prerequisites: Communications Science and Disorders majors only or instructor’s consent

C_S_D 4810: Psycholinguistics
(same as LINGST 4810). Examination of the knowledge and processes that underlie the human ability to produce and understand language.

Credit Hours: 3
Prerequisites: instructor’s consent

C_S_D 4820: Speech Perception
(same as LINGST 4820). Selected topics in the perceptual processing of speech sounds and spoken language.

Credit Hours: 3
Prerequisites: instructor’s consent

C_S_D 4830: Individual Differences in Language Processing
Examination of the normal variations exhibited across individuals in the acquisition, use, and representation of language. Also considered are individual differences seen in second language learning, the aging process, and language disorders.

Credit Hours: 2
Prerequisites: instructor’s consent

C_S_D 4840: Language and Development in Infancy
Overview of theory and research on the foundations and development of language in infancy (0 to 2 years), with an emphasis on relevant, interrelated areas of development, individual differences, early recognition of delay, and assessment.

Credit Hours: 3
Prerequisites: senior standing required. Instructor’s consent required

C_S_D 4900: Clinical Observation in Communication Disorders
Directed clinical observations designed to prepare the student for clinical practicum. Required for professional certification. Graded on a S/U basis only.

Credit Hours: 2
Prerequisites: senior standing and departmental consent. Communication Science and Disorders majors only

C_S_D 4945: Clinical Apprenticeship in Communication Disorders
Supervised observation and clinical experience in speech-language pathology for undergraduates.

Credit Hour: 1-3
Prerequisites: senior standing and departmental consent. Communication Science and Disorders majors only

C_S_D 4950: Research Apprenticeship
Research apprenticeship with a faculty member, assisting in the development and execution of research in communication processes and disorders. May be repeated to 6 hrs. maximum.

Credit Hour: 1-99
Prerequisites: instructor’s consent

C_S_D 4960: Directed Reading in Communication Science and Disorders
Independent reading; reports.

Credit Hour: 1-3
Prerequisites: instructor’s consent

C_S_D 4990: Honors Thesis
Individual honors thesis on a topic selected with a faculty advisor. Requires planning, conducting, and writing up a research project under the guidance of a faculty member. Successful completion of thesis and maintenance of 3.3 GPA, leads to degree with departmental honors. Graded on A-F basis only.

Credit Hours: 1-99
Prerequisites: Senior standing; 3.3 GPA; 3.5 GPA in Communication Science and Disorders courses; instructor’s consent. Restricted to Communication Science and Disorders students only

C_S_D 7001: Topics in Communication Science and Disorders
Study of selected topics in speech pathology/audiology. Topic and credit may vary from semester to semester. May be repeated for credit with instructor and departmental consent.

Credit Hour: 1-99
Prerequisites: instructor’s consent

C_S_D 7050: Clinical Applications of Sign Language
This course covers research, theory, and methods of using sign language to assist the communication of the Deaf, individuals with disabilities, and hearing learners. Use of sign language to improve literacy and classroom management will also be targeted. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C_S_D 1050 and C_S_D 1100 or equivalent. Instructor’s consent required

C_S_D 7085: Problems in Communication Science and Disorders
Individual study not leading to thesis or dissertation.

Credit Hour: 1-99
Prerequisites: instructor’s consent

C_S_D 7200: Professional Voice
Voice production, common voice problems and their causes; healthy vocal habits and techniques to achieve optimal voice. Communication Science Disorder students may not take for graduate credit.

Credit Hours: 2
<table>

<th>Course Title</th>
<th>Description</th>
<th>Credit Hours</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>C_S_D 7340</td>
<td>Aural Rehabilitation</td>
<td>Identification, evaluation, and management of problems associated with hearing impairment in both children and adults. Includes issues related to speech/language development, communication, education, and social factors.</td>
<td>3</td>
<td>C_S_D 3230 and C_S_D 4330</td>
</tr>
<tr>
<td>C_S_D 7400</td>
<td>Neurophysiology for Speech, Language, and Hearing</td>
<td>Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.</td>
<td>3</td>
<td>Communication Science and Disorders majors or instructor’s consent</td>
</tr>
<tr>
<td>C_S_D 7810</td>
<td>Psycholinguistics (same as LINGST 7810)</td>
<td>Examination of the knowledge and processes that underlie the human ability to produce and understand language.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>C_S_D 7820</td>
<td>Speech Perception (same as LINGST 7820)</td>
<td>Selected topics in the perceptual processing of speech sounds and spoken language.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>C_S_D 7830</td>
<td>Individual Differences in Language Processing</td>
<td>Examination of the normal variations exhibited across individuals in the acquisition, use, and representation of language. Also considered are individual differences seen in second language learning, the aging process, and language disorders.</td>
<td>2</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>C_S_D 7840</td>
<td>Language and Development in Infancy</td>
<td>Overview of theory and research on the foundations and development of language in infancy (0 to 2 years), with an emphasis on relevant, interrelated areas of development, individual differences, early recognition of delay, and assessment.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>C_S_D 8001</td>
<td>Topics in Communication Science and Disorders</td>
<td>Study of selected topics in speech pathology/audiology. Topic and credit may vary from semester to semester. May be repeated for credit with instructor and departmental consent.</td>
<td>1-99</td>
<td>instructor’s consent, instructor’s consent</td>
</tr>
<tr>
<td>C_S_D 8020</td>
<td>Developmental Language Disorders</td>
<td>Nature, etiology, assessment and management of childhood language disorders.</td>
<td>3</td>
<td>C_S_D 3210, C_S_D 4210, C_S_D 4430, or equivalent or instructor’s consent</td>
</tr>
<tr>
<td>C_S_D 8030</td>
<td>Acquired Language Disorders</td>
<td>Etiology, symptomatology, assessment and rehabilitation of acquired neurogenic communication disorders in aphasia, traumatic brain injury, dementia, and right-hemisphere syndrome.</td>
<td>3</td>
<td>C_S_D 4030 and C_S_D 4430, or instructor’s consent</td>
</tr>
<tr>
<td>C_S_D 8050</td>
<td>Research in Communication Science and Disorders</td>
<td>Independent research leading to a report but not to a thesis or dissertation.</td>
<td>1-99</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>C_S_D 8085</td>
<td>Problems in Communication Science and Disorders</td>
<td>Individual study not leading to thesis or dissertation.</td>
<td>1-99</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>C_S_D 8087</td>
<td>Seminar: Contemporary Topics in Speech-Language Pathology</td>
<td>Advanced study involving critical literature review and research on selected topics in speech and language. May be repeated for up to 6 credits.</td>
<td>1-3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>C_S_D 8090</td>
<td>Research in Communication Science and Disorders</td>
<td>Research leading to thesis or dissertation.</td>
<td>1-99</td>
<td>instructor’s consent. Graded on a S/U basis only</td>
</tr>
<tr>
<td>C_S_D 8150</td>
<td>Advanced Speech Science</td>
<td>Advanced exploration of the physiology of speech production and the corresponding acoustic characteristics of speech. Includes experience with pertinent laboratory instrumentation.</td>
<td>2</td>
<td>C_S_D 3210 and C_S_D 3220</td>
</tr>
<tr>
<td>C_S_D 8200</td>
<td>Motor Speech Disorders</td>
<td>Review of neuroanatomic mechanisms underlying speech production; etiology, symptomatology, epidemiology, and prognosis of motor speech disorders resulting from acquired neurological damage. Emphasis on clinical assessment and rehabilitation procedures.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>C_S_D 8210</td>
<td>Disorders of Fluency</td>
<td>Identification and remediation of fluency disorders in children and adults.</td>
<td>3</td>
<td>C_S_D 3210, C_S_D 4210, C_S_D 4430, or equivalent or instructor’s consent</td>
</tr>
</tbody>
</table>
C_S_D 8220: Disorders of Voice
Diagnosis and management of communicative disorders resulting from pathologies or abnormalities of the craniofacial structures and from pathologies or misuse of the phonatory systems.
Credit Hours: 2
Prerequisites: C_S_D 3210, C_S_D 4320 and C_S_D 4210 or instructor's consent

C_S_D 8230: Dysphagia
Etiology, symptomatology, and epidemiology of acquired and developmental swallowing disorders (dysphagia). Emphasis on instrumental and non-instrumental methods for assessing and treating dysphagia.
Credit Hours: 3
Prerequisites: C_S_D 3210, C_S_D 4220, C_S_D 8200; or instructor's consent

C_S_D 8240: Orofacial Anomalies
Credit Hour: 1
Prerequisites: C_S_D 3210, C_S_D 4320

C_S_D 8250: Clinical Methods in Speech-Language Pathology
An introduction to clinical procedures and evidence-based intervention methods relating to speech and language disorders. Topics include session design, data collection, measurement of progress, reporting of clinical results, and various treatment options. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: departmental consent

C_S_D 8260: Diagnosis in Speech-Language Pathology
General principles of diagnosis; specific diagnostic tools and procedures for various speech and language disorders.
Credit Hours: 3
Prerequisites: departmental consent

C_S_D 8320: Speech Sound Disorders
Principles of clinical assessment and treatment for speech sound disorders in children. Includes foundations in research on early speech sound acquisition, organic and developmental disorders, and treatment efficacy. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: C_S_D 3010 or equivalent or permission of instructor; departmental consent

C_S_D 8420: Reading and Language Disabilities in School-Age Children
Theories, research, and practice in reading development and disorders. Assessment and remediation of reading disabilities related to language disorders of various etiologies including developmental language disorders and head injury.
Credit Hours: 2
C_S_D 9087: Seminar: Contemporary Topics in Speech-Language Pathology
Advanced study involving critical literature review and research on selected topics in speech and language. May be repeated for up to 6 credits.
Credit Hour: 1-3
Prerequisites: instructor's consent

C_S_D 9090: Research in Communication Science and Disorders
Research leading to thesis or dissertation. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent

Computer Science (CMP_SC)

CMP_SC 1000: Introduction to Computer Science
This course introduces the Computer Science field, including the history of computers, career opportunities, and ethical/social issues. There will be lectures given by MU Computer Science faculty to discuss exciting fields as well as career advisement given by Computer Science industry representatives.
Credit Hour: 1
Prerequisites: Restricted to freshman/sophomore Computer Science/Information Technology majors

CMP_SC 1001: Topics in Computer Science
Topic and credit may vary from semester to semester. May be repeated upon consent of department.
Credit Hour: 1-99

CMP_SC 1050: Algorithm Design and Programming I
This course provides experience in developing algorithms, designing, implementing programs. Topics include syntax/semantics, flow control, loops, recursion, I/O, arrays, strings and pointers. Math Reasoning Proficiency Course.
Credit Hours: 3
Prerequisites: MATH 1100 or MATH 1160 or MATH 1500 (C- or better)

CMP_SC 2050: Algorithm Design and Programming II
A study of fundamental techniques and algorithms for representing and manipulating data structures. Topics include data abstraction, recursion, stacks, queues, linked lists, trees, efficient methods of sorting and searching, and Big-O analysis.
Credit Hours: 3
Prerequisites: CMP_SC 1050

CMP_SC 2111: Production Languages
The study of the syntax, semantics, and applications of one programming language suitable for large scale scientific or commercial projects, such as FORTRAN, COBOL, PL/1, C, or ADA. May be taken more than once for credit.
Credit Hour: 1-3
Prerequisites: CMP_SC 2050

CMP_SC 2270: Introduction to Digital Logic
Basic tools, methods and procedures to design combinational and sequential digital circuits and systems, including number systems, boolean algebra, logic minimization, adder design, memory elements, and finite state machine design.
Credit Hours: 3
Prerequisites: CMP_SC 1050

CMP_SC 2830: Introduction to the Internet, WWW and Multimedia Systems
This course will attempt to provide a comprehensive understanding of the evolution, the technologies, and the tools of the Internet. In particular, issues pertaining to the World Wide Web and Multimedia (HTML, CGI, Web based applications) will be discussed in detail.
Credit Hours: 3
Prerequisites: CMP_SC 2050

CMP_SC 3001: Topics in Computer Science
Current and new technical developments in computer science. May be repeated for 6 hours credit.
Credit Hour: 1-99
Prerequisites: departmental consent. For juniors and seniors

CMP_SC 3050: Advanced Algorithm Design
This class surveys fundamental algorithms and data structures that have wide practical applicability, including search trees and graph algorithms. Emphasis is placed on techniques for efficient implementation and good software development methodologies.
Credit Hours: 3
Prerequisites: CMP_SC 2050

CMP_SC 3280: Computer Organization and Assembly Language
Introduces computer architectures, programming concepts including parameter passing, I/O, interrupt handling, DMA, memory systems, cache, and virtual memory. Graded of A-F basis only.
Credit Hours: 3
Prerequisites: CMP_SC 2270 or ECE 1210

CMP_SC 3330: Object Oriented Programming
This course focuses on object-oriented programming concepts: abstraction, polymorphism, encapsulation, inheritance, interfaces, abstract classes, files, streams, and object serialization. Topics such as GUI and event-driven programming are also tackled.
Credit Hours: 3
Prerequisites: CMP_SC 2050
CMP_SC 3380: Database Applications and Information Systems
Covers fundamental topics of database management systems (DBMS) and database-enabled applications. Topics include a brief history of secondary storage and databases, data modeling, introductory SQL, an overview of current database trends, and current popular database systems. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 2050

CMP_SC 3530: UNIX Operating System
Introduction to the UNIX operating system and its interfaces including the file system, shell, editors, pipes and filters, input/output system, shell programming, program development including C, and document preparation.

Credit Hours: 3
Prerequisites: Advanced C programming experience

CMP_SC 3940: Internship in Computer Science
Computer-related experience in business or industry jointly supervised by faculty and computer professionals. Students should apply one semester in advance for consent of the supervising professor. Graded on a S/U basis only.

Credit Hour: 1-3
Prerequisites: CMP_SC 2050

CMP_SC 4001: Topics in Computer Science
Topic and credit may vary from semester to semester. May be repeated upon consent of department.

Credit Hour: 1-99

CMP_SC 4050: Design and Analysis of Algorithms I
This course reviews and extends earlier work with linked structures, sorting and searching algorithms, and recursion. Graph algorithms, string matching, combinatorial search, geometrical algorithms and related topics are also studied.

Credit Hours: 3
Prerequisites: CMP_SC 3050 and MATH 2320

CMP_SC 4060: String Algorithms
This course provides an introduction to algorithms that efficiently compute patterns in strings. Topics covered include basic properties of strings, data structures for processing strings, string decomposition, exact and approximate string matching algorithms. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 4050

CMP_SC 4070: Numerical Methods for Science and Engineering
Introduces basic numerical methods widely used by computer scientists/engineers. Students will use the MATLAB platform to computationally solve problems, such as finding roots of nonlinear equations, solving systems of equations, fitting curves, solving ODEs, finding eigenvalues, etc. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 2050, junior standing or instructor’s consent

CMP_SC 4080: Parallel Programming for High Performance Computing
(cross-leveled with CMP_SC 7080) This course will provide in-depth treatment of the evolution high performance computing architectures and parallel programming techniques for those architectures. We will cover topics such as: multi-process and multi-threaded programming; multi-node system architectures (clusters, grids, and clouds) and distributed programming; and general purpose GPU programming. To reinforce lecture topics, programming projects will be completed using multi-process and multi-threaded techniques for modern multicore, multiprocessor workstations; parallel and distributed programming techniques for modern multi-node systems; and general purpose GPU programming. Parallel algorithms will be investigated, selected, and then developed for various scientific data processing problems. Programming projects will be completed using C and C++ APIs and language extensions, e.g. threads (pthreads, Boost/C++), TBB, CILK, OpenMP, OpenMPI, CUDA and OpenCL.

Credit Hours: 3
Prerequisites: CMP_SC 3280 or ECE 3210 and CMP_SC 3050 or ECE 3220

CMP_SC 4085: Problems in Computer Science
Independent investigation or project in Computer Science. May be repeated to up 6 hours.

Credit Hour: 1-6
Prerequisites: senior standing in Computer Science

CMP_SC 4270: Computer Architecture I
Architectural features of high-performance computer systems including hierarchical and virtual memory, pipelining, vector processing and an introduction to multiple-processor systems.

Credit Hours: 3
Prerequisites: CMP_SC 2270

CMP_SC 4280: Network Systems Architecture
(same as ECE 4280; cross-leveled with CMP_SC 7280). The course covers network systems (interconnects and switch fabrics, network considerations) and relevant networking applications at the network, transport and application layer. Prerequisites: ECE 3210 or CMP_SC 3280 and ECE 3220 or CMP_SC 2050

Credit Hours: 4

CMP_SC 4320: Software Engineering I
Overview of software life cycle, including topics in systems analysis and requirements specification, design, implementation testing and maintenance. Uses modeling techniques, project management, peer review, quality assurance, and system acquisition.

Credit Hours: 3
Prerequisites: CMP_SC 3380

CMP_SC 4330: Object Oriented Design I
Building on a prior knowledge of program design and data structures, this course covers object-oriented design, including classes, objects, inheritance, polymorphism, and information hiding. Students will apply
techniques using a modern object-oriented implementation language. Enrollment limited to undergraduate students only.

**Credit Hours:** 3
**Prerequisites:** CMP_SC 2050

**CMP_SC 4380: Database Management Systems I**
Fundamental concepts of current database systems with emphasis on the relational model. Topics include entity-relationship model, relational algebra, query by example, indexing, query optimization, normal forms, crash recovery, web-based database access, and case studies. Project work involves a modern DBMS, such as Oracle, using SQL.

**Credit Hours:** 3
**Prerequisites:** CMP_SC 3380

**CMP_SC 4410: Theory of Computation I**
An introductory study of computation and formal languages by means of automata and related grammars. The theory and applications of finite automata, regular expressions, context free grammars, pushdown automata and Turing machines are examined. May not be counted toward Computer Science MS/PHD.

**Credit Hours:** 3
**Prerequisites:** MATH 2320

**CMP_SC 4430: Compilers I**
(cross-leveled with CMP_SC 7430). Introduction to the translation of programming languages by means of interpreters and compilers. Lexical analysis, syntax specification, parsing, error-recovery, syntax-directed translation, semantic analysis, symbol tables for block structured languages, and run-time storage organization. May not be counted toward Computer Science MS/PHD.

**Credit Hours:** 3
**Prerequisites:** MATH 2320, CMP_SC 3280 and CMP_SC 4450

**CMP_SC 4440: Malware Analysis and Defense**
Malicious software or "malware" is a security threat. This course teaches students to understand the nature and types of viruses and how they are threats; teaches techniques used to prevent, detect, repair and defend against viruses and worms; teaches program binary examination tools to detect malicious code; and teaches ethical issues surrounding computer security violations.

**Credit Hours:** 3
**Prerequisites:** CMP_SC 3280, ECE 3210 or equivalent

**CMP_SC 4450: Principles of Programming Languages**
An introduction to the structure, design and implementation of programming languages. Topics include syntax, semantics, data types, control structures, parameter passing, run-time structures, and functional and logic programming. May not be counted toward Computer Science MS/PHD.

**Credit Hours:** 3
**Prerequisites:** CMP_SC 2050

**CMP_SC 4460: Introduction to Cryptography**
(cross-leveled with CMP_SC 7460). Cryptography is an important technique used to achieve security goals in an untrusted and possibly adversarial environment. The goals of this course are: (1) to provide students with a solid background with basic cryptographic techniques and their applications, (2) to impart knowledge of standard cryptographic algorithms and (3) to foster understanding of the correct use of cryptographic techniques.

**Credit Hours:** 3
**Prerequisites:** CMP_SC 3050 and MATH 2320

**CMP_SC 4520: Operating Systems I**
Basic concepts, theories and implementation of modern operating systems including process and memory management, synchronization, CPU and disk scheduling, file systems, I/O systems, security and protection, and distributed operating systems.

**Credit Hours:** 3
**Prerequisites:** CMP_SC 3050 and MATH 1700

**CMP_SC 4610: Computer Graphics I**
Basic concepts and techniques of interactive computer graphics including hardware, software, data structures, mathematical manipulation of graphical objects, the user interface, and fundamental implementation algorithms.

**Credit Hours:** 3
**Prerequisites:** CMP_SC 3050 and MATH 1500 or MATH 1300 and MATH 1400

**CMP_SC 4620: Physically Based Modeling and Animation**
This course introduces students to physically based modeling and animation methodology for computer graphics and related fields such as computer vision, visualization, biomedical imaging and virtual reality. We will explore current research issues and will cover associated computational methods for simulating various visually interesting physical phenomena. This course should be appropriate for graduate students in all areas as well as advanced undergraduate students. Graded on A-F basis only.

**Credit Hours:** 3
**Prerequisites:** CMP_SC 4610, good knowledge of C or C++ programming, no physics background necessary

**CMP_SC 4650: Digital Image Processing**
(same as ECE 4850). Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

**Credit Hours:** 3
**Prerequisites:** CMP_SC 2050, STAT 4710 or instructor's consent

**CMP_SC 4670: Digital Image Compression**
(same as ECE 4675; cross-leveled with CMP 7670). Covers digital image formation, information theory concepts, and fundamental lossless and lossy image compression techniques including bit plane encoding, predictive coding, transform coding, block truncation coding, vector quantization, subband coding and hierarchical coding.

**Credit Hours:** 3
**Prerequisites:** CMP_SC 2050
CMP_SC 4720: Introduction to Machine Learning and Pattern Recognition
(Same as ECE 4720) This course provides foundations and methods in machine learning and pattern recognition that address the problem of programming computers to optimize performance by learning from example data or expert knowledge. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CMP_SC 2050 and STAT 4710 or instructor consent

CMP_SC 4730: Building Intelligent Robots
(same as ECE 4340). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures.
Credit Hours: 4
Prerequisites: junior standing and programming experience in one of the following programming languages - Basic, C, C++, or Java

CMP_SC 4740: Interdisciplinary Introduction to NLP
(same as LINGST 4740; cross-leveled with CMP_SC 7740). The goal of this course is to enable students to develop substantive NLP applications. Focus on current structural and statistical techniques for the parsing and interpretation of texts.
Credit Hours: 3
Prerequisites: senior standing

CMP_SC 4750: Artificial Intelligence I
Introduction to the concepts and theories of intelligent systems. Various approaches to creating intelligent systems, including symbolic and computational approaches, insight into the philosophical debates important to understanding AI.
Credit Hours: 3
Prerequisites: CMP_SC 3050 and junior standing

CMP_SC 4770: Introduction to Computational Intelligence
(same as ECE 4870). Introduction to the concepts, models and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization.
Credit Hours: 3

CMP_SC 4830: Science and Engineering of the World Wide Web
This course will study the science and engineering of the World Wide Web. We will study the languages, protocols, services and tools that enable the web. Emphasis will be placed on basics and technologies.
Credit Hours: 3
Prerequisites: CMP_SC 2830

CMP_SC 4850: Computer Networks I
(cross-leveled with CMP_SC 7850). Introduction to concepts and terminology of data communications and computer networking. Basic protocols and standards, applications of networking, routing algorithms, congestion avoidance, long-haul and local networks.
Credit Hours: 3
Prerequisites: CMP_SC 2270 or ECE 1210 and MATH 2320

CMP_SC 4860: Network Security
Principles and practice of cryptography, network security, and computer system security. It includes symmetric and asymmetric cryptography, authentication, security applications such as secure email, IP security, Web security, and system security issues such as intruders, viruses, worms, Trojan horses, and fireworks. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CMP_SC 4850

CMP_SC 4870: Wireless and Mobile Networks
Concepts and techniques in wireless and mobile networks: cellular concepts, wireless physical layer, wireless MAC protocol, mobility management, power management, wireless network security, wireless telecommunication system, wireless LAN, wireless ad hoc networking, wireless personal area network. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CMP_SC 4850

CMP_SC 4970: Senior Capstone Design I
Design projects emphasizing team work, communication skills, and prototyping. Covers professional ethics, intellectual property/patenting, knowledge of engineering literature, safety, economic and environmental impact of technology. Essays, oral and written reports.
Credit Hours: 3
Prerequisites: CMP_SC 4320 and senior standing

CMP_SC 4980: Senior Capstone Design II
Course entails completion of CMP_SC 4970 design project. Design prototyping, testing, evaluation, presentation, and preparation of documentation.
Credit Hours: 3
Prerequisites: CMP_SC 4970

CMP_SC 4990: Undergraduate Research in Computer Science
Independent investigation or project in Computer Science.
Credit Hour: 0-6
Prerequisites: senior standing in Computer Science. May be repeated to 6 hours

CMP_SC 4995: Undergraduate Research in Computer Science - Honors
Independent investigation to be presented as an undergraduate honors thesis.
Credit Hour: 1-6
Prerequisites: honors student in Computer Science

CMP_SC 7001: Topics in Computer Science
Topic and credit may vary from semester to semester. May be repeated upon consent of department.
Credit Hour: 1-99
**CMP_SC 7010: Computational Methods in Bioinformatics**
(Same as INFOINST 7010) Introduces the fundamental concepts and basic computational techniques for mainstream bioinformatics problems. Emphasis will be placed on the computational aspect of bioinformatics, including formulation of a biological problem in a computable problem, design of scoring functions and algorithms, confidence assessment of prediction results and software development.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 4050 and STAT 4710

---

**CMP_SC 7050: Design and Analysis of Algorithms I**
This course reviews and extends earlier work with linked structures, sorting and searching algorithms, and recursion. Graph algorithms, string matching, combinatorial search, geometrical algorithms and related topics are also studied. Cannot be counted toward CS MS/PHD.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 3050 and MATH 2320

---

**CMP_SC 7060: String Algorithms**
This course provides an introduction to algorithms that efficiently compute patterns in strings. Topics covered include basic properties of strings, data structures for processing strings, string decomposition, exact and approximate string matching algorithms. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 4050

---

**CMP_SC 7070: Numerical Methods for Science and Engineering**
Introduces basic numerical methods widely used by computer scientists/engineers. Students will use the MATLAB platform to computationally solve problems, such as finding roots of nonlinear equations, solving systems of equations, fitting curves, solving ODEs, finding eigenvalues, etc. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2050 or instructor’s consent

---

**CMP_SC 7080: Parallel Programming for High Performance Computing**
(cross-leveled with CMP_SC 4080). This course will provide in-depth treatment of the evolution high performance computing architectures and parallel programming techniques for those architectures. We will cover topics such as: multi-process and multi-threaded programming; multi-node system architectures (clusters, grids, and clouds) and distributed programming; and general purpose GPU programming. To reinforce lecture topics, programming projects will be completed using multi-process and multi-threaded techniques for modern multicore, multiprocessor workstations; parallel and distributed programming techniques for modern multi-node systems; and general purpose GPU programming. Parallel algorithms will be investigated, selected, and then developed for various scientific data processing problems. Programming projects will be completed using C and C++ APIs and language extensions, e.g. threads (pthreads, Boost/C++), TBB, CILK, OpenMP, OpenMPI, CUDA and OpenCL.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 3280 or ECE 3210 and CMP_SC 3050 or ECE 3220

---

**CMP_SC 7087: Seminar in Computer Science**
Reviews of recent investigations, projects of major importance.

**Credit Hours:** 1

---

**CMP_SC 7270: Computer Architecture I**
Architectural features of high-performance computer systems including hierarchical and virtual memory, pipelining, vector processing and an introduction to multiple-processor systems.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 3210 or CMP_SC 2270

---

**CMP_SC 7280: Network Systems Architecture**
(same as ECE 7280; Cross-leveled with CMP_SC 4280). The course covers network systems (interconnects and switch fabrics, network considerations) and relevant networking applications at the network, transport and application layer.

**Credit Hours:** 4  
**Prerequisites:** ECE 3210 or CMP_SC 3280 and ECE 3220 or CMP_SC 2050

---

**CMP_SC 7320: Software Engineering I**
(cross-leveled with CMP_SC 4320). Overview of software life cycle, including topics in systems analysis and requirements specification, design, implementation testing and maintenance. Uses modeling techniques, project management, peer review, quality assurance, and system acquisition. May not be counted toward CS MS/PHD.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 3380

---

**CMP_SC 7380: Database Management Systems I**
Fundamental concepts of current database systems with emphasis on the relational model. Topics include entity-relationship model, relational algebra, query by example, indexing, query optimization, normal forms, crash recovery, web-based database access, and case studies. Project work involves a modern DBMS, such as Oracle, using SQL.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2050

---

**CMP_SC 7410: Theory of Computation I**
An introductory study of computation and formal languages by means of automata and related grammars. The theory and applications of finite automata, regular expressions, contextfree grammars, pushdown automata and Turing machines are examined. May not be counted toward CS MS/PHD.

**Credit Hours:** 3  
**Prerequisites:** MATH 2320

---

**CMP_SC 7430: Compilers I**
(cross-leveled with CMP_SC 4430). Introduction to the translation of programming languages by means of interpreters and compilers. Lexical analysis, syntax specification, parsing, error-recovery, syntax-directed translation, semantic analysis, symbol tables for blockstructured languages, and run-time storage organization. May not be counted toward CS MS/PHD.

**Credit Hours:** 3
Prerequisites: MATH 2320 and CMP_SC 3280 and CMP_SC 4450

CMP_SC 7440: Malware Analysis and Defense
(cross-leveled with CMP_SC 4440). Malicious software or "malware" is a security threat. This course teaches students to understand the nature and types of viruses and how they are threats; teaches techniques used to prevent, detect, repair and defend against viruses and worms; teaches program binary examination tools to detect malicious code; and ethical issues surround computer security violations.
Credit Hours: 3
Prerequisites: CMP_SC 3280, ECE 3210 or equivalent

CMP_SC 7450: Principles of Programming Languages
An introduction to the structure, design and implementation of programming languages. Topics include syntax, semantics, data types, control structures, parameter passing, run-time structures, and functional and logic programming. May not be counted toward CS MS/PHD.
Credit Hours: 3
Prerequisites: CMP_SC 2050

CMP_SC 7460: Introduction to Cryptography
(cross-leveled with CMP_SC 4460). Cryptography is an important technique used to achieve security goals in an untrusted and (possibly) adversarial environment. The goals of this course are: (1) to provide students with a solid back- ground with basic cryptographic techniques and their applications, (2) impart knowledge of standard cryptographic algorithms and (3) foster understanding of the correct use of cryptographic techniques.
Credit Hours: 3
Prerequisites: CMP_SC 3050 and MATH 2320

CMP_SC 7520: Operating Systems I
Basic concepts, theories and implementation of modern operating systems including process and memory management, synchronization, CPU and disk scheduling, file systems, I/O systems, security and protection, and distributed operating systems. Cannot be counted toward CS MS/PHD.
Credit Hours: 3
Prerequisites: CMP_SC 3050 and MATH 1700

CMP_SC 7610: Computer Graphics I
Basic concepts and techniques of interactive computer graphics including hardware, software, data structures, mathematical manipulation of graphical objects, the user interface, and fundamental implementation algorithms.
Credit Hours: 3
Prerequisites: CMP_SC 3050 and either MATH 1500 or MATH 1300 and MATH 1400

CMP_SC 7620: Physically Based Modeling and Animation
(cross-leveled with CMP_SC 4620). Introduces fundamental algorithms and techniques including interpolation, quaternions, rigid body dynamics, kinematics, particle systems, free form and dynamic deformations, spring and damper systems and computational natural phenomena simulation.
Credit Hours: 3
Prerequisites: CMP_SC 4610 or CMP_SC 7610, C/C++ programming, linear algebra

CMP_SC 7650: Digital Image Processing
(same as ECE 7655). Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.
Credit Hours: 3
Prerequisites: CMP_SC 2050, STAT 7710 or instructor’s consent

CMP_SC 7670: Digital Image Compression
(same as ECE 7675; cross-leveled with CMP_SC 4670). Covers digital image formation, information theory concepts, and fundamental lossless and lossy image compression techniques including bit plane encoding, predictive coding, transform coding, block truncation coding, vector quantization, subband coding and hierarchical coding.
Credit Hours: 3
Prerequisites: CMP_SC 2050

CMP_SC 7720: Introduction to Machine Learning and Pattern Recognition
(same as ECE 7720). This course provides foundation knowledge and methods in machine learning and pattern recognition that address the problem of programming computers to optimize performance by learning from example data or expert knowledge. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CMP_SC 2050 and STAT 4710 or instructor’s consent

CMP_SC 7730: Building Intelligent Robots
(same as ECE 7340). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures. Prerequisites: programming experience in one of the following programming languages: Basic, C, C++, or Java.
Credit Hours: 4

CMP_SC 7740: Interdisciplinary Introduction to Natural Language Processing
(same as LINGST 7740; cross-leveled with CMP_SC 4740). The goal of this course is to enable students to develop substantive NLP applications. Focus on current structural and statistical techniques for the parsing and interpretation of text.
Credit Hours: 3

CMP_SC 7750: Artificial Intelligence I
Introduction to the concepts and theories of intelligent systems. Various approaches to creating intelligent systems, including symbolic and computational approaches, insight into the philosophical debates important to understanding AI.
Credit Hours: 3
Prerequisites: CMP_SC 3050
**CMP_SC 7770: Introduction to Computational Intelligence**
(same as ECE 7870). Introduction to the concepts, models and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization.

**Credit Hours:** 3

**Prerequisites:** CMP_SC 3330 and CMP_SC 2830

---

**CMP_SC 7830: Science and Engineering of the World Wide Web**

This course will study the science and engineering of the World Wide Web. We will study the languages, protocols, services and tools that enable the web. Emphasis will be placed on basics and technologies.

**Credit Hours:** 3

**Prerequisites:** CMP_SC 3330 and CMP_SC 2830

---

**CMP_SC 7850: Computer Networks I**
(cross-leveled with CMP_SC 4850). Introduction to concepts and terminology of data communications and computer networking. Basic protocols and standards, applications of networking, routing algorithms, congestion avoidance, long-haul and local networks.

**Credit Hours:** 3

**Prerequisites:** CMP_SC 2270 or ECE 1210 and MATH 2320

---

**CMP_SC 7860: Network Security**

Principles and practice of cryptography, network security, and computer system security. It includes symmetric and asymmetric cryptography, authentication, security applications such as secure email, IP security, Web security, and system security issues such as intruders, viruses, worms, Trojan horses, and firewalls.

**Credit Hours:** 3

**Prerequisites:** CMP_SC 7850 or CMP_SC 4850

---

**CMP_SC 7870: Wireless and Mobile Networks**

Concepts and techniques in wireless and mobile networks: cellular concepts, wireless physical layer, wireless MAC protocol, mobility management, power management, wireless network security, wireless telecommunication system, wireless LAN, wireless ad hoc networking, wireless personal area network. Prerequisites: CMP_SC 7850 or CMP_SC 4850

**Credit Hours:** 3

---

**CMP_SC 7870: Advanced Topics in Computer Science**

Topic may vary from semester to semester. May be repeated upon consent of department.

**Credit Hours:** 3

**Prerequisites:** varies by topic

---

**CMP_SC 8050: Design and Analysis of Algorithms II**

Techniques for the design and analysis of correct, efficient algorithms. Topics include graph, geometric, and algebraic/numeric algorithms, NP-completeness, and parallel algorithms.

**Credit Hours:** 3

**Prerequisites:** CMP_SC 4050

---

**CMP_SC 8060: Survey of Advanced Algorithm Techniques**

This class provides a survey of important algorithmic techniques, some of which are emerging right now, and show that they are much easier to understand than they first appear. The class will create a renewed appreciation for what makes Computer Science such a fun/interesting discipline.

**Credit Hours:** 3

**Prerequisites:** CMP_SC 4050

---

**CMP_SC 8085: Problems in Computer Science**

Independent study project work with a professor in computer science.

**Credit Hours:** 1-4

**Prerequisites:** instructor consent

---

**CMP_SC 8090: Computational Geometry**

Studies fundamental geometric problems within the framework of analysis of algorithms: convex hull algorithms in the plane and in general dimension, Voronoi diagram construction and applications to the solution of proximity problems, intersection problems, and geometric searching problems.

**Credit Hours:** 3

**Prerequisites:** CMP_SC 4050 and MATH 2300, or instructor’s consent

---

**CMP_SC 8110: Problem Solving in Bioinformatics**

(Same as INFOINST 8010). The course covers a variety of bioinformatics research topics such as biological sequence comparison, protein structure prediction, protein and gene function prediction, and inference and modeling of biological networks. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** INFOINST 7010 or CMP_SC 7010

---

**CMP_SC 8120: Structural Bioinformatics of Proteins, Complexes, System**

(same as INFOINST 8210). Main course objective is to provide an introduction to the state-of-the-art methods in structural bioinformatics. The course will cover the methods that are applied to a wide range of biomolecular objects from protein domains and small proteins to large biological systems. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** INFOINST 7010 or CMP_SC 7010

**Recommended:** CMP_SC 4050 or CMP_SC 7050

---

**CMP_SC 8130: Computational Genomics**

(same as INFOINST 8310). This course introduces computational concepts and methods of genomics to students. The course covers genome structure, database, sequencing, assembly, annotation, gene and RNA finding, motif and repeats identification, single nucleotide polymorphism, and epigenomics. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** INFOINST 7010 or CMP_SC 7010

**Recommended:** CMP_SC 4050 or CMP_SC 7050

---

**CMP_SC 8150: Integrative Methods in Bioinformatics**

(same as INFOINST 8150), Introduces the most popular experimental methods from the point of view of the information sources that can be used. Students will use data obtained directly from biological experiments
and learn how to suggest new experiments to improve results. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** INFOINST 7010 or CMP_SC 7010

---

**CMP_SC 8160: Content Management in Biomedical Informatics**  
(same as INFOINST 8860). This course introduces theory and techniques for content extraction, indexing, and retrieval of biomedical media databases. Topics include biomedical media databases, feature extraction methods, advanced database indexing structures, query methods, and result visualization. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 7380, INFOINST 7010

---

**CMP_SC 8170: Computational Modeling of Molecular Structures**  
This course uses a problem solving paradigm to investigate common principles, data structures, algorithms, challenges, and solutions in computationally modeling (constructing) 3D structures of proteins, RNAs, chromosomes, and genomes.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 7010

---

**CMP_SC 8180: Machine Learning Methods for Biomedical Informatics**  
(same as INFOINST 8880). Teaches statistical machine learning methods and applications in biomedical informatics. Covers theories of advanced statistical machine learning methods and how to develop machine learning methods to solve biomedical problems. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 7050 and INFOINST 7010 or CMP_SC 7010 or CMP_SC 7005

---

**CMP_SC 8190: Computational Systems Biology**  
(same as INFOINST 8390). This course covers current theories and methods in the modeling and analysis of high-throughput experiments such as microarrays, proteomics, and metabolomics. Topics include the inference of causal relations from experimental data and reverse engineering of cellular systems. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** INFOINST 7010 or CMP_SC 7010; INFOINST 8010

---

**CMP_SC 8270: Computer Architecture II**  
Study of array processors, multiprocessors, multicomputers, and networked computing systems. Topics include architectures, interconnection networks, communication mechanisms, distributed memories and security. Introduction to parallel algorithm design.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 4210 or ECE 4270

---

**CMP_SC 8320: Software Engineering II**  
Further discussion of software development methodology.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 4320

---

**CMP_SC 8330: Object Oriented Design II**  
Software system design using classes and their properties of abstraction, inheritance, dynamic binding, and polymorphism. Focus on object-oriented design of systems such as windows, graphics systems, and operating system.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 4330

---

**CMP_SC 8370: Data Mining and Knowledge Discovery**  
Course topics include an introduction to fundamental concepts, data mining techniques from machine learning and pattern recognition areas, association rules, web mining, spatial mining, temporal mining, multimedia/multimodal database mining, and database mining, and geospatial information mining.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 7380

---

**CMP_SC 8380: Database Management Systems II**  
Further study in the theory, design, organization and implementation of databases and database management systems. Topics include: high-dimensional database indexing, content-based retrieval from image and video databases, object-relational databases, object-oriented databases, and data mining.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 7380

---

**CMP_SC 8390: Information Indexing and Retrieval**  
Theory and techniques for the modeling, indexing, and retrieval of text-based and multimedia databases. Topics include introduction to different information retrieval models, retrieval evaluation, query languages, query operations, and indexing/searching methods.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2050 and CMP_SC 2110

---

**CMP_SC 8410: Theory of Computation II**  
An advanced study of computational and formal languages by means of automata and related grammars. Turing machines, decidability, computability, computational complexity, language translation, and recent trends in automata theory.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 7410

---

**CMP_SC 8430: Compilers II**  
Further study of the compilation process. Compiler generation tools, parsing methods, code generation, data-flow analysis, code optimization, error handling, discussion of programming language features and their relationship to the compilation process.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 7430

---

**CMP_SC 8440: Information Security: A Language-Based Approach**  
This course focuses on language-based techniques for information flow security. Students will gain a solid background in information security, be encouraged to do further research and be exposed to important/
promising trends in state-of-the-art computer security. Prerequisites: CMP_SC 4450 or CMP_SC 7450

Credit Hours: 3
Prerequisites: CMP_SC 4050, STAT 4710

**CMP_SC 8770: Neural Networks**
(same as ECE 8890). The course will consider computing systems based on neural networks and learning models along with implementations and applications of such systems.

Credit Hours: 3
Prerequisites: CMP_SC 4870 or CMP_SC 7870 or instructor’s consent

**CMP_SC 8790: Filtering, Tracking and Data Fusion**
This course will cover theory and applications of rigorous and efficient techniques for determining the state of an observed system from a series of imperfect observations or measurements. Specific topics to be covered include semidefinite matrix theory, the Kalman filter, the Unscented Transform, Covariance Intersection and related techniques. Applications of these techniques include head and hand tracking in virtual reality systems, robotics, and distributed information fusion.

Credit Hours: 3
Prerequisites: CMP_SC 2050, MATH 2300 or Linear Algebra or Matrix Theory

**CMP_SC 8850: Computer Networks II**
In-depth analysis and evaluation of computer networking architectures, protocols and algorithms, network security, distributed database and computational networks, routing and congestion control, domains and internetworking.

Credit Hours: 3
Prerequisites: CMP_SC 7850

**CMP_SC 8860: Parallel and Distributed Processing**
This course covers basic issues of parallel and distributed processing, including parallel and distributed architectures and models, parallel programming, and parallel algorithms and applications.

Credit Hours: 3
Prerequisites: CMP_SC 4050

**CMP_SC 8870: Modeling and Management of Uncertainty**
(same as ECE 8870). Theoretical and practical issues in the modeling and management of uncertainty. Topics include probabilistic uncertainty, belief theory and fuzzy set theory. Applications to computer vision, pattern recognition and expert systems. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECE 4870 or ECE 7870 or CMP_SC 4770 or CMP_SC 7770 or instructor’s consent

**CMP_SC 8880: Wireless Embedded Systems**
This course introduces wireless embedded systems and focuses on the nature of computation and communication needed to design large-scale, distributed, and wirelessly connected embedded systems. We will study emerging technology and standards by reading papers and doing projects on real systems.

Credit Hours: 3
Prerequisites: CMP_SC 4050 and CMP_SC 4850 or instructor’s consent

**CMP_SC 8880: Research Masters Project in Computer Science**
Investigation and research of a topic, not leading to a thesis. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: departmental consent

**CMP_SC 8990: Research-Masters Thesis Computer Science**
Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: advisor’s consent

**CMP_SC 9001: Advanced Topics in Computer Science - PhD**
New and current technical developments in computer science. For PhD students.
Credit Hour: 1-4

**CMP_SC 9990: Research-Doctoral Dissertation Computer Science**
Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: advisor’s consent

**Dermatology (DERM)**

**DERM 6233: ABS Dermatology Research**
ABS Dermatology Research
Credit Hours: 5

**DERM 6235: ABS Dermatology Research and Review**
ABS Dermatology Research and Review
Credit Hour: 5-10

**DERM 6450: Dermatology I**
The Dermatology rotation is designed to provide the medical student with a broad general base in clinical dermatology for the non-dermatologist. During the rotation the student should: Enhance the visual diagnostic skills and related reasoning used in dermatology; Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist; Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health; Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases; Learn appropriate use of both systemic and topical dermatologic medications; Learn basic punch, shave, and excisional biopsy techniques; Become proficient in skin surveillance, especially early detection of skin cancer. Students are evaluated using a standard evaluation. The student’s knowledge of subject matter is evaluated in the following settings: informal discussion during clinics, ward rounds, inpatient consultation rounds and scheduled conferences.
Credit Hours: 5
Prerequisites: Internal Medicine Clerkship
DERM 6750: Dermatology I - Rural
The Dermatology rotation is designed to provide the medical student with a broad general base in clinical dermatology for the non-dermatologist. During the rotation the student should: Enhance the visual diagnostic skills and related reasoning used in dermatology. Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist. Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health. Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases. Learn appropriate use of both systemic and topical dermatologic medications. Learn basic punch, shave, and excisional biopsy techniques. Become proficient in skin surveillance, especially early detection of skin cancer.

Credit Hours: 5

DERM 6856: Dermatology II
This elective rotation is an expansion of the objective goals outlined for Dermatology I. The student is expected to expand the depth and breadth of his/her dermatology experiences and knowledge. Enhance the visual diagnostic skills and related reasoning used in dermatology. Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist. Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health. Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases. Learn appropriate use of both systemic and topical dermatologic medications. Learn basic punch, shave, and excisional biopsy techniques. Become proficient in skin surveillance, especially early detection of skin cancer. As Dermatology II is an extension of the Dermatology I curriculum, Dermatology II students are expected to master the above objectives. In addition, they are expected to expand their clinical skills related to the diagnosis and treatment of dermatologic diseases and they will have increased responsibilities for patient education. It is expected that they will further their surgical skills including biopsies, simple excisions, and basic cryotherapy. They will also become proficient in basic laboratory procedures including KOH and scabies prep.

Credit Hours: 5

Diagnostic Medical Ultrasound (DMU)

DMU 1000: Introduction to Diagnostic Medical Ultrasound
Introduction to the profession of diagnostic medical ultrasound. Imaging characteristics, educational requirements, professional trends. Observation opportunities. Graded on S/U basis only.

Credit Hour: 1

DMU 4001: Topics in Diagnostic Medical Ultrasound
Organized study of selected topics in medical ultrasound. Topics may vary. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-99
Prerequisites: restricted to Diagnostic Medical Ultrasound undergraduate students; program director’s consent

DMU 4085: Problems in Diagnostic Medical Ultrasound
Independent study leading to a special project or paper. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-99
Prerequisites: restricted to Diagnostic Medical Ultrasound undergraduate students only; program director’s consent

DMU 4200: Principles of Diagnostic Medical Ultrasound
Principles and history of ultrasound, ultrasound equipment, sonographic techniques, aspects of patient care.

Credit Hours: 3
Prerequisites: departmental consent

DMU 4234: Clinical Pathophysiology
Abnormal function of organ systems in the presence of disease; clinical manifestations and medical management.

Credit Hours: 3

DMU 4309: Normal Ultrasound Clinical
Integration of ultrasound instrumentation and clinical practice in a laboratory setting. Interaction between the sonographer, equipment and patient.

Credit Hours: 5
Prerequisites: DMU 4312, DMU 4313 and DMU 4315; instructor’s consent

DMU 4311: Pathological Images of Ultrasound
Disease presentation in ultrasound imaging. Practical aspects of ultrasound scanning techniques in pathology.

Credit Hours: 3
Prerequisites: DMU 4200, DMU 4312 and DMU 4315; instructor’s consent

DMU 4312: Sectional Anatomy
(same as RA_SCI 4110). A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques.

Credit Hours: 3
Prerequisites: instructor’s consent

DMU 4313: Ultrasound Physics
Principles of diagnostic ultrasound physics. Sound wave characteristics, tissue interaction, power intensity, and Doppler physics.

Credit Hours: 3
Prerequisites: MATH 1100, CHEM 1100 or CHEM 1320, PHYSCS 1210, and departmental consent

DMU 4314: Abdominal Ultrasound
(cross-leveled with DMU 7314). Differentiation between normal and pathological ultrasound studies of the abdomen. Differential diagnosis of pathological states.

Credit Hours: 5
DMU 4312: DMU 4309 and DMU 4311; instructor's consent

DMU 4315: Ultrasound Instrumentation
Integration of ultrasound physics and instrumentation components in a laboratory setting. Practice in modes of operation and safety.

Credit Hours: 3
Prerequisites: DMU 4200; instructor's consent

DMU 4318: Gynecology Ultrasound

Credit Hours: 3
Prerequisites: DMU 4312, DMU 4309 and DMU 4311

DMU 4320: Obstetrics Ultrasound
Study of normal and abnormal obstetrical ultrasound anatomy. Distinction between normal and pathological OB ultrasound studies with emphasis on differential diagnosis.

Credit Hours: 3
Prerequisites: DMU 4312, DMU 4309 and DMU 4311

DMU 4322: Superficial Organs Ultrasound
Ultrasound evaluation and diagnosis of normal and abnormal superficial organs; thyroid gland, testes, breasts, soft tissues and musculoskeletal.

Credit Hours: 3
Prerequisites: DMU 4312, DMU 4309 and DMU 4311; instructor's consent

DMU 4325: Ultrasound Clinical Pharmacology and Contrast Agents
Study of the biophysical, biochemical and complete action of ultrasound contrast agents and other drugs used in Diagnostic Medical Ultrasound and their pharmacodynamics.

Credit Hours: 3

DMU 4326: Vascular Ultrasound Physics, Instrumentation and Hemodynamics
Study of vascular principles and fundamentals including physics and instrumentation. Emphasis on ultrasound wave characteristics, Doppler principles, tissue interaction and hemodynamics.

Credit Hours: 3
Prerequisites: DMU 4313 and DMU 4315; instructor's consent

DMU 4330: Vascular Ultrasound Lab
Vascular ultrasound scanning techniques, protocols, measurements, film/video critique, and Plethysmography in a clinical lab setting.

Credit Hours: 3
Prerequisites: DMU 4312, and DMU 4326; instructor's consent

DMU 4332: Vascular Ultrasound
Vascular ultrasound for normal and pathological processes: study of disease, correlation of patients’ clinical data and ultrasound findings used in differential diagnosis.

Credit Hours: 4
Prerequisites: DMU 4312, DMU 4311, DMU 4322, and DMU 4326 or instructor’s consent

DMU 4338: Cardiac Ultrasound, Principles and Hemodynamics
Study of cardiac ultrasound fundamentals including: wave characteristics, principles of 2-D/3-D/4-D imaging, M-mode, and Doppler, cardiac anatomy and physiology, evaluation methods and hemodynamics. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: DMU 4313, DMU 4315, instructor's consent

DMU 4342: Adult Cardiac Ultrasound
(cross-leveled with DMU 7342). Provides principles of diagnostic adult cardiac ultrasound in relation to pathology, further presenting the practical aspects of scanning techniques, exam critique, patient care in relation to cardiac US exams. Graded on A-F basis only.

Credit Hours: 5
Prerequisites: DMU 4313, DMU 4315 and DMU 4338; instructor’s consent

DMU 4941: Ultrasound Clinical I
Application of medical ultrasound in supervised clinical settings. Decisions regarding diagnosis, patient handling and imaging.

Credit Hours: 7
Prerequisites: DMU 4312, DMU 4309 and DMU 4311 and instructor’s consent

DMU 4943: Ultrasound Clinical III
Final clinical application of general medical ultrasound practicum in supervised clinical settings. Further enhancement of practice, decision making, patient handling, image processing and case studies.

Credit Hours: 6
Prerequisites: DMU 4993 and instructor’s consent

DMU 4944: Vascular Ultrasound Clinical IV
Application of diagnostic vascular ultrasound in supervised clinical settings: practice, decision making, patient handling and image processing.

Credit Hours: 7
Prerequisites: DMU 4326 and instructor’s consent

DMU 4945: Cardiac Ultrasound Clinical V
Application of ultrasonography in real clinical settings for learning, practicing and decision making regarding, patient handling and imaging process with students supervised in a clinical setting. Graded on A-F basis only.

Credit Hours: 6
Prerequisites: DMU 4313, DMU 4315, DMU 4944. Instructor and Departmental permission required
DMU 4946: Cardiac Ultrasound Clinical VI
Further application of ultrasonography for continuation of learning, practicing and decision making, patient handling and imaging process with students supervised in a clinical setting. Graded on A-F basis only.
Credit Hours: 6
Prerequisites: DMU 4313, DMU 4315, DMU 4338 and DMU 4945. Instructor and Departmental permission required

DMU 4993: Ultrasound Clinical II
Application of medical ultrasound in supervised clinical settings with practice and decision making related to ultrasound diagnosis, patient handling and image processing.
Credit Hours: 8
Prerequisites: DMU 4941; instructor’s consent

DMU 7200: Diagnostic Medical Ultrasound Principles and Patient Care
Introduction diagnostic medical ultrasound principles including history, development, ultrasound physics - equipment fundamentals. Provides introduction to concepts of sonographic techniques, positioning, image critique, aspects of patient care and professional organizations. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: DMU 1000; instructor’s consent

DMU 7234: Clinical Pathophysiology
(same as PH_THR 7270). Abnormal function of organ systems in the presence of disease; clinical manifestations and medical management.
Credit Hours: 3

DMU 7309: Normal Ultrasound Clinical
Integration of ultrasound instrumentation and clinical practice in a laboratory setting. Interaction between the sonographer, equipment and patient.
Credit Hours: 5
Prerequisites: DMU 7312, DMU 7313 and DMU 7315; instructor’s consent

DMU 7311: Pathological Images Ultrasound
Disease presentation in ultrasound imaging. Practical aspects of ultrasound scanning techniques in pathology.
Credit Hours: 3
Prerequisites: DMU 4200, DMU 7312 and DMU 7315; instructor’s consent

DMU 7312: Sectional Anatomy
(same as RA_SCI 4110). A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques.
Credit Hours: 3
Prerequisites: instructor’s consent

DMU 7313: Ultrasound Physics
Principles of diagnostic ultrasound physics. Sound wave characteristics, tissue interaction, power intensity, and Doppler physics.
Credit Hours: 3
Prerequisites: MATH 1100, CHEM 1100 or CHEM 1320, PHYSCS 1210, and departmental consent

DMU 7314: Abdominal Ultrasound
(cross-leveled with DMU 4314). Differentiation between normal and pathological ultrasound studies of the abdomen. Differential diagnosis of pathological states.
Credit Hours: 5
Prerequisites: DMU 7312, DMU 7309 and DMU 7311; instructor’s consent

DMU 7315: Ultrasound Instrumentation
Integration of ultrasound physics and instrumentation components in a laboratory setting. Practice in modes of operation and safety.
Credit Hours: 3
Prerequisites: DMU 4200; instructor’s consent

DMU 7318: Gynecology Ultrasound
Credit Hours: 3
Prerequisites: DMU 7312, DMU 7309 and DMU 7311

DMU 7320: Obstetrics Ultrasound
Study of normal and abnormal obstetrical ultrasound anatomy. Distinction between normal and pathological OB ultrasound studies with emphasis on differential diagnosis.
Credit Hours: 3
Prerequisites: DMU 7312, DMU 7309 and DMU 7311; instructor’s consent

DMU 7322: Superficial Organs Ultrasound
Ultrasound evaluation and diagnosis of normal and abnormal superficial organs; thyroid gland, testes, breasts, soft tissues and musculoskeletal.
Credit Hours: 3
Prerequisites: DMU 7312, DMU 7309 and DMU 7311; instructor’s consent

DMU 7325: Ultrasound Clinical Pharmacology and Contrast Agents
Study of the biophysical, biochemical and complete action of ultrasound contrast agents and other drugs used in DMU and their pharmacodynamics.
Credit Hours: 3
Prerequisites: DMU 7312, DMU 7309 and DMU 7311; instructor’s consent

DMU 7326: Vascular Ultrasound Physics, Instrumentation and Hemodynamics
Study of vascular principles and fundamentals including physics and instrumentation. Emphasis on ultrasound wave characteristics, Doppler principles, tissue interaction and hemodynamics.
DMU 7330: Vascular Ultrasound Lab
Vascular ultrasound scanning techniques, protocols, measurements, film/video critique, and Plethysmography in a clinical lab setting.

Credit Hours: 3
Prerequisites: DMU 7313 and DMU 7315; instructor's consent

DMU 7332: Vascular Ultrasound
Vascular ultrasound for normal and pathological processes: study of disease, correlation of patients' clinical data and ultrasound findings used in differential diagnosis.

Credit Hours: 4
Prerequisites: DMU 7312, DMU 7311, DMU 7322, and DMU 7326 or instructor's consent

DMU 7338: Cardiac Ultrasound, Principles and Hemodynamics
Study of cardiac ultrasound fundamentals including: wave characteristics, principles of 2-D/3-D/4-D imaging, M-mode, and Doppler, cardiac anatomy and physiology, embryology, evaluation methods and hemodynamics. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: DMU 4313, DMU 4315, instructor's consent

DMU 7342: Adult Cardiac Ultrasound
(cross-leveled with DMU 4342). Study of adult cardiac ultrasound for normal and pathological processes. Differential diagnosis of cardiac disease through correlation of patients' clinical data and ultrasound findings.

Credit Hours: 5
Prerequisites: DMU 7312, DMU 7313 and DMU 7315 and instructor's consent

DMU 7941: Ultrasound Clinical I
Application of medical ultrasound in supervised clinical settings. Decisions regarding diagnosis, patient handling and imaging.

Credit Hours: 7
Prerequisites: DMU 7312, DMU 7309 and DMU 7311 and instructor's consent

DMU 7943: Ultrasound Clinical III
Final clinical application of general medical ultrasound practicum in supervised clinical settings. Further enhancement of practice, decision making, patient handling, image processing and case studies.

Credit Hours: 6
Prerequisites: DMU 7993 and instructor's consent

DMU 7944: Vascular Ultrasound Clinical IV
Application of diagnostic vascular ultrasound in supervised clinical settings: practice, decision making, patient handling and image processing.

Credit Hours: 7
Prerequisites: DMU 7326 and instructor's consent

DMU 7945: Cardiac Ultrasound Clinical V
Application of diagnostic cardiac ultrasound in supervised clinical settings: practice and decision making regarding echocardiography, patient handling and image processing.

Credit Hours: 6
Prerequisites: DMU 7313 and DMU 7315 and instructor's consent

DMU 7946: Cardiac Ultrasound Clinical VI
Further enhancement of diagnostic cardiac ultrasound in supervised clinical settings: practice and decision making regarding echocardiography, patient handling and image processing.

Credit Hours: 6
Prerequisites: DMU 7945

DMU 7993: Ultrasound Clinical II
Application of medical ultrasound in supervised clinical settings with practice and decision making related to ultrasound diagnosis, patient handling and image processing.

Credit Hours: 8
Prerequisites: DMU 7941; instructor's consent

DMU 8001: Topics in Diagnostic Medical Ultrasound
Organized study of selected topics. Topic may vary.

Credit Hour: 1-3
Prerequisites: restricted to students enrolled in the Diagnostic Medical Ultrasound program only

DMU 8050: Research in Diagnostic Medical Ultrasound
Research not leading to a thesis or dissertation. Graded on an A-F basis only.

Credit Hour: 1-99
Prerequisites: restricted to students enrolled in the Diagnostic Medical Ultrasound program only

DMU 8085: Problems in Diagnostic Medical Ultrasound
Independent study of a special project involving clinical applications or research. Topic may vary.

Credit Hour: 1-99
Prerequisites: restricted to students enrolled in the Diagnostic Medical Ultrasound program only

DMU 8090: Research in Diagnostic Medical Ultrasound
Research leading to a thesis or dissertation. Graded on an S/U basis only.

Credit Hour: 1-99
Prerequisites: restricted to students enrolled in the Diagnostic Medical Ultrasound program only

DMU 8346: Pediatric Cardiac Ultrasound
Study of pediatric cardiac ultrasound for normal and pathological processes. Differential diagnosis of cardiac disease through correlation of patients' clinical data and ultrasound findings.

Credit Hours: 4
**Economics (ECONOM)**

**Prerequisites:** DMU 7342 and instructor's consent

**DMU 8947: Applied Clinical Research & Practicum**
Clinical research application of cardiovascular & general ultrasound in clinical environment: clinical research, practicum, decision making, patient handling, and image processing. Graded on A-F basis only.

**Credit Hours:** 5-8
**Prerequisites:** DMU 7944, DMU 7946, instructor's consent

**Digital Storytelling (DST)**

**DST 1880: Introduction to Digital Storytelling**
Introduction to concepts and skills for Digital Storytelling, including media literacy and forms of narrative manifested historically and currently across a range of media. This course focuses on theories and concepts that support the critical analysis and creation of contemporary narrative in digital form with particular attention to audio, visual and written communication. Graded on A-F basis only.

**Credit Hours:** 3

**DST 2001: Topics in Digital Storytelling**
Organized study of selected topics in Digital Storytelling. Subject may vary from semester to semester. May be repeated with consent of instructor. Graded on A-F basis only.

**Credit Hours:** 3

**DST 2880: Digital Storytelling Production I**
Digital Storytelling Production I teaches agility with digital video technology through applied experiences. Assignments in digital video production emphasize how video narratives are created and how images and audio enhance the structure, mood, and theme of the narrative. Instruction will focus on planning a video production and developing the tools and practices in lighting, sound recording, image capturing, and editing. Graded on A-F basis only.

**Credit Hours:** 3

**DST 3001: Topics in Digital Storytelling**
Organized study of selected topics in Digital Storytelling. Subject may vary from semester to semester. May be repeated with consent of instructor. Graded on A-F basis only.

**Credit Hours:** 3
**Prerequisites:** Sophomore standing

**DST 4001: Topics in Digital Storytelling**
Advanced study of selected topics in Digital Storytelling. Subject may vary from semester to semester. May be repeated with consent of instructor. Graded on A-F basis only.

**Credit Hours:** 3
**Prerequisites:** Sophomore standing

**ECONOM 1014: Principles of Microeconomics**
A basic examination of the economy at the individual consumer, firm and market level. Simple economic models used to analyze the workings of the economy. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, the importance of free trade, the markets response to economic shocks and the effect of government intervention. Not open to students who have completed ECONOM 1024, ECONOM 1051, or AG_EC 1041.

**Credit Hours:** 3

**ECONOM 1015: Principles of Macroeconomics**
Macroeconomics generally refers to a collection of questions about how scarcity affects a collection of people interacting with one another. In this course, our focus is on understanding how scarcity affects welfare of a nation. Topics include Gross Domestic Product, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, and exchange rates. Not open to students who have completed ECONOM 1051 or AG_EC 1042.

**Credit Hours:** 3
**Prerequisites:** ECONOM 1014 or ECONOM 1024

**ECONOM 1024: Fundamentals of Microeconomics**
This course uses mathematical reasoning to provide an elementary quantitative introduction to fundamental concepts in microeconomics. It uses college algebra and simple geometric concepts to describe the behavior of economic units, such as consumers, firms and resource owners, and to depict their interaction through production and exchange in perfect and imperfect markets. Not open to students who have completed ECONOM 1014, ECONOM 1051, or AG_EC 1041. Math Reasoning Proficiency Course.

**Credit Hours:** 3
**Prerequisites:** MATH 1100 or MATH 1120 or equivalent with grade of C or better

**ECONOM 1051H: General Economics - Honors**
One semester course covering similar material as covered in ECONOM 1014 and ECONOM 1015. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, and exchange rates. Not open to students who have completed ECONOM 1014 or ECONOM 1024 and ECONOM 1015. Math Reasoning Proficiency Course.

**Credit Hours:** 5
**Prerequisites:** Honors eligibility required

**ECONOM 1051: General Economics**
One semester course covering similar material as covered in ECONOM 1014 and ECONOM 1015. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, and exchange rates. Includes applications for Journalism students. Not open to students who have completed ECONOM 1014 or ECONOM 1024 and ECONOM 1015 or AG_EC 1041 and AG_EC 1042. Graded on A-F basis only.

**Credit Hours:** 5
Prerequisites: Open only to pre-Journalism and Journalism majors; departmental consent required

ECONOM 2004: Undergraduate Topics in Economics - Social Science
Organized study of selected topics in Economics; applied or theoretical economics; covers subjects not included in regularly offered courses.
Credit Hour: 1-3
Prerequisites: instructor’s consent

ECONOM 3004: Topics in Economics - Social Science
Study in applied or theoretical economics; covers subjects not included in regularly offered courses.
Credit Hour: 1-3
Prerequisites: instructor’s consent

ECONOM 3224: Introduction to International Economics
A topical course which emphasizes the application of basic economic analysis to real and current international economic issues. Topics include free trade, protectionism, free trade areas, multilateral trade negotiations, trade and development, exchange rates, the International Monetary System, and economic integration.
Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024 or ECONOM 1051

ECONOM 3229: Money, Banking and Financial Markets
Operation of the U.S. financial and economic system. Covers interest rates, banking regulation, the money supply process and the conduct of the Federal Reserve, inflation and the macroeconomy, exchange rates and the international financial system, rational expectations, and efficient markets.
Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015, or ECONOM 1051

ECONOM 3229H: Money, Banking and Financial Markets - Honors
Operation of the U.S. financial and economic system. Covers interest rates, banking regulation, the money supply process and the conduct of the Federal Reserve, inflation and the macroeconomy, exchange rates and the international financial system, rational expectations, and efficient markets. Honors eligibility required.
Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015, or ECONOM 1051

ECONOM 3251: Theory of the Firm
Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Topics include the economics of the firm in the context of partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition as well as game theory. No credit for students who have completed ECONOM 4351.
Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024 or ECONOM 1051, and MATH 1400, or equivalent. Not open to economics majors

ECONOM 3323: Capitalism, Democracy and Society
This is a one-credit seminar course for students interested in careers involving social science research and analysis; topics covered will be a selection of classic and contemporary debates in the social sciences.
Credit Hour: 1
Prerequisites: ECONOM 1014 and ECONOM 1015, or ECONOM 1051

ECONOM 4004: Topics in Economics- Social Science
Study in applied or theoretical economics; covers subjects not included in regularly offered courses.
Credit Hour: 1-3
Prerequisites: instructor’s consent

ECONOM 4311: Labor Economics
Surveys theoretical explanations of wage and employment determination in contemporary labor markets.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4315: Public Economics
Analyzes economic effects of government expenditures, taxes and debt. Expenditure and taxation principles, tax reform, cost-benefit analysis, fiscal policy.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4320: History of Economic Thought
Origins of modern economic thought in the context of social and intellectual environment of the time in which they originated, their contribution to their period and to modern thought.
Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015, or ECONOM 1051

ECONOM 4322: Economics of Regulation and Antitrust
Economic issues concerning the role of government regulation. The course examines the rationale for and effects of regulatory policies in public utilities, transportation, and communications industries.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4325: The International Monetary System
Study of macroeconomic and monetary relationships between the U.S. and the world. Topics include balance of payments, foreign exchange rates, history of the international monetary system.
Credit Hours: 3
Prerequisites: ECONOM 3229

ECONOM 4326: Economics of International Trade
The microeconomic theory of international trade. Topics include comparative advantage, the theory of commercial policy, economic integration, trade with less developed countries and the trade effects of economic growth.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4329: The Banking System and the Money Market
Organization of the money market; credit control procedures and aims, effect of bank expansion and contraction on money market and national income deregulation.

Credit Hours: 3
Prerequisites: ECONOM 1015 or ECONOM 1051

ECONOM 4340: Introduction to Game Theory
An introduction to the theory of games, viewed as a set of tools used widely in economics to study situations in which decision-makers (consumers, firms, governments, etc.) interact. The course introduces the basic theory, emphasizing the concepts and their economic applications.

Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4345: Economics of Education
Economic theory is used to analyze the market for educational services and education policy. Topics include: human capital theory, cost and performance measures for public and private schools, market based approaches to school reform, school finance, higher education cost and access.

Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024, or ECONOM 1051, and MATH 1400, or equivalent

ECONOM 4351: Intermediate Microeconomics
Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed ECONOM 3251.

Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024 or ECONOM 1051, and MATH 1400, or equivalent

ECONOM 4351H: Intermediate Microeconomics - Honors
Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed ECONOM 3251. Honors eligibility required.

Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024 or ECONOM 1051, and MATH 1400, or equivalent

ECONOM 4353: Intermediate Macroeconomics
The study of the structure and performance of national economics. Topics include: long-term economic growth, aggregate economic fluctuations, unemployment, and inflation; consequences for national economies of being part of the global economic system; government policies and macroeconomic performance.

Credit Hours: 3
Prerequisites: MATH 1500 or equivalent

ECONOM 4355: Industrial Organization and Competitive Strategy
Analyzes the structure of industry, its impact on the operations of the firm and significance for public policy. The focus is on strategic interaction among firms with market power. Topics include oligopoly, competition, collusion, price discrimination, product differentiation, advertising, entry and exit.

Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4357: Health Economics
Analyzes the economics of health care in the United States with particular attention paid to the role of government. It examines the demand for health care and the structure and consequences of public and private health insurance; the supply of health care, including professional training, licensure, specialization and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine and health care reform.

Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351 and STAG 2500, or equivalent

ECONOM 4360: Economic Development
(same as PEA_ST 4360). The study of less-developed countries including problems of measuring economic growth, analysis of sources of economic growth, causes of changes in economic structure, development and trade policies. The consequences of goals and assumptions for development policy are analyzed.

Credit Hours: 3
Prerequisites: ECONOM 3229, and ECONOM 3251 or ECONOM 4351

ECONOM 4361: Comparative Economic Systems
Study of capitalism, market socialism, and central planning.

Credit Hours: 3
Prerequisites: ECONOM 3229, and ECONOM 3251 or ECONOM 4351

ECONOM 4367: Law and Economics
This course is a survey of economic analyses of American legal institutions. Students will apply basic microeconomics, game theoretic and statistical concepts to the study of property, contracts, torts, the legal process, crime, and the judiciary.

Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351 and STAG 2500, or equivalent

ECONOM 4370: Quantitative Economics
The aim of this course is to provide an introduction to the mathematical language of economic theory. Topics include linear models, matrix algebra, rules of differentiation and comparative static analysis, optimization.

Credit Hours: 3
Prerequisites: MATH 1500 or equivalent
ECONOM 4371: Introductory Econometrics
Study methods for quantitative analysis of economic data. Estimation techniques, tests of significance, prediction and forecasting reviewed with respect to problems presented by economic data and information demands of economic decision models.

Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351, and STAT 2500, or equivalent

ECONOM 4384: Structural Change in Economic History
Explores changes in the structure of the American economy from its earliest colonial beginnings. Structural change, an integral part of growth, is related to technical change, population growth and to the content and form of economic theory.

Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015, or ECONOM 1051

ECONOM 4385: Problems in Economics
Development of a carefully considered research project under close supervision of a faculty member. Credit arranged by instructor.

Credit Hours: 1-3
Prerequisites: ECONOM 4351, ECONOM 4371, and instructor’s consent. Not open to non-majors

Credit Hour: 1-3
Prerequisites: ECONOM 4370 or instructor’s consent

ECONOM 4940: Internship in Economics
Internship experience for Economics majors. 120 hours of supervised internship work with approval of Director of Undergraduate Studies and academic advisor. Graded on S/U basis only.

Credit Hours: 3
Prerequisites: ECONOM 4351 and ECONOM 4371; Declared economics majors who have a minimum overall MU GPA of 2.75 and have junior or senior standing. Students must have completed at least 15 credit hours at MU

ECONOM 4965: Independent Study in Economics
Individual work, with conferences adjusted to needs of student.

Credit Hour: 1-3
Prerequisites: instructor’s consent

ECONOM 4970: Senior Seminar in Economics
Seminar for graduating seniors who are majoring in economics. Multiple writing assignments will emphasize synthesis of theoretical, empirical, and institutional economics. Not open to non-majors.

Credit Hours: 3

ECONOM 4971: Supplemental Senior Seminar in Economics
Content description is the same as ECONOM 4970. Required for Economics honors students and double majors in Economics who take a capstone course in another major. No credit for students who have completed ECONOM 4970. Not open to non-majors. Graded on A-F basis only.

Credit Hour: 1

ECONOM 4995: Honors Proseminar
Seminar for graduating seniors. This capstone course integrates previous economics courses by applying economic theories to problems. Students acquire an understanding of what research in economics can produce and how to produce those results. Course requirements are to produce a list of distinctive activities that count as research and produce a research paper. Multiple writing assignments will emphasize synthesis of theoretical, empirical and institutional economics. No credit for students who have completed ECONOM 4970. Not open to non-majors. Capstone course required for Economics honors students.

Credit Hours: 3

ECONOM 7001: Topics in Economics - General
Study in applied or theoretical economics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99
Prerequisites: instructor’s consent

ECONOM 7085: Problems in Economics
Individual study in Economics.

Credit Hour: 1-99
Prerequisites: instructor’s consent

ECONOM 7311: Labor Economics
Surveys theoretical explanations of wage and employment determination in contemporary labor markets.

Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 7351

ECONOM 7315: Public Economics
Analyzes economic effects of government expenditures, taxes and debt. Expenditure and taxation principles, tax reform, cost-benefit analysis, fiscal policy.

Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 7320: History of Economic Thought
Origins of modern economic thought in the context of social and intellectual environment of the time in which they originated, their contribution to their period and to modern thought.

Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015 or ECONOM 1051H
ECONOM 7322: Economics of Regulation and Antitrust
Economic issues concerning the role of government regulation. The course examines the rationale for and effects of regulatory policies in public utilities, transportation, and communications industries.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 7351

ECONOM 7325: The International Monetary System
Study of macroeconomic and monetary relationships between the US and the world. Topics include balance of payments, foreign exchange rates, history of the international monetary system.
Credit Hours: 3
Prerequisites: ECONOM 7322 or instructor's consent

ECONOM 7326: Economics of International Trade
The microeconomic theory of international trade. Topics include comparative advantage, the theory of commercial policy, economic integration, trade with LDC's and the trade effects of economic growth.
Credit Hours: 3
Prerequisites: ECONOM 7351 or instructor's consent

ECONOM 7329: The Banking System and the Money Market
Organization of the money market; credit control procedures and aims, effect of bank expansion and contraction on money market and national income deregulation.
Credit Hours: 3
Prerequisites: ECONOM 1015 or ECONOM 1051

ECONOM 7332: Microeconomics for Managers
Microeconomic concepts presented at the intermediate level, graphic treatment with limited calculus, managerial issues presented at the MBA level. (Not open to economics majors).
Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024, MATH 1300; permission required for MBA program

ECONOM 7340: Introduction to Game Theory
An introduction to the theory of games, viewed as a set of tools used widely in economics to study situations in which decision-makers (consumers, firms, governments, etc.) interact. The course introduces the basic theory, emphasizing the concepts and their economic applications.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 7351 or instructor's consent

ECONOM 7345: Economics of Education
Economic theory is used to analyze the market for educational services and education policy. Topics include: human capital theory, cost and performance measures for public and private schools, market based approaches to school reform, school finance, higher education cost and access.
Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024, or ECONOM 1051H and ECONOM 4371 or equivalent

ECONOM 7351: Intermediate Microeconomics
Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed 3251.
Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024 or ECONOM 1051H and MATH 1320 or equivalent

ECONOM 7353: Intermediate Macroeconomics
The study of the structure and performance of national economies. Topics include: long-term economic growth, aggregate economic fluctuations, unemployment, and inflation; consequences for national economies of being part of the global economic system; government policies and macroeconomic performance.
Credit Hours: 3
Prerequisites: ECONOM 1015 or ECONOM 1051 and MATH 1400 or equivalent

ECONOM 7355: Industrial Organization and Competitive Strategy
Analyzes the structure of industry, its impact on the operations of the firm and significance for public policy. The focus is on strategic interaction among firms with market power. Topics include oligopoly, competition, collusion, price discrimination, product differentiation, advertising, entry and exit.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 7351

ECONOM 7357: Health Economics
(same as PUB_AF 7357). Analyzes the economics of health care in the United States with particular attention paid to the role of government. It examines the demand for health care and the structure and consequences of public and private health insurance; the supply of health care, including professional training, licensure, specialization and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine: and examination of recent proposals and initiatives for health care reform.
Credit Hours: 3
Prerequisites: STAT 2500 and ECONOM 4351

ECONOM 7360: Economic Development
(same as PEA_ST 4360). The study of less-developed countries including problems of measuring economic growth, analysis of sources of economic growth, causes of changes in economic and structure, development and trade policies. The consequences of goals and assumptions for development policy are analyzed.
Credit Hours: 3
Prerequisites: ECONOM 3229 and ECONOM 3251 or ECONOM 4351.; graduate standing required

ECONOM 7361: Comparative Economic Systems
Study of capitalism, market socialism, and central planning.
Credit Hours: 3
Prerequisites: ECONOM 3229 and ECONOM 3251 or ECONOM 4351
ECONOM 7367: Law and Economics
(same as Public Affairs PUB_AF 7367). This course is a survey of economic analyses of American legal institutions. Students will apply basic microeconomic, game theoretic and statistical concepts to the study of property, contracts, torts, the legal process, crime and the judiciary.

Credit Hours: 3
Prerequisites: [ECONOM 4351 or ECONOM 3251, and STAT 2500, or equivalent]

ECONOM 7370: Quantitative Economics
The aim of this course is to provide an introduction to the mathematical language of economic theory. Topics include linear models, matrix algebra, rules of differentiation and comparative static analysis, optimization.

Credit Hours: 3
Prerequisites: MATH 1500 or equivalent

ECONOM 7371: Introductory Econometrics
Study methods for quantitative analysis of economic data. Estimating techniques, tests of significance, prediction and forecasting reviewed with respect to problems presented by economic data and information demands of economic decision models.

Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351 and STAT 1320 and MATH 1320 or instructor’s consent

ECONOM 7384: Structural Change in Economic History
Explores changes in the structure of the American economy from its earliest colonial beginnings. Structural change, an integral part of growth, is related to technical change, population growth and to the content and form of economic theory.

Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015, or ECONOM 1051H or instructor’s consent

ECONOM 7775: Dynamic Optimization and its Applications to the Natural Sciences and Economics

Credit Hour: 1-3
Prerequisites: ECONOM 7370 or instructor’s consent

ECONOM 8001: Topics in Economics- General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hours: 3
Prerequisites: instructor’s consent

ECONOM 8085: Problems in Economics
Graduate students may select topics for study and investigation subject to approval by supervising faculty.

Credit Hour: 1-99

ECONOM 8090: Research in Economics
Thesis research for M.A. degree. Graded on a S/U basis only.

Credit Hour: 1-99

ECONOM 8340: Game Theory
Game theory is the study of strategic behavior by agents who perceive themselves as "large" relative to the market and who therefore consider the effect of their behavior on others. This course examines the rigorous theory of strategic interaction of rational agents. May be repeated for credit.

Credit Hours: 3
Prerequisites: ECONOM 4351 or equivalent; MATH 1320 or equivalent. Graded on A-F basis only

ECONOM 8370: Mathematics for Economics
The aim of this course is to cover essential mathematics used in economics. Topics include introductory linear algebra, multivariate calculus, comparative statics analysis, unconstrained optimization, and equality constrained optimization. May be repeated for credit.

Credit Hours: 3
Prerequisites: ECONOM 4351 or equivalent; MATH 1320 or equivalent. Graded on A-F basis only

ECONOM 8370: Mathematics for Economics
The aim of this course is to cover essential mathematics used in economics. Topics include introductory linear algebra, multivariate calculus, comparative statics analysis, unconstrained optimization, and equality constrained optimization. May be repeated for credit.

Credit Hours: 3
Prerequisites: ECONOM 4351 or equivalent; MATH 1320 or equivalent. Graded on A-F basis only

ECONOM 8413: Research Workshop I
Required course for economics MA students. Combines instruction, student presentations, and seminar participation to introduce research methods and practice. A major research paper are required.

Credit Hours: 3
Prerequisites: ECONOM 8451, ECONOM 8453, and ECONOM 8472 or instructor’s consent

ECONOM 8451: Microeconomic Theory
MA-level course in microeconomic theory. The course relies extensively on calculus to survey theories of: rational behavior in consumption, production, and pricing decisions of households and firms; partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition; and general equilibrium and welfare.

Credit Hours: 3

ECONOM 8453: Macroeconomic Theory
Basic models in macroeconomics will be covered with emphasis on assumptions and on how hypotheses can be tested. Course is an introductory survey for students intending to develop ability for research in macroeconomics.

Credit Hours: 3
Prerequisites: ECONOM 4353 or equivalent; at least concurrent enrollment in ECONOM 8451. Instructor’s consent required for non graduate level students

ECONOM 8470: Dynamic Optimization
Topics to be covered include calculus of variations, optimal control theory, dynamic programming in discrete time variables, and economic
modeling. The Euleless Equation, the Transversally Condition and the Bellman Equation will also be covered.

Credit Hours: 3
Prerequisites: ECONOM 7370

ECONOM 8472: Econometric Methods I
Familiarizes students with fundamental techniques found and used in applied economic research. Topics include: ordinary least squares, generalized least square, instrumental variables, maximum likelihood estimation, and generalized methods of moments.

Credit Hours: 3
Prerequisites: STAT 7710 or instructor's consent

ECONOM 8473: Applied Econometrics
Continuation of ECONOM 8472 for MA students. Topics include: simultaneous equations, nonlinear least squares, qualitative choice. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECONOM 8472 or instructor's consent

ECONOM 9001: Topics in Economics
Selected current topics in economics.

Credit Hours: 3

ECONOM 9085: Problems in Economics
Graduate students may select topics for study and investigation subject to approval by supervising faculty.

Credit Hour: 1-99

ECONOM 9090: Research in Economics
Thesis research for Ph.D. degree. Graded on a S/U basis only.

Credit Hour: 1-99

ECONOM 9411: Advanced Labor Economics I
Analysis of the determination of wages and employment and the relation of trade unionism to the economy.

Credit Hours: 3
Prerequisites: ECONOM 9452 or instructor’s consent

ECONOM 9412: Advanced Labor Economics II
Applications of contemporary analytical techniques to labor market topics chosen by the instructor.

Credit Hours: 3
Prerequisites: ECONOM 9411 and ECONOM 9452 or instructor’s consent

ECONOM 9413: Research Workshop II
Introduces doctoral students to practices of preparing scholarly economic research by moving through the process of selecting a topic, identifying relevant literature, and communicating results. Graded on A-F basis only.

Credit Hour: 1-2
Prerequisites: ECONOM 9452, ECONOM 9454 and ECONOM 9474; PhD standing

ECONOM 9415: Advanced Public Economics I
Tax incidence and optimal taxation in static economies and issues of taxation in dynamic economies.

Credit Hours: 3
Prerequisites: ECONOM 9452 or instructor’s consent

ECONOM 9416: Advanced Public Economics II
Macroeconomic issues of government finance. Theoretical and empirical analysis of Ricardian equivalence.

Credit Hours: 3
Prerequisites: ECONOM 9452 or instructor’s consent

ECONOM 9426: International Trade
Pure theory of international trade and commercial policy.

Credit Hours: 3
Prerequisites: ECONOM 9452 or instructor’s consent

ECONOM 9427: Topics in International Trade
The course will cover recent research in International Trade and important issues related to the impact of trade on economic growth and development. Topics include the relationship between trade and growth, the impact of international trade on firms, households and economic growth. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECONOM 9452 or instructor’s consent

ECONOM 9430: Advanced Money and Banking
The working and structure of institutional arrangements, welfare aspects of structural policies, operation of money and credit markets, and behavior of returns on assets.

Credit Hours: 3
Prerequisites: ECONOM 9452 or instructor’s consent

ECONOM 9431: Central Banking Policies
Examines central banking procedures, policies and the role they play in maintaining economic stability. Special attention to connection of Federal Reserve System with money and capital markets.

Credit Hours: 3
Prerequisites: ECONOM 9452 or instructor’s consent

ECONOM 9446: Advanced Empirical Methods
Empirical and modeling techniques for evaluation of microeconomic policy questions.

Credit Hours: 3
Prerequisites: ECONOM 8451, ECONOM 8472
Recommended: Concurrent enrollment in ECONOM 8473 or ECONOM 9473

ECONOM 9447: Topics in Microeconomic Policy Analysis
Applies the methods and techniques of microeconomics and to specific timely policy questions. Taught by applied-microeconomics faculty and focuses on current topics in labor economics, public economics, the
economics of education, health economics, and other applied areas of microeconomics.

Credit Hours: 3
Prerequisites: ECONOM 8451, ECONOM 8472, ECONOM 9446
Recommended: Concurrent enrollment in ECONOM 8473 or ECONOM 9473

ECONOM 9451: Advanced Microeconomic Theory I
The theory of rational behavior and partial equilibrium in markets. Topics include consumer behavior, theory of the firm, decisions making under uncertainty, perfect competition, monopoly and monopsony, and imperfect competition. Graded on A/F basis only.

Credit Hours: 3
Prerequisites: ECONOM 9451 or instructor’s consent; PhD standing

ECONOM 9452: Advanced Microeconomic Theory II
Survey of equilibrium theory and market failures in economics. Topics include the structure and modeling of games, and cooperative and non-cooperative equilibrium concepts.

Credit Hours: 3
Prerequisites: Economics [ECONOM] 9451 or instructor’s consent

ECONOM 9453: Advanced Macroeconomic Theory I
Aggregate models of life-cycle microfoundations, of macroeconomics fluctuations and growth. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: departmental consent; PhD standing

ECONOM 9454: Advanced Macroeconomic Theory II
Analyzes topics in income analysis, including capital theory and economic dynamics.

Credit Hours: 3
Prerequisites: ECONOM 9453 or instructor’s consent

ECONOM 9455: Monopoly and Competition
A survey of the theoretical and empirical literature on the organization of industries. Includes study of monopolized markets, competitive markets, and strategic interaction among firms in imperfectly competitive markets. Both the rationale and practice of anti-trust policy are studied.

Credit Hours: 3
Prerequisites: ECONOM 9452 and ECONOM 9471 or instructor’s consent

ECONOM 9460: Development Economics
Theories of economic development critically examined. Sources and consequences of growth processes analyzed in context of economic theory and historical occurrence.

Credit Hours: 3
Prerequisites: ECONOM 8451 and ECONOM 8472

ECONOM 9471: Advanced Game Theory
Presents core concepts in game theory and illustrates their uses with a range of applications.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor’s consent

ECONOM 9473: Econometric Methods II
Introduces students to econometric concepts and techniques at a theoretical level, and provides a bridge to understanding the econometric literature. Topics include: probability theory, convergence, simultaneous equations, nonlinear models, and nonparametric estimation.

Credit Hours: 3
Prerequisites: departmental consent required

ECONOM 9474: Econometric Methods III
This course is designed to familiarize students with useful econometric tools not covered in Econometric Methods I and II. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECONOM 9473 or instructor’s consent; PhD standing

ECONOM 9476: Advanced Topics in Econometrics I
Equips students with some essential tools for conducting publishable econometric research. Topics at the discretion of the instructor.

Credit Hours: 3
Prerequisites: ECONOM 9474 or instructor’s consent

ECONOM 9477: Advanced Topics in Econometrics II
Equips students with some essential tools for conducting publishable econometric research topics at the discretion of the instructor.

Credit Hours: 3
Prerequisites: ECONOM 9476 or instructor’s consent

ECONOM 9480: Independent Readings for Ph.D. Comprehensive Examinations
Independent Readings for Ph.D. Comprehensive Exam. Graded on S/U basis only.

Credit Hour: 1-6

ECONOM 9484: Economic History
Techniques of the new economic history are explored in the context of European economic development.

Credit Hours: 3
Prerequisites: ECONOM 8451

Education Honors (EDUC_H)

EDUC_H 3050H: Special Readings in Education Honors
Directed study of literature and research reports in education.

Credit Hour: 1-4
Prerequisites: instructor’s consent and Honors program director. Honors eligibility required

EDUC_H 3060H: Honors Seminar in Education Honors
Credit Hour: 1-2
Prerequisites: instructor’s consent and Honors program director. Honors eligibility required
### Educational Leadership and Policy Analysis (ED_LPA)

**ED_LPA 3100: Foundations of Education**  
Focus on developing a theoretical and conceptual knowledge of leadership. In addition, skill building-exercises will take place through group case studies and role playing exercises allowing each student to identify and achieve methods for personal development.  
**Credit Hour: 1-3**

**ED_LPA 4060: Inquiring into Schools, Community and Society II**  
Required 3 hour course for students pursuing teacher certification. Designed to transition students into the teaching internship through study of teacher roles, school organizations and cultures, and community contexts.  
**Credit Hours: 3**  
**Prerequisites:** LTC 2040 and LTC 4040

**ED_LPA 7060: Inquiring into Schools, Community and Society II**  
Required 3 hours course for students pursuing teacher certification. Designed to transition students into the teaching internship through study of teacher roles, school organizations and cultures, and community contexts. Prerequisites: LTC 2040 and LTC 7040  
**Credit Hours: 3**

**ED_LPA 7085: Problems in Educational Leadership and Policy Analysis**  
Problems in Educational Leadership and Policy Analysis  
**Credit Hour: 1-99**

**ED_LPA 7301: Topics in Educational Leadership and Policy Analysis**  
Group study of topics in educational leadership, policy analysis, and higher and continuing education.  
**Credit Hour: 1-99**

**ED_LPA 7458: Sociology of Education** (same as SOCIOL 7410; cross-leveled with SOCIOL 4410). Contexts, structures and processes of schooling; effects on class, race, ethnicity and gender; social change, educational policy, and organizational dynamics; higher education and the economy.  
**Credit Hours: 3**  
**Prerequisites: SOCIOL 1000 or equivalent**

**ED_LPA 7822: College Teaching with Technology I**  
Examines the use of educational technologies, both class room based (e.g., student response systems) and online (e.g., course management’s systems), to assist in the dissemination of course resources and the facilitation of student interaction.  
**Credit Hour: 1**
ED_LPA 7823: College Teaching with Technology II
Integrates learning technologies into the traditional framework of a face-to-face course by creating a course website and developing technical proficiency with relevant educational technologies.

Credit Hour: 1
Prerequisites: College Teaching I or instructor's consent

ED_LPA 8409: Learning, Curriculum and Assessment for School Leaders
Addresses assessment, learning and curriculum and the integration of the instructional and assessment processes. Topics include authentic assessment, curriculum alignment, cognition and learning, instructional approaches, and application of student learning theory to the curriculum.

Credit Hours: 3

ED_LPA 8410: Learning Cultures
Integrates the themes of building a common purpose to enhance school culture, empowering teachers and students, and diversity. Topics include importance of shared mission and vision, the use of group processes and collaboration, the intricacies of school culture, and ethical and moral leadership.

Credit Hours: 3

ED_LPA 8411: Professional Development for Learning
Focuses on the professional development and reflection on practice. Topics include organizational actions and personal responsibility, life-long learning, and public education in a democratic society.

Credit Hours: 3

ED_LPA 8412: School Improvement
This course addresses the topics of organizational management and personal inquiry. It covers issues such as organizational effectiveness, organizing for an effective school environment, legal and fiscal decision-making and responsibilities of school leaders, creating an environment where stakeholders acquire and utilized data to inform decisions and practice, and where action research methods are utilized to evaluate and inform practice.

Credit Hours: 3

ED_LPA 8413: Internship
The internship experience provides the opportunity for the student to assume a leadership role associated with instructional improvement. Graded on S/U basis only.

Credit Hour: 1-11

ED_LPA 8414: Current Issues in Site-Level Leadership
This course is designed to introduce students to the rigors of the principalship. Topics will include issues affecting beginning principals, school cultures, and the use of technology for communication and research.

Credit Hours: 3

ED_LPA 8415: Leadership for Collaborative Cultures
This course will instill an understanding of major components of purposeful, systemic change, interpersonal relationships, communication and organizational management. The development of an appreciation of diversity, equity, and democracy for all students will be an ongoing theme of the course.

Credit Hours: 3

ED_LPA 8416: Foundations of School Leadership
School leader knowledge of student learning theory and related instructional practices is the focus of this course. The problem-based learning format will include topics on school culture, leadership communication, technology, and conflict resolution. Issues concerning professional relationships are also addressed.

Credit Hours: 3

ED_LPA 8417: Site-Level Organization and Leadership
Student will study state and national regulations that affect Missouri school policies. The student will develop a database on various legal issues. A study of middle level education will conclude with on-site evaluation of a local middle school.

Credit Hours: 3

ED_LPA 8418: Supervision for Learning Environments
Students are prepared to articulate, recognize, and support classroom practices that reflect the most current principles of learning. Effective instructional strategies that link this knowledge to practice will be entered into a computer database.

Credit Hours: 3

ED_LPA 8419: Structures and Processes for Effective Schools
Emphasis is placed on the Missouri Comprehensive Guidance Program and positive strategies for working with challenging students. A continuation of the study of state and national legal and policy issues will focus on special programs and services.

Credit Hours: 3

ED_LPA 8420: Curriculum for Site-Level Leadership
Student and program assessment are the primary topics for this course on curricular leadership. Class participants are engaged in the development of authentic experiences using technology to develop and apply the testing and assessment knowledge appropriate to school leaders.

Credit Hours: 3

ED_LPA 8421: Action Research in School Leadership
Databases on legal and policy issues are completed and merged into a single database and placed on the specialist program web site. Site and classroom level action research is investigated, concluding with an assessment of local action research efforts in area schools.

Credit Hours: 3
ED_LPA 8422: Advanced Problems of Leadership Practice
This pre-internship course is a study of team building, program assessment, and site-based management. Addressing problems through a comprehensive school improvement approach with practicing principal will serve to prepare the students for internship experiences.
Credit Hours: 3

ED_LPA 8423: Advanced Leadership for Learning Environments
Students will demonstrate their understanding of instructional improvement for all teachers and students by designing and defending a comprehensive strategy for instructional changes in a simulated school. The ongoing study of learning principles and effective instructional practices will be concluded.
Credit Hours: 3

ED_LPA 8424: Education Politics and Policymaking
This course examines the politics and policymaking process of education in the United States, paying particular attention to the influence of various institutions and actors at local, state, and federal levels. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 8428: Curriculum Leadership
A study of research, theory, and skills necessary for curriculum leadership in educational organizations. Course includes generic curriculum management processes, design trends, controversial issues multi-media, innovative instructional techniques, and program evaluation.
Credit Hours: 3

ED_LPA 8430: School Law and Finance for Principal Leadership
Designed to engage learners in examination of the legal (judicial and legislative) system, school law, and finance policies that govern public schools and their fiscal resources in the United States and the State of Missouri. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 8431: Leadership for Data-Driven Change
This course instructs school leaders on how to use data for school improvement. Students will: identify reliable sources of data; develop, implement, and monitor strategic School Improvement Plans using data; analyze data using technology; and describe evidence-based strategies that respond to data analysis. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 8957: Qualitative Methods in Educational Research I
(same as LTC 8957 and ESC_PS 8957). This course provides a practical introduction to qualitative research and its applications in education and social sciences. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 8958: Research in Educational Leadership and Policy Analysis
Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: departmental consent

ED_LPA 9090: Research in Educational Leadership and Policy Analysis
Credit Hour: 1-99
Prerequisites: instructor's consent

ED_LPA 9095: Problems in Educational Leadership and Policy Analysis
Credit Hour: 1-99
Prerequisites: instructor's consent

ED_LPA 9400: Social Theory in Education
Students will examine the relationship of society and education through a variety of theoretical perspectives and empirical studies. These theories deal with the relation of education to society as a whole, and the relation between education and the state. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 9401: Educational Leadership
Critical examination of key leadership theories and their application to various educational contexts. Includes consideration of research methods and designs appropriate for the study of leadership and the spectrum of lenses through which educational leadership is studied.
Credit Hours: 3

ED_LPA 9402: Educational Policy Analysis
Course centers on developing multiple understandings of the education policy making process. Theoretical constructs used to advance those understandings are eclectic in nature, drawing from the fields of political science, history, sociology and economics.
Credit Hours: 3

ED_LPA 9403: Organizational Analysis
Analysis of organizational characteristics and principles in educational organizations. Topics include: Organizational theories and models, organizational culture, communication, innovation, planning, leadership, power and influence, and external environment influences.
Credit Hours: 3

ED_LPA 9404: Inquiry into Educational Leadership and Policy Analysis
A critical overview of theory development, research paradigms, and research ethics in the department of Educational Leadership and Policy Analysis. Required for all ELPA Ph.D. students.
Credit Hours: 3
Recommended: for students who have completed at least 2 semesters of coursework
ED_LPA 9405: Seminar in Educational Leadership and Policy Analysis
Seminar in Educational Leadership and Policy Analysis
Credit Hour: 1-99

ED_LPA 9406: Seminar in Educational Administration
Seminar in Educational Administration
Credit Hour: 1-99

ED_LPA 9407: Seminar in Educational Policy
Seminar in Educational Policy
Credit Hour: 1-99

ED_LPA 9408: Seminar in Higher Education
Seminar in Higher Education
Credit Hour: 1-99

ED_LPA 9409: Introduction to Research Design
This course provides an introduction to quantitative, qualitative, and mixed methods research, with an emphasis on the epistemological and ontological issues that inform our choice of research methods. This course is intended for first year doctoral students. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 9424: Superintendent: Instructional Leadership
Effective superintendents understand educational core knowledge of curriculum, instructional and assessment. They establish an exception for the use of best instructional practices for all students among both the educational and public communities. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 9427: School Budget Development and Fiscal Management
This course includes an overview of school finance programs of the 50 states, including special funds for exceptional children and compensatory education. Various aspects of planning, accounting, auditing, and reporting related to budget development and fiscal management are covered.
Credit Hours: 3

ED_LPA 9429: Superintendent: Communication, Team Leadership
Effective superintendents negotiate political and cultural challenges to lead diverse, socially-just school systems. Reflective practices that enhance competence in public board member, and district personnel relationships are essential skills. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 9440: Race, Gender, and Ethnicity in Higher Education
(same as WGST 9440). Historical and current issues of race, gender, and ethnicity in colleges and universities in the U.S. Issues include: students, faculty, and staff experiences of diversity, access and equity, and salience of diversity in a higher education setting.
Credit Hours: 3

ED_LPA 9441: The Adult Learner
The identification of learning, motivation and participation patterns among adults will be examined. Learning theories and adult development life-cycle and stage research data will be explored as well as their implications for practice.
Credit Hours: 3

ED_LPA 9442: Curriculum Philosophy and Development in Higher Education
A study of the philosophical foundations of postsecondary curricula, current trends and issues, and approaches to curriculum reforms and revisions.
Credit Hours: 3

ED_LPA 9444: Program Planning in Higher Education
Analysis of program planning and evaluation in higher education. Topics include: conceptualizations of program planning, situational analysis, needs assessment, priority setting, marketing and promotion, and program evaluation.
Credit Hours: 3

ED_LPA 9447: College Student Culture and Environment
This course examines the characteristics and outcomes of American undergraduates, and the aspects of the college environment the
differentially influence students. Topics include: theoretical models of students change, campus climate and cultures, learning communities, institutional differences, and conditions for success.

**Credit Hours:** 3

ED_LPA 9481: Internship in Educational Leadership and Policy Analysis
Some sections may be graded on A-F or S/U basis only.
Credit Hour: 1-99
Prerequisites: departmental consent

General introduction to quantitative methods of data analysis. Develop concepts of measurement, design, and analysis. The focus is on data driven decision making and using various quantitative methods to investigate problems of educational leadership practice. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Only students in the Statewide Cooperative Ed.D. program in Educational Leadership can enroll

ED_LPA 9483: Qualitative Tools for Applied Research in Educational Leadership
Students will learn about a number of qualitative research designs that leaders can use to critically examine research questions in their practice. They will also learn to analyze educational issues and execute processes to effectively explore those issues. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to students in the Statewide Cooperative Ed.D. Program in Educational Leadership

ED_LPA 9484: Program Evaluation and Planning for Educational Leaders
Participants develop thorough knowledge of theoretical underpinnings of selected approaches to program planning and evaluation and their necessary integration. Affords participants the opportunity to plan, conduct and deliver the results of a program evaluation to actual client. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Only students in the Statewide Cooperative Ed.D. Program in Educational Leadership can enroll

ED_LPA 9620: Qualitative Methods in Educational Research II
(same as ESC_PS 9620 and LTC 9620). This course constructs a conceptual and methodological bridge between the understandings of qualitative research developed in Qualitative Methods I and more advanced study of theories, designs, and methods. The focus is on theory, approaches to data analysis, and interpretation. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ESC_PS 8957

ESC_PS 1901: Topics in Educational School, and Counseling Psychology - General
Topics place holder for lower division courses.
Credit Hour: 1-3

ESC_PS 2000: Experiencing Cultural Diversity in the United States
The purpose of this course is to examine cultural diversity in U.S. Society, to increase self-awareness related to worldviews and beliefs about diversity issues, and to increase understanding of the intersections of multiple group identities. Graded on A-F basis only.
Credit Hours: 3

ESC_PS 2010: Inquiry Into Learning I
This course is designed to focus students on the central themes of learning and teaching. Emphasis will be placed on the interaction of theory, philosophy and practice as related to the field of education. Required for Phase II of the certification program.
Credit Hours: 3

ESC_PS 2014: Inquiry into Learning I - Field Experience
This field experience course supports the Inquiry into Learning I, component of Phase I. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: departmental consent

ESC_PS 2014H: Inquiry into Learning I - Field Experience - Honors
This field experience course supports the Inquiry into Learning I, component of Phase I. Graded on S/U basis only. Honors eligibility required
Credit Hour: 1
Prerequisites: departmental consent

ESC_PS 2100: Career Explorations
Contribution of career development theory to choice of career and/or major. Exploration of personal and social determinants of career choice. Class consists of lecture, laboratory experiences, and use of facilities at the Career Planning and Placement Center. Some sections may be graded on either A-F basis or S/U basis only.
Credit Hour: 1-3

ESC_PS 2350: Transforming Stress: Heart Rate Variability Biofeedback
This course will offer an in-depth opportunity to learn the philosophy and management of stress through a computer-based biofeedback system. Students will develop a personal practice, track their progress and learn skills in using this technology for a range of concerns.
Credit Hour: 1

ESC_PS 2400: Learning and Instruction
The nature of human learning processes with implications for instruction. Emphasis on bases of and readiness for learning, types of learning, memory forgetting and transfer, and related topics.
Credit Hours: 2
Prerequisites: PSYCH 1000
ESC_PS 2500: Child Development
The psychological, intellectual, social, and physical development of children.
Credit Hours: 3
Prerequisites: PSYCH 1000

ESC_PS 2700: Psychological Perspectives in Sport
Survey of sport psychology literature with focus upon such topics as personality, positive and negative affect, cognitive and behavioral intervention, motivation, aggression, audience effects, team cohesion, team building, leadership, exercise, and multicultural issues.
Credit Hours: 3

ESC_PS 2901: Topics in Educational School, and Counseling Psychology - General
Topics place holder for lower division courses.
Credit Hour: 1-3

ESC_PS 3085: Problems in Educational, School, and Counseling Psychology
Credit Hour: 1-3
Prerequisites: instructor’s consent

ESC_PS 3100: African-American Psychology
(same as BL_STU 3100 and PSYCH 3880). The research, theories and paradigms developed to understand the attitudes, behaviors and psychosocial realities of African-Americans are discussed.
Credit Hours: 3
Prerequisites: PSYCH 1000

ESC_PS 3200: Black Feminism
This course outlines the basic principles and practices of Black feminism in the United States. Examination of the multiple systems of oppression on Black women’s lives and Black women’s collective actions against social structures will occur.
Credit Hours: 3
Prerequisites: PSYCH 1000 or instructor’s consent

ESC_PS 3901: Topics in Educational School, and Counseling Psychology - General
Topics place holder for lower division courses.
Credit Hour: 1-3

ESC_PS 4087: Seminar in Educational, School, and Counseling Psychology
Credit Hour: 1-3
Prerequisites: instructor’s consent

ESC_PS 4115: Human Learning
An introduction to the basic principles of learning. Focus is on principles of learning which have the greatest utility for professional educators. This course provides a foundation for more advanced courses in human learning.

ESC_PS 4120: Foundations of Counseling Psychology
Survey of contemporary theories underlying individual feminist, family systems, and multicultural approaches to counseling. Introduction to professional and ethical issues in Counseling Psychology.
Credit Hours: 3
Prerequisites: departmental consent

ESC_PS 4160: Developmental Aspects of Human Learning
Investigates aspects of human development that affect classroom learning. Topics include parenting style, divorce, friendship, mental health, attachment, play, aggression, culture, and media.
Credit Hours: 3

ESC_PS 4170: Introduction to Applied Statistics
Introduces statistical techniques including descriptive statistics, correlation, simple regression and hypothesis testing. Math Reasoning Proficiency Course.
Credit Hours: 3
Prerequisites: College Algebra or equivalent

ESC_PS 4200: Positive Psychology
Using self-actualization and self-determination theory, the course builds on identifying personal strengths in people. An emphasis is placed on developing interventions that promote positive thinking. Some sections graded on either A-F or S/U basis only.
Credit Hours: 3

ESC_PS 4460: Exploring Mental Health Issues in Schools
This course is an introduction to the mental health challenges found in schools. It provides education professionals with the knowledge and basic skills to promote positive mental health practices in the schools.
Credit Hours: 3

ESC_PS 4901: Topics in Educational School, and Counseling Psychology - General
Topics place holder for lower division courses.
Credit Hour: 1-3

ESC_PS 4960: Readings in Educational, School, and Counseling Psychology
Credit Hour: 1-3
Prerequisites: instructor’s consent
ESC_PS 7000: Foundation of Teacher Prep I
Designed for graduate students seeking teacher certification, this course addresses content and application in comprehensive classroom management, development, behavior management, and diversity. Field work is required and integrated with course content.

Credit Hours: 3
Prerequisites: PSYCH 1000

ESC_PS 7087: Seminar in Educational, School, and Counseling Psychology
Credit Hour: 1-3
Prerequisites: instructor’s consent

ESC_PS 7100: Theories and Applications of Educational Psychology
An introduction into the ideas and purpose of Educational Psychology in human development, learning, assessment/measurement and education.

Credit Hours: 3
Prerequisites: PSYCH 1000

ESC_PS 7115: Human Learning
An introduction to the basic principles of learning. Focus is on principles of learning which have the greatest utility for professional educators. This course provides a foundation for more advanced courses in human learning. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ESC_PS 4100 or ESC_PS 7100

ESC_PS 7120: Foundations of Counseling Psychology
Survey of contemporary theories underlying individual, feminist, family systems, and multicultural approaches to counseling. Introduction to professional and ethical issues in Counseling Psychology.

Credit Hours: 3
Prerequisites: departmental consent

ESC_PS 7130: Parent Counseling and Consultation
For personnel working with parents in professional settings. Examines current family needs and child-rearing practices. Basic skills in diagnosis, counseling, consultation, parent education are developed.

Credit Hours: 3
Prerequisites: ESC_PS 4120 or ESC_PS 7120

ESC_PS 7150: Interviewing and Counseling
Study of beginning interviewing and counseling skills applied to helping relationships in human services professions. Emphasis placed on learning helping skills in small group format. Lab required.

Credit Hours: 3
Prerequisites: PSYCH 1000 or PSYCH 1010

ESC_PS 7160: Developmental Aspects of Human Learning
Investigates aspects of human development that affect classroom learning. Topics include parenting style, divorce, friendship, mental health, attachment, play aggression, culture, and media. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 7170: Introduction to Applied Statistics
Introduces statistical techniques including descriptive statistics, correlation, simple regression and hypothesis testing. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: College Algebra or equivalent

ESC_PS 7180: Foundations of Rehabilitation
The vocational and independent living rehabilitation system for disabled persons. Concept of disability, its social psychological implications, and techniques of preparing disabled persons for adult adjustment.

Credit Hours: 3
Prerequisites: PSYCH 1000

ESC_PS 7185: Health Behaviors: Drug and Sexuality Education
Psychological, social and physical factors related to drug taking and sexuality behaviors.

Credit Hours: 3
Prerequisites: LTC 1310 or equivalent or instructor’s consent

ESC_PS 7190: Alcohol Abuse and Rehabilitation I
Covers historical perspective, definition and measurement of the problem, classifications and theories about the etiology of alcoholism.

Credit Hours: 3
Prerequisites: ESC_PS 4120 or ESC_PS 7120 or ESC_PS 4180 or ESC_PS 7180 or instructor’s consent

ESC_PS 7195: Sport and Applied Coaching Psychology
Sport and Applied Coaching Psychology is a fusion of positive psychology and sport psychology. Positive psychology teaches coaches a healthy approach based in positive motivation and behavior modeling. Sport psychology helps coaches identify with the mental training of athletes and its role in delivering maximum performance. Course focus is on helping coaches maximize the potential of their athletes and teams, while also building upon their emotional and psychological wellbeing.

Credit Hours: 3

ESC_PS 7200: Positive Psychology
Positive psychology explores what is positive, creative, and fulfilling in human behavior. It is the scientific study of well-being and flourishing: what people do right. This course will examine cornerstones and key concepts such as emotions, engagement, relationships, strengths, virtues, meaning, and purpose. Proven as a very effective application in the realms of organizations, governments, businesses, education, counseling, etc., it is best originally understood by applying it to oneself.

Credit Hours: 3

ESC_PS 7220: Measurement of Cognitive Abilities
Analysis of the function of psychological testing and a critical examination of various achievement, aptitude, and intelligence assessment instruments.

Credit Hours: 3

</tbody>
</table>
ESC_PS 8095: Research in Educational, School, and Counseling Psychology
Supervised research that is independent of master’s thesis or doctoral dissertation. Graded on S/U basis only.
Credit Hours: 1-6
Prerequisites: advisor’s consent

ESC_PS 8100: Psychological Assessment of Children and Adolescents: Cognitive Assessment
Basic principles in intelligence theory and intermediate measurement concepts. Practice in administering, scoring, and interpretation of data from individually administered intelligence tests with school aged children and adolescents. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ESC_PS 8040, demonstrated knowledge of ethical principles and departmental consent

ESC_PS 8110: Methods in Group Counseling
Study of group counseling methods and techniques. Participation in a group is required.
Credit Hours: 3
Prerequisites: ESC_PS 8040, demonstrated knowledge of ethical principles and departmental consent

ESC_PS 8120: Psychological Assessment of Children and Adolescents: Psychoeducational Assessment
Practice in administering, scoring, and interpretation of data from academic achievement, nonverbal intelligence, memory, adaptive behavior, and perceptual/motor assessments with school-age youth and adolescents.
Credit Hours: 3
Prerequisites: ESC_PS 8100 and instructor’s consent

For first-year doctoral students in school psychology. History, current issues, trends, professional organizations, legal-ethical standards of doctoral level school psychology are discussed. The scientist-practitioner model and scientific reasoning process as they apply to both science and practice are reviewed.
Credit Hours: 3
Prerequisites: Must be admitted to school psychology program

ESC_PS 8130: Psychological Assessment of Adults
Students develop and practice skills in writing psychological reports with special emphasis on assessing psychological social-vocational functioning.
Credit Hours: 3
Prerequisites: ESC_PS 8100

ESC_PS 8135: Foundations of Career Psychology
Theoretical orientations to counseling for career development; nature and structure of work, education, and leisure; work and family issues; career concerns of special populations; use of career information in counseling.
Credit Hours: 3
Prerequisites: PSYCH 1000

ESC_PS 8140: Psychological Assessment in Children and Adolescents: Behavior and Social Emotional Assessment
This course introduces behavior theory, behavioral and social-emotional assessment techniques (including observations, interviewing, rating scales, and projective techniques) and their link to relevant interventions, with a primary focus on school-age youth and adolescents.
Credit Hours: 3

ESC_PS 8145: Psychological Interventions with Children and Adolescents: Behavioral Intervention
This course will emphasize behavioral theory, assessment, and intervention, including functional behavior assessment, positive behavior supports, and the conceptualization from an individual, systems, and public health perspective. Graded on A-F basis only
Credit Hours: 3

ESC_PS 8160: Psychological Interventions with Children and Adolescents: Educational Instruction
This course investigates models of school instruction in both general and special education, and how instruction can be adapted for learners who exhibit a range of academic and psychological problems and disabling conditions.
Credit Hours: 3
Prerequisites: ESC_PS 8100, ESC_PS 8120 and instructor’s consent

ESC_PS 8165: Psychological Interventions with Children and Adolescents: Evidence- Based Therapies
An introduction to evidence-based child and adolescent psychotherapies, including individual and group interventions. Various aspects will be considered including assessment, diagnosis, and treatment planning. Graded on A-F basis only.
Credit Hours: 3

ESC_PS 8170: Career Resources in Business and Industry
Personnel practices, occupational requirements, and career opportunities and resources in business and industry. Applications are emphasized through on-site visits and use of business-industry-labor personnel. Graded on S/U basis only.
Credit Hour: 2-4
Prerequisites: ESC_PS 8135 or instructor’s consent

ESC_PS 8180: Theory and Practice in Career Psychology
Methods and programs for facilitating the career development of individuals over the life span. Organization and development of activities and programs for all ages emphasized.
Credit Hours: 3
Prerequisites: ESC_PS 8135

ESC_PS 8185: Health Promotion
An overview of the important concepts of health promotion. Emphasis on specific health-related problems and issues, health behavior change, and the design, development implementation, and evaluation of comprehensive health promotion programs.
ESC_PS 8195: Applied Positive Coaching
Explores concepts of sport, coaching and positive psychology, particularly the interventions and applications designed to further develop a coach’s philosophy, communication skills, understanding of motivation, leadership skills, and the coach’s and athlete’s well-being. Prerequisites: ESC_PS 7195
Credit Hours: 3

ESC_PS 8220: Vocational Assessment of Individuals with Disabilities
This course is an overview of the philosophy of vocational assessment of individuals with disabilities. The course also emphasizes to positive integration of vocational assessment into the rehabilitation counseling process. Assessment practice included.
Credit Hours: 3
Prerequisites: ESC_PS 7180 and ESC_PS 8082

ESC_PS 8232: Foundations of Sport Performance
Focuses on principles and methods to become an effective sport performance coach. Examines the development of athletes and education of basic sports nutrition, strength, and conditioning.
Credit Hours: 3

ESC_PS 8240: Sport in America
Sociological perspectives of sport in America. Attention given to the influence of society on sport as in institution, and the role of sport as an agent of social change.
Credit Hours: 3
Prerequisites: SOCIOL 1000 or PSYCH 1000

ESC_PS 8250: School Psychology Practicum: Introduction to School Services
This course is an intro practicum that exposes students to the organization and functions of schools. Students work with psychologists and other school personnel on academic and behavioral interventions to learn how schools serve children and their families. May be repeated for credit.
Credit Hour: 1-6
Prerequisites: LTC 1310 or equivalent or instructor’s consent

ESC_PS 8260: School Psychology Practicum: School-Based
Level II School Psychology Practicum provides students with experience in school-based psychological service delivery. Students gain experience with psychoeducational assessment and diagnosis, intervention planning and delivery, consultation, and serving on multidisciplinary teams. May be repeated for credit.
Credit Hour: 1-6
Prerequisites: instructor’s consent

ESC_PS 8265: Administration of Athletic Programs
Examines methods, principles, and roles of athletic administrators. Also, examines the job responsibilities and competencies required of sport leaders in athletic administration.
Credit Hours: 3

ESC_PS 8270: Student-Athlete Wellbeing
As a positive coach and career educator, your knowledge of student wellbeing is critical to support your students’ physical, mental, and social health alongside their academic success and development beyond sport. Although our semester will focus largely on the most critical components of student welfare, we will also frame our study of student wellbeing using the tenets of Positive Psychology, a discipline that champions a strengths-based approach to guide positive behaviors associated with health and wellbeing. Health promotion theory will also guide our course of study as we examine: (a) individual student-athlete wellbeing with a focus on physical, mental, and social health (b) wellbeing in the context of student services provided by the school or organization, and (c) program evaluation methodology to identify strengths and opportunities for program improvement to enhance wellbeing and welfare for all student-athletes. Graded on A-F basis only.
Credit Hours: 3
Recommended: ESC_PS 7200 Positive Psychology

ESC_PS 8280: Gender Issues in Sport
Through a study of theory and applied practice, students will explore personal biases, understand intersecting identities and explore privilege and oppression at the individual, interpersonal, structural, and cultural level when considering gender awareness in sport.
Credit Hours: 3

ESC_PS 8290: Multicultural Issues in Sport
The purpose of this course is to increase the level of multicultural awareness, knowledge, skills, and relationship of athletic coaches...
working with diverse student populations. Activities and assignments are designed to assist, encourage, and challenge each student to more fully develop awareness and knowledge of self, and to use this information to improve intercultural interactions with others in professional settings as well as other settings.

Credit Hours: 3

**ESC_PS 8300: Positive Leadership in Sport**
A Positive Leadership philosophy requires Positive Leadership delivery. Course is designed to prepare leaders to bridge content knowledge to practical application. Students will use core competencies learned throughout their program to develop their leadership approach.

Credit Hours: 3

**ESC_PS 8310: Colloquium in Educational Psychology**
A course that covers current topics in learning, development, and schooling. Topics include cognitive, affective, academic, physical, moral ethnic/cultural domains. May be repeated for credit.

Credit Hour: 1
Prerequisites: Instructor's consent required

**ESC_PS 8320: Advanced Human Learning**
A study of behavioral and cognitive theories of learning with an emphasis on those greatest utility for educators. Experimental evidence forming the theoretical base for educational practice is examined.

Credit Hours: 3
Recommended: ESC_PS 2400 or ESC_PS 7100

**ESC_PS 8330: Motivating At-Risk and Diverse Students**
This course examines motivational concepts that apply to students of all ages. The course is designed to help teachers design classrooms and assignments that would improve the motivation of students, especially at-risk students. The course pays special attention to issues of diversity relevant to motivation. Graded on A-F basis only.

Credit Hours: 3

**ESC_PS 8340: Cultural Backgrounds and Learning**
The course explores the influence of culture on the process of learning. Topics and discussions will center on learning within the K-12 classroom. Readings and assignments are tailored to engage students in practical classroom applications of the information and discussions within the course. At the conclusion of the course students will have a deep understanding of how culture shapes thinking, learning, behavior, and the classroom environment. Graded on A-F basis only.

Credit Hours: 3

**ESC_PS 8350: Cognition, Learning and Instruction**
Examines the topics of memory and cognition as they apply to the process of learning and instruction.

Credit Hours: 3
Prerequisites: ESC_PS 8320 or instructor's consent

**ESC_PS 8355: Cognition and Emotion**
This course looks at human cognition and emotions and their influence on learning, self-control, motivation, executive processes, and behavior change. Graded on A-F basis only.

Credit Hours: 3

**ESC_PS 8360: Advanced Counseling Theories and Interventions**
Contemporary theories and interventions of counseling. Advanced study of efficacious techniques. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ESC_PS 8040 or ESC_PS 8342

**ESC_PS 8400: Analysis of Research in Career Psychology**
Examination of career development theories, the research supporting the theories, and the practical application of these ideas in career counseling and career programs.

Credit Hours: 3
Prerequisites: ESC_PS 8135

**ESC_PS 8410: School Guidance Programs**
Provides knowledge and skills in the development and management of school guidance programs including program planning, structuring, implementing, and evaluating.

Credit Hours: 3
Prerequisites: ESC_PS 7120

**ESC_PS 8415: Program Evaluation for School Counselors**
Program Evaluation is a graduate seminar intended to provide students with the skills needed to evaluate comprehensive guidance and counseling programs. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ESC_PS 7120

**ESC_PS 8425: Effects of Maltreatment on Child and Adolescent Development**
Course topics to be covered include 1) definitions of child maltreatment, 2) incidence and prevalence rates, 3) possible causes and consequences associated with child maltreatment, 4) treatment of survivors and perpetrators, and 5) prevention efforts. Important legal and ethical issues will be discussed, such as children's competence and eyewitness abilities, false allegations of abuse, mandated reporting, and investigative interviewing of children. Graded on A-F basis only.

Credit Hours: 3

**ESC_PS 8430: Mental, Emotional, and Behavioral Disorders in Youth**
The course will include an overview of normal development and an investigation into specific deviations in intensity, frequency, and/or duration of normal development which impact the individual in his or her home, school, and community.

Credit Hours: 3

**ESC_PS 8435: Wellness Management for School Personnel**
The current climate in schools places considerable demands on teachers and other school personnel. Often, those working in schools find
themselves under enormous stress and pressure. In this course, school personnel will examine a variety of topics related to both identifying and effectively dealing with these pressures. Topics include communication skills, dealing with challenging individuals in the school system, recognizing and effectively managing stress, and recognizing burnout and re-energizing. The course will provide an overview of the research on these topics, as well as numerous effective strategies to deal with these pressures. Students in the course will have opportunities to apply learned strategies to real-life situations in the schools. Graded on A-F basis only.

**Credit Hours:** 3

ESC_PS 8440: School Mental Health: Policy, Law and Ethics
This course is designed to familiarize school-based professionals with policies, laws and ethics associated with children and youth and schools.

**Credit Hours:** 3

ESC_PS 8445: Building Resiliency and Optimism in Youth
Examines risk and resiliency processes during childhood and adolescence. Focuses on defining resilience; sources of risks and protective factors within families, schools, and communities; prevention programs targeting early, middle childhood and adolescence. Promotion of one’s own resilience and well-being discussed. Special topics include strengths-based models of resiliency, resilience and family difficulties, violence and maltreatment, poverty, dropout, and school/community-based prevention and intervention.

**Credit Hours:** 3

ESC_PS 8450: Diversity Issues in School Mental Health
The purpose of this course is to increase the level of multicultural awareness, knowledge, skills, and relationship of school personnel working with diverse student populations.

**Credit Hours:** 3

ESC_PS 8455: Bully and Youth Violence: Prevention and Reduction
This course is a survey of current issues in bullying and youth violence with an emphasis on applications in the school environment. The course will present effective strategies for bullying and violence prevention within the school and in collaboration with the community at large. Students are encouraged to apply the course concepts to their work environment and develop tools for future practice in schools and other youth-serving settings. Graded on A-F basis only.

**Credit Hours:** 3

ESC_PS 8460: Communication and Collaboration with Children and Families
This course will provide education professionals with the knowledge and basic skills to address common mental health issues through positive and solution focused communication and collaboration.

**Credit Hours:** 3

ESC_PS 8465: Vital Issues in School Mental Health
The course is highly individualized in that students, as a group, will choose the specific topics to be covered. Readings and assignments have three foci: 1) improve understanding of each issue within a broader context of public mental health policy, prevention, intervention, and maintenance; 2) deepen student knowledge of the topic from practice and research-based sources; and 3) enable students to deal more effectively with those issues within relevant settings. Topics may include, but are not limited to: school dropout, substance use, self-injury/cutting, relational aggression, management of extreme behaviors, homelessness, divorce/death, eating disorders, pregnancy, ADHD, and many others. Graded on A-F basis only.

**Credit Hours:** 3

ESC_PS 8470: Preventions and Interventions in School Mental Health
This course explores the role that educators and school mental health professionals play in promoting, prevention and early intervention practices for mental, emotional, and behavioral disorders in youth and considers the basic steps for designing, implementing and evaluating evidence based interventions.

**Credit Hours:** 3

ESC_PS 8475: Proactive Behavior Management
This course provides a framework to a prevention-focused model of classroom support and behavior management. Prevention is less time-consuming in the long run and leads to more opportunities for learning and social engagement because discipline problems are not interfering with teaching. This course will include evidence based strategies to structure proactive learning environments that promote students' academic skills and competencies as well as their social and emotional development. Graded on A-F basis only.

**Credit Hours:** 3

ESC_PS 8490: Mental Health in Schools Capstone Paper
Course focuses on writing a capstone integration paper that is intended to be a culminating experience. Allows students to reflect on the content of their course work, evaluate the knowledge and skills acquired, and apply what they have learned into their professional practice.

Prerequisites: instructor’s consent

**Credit Hour:** 1

ESC_PS 8500: Rehabilitation Counseling
A study of the history and current status of rehabilitation counseling, and the role, theory, and practice of counseling in rehabilitation settings with persons with disabilities.

**Credit Hours:** 3

ESC_PS 8510: Medical and Psychological Aspects of Disability
Presentation of medical aspects of major disabilities and their effects upon social, vocational, personal, and economic adjustment. Study of basic restoration and accommodating services.

**Credit Hours:** 3

ESC_PS 8515: Sport Psychology
Current topics of research in sport psychology are examined. Topics include: sport personality, attention, activation and anxiety intervention, motivation, sport aggression, audience effects, team cohesion, leadership, and health psychology.

**Credit Hours:** 3
Prerequisites: PSYCH 1000

ESC_PS 8520: Job Acquisition for Individuals with Disabilities
Techniques of job development, placement, job analyses of the individual’s skill and abilities and the employer’s needs, and how to build professional relationships with employers.
Credit Hours: 3
Prerequisites: ESC_PS 7180

ESC_PS 8530: Developmental Psychopathology and Exceptionality
An investigation into the presentation, diagnosis, and treatment of psychopathologies in individuals, emphasizing causal pathways, risks/resiliency, prevalence, incidence, and continuity/discontinuity of the disorders from research in the field of developmental psychopathology. Graded on A-F basis only.
Credit Hours: 3

ESC_PS 8540: Theory and Practice in Feminist Therapy
Theory, research, practice standards and current debates within feminist therapy. Includes both examination of topical areas in a seminar format and live observation of feminist therapy.
Credit Hours: 3
Prerequisites: ESC_PS 8940 or instructor’s consent

ESC_PS 8550: Diversity and Multiculturalism II - Practical Application
This course is part two in the Multicultural Education Certificate series of online courses designed for students working in a broad range of professions, such as health care, social work, education, school counseling, administration, etc. Students will examine various topics on diversity and multiculturalism to enhance their personal and professional development. To this end, the milieu of this course will be a safe online environment that is conducive to open dialogue, self-reflection, critical thinking, and questioning, and one in which students can actively engage in the learning process through affective and cognitive approaches. Postings, along with relevant readings and assignments, will be used as the primary tools and resources for this collective learning experience. Graded on A-F basis only.
Credit Hours: 3
Recommended: ESC_PS 8450

ESC_PS 8555: African American Education - Historic and Current Issues
Critical examination of the deculturalization of American educational system. Concepts of race, culture, and “post racial society” are juxtaposed with social and systemic trends impacting African American students both in and out of the classroom. Pedagogical strategies are discussed. Graded on A-F basis only.
Credit Hours: 3
Recommended: ESC_PS 8450

ESC_PS 8560: Immigrant Issues in Education
The purpose of this course is to increase the level of cross-cultural awareness, knowledge, and skills of school personnel working with students who are immigrants. It is designed to be practically and experientially oriented. Activities and assignments in the class are designed to assist, encourage, and challenge each student to more fully develop awareness and knowledge of self, and to use this information to improve intercultural interactions with others in professional settings as well as other settings. The anticipated outcome includes improved skills in conceptualizing the unique needs of and responding with appropriate approaches to effectively assist students who are immigrants. Graded on A-F basis only.
Credit Hours: 3
Recommended: ESC_PS 8450

ESC_PS 8565: Gay, Lesbian and Bisexual Issues in the Schools
This online course seeks to expand your perspective, worldview, and knowledge of GLB individuals and in your work environments as well as an invitation to promote social justice to make positive changes for the benefit of GLB individuals. Individuals who identify as GLB face many unique experiences, challenges, and opportunities during their developmental life span including issues related to coming out, psychological well-being and mental health development, heterosexism and homophobia, stereotypes and myths, and sexual identity. These issues and more are discussed in the course. Graded on A-F basis only.
Credit Hours: 3

ESC_PS 8580: Social and Cultural Identity Development
Graduate-level course designed to introduce students to: (a) the dominant social and cultural identity theories and paradigms; (b) how these theories have been operationalized and measured.
Credit Hours: 3

ESC_PS 8585: Gender Issues in Counseling and Education
Topics include conceptions of gender roles, measurement of gender-related constructs, gender role socialization process, high incidence gender-related problems, and psychoeducational and counseling interventions.
Credit Hours: 3
Prerequisites: instructor’s consent

ESC_PS 8590: Multicultural Counseling Competencies: Theory and Research
This course will introduce students to the current status of multicultural counseling theories and research issues and help students to increase their knowledge of cultural differences in counseling and psychology. Graded on A-F basis only.
Credit Hours: 3

ESC_PS 8640: Interviewing, Diagnosis, and Assessment
Introduction to clinical, psychometric assessment, and diagnosis. Data-gathering methods include interviews and tests/inventories of intellectual functioning, abilities, personality, and interests. Students utilize psychological reports to inform assessment, diagnosis and treatment.
Credit Hours: 3

ESC_PS 8650: Gay, Lesbian and Bisexual Issues in the Schools
This online course seeks to expand your perspective, worldview, and knowledge of GLB individuals and in your work environments as well as an invitation to promote social justice to make positive changes for the benefit of GLB individuals. Individuals who identify as GLB face many unique experiences, challenges, and opportunities during their developmental life span including issues related to coming out, psychological well-being and mental health development, heterosexism and homophobia, stereotypes and myths, and sexual identity. These issues and more are discussed in the course. Graded on A-F basis only.
Credit Hours: 3

ESC_PS 8850: Social and Cultural Identity Development
Graduate-level course designed to introduce students to: (a) the dominant social and cultural identity theories and paradigms; (b) how these theories have been operationalized and measured.
Credit Hours: 3

ESC_PS 8940: Theory and Practice in Feminist Therapy
Theory, research, practice standards and current debates within feminist therapy. Includes both examination of topical areas in a seminar format and live observation of feminist therapy.
Credit Hours: 3
Prerequisites: ESC_PS 8940 or instructor’s consent

ESC_PS 8950: Interviewing, Diagnosis, and Assessment
Introduction to clinical, psychometric assessment, and diagnosis. Data-gathering methods include interviews and tests/inventories of intellectual functioning, abilities, personality, and interests. Students utilize psychological reports to inform assessment, diagnosis and treatment.
Credit Hours: 3
**ESC_PS 8655: Item Response Theory**
Introduces modern scaling with Item Response Theory, and includes how it can be used to statistically specify information about latent variables and the stimuli (e.g., tests) used to represent them.

**Credit Hours:** 3  
**Prerequisites:** ESC_PS 9640 and ESC_PS 9650

**ESC_PS 8690: Educational Planning and Evaluation**
This course addresses major issues and models used in educational program planning and evaluation, including the appropriate use of various evaluation models and different types of data.

**Credit Hours:** 3  
**Prerequisites:** departmental inquiry course, ESC_PS 8610 and/or ESC_PS 8630

**ESC_PS 8700: Life/Career Coaching and Development**
Designed to teach life and career coaching strategies with roots in career psychology and positive psychology. It provides the tools and knowledge on how to coach people to achieve their personal and professional goals.

**Credit Hours:** 3  
**Prerequisites:** ESC_PS 7200

**ESC_PS 8710: Meaning In Work**
Covers a broad look at meaning and vocation using theoretical and empirical frameworks. Also explores the influence of culture, environment, relationships and personal values on meaning development while providing a framework for working from a coaching/counseling standpoint to help others identify or develop meaningful vocations. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** ESC_PS 7200

**ESC_PS 8720: Community and Stewardship**
Examines the concepts of community and stewardship, explores the literal roots of the word (common-unity) and our ability to respond (responsibility) to and build our communities. Also explores the connections between altruism, personal well-being, and social stewardship.

**Credit Hours:** 3  
**Prerequisites:** ESC_PS 7200

**ESC_PS 8730: Positive Organizational Psychology**
Surveys the impact of positive organizational psychology research throughout professional organizations. Students will learn empirically defined elements of positive work environments and learn the building blocks associated with this field including: Appreciative Inquiry, the Abundance Approach, Strengths-Based Organizations, Positive Work Environments, and Employee Engagement and Satisfaction.

**Credit Hours:** 3  
**Prerequisites:** ESC_PS 7200

**ESC_PS 8830: Quantitative Analysis in Educational Research I**
This is the first course in the sequence of statistical analysis methods. Topics covered in this course include statistical inference, simple regression, multiple regression, regression assumptions, regression with categorical predictors, model selection methods polynomial regression, and model validation.

**Credit Hours:** 3

**ESC_PS 8840: Quantitative Analysis in Educational Research II**
This is the second course in the sequence of statistical analysis methods. Topics extend those covered in Quantitative Analysis I and include hypothesis testing, ANOVA, ANCOVA, repeated measures design, random-effects ANOVA, introduction to logistic regression, polytomous and ordinal regression and linear mixed models (if time permits).

**Credit Hours:** 3  
**Prerequisites:** ESC_PS 7170 and ESC_PS 8830

**ESC_PS 8850: Quantitative Foundations in Educational Research**
This course is designed to provide students the fundamental and necessary quantitative methods skills in educational research. Topics include one-way and factorial analysis of variance (ANOVA), analysis of covariance (ANCOVA), repeated measures ANOVA, random-effects ANOVA, simple linear regression, multiple regression, regression diagnostics, introduction to logistic regression, and statistical power analysis. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** ESC_PS 7170

**ESC_PS 8870: Public Health Psychology**
Study of applications of psychology to behavior, environment, and policy to promote health and prevent disease. The course gives particular attention to behavioral epidemiology and risk/resiliency factors associated with negative outcomes of childhood and adolescents.

**Credit Hours:** 3

**ESC_PS 8900: Topics in Education, School and Counseling Psychology**
Topics placeholder for upper division courses.

**Credit Hour:** 1-3

**ESC_PS 8940: Counseling Psychology Practicum**
Supervised practice of counseling in an approved counseling setting. May be repeated. Graded on S/U basis only.

**Credit Hour:** 3-9  
**Prerequisites:** ESC_PS 8110 and instructor's consent

**ESC_PS 8941: Practicum and Theory in Group Counseling I**
Supervised practice of group facilitation in an approved setting. Formal study of contemporary theories and advanced techniques is integrated with the practice of group facilitation. Graded on S/U basis only.

**Credit Hours:** 4  
**Prerequisites:** ESC_PS 8110 and instructor's consent

**ESC_PS 8942: Practicum and Theory in Group Counseling II**
A continuation of Educational School, and Counseling Psychology 8200. Graded on S/U basis only.

**Credit Hours:** 4

</thead>
<tbody>
<tr>
<td>ESC_PS 8943</td>
<td>Practicum in Multicultural Counseling Interventions</td>
<td>Supervised practice of applied multicultural counseling interventions in a wide variety of approved community and university settings. Graded on S/U basis only.</td>
<td>ESC_PS 8200 and instructor’s consent</td>
<td>1-6</td>
</tr>
<tr>
<td>ESC_PS 8944</td>
<td>School Psychology Practicum</td>
<td>Supervised practice of psychological assessment, intervention and remediation strategies. May be repeated. Graded on A-F basis only.</td>
<td>ESC_PS 8040 and either ESC_PS 8570 or ESC_PS 8590</td>
<td>1-6</td>
</tr>
<tr>
<td>ESC_PS 8945</td>
<td>Practicum in Marriage and Family Counseling</td>
<td>Supervised practice in marriage and family counseling conducted in appropriate laboratories and agencies. Graded on S/U basis only.</td>
<td>ESC_PS 8040, ESC_PS 8342, ESC_PS 8160 or ESC_PS 8050 and departmental consent</td>
<td>3-6</td>
</tr>
<tr>
<td>ESC_PS 8946</td>
<td>Rehabilitation Counseling Internship</td>
<td>Field-based counseling internship in a community setting serving individuals with disabilities. 600 hour supervised experience designed to combine theoretical and applied program training aspects. Graded on S/U basis only.</td>
<td>ESC_PS 8040, ESC_PS 8520, and ESC_PS 8220</td>
<td>3-9</td>
</tr>
<tr>
<td>ESC_PS 8947</td>
<td>Practicum in Student Development Programs</td>
<td>Supervised practice in student personnel services in an approved agency. Graded on S/U basis only.</td>

<td>3</td>
</tr>
<tr>
<td>ESC_PS 8948</td>
<td>Field Placement in Counseling/Supervision</td>
<td>Students will conduct counseling and/or supervision in approved community agencies under the supervision of licensed practitioners. Graded on S/U basis only.</td>
<td>completion of 9 credit hours of ESC_PS 8040, and consent of the Counseling Area Faculty</td>
<td>1-6</td>
</tr>
<tr>
<td>ESC_PS 8950</td>
<td>Prevention Science Practicum: School and Family Centered Interventions</td>
<td>Prevention Science Practicum is an advanced graduate level practicum intended to provide students with the theoretical and practice skills needed to provide effective prevention services to children and families across multiple contexts. An emphasis is placed on school and family centered supports that prevent emotional and behavior problems in children. Graded on S/U basis only.</td>
<td>ESC_PS 8000 preferred; instructor's consent</td>
<td>3-6</td>
</tr>
<tr>
<td>ESC_PS 8957</td>
<td>Qualitative Methods in Educational Research I</td>
<td>(same as LTC 8957 and ED_LPA 8957). This course provides a practical introduction to qualitative research and its applications in education and social sciences. Graded on A-F basis only.</td>
<td>Instructor’s consent required</td>
<td>3</td>
</tr>
<tr>
<td>ESC_PS 8960</td>
<td>Interdisciplinary Child and Family Practicum</td>
<td>This class includes a focus on child/family services with a systems/interdisciplinary approach. Students provide services via a mentorship model (strong supervision initially moving toward autonomy). Services include evaluations, therapy, consultation, psychiatric cross-training, and others. Graded on S/U basis only.</td>
<td>ESC_PS 8040 and instructor’s consent</td>
<td>1-6</td>
</tr>
<tr>
<td>ESC_PS 8980</td>
<td>Field Experience in Counseling</td>
<td>Graded on S/U basis only.</td>
<td>Instructor’s consent</td>
<td>3-9</td>
</tr>
<tr>
<td>ESC_PS 8990</td>
<td>Career Development Theory for Women</td>
<td>Consideration of the relevance of theories of career development for women, and their application to the counseling of women. Supervised clinical experience in the application of theories to counseling high school age women.</td>
<td>Instructor’s consent</td>
<td>3</td>
</tr>
<tr>
<td>ESC_PS 9000</td>
<td>Multicultural Issues in Counseling</td>
<td>This course covers the research and theories of counseling racial/ethnic minorities and gays, lesbians, and bisexuals in the U.S. Examination of personal values and education about the interrelationship between race, class, gender, and sexuality are accomplished via structured activities.</td>
<td>ESC_PS 8340</td>
<td>3</td>
</tr>
<tr>
<td>ESC_PS 9010</td>
<td>Building Cross-Cultural Competencies: Taiwan Up Close</td>
<td>The primary purpose of the course is to promote the development of cross-cultural knowledge, awareness, and skills for applied psychologists. The first part of the course occurs at MU in preparation for part two, a 10-day professional cultural immersion in Taiwan.</td>
<td>ESC_PS 9000 preferred; instructor's consent</td>
<td>3</td>
</tr>
<tr>
<td>ESC_PS 9020</td>
<td>Psychology of Crossing Cultural Borders</td>
<td>The primary purpose of the course is to promote the development of cross-cultural knowledge, awareness, and skills for applied psychologists. Students acquire knowledge of psychological processes associated with crossing cultural borders, and translate that knowledge into practical applications. Graded on A-F basis only.</td>
<td>ESC_PS 8000 preferred; instructor's consent</td>
<td>3</td>
</tr>
</tbody>
</table>
ESC_PS 9040: Cross-Cultural Issues in Counseling: International Focus
This course focuses on developing students’ awareness, knowledge, and skills in cross-national counseling and research in equipping the next generation of counseling psychologists’ competencies related to the globalization trend of counseling psychology. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ESC_PS 9000

ESC_PS 9050: Biofeedback in Psychological Practice
Use of biofeedback in achieving voluntary self-regulation and control of stress related behaviors.
Credit Hours: 3
Prerequisites: ESC_PS 8040 or ESC_PS 8342 and instructor’s consent

ESC_PS 9087: Advisor’s Seminar
Credit Hour: 1
Prerequisites: departmental consent

ESC_PS 9090: Doctoral Dissertation Educational School & Counseling Psychology
Independent research leading to dissertation. Graded on S/U basis only.
Credit Hour: 1-12
Prerequisites: departmental consent

ESC_PS 9091: Internship in Counseling Psychology
Supervised experience in counseling psychology on half- or full-time basis in approved internship station. May be repeated. Graded on S/U basis only.
Credit Hour: 1-6
Prerequisites: departmental consent

ESC_PS 9092: Internship in School Psychology
Supervised practice in school psychology in an educational setting. May be repeated. Graded on S/U basis only.
Credit Hour: 1-6
Prerequisites: departmental consent

ESC_PS 9093: Doctoral Internship in School Psychology
Supervised practice in doctoral-level school psychology in an institutional or applied setting. May be repeated. Graded on S/U basis only.
Credit Hour: 1-6
Prerequisites: departmental consent

ESC_PS 9125: Professional Iss. in Sch. Psych. II: Rsrch. Design & Application
For first-year doctoral students in school psychology. Includes study of research design and methodological issues in the field of school psychology.
Credit Hours: 3
Prerequisites: Must be admitted to school psychology doctoral program

ESC_PS 9126: Prevention Science Research Design and Analysis
Prevention Science Research is a graduate seminar intended to provide students with the theoretical and empirical foundations of prevention science. In particular, students will learn how to conceptualize problems from a prevention science perspective and design and evaluate preventive interventions using advanced methodologies. Opportunities for community based participatory research including research design and analysis, papers and briefs, grantwriting, and community collaborations regarding prevention programming particularly pertaining to children’s mental health.
Credit Hour: 1-3
Prerequisites: instructor’s consent

ESC_PS 9250: School Psychology Practicum: Community-Based
This course is an advanced practicum for students providing school psychology services in non-school settings. Students develop higher-level skills in the areas of case coordination, diagnostic decision-making, intervention, and systems change. May be repeated for credit.
Credit Hour: 1-6
Prerequisites: instructor’s consent

ESC_PS 9260: Policy Practicum in Professional Psychology
Policy Practicum is an advanced practicum focused on macro level skills for shaping policy and systems-level intervention. Students work within agencies that establish policy for special education, mental health, and other education/psychology-related issues. May be repeated for credit.
Credit Hour: 1-3
Prerequisites: instructor’s consent

ESC_PS 9300: Psychoanalytic Counseling
A study of the contribution of classical and contemporary psychoanalysis to counseling theory, research and practice. Examination of theoretical and clinical material in a seminar format.
Credit Hours: 3
Prerequisites: ESC_PS 8040, ESC_PS 8342 and instructor’s consent

ESC_PS 9400: Theories and Practices in Supervision
Instruction and practice in the supervision of psychological services conducted in appropriate laboratories and agencies. Sections titled Counseling Psychology are graded on S/U basis only. Sections titled School Psychology are on A-F basis only.
Credit Hours: 3
Prerequisites: ESC_PS 8940 or ESC_PS 8944 and instructor’s consent

ESC_PS 9445: College Student Development
Emphasis on college student development theory and its application in student affairs work.
Credit Hours: 3

ESC_PS 9446: Student Affairs Administration
(same as ED_LPA 9446). History, philosophy, theory, and issues pertinent to student affairs work.
Credit Hours: 3
ESC_PS 9450: Motivation
Investigates human motivation applied to performance in schools, athletics, and personal life. Topics include goals, attributions, self-efficacy, interest, cultural differences, and rewards. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ESC_PS 8320 or equivalent

ESC_PS 9460: Health Behavior Change Research
(Same as NURSE 9460). Doctoral seminar focusing on theories, measurement, and methods for conducting health behavior change research. Prerequisites: NURSE 9120,

Credit Hours: 3
Prerequisites or Corequisites: NURSE 9410, or faculty consent

ESC_PS 9530: Scientific Fdns of Counseling Psych I: Prof Iss & Dsgn & Appl
For first-year doctoral students in counseling psychology. This course focuses on the history of counseling psychology, in and scientific reasoning processes as they apply to both science and practice.

Credit Hours: 3
Prerequisites: ESC_PS 9530

ESC_PS 9540: Scientific Foundations of Counseling Psych II: Rsrch, Dsgn & Appl
For first-year doctoral students in applied psychology. Includes study of research design and methodological issues in the field of counseling psychology.

Credit Hours: 3
Prerequisites: ESC_PS 9530 and ESC_PS 9540 and instructor's consent

ESC_PS 9550: Scientific Writing in Counseling Psychology
This course focuses on the technical skills needed for developing a scientific research proposal in counseling psychology.

Credit Hours: 3
Prerequisites: ESC_PS 9530 and ESC_PS 9540 and instructor's consent

ESC_PS 9560: Psychological Consultation: Schools
The individual psychological consultation process between the mental health professional and school personnel. Techniques, models, research roles, and responsibilities are discussed. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 9570: Psychological Consultation: Organizations
This course provides an introduction to the theory and practical skills required to effectively consult at the organizational level in a variety of settings and contexts. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 9610: Applied Sport Psychology
Building upon the knowledge base of sport psychology, this course integrates and synthesizes student’s understandings of the wide array of concepts and theories of the field into meaningful applications and strategies aimed at enhancing the sport experience of others. A case study approach will be employed.

Credit Hours: 3
Prerequisites: ESC_PS 8515

ESC_PS 9620: Qualitative Methods in Educational Research II
(same as ED_LPA 9620 and LTC 9620). This course constructs a conceptual and methodological bridge between the understandings of qualitative research developed in Qualitative Methods I and more advanced study of theories, designs, and methods. The focus is on theory, approaches to data analysis, and interpretation. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ESC_PS 8957

ESC_PS 9640: Introduction to Theory of Educational Measurement
Classical and modern test theory, including IRT, generalizability theory and test bias. Also covered are advanced strategies for investigating reliability and validity.

Credit Hours: 3
Prerequisites: ESC_PS 8830 and ESC_PS 8840 or equivalent and instructor's consent

ESC_PS 9650: Application of Multivariate Analysis in Educational Research
The focus of this course will be on applications of multivariate analysis in educational research.

Credit Hours: 3
Prerequisites: ESC_PS 8830 and ESC_PS 8840 or equivalent and instructor's consent

ESC_PS 9710: Structural Equation Modeling
Simultaneous analysis of relationships among variables. Topics included are path analysis, confirmatory factor analysis, hybrid models, and special types of structural models involving longitudinal data, multiple groups and analysis of means. May be repeated for credit.

Credit Hours: 3
Prerequisites: ESC_PS 7170, ESC_PS 8830, ESC_PS 8840, ESC_PS 9650; consent required

ESC_PS 9720: Hierarchical Linear Modeling
Hierarchical Linear Modeling (HLM), including multilevel and longitudinal approaches, in applied research settings for the social, educational psychological, and health-related sciences. May be repeated for credit.

Credit Hours: 3
Prerequisites: ESC_PS 7170, ESC_PS 8830, ESC_PS 8840, ESC_PS 9650; consent required

ESC_PS 9900: Topics in Educational Leadership and Policy Analysis
Topics placeholder for upper division courses.

Credit Hour: 1-3

Electrical And Computer Engineering (ECE)
ECE 1000: Introduction to Electrical and Computer Engineering
Introduction to the basic principles of electrical and computer engineering through hands-on activity. Course includes fundamentals of programming using Matlab, applied to electrical and computer engineering problems.
Credit Hours: 2

ECE 1001: Experimental Course
For freshman-level students. Content and number of credit hours to be listed in Schedule of Courses.
Credit Hour: 1-99

ECE 1210: Introduction to Logic Systems
Introduces basic tools, methods and procedures to design combinational and sequential digital circuits and systems. Topics include number systems, Boolean algebra, logic minimization, circuit design, memory elements, and finite state machine design. Graded on A-F basis only.
Credit Hours: 3

ECE 2001: Experimental Course
For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.
Credit Hour: 1-99

ECE 2100: Circuit Theory I
DC circuit analysis, inductors and capacitors, first order response, AC circuit analysis, single-phase AC power. Graded on A-F basis only.
Credit Hours: 4
Corequisites: MATH 2300

ECE 2110: Experimental Electrical Engineering I
Application of standard electronic test equipment to basic experimental tasks of measurement and characterization of electronic phenomena and devices.
Credit Hours: 3
Prerequisites: ENGINR 2100 concurrently

ECE 3110: Electrical and Computer Engineering Projects
Open-ended design projects which encourage innovative solutions to design and measurement problems. Students teams complete several projects from different areas. Both oral and written presentations emphasized. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: STAT 4710 and ECE 3210 and ECE 3410. Restricted to Electrical and Computer Engineering students only or instructor’s consent

ECE 3210: Microprocessor Engineering
Introduction to microprocessor architectures and programming; memory, memory management and cache organizations, bus configurations and timing implications; parallel I/O and serial communication interfaces.
Credit Hours: 4
Prerequisites: ECE 1210 and CMP_SC 1040 or CMP_SC 1050

ECE 3220: Software Design in C and C++
Software/Hardware development for embedded systems, including memory, I/O and interrupts; an overview of C and C++, class structures in object oriented programming; software development with UML and testing and debugging strategies. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ECE 3210 and C++ or Java

ECE 3230: Algorithms and Software Design
Covers basic algorithms including: arithmetic operations, sorting, string processing, parsing, hashing, and tree and graph manipulations. The C language and UNIX operating system are used as vehicles for illustration and practice in use of the algorithms and in the application of software design techniques.
Credit Hours: 3
Prerequisites: ECE 1210

ECE 3410: Electronic Circuits and Signals I
Electron Devices, modeling and applications to basic electronic circuits, including RC amplifiers and power supplies.
Credit Hours: 4
Corequisites: ECE 3810

ECE 3470: Introduction to Power Engineering
Real and reactive power in single and three-phase ac circuits; magnetic circuits and transformers; energy conversion, DC machines, induction and synchronous machines; power transmission and distribution. Graded on A-F basis only. Corequisites ECE 3810.
Credit Hours: 3

ECE 3510: Electromagnetic Fields
Elements of vector analysis, transmission line theory, electrostatics, magnetostatics, time varying fields and plane waves. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: PHYSCS 2760, MATH 4100

ECE 3610: Semiconductors and Devices
Crystal structure; quantum aspects of energy, radiation and matter; quantum mechanics and energy bands in solids; electronic and optical properties of semiconductors; p-n junctions and diodes; bipolar and field-effect transistors.
Credit Hours: 3
Prerequisites: ECE 3510

ECE 3810: Circuit Theory II
Impulse and step responses, RLC circuits, classical differential equations solutions, complex plane stability, frequency and Bode Analysis, Resonance, Laplace transforms, two-port networks, mutual inductance and transformers. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: ECE 2100
Corequisites: MATH 4100
ECE 3830: Signals and Linear Systems
Transform Analysis of Signals and Linear Systems. Laplace transforms, z-transforms, Fourier series and transforms.
Credit Hours: 3
Prerequisites: ECE 3810

ECE 4001: Topics in Electrical and Computer Engineering
Current and new technical developments in electrical engineering.
Credit Hour: 3-4
Prerequisites: senior standing

ECE 4020: Energy Systems and Resources
(same as NU_ENG 4315). Analysis of present energy usage in Missouri, USA and the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies.
Credit Hours: 3
Prerequisites: ENGINR 2300

ECE 4030: Introduction to Nuclear Reactor Engineering
(same as NU_ENG 4346). Engineering principles of nuclear power systems, primarily for the production of electrical energy.
Credit Hours: 3
Prerequisites: ENGINR 1200, ENGINR 2300

ECE 4040: Introduction to Nuclear Physics
Introduction of Quantum mechanics for non-physics majors. Course topics include nuclear properties; alpha, beta and gamma radioactive decay; and nuclear reactions. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: senior standing or graduate standing in engineering or equivalent mathematical preparation

ECE 4085: Problems in Electrical and Computer Engineering
Analytical or experimental problems pertaining to electric circuits, machines, fields or electronics.
Credit Hour: 1-3
Prerequisites: 12 hours Electrical and Computer Engineering credit or instructor’s consent

ECE 4150: Solid State Area Laboratory
Laboratory experiments involved with solid state theory and integrated circuit fabrication and testing.
Credit Hour: 1
Prerequisites: ECE 4650 and ECE 4670

ECE 4170: Control Systems Laboratory
Experiments in computer process control and industrial automation; automated process modeling; control algorithm design; control simulation; direct digital real-time control; transducers; computer interfacing; industrial control mechanisms; Programmable Logic Controllers.
Credit Hour: 1
Prerequisites: ECE 4310, ECE 3210, ECE 3110

ECE 4220: Real Time Embedded Computing
Embedded systems development with real time constraints including RTOS, task management and synchronization, real time scheduling algorithms, deadlocks, performance analysis and optimization, interfacing to external devices, and device drivers. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ECE 3820

ECE 4250: VHDL and Programmable Logic Devices
Design techniques including module definition, functional partitioning, hardware design language descriptions and microprogramming; design examples include arithmetic units, programmable controllers, and microprocessors.
Credit Hours: 4
Prerequisites: ECE 3210

ECE 4270: Computer Organization
Advanced computer architectures and programming; memory, memory management and cache organizations, parallel processing, graphical processor units for general programming.
Credit Hours: 4
Prerequisites: ECE 3210 and ECE 4220

ECE 4280: Network Systems Architecture
(same as CMP_SC 4280; cross-leveled with ECE 7280). The course covers network systems interconnects and switch fabrics, network considerations: and relevant networking applications at the network, transport and application layer. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: ECE 3210, ECE 3220

ECE 4310: Feedback Control Systems
(same as BIOL_EN 4310). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: MATH 4100

ECE 4330: Introduction to Mechatronics and Robotic Vision
Covers 1) mechatronic systems; 2) the mathematical tools used to model industrial and mobile robots; and 3) vision sensors, their underlying models and algorithms that allow us to control and interact with robots.
Credit Hours: 4
Prerequisites: ECE 3220 or ECE 4220 or a C/C++ languages

ECE 4340: Building Intelligent Robots
(same as CMP_SC 4730). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures. Prerequisites: junior standing and programming experience in one of the following programming languages: Basic, C, C++, or Java.
Credit Hours: 4
ECE 4350: Programmable Logic Controllers
Hardware and software aspects of PLC’s; computer/PLC Communications; developing ladder logic programs; interfacing I/O devices, including sensors, to the PLC; labeling and documentation; utilizing analog capabilities; applications; developing Supervisory Control and Data Acquisitions (SCADA) applications.
Credit Hours: 4
Prerequisites: junior standing or above

ECE 4370: Automatic Control System Design
Techniques for feedback system design and analysis; compensation using root locus and frequency-domain methods; state-variable design methods; techniques for nonlinear systems analysis and design; sample-data control systems.
Credit Hours: 3
Prerequisites: ECE 4310

ECE 4390: Computer Process Control
Role of digital computer in process control; digital controller design; computer interfacing; transducers; programmable logic controllers; process modeling; introduction to robotics.
Credit Hours: 3
Prerequisites: ECE 4310 and ECE 3210

ECE 4400: Power Electronics
Power electronic device characteristics, important circuit and component concepts, loss mechanisms and thermal analysis, phase controlled rectifiers, dc-dc converters, and dc-ac inverters. Includes laboratory projects.
Credit Hours: 4
Prerequisites: ECE 3410

ECE 4430: Electronic Circuits and Signals II
Advanced study of electronic devices including frequency response of amplifiers, nonlinear effects in transistor amplifiers, oscillators, and feedback amplifiers.
Credit Hours: 3
Prerequisites: ECE 3830 and ECE 3410

ECE 4440: Power Systems Analysis
Selected topics related to modern power system analysis. Single and three-phase balanced power; Transformers and the per unit concept; Properties and analysis of transmission lines; power flow analysis; symmetrical and asymmetrical faults; system stability; power distribution; use of Powerworld software. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ECE 3810 and MATH 4100 or instructor’s consent

ECE 4450: Amplifier Analysis and Design
Design of electronic networks with application to instrumentation, control and communications systems. Practical specifications and problems in design. Lectures and projects. Prerequisites: ECE 4430
Credit Hours: 3

ECE 4460: Energy and Machines
Credit Hours: 3
Prerequisites: ECE 3510

ECE 4465: Energy and Machines Lab
Electrical safety, magnetic and poly-phase circuits, synchronous and induction machines laboratory.
Credit Hour: 1
Prerequisites or Corequisites: ECE 4460

ECE 4470: Sustainable Electrical Energy Resources
Analysis of renewable electrical energy resources from both the utility and distributed resource perspective. Covers safety, metering and power quality issues associated with coupling distributed resources to the utility grid.
Credit Hours: 3
Prerequisites: ECE 2100 or ENGINR 2100

ECE 4480: Test and Evaluation of Electrochemical Devices
(cross-leveled with ECE 7480). This combined undergraduate/graduate introductory course will introduce the student to the testing and evaluation of electrochemical cells and batteries. Included with an introduction to battery technology is material emphasizing test safety and operational hazards. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: at least 3 college credit hours of chemistry; senior standing in Electrical Engineering or major with equivalent mathematical preparation

ECE 4510: Pulsed Power Engineering
Concepts of energy generation and storage systems used in pulse power engineering, high power opening and closing switches, high voltage engineering, grounding and shielding, high voltage safety.
Credit Hours: 3
Prerequisites: ECE 3510

ECE 4530: Photonics
Introduction to the physical principles and optical materials used in diagnostics, optical communications, semiconductor and solid state lasers, optical fiber transmissions, optical detectors, optical signal processing.
Credit Hours: 3
Prerequisites: ECE 3510

ECE 4550: Introduction to Plasmas
(same as NU_ENG 4375). Equations of plasma physics, interaction of waves and plasmas; plasma sheaths and oscillations; measurements and applications.
Credit Hours: 3
Prerequisites: ECE 3510

ECE 4570: Lasers and Their Applications
(same as NU_ENG 4382). An introductory course in lasers. The course treats the subject from both a conceptual viewpoint and from the application of Maxwell’s equations, to develop the optical theory for lasers. The course includes approximately 10 classroom hours of laboratory work with lasers.

Credit Hours: 3
Prerequisites: PHYSCS 2760 and MATH 4110

ECE 4580: Computational Neuroscience
(same as BIO_SC 4580 and BIOL_EN 4575). Interdisciplinary course in biology and quantitative sciences with laboratory and modeling components. Explores basic computational and neurobiological concepts at the cellular and network level. Introduction to neuronal processing and experimental methods in neurobiology; modeling of neurons and neuron-networks. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: MATH 1500 or equivalent

ECE 4610: Physical Electronics
Introduction to physical principles of semiconductors and semiconductor devices; gas, solid state, and semiconductors lasers; electro-optics; plasma physics and gaseous electronics; materials interaction with electric and magnetic fields.

Credit Hours: 3
Prerequisites: ECE 3510

ECE 4620: Introduction to BioMEMS
Study of BioMEMS devices and applications. Topics cover BioMEMS including overview of microfabrication techniques, common bioMEMS material, microfluidic principles, microfluidic devices, drug delivery, biomedical microdevices for neural implants, patch-clamping and single cell based analysis systems, microelectroporation, DNA microarrays, Polymerase Chain Reaction and biopolymers, chemical and gas sensors and biosensors. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECE 3510

ECE 4630: Introduction to Optical Electronics

Credit Hours: 3
Prerequisites: ECE 3610

ECE 4640: MEMS Laboratory
The main objective of this course is to provide hands-on skills for the interdisciplinary Microelectromechanical Systems (MEMS). It puts emphasis on the practical aspects of design, fabrication, test, and characterization of micro/nano devices and systems. Graded on A-F basis only.

ECE 4650: Semiconductor Device Theory
Band theory, equilibrium and non-equilibrium semiconductor electronics, junction theory, p-n junction devices, bipolar and field effect transistors including SPICE simulation.

Credit Hours: 3
Prerequisites: ECE 3610

ECE 4655: Digital image Processing
(same as CMP_SC 4650). This course provides fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

Prerequisites: STAT 4710 and CMP_SC 2050 or instructor’s consent

ECE 4670: Microelectronic Fabrication
Basic silicon integrated circuit fabrication processes, basic techniques of wafer processing, economics of fabrication and resulting devices properties, interdependence of process flow and device design. Accompanying laboratory.

Credit Hours: 4
Prerequisites: ECE 3610

ECE 4675: Digital Image Compression
(same as CMP_SC 4670; cross-leveled with ECE 7675). This course provides basic concepts and theorems in information theory, discrete cosine transform, discrete wavelet transform, quantizer design, bit allocation, and rate-distortion analysis and practical coding and communication system design, (such as Huffman coding, arithmetic coding, variable length coding, motion estimation, JPEG.) Graded on A-F basis only.

Credit Hours: 3
Prerequisites: STAT 4710 or instructor’s consent

ECE 4690: Design and Simulation of VLSI Circuits
Design of CMOS integrated circuits with emphasis on analog applications. Device models are developed for circuit simulation. Lecture and laboratory.

Credit Hours: 4
Prerequisites: ECE 4670

ECE 4710: Communications Systems
Concepts of communication systems, signal analysis and power spectrum density, signal transmission and filtering, linear modulation, exponential modulation, sampling, baseband digital communication, modulated digital communication, spread spectrum communication.

Credit Hours: 3
Prerequisites: ECE 3830
ECE 4720: Introduction to Machine Learning and Pattern Recognition
(Same as CMP_SC 4720) This course provides foundation knowledge to the basic methods in machine learning and pattern recognition (MLPR). MLPR addresses the problems of programming computers to optimize certain performance criteria by using example data or expert knowledge and it has wide applications.

**Credit Hours:** 3
**Prerequisites:** CMP_SC 2050 and STAT 4710 or instructors consent

---

ECE 4730: Introduction to Wireless Communication System
Principles of wireless communication analysis and design. Digital communication basics, cellular radio, wireless PCS communications, multiple access techniques, channel coding and equalization, and standards of digital cellular/PCS systems.

**Credit Hours:** 3

---

ECE 4730: Introduction to Wireless Communication System
Principles of wireless communication analysis and design. Digital communication basics, cellular radio, wireless PCS communications, multiple access techniques, channel coding and equalization, and standards of digital cellular/PCS systems.

**Credit Hours:** 3

---

ECE 4730: Introduction to Wireless Communication System
Principles of wireless communication analysis and design. Digital communication basics, cellular radio, wireless PCS communications, multiple access techniques, channel coding and equalization, and standards of digital cellular/PCS systems.

**Credit Hours:** 3

---

ECE 4830: Introduction to Digital Signal Processing
Concepts, analytical tools, design techniques used in computer processing of signals; signal representation, sampling, discrete-time systems analysis, recursive and non-recursive filters, design/implementation, discrete Fourier transform.

**Credit Hours:** 4
**Prerequisites:** ECE 2110, ECE 1210, ECE 3830

---

ECE 4850: Image Processing
(same as CMP_SC 4650). Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

**Credit Hours:** 3

---

ECE 4870: Introduction to Computational Intelligence
(same as CMP_SC 4770). Introduction to the concepts, models, and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization. Graded on A-F basis only.

**Credit Hours:** 3
**Prerequisites:** some exposure to rigorous axiomatic mathematical development of a topic (as can be found in most senior/graduate level math or statistics courses) is needed to appreciate some of the development of the theory. Also, the ability to program (well) in some high level language is essential to perform the computer projects

---

ECE 4880: Micro/Nano Systems
Micro/nano systems including micromachining, material properties, micro-actuators, optical, RF, inertial/mechanical and acoustic M/NEMS and M/Nanofluidic systems. Graded on A-F basis only.

**Credit Hours:** 3
**Prerequisites:** ECE 3610 or instructor’s consent

---

ECE 4910: Microwave Systems
Theory and applications of transmission systems with emphasis on transmission lines at low and high frequencies.

**Credit Hours:** 3

---

ECE 4920: Microwave Engineering
Wave equation, plane wave propagation, transmission line theory, Smith Chart analysis, impedance transformers, waveguides modes, basic antenna theory, impedance matching and tuning, basic microstrip and stripline circuits.

**Credit Hours:** 3

---

ECE 4930: Intermediate Electromagnetics
Course covers transmission lines, waveguides, microstrip electromagnetic circuits, and radiating systems.

**Credit Hours:** 4
**Prerequisites:** ECE 3510

---

ECE 4940: Antenna Theory, Design and Laboratory
Introduction to antenna theory, design and laboratory. Emphasis on engineering aspects of antenna systems, transmitting and receiving antenna parameters, various antennas.

**Credit Hours:** 4
**Prerequisites:** ECE 3510

---

ECE 4950: Microwave Principles
Maxwell’s Equations, transmission lines, plane wave propagation and reflection, waveguides, resonant cavities, microwave devices and components, radiation, radio wave propagation. Lecture and laboratory.

**Credit Hours:** 4
**Prerequisites:** ECE 3510 and ECE 3410

---

ECE 4970: Senior Capstone Design

**Credit Hours:** 3
**Prerequisites:** ECE 3110 and senior standing. Restricted to Electrical and Computer Engineering students only or instructor’s consent

---

ECE 4980: Senior Capstone Design II
(same as CMP_SC 4980). Completion of ECE 4970 design project. Design prototyping, testing, evaluation and preparation of documentation. Lectures on ethics, professionalism, safety, economic consideration. Oral and written reports. Not for graduate credit.

**Credit Hours:** 2
**Prerequisites:** senior standing and ECE 4970

---

ECE 4990: Undergraduate Research in Electrical Computer Engineering
Supervised independent study or project in electrical or computer engineering, culminating in a written report.

**Credit Hour:** 1-3
**Prerequisites:** Undergraduate Program Director’s consent
ECE 4995: Undergraduate Honors Research in Electrical Computer Engineering
Independent investigation or project in electrical or computer engineering to be presented as an undergraduate honors thesis.
Credit Hour: 1-3
Prerequisites: Participation in the Electrical and Computer Engineering Honors Program

ECE 7001: Advanced Topics in Electrical and Computer Engineering
Current and new technical developments in electrical engineering.
Credit Hour: 3-4

ECE 7010: Digital Computer Applications in Engineering
Use of digital computer for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, differentiation and differential equations.
Credit Hours: 3
Prerequisites: MATH 2300

ECE 7020: Energy Systems and Resources
(same as NU_ENG 7315). Analysis of present energy usage in Missouri, USA and the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies.
Credit Hours: 3
Prerequisites: ENGINR 2300

ECE 7030: Introduction to Nuclear Reactor Engineering
(same as NU_ENG 7346). Engineering principles of nuclear power systems, primarily for the production of electrical energy.
Credit Hours: 3
Prerequisites: graduate ENGINR 1200, ENGINR 2300

ECE 7040: Introduction to Nuclear Physics
Introduction of Quantum mechanics for non-physics majors. Course topics include nuclear properties; alpha, beta and gamma radioactive decay; and nuclear reactions. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: senior standing or graduate standing in engineering or equivalent mathematical preparation

ECE 7150: Solid State Area Laboratory
Laboratory experiments involved with solid state theory and integrated circuit fabrication and testing.
Credit Hour: 1
Prerequisites: ECE 4650 and ECE 4670

ECE 7170: Control Systems Laboratory
Experiments in computer process control and industrial automation; automated process modeling; control algorithm design; control simulation; direct digital real-time control; transducers; computer interfacing; industrial control mechanisms; Programmable Logic Controllers.
Credit Hour: 1
Prerequisites: graduate ECE 4310, ECE 3210, ECE 3110

ECE 7220: Real Time Embedded Computing
Embedded systems development with real time constraints including RTOS, task management and synchronization, realtime scheduling algorithms, deadlocks, performance analysis and optimization, interfacing to external devices, and device drivers. Graded A-F basis only.
Credit Hours: 3
Prerequisites: ECE 3220

ECE 7250: VDHL and Programmable Logic Devices
Design techniques including module definition, functional partitioning, hardware design language descriptions and microprogramming; design examples include arithmetic units, programmable controllers, and microprocessors.
Credit Hours: 4
Prerequisites: ECE 3210

ECE 7270: Computer Organization
Advanced computer architectures and programming; memory, memory management and cache organizations, parallel processing, graphical processor units for general programming.
Credit Hours: 4
Prerequisites: ECE 3210

ECE 7280: Network Systems Architecture
(same as CMP_SC 7280; cross-leveled with ECE 4280). The course covers network systems interconnects and switch fabrics, network considerations and relevant networking applications at the network, transport and application layer. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: ECE 3210, ECE 3220

ECE 7310: Feedback Control Systems
(same as BIOL_EN 7310). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control.
Credit Hours: 4
Prerequisites: MATH 4100

ECE 7330: Introduction to Mechatronics and Robotic Vision
Introduces robotics; robot system characteristics; robot motive power systems; geometric structure of robots; sensors and feedback; control applications and algorithms; data acquisition and output actuation function; robots and AI; microprocessor applications. Lecture and Laboratory.
Credit Hours: 4
Prerequisites: MATH 4100

ECE 7335: Nuclear Safeguards Science and Technology
(same as NU_ENG 7335). This course provides an overview of nuclear materials management and safeguards, including physical protection systems, material accounting and control, monitoring, and regulatory issues.
Credit Hours: 3  
Prerequisites: NU_ENG 4303 or NU_ENG 7303

**ECE 7340: Building Intelligent Robots**  
(Same as CMP_SC 7730) Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures.

Credit Hours: 4  
Prerequisites: some programming experience

**ECE 7350: Programmable Logic Controllers**  
Hardware and software aspects of PLC’s; computer/PLC Communications; developing ladder logic programs; interfacing I/O devices, including sensors, to the PLC; labeling and documentation; utilizing analog capabilities; applications; developing Supervisory Control and Data Acquisitions (SCADA) applications.

Credit Hours: 4  
Prerequisites: junior standing or above

**ECE 7370: Automatic Control System Design**  
Techniques for feedback system design and analysis; compensation using root locus and frequency-domain methods; state-variable design methods; techniques for nonlinear systems analysis and design; sample-data control systems.

Credit Hours: 3  
Prerequisites: ECE 4310

**ECE 7390: Computer Process Control**  
The role of digital computer in process control; digital controller design; computer interfacing; transducers; programmable logic controllers; process modeling; introduction to robotics.

Credit Hours: 3  
Prerequisites: ECE 4310 and ECE 3210

**ECE 7410: Power Electronics I**  
Power electronic device characteristics, important circuit and component concepts, loss mechanisms and thermal analysis, phase controlled rectifiers, dc-dc converters, and dc-ac inverters. Includes laboratory projects.

Credit Hours: 4  
Prerequisites: ECE 3410

**ECE 7430: Electronic Circuits and Signals II**  
Advanced study of electronic devices including frequency response of amplifiers, nonlinear effects in transistor amplifiers, oscillators, and feedback amplifiers.

Credit Hours: 3  
Prerequisites: ECE 3830 and ECE 3410

**ECE 7450: Amplifier Analysis and Design**  
Design of electronic networks with application to instrumentation, control and communications systems. Practical specifications and problems in design. Lectures and projects.

Credit Hours: 3  
Prerequisites: ECE 4430

**ECE 7460: Energy and Machines**  

Credit Hours: 3  
Prerequisites: ECE 3510

**ECE 7470: Sustainable Electrical Energy Resources**  
Analysis of renewable electrical energy resources from both the utility and distributed resource perspective. Covers safety, metering and power quality issues associated with coupling distributed resources to the utility grid.

Credit Hours: 3  
Prerequisites: ECE 3470 or ENGR 2100

**ECE 7480: Test and Evaluation of Electrochemical Devices**  
(cross-leveled with ECE 4480). This combined undergraduate/graduate introductory course will introduce the student to the testing and evaluation of electrochemical cells and batteries. Included with an introduction to battery technology is material emphasizing test safety and operational hazards. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: at least 3 college credit hours of chemistry; graduate standing in Electrical Engineering or major with equivalent mathematical preparation

**ECE 7480: Test and Evaluation of Electrochemical Devices**

Credit Hours: 3  
Prerequisites: ECE 3510

**ECE 7490: Lasers and Their Applications**  
(same as NU_ENG 7382). An introductory course in lasers. The course treats the subject from both a conceptual viewpoint and from
the application of Maxwell’s equations, to develop the optical theory for lasers. The course includes approximately 10 classroom hours of laboratory work with lasers.

**Credit Hours:** 3  
**Prerequisites:** PHYSCS 2760 and MATH 4110

---

**ECE 7580: Computational Neuroscience**  
(Same as BIO_SC 7580 and BIOL_EN 7575). Interdisciplinary course in biology and quantitative sciences with laboratory and modeling components. Explores basic computational and neurobiological concepts at the cellular and network level. Introduction to neuronal processing and experimental methods in neurobiology; modeling of neurons and neuron-networks. Graded on A-F basis only.

**Credit Hours:** 4  
**Prerequisites:** MATH 1500 or equivalent

---

**ECE 7610: Physical Electronics**  
Introduction to physical principles of semiconductors and semiconductor devices; gas, solid state, and semiconductors lasers; electro-optics; plasma physics and gaseous electronics; materials interaction with electric and magnetic fields.

**Credit Hours:** 3  
**Prerequisites:** ECE 3510

---

**ECE 7620: Introduction to BioMEMS**  

**Credit Hours:** 3  
**Prerequisites:** ECE 7650

---

**ECE 7630: Introduction to Optical Electronics**  

**Credit Hours:** 3  
**Prerequisites:** ECE 3610

---

**ECE 7640: MEMS Laboratory**  
The main objective of this course is to provide hands-on skills for the interdisciplinary Microelectromechanical systems (MEMS). It puts emphasis on the practical aspects of design, fabrication, test, and characterization of micro/nano devices and systems. Graded on A-F basis only.

**Credit Hours:** 4  
**Prerequisites:** PHYSCS 2760, CHEM 1320 or ECE 2100; instructor’s consent

---

**ECE 7650: Semiconductor Device Theory**  
Band theory, equilibrium and non-equilibrium semiconductor electronics, junction theory, p-n junction devices, bipolar and field effect transistors including SPICE simulation.

**Credit Hours:** 3  
**Prerequisites:** ECE 3610

---

**ECE 7655: Digital Image Processing**  
(same as CMP_SC 7650). The course provides fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

**Credit Hours:** 3  
**Prerequisites:** STAT 4710 and CMP_SC 2050 or instructor’s consent

---

**ECE 7657: Microelectronic Fabrication**  
Basic silicon integrated circuit fabrication processes, basic techniques of wafer processing, economics of fabrication and resulting devices properties, interdependence of process flow and device design. Accompanying laboratory.

**Credit Hours:** 4  
**Prerequisites:** ECE 3610

---

**ECE 7670: Digital Image Compression**  
(same as CMP_SC 7670; cross-leveled with ECE 4675). This course provides basic concepts and theorems in information theory, discrete cosine transform, discrete wavelet transform, quantizer design, bit allocation, and rate-distortion analysis and practical coding and communication system design, (such as Huffman coding, arithmetic coding, variable length coding, motion estimation, JPEG.) Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** STAT 4710 or instructor’s consent

---

**ECE 7690: Design and Simulation of VLSI Circuits**  
Design of CMOS integrated circuits with emphasis on analog applications. Device models are developed for circuit simulation. Lecture and laboratory.

**Credit Hours:** 4  
**Prerequisites:** ECE 4670

---

**ECE 7710: Communications Systems**  
Concepts of communication systems, signal analysis and power spectrum density, signal transmission and filtering, linear modulation, exponential modulation, sampling, baseband digital communication, modulated digital communication, spread spectrum communication.

**Credit Hours:** 3  
**Prerequisites:** ECE 3830

---

**ECE 7720: Introduction to Machine Learning and Pattern Recognition**  
(same as CMP_SC 7720). This course provides foundation knowledge to the basic methods in machine learning and pattern recognition (MLPR). MLPR addresses the problem of programming computers to optimize
certain performance criteria by using example data or expert knowledge and it has wide applications.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2050 and STAT 4710 or instructor’s consent

---

**ECE 7730: Introduction to Wireless Communication System**  
Principles of wireless communication analysis and design. Digital communication basics, cellular radio, wireless PCS communications, multiple access techniques, channel coding and equalization, and standards of digital cellular/PCS systems.  

**Credit Hours:** 3

---

**ECE 7810: Multimedia Engineering and Technology**  
(same as CMP_SC 7810). Survey of multimedia applications. Capture, coding, storage, transmission, and software tools for developing productions involving text, graphics, images, animation, sound and video. Term projects. Lecture and laboratory.  

**Credit Hours:** 4  
**Prerequisites:** ECE 3210 and ECE 3830

---

**ECE 7830: Introduction to Digital Signal Processing**  
Concepts, analytical tools, design techniques used in computer processing of signals; signal representation, sampling, discrete-time systems analysis, recursive and non-recursive filters, design/implementation, discrete Fourier transform.  

**Credit Hours:** 4

---

**ECE 7850: Digital Image Processing**  
(same as CMP_SC 7650). Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.  

**Credit Hours:** 3

---

**ECE 7870: Introduction to Computational Intelligence**  
(same as CMP_SC 7770). Introduction to the concepts, models, and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization. Graded on A-F basis only.  

**Credit Hours:** 3  
**Prerequisites:** some exposure to rigorous axiomatic mathematical development of a topic (as can be found in most senior/graduate level math or statistics courses) is needed to appreciate some of the development of the theory. Also, the ability to program (well) in some high level language is essential to perform the computer projects

---

**ECE 7880: Micro/Nano Systems**  
Micro/nano systems including micromachining, material properties, micro-actuators, optical, RF, inertial/mechanical and acoustic M/NEMS and M/Nanofluidic systems. Graded on A-F basis only.  

**Credit Hours:** 3  
**Prerequisites:** ECE 3610 or instructor’s approval

---

**ECE 7910: Microwave Systems**  
Theory and applications of transmission systems with emphasis on transmission lines at low and high frequencies.  

**Credit Hours:** 3  
**Prerequisites:** ECE 3510

---

**ECE 7920: Microwave Engineering**  
Wave equation, plane wave propagation, transmission line theory, Smith Chart analysis, impedance transformers, waveguides modes, basic antenna theory, impedance matching and tuning, basic microstrip and stripline circuits.  

**Credit Hours:** 3

---

**ECE 7930: Intermediate Electromagnetics**  
Course covers transmission lines, waveguides, microstrip electromagnetic circuits, and radiating systems  

**Credit Hours:** 4  
**Prerequisites:** ECE 3510

---

**ECE 7940: Antenna Theory, Design and Laboratory**  
Introduction to antenna theory, design and laboratory. Emphasis on engineering aspects of antenna systems, transmitting and receiving antenna parameters, and various wire antennas.  

**Credit Hours:** 4  
**Prerequisites:** ECE 3510

---

**ECE 7950: Microwave Principles**  
Maxwell's Equations, transmission lines, plane wave propagation and reflection, waveguides, resonant cavities, microwave devices and components, radiation, radio wave propagation. Lecture and laboratory.  

**Credit Hours:** 4  
**Prerequisites:** ECE 3510 and ECE 3410

---

**ECE 8001: Advanced Topics in Electrical and Computer Engineering**  
Advanced Topics in Electrical and Computer Engineering  

**Credit Hours:** 3

---

**ECE 8010: Supervised Study in Electrical Engineering**  
Supervised individual study at the graduate level to be completed within the course of one semester in the form of a brief report. Graded on S/U basis only  

**Credit Hour:** 1-3

---

**ECE 8020: Superconductivity and its Applications**  
(same as NU_ENG 8450). Phenomenology and theory of superconductivity, cryogenic practice, metallurgy of superconducting elements, alloys and compounds. Present and prospective applications.  

**Credit Hours:** 3

---

**ECE 8085: Problems in Electrical and Computer Engineering**  
Supervised investigation of an electrical engineering problem for an MS project. Study culminates in a project report. Graded on a S/U basis only.  

**Credit Hour:** 2-5
ECE 8110: Preparing Advanced Professionals - I
Discussions on a variety of topics: Pedagogy - latest from cognitive science and learning theory, effective teaching, how a university functions, engineering teaching and research; how leading industries perform research and the importance of soft skills, etc. Graded on A-F basis only.

Credit Hours: 1
Prerequisites: restricted to graduate Engineering majors only

ECE 8120: Preparing Advanced Professionals - II
Continues format of ECE 8110 with group discussions and seminars by experts on how to write an effective proposal, including a review of model proposals, model proposal reviews, and a 'hands-on' proposal writing followed by globalization and its effects on professionals. Graded on A-F only.

Credit Hours: 1
Prerequisites: graduate engineering majors only

ECE 8250: Digital Hardware Systems Design
Characteristics and parameters of various hardware subsystems including main memory, auxiliary memory, arithmetic units, card equipment, etc., and principles of organization into efficient system.

Credit Hours: 3
Prerequisites: ECE 4250

ECE 8260: Computer Networks
Concepts and goals of computer networking, structure of computer networks, OSI model and layers, network control, analysis, design, and management, data communication techniques including fiber optics, WAN, MAN and LAN architectures and protocols, inter-networking, case studies, and hands-on studying the performance by analytic modeling and computer simulation.

Credit Hours: 3
Prerequisites: CMP_SC 4270

ECE 8270: Parallel Computer Architecture
The course covers parallel computer architecture (general purpose multi-core and many-core processors, shared and distributed memory systems, clusters). Emphasis will be given to both architectural and programmability aspects. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECE 4270 or ECE 7270, ECE 4220 or ECE 7220 or CMP_SC 4250 or CMP_SC 7250

ECE 8320: Nonlinear Systems
Nonlinear systems including topics such as limit cycles, phase plane analysis, bifurcation, Lyapunov stability, input-output stability, passivity. Topics from control such as feedback linearization, sliding control, and Lyapunov redesign. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECE 4310

ECE 8330: Neural Networks for Learning Control
Neurocomputing techniques and structures for modeling, learning control, control stabilization, and optimization of performance over time.

Credit Hours: 3
Prerequisites: at least on 4000, 7000 or 8000- level control course

ECE 8340: Multivariable Control System Design
This course will cover techniques in multivariable control system design and analysis, including LOG H-2 design, H-oo design, LTR, robust performance, and selected adaptive and learning control techniques for nonlinear control.

Credit Hours: 3
Prerequisites: ECE 8310 or acceptable equivalent

ECE 8350: Optimal Control Theory
Analysis and design of dynamic systems using optimal control theory: parameter optimization, dynamic optimization, computational methods, differential games.

Credit Hours: 3
Prerequisites: ECE 8310

ECE 8360: Stochastic Optimal Estimation and Control
Surveys random process theory; stochastic control and optimization; estimation and filtering based on Kalman-Bucy techniques; stochastic stability; adaptive and learning control systems.

Credit Hours: 3
Prerequisites: ECE 8310

ECE 8370: Digital and Sample-Data Systems
Introduces sampling and quantization, design of digital and sample-data systems, digital filters, adaptive sampling and quantization.

Credit Hours: 3
Prerequisites: ECE 8310 and STAT 4710

ECE 8410: Power Electronics II
Circuit concepts and analysis techniques for transistor switching regulators, thyristor choppers, transistor inverters, self-commutated thyristor investors and cycloconverters.

Credit Hours: 3
Prerequisites: ECE 4410

ECE 8420: Power Electronic Drives
Advanced study of DC and AC motor drives controlled by power electronic methods, including phase controlled rectifier, DC chopper, cycloconverter, variable frequency inverters.

Credit Hours: 3
Prerequisites: ECE 8410, ECE 8310

ECE 8430: Digital Electronics
Electronic hardware aspects of digital systems. Includes state-of-the-art information on integrated-circuit logic devices and their applications.

Credit Hours: 3
Prerequisites: ECE 4690

ECE 8725: Supervised Learning  
(same as CMP_SC 8725). This course introduces the theories and applications of advanced supervised machine learning methods. It covers hidden Markov model and expectation maximization (EM) algorithms, probabilistic graphical models, non-linear support vector machine and kernel methods. The course emphasizes both the theoretical underpinnings of the advanced supervised learning methods and their applications in the real world. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: CMP_SC 4720 or CMP_SC 7720 or ECE 4720 or ECE 7720 or instructor's consent

ECE 8730: Fundamentals of Radar Signal Processing  
Study of radar signal processing fundamentals. Topics include radar systems, signal models, sampling and quantization of radar signals, radar waveforms, Doppler processing, detection fundamentals, radar imaging.

Credit Hours: 3

ECE 8735: Unsupervised Learning  
(same as CMP_SC 8735). Theoretical and practical aspects of unsupervised learning including topics of expectation maximization (EM), mixture decomposition, clustering algorithms, cluster visualization, and cluster validity. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: CMP_SC 4720 or CMP_SC 7720 or ECE 4720 or ECE 7720 or instructor's consent

ECE 8740: Digital Signal Processing in Remote Sensing  
Study of digital signal processing in remote sensing applications. Investigation of digital signal processing methods for visible, near infrared, thermal infrared, and microwave wavelength sensors.

Credit Hours: 3

ECE 8750: Digital Signal Processing in Telecommunications  
Applications of digital signal processing in telecommunication systems; oversampling and quantizations, Delta-Sigma modulation, linear predictive speech coding, adaptive filtering, echo canceller, adaptive receivers and equalizers for wireless communication, digital cellular, CDMA.

Credit Hours: 3  
Prerequisites: ECE 4830 and ECE 4710

ECE 8770: Advanced Mobile Communication Systems  
Channel estimation and equalization, multi-user detection, diversity combining, multi-carrier and OFDM. Standards of 3G Wireless Communication Systems such as EDGE, CDMA 2000 and UMTS.

Credit Hours: 3

ECE 8780: State Variable Methods in Automatic Control  
(same as CH_ENG 8780, MAE 8780, NU_ENG 8408). State variables for continuous and discrete-time dynamic control systems; controllability and observability; optimal control of linear systems.

Credit Hours: 3
ECE 8855: Advanced Image Processing
(same as CMP_SC 8650). This course covers advanced topics in image understanding including multispectral multimodal imaging, motion estimation, texture analysis, geometric level set methods.
Credit Hours: 3
Prerequisites: CMP_SC 4650 or CMP_SC 7650 or instructor’s consent

ECE 8860: Probability and Stochastic Processes for Engineers
Introduction to probability, multidimensional complex (phaser) random variables and stochastic processes in electrical engineering.
Credit Hours: 3
Prerequisites: ECE 4830, ECE 4710, or ECE 8620

ECE 8870: Modeling and Management of Uncertainty
(same as CMP_SC 8870). Theoretical and practical issues in the modeling and management of uncertainty. Topics include probabilistic uncertainty, belief theory and fuzzy set theory. Applications to computer vision, pattern recognition and expert systems. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ECE 4870 or ECE 7870 or instructor’s consent

ECE 8875: Advanced Topics in Computational Intelligence
This course is a continuation of ECE 7870 in the concepts, models, and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation, and swarm intelligence. Advanced topics in these areas will be discussed with a focus on applications of these technologies.
Credit Hours: 3
Prerequisites: ECE 4870 or ECE 7870

ECE 8880: System Modeling
System performance requires the assessment of its delay and throughput. Markov theory provides the theoretical basis for such assessment. More general methods describe queues including open and closed queuing networks. Includes performance assessment of computer processors.
Credit Hours: 3
Prerequisites: STAT 4710

ECE 8890: Neural Networks
(same as CMP_SC 8770). The course will consider computing systems based on neural networks and learning models along with implementations and applications of such systems.
Credit Hours: 3
Prerequisites: ECE 4870 or ECE 7870 or instructor’s consent

ECE 8910: High Frequency Transmission and Radiation
Skin effect; theory of transmission lines, wave guides, resonators.
Credit Hours: 3

ECE 8920: Antennas
Point and aperture sources; simple antennas; antenna array; data-processing antennas; and other broadband and directive antennas.

ECE 8990: Research-Master Thesis in Electrical and Computer Engineering
Independent investigation in a field of electrical engineering to be presented as thesis or dissertation. Graded on a S/U basis only.
Credit Hour: 1-99

ECE 9001: Advanced Topics in Electrical and Computer Engineering
Advanced Topics in Electrical and Computer Engineering
Credit Hours: 3

ECE 9990: Research-Doctoral Dissertation Electrical & Computer Engineering
Independent investigation in a field of electrical engineering to be presented as thesis or dissertation. Graded on a S/U basis only.
Credit Hour: 1-99

Engineering (ENGINR)

ENGINR 1000: Introduction to Engineering
This course will introduce the students to university life, discuss learning strategies for success and give an overview of the engineering profession and each of the main engineering disciplines.
Credit Hour: 0-2

ENGINR 1001: Experimental Course
For freshman-level students. Content and number of credit of hours to be listed in Schedule of Courses.
ENGINR 1100: Engineering Graphics Fundamentals
Introduction to computer-aided design and drafting. Topics include visualization methods and standards techniques for communication and presenting engineering design graphics information.
Credit Hour: 3-99
Prerequisites or Corequisites: MATH 1500
Prerequisites: Restricted to Engineering Students only, or by departmental consent

ENGINR 1110: Solid Modeling for Engineering Design
Introduction to 3D (three dimensional) modeling techniques using computer aided design software. Topics include model creation techniques and advanced graphical presentation practices. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: ENGINR 1100 and instructor's consent. Restricted to Engineering Students Only or by departmental consent

ENGINR 1200: Statics and Elementary Strength of Materials
Fundamentals of statics; static equilibrium and introduction to elements of mechanics of elastic materials.
Credit Hour: 3
Corequisites: MATH 1500 and PHYSCS 2750. Restricted to Engineering Students only or with departmental consent

ENGINR 2001: Experimental Course
For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.
Credit Hour: 1-99

ENGINR 2100: Circuit Theory for Engineers
DC circuit analysis, inductors and capacitors, first-order response, AC circuit analysis, single-phase AC power and three-phase, transformers.
Credit Hour: 3
Corequisites: MATH 2300. For Non-Electrical and Computer Engineering Majors. Restricted to Engineering Students only or with departmental consent

ENGINR 2100H: Circuit Theory for Engineers - Honors
DC circuit analysis, inductors and capacitors, first order response, AC circuit analysis, single-phase AC power.
Credit Hour: 3
Prerequisites: MATH 1700. Honors eligibility required

ENGINR 2200: Intermediate Strength of Materials
Elements of mechanics of elastic materials.
Credit Hour: 3
Prerequisites: ENGINR 1200. Restricted to Engineering Students only or with departmental consent

ENGINR 2300: Engineering Thermodynamics
(same as MAE 2300). Fluid properties, work and heat, first law, second law, entropy, applications to vapor and ideal gas processes.
Credit Hours: 3
Prerequisites: PHYSCS 2750. Restricted to Engineering Students Only or departmental consent

ENGINR 2500: A History of Modern Engineering
This course will introduce the student to significant engineering events that have shaped the late modern-area from the French Revolution to the end of World War II (1789-1945). Radical inventions and their dates will be used as historical landmarks throughout the course. Graded on A-F basis only.
Credit Hours: 3

ENGINR 2500H: A History of Modern Engineering - Honors
This course will introduce the student to significant engineering events that have shaped the late modern-area from the French Revolution to the end of the World War II (1789-1945). Radical inventions and their dates will be used as historical landmarks throughout the course. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Honors eligibility required

ENGINR 2600H: History of Human Spaceflight - Honors
This course will provide an overview of the history of human spaceflight, including early efforts up through the present for the three countries that have flown humans in space (U.S., Russian, and China). Special topics will include a discussion of the major space accidents. Finally, the future of human space exploration will be discussed. May be repeated for credit. Graded on A-F basis only. Prerequisites: Honors eligibility required
Credit Hours: 3

ENGINR 3000: Short Term Education Abroad
Introduction to history and culture of country and/or cities in specified country. Students will make engineering profession and corporate site visits. Lecture activities will focus on industry and society, with country and/or cities compared and contrasted to U.S. engineering. Graded A-F only.
Credit Hours: 3
Prerequisites: Instructor's consent required. Students must be in Academic Good Standing

ENGINR 3000H: Short Term Education Abroad - Honors
Introduction to history and culture of country and/or cities in specified country. Students will make engineering profession and corporate site visits. Lecture activities will focus on industry and society, with country and/or cities compared and contrasted to U.S. engineering. Graded A-F only.
Credit Hours: 3
Prerequisites: Instructor’s consent required. Students must be in Academic Good Standing
ENGINR 4000: Study Abroad Technical Elective
This course is designed to provide students with an international experience while also potentially fulfilling a required engineering technical elective course. Engineering technical electives are courses that are relevant or related to engineering from a broad range of fields including math and science as well as the various engineering departments. This course will be used as the umbrella course for all Engineering Technical Elective Study Abroad Opportunities and each course will provide a separate section number.

Credit Hour: 3-6

ENGINR 4085: Problems in Engineering
Special design, experimental or analytical problems in engineering. May be repeated to 6 hours.

Credit Hour: 0-6

ENGINR 4890: Multi-disciplinary Senior Engineering Capstone Design
Engineering design and prototyping including reliability, testing, evaluation, preparation of documentation, safety, ethics, manufacturing, intellectual property, economic and environmental constraints. Oral and written reports. Graded A-F only.

Credit Hours: 3
Prerequisites: senior standing and Instructor’s consent. Student's department consent also required

ENGINR 8100: Design and Development of Biomedical Innovations
(same as BIOL_EN 8100). This course takes students through the process of brainstorming and working out a solution to a medical need, and then producing a product. Outputs may include the development of a physical prototype through interactions with the College of Engineering rapid prototype facility. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Must be enrolled in a graduate degree program

English (ENGLISH)

ENGLISH 1000: Exposition and Argumentation
Stresses writing as a process, with due attention given to critical reading and thinking skills applicable to all college classes, as well as to invention, drafting, revising, and rewriting. English 1000 is a prerequisite for any Writing Intensive course.

Credit Hours: 3

ENGLISH 1000H: Honors Exposition English
Stresses writing as a process, with due attention given to critical reading and thinking skills applicable to all college classes, as well as to invention, drafting, revising, and rewriting. English 1000 is a prerequisite for any Writing Intensive course.

Credit Hours: 3
Prerequisites: Honors eligibility required

ENGLISH 1060: Human Language
(same as ANTHRO 1060, C_S_D 1060 and LINGST 1060). General introduction of various aspects of linguistic study. Elementary analysis of language data, with some attention to application of linguistic study to other disciplines.

Credit Hours: 3

ENGLISH 1100: Reading Literature
Introduces the student to the values, rigors, and pleasures of reading literature. Intended for first-year, non-English majors. No more than six hours may be taken in the Reading Literature Series.

Credit Hours: 3

ENGLISH 1106: Reading Literature, Beginnings to 1603
See ENGLISH 1100 course for description.

Credit Hours: 3

ENGLISH 1107: Reading Literature, 1603 to 1789
See ENGLISH 1100 course for description.

Credit Hours: 3

ENGLISH 1108: Reading Literature, 1789-1890
See ENGLISH 1100 course for description.

Credit Hours: 3

ENGLISH 1109: Reading Literature, 1890 to Present
See ENGLISH 1100 course for description.

Credit Hours: 3

ENGLISH 1160: Themes in Literature
Topics (e.g., The Idea of Progress, Images of Women) announced at time of registration. No more than six hours may be taken in the Themes in Literature series.

Credit Hours: 3

ENGLISH 1166: Themes in Literature, Beginnings to 1603
See ENGLISH 1160 for course description.

Credit Hours: 3

ENGLISH 1167: Themes in Literature, 1603 to 1789
See ENGLISH 1160 for course description.

Credit Hours: 3

ENGLISH 1168: Themes in Literature, 1789 to 1890
See ENGLISH 1160 for course description.

Credit Hours: 3

ENGLISH 1169: Themes in Literature, 1890 to Present
See ENGLISH 1160 for course description.

Credit Hours: 3

ENGLISH 1110: Writing Intensive
This course is designed to provide students with an international experience while also potentially fulfilling a required writing intensive course. Writing intensive courses are courses that are relevant or related to writing from a broad range of fields including math and science as well as the various writing departments. This course will be used as the umbrella course for all Writing Intensive Study Abroad Opportunities and each course will provide a separate section number.

Credit Hour: 3-6

Prerequisites: senior standing and Instructor's consent. Student's department consent also required

Provides intensive guided practice in expository and persuasive writing.
Credit Hours: 3
Prerequisites: ENGLSH 1000 or equivalent

ENGLSH 2015H: Theory and Practice of Tutoring Writing Seminar - Honors
(same as GN_HON 2015H). Addresses both the theory and practice of tutoring and the foundations of good writing. This course also qualifies students for a part-time job working as Writing Lab/Online Writery tutors in future semester.
Credit Hours: 3
Prerequisites: ENGLSH 1000; instructor’s consent. Honors eligibility required

ENGLSH 2030: Professional Writing
Introduction to the communication required in any professional field, including basic letters and resumes, reviews, reports, and electronic networking, culminating in an extensive report and a related oral presentation.
Credit Hours: 3
Prerequisites: ENGLSH 1000

ENGLSH 2100: Writing About Literature
Introduces the student to reading in three or four genres (fiction, poetry, drama, and non-fiction) and to literary concepts and terms and their application in literary analysis.
Credit Hours: 3
Prerequisites: ENGLSH 1000

ENGLSH 2100H: Writing About Literature - Honors
Introduces the student to reading in three or four genres (fiction, poetry, drama, and non-fiction) and to literary concepts and terms and their application in literary analysis.
Credit Hours: 3
Prerequisites: ENGLSH 1000. Honors eligibility required

ENGLSH 2140: Twentieth-Century Literature
A multi-genre survey emphasizing American and British works within the intellectual and cultural context of our time.
Credit Hours: 3
Prerequisites: ENGLSH 1000

ENGLSH 2150: Popular Literature
Study of literary genres, such as science fiction and the detective novel, that may be overlooked in traditional literature classes.
Credit Hours: 3
Prerequisites: ENGLSH 1000

ENGLSH 2155: Introduction to World Literatures
Presents and puts into context works by writers from different nations or ethnic backgrounds; includes works in two or more literary genres. No more than six hours may be taken in the Introduction to World Literature series.
Credit Hours: 3

ENGLSH 2156: Introduction to World Literatures, Beginnings to 1603
See ENGLSH 2155 for course description.
Credit Hours: 3

ENGLSH 2157: Introduction to World Literatures, 1603 to 1789
See ENGLSH 2155 for course description.
Credit Hours: 3

ENGLSH 2158: Introduction to World Literatures, 1789 to 1890
See ENGLSH 2155 for course description.
Credit Hours: 3

ENGLSH 2159: Introduction to World Literatures, 1890 to Present
Presents and puts into context works by writers from different nations or ethnic backgrounds, includes works in two or more literary genres. No more than six hours may be taken in the Introduction to World Literature series.
Credit Hours: 3

</table>
ENGLSH 2400: Introduction to African Diaspora Literature
(same as BL_STU 2400). Introduces students to African Diaspora literature with an emphasis on literature written originally in English. No more than six hours may be taken in the Introduction to African Diaspora Literature series.
Credit Hours: 3
Prerequisites: ENGLSH 1000

ENGLSH 2407: Introduction to African Diaspora Literature, 1603 to 1789
(same as BL_STU 2407). See ENGLSH 2400 for course description.
Credit Hours: 3

ENGLSH 2408: Introduction to African Diaspora Literature, 1789 to 1890
(same as BL_STU 2408). See ENGLSH 2400 for course description.
Credit Hours: 3

ENGLSH 2409: Introduction to African Diaspora Literature, 1890 to Present
(same as BL_STU 2409). See ENGLSH 2400 for course description.
Credit Hours: 3

ENGLSH 2490: Introduction to Native Studies
(same as PEA_ST 2490). Introduction to the field of Native Studies. Topics include indigenous knowledge, culture change and continuity, history and misrepresentation, politics and political history, and global indigenous relationships. Graded on A-F basis only.
Credit Hours: 3

ENGLSH 2510: Creative Writing: Intermediate Fiction
Provides intensive guided practice in the writing of short fiction.
Credit Hours: 3
Prerequisites: ENGLSH 1510 or equivalent

ENGLSH 2520: Creative Writing: Intermediate Nonfiction Prose
Provides guided practice in the writing of creative nonfiction.
Credit Hours: 3
Prerequisites: ENGLSH 1520 or equivalent

ENGLSH 2530: Creative Writing: Intermediate Poetry
Provides intensive guided practice in the writing of poetry.
Credit Hours: 3
Prerequisites: ENGLSH 1530 or equivalent

ENGLSH 2560: Beginning Playwriting
(same as THEATR 2920). Study and practice of playwriting fundamentals; emphasizes the one-act play.
Credit Hours: 3

ENGLSH 2601: Languages of Africa
(same as BL_STU 2601, LINGST 2601). Introduction to the diversity of the 2000+ African languages, including first-hand experience exploring a few in detail with native speakers. Features of African languages are compared with others of the world. Political and social aspects of language in Africa are discussed.
Credit Hours: 3

ENGLSH 2700: Introduction to Folklore Field Research
(same as ANTHRO 2150). Course will focus on the specifics of how to identify, collect, preserve and document folklore within communities.
Credit Hours: 3
Prerequisites: ENGLSH 1000

ENGLSH 2770: Introduction to Oral Literature
An introduction to works of verbal art from living oral tradition (e.g. Native American and African-American) and to some of our most important literary works with roots in oral tradition (e.g., the Bible, the Iliad, and the Odyssey, and Beowulf).

Prerequisites: ENGLSH 1000

ENGLSH 2830: American Film History I, 1895-1950
(same as FILM_S 2830). Examines the development of American cinema in relation to other national cinemas, from 1895-1950. No credit for students who have completed ENGLSH 1810 or FILM_S 1810.
Credit Hours: 3
Prerequisites: ENGLSH 1000, ENGLSH 1800 or FILM_S 1800

ENGLSH 2840: American Film History II, 1950-Present
(same as FILM_S 2840). Examines American film history in an international context, from 1950-present. No credit for students who have completed ENGLSH 1820 or FILM_S 1820.
Credit Hours: 3
Prerequisites: ENGLSH 1000 and ENGLSH 1800 or FILM_S 1800

ENGLSH 2860: Film Themes and Genres
(same as FILM_S 2860). Topics (e.g. Film noir, African-American filmmakers, Food and Film, The Western) announced at time of registration. No more than six hours may be taken in ENGLSH 2680.
Credit Hours: 3
Prerequisites: ENGLSH 1000 and ENGLSH 1800 or FILM_S 1800

ENGLSH 2945: Service Learning in English
Students perform volunteer service and complete course requirements, which may include class meetings and written and oral assignments. May
be repeated with departmental consent. Graded on a S/U basis only. Does not meet A&S general education requirements.

Credit Hours: 1-3
Prerequisites: instructor’s consent

**ENGLSH 3010: Advanced Composition**
An intensive writing workshop in which student essays and related texts receive close reading and analysis. Focus (e.g. The Essay, The Research Paper) announced at time of registration.

Credit Hours: 3
Prerequisites: instructor’s consent

**ENGLSH 3080: Sexuality and Gender Theory**
(same as [WGST] 3080). Examination of major theoretical approaches and debates in the study of gender and sexuality, with particular attention to the intersection of culture, representation, and identity. May be repeated to 6 hours with department consent.

Credit Hours: 3
Prerequisites: sophomore standing

**ENGLSH 3100: Introduction to Literary Theory**
Introduction to the range of theoretical approaches to the study of literature; intended as a broad survey of literary theory, whether from the Classical era onward or 20th century literary theory and beyond.

Credit Hours: 3
Prerequisites: ENGLSH 1000 and sophomore standing

**ENGLSH 3110: Special Themes in Literature**
Topics (e.g., Postmodernism, Representations of Nature) announced at time of registration.

Credit Hours: 1-3
Prerequisites: ENGLSH 1000 or equivalent and sophomore standing. No more than six hours may be taken in the Special Themes in Literature series

**ENGLSH 3110H: Special Themes in Literature - Honors**
Topics (e.g., Postmodernism, Representations of Nature) announced at time of registration. No more than six hours may be taken in the Special Themes in Literature series.

Credit Hours: 1-3
Prerequisites: ENGLSH 1000 or equivalent and sophomore standing. Honors eligibility required

**ENGLSH 3116: Special Themes in Literature, Beginning to 1603**
See ENGLSH 3110 for course descriptions.

Credit Hours: 3

**ENGLSH 3117: Special Themes in Literature, 1603 to 1789**
See ENGLSH 3110 for course descriptions.

Credit Hours: 3

**ENGLSH 3118: Special Themes in Literature, 1789 to 1890**
See ENGLSH 3110 for course descriptions.

Credit Hours: 3

**ENGLSH 3118H: Special Themes in Literature, 1789 to 1890 - Honors**
See ENGLSH 3110H for course descriptions.

Credit Hours: 3
Prerequisites: Honors eligibility required

**ENGLSH 3119: Special Themes in Literature, 1890 to Present**
See ENGLSH 3110 for course descriptions.

Credit Hours: 3

**ENGLSH 3170: World Dramatic Literature**
(same as THEATR 3700). Survey of world drama from Greeks to present, focusing on structure, theory, and performance. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: sophomore standing

**ENGLSH 3180: Survey of Women Writers**
(same as WGST 3180). A study of writing by women from the Middle Ages to the present.

Credit Hours: 3
Prerequisites: sophomore standing

**ENGLSH 3180H: Survey of Women Writers - Honors**
A study of writing by women from the Middle Ages to the present.

Credit Hours: 3
Prerequisites: sophomore standing. Honors eligibility required

**ENGLSH 3200: Survey of British Literature: Beginnings to 1784**
Historical survey from beginnings of British literature through the age of Johnson, with readings representing significant writers, works and currents of thought.

Credit Hours: 3
Prerequisites: ENGLSH 1000 or equivalent

**ENGLSH 3210: Survey of British Literature: Romanticism to the Present**
Historical survey of British literature from the Romantic period to the present, emphasizing important writers and significant intellectual and cultural movements.

Credit Hours: 3
Prerequisites: ENGLSH 1000

**ENGLSH 3300: Survey of American Literature: Beginnings to 1865**
A survey of major writers and movements in American literature from Colonialism to Romanticism.

Credit Hours: 3
Prerequisites: ENGLSH 1000 or equivalent

**ENGLSH 3310: Survey of American Literature: 1865-Present**
A survey of major writers and movements in American literature from realism to postmodernism.
Credit Hours: 3
Prerequisites: ENGLSH 1000 or equivalent

ENGLSH 3400: Survey of African American Literature, Beginnings to 1900
(same as BL_STU 3400). A survey of major authors and movements in African American literature from its beginnings to 1900.
Credit Hours: 3
Prerequisites: ENGLSH 1000

ENGLSH 3410: Survey of African American Literature, 1900-Present
(same as BL_STU 3410). A survey of major authors and movements in African American literature from 1900 to the present.
Credit Hours: 3
Prerequisites: ENGLSH 1000

ENGLSH 3420: Periods and Genres in African Diaspora Literature
(same as BL_STU 3420). Topic (e.g. Harlem Renaissance African Diaspora Poetry) Announced at time of registration. No more than six hours may be taken in the Periods and Genres in African Diaspora Literature series.
Credit Hours: 3
Prerequisites: ENGLSH 1000

ENGLSH 3427: Periods and Genres in African Diaspora Literature, 1603 to 1789
(same as BL_STU 3427). See ENGLSH 3420 for course description.
Credit Hours: 3

ENGLSH 3428: Periods and Genres in African Diaspora Literature, 1789 to 1890
(same as BL_STU 3428). See ENGLSH 3420 for course description.
Credit Hours: 3

ENGLSH 3429: Periods and Genres in African Diaspora Literature, 1890 to Present
(same as BL_STU 3429). See ENGLSH 3420 for course description.
Credit Hours: 3

ENGLSH 3430: Introduction to African Diaspora Literary Theory
(same as BL_STU 3705). Introduction to the range of theoretical approaches to the study of African Diaspora literature, with particular attention to the diverse socio-political contexts that undergird range of literary, historical, and cultural theories; intended as a broad survey of African Diaspora literary theory, whether from the Slavery era onward or 20th century literary theory and beyond. May be repeated for credit with consent.
Credit Hours: 3
Prerequisites: ENGLSH 1000 and sophomore standing

ENGLSH 3490: Native Writing and Representation
(same as PEA_ST 3490). Survey of native writing and representation from the late eighteenth century to the present, encompassing a diverse range of tribes and forms. Material will be drawn from tribes inhabiting the North American continent, but global indigenous relationships will also be addressed. Graded on A-F basis only.
Credit Hours: 3

ENGLSH 3560: Intermediate Playwriting
(same as THEATR 3920). Intermediate study of the writing process as applied to theatre, leading to the creation of a full-length play to be considered for production.
Credit Hours: 3
Prerequisites: ENGLSH 1000 and ENGLSH 1800 or FILM_S 1800

ENGLSH 3570: Performance of Literature
(same as COMMUN 3570 and THEATR 3200). Analysis and oral interpretation of literary works. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: sophomore standing

ENGLSH 3700: American Folklore
(same as ANTHRO 3150). Focus on regional and ethnic folklore; emphasis on analysis of folklore in context. Requirements include book reports and two analytical papers based on student field research.
Credit Hours: 3

ENGLSH 3820: Major Directors
(same as FILM_S and RM_LAN 3820). Topics (e.g. Hitchcock, Kubrick, Fellini, Allen, Kurosawa, Wilder) announced at time of registration. Only 6 hours may be taken for credit toward major. Graded on A/F basis only.
Credit Hours: 3
Prerequisites: ENGLSH 1000 and ENGLSH 1800 or FILM_S 1800

ENGLSH 3850: Studies in Film History
(same as FILM_S 3850). Topics (e.g. Classical Period of Hollywood cinema, silent era, Post-WWII American film, German Weimar cinema, French New Wave) announced at time of registration. Only 6 hours count as credit toward major.
Credit Hours: 3
Prerequisites: ENGLSH 1000 and ENGLSH 1800 or FILM_S 1800

ENGLSH 3855: Documentary Film
(same as FILM_S 3855). Surveys the history of documentary film including the development of subgenres, sound and voice over in documentary, re-enactment, ethical issues in documentary film production, and more. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ENGLSH 1000

ENGLSH 4000: Advanced Studies in English
Advanced examination of subjects within English studies. Subjects vary from semester to semester. May repeat to six hours.
Credit Hour: 1-3

ENGLSH 4004: Topics in English-Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May repeat to six hours.
Credit Hour: 1-99

ENGLISH 4040: Studies in Writing
An advanced writing workshop in nonfiction prose. Topics (The Personal Narrative, Nature Writing) announced at time of registration. May repeat to six hours with departmental consent.

Credit Hours: 3
Prerequisites: ENGLISH 2010 or instructor's consent

Examines questions related to rhetoric, the study of symbols used for persuasion, justification, or communication. Specific topics are announced at time of registration and may involve the rhetorical study of fiction or nonfiction, oral or written texts, verbal or visual modes.

Credit Hours: 3
Prerequisites: ENGLISH 1000, junior standing

ENGLISH 4050: Historical Survey of Rhetoric
A survey of major works of rhetoric from Plato to the present day, with special attention to those works influencing English language rhetorics and theories of rhetoric.

Credit Hours: 3
Prerequisites: ENGLISH 1000 and sophomore standing

ENGLISH 4060: Studies in Critical Theory
Focuses on questions raised by various critical theories, includes practice writing criticism that applies the theories to particular works. May repeat to six hours with department’s consent.

Credit Hours: 3
Prerequisites: junior standing

ENGLISH 4070: History of Criticism
Surveys modern and contemporary theories of literary criticism: historical, archetypal, generic, formalist, phenomenological and interdisciplinary. Emphasizes key writers in each field.

Credit Hours: 3
Prerequisites: junior standing

ENGLISH 4100: Genres
Advanced survey of major movements and writers. Topics (e.g., American Poetry, The Development of the British Novel) announced at time of registration. No more than six hours may be taken in the Genres series.

Credit Hours: 3
Prerequisites: junior standing

ENGLISH 4100H: Genres - Honors
Advanced survey of major movements and writers. Topics (e.g., American Poetry, The Development of the British Novel) announced at time of registration. No more than six hours may be taken in the Genres series.

Credit Hours: 3
Prerequisites: junior standing. Honors eligibility required

ENGLISH 4106: Genres, Beginning to 1603
See ENGLSH 4100 for course description.

Credit Hours: 3

ENGLISH 4107: Genres, 1603 to 1789
See ENGLSH 4100 for course description.

Credit Hours: 3

ENGLISH 4108: Genres, 1789 to 1890
See ENGLSH 4100 for course description.

Credit Hours: 3

ENGLISH 4109: Genres, 1890 to Present
See ENGLSH 4100 for course description.

Credit Hours: 3

ENGLISH 4120: Ethnic Literature
Explores in depth the literary traditions of one of America’s minority ethnic cultures: Native American, African-American, Hispanic American, Asian American.

Credit Hours: 3
Prerequisites: junior standing. No more than six hours may be taken in the Ethnic Literature series

ENGLISH 4127: Ethnic Literature, 1603 to 1789
See ENGLSH 4120 for course description.

Credit Hours: 3

ENGLISH 4128: Ethnic Literature, 1789 to 1890
See ENGLSH 4120 for course description.

Credit Hours: 3

ENGLISH 4129: Ethnic Literature, 1890 to Present
See ENGLSH 4120 for course description.

Credit Hours: 3

ENGLISH 4140: Modern Literature
A study of selected twentieth-century literature within the intellectual and cultural contexts of the modern era.

Credit Hours: 3

ENGLISH 4150: World Literatures
Study of important works and writers from Asia, Africa, Europe, Latin America or the mid-East. Topics (e.g., Survey of World Literature, The Bible) announced at time of registration.

Credit Hours: 3
Prerequisites: junior standing. No more than six hours may be taken in the World Literature series

ENGLISH 4156: World Literatures, Beginning to 1603
See ENGLSH 4150 for course description.
Credit Hours: 3

ENGLSH 4157: World Literatures, 1603 to 1789
See ENGLSH 4150 for course description.

Credit Hours: 3

ENGLSH 4158: World Literatures, 1789 to 1890
See ENGLSH 4150 for course description.

Credit Hours: 3

ENGLSH 4159: World Literatures, 1890 to Present
See ENGLSH 4150 for course description.

Credit Hours: 3

ENGLSH 4160: Major Authors
Intensive study of the work of a single writer (e.g., Milton) or set of writers (e.g., Whitman and Dickinson). Topic announced at time of registration. No more than six hours may be taken in the Major Author series.

Credit Hours: 3

Prerequisites: junior standing

ENGLSH 4166: Major Authors, Beginning to 1603
See ENGLSH 4160 for course description.

Credit Hours: 3

ENGLSH 4167: Major Authors, 1603-1789
See ENGLSH 4160 for course description.

Credit Hours: 3

ENGLSH 4168: Major Authors, 1789-1890
See ENGLSH 4160 for course description.

Credit Hours: 3

ENGLSH 4169: Major Authors, 1890-Present
See ENGLSH 4160 for course description.

Credit Hours: 3

ENGLSH 4170: Comparative Approaches to Literature
Study of works separated by the places or eras of their composition, but unified by themes or traditions. Topics (e.g., Poets of African Diaspora, Literatures of Exile) announced at time of registration. No more than six hours may be taken in the Comparative Approaches to Literature.

Credit Hours: 3

Prerequisites: junior standing

ENGLSH 4176: Comparative Approaches to Literature, Beginning to 1603
See ENGLSH 4170 for course description.

Credit Hours: 3

ENGLSH 4177: Comparative Approaches to Literature, 1609-1789
See ENGLSH 4170 for course description.

Credit Hours: 3

ENGLSH 4178: Comparative Approaches to Literature, 1789-1890
See ENGLSH 4170 for course description.

Credit Hours: 3

ENGLSH 4179: Comparative Approaches to Literature, 1890-Present
See ENGLSH 4170 for course description.

Credit Hours: 3

ENGLSH 4180: Major Women Writers (same as WGST 4180)
Study of a limited number (1-3) of significant writers to be read intensively using contemporary feminist critical theory. No more than six hours may be taken in the Major Women Writers series.

Credit Hours: 3

ENGLSH 4181: Themes in Literature by Women (same as WGST 4181 and BL_STU 4181)
Examines works by a number of women writers with particular attention to their socio-political context. May repeated to six hours with department’s consent.

Credit Hours: 3

Prerequisites: junior standing

ENGLSH 4186: Major Women Writers, Beginning to 1603 (same as WGST 4186)
See ENGLSH 4180 for course description.

Credit Hours: 3

ENGLSH 4187: Major Women Writers, 1603-1789 (same as WGST 4187)
See ENGLSH 4180 for course description.

Credit Hours: 3

ENGLSH 4188: Major Women Writers, 1789-1890 (same as WGST 4188)
See ENGLSH 4180 for course description.

Credit Hours: 3

ENGLSH 4189: Major Women Writers, 1890-Present (same as WGST 4189)
See ENGLSH 4180 for course description.

Credit Hours: 3

ENGLSH 4200: Introduction to Old English (same as LINGST 4200)
A beginning study of the Old English or Anglo-Saxon language in its cultural context, with emphasis on gaining a reading knowledge.

Credit Hours: 3

Prerequisites: junior standing

ENGLSH 4210: Medieval Literature
Representative works from the Anglo-Saxon and Middle-English periods. May repeat to six hours with department’s consent.

Credit Hours: 3

Prerequisites: junior standing
ENGLISH 4220: Renaissance and Seventeenth Century Literature
Topics (e.g., The Metaphysical Poets, Themes in Shakespeare) announced at time of registration. No more than six hours may be taken in the Renaissance and Seventeenth Century Literature.

Credit Hours: 3
Prerequisites: junior standing

ENGLISH 4226: Renaissance and Seventeenth Century Literature, Beginning to 1603
See ENGLISH 4220 for course description.

Credit Hours: 3

ENGLISH 4227: Renaissance and Seventeenth Century Literature, 1603 to 1789
See ENGLISH 4220 for course description.

Credit Hours: 3

ENGLISH 4240: Restoration and 18th-Century English Literature
Topics (e.g., Restoration Drama, Johnson and his Circle) announced at time of registration. May repeat to six hours with department’s consent.

Credit Hours: 3
Prerequisites: junior standing

</tbody>
</table>
ENGLSH 4650: Principles of Teaching English as a Second Language
(same as LINGST 4650 and LTC 4460). Linguistic and pedagogical principles of teaching English to speakers of other languages.
Credit Hours: 3
Prerequisites: ENGLSH 4600 and ENGLSH 4610 or equivalent

ENGLSH 4670: Field Methods in Linguistics
(same as LINGST 4870 and ANTHRO 4870). Provides training in the methods of constructing a detailed linguistic description and analysis of wholly unfamiliar language, based on interviews with a native speaker. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: LINGST 1060, ANTHRO 1060, ENGLSH 1060, or C_S_D 1060; LINGST 4600, or ENGLSH 4600; LINGST 4630, or ENGLSH 4630; LINGST 4640 or ENGLSH 4640
Corequisites: concurrent enrollment in LINGST 4630 or ENGLSH 4630 or LINGST 4640 or ENGLSH 4640

ENGLSH 4700: Special Themes in Folklore
(same as ANTHRO 4150). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore of a particular group. May be repeated for a maximum of six hours with department's consent.
Credit Hours: 3

ENGLSH 4710: Themes in African Diaspora Folklore
(same as ANTHRO 4160 and BL_STU 4710). Intensive study in a selected area of African Diaspora folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature; or the folklore of a particular group. ENGLSH 4700 and ENGLSH 4710 may be repeated for a maximum of six hours with instructor's consent.
Credit Hours: 3

ENGLSH 4770: Oral Tradition
(same as CL_HUM 4770). Study of verbal art from living oral traditions (e.g., Native American and African American) and important literary works with roots in oral tradition (e.g., the Bible, the Iliad, the Odyssey, and Beowulf).
Credit Hours: 3
Prerequisites: junior standing

ENGLSH 4780: Women’s Folklore and Feminist Theory
(same as WGST 4780). Examines folklore and artistic expression of women in relation to feminist theory and in multicultural contexts. Includes verbal genres (narrative/ story) as well as material genres (quilting/ arts).
Credit Hours: 3
Prerequisites: junior standing or instructor’s consent

ENGLSH 4810: Film Theory
(same as FILM_S 4810). This course explores contemporary trends in film theory. Topics may include: psychoanalysis, feminism, Marxism, cultural studies, queer theory, audience and star studies, postcolonialism, among others.
Credit Hours: 3
Prerequisites: ENGLSH 1000 and ENGLSH 1800 or FILM_S 1800; junior standing or above required

ENGLSH 4820: Studies in Film Genre
(same as FILM_S 4820). Topics (e.g. The Western, Film Noir) announced at time of registration. No more than six hours may be taken for credit toward the major.
Credit Hours: 3
Prerequisites: ENGLSH 1000 and ENGLSH 1800 or FILM_S 1800; junior standing or instructor’s consent

ENGLSH 4840: Culture and Media
(same as FILM_S 4840). Topics (e.g. Cinema and Imperialism, Indigenous Media, Ethnographic Documentary) announced at time of registration. No more than six hours may be taken for credit toward the major.
Credit Hours: 3

ENGLSH 4935: Adaptation of Literature for Film
(same as FILM_S 4935 and THEATR 4935; cross-leveled with ENGLSH 7580, FILM_S 7935 and THEATR 7935). This upper-division course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for film.
Credit Hours: 3

ENGLSH 4940: Internship in English
Students work in an agency or institution using their English-related skills for one to three credit hours. Graded on an S/U basis only.
Credit Hour: 1-3
Prerequisites: junior standing, department's consent

ENGLSH 4950: Internship in Publishing
Offers practical experience working with a literary or scholarly publication edited or sponsored by faculty members. Graduate students in English must take the course two semesters in order to count three hours toward the completion of their program.
Credit Hour: 3
Prerequisites: instructor's consent

ENGLSH 4955: Independent Research in English
Development of a carefully considered research project under close supervision of a faculty member. Open to undergraduate students only.
Credit Hour: 1-3
Prerequisites: junior standing and departmental consent

ENGLSH 4960: Special Readings in English
Individual work with conferences adjusted to needs of student.
Credit Hour: 1-99
Prerequisites: 4000-level course in area of proposed work and written consent of instructor. Restricted to senior English majors in their final semester.
ENGLSH 4970: Capstone Experience
For students in their last semester, this course focuses on a major project and the processes of selection, research, and writing leading to its completion. Includes a professional component (resume, cover letter).
Credit Hours: 3
Prerequisites: English major with senior standing

ENGLSH 4995: Senior Honors Thesis
Independent research under direction of faculty. Second course of two part Honors Sequence.
Credit Hours: 3
Prerequisites: ENGLSH 4996

ENGLSH 4996: Honors Seminar in English
First of two major semester Honors sequence. Studies literary topic, critical approaches and advanced literary research methodology in preparation for Honors Senior Thesis.
Credit Hours: 3
Prerequisites: 3.3 overall GPA and in major

ENGLSH 7004: Topics in English-Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May repeat to six hours.
Credit Hour: 1-99

ENGLSH 7040: Studies in Writing
An advanced writing workshop in nonfiction prose. Topics (The Personal Narrative, Nature Writing) announced at time of registration. May repeat to six hours with departmental consent.
Credit Hours: 3
Prerequisites: ENGLSH 2010 or instructor’s consent

ENGLSH 7045: Rhetorical Studies
Examines questions related to rhetoric, the study of symbols used for persuasion, justification, or communication. Specific topics are announced at time of registration and may involve the rhetorical study of fiction or nonfiction, oral or written texts, verbal or visual modes.
Credit Hours: 3

ENGLSH 7050: Historical Survey of Rhetoric
A survey of major works of rhetoric from Plato to the present day, with special attention to those works influencing English language rhetoric’s and theories of rhetoric.
Credit Hours: 3
Prerequisites: ENGLISH 1000

ENGLSH 7060: Studies in Critical Theory
Focuses on questions raised by various critical theories, includes practice writing criticism that applies the theories to particular works. May repeat to six hours with departmental consent.
Credit Hours: 3

ENGLSH 7070: History of Criticism
Surveys modern and contemporary theories of literary criticism: historical, archetypal, generic, formalist, phenomenological and interdisciplinary. Emphasizes key writers in each field.
Credit Hours: 3

ENGLSH 7100: Genres
Advanced survey of major movements and writers. Topics (e.g., American Poetry, The Development of the British Novel) announced at time of registration. No more than six hours may be taken in the Genres series.
Credit Hours: 3

ENGLSH 7106: Genres, Beginning to 1603
See ENGLSH 7100 for course description.
Credit Hours: 3

ENGLSH 7107: Genres, 1603 to 1789
See ENGLSH 7100 for course description.
Credit Hours: 3

ENGLSH 7108: Genres, 1789 to 1890
See ENGLSH 7100 for course description.
Credit Hours: 3

ENGLSH 7109: Genres, 1890 to Present
See ENGLSH 7100 for course description.
Credit Hours: 3

ENGLSH 7120: Ethnic Literature
Explores in depth the literary traditions of one of America’s minority ethnic cultures: Native American, African-American, Hispanic American, Asian American. No more than six hours may be taken in the Ethnic Literature series.
Credit Hours: 3

ENGLSH 7127: Ethnic Literature, 1603 to 1789
See ENGLSH 7120 for course description.
Credit Hours: 3

ENGLSH 7128: Ethnic Literature, 1789 to 1890
See ENGLSH 7120 for course description.
Credit Hours: 3

ENGLSH 7129: Ethnic Literature, 1890 to Present
See ENGLSH 7120 for course description.
Credit Hours: 3

ENGLSH 7140: Modern Literature
A study of selected twentieth-century literature within the intellectual and cultural contexts of the modern era.
ENGLSH 7150: World Literatures
Study of important works and writers from Asia, Africa, Europe, Latin America or the mid-East. Topics (e.g., Survey of World Literature, The Bible) announced at time of registration. No more than six hours may be taken in the World Literatures series.
Credit Hours: 3

ENGLSH 7156: World Literatures, Beginning to 1603
See ENGLSH 7150 for course description.
Credit Hours: 3

ENGLSH 7157: World Literatures, 1603 to 1789
See ENGLSH 7150 for course description.
Credit Hours: 3

ENGLSH 7158: World Literatures, 1789 to 1890
See ENGLSH 7150 for course description.
Credit Hours: 3

ENGLSH 7159: World Literatures, 1890 to Present
See ENGLSH 7150 for course description.
Credit Hours: 3

ENGLSH 7160: Major Authors
Intensive study of the work of a single writer (e.g., Milton) or set of writers (e.g., Whitman and Dickinson). Topic announced at time of registration. No more than six hours may be taken in the Major Authors series.
Credit Hours: 3

ENGLSH 7166: Major Authors, Beginning to 1603
See ENGLSH 7160 for course description.
Credit Hours: 3

ENGLSH 7167: Major Authors, 1603-1789
See ENGLSH 7160 for course description.
Credit Hours: 3

ENGLSH 7168: Major Authors, 1789-1890
See ENGLSH 7160 for course description.
Credit Hours: 3

ENGLSH 7169: Major Authors, 1890-Present
See ENGLSH 7160 for course description.
Credit Hours: 3

ENGLSH 7170: Comparative Approaches to Literature
Study of works separated by the places or eras of their composition, but united by themes or traditions. Topics (e.g., Poets of African Diaspora, Literatures of Exile) announced at time of registration. No more than six hours may be taken in the Comparative Approaches to Literature Series.
Credit Hours: 3

ENGLSH 7176: Comparative Approaches to Literature, Beginning to 1603
See ENGLSH 7170 for course description.
Credit Hours: 3

ENGLSH 7177: Comparative Approaches to Literature, 1609-1789
See ENGLSH 7170 for course description.
Credit Hours: 3

ENGLSH 7178: Comparative Approaches to Literature, 1789-1890
See ENGLSH 7170 for course description.
Credit Hours: 3

ENGLSH 7179: Comparative Approaches to Literature, 1890-Present
See ENGLSH 7170 for course description.
Credit Hours: 3

ENGLSH 7180: Major Women Writers
(same as WGST 7180). Study of a limited number (1-3) of significant writers to be read intensively using contemporary feminist critical theory. No more than six hours may be taken in the Major Women Writers series.
Credit Hours: 3

ENGLSH 7181: Themes in Literature by Women
(same as WGST 7181). Examines works by a number of women writers with particular attention to their socio-political context. May repeat to six hours with department's consent.
Credit Hours: 3

ENGLSH 7186: Major Women Writers, Beginning to 1603
(same as WGST 7186). See ENGLSH 7180 for course description.
Credit Hours: 3

ENGLSH 7187: Major Women Writers, 1603-1789
(same as WGST 7187). See ENGLSH 7180 for course description.
Credit Hours: 3

ENGLSH 7188: Major Women Writers, 1789-1890
(same as WGST 7188). See ENGLSH 7180 for course description.
Credit Hours: 3

ENGLSH 7189: Major Women Writers, 1890-Present
(same as WGST 7189). See ENGLSH 7180 for course description.
Credit Hours: 3

ENGLSH 7200: Introduction to Old English
(same as LINGST 7200). A beginning study of the Old English or Anglo-Saxon language in its cultural context, with emphasis on gaining a reading knowledge.
Credit Hours: 3
Credit Hours: 3

ENGLSH 7210: Medieval Literature
Representative works from the Anglo-Saxon and Middle-English periods. May repeat to six hours with department’s consent.

Credit Hours: 3

ENGLSH 7220: Renaissance and 17th-Century English Literature
Topics (e.g., The Metaphysical Poets, Themes in Shakespeare) announced at time of registration. No more than six hours may be taken in the Renaissance and Seventeenth Century Literature series.

Credit Hours: 3

ENGLSH 7226: Renaissance and Seventeenth Century Literature, Beginning to 1603
See ENGLSH 7220 for course description.

Credit Hours: 3

ENGLSH 7227: Renaissance and Seventeenth Century Literature, 1603-1789
See ENGLSH 7220 for course description.

Credit Hours: 3

ENGLSH 7240: Restoration and 18th-Century English Literature
Topics (e.g., Restoration Drama, Johnson and his Circle) announced at time of registration. May repeat to six hours with department’s consent.

Credit Hours: 3

ENGLSH 7250: 19th-Century English Literature
(cross-leveled with ENGLSH 4250). Topics (e.g., Victorian Poetry, Non-Fiction Prose) announced at time of registration. May repeat to six hours with department’s consent.

Credit Hours: 3

ENGLSH 7260: 20th-Century British Literature
(cross-leveled with ENGLSH 4260). Topics (e.g., Contemporary British Poets, The Post-War Novel) announced at time of registration. May repeat to six hours with department’s consent.

Credit Hours: 3

ENGLSH 7300: Early American Literature
Topics (e.g., Narratives of Discovery and Exploration, The Puritan Heritage) announced at time of registration. May repeat to six hours with department’s consent.

Credit Hours: 3

ENGLSH 7310: 19th-Century American Literature
(cross-leveled with ENGLSH 4310). Topics (e.g., American Romanticism, Regionalism) announced at time of registration. May repeat to six hours with department’s consent.

Credit Hours: 3

ENGLSH 7320: 20th-Century American Literature
(cross-leveled with ENGLSH 4320). Topics (e.g., American Poetry since T. S. Eliot, The Short Story) announced at time of registration. May repeat to six hours with department’s consent.

Credit Hours: 3

ENGLSH 7400: Studies in African Diaspora Literature
(same as BL_STU 7400). Topics (e.g., African American Poetry, African Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in African Diaspora Literature series.

Credit Hours: 3

ENGLSH 7407: Studies in African Diaspora Literature, 1603 to 1789
(same as BL_STU 7407). See ENGLSH 7400 for course description.

Credit Hours: 3

ENGLSH 7408: Studies in African Diaspora Literature, 1603 to 1789
(same as BL_STU 7408). See ENGLSH 7400 for course description.

Credit Hours: 3

ENGLSH 7409: Studies in African Diaspora Literature, 1890-to Present
(same as BL_STU 7407). See ENGLSH 7400 for course description.

Credit Hours: 3

ENGLSH 7410: Major African Diaspora Writers
(same as BL_STU 7410). An intensive study of selected writers of African Diaspora literature, focusing on texts originally in English. No more than six hours may be taken in the Major African Diaspora Writers series.

Credit Hours: 3

ENGLSH 7417: Major African Diaspora Writers, 1603 to 1789
(same as BL_STU 7417). See ENGLSH 7410 for course description.

Credit Hours: 3

ENGLSH 7418: Major African Diaspora Writers, 1789 to 1890
(same as BL_STU 7418). See ENGLSH 7410 for course description.

Credit Hours: 3

ENGLSH 7419: Major African Diaspora Writers, 1890 to Present
(same as BL_STU 7419). See ENGLSH 7410 for course description.

Credit Hours: 3

ENGLSH 7420: Africana Womanism
(same as BL_STU 7420). An intensive study of Africana Womanism, focusing on selected Africana women writers.

Credit Hours: 3

Prerequisites: graduate standing or instructor’s consent. May be repeated to six hours with departmental consent.
ENGLSH 7480: Major African Diaspora Women Writers
(same as WGST 7480 and BL_STU 7480). Study of selected African Diaspora women writers, focusing on texts originally in English. May be repeated for credit with departmental consent. Maximum of 6 hours for ENGLSH 7180 and ENGLSH 7480
Credit Hours: 3

ENGLSH 7487: Major African Diaspora Women Writers, 1603 to 1789
(same as WGST 7487 and BL_STU 7487). See ENGLSH 7480 for course description.
Credit Hours: 3

ENGLSH 7488: Major African Diaspora Women Writers, 1789 to 1890
(same as WGST 7488 and BL_STU 7488). See ENGLSH 7480 for course description.
Credit Hours: 3

ENGLSH 7489: Major African Diaspora Women Writers, 1789 to 1890
(same as WGST 7489 and BL_STU 7489). See ENGLSH 7480 for course description.
Credit Hours: 3

ENGLSH 7490: Native Studies
In-depth study of topics in Native writing and representation, such as tribal intellectual histories, defined historical periods, or specific genres or media. Examples of course titles include Ojibwe Writing, Native Film and Video, and Contemporary Native Literature.
Credit Hours: 3

ENGLSH 7510: Creative Writing: Advanced Fiction
An intensive writing workshop in which student stories and related literary texts receive close reading and analysis.
Credit Hours: 3
Prerequisites: ENGLSH 2510 or equivalent

ENGLSH 7520: Creative Writing: Advanced Nonfiction Prose
An intensive writing workshop in which a student’s creative nonfiction receives close reading and analysis.
Credit Hours: 3
Prerequisites: ENGLSH 2520 or equivalent

ENGLSH 7530: Creative Writing: Advanced Poetry
Poetry regarded as a mode of understanding. Poetic values related to other values. Practical consideration of verse techniques.
Credit Hours: 3
Prerequisites: ENGLSH 2530 or equivalent

ENGLSH 7560: Advanced Playwriting: Problems
(same as THEATR 7920; cross-leveled with ENGLSH 4650 and THEATR 4920). Advanced study of the writing process as applied to theatre, including theory and practice. Special playwriting problems and techniques.
Credit Hours: 3
Prerequisites: ENGLSH 3560

ENGLSH 7570: Adaptation of Literature for the Stage
(same as THEATR 7930; cross-leveled with ENGLSH 4570). Explores adaptation principles and practices with a variety of forms of literature that were not originally written for the stage.
Credit Hours: 3
Prerequisites: instructor’s consent

ENGLSH 7580: Adaptation of Literature for Film
(same as FILM_S 7935 and THEATR 7935; cross-leveled with ENGLSH 4935, FILM_S 4935 and THEATR 4935). This upper division course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for film.
Credit Hours: 3
Prerequisites: instructor’s consent

ENGLSH 7600: Structure of American English
(same as LINGST 7600). Introduction to English linguistics. Study of the grammar and pronunciation of contemporary English, with the major focus on syntax.
Credit Hours: 3

ENGLSH 7610: History of the English Language
(same as LINGST 7610). Historical changes in the grammar and pronunciation of the English language from Old English to the present. Introduction to Indo-European origins of English.
Credit Hours: 3

ENGLSH 7620: Regional and Social Dialects of American English
(same as LINGST 7620). The study of regional and social variation in pronunciation, vocabulary, and grammar of American English.
Credit Hours: 3
Prerequisites: ENGLSH 4600 and ENGLSH 4610 or equivalent

ENGLSH 7630: Phonology
(same as LINGST 7630). Survey of the sound patterns of English, with some comparison to other languages.
Credit Hours: 3
Prerequisites: ENGLSH 4600 or another introductory course in linguistics or phonetics

ENGLSH 7640: Syntax
(same as LINGST 7640). Study of the properties of phrase-and sentence-level grammar, emphasizing English, with some comparison to other languages.
Credit Hours: 3
Prerequisites: ENGLSH 4600 or another comparable linguistics course

ENGLSH 7650: Principles of Teaching English as a Second Language
(same as LINGST 7650). Linguistic and pedagogical principles of teaching English to speakers of other languages.
Credit Hours: 3
Prerequisites: ENGLSH 4600 and ENGLSH 4610 or equivalent
ENGLISH 7670: Field Methods in Linguistics
(same as LINGST 7870 and ANTHRO 7870). Provides training in the methods of constructing a detailed linguistic description and analysis of a wholly unfamiliar language, based on interviews with a native speaker. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: LINGST 1060, LINGST 7600, LINGST 7630 and LINGST 7640
Corequisites: LINGST 7630 or LINGST 7640

ENGLISH 7700: Special Themes in Folklore
(same as ANTHRO 7150). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore of a particular group. May be repeated for a maximum of six hours with department's consent.

Credit Hours: 3

ENGLISH 7710: Themes in African Diaspora Folklore
(same as ANTHRO 7160 and [BL_STU 7710). Intensive study in a selected area of African Diaspora folklore: folk narrative, folk song, myth, proverb, etc., folklore of a particular group. ENGLISH 7700 and ENGLISH 7710 may be repeated for a maximum of six hours with instructor's consent.

Credit Hours: 3

ENGLISH 7770: Oral Tradition
(same as CL_HUM 4770). Study of verbal art from living oral traditions (e.g., Native American and African American) and important literary works with roots in oral tradition (e.g., the Bible, the Iliad the Odyssey, and Beowulf).

Credit Hours: 3
Prerequisites: instructor's consent

ENGLISH 7780: Women's Folklore and Feminist Theory
(same as WGST 7780). Examines folklore and artistic expression of women in relation to feminist theory and in multicultural contexts. Includes verbal genres (narrative/song) as well as material genres (quilting/arts).

Credit Hours: 3

ENGLISH 7810: Film Theory
(same as FILM_S 7810). This course explores contemporary trends in film theory. Topics may include psychoanalysis, feminism, Marxism, cultural studies, queer theory, audience and star studies, postcolonialism, among others. Graded on A-F basis only.

Credit Hours: 3

ENGLISH 7840: Culture and Media
(same as FILM_S 7840). Topics (e.g., Cinema and Imperialism, Indigenous Media, Ethnographic Documentary) announced at time of registration. No more than six hours may be taken for credit toward the major.

Credit Hours: 3

ENGLISH 7950: Internship in Publishing
Offers practical experience working with a literary or scholarly publication edited or sponsored by faculty members. Graduate students in English must take the course two semesters in order to count three hours toward the completion of their program.

Credit Hours: 3
Prerequisites: instructor's consent

ENGLISH 8001: Topics in English-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

ENGLISH 8005: Introduction to Graduate Study
Introduces entering MA and PhD students to the profession of English and the intellectual resources needed to complete their degrees successfully.

Credit Hour: 1

ENGLISH 8006: Professional Issues in English Studies
Introduces advanced graduate students to issues relevant to their professional training, including entering the job market and preparing work for publication. May be repeated for credit.

Credit Hour: 1-3

ENGLISH 8010: Theory and Practice of Composition
Current and historical theories of rhetoric and composition as applied to the teaching of college composition.

Credit Hours: 3
Prerequisites: department's consent

ENGLISH 8040: Seminar in Rhetoric and Composition
Topics (e.g., The Institutionalization of Rhetoric, Writing Across the Curriculum) announced at time of registration. May repeat to twelve hours with department's approval.

Credit Hours: 3

ENGLISH 8050: Contemporary Critical Approaches
A survey of contemporary professional critical methods, such as formalism, poststructuralism, feminism, Marxism, new historicism, psychoanalysis, identity studies, and cultural studies.

Credit Hours: 3

ENGLISH 8060: Seminar in Criticism and Theory
Principles and practices of selected critics. May repeat to twelve hours with department's consent.

Credit Hours: 3

ENGLISH 8070: History of Criticism and Theory
A survey of the history of literary criticism and theory. While comprehensive in scope, the course might focus on specific topics in the history of criticism, such as the dialectic between rhetoric and poetics, the rise of aesthetics, or the relation of art and culture to society. Figures studied will extend from early philosophers such as Plato and Aristotle,
through eighteenth-century thinkers such as Kant and Johnson, up to present theorists such as Derrida and Butler.

**Credit Hours:** 3

**ENGLSH 8090: Masters Thesis Research**
Leads to preparation of masters thesis. Graded on S/U basis only.

**Credit Hour:** 1-99

**ENGLSH 8095: Problems in English**
Individual work not leading to preparation of dissertation.

**Credit Hour:** 1-99

**Prerequisites:** departmental consent

**ENGLSH 8110: Forms**
Topics (e.g., The Epic, The Epistolary Novel) announced at time of registration. May repeat to twelve hours with department’s approval.

**Credit Hours:** 3

**ENGLSH 8200: Seminar in Old English Literature**
Topics in Old English or Anglo-Saxon literature, such as Beowulf, the Exeter Book poems, or the genres of elegy, Biblical narrative, or wisdom poetry. May repeat to twelve hours with department’s approval.

**Credit Hours:** 3

**Prerequisites:** ENGLSH 4200 or equivalent

**ENGLSH 8210: Seminar in Middle English Literature**
Topics (e.g., Medieval Drama, Chaucer) announced at time of registration. May repeat to twelve hours with department’s approval.

**Credit Hours:** 3

**ENGLSH 8220: Seminar in Renaissance British Literature**
Topics (e.g., Tudor and Stuart Drama, Shakespearean Tragedy) announced at time of registration. May repeat to twelve hours with department’s approval.

**Credit Hours:** 3

**ENGLSH 8230: Seminar in 17th-Century British Literature**
Topics (e.g., The Metaphysical Poets, Restoration Drama) announced at time of registration. May repeat to twelve hours with department’s approval.

**Credit Hours:** 3

**ENGLSH 8240: Seminar in 18th-Century British Literature**
Topics (e.g., The 18th-Century Novel, Historical and Biographical Prose) announced at time of registration. May repeat to twelve hours with department’s approval.

**Credit Hours:** 3

**Prerequisites:** instructor’s consent and ENGLSH 4510

**ENGLSH 8250: Seminar in 19th-Century British Literature**
Topics (e.g., The Later Romantics, Victorian Poetry) announced at time of registration. May repeat to twelve hours with department’s approval.

**Credit Hours:** 3

**ENGLSH 8260: Seminar in 20th-Century British Literature**
Topics (e.g., Chief Contemporary Poets, Modernism and the Novel) announced at time of registration. May repeat to twelve hours with department’s approval.

**Credit Hours:** 3

**ENGLSH 8300: Seminar in Early American Literature**
Topics (e.g., Religious and Philosophical Writings, The Revolutionary Period) announced at time of registration. May repeat to twelve hours with department’s approval.

**Credit Hours:** 3

**ENGLSH 8310: Seminar in 19th Century American Literature**
Topics (e.g., The Transcendentalists, American Realism) announced at time of registration. May repeat to twelve hours with department’s consent.

**Credit Hours:** 3

**ENGLSH 8320: Seminar in 20th-Century American Literature**
Topics (e.g., The African-American Novel, Chief Contemporary Poets) announced at time of registration. May repeat to twelve hours with department’s consent.

**Credit Hours:** 3

**ENGLSH 8330: Seminar in 21st-Century American Literature**
Topics (e.g., The African-American Novel, Chief Contemporary Poets) announced at time of registration. May repeat to twelve hours with department’s consent.

**Credit Hours:** 3

**ENGLSH 8400: Seminar in African Diaspora Literature**
Topics (e.g., Autobiography, Black Women Writers) announced at time of registration. May be repeated to 12 hours with departmental consent.

**Credit Hours:** 3

**ENGLSH 8410: Seminar in African Diaspora Theory and Literature Criticism**
Topics (e.g., Black Women Writers) announced at time of registration. May be repeated to 12 hours with departmental consent.

**Credit Hours:** 3

**ENGLSH 8410: Seminar in African Diaspora Theory and Literature Criticism**
Topics (e.g., Autobiography, Black Women Writers) announced at time of registration. May be repeated to 12 hours with departmental consent.

**Credit Hours:** 3

**ENGLSH 8510: Advanced Writing of Fiction**
Advanced fiction writing designed primarily for graduate students, with the intention of producing work of professional quality. May repeat to twelve hours with consent of instructor.

**Credit Hours:** 3

**ENGLSH 8520: Advanced Writing of Nonfiction Prose**
Advanced workshop in nonfiction prose primarily for graduate students intending to produce professional quality work.

**Credit Hours:** 3

**Prerequisites:** instructor’s consent
ENGLSH 8530: Advanced Writing of Poetry
Advanced poetry writing designed primarily for graduate students with the intention of producing work of professional quality. May repeat to twelve hours with consent of instructor.

Credit Hours: 3
Prerequisites: instructor's consent and ENGLSH 4530

ENGLSH 8560: Graduate Seminar in Playwriting
(same as THEATR 8920). Seminar in theory, practice, and pedagogy of playwriting, students a mid-term in playwriting theory, a full-length play, a research paper, and a syllabus and lesson plans for an undergraduate playwriting course.

Credit Hours: 3

ENGLSH 8600: Seminar in the English Language
(same as LINGST 8600). Descriptive and historical studies of the English language. Topics (e.g., The Germanic Origins, Modern Syntactic Analysis) announced at time of registration. May repeat to twelve hours with department's approval.

Credit Hours: 3

ENGLSH 8700: Seminar in Folklore
(same as ANTHRO 8157 and REL_ST 8700). Focus on the roots of folklore scholarship and methodology and their evolution in modern approaches to the study of oral, traditional verbal genres and their performance in natural folk groups. May repeat to twelve hours with department's consent.

Credit Hours: 3

ENGLSH 9090: Doctoral Dissertation Research
Leads to preparation of dissertation. Graded on S/U basis only.

Credit Hour: 1-12

Environmental Science (ENV_SC)

ENV_SC 1001: Topics in Environmental Science - General
Organized study of selected topics in environmental science.

Credit Hour: 1-99

ENV_SC 1100: Introduction to Environmental Science
This class provides an opportunity to develop an understanding of environment, physical and social causes of environmental problems, their impacts, and strategies to manage these issues.

Credit Hours: 3
Prerequisites: Enrollment restricted to College of Agriculture, Food and Natural Resources undergraduates and students minoring in Environmental Science. Other students must request instructor permission

ENV_SC 2001: Topics in Environmental Science - General
Organized study of selected topics in environmental science.

Credit Hour: 1-99

ENV_SC 2002: Topics in Environmental Science- Biological/Physical/Mathematical
Organized study of selected topics. Subjects and credit may vary from semester to semester.

Credit Hour: 1-99

ENV_SC 3001: Topics in Environmental Science - General
Organized study of selected topics in environmental science.

Credit Hour: 1-99

ENV_SC 3085: Problems in Environmental Science
Special individualized projects or readings in environmental science.

Credit Hour: 1-99

ENV_SC 3250: Pollutant Fate and Transport
(same as CV_ENG 3250). Introduction to concepts governing pollutant fate and transport in the environment, including pollutant interactions within and migration through environmental systems, as well as analytical techniques and tools necessary to quantify conditions and movement.

Credit Hours: 3
Prerequisites: ENV_SC 1100 or SOIL 2100 or CV_ENG 3200; and CHEM 1320; or instructor's permission

English Language Support Program (ELSP)

ELSP _0100: Grammar and Composition I
Grammar and Composition I. Graded S/U only.

Credit Hours: 3

ELSP _0200: Reading and Vocabulary
Reading and Vocabulary. Graded on S/U basis only.

Credit Hours: 3
ENV_SC 3290: Soils and the Environment
(same as SOIL 3290). Addresses the role of soils and soil properties on environmental pollution and management. Emphasis will be placed on carbon, nitrogen, phosphorus, and sulfur transformations and transport in natural and disturbed ecosystems and soil management practices and technology to prevent or remediate environmental pollution.

Credit Hours: 3
Prerequisites: SOIL 2100, 3 hrs of chemistry, ENGLISH 1000 or instructor’s consent

ENV_SC 3330: Environmental Land Use Management
An introduction to environmentally sustainable use and management of land.

Credit Hours: 3

ENV_SC 3500: Pollutant Fate and Transport
This course introduces students to concepts governing pollutant fate and transport in the environment, and it provides students with the quantitative tools necessary to estimate the fate and transport of pollutants in the environment.

Credit Hours: 3
Prerequisites: ENV_SC 1100 or SOIL 2100, and CHEM 1310 and CHEM 1320

ENV_SC 4001: Topics in Environmental Science - General
Organized study of selected topics in environmental science.

Credit Hour: 1-99

ENV_SC 4085: Problems in Environmental Science
Special individualized research projects or readings in environmental science.

Credit Hour: 1-99

ENV_SC 4305: Environmental Soil Physics
(same as SOIL 4305). Study of soil physical properties and processes important in solving environmental problems. Topics include soil solids, water content and energy, and transport of water, solutes, gas and heat.

Credit Hours: 3
Prerequisites: SOIL 2100, PHYSCS 1210 or equivalent

ENV_SC 4306: Environmental Soil Physics Laboratory
(same as SOIL 4306). Introduction to the methodology and equipment for measurement of soil physical properties and processes.

Credit Hours: 2
Prerequisites: concurrent or previous enrollment in ENV_SC 4305

ENV_SC 4312: Environmental Soil Microbiology
(same as SOIL 4312). Microbiology/ecology of life in the soil ecosystem. Emphasis is placed on the role of microbes in nutrient cycling, microbial pesticide/xenobiotic transformation bioremediation, etc.

Credit Hours: 3
Prerequisites: general microbiology, SOIL 2100, or instructor’s consent

ENV_SC 4318: Environmental Soil Chemistry
(same as SOIL 4318 and GEOL 4318). Study of chemical constituents and processes occurring in soils. Topics include soil minerals and weathering processes, organic matter, solution chemistry, oxidation-reduction reactions and adsorption processes.

Credit Hours: 3
Prerequisites: SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330; junior standing or instructor’s consent

ENV_SC 4320: Hydrologic and Water Quality Modeling
(same as NAT_R 4320). Introduction to models for simulating hydrologic and water quality processes. Emphasis is placed on watersheds to provide experience with the use of simulation models for natural resource decision making.

Credit Hours: 3
Prerequisites: ENV_SC 1100 or SOIL 2100 or equivalent

ENV_SC 4396: Agroforestry for Watershed Restoration
Agroforestry for watershed restoration will focus on integrated approaches for improved water quality, soil health, and economic benefits. Students will learn principles and practices, critical analysis and application of agroforestry practices to improve overall environmental quality. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: FOREST 4385 or FOREST 7385 or permission of instructor

ENV_SC 4940: Environmental Science Internship
Supervised professional experience with an approved public or private organization. Graded on S/U basis only.

Credit Hour: 1-99

ENV_SC 4950: Undergraduate Research in Environmental Science
Research apprenticeship with a faculty mentor. Students are expected to develop initial concept for the research, design experiments, collect data, and analyze data with faculty input, oversight, and guidance.

Credit Hour: 1-4
Prerequisites: ENV_SC 1100, STAT 2530 and 9 hours of Environmental Science with at least 3 hours above the 3000-level and instructor’s consent

ENV_SC 7001: Topics in Environmental Science
Organized study of selected topics in environmental science. Intended for graduate students.

Credit Hour: 1-99

ENV_SC 7085: Problems in Environmental Science
Special individualized non-thesis research projects or readings in environmental science.

Credit Hour: 1-99
ENV_SC 7305: Environmental Soil Physics
(same as SOIL 7305). Study of soil physical properties and processes important in solving environmental problems. Topics include soil solids, water content and energy, and transport of water, solutes, gas and heat.

Credit Hours: 3
Prerequisites: SOIL 2100, PHYSCS 1210 or equivalent

ENV_SC 7306: Environmental Soil Physics Laboratory
(same as SOIL 7306). Introduction to the methodology and equipment for measurement of soil physical properties and properties and processes. Prerequisites or Co-requisites: SOIL 4305.

Credit Hours: 2

ENV_SC 7312: Environmental Soil Microbiology
(same as SOIL 7312). Microbiology/ecology of life in the soil ecosystem. Emphasis is placed on the role of microbes in nutrient cycling, microbial pesticide/xenobiotic degradation and bioremediation, soil quality and pathogen regulation in the environment. Nitrogen fixation, mycorrhizal processes are discussed.

Credit Hours: 3

ENV_SC 7318: Environmental Soil Chemistry
(same as SOIL 7318 and GEOL 7318). Study of chemical constituents and processes occurring in soils. Topics include soil minerals, and weathering processes, organic matter, solution chemistry, oxidation-reduction reactions and adsorption processes.

Credit Hours: 3
Prerequisites: SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330

ENV_SC 7320: Hydrologic and Water Quality Modeling
(same as NAT_R 7320). Introduction to models for simulating hydrologic and water quality processes. Emphasis is placed on watersheds to provide experience with the use of simulation models for natural resource decision making.

Credit Hours: 3
Prerequisites: ENV_SC 1100 or SOIL 2100 or equivalent

ENV_SC 7396: Agroforestry for Watershed Restoration
Agroforestry for watershed restoration will focus on integrated approaches for improved water quality, soil health, and economic benefits. Students will learn principles and practices, critical analysis and application of agroforestry practices to improve overall environmental quality. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: FOREST 4385 or FOREST 7385 or permission of instructor

ENV_SC 8085: Problems in Environmental Science
Special individualized non-thesis research projects or readings in environmental science.

Credit Hour: 1-99

ENV_SC 8090: Masters Research in Environmental Science
Original investigations in environmental science for presentation in a thesis. Graded on S/U basis only.

Credit Hour: 1-10

ENV_SC 8400: Solute Transport in the Vadose Zone
(same as SOIL 8400). Transport of water and solutes in geomedia with emphasis on development of the equations of flow. Evaluation of analytical and numerical solutions to equations describing transport phenomena.

Credit Hours: 3
Prerequisites: ENV_SC 7305 or SOIL 7305

ENV_SC 8500: Chemistry of the Vadose Zone
(same as SOIL 8500). Chemical reactions occurring in geomedia with emphasis on understanding molecular scale processes occurring at the solid-water interface, aqueous geochemistry, and soil organic matter.

Credit Hours: 3
Prerequisites: SOIL 7318 or GEOL 7300 or instructor’s consent

ENV_SC 9001: Topics in Environmental Science
Organized study of selected topics in environmental science. Intended for graduate students.

Credit Hour: 1-99

ENV_SC 9085: Problems in Environmental Science
Special individualized non-thesis research projects or readings in environmental science.

Credit Hour: 1-99

ENV_SC 9090: Doctoral Research in Environmental Science
Original investigations in environmental science for presentation in a dissertation. Graded on S/U basis only.

Credit Hour: 1-10

ENV_SC 9407: Advanced Environmental Soil Physics
(same as SOIL 9407). Transport of mass and energy through soil with emphasis on development of the equations of flow. Evaluation of analytical and numerical solutions to differential equations describing transport phenomena.

Credit Hours: 3
Prerequisites: SOIL 7305, MATH 4100 or MATH 7100, or equivalent
### Environmental Studies (ENV_ST)

**ENV_SC 9418: Advanced Environmental Soil Chemistry**  
(same as SOIL 9418). Linking molecular-scale solution-phase and surface reactions with macroscopic chemical processes. Fundamentals of aqueous surface and colloid chemistry will be discussed.  
**Credit Hours:** 3  
**Prerequisites:** SOIL 7318 or GEOL 7300, and CHEM 3300

**ENV_ST 2070: Introduction to Ecological Economics**  
(same as AG_EC 2070). Examines current environmental and natural resource issues using a systems perspective and key economic concepts. Explores connections between the environment and the economy based on problems at the local, national, and international levels.  
**Credit Hours:** 3  
**Prerequisites:** ENGLISH 1000 and sophomore standing

**ENV_ST 2101: Topics in Environmental Sciences**  
Selected topics not in regularly offered courses.  
**Credit Hour:** 1-3

**ENV_ST 2110: Environmental Sustainability**  
Students will assess availability of key resources, estimate sustainable rates of use and develop plans for aligning current and sustainable rates of use using personal, business and government strategies. Graded A-F only.  
**Credit Hours:** 3  
**Prerequisites:** ENGLISH 1000 and one introductory environmental course

**ENV_ST 2150: Directed Independent Study**  
Working with Environmental Studies you will find and develop a research project or an internship with the university, a government agency, a business or a non-profit agency. The project will be directed towards solving an environmental problem.  
**Credit Hour:** 1-3  
**Prerequisites:** instructor’s consent

**ENV_ST 3000: Natural History of Missouri**  
This class deals with the characteristics of natural ecological communities of Missouri and with the skills needed to observe, record and interpret those characteristics. Graded on A-F basis only. Prerequisites: MATH 1100 and ENGLISH 1000  
**Credit Hours:** 2

**ENV_ST 4310: Topics in Environmental Studies**  
This course covers topics not covered in regularly offered courses. Students are expected to combine skills, knowledge and perspectives from the natural and social science to analyze selected environmental problems.  
**Credit Hour:** 1-3

**ENV_ST 4350: Modeling Environmental Problems**  
This course covers modeling environmental problems as systems. Modeling incorporates rates of change, feedback loops, short/long term signals, inertia, upstream causes, interventions, implementing interventions and unintended consequences. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** 9 hours natural science courses and junior standing

**ENV_ST 7350: Modeling Environmental Problems**  
Course covers modeling environmental problems as systems. Modeling incorporates rates of change, feedback loops, short/long term signals, inertia, upstream causes, interventions, implementing interventions, unintended consequences and predicting outcomes of major shocks (oil prices, pandemics, climate change). Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** 9 hours natural science

### Family And Community Medicine (F_C_MD)

**F_C_MD 6001: Family Medicine Clerkship**  
Family Medicine Clerkship  
**Credit Hours:** 6

**F_C_MD 6011: Rural Family Medicine Clerkship**  
Rural Family Medicine Clerkship  
**Credit Hours:** 6

**F_C_MD 6101: Remediation 6001 Family Medicine Clerkship**  
Family Medicine Clerkship remediation.  
**Credit Hours:** 6  
**Prerequisites:** F_C_MD 6001 Family Medicine Clerkship, received unsatisfactory grade

**F_C_MD 6251: ABS Evidence Based Medicine**  
ABS Evidence Based Medicine  
**Credit Hours:** 5

**F_C_MD 6253: ABS Family and Community Medicine Research**  
ABS Family and Community Medicine Research  
**Credit Hour:** 5-10

**F_C_MD 6255: ABS Family and Community Medicine Research and Review**  
ABS Family and Community Medicine Research and Review  
**Credit Hours:** 5

**F_C_MD 6475: Family Medicine Elective**  
Family Medicine Elective  
**Credit Hours:** 5
F_C_MD 6477: Family Medicine Elective Preceptorship
May be available as a rural offsite elective: contact the MU-AHEC Coordinator. Goals/Objectives: During this elective the student works closely with a family physician in private practice. Students both observe the preceptor’s patient encounters and take primary responsibility for several patients each day, discussing diagnosis and formulating management plans with supervision by the preceptor. The Preceptorship also provides opportunities not available elsewhere in the medical school curriculum, including seeing the patient’s illness in its context, assessing a community’s health care system, and learning about practice management. Evaluations: Evaluation of the student is based on the preceptor’s evaluation and comments. Notes: Site must be pre-approved by the Course Director.
Credit Hours: 5
Prerequisites: Students should have completed at least two clinical blocks, plus the Family Practice Clerkship

F_C_MD 6479: Family and Community Medicine Research
Family and Community Medicine Research
Credit Hours: 5

F_C_MD 6481: Clinical Nutrition
Clinical Nutrition
Credit Hours: 5

F_C_MD 6483: Preventive/Community Medicine
Preventive/Community Medicine
Credit Hours: 5

F_C_MD 6485: Geriatrics-Family and Community Medicine Elective
Goals/Objectives: This is an outpatient experience in a variety of settings. Each week students will: 1. Work with Dr. David Cravens and other health care providers at Lenoir Village, Lenoir Manor, Lenoir Health Care and Maplewood Apartments. These all represent different levels and types of care available to elders. a. Students will develop an understanding of the available care and residential options that elders utilize. 2. Work with several geriatricians in the SAGE Clinic and/or Geriatrics Clinic at Green Meadows. a. Students will improve their understanding of care of elders in the outpatient setting. b. Students will also see patients undergoing geriatric assessment and thus develop a better understanding of the multidisciplinary approach to geriatric assessment. 3. Additional experiences may be arranged depending on the student’s interests. 4. Participate in the various conferences related to geriatrics. Evaluations: Final evaluation will be determined by the attending physicians supervising the student during the block.
Credit Hours: 5
Prerequisites: Must have completed all core clerkships

F_C_MD 6486: Evidence Based Medical Writing in Family Medicine
Student will co-author a draft of an evidence-based article under the supervision of FCM faculty with evidence-based writing experience. Before writing begins, students complete an evidence-based medicine curriculum using online modules. FCM integrated residents will also participate in a departmental editorial review session.

F_C_MD 6487: Family and Community Medicine Palliative Care Elective
This is an inpatient and outpatient experience in a variety of settings that represent different levels and types of care available to people with terminal condition.
Credit Hours: 5
Prerequisites: F_C_MD 6001; restricted to 4th year medical students

F_C_MD 6775: Family Medicine Preceptorship - Rural
Family Medicine Preceptorship - Rural
Credit Hours: 5

F_C_MD 6776: RURAL FAMILY MED ELECT
Rural Family Medicine Elective
Credit Hours: 5

F_C_MD 6777: Rural Health Policy and Legislative Advocacy
Elective content will focus on the intersection of rural medicine, health policy, and legislative advocacy. Course Goals: 1) To inform and educate students about rural health policy issues at the local, state, and national levels. 2) To train medical students to be informed advocates of rural health policy issues at the local, state, and national levels. To apply, medical students must complete the Rural Track Elective Application posted on the MU AHEC website http://medicine.missouri.edu/ahec/rural-track-elective.html. In the notes section of the application, the student must document a rationale for applying for this course. (Maximum length - 1 paragraph).
Credit Hours: 5
Prerequisites: M4 status. Applicants must complete either the Rural Track Summer Community Program or the Rural Track Clerkship Program prior to enrollment. Students will share first-hand experiences from rural track placement(s) with legislators to advocate for the MU Rural Track Pipeline Program and to influence rural health policy in Missouri

F_C_MD 6875: Family Medicine Onsite Externship
Goals/Objectives: The student who is on the onsite track of the externship will be a member of the Family Practice Inpatient Team that is responsible for providing care to Family Practice patients in the hospital. The team consists of an attending, physician, two third-year residents, and two or three first-year residents. The student will be expected to function as a member of the team, attending rounds on a daily basis and assuming responsibility, under supervision, for the care of some of the patients. Each student will have 4-5 nights of call including weekend days. Students will be responsible for providing care, with supervision, to those patients admitted while they are on call. Students will also be expected to follow their patients after discharge, making home visits or nursing home visits and seeing them in follow-up at the clinic as indicated. Students will also have exposure to ambulatory family medicine. Each student will work closely in the clinic with one of the third-year residents assigned to the inpatient team. The student will attend each of the resident’s clinics whether they are at Green Meadows, Fulton, or Fayette.
Credit Hours: 5
Prerequisites: Students should have completed at least two clinical blocks, plus the Family Practice Clerkship

F_C_MD 6876: Family Medicine Offsite Externship
Several different types of experiences are available for the offsite track of the externship. Students have the opportunity to work at selected Indian Health Service sites that provide the appropriate mix of inpatient and outpatient experiences. A list of these IHS sites and the students’ evaluations are available in the course office. These offer high volume and high levels of responsibility. Planning needs to begin early in the third year. Offsite externship experiences are also available in certain community-based family practices and in certain family practice residency programs. A list of pre-approved sites is available in the course office. All of the sites available for the offsite experience have been carefully selected by the faculty based on previous experiences of fourth-year students. These sites offer an appropriate level of patient care responsibility with supervision. Offsite practices need to be approved in advance by the course director and often require planning 6 to 12 months in advance. Students considering offsite rotations will be expected to have a clear idea of how these experiences will offer unique advantages to their personal and professional development. These sites offer an appropriate level of patient care responsibility with supervision. Offsite externship experiences are also available in certain community-based family practices and in certain family practice residency programs. A list of pre-approved sites is available in the course office. All of the sites available for the offsite experience have been carefully selected by the faculty based on previous experiences of fourth-year students. These sites offer an appropriate level of patient care responsibility with supervision. Offsite practices need to be approved in advance by the course director and often require planning 6 to 12 months in advance. Credit Hours: 5

F_C_MD 6877: Rural Family Medicine Elective
Rural Family Medicine Elective
Credit Hours: 5

F_C_MD 6878: Family Medicine Maternity Care-Advanced Selective
Family Medicine Maternity Care-Advanced Selective
Credit Hours: 5

F_C_MD 7001: Topics in Family and Community Medicine
Selected topics of interest related to family and community medicine.
Credit Hours: 3
Prerequisites: Understanding of research methods, statistics (basic) and graduate, post graduate or instructor consent

F_C_MD 7300: Problems Community Health Medicine Practice
Directed exploration of community health problems.
Credit Hour: 1-3
Prerequisites: instructor’s consent

F_C_MD 7310: The Health Care System
Overview of health care system and relationship between its components. Focuses on changing nature of the system and issues confronting the future health care system.
Credit Hours: 3

Prerequisites: instructor’s consent

F_C_MD 7350: Special Readings in Community Health
Extensive reading and critical analysis of classical and current studies in selected areas of community health.
Credit Hour: 1-3
Prerequisites: instructor’s consent

F_C_MD 7400: Problems in Community Health
Intensive study of an area of community health.
Credit Hour: 1-3
Prerequisites: instructor’s consent

F_C_MD 7490: Research in Community Health
Independent investigation of some problem in community health to be presented as a thesis. Graded on a S/U basis only.
Credit Hour: 1-99

F_C_MD 7492: Field Experience in Community Health Education
Field practice in a selected community setting under faculty or other competent supervision.
Credit Hour: 1-99
Prerequisites: Restricted to students specializing in community health education; consent of community health education faculty

F_C_MD 7750: Physical Function and Older Adults
(same as ARCHST 7640, HMI 7750, H_D_FS 7750, NURSE 7750, P_HLTH 7750, and SOC_WK 7752). This course takes an interdisciplinary approach to understanding and improving the physical function and independence of older adults and explores approaches to alleviate disabling conditions that interfere with physical function and quality of life in old age. Graded on A-F basis only.
Credit Hours: 3

F_C_MD 7751: Psychosocial Function and Older Adults
(same as ARCHST 7650, HMI 7751, H_D_FS 7751, NURSE 7751, P_HLTH 7751, and SOC_WK 7752). This course takes an interdisciplinary approach to understanding the psychosocial function of older adults and explores approaches to alleviate disabling conditions that interfere with psychosocial function and quality of life in old age. Graded on A/F basis only.
Credit Hours: 3

F_C_MD 7770: Physical Function and Older Adults
Classification and summarization of data used in public health practice and research. Probability, sampling, hypothesis testing. Correct and incorrect use of statistics in the literature.
Credit Hours: 3

F_C_MD 8330: Statistical Aspects of Public Health
Classification and summarization of data used in public health practice and research. Probability, sampling, hypothesis testing. Correct and incorrect use of statistics in the literature.
Credit Hours: 3
Prerequisites: instructor’s consent
F_C_MD 8410: Principles and Practices in Medical Education
An examination of the past and present influences on the education of physicians, the application of adult education principles and the future approaches to medical education.
Credit Hours: 3
Prerequisites: instructor’s consent

F_C_MD 8411: Learning Strategies in Preclinical & Clinical Educ. of Physicians
Examination of curricular strategies in preclinical and clinical education of medical students and graduate medical education. Emphasis will be placed on different types of instructional strategies.
Credit Hours: 3
Prerequisites: instructor’s consent

F_C_MD 8420: Principles of Epidemiology
Examines methods of study of disease frequency and distribution in populations. Utilizes small group discussions for understanding of current medical literature.
Credit Hours: 3
Prerequisites: instructor’s consent

F_C_MD 8421: Clinical Epidemiology/Evidence Based Medicine
(same as V_PBIO 8421). Advanced epidemiologic theory and methods in the study and control of infectious and noninfectious diseases.
Credit Hours: 3
Prerequisites: instructor’s consent

F_C_MD 8422: Clinical Research Methods I
Principles of designing, implementing and reviewing research in the health sciences.
Credit Hours: 3

F_C_MD 8423: Clinical Research Methods II
This is a continuation of the Clinical Research Methods I (CRM_I) introductory course on the multi-method approach to clinical research. Similar to the previous course, it covers both quantitative and qualitative research methods, but includes advanced applications.
Credit Hours: 3

F_C_MD 8430: Applications of Evidence-Based Medicine I
Students will participate in editing, presentation and publication of evidence-based reviews of current medical literature.
Credit Hours: 3
Prerequisites: instructor’s consent

F_C_MD 8431: Applications of Evidence-Based Medicine II
Students will participate in editing, presentation and publication of evidence-based reviews of current medical literature.
Credit Hours: 3
Prerequisites: instructor’s consent

F_C_MD 8450: Research in Community Health
Original research in community health not leading to a thesis but requiring a formal research report.
Credit Hour: 1-99

F_C_MD 8491: Field Experience in Family and Community Medicine
Supervised teaching experience in the preclinical, clinical, and residency programs.
Credit Hour: 1-6
Prerequisites: instructor’s consent

Film Studies (FILM_S)

FILM_S 1000: Introduction to Film for Non-Majors
Introduction to terms and concepts for film analysis, including mise-en-scene, cinematography, editing, sound narrative, genre, and other elements. No credit for students who have completed FILM_S 1800. No credit for film majors or minors. Graded on A-F basis only.
Credit Hours: 3

FILM_S 1800: Introduction to Film Studies
(same as ENGLSH 1800). Introduction to terms and concepts for film analysis, including mise-en-scene, cinematography, editing, sound narrative, genre, and other elements. No credit for students who have completed FILM_S 2810. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Freshmen and Sophomores only or instructor’s consent

FILM_S 2001: Topics in Film Studies-General
Organized study of selected topics. Subject may vary from semester to semester. May be repeated with consent of instructor.
Credit Hour: 1-3

FILM_S 2005: Topics in Film Studies- Humanities
Organized study of selected topics. Subject may vary from semester to semester. May be repeated with consent of instructor.
Credit Hour: 1-3

FILM_S 2010: The Philosophy of Film
(same as PHIL 2010). Philosophical problems having to do with film. Topic may include the nature of films, the differences between fiction and documentary film, ethical issues with film and filmmaking.
Credit Hours: 3

FILM_S 2020: World Cinema for Non-Majors
World Cinema introduces students to the history of international cinema. The course focuses on particular cinematic movements and national cinemas as case studies for trends and trajectories that also characterize the national and non-Hollywood cinemas not covered in the course. Examines the relationship of form and genre to individual national, or localized, cultural contexts. No credit for students who have completed FILM_S 2820. No credit for film majors or minors. Graded on A-F basis only.
FILM_S 2160: Film Adaptation of Shakespeare - Non Majors
This course serves as an introduction to the problems and complexities that arise when adapting William Shakespeare's plays to contemporary film. One basic task of the course is to develop students' ideas about adaptation, especially with reference to contemporary adaptation theory. This course hopes both to explain and discredit the value of "fidelity discourse," students should be liberated from the notion of "faithfulness" to the texts. No credit for film majors or minors. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: FILM_S 1800 or ENGLSH 1800; sophomore standing or higher

FILM_S 2540: Introduction to Film Management
Film Production Management is a hands-on exploration of the roles of feature film executive producers, producers and unit production managers. Creating balanced budgets, hiring personnel, creating meaningful business relationships, and managing post-production responsibilities are investigated. The feature film budget will be examined in each phase of the production; creating a sales pitch for a film, and developing a detailed approach to distribution is explored. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: FILM_S 1800 or ENGLISH 1800; sophomore standing or higher

FILM_S 2820: Trends in World Cinema
(same as GERMAN 2820 and RM_LAN 2820). This course is a historical overview of the major trends in international cinema. It focuses on the intersection of aesthetics, industry, and ideological and social concerns in cinematic production.
Credit Hours: 3
Prerequisites: Sophomore standing, ENGLISH 1800 or FILM_S 1800 or instructor's consent

FILM_S 2830: American Film History I, 1895-1950
(same as ENGLISH 2830). Examines the development of American cinema in relation to other national cinemas, from 1895-1950. No credit for students who have completed ENGLISH or FILM_S 1810.
Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800

FILM_S 2840: American Film History II, 1950-Present
(same as ENGLISH 2840). Examines American film history in an international context, from 1950-present. No credit for students who have completed ENGLISH or FILM_S 1820.
Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or Film FILM_S 1800

FILM_S 2850: Italian Cinema
(same as ITAL 2850). A course which concentrates on the development of Italian Cinema, primarily since the Post-WWII era, and the ways in which it reflects major economic, social and political events occurring in Italy. No knowledge of Italian required.
Credit Hours: 3
Prerequisites: Sophomore standing

FILM_S 2860: Film Themes and Genres
(same as ENGLISH 2860). Topics (e.g. Film noir, African-American filmmakers, Food and Film, The Western) announced at time of registration. No more than six hours may be taken in Film Themes and Genres 2680.
Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800

FILM_S 2865: The Art of Soviet and Russian Cinema
(Same as RUSS 2865) Topics (e.g. Distorted Picture: Post-War Cinema in a Soviet State, Cinema in the Soviet Times and Beyond, etc.) announced at time of registration. Only 6 hours may be taken toward major.
Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800

FILM_S 2870: Film and Literature
(same as ENGLISH 2870). Explores the complex interplay between film and literature in order to gain an understanding of the possibilities - and problems - involved in the transposition from literature to film. Graded A-F basis only.
Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800

FILM_S 3001: Topics in Film- General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-3
Prerequisites: Sophomore standing or instructor’s consent

FILM_S 3005: Topics in Film Studies - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-3
Prerequisites: Sophomore standing or instructor’s consent

FILM_S 3005H: Topics in Film Studies - Humanities - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Honors eligibility required
Credit Hour: 1-3
Prerequisites: Sophomore standing or instructor’s consent

FILM_S 3490: Indian Cinema
(same as S_A_ST 3490, AR_H_A 3790 and ANTHRO 3490). Indian Cinema provides an overview of the key genres and themes of Indian film, including Bollywood, art cinema/parallel cinema, Indian regional cinemas, and diasporan cinema. The course combines film studies, anthropological, historical, and visual culture analyses to provide a holistic view of Indian culture and society through cinema.
Credit Hours: 3
Prerequisites: Sophomore standing or higher
### FILM_S 3530: Crafting Character and Story for Screen
Analyze various script formats and apply different writing techniques and styles to create screenplays and teleplays. Work inside a creative critique environment to craft vivid storytelling and character elements while developing viable loglines and pitches for their stories. Screenwriting concepts include the three-act structure and the timing and placement of plot points. Graded on A-F basis only. May be restricted to Film Studies majors and minors during early registration

**Credit Hours:** 3  
**Prerequisites:** FILM_S 1800 or ENGLISH 1800; sophomore standing or higher

### FILM_S 3540: Principles of Cinematography
An exploration of the principles and techniques of cinematography that includes shot composition lighting styles, and storytelling, using the moving image. Students will examine historical and contemporary approaches to cinematography used in Hollywood, foreign and independent films. Analyzing cinematographic approaches of a wide range of work will help the students discriminate the quality of their own creative work. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** FILM_S 1800 or ENGLISH 1800; Sophomore standing or higher. May be restricted to Film Studies majors and minors during early registration

### FILM_S 3550: Introduction to Field Production
Provides a comprehensive overview of pre-production and production involved in the development of a film. Students will receive hands-on experience in lighting design, camera operation, grip and electrical, producing, directing, sound capture and design, and fundraising. Students will ultimately be responsible for the production of a commercially viable, competition grade short film at the end of the semester. Some outside class commitments are required.

**Credit Hours:** 3  
**Prerequisites:** FILM_S 1800 or ENGLISH 1800 and FILM_S 3540

### FILM_S 3775: The Ancient World on Film
(Same as CL_HUM 3775 and AR_H_A 3775) This course explores how classical antiquity has been represented in twentieth and twenty-first-century film, with particular emphasis on the ways in which ancient narratives and iconography have been appropriated by filmmakers to address contemporary cultural issues.

**Credit Hours:** 3  
**Prerequisites:** Prior 2000 level coursework in CL_HUM, AR_H_A, or FILM_S. Instructors consent required

### FILM_S 3780: Architecture in Film
(Same as AR_H_A 3780) Filmmakers use architecture to convey meaning on symbolic, psychological, and ideological levels. Using architectural history and theory, in conjunction with weekly film screenings from a variety of genres, this course explores how architecture operates within film.

**Credit Hours:** 3

### FILM_S 3785: Art and Artists on Film
(Same as AR_H_A 3785) This course explores representations of art and artists in film, including documentary films, fictionalized films, and films made by artists.

**Credit Hours:** 3

### FILM_S 3820: Major Directors
(Same as ENGLISH 3820 and RM_LAN 3820). Topics (e.g. Hitchcock, Kubrick, Fellini, Allen, Kurosawa, Wilder) announced at time of registration. Only 6 hours may be taken for credit toward major. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800

### FILM_S 3840: German Film After 1945
(Same as GERMAN 3840). Examines a selection of post-War films by German directors, as well as historical, literary, and theoretical texts.

**Credit Hours:** 3  
**Prerequisites:** Sophomore standing, or instructor's consent

### FILM_S 3845: Modern Israeli Film
(Same as HEBREW 3845). Examines the modern film of developing Israel. Discusses complex social relationships. Introduces concepts of Hebrew language and its use in the arts world-wide. Discusses varied communities in Israel, and universal themes such as democracy and social justice. Provides introduction to Israeli culture.

**Credit Hours:** 3  
**Prerequisites:** Sophomore standing or consent of instructor required

### FILM_S 3850: Studies in Film History
(Same as ENGLISH 3850). Topics (e.g. Classical Period of Hollywood cinema, silent era, Post-WWII American film, German Weimar cinema, French New Wave) announced at time of registration. Only 6 hours count as credit toward major.

**Credit Hours:** 3  
**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800

### FILM_S 3855: Documentary Film
(Same as ENGLISH 3855). Surveys the history of documentary film including the development of subgenres, sound and voice over in documentary, re-enactment, ethical issues in documentary film production, and more. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** ENGLISH 1000
FILM_S 3861: Film Themes and Genres
Topics (e.g. Film noir, African-American filmmakers, Food and Film, The Western) announced at time of registration. No more than six hours may be taken in Film Themes and Genres 3861.

Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800

FILM_S 3865: The Holocaust on Screen
(same as GERMAN 3865). This course explores how the Holocaust has been depicted on film in a variety of national and historical contexts. Drawing on films from 1945 to the present, from the U.S., Germany, Poland, France, and Italy, we will consider to what end images of the Holocaust have been used. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Sophomore standing

FILM_S 3870: Russian Women and Film
(same as RUSS 3870, WGST 3870) Traces image(s) of the Russian woman in 20th-century Russia as constructed in Russian, Soviet and late-Soviet film. Discusses heroines of pre-revolutionary melodrama and "new Soviet man and woman" of the 20s. Considers war-time realignment of gender roles in defense of motherland and their subtle revamping in post-war and post-Stalinist period, and the shifting relations between women and men, women and women, and women and the State. Emphasizes cultural-historical and ideological status of women as reflected in onscreen image(s) in Russian film. Designed to serve as an introduction to film studies and to 20th-century Russian culture more generally. Conducted in English (all films have English subtitles).

Credit Hours: 3
Prerequisites: Sophomore standing or instructor's consent

FILM_S 3875: Brazilian Cinema
(same as PORT 3875). An introduction to Brazilian cinema, culture, and society through the study of contemporary cinematic productions. Topics include: Hollywood perceptions of Brazil; redefinition of national identity and history, representations of race and gender.

Credit Hours: 3
Prerequisites: ENGLISH 1000

FILM_S 3880: Contemporary Chinese Film
(same as CHINSE 3880). Introduces development of 20th century Chinese film and popular genres, including review of earlier times. Explores how present day Chinese understand their own history, and issues they face in drive toward modernization in a global context. Films and readings in English or with English subtitles. No previous knowledge of the culture or language required.

Credit Hours: 3
Prerequisites: Sophomore standing or instructor’s consent

FILM_S 3890: Russian and Soviet Film
(same as RUSS 3890). Introduces three significant genres of Russian cinema: comedy, literary adaptations, and films that explore issues of identity and autobiography. Includes examples from different epochs. Considers Soviet and post-Soviet films. Russia and Russian culture. Course conducted in English; films have English subtitles.

Credit Hours: 3
Prerequisites: Sophomore standing or instructor's consent

FILM_S 3895: Korean Society Through Cinema
(Same as Korean KOREAN 3890). Examines the way in which Korean film reveals the cultural, political, and ideological orientation of the society in which it is created and circulated. Compares films from North and South Korea, considering modernity, gender, nationhood, and class. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Sophomore Standing

FILM_S 3930: Screenwriting for Television and Film
(same as THEATR 3930). Fundamentals of storytelling utilizing tools and structure used by television and film.

Credit Hours: 3
Prerequisites: ENGLISH 1000

FILM_S 4001: Topics in Film-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-3
Prerequisites: Sophomore standing or instructor’s consent

FILM_S 4005: Topics in Film Studies - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-3
Prerequisites: sophomore standing or instructor’s consent

FILM_S 4130: Advanced Character Voice and Dialogue
Builds upon principles of story arc and screenwriting techniques, while providing an in-depth study of character psyche and unique voice. Students will master the skills necessary to create vibrant, memorable characters through the exploration and development of unique character traits, physical imagery development and distinctive voice. Students will analyze dialog traits of scripts and films of industry professionals, and will craft their own characters using industry standard technology, adhering to the principles of industry standard formatting. Graded on A-F basis only. Prerequisites: One of the following must have been taken: FILM_S 3530, THEATR 3930, FILM_S 3930, ENGLISH 2510, ENGLISH 2520 or ENGLISH 2530.

Credit Hours: 3

FILM_S 4370: Film Studies: The Intersection of Documentary Film and Journalism
(same as JOURN 4370; cross-leveled with FILM_S 7370 and JOURN 7370). The popularity of documentary film in the past ten years has skyrocketed, and recent award-winning documentaries such as Inside Job (2010), Blackfish (2013), and The Invisible War (2012) are simultaneously entertaining audiences and investigating serious issues like the financial collapse, killer whale captivity, and sex crimes in the military--issues that in the past might have been covered exclusively by investigative journalism. What explains the public’s growing fascination with documentary? How is documentary film reacting to recent transformations in the media landscape? Is it filling a critical need that journalism is no longer willing or able to meet? This course will explore
the intersection of these two nonfiction storytelling forms--documentary film and journalism--and examine the role played by advocacy in both modes, as well as the cultural and ethical implications of the convergence between journalism and documentary film. In that it is centered on contemporary documentary film culture, the course also takes advantage of the True/False Film Festival, and will be host to a conference during Week 6, featuring a number of major visiting filmmakers and film critics. Attendance at some sessions is required. Graded on A-F basis only.

Credit Hours: 3

FILM_S 4550: Introduction to Post Production
Introduction to the Post Production explores traditional and current audio and video post-production concepts, techniques and technology. Using non-linear editing and audio post-production software students develop techniques in video and audio editing, and investigate the post production concepts of color correction, audio mixing, and motion graphics. Using media encoding software, students examine exporting and compressing footage to a wide range of digital delivery formats. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: FILM_S 1800 or ENGLSH 1800; sophomore standing or higher

FILM_S 4580: Production Practicum
Provides an intensive, comprehensive experience in film production. Students will receiver hands-on experience in lightning and set design, camera operation, grip/electrical and sound capture. The course pits students against a rigorous industry standard shooting schedule - long hours are to be expected each day. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: FILM_S 3540

FILM_S 4810: Film Theory
(same as ENGLSH 4810). This course explores contemporary trends in film theory. Topics may include: psychoanalysis, feminism, Marxism, cultural studies, queer theory, audience and star studies, postcolonialism, among others.

Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800. Junior standing or above required

FILM_S 4820: Studies in Film Genre
(Same as ENGLSH 4820) Topics (e.g. The Western, film noir) announced at time of registration. No more than six hours may be taken toward the major.

Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800; Junior Standing or instructor’s consent

FILM_S 4840: Culture and Media
(Same as ENGLSH 4840). Topics (e.g. Cinema and Imperialism, Indigenous Media, Ethnographic Documentary) announced at time of registration. No more than six hours may be taken for credit toward the major.

Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800. Junior standing or instructor’s consent required

FILM_S 4850: Film Themes and Genres
Topics (e.g. Film noir, African-American filmmakers, Food and Film., The Western) announced at time of registration. No more than six hours may be taken in Film Themes and Genres 4860.

Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800

FILM_S 4880: Capstone Experience
This course is for Film Studies students who have completed their concentration requirements. The main objective is to help students independently create and complete a capstone project. The project should allow you to conceptualize and enter professional life after commencement.

Credit Hours: 3
Prerequisites: Film Studies majors only. Consent of instructor required

FILM_S 4935: Adaptation of Literature for Film
(same as ENGLSH 4935 and THEATR 4935, cross-leveled with FILM_S 7935, ENGLSH 7580 and THEATR 7935). This upper-division course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for film.

Credit Hours: 3

FILM_S 4940: Internship
This course is for Film Studies students who have the opportunity to work in an internship position in a related industry or at a government agency where they can gain valuable on the job experience and knowledge. The student must register for the Internship course in the semester in which the work takes place. Graded S/U basis only.

Credit Hour: 1-3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800. Must have at least 15 hours of Films Studies credit. Online courses do not count for the 15 hours of Film Credit

FILM_S 4960: Special Readings in Film Studies
Arranged. Individual work with conferences adjusted to needs of student.

Credit Hour: 1-3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800.

FILM_S 4993: Latin American Cinema (in Spanish)
(same as SPAN 4960). Subject varies according to instructor.

Credit Hour: 2-3
Prerequisites: SPAN 3420 and SPAN 3430

FILM_S 4995: Senior Honors Thesis
Independent honors research under direction of faculty. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: Senior standing required, consent of instructor required, Honors eligibility required

**FILM_S 7001: Topics in Film Studies-General**
Topics in Film Studies-General
Credit Hour: 1-3

**FILM_S 7370: The Intersections of Documentary Film and Journalism**
(same as JOURN 7370). (cross-leveled with JOURN 4370 and FILM_S 4370). The popularity of documentary film in the past ten years has skyrocketed, and recent award-winning documentaries such as Inside Job (2010), Blackfish (2013), and The Invisible War (2012) are simultaneously entertaining audiences and investigating serious issues like the financial collapse, killer whale captivity, and sex crimes in the military—isues that in the past might have been covered exclusively by investigative journalism. What explains the public’s growing fascination with documentary? How is documentary film reacting to recent transformations in the media landscape? Is it filling a critical need that journalism is no longer willing or able to meet? This course will explore the intersection of these two nonfiction storytelling forms--documentary film and journalism--and examine the role played by advocacy in both modes, as well as the cultural and ethical implications of the convergence between journalism and documentary film. In that it is centered on contemporary documentary film culture, the course also takes advantage of the True/ False Film Festival, and will be host to a conference during Week 6, featuring a number of major visiting filmmakers and film critics. Attendance at some sessions is required. Graded on A-F basis only.
Credit Hours: 3

**FILM_S 7810: Film Theory**
(same as ENGLISH 7810). This course explores contemporary trends in film theory. Topics may include: psychoanalysis, feminism, Marxism, cultural studies, queer theory, audience and star studies, postcolonialism, among others. Graded on A-F basis only.
Credit Hours: 3

**FILM_S 7840: Culture and Media**
(same as ENGLISH 7840). Topics (e.g. Cinema and Imperialism, Indigenous Media, Ethnographic Documentary) announced at time of registration. No more than six hours may be taken for credit toward the major.
Credit Hours: 3

**FILM_S 7935: Adaptation of Literature for Film**
(same as THEATR 7935 and ENGLISH 7580, cross-leveled with FILM_S 4935, ENGLISH 4935 and THEATR 4935). This upper-division course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for film.
Credit Hours: 3

**FILM_S 7975: Distorted Picture: Post-War Cinema in a Police State**
(Same as RUSS 7975) Considers strategies and stylistic devices employed by East European & Soviet directors to produce artistically worthy films under censorship. Discusses how artists adapted methods, boldness of expression, thematic content, and technical sophistication. Attention paid to production techniques.
Credit Hours: 3

**FILM_S 8005: Topics in Film Studies - Humanities**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.
Credit Hour: 1-3
Prerequisites: instructor’s consent

**Finance (FINANC)**

**FINANC 1000: Principles of Finance**
Financing business, consumer, and government activity; stocks, bonds, real estate, and financial markets; risk; insurance; inflation; cash and income management; capital accumulation and appreciation.
Credit Hours: 3
Prerequisites: Students admitted to COB upper level degree program cannot enroll

**FINANC 2000: Survey of Business Finance**
An overview of the global financial system, financial markets, financial institutions, and principles of financial management.
Credit Hours: 3
Prerequisites: Students admitted to COB upper level degree program cannot enroll

**FINANC 3000: Corporate Finance**
Financial decision-making in a corporate environment. Time value of money, capital budgeting, cost of capital, working capital management and financial instruments issued by the firm.
Credit Hours: 3
Prerequisites: completed 45 semester hours, ACCTCY 2036 and ACCTCY 2037, STAT 2500, in addition to ECONOM 1015 or ECONOM 1014 or ECONOM 1024 and ECONOM 1015

**FINANC 3300: Personal Risk Management and Insurance**
Teaches the importance of risk in personal endeavors and the intelligent handling of such risk. Life, health, auto, homeowner and liability risks are treated.
Credit Hours: 3
Prerequisites: sophomore standing

**FINANC 4010: Financial Management**
Theory and techniques of financial management, study of firm valuation, dividend policy, capital budgeting and capital asset pricing.
Credit Hours: 3
Prerequisites: FINANC 3000

**FINANC 4020: Investments**
Security valuation and analysis, formulation of personal and professional investment programs.
FINANC 4020H: Investments - Honors
Security valuation and analysis, formulation of personal and professional investment programs.
Credit Hours: 3
Prerequisites: FINANC 3000

FINANC 4030: Financial Intermediaries and Markets
Functions of intermediaries in the aggregation and allocation of funds, creation and transfer of assets, and distribution of risks. Regulation of financial institutions; financial institutions as instruments of public policy.
Credit Hours: 3
Prerequisites: FINANC 3000 and ECONOM 3229

FINANC 4110: Financial Management Policy
Application of the concepts and tools of finance to cases in working capital management, capital budgeting analysis and capital structure decisions.
Credit Hours: 3
Prerequisites: senior standing and FINANC 4010

FINANC 4120: Security Analysis
Classifies and analyzes securities, markets, industries. Formulation of investment policy for institutions, aggressive personal investors.
Credit Hours: 3
Prerequisites: FINANC 4020

FINANC 4130: Management of Financial Institutions
Operating principles of major financial intermediaries, including commercial banking, savings, insuring, lending and investing institutions. Analysis of cases; study of current problems. Some sections of the course may be graded on A-F or S/U graded basis only.
Credit Hours: 3
Prerequisites: FINANC 4030

FINANC 4185: Problems in Finance
Independent study, reports on selected topics. Some sections of this course may be offered A-F only or S/U only.
Credit Hour: 1-99

FINANC 4201: Topics in Finance
Selected topics in finance, insurance or real estate. Offered on an experimental basis. Some sections of this course may be offered A-F only or S/U only.
Credit Hours: 3

FINANC 4220: Portfolio Management
Development and application of the principles of modern portfolio theory to financial assets. Analysis of the concepts of diversification, portfolio construction, portfolio revision, and use of types of financial assets in effective portfolio management.
Credit Hours: 3
Prerequisites: FINANC 3000
Corequisites: FINANC 4020

FINANC 4710: Topics in International Finance
Available during study abroad session. Emphasis is on international corporate governance, foreign exchange risk management, international capital markets, balance of payments, international monetary system, and exchange rate determination. Graded on A-F basis only.

Credit Hours: 3

FINANC 4720: International Finance
Application of domestic corporate finance to the international arena. Emphasis on international capital budgeting, working capital management, foreign exchange risk management, international capital markets, balance of payments, international monetary system, and exchange rate determination.

Credit Hours: 3

FINANC 4820: Investment Fund Management
Analysis and management of securities and markets by participation in the management of a student-run portfolio of publicly traded stocks and bonds. May be repeated for credit.

Credit Hours: 3

Prerequisites: FINANC 3000, FINANC 4120 or FINANC 4620, instructor’s consent

FINANC 4840: Angel Capital Education Program
(cross-leveled with FINANC 7840). In depth understanding of investing in start up enterprises, including structuring investment deals, doing due diligence, and monitoring of prior investments. Graded on A-F basis only.

Credit Hours: 1-3

Prerequisites: instructor’s consent

FINANC 4940: Professional Finance Internship
Provides students experience with financial activities in business organizations (or, occasionally, in a governmental or not-for-profit setting). Students are required to prepare and execute a plan of study approved by the instructor and the complete written assignments detailed in the plan.

Credit Hours: 3

Prerequisites: FINANC 3000, College of Business students with a finance concentration or international business students with a finance emphasis, and instructor’s consent

FINANC 7010: Financial Management
Theory and techniques of financial management, study of firm valuation, dividend policy, capital budgeting and capital asset pricing.

Credit Hours: 3

Prerequisites: FINANC 3000

FINANC 7020: Investments
Security valuation and analysis, formulation of personal and professional investment programs.

Credit Hours: 3

Prerequisites: FINANC 3000

FINANC 7201: Special Topics in Finance
Selected topics in Finance, insurance, or real estate. Offered on an experimental basis.

Credit Hour: 1-3

Prerequisites: instructor’s consent

FINANC 7210: Microeconomics for Business
Examination of how the behavior of consumers and the business decisions of firms affect supply, demand, and the resulting prices of goods and services in the market.

Credit Hour: 1-3

FINANC 7220: Economics for Managers
Applies the concepts and tools of economics to management issues and problems.

Credit Hour: 1.5

Prerequisites: FINANC 7210 or equivalent

FINANC 7410: Managerial Finance I
Introduction to financial management including the time value of money capital budgeting techniques, risk measurement, and the valuation of financial securities.

Credit Hour: 1-3

Prerequisites: ACCTCY 7310

FINANC 7420: Managerial Finance II
Continuation of the study of financial management with focus on the risk-return tradeoff, capital structure, corporate layout policies, long-term financing, elementary options pricing, and mergers and acquisitions.

Credit Hour: 1-3

Prerequisites: FINANC 7410

FINANC 7440: Managerial Finance
Analyzes financial information relative to acquisition, management of assets; costs of alternative financial contracts; effect of mix of outstanding securities on entity’s cost of capital; interaction between funding/investment decisions.

Credit Hours: 3

Prerequisites: ACCTCY 7310 or departmental consent

FINANC 7620: Investment Strategy of Warren Buffett
Survey and application of the investment philosophy and valuation methods of Warren Buffett.

Credit Hours: 3

Prerequisites: FINANC 3000 or FINANC 7440

FINANC 7820: Investment Fund Management
Analysis and management of securities and markets by participation in the management of a student-run portfolio of publicly traded stocks and bonds. May be repeated 1 time for credit.

Credit Hours: 3

Prerequisites: FINANC 3000 or FINANC 7440; instructor’s consent

<tr>
<td>FINANC 8070</td>
<td>Security Markets and Investments</td>
<td>Valuation of securities including stocks, bonds, options and futures; risk-return analysis of financial assets.</td>
<td>3</td>
<td>FINANC 7440 or equivalent</td>
</tr>
<tr>
<td>FINANC 8085</td>
<td>Problems in Finance</td>
<td>For independent investigation and analysis, graduate students select topics suggested by the foregoing undergraduate courses.</td>
<td>1-3</td>
<td></td>
</tr>
<tr>
<td>FINANC 8310</td>
<td>Financial Modeling and Databases</td>
<td>Financial modeling and using online databases to retrieve data, data analysis, spreadsheet design, excel VBA programming, interpreting results. Graded on A-F basis only.</td>
<td>1-3</td>
<td>BUS_AD 7440</td>
</tr>
<tr>
<td>FINANC 8320</td>
<td>Financial Markets</td>
<td>Operation and structure of money markets and capital markets, including markets for stocks, bonds and derivatives securities. Study of the securities that trade in those markets including characteristics, valuation and diversification.</td>
<td>1-3</td>
<td>FINANC 8320</td>
</tr>
<tr>
<td>FINANC 8330</td>
<td>Investment Policy and Portfolio Management</td>
<td>Study of investment policies and the effects of risk and diversification on investment management including measurement of risk, identification of investment policy, and construction and maintenance of investment portfolios. Prerequisites: FINANC 8320</td>
<td>1-3</td>
<td>FINANC 8320</td>
</tr>
<tr>
<td>FINANC 8340</td>
<td>Derivative Financial Securities</td>
<td>Comprehensive overview of derivative securities including financial futures and options, swaps, and financial engineering. Major topics: institutional aspects of these markets, advanced pricing models, pricing relationships among derivative securities, and risk shifting.</td>
<td>3</td>
<td>FINANC 8070</td>
</tr>
<tr>
<td>FINANC 8350</td>
<td>Financial Statement Analysis I</td>
<td>An introduction to financial statement analysis with emphasis on interpretation and understanding of the balance sheet income statement, and statement of cash flows.</td>
<td>1-3</td>
<td>ACCTCY 7310</td>
</tr>
<tr>
<td>FINANC 8352</td>
<td>Financial Statement Analysis II</td>
<td>Analysis of company financial statements and related accounting information with emphasis on investors' decisions to invest in the company.</td>
<td>1.5-3</td>
<td>FINANC 8350</td>
</tr>
<tr>
<td>FINANC 8360</td>
<td>Equity Securities Analysis</td>
<td>Theory and application of models and methods for valuing common stocks.</td>
<td>1-3</td>
<td>FINANC 7420</td>
</tr>
<tr>
<td>FINANC 8370</td>
<td>Fixed-Income Securities Analysis</td>
<td>Markets for fixed-income securities and theory and application of models for valuing bonds and other fixed-income securities. Prerequisites: FINANC 7420</td>
<td>1-3</td>
<td>FINANC 7420</td>
</tr>
<tr>
<td>FINANC 8410</td>
<td>Advanced Financial Management</td>
<td>Examination of the modern theory of finance. Capital budgeting capital structure, dividend theory and valuation.</td>
<td>3</td>
<td>FINANC 7440</td>
</tr>
<tr>
<td>FINANC 8420</td>
<td>Working Capital Management</td>
<td>Financial planning and short-term financial management; integration of quantitative techniques, microeconomics, and financial decisions; analysis of decisions about profit planning, financial forecasting, accounts receivable, cash management, and financial short-term assets.</td>
<td>3</td>
<td>FINANC 8410</td>
</tr>
<tr>
<td>FINANC 8430</td>
<td>Capital Budgeting</td>
<td>An investigation of long-term financial decisions. Topics include capital budgeting, leasing, long-term financing. Extensive use of cases.</td>
<td>3</td>
<td>FINANC 8410</td>
</tr>
<tr>
<td>FINANC 8440</td>
<td>Financing Multinational Business</td>
<td>Study of foreign exchange markets, currency derivatives, global capital budgeting, and international financial decision strategy. Some sections of this course may be offered on an A-F or S/U basis only.</td>
<td>1-3</td>
<td>FINANC 7420</td>
</tr>
<tr>
<td>FINANC 8450</td>
<td>Ethics and Standards of Financial Practice</td>
<td>Study of financial ethics with particular focus on standards of practice for investment performance standards. Recommended for students planning to take the CFA exam. Prerequisites: FINANC 7420</td>
<td>1-3</td>
<td>FINANC 7420</td>
</tr>

<tr>
<td>FINANC 8510</td>
<td>Management of Financial Institutions</td>
<td>Study and analysis of policies, goals, practices and organizational changes in the management of financial institutions and intermediaries.</td>
<td>3</td>
<td>FINANC 7440</td>
</tr>
<tr>
<td>FINANC 8520</td>
<td>Real Estate Investment</td>
<td>Analysis of real estate as an investment including forecasting net operating income and cap rates, risk analysis estimation of return on investment, and syndication. Prerequisites: FINANC 7420</td>
<td>1.5-3</td>
<td></td>
</tr>
<tr>
<td>FINANC 8530</td>
<td>Real Estate Portfolio Analysis</td>
<td>Portfolio analysis applied to real estate investment including diversification, portfolio theory, and management of real estate portfolios including real estate operating companies (REOCs).</td>
<td>1.5-3</td>
<td>FINANC 7420 or instructor's consent</td>
</tr>
<tr>
<td>FINANC 8560</td>
<td>Real Estate Securities Analysis</td>
<td>Analysis of real estate securities including in-depth financial statement analysis and valuation of real estate investment trusts (REITs) and real estate operating companies (REOCs).</td>
<td>1.5-3</td>
<td>FINANC 8530 or instructor's consent</td>
</tr>
<tr>
<td>FINANC 8620</td>
<td>Investment Strategy of Warren Buffett</td>
<td>This course is designed to familiarize students with the investment philosophy of Warren Buffett. Buffett's criteria for evaluating potential acquisitions and investments will be analyzed in detail.</td>
<td>1-3</td>
<td>FINANC 7420</td>
</tr>
<tr>
<td>FINANC 8630</td>
<td>Corporate Risk Management</td>
<td>Principles of identifying, analyzing, assessing, and managing operational risks faced by large organizations. Sources, dimensions, and qualities of risk as well as development and implementation of methods to avoid, control, or transfer risk.</td>
<td>1-3</td>
<td>FINANC 7420 or Corequisites: FINANC 7420 Recommended: Undergraduate Business degree with major/emphasis/minor in Finance, Accounting or Economics</td>

<tr>
<td>FINANC 9300</td>
<td>Financial Economics</td>
<td>Utility analysis, efficient frontier mathematics, asset pricing and related topics.</td>
<td>3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>FINANC 9400</td>
<td>Seminar in Investment Analysis</td>
<td>Develops integrated theory and analytic techniques for evaluating investment potential of financial instruments. Emphasizes corporate securities. Selected cases and readings.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>F_W 1002</td>
<td>Topics in Fisheries and Wildlife</td>
<td>Organized study of selected topics intended primarily for lower-level students in Fisheries and Wildlife Sciences.</td>
<td>1-99</td>
<td></td>
</tr>
<tr>
<td>F_W 1012</td>
<td>Introduction to Captive Wild Animal Management</td>
<td>General introduction to housing, husbandry, behavior, genetics, nutrition, reproduction, animal health, and disease control of native and exotic species in zoological parks and other animal conservation facilities; emphasizes the role of captive animals in wildlife conservation. Graded on A-F basis only.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>F_W 1100</td>
<td>Introductory Zoology with Laboratory</td>
<td>Introduces important principles and concepts of zoology. Emphasizes cell biology; evolution; genetics; ecology; structure, function, development of the organism.</td>
<td>5</td>
<td></td>

</tbody>
</table>
F_W 2002: Topics in Fisheries and Wildlife-Biological/Physical/Mathematics
Organized study of selected topics. Intended for lower division Fisheries and Wildlife students. Subjects may vary from semester to semester.
Credit Hour: 1-99

F_W 2100: Colloquium in Fisheries and Wildlife
Case studies in the biology and management of fish and wildlife and their environments. Fisheries and Wildlife majors. Graded on S/U basis only.
Credit Hour: 1

F_W 2500: Introduction to Genetics and Evolution for Conservation
Basic principles and processes of genetics and evolution and their importance for management and conservation. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: NAT_R 1070, BIO_SC 1500, CHEM 1310, MATH 1100

F_W 2600: Ornithology
(same as BIO_SC 2600). Structure, identification, habits, importance of regional birds. Field work, lectures, lab.
Credit Hours: 4
Prerequisites: 5 hours Biological Sciences or instructor’s consent

F_W 2700: Ichthyology
(same as BIO_SC 2700). A broad introduction to the biology and ecology of fishes. Emphasis will be placed on understanding the adaptations fishes exhibit to aspects of their environment.
Credit Hours: 4
Prerequisites: 8 hours Biological Sciences or equivalent

F_W 2900: Principles of Wildlife Management
Expose students to the principles of wildlife management with emphasis on current issues faced by wildlife researchers and managers in the field.
Graded on A-F basis only.
Credit Hours: 4
Prerequisites: NAT_R 1070 and one other course in biological or environmental science; sophomore standing or higher

F_W 3002: Topics in Fisheries and Wildlife-Biological/Physical/Mathematics
Organized study of selected topics. Intended for upper division students. Subjects and credit may vary from semester to semester.
Credit Hour: 1-99

F_W 3085: Problems in Fisheries and Wildlife
Individual problems studies to supplement regularly organized undergraduate courses in Fisheries and Wildlife. Proposal for problems study must be arranged by student and supervising faculty member prior to registration.
Credit Hour: 1-99
Prerequisites: consent of supervising faculty member

F_W 3090: International Studies in Conservation
International study abroad that enhances and expands conservation knowledge and experience. May be repeated for credit.
Credit Hour: 1-5
Prerequisites: 12 hours biological science and/or conservation-related course work. Restricted to Fisheries and Wildlife majors only; departmental consent. Must complete a Study Abroad Proposal prior to attending the course

F_W 3200: Aquaculture
This course aims to develop an understanding of key aspects of the practice of fish culture, an awareness of aquatic species being cultured worldwide, and an appreciation of why aquaculture is expanding so rapidly on a global basis and the emerging environmental concerns associated with aquaculture growth. Graded on A-F basis only.
Credit Hours: 3

F_W 3300: Wildlife Damage Management
To explore wildlife damage conflicts involving human health and safety, agricultural resources, economics and natural resources. The course studies damage caused by wildlife species and methods to alleviate damage. Covers wildlife diseases, human dimensions and wildlife policies. Graded on A-F basis only.
Credit Hours: 3

F_W 3350: Wildlife Damage Management Lab
To explore wildlife damage management techniques in a field setting. To gain knowledge in assessing wildlife damage and the responsible species and determine the best approach to reduce that damage. Graded on A-F basis only.
Credit Hour: 1
Corequisites: F_W 3300

F_W 3400: Water Quality and Natural Resource Management
Introduction to broad aspects of water quality science, management and policy. Topics include aquatic ecology, eutrophication, lake and coastal management, water supply and treatment, watershed management with respect to agriculture and urban development, and toxicology.
Credit Hours: 3
Prerequisites: CHEM 1310 and NAT_R 1070 or instructor’s consent

F_W 3500: Wildlife Conservation in British Cities
Five week study abroad course focusing on approaches to wildlife conservation in London, Birmingham, Manchester, Liverpool and Edinburgh. Students will learn how managers blend ecology, conservation, and participatory approaches to management to conserve species in a human dominated landscape. Hands on involvement with conservation projects included.
Credit Hour: 3-6
Prerequisites: NAT_R 1060 or NAT_R 1070, Management course in SNR; instructor’s consent
F_W 3600: Introduction to Conservation Biology
Introduction to principles of conservation biology. Application of ecological concepts and conservation biology principles to management of endangered species, biodiversity and threatened ecosystems.
Credit Hours: 3
Prerequisites: BIO_SC 3650

F_W 3660: Mammalogy
(same as BIO_SC 3660). Taxonomy, distribution, structure, habits, importance of mammals; emphasizes those of central United States.
Credit Hours: 4
Prerequisites: junior standing or instructor’s consent

F_W 3700: Animal Behavior
Behavior allows animals to react promptly to environmental changes, and is how they interact with others and their surroundings. Because behaving is central to an animal’s life, knowing about behavior is fundamental to understanding animal ecology and to conservation efforts. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: F_W 1100

F_W 3900: Ecology of Fishes
This course considers fishes’ interactions with their environments in relation to survival, growth and population processes. The course is for mid- to upper-level undergraduates interested in fisheries science, management and fish conservation. May be repeated once for credit. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: STAT 2530 or STAT 1400; BIO_SC 1500 or F_W 1100; sophomore standing

F_W 4002: Topics in Fisheries and Wildlife-Biological/Physical/ Mathematics
Organized study of selected topics intended primarily for senior-level students in Fisheries and Wildlife Sciences.
Credit Hour: 1-99

F_W 4100: Limnology
(same as BIO_SC 4100). (lecture/lab: 4 hrs.; lecture only: 3 hrs.). Ecology of inland waters with emphasis on productivity.
Credit Hour: 3-4
Prerequisites: senior standing or BIO_SC 3650

F_W 4200: Urban Wildlife Conservation
Reviewing the theory and practice of applying ecological concepts to the management of wildlife species in urban areas.
Credit Hours: 3
Prerequisites: BIO_SC 3650 or instructor’s consent

F_W 4220: Human Dimensions of Fish and Wildlife Conservation
Overview of human dimensions approaches and methods as they are applied to issues in fish and wildlife conservation.
Credit Hours: 3

F_W 4300: Fisheries Management
Introduction to the scientific principles and techniques of fishery management. Integrates ecological principles with social, economic and legal considerations.
Credit Hours: 3
Prerequisites: BIO_SC 3650 and STAT 2530

F_W 4400: Techniques for Fisheries Management and Conservation
Introduction to techniques (field and analytical/quantitative) used by fisheries and conservation biologists. Fosters understanding of techniques uses, advantages, limitations biases, and data interpretation. Extended weekly field outings require chest waders and life jackets. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: BIO_SC 3650 and STAT 2530 or NAT_R 3110 and F_W 2700 or F_W 4300

F_W 4500: Animal Population Dynamics and Management
Quantitative modeling approach to examining principles and analysis techniques of fish and wildlife population dynamics. Emphasis on approaches useful in the management of exploited species.
Credit Hours: 3
Prerequisites: MATH 1400, STAT and BIO_SC 3650

F_W 4600: Ecosystem Management
Explores the development and implementation of large-scale approaches to restoring and maintaining ecosystems for sustainability. Incorporates ecological, socio-economic, and institutional factors that influence natural management agencies. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: BIO_SC 3650

F_W 4700: Wildlife Management Planning
Students will be exposed to various wildlife planning tools. Student teams will develop wildlife management plans with strategic and operational components for current conservation issues in Missouri. Plans will be critiqued by peers and outside professionals. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BIO_SC 3650 and senior standing; F_W 2900

F_W 4800: Environmental Toxicology
Introduction to classes of chemicals, tools, methods, and approaches used in environmental toxicology. Emphasizes fundamentals of toxicology, dose-response relationships, evaluation of contaminant
issues, strategies, and exposure analysis/toxicity assessment strategies in a risk assessment.

**Credit Hours:** 3  
**Prerequisites:** CHEM 1320 and F_W 3400 or instructor’s consent

---

**F_W 4810: Wildlife Disease Ecology**  
An introduction to the ecology of wildlife diseases. Topics include the definition of a disease, how to measure diseases, impacts on individuals and populations, and the role of disease in wildlife management and conservation.  

**Credit Hours:** 3  
**Prerequisites:** for undergraduates, BIO_SC 3650

---

**F_W 4880: Waterfowl Ecology and Management**  
Ecology and management of North American waterfowl and their habitats. Laboratory exercises focus on identification, life histories, sex and age determination, and survey methods. Lectures cover taxonomy, ecology, behavior, population dynamics, harvest management, and habitat management and conservation. Graded on A-F basis only.  

**Credit Hours:** 3  
**Prerequisites:** F_W 2600; BIO_SC 3650; instructor’s consent

---

**F_W 4910: Senior Seminar in Captive Wild Animal Management**  
(same as AN_SCI 4910). Investigates key issues in captive wild animal management, focusing on the role of animal caretakers in addressing the issues. Students are required to formulate informed opinions regarding these topics and communicate effectively about the subject matter. Graded on A-F basis only.  

**Credit Hours:** 1  
**Prerequisites:** AN_SCI 1012 or F_W 1012 or instructor’s consent; junior or senior standing

---

**F_W 4940: Fisheries and Wildlife Internship**  
Supervised professional experience with an approval public or private organization. May be repeated for credit. Graded on S/U basis only.  

**Credit Hours:** 1-12  
**Prerequisites:** Fisheries and Wildlife majors only, instructor’s consent

---

**F_W 4950: Undergraduate Research in Fisheries and Wildlife**  
Individually directed field or laboratory research for students under faculty supervision. Project must be arranged by student and faculty member prior to registration.  

**Credit Hours:** 1-99  
**Prerequisites:** consent of supervising faculty member

---

**F_W 4960: Special Readings in Fisheries and Wildlife**  
Critical review of current literature and research in fisheries and wildlife sciences. Project must be arranged by student and faculty supervisor prior to registration.  

**Credit Hours:** 1-99  
**Prerequisites:** supervising faculty member’s consent required

---

**F_W 7002: Graduate Topics in Fisheries and Wildlife**  
Organized study of selected topics intended primarily for graduate students in Fisheries and Wildlife Sciences. Graded on A-F basis only.  

**Credit Hour:** 1-99

---

**F_W 7100: Limnology**  
(same as BIO_SC 7100). (lecture/lab: 4 hrs.; lecture only: 3 hrs.) Ecology of inland waters with emphasis on productivity.  

**Credit Hour:** 3-4  
**Prerequisites:** BIO_SC 3650

---

**F_W 7200: Urban Wildlife Conservation**  
Reviewing the theory and practice of applying ecological concepts to the management of wildlife species in urban areas.  

**Credit Hours:** 3  
**Corequisites:** BIO_SC 3650 or instructor’s consent

---

**F_W 7220: Human Dimensions of Fish and Wildlife Conservation**  
Overview of human dimensions approaches and methods as they are applied to issues in fish and wildlife conservation.  

**Credit Hours:** 3  
**Prerequisites:** One 3000-level or above professional management or techniques course or instructor consent

---

**F_W 7300: Fisheries Management**  
Introduction to the scientific principles and techniques of fishery management. Integrates ecological principles with social, economic and legal considerations.  

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 3650 and STAT 2530

---

**F_W 7400: Techniques for Fisheries Management and Conservation**  
Introduction to techniques (field and analytical/quantitative) used by fisheries and conservation biologists. Fosters understanding of techniques uses, advantages, limitations biases, and data interpretation. Extended weekly field outings require chest waders and life jackets.  

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 3650 and STAT 2530 or NAT_R 3110 and F_W 2700 or F_W 4300

---

**F_W 7500: Animal Population Dynamics and Management**  
Quantitative modeling approach to examining principles and analysis techniques of fish and wildlife population dynamics. Emphasis on approaches useful in the management of exploited species. Graded on A-F basis only.  

**Credit Hours:** 3  
**Prerequisites:** MATH 1400, BIO_SC 3650, Statistics

---

**F_W 7600: Ecosystem Management**  
Explores the development and implementation of large-scale approaches to restoring and maintaining ecosystems for sustainability. Incorporates ecological, social-economic, and institutional factors that influence natural resource management agencies. Graded on A-F basis only.  

**Credit Hours:** 4
F_W 7700: Wildlife Research and Management Techniques
Research and Management methods for wildlife populations and habitats.
Credit Hours: 4
Prerequisites: BIO_SC 3650 and STAT 2530 or NAT_R 3110. One-week pre-semester field session required

F_W 7800: Environmental Toxicology
Introduction to classes of chemicals, tools, methods, and approaches used in environmental toxicology. Emphasizes fundamentals of toxicology, dose-response relationships, evaluation of contaminant issues, strategies, and exposure analysis/toxicity assessment strategies in a risk assessment.
Credit Hours: 3
Prerequisites: CHEM 1320 and F_W 3400 or instructor's consent

F_W 7810: Wildlife Disease Ecology
An introduction to the ecology of wildlife diseases. Topics include the definition of a disease, how to measure diseases, impacts on individuals and populations, and the role of disease in wildlife management and conservation.
Credit Hours: 3
Prerequisites: instructor's consent

F_W 7880: Waterfowl Ecology and Management
Credit Hours: 3
Prerequisites: F_W 2600; BIO_SC 3650; instructor's consent

F_W 8001: Topics in Fisheries and Wildlife
Organized study of selected topics. Subjects and credit may vary from semester to semester.
Credit Hour: 1-99
Prerequisites: instructor's consent

F_W 8050: Non-Thesis Research in Fisheries and Wildlife
Independent research not leading to a thesis.
Credit Hour: 1-99

F_W 8085: Graduate Problems in Fisheries and Wildlife
Individualized problems studies to supplement regularly organized graduate courses in Fisheries and Wildlife.
Credit Hour: 1-5
Prerequisites: consent of supervising faculty member

F_W 8087: Masters Seminar in Fisheries and Wildlife
Discussions of current developments in forestry, fisheries and wildlife, and critical study of research programs.
Credit Hour: 1

F_W 8090: Masters Thesis Research in Fisheries and Wildlife
Research leading to a thesis or dissertation. Graded on a S/U basis only.
Credit Hour: 1-99

F_W 8300: Professional Development and Communications
Intended to foster professional growth and development of graduate students. The course will present a rigorous introduction to professionalism, ethics, career development, and professional communications skills and techniques. Graded on A-F basis only.
Credit Hour: 1-3

F_W 8440: Fish Ecology
Advanced study of the interactions between fish and their environment. Topics include behavioral, physiological, population and community ecology of fishes, with emphasis on development and application of ecological theory in fishery management.
Credit Hours: 3
Prerequisites: F_W 2700, F_W 4100, BIO_SC 3650 or equivalent

F_W 8450: Advanced Limnology
Physical, chemical and biological processes of lakes and streams emphasizing biological production, water quality and modern problems. Field, laboratory techniques in limnology research.
Credit Hours: 3
Prerequisites: F_W 4100, BIO_SC 3650, BIO_SC 3510 or equivalent

F_W 8460: Wetland Ecology
A survey of the wetlands of North America; emphasis on nutrient dynamics, habitat structure, management, legislation and regulations, and man's impacts.
Credit Hours: 3
Prerequisites: F_W 4100, BIO_SC 3650 and instructor's consent

F_W 8470: Fish Bioenergetics: Concepts and Applications
Key concepts of fish bioenergetics are treated by readings, discussions of articles and lectures by the instructor. Concepts are applied through modeling. Novel applications, shortcomings and benefits of bioenergetics models are treated. The course applies to graduate students seeking careers in fisheries management, aquatic ecology, fish conservation and aquaculture. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: instructor's consent

F_W 8510: Ecology, Conservation, and Environmental Justice
The goal of this course is to introduce graduate students in natural resource management and conservation biology to the ecological and management concepts that underlie environmental justice issues, and to explain how broader environmental justice concepts are relevant to natural resource and conservation fields. Graded on A-F basis only.
Prerequisites: one undergraduate course from the following list of disciplines: ecology, natural resource management, conservation biology, sociology or equivalent.
Credit Hours: 2
F_W 8520: Stream Ecology
Ecological principles applied to flowing waters. Emphasis on ecological processes within algal, invertebrate and fish communities. The influence of geomorphic processes, hydrologic principles and physical-chemical factors on the biota.
Credit Hours: 3

F_W 8530: Quantitative Fish and Wildlife Assessment
Methods to assess space use patterns, animal abundance and population status are drawn into quantitative framework for making inferences to wild populations. Practical application and limitations of techniques are emphasized through analysis and interpretation of field data.
Credit Hours: 4
Prerequisites: NAT_R 3110 or equivalent

F_W 8540: Wildlife Nutritional Ecology
A comprehensive and comparative treatment of vertebrates interact with their environment to satisfy nutrient and energy requirements. Emphasis on nutrient requirements, food processing, bioenergetics and foraging strategies.
Credit Hours: 3
Prerequisites: BIO_SC 3650 or instructor's consent

F_W 8550: Advanced Waterfowl Ecology
Advance studies of waterfowl ecology. Emphasis on mating systems, foraging ecology, energetics, and post-breeding and wintering ecology.
Credit Hours: 3
Prerequisites: F_W 2600, F_W 3800 and BIO_SC 3650 or instructor's consent

F_W 8620: Vertebrate Behavioral Ecology
In-depth study of the behavioral adaptations of vertebrates. Topics include reproductive strategies, mate selection, parental care, predator avoidance, habitat selection, foraging strategies and spacing patterns.
Credit Hours: 3
Prerequisites: BIO_SC 4640 and BIO_SC 3650 or equivalents

F_S 1010: Introduction to Viticulture and Enology
This course will give a general overview of growing grapes (viticulture) and winemaking (enology) with an emphasis on Missouri wines and wineries. This course is the first course in a sequence of courses in the viticulture and enology track of the food science degree program.
Credit Hour: 1

F_S 1030: Food Science and Nutrition
Basic principles of science and technology as applied to the problem of providing safe, nutritious, and desirable food for man.
Credit Hours: 3

F_S 2114: Live Animal and Meat Evaluation
(same as AN_SCI 2114). The composition and quality meat produced from food animals is the driving component of livestock economic value. This course will teach the principles and procedures involved in evaluation, grading, selection, and economic value of meat animals and poultry and the carcasses they produce. This course is an excellent introduction and (or) prerequisite for all livestock production courses and will provide a baseline of information for students interested in livestock or meat judging.
Credit Hours: 3

F_S 2131: Dairy Products Evaluation
(same as AN_SCI 2131). Sensory Evaluation and judging of dairy products.
Credit Hours: 2

F_S 2172: Elements of Food Microbiology
Basic course stressing principles of microbiology applied to foods.
Credit Hours: 3

F_S 3190: Study Abroad: International Meat, Dairy and Enology
(same as AN_SCI 3190). This study abroad course introduces students to the meat, dairy and wine industries in Germany or in New Zealand (destinations are on a rotational basis). Students will visit small, medium and large-scale producers and learn about differences in comparison to the US industries. May be repeated once for credit. Prerequisites: instructor's consent
Credit Hours: 1-99
F_S 3190H: Study Abroad: International Meat, Dairy and Enology - Honors
(same as AN_SCI 3190). This study abroad course introduces students to the meat, dairy and wine industries in Germany or in New Zealand (destinations are on a rotational basis). Students will visit small, medium and large-scale producers and learn about differences in comparison to the US industries. May be repeated once for credit.

Credit Hours: 3
Prerequisites: instructor’s consent. Honors eligibility required

F_S 3210: Kitchen Chemistry
This course is targeted at current Food Science, Hospitality Management, Nutrition or Biochemistry students who wish to study the application of scientific principles to the practice of cooking. This on-line summer class assumes students have access to a working kitchen. Video cooking projects are submitted weekly. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CHEM 1100 or higher

F_S 3214: Principles of Meat Science
(same as AN_SCI 3214). Study of the principles involved in the conversion of living animals to meat and by-products; efficient utilization of meat as a food.

Credit Hours: 3
Prerequisites: one course in Biological Sciences

F_S 3231: Principles of Dairy Foods Science
(same as AN_SCI 3231). Technology, chemistry and microbiology related to milk and its transformation into fluid milk products, fermented dairy foods and spreads. (2 hours of lecture and two hours of laboratory per week.)

Credit Hours: 3
Prerequisites: One course in Chemistry or Biological Sciences

F_S 3240: Principles of Viticulture I
(same as PLNT_S 3240). Grapevine growth, development, selection, propagation, training systems, pruning, and harvesting; vineyard site selection, design, and development. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: F_S 1010 and F_S 2195 or PLNT_S 2195; or PLNT_S 2100; or PLNT_S 2110; or PLNT_S 2125

F_S 3250: Physical Principles for Food Processing
Introduction to basic engineering concepts used to process raw materials: Energy balance, Pipe flow, Viscosity, Heat exchange, Refrigeration.

Credit Hours: 3
Prerequisites: one calculus course and one physics course

F_S 3385: Problems in Food Science
Supervised study in a specialized phase of food science and nutrition.

Credit Hour: 1-99

F_S 4199: Food Industry Senior Seminar
The course explores the structure and the various branches of the food industry. Emphasis is placed on industry trends and the manufacture of specific selected food products and their ingredients. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: F_S 1030 or equivalent, F_S 2199 or equivalent; junior or senior standing

F_S 4301: Topics in Food Science
Instruction in specific subject matter areas in the field of food science and nutrition.

Credit Hour: 1-99

F_S 4310: Food Chemistry and Analysis
Structure, composition and chemical properties of food.

Credit Hours: 4
Prerequisites: 5 hours Chemistry or Biochemistry

F_S 4311: Investigation of Food Properties
Study of the chemical and physical properties of foods and the interaction of food components.

Credit Hours: 3
Prerequisites: F_S 4310 or equivalent, or instructor’s consent

F_S 4315: Food Chemistry and Analysis Laboratory
The quantitative determination of the constituents of food.

Credit Hours: 3
Prerequisites: F_S 4310 or concurrent enrollment

F_S 4330: Principles of Food Processing
(same as AG_S_M 4330; cross-leveled with F_S 7330). Introduction to basic engineering concepts used to process raw materials. Principle topics include energy, material balance, fluid flow, heat transfer, refrigeration and freezing, and preservation.

Credit Hours: 3
Prerequisites or Corequisites: Instructor’s consent
Prerequisites: MATH 1100 and AG_S_M 1040 or PHYSCS 1210

F_S 4331: Technology of Dairy Products and Ingredients
Technology, chemistry, and nutrition of dairy foods as well as functional properties of dairy ingredients.

Credit Hours: 3
Prerequisites: one Chemistry course and F_S 3231 or equivalent

F_S 4340: Principles of Viticulture II
(same as PLNT_S 4340). Environmental and biological factors influencing vine physiology and wine grape quality. Irrigation, canopy management, pest and disease control, budgets and current trends in viticulture. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: F_S 3240 or PLNT_S 3240
F_S 4344: Processing Muscle Foods
(same as AN_SCI 4344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility.
Credit Hours: 3
Prerequisites: One Chemistry course

F_S 4354: Physiology and Biochemistry of Muscle as Food
(same as AN_SCI 4354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.
Credit Hours: 3
Prerequisites: BIO_SC 1010 or equivalent or F_S 3214 or instructor’s consent

F_S 4370: Food Microbiology
Study of bacteria, yeast and molds. Includes dominant flora, public health significance, characterization of organisms, examination of foods representative of major food groups, spoilage, preservation, food fermentations and physiological groups.
Credit Hours: 3
Prerequisites: F_S 2172 and one Biochemistry course or concurrent enrollment

F_S 4375: Food Microbiology Laboratory
Examination of foods for microorganisms and characterization of major species.
Credit Hours: 2
Prerequisites: F_S 4370 or concurrent enrollment

F_S 4380: Sensory Analysis of Food and Beverages
Methodological principles of the sensory analysis of food and beverages with an emphasis on wine analysis.
Credit Hours: 3
Recommended: one statistics course

F_S 4385: Problems in Food Science
Advanced problems in a selected field of food science and nutrition.
Credit Hour: 1-99

F_S 4390: Optimization and Management of Food and Agricultural Systems
(same as AG_S_M 4390 and HSP_MGMT 4390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.
Credit Hours: 3
Prerequisites: MATH 1100

F_S 4440: Principles of Winemaking and Wine Chemical Analysis
The theoretical and practical basics needed by enologists/winemakers including sensory analysis of grapes; chemical, microbiological and technological aspects of winemaking; and the analytical methods used for juice and wine analysis. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: 5 credit hours inorganic chemistry and organic chemistry or concurrent, or instructors consent

F_S 4441: Cellar Operations and Special Vinifications
The theoretical and practical basics needed by winemakers to supervise the operations of the winemaking, wine stabilization and packaging equipment. The theoretical and practical basics needed by winemakers to make special wines including rose, dessert, carbonic maceration, and sparkling wines. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: 5 credit hours inorganic chemistry and organic chemistry and F_S 4440 or instructor’s consent

F_S 4940: Field Training
Credit Hour: 1-99
Prerequisites: junior or senior standing and instructor’s consent

F_S 4941: Internship in Food Science
Combines study, observation and employment in an area of food science and nutrition. Written reports, faculty evaluation.
Credit Hour: 1-6
Prerequisites: one Food Science course and instructor’s consent

F_S 4970: Food Product Development
Capstone course integrating the various disciplines of food science to create new food products.
Credit Hours: 3
Prerequisites: ENGLSH 1000 and instructor’s consent

F_S 4980: Food Quality Assurance
Capstone course integrating various food science disciplines to comply with regulations concerned with protection of the nation’s food supply. Applies practices to insure consumers of healthful foods.
Credit Hours: 3
Prerequisites: ENGLSH 1000, senior standing and instructor’s consent

F_S 7310: Food Chemistry and Analysis
Structure, composition and chemical properties of food.
Credit Hours: 4
Prerequisites: 5 hours Chemistry or Biochemistry

F_S 7311: Investigation of Food Properties
Study of the chemical and physical properties of foods and the interaction of food components. Lecture.
Credit Hours: 3
Prerequisites: F_S 4310 or F_S 7310 or equivalent, or instructor’s consent
F_S 7315: Food Chemistry and Analysis Laboratory
The quantitative determination of the constituents of food.
Credit Hours: 3
Prerequisites: F_S 4310 or concurrent enrollment

F_S 7330: Principles of Food Processing
(same as AG_S_M 7330; cross-leveled with F_S 4330). Basic principles
of food processing, with emphasis on blanching, pasteurization,
commercial sterilization, refrigeration, freezing, concentration,
dehydration and packing. Impacts of processing on product quality are
evaluated.
Credit Hours: 4

F_S 7331: Technology of Dairy Products and Ingredients
Technology, chemistry, and nutrition of dairy foods as well as functional
properties of dairy ingredients.
Credit Hours: 3
Prerequisites: one Chemistry course and F_S 3231 or equivalent

F_S 7344: Processing Muscle Foods
(same as AN_SCI 7344). Materials and technologies for the manufacture
of muscle food products from red meats, poultry and seafood. Experience
problem-solving through further processing of complex ingredients and
develop skills by practicing operations in a pilot plant facility.
Credit Hours: 3
Prerequisites: one Chemistry course

F_S 7354: Physiology and Biochemistry of Muscle as Food
(same as AN_SCI 7354). Basic concepts in muscle growth and
development of livestock evaluating the effects of environment, welfare,
nutrition and genetics regarding muscle metabolism, physiology, and the
ultimate condition of muscle as food.
Credit Hours: 3
Prerequisites: BIO_SC 1010 or equivalent or F_S 3214 or instructor's
consent

F_S 7360: Food Quality Assurance
Interprets regulations concerned with protection of the nation’s food
supply. Applies protection and sanitary practices to insure consumers of
wholesome and healthful foods.
Credit Hours: 3
Prerequisites: Microbiology

F_S 7370: Food Microbiology
Study of bacteria, yeast and molds. Includes dominant flora, public
health significance, characterization of organisms, examination of
foods representative of major food groups, spoilage, preservation, food
fermentations and physiological groups.
Credit Hours: 3
Prerequisites: F_S 2172 and one Biochemistry course or concurrent
enrollment

F_S 7375: Food Microbiology Laboratory
Examination of foods for microorganisms and characterization of major
species.
Credit Hours: 2
Prerequisites: F_S 4370 or concurrent enrollment

F_S 7380: Sensory Analysis of Food and Beverages
Methodological principles of the sensory analysis of food and beverages
with an emphasis on wine analysis.
Credit Hours: 3
Recommended: one statistics course

F_S 7390: Optimization and Management of Food and Agriculture
Systems
(same as AG_S_M 7390 and HSP_MGMT 7390). This course is
designed to introduce the student to the concept of layers and interacting
systems within an operation and the analytical methods of modeling and
simulation to make effective management decisions for optimal system
design and function.
Credit Hours: 3
Prerequisites: instructor's consent

F_S 7440: Principles of Winemaking and Wine Chemical Analysis
The theoretical and practical basics needed by enologist/winemakers
including sensory analysis of grapes; chemical, microbiological and
technological aspects of winemaking; and the analytical methods used for
juice and wine analysis. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: 5 hours inorganic chemistry and organic chemistry or
concurrent, or instructor's consent

F_S 7441: Cellar Operations and Special Vinifications
The theoretical and practical basics needed by winemakers to supervise
the operations of the winemaking, wine stabilization and packaging
equipment. The theoretical and practical basics needed by winemakers
to make special wines including rose, dessert, carbonic maceration, and
sparkling wines. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: 5 credit hours inorganic chemistry and organic chemistry
and F_S 4440 or instructor's consent

F_S 7941: Internship in Food Science
Combines study, observation and employment in an area of food science
and nutrition. Written reports, faculty evaluation.
Credit Hours: 1-6
Prerequisites: One Food Science course and instructor's consent

F_S 7970: Food Product Development
Capstone course integrating the various disciplines of food science to
create new food products.
Credit Hours: 3
Prerequisites: ENGLISH 1000, and instructor's consent

</table>
Prerequisites: BIOCHM 3630 or equivalent and F_S 4310 or equivalent, or instructor's consent

F_S 9085: Problems in Food Science
Individual studies includes minor research problems.
Credit Hour: 1-99
Prerequisites: Food Science PhD students

F_S 9087: Seminar in Food Science
Provides students with opportunities for development in depth of advanced aspects of food science through reviews of research in progress and of current scientific publications. Prerequisites: PhD standing
Credit Hour: 1

F_S 9090: Research in Foods Science
Original investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: Food Science PhD students

F_S 9402: Advanced Research Methods in Food and Hospitality Systems
This course provides doctoral students with introduction and review of research methods available for use in the study of food science, hospitality management and agricultural system management. Hence, the emphasis of this course is on empirical studies in the field, and will examine research conducted by scholars in the academic area. This course assists as baseline preparation for graduate students’ continuing work in the graduate program. Specifically, the course provides students with knowledge and research experience in regard to 1) research fundamentals and backgrounds, 2) types of research, and 3) data analysis.
Credit Hours: 3
Prerequisites: Introductory research method course or statistics course; instructor’s consent required

F_S 9460: Advanced Food Quality Assurance
Analyzes concepts of integrating laws, TQM and statistical process control into HACCP and ISO systems required for the quality of the global food industry.
Credit Hours: 3
Prerequisites: F_S 4980 or equivalent and one Statistics course

F_S 9470: Advanced Food Technology
To understand the physical and chemical changes that occur during the processing and storage of food; study the quality and safety issues of foods and learn traditional and recent advances in food science and technology.
Credit Hours: 3
Prerequisites: F_S 4310, or equivalent or instructor’s consent

FOREST 1102: Topics in Forestry - Biological/Physical/Mathematical
Organized study of selected topics in forestry. Intended for undergraduate students.
Credit Hour: 1-3

FOREST 1104: Topics in Forestry - Social Science
Organized study of selected topics in forestry. Intended for undergraduate students.
Credit Hour: 1-3

FOREST 2151: Dendrology
An introduction to the biology of trees, emphasizing identification in the field, taxonomy, ecology, geographic distribution and economic significance of forest species.
Credit Hours: 4
Prerequisites: BIO_SC 1200 or PLNT_S 2120 and PLNT_S 3130 or instructor’s consent

FOREST 2540: Forest Hydrology Field Studies
Introduction to forest hydrology, watershed management, water quantity and quality, climate and biophysical relationships.
Credit Hour: 1
Prerequisites: SOIL 2100, FOREST 2151
Corequisites: FOREST 2541, FOREST 2542, FOREST 2543, FOREST 2544 and FOREST 2545

FOREST 2541: Forest Utilization
Field studies of logging and milling of timber.
Credit Hour: 1
Prerequisites: SOIL 2100, FOREST 2151
Corequisites: FOREST 2540, FOREST 2542, FOREST 2543, FOREST 2544 and FOREST 2545

FOREST 2542: Forest Measurement and Inventory
Field measurement of standing trees including diameter, height and age. Estimation of forest timber resources using a variety of sampling schemes and techniques. Introduction to Arcview and growth models.
Credit Hour: 1
Prerequisites: SOIL 2100, FOREST 2151
Corequisites: FOREST 2540, FOREST 2542, FOREST 2543, FOREST 2544 and FOREST 2545

FOREST 2543: Forest Ecology Field Studies
Field studies of vegetation, soils, habitats and ecological units. Application of ecological principles of natural resource management and understanding of natural and managed forested communities with an emphasis on southeastern Missouri.
Credit Hour: 1
Prerequisites: SOIL 2100, FOREST 2151
Corequisites: FOREST 2540, FOREST 2541, FOREST 2542, FOREST 2543, FOREST 2544 and FOREST 2545
FOREST 2544: Introduction to Silviculture and Management
Management objectives and stand prescriptions, regeneration and intermediate silvicultural treatments, management on private and federal forest lands, tree evaluation and timber marking.
Credit Hour: 1
Prerequisites: SOIL 2100, FOREST 2151
Corequisites: FOREST 2540, FOREST 2541, FOREST 2542, FOREST 2543 and FOREST 2545

FOREST 2545: Forest Management Planning
Preparation and presentation of a written forest management plan using material and data developed in prerequisite courses.
Credit Hour: 1
Prerequisites: SOIL 2100, FOREST 2151
Corequisites: FOREST 2540, FOREST 2541, FOREST 2542, FOREST 2543 and FOREST 2544 concurrently

FOREST 3201: Topics in Forestry
Organized study of selected topics. Intended primarily for undergraduate Forestry students. Subjects and credit may vary from semester to semester.
Credit Hour: 1-99

FOREST 3207: Forest Fire Control and Use
Fundamentals of all phases of fire protection. Objectives and techniques in use of fire.
Credit Hours: 2

FOREST 3212: Forest Health and Protection
Fundamental concepts of forest pathology and forest entomology including emphasis on ecological principles and management strategies.
Credit Hours: 4
Prerequisites: FOREST 2151

FOREST 3217: Fire and Society
A study of the relationship between society (humans) and fire. What kind of role does fire play in day-to-day life? How has fire influenced our behavior since Day 1? How do we view fire today?
Credit Hours: 2

FOREST 3240: Wood Technology
Structure and identification of commercial woods. Relation of growth to physical and chemical properties of wood.
Credit Hours: 3

FOREST 3290: Urban Forestry
The culture and management of trees in urban areas, including ownership patterns, species composition, growth environment, amenities provided and evaluation. One-day field trip required.
Credit Hours: 2
Prerequisites: FOREST 2151 or PLNT_S 2210, or instructor's consent

FOREST 3300: Problems in Forestry
Problems in Forestry
Credit Hours: 3

FOREST 3350: Special Readings in Forestry
Critical review of current literature and research in forestry, fisheries and wildlife, and methods of presenting research results.
Credit Hour: 1-99

FOREST 4301: Topics in Forestry
Organized study of selected topics. Intended for upper-division students. Subjects and credit may vary from semester to semester.
Credit Hours: 3

FOREST 4320: Forest Ecology
Principles of community, ecosystem, and population ecology and examination of the influence of environmental factors and human activity on forest dynamics, composition, structure and function.
Credit Hours: 5
Prerequisites: FOREST 2151 or instructor’s consent; Restricted to Senior standing only

FOREST 4330: Practice of Silviculture
Applied ecological principles, cultural practices, tree improvement techniques and treatments to forest stands and other lands for systematic production of goods and services.
Credit Hours: 3
Prerequisites: FOREST 4320; Senior standing only

FOREST 4340: Tree Physiology
Lectures on physical and chemical phenomena involved in the functions and activities of trees.
Credit Hours: 3
Prerequisites: BIOCHM 2110, BIO_SC 1200, CHEM 1100; or instructor’s consent

FOREST 4350: Forest Economics
Economic principles applied to production/marketing of goods and services from forest land: emphasizes capital and land factors and investment alternatives related to time.
Credit Hours: 3
Prerequisites: Mathematics requirement completed; AG_EC 1042, or AG_EC 2070

FOREST 4360: Photogrammetry, Inventory and Models
Applied course in the area of aerial photogrammetry, forest inventory, and forest growth models for developing, maintaining, and utilizing these tools in a forest management.
Credit Hours: 3

FOREST 4365: Logging Systems: Operations and Analyses
A systems approach to timber harvesting from acquisition through engineering to log transport. Regional aspects and influences will be considered.
Credit Hours: 3
**Prerequisites:** FOREST 2540, FOREST 2541

**FOREST 4370: Wildland Fire Management**
Management, administration, and organization of wildland and prescribed fires and other natural and man-made disasters. Emphasis placed on organizational arrangements of incidents rather than on either strategy or tactics.

**Credit Hours:** 3  
**Prerequisites:** FOREST 3207 or equivalent

**FOREST 4375: Forest Stand Dynamics**
Examines the development of forest structure, the role of disturbance on forest change and the use of this knowledge in applying silvicultural systems. Both forest stand dynamics theories, structure diagrams, forest growth models, and long term data sets are used to understand stand dynamics.

**Credit Hours:** 3  
**Prerequisites:** FOREST 4330 or instructor’s consent

**FOREST 4380: Forest Resource Management**
Teaches resource managers how to develop a plan for the management of forest resources using managerial, economic, silvical and wildlife techniques for its enhancement and to meet the landowner’s objectives.

**Credit Hours:** 3  
**Prerequisites:** FOREST 4330 and FOREST 4350; Senior Standing only

**FOREST 4385: Agroforestry I: Theory, Practice and Adoption**
Understand biophysical, ecological, social and economic features of temperate and tropical agroforestry. Covers the basics of design, planning and implementation of agroforestry practices.

**Credit Hours:** 3  
**Prerequisites:** junior standing

**FOREST 4387: Agroforestry Economics and Policy**
This course focuses on economic principles applied to the adoption and management of agroforestry practices at both the micro and macro scale. This includes cost and benefits analysis of ecosystem services and marketing of goods and services from agroforestry. More specifically, this course emphasizes both market and nonmarket valuation of managed tree and crop/livestock interactions; investment alternatives related to economics and natural resources; and decision making with relation to financial principles, environmental principles, and social principles. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** FOREST 4385 or FOREST 7385, AG_EC 1041 or permission of instructor

**FOREST 4390: Watershed Management and Water Quality**
Hydrologic processes on wildland watersheds. Effects of forest land management on streamflow, erosion and water quality.

**Credit Hours:** 3  
**Prerequisites:** MATH 1400 or instructor’s consent; Senior standing only

**FOREST 4940: Forestry Internship**
Supervised professional experience with an approved public or private organization. May be repeated for credit. Graded on S/U basis only.

**Credit Hour:** 1-12  
**Prerequisites:** Forestry majors only, instructor’s consent

**FOREST 4950: Forestry Undergraduate Research**
Research apprenticeship with a faculty mentor. Students are expected to develop initial concept for the research, design experiments, collect data, and analyze data with faculty input, oversight, and guidance. Graded on A-F basis only.

**Credit Hour:** 1-4  
**Prerequisites:** Senior standing required

**FOREST 4960: Special Readings in Forestry**
Organized study of selected topics. Intended for upper-division and graduate students. Subjects and credit may vary from semester to semester.

**Credit Hour:** 1-99  
**Prerequisites:** Senior standing required

**FOREST 4994: Senior Honors Research in Forestry**
Credit Hour: 1-3  
**Prerequisites:** 3.30 GPA and instructor’s consent

**FOREST 4995: Senior Honors Research in Forestry**
Credit Hour: 1-3  
**Prerequisites:** 3.30 GPA and instructor’s consent

**FOREST 7301: Topics in Forestry**
Organized study of selected topics. Intended for upper-division and graduate students. Subjects and credit may vary from semester to semester.

**Credit Hour:** 1-99

**FOREST 7320: Forest Ecology**
Principles of community, ecosystem, and population ecology and examination of the influence of environmental factors and human activity on forest dynamics, composition, structure and function.

**Credit Hours:** 5  
**Prerequisites:** FOREST 2151 or BIO_SC 3210 or instructor’s consent

**FOREST 7330: Practice of Silviculture**
Applied ecological principles, cultural practices, tree improvement techniques and treatments to forest stands and other lands for systematic production of goods and services.

**Credit Hours:** 3  
**Prerequisites:** FOREST 4320

**FOREST 7340: Tree Physiology**
Lectures on physical and chemical phenomena involved in the functions and activities of trees.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 2110; BIO_SC 1200; CHEM 1100; or instructor’s consent

FOREST 8460: Advanced Forest Ecology
Lecture/discussion based course emphasizing contemporary and classic ecological studies and concepts in the context of current forest ecology issues and research. Prerequisites: undergraduate ecology course

Credit Hours: 3

FOREST 8490: Advanced Forest Management
Modern quantitative methods to facilitate decision-making in harvest scheduling and regulation, land use allocation, and production planning in natural resource management.

Credit Hours: 3
Prerequisites: FOREST 4380

FOREST 8515: Advanced Forest Biometrics
An introduction to the topics and philosophy of ecological modeling. The course will guide students through the process of developing a conceptual model, formalizing the model, parameterizing, and running the model as well as analyzing the results.

Credit Hours: 3
Prerequisites: STAT 7070 or instructor’s consent

FOREST 8520: Social Forestry
Issues with using forestry as an international development tool; planning, implementing and evaluating farm and community forestry projects.

Credit Hours: 3
Prerequisites: FOREST 4350, or AG_EC 3270, or equivalent and instructor’s consent

FOREST 8530: Ecosystem Management: The Human Dimension
Overview of cultural, social, political and economic dimensions of natural resource problems and issues from an ecologically grounded management perspective.

Credit Hours: 3
Prerequisites: NAT_R 4353 or equivalent

FOREST 8540: Tree Growth-Quality Relationships
Response of tree growth (wood formation) to such environmental influences fertilization, moisture, nutrient supply, wounding pruning, etc.

Credit Hours: 3

FOREST 8620: Plant-Water Relations

Credit Hours: 3

FOREST 8625: Plant-Water Relations Laboratory
Introduction to techniques and instrumentation used in studies of plant-water relations.

Credit Hours: 2
Corequisites: FOREST 8620

FOREST 9087: Seminar in Forestry
Discussions of current developments in Forestry, and critical study of research programs. Graded on S/U basis only.

Credit Hour: 1

FOREST 9090: Dissertation Research in Forestry
Original investigation for presentation in a doctoral dissertation. Graded on a S/U basis only.

Credit Hour: 1-10

FOREST 9410: Seminar in Forestry
Discussions of current developments in Forestry, and critical study of research programs.

Credit Hour: 1

French (FRENCH)

FRENCH 1100: Elementary French I
An introductory course for students who wish to begin their study of French. It teaches the four skills—listening, speaking, reading, and writing. The class meets four days a week and one day in the lab. Class time is used to practice the structures and vocabulary.

Credit Hours: 5

FRENCH 1100H: Elementary French I - Honors
This course is designed for Honors students with 2-3 years of high school French focuses on the four skills, speaking, listening, reading and writing, and offers enriched cultural opportunities in and out of the classroom, such as movies, guest lectures, art exhibits, and plays. Students practice those skills, using authentic materials in real-life situations. Graded on A-F basis only.

Credit Hours: 5
Prerequisites: 2 years high school French; Honors eligibility required

FRENCH 1200: Elementary French II
The second course of the beginning language sequence is the continuation of FRENCH 1100. It places equal emphasis on the four skills; listening, speaking, reading, and writing. Students who have prior knowledge of French are encouraged to take this course. NO credit for both FRENCH 1200 and FRENCH 1250.

Credit Hours: 5
Prerequisites: grade of C or better in FRENCH 1100 or equivalent

FRENCH 1250: Accelerated Beginning French
Course is designed for students who have taken more than two years of High School French. It offers a reinforcement of the beginning concepts of the French language and the many cultures it encompasses. Course allows students to further develop all language skills. NO credit for both FRENCH 1200 and FRENCH 1250.

Credit Hours: 5

FRENCH 2001: Undergraduate Topics in French-General
Organized study of selected topics. Subjects may vary from semester to semester. May be repeated with consent of department.

FRENCH 3005: French Language Continuation
Introduction to the functional use of French in an international setting. Focus on listening, speaking, reading, and writing.

Credit Hours: 3
Prerequisites: FRENCH 1100 with a grade of "C" or higher

FRENCH 3006: French Language Continuation
An intensive study of the French language emphasizing pronunciation, grammar, and vocabulary. The course is designed to prepare students for advanced French courses.

Credit Hours: 3
Prerequisites: FRENCH 1100 with a grade of "C" or higher

FRENCH 3011: French Language Continuation
An advanced course in French language and literature, focusing on contemporary French culture and society.

Credit Hours: 3
Prerequisites: FRENCH 3005 or FRENCH 3006

FRENCH 3021: French Language Continuation
An advanced course in French language and literature, focusing on contemporary French culture and society.

Credit Hours: 3
Prerequisites: FRENCH 3005 or FRENCH 3006

FRENCH 3031: French Language Continuation
An advanced course in French language and literature, focusing on contemporary French culture and society.

Credit Hours: 3
Prerequisites: FRENCH 3005 or FRENCH 3006

FRENCH 3041: French Language Continuation
An advanced course in French language and literature, focusing on contemporary French culture and society.

Credit Hours: 3
Prerequisites: FRENCH 3005 or FRENCH 3006
FRENCH 2004: Undergraduate Topics in French-Social Science
Organized study of selected topics. Subjects may vary from semester to semester. May be repeated with departmental consent.
Credit Hour: 1-3
Prerequisites: FRENCH 1200 with a grade of C or better

FRENCH 2005: Undergraduate Topics in French-Humanities/Fine Arts
Organized study of selected topics. Subjects may vary from semester to semester. May be repeated with departmental consent.
Credit Hour: 1-3
Prerequisites: FRENCH 1200 with a grade of C or better

FRENCH 2005H: Undergraduate Topics in French-Humanities/Fine Arts - Honors
Organized study of selected topics. Subjects may vary from semester to semester. May be repeated with departmental consent.
Credit Hour: 1-3
Prerequisites: FRENCH 1200 with a grade of C or better. Honors eligibility required

FRENCH 2100: Elementary French III
A multi-skill course following FRENCH 1200, centering on cultural/literary reading, and including a grammar review, practice of the spoken language, as well as some practice in written expression.
Credit Hours: 3
Prerequisites: grade of C or better in FRENCH 1200 or FRENCH 1250, or their equivalent courses

FRENCH 2100H: Elementary French III - Honors
A multi-skill course following FRENCH 1200, centering on cultural/literary reading, and including a grammar review, practice of the spoken language, as well as some practice in written expression.
Credit Hours: 3
Prerequisites: grade of C or better in FRENCH 1200 or FRENCH 1250, or their equivalent courses. Honors eligibility required

FRENCH 2160: Intermediate French Composition and Conversation
A course designed to develop the ability to speak, read, and write in French via the reading of French short stories and/or a short novel. Grammar review.
Credit Hours: 3
Prerequisites: FRENCH 2100

FRENCH 2300: French Literature and Thought in English Translation I
This course examines how the masterworks of French literature, from the Middle Ages to the eighteenth century, have influenced Western literary, cultural and philosophical traditions.
Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent

FRENCH 2305: New World Francophone Literature in Translation
Credit Hours: 3
Prerequisites: ENGLSH 1000

FRENCH 2320: French Literature and Thought in English Translation II
This course examines how the masterworks of French literature of the nineteenth and twentieth centuries have influenced Western literary, cultural and philosophical traditions.
Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent

FRENCH 2330: French Literature in Translation III
This course examines how the masterworks of French literature of the nineteenth and twentieth centuries have influenced Western literary, cultural and philosophical traditions.
Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent

FRENCH 2350: New World Francophone Literature in Translation
Credit Hours: 3
Prerequisites: ENGLSH 1000

FRENCH 2370: French Women Writers (in translation)
Survey of texts and contributions of French women writers from the medieval period to the 20th century.
Credit Hours: 3
Prerequisites: sophomore standing

FRENCH 3001: Topics in French-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-3
Prerequisites: sophomore standing, departmental consent for repetition

FRENCH 3004: Topics in French-Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-3
Prerequisites: sophomore standing, departmental consent for repetition

FRENCH 3005: Topics in French-Humanities/Fine Arts
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-3
Prerequisites: sophomore standing, departmental consent for repetition

FRENCH 3005H: Topics in French-Humanities/Fine Arts - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-3
Prerequisites: sophomore standing, departmental consent for repetition. Honors eligibility required

</tbody>
</table>
FRENCH 4430: Seventeenth-Century French Literature
(cross-leveled with FRENCH 7430). Survey of major writers of the seventeenth century. The principal currents of the century as well as the Baroque and the classical movements are discussed. Authors include Corneille, Molieres, Racine, Descartes, Pascal, La Bruyere, La Rochefoucauld, and Madame de Lafayette.

Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4440: Eighteenth-Century French Literature
(cross-leveled with FRENCH 7440). Through systematic and representative readings, this course familiarizes students with the literary trends and intellectual currents of 18th century France. The course includes works by Montesquieu, Voltaire, Rousseau, Laclos, Diderot, Marivaux, Prevost, and Beaumarchais.

Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4450: Nineteenth-Century French Literature
(cross-leveled with FRENCH 7450). Selected readings from poetry and theatre with an emphasis on the various manifestations of Romanticism throughout the century. Works by Lamartine, Hugo, Vigny, Musset, Gautier, Nerval, Baudelaire, Verlaine, and Mallarme are included.

Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4460: Twentieth-Century French Novel
(cross-leveled with FRENCH 7460). The course is a historical survey that deals with three topics: the modernist writings of the early twentieth century. (Proust, Gide, and Colette), existentialism of the mid-century (Sartre, Camus), and contemporary forms of writing (Beckett, Robbe-Grillet, Sarraute, among others).

Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4470: Introduction to the Contemporary French Theatre
Survey of twentieth-century French drama. Students read plays by Claudel, Giraudoux, Sartre, Anouilh, Beckett, Ionesco, Genet, and others. Strong emphasis is played on class discussions. Written analyses of two plays are assigned, and there is an hourly exam and a final.

Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4480: Introduction to Modern French Poetry
Introduction to major currents of French poetry from beginning of the 19th century to the present. Students will write explications of poems, present oral analyses and will be tested on poetic terms and poetic content/styles of various poems and poets.

Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4490: Nineteenth-Century French Novel
(cross-leveled with FRENCH 7490). Study of the three major currents in prose fiction: romanticism, realism, and naturalism. Representative readings from Chateaubriand, Balzac, Stendhal, Flaubert, and Zola are included.

Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4510: African Francophone Literature
Course introduces contemporary African Literature to students via readings and detailed analysis of literary texts by Francophone African writers.

Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4710: History of the French Language
(same as LINGST 4710). Study of the French language from its Latin origin to the present. The course includes a survey of the external social, political, and historical factors that have affected the development of French, followed by a diachronic study of the internal structural features of the language.

Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4720: Structure of Modern French
(same as LINGST 4720). An introductory presentation of the phonological and syntactic systems of contemporary standard French.

Credit Hours: 3
Prerequisites: FRENCH 3160 or equivalent or instructor's consent

FRENCH 4820: Blogging the World: The Web in Cultural Context
(same as GERMAN 4820 and RUSS 4820). Innovative interdisciplinary course addresses issues of access to international news and specific cultural context working in cross-disciplinary teams. Students in journalism, foreign language, international studies, political science and various other disciplines track cultural developments and information on non-US Web sites, blogs and digital social networks along with exploring various historical forms of communication that preceded the digital era of the Web. Students analyze the potential and limitations/ effects of blogs and the web in specific contemporary cultural contexts and as part of the broader historical evolution of the web. The course is taught in English. The goal of this course is two-fold: students learn the particulars of web blogging, explore various features of the contemporary social network landscape while focusing on the concept of culture, in particular the cultures of Europe and the US. Questions asked are: what is culture? What is common or popular right now in other cultures? And how do new social networks amplify or alter certain features or culture across national and international contests?

Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4960: Special Readings in French
Independent study through readings, conferences, reports.

Credit Hour: 1-3
Prerequisites: FRENCH 3420 and FRENCH 3430 and departmental consent
FRENCH 4980: Special Themes in French
Subject varies according to instructor. May be repeated for credit.
Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4993: The Capstone Experience in French
This course is required of all majors. Topics vary but all courses synthesize and review essential components of the major: speaking, writing, reading in French, and the ability to think critically and analytically.
Credit Hours: 3

FRENCH 4993H: The Capstone Experience in French - Honors
This course is required of all majors. Topics vary but all courses synthesize and review essential components of the major: speaking, writing, reading in French, and the ability to think critically and analytically.
Credit Hours: 3
Prerequisites: Honors eligibility required

FRENCH 4996: Honors Reading in French
Directed readings in area of honors thesis.
Credit Hour: 1
Prerequisites: admission to departmental Honors program

FRENCH 7004: Topics in French-Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.
Credit Hour: 1-99

FRENCH 7110: Advanced oral French for Teachers
Advanced speaking practice primarily for teachers with emphasis on pronunciation, syntactical accuracy and vocabulary expansion. May not be used toward Arts and Science Major. May be repeated for a maximum of 12 hours credit.
Credit Hour: 1-99
Prerequisites: FRENCH 3160 or equivalent

FRENCH 7120: Foreign Language Teaching Methodology
(same as SPAN 7120). Theory and techniques of current foreign language methodology and their application in the classroom. Presentation of instructional projects, classroom observations, and strategies for classroom management. May not be used toward Arts and Science major.
Credit Hours: 3

FRENCH 7130: Stylistics
A technical study of French as a means of communication and of self-expression, involving levels of meaning, rhetorical structure, and textual analysis.
Credit Hours: 3
Prerequisites: FRENCH 3160 or FRENCH 3280 and FRENCH 3420 or FRENCH 3430

FRENCH 7140: Modern French Novel
Introduction to major currents of French poetry from beginning of the 19th century to the present. Students will write explications of poems, present oral analyses and will be tested on poetic terms and poetic content/styles of various poems and poets.
Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430
FRENCH 7490: Nineteenth-Century French Novel
(cross-leveled with FRENCH 4490). Study of the three major currents in prose fiction: romanticism, realism, and naturalism. Representative readings from Chateaubriand, Balzac, Stendhal, Flaubert, and Zola are included.

Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 7510: African Francophone Literature
Course introduces contemporary African Literature to students via readings and detailed analysis of literary texts by Francophone African writers.

Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 7710: History of the French Language
(same as LINGST 7710). Required of M.A. candidates.

Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 7720: Structure of Modern French
(same as LINGST 7720). An introductory presentation of the phonological and syntactic systems of contemporary standard French.

Credit Hours: 3
Prerequisites: FRENCH 3160 or equivalent or instructor's consent

FRENCH 7820: Blogging the World: The Web in Cultural Context
(same as RUSS 7820 and GERMAN 7820). Innovative interdisciplinary course addresses issues of access to international news and specific cultural context. Working in cross-disciplinary teams, students in journalism, foreign language, international studies, political science and various other disciplines track cultural developments and information on non-US Web sites, blogs and digital social networks along with exploring various historical forms of communication that preceded the digital era of the Web. Students analyze the potential and limitations/effects of blogs and the web in specific contemporary cultural contexts and as part of the broader historical evolution of the web. The course is taught in English. The goal of this course is two-fold: students learn the particulars of web blogging, explore various features of the contemporary social network landscape while focusing on the concepts of culture, in particular the cultures of Europe and the US. Questions asked are: what is culture? What is common or popular right now in other cultures? And how do new social networks amplify or alter certain features or culture across national and international contexts?

Credit Hours: 3

FRENCH 7960: Special Readings in French
Independent study through readings, conferences, reports.

Credit Hour: 1-3
Prerequisites: departmental consent

FRENCH 7993: The Capstone Experience in French
This course is required of all majors. Topics vary but all courses synthesize and review essential components of the major: speaking, writing, reading in French, and the ability to think critically and analytically.

Credit Hours: 3

FRENCH 8080: Readings in French
Independent readings in preparation for MA or MALT comprehensive examination in French. Graded on A-F basis only.

Credit Hour: 1-3

FRENCH 8085: Problems in French
Problems in French.

Credit Hour: 1-99

FRENCH 8087: Seminar in French
Subject varies according to instructor.

Credit Hour: 2-3

FRENCH 8090: Research in French
Leads to preparation of MA or MALT thesis. Graded on S/U basis only.

Credit Hour: 1-99

FRENCH 8120: Bilingualism and Language Contact
(same as SPAN 8120 and LINGST 8120). Global analysis of the study of Bilingualism from a combined sociocultural, sociolinguistic and psycholinguistic perspective based on current research and examination of various phenomena of language contact (taught in English).

Credit Hours: 3

FRENCH 8411: Old French
Old French.

Credit Hours: 3
Recommended: FRENCH 4710 or FRENCH 7710 and some knowledge of Latin

FRENCH 8412: Studies in French Medieval Literature
Studies in French Medieval Literature.

Credit Hours: 3
Recommended: FRENCH 4410 or FRENCH 7710

FRENCH 8416: Studies in the French Renaissance
Studies in the French Renaissance.

Credit Hours: 3
Recommended: FRENCH 4420 or FRENCH 7420

FRENCH 8417: Studies in Seventeenth-Century French Literature

Credit Hours: 3
Recommended: FRENCH 4430 or FRENCH 7430
FRENCH 8418: Studies in Eighteenth-Century French Literature
Credit Hours: 3
Recommended: FRENCH 4440 or FRENCH 7440

FRENCH 8419: Studies in Nineteenth-Century French Literature
Credit Hours: 3
Recommended: FRENCH 4450 or FRENCH 7450; or FRENCH 4490 or FRENCH 7490

FRENCH 8420: Studies in Twentieth-Century French Literature
Credit Hours: 3
Recommended: FRENCH 4460 or FRENCH 7460, FRENCH 4470 or FRENCH 7470 or FRENCH 4480 or FRENCH 7480

FRENCH 9080: Readings in French
Independent readings in preparation for the PhD comprehensive examination in French.
Credit Hour: 3-6

FRENCH 9090: Research in French
Leads to preparation of PhD dissertation in French. Graded on S/U basis only.
Credit Hour: 1-99

General Human Environmental Sciences (GN_HES)

GN_HES 1100: Introduction to Human Environmental Sciences
Introduction to Human Environmental Sciences
Credit Hour: 1

General Studies (G_STDY)

G_STDY 3301: Topics in General Studies
Experimental and/or interdisciplinary. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-99

G_STDY 4940: Internship in General Studies
Internship limited to students pursuing the Bachelor of General Studies degree. Graded on S/U basis only.
Credit Hour: 1-6

G_STDY 4950: Special Project in General Studies
With advisor's approval, student works with a faculty member on a major reading, research, or creative project, usually of interdisciplinary nature.
Credit Hour: 1-6

G_STDY 4960: Readings in General Studies
Independent readings with supervisory faculty member. May be repeated to a maximum of six hours.
Credit Hour: 1-6
Prerequisites: Open only to General Studies majors

G_STDY 4970: Directed Readings in General Studies
Independent readings with supervisory faculty member; this course serves as the student's capstone experience.
Credit Hour: 1-6
Prerequisites: Open only to General Studies majors only

G_STDY 4971: Internship in General Studies
Internship experience which serves as the student's capstone experience. Program advisor must approve internship. Section 2 of this course will be designated for Service Learning Capstone experience. Graded on S/U basis only.
Credit Hour: 1-6

GEOG 1050: Introductory Meteorology
(same as ATM_SC 1050). Physical processes of atmosphere in relation to day-to-day changes in weather.
Credit Hours: 3

GEOG 1100: Regions and Nations of the World I
Introductory analysis for general education. Regional character, spatial relationships, major problems of Europe, North America (United States and Canada) and Latin America. Organized around basic concepts in field of geography.
Credit Hours: 3

GEOG 1100H: Regions and Nations of the World I - Honors
Introductory analysis for general education. Regional character, spatial relationships, major problems of Europe, North America (United States and Canada) and Latin America. Organized around basic concepts in field of geography.
Credit Hours: 3
Prerequisites: Honors eligibility required

GEOG 1200: Regions and Nations of the World II
Introductory analysis for general education. Regional character, spatial relationships, problems of environment and development of the former Soviet Union, Pacific World, South and East Asia, Africa and Middle East. Organized around basic concepts in the field of geography. May be taken independently of GEOG 1100.
Credit Hours: 3

GEOG 1205H: Regions and Nations General Honors
Credit Hours: 3
Prerequisites: Honors eligibility required

GEOG 1205H: Regions and Nations General Honors
Credit Hours: 3
Prerequisites: Honors eligibility required
GEOG 1550: Introduction to the Humanized Earth
Examines human culture as a geographical element; the power of culture and human institutions in human-environmental interaction and the creation of agriculture, folk culture, popular culture, cities, and a broad range of cultural landscapes.

Credit Hours: 3
Prerequisites: GEOG 1100 or GEOG 1200

GEOG 1600: Climate Change: Science and Public Policy
This course will explore the role of physical science, environmental politics and public policy in shaping contemporary debate concerning climate change, mitigation, and adaptation strategies. We will examine the scientific rationale and statistical basis underwriting the concept of climate change, why aspects of the science remain controversial, the prospects of institutional action and the difficulties inherent in developing public policies targeting mitigation and adaptation. Course includes a role-laying simulation where students will play roles based on 2009 climate negotiations in Copenhagen, Denmark. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: freshman and sophomores only

GEOG 1800: Digital Earth: Introduction to the Geospatial Technologies
Introduction to technologies used to map a changing world, with an emphasis on digital mapping explorations of human and environmental interactions on Earth. Course includes lab and fieldwork to introduce geographic information data collection and analysis techniques. Graded on A/F basis only. May be repeated for credit.

Credit Hours: 3
Prerequisites: Freshman and sophomore standing or instructor's consent

GEOG 1840: Global Environmental Change
Course uses a geographic framework to study patterns and processes related to global environmental change. Topics include environmental reconstruction, water resources, human-environment interactions, glaciers, fire, and climate.

Credit Hours: 3
Prerequisites: freshman or sophomore standing

GEOG 1900: Our Dynamic Planet in Film
This course focuses on using documentary films (e.g., Planet Earth) as a medium for studying how global environmental change is impacting all spheres of our dynamic planet. To ensure a more complete understanding of course material, films are supplemented with active lectures and discussions of assigned readings from both periodicals and peer-reviewed literature that emphasize key points illustrated in the films. In doing so, this course synthesizes material from numerous fields of study that fall under the burgeoning umbrella field of global change ecology. This synthetic approach is used to highlight the formidable linkages on Earth between the non-living and living, thus permitting students to gain an appreciation and holistic understanding of how global environmental change is impacting Earth processes responsible for creating both our current landscapes and the remarkable diversity of life that inhabit them.

Credit Hours: 3

GEOG 2010: Exploring Geography
We are all explorers. As children, we grew up testing the boundaries of our known worlds and trying to understand what was beyond. Geography gives us the means to formalize this impulse to explore the world around us, both local and distant. It allows us to make sense of the ways in which space and relationships between objects drives much of human, social, and environmental interaction. In this course, we will illustrate some of the principle ways in which Geographers investigate, explain, and map meaning, pushing the boundaries of what we know as individuals and society. Using a combination of discussion and field exercises, students will be asked to engage with a number of critical societal issues that have geographical elements at their core. Examples include the Geography of crime, imagining place, the city of the future, environmental change, terrorism, human trafficking, drones, and sustainability.

Credit Hours: 1

GEOG 2100: United States and Canada
Intensive examination of selected areas and distributions. Regional systems, problems and planning.

Credit Hours: 3
Prerequisites: sophomore standing

GEOG 2120: United States and Canada
Credit Hour

GEOG 2130: Geography of Missouri
Physical, human, economic, and political geography of Missouri; regions of the state; geography applied to current state issues.

Credit Hours: 3
Prerequisites: GEOG 1100

GEOG 2140: Geography of Missouri
Credit Hour

GEOG 2150: Introduction to Human Geography
Physical environment and culture in the regional development of South America.

Credit Hours: 3

GEOG 2160: South America
Credit Hour

GEOG 2170: North America
Credit Hour

GEOG 2210: Geography of Europe
Intensive examination of selected areas and distributions. Regional systems, problems and planning.

Credit Hours: 3
Prerequisites: sophomore standing

GEOG 2240: Geography of Europe
Credit Hour

GEOG 2260: Geography of East Asia
Cultural, physical and economic geography of China, Japan, and Korea, with emphasis on China. Landscape analysis, determination of regional identities, and study of political forces evident in the development of the contemporary scene are stressed.

Credit Hours: 3
Prerequisites: GEOG 1200

GEOG 2270: Geography of Asia
Credit Hour

GEOG 2300: Geography of Asia
Credit Hour

GEOG 2340: South America
Physical environment and culture in the regional development of South America.

Credit Hours: 3
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 2450</td>
<td>Themes in the Geography of Africa South of the Sahara (same as BL_STU 2450)</td>
<td>Major concepts of African geography in current and historical perspective. Case studies of major African countries.</td>
</tr>
<tr>
<td>GEOG 2580</td>
<td>Geography of Cemeteries</td>
<td>Cemeteries have a discernible spatial and temporal pattern providing a foundation for geographical study. Migration, demographics, spatial analysis and basic mapping skills will be used to investigate cemeteries and their pattern.</td>
</tr>
<tr>
<td>GEOG 2610</td>
<td>Climate, Landforms and Vegetation: Introduction to Physical Geography</td>
<td>Examination of the interacting natural systems that comprise the Earth’s physical environment, including the atmosphere, biosphere, and landforms. Focus on relating fundamental physical, chemical and ecological processes to the global geographic patterns they produce.</td>
</tr>
<tr>
<td>GEOG 2660</td>
<td>Environmental Geography</td>
<td>Historical perspectives on the human agency in transforming the earth, with emphasis on international environmental problems. Topics include basic biogeography; environmental impacts of population growth, underdevelopment and overdevelopment; and new approaches to management of global resources.</td>
</tr>
<tr>
<td>GEOG 2710</td>
<td>Economic Geography</td>
<td>Geographical location and organization of world’s major economic activities. Emphasizes agricultural and industrial patterns, commodity flows, transport networks, geographical principles of market and industrial location, internal spatial organization of cities, land-use models, geographic aspects of economics growth.</td>
</tr>
<tr>
<td>GEOG 2720</td>
<td>The City</td>
<td>Study of cities: origin, development, distribution; social, economic, and demographic significance. Consideration of theories of structure, urban hierarchies, and land use planning.</td>
</tr>
<tr>
<td>GEOG 2904</td>
<td>Topics in Geography-Social Science</td>
<td>Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.</td>
</tr>
<tr>
<td>GEOG 3040</td>
<td>Introduction to Geographic Information Systems GIS (same as CV_ENG 3050)</td>
<td>Introduces theory, concepts and techniques related to the creation, manipulation, processing, and basic analysis of spatial data using GIS. Data management, current data models, GIS applications and course topics are reinforced through hands-on computer laboratory exercises.</td>
</tr>
<tr>
<td>GEOG 3140</td>
<td>Mexico, Central America, and the Caribbean</td>
<td>Physical environment and culture in the regional development of Mexico, Central America, and the Caribbean.</td>
</tr>
<tr>
<td>GEOG 3260</td>
<td>Southeast Asia (same as S_A_ST 3260)</td>
<td>Physical, cultural, historical and regional geography of Southeast Asia, with an introduction to East Asian geography. Emphasizes the problems of tradition and development.</td>
</tr>
<tr>
<td>GEOG 3270</td>
<td>Geography of the Middle East</td>
<td>Cultural, physical and historical geography of Middle East, with emphasis on cultural adaptations to environments and conflicts over the resources.</td>
</tr>
<tr>
<td>GEOG 3280</td>
<td>Geography of South Asia (same as S_A_ST 3280)</td>
<td>Topical and regional analysis of India, Pakistan, Sri Lanka. Historical development of distinctive cultural regions. Relations with neighboring areas. Impact of Westernization on economic activities, settlements, population.</td>
</tr>
<tr>
<td>GEOG 3290</td>
<td>Geography of Russia and the Newly Independent States of Eurasia</td>
<td>Geographic analysis of social, economic and political issues confronting Russia and the NIS, including environmental problems, economic interdependence and prospects for regional economic development, population change and migration, inter-ethnic relations and ethno-territorial conflict.</td>
</tr>
<tr>
<td>GEOG 3385</td>
<td>Special Problems in Geography</td>
<td>Independent investigation leading to a paper or project. May be repeated to a maximum of 6 hours.</td>
</tr>
<tr>
<td>GEOG 3450</td>
<td>Geography of Africa</td>
<td>Major concepts of African geography in current and historical perspective.</td>
</tr>
<tr>
<td>GEOG 3685</td>
<td>Special Problems in Geography</td>
<td>Independent investigation leading to a paper or project. May be repeated to a maximum of 6 hours.</td>

</tbody>
</table>
GEOG 3496: Digital Indigenous Studies
(same as PEA_ST 3496). This course introduces students to Indigenous studies in a digital world. The course begins with study of Indigenous sovereignty and representation, and moves quickly to critical and theoretical readings in new media, tracing both the historical impact of digital technologies (such as GIS) on Native communities, and the ways that both urban and rural Native communities have engaged in innovative digital projects that expand the way we understand information and storytelling in digital environments. The course materials will cover a wide range of platforms and audio-visual genres, from documentary, community video, and animation productions, to GIS, video games, and social media sites. Students will engage with both scholars and artists working with new media through a program of public lectures, classroom visits, and Skype interviews. All interview will be archived as podcasts from the course website. Students will write weekly short response papers and produce independent audio-visual projects over the course of the semester, with opportunities to revise their work leading up to substantial final projects. The course will also integrate community outreach into the curriculum through online participation of students from the Kiowa Kids, an Indigenous language immersion and storytelling program.
Credit Hours: 3

GEOG 3496H: Digital Indigenous Studies - Honors
(same as PEA_ST 3496H). This course introduces students to Indigenous studies in a digital world. The course begins with study of Indigenous sovereignty and representation, and moves quickly to critical and theoretical readings in new media, tracing both the historical impact of digital technologies (such as GIS) on Native communities, and the ways that both urban and rural Native communities have engaged in innovative digital projects that expand the way we understand information and storytelling in digital environments. The course materials will cover a wide range of platforms and audio-visual genres, from documentary, community video, and animation productions, to GIS, video games, and social media sites. Students will engage with both scholars and artists working with new media through a program of public lectures, classroom visits, and Skype interviews. All interview will be archived as podcasts from the course website. Students will write weekly short response papers and produce independent audio-visual projects over the course of the semester, with opportunities to revise their work leading up to substantial final projects. The course will also integrate community outreach into the curriculum through online participation of students from the Kiowa Kids, an Indigenous language immersion and storytelling program.
Credit Hours: 3
Prerequisites: Honors eligibility required

GEOG 3510: Historical Geography of North America
Analysis of selected geographical patterns and themes in the continent’s past. Focus is explicitly geographical, stressing extensive use of maps and recent scholarly work by historical geographers.
Credit Hours: 3
Prerequisites: junior standing, or instructor’s consent

GEOG 3540: Geographies of Sexualities
(Same as WGST 3540) This class will explore the relationship of sexuality and space. The class will focus on the ways that sexuality creates particular spaces, and the ways that sexuality and space shape one another in the midst of nation, gender, religion, race, class, and generation.
Credit Hours: 3
Prerequisites: Sophomore standing required

GEOG 3560: Native American Geographies
A survey of the Native American geographies in the United States. Historical and contemporary topics are covered employing cross-cultural perspectives including some philosophical views of the Earth and society, sense of place, memory, sacred land, colonialism and GIS representations, and natural resources.
Credit Hours: 3

GEOG 3600: Climates of the World
(same as ATM_SC 3600). A study of the world distribution of climates based on “cause and effect” relationships. Special attention is given to the impacts of climate on humanity.
Credit Hours: 3
Prerequisites: GEOG 1050 or equivalent or graduate standing

GEOG 3610: Physical Geography of the United States
Study of natural regions of the United States by integrating topics from landforms, geology, climate, soils, vegetation, resources, and land use.
Credit Hours: 3
Prerequisites: GEOG 2610

GEOG 3630: Earth Surface Systems
Systematic study of landforms geomorphic processes governing them. Provides a foundation for the theoretical, technical, and practical understanding of environmental systems.
Credit Hours: 3
Prerequisites: GEOG 2610 and junior standing or instructor’s consent

GEOG 3740: Geography and Planning
Emphasis on geographic techniques for gathering and generating environmental information for planners. Principles of land use planning will be applied to selected regions.
Credit Hour: 1-3
Prerequisites: GEOG 2840 and instructor’s consent

GEOG 3760: Geography of the World’s Religions
(same as REL_ST 3760). Explores the significance of place in the origin, diffusion, distribution and practice of religions, emphasizing imprints of religion on the cultural landscape and connections between culture, politics, economics, and religion.
Credit Hours: 3
Prerequisites: 1000/2000 level Geography course; junior standing or instructor’s consent
GEOG 3780: World Political Geography: Patterns and Processes
(same as PEA_ST 3780). Geographic factors in the development of political boundaries traditions, and societal perspectives. Spatial patterns and geopolitical processes are explored in selected regions of the world.

Credit Hours: 3
Prerequisites: GEOG 1100 or GEOG 1200 or sophomore standing

GEOG 3800: Geography of Travel and Tourism
This course examines the fundamentals of the geography of tourism and travel in both foreign and domestic contexts. During the past few decades, tourism has been a fast growing industry around the world, although tourism can easily be negatively influenced by terrorism, natural disasters, and economic downturns. During the semester we'll look at several common types of tourism and focus on the positive and negative impacts of tourism upon local cultures, the environment, and economic development. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: GEOG 1100 or GEOG 1200 or sophomore standing

GEOG 3830: Remote Sensing
Introduction to the principles of remote sensing of the environment. Digital imagery from spacecraft, conventional and high-altitude aerial photography, thermal imaging, and microwave remote sensing.

Credit Hours: 3
Prerequisites: GEOG 2840 and instructor’s consent

GEOG 3840: Cartography
Principles of computer-assisted cartography. Automated cartographic display. "Hands on" experience with computer-mapping software and hardware systems. Role of computers in map design. Digital encoding of geographic data.

Credit Hours: 3
Prerequisites: GEOG 2840

GEOG 3904: Topics in Geography - Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated up to 6 hours credit with departmental consent.

Credit Hour: 1-12
Prerequisites: sophomore standing

GEOG 4130: The Geospatial Sciences in National Security
(Same as CV_ENG 4175). This course explores the critical contribution of the geospatial sciences in the collection, processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.

Credit Hours: 3
Prerequisites: junior standing or above required; instructor’s consent

GEOG 4390: Special Readings in Geography
Independent readings selected in consultation with supervisory faculty member. May be repeated to a maximum of 6 hours.

Credit Hour: 1-3
Prerequisites: instructor’s consent and independent study contract

GEOG 4520: Environmental Biophysics
(same as ATM_SC 4520). Students will learn techniques and principles used to describe the microenvironment of living organisms and use quantitative expressions to estimate missing values, and mass transfer laws to estimate flux of energy, water and gas.

Credit Hours: 3
Prerequisites: College Physics and Calculus I

GEOG 4550: Selected Themes in Cultural Geography
Case studies in the patterns and processes of human-environmental interactions. Study of the cultural forces responsible for the continual transformation of the earth's cultural landscapes.

Credit Hours: 3

GEOG 4560: Resources and Indigenous Peoples
This is a survey of indigenous peoples' struggle to control and use natural resources, to have a say in determining the path of economic development, and to restrain the destructive tendencies of colonialism and capitalism, challenging traditional state-to-state relations.

Credit Hours: 3
Prerequisites: Junior standing required

GEOG 4620: Biogeography: Global Patterns of Life
Analysis of the patterns and processes of plant distribution in the contemporary landscape, stressing environmental influences and vegetation dynamics, particularly as they relate to North American vegetation.

Credit Hours: 3
Prerequisites: GEOG 2610 and junior standing, or instructor’s consent

GEOG 4630: River and Stream Dynamics
Systematic study of river mechanics, stream-channel form, river management and restoration. Provides a theoretical and practical understanding of stream systems.

Credit Hours: 3
Prerequisites: GEOG 2610 and GEOG 3630, or instructor’s consent

GEOG 4710: Spatial Analysis in Geography
Application of statistical methods to geographic research. Prepares students to utilize advanced methodologies and models in spatial analysis. Includes computer analysis of geographical data. Math Reasoning Proficiency Course

Credit Hours: 3
Prerequisites: MATH 1100 or MATH 1120

GEOG 4720: Seminar in Geography Education
Study and research on fundamental themes in geography. Integration of these themes into regional and systematic approaches to the teaching of geography. Enrollment is restricted to students pursuing or considering careers in teaching.

Credit Hours: 3
Prerequisites: junior standing and instructor’s consent
GEOG 4740: Location Analysis and Site Selection
(same as CV_ENG 4185). An overview of location analysis in regional planning and spatial decision support, this course focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. May be repeated for credit.
Credit Hours: 3

GEOG 4770: Migration and Immigration
Explores demographic, economic, and social issues surrounding immigration and migration. The course focuses on the global labor migration system, immigration to the United States, and internal migration within the US, as well as the linkages between these systems.
Credit Hours: 3

GEOG 4780: Selected Themes in Political Geography
Study of basic writing, dominant geographers, case studies, bibliographies and development of research methods.
Credit Hours: 3

GEOG 4790: Geographic Information Systems for the Social Sciences
Designed for social science students interested in learning about the tools available in GIS for linking to and analyzing spatial qualitative data. Uses multiple data sources (qualitative and quantitative), applied within a social context, using spatial investigation procedures to detect geographical trends in data sets. Primary focus is on how GIS can enhance social science research.
Credit Hours: 3
Prerequisites: juniors and seniors only

GEOG 4810: Landscape Ecology and GIS Analysis I
(same as NAT_R 4385). Examination of the landscape-scale approach to biodiversity, ecosystem dynamics, and habitat management. Particular emphasis on the use of Geographic Information Systems to analyze the spatial dimension of ecological patterns and processes.
Credit Hours: 3
Prerequisites: GEOG 3040, or instructor’s consent

GEOG 4850: Transportation Geography
(same as CV_ENG 4155). Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.
Credit Hours: 3

GEOG 4860: Advanced Remote Sensing
Advanced remote sensing to provide digital image processing techniques for satellite and airborne imagery; emphasis on spatial/spectral analysis, image classification and land use/land cover change detection. Class project heavily involved.
Credit Hours: 3
Prerequisites: GEOG 3830

GEOG 4904: Topics in Geography-Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-12
Prerequisites: junior standing and instructor’s consent; departmental consent for repetition

GEOG 4940: Advanced Geographic Information Systems (GIS II)
(cross-leveled with GEOG 7940). Advanced study of geographic and spatial analysis and modeling utilizing Geographic Information Systems technology. Focus on project management, research applications, and geostatistical analysis through independent research projects.
Credit Hours: 3
Prerequisites: GEOG 3040 or instructor’s permission

GEOG 4990: Senior Seminar in Geography
A seminar in selected themes in Geography. Class will focus on research, writing, presenting, and discussing themes in contemporary geography. Required of all majors prior to graduation.
Credit Hours: 3
Prerequisites: 5 courses in geography or instructor’s consent

GEOG 7130: The Geospatial Sciences in National Security
(Same as CV_ENG 7175). This course explores the critical contribution of the geospatial sciences in the collection, processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.
Credit Hours: 3
Prerequisites: Honors eligibility required

GEOG 7520: Meteorology of the Biosphere
(same as ATM_SC 7520). Energy balance and mass transfer microenvironment of plants and animals. Effects of weather events on plants and animal production discussed.
Credit Hours: 3
GEOG 7550: Selected Themes in Cultural Geography
Case studies in the patterns and processes of human-environmental interactions. Study of the cultural forces responsible for the continual transformation of the earth’s cultural landscapes.
Credit Hours: 3

GEOG 7560: Resources and Indigenous Peoples
This is a survey of indigenous peoples’ struggle to control and use natural resources, to have a say in determining the path of economic development, and to restrain the destructive tendencies of colonialism and capitalism, challenging traditional state-to-state relations.
Credit Hours: 3

GEOG 7620: Biogeography: Global Patterns of Life
Analysis of the patterns and processes of plant distribution in the contemporary landscape, stressing environmental influences and vegetation dynamics, particularly as they relate to North American vegetation.
Credit Hours: 3
Prerequisites: GEOG 2610 or instructor’s consent

GEOG 7630: River and Stream Dynamics
Systematic study of river mechanics, stream-channel form, river management and restoration. Provides a theoretical and practical understanding of stream systems.
Credit Hours: 3
Prerequisites: GEOG 2610 and GEOG 3630, or instructor’s consent

GEOG 7690: Seminar in Geography Education
Study and research on fundamental themes in geography. Integration of these themes into regional and systematic approaches to the teaching of geography. Enrollment is restricted to students pursuing or considering careers in teaching.
Credit Hours: 3
Prerequisites: instructor’s consent

GEOG 7700: Migration and Immigration
As fertility and mortality decline to record low levels, immigration and migration have become the primary components of population change. Changes brought on by immigration to a country and the internal redistribution of population via migration pose challenges to governments, economic development, social and cultural relations, and environmental sustainability. This course explores issues surrounding immigration and migration. Beginning with the demographic overview of immigration, it focuses on the challenges faced by immigrant, sending, and receiving nations in the global migration system. The second part of the course focuses on the array of issues surrounding immigration to the United States, including the socio-economic adaptation of immigrants, the economic and cultural impacts of immigration, and illegal immigration. The third part of the course focuses on internal migration within migration within the US, discussing topics such as migration to the Sunbelt, Great Plains depopulation, poverty migration, migration to the suburbs, and migration’s impact on community. Linkages between domestic migration and immigration will also be explored.
Credit Hours: 3

GEOG 7710: Spatial Analysis in Geography
Application of statistical methods to geographic research. Prepares students to utilize advanced methodologies and models in spatial analysis. Includes computer analysis of geographical data.
Credit Hours: 3
Prerequisites: MATH 1100 or MATH 1120

GEOG 7720: Seminar in Geography Education
Study and research on fundamental themes in geography. Integration of these themes into regional and systematic approaches to the teaching of geography. Enrollment is restricted to students pursuing or considering careers in teaching.
Credit Hours: 3
Prerequisites: instructor’s consent

GEOG 7740: Location Analysis and Site Selection
(Same as CV_ENG 7185). An overview of location analysis in regional planning and spatial decision support, this course focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. May be repeated for credit.
Credit Hours: 3

GEOG 7750: Selected Themes in Cultural Geography
Case studies in the patterns and processes of human-environmental interactions. Study of the cultural forces responsible for the continual transformation of the earth’s cultural landscapes.
Credit Hours: 3

GEOG 7760: Resources and Indigenous Peoples
This is a survey of indigenous peoples’ struggle to control and use natural resources, to have a say in determining the path of economic development, and to restrain the destructive tendencies of colonialism and capitalism, challenging traditional state-to-state relations.
Credit Hours: 3

GEOG 7780: Selected Themes in Political Geography
Study of basic writing, dominant geographers, case studies, bibliographies and development of research methods.
Credit Hours: 3

GEOG 7790: Geographic Information Systems for the Social Sciences
Designed for social science students interested in learning about the tools available in GIS for linking to an analyzing spatial qualitative data. Uses multiple data sources (qualitative and quantitative), applied within a social context, using spatial investigation procedures to detect geographical trends in data sets. Primary focus is on how GIS can enhance social science research.
Credit Hours: 3

GEOG 7810: Landscape Ecology and GIS Analysis I
(same as NAT_R 7385). Examination of the landscape-scale approach to biodiversity, ecosystem dynamics, and habitat management. Particular emphasis on the use of Geographic Information Systems to analyze the spatial dimension of ecological patterns and processes.
Credit Hours: 3

GEOG 7840: Geographic Information Systems I
Introductory study of theory, concepts and techniques related to basic analysis, creation and processing of geographic and spatial data using Geographic Information Systems (GIS). Independent learning and computer-based laboratory exercises supplement theoretical lectures and discussion.
Credit Hours: 3

GEOG 7850: Transportation Geography
(same as CV_ENG 7155). Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include

</table>

Prerequisites vary for each course depending on the specific requirements set by the department.
Applied project in remote sensing. Data selection, image processing, land use and land cover change, and quantitative biophysical information extraction from remotely sensed data.
Credit Hours: 3
Prerequisites: GEOG 4830 or instructor's consent

GEOG 8902: Topics in Geography-Biological/Physical/Mathematical
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.
Credit Hours: 1-3
Prerequisites: instructor's consent

Geology (GEOL)

GEOL 1050: Planet Earth
An introduction to Earth Science. Topics include: evidence for continental drift and plate tectonics, causes and prediction of natural hazards, the scale of geological time.
Credit Hours: 3

GEOL 1100: Principles of Geology with Laboratory
Three lectures, 2-hours lab. Earth processes and products and their impact on human needs and the environment. One field trip.
Credit Hours: 4

GEOL 1100H: Principles of Geology with Laboratory - Honors
Three lectures, 2-hours lab. Earth processes and products and their impact on human needs and the environment. One field trip.
Credit Hours: 4
Prerequisites: Honors eligibility required

GEOL 1150: Physical Geology for Scientists and Engineers
Introduction to physical geology and basic earth processes with a focus on applications and societal relevance. In addition to basic geologic processes, basic physical principles will illustrate the interactions between geology and engineering.
Credit Hours: 4
Prerequisites: MATH 1500. Instructor's consent required

GEOL 1200: Environmental Geology with Laboratory
The interaction between geologic processes and human society. Topics include mineral, water, and energy resources, volcanic hazards, earthquakes, landslides, floods, coastal erosion, pollution problems and environmental management.
Credit Hours: 4

GEOL 1250: The World's Oceans
An interdisciplinary introduction to oceanography. Topics include: geologic evolution of ocean basins, properties of seawater, ocean circulation (waves, tides, and currents), marine ecosystems, instability of beaches and coastlines, coastal development and engineering.

GEOL 1400: Themes in Geology
5-week course organized around a central theme or topic, up to 3 different sections can be taken for credit.
Credit Hour: 1

GEOL 2100: Independent Study in Geology
Directed Library research in geological topics, under the supervision of faculty sponsor. May be repeated for a maximum of 3 hours credit.
Credit Hour: 1-3
Prerequisites: instructor's consent

GEOL 2110: Introduction to Soil Science with Laboratory
(same as SOIL 2110). Introduction to Soil Science with emphasis placed on physical, biological, and chemical properties and applications to land use, plant growth, and environmental problems with laboratory application of these concepts.
Credit Hours: 5
Prerequisites: CHEM 1320

GEOL 2120H: Faults and Earthquakes: Past, Present, and Future
Seminar in science and societal ramifications of earthquakes. Geologic background includes causes, behavior, and distribution of faults. Student-led discussions cover historical disasters, economic, political, psychological, and cultural perspectives.
Credit Hours: 3
Prerequisites: ENGLSH 1000 and Honors eligibility required

GEOL 2150: The Age of the Dinosaurs
Study of the evolution of dinosaurs during the Mesozoic Era. New information on dinosaur life habits, food resources, dispersal by plate tectonics, and theories of extinction will be covered.
Credit Hours: 3
Prerequisites: 1000-level science course

GEOL 2160H: Volcanoes and the Human Environment - Honors
(same as GN_HON 2450H). This course gives students an understanding of how volcanoes work, how they are studied, and how they have impacted human cultures. Students will gain appreciation of volcanology as a broad scientific discipline within geology and the role that science plays in public policy. Graded on A/F basis only.
Credit Hours: 3
Prerequisites: Honors eligibility required

GEOL 2200: Oceanography
Topics include: history and methods of marine research, properties of seawater, ocean circulation, biological productivity and zonation, origin and classification of marine sediments, character of major coastal and open-ocean environments, economic resources and environmental hazards. Math Reasoning Proficiency Course.
Credit Hours: 3
Prerequisites: MATH 1100 or MATH 1120
GEOL 2220H: Honors Seminar: Headline Topics in the Geological Science
Seminar organized around a central theme that is the focus of intense ongoing research and public debate.
Credit Hours: 3
Prerequisites: ENGLISH 1000 and Honors eligibility required

GEOL 2300: Earth Systems and Global Change
Study of the earth as a whole, taking into account the many interwoven components of the geosphere, hydrosphere, atmosphere and biosphere.
Credit Hours: 3
Prerequisites: 1000-level Science course

GEOL 2350: Historical Geology
Summary of principles and techniques used in reconstructing Earth’s history. Survey of major events that have affected Earth and its inhabitants. Review of geologic history of North America.
Credit Hours: 3
Prerequisites: GEOL 1100 or GEOL 1200 and ENGLISH 1000

GEOL 2360: Historical Geology Laboratory
A laboratory course designed to improve understanding of Earth History by examination of maps and mineral, rock, sediment and fossil samples.
Credit Hour: 1
Prerequisites: GEOL 1100 or GEOL 1200
Corequisites: GEOL 2350

GEOL 2400: Surficial Earth Processes and Products with Laboratory
Semiquantitative analysis of geologic processes that shape the earth’s surface. Includes topics in sedimentation and geomorphology.
Credit Hours: 4
Prerequisites: GEOL 1100 OR GEOL 1200 and MATH 1100 or MATH 1120

GEOL 2450: Global Water Cycle
Study of environmental geochemical factors controlling the composition of natural waters, and sources of water’s constituents (natural or human-produced). Math Reasoning Proficiency Course.
Credit Hours: 3
Prerequisites: GEOL 1100 or GEOL 1200 and MATH 1100 or MATH 1120

GEOL 2500: Regional Geology Field Trip
Field based study of a particular geologic region, including classroom preparation prior to the field trip. The trip will last 7-10 days, either during Spring Break or immediately after finals week. May be repeated for credit.
Credit Hours: 3
Prerequisites: GEOL 1100 or GEOL 1200

GEOL 2600: Mineral and Energy Resources of the Earth
This course examines the geology of Earth’s major mineral and energy resources—their origin, distribution, and characteristics—and societal implications of their use and abundance. Major topics: fossil fuels, nuclear energy, base & precious metals, non-metallic minerals, water.
Credit Hours: 3
Prerequisites: GEOL 1100 or GEOL 1200

GEOL 3085: Problems in Geological Sciences
Credit Hour: 1-5
Prerequisites: instructor’s consent

GEOL 3110: Geology of Missouri
The physical, historical, and environmental geology of Missouri are described, discussed and interpreted.
Credit Hours: 3
Prerequisites: ENGLISH 1000 and either GEOL 1100 or GEOL 1200

GEOL 3115: Geology of Missouri Laboratory
A field based and laboratory based course that uses standard geological techniques to interpret the rock record of Boone County and Missouri.
Credit Hour: 1
Corequisites: GEOL 3110

GEOL 3200: Rocks and Rock-Forming Minerals: Identification, Occurrence and Origin
Introduction to the classification, occurrence, and origin of rocks and rock-forming minerals.
Credit Hours: 3
Prerequisites: GEOL 1100 or GEOL 1200 and CHEM 1310

GEOL 3210: Rocks and Rock-Forming Minerals Laboratory
Identification of rock-forming minerals and rocks in hand specimen by their physical properties.
Credit Hour: 1
Corequisites: GEOL 3200

GEOL 3250: Mineralogy
Introduction to crystallography, crystal chemistry and crystal structures. Systematic study of mineral groups. Includes identification of minerals by physical, chemical and optical properties.
Credit Hours: 5
Prerequisites: CHEM 1310

GEOL 3300: Introduction to Geochemistry
Credit Hours: 3
Prerequisites: CHEM 1330 (may be co-enrolled), MATH 1400 or MATH 1500, and GEOL 1100 or GEOL 1200, or instructor’s consent

GEOL 3800: Sedimentology with Lab
Mechanics of sediment transport by fluid flow and gravity flow, origins of stratification and sedimentary structures, facies characteristics depositional environments.
Credit Hours: 4
Prerequisites: GEOL 2350 and GEOL 2400 and either GEOL 3250 or GEOL 3200 and GEOL 3210

GEOL 4002: Topics in Geological Sciences-Biological/Physical/Mathematics
Organized study of selected topics. Subjects and earnable credit may vary. May be repeated with departmental consent.
Credit Hour: 1-99
Prerequisites: instructor’s consent

GEOL 4100: Groundwater Hydrology
Analysis of groundwater occurrence, flow, recovery, and solute transport within shallow levels of the Earth’s crust.
Credit Hours: 3
Prerequisites: GEOL 1100 or GEOL 1200, PHYSCS 1210, MATH 1400 or MATH 1500

GEOL 4110: Karst Hydrology
The hydrology of karst terrains is taught from the perspective of integrated drainage basins. Discussion addresses the origin and hydrogeology of karst aquifers and the biology of the animals that live in karstic aquifers.
Credit Hours: 3
Prerequisites: instructor’s consent

GEOL 4120: Engineering Geology
Fundamentals of earth materials and geological processes and their applications in engineering works and environmental sciences. Includes properties of minerals and rocks, rock and soil mechanics, surficial geological processes, and practice of engineering.
Credit Hours: 3
Prerequisites: GEOL 1100 or GEOL 1200 and MATH 1700 or MATH 2100, or instructor’s consent

GEOL 4130: Groundwater Modeling
Use of leading groundwater flow and contamination modeling software. Theory of groundwater flow, solute transport, and selected numerical solution techniques. Applications to water resource, environmental, and geological problems.
Credit Hours: 3
Prerequisites: GEOL 4100 or equivalent

GEOL 4150: Structural Geology
The mechanical behavior of earth materials. Analysis of the geometry and mechanics of faults, fractures, and folds. Laboratory includes problems on stresses and strains associated with deformation, geometric analysis of deformation structures, and interpretation of geologic maps.
Credit Hours: 4
Prerequisites: GEOL 1100 or GEOL 1200 and MATH 1500 or MATH 1400

GEOL 4180: Solar System Science
(same as PHYSCS 4180 and ASTRON 4180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.
Credit Hours: 3
Prerequisites: MATH 1700 and PHYSCS 1220 or PHYSCS 2760 or instructor’s consent

GEOL 4200: Economic Geology with Laboratory
Geochemistry of ore deposits. Introduction to types of mineral deposits, genesis of ore, and current areas of research. Laboratory emphasizes hand-specimen and polished-section studies of a wide variety of ore deposit types.
Credit Hours: 4
Prerequisites: GEOL 4900

GEOL 4210: Marine Geology
Comprehensive examination of the geology of the oceans. Topics includes techniques of data collection and interpretation, physical oceanography, origin of marine sediments, marine tectonics, and ocean history.
Credit Hours: 3
Prerequisites: GEOL 3800 CHEM 1330 and PHYSCS 1220

GEOL 4300: Introduction to Low-Temperature Geochemistry
Introduction to the chemical alteration of rock-forming minerals in weathering environments and to factors controlling the chemical composition of subsurface water.
Credit Hours: 3
Prerequisites: GEOL 3300 or instructor’s consent

GEOL 4318: Environmental Soil Chemistry
(same as SOIL 4318 and ENV_SC 4318). Study of chemical constituents and processes occurring in soils. Topics include soil minerals and weathering processes, organic matter, solution chemistry, oxidation-reduction reactions and adsorption processes.
Credit Hours: 3
Prerequisites: SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330. Junior standing or instructor’s consent

GEOL 4318: Environmental Soil Chemistry
Topics include chemistry of petroleum-forming reactions and their kinetic parameters; use of organic-chemical criteria in source-rock evaluation; carbon isotope fractionation in organic precursors of biological molecules; early history of earth’s atmosphere.
Credit Hours: 3
Prerequisites: GEOL 3300 or instructor’s consent

GEOL 4400: Geomicrobiology and Microbial Biogeochemistry
Roles of microbes in a variety of geological settings through time. Microbial roles in degradation of organic pollutants and transformation of toxic metals and radionuclides in contaminated environments.
Credit Hours: 3
Prerequisites: GEOL 3300 or instructor’s consent

GEOL 4500: Organic Geochemistry
Topics include chemistry of petroleum-forming reactions and their kinetic parameters; use of organic-chemical criteria in source-rock evaluation; carbon isotope fractionation in organic precursors of biological molecules; early history of earth’s atmosphere.
Credit Hours: 3
Prerequisites: instructor’s consent
GEOL 4550: Introduction to Paleontology with Laboratory
Study of the morphology, paleontology, patterns of evolution, and causes of extinction in geologically important groups of invertebrate and vertebrate fossils. Lab concentrates on identification of biostratigraphically important fossils (mostly invertebrates). Several half-day field trips.
Credit Hours: 4
Prerequisites: GEOL 1100 or GEOL 1200

GEOL 4650: Plate Tectonics
Formation, evolution, and structure of the earth. Rules, causes, and implications of plate tectonics with emphasis on present-day features.
Credit Hours: 3
Prerequisites: GEOL 3250, or GEOL 4150 or instructor’s consent

GEOL 4680: Neotectonics and Earthquake Geology
Introduction to techniques and concepts of active crustal deformation from the geological and geodetic perspectives. Topics include tectonic geomorphology, paleoseismology, Quaternary dating, tectonic geodesy, numerical models of faults, and earthquake hazard assessment.
Credit Hours: 3
Prerequisites: GEOL 4650 or GEOL 4150 and instructor’s consent

GEOL 4700: Theoretical Geochemistry
Introduction to theoretical concepts in low and high temperature geochemistry. Topics include thermodynamics of fluids, gases and solids in geological materials, phase diagrams, equilibrium constants, electrolyte theory, oxidation-reduction reactions.
Credit Hours: 3
Prerequisites: GEOL 3250, CHEM 1330 and MATH 1700

GEOL 4800: Introduction to Geophysics
Introduction to the fundamentals of geophysical methods and their applications in geology, environmental studies, and exploration. Topics include seismic, gravity, magnetic, and electric methods.
Credit Hours: 3
Prerequisites: PHYSCS 1210 or PHYSCS 2750 and MATH 1700

GEOL 4900: Igneous and Metamorphic Petrology with Laboratory
Introduction to igneous and metamorphic rock associations and rock-forming processes. Emphasis on understanding the evolution of the Earth in view of igneous and metamorphic rock petrogenesis.
Credit Hours: 4
Prerequisites: GEOL 3250 and GEOL 3300

GEOL 4950: Senior Thesis
Research conducted in an area of the Geological Sciences under the auspices of a member of the faculty. Under normal circumstances, this research should be completed over two semesters. May be repeated for a maximum of 3 hours credit.
Credit Hour: 1-3

GEOL 4990: Communicating in the Earth Sciences
Synthesis of Geology curriculum through study of classic Earth Science papers. Emphasizes critical analysis of scientific papers, data interpretation, science writing and oral presentations. Satisfies Capstone for BA in Environmental Geology.
Credit Hours: 3
Prerequisites: GEOL 3800 and senior standing or instructors permission

GEOL 4991: Capstone in Environmental Geology
Readings and discussions in selected areas of environmental geology. Subject depends on instructor. 3 credit hour Capstone must be completed unless student completes a Senior Thesis. In that case, Capstone + Senior Thesis credit hours must equal 3.
Credit Hour: 1-3
Prerequisites: Restricted to Environmental Geology students

GEOL 4992: Field Course
Credit Hours: 6
Prerequisites: GEOL 2350, GEOL 4150, and GEOL 3800

GEOL 7100: Groundwater Hydrology
Analysis of groundwater occurrence, flow, recovery, and solute transport within shallow levels of the Earth's crust.
Credit Hours: 3
Prerequisites: GEOL 1100 or GEOL 1200, PHYSCS 1210, MATH 1400 or MATH 1500

GEOL 7110: Karst Hydrology
Study of the mechanisms of groundwater flow in Karst terrains. Emphasizing several scales including that of a conduit, a catchment, and regional framework.
Credit Hours: 3
Prerequisites: GEOL 1100 or GEOL 1200, PHYSCS 1210, MATH 1400 or MATH 1500

GEOL 7120: Engineering Geology
Fundamentals of earth materials and geological processes and their applications in engineering works and environmental sciences. Includes properties of minerals and rocks, rock and soil mechanics, surficial geological processes, and practice of engineering.
Credit Hours: 3
Prerequisites: instructor’s consent
Credit Hours: 3
Prerequisites: GEOL 1100 or GEOL 1200 and MATH 1700 or MATH 2100, or instructor’s consent

GEOL 7130: Groundwater Modeling
Use of leading groundwater flow and contamination modeling software. Theory of groundwater flow, solute transport, and selected numerical solution techniques. Applications to water resource, environmental, and geological problems.
Credit Hours: 3
Prerequisites: GEOL 1100 or GEOL 1200 and MATH 1700 or MATH 2100, or instructor’s consent

GEOL 7150: Structural Geology
The mechanical behavior of earth materials. Analysis of the geometry and mechanics of faults, fractures, and folds. Laboratory includes problems on stresses and strains associated with deformation, geometric analysis of deformation structures, and interpretation of geologic maps.
Credit Hours: 4
Prerequisites: instructor’s consent and GEOL 1100 or GEOL 1200 and MATH 1500 or MATH 1400

GEOL 7180: Solar System Science
(same as PHYSCS 7180 and ASTRON 7180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.
Credit Hours: 3
Prerequisites: MATH 1700 and PHYSCS 1220 or PHYSCS 2760 or instructor’s consent

GEOL 7200: Economic Geology with Laboratory
Geochemistry of ore deposits. Introduction to types of mineral deposits, genesis of ore, and current areas of research. Laboratory emphasizes hand-specimen and polished-section studies of a wide variety of ore deposit types.
Credit Hours: 4
Prerequisites: GEOL 4900

GEOL 7210: Marine Geology
Comprehensive examination of the geology of the oceans. Topics includes techniques of data collection and interpretation, physical oceanography, origin of marine sediments, marine tectonics, and ocean history.
Credit Hours: 3
Prerequisites: GEOL 3800 CHEM 1330 and PHYSCS 1220

GEOL 7300: Introduction to Low-Temperature Geochemistry
Introduction to the chemical alteration of rock-forming minerals in weathering environments and to factors controlling the chemical composition of subsurface water.
Credit Hours: 3
Prerequisites: GEOL 3300 or instructor’s consent

GEOL 7318: Environmental Soil Chemistry
(same as SOIL 7318 and ENV_SC 7318). Study of chemical constituents and processes occurring in soils. Topics include soil minerals, and weathering processes organic matter, solution chemistry, oxidation-reduction reactions and adsorption processes.
Credit Hours: 3
Prerequisites: SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330 or instructor’s consent

GEOL 7400: Geomicrobiology and Microbial Biogeochemistry
Roles of microbes in a variety of geological settings through time. Microbial roles in degradation of organic pollutants and transformation of toxic metals and radionuclides in contaminated environments.
Credit Hours: 3
Prerequisites: GEOL 3300 or instructor’s consent

GEOL 7500: Organic Geochemistry
Topics include chemistry of petroleum-forming reactions and their kinetic parameters; use of organic-chemical criteria in source-rock evaluation; carbon isotope fractionation in organic precursors of biological molecules; early history of earth’s atmosphere.
Credit Hours: 3
Prerequisites: instructor’s consent

GEOL 75650: Plate Tectonics
Formation, evolution, and structure of the earth. Rules, causes, and implications of plate tectonics with emphasis on present-day features.
Credit Hours: 3
Prerequisites: GEOL 3250, GEOL 4150 or instructor’s consent

GEOL 7680: Neotectonics and Earthquake Geology
Introduction to techniques and concepts of active crustal deformation from the geological and geodetic perspectives. Topics include tectonic geomorphology, paleoseismology, Quaternary dating, tectonic geodesy, numerical models of faults, and earthquake hazard assessment.
Credit Hours: 3
Prerequisites: GEOL 4650 or GEOL 4150

GEOL 7700: Theoretical Geochemistry
Introduction to theoretical concepts in low and high temperature geochemistry. Topics include thermodynamics of fluids, gases and solids in geological materials, phase diagrams, equilibrium constants, electrolyte theory, oxidation-reduction reactions.
Credit Hours: 3
Prerequisites: GEOL 3250, CHEM 1330 and MATH 1700

GEOL 7800: Introduction to Geophysics
Introduction to the fundamentals of geophysical methods and their applications in geology, environmental studies, and exploration. Topics include seismic, gravity, magnetic, and electric methods.
Credit Hours: 3
Prerequisites: PHYSCS 1210 or PHYSCS 2750 and MATH 1700

</table>

**German (GERMAN)**

**GERMAN 1100: Elementary German I**
For beginners with no prior knowledge of German. This course helps learners develop the skills they need to use German as a means of communication in their personal and professional life. It covers a wide variety of vocabulary pertaining to everyday life; emphasis is on all types of communication--oral and listening skills, reading and writing.  
**Credit Hours: 5**

**GERMAN 1100H: Elementary German I - Honors**
This course is designed for Honors students with little or no German language background and will provide students with a foundation in vocabulary and grammar in order to develop communication proficiency in German. Students will be trained using the five skills: listening, speaking, writing, reading and cultural knowledge. The course will be taught as a total immersion class and thus differs from the standard elementary German sequence. Furthermore, students will be required to complete lengthier reading and writing tasks as well as present a final oral multimedia project at the end of the semester.  
**Credit Hours: 5**

**Prerequisites:** Honors eligibility required
GERMAN 1150: Freshman Introduction to German Studies
Introduction to German Studies as an academic field. Small seminar setting with senior faculty, their favorite texts, and questions pursued in the research and teaching. Recommended for all students interested in integrating German studies into their academic career, conducted in English.

Credit Hours: 1
Prerequisites: Restricted to Freshman students only

GERMAN 1200: Elementary German II
A continuation of GERMAN 1100. This course helps learners develop the skills they need to use German as a means of communication in their personal and professional life. It covers a wide variety of vocabulary pertaining to everyday life; emphasis is on all types of communication - oral and listening skills, reading and writing.

Credit Hours: 3
Prerequisites: C- or better in GERMAN 1200, or equivalent

GERMAN 1200H: Elementary German II - Honors
This course is designed for Honors students who either took the GERMAN 1100H section or are placing into GERMAN 1200 as honors eligible students. The main focus of this course is on further development of basic communication skills in speaking, listening, reading, and writing in German adding more nuanced cultural and sociolinguistic competencies in a total immersion environment.

Credit Hours: 5
Prerequisites: Honors eligibility required

GERMAN 2001: Undergraduate Topics in German-General
Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent.

Credit Hour: 1-3

GERMAN 2005: Undergraduate Topics in German-Humanities
Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent. No language credit.

Credit Hour: 1-3

GERMAN 2005H: Undergraduate Topics in German-Humanities - Honors
Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent. No language credit.

Credit Hour: 1-3
Prerequisites: Honors eligibility required

GERMAN 2100: Intermediate German I
A continuation of GERMAN 1200. This course helps learners develop the skills they need to use German as a means of communication in their personal and professional life. It covers a wide variety of vocabulary pertaining to everyday life; emphasis is on all types of communication - oral and listening skills, reading and writing.

Credit Hour: 1-3

GERMAN 2260: Intermediate German II: Language and Culture
This course continues to help learners develop the necessary communicative skills in German. The particular emphasis is on oral and writing skills, and texts that provide insight into contemporary German culture and social life.

Credit Hours: 3
Prerequisites: C- in GERMAN 2100 or equivalent

GERMAN 2310: German Civilization: Beginning to 1850
Major historical, social, artistic, literary themes from beginnings to end of Revolution of 1848. Films and recordings. May be taken independently of GERMAN 2320. No foreign language credit. Some sections may enforce prerequisite of ENGLSH 1000.

Credit Hours: 3

GERMAN 2320: German Civilization: 1850 to Present
Second Empire, Weimar Republic, Nazi era, two Germanies after 1949. Historical, social, artistic, literary themes. Films and recordings. May be taken independently of GERMAN 2310. No foreign language credit.

Credit Hours: 3
Prerequisites: some sections may enforce prerequisite of ENGLSH 1000

GERMAN 2480: Monstrous Births: Tales of Creation in 19th Century Literature
Examines literary and other cultural works which explore the creation of human beings by traditional, technological, or magical means. Course and readings in English translation.

Credit Hours: 3
Prerequisites: ENGLSH 1000 or equivalent

GERMAN 2820: Trends in World Cinema
(same as FILM_S 2820 and RM_LAN 2820). This course is a historical overview of the major trends in international cinema. It focuses on the intersection of aesthetics, industry, and ideological and social concerns in cinematic production.

Credit Hours: 3
Prerequisites: sophomore standing, ENGLSH 1800 or FILM_S 1800 or instructor’s consent

GERMAN 3001: Topics in German-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

Credit Hour: 1-3

GERMAN 3005: Topics in German-Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

Credit Hour: 1-3
Prerequisites: sophomore standing and instructor’s consent

GERMAN 3160: German Conversation and Composition
This course expands communicative competence in German and provides a review of advanced grammar concepts. Primary emphasis is on the further development of oral and written skills, reading comprehension, vocabulary expansion, and a broad exposure to relevant topics of contemporary German culture and society. Conducted in German.
Credit Hours: 3
Prerequisites: GERMAN 2260, or equivalent

GERMAN 3180: Business German
Examines language within the economic and professional context of German-speaking countries. Introduces different economic concepts of Germany’s turbulent 20th century, modern-day business systems and everyday commercial activities such as job applications, professional routines, capital investment and banking. Provides students with vocabulary, cultural knowledge and communicative abilities in order to participate in the professional German-speaking world using linguistically-solid and stylistically-persuasive writing and speaking skills.
Credit Hours: 3
Prerequisites: GERMAN 2260 and GERMAN 3230 or equivalent

GERMAN 3190: Contemporary German Culture
This content-driven course provides insights into essential subjects of 20th century German history and contemporary society, using a variety of literature, journalistic sources and film. The course will improve German conversation and literacy skills, and will strengthen critical reading and writing, as well as interpretative abilities. Significant grammatical concepts will be thoroughly reviewed throughout the semester. Conducted in German.
Credit Hours: 3
Prerequisites: GERMAN 2260 or instructor’s consent

GERMAN 3230: Introduction to German Literature
This course introduces students to German-language literary texts, images, and films in their cultural and historical context through exposure to major genres (poetry, drama, short stories, and the novel). It further builds their vocabulary and teaches them critical interpretive skills as preparation for the analysis of literary texts in upper-division courses - and in life.
Credit Hours: 3
Prerequisites: C- or better in GERMAN 3160, or GERMAN 3190

GERMAN 3230: Readings in German Literature
Readings in English of selected works of German literature from Goethe to the present, with a particular emphasis on writers and texts that have had a strong influence on European thought and culture.
Credit Hours: 3
Prerequisites: sophomore standing, ENGLISH 1000

GERMAN 3440: After the Fact: Holocaust in Contemporary History, Art & Literature
(same as PEA_ST 3440). Explores responses to the Holocaust from numerous perspectives. Considers how the Holocaust is remembered, memorialized, and debated in a variety of national contexts. Touches on historical, philosophical, and aesthetic points of view.
Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent

GERMAN 3460: Marx & Nietzsche: Labor, Power, and the German Mind of 19th Century
Examines writings of Germany’s two most radical nineteenth-century thinkers. Explores key terms of political economy and philosophy developed by Marx and Nietzsche. Journal and three papers.
Credit Hours: 3
Prerequisites: sophomore standing, ENGLISH 1000

GERMAN 3510: Think Global: Fundamentals of Globalization and Digital Technologies
(same as JOURN 3510H). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Sophomore standing or instructor’s consent

(same as JOURN 3510H). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Sophomore standing; 2.75 GPA or instructor’s consent. Honors eligibility required

GERMAN 3520: Folk and Fairytales in a Global Context
Analyzes the most famous European collection of fairytales, namely the Kinder-und Hausmarchen (Children’s and Household Tales) by the Brothers Grimm and juxtaposes them to folktales from other cultures. Looks at the genre of fairytales, studies the historical context of the genesis of the collection of tales, and modern versions of the tales. Compares and contrasts Grimm’s fairytales with folktales of different cultural traditions, analyzes and identifies the formal structure of fairytales and motifs, discusses various interpretive models/perspectives and juxtaposes several historical and contemporary literary fairytales and fairytale adaptations. Cultural unit examples will be on Mongolian culture and history and the Maori culture of New Zealand. Students are expected to create their own cultural unit based on the course’s units. Course is taught in English.
Credit Hours: 3
Prerequisites: sophomore standing required
GERMAN 3520H: Folk and Fairytales in a Global Context
Analyzes the most famous European collection of fairytales, namely the Kinder-und Hausmarchen (Children’s and Household Tales) by the Brothers Grimm and juxtaposes them to folktales from other cultures. Looks at the genre of fairytales, studies the historical context of the genesis of the collection of tales, and modern versions of the tales. Compares and contrasts Grimm’s fairytales with folktales of different cultural traditions, analyzes and identifies the formal structure of fairytales and motifs, discusses various interpretive models/perspectives and juxtaposes several historical and contemporary literary fairytales and fairytale adaptations. Cultural unit examples will be on Mongolian culture and history and the Maori culture of New Zealand. Students are expected to create their own cultural unit based on the course’s units. Course is taught in English.
Credit Hours: 3
Prerequisites: sophomore standing required. Honors eligibility required

GERMAN 3550: Resistance is Futile: The Advance of the Cyborg
Contemporary culture is haunted by the image of artificial killing machine as metaphor for technology run rampant. Fears may be prompted by feelings of alienation in automated society and underlying suspicion that humans may be nothing more than sophisticated machines. Course maps history of l’homme machine, focusing on fictional representation of creatures that consist of both human and technological "parts." Goal is to discern source of fascination and sociopolitical mechanism behind evocation of "human machine."
Credit Hours: 3
Prerequisites: Sophomore standing or consent of instructor

GERMAN 3830: History of the German Film
(same as FILM_S 3830). Introduction to the development of the German film. Old and recent films are viewed and discussed in terms of techniques, artistry, psychology and social impact. English dubbing or subtitles. No foreign language credit.
Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent

GERMAN 3840: German Film After 1945
(same as FILM_S 3840). Examines a selection of post-War films by German directors, as well as historical, literary, and theoretical texts.
Credit Hours: 3
Prerequisites: sophomore standing, or instructor’s consent

GERMAN 3850: The Holocaust on Screen
(same as FILM_S 3865). This course explores how the Holocaust has been depicted on film in a variety of national and historical contexts. Drawing on films from 1945 to the present, from the U.S., Germany, Poland, France, and Italy, we will consider to what end images of the Holocaust have been used. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: sophomore standing

GERMAN 3865: Service Learning in German Studies
Service learning offers students a chance to put into practice what they have learned in theory. Students work as teacher-aids or tutors in foreign language/culture classes at area schools. Does not meet Arts and Science foundation requirements. Graded on S/U basis only.
Credit Hours: 2
Prerequisites: GERMAN 2260, or instructor’s consent

GERMAN 4001: Topics in German-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.
Credit Hour: 1-3
Prerequisites: junior standing and instructor’s consent

GERMAN 4005: Topics in German-Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.
Credit Hour: 1-3
Prerequisites: junior standing and instructor’s consent

GERMAN 4005H: Topics in German-Humanities - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.
Credit Hour: 1-3
Prerequisites: junior standing and instructor’s consent. Honors eligibility required

GERMAN 4070: Intensive Beginning German
Designed to lead to a reading knowledge of German. Cannot be taken to fulfill undergraduate language requirement.
Credit Hours: 3
Prerequisites: graduate standing or instructor’s consent

GERMAN 4160: Advanced Language Proficiency
(cross-leveled with GERMAN 7160). A course for intermediate to advanced students of German. This course helps learners develop further the necessary communicative skills in German. The particular emphasis is on oral and writing skills, and texts that provide insight into contemporary German culture and social life.
Credit Hours: 3
Prerequisites: GERMAN 3230 or equivalent

GERMAN 4180: Advanced German: Conversation and Stylistics
(cross-leveled with GERMAN 7180). This course continues to emphasize all communicative skills in German: oral and listening skills, reading and writing. There is also an emphasis on advanced grammar. The content focuses on contemporary German culture and social life.
Credit Hours: 3
Prerequisites: senior or graduate standing, or instructor’s consent

GERMAN 4220: Eerie Tales: Classic German Narratives
In this class, we will read classic uncanny tales in German by major authors, and will explore the traits of this category across a variety of literary movements.
GERMAN 4230: Enlightenment and Revolution
Reading and discussion of selected works by major German writers from 1740 to 1870.
Credit Hours: 3
Prerequisites: GERMAN 3230 or equivalent language capacity

GERMAN 4240: Modernism and Modernity
Reading and discussion of selected works by major German writers from 1870 to the present.
Credit Hours: 3
Prerequisites: GERMAN 3230 or equivalent

GERMAN 4260: Recent German Literature
This course examines ‘post-unification’ works (i.e. by formerly East and West German authors) of literature and film written since 1989 that addresses social and political changes leading to or resulting from unification and the experience of WWII. Students will analyze the diverse cultural, political and economic factors that influence writers and filmmakers whose aesthetic production in turn helps shape contemporary German society.
Credit Hours: 3

GERMAN 4440: Enlightenment and Sturm und Drang
Survey of literature and thought of 18th-century Germany, with emphasis on the works of Lessing, Wieland, Herder and the younger Goethe.
Credit Hours: 3
Prerequisites: GERMAN 4230 or equivalent

GERMAN 4450: German Romanticism
Credit Hours: 3
Prerequisites: GERMAN 4230 or equivalent

GERMAN 4530: The German Novelle
Credit Hours: 3
Prerequisites: GERMAN 4230 or equivalent

GERMAN 4650: Faust
Credit Hours: 3
Prerequisites: GERMAN 4230 or equivalent

GERMAN 4670: Medieval German Literature 1170-1210
Analysis of major narrative and lyric poetry of the Age of Chivalry.
Credit Hours: 3
Prerequisites: GERMAN 4230 or equivalent

GERMAN 4730: German Internship and Methods
Supervised introduction to the methodology of the teaching of elementary German; conducted in a classroom environment.
Credit Hours: 3
Prerequisites: junior standing, GERMAN 4230, or instructor’s consent

GERMAN 4810: Case Studies in an Inter/Multicultural World
(same as T_A_M 4810). This inter-departmental course examines the ways in which people across the globe are affected every day by an unprecedented array of linkages that defy geographic and political boundaries. Also serves as one of the seminars for the certificate in Digital Global Studies. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Sophomore standing; 2.75 GPA or instructor’s consent

GERMAN 4820: Blogging the World: The Web in Cultural Context
(same as FRENCH and RUSS 4820). Innovative interdisciplinary course addresses issues of access to international news and specific cultural context working in cross-disciplinary teams. Students in journalism, foreign language, international studies, political science and various other disciplines track cultural developments and information on non-US Web sites, blogs and digital social networks along with exploring various historical forms of communication that preceded the digital era of the Web. Students analyze the potential and limitations/ effects of blogs and the web in specific contemporary cultural contexts and as part of the broader historical evolution of the web. The course is taught in English. The goal of this course is two-fold; students learn the particulars of web blogging, explore various features of the contemporary social network landscape while focusing on the concept of culture, in particular the cultures of Europe and the US. Questions asked are: what is culture? What is common or popular right now in other cultures? And how do new social networks amplify or alter certain features or culture across national and international contests?
Credit Hours: 3
Prerequisites: sophomore standing required

GERMAN 4960: Special Readings in German
Independent study through readings, conferences, and reports.
Credit Hour: 1-3
Prerequisites: Junior standing and instructor’s consent

GERMAN 4980: German Capstone Seminar
(cross-leveled with GERMAN 7980). Required of all senior German majors; usually taken in the senior year. Focuses on contemporary Germany and brings together aspects of German literature and culture studies during the degree program.
Credit Hours: 3
Prerequisites: senior standing, one 3000-level literature course or equivalent or departmental consent

GERMAN 4996: Honors in German
Special problems in Germanic literature or linguistics.
Credit Hour: 1-3
Prerequisites: departmental consent of Honors director

GERMAN 7001: Topics in German-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.
Credit Hour: 1-3
GERMAN 7005: Topics in German - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.
Credit Hour: 1-99

GERMAN 7085: Problems in German
Credit Hour: 1-3
Prerequisites: chairman's consent

GERMAN 7160: German Conversation and Composition III
(cross-leveled with GERMAN 4160). A course for intermediate to advanced students of German. This course helps learners develop further the necessary communicative skills in German. The particular emphasis is on oral and writing skills, and texts that provide insight into contemporary German culture and social life.
Credit Hours: 3
Prerequisites: GERMAN 3230 or equivalent

GERMAN 7180: Advanced German: Conversation and Stylistics
(cross-leveled with GERMAN 4180). This course continues to emphasize all communicative skills in German: oral and listening skills, reading and writing. There is also an emphasis on advanced grammar. The content focuses on contemporary German culture and social life.
Credit Hours: 3
Prerequisites: GERMAN 4230 or equivalent

GERMAN 7440: Enlightenment and Sturm und Drang
Survey of literature and thought of 18th-century Germany, with emphasis on the works of Lessing, Wieland, Herder and the younger Goethe.
Credit Hours: 3
Prerequisites: GERMAN 4230 or equivalent

GERMAN 7530: The German Novelle
Credit Hours: 3
Prerequisites: GERMAN 4230 or equivalent

GERMAN 7650: Faust
Credit Hours: 3
Prerequisites: GERMAN 4230 or equivalent

GERMAN 7660: Recent German Literature
Credit Hours: 3
Prerequisites: GERMAN 4230 or equivalent

GERMAN 7670: Medieval German Literature 1170-1210
Analysis of major narrative and lyric poetry of the Age of Chivalry.
Credit Hours: 3
Prerequisites: GERMAN 4230 or equivalent

GERMAN 7730: German Internship and Methods
Supervised introduction to the methodology of the teaching of elementary German; conducted in a classroom environment.
Credit Hours: 3
Prerequisites: GERMAN 4230 or equivalent, or instructor's consent

GERMAN 7820: Blogging the World: The Web in Cultural Context
(same as RUSS 7820 and FRENCH 7820). Innovative interdisciplinary course addresses issues of access to international news and specific cultural context. Working in cross-disciplinary teams, students in journalism, foreign language, international studies, political science and various other disciplines track cultural developments and information on non-US Web sites, blogs and digital social networks along with exploring various historical forms of communication that preceded the digital era of the Web. Students analyze the potential and limitations/effects of blogs and the web in specific contemporary cultural contexts and as part of the broader historical evolution of the web. The course is taught in English. The goal of this course is two-fold: students learn the particulars of web blogging, explore various features of the contemporary social network landscape while focusing on the concept of culture, in particular the cultures of Europe and the US. Questions asked are: what is culture? What is common or popular right now in other cultures? And how do new social networks amplify or alter certain features or culture across national and international contexts?
Credit Hours: 3

GERMAN 7960: Special Readings in German
Independent study through readings, conferences, and reports.
Credit Hour: 1-3
Prerequisites: instructor's consent

GERMAN 7980: German Capstone Seminar
(cross-leveled with GERMAN 4980). Focuses on contemporary Germany and brings together aspects of German literature and culture studies during the degree program.
Credit Hours: 3
Prerequisites: one 3000-level literature course or equivalent, or instructor's consent

GERMAN 8001: Topics in German-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.
Credit Hour: 1-3

GERMAN 8005: Topics in German - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.
Credit Hour: 1-99

GERMAN 8007: SEMINAR:GERMAN
Seminar in German.
Credit Hours: 3

GERMAN 8050: Research in German
Translations or creative work not leading to thesis. Credit hours arranged.
Credit Hour: 1-3
GERMAN 8085: Problems in German
Credit Hour: 1-3
Prerequisites: chairman’s consent

GERMAN 8087: Seminar in German
Course content varies.
Credit Hours: 3

GERMAN 8090: Research in German
Graded on S/U basis only.
Credit Hour: 1-3
Prerequisites: graduate director’s consent

GERMAN 8450: Reformation and Renaissance Literature
The course investigates significant works of German literature of the late 15th and 16th Centuries.
Credit Hours: 3

GERMAN 8520: German Poetry from Sturm und Drang to 1848
Reading of selected poetry by German writers of Sturm und Drang, Classicism, Romanticism, and Vomarz.
Credit Hours: 3

GERMAN 8615: History of the German Language
(same as LINGST 8615).
Credit Hours: 3

GERMAN 8625: Middle High German
(same as LINGST 8625).
Credit Hours: 3

GERMAN 8625: Middle High German
Credit Hours: 3

Graduate School (GRAD)

GRAD 4010: Preparing To Be A Graduate Teaching Assistant
Provides an understanding of the roles and responsibilities of teaching assistants to prepare students for graduate school. Learning will take place through observation, lecture, reading and discussion. Graded on S/U basis only.
Credit Hour: 1

GRAD 7010: Preparing To Be A Graduate Teaching Assistant
Provides an understanding of the roles and responsibilities of teaching assistants to prepare students for graduate school. Learning will take place through observation, lecture, reading and discussion. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: graduate standing

GRAD 7020: Learning Across Borders Seminar
Social, cultural, and economic problems—and their solutions—are increasingly global and interdisciplinary. Global awareness is essential, therefore, in order to compete in the increasing global marketplace.

Coupling professional knowledge and skills with international experience gives graduates a competitive advantage, as employers look beyond the academic transcript for additional skills. The Learning Across Borders seminar (LAB) creates opportunities for graduate students to work across cultures and disciplines. Throughout the academic year students will participate in a series of Think Tanks (interactive discussions facilitated by MU faculty and special guests) and LAB-approved events. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: Students must register for both semesters

GRAD 7070: Academic Interactions in the American University
This course is designed to give graduate students new to the western academic environment an overview of classroom and departmental activities and expectations. Specifically, it will give students cultural insight into academic tasks and some of the linguistic tools necessary to accomplish those tasks.
Credit Hours: 3
Prerequisites: ibt TOEFL of 60
Recommended: for any students who have not previously studied in a western academic environment and strongly recommended for students with an overall TOEFL score of 80 or below or sub-scores in listening and/or speaking of 20 or less

GRAD 7302: Tools for Teaching American Students
Emphasis on advanced academic listening, discrete pronunciation skills, techniques for laboratory teaching and one-to-one interactions. Integrated with a general overview of American classroom culture.
Credit Hours: 3

GRAD 7303: Communication and Culture for American College Teaching
This class will focus on the linguistic aspects of teaching, as well as specific pedagogical; and cultural aspects of the American classroom. It will emphasize fluency development at the suprasegmental level, and interactive teaching skills, like organizational, questioning and compensation strategies.
Credit Hours: 3

GRAD 9001: Topics in Graduate School
Organized study of selected professional and career development topics. Subjects and course credit may vary from semester to semester.
Credit Hour: 1-99
Prerequisites: instructor’s and academic advisor’s consent

GRAD 9010: Preparing Future Faculty I
First course in a two-semester Preparing Future Faculty program that introduces Ph.D. students to a variety of faculty roles and work environments. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: instructor’s consent

GRAD 9020: Preparing Future Faculty II
Second course in a two-semester Preparing Future Faculty program that introduces Ph.D. students to a variety of faculty roles and work
environments. Topics build upon those presented in GRAD 9010 and focus on the job search and career development processes. Graded on S/U basis only.

Credit Hour: 1  
Prerequisites: GRAD 9010

GRAD 9300: Teaching with Technology-Strategies for Your Online Classroom  
(same as IS_LT 9477). Designed to assist current and future course instructors to integrate learning technologies into a traditional face-to-face course. Graded on A-F basis only.

Credit Hour: 1

GRAD 9050: Building Leadership Potential with Transferable Skills  
Specialized leadership and transferable skills course that helps students recognize their potential and versatility for careers within and beyond the academy. Five major themes: 1) Leadership Theory and Strengths; 2) Management and Organization; 3) Problem Solving and Conflict Resolution; 4) Verbal and Written Communication and 5) Creativity and Entrepreneurship. Learning enhanced with readings and videos and in Blackboard. Guest speakers. Must complete StrengthsQuest, readings, a job shadow with a leader of choice, and an Individual Development Plan. Graded on S/U basis only.

Credit Hour: 1  
Prerequisites: early stage doctoral student in good standing; instructor consent

GRAD 9304: Instructional and Communication Strategies for Effective College Teaching  
This class will focus on teaching and presentation strategies such as lesson design, using case studies and problem based learning, interactive learning, and classroom and course management. The linguistic emphasis will be on reduction, linking and speech patterns as well as pragmatic issues of organizing, clarifying and emphasizing ideas. Requires an MU Oral Language Proficiency Assessment score of 3 and course consent. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: ITAP language level 3P or GRAD 7303 and level 2; consent required

Greek (GREEK)

GREEK 1100: Elementary Ancient Greek I  
Study of forms, grammar, syntax. Early attention to reading in simple Attic prose.

Credit Hours: 5

GREEK 1100H: Elementary Ancient Greek I - Honors  
Study of forms, grammar, syntax. Early attention to reading in simple Attic prose.

Credit Hours: 5  
Prerequisites: Honors eligibility required

GREEK 1200: Elementary Ancient Greek II  
Continuation of GREEK 1100. Readings in Attic prose.

Credit Hours: 5  
Prerequisites: grade of C or higher in GREEK 1100 or equivalent

GREEK 1200H: Elementary Ancient Greek II - Honors  
Continuation of GREEK 1100H. Readings in Attic prose.

Credit Hours: 5  
Prerequisites: grade of C or higher in GREEK 1100 or equivalent. Honors eligibility required

GREEK 2000H: Greek Reading - Honors  
Selected works of Greek literature.

Credit Hours: 3  
Prerequisites: grade of C or higher in GREEK 1200. Honors eligibility required

GREEK 2000: Greek Reading  
Selected works of Greek literature.

Credit Hours: 3  
Prerequisites: grade of C or higher in GREEK 1200

GREEK 4120H: Intensive Beginning Greek II - Honors  
Continuation of GREEK 4110H. Attention to ability to read rapidly and accurately. Course meets five hours weekly for three hours credit.

Credit Hours: 3  
Prerequisites: graduate standing or Honors eligibility required

GREEK 4300: Intermediate Readings  
Selected advanced readings in prose and poetry. Introduction to Homer.

Credit Hours: 3  
Prerequisites: GREEK 2000 or equivalent

GREEK 4350: The Greek New Testament  
(same as REL_ST 4650). Readings in the Greek New Testament and similar literature, e.g., the Septuagint.

Credit Hours: 3  
Prerequisites: GREEK 4300 or instructor’s consent. Graded on A-F basis only

GREEK 4400: Homer  
Reading, discussion, and literary analysis of Iliad and Odyssey.

Credit Hours: 3  
Prerequisites: two years Classical Greek or equivalent

GREEK 4500: Greek Stylistics  
Study and practice of Greek prose, with special consideration to basic problems: abstract expression, word order, sentence structure and use of common rhetorical devices.

Credit Hours: 3

GREEK 4505: Topics in Greek  
Topics course involving Greek texts. May be repeated for credit.
GREEK 4510: Greek Tragedy
Selected works of Aeschylus, Sophocles, Euripides, with special attention to language, style, ideas, and dramatic techniques.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 4520: Greek Comedy
Selected plays of Aristophanes and Menander, with special attention to cultural contexts.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 4530: Greek Lyric Poetry
Selected readings from lyric poets, with attention to verse forms, and dialects.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 4540: Greek Oratory
Selections from Greek orators, with emphasis on Lysias and Demosthenes.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 4550: Greek Philosophers
Emphasis on readings and analysis of selected texts of major Greek philosophers.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 4560: Greek Historians
Reading and analysis of selected texts of major Greek historians.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 4570: Greek Epigraphy
Introduction to study of Greek inscriptions and their contribution to the understanding of other aspects of ancient culture.
Credit Hours: 3
Prerequisites: GREEK 2000

GREEK 4700: Survey of Greek Literature
Greek literature from origins to end of Roman period; emphasis on authors not covered in other courses, to provide general view of styles and genres.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 4960: Special Readings in Greek
Readings in authors and texts not covered in other courses.
Credit Hours: 3
Prerequisites: departmental consent; two years Classical Greek or equivalent

GREEK 7300: Intermediate Readings in Greek
Selected advanced readings in prose and poetry. Introduction to Homer.
Credit Hours: 3
Prerequisites: GREEK 2000 or equivalent. Available to students for graduate credit in departments other than Classical Studies

GREEK 7350: The Greek New Testament
(same as REL_ST 7650). Readings in the Greek New Testament and similar literature, e.g., the Septuagint. Graduate students read significantly more Greek than do undergraduates and testing is accordingly more rigorous. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: GREEK 4300 or instructor's consent

GREEK 7400: Homer
Reading, discussion, and literary analysis of Iliad and Odyssey.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 7500: Greek Stylistics
Study and practice of general Greek prose tendencies, with special consideration to basic problems: abstract expression, word order, sentence structure and use of common rhetorical devices.
Credit Hours: 3

GREEK 7505: Topics in Greek
Organized study of selected authors or eras. Subject and earnable credit vary from semester to semester.
Credit Hour: 1-99
Prerequisites: two years of Classical Greek or equivalent

GREEK 7510: Greek Tragedy
Selected works of Aeschylus, Sophocles, Euripides, with special attention to language, style, ideas, and dramatic techniques.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 7520: Greek Comedy
Selected plays of Aristophanes and Menander, with special attention to cultural contexts.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 7530: Greek Lyric Poetry
Selected readings from lyric poets, with attention to verse forms, and dialects.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent
GREEK 7540: Greek Oratory
Selections from Greek orators, with emphasis on Lysias and Demosthenes.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 7550: Greek Philosophers
Emphasis on readings and analysis of selected texts of major Greek philosophers.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 7560: Greek Historians
Reading and analysis of selected texts of major Greek historians.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 7570: Greek Epigraphy
Introduction to study of Greek inscriptions and their contribution to the understanding of other aspects of ancient culture.
Credit Hours: 3
Prerequisites: GREEK 2000

GREEK 7700: Survey of Greek Literature
Greek literature from origins to end of Roman period; emphasis on authors not covered in other courses, to provide general view of styles and genres.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 7960: Special Readings in Greek
Readings in authors and texts not covered in other courses.
Credit Hour: 1-3
Prerequisites: departmental consent and two years Classical Greek or equivalent

GREEK 8000: Proseminar in Greek Texts
This is a seminar-level introduction to Greek literary and historical texts. The emphasis in this course will be on wide and intensive reading, with the objective of helping the new graduate student quickly develop a sound literary and linguistic competence.
Credit Hours: 3

GREEK 8010: Greek Rough Guide
Intensive exploration of Greek Literature from its earliest appearance through the Roman period. Emphasis upon texts as both literary and cultural artifacts whose interpretation requires familiarity with the historical and archaeological legacy of antiquity as well as modern exegetical strategies. Graded on A-F basis only.
Credit Hours: 3

GREEK 8100: Greek Historiography
(same as HIST 8500). Study of the major contemporary historians of Classical Greece and their methodology. Differential readings available to both students with a reading knowledge of Greek and also those without Greek.
Credit Hours: 3

GREEK 9287: Seminar in Greek Drama
May be repeated to a maximum of 6 hours.
Credit Hours: 3

GREEK 9387: Seminar in Greek Lyric Poetry
Seminar in Greek Lyric Poetry.
Credit Hour: 1-99

GREEK 9487: Seminar in the Greek Philosophers
Seminar in the Greek Philosophers.
Credit Hours: 3

GREEK 9587: Seminar in the Greek Historians
Seminar in the Greek Historians.
Credit Hours: 3

GREEK 9687: Seminar in Greek Epic Poetry
Seminar in Greek Epic Poetry.
Credit Hours: 3

GREEK 9787: Seminar on the Age of Pericles
Study of Greek culture of mid-fifth century B.C., including law, religion, art, philosophy, science, and other aspects of the culture, to give students an integrated view of life of the period.
Credit Hours: 3

GREEK 9887: Seminar in Special Fields
Seminar in Special Fields.
Credit Hours: 3

Health Management and Informatics (HMI)

HMI 6495: Health Care Management
Health Care Management
Credit Hours: 5

HMI 7410: Design of Health and Human Service Systems
Critical overview of issues, responses, and challenges in health services delivery, population health, and health policy in the U.S. to better respond, organize, deliver, and finance quality, cost-effective health care.
Credit Hours: 3
Prerequisites: consent required

HMI 7420: Fundamentals of Bioinformatics
The purpose of this course is to provide perspective on the fundamentals of exploration of biological knowledge using computers. As technologies...
such as microarray, sequencing, and biomarkers become more pervasive, they are impacting not only the development of science, but also domains such as health care, nutrition, and ethics. This course provides a description of fundamental bioinformatics concepts such as sequencing, proteomics, metabolomics, and biological pathways, and illustrates them with short informatics experiments. Mainly online resources will be used, so no programming is necessary. Also, the course includes a short primer of molecular biology, so background in molecular biology is not required.

**Credit Hours:** 3  
**Prerequisites:** Open to undergraduates with dual enrollment

### HMI 7430: Introduction to Health Informatics
(same as INFOINST 7430). Introduction to the use of clinical information systems in healthcare. Topics include clinical data, standards, electronic medical records, computerized provider order entry, decision support, telemedicine, and consumer applications.

**Credit Hours:** 3  
**Prerequisites:** departmental consent

### HMI 7440: Health Information Technology
In this course, the student will learn 1) the visual basic programming language and how to design a visual basic application 2) the SQL database language and how to design and operate a database, and 3) HTML, HTML5, javascript and vbscript languages and how to design a client-server database application using Visual Basic and a web database application. Applications will be healthcare focused.

**Credit Hours:** 3  
**Prerequisites:** college algebra and statistics

### HMI 7471: Introduction to Accounting and Finance in Health Care
This is the first course in a two-course sequence focusing on the financial management of healthcare organizations. This course introduces the current financial environment in which providers operate and the fundamentals of financial accounting, with an emphasis on accounting and financial management principles and concepts that are critical to decision making for department-level management of health services organizations. This course provides the foundation for the second Financial Management for Health Care Organizations course offered in the second year of this program.

**Credit Hours:** 3  
**Prerequisites:** Graduate standing or consent of instructor

### HMI 7564: Health Ethics Theory
An introduction to health ethics theory and methodology. We discuss metaethics and normative ethics theories, normative ethics in health ethics and methods of ethics case work up.

**Credit Hours:** 3

### HMI 7566: Health Informatics Ethics
An introduction to ethical issues arising in the use of computers and information technology in clinical contexts in health care.

**Credit Hours:** 3  
**Prerequisites:** graduate standing, Health Management and Informatics [HMI] 7564 or equivalent course or permission of instructor

### HMI 7567: Health Organizational Ethics
An introduction to the ethics of administrative, managerial, and related business issues that arise in healthcare organizations.

**Credit Hours:** 3  
**Prerequisites:** HMI 7564 or equivalent course, or permission of instructor

### HMI 7750: Physical Function and Older Adults
(same as F_C_MD 7750, ARCHST 7640, H_D_FS 7750, NURSE 7750, P_HLTH 7750, and SOC_WK 7752). This course takes an interdisciplinary approach to understanding and improving the physical function and independence of older adults and explores approaches to alleviate disabling conditions that interfere with physical function and quality of life in old age. Graded on A-F basis only.

**Credit Hours:** 3

### HMI 7751: Psychosocial Function and Older Adults
(same as ARCHST 7650, F_C_MD 7751, H_D_FS 7751, NURSE 7751, P_HLTH 7751 and SOC_WK 7751). This course takes an interdisciplinary approach to understanding the psychosocial function of older adults and explores approaches to alleviate disabling conditions that interfere with psychosocial function and quality of life in old age. Graded on A- basis only.

**Credit Hours:** 3

### HMI 8090: Thesis Research in Health Management and Informatics
Research leading to a thesis. May be repeated to maximum of 9 hours.

**Credit Hours:** 1-6  
**Prerequisites:** Advisor’s consent

### HMI 8401: Topics in Health Management and Informatics
Organized study of selected topics. Subjects will vary from semester to semester. May be repeated for credit with departmental consent.

**Credit Hours:** 3

### HMI 8435: Information Security, Evaluation and Policy
The purpose of this course is to provide an extensive overview, practical applications and analyses of functionality and usability evaluations of health care information technology, and to discuss the impact of security on the present and future health care settings.

**Credit Hours:** 3

### HMI 8437: Data Warehousing and Data/Text Mining for Health Care
An introduction to the basic concepts of data warehouse and data/text mining, creating an understanding of why we need those technologies and how they can be applied to healthcare problems.

**Credit Hours:** 3

### HMI 8441: Controlled Terminology Theory and Application
Basic and advanced concepts of controlled terminologies and their use in the representation of biomedical information and knowledge, with emphasis on terminology management in the health care enterprise.
Syntactic and semantic structure of controlled terminologies are examined and a number of representative terminologies are analyzed.

**Credit Hours: 3**

**HMI 8443: Enterprise Information Architecture**
Organization and development of infrastructure necessary to support an enterprise information system for patient care. Components of architecture are introduced in a problem-based approach, case examples are presented as the basis for addressing specific attributes of the components, as well as problems facing the design of an enterprise information system for health care.

**Credit Hours: 3**

**HMI 8450: Methods of Health Services Research**
Writing intensive course provides students with basic understanding of literature search, experimental designs, evaluation methods, ethics, reporting and application of health services research. Practical research problems are discussed and students prepare a professional, managerially relevant research proposal.

**Credit Hours: 3**

**HMI 8451: Individual Executive Management Studies**
Students will investigate and address important issues in their organizations. Students will use scientific evidence and techniques to solve applied problems. They will develop data collection protocols, collect and analyze data, draw conclusions, and develop recommendations using basic research methods tools. They will provide actionable and feasible recommendations based on their analysis.

**Credit Hours: 3**

**Prerequisites:** HMI 7410, HMI 8450 or permission of instructor

**HMI 8453: Executive Management Studies**
Students will use scientific evidence and techniques to solve applied problems in health care organizations. Students will serve as professional consultants, working within small teams to develop project specifications and plans in collaboration with their clients. They will develop data collection protocols, collect and analyze data, draw conclusions and develop recommendations using basic research methods tools. They will provide actionable and feasible recommendations to their clients based on their analysis. Graded on A/F basis only.

**Credit Hours: 3**

**Prerequisites:** HMI 7410; Graduate standing or permission of the instructor

**HMI 8456: Administration of Health Care Organizations**
Analyzes health care organizations, emphasizing organizational structure, and strategy, and managerial leadership. Topics include governance, adaptation, design, interorganizational networks, and organizational performance.

**Credit Hours: 3**

**HMI 8457: Managing Human Resources in Health Care Organizations**
Provides a framework for understanding and thinking strategically about employee relations and management of people in organizations, drawing on insights from social sciences to explore how psychological, economic, social, and cultural forces influence human resources management in health care.

**Credit Hours: 3**

**HMI 8470: Strategic Planning and Marketing for Health Care Organizations**
Analysis of strategic planning and services management and marketing concepts, techniques, and tools in the health care industry. Includes analyzing the environment, assessing the organization’s strengths and weaknesses, formulating strategy to achieve competitive advantage, and implementing strategy through service management and marketing.

**Credit Hours: 3**

**HMI 8472: Financial Management for Health Care Organizations**
Application of concepts, tools and techniques of financial management and their interrelationships as they apply to current and future operation of health care organizations.

**Credit Hours: 3**

**Prerequisites:** HMI 7471

**HMI 8478: Knowledge Management in Health Care**
Representing clinical terms, concepts and knowledge in a form for manipulation by intelligent systems. Theoretical formalisms and conceptual representations of medical information. Examination of knowledge engineering tools and decision support systems.

**Credit Hours: 3**

**HMI 8485: Problems in Health Management and Informatics**
Intensive study of an area of health services management.

**Credit Hours:** 1-6

**Prerequisites:** instructor’s consent

**HMI 8524: Health Economics**
Building upon previous knowledge of basic economic theories, concepts, and tools, the structure, organization, activities, functions, and problems of health and medical care are considered from an economics perspective.

**Credit Hours: 3**

**Prerequisites:** microeconomics

**HMI 8544: Managerial Epidemiology**
Examination of basic epidemiological concepts and methods as applied to health services management. Equal emphasis on applications of epidemiology to health services planning, quality monitoring, planning, policy development, system development, finance, and underwriting.

**Credit Hours: 3**

**HMI 8550: Health Data Analytics**
The purpose of this course is to provide you with an applied approach to analyze healthcare data. It will enhance abilities to know when and how to use theories, concepts, and tools of data analysis and statistics to evaluate and analyze health care data systematically. The emphasis of the course is on the use of data analysis in the health care field. The focus is on applying data analysis to health care data, problems and
issues in the health care system, and on the data application necessary to make decisions based on the analysis. This course builds upon previous knowledge of basic statistics and analytics, concepts, and tools by applying them specifically to the health care system.

**Credit Hours:** 3  
**Prerequisites:** college algebra and statistics or permission of instructor

**HMI 8565: Health Care Ethics**  
Explores ethics issues and controversies facing clinicians and healthcare administrators. Topics may include end-of-life care, imperiled newborns, maternal-fetal conflict, procreative liberty, genetic screening and enhancement, organ procurement and allocation, rationing, public health, workplace relationships, and conflicts of interest.  
**Credit Hours:** 3  
**Prerequisites:** HMI 7564 or equivalent course, or permission of instructor

**HMI 8571: Decision Support in Health Care Systems**  
Applies principles and techniques of computer-assisted decision making to solve health care problems. Clinical and managerial applications of artificial intelligence, including expert systems reviewed. Advantages of integrating decision support programs with databases are discussed.  
**Credit Hours:** 3

**HMI 8573: Decision Making for Health Care Organizations**  
Applies and integrates marketing, operations, human resources, and financial management decision-making in health care organizations. Case studies, role playing exercises, simulations, and games are used to demonstrate the dynamic tension between operations efficiency and marketing effectiveness that characterizes decision-making directed toward achieving organizational financial integrity.  
**Credit Hours:** 3

**HMI 8574: Health Care Law**  
Survey of the function and methods of law as applied to health care administration and health care.  
**Credit Hours:** 1

**HMI 8575: Health Policy and Politics**  
Overview and critical analysis of health policy issues in the United States, including how the dynamics of the policy making process have shaped outcomes, successful and unsuccessful, of a number of important policy initiatives.  
**Credit Hours:** 3

**HMI 8610: Consumer Health Informatics**  
Consumer health informatics explores the branch of medical informatics that analyzes consumers’ needs for information; studies and implements methods of making information accessible to consumers; and models and integrates consumers’ preferences into medical information systems.  
**Credit Hours:** 3

**HMI 8689: Field Experience in Health Management and Informatics**  
Supervised field experience in approved health agencies and institutions. Opportunity for observation and service participation in various fields of health. Graded on a S/U basis only.  
**Credit Hours:** 3

**HMI 8810: Research Methods in Informatics**  
(same as INFOINST 8810). Research Methods in Health and Bioinformatics is a writing intensive course that provides students with an understanding of research proposal development, literature searching, research synthesis, research designs, evaluation methods, and ethics. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** STAT 7450 or STAT 7510. Second semester or later in PhD program or instructors consent

**HMI 8870: Knowledge Representation in Biology and Medicine**  
(same as INFOINST 8870). The main topics presented in the course are: logic systems, knowledge representation methods, production systems and representation of statistical and uncertain knowledge. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** HMI 7430 and HMI 7440

**HMI 9440: Technology Evaluation in Health Care Systems Research**  
(same as NURSE 9470). Examines technology applications and evaluator methods used to determine outcomes, efficiencies, effectiveness, satisfaction, and cost of using technology. May be repeated for credit.  
**Credit Hours:** 3  
**Prerequisites or Corequisites:** NURSE 9410 or faculty consent  
**Prerequisites:** 6.0 credit of graduate statistics

**Health Professions (HTH_PR)**

**HTH_PR 1001: Topics in Health Professions**  
Organized study of selected topics in Health Professions. Particular topics and credit may vary each semester.  
**Credit Hour:** 1-3  
**Prerequisites:** instructor’s consent

**HTH_PR 2000: Leadership in Health Care**  
This course will cover a broad range of concepts in leadership and professional development. Focus will be placed on knowledge and skills necessary for effective leadership in the Health Professions. The first of two semesters series. Graded on S/U basis only.  
**Credit Hour:** 1  
**Prerequisites:** instructors consent; restricted to students in specified leadership programs

**HTH_PR 2001: Topics in Health Professions**  
Organized study of selected topics in health professions. Particular topics and earnable credit may vary from semester to semester.  
**Credit Hour:** 1-99
Prerequisites: sophomore standing and instructor's consent

**HTH_PR 2960: Special Readings in Health Professions**
Directed study of literature and research reports in the health-related professions.
Credit Hour: 1-3
Prerequisites: instructor's consent

**HTH_PR 4085: Problems in Health Professions**
Credit Hour: 1-99
Prerequisites: instructor's consent

**HTH_PR 4250: Human Kinesiology**
(same as PH_THR 4250 and OC_THR 4250). Study of principles of physical laws, biomechanics and anatomic structure relative to human movement. Application through analysis of daily functional performance, exercise and sport.
Credit Hours: 3
Prerequisites: anatomy

**HTH_PR 4310: Health Policy for the Health Professional**
Seminar to facilitate understanding of health policy, the legislative process, and politics. Emphasis on health professions, including issues of workforce, funding, and advocacy in the context of current health policy issues.
Credit Hour: 1-3

**HTH_PR 4950: Research Apprenticeship in Health Professions**
This course provides undergraduate students in the health professions and related disciplines experience with research in the health professions and related disciplines experience with research in the health professions. Students will assist in the development and execution of research projects under the supervision of an SHP faculty member.
Credit Hour: 1-3
Prerequisites: instructor’s consent

**HTH_PR 8001: Topics in Health Professions**
Organized study of selected topics in health and/or healthcare. Topic and credit may vary from semester to semester.
Credit Hour: 1-3
Prerequisites: instructor’s consent

**HTH_PR 8085: Problems in Health Professions**
Individual study not leading to thesis or dissertation.
Credit Hour: 1-3
Prerequisites: instructor’s consent

**HTH_PR 8960: Directed Readings in Health Professions**
Selected readings on specific topics.
Credit Hour: 1-3
Prerequisites: instructor’s consent

**Health Sciences (HLTH_SCI)**

**HLTH_SCI 1000: Introduction to the Health Professions**
Overview of clinical/non-clinical health careers; aptitudes/abilities needed for each; the history, current and future state of health care in the U.S: introduction to diverse populations and patient/family issues; Assists with career planning/selection of appropriate majors. Graded on A-F basis only.
Credit Hours: 3

**HLTH_SCI 2100: Health Sciences Seminar**
Professional Development course for Health Science Majors. Topics include resume development/revision, interviewing skills, applying to graduate/professional programs and/or jobs, professional communication, etc. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: sophomore standing required; restricted to Health Science majors only

**HLTH_SCI 2200: Nuclear Weapons: Environmental, Health and Social Effects**
(same as SOCIOL 2281 and PEA_ST 2200). Environmental consequences of the nuclear arms race, "regional" nuclear war, and weapons testing for human health, agriculture, and society. Examining "a world without nuclear weapons"; political dialogue on proliferation; Iran, North Korea, and nuclear weapons conventions. Graded on A-F basis only.
Credit Hours: 3

**HLTH_SCI 2300: Public Health Principles and Practice**
This course focuses on the basic structures of the public health system in the US and provides an introduction to the factors that influence and shape that system including financing, politics and global issues. Graded on an A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Health Sciences Majors during pre-registration
HLTH_SCI 3300H: Public Health Principles and Practice - Honors
This course focuses on the basic structures of the public health system in the US and provides an introduction to the factors that influence and shape that system including financing, politics and global issues. Graded on an A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Health Sciences Majors during preregistration. Honors eligibility required

HLTH_SCI 3400: Global Health
(same as PEA_ST 3401). An introduction to public health in a global context, with an emphasis on understanding how disparities in socioeconomic status, differences in political and national health care systems and the work of international organizations impact health in communities around the world. Graded on A-F basis only.

Credit Hours: 3

HLTH_SCI 3500: Mental Health
This course provides a look at mental health problems with regard to influences, etiology, diagnosis, and treatment. Students learn theories of mental health, diagnostic criteria, treatment modalities, and community issues concerning the mental health system. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HLTH_SCI 2100

HLTH_SCI 3600: Health Promotion Planning
This course will provide a comprehensive introduction to health promotion programming by integrating a solid theoretical foundation of the discipline with hands-on experience in project planning, funding, implementation, and evaluation. Graded on A-F basis only. Prerequisites: Restricted to Health Science majors during early registration

Credit Hours: 3

HLTH_SCI 3900: Introduction to The Research Process and Evidence Base
This course is an introduction to the basic quantitative and qualitative research techniques used in the health professions. Basic elements of research as well as strengths and weaknesses of various methodologies, Institutional Boards, research ethics, research design, validity and reliability will be covered. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Health Sciences Majors with junior or senior standing

HLTH_SCI 4001: Topics in Health Science
Organized study of selected topics. Subjects will vary from semester to semester.

Credit Hour: 1-3

HLTH_SCI 4300: Health Care in the United States
Overview of financing, structure, and outcomes in the U.S. health care system. Contemporary health care issues, policy, and politics will be addressed. Graded on A-F basis only.

Credit Hours: 3

HLTH_SCI 4300H: Health Care in the United States - Honors
Overview of financing, structure, and outcomes in the U.S. health care system. Contemporary health care issues, policy, and politics will be addressed. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Honors eligibility required

HLTH_SCI 4400: Culture and Health Literacy for the Health Professions
This course will explore differences and attitudes towards the health care industry across various social, cultural and ability groups. This exploration will result in more culturally competent health professionals by promoting self-awareness and challenging the existing assumptions and biases of the health care system.

Credit Hours: 3
Prerequisites: junior or senior standing or instructor’s consent

HLTH_SCI 4410: Humanism and Health Literacy
This class will teach how the humanities can help students become better health professionals. Topics include: spirituality and health; non-medical factors that impact health; representation of disability in art history; and literature and health. Graded on A-F basis only.

Credit Hours: 3

HLTH_SCI 4420: Health Literacy and Behavioral Compliance
Students will learn about the behavioral, psychological, and cognitive factors that impact health literacy and the ability to follow healthcare recommendations.

Credit Hours: 3

HLTH_SCI 4480: Clinical Ethics
(same as CDS 4480). Exploration of bioethics issues in health care with emphasis on issues related to patient choice and provider responsibility. Topics include philosophical theories, principles and models for ethical and lawful decision making in healthcare.

Credit Hours: 3
Prerequisites: junior or senior standing; Restricted to Health Science majors only

HLTH_SCI 4500: Health Care Management
Examines various management concepts as they relate to the unique environment of health care. Concepts include planning, decision making, budgeting, staffing, organizing, and motivating for working with individuals or teams. Graded on A-F basis only.

Credit Hours: 3

HLTH_SCI 4975: Internship in Health Sciences
Focuses on knowledge, skills and attitudes that enhance personal effectiveness and professional success. Opportunities to research selected career paths and related topics in health sciences and public health are highlighted.

Credit Hours: 3
Prerequisites: HLTH_SCI 2100; junior standing
participate in directed service learning projects or internships in selected emphasis area. Graded on A-F basis only.

**Credit Hour:** 1-6  
**Prerequisites:** HLTH_SCI 2100

---

**HLTH_SCI 4985: Healthcare Organization and Leadership**  
(same as CDS 4985). In this course, students will explore leadership principles as they relate to the student's focus area, combining previous expertise in the field with an interdisciplinary perspective within the healthcare community. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** HLTH_SCI 2100; senior standing required

---

**Hebrew (HEBREW)**

**HEBREW 1100: Elementary Hebrew I**  
For beginners with no prior knowledge of Hebrew. Five hours of classroom instruction, with one hour lab work weekly.

**Credit Hours:** 6

**HEBREW 1200: Elementary Hebrew II**  
Five hours of classroom instruction, with one hour lab work weekly.

**Credit Hours:** 6  
**Prerequisites:** C- or better in HEBREW 1100, or equivalent

---

**HEBREW 2001: Topics in Hebrew-General**  
Organized study of selected topics. Subjects and topics may vary semester to semester. May be repeated with departmental consent.

**Credit Hour:** 1-3

**HEBREW 2005: Topics in Hebrew - Humanities**  
Organized study of selected topics. Subjects and topics may vary semester to semester. May be repeated with departmental consent. No knowledge of Hebrew required. No language credit.

**Credit Hour:** 1-3

---

**HEBREW 3085: Problems in Hebrew**  
Supervised study of Hebrew language and/or culture.

**Credit Hour:** 1-3  
**Prerequisites:** instructor's consent

**HEBREW 3310: Introduction to Israeli Culture**  
Examines unique qualities that shape modern Israeli culture; looks at major social and political events that have shaped ethnicity, ideology, religion, identity, and diversity of the State of Israel. Discusses literature, the fine arts, language, and the mass media. No Foreign Language credit. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** sophomore standing or instructor's consent

**HEBREW 3845: Modern Israeli Film**  
(same as FILM_S 3845). Examines the modern film of developing Israel. Discusses complex social relationships. Introduces concepts of Hebrew language and its use in the arts world-wide. Discusses varied communities in Israel, and universal themes such as democracy and social justice. Provides introduction to Israeli culture. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** sophomore standing or instructor's consent required

---

**History (HIST)**

**HIST 1004: Undergraduate Topics in History-Social Science**  
Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated for credit with departmental consent.

**Credit Hour:** 1-3

---

**HIST 1100: Survey of American History to 1865**  
Introduction to U.S. history through the Civil War, surveying political, economic, social and cultural development of the American people.

**Credit Hours:** 3

**HIST 1100H: Survey of American History to 1865 - Honors**  
Introduction to U.S. history through the Civil War, surveying political, economic, social and cultural development of the American people.  

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

**HIST 1200: Survey of American History Since 1865**  
Introduction to U.S. history since 1865, surveying political, economic, social, and cultural development of the American people.

**Credit Hours:** 3

**HIST 1200H: Survey of American History Since 1865 - Honors**  
Introduction to U.S. history since 1865, surveying political, economic, social, and cultural development of the American people.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

---

**HIST 1400: American History**  
Broad survey of political, economic, social, intellectual, diplomatic and constitutional development of American people from first English settlements to present day; emphasizes evolution of American culture and institutions. Students may not receive additional credit for HIST 1100 and/or HIST 1200.

**Credit Hours:** 5

**HIST 1410: African American History**  
(same as BL_STU 1410). Survey of social, political and economic development to the African American people in American life from 1619 to the present.

**Credit Hours:** 3
### HIST 1420: Globalization and History
This course will explore the contemporary phenomenon of globalization in historical perspective. Our goal will be to help students come to terms with the origins and dynamics of this process, which is transforming our economy and society more rapidly and thoroughly than ever before.

**Credit Hours:** 3

### HIST 1500: Foundations of Western Civilization
Development of characteristic ideas and institutions of Western cultural tradition, from origin of civilization in ancient Near East to beginning of rapid social, political, intellectual transformation of Europe in 18th century.

**Credit Hours:** 3

### HIST 1500H: Foundations of Western Civilization - Honors
Development of characteristic ideas and institutions of Western cultural tradition, from origin of civilization in ancient Near East to beginning of rapid social, political, intellectual transformation of Europe in 18th century.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

### HIST 1510: History of Modern Europe
Selected major themes in European history from French Revolution to recent times. Breakdown of traditional institutions, ideas; political, social revolution; industrialization, nationalism, imperialism, world wars; democratic, totalitarian ideologies, movements; quest for international order, European unity.

**Credit Hours:** 3

### HIST 1510H: History of Modern Europe - Honors
Selected major themes in European history from French Revolution to recent times. Breakdown of traditional institutions, ideas; political, social revolution; industrialization, nationalism, imperialism, world wars; democratic, totalitarian ideologies, movements; quest for international order, European unity.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

### HIST 1520: The Ancient World
Survey of institutional and cultural development of ancient Near East, Greece, Rome, and Asia.

**Credit Hours:** 3

### HIST 1540: England Before the Glorious Revolution
Survey of English institutions, culture and politics from the Roman invasion to the Revolution of 1688.

**Credit Hours:** 3

### HIST 1550: Britain 1688 to the Present
Surveys British history from 1688 to present. Emphasizes social and economic change.

**Credit Hours:** 3

### HIST 1560: The World of the Middle Ages
Survey of European development from the fall of Rome to the 16th century.

**Credit Hours:** 3

### HIST 1570: Survey of Early Modern Europe, 1350-1650
Survey of Western and Central Europe (including Britain) from the Black Death to the end of the Thirty Years’ War. This period comprises late medieval crises, the Renaissance, Reformation, Counter-Reformation, Exploration and the New World, the Confessional Age, early modern state-building, and the Thirty Years’ War.

**Credit Hours:** 3

### HIST 1580: History of Christianity
Origin, diffusion and development of Christianity, with special attention to its influence on Western civilization. Major emphasis on period up to French Revolution.

**Credit Hours:** 3

### HIST 1590: Women and the Family in the Pre-Modern West
Examines the changing roles of women and familial structures from the Ancient Mediterranean World to the Protestant Reformation and the effects of religious, political and economic change on the family.

**Credit Hours:** 3

### HIST 1600: Foundations of Russian History
A survey of the Kievan and Muscovite period to the end of the 17th century.

**Credit Hours:** 3

### HIST 1610: Russia in Modern Times  
(same as PEA_ST 1610). Survey of Russian history from 1801 to present.

**Credit Hours:** 3

### HIST 1790: History of Early Africa  
(same as BL_STU 1790). This course introduces students to the early history of Africa. It focuses on political, social, economic and cultural developments based on primary and secondary sources available in print and online.

**Credit Hours:** 3

### HIST 1800: History of Modern Africa  
(same as BL_STU 1800). This course introduces students to the recent history of Africa. It provides them with an opportunity to understand the main challenges Africans faced since colonial times based on primary and secondary sources.

**Credit Hours:** 3

### HIST 1810: History of South Africa  
(same as BL_STU 1810). Surveys the social, cultural and economic dynamics of South African society from the 16th century to the present with an emphasis on the last two centuries and the consolidation of the apartheid state.

**Credit Hours:** 3
Credit Hours: 3

HIST 1820: Asian Humanities
(same as REL_ST 1820, AR_H_A 1230 and S_A_ST 1152). This course in an introduction to the literature and visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.

Credit Hours: 3

HIST 1830: Survey of East Asian History
(same as KOREAN 1830). Introductory survey of the history of East Asian countries (China, Korea, Vietnam, and Japan) in the past two thousand years, focusing on their cultural, economic, and political traditions as well as their transformations in the modern era.

Credit Hours: 3

HIST 1840: Colonial Latin America
Survey of Latin America, 1492-1825; Exploration and conquest; European settlement; colonial government and institutions; economy and society; cultural and intellectual life, independence movements.

Credit Hours: 3

HIST 1850: Latin America Since Independence
Political, social and economic developments; nationalism; revolutionary movements; U.S. influence.

Credit Hours: 3

HIST 1860: History of Ancient India
(same as S_A_ST 1860). This course surveys the history of South Asian history. The course begins with the Indus Valley Civilization (fl. 2600-1900B.C.) and ends with an analysis of Islamic impact on India culture around 1200-1350. Emphasis will be placed on cultural and social history, religion, arts and literature, and the sources used for the study of premodern civilizations. Students will develop a basic knowledge and vocabulary necessary to pursue additional South Asian courses.

Credit Hours: 3

HIST 1861: History of Modern India
(same as S_A_ST 1861). This course surveys the history of the South Asian subcontinent from the early seventeenth through the twentieth century. Emphasis will be placed on cultural and social history, religion, arts and literature, imperialism and colonialism, and the sources used for the study of modern civilizations. Students will develop a basic knowledge and vocabulary necessary to pursue additional South Asian courses.

Credit Hours: 3

HIST 1862: History of India: 1000-1750
(same as S_A_ST 1862). This course surveys the history of the South Asian subcontinent from the eleventh through mid-eighteenth centuries. Emphasis will be placed on cultural and social history, religion, arts and literature, and the sources used to study civilization. Students will develop a basic knowledge and vocabulary necessary to pursue additional South Asian courses.

Credit Hours: 3

HIST 1870: Imperial China: China to 1600
This course offers a broad introduction to Chinese history and culture from antiquity up to the later imperial period (around 1600). It is designed to provide the student with an understanding of the historical development of China’s culture, economic, political, and intellectual traditions.

Credit Hours: 3

HIST 1871: History of China in Modern Times
This is a lecture course designed to introduce to beginning level students the epic journey of China’s historical transformation since c. 1600. This survey provides a basis for understanding the painstaking transition from “tradition” to “modernity” in China.

Credit Hours: 3

HIST 1872: Mao’s China and Beyond: China Since 1949
Through a series of readings, images, and film we will look at the dramatic cultural, economic, social and intellectual changes the People’s Republic of China has experienced since 1949, and look at the interrelated, yet often contradictory, challenges facing Beijing in regards to the task of furthering economic prosperity while promoting policies of integrating with the international society.

Credit Hours: 3

HIST 1873: Topics in History-Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hour: 1-99

HIST 2004: Topics in History-Social Science - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hour: 1-99

Prerequisites: Honors eligibility required

HIST 2210: Twentieth Century America
Survey of American development from 1900 to present. For students who have not taken advanced courses in American history, especially HIST 4210, HIST 4220, or HIST 4230.

Credit Hours: 3

HIST 2220: America in the 1960’s
(same as PEA_ST 2220). Examines the political and cultural main currents of the 1960s. Emphasizes the challenges mounted by protest groups and the responses of America’s political leadership to the ferment of the period.

Credit Hours: 3

Prerequisites: sophomore standing
HIST 2230: Walt Disney and American Culture
Examines Walt Disney's influence on shaping of modern American culture.
Credit Hours: 3

HIST 2400: Social History of U.S. Women
(same as WGST 2400). This course, the social History of US Women, offers a general overview of US Women, beginning with the colonial period up to the present day.
Credit Hours: 3

HIST 2410: African American Women in History
(same as BL_STU 2410 and WGST 2410). African American Women in history is a topics course covering major issues affecting black women since their introduction into english-speaking North America to the present.
Credit Hours: 3

HIST 2420: Conspiracy Theories and Conspiracies in American History and Culture
From the Salem witch trials to the present-day obsessions with the JFK assassination, UFOs, and the like, Americans have often embraced conspiracy theories to explain mysterious events and wrenching social changes. The primary objective of the course is to help students deal more intelligently with the conspiratorial fears and political paranoia that pervade modern American culture, by placing them in a broad historical context.
Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent

HIST 2430: History of American Religion
This course focuses on the overall development of American religion from the 17th century to the present. Students will be invited to think about the larger questions concerning American religion, including why religion in America has developed in the way that it has, and how and why it continues to thrive in American popular culture.
Credit Hours: 3

HIST 2440: History of Missouri
Survey of Missouri’s development from the beginning of settlement to present.
Credit Hours: 3

HIST 2445: American Constitutional Democracy
(same as POL_SC 2445). This course offers an introduction to American constitutional democracy. On the one hand, this course will strive to set the development of America’s constitutional democracy into its historical context and to explain it in relation to larger social, political, military, and economic events. A second emphasis is on the nature and character of the American democratic system. Graded on A-F basis only.
Credit Hours: 3

HIST 2520: From Waterloo to Sarajevo: European History, 1815-1914
Political, social, economic, and cultural development of Europe from French Revolution to outbreak of World War I.
Credit Hours: 3

HIST 2530: Ukrainian History from Medieval to Modern Times
A successor state of the former Soviet Union, Ukraine occupies a strategic position in Eastern Europe. The course will trace the long, turbulent history of this East Slavic nation, culminating the independence in 1991.
Credit Hours: 3

HIST 2531: Women in Russian History
This is a survey course which is designed for students who have not previously taken in course in Russian history, and who are interested in how women experienced the period from the formation of the Kievan state in the ninth century to the fall of the Soviet Union in 1991.
Credit Hours: 3

HIST 2600: Early Christianity
(same as REL_ST 2600). History of Christian practices and teachings from Christian origins through the 8th century, including Eastern Orthodoxy Syrian Christianity, Roman Catholicism. Themes such as interpretation and creation of Scriptures, worship style, central rituals, debates about right teaching (orthodoxy) mysticism and developing lifestyles both in and apart from the world.
Credit Hours: 3
Prerequisites: sophomore standing

HIST 2610: Medieval Christianity
(same as REL_ST 2610). Study of the doctrinal developments, major theologians and schools, institutional formation and dissolution, mysticism, and liturgical expression within the context of cultural and political history. Beginning with Augustine and concluding with the 15th century. Prerequisites: REL_ST 2600
Credit Hours: 3

HIST 2620: History of Christianity, 1500-Present
(same as REL_ST 2620). Protestant and Catholic Christianity in age of European expansion; enlightenment; 19th and 20th-century challenges and responses.
Credit Hours: 3
Prerequisites: REL_ST 2600 and REL_ST 2610

HIST 2630: History of Christian Traditions
(same as REL_ST 2630). An overview of the origins and development of Christianities from the first century of the Common Era to the present day. Topics will include competing Christian theologies, colonialism, conversion narratives, globalization, religious violence, and heresy.
Credit Hours: 3
HIST 2800: Women in Indian History
(same as S_A_ST 2800). This course examines the role of women in Indian (South Asian) history, focusing on women in British Indian from the eighteenth century up to the Partition of 1947. While previous knowledge of South Asian history may be beneficial, it is not required for this course.

Credit Hours: 3

HIST 2810: History of Korea: Premodern to Hypermodern
This course examines Korea historically. The area known as Korea and the people identified as Korean are considered temporally from the ancient times to the contemporary period. This course begins with the questions of what is Korea and when it became a distinct place in world history.

Credit Hours: 3

HIST 2904: Black Studies in Slavery and Freedom
(same as BL_STU 2904). This course provides study of historical background, economic, political and social implications of slavery and freedom in the African Diaspora (Americas, Africa, Europe, Asia) as well as the legal and extralegal struggles for and meaning of (global, local, and national) freedom.

Credit Hours: 3

HIST 2950: Sophomore Seminar
This course is designed to introduce history majors to the experience of doing original research early in their undergraduate career. Topic will vary.

Credit Hours: 3

Prerequisites: sophomore standing required; departmental consent required

HIST 3000: History of Religion in America to the Civil War
(same as REL_ST 3000). Studies major American religious traditions from the Age of Discovery to the Civil War, especially the evolution of religious practices and institutions and their influence upon American social, intellectual and political developments.

Credit Hours: 3

Prerequisites: sophomore standing. May be restricted to History majors only during preregistration

HIST 3010: Colonial America
This course will examine major colonial American events from a cultural history standpoint. We will explore the ways in which the famous and not so famous shaped and were shaped by events of the seventeenth and eighteenth centuries and how these people understood the changing meaning of American liberty.

Credit Hours: 3

(same as BL_STU 3200). Examines the dismantling of American apartheid and its transformation into a new racial control system. It also explores how and why the Civil Rights Movement was converted into a struggle for Black Power.

Credit Hours: 3

Prerequisites: May be restricted to History majors only during preregistration

HIST 3210: History of Religion in Post-Civil War America
(same as REL_ST 3210). Surveys major American religious traditions from 1865 to the present. Focuses on the evaluation of religious practices and institutions and their interaction with and influence upon American social, intellectual and political developments.

Credit Hours: 3

Prerequisites: May be restricted to History majors only during preregistration

HIST 3220: U.S. Women's Political History, 1880-Present
(same as WGST 3220). This course explores American women's engagement with American politics (broadly defined) over the course of the twentieth century. It addresses issues of political identity, organization, ideology, and division.

Credit Hours: 3

Prerequisites: sophomore standing. May be restricted to History majors only during preregistration

HIST 3230: Individualism and Success in Modern America, 1830-Present
This course explores changing notions of individualism and success in American culture during the 19th and 20th centuries. Standards defining achievement, gain, and happiness for the individual citizen have evolved over time, and we will examine a wide variety of sources - advice literature, essays, novels, historical texts, plays and movies, political and religious texts, social criticism - to analyze this broad evolution. The resulting insights into a variety of historical issues and values, problems and possibilities, promise to forge a deeper understanding of what it has meant to be a successful individual in the United States over the last two hundred years.

Credit Hours: 3

Prerequisites: May be restricted to History majors only during preregistration

HIST 3400: Religious Biography: Black Religion
(same as BL_STU 3590). Studies black American religion through the biographies of representative and influential figures of the 19th and 20th centuries, including Nat Turner, W.E.B. Du Bois, and Marcus Garvey, M.L. King, Malcolm X.

Credit Hours: 3

Prerequisites: May be restricted to History majors only during preregistration

HIST 3420: America's Environmental Experience
(same as PEA_ST 3420). Team-taught analysis of American thought and action on physical environment during 19th-20th centuries. Relation between politics, economics, technological change, environmental quality; roles of science, law, regulatory agencies, grassroots action.

Credit Hours: 3

Prerequisites: May be restricted to History majors only during preregistration
HIST 3430: Sex Radicals in U. S History
(same as WGST 3430). Survey of the history of sexuality in the United States. Prerequisites: May be restricted to History majors only during preregistration.

Credit Hours: 3
Prerequisites: sophomore standing

HIST 3485: The United States and the Middle East
This course will explore the history of American relations with the Middle East. How have U.S. Policy-makers defined American interests in this region? How have they sought to protect and advance those interests? We will consider the cultural stereotypes and assumptions Americans have brought to their relations with the Middle East, and the images of the Middle East that have been projected in American popular culture. Finally, we will explore the ways in which the current political situations in the Middle East reflects the results of past U.S.

Credit Hours: 3

HIST 3410: The Ancient Greek World
Political and social institutions, intellectual life of Greek city-states to time of Alexander.

Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 3450: The Roman World
Rise and development of Roman institutions, Rome’s imperialism and culture through reign of Marcus Aurelius.

Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 3460: The Hellenistic World: From Alexander to Rome
The achievements of Alexander the Great; political, social, economic development of Hellenistic kingdoms from his death to 31 B.C.

Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 3470: The Scientific Revolution: 1550-1800
This course covers the history of science, or natural philosophy, from late Renaissance to the beginnings of the "Darwinian Revolution."

Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to History majors only during preregistration

Political, cultural and social history of Italy since 1815. Looks at how Unification, World War, Fascism, the Cold War, Student protests, the women’s movement and the end of the USSR shaped contemporary Italy.

Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 3490: The Origins of Scientific Thought
This course will trace the evolution of Western science from its Egyptian-Babylonian roots to the "Copernican Revolution" of the mid-sixteenth century.

Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to History majors only during preregistration

HIST 3500: The Early Middle Ages
This course will focus on the social, political, economic, and cultural development of Europe from roughly 300 to 1050.

Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to History majors only during preregistration

HIST 3510: The Later Middle Ages
This course will focus on the social, political, economic, and cultural development of Europe from roughly 1050 to 1500.

Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to History majors only during preregistration

HIST 3520: Ireland, 1100s to 1850
(Ireland, from Conquest to Famine: Ireland’s history as the first British Colony, from the conquests of the 1100s and 1500s-1600s to the Irish rebellion of 1798 and the Great Famine and mass emigration of 1845-50.

Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to History majors only during preregistration

HIST 3530: Ireland, 1850-1923
(same as PEA_ST 3530). Ireland, from Famine to Partition: Irish history from the Great Famine of 1845-50 to the revolutions of 1916-23 that brought partial independence from Britain but partitioned Ireland into two hostile and trouble states.

Credit Hours: 3
**Prerequisites:** May be restricted to History majors only during preregistration

**HIST 3612: Ireland, 1920-Present**
(same as PEA_ST 3612). Ireland, from Partition to the Present: After surveying the conflicts that led to Irish revolution and partition in 1916-23, the course focuses on the development of post partition Ireland and Northern Ireland, and on the violence that has scarred Northern Ireland since the 1960s.

**Credit Hours:** 3

**Prerequisites:** May be restricted to History majors only during preregistration

**Recommended:** HIST 3610 and/or HIST 3611

**HIST 3624: Comparative Approaches to Black Studies in History**
(same as BL_STU 3624). Comparative approach to the study of Black Diaspora history that focuses on the theory, method, structure, and application of modes of cultural production within the history of Black Diaspora cultures. Program consent for repetition.

**Credit Hours:** 3

**Prerequisites:** sophmore standing. May be restricted to History majors only during preregistration

**HIST 3630: Chinese Women's History**
Historical analysis of Chinese women in family, community, ideology, and national politics from the Late Imperial period to the present.

**Credit Hours:** 3

**Prerequisites:** sophmore standing or instructor’s consent. May be restricted to History majors only during preregistration

**HIST 3650: Islam and the West**
(same as PEA_ST 3850). This course provides a historical intellectual context for the raging debate on Islam and the West. It will discuss how Muslims conceived and reacted variously to the political and cultural challenge the West posed in the nineteenth and twentieth century. It will focus on the discourse on the reception of modernization in Islam. It will highlight the political and cultural energies invested by various Muslim elite communities to distinguish between modernization and Westernization. Islamic fundamentalism, the dominant Islamic expression of our time, will be usefully discussed in the context of this debate and praxis about modernization, authenticity, and Westernization.

**Credit Hours:** 3

**Prerequisites:** junior/senior standing. May be restricted to History majors only during preregistration

**HIST 3660: History of Mexico**
Survey of Mexican history from Cortes to present day.

**Credit Hours:** 3

**Prerequisites:** May be restricted to History majors only during preregistration

**HIST 3780: History of Caribbean America**
Comparative regional study of insular and mainland Caribbean nations. Emphasis on modern period. Independence; abolition of slavery; U.S. hegemony; economic, social, and political upheaval.

**Credit Hours:** 3

**Prerequisites:** May be restricted to History majors only during preregistration

**HIST 3800: Age of Jefferson**
Political, constitutional, cultural, and economic developments in United States during formative period of Republic, 1787-1828. Special attention to Constitutional Convention, formation of national political institutions.

**Credit Hours:** 3

**Prerequisites:** May be restricted to History majors only during preregistration
Prerequisites: May be restricted to History majors only during preregistration

HIST 4030: History of the Old South
Study of the South to 1860.
Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 4040: Houses Divided: Society and Politics in the Civil War Era
(same as BL_STU 4040). Houses Divided: Society and Politics in the Civil War Era examines the sectional crisis, the Civil War and Reconstruction through the lens of divided households. Considers the experience of soldiers and civilians, women and men, slaves and freed people.
Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 4050: American Colonial History to 1760
Study of colonial America; special emphasis on creation of a native American culture prior to 1760.
Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 4055: Witchcraft in Seventeenth Century New England
This course explores the social, cultural and intellectual aspects of witchcraft and witch-hunting in seventeenth century New England.
Credit Hours: 3

HIST 4060: The Period of the American Revolution, 1760-1789
Analysis of the Revolution, its causes and consequences, through establishment of the new government in 1789.
Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 4070: Indians and Europeans in Early America
A study of the cultural, political and often military struggle that took place for control of North America from contact through mid 19th century emphasizing native efforts to resist European domination and expansion in areas that became the U.S. and Canada.
Credit Hours: 3
Prerequisites: HIST 1100 or equivalent. May be restricted to History majors only during preregistration

HIST 4080: American Foreign Policy from Colonial Times to 1898
(same as PEA_ST 4080).
Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 4085: Special Problems in History
Independent investigation leading to a paper or project.
Credit Hour: 1-99

HIST 4085H: Special Problems in History
Independent investigation leading to a paper or project.
Credit Hour: 1-99
Prerequisites: honors eligibility required

HIST 4100: American Cultural and Intellectual History to 1865
Origins and growth of American values and ideas considered in their social context. Topics include: the work ethic, republican politics, revivalism, reform movements, sexual attitudes, literature in the marketplace, Afro-American and slave-holding subcultures.
Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

Political, social, economic, and intellectual evolution of America into a modern society, 1877-1918.
Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 4220: U.S. Society Between the Wars 1918-1945
Detailed examination of American history from end of World War I to end of World War II.
Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 4230: Our Times: United States Since 1945
Detailed examination of American history from end of World War II to the present.
Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 4240: History of the New South
Study of the South since 1860.
Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration
HIST 4250: U.S. Foreign Relations, 1898-1945
A history of American Foreign Policy from the Spanish American War to the end of World War II.

Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to History majors only during preregistration

HIST 4260: The Age of Ascendancy: U.S. Foreign Relations, 1945 - Present
(same as PEA_ST 4260). Surveys the Cold War in Europe and Asia, the Korean and Vietnam Wars, and Middle East policy.

Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to History majors only during preregistration

HIST 4270: African-Americans in the Twentieth Century
(same as BL_STU 4270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.

Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 4280: America in the Reagan Years
Examines the major political, economic, social, and cultural currents and developments of the "Long Eighties," from Jimmy Carter's "malaise speech" of July 1979 to Bill Clinton's mid-1990s embrace of welfare reform and pronouncement that the era of big government was over.

Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 4310: Adoption, Child Welfare and the Family, 1850-Present
(same as WGST 4310; cross-leveled with HIST 7310 and WGST 7310). This interdisciplinary U.S. history course will address topics such as: changing legal and social meaning of adoption since 1850; historical connections between adoption and poverty, family, gender race, sexuality, class, fertility, identity; and more recent issues such as transnational adoption.

Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 4400: History of American Law
American law from English origins to present. Reviews common law, codification, legal reform movements, slavery law, administrative state, formalism, legal realism, jurisprudential questions concerning rule of law.

Credit Hours: 3
Prerequisites: HIST 1100, HIST 1200, or HIST 1400. May be restricted to History majors only during preregistration

HIST 4410: Introduction to U.S. Social History
Study of daily life and the ways ordinary Americans experienced historical change. Considers such topics as work, leisure, family and community.

HIST 4415: African Americans and American Justice
(same as BL_STU 4415) This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws.

Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 4420: American Urban History
Growth, development and implications of the city in American history; historical analysis of urban problems.

Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 4425: The Superhero in American Culture From Washington to Wolverine
This course aims to help students become better informed and more critical consumers of popular culture by situating a selection of important American works and genres within the historical context of their creation, and in the history of American culture. Students will be challenged to look for historical patterns in popular culture and to consider the particular habits of thought and action that American popular culture seems to reinforce.

Credit Hours: 3
Prerequisites: HIST 1100 or HIST 1200 or HIST 1400 or HIST 2210

HIST 4430: The Great West in American History
Historical development of major regions, with emphasis on response to environment, public land policy, role of government in economic and resource development, citizen action, and cultural pluralism.

Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

HIST 4440: History of the American Environment
A reading and discussion course exploring diverse responses to the changing American environment from early man to the present, including ecological, institutional, and philosophical aspects.

Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration

#### HIST 7020: United States History from 1800-1860
American history from the Jeffersonian "revolution" in 1800 to the election of 1860 focuses on major discussion topics including the War of 1812, Jacksonian democracy, the growth of slavery, westward expansion, reform movements, and the coming of the Civil War.

- Credit Hours: 3

#### HIST 7030: History of the Old South
Study of the South to 1860.

- Credit Hours: 3

#### HIST 7040: Houses Divided: Society and Politics in the Civil
All major aspects of the period considered; rivalry between nationalizing and sectionalizing forces emphasized.

- Credit Hours: 3

#### HIST 7050: American Colonial History to 1760
Study of colonial America; special emphasis on creation of a native American culture prior to 1760.

- Credit Hours: 3

#### HIST 7060: The Period of the American Revolution, 1760-1789
Analysis of the Revolution, its causes and consequences, through establishment of the new government in 1789.

- Credit Hours: 3

#### HIST 7070: Indians and Europeans in Early America
A study of the cultural, political and often military struggle that took place for control of North America from contact through mid 19th century emphasizing native efforts to resist European domination and expansion in areas that became the U.S. and Canada.

- Credit Hours: 3
- **Prerequisites:** HIST 1100 or equivalent

#### HIST 7080: American Foreign Policy from Colonial Times to 1898
(same as PEA_ST 7080).

- Credit Hours: 3

#### HIST 7085: Problems in History
(same as S_A_ST 8085). Individual work not leading to dissertation.

- Credit Hour: 1-99
- **Prerequisites:** Instructor's consent

#### HIST 7100: American Cultural and Intellectual History to 1865
Origins and growth of American values and ideas considered in their social context. Topics include: the work ethic, republican politics, revivalism, reform movements, sexual attitudes, literature in the marketplace, Afro-American and slave-holding subcultures.

- Credit Hours: 3

#### HIST 7200: American Cultural and Intellectual History Since 1865
Tensions and transformations in American culture to the present. Topics include: spiritual crisis in Christianity; rise of welfare state liberalism; socialist and feminist alternatives; literature and the arts.

- Credit Hours: 3

#### HIST 7210: Origins of Modern America, 1877-1919
Political, social, economic, and intellectual evolution of America into a modern society, 1877-1918.
HIST 7220: U.S. Society Between the Wars 1918-1945
Detailed examination of American history from end of World War I to end of World War II.
Credit Hours: 3

HIST 7230: Our Times: United States Since 1945
Detailed examination of American history from end of World War II to the present.
Credit Hours: 3

HIST 7240: History of the New South
Study of the South since 1860.
Credit Hours: 3

HIST 7250: U.S. Foreign Relations, 1898-1945
A history of American Foreign Policy from the Spanish American War to the end of World War II.
Credit Hours: 3

HIST 7260: The Age of Ascendancy: U.S. Foreign Relations, 1945-Present
(same as PEA_ST 7260). Surveys the Cold War in Europe and Asia, the Korean and Vietnam Wars, and Middle East policy.
Credit Hours: 3

HIST 7270: African-Americans in the Twentieth Century
(same as BL_STU 7270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.
Credit Hours: 3

HIST 7280: America in the Reagan Years
Examines the major political, economic, social, and cultural currents and developments of the "Long Eighties," from Jimmy Carter’s "malaise speech" of July 1979 to Bill Clinton’s mid-1990s embrace of welfare reform and pronouncement that the era of big government was over.
Credit Hours: 3

HIST 7310: Adoption Child Welfare and the Family, 1850-present
(same as WGST 7310; cross-leveled with HIST 4310, WGST 4310). This interdisciplinary U.S. history course will address topics such as: changing legal and social meanings of adoption since 1850; historical connections between adoption and poverty, family, gender, race, sexuality, class, fertility, identity; and more recent issues such as transnational adoption.
Credit Hours: 3

(same as BL_STU 7415) This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws.
Credit Hours: 3

HIST 7420: American Urban History
Growth, development and implications of the city in American history; historical analysis of urban problems.
Credit Hours: 3

HIST 7430: The Great West in American History
Historical development of major regions, with emphasis on response to environment, public land policy, role of government in economic and resource development, citizen action, and cultural pluralism.
Credit Hours: 3

HIST 7440: History of the American Environment
A reading and discussion course exploring diverse responses to the changing American environment from early man to the present, including ecological, institutional, and philosophical aspects.
Credit Hours: 3

HIST 7470: Quantitative Methods in Historical Study
Introduces quantitative approaches to the study of history. Emphasizes opportunities, limitations, and dangers involved in several common forms of quantitative study.
Credit Hours: 3

HIST 7480: War Crimes and Genocide
This course will explore the development of international law, international consciousness, and U.S. foreign policy on the two distinct but often related issues of war crimes and genocide during the late 19th and throughout the 20th centuries.
Credit Hours: 3

HIST 7500: Philip II and Alexander the Great of Macedonia
Concentrates on the history and politics of Greece during reigns of these two kings along with Alexander’s military conquests and various controversies from the period.
Credit Hours: 3

HIST 7510: Crime and Punishment: Law in Classical Athens
Examines the main principles of Athenian law and judicial procedures including history of law code and study of actual speeches from a variety of law suits and procedures.
Credit Hours: 3
HIST 7515: Power and Oratory in Ancient Greece
Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC.
Credit Hours: 3
Prerequisites: instructor’s consent

HIST 7520: The Roman Revolution
(cross-leveled with HIST 7520). Analysis of the downfall of Republican institutions and the origins of autocracy, from the Gracchi to the death of Augustus in A.D. 14.
Credit Hours: 3

HIST 7530: The Roman Empire
Roman imperialism; management of, and rebellion in, the Empire; cultural exchange between Rome and its provinces.
Credit Hours: 3

HIST 7540: The Later Roman Empire
Political, religious and cultural life in Late Antiquity, from the “soldier emperors,” to the barbarian kingdoms and early Byzantium.
Credit Hours: 3

HIST 7550: Age of the Vikings
Scandinavia and Scandinavian expansion in the Central Middle Ages. Covers political, economic, religious, and cultural effects of the Viking movement.
Credit Hours: 3
Prerequisites: consent required
Recommended: HIST 1500, HIST 1540, HIST 1600 or HIST 2560

HIST 7555: Medieval France
This course covers the area that became the kingdom of France from the end of the Roman era until the end of the Hundred Years War; emphasize on political and cultural developments.
Credit Hours: 3
Prerequisites: instructor’s consent

HIST 7560: The Crusades
Survey of the European crusading movement from its inception in the late eleventh century to its decline during the later Middle Ages.
Credit Hours: 3

HIST 7570: Intellectual History of Europe, 17th and 18th Centuries
The Enlightenment’s attack on traditional Christian thought and values.
Credit Hours: 3

HIST 7610: Early Modern Britain, 1450-1688
Study of English politics, society, economy, culture, and religion during primarily the Tudor and Stuart eras, from the establishment of the Tudor dynasty (1485) through the Glorious Revolution. Emphasis on social and religious history.
Credit Hours: 3

HIST 7620: Modern England
Surveys British history in the 18th and 19th centuries. Emphasizes social and economic change.
Credit Hours: 3

HIST 7625: Nature vs. Nurture: The History of a Debate
(cross-leveled with HIST 4625). The purpose of this course is to explore the debate on nature vs. nurture in human society from the late eighteenth century to the present. The goal of the course is to give biology, history, and social science (including journalism) majors a better understanding of how this debate between nature and culture has played out over the past 250 years, and what impact it has left on biology, the social sciences, and public discourse today. Graded on A-F basis only.
Credit Hours: 3

HIST 7630: The Age of the Renaissance
Major changes in European economic, social, political, religious, and intellectual life between 1250-1500. Humanism and Renaissance. The “Renaissance problem.
Credit Hours: 3

HIST 7640: The Age of the Reformation
State of Europe about 1500. Political, diplomatic, social, and intellectual changes to 1648. Humanistic reform movements. Protestant-Catholic Reformation. Development of the modern state and international relations.
Credit Hours: 3

HIST 7650: Revolutionary France, 1789-1851
Revolutionary upheavals of the revolutionary-Napoleonic era, which destroyed traditional French society and laid the basis for modern France.
Credit Hours: 3

HIST 7660: European Women in the 20th Century
(same as WGST 7660). Examines the history of European women from World War I to the present. The course focuses on wars, migration, and the changing nature of family, work and community.
Credit Hours: 3

HIST 7670: From the Holy Roman Empire to the First World War:
German History, 1750-1918
(cross-leveled with HIST 4670). Cultural, social and political history of Central Europe from 1800 to 1914. A case study in incomplete modernization, focused on industrialization, unification, cultural crisis and imperialism.
Credit Hours: 3

</tbody>
</table>
HIST 8004: Topics in History-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to maximum of 6 hours.
Credit Hour: 1-99
Prerequisites: department consent

HIST 8010: Studies in American Religious History, 1750-1850
This class will examine important ideas and trends in the field, with an emphasis on popular religious movements. This is a reading-based seminar, revolving around discussion of influential recent books. May be repeated to a maximum of 6 hours.
Credit Hours: 3

HIST 8015: Seminar in American Religious History
The purpose of this course is for students to write an original work of scholarship, such as might be publishable in an academic journal or serve as a dissertation or book chapter. The field is open to topics in American religious history, including the social, cultural, political and intellectual history of American religion. Graded on A-F basis only.
Credit Hours: 3

HIST 8020: Seminar in the National Period of United States History
Directed research in the period 1787-1861. May be repeated to a maximum of 6 hours.
Credit Hours: 3

HIST 8021: Studies in the Early American Republic
This is an intense reading and discussion course designed to give students a crash course in the historiography of this period (emphasizing political culture) as well as practical experience in assimilating themselves quickly to a field. Students must attend and be prepared to participate knowledgeably in each class section. Graded on A-F basis only.
Credit Hours: 3

HIST 8022: Studies in the Age of Jackson 1824-1850
Continuation of HIST 8021, from election of Jackson to Civil War. May be repeated to a maximum of 6 hours.
Credit Hours: 3

HIST 8030: Studies in Sectional Controversy, Civil War and Reconstruction
Directed readings and discussions of major issues in the period of national unification of the United States, from 1850 through 1877. May be repeated to a maximum of 6 hours.
Credit Hours: 3

HIST 8031: Seminar in United States Sectionalism, Civil War & Reconstruction
Directed original research on political and related topics of the period 1848-1877. May be repeated to a maximum of 6 hours.
Credit Hour: 3-12

HIST 8085: Problems in History
(same as S_A_ST 8085). Individual work not leading to dissertation.
Credit Hour: 1-99
Prerequisites: instructor's consent

HIST 8089: Masters Research in History
Work equal to research done for a dissertation, but not leading to thesis.
Credit Hour: 1-99
Prerequisites: instructor's consent

HIST 8090: Masters Research in History
Graded on a S/U basis only.
Credit Hour: 1-99

HIST 8210: Studies in Recent United States History
Critical evaluation of writing in American history in period 1929-present. May be repeated to a maximum of 6 hours.
Credit Hours: 3

HIST 8211: Seminar in Recent United States History
Advanced seminar in American history from 1929 to present. May be repeated to a maximum of 12 hours.
Credit Hour: 1-12

The purpose of this course is to discuss important ideas and trends in the history of American religion from about 1850-2000. This period is currently one of the richest fields in American historical scholarship, and this is particularly the case for American religious history. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: consent required

HIST 8400: Studies in U.S. Women's History
Reading, discussion, and analysis of the historiography of the field. May be repeated to a maximum of 6 hours.
Credit Hours: 3

HIST 8401: Seminar in U.S. Women's History
Directed research and writing in American women's history. May be repeated to a maximum of 6 hours.
Credit Hours: 3

HIST 8405: Studies in Gender
Studies in recent research material focused on the analysis of the intersections of gender, race and class in particular times and places. May be repeated to a maximum of 6 hours.
Credit Hours: 3

HIST 8410: Independent Readings for History Ph.D. Comprehensive Examination
Independent readings for Ph.D. Comprehensives.
HIST 8415: Studies in African-American History
(same as BL_STU 8415). Readings on selected topics in African-American history from 1619 to the present, with emphasis on conflicting interpretations. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8416: Seminar in African-American History
(same as BL_STU 8416). Directed research in selected topics in African-American history. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8425: Seminar in United States Immigration History
The course will focus on historiography of American immigration, mainly European immigrants during 1820-1920. Special attention given to books and articles published in the past 25 years. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8432: Studies in Rural Social History of the United States
This course surveys the historiography of rural social history of the United States using a comparative regional perspective and presenting a chronological overview of the nineteenth and twentieth centuries.

Credit Hours: 3

HIST 8435: Seminar in American Cultural and Intellectual History
Directed research and writing in American cultural and intellectual history. May be repeated to a maximum of 6 hours.

Credit Hour: 1-12

HIST 8436: Studies in American Cultural and Intellectual History
Reading and discussion designed to promote critical understanding of theoretical and historiographical problems in American cultural and intellectual history. May be repeated to maximum of 6 hours.

Credit Hours: 3

HIST 8440: Studies in American Western and Environmental History
Readings, class discussion, and written analysis on topics in American Western and environmental history from early settlement to the present. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8441: Seminar in American Western and Environmental History
Directed research in problems in American Western and environmental history. May be repeated to maximum of 6 hours.

Credit Hour: 3-6

HIST 8445: Studies in World Environmental History
Readings explore relationship between human agency and environmental change over the courses of world history and on various continents. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8450: Studies in the History of the South
Group readings and appraisal of controversial interpretations in Southern history. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8455: Studies in the History of American Diplomacy
Readings in evolution of American diplomacy from the Revolution to present. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8456: Seminar in Recent American Diplomatic Problems
Directed research in problems of 20th-century American diplomacy. May be repeated to a maximum of 6 hours.

Credit Hours: 3-6

HIST 8457: Studies in the History of the United States and the World
This graduate seminar will explore the emerging historiographical field known as "The United States and the World", broadly defined to encompass both the history of U.S. foreign policy and other topics like the history of trade, immigration, and cultural exchange. This course will focus on historiography and methodology in order to introduce students to the existing literature, assist in preparation for comprehensive examinations, identify major trends in the field, and suggest directions for future research. Graded on A-F basis only.

Credit Hours: 3

HIST 8460: Studies in Trans-Atlantic History
This course examines important historical themes in a trans-Atlantic context. Readings will invite exploration of changes, continuities, contrasts, and causation of similar phenomena on both side of the ocean, in the Americas, Europe, and/or Africa.

Credit Hours: 3

HIST 8480: Historiography
Acquaints graduate students with examples of modern historical thought and practice by examining various conceptual approaches to the study of history. May be repeated to a maximum of six hours.

Credit Hours: 3

HIST 8510: Seminar in Ancient History
Readings and research on selected problems in ancient history. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8511: Studies in Ancient History
Reading of standard works and recent scholarship on selected problems in ancient history. May be repeated a maximum of 6 hours.
Credit Hours: 3

HIST 8531: Studies in English History
Readings in historical literature covering period since 1660; particular reference to new interpretations of political, social developments. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8540: Seminar in Medieval Culture
Investigates cultural developments in the medieval period. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8541: Studies in Medieval History
Readings in medieval history and historiography with emphasis on current scholarship. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8542: Seminar in Medieval Paleography
This course provides an introduction to medieval and Renaissance manuscript-sources and their use as research-tools in a fairly wide variety of sub-fields (e.g., archival study, scholastic text-analysis, vernacular literature). Graded on A-F basis only.

Credit Hours: 3

Prerequisites: departmental consent and competence in Latin grammar required

HIST 8550: Seminar in the Renaissance and Reformation
Analyzes problems of the period 1300-1600; emphasizes intellectual history. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8551: Studies in Early Modern European History
Readings in historical classics and current scholarship on Renaissance, Reformation, Baroque, and Enlightenment periods. Problem of modernity. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8570: Studies in Modern European History
Readings in recent research material on selected topics. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8800: Studies in Latin American History
Readings in standard and recent historical literature, with critical discussion of reports on special topics. May be repeated to a maximum of 6 hours.

Credit Hour: 1-6

HIST 8820: Studies on India in World History
This course is designed to introduce graduate students to major themes of South Asian history as well as to show how South Asian history may be integrated into world history survey course. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: consent of department required

HIST 8830: Studies in Muslim History
This course is designed to introduce graduate students to major themes in Muslim history, to supplement their current studies, and to provide a background necessary to teach surveys in world history, the modern world, or interdisciplinary studies. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: departmental consent

HIST 9089: PhD Research in History
Work equal to research done for a dissertation, but not leading to thesis.

Credit Hour: 1-99

Prerequisites: instructor's consent

HIST 9090: PhD Research in History
Graded on a S/U basis only.

Credit Hour: 1-99

Honors-General (GN_HON)

GN_HON 1010H: Career Explorations
Colloquia in which experts from both the University and the Columbia communities discuss their specialties and answer students' questions on the nature and current status of their disciplines. Open primarily to freshmen. Graded on an S/U basis only.

Credit Hour: 1

Prerequisites: Honors eligibility required

GN_HON 1030H: Honors Discussion Groups
Informal discussion between students and faculty on various academic topics. Graded S/U only.

Credit Hour: 1-2

Prerequisites: Honors eligibility required

GN_HON 1050H: Honors Seminar
Freshman-sophomore seminar offering a small group opportunity to write about and discuss basic works chosen by instructor.

Credit Hour: 1-3

Prerequisites: Honors eligibility required

GN_HON 1070H: Honors Elective Colloquium

Credit Hour: 2-3

Prerequisites: Honors eligibility required

GN_HON 1080H: Honors Internship
Independent study under the supervision of a regular faculty member.

Credit Hour: 1-3

Prerequisites: written proposal with professor's approval submitted in advance to Director of the Honors College. Honors eligibility required
GN_HON 1090H: Independent Study-Service Learning
Students participate in community service activities, attend regular meetings, conduct research, submit four journals, a short bibliography and a research paper on their service in the community.

Credit Hour: 1-3
Prerequisites: Honors eligibility required

GN_HON 2010: Honors Tutorial
Small group of students (2-5) engage in collaborative work under faculty guidance. The focus is determined in advance by a faculty member and shaped through discussion with the enrolled students. Course may be repeated for credit.

Credit Hour: 1-3
Prerequisites: instructor's consent

GN_HON 2010H: Honors Tutorial
Small group of students (2-5) engage in collaborative work under faculty guidance. The focus is determined in advance by a faculty member and shaped through discussion with the enrolled students. Course may be repeated for credit. Honors eligibility required

Credit Hour: 1-3
Prerequisites: instructor's consent

GN_HON 2015H: Theory and Practice of Tutoring Writing Seminar (same as ENGLSH 2015H). Addresses both the theory and practice of tutoring and the foundations of good writing. This course also qualifies students for a part-time job working as Writing Lab/Online Writing tutors in future semesters.

Credit Hours: 3
Prerequisites: ENGLSH 1000; instructor’s consent

GN_HON 2022: HCCIP Head Start
Students provide individualized attention to high-risk, low-income preschool children 3-5 hours per week directing enrichment activities.

Credit Hours: 3

GN_HON 2022H: HCCIP Head Start - Honors
Students provide individualized attention to high-risk, low-income preschool children 3-5 hours per week directing enrichment activities.

Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2024: HCCIP Public Health
HCCIP Public Health course enhances and supports the service learning experience by exploring areas of public health and volunteerism for students considering health-related careers. Students work 3-5 hours per week on service projects.

Credit Hours: 3

GN_HON 2024H: HCCIP Public Health - Honors
HCCIP Public Health course enhances and supports the service-learning experience by exploring areas of public health and volunteerism for students considering health-related careers. Students work 3-5 hours per week on service projects.

Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2027: Honors College Community Involvement Program
Course offers students the opportunity to become involved in the community, study service ethics, citizenship and leadership, and participate in the FIG program.

Credit Hours: 3

GN_HON 2027H: Honors College Community Involvement Program - Honors
Course offers students the opportunity to become involved in the community, study service ethics, citizenship and leadership, and participate in the FIG program.

Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2029: HCCIP Literacy Project
A service-learning outreach program designed to assist members of the community and offer students problem solving and leadership. Graded on A-F basis only.

Credit Hours: 3

GN_HON 2029H: HCCIP Literacy Project - Honors
A service-learning outreach program designed to assist members of the community and offer students problem solving and leadership. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2085H: Honors Problems
Independent study under the supervision of a regular faculty member.

Credit Hour: 1-3
Prerequisites: written proposal with professor's approval submitted in advance to Director of the Honors College. Honors eligibility required

GN_HON 2111H: The Ancient World
The reading list is comprised of the great writers of classical Greece and Rome such as Homer, Sophocles, Plato, Aristotle, Virgil and Apuleius, and of the biblical period, the authors of the Book of Job and the Gospel of Mark.

Credit Hours: 3

GN_HON 2112H: The Middle Ages and the Renaissance
The literature, art and philosophy which reflect the interaction of biblical thought with the classical past, and ultimately an emerging humanism, form the contents of the second semester. Readings include selections from such central figures as Aquinas, Chaucer, Dante, and Shakespeare. Special lectures are presented on the art, architecture and music of these eras.

Credit Hours: 3
Prerequisites: Honors eligibility required
GN_HON 2113H: The Early Modern World: The 17th-19th Centuries Enlightenment
The third segment of the Sequence treats the cultural developments in the West from the Baroque to the Enlightenment through Romanticism. The works of Cervantes, Descartes, Milton, Voltaire, Kant, Austen, Goethe, and Dickinson are among those studied. The music and visual arts of these periods are also included.

Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2114H: The Modern Era
The final semester of the Humanities Sequence deals with the intellectual and cultural developments from the mid-nineteenth to the late twentieth century. Lectures and discussions will be held on the philosophy of Marx, Nietzsche, Sartre and Hannah Arendt; on the literary works of Dickens, Dostoevsky, James Joyce, Virginia Woolf, T.S. Eliot, and Toni Morrison. Special lectures are presented on the music of the period.

Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2117H: The Emerging Canons of the Americas
Students will explore the issues of canonicity and the emerging works of Native American, Caribbean, Afro-Latin American, Asian American and Latino writers comparatively on the conceptions of colonialism, power and resistance, cultural and racial identity, hybridity, tradition and change.

Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2120H: Honors Humanities Colloquium
Credit Hour: 2-3
Prerequisites: Honors eligibility required

GN_HON 2230H: Honors Social Science Colloquium
Credit Hour: 2-3
Prerequisites: Honors eligibility required

GN_HON 2243H: Human Sciences Sequence I: Personal Identity
This interdisciplinary course approached the perennial but fascinating question of how we define, develop, and present ourselves. It considers this question from a range of disciplinary, regional, and thematic perspectives.

Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2244H: Social Relations
This interdisciplinary course explores the construction of human identity as it related to social groups (these groups might include anything from the family to fan clubs, sports teams to college students).

Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2245H: Social Organization
This course examines various forms of social organization from an interdisciplinary perspective. The course will examine small organizations (such as families and kin networks) that are grounded in face-to-face relationships and then consider the impact of large-scale organizations (such as markets and states). The class will also explore how these larger organizations can hold together in the absence of direct personal connections between members.

Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2246H: Global Citizenship
This course continues our introduction to the fundamental problems and concepts of social science by concentrating on today’s emerging global society and the ways in which it shapes social identity. The course also aims at encouraging students to think of themselves as global citizens - people who possess a sense of their own role as citizens of the world.

Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2310H: Honors Behavioral Science Colloquium
Credit Hour: 2-3
Prerequisites: Honors eligibility required

GN_HON 2450H: Honors Biological, Physical, Math (Computer Science) Science Colloquium
Open to all honors-eligible students. These courses may be cross-listed with Biological, Physical or Mathematical Science Departments. Interdisciplinary or experimental courses are encouraged.

Credit Hour: 1-3
Prerequisites: Honors eligibility required

GN_HON 2461H: Environment: From Molecules to the Cosmos
Inquiry-based exploration of how the world was made, environments formed, life evolved, and how it works together to sustain life on Earth. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2462H: Energy: From Particles to Civilizations
Inquiry based exploration of energy, what it is, how it is used, and how it sustains our life on Earth. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2950H: Honors Preceptorship
Active participation in a professor’s research for up to six hours a week.

Credit Hour: 1-3
Prerequisites: written description of the work with professor’s approval submitted in advance to Director of the Honors College. Honors eligibility required

GN_HON 3070H: Honors Electives Colloquium
Credit Hour: 2-3
Prerequisites: Honors eligibility required
GN_HON 3112H: Interdisciplinary Topics in the Humanities: Aesthetics and Performance
Aesthetics and Performance is the 2nd course offered in a four-semester, upper-level Humanities Series. It takes an Interdisciplinary approach to a variety of topics relevant to such disciplines as Art History, Art, Theater, English, and Film Studies. Students will be introduced to key figures, ideas, and texts in aesthetics and performance. The course format will be a combination of guest lectures, small-group discussion, and when possible, team-teaching. May be repeated for credit.
Credit Hours: 2-3
Prerequisites: junior or senior standing. Honors eligibility required

GN_HON 3131H: Interdisciplinary Topics in the Humanities: Big Ideas, Big Questions
Big Ideas, Big Questions is the third course offered in a four-semester, upper-level Humanities Series. It takes an interdisciplinary approach to concepts, theories, debates, and questions central to our understanding of the humanities.
Credit Hours: 3
Prerequisites: upper-level standing or permission of instructor; Honors eligibility required

GN_HON 3120H: Honors Humanities Colloquium
Credit Hour: 2-3
Prerequisites: junior standing. Honors eligibility required

GN_HON 3210H: Honors Behavioral Colloquium
Credit Hour: 2-3
Prerequisites: junior standing. Honors eligibility required

GN_HON 3230H: Honors Social Science Colloquium
Credit Hour: 2-3
Prerequisites: junior standing required. Honors eligibility required

GN_HON 3241H: Human Nature
(same as ANTHRO 3340H). We will investigate the topic of human nature, asking such questions as: What are we like? Why do we behave the way we do? Are we inherently selfish or social? Do we have a unitary "self" or are we made up of many (and sometimes contradictory) selves? Is there a single "human" nature or are there distinct "male" and "female" natures? Does human nature vary across cultures? Insights come from fields ranging from genetics to literature. The concept of "human nature" is fiercely contested and debated both within and between academic disciplines. We will be focusing on the scientific study of human nature, seeking naturalistic explanations by formulating and testing hypotheses. In particular, we will use evolutionary theory to unify explanations from disparate disciplines like biology, psychology, and anthropology. In each class, we will discuss one specific topic like sex or violence and seek to make sense of it from both the proximate level (what triggers the behavior and how does it develop?) and the ultimate level (why and how did our evolutionary history imbue us with this capacity?). Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 3450H: Honors Biological, Physical, Math (Computer Sci.) Science Colloquium

Credit Hour: 2-3
Prerequisites: junior standing required. Honors eligibility required

Hospitality Management (HSP_MGMT)

HSP_MGMT 1043: Introduction to Hospitality Management
A basic course in hospitality management operations. Review development of the industry, current trends and an analysis of the various types of operations in the hospitality industry.
Credit Hours: 3
Prerequisites: Restricted to students with 75 hours or less

HSP_MGMT 1133: Hospitality Law
Law as it relates to the hospitality field; theories of recovery/liability; lawsuits and their prevention; familiarization with legal arguments, lawyers, litigation and threats of litigation. May be taken concurrently with HSP_MGMT 1043.
Credit Hours: 3

HSP_MGMT 1505: Fundamentals of Sport Venue Management
Familiarization of the history of sport venues, types of sport venues, governance, the operations of various departments commonly found in a sport venue, design and flow of sport venues, and the concept of the Total Guest Experience. Graded A-F only.
Credit Hours: 3

HSP_MGMT 1723: Private Club Management and Operation
Clubs as a legal entity. Organizational structure, creed, charter, and by-laws; athletic activities, master and club calendars; food and beverage departments, budgets, taxes, and the future of clubs are discussed. Field trips to local area clubs are planned.
Credit Hours: 3

HSP_MGMT 1991: Food Service Sanitation Management
Basic principles of food service sanitation safety. Meets Standards for National Sanitation Certification. Graded on S/U basis only.
Credit Hour: 1
HSP_MGMT 1995: Culinary Fundamentals
Basic principles of food purchasing and selection, scientific principals and culinary fundamentals of food products in commercial food service operations.

Credit Hours: 3
Prerequisites: HSP_MGMT 1991

HSP_MGMT 2123: Food Service Operational Fundamentals
A basic training and directed work experience in selected entry-level positions, allowing students to develop skills sets in service, point of sale systems, food production, inventory and storage, performance evaluation, professionalism, and positive work relations in both the "Front" and "Back of House".

Credit Hours: 2
Prerequisites: HSP_MGMT 1991; concurrent enrollment with HSP_MGMT 2143 for Food and Beverage Management Emphasis students

HSP_MGMT 2143: Introduction to Food Production and Service Fundamental
This course provides students with information on the basic principles of effective food production and service management. The primary focus is on service management, menu planning, development and maintenance of quality standards throughout the food manufacturing cycle, and determination of recipe and total food costs.

Credit Hours: 2
Prerequisites: HSP_MGMT 1043; concurrent enrollment with HSP_MGMT 2123 for Food and Beverage Management Emphasis students

HSP_MGMT 2191: Seminar in Professional Development
Readings and discussion related to professional development for the industry.

Credit Hour: 1
Prerequisites: HSP_MGMT 1043. Open only to Junior and Senior students

HSP_MGMT 2385: Problems in Hospitality Management
Supervised study in a specialized phase of hospitality management.

Credit Hour: 1-99
Prerequisites: Hospitality Management major and departmental consent. Restricted to Freshman and Sophomore students

HSP_MGMT 2401: Topics in Hospitality Management
Instruction in specific subject matter areas in the field of hospitality management.

Credit Hour: 1-99
Prerequisites: Open only to Freshman and Sophomore students. Instructor’s consent required

HSP_MGMT 2550: Practicum in Sport Venue Management
200 hours of practical experience in a minimum of 4 components/functions of a sport venue. Graded S/U basis only.

Credit Hours: 3
Prerequisites: HSP_MGMT 1505. Restricted to Hospitality Management Majors only

HSP_MGMT 2991: Banquet and Catering Management
Students will gain knowledge and skills associated with management of systems and operations in catering and banquet facilities. An emphasis will be placed on the fundamentals of planning, food and beverage controls, menu planning, sales, marketing plans, and guest services.

Credit Hours: 3
Prerequisites: HSP_MGMT 1043 and HSP_MGMT 1991

HSP_MGMT 3153: Food Service Operations Management
In-depth study of management of systems/techniques utilized to control food, beverage and labor costs in hospitality industry with emphasis on computer applications/problems solving. Math Reasoning Proficiency course.

Credit Hours: 3
Prerequisites: HSP_MGMT 1043, HSP_MGMT 2143. Open only to junior and senior students

HSP_MGMT 3193: Hotel Organization and Structure
Analysis of the operating and functional departments in a modern hotel and the study of the interrelationships among the departments; five-day off-campus seminar.

Credit Hours: 3
Prerequisites: HSP_MGMT 1043 and instructor’s consent. Open only to juniors and seniors

HSP_MGMT 3233: Professional Beverage Management
This course provides an overview and analysis of the bar and beverage industry. Students will learn and explore the managerial and operational elements of professional beverage management. An emphasis will be placed on the legal aspects of beverage services, as well as provide training on responsible service of alcohol. In addition, sensory analysis will be used to pair food and beverages. The course will also give a better understanding of world beverages and the differences within each area. Students will apply knowledge and techniques of beverage service to menu and operational development.

Credit Hours: 3
Prerequisites: Open only to junior and senior students

HSP_MGMT 3343: Hotel Operations and Management
An in-depth study of management processes in non-food functions of hotels.

Credit Hours: 3
Prerequisites: HSP_MGMT 1043; open only to junior and senior students

HSP_MGMT 3385: Advanced Problems in Hospitality Management
Advanced study in a selected field of Hospitality Management.

Credit Hour: 1-99
Prerequisites: Hospitality Management major; open only to junior and senior students; instructor’s consent required
HSP_MGMT 3401: Advanced Topics in Hospitality Management
Instruction in specific subject matter areas in the field of hospitality management.
Credit Hour: 1-99
Prerequisites: Open only to juniors and senior students; instructor’s consent required

HSP_MGMT 3410: Conference and Meeting Management
An overview of convention and meeting planning to include group business market, the role of the event planner, the various techniques and services used to meet their needs, and technology used in the convention and meeting industry.
Credit Hours: 3
Prerequisites: HSP_MGMT 1043 (concurrent enrollment is allowed); open only to junior and senior students

HSP_MGMT 3415: Current Issues in Meeting and Event Management
A 1-credit guest speaker lecture class which provides a variety of professional topics for students who focus on convention and event management area.
Credit Hour: 1
Prerequisites: HSP_MGMT 1043 (concurrent enrollment is allowed). Open only to junior and senior students

HSP_MGMT 3510: Guest Service Management: Delivering the Fan Experience
Deliver the total sport fan experience through customer service from "driveway to driveway." Leadership in delivering customer service and meeting guest expectations. Service compliance standards, communication with patrons, and proper use of technology. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HSP_MGMT 1043. Instructor’s consent required. Open only to junior and senior students

HSP_MGMT 3515: Sport Venue Operation Management
Examination of the various operational dynamics of sport venues including: public versus private ownership and governance structures, scheduling and booking, sales and marketing, box office operations, financial management, event planning and execution, and revenue generation. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HSP_MGMT 1505; open only to junior and senior students

HSP_MGMT 3525: Principles of Live Entertainment Management
An in-depth study of business practices associated with the presentation of live entertainment events including family shows and musical performances. Course topics will include artist management, contracts and riders, financial management, event production, and tour scheduling. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HSP_MGMT 1505 or instructor’s consent; junior or senior standing

HSP_MGMT 3777: Management of Gaming Operations
Examines the history and development of gaming operations including legal, economic and psychological forces.
Credit Hours: 3
Prerequisites: Students must be age 21 or older. Open only to junior and senior students

HSP_MGMT 4243: Strategic Management in the Hospitality Industry
Applies functions and tools of business management to the hospitality field.
Credit Hours: 3
Prerequisites: HSP_MGMT 3343, HSP_MGMT 3153 and ACCTCY 2036. Restricted to Hospitality Management Majors during early registration. Open only to junior and senior students

HSP_MGMT 4253: Hospitality Human Resources Management
Recruitment, training, management of personnel required for operations in a hospitality business at all employment levels.
Credit Hours: 3
Prerequisites: HSP_MGMT 1043 or instructor’s consent. Restricted to Hospitality Management Majors during early registration. Open only to juniors and senior students

HSP_MGMT 4273: Hospitality Sales and Marketing Management
Marketing of hospitality services: human factors, consumer demand, planning, professional considerations. Discussion of traditional and current marketing methods.
Credit Hours: 3
Prerequisites: HSP_MGMT 1043. Restricted to Hospitality Management majors during early enrollment. Open only to junior and senior students

HSP_MGMT 4320: Destination Management
An overview of the optimal planning, development, and marketing of destination image and position in the context of the overall management plan.
Credit Hours: 3
Prerequisites: HSP_MGMT 1043 (concurrent enrollment is allowed). Open only to junior and senior students

HSP_MGMT 4343: International Hotel Management
This is an international hotel management course, which covers cultural aspects of hotel management, and current trends in the hotel management worldwide.
Credit Hours: 3
Prerequisites: HSP_MGMT 1043. Open only to junior and senior students

HSP_MGMT 4353: Hotel Finance Management
This is a finance management course designed for students who may pursue a management career in the hotel industry.
Credit Hours: 3
Prerequisites: HSP_MGMT 1043, HSP_MGMT 3343. Open only to junior and senior students
HSP_MGMT 4390: Optimization and Management of Food and Agricultural Systems
(same as F_S 4390 and AG_S_M 4390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.

Credit Hours: 3
Prerequisites: MATH 1100

HSP_MGMT 4505: Sport Venue and Event Promotion
An examination of theoretical principles and industry best practices for effective communication with various publics in the promotion of venues and their respective events. The principles of organizational advocacy, conducting press conferences, leveraging social media platforms, and the development and implementation of crisis communication plans are among the topics to be discussed. Students will have opportunities to receive practice in the preparation of strategic communication materials for print and electronic distribution. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HSP_MGMT 1505 and instructor's consent

HSP_MGMT 4520: The Business of Sport Venue Management
In-depth examination of venue business operations with an emphasis on revenue generation through sponsorships, group sales, and premium seating. Graded A-F basis only.

Credit Hours: 3
Prerequisites: HSP_MGMT 1505 or instructor's consent; junior or senior standing required

HSP_MGMT 4525: Sport Venue Security and Operational Risk Management
Overview of safety and security threats associated with venue infrastructure and the operation of sport and entertainment events. Assessment methodologies and mitigation strategies will be presented. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HSP_MGMT 1505 or instructor's consent, and junior or senior standing

HSP_MGMT 4940: Field Training in Hospitality Management
Advanced study, observation and employment in an area of hospitality. Written reports, faculty evaluation.

Credit Hour: 1-99
Prerequisites: junior or senior standing and instructor's consent

HSP_MGMT 4941: Internship in Hospitality Management
Combines study, observation and employment in an area of hospitality. Written reports, faculty evaluation.

Credit Hour: 1-12
Prerequisites: Completion of at least 75 hours

HSP_MGMT 4963: Recent Trends in Hospitality Management
For upper-level and graduate students who wish additional knowledge and understanding in specific subject matter areas.

Credit Hours: 1-2

HSP_MGMT 4980: Special Events Management
An overview of managing special events to include event design feasibility studies, legal compliance, promotion, safety and security, logistic, staffing, financial control and technology.

Credit Hours: 3
Prerequisites: HSP_MGMT 3410 and HSP_MGMT 4320. Open only to junior and senior students

HSP_MGMT 4985: Commercial Food Production Management
Identifies and applies the skills necessary to plan, produce, and serve meals to customers in a commercial setting.

Credit Hours: 5
Prerequisites: HSP_MGMT 1995, HSP_MGMT 2123 and HSP_MGMT 3153; open only to junior and senior students

HSP_MGMT 7253: Hospitality Human Resources Management
Recruitment, training management of personnel required for advanced position in hospitality operations.

Credit Hours: 3
Prerequisites: instructor's consent

HSP_MGMT 7273: Hospitality Sales
Marketing of Hospitality services: human factors, consumer demand, planning, professional considerations. Promotional methods, advertising, selling, merchandising, public relations and sales promotion.

Credit Hours: 3
Prerequisites: instructor's consent

HSP_MGMT 7320: Destination Management
This course provides an overview of hospitality and tourism destination management using a system approach that integrates a variety of hospitality and tourism organizations and business. Graded A-F only.

Credit Hours: 3
Prerequisites: HSP_MGMT 4980 or equivalent. Consent of instructor required

HSP_MGMT 7343: International Hotel Management
Course designed for graduate students pursuing a managerial position in the Hospitality Industry to understand the value and the competitive advantage of global hotel management. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HSP_MGMT 1043 and FINANC 2000. Instructor's consent required
HSP_MGMT 7353: Hospitality Financial Management
A finance management course designed for students who may pursue a management career in the hospitality industry.
Credit Hours: 3
Prerequisites: instructor's consent

HSP_MGMT 7390: Optimization and Management of Food and Agriculture Systems
(same as F_S 7390 and AG_S_M 7390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.
Credit Hours: 3
Prerequisites: instructor's consent

Human Development And Family Studies (H_D_FS)

H_D_FS 1520: Drop-In Child Care Programs
Examination of appropriate planning for and experience in a drop-in child care program.
Credit Hours: 3
Prerequisites: H_D_FS 3420 or equivalent and instructor's consent

H_D_FS 1600: Foundations of Family Studies
Introduction to family studies discipline and profession. Introduces historical changes in families, diversity by race, ethnicity, class and sexual orientation, and interaction of families with neighborhoods, schools, the workplace, and larger systems.
Credit Hours: 3

H_D_FS 1600H: Foundations of Family Studies - Honors
Introduction to family studies discipline and profession. Introduces historical changes in families, diversity by race, ethnicity, class and sexual orientation, and interaction of families with neighborhoods, schools, the workplace, and larger systems.
Credit Hours: 3
Prerequisites: Honors eligibility required

H_D_FS 1610: Intimate Relationships and Marriage
Examination of issues pertaining to intimate and marital relationships such as relationship foundation and dissolution processes, love, sex, behavioral scripts, and conflict. Diversity related to race, ethnicity, gender, and sexual orientation is explored.
Credit Hours: 3

H_D_FS 2085: Problems in Human Development and Family Studies
Graded on S/U basis only.
Credit Hour: 1-99

H_D_FS 2200: Research Methods in Human Development and Family Studies
Introduction to research methods in the social sciences. Emphasis on both qualitative and quantitative methods, as well as applied research and program evaluation.
Credit Hours: 3
Prerequisites: sophomore standing

H_D_FS 2300: Multicultural Study of Children and Families
Study of cultural variation in family life around the world and within America (e.g.: African-American, Hispanic American). Attention is paid to the external conditions that affect the internal workings of these families.
Credit Hours: 3

H_D_FS 2400: Principles of Human Development
Concepts and principles basic to an understanding of human development and learning throughout the life span.
Credit Hours: 4
Prerequisites: ENGLSH 1000

H_D_FS 2400H: Principles of Human Development - Honors
Concepts and principles basic to an understanding of human development and learning throughout the life span.
Credit Hours: 4
Prerequisites: ENGLSH 1000. Honors eligibility required

H_D_FS 2450: Human Sexuality Across the Life Span
An introductory survey of human sexuality including gender, love and intimacy, sexual expression and variation, sexual orientation, contraception, pregnancy and birth, sexually transmitted infections, sexual coercion, and sex in society. Sexuality within the context of intimate relationships across the life course will be emphasized.
Credit Hours: 3

H_D_FS 3050: Child Development: Birth to 3 (Infant/Toddler)
Child development from birth to age 3. Topics include growth patterns; influences of disabilities and risk factors; environmental factors and attachment; language acquisition; brain development; cognitive and social-emotional development; and perceptual and sensory motor skills. Some course content overlaps with H_D_FS 3500.
Credit Hours: 3
Prerequisites: restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI-ECE)

H_D_FS 3085: Problems in Human Development and Family Studies
Independent work on special problems in human development and family studies.
Credit Hour: 1-99
Prerequisites: instructor's consent. Graded on S/U basis only

H_D_FS 3090: Research Experience in Human Development and Family Studies
Student training and engagement in research with a H_D_FS faculty member. Students learn about the research process and methods, and
develop research skills (e.g., data collection, entry, coding, analysis) through hands-on work. Graded on S/U basis only. May be repeated for credit.

**Credit Hours:** 1-6  
**Prerequisites:** H_D_FS 2200; instructor's consent

---

**H_D_FS 3150: Child Development 4-8 (Early Childhood)**  
Physical, cognitive, social/emotional and personality growth and development during early childhood. Topics include major theories of development and current research and ideas in conjunction with historical approaches to examining growth and development in ages 4-8.

**Credit Hours:** 3  
**Prerequisites:** enrollment restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

---

**H_D_FS 3250: Professional Development**  
Role of a professional as a teacher, administrator, or advocate in early childhood programming. Topics include professionalism and ethics; identifying child abuse; the role of an early childhood educator; program models and working with children and professional colleagues.

**Credit Hours:** 3  
**Prerequisites:** enrollment restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

---

**H_D_FS 3350: Child Guidance and Classroom Environments**  
Examines developmentally appropriate practice in child guidance. Current guidance methods and programs will be covered. Students will develop their own approach to guidance based upon course content.

**Credit Hours:** 3  
**Prerequisites:** enrollment restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

---

**H_D_FS 3420: Early and Middle Childhood**  
Emotional, cognitive, and physical development of the child before puberty. Observation is integral part of course. Cannot receive credit for more than one of the following: PSYCH 2410, H_D_FS 3420, or ESC_PS 2500.

**Credit Hours:** 3  
**Prerequisites:** Restricted to Education, HDFS and Pre-HDFS majors during preregistration period

---

**H_D_FS 3430: Adolescence and Young Adulthood**  
Physical, intellectual, and psychosocial maturation of adolescents and young adults within the context of life long developmental sequelae.

**Credit Hours:** 3  
**Prerequisites:** Restricted to HDFS and Pre-HDFS majors during pre-registration period

---

**H_D_FS 3440: Adulthood and Aging**  
Examination of biological, cognitive, psychological and social changes experienced across adulthood.

**Credit Hours:** 3
H_D_FS 3650: Diversity in the Lives of Young Children and Families
In this course, students will explore cultural diversity in daily life and beliefs in families with young children. The focus is on U.S. families, with attention to the multiple cultures from which they come. Course content overlaps with H_D_FS 2300. Not recommended for students to enroll in both courses. Students may not receive credit for both H_D_FS 3650 and H_D_FS 2300.
Credit Hours: 3
Prerequisites: restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI-ECE)

H_D_FS 3700: Child Development Laboratory
Experience working with young children (ages 2-6 years), and applying developmentally appropriate practice. Focus on general guidance, curriculum planning, family and staff relations.
Credit Hours: 6
Prerequisites: H_D_FS 3500 or equivalent and instructor's consent

H_D_FS 3720: Student Teaching Prekindergarten
Experience working with children (2-5 years), using general guidance principles and methods for fostering creativity.
Credit Hours: 6
Prerequisites: H_D_FS 3420 or equivalent and instructor's consent

H_D_FS 3730: Field Training Practicum
Field training experiences under supervision. May be repeated for credit. Graded on S/U basis only.
Credit Hours: 3
Prerequisites: advisor's consent

H_D_FS 3750: Working with Families
This course focuses on application of an ecological model to the understanding of variation in parental roles, perspectives, approaches, and challenges. The course also provides an overview of effective communication strategies and parent education programs. Course content overlaps with H_D_FS 3600. Not recommended for students to enroll in both courses. Students will not receive credit for both H_D_FS 3600 and H_D_FS 3750.
Credit Hours: 3
Prerequisites: restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI-ECE)

H_D_FS 3800: Children's Play
This course is an examination of the complex phenomenon of play in children's lives. Emphasis is placed on the value of play in developmental, social, and cultural contexts. Topics include the exploration of play theories and supporting empirical evidence, play materials, various environments, violence and conflict resolution, and therapeutic uses of play. Observation and assessment of children at play and analysis of play environments is required.
Credit Hours: 3
Prerequisites: H_D_FS 2400, H_D_FS 3420, PSYCH 2410 or ESC_PS 2500 or equivalent, junior standing. Enrollment is restricted to H_D_FS and Pre H_D_FS majors during preregistration period

H_D_FS 3950: Practicum I: Child Observations in Classroom Environment
Opportunity for Early Childhood Education teacher candidates to have a guided learning experience in a professional agency that provides services to children and families. Some course content overlaps with LTC 4110.
Credit Hours: 3
Prerequisites: restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI-ECE); H_D_FS 3050, H_D_FS 3150, H_D_FS 3250, H_D_FS 3350 and H_D_FS 3450

H_D_FS 3960: Readings in Human Development and Family Studies
Readings in recent research; critical discussions.
Credit Hour: 1-99

H_D_FS 4001: Topics in Human Development and Family Studies
Selected current topics in field of interest.
Credit Hour: 1-99

H_D_FS 4085: Problems in Human Development and Family Studies
Independent work on special problems in human development and family studies. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent

H_D_FS 4100: Children in Health Care Settings
Overview of the medical conditions and treatments commonly encountered by children and adolescents in health care settings and their typical reactions to them. Introduction to the philosophy and the role of the child life profession.
Credit Hour: 3
Prerequisites: H_D_FS 2200, H_D_FS 2400 and H_D_FS 3420, or equivalent. Restricted to Human Development and Family Studies and Pre-Human Development and Family Studies majors during pre-registration period

H_D_FS 4110: Child Life Theory and Practice
Focuses on theoretical foundations and principal intervention strategies used in Child Life professional practice.
Credit Hours: 3
Prerequisites: H_D_FS 2200, H_D_FS 3420, H_D_FS 3500 or H_D_FS 3700, and instructor’s consent
**H_D_FS 4130: Child Life Practicum**
Observation of Child Life staff at Children’s Hospital and experience helping children and adolescents cope with hospitalization.

**Credit Hours:** 3  
**Prerequisites:** H_D_FS 3500 and H_D_FS 3700, consent required

**H_D_FS 4150: Development of Curriculum for Children Ages Birth to 3**
Students will learn and use assessment and documentation to inform curriculum; plan and evaluate developmentally appropriate activities; and learn about effective ways to share curriculum information with families. Focus is on children ages birth to 3.

**Credit Hours:** 3  
**Prerequisites:** enrollment is restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

**H_D_FS 4200: Latino/a Youth and Families**
Current issues in theory, methods, and research in U.S. Latino/a youth and families are examined from a social and developmental psychological perspective. The course is an advanced level study, with a particular focus on history, theories, methods, research, and applied social issues. Topics will include, parenting, siblings, youth development and adjustment, stress, risky behaviors, gender issues, assessment, study design, cultural values, intervention programs, and immigration issues.

**Credit Hours:** 3  
**Prerequisites:** H_D_FS 1600, H_D_FS 2200, H_D_FS 2300, H_D_FS 2400

**H_D_FS 4250: Development of Curriculum for Children 4-8**
Students will learn and use assessment and documentation to inform curriculum; plan and evaluate developmentally appropriate activities; and learn about effective ways to share curriculum information with families. Focus is on children ages 4-8.

**Credit Hours:** 3  
**Prerequisites:** enrollment is restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

**H_D_FS 4300: Black Families**
(same as BL_STU 4300). Emphasis is on the unique social, economic, religious, educational, and political environments that have affected the structure and function of the Black family.

**Credit Hours:** 3  
**Prerequisites:** H_D_FS 2200 or equivalent, and junior standing

**H_D_FS 4350: Assessing Young Children and their Environments**

**Credit Hours:** 3  
**Prerequisites:** enrollment is restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

**H_D_FS 4400: Childhood Death and Bereavement**
An exploration of issues that arise for children and families when facing life-threatening illness and death. The course also includes an examination of coping and helping strategies for dying and grieving children.

**Credit Hours:** 3  
**Prerequisites:** H_D_FS 2200, H_D_FS 2400, H_D_FS 3420 and instructor’s consent. Restricted to HDFS and Pre-HDFS majors during pre-registration period

**H_D_FS 4420: Environmental Influences on Lifespan Cognition**
This course covers the change and growth of cognition through the lifespan with particular attention to how the environment influences cognition (including perception, language memory, attention executive functions, and problem solving).

**Credit Hours:** 3  
**Prerequisites:** Pre-HDFS and HDFS Majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300, H_D_FS 2400 and H_D_FS 3420

**H_D_FS 4450: Understanding and Adapting for Developmental Differences**
This course focuses on knowledge of disability conditions, assessment and identification, interventions in inclusive environments, and collaborations among service providers.

**Credit Hours:** 3  
**Prerequisites:** enrollment is restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

**H_D_FS 4570: Development and Administration of Child Services Programs**
The development of leadership and management skills for administering community-and hospital-based programs for children. Includes an overview of office policy and procedure, staff and volunteer management, public relations, budgeting, accounts, accountability, and quality assurance.

**Credit Hours:** 3  
**Prerequisites:** Restricted to Pre-HDFS and HDFS Majors. Must have also completed H_D_FS 1600, H_D_FS 2200, H_D_FS 2300, H_D_FS 2400 and H_D_FS 3700

**H_D_FS 4610: Stress and Resilience in Families**
Introduction to the study of stressor events in families, such as poverty, violence within families, substance abuse, and health problems. Emphasis is on both prevention and coping.

**Credit Hours:** 3  
**Prerequisites:** Pre-HDFS and HDFS majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300 and H_D_FS 2400

**H_D_FS 4620: Family Interaction**
Analysis of intrafamilial interaction from a systems perspective; includes comparative study of family paradigms, family subsystems, goals, and resources, boundaries, and patterns of feedback.

**Credit Hours:** 3  
**Prerequisites:** Pre-HDFS and HDFS majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300 and H_D_FS 2400
H_D_FS 4630: The Process of Divorce
Examination of theory and research related to marital dissolution. The impact of divorce on children and adults, and divorce intervention strategies are considered.

Credit Hours: 3
Prerequisites: Pre-HDFS and HDFS majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300 and H_D_FS 2400

H_D_FS 4640: Interpersonal Relationships
In-depth examination of interpersonal relationships, including theoretical perspectives, research methods, relationship forms, relationship processes, and how context affects relationships. Students are introduced to the field of close relationships.

Credit Hours: 3
Prerequisites: Pre-HDFS and HDFS majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300 and H_D_FS 2400

H_D_FS 4650: History of the Family in Russia
Survey of family relations in Russia from the Kievan period. Materials drawn from child development and family studies, education, history, sociology, and literature.

Credit Hours: 3
Prerequisites: 3 hours in Social/Behavioral Sciences. Honor eligibility required

H_D_FS 4655H: History of the Family in Russia - Honors
Survey of family relations in Russia from the Kievan period. Materials drawn from child development and family studies, education, history, sociology, and literature.

Credit Hours: 3
Prerequisites: 3 hours in Social/Behavioral Sciences

H_D_FS 4680: Family Communication
(same as COMMUN 4520). Analysis of the functions and processes of communication within families.

Credit Hours: 3
Prerequisites: junior standing or departmental consent. May be restricted to Communication majors only during early registration

H_D_FS 4700: Children and Families in Poverty
Study of the extent, distribution, and implications of poverty on children and families. Examination of myths and realities, social conditions, policies, and programs that contribute to or reduce poverty and its consequences.

Credit Hours: 3
Prerequisites: Pre-HDFS and HDFS majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300 and H_D_FS 2400

H_D_FS 4720: Child and Family Advocacy
Study of the processes of social policies, legislation, and regulations affecting children and families at the local, state and federal levels. The course emphasizes current issues and need for citizen involvement. There will be sections restricted to H_D_FS majors and to Education majors. The H_D_FS section will be for 3 credits and the Education will be for 2 credits.

Credit Hour: 2-3
Prerequisites: Pre-HDFS and HDFS majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300 and H_D_FS 2400

H_D_FS 4740: Parent-Child Relations Over the Life Course
Examines the development, continuities, transitions, and discontinuities of parent-child relationships over the life course. Considers the influence of parents on children and children on parents.

Credit Hours: 3
Prerequisites: H_D_FS 2200 or equivalent

H_D_FS 4750: Program and Curriculum Design for FACS Education in Middle and Secondary Schools
What should a teacher do about planning for student learning in FACS? Includes objectives, lesson designs, resources, learner diversity, thinking skills, reasoning processes, articulation, legislation.

Credit Hours: 2
Prerequisites: Pre-HDFS and HDFS majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300 and H_D_FS 2400

H_D_FS 4760: Assessment in Family and Consumer Sciences Education
What should a teacher do to determine the extent to which program/lesson objectives have been achieved? Includes the selection, design, and use of a wide variety of assessment tools and techniques, and the impact of assessment on the evaluation of learners and program design.

Credit Hours: 2
Prerequisites: admission into Phase II, H_D_FS 4800, and instructor’s consent

H_D_FS 4800: Methods of Teaching FACS in Middle and Secondary Schools
What should a teacher do to help students achieve learner objectives? Includes classroom management strategies, choosing and using instructional methods to stimulate thinking skills and reasoning processes, communication skills, professionalism, and public relations.

Credit Hours: 3
Prerequisites: admission into Phase II, and instructor’s consent

H_D_FS 4940: Field Experience in Family and Consumer Sciences
Students will observe and assist in FACS classroom.

Credit Hour: 1
Prerequisites: to be taken concurrently with H_D_FS 4800, and instructor’s consent

H_D_FS 4941: Field Experience in Family and Consumer Sciences
Students will be involved in real-world experiences in a FACS classroom.

Credit Hour: 1
Prerequisites: to be taken concurrently with H_D_FS 4830; requires instructor’s consent
H_D_FS 4942: Student Teaching FACS in Middle and Secondary Schools
What guided practicum experiences will directly contribute to success as a classroom teacher? Students will teach for sixteen weeks within the state of Missouri under the supervision of an experienced FACS teacher.

Credit Hour: 1-15
Prerequisites: H_D_FS 4800, H_D_FS 4820, H_D_FS 4830, ENGLSH 1000, admittance to Phase III, and instructor’s consent

H_D_FS 4947: Families and Lifespan Development Capstone
Focus on integrating, extending, critiquing, and applying knowledge gained in the Families and Lifespan Development option within a family and lifespan development educational framework. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: senior standing and instructor’s consent

H_D_FS 4970: Families and Lifespan Development Capstone
Focus on integrating, extending, critiquing, and applying knowledge gained in the Families and Lifespan Development option within a family and lifespan development educational framework. Graded on A-F basis only.

Credit Hour: 1-15
Prerequisites: H_D_FS 4800, H_D_FS 4820, H_D_FS 4830, ENGLSH 1000, admittance to Phase III, and instructor’s consent

H_D_FS 4971: Child Development and Education Capstone
Practical experience working with young children (up to 10) in out-of-home care facilities. Program planning for children and working with parents. Lab hours required.

Credit Hours: 9
Prerequisites: H_D_FS 2200, H_D_FS 3500 and H_D_FS 3700, or equivalent and instructor’s consent

H_D_FS 4993: Internship in Human Development and Family Studies
Internships or field training experiences under supervision. Graded on S/U basis only.

Credit Hour: 1-99
Prerequisites: H_D_FS 2200 or equivalent and instructor’s consent

H_D_FS 7001: Topics in Human Development and Family Studies
Selected current topics in field of interest.

Credit Hour: 1-99

H_D_FS 7085: Problems
Independent work on special problems in human development and family studies. Graded on S/U basis only.

Credit Hour: 1-99
Prerequisites: instructor’s consent

H_D_FS 7100: Children in Health Care Settings
Overview of the medical conditions and treatments commonly encountered by children and adolescents in health care settings and their typical reactions to them. Introduction to the philosophy and the role of the child life profession.

Credit Hours: 3
Prerequisites: H_D_FS 2400 and H_D_FS 2420 or equivalent

H_D_FS 7110: Child Life Theory and Practice
Focuses on theoretical foundations and principal intervention strategies used in Child Life professional practice.

Credit Hours: 3

H_D_FS 7130: Child Life Practicum
Observation of Child Life staff at Children’s Hospital and experience helping children and adolescents cope with hospitalization.

Credit Hours: 3
Prerequisites: H_D_FS 3500 and H_D_FS 3700, consent required

H_D_FS 7200: Latino Families and Youth
This course will cover the critical integration of theoretical, methodological, and empirical issues in Latino psychology using a cross-cultural, cross-ethnic perspective, including the increased sensitivity to issues and challenges facing Latino families and youth from a social science perspective. There will be a particular focus on selected topics in social and developmental psychology, as well as, understanding the relevance to other areas of study, to policy contexts, and to applied settings. Students will provide a written, integrative literature review and research proposal related to the course topic. The course will consist primarily of seminar discussions based on the textbook and additional readings. Students will lead class discussions based on the readings and their QRCs. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Instructor’s consent

H_D_FS 7231: Foundations of Youth Development
This course provides an introduction to the field of youth development and the professions that include youth work. This course is designed to provide a foundation of knowledge that students will need to begin any course in the Great Plains IDEA Youth Development programs. Priority given to students in the Great Plains Idea Group master’s and certificate programs.

Credit Hour: 1

H_D_FS 7233: Basic Grant Development and Management
This course introduces students to grant development and management. This short-course is not intended to cover all aspects of grant development and management, but it will help students gain confidence in their grant development abilities and inspire them to learn more. Priority given to students in the Great Plains Idea Group master’s and certificate programs.

Credit Hours: 3

H_D_FS 7252: Adult Development
This course presents a life-span, multidisciplinary developmental framework that considers sociohistorical influences, individual differences, and concern for promoting optimal functioning. Priority given to students in the Great Plains Idea Group master’s and certificate programs.

Credit Hours: 3

H_D_FS 7253: Physical Health and Aging
This course identifies the basic physiologic changes during aging and their effects on health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical...
application to community settings is addressed. Priority given to students in the Great Plains Idea Group master’s and certificate programs.

Credit Hours: 3

H_D_FS 7255: Aging Policy
Policy development in the context of the economic status of the elderly populations. Retirement planning and the retirement decision; Social Security and public transfer programs for the elderly; intrafamilial transfers to/from the elderly; private pensions; financing medical care for the elderly; prospects and issues for the for the future. Priority given to students in the Great Plains Idea Group master’s and certificate programs.

Credit Hours: 3

H_D_FS 7256: Environments and Aging
Examination of attributes of physical environments that support special needs of older people and application of this knowledge to the design and management of housing, institutional settings, neighborhoods and communities. Priority given to students in the Great Plains Idea Group master’s and certificate programs.

Credit Hours: 3

H_D_FS 7257: Aging and the Family
Theories and research related to personal and family adjustments in later life affecting older persons and their inter-generational relationships. Related issues including demographics are also examined through the use of current literature. Priority given to students in the Great Plains Idea Group master’s and certificate programs.

Credit Hours: 3

H_D_FS 7259: Mental Health and Aging
Student is introduced to the range of issues utilizing several theoretical perspectives and the systems framework. Major mental, emotional, and psychiatric problems encountered in old age are examined, along with normal processes of aging individual’s personality, mental and brain functions. Priority given to students in the Great Plains Idea Group master’s and certificate programs.

Credit Hours: 3

H_D_FS 7260: Women and Aging
Women and aging is the study of theory, research and application of issues related to women and the aging experience. Priority given to students in the Great Plains Idea Group master’s and certificate programs.

Credit Hours: 3

H_D_FS 7261: Biological Principles of Aging
This course will give an overview of the normal aging process of the human body systems, environmental factors influencing normal aging, diseases and disorders associated with aging. A special topics unit will include but is not limited to interviews and observations dealing with the aging process in humans. Priority given to students in the Great Plains Idea Group master’s and certificate programs.

Credit Hours: 3

H_D_FS 7262: Long-Term Care Administration
Provides information for persons interested in leadership role in long-term care, or for those considering careers intersecting with senior living organizations. Also considers long-term care options. Priority given to students in the Great Plains Idea Group master’s and certificate programs.

Credit Hours: 3

H_D_FS 7300: Black Families
(same as BL_STU 7300). Emphasis is on the unique social, economic, religious, educational, and political environments that have affected the structure and function of the black families.

Credit Hours: 3

Prerequisites: H_D_FS 2200 or equivalent

H_D_FS 7400: Childhood Death and Bereavement
An exploration of issues that arise for children and families when families facing terminal illness or death. The course also includes an examination of coping and helping strategies for dying and grieving children.

Credit Hours: 3

Prerequisites: H_D_FS 2400 and H_D_FS 3420

H_D_FS 7470: Problems of Development in Multicultural Context
Within the context of socio-cultural diversity, this course covers developmental problems from conception to early adulthood. Theoretical and empirical contributions to classification, assessment, intervention, and public policy are emphasized.

Credit Hours: 3

Prerequisites: H_D_FS 2400, H_D_FS 1600, H_D_FS 2300, and H_D_FS 3420, or instructor’s consent

H_D_FS 7500: Developing Plans of Care for Community-Dwelling Older Adults
This applied course focuses on conducting geriatric assessments across multiple domains in order to develop holistic plans of care for older adults. Designed for students with some familiarity with the large age-graded income and health programs (e.g., Social Security, Medicare), the course examines the broad range of community resource programs designed to support more specific medical, psychosocial, and functional needs. Although service delivery varies by community, students will be trained to seek out those that are locally provided, up to and including resources providing a transitional bridge to respite and long-term care services. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Bachelor or Master’s degree in Human Services, Social Work, Mental Health, Nursing, Physical Rehabilitation, or Psychology. Must be enrolled in Graduate Certificate in Geriatric Care Management Program

H_D_FS 7520: Ethical, Legal, and Business Considerations in Geriatric Care Management
This applied eight-week course addresses multiple issues that geriatric care managers must consider in their work with the vulnerable older population. Topics include the ethics of care management, developing
cultural and spiritual competencies, legal requirements in both the fee-
for-service and nonprofit settings, as well as business aspects for those
considering independent practice in this growing field, including national
certification. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: H_D_FS 7500, H_D_FS 8012 and H_D_FS 7510;
Bachelor or Master’s degree in human services, social work, mental
health, nursing, physical rehabilitation or psychology required; must be
enrolled in Graduate Certificate in Geriatric Care Management program

H_D_FS 7570: Development and Administration of Child Services
Programs
The development of leadership and management skills for administering
community-and-hospital-based programs for children. Includes
an overview of office policy and procedures, staff and volunteer
management, public relations, budgeting, accounts, accountability, and
quality assurance. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: H_D_FS 2200 or equivalent, H_D_FS 3600 or H_D_FS
3700, or instructor’s consent

H_D_FS 7583: Personal Financial Issues of Older Adults
(same as FINPLN 7583). Principles and practice of personal finance
relevant to assessing and improving the financial security of older
individuals. Topics covered include sources of income, management of
cash flow, credit use and abuse, risk exposure, investment management,
housing, and financial planning. Financial vulnerabilities of seniors will be
explored. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Bachelor or Master’s degree in human services, social
work, mental health, nursing physical rehabilitation or psychology;
must be enrolled in Graduate Certificate in Geriatric Care Management
program. May be repeated for credit

H_D_FS 7600: Resilience in Families
Exploration of the evolution of a resilience approach to the study of
families and human development. Using a lifespan approach, students
will explore resilience across time as well as within special populations
such as families experiencing crisis and trauma, culturally diverse families,
and military families. Graded on A-F basis only.

Credit Hours: 3

H_D_FS 7610: Stress and Resilience in Families
Introduction to the study of stressor events in families, such as poverty,
violence within families, substance abuse, and health problems.
Emphasis is on both prevention and coping.

Credit Hours: 3

H_D_FS 7630: The Process of Divorce
Examination of theory and research related to marital dissolution. The
impact of divorce on children and adults, and divorce intervention
strategies will be considered.

Credit Hours: 3
Prerequisites: H_D_FS 1600, and H_D_FS 2200 or equivalent; or
instructor’s consent

H_D_FS 7640: Interpersonal Relationships
In-depth examination of interpersonal relationships, including theoretical
perspectives, research methods, relationship forms, relationship
processes, and how context affects relationships. Students will also be
introduced to the field of close relationships.

Credit Hours: 3

H_D_FS 7650: Family Crisis Intervention
Individuals and families in crises are examined. Focus is on grief
and loss, substance abuse, family violence, and suicidal ideation.
Examination of evidence-based preventions and treatments and
community resources for those affected by stress, trauma, and crises.
Graded on A-F basis only.

Credit Hours: 3

H_D_FS 7690: Family Resource Management
Survey course of personal finance and family resource management
literature to provide an overview of how individual and family members
develop and exercise their capacity to obtain and manage resources to
meet life needs. Resources include the self, other people, time, money,
energy, material assets, space, and environment. Graded on A-F basis
only.

Credit Hours: 3

H_D_FS 7720: Child and Family Advocacy
Study of the processes of social policies, legislation, and regulations
affecting children and families at the local, state and federal levels. The
course emphasizes current issues and need for citizen involvement.
There will be sections restricted to Human Developmental and Family
Studies majors and to Education majors. The Human Developmental and
Family Studies section will be for 3 credits and Education will be for 2
credits.

Credit Hour: 2-3

H_D_FS 7750: Physical Function and Older Adults
(same as F_C_MD 7750, ARCHST 7640, HMI 7750, NURSE
7750, P_HLTH 7750, and SOC_WK 7752). This course takes an
interdisciplinary approach to understanding and improving the physical
function and independence of older adults and explores approaches to
alleviate disabling conditions that interfere with physical function and
quality of life in old age. Graded on A-F basis only.

Credit Hours: 3

H_D_FS 7771: Psychosocial Function and Older Adults
(same as ARCHST 7650, F_C_MD 7751, HMI 7751, NURSE
7751, P_HLTH 7751 and SOC_WK 7751). This course takes an
interdisciplinary approach to understanding the psychosocial function of
older adults and explores approaches to alleviate disabling conditions
that interfere with psychosocial function and quality of life in old age.
Graded on A-F basis only.

Credit Hours: 3
H_D_FS 7800: Program and Curriculum Design for FACS Education in Middle and Secondary School
What should a teacher do about planning for student learning in FACS? Includes objectives, lesson designs, resources, learner diversity, thinking skills, reasoning processes, articulation, legislation.

Credit Hours: 3
Prerequisites: ESC_PS 2010 and SPC_ED 4020 or equivalent. Admission to Phase II, and instructor’s consent

H_D_FS 7820: Assessment in Family and Consumer Sciences Education
What should a teacher do to determine the extent to which program/lesson objectives have been achieved? Includes the selection, design, and use of a wide variety of assessment tools and techniques, and the impact of assessment on the evaluation of learners and program design.

Credit Hours: 2
Prerequisites: admission into Phase II, H_D_FS 4800, and instructor’s consent

H_D_FS 7830: Methods of Teaching FACS in Middle and Secondary Schools
What should a teacher do to help students achieve learner objectives? Includes classroom management strategies, choosing and using instructional methods to stimulate thinking skills and reasoning processes, communication skills, professionalism, and public relations.

Credit Hours: 3
Prerequisites: admission into Phase II, and instructor’s consent

H_D_FS 7940: Field Experience in Family and Consumer Sciences Education
Students will observe and assist in FACS classroom.

Credit Hour: 1
Corequisites: H_D_FS 4800, and instructor’s consent

H_D_FS 7941: Field Experience in Family and Consumer Sciences
Students will be involved in real-world experiences in a FACS classroom.

Credit Hour: 1
Corequisites: H_D_FS 4820, H_D_FS 4830, and instructor’s consent

H_D_FS 7942: Student Teaching FACS in Middle and Secondary Schools
What guided practicum experiences will directly contribute to success as a classroom teacher? Students will teach for sixteen weeks within the state of Missouri under the supervision of an experienced FACS teacher.

Credit Hours: 15
Prerequisites: H_D_FS 4800, H_D_FS 4820, H_D_FS 4830, instructor’s consent

H_D_FS 8001: Topics in Human Development and Family Studies
Selected current topics in field of interest.

Credit Hour: 1-99

H_D_FS 8012: Family Dynamics and Intervention
(same as NURSE 8010). Theories of family function and dysfunction; techniques of assessment; models of family intervention. Practicum with selected families.

Credit Hours: 3
Prerequisites: NURSE 7100

H_D_FS 8085: Problems in Human Development and Family Studies
Independent work on special problems in human development and family studies. Graded on S/U basis only.

Credit Hour: 1-99
Prerequisites: instructor’s consent

H_D_FS 8087: Seminar in Human Development and Family Studies
Seminar in selected topics in human development and family studies.

Credit Hour: 1-99

H_D_FS 8100: Foundations and Principles of Family and Community Services
This course provides an introduction to the field of family studies and related professions that involve working with individuals and families in communities. This course is designed to provide a foundation of knowledge that students will need in the Great Plains IDEA family and Community Services program. This course is organized around theory, research, and practice of Family Studies. Graded on A-F basis only.

Credit Hours: 3

H_D_FS 8110: Developmental Perspectives on Health and Illness
Seminar on child and adolescent development as applied to illness and hospitalization, with a focus on applying psychosocial research and theory in work with pediatric populations. Graded on A-F only. May be repeated for credit.

Credit Hours: 3
Prerequisites: instructor consent; coursework in human development and experience with pediatric populations

H_D_FS 8200: Research Methods in Human Development and Family Studies
Examination of the rationale for conducting scientific research; various research methods pertinent to the study of individuals over the life span, close relationships, marriages, and families; hypothesis formulation; selection of appropriate designs, instrumentation, and analysis.

Credit Hours: 3
Prerequisites: instructor’s consent

H_D_FS 8210: Theories of Human Development
Major theories of life span human development. Attention given to structure, content, and major research critiques for theoretical strengths.

Credit Hours: 3
Prerequisites: 6 hours of 300-level Behavioral Sciences courses or instructor’s consent

H_D_FS 8220: Family Theories
Reviews existing family theories, their assumptions, values, propositions, and applications. Examines processes of theory testing and construction and linkages between theory and research.
Credit Hours: 3
Prerequisites: instructor’s consent

H_D_FS 8221: Gerontechnology
Population aging is combining with technological advancement to create and change the world of modern older people, their families, and their communities. This course takes an interdisciplinary approach to the understanding of the biological, environmental, and social spheres where technology and gerontology meet. Graded on A-F basis only.
Credit Hours: 3

H_D_FS 8222: Creativity and Aging
What happens to creativity as a person ages? This unique class will help students to understand developmental and pathological changes in the brain that can lead to changes in creative output over time. Through hands-on experiences and direct association with older adults, students will grow an appreciation for creativity produced and inspired by older people. This course is intended to provide experiences that will help the student to be able to create art programs for older adults. Graded on A-F basis only.
Credit Hours: 3

H_D_FS 8231: Management and Leadership
This course serves as an overview of management and leadership concepts related to the operational and administrative competencies necessary in effective community-based family and youth organizations and agencies. It is designed to provide students with foundational skills and knowledge to manage day-to-day functions related to organizational systems such as human resource management, financial management, risk management, strategic planning, governance and advisory structures, and marketing. Graded on A-F basis only.
Credit Hours: 3

H_D_FS 8232: Youth Professionals as Consumers of Research
This course will help youth development professionals understand and evaluate the quality of research reports. Students will learn the basics of quantitative and qualitative research approaches that will enable them to understand, evaluate, and critique research articles reported in newspaper, journals or other sources. Priority given to students in the Great Plains Idea Group master’s and certificate programs.
Credit Hours: 3

H_D_FS 8233: Adolescents and their Families
This course explores adolescent development in the context of the family. The bi-directional influences between adolescents and their families will be examined. Implications for professionals working with youth and families will be explored and highlighted. Priority given to students in the Great Plains Idea Group master’s and certificate programs.
Credit Hours: 3

H_D_FS 8234: Adolescents and their Families
This course introduces the developmental period of adolescence. Emphasis will be on developmental tasks of this life stage and influences of family and home, school, peers and other contextual forces. Priority given to students in the Great Plains Idea Group master’s and certificate programs.
Credit Hours: 3

H_D_FS 8235: Administration and Program Management
This course introduces students to the development, administration and management of youth-serving organizations. Priority given to students in the Great Plains Idea Group master’s and certificate programs.
Credit Hours: 3

H_D_FS 8236: Federal and State Policies that Impact Youth Development
This course examines various federal and state policies that affect developmental opportunities for youth. Course participants will also examine not only how policies are developed, but also why. Priority given to students in the Great Plains Idea Group master’s and certificate programs.
Credit Hours: 3

H_D_FS 8237: Youth Cultures and the Cultures of Youth
This course examines the cultural contexts that affect youth from within and outside the family. Students will study social, ethnic, and educational processes that affect youth, and they will examine how history has shaped the current cultural climate of the U.S. Priority given to students in the Great Plains Idea Group master’s and certificate programs.
Credit Hours: 3

H_D_FS 8238: Program Design, Implementation and Evaluation
The course will discuss program design, implementation, and outcome evaluation. This course will focus on planning, designing logic models, and evaluating program. Students will evaluate a community-based project.
Credit Hours: 3
Prerequisites: graduate standing required. Priority given to students in the Great Plains Idea Group master’s and certificate programs

H_D_FS 8239: Community Youth Development
This course focuses on community youth development from a strength-based or developmental asset approach. This approach encompasses both individual development and interrelationships with social environments. Priority given to students in the Great Plains Idea Group master’s and certificate programs.
Credit Hours: 3

H_D_FS 8240: Youth Development
This course introduces the developmental period of adolescence. Emphasis will be on developmental tasks of this life stage and influences of family and home, school, peers and other contextual forces. Priority given to students in the Great Plains Idea Group master’s and certificate programs.
Credit Hours: 3

H_D_FS 8250: Perspectives in Gerontology
An overview of current aging issues including the prevailing focus of gerontology theory and research, critical social and political issues in aging, the interdisciplinary focus of gerontology, career opportunities,
and aging in the future. Priority given to students in the Great Plains Idea Group master’s and certificate programs.

Credit Hours: 3

H_D_FS 8253: Physical Health in Aging
This course identifies the basic physiologic changes during aging and their effects on health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed. Priority given to students in the Great Plains Idea Group master’s and certificate program.

Credit Hours: 3

H_D_FS 8254: Gerontology Research Methods and Program Evaluation
Overview of program evaluation, research methods and grant writing in gerontology. Includes application of quantitative and qualitative methods in professional settings. Priority given to students in the Great Plains Idea Group master’s and certificate programs.

Credit Hours: 3

H_D_FS 8258: Professional Seminar in Gerontology
An integrative experience for gerontology students designed to be taken near the end of the degree program. By applying knowledge gained in earlier course work, students strengthen skills in ethical decision-making behavior, apply these skills in gerontology-related areas such as advocacy, professionalism, family and workplace issues.

Credit Hours: 3

Prerequisites: Completion of all other gerontology program coursework.
Priority given to students in the Great Plains Idea Group master’s and certificate programs

H_D_FS 8300: Advanced Seminar on Multicultural Families
Advanced study of multicultural (racial, ethnic, social) families within American society. Attention is focused on each group’s unique cultural heritage and social environment.

Credit Hours: 3

Prerequisites: instructor’s consent

H_D_FS 8400: Programs for Young Children
An examination of program models that serve as a framework for curriculum in programs for children birth through age 5.

Credit Hours: 3

H_D_FS 8420: Cognitive Development
(same as PSYCH 8420). Study of the development of reasoning, perception and language.

Credit Hours: 3

H_D_FS 8430: Temperament and Personality Development
(same as PSYCH 8430). Intended for graduate students in psychology and related fields. This course is a survey of theory and research in the area of temperament and personality development, with emphasis on child development. Prerequisite: instructor’s consent.

Credit Hours: 3

H_D_FS 8440: Social and Emotional Development
(same as PSYCH 8440). Seminar on emotional and social development in children, with focus on research and theory on the impact of various family, school, and societal factors.

Credit Hours: 3

H_D_FS 8450: Adolescence and Emerging Adulthood
Seminar on development during adolescence and emerging adulthood from biological, cognitive, psychosocial, and cultural perspectives, and with a focus on health-related attitudes and behaviors.

Credit Hours: 3

H_D_FS 8460: Life Course Perspective
Seminar on the life course perspective, an interdisciplinary approach to the study of lives over time and the interplay between human lives and social institutions. Deals with how individual lives are shaped by social change and social structure.

Credit Hours: 3

H_D_FS 8470: Identity Development
Uses an Eriksonian framework to explore research regarding developmental tasks related to identity, such as attachment, self-esteem, moral behavior, achievement, and the formation of an abstract sense of self. Also considers such issues as gender identity, ethnic identity, and sexual identity.

Credit Hours: 3

H_D_FS 8510: Parenting Education
Study of theories, models, research and skills regarding parenting effectiveness and parent-child relations in the context of Western and Eastern cultures. Included are comparisons of the relative strengths and weaknesses of various parenting approaches, historical perspective on parenthood and children, parenting roles, strategies for contemporary parenting, developmental interaction from infancy through adulthood and selected special concerns of parents. A Bio-Ecological Systems approach will be utilized in this course. Graded on A-F basis only.

Credit Hours: 3

H_D_FS 8520: Lifespan Development
This course covers the human development including the cognitive, social-emotional, motor, language, and moral domains from both a lifespan and a bio-ecological perspective. Course content focuses on the major theories of development as well as current research on the micro-macro interrelationship. Students who complete this course will have a better understanding of individual human developmental processes and their relationship with context and within family and community matters. Graded on A-F basis only.

Credit Hours: 3

H_D_FS 8510: Parenting Education
Study of theories, models, research and skills regarding parenting effectiveness and parent-child relations in the context of Western and Eastern cultures. Included are comparisons of the relative strengths and weaknesses of various parenting approaches, historical perspective on parenthood and children, parenting roles, strategies for contemporary parenting, developmental interaction from infancy through adulthood and selected special concerns of parents. A Bio-Ecological Systems approach will be utilized in this course. Graded on A-F basis only.

Credit Hours: 3

H_D_FS 8610: Remarriage & Stepfamilies: Development, Dynamics, & Intervention
The processes of remarriage and reconstituted family dynamics; special developmental needs and intervention models will be studied. The impact on children is considered.
Credit Hours: 3
Prerequisites: instructor’s consent

H_D_FS 8620: Work and Family
Study of the interaction between paid labor, unpaid labor, and the American family. Heavy concentration is placed on the roles gender, race, and history play is the workplace and in the home.
Credit Hours: 3
Prerequisites: instructor’s consent

H_D_FS 8630: Gendered Relations in Families
(same as WGST 8630). From a feminist perspective, the roles of gender in shaping family life experience and of family life experience in shaping gender will be explored. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: instructor’s consent

H_D_FS 8640: Family Interaction
Examination of intrafamilial interaction. Includes an overview of theories used to study family interaction, critical review of the assessment of family interaction; and examination of contemporary research on family interaction focusing on intra and inter-generational relationships.
Credit Hours: 3
Prerequisites: H_D_FS 1600 and H_D_FS 2200 or equivalent; or instructor’s consent

H_D_FS 8710: Children, Families and Public Policy
Seminar on societal issues relating to children and families, with focus on the development of public policies.
Credit Hours: 3
Prerequisites: instructor’s consent

H_D_FS 8770: Poverty
Implications of poverty for child, adult, and family functioning. Poverty-related policies and programs.
Credit Hours: 3

H_D_DS 8960: Readings in Human Development and Family Studies
Readings in recent research; critical evaluation.
Credit Hours: 1-99
Prerequisites: instructor’s consent

H_D_FS 8972: Internship in Human Development and Family Studies
Internships and/or field training experiences under supervision. Graded on S/U basis only.
Credit Hours: 1-99
Prerequisites: instructor’s consent

H_D_FS 9090: Research in Human Development and Family Studies
Independent research leading to thesis or dissertation. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor’s consent

H_D_FS 9100: Teaching Practicum
Supervised experience in teaching various audiences, including college students, professionals, and community residents. Graded on S/U basis only.
Credit Hour: 2-6
Prerequisites: instructor’s consent

H_D_FS 9130: Writing Research Proposals: Skill Building
(same as NURSE 9132). This course teaches the components of writing a research proposal for external funding. Graded on S/U basis only.
Credit Hours: 3
Prerequisites: H_D_FS 9200 and graduate level statistics course; instructor's consent; PhD Students only

H_D_FS 9131: Responsible Conduct of Research in Health and Social Sciences
(same as NURSE 9131). This course examines professional research ethics including the rights of human subjects. Graded on an S/U basis only.
Credit Hour: 1
Prerequisites: instructor’s consent

H_D_FS 9200: Advanced Research Methods in Human Development and Family Studies
(same as NURSE 9410). Examination of issues related to the study of individuals and their families: measurement, designs, and interpretation of statistical analyses. Statistics are placed in perspective through readings and discussions of the relationships between theory, research design, and data analyses.
Credit Hours: 3
Prerequisites: H_D_FS 8200 or instructor’s consent

H_D_FS 9210: Research Practicum in Human Development and Family Studies
Independent research activities in conjunction with faculty. Graded on S/U basis only.
Credit Hour: 2-6
Prerequisites: instructor’s consent

H_D_FS 9400: Macro Social Theory
(same as SOC_WK 9400). An in-depth examination of human development and social environmental theories appropriate to social welfare practice in formal organizations, interorganizational combinations, communities, and larger political entities. Students may not receive credit for both H_D_FS 9400 and SOC_WK 9400.
Credit Hours: 3

H_D_FS 9420: Qualitative Methods
(same as NURSE 9420). Examines the following selected qualitative research approaches appropriate for the study of nursing phenomena and the extension or modification of scientific knowledge so as to be relevant to nursing: case study research methods, verbal qualitative approaches, and nonverbal qualitative approaches. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: NURSE 7150 and doctoral status (or permission of faculty)

H_D_FS 9550: Meta Analysis Research
(same as NURSE 9550). Examines quantitative synthesis including research questions, search strategies, coding issues, meta-analysis statistical procedures, and interpretation of findings. Emphasizes conceptual understanding and practical methods. Graded on A-F only basis.
Credit Hours: 3
Prerequisites: 6 hours of graduate statistics; H_D_FS 9200 or graduate level quantitative methods course

H_D_FS 9560: Qualitative Systematic Reviews
(same as SOC_WK 9560 and NURSE 9560). Examine and carry out elements of qualitative systematic reviews: topic/problem identification, data collection, and analysis. Understand how to limit threats to validity and maximize generalizability.
Credit Hours: 3
Prerequisites: H_D_FS 9420 or equivalent

H_D_FS 9700: Social Welfare Policy Seminar
(same as SOC_WK 9700) Critical examination of comparative models of social policy development; preparation of a professional social work policy analysis in the student's area of interest/specialization.
Credit Hours: 3

Industrial And Manufacturing Systems (IMSE)

IMSE 1000: Introduction to Industrial Engineering
Introduction to industrial engineering profession, the Industrial and Manufacturing Systems Engineering department, and the core topics of industrial engineering. Introduction to problem solving, ethics and industrial engineering design and analysis techniques.
Credit Hour: 1

IMSE 1010: Experimental Course
For freshman-level students. Content and credit to be listed in the Schedule of Courses.
Credit Hour: 1-99

IMSE 1087: Undergraduate Seminar
Seminars are held monthly to provide a forum for departmental communication of upcoming opportunities (jobs, speakers, deadlines, etc.), speakers from industry to provide educational context, and student interaction. Required every semester of enrollment for graduation. Graded on S/U basis only.
Credit Hours: 0

IMSE 2030: Fundamentals of Systems Design and Analysis
Develop an understanding of a systems approach to the design and operation of modern industrial organizations: systems structure and function, system specification, structured problem solving and system design methodology.
Credit Hours: 3

IMSE 2110: Probability and Statistics for Engineers
Introduction to data analysis, probability concepts, random variables, parameter estimation and hypothesis testing.
Credit Hours: 3
Prerequisites: MATH 1500. Restricted to Engineering Students who are non-IMSE majors

IMSE 2210: Linear Algebra for Engineers
Study of quantitative methods necessary for analysis, modeling and design of optimal industrial systems.
Credit Hours: 3
Prerequisites: CMP_SC 1001, INFOTC 1040, CMP_SC 1050 and MATH 1700

IMSE 2410: Introduction to Information Technologies
A survey of current technologies and their use. Different technologies will be reviewed. Examples: web search strategies, common application tools, searching and sorting on the WWW, upcoming trends and directions in information technologies. This is a web-based self-study course with instructor's guidance.
Credit Hour: 1

IMSE 2710: Engineering Economic Analysis
Fundamentals of engineering economic decision making. Includes time value of money, breakeven analysis, capital budgeting, replacement, after-tax analysis, inflation, risk, sensitivity analysis and multi-attribute analysis.
Credit Hours: 3
Prerequisites: sophomore standing

IMSE 2810: Performance Measurement and Ergonomics
Credit Hours: 3
Prerequisites: IMSE 2110

IMSE 2810: Performance Measurement and Ergonomics
Credit Hours: 3
Prerequisites: IMSE 2110

IMSE 2810: Performance Measurement and Ergonomics
Credit Hours: 3
Prerequisites: IMSE 2110

IMSE 3001: Topics in Industrial and Manufacturing Systems Engineering
Current and new technical developments in industrial engineering. May be repeated to 6 hours.
Credit Hour: 0-4
Prerequisites: instructor's consent

IMSE 3030: Manufacturing and Supply Systems
Provide a structured approach for the design and optimization of a system throughout its lifecycle: techniques following the logical sequence of strategic analysis, system design, implementation, and monitoring.
Credit Hours: 3
Prerequisites: IMSE 2030
IMSE 3110: Probability Models for Engineers
Introduction to probability concept and theory, random variables, discrete and continuous probability distributions, joint probability distributions.
Credit Hours: 3
Prerequisites: MATH 1500. Restricted to IMSE students only

IMSE 3810: Ergonomics and Workstation Design
Ergonomics and human factors theories applied to the design of man-machine systems. Discussion of ergonomic methods for measurement, assessment, and evaluation, with major topics including workstation design, environmental stresses, and workplace safety. Includes lab.
Credit Hours: 3
Prerequisites: Restricted to IMSE students or by Departmental consent and ENGINR 1200

IMSE 4001: Topics in Industrial and Manufacturing Systems Engineering
Current and new technical developments in industrial engineering.
Credit Hours: 3

IMSE 4085: Problems in Industrial Engineering
Supervised investigation in industrial engineering presented in form of an engineering report.
Credit Hour: 1-4

IMSE 4110: Engineering Statistics
Understanding and application of statistical analysis techniques. Emphasis on hypothesis testing, regression analysis, analysis of variance (ANOVA) and design of experiments (DOE).
Credit Hours: 3
Prerequisites: Restricted to IMSE students or by Departmental consent. Grade of C- or better in IMSE 3110

IMSE 4210: Linear Optimization
Theory and application of linear optimization.
Credit Hours: 3
Prerequisites: Restricted to IMSE students or by Departmental consent. Grade of C- or better in IMSE 2210

IMSE 4230: Operations Research Models
Formulates probabilistic models and determines optimal control policies for queuing and inventory systems. Introduces Markov chains and dynamic programming.
Credit Hours: 3
Prerequisites: Restricted to IMSE students or by Departmental consent. Grade of C- or better in IMSE 2210 and IMSE 3110

IMSE 4280: Systems Simulation
Discrete-event stochastic systems modeling and experimentation using simulation software. Statistical design and analysis including distribution fitting and alternative comparison methodologies.
Credit Hours: 3

IMSE 4310: Integrated Production Systems Design
Design and operation of production systems, including lean six sigma concepts, just-in-time/kanban, facility layout and material flow issues.
Credit Hours: 3
Prerequisites: Restricted to IMSE students or by Departmental consent. IMSE 4210, IMSE 4280

IMSE 4330: Material Flow and Logistics System Design
Modeling and analysis of structural and operational issues associated with material-flow system design including facility location, warehouse/inventory systems, and distribution/transportation systems.
Credit Hours: 3
Prerequisites: IMSE 4210, IMSE 4280

IMSE 4350: Production and Operations Analysis
Quantitative methods for forecasting, scheduling, and production control in manufacturing and service systems. Use of Enterprise Resource Planning (ERP) systems.
Credit Hours: 3
Prerequisites: Restricted to IMSE students or by Departmental consent. IMSE 4210 and IMSE 4230

IMSE 4385: Lean Six Sigma Green Belt Project
Application of the Lean Six Sigma methodology in an industry-based project. Prerequisites: IMSE 4310
Credit Hour: 1

IMSE 4410: Management Information Systems Design
MIS concepts and management issues, HTML for web pages and eShop (front-office operations), back-office operations using relational databases, introduction to SQL.
Credit Hours: 3
Prerequisites: Restricted to IMSE students or by Departmental consent. INFOTC 1040 or CMP_SC 1050 and junior standing required

IMSE 4420: Web-Based Information Systems
Data models, design of databases using E-R, UML (Access/Oracle), web databases, web servers and interfaces (Visual Basic, JavaScript), E-commerce infrastructure (PDM, STEP, XML), data mining for management information and services.
Credit Hours: 3
Prerequisites: IMSE 4410 and instructor's consent

IMSE 4550: Computer Aided Design and Manufacturing
Product realization process from design, process planning, to manufacturing. Includes CE, DFS/DFM, CAD, CAPP, CNC, and survey of manufacturing methods.
Credit Hours: 4
Prerequisites: Restricted to IMSE students or by Departmental consent. Junior Standing
IMSE 4560: Introduction to Rapid Prototyping
(cross-leveled with IMSE 4560). Course covers all five MU systems: FDM, SLS, SLA, Polyjet, 3DP. Students will learn fundamental rapid prototyping and related concepts, and design and produce models from each system. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Sophomore standing or higher

IMSE 4570: Computer Integrated Manufacturing Control
Implementation of computer integrated manufacturing (CIM) and automation at the shop floor level. Covers essential components of machine sensing and actuation (including programmable robots), information representation and processing, data communication and networking.
Credit Hours: 3
Prerequisites: Junior Standing

IMSE 4580: Industrial Energy Efficiency and Management
(cross-leveled with IMSE 7580). Introduction to the fundamentals of industrial energy efficiency and management. Covers the essential concepts, best practices, management systems and current standards to achieve and improve energy efficiency in industrial settings, and utilizes hands-on experiences involving real assessment and analysis of industrial site visits and projects.
Credit Hours: 3
Prerequisites: IMSE 2030 or instructor's consent

IMSE 4610: Engineering Quality Control
Analysis of quality in manufacturing including control charts, sampling plans, process capability, experimental design; introduction to system reliability. Overview of Six Sigma and DMAIC methodology.
Credit Hours: 3
Prerequisites: Restricted to IMSE students or by Departmental consent. IMSE 4110

IMSE 4760: Entrepreneurial Innovation Management: Enterprise Design
(same as MANGMT 4760). Expand on IMSE 4750 business/technology plan into an operations plan; advertising facilities layout, selling and distribution channels, product designs, accounting procedures, manufacturing processes, and prototypes.
Credit Hours: 3
Prerequisites: IMSE 4750

IMSE 4765H: Entrepreneurial Innovation Management: Enterprise Design-Honors
(same as MANGMT 4765H). Expand on IMSE 4755H business/technology plan into an operations plan; advertising facilities layout, selling and distribution channels, product designs, accounting procedures, manufacturing processes, and prototypes.
Credit Hours: 3
Prerequisites: IMSE 4755H. Honors eligibility required

IMSE 4770: Entrepreneurial Innovation Management: Enterprise Operations
(same as MANGMT 4770). Perform the day-to-day operations for an enterprise by managing all business processes including finance, manufacturing, sales and delivery. Prerequisites: Junior Standing
Credit Hours: 3

IMSE 4775H: Entrepreneurial Innovation Management: Enterprise Operations-Honors
Perform the day-to-day operations for an enterprise by managing all business processes including finance, manufacturing, sales and delivery.
Credit Hours: 3
Prerequisites: Junior Standing. Honors eligibility required

IMSE 4770: Capstone Design I
Overview of professional engineering issues such as ethics, team dynamics, communication, and project management. Includes team-based industrial assessments to develop skills in problem/opportunity identification.
Credit Hour: 1
Prerequisites: Restricted to IMSE students or by Departmental consent. Senior Standing

IMSE 4780: Capstone Design II
Industry-based team design experience structured to integrate material presented throughout the Industrial and Manufacturing Systems Engineering curriculum. Must immediately follow IMSE 4970.
Credit Hours: 3
Prerequisites: Restricted to IMSE students or by Departmental consent. IMSE 3810, IMSE 4310, IMSE 4970

IMSE 4990: Undergraduate Research in Industrial Engineering
Independent investigation or project in industrial engineering. May be repeated to 6 hours.
Credit Hour: 0-6

utilizes hands-on experiences involving real assessment and analysis of industrial site visits and projects.

**IMSE 7610: Engineering Quality Control**
Analysis of quality in manufacturing including control charts, sampling plans, process capability, experimental design; introduction to system reliability. Overview of Six Sigma and DMAIC methodology.

**Credit Hours:** 3  
**Prerequisites:** IMSE 2030 or instructor's consent

**IMSE 7750: Entrepreneurial Innovation Management: Advanced Enterprise Conception**
Develop a new business and technology plan (including marketing, finance, engineering, manufacturing, and production concepts) in this joint College of Engineering/College of Business course.

**Credit Hours:** 3  
**Prerequisites:** IMSE 4110 or IMSE 7110

**IMSE 7760: Entrepreneurial Innovation Management: Advanced Enterprise Design**
Expand on IMSE 7750 business and technology plan into a business operation plan: advertising designs, facilities layout, selling and distribution channels, product designs, accounting procedures, manufacturing processes, and product prototypes.

**Credit Hours:** 3  
**Prerequisites:** IMSE 7750

**IMSE 7770: Entrepreneurial Innovation Management: Advanced Enterprise Operations**
Perform the day-to-day operations for an enterprise by managing all business processes including finance, manufacturing, sales, and delivery.

**Credit Hours:** 3

**IMSE 8001: Advanced Topics in Industrial & Manufacturing Systems Engineering**
Current and new technical developments in industrial engineering.

**Credit Hours:** 3

**IMSE 8030: Advanced Manufacturing and Supply Systems**
The design, regulation, and optimization of manufacturing and supply systems through systems analysis.

**Credit Hours:** 3

**IMSE 8070: Research Methods in Industrial & Manufacturing System Engineering**
Development of research approach. Selection of topic area including techniques of literature search with special emphasis on problem definition. Topics pertinent to planning, organizing and carrying out industrial engineering research or design project.

**Credit Hours:** 1

**IMSE 8085: Problems in Industrial and Manufacturing Systems Engineering**
Supervised investigation in industrial engineering to be presented in the form of an engineering report.

**Credit Hours:** 1-99

**IMSE 8087: Industrial Engineering Graduate Seminar**
Selected topics in industrial engineering; oral presentations and engineering reports.

**Credit Hours:** 0

**IMSE 8110: Engineering Experimentation**
Application of advanced statistical methods for the analysis of engineering design and experimental problems.

**Credit Hours:** 3  
**Prerequisites:** IMSE 4110 or IMSE 7110

**IMSE 8210: Operations Research-Discrete Models**
Applications of discrete operations research methods, including linear programming, fuzzy sets, integer programming, and meta-heuristics.

**Credit Hours:** 3  
**Prerequisites:** IMSE 4210 or IMSE 7210

**IMSE 8220: Nonlinear Optimization**
Introduces computational non-linear mathematical programming procedures their use in solving complex industrial systems design problems.

**Credit Hours:** 3  
**Prerequisites:** IMSE 4210 or IMSE 7210

**IMSE 8230: Operations Research-Stochastic Models**
Theory and applications of stochastic processes; includes continuous time Markov chain, Markov decision process, queueing theory, and stochastic manufacturing systems.

**Credit Hours:** 3  
**Prerequisites:** IMSE 4230 or IMSE 7230

**IMSE 8280: Advanced Systems Simulation**
Theory and practice of dynamic modeling and statistical experimentation.

**Credit Hours:** 3  
**Prerequisites:** IMSE 4280

**IMSE 8310: Advanced Integrated Production Systems**
Advanced study of the design and operation of flow shop, job shop, and cell-based production systems, including scheduling, layout and material flow issues.

**Credit Hours:** 3  
**Prerequisites:** IMSE 4310 or IMSE 7310

**IMSE 8370: Supply Chain Modeling and Analysis**
Theory and application of supply chain networks, integration of production and inventory control methods.

**Credit Hours:** 3
**Prerequisites:** IMSE 8210, IMSE 8230

**IMSE 8410: Advanced Management Information Systems Design**
Develops requirements for management information, staffing, cost estimating, evaluation, and the design of management communication systems; includes case studies.

**Credit Hours:** 3

**Prerequisites:** IMSE 8410

---

**IMSE 8550: Advanced CAD/CAM**
Covers the state-of-the-art in CAD/CAM and explores the latest developments, residual problems, and new direction in CAD/CAM. Includes sculptured surface modeling, rapid prototyping and manufacturing, integrated process planning, shape analysis, machine intelligence.

**Credit Hours:** 3

**Prerequisites:** IMSE 4410

---

**IMSE 8610: Advanced Quality Systems**
Advanced process control charts, empirical model-building, fractional factorial designs and Taguchi techniques as tools for process and product improvement, professional ethics in quality management; TQM and ISO 9000.

**Credit Hours:** 3

**Prerequisites:** IMSE 4610, IMSE 8110

---

**IMSE 8730: Strategic Enterprise Management**
Topics including enterprise strategies, process and content models, strategy implementation, value chain analysis, business processes, systems engineering approaches, business process reengineering, and dynamic systems modeling.

**Credit Hours:** 3

---

**IMSE 8810: Human Factors**
Human factors inputs, outputs and environment and their influence on design and evaluation of man and machine systems.

**Credit Hours:** 3

---

**IMSE 8850: Health Care Systems Design and Analysis**
Health care systems design principles and major problems, basic organization within health care system, alternative system design strategies, factors affecting design process success.

**Credit Hours:** 3

---

**IMSE 8990: Research-Masters Thesis in Industrial Engineering**
Independent investigation in field of industrial engineering to be presented as a thesis. Graded on S/U basis only.

**Credit Hour:** 1-99

---

**Information Science And Learning Technologies (IS_LT)**

**IS_LT 1111: Information Use and Student Success**
In this course, students will learn to frame meaningful questions, gain knowledge and skills to succeed academically, understand the structure and content of information resources, evaluate information, and use information resources as genuine learning tools.

**Credit Hour:** 1

**IS_LT 1111H: Information Use and Student Success - Honors**
In this course, students will learn to frame meaningful questions, gain knowledge and skills to succeed academically, understand the structure and content of information resources, evaluate information, and use information resources as genuine learning tools. Honors eligibility required

**Credit Hour:** 1

---

**IS_LT 4310: Seminar in Information Science and Learning Technologies**
Discussion and critical study of current developments in the field of information science and learning technologies.

**Credit Hour:** 1-3

---

**IS_LT 4356: Interactive Web Design with JavaScript**
(cross-leveled with IS_LT 7356). The purpose of this course is to provide students with opportunities to explore, use, and synthesize
various JavaScript frameworks, user interface and visualization libraries, and plugins while creating interactive user experiences with html5, JavaScript animation, and mobile platforms. The course will cover topics like interactive photo galleries, mobile Web design, animation, user interactivity, jQuery, and development environments.

Credit Hours: 3
Prerequisites: IS_LT 4370

IS_LT 4360: Introduction to Web Development
Basic web design and HTML. Covers file transfer and UNIX/LINUX servers management. Develops understanding of web graphic formats. Emphasizes user interface, navigation, and instructional design in building web sites. Online. Graded on A-F basis only.

Credit Hours: 3

IS_LT 4361: Introduction to Digital Media
Hands-on approach to multimedia production techniques. Develops understanding of image software, video software, scanners, digital cameras, digital video cameras, and graphics tablets. Graded on A-F basis only.

Credit Hours: 3

IS_LT 4364: Flash Authoring
Teaches skills required to plan, develop and evaluate a multimedia project using digital authoring software. Emphasizes instructional design and user interface issues. Course is production-based. Graded on A-F basis only.

Credit Hours: 3

IS_LT 4370: Intermediate Web Development
Development of design and web authoring skills. Interactivity through use of cgi scripts and javascript. Design capabilities using Style Sheets. Gain expertise required for the production of HTML documents incorporating these advanced techniques.

Credit Hours: 3
Prerequisites: IS_LT 4360 or instructor's consent

IS_LT 7301: Introduction to Information Technology
The nature of information and information transfer in the institutional setting; covers the culture of information in society, standards for information processing and transfer, and networking in communications perspectives of information providing agencies.

Credit Hours: 3

IS_LT 7302: Organization of Information
An overview of the research that addresses information-seeking behavior and the history, background, and development of catalogs and indexes.

Credit Hours: 3

IS_LT 7305: Foundations of Library and Information Science
An introduction to the background, contexts, organizations, issues, ethics, values, and terms of information science, the information professions, and the library as an idea, space, institution, and repository of the cultural record.

Credit Hours: 3
Prerequisites: IS_LT 4370 or IS_LT 7370

IS_LT 7310: Seminar in Information Science and Learning Technology
Discussion and critical study of current developments in the field of information science and learning technologies.

Credit Hour: 1-3

IS_LT 7312: Principles of Cataloging and Classification

Credit Hours: 3
Prerequisites: IS_LT 7305

IS_LT 7313: Managing Collections and Access
Selection of materials for libraries and information agencies, policies for collection management, freedom and diversity of information, access to information and evaluation of collections and access.

Credit Hours: 3

IS_LT 7314: Reference Sources and Services
General reference sources with emphasis on print sources. principles, developments and trends in reference services and reference service organization.

Credit Hours: 3

IS_LT 7315: Management of Information Agencies
Concepts of management applied to libraries and information systems; management tools, programming, models and simulation in an environment of an information producing or disseminating agency.

Credit Hours: 3

IS_LT 7334: Library Information Systems
Focuses on the automated library systems marketplace. Covers integrated online library systems from the systems, functional and user perspective. Includes management approaches for procurement and operation of such systems.

Credit Hours: 3

IS_LT 7336: Interactive Web Design with JavaScript
(cross-leveled with IS_LT 4356). The purpose of this course is to provide students with opportunities to explore, use, and synthesize various JavaScript frameworks, user interface and visualization libraries, and plugins while creating interactive user experiences with html5, JavaScript animation, and mobile platforms. The course will cover topics like interactive photo galleries, mobile Web design, animation, user interactivity, jQuery, and development environments.

Credit Hours: 3
Prerequisites: IS_LT 4370 or IS_LT 7370

IS_LT 7357: Web Application Development I
Students learn to develop Web applications to support online learning and collaboration using ASP.Net, PHP, or Java. In this course students
will learn fundamental Web programming principles and develop web applications. Specific concepts taught in this course include: reading and writing files to a server, interacting with users through web forms, storing and retrieving data in relational databases (MS SQL, MySQL, or Oracle), object-oriented programming, and web application security.

**Credit Hours:** 3  
**Prerequisites:** Intermediate Web Development

### IS_LT 7358: Application Development II
Building on Web Application Development I, this course covers advanced Web programming techniques and focuses on developing Web-based learning applications. With intensive programming, students will analyze and learn how the applications in existing learning environments operate and interact, and then develop learning applications of their own. Specific concepts covered in this course include task analysis, algorithms, APIs, user rights and permissions, data integrity, flexible design, code documentation, Web Services, Web for mobile handheld devices or Ajax.

**Credit Hours:** 3  
**Prerequisites:** Web Application Development I

### IS_LT 7360: Introduction to Web Development
Basic web design and HTML. Covers file transfer and UNIX/LINUX servers management. Develops understanding of web graphic formats. Emphasizes user interface, navigation, and instructional design in building web sites. Online. Graded on A-F basis only.

**Credit Hours:** 3

### IS_LT 7361: Introduction to Digital Media
Hands-on approach to multimedia production techniques. Develops understanding of image software, video software, and scanners, digital cameras, digital video cameras, graphics tablets. Graded on A-F basis only.

**Credit Hours:** 3

### IS_LT 7364: Flash Authoring
Plan, develop, and evaluate a multimedia project using digital authoring software (Macromedia Flash). Emphasizes scripting and user interface issues for web-based animations. Course is production-based. Graded on A-F basis only.

**Credit Hours:** 3

### IS_LT 7366: Technology Leadership in Schools
Develop skills, knowledge, and values needed to provide leadership in schools. Analyzes characteristics of effective leaders, focusing on staff development. Explores technology and school reform, technology integration, and current issues. Online. Graded on A-F basis only.

**Credit Hours:** 3

### IS_LT 7368: Technology Across the Curriculum
The emphasis in this course is on using technologies to enhance and support student collaboration and learning in K-23 classrooms.

**Credit Hours:** 3  
**Prerequisites:** admission to the Teaching Fellowship Program

### IS_LT 7370: Intermediate Web Development
Development of design and web authoring skills. Interactivity through use of CGI scripts and javascript. Design capabilities using Style Sheets. Gain expertise required for the production of HTML documents incorporating these advanced techniques.

**Credit Hours:** 3  
**Prerequisites:** IS_LT 7360 or instructor’s consent

### IS_LT 7371: Exploring Sakai
This course will prepare you to work within the Sakai Learning Management System (LMS) to set up and manage an online course. As a student in this course you will investigate and manipulate components of Sakai from an instructor’s perspective. Graded on A-F basis only.

**Credit Hour:** 1

### IS_LT 7372: Exploring Blackboard
This course will prepare you to work within the Blackboard Learning Management System (LMS) to set up and manage an online course. As a student in the course, you will investigate and manipulate components of Blackboard from an instructor’s perspective. Graded on A-F basis only.

**Credit Hour:** 1

### IS_LT 7373: Exploring Moodle
This course will prepare you to work within the Moodle Learning Management System (LMS) to set up and manage an online course. As a student in this course, you will investigate and manipulate components of Moodle from an instructor’s perspective. Graded on A-F basis only.

**Credit Hour:** 1

### IS_LT 7376: Introduction to Technology in Schools
Study of theories and practices associated with educational technology. Explores basic instructional design processes and strategies for integrating technology into teaching and learning. Provides an overview of the EdTech field and a survey of emerging trends.

**Credit Hours:** 3  
**Prerequisites:** teaching experience or instructor’s consent

### IS_LT 7377: Electronic Portfolio Development

**Credit Hours:** 3  
**Prerequisites:** instructor’s consent

### IS_LT 7380: School Library Practicum
Directed, project-based experience in school libraries.

**Credit Hour:** 1-3  
**Prerequisites:** admission to MA, initial certification or 24 completed LIS credit hours taken at MU; instructor’s consent

### IS_LT 7381: Practicum in Information Agencies
Provides a supervised work experience for master’s degree students in a public, academic, or special library. Graded on S/U basis only.

**Credit Hour:** 1-3  
**Prerequisites:** IS_LT 7301, IS_LT 7302 or IS_LT 7312, IS_LT 7314, IS_LT 7315
IS_LT 9085: Problems in Information Science and Learning Technology
Independent, directed study on a topic in the areas of information science and learning technologies.

Credit Hour: 1-99
Prerequisites: departmental consent

IS_LT 9090: Research in Information Science and Learning Technologies
Dissertation research. Graded on S/U basis only.

Credit Hour: 1-99
Prerequisites: Doctoral Committee Chair’s consent

IS_LT 9407: Intellectual Freedom and Its Discontents
The course examines principles and contradictions of intellectual freedom and their relation to librarianship. The nature of free speech, the First Amendment, sources of censorship, and professional disputes about intellectual freedom practice in libraries will be important topics.

Credit Hours: 3

IS_LT 9408: Information Policy
Examination of the roles of private and public sectors in information policy formation. Includes consideration of social, economic, political and technological issues.

Credit Hours: 3

IS_LT 9409: Seminar in Digital Libraries
This course is a project-based learning environment that combines Instructor-prepared content, group-based student projects, and threaded asynchronous discussions on selected topics relating to the design, development, and implementation of practical digital libraries. Research directives within the broad domain of digital library development are also covered.

Credit Hours: 3

IS_LT 9410: Seminar in Information Science and Learning Technology
Discussion and critical study of current developments in information science and learning technologies.

Credit Hour: 1-3

IS_LT 9412: Information Storage and Retrieval
Introduces students to concepts and terminology associated with the storage and retrieval of bibliographic information. Emphasizes design of applied database management systems.

Credit Hours: 3

IS_LT 9413: Management of Electronic Resources
This course explores electronic resources (primarily subscription journals and databases) in terms of products, pricing, in-house management of resources, both technical and organizational, licensing, configuring databases and organizing websites for the end user, statistical reporting, and future trends.

Credit Hours: 3

IS_LT 9414: Internet Reference
Learn to examine and evaluate web sites, about different search engines, and how to use web sites to answer basic reference questions.

Credit Hours: 3
Prerequisites or Corequisites: IS_LT 7314

IS_LT 9417: Technology Action Research
Study of concepts associated with action research; and the processes and procedures for conducting action research. Culminating project is the development of an action research project.

Credit Hours: 3
Prerequisites: 12 credit hours completed prior to enrolling

IS_LT 9420: Information in the Disciplines
Provides an understanding of how and why information is produced, stored and communicated in various intellectual disciplines. Students evaluate examples of these activities in specific disciplines.

Credit Hours: 3

IS_LT 9423: Ethics and Information
This course introduces basic concepts of ethics and focuses on applying ethical norms to the production, dissemination, and use of information. The information services offered by libraries are also examined within the context of ethics.

Credit Hours: 3

IS_LT 9428: The History of Books and Printing: The Printed Book
Focuses on the social, cultural, intellectual, and religious elements of books and print culture. The impact on communication and society is especially emphasized.

Credit Hours: 3

IS_LT 9431: Children’s Library Materials
Evaluation and selection of materials for children birth-age 13 (Grade 6). Early literacy, emergent readers, reader response theory; social, cultural contexts of readers and reading, trends in publishing.

Credit Hours: 3

IS_LT 9432: Online Searching
Search strategies and techniques for commercial online databases. The course first covers the basic concepts of online information retrieval and then focuses on selection and online searching in the most prominent social science, science, humanities, and numerical databases.

Credit Hours: 3
Prerequisites: IS_LT 4301 or IS_LT 7301 and IS_LT 4314 OR IS_LT 7314

IS_LT 9433: Youth Services in Libraries
Examines physical, mental, and emotional development of youth birth through high school. Emphasis on community analysis, outreach services, program design and techniques. Graded on A-F basis only.

Credit Hours: 3
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>IS_LT 9434</td>
<td>Teen Library Materials</td>
<td>Evaluation, selection of print, alternate formats for teens, 13-18 (Grades 7-12). Personal, social, popular culture contexts of teen readers and texts; emphasizes reader response; challenges common assumptions about teens and reading.</td>
<td>3</td>
</tr>
<tr>
<td>IS_LT 9435</td>
<td>Adult Services in Libraries</td>
<td>Library services to adults, including special populations. Emphasis on information needs of adults, organization and management of adult services.</td>
<td>3</td>
</tr>
<tr>
<td>IS_LT 9437</td>
<td>Reader Advisory Services</td>
<td>Examination of value and role of leisure reading and leisure reading materials. Coverage of reader advisory techniques, support processes, and resources for providing reader advisory services to various audiences. Graded on A-F basis only.</td>
<td>3</td>
</tr>
<tr>
<td>IS_LT 9440</td>
<td>Learning with the Internet</td>
<td>Explores the potential of the Internet to support inquiry-based learning through collaborative activities, research, and authoring/publishing. Investigates goals and strategies of online learning. Examines learning theories and models of teaching/learning in relation to selected Internet activities for K-12 students.</td>
<td>3</td>
</tr>
<tr>
<td>IS_LT 9443</td>
<td>The Academic Library</td>
<td>Development, objectives, organization and structure, nature of the collections and responsibility for their development, philosophy of library services, measurement and standards of library effectiveness.</td>
<td>3</td>
</tr>
<tr>
<td>IS_LT 9444</td>
<td>The Public Library</td>
<td>An overview of public library history, missions, and societal roles. Includes public library funding, organization, and management.</td>
<td>3</td>
</tr>
<tr>
<td>IS_LT 9445</td>
<td>Special Libraries and Information Centers</td>
<td>Goals of special librarianship including information provision, management styles. Library functions as performed in special libraries. Contributions of special libraries, such as information analysis centers, information brokering, and accountability for and evaluation of services.</td>
<td>3</td>
</tr>
<tr>
<td>IS_LT 9446</td>
<td>International and Comparative Librarianship</td>
<td>International libraries, intercultural information concerns, how information agencies differ between nations and global information issues. Course presents various countries, their information infrastructures and the influence of information and communication technologies.</td>
<td>3</td>
</tr>
<tr>
<td>IS_LT 9449</td>
<td>Business Information Resources</td>
<td>The course covers the basic concepts of business information and the information searching techniques used for specific business information needs (finding company information, industry information, investment information, statistical information, marketing information, etc.)</td>
<td>3</td>
</tr>
<tr>
<td>IS_LT 9450</td>
<td>Introduction to Research in Library and Information Science</td>
<td>Examination of the nature, utility, and methodologies of research in the profession. Emphasis is on understanding and evaluating potential and actual research.</td>
<td>3</td>
</tr>
<tr>
<td>IS_LT 9452</td>
<td>Library Use Instruction</td>
<td>This course considers learning theory applicable to instruction, learning styles, teaching methods, and appropriate evaluation of library use instruction. Students learn strategies for incorporating library instruction into the institutional curriculum</td>
<td>3</td>
</tr>
<tr>
<td>IS_LT 9453</td>
<td>Planning and Evaluation of Information Services</td>
<td>The course focuses on the complexity of the planning process in libraries and other information agencies, including the influence of external environments (upper administrations, user communities, information producers) on planning. Internal elements of the organization (staffing, services, finances) are discussed, as are external elements (requirements of a parent organization, legal constraints, etc.). The role of evaluation of personnel, budgets, facilities, access to information, and services is integrated into the process of providing service.</td>
<td>3</td>
</tr>
<tr>
<td>IS_LT 9454</td>
<td>Copyright in Libraries</td>
<td>An introductory and practical course covering the foundations of copyright, fair use, e-reserves, related laws including DMCA and TEACH and managing copyright in the public and school environments.</td>
<td>3</td>
</tr>
<tr>
<td>IS_LT 9455</td>
<td>Formative and Summative Evaluation</td>
<td>Study of the process of gathering data and making judgments about the effectiveness of instructional programs that uses technology. Covers techniques of a formative evaluation process to revise instruction. Culminating project is planning and conducting a portion of a summative evaluation of instructional program.</td>
<td>3</td>
</tr>
<tr>
<td>IS_LT 9456</td>
<td>Designing Computer Support for Collaborative Learning</td>
<td>Students will examine the theoretical bases for using collaboration and social interaction as methods for learning, and learn key methods and approaches for designing computer supported collaborative learning. Graded A-F only.</td>
<td>3</td>
</tr>
</tbody>
</table>
IS_LT 9457: Designing Computer Support for Cooperative Work
Study of the tools and methods of groupware and communities of practice, including their psychological, social and organizational effects. Students focus on designing and developing improved tools and methods. Graded on A-F basis only.
Credit Hours: 3

IS_LT 9458: Technology and Assessment
Learn how to assess specific types of knowledge, using technology to enhance the process. Explore innovative tools and means of assessment that help teachers individualize and differentiate instruction to improve learning. Develop technology-enhanced assessment of student learning. Graded on A-F basis only.
Credit Hours: 3

IS_LT 9461: Interaction Design
Students will learn the basic concepts of interaction design, then focus on usability engineering and prototyping principles to support the design process for learning and performance based technologies.
Credit Hours: 3

IS_LT 9467: Technology to Enhance Learning
Strategies for integrating technology into the teaching and learning process, with a focus on enhancing how students think rather than what they think. Special attention given to supporting higher order thinking and problem solving with technology.
Credit Hours: 3

IS_LT 9468: Learning and Task Analysis
Multiple methods for conducting task analysis for learning to identify learning processes, learning topics, and learning experiences, including procedural, prerequisites, cognitive simulations, case libraries, environmental analysis, and decision making.
Credit Hours: 3

IS_LT 9469: Designing Electronic Performance Support Systems
Performance support systems (PSS) are technology systems that support human activity within the complexities of organizational requirements and processes. Students build competency for designing PSS.
Credit Hours: 3

IS_LT 9471: Instructional Systems Design
Development of skills and knowledge related to the systematic design of instruction. Emphasis is placed on content analysis, instructional strategies, and formative evaluation.
Credit Hours: 3
Prerequisites: course in Curriculum or Instruction or instructor's consent

IS_LT 9472: Designing and Modeling Systems
Examination of living systems, general systems theory, and the art and practice of the learning organization.
Credit Hours: 3

IS_LT 9473: Project Management
This course introduces the learner to the necessary and practical project management concepts and skills that lead to reductions in project cycle time while maintaining control over budget, resources, risk, and delivered value. This course proposes to integrate practical project management skills within the project management lifecycle (i.e., initiating, planning, executing, controlling, and closing).
Credit Hours: 3

IS_LT 9474: Needs Assessment for Learning and Performance
Analyze learning and performance needs and opportunities using a systemic framework and associated strategies and techniques. Develop needs assessment instruments, collect data, and prepare recommendations for improvement.
Credit Hours: 3

IS_LT 9475: Diffusion of Educational Innovations
In-depth analysis of innovation development and adoption processes in educational organizations, including schools, universities, and training centers.
Credit Hours: 3

IS_LT 9478: Designing Problem-Based Learning Environments
Based on theories of situated learning, constructivism, everyday cognition, case-based reasoning, and activity theory, students will design and develop a learning environment that engages learners in constructive learning and problem solving with emphasis on assessing higher-order learning. Graded on A-F basis only.
Credit Hours: 3

IS_LT 9480: Internship in Information Science and Learning Technologies
Provides internship experience under supervision in advanced levels of practical experience in Information Science and Learning Technology Research and Teaching. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: School director's consent

IS_LT 9483: Capstone: Online Educator Focus Area
Culminating course for Online Educator focus in Educational Technology graduate degree. Design/develop/evaluate an online course or rework existing course. Analyze evaluation data from two external reviewers (novice/expert). Write paper describing results and modifications. To be taken during last semester of student's program. Graded on S/U basis only.
Credit Hour: 1

IS_LT 9484: Teaching Online Courses
Examines emerging issues in teaching and learning online; instructor and student roles; instructional strategies for supporting diverse learners; methods of student assessment; online communication; classroom management; characteristics of online learning management systems. May be repeated for credit.
Credit Hours: 3
IS_LT 9485: Designing Online Learning
Students will practice designing online lessons for meaningful learning outcomes such as knowledge construction, building models, knowledge transmission, and community building and working collaboratively.
Credit Hours: 3
Prerequisites: IS_LT 9471

Information Technology (INFOTC)

INFOTC 1001: Topics in Information Technology
Topics may vary from semester to semester. May be repeated upon consent of department.
Credit Hours: 3

INFOTC 1040: Introduction to Problem Solving and Programming
An introduction to problem solving methods and programming concepts, providing experience in designing, developing, implementing, and testing programs. Cannot be taken for credit after CMP_SC 1050.
Credit Hours: 3

INFOTC 1610: Introduction to Entertainment Media
This course is an introduction to the basic fundamentals of entertainment products such as postproduction technology, camera and lighting technology, audio creation and mixing technology, and broadcast technology. Computer programs designed for visual special effects are used.
Credit Hours: 3

INFOTC 2001: Topics in Information Technology
Topics may vary from semester to semester. May be repeated upon consent of department. Graded on A-F basis only.
Credit Hours: 3

INFOTC 2600: Digital Multimedia
This course introduces broad views of concepts, software, hardware, and solutions in entertainment media applications. It will examine career options in fields such as information technology, news, film production and postproduction, website design, advertising, or communication.
Credit Hours: 3

INFOTC 2610: Audio/Video I
This is an introductory course on digital audio and video editing. Background presented in the course will include an overview of the techniques used in modern Non-Linear video editing, and understanding of block editing, and why it is essential when using modern digital technology. The course is hands-on with students at workstations, learning the software directly at the keyboard, and working on assignments in a lab context.
Credit Hours: 3

INFOTC 2620: Computer Modeling and Animation I
Introduction to the field of computer modeling and animation with an emphasis on tools. Learn programming methods for developing customized modeling and animation algorithms. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CMP_SC 1050
Corequisites: CMP_SC 2050

INFOTC 2810: Fundamentals of Network Technology
This course includes an overview of networking and the common wireless standards. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CMP_SC 1050

INFOTC 2910: Cyber Security
This course covers numerous platform-independent security topics including threats, problem ports and services, theory and practice of defense in security, intrusion detection, data security, securing remote access, user education and support, designing a secure network and security management. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CMP_SC 1050, INFOTC 2810

INFOTC 3001: Topics in Information Technology
Topics may vary from semester to semester. May be repeated upon consent of department. Graded on A-F basis only.
Credit Hours: 3

INFOTC 3610: Audio/Video II
This course presents broad professional techniques for completing an off-line edit and the progression to online and finishing, adding depth to topics introduced in A/V I. Students will gain experience in editing techniques involving dialogue, action, documentaries, music videos, and multi-camera projects. The course also introduces special effects, audio finishing, clip and media management, and use of various media formats.
Credit Hours: 3
Prerequisites: INFOTC 2610
Corequisites: CMP_SC 2050

INFOTC 3620: Computer Modeling and Animation II
This course covers advanced methods for modeling and animation with an emphasis on computer science theory and virtual reality. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: INFOTC 2620 and CMP_SC 2050

INFOTC 3630: Introduction to Game Design
This class will focus on the theory, design, and implementation of games. Students will learn about designing and implementing vital components for modern game engines, with respect to data structures, algorithms, content, development tools, and optimization strategies. In addition, students will use the Valve Source Engine (used to power Half-Life 2) to develop their own mod. The final project is a fully functional game.
Credit Hours: 3
Prerequisites: INFOTC 2620, CMP_SC 2050

INFOTC 3640: Digital Effects
This course is an introduction to the fundamentals of digital motion picture effects technology. This course is designed for a student interested in pursuing a career in information technology, news, film production and film postproduction, website design, or communication.

Credit Hours: 3
Prerequisites: INFOTC 1610 or INFOTC 2610

INFOTC 3850: Computer System Administration
This course will cover network management tools, network maintenance, data management, remote access management, management tasks, responsibilities and ethics, required plans and policies, design of a well-managed network. Some work will be done in both Windows and Linux environments. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 2050, junior standing

INFOTC 4001: Topics in Information Technology
Topics may vary from semester to semester. May be repeated upon consent of department. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 2050, junior standing

INFOTC 4390: Database Administration
This course is designed to give a firm foundation in Database Administrators’ tasks. The primary goal is to give necessary knowledge and skills to setup, maintain and troubleshoot an Oracle database. This is an instructor-led course featuring lecture and hands-on exercises. Online demonstration and written practice sessions reinforce the concepts and skills introduced. The course defined objectives are designed to support preparation for the Oracle Certified Professional examination.

Credit Hours: 3
Prerequisites: CMP_SC 4380

INFOTC 4400: C#/.NET Development
Learn how to develop and debug multi-threaded Windows desktop applications based on the object-oriented (OO), Model-View-Controller (MVC), and Model View ViewModel (MVVM) paradigms using C#, .NET, Windows Presentation Foundation (WPF), and Visual Studio. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 2050

INFOTC 4500: Team-Based Mobile Device Application Development
(same as JOURN 4444). This is a multi-disciplinary, team-based course on developing applications for mobile devices. Teams will be comprised of students who are software developers and students who are designers. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 2050 or permission of instructor

INFOTC 4630: Game Design II
This course explores 1) the manual and procedural development of static and dynamic game content, 2) programming for gameplay, interactivity, UI, game Artificial Intelligence, and 3) algorithms, ADTs, and research vital to game design.

Credit Hours: 3
Prerequisites: INFOTC 3630

INFOTC 4640: Digital Effects II
This course builds on fundamentals of digital motion picture effects technology learned in Digital Effects I. Computer programs designed for digital visual special effects in film and broadcast are integrated throughout the course.

Credit Hours: 3
Prerequisites: INFOTC 3640

INFOTC 4650: Shader Programing
The focus of this course is modern computer graphics algorithms and programming, with an emphasis on games, shader languages, (GLSL and Cg) and Graphical Processor Units (GPUs).

Credit Hours: 3
Prerequisites: CMP_SC 2050

Integrative Neuroscience (NEUROSCI)

NEUROSCI 7990: Non-Thesis Research in Neuroscience
The course is intended primarily for post-baccalaureate students who have not entered a formal graduate program but who are performing neuroscience research. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: instructor’s consent required

NEUROSCI 8020: Advances in Neuroscience and Neuropathology
In depth review of recent advances in basic neuroscience research as well as pathological conditions affecting nervous systems at the cellular and systems level, and the methods and techniques used to study the nervous system. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: instructor’s consent required

NEUROSCI 8090: Thesis Research in Neuroscience
The course is intended primarily for graduate students who are working with mentors in departments that do not offer courses (e.g. Radiology). Graded on A-F basis only.

Credit Hour: 1-6
Prerequisites: instructor’s consent required

NEUROSCI 8187: Neuroscience Journal Club
In depth readings and presentations/discussions of neuroscience journal articles including recent advances in basic neuroscience research, pathological conditions affecting nervous systems, and neuroscience techniques. Graded on S/U basis only. May be repeated for credit.

Credit Hour: 1
NEUROSCI 8440: Integrative Neuroscience 1
(same as BIO_SC 8440). Organization, development and function of the nervous system focusing on cellular and molecular processes. Graded on A-F basis only.
Credit Hours: 3

NEUROSCI 8442: Integrative Neuroscience II
(same as BIO_SC 8442). Organization and function of the nervous system at the systems level to examine processes of behavior and cognition. Graded on A-F basis only.
Credit Hours: 3

NEUROSCI 9090: Thesis Research in Neuroscience
The course is intended primarily for graduate students who are working with mentors in departments that do not offer courses (e.g. Radiology). Graded on A-F basis only.
Credit Hour: 1-6
Prerequisites: Instructor's consent required

Interdisciplinary Studies (INTDSC)

INTDSC 1001: Proseminar in Interdisciplinary Studies
Lecture/discussion survey of time-management, note taking techniques, in the context of the three courses that are part of a Freshman Interest Group. Regular use of library, electronic mail and computing facilities is stressed. Elective credit only; students cannot receive credit for INTDSC 2001 and INTDSC 1001 or INTDSC 1150. Graded on S/U basis only.
Credit Hour: 1

INTDSC 1020: University Freshmen Seminar
(same as SSC 1020). To maximize student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by collegiate life. Attainment of an appropriate balance between personal freedom and social responsibility underlies all seminar activities. No credit for students who have earned credit for AFNR 1115, INTDSC 1001, IS_LT 1110, ED_LPA 3100 or an equivalent first year orientation course at another institution. Credit restrictions that apply to orientation classes apply to this course. Students are not allowed to be enrolled in SSC 1020 and SSC 1150 in the same semester.
Credit Hour: 1
Prerequisites: Restricted to first time college student

INTDSC 1940: Internship
Limited to freshmen/sophomores who are "undecided" or otherwise not accepted into a major. Graded on S/U basis only.
Credit Hour: 0-1

INTDSC 2001: Proseminar in Interdisciplinary Studies
Lecture/discussion survey of a range of issues of special importance for transfer students new to the University. Elective credit only; no credit for INTDSC 1001 and/or SSC 1150. Graded on A-F basis only.
Credit Hour: 1

INTDSC 2940: Internship in Interdisciplinary Studies
Internship limited to students pursuing the BA in Interdisciplinary Studies degree. Graded on S/U basis only.
Credit Hour: 1-6

INTDSC 2960: Readings in Interdisciplinary Studies
Independent readings with supervisory faculty member. Open only to Interdisciplinary Studies majors. May be repeated up to a maximum of 6 hours.
Credit Hour: 1-6

INTDSC 4940: Internship in Interdisciplinary Studies
Internship limited to students pursuing the BA in Interdisciplinary Studies degree. Graded on S/U basis only.
Credit Hour: 1-6
Prerequisites: departmental Consent Required

INTDSC 4960: Readings in Interdisciplinary Studies
Independent readings with supervisory faculty member. Open only to Interdisciplinary Studies majors. May be repeated up to a maximum of 6 hours.
Credit Hour: 1-6
Prerequisites:

INTDSC 4970: Service Learning Project.
Students will engage in service activities, directly relevant to their areas of academic emphasis, in community not-for-profit agencies. At the same time as participants work in the community, they will research their agency and organization, undergo mock employment interviews, create a cover letter and resume based on the professional skills they have gained through their service, and reflect on careers and leadership in public service.
Graded on A-F basis only.
Credit Hour: 3-6
Prerequisites: restricted to Interdisciplinary, General Studies and International Studies students

INTDSC 4971: Capstone Internship in Interdisciplinary Studies
Internship experience which serves as the student's capstone experience. Program advisor must approve internships. Section 2 of this course will be designated for Service Learning Capstone experience.
Graded on S/U basis only.
Credit Hour: 1-6

IN_MED 6450: Dermatology I
The Dermatology rotation is designed to provide the medical student with a broad general base in clinical dermatology for the non-dermatologist. During the rotation the student should: Enhance the visual diagnostic skills and related reasoning used in dermatology; Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist; Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health; Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases; Learn appropriate use of both systemic and topical dermatologic medications; Learn basic punch, shave, and excisional biopsy techniques; Become proficient in skin surveillance, especially early detection of skin cancer. Students are evaluated using a standard evaluation. The student’s knowledge of subject matter is evaluated in the following settings: informal discussion during clinics, ward rounds, inpatient consultation rounds and scheduled conferences. A slide (Kodachrome) practical and written examination at the end of the block will be administered at UMC on the last day of the block. Material covered is from the student slide set given in CD format, the AAD Core Curriculum website (www.aad.org/education/titlepage.htm), weekly student lectures, and Unknowns Conference.
Credit Hours: 5

IN_MED 6500: Cardiology Consultation Service
On the inpatient cardiology consultation block, the senior student gains experience in cardiology consultation at either the University Hospital or the Harry S Truman VA Hospital. Through active participation in the consult service the student is provided the opportunity to acquire knowledge of cardiovascular anatomy, physiology, cardiovascular pharmacology, prevention of cardiovascular disease, risk factors for cardiac disease, lipid disorders, chronic coronary artery disease management and its complications, cardiac arrhythmias and conduction abnormalities, hypertension, valvular heart disease, cardiomyopathy, pericardial disease, pulmonary heart disease, peripheral vascular disease, cerebral vascular disease, adult congenital heart disease, and pre- and post-operative assessment of patients with or without cardiac problems. Students will be evaluated using the standard department student elective evaluation form submitted to the Internal Medicine Education Office. Each faculty working with the student will have the opportunity to contribute to the final grade. The final evaluation will be based on student performance on the cardiology consultation service and active participation in the cardiology conferences. Students’ skills in performing a history and physical exam, the quality of their presentation, the quality of their knowledge base, the quality of their interactions will constitute the basis of grade assignment.
Credit Hours: 5

IN_MED 6507: Endocrinology/Metabolism
The Endocrinology rotation is designed to enable the student to deal with clinical problems in Diabetes endocrinology and metabolism with particular emphasis on the more common problems in an ambulatory setting. During the rotation the student will have the opportunity to see patients with a wide range of endocrine disorders. These patients will be used as the focus for teaching with the emphasis placed on differential diagnosis, pathophysiology, management, and how the disorder affects the patient as a whole. By the end of the rotation the student should be able to evaluate and manage (with supervision) patients with: 1. Diabetes Mellitus 2. Hypoglycemia 3. Thyroid disorders including goiters, thyroid nodules, hyperthyroidism and hypothyroidism 4. Adrenal disorders including adrenal incidentalomas, Cushing and Hyperaldosteronism 5. Pituitary problems including hypopituitarism, conditions due to pituitary hormone excess that including Cushing’s disease, acromegaly and prolactinoma. 6. Calcium abnormalities including hyperparathyroidism, hypoparathyroidism, hypercalcemia, hypocalcemia and osteoporosis. 7. Polycystic ovarian syndrome. Evaluations: The course grade will be based on students’ skill in performing a history and physical exam, the quality of the presentation, the quality of their knowledge base and the quality of their interactions.

Credit Hours: 5
IN_MED 6513: Infectious Diseases
The goals of the Infectious Diseases elective will be to: 1. Teach the student how to be an effective consultant. 2. Assist the student in his/her knowledge of disease processes. 3. Help the student improve his/her history taking and physical examination skills. 4. Enhance the student’s knowledge regarding the use of antimicrobial agents. 5. Improve the student’s understanding of the diagnosis and management of commonly-encountered infectious diseases with attention to the use of the history and readily available laboratory tests.

Rural Pulmonary Medicine general elective.
Credit Hours: 5
Prerequisites: IN_MED 6002. Restricted to fourth year medical student

IN_MED 6707: General Internal Medicine Outpatient - Rural
The 4th year medical student will work with an IM community-based faculty member at a rural training site. Students will see patients in clinic, perform the history and physical examination, and develop an assessment and plan for these patients on their own. They will then discuss with the community-based faculty member and see the patient together. The 4th year student will complete oral presentations and document encounters as directed by the community-based faculty member. Course may be repeated for credit.
Credit Hours: 5

IN_MED 6750: DERMATOLOGY 1-RURAL
Dermatology 1 - Rural
Credit Hours: 5

IN_MED 6800: Coronary Care Unit
During the Coronary Intensive Care Unit rotation, the medical student is provided the opportunity to acquire knowledge in the evaluation and management of acute and chronic coronary artery disease, life threatening cardiac arrhythmia’s, acute severe congestive heart failure, acute valvular disease, acute infective endocarditis, hypertensive emergencies, cardiac tamponade, aortic dissection, aortic pulmonary embolism, life threatening complications of cardiac therapy, hypotension, and shock. The Coronary Intensive Care rotation allows the student to evaluate and treat these patients in close conjunction with medical residents, cardiology fellows and cardiology faculty. Students will be evaluated using the standard Department student elective evaluation form submitted to the Internal Medicine Education Office. Each faculty working with the student will have the opportunity to contribute to the final grade. The final evaluation will be based on student performance on the cardiology consultation service and active participation in the cardiology conferences. Students’ skills in performing a history and physical exam, the quality of their presentation, the quality of their knowledge base, the quality of their interactions will constitute the basis of grade assignment.
Credit Hours: 5

IN_MED 6801: Diabetes Mellitus Externship
Diabetes Mellitus Externship
Credit Hours: 5

IN_MED 6802: Gastroenterology
Medical students will be assigned to the inpatient GI consultation service, where they will see and evaluate patients, read about their problems, and present them to the GI fellow and/or teaching attending. They should attend all endoscopic procedures on the patients they follow on the inpatient service. They should also attend a sampling of outpatient procedures each week in the Endoscopy Center. As time permits, they may be assigned to one or more GI clinics during the rotation as well. Medical students will be expected to attend all GI conferences during the rotation. Students are also encouraged to attend Internal Medicine Grand Rounds and Internal Medicine Morning Report. They may also be assigned to give one formal presentation during their rotation. It is recommended that they read the entire GI-Liver section of the Internal Medicine textbook that they used on their third-year Internal Medicine Clerkship. Ongoing feedback is provided to the student during the rotation. At the end of the rotation, a formal written evaluation will be prepared by the inpatient attending, in conjunction with the GI fellow with whom the resident/medical student worked with. Conference participation is factored in.
Credit Hours: 5

IN_MED 6803: Subinternship in Internal Medicine
The internal medicine subinternship builds on the skills begun during the internal medicine clerkship and prepares the student for the internship year. 1. Students will refine and further develop skills in: a. Physical
exam, history taking, chart review, and written notes; b. Problem list
development and management plan; data interpretation and synthesis; c. Oral presentation; d. Interpersonal relations with patients, families, staff and peers; e. Time management i. Self-directed learning ii. Evidence-based medicine 2. Expand knowledge base in general internal medicine 3. Assume primary responsibility for inpatient care 4. Further develop in the role of primary care giver Patient management skills, medical record keeping, presentation skills, knowledge base, and ability to handle responsibility will be carefully observed by both the senior ward resident and the attending physician. Students will receive constructive feedback/suggestions for improvement throughout the rotation from both the attending and the senior ward resident. The attending, with input from the senior ward resident and the third year students, will report the final scores using the Department of Internal Medicine standard electives evaluation form. Students will meet with the attending physician at the end of the block to discuss their performance. Students will not receive elective credit for three weeks rotations.

Credit Hours: 5

IN_MED 6804: Geriatrics - Internal Medicine @ VA
Geriatrics - Internal Medicine @ VA

Credit Hours: 5

IN_MED 6805: Hematology and Medical Oncology Chronic Care
The specific objective of the course is to assist the student in developing a greater understanding for the care of chronically ill patients with hematologic and neoplastic diseases. The student’s evaluation is based predominantly on his/her performance in presentation and in written chart notes of patients under the student’s care. This evaluation will be by the attending physician with whom the student has worked. The standard department student elective evaluation form will be used to document student performance.

Credit Hours: 5

IN_MED 6806: Immunology/Rheumatology
The overall curricular objectives of this elective include: 1. Basic Information. The student should be able to: a. Perform a medical history and screening physical examination with attention to symptoms and signs of rheumatic disease. b. Understand the basic pathophysiology and clinical diagnosis of common arthritic and musculoskeletal diseases in adults. b. Understand the natural history of rheumatic diseases, particularly rheumatoid arthritis, soft tissue rheumatism, degenerative joint disease, systemic lupus erythematosus and spondyloarthropathies. c. Understand the short and long term management of rheumatic conditions and apply these principles together with overall clinical judgment in the management of individual patients. These therapeutic measures include: 1. drug therapy, 2. physical rehabilitative measures, and 3. surgical intervention. d. Learn the uses and pitfalls of laboratory tests in practice. e. Formulate ways to approach the emotional problems of patients with chronic disease. f. Understand the value of the comprehensive approach in arthritis treatment including patient education, the role of the allied health professional and community resources.

Credit Hours: 5

IN_MED 6807: Medical Intensive Care
Under the supervision of the medical critical care attending, the medical students are part of a team providing assessment, management, and follow-up of critically ill patients. Students will be intimately involved in this multidisciplinary approach to patient care. As a member of the ICU patient management team, the student will work collaboratively with residents, fellows, medical attendings, nurses, pharmacists, respiratory therapists and the nutritional support staff. The team will work in a coordinated fashion with consulting physicians and services, social services, physical therapy workers, and the radiology and pathology laboratory departments, and chaplain services.

Credit Hours: 5

IN_MED 6808: Nephrology Advanced Elective
This elective builds on the knowledge and skills students have acquired in the third year course in Internal Medicine. Students will have the opportunity to perform histories and physicals, participate in the decision-making process of patient management, and be responsible for daily follow-up in patients with fluid and electrolyte problems, acid-base disturbances, acute and chronic renal failure and a variety of renal diseases. The focus in these areas will be at a much higher level of responsibility and management than in the third-year course.

Credit Hours: 5

IN_MED 6809: Pulmonary Medicine Diagnostic Services
The Pulmonary Medicine Service is designed to allow students to participate in the diagnosis and care of hospitalized patients with an acute pulmonary problem as well as continuity follow up of existing known disease processes. This service evaluates and assists in management of adult patients at the University or VA Medical Centers. Either rotation includes intensive care unit patients with primary surgical or cardiac diagnoses, the rotation at the VA Medical Center also includes intensive care unit patients with primary medical diagnoses. The rotation will introduce the student to major clinical entities including the diagnosis and management of infectious lung disorders, neoplasms of the lungs, chronic obstructive pulmonary disease, asthma, acute respiratory failure, occupational pulmonary disease and interstitial lung disorders. The student will be introduced to the variety of diagnostic tests including radiographic studies, fiberoptic bronchoscopy, pulmonary function testing, cardiopulmonary exercise testing, surgical lung biopsy, thoracentesis and pleural biopsy, and arterial blood sampling. Students also participate in consultation on patients requiring outpatient pulmonary clinic evaluation. Each student is encouraged to spend extra time in the pulmonary function lab, and have pulmonary function tests and cardiopulmonary exercise tests done on themselves, depending on available time. Each student rotating through the pulmonary service will be expected to evaluate and present patients fully on a daily basis to the pulmonary consult team, including the attending physician. The student will have an opportunity to assist fellows and faculty with procedures such as bronchoscopy and thoracentesis. Students will have the opportunity to interpret pulmonary function tests, chest radiographs and other radiographic studies such as computed tomography and nuclear medicine studies of the thorax.

Credit Hours: 5

IN_MED 6820: General Medicine - Offsite
This course was established to accommodate fourth year medical students who wish to take an elective at another medical institution. There is no specific maximum number of students who will be permitted to enroll in this course.

### ITAL 2160: Intermediate Italian
Continues development of language skills acquired in Elementary Italian. While learning new structures and new vocabulary, students also review basic grammar components. By the end of the course, students are able to understand (through reading and listening) and communicate (in writing and orally) in a variety of both formal and informal situations.

**Credit Hours:** 3  
**Prerequisites:** ITAL 1200

### ITAL 2310: Italian Civilization
Open to any student interested. No knowledge of Italian required.

**Credit Hours:** 3  
**Prerequisites:** sophomore standing

### ITAL 2850: Italian Cinema
(same as FILM_S 2850). A course which concentrates on the development of Italian Cinema, primarily since the Post-WWII era, and the ways in which it reflects major economic, social and political events occurring in Italy. No knowledge of Italian required.

**Credit Hours:** 3  
**Prerequisites:** sophomore standing

### ITAL 3001: Topics in Italian-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition. No knowledge of Italian required.

**Credit Hour:** 1-3

### ITAL 3005: Topics in Italian-Humanities/Fine Arts
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition. No knowledge of Italian required.

**Credit Hour:** 1-3

### ITAL 3005H: Topics in Italian-Humanities/Fine Arts - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition. No knowledge of Italian required.

**Credit Hour:** 1-3  
**Prerequisites:** Honors eligibility required

### ITAL 3150: Post-Intermediate Italian
Gives emphasis on acquiring communicative multi-skills competence necessary to understand and discuss a variety of written and aural texts, from newspaper articles to brief literature excerpts. It offers students opportunity to review grammar components as well as learning more complex structures, to expand their vocabulary, and to use language in a variety of cultural contexts.

**Credit Hours:** 3  
**Prerequisites:** ITAL 2160

### ITAL 3160: Italian Composition
Continues the development of the language skills acquired in Intermediate and Post-Intermediate Italian. It offers students the opportunity to expand their vocabulary, to use the language in a variety of contexts prompted by cultural activities, and to acquire more complex grammatical structures. Emphasis is given on refining writing skills in connection with different text types.

**Credit Hours:** 3  
**Prerequisites:** ITAL 3150

### ITAL 3310: 20th Century Italian Fiction in Translation
This course is designed to present American students with a selection of Italian novels aimed at introducing them to some key issues in the historical, social, and literary developments of Italian life from the turn of the century to the 1960s.

**Credit Hours:** 3  
**Prerequisites:** sophomore standing or ENGLSH 1000

### ITAL 3420: Introduction to Italian Literature
This course introduces students to the literacy terminology that will enable them to study Italian literature.

**Credit Hours:** 3  
**Recommended:** ITAL 2310 and basic reading knowledge of a Romance Language

### ITAL 3430: Survey of Italian Literature
Designed to expose students to the rich variety of Italian letters. Emphasis will be placed on textual analysis as well as on authors, themes and stylistic features.

**Credit Hours:** 3  
**Recommended:** ITAL 2310 and basic reading knowledge of a Romance Language

### ITAL 3820: Films of Federico Fellini
(same as FILM_S 3820). In studying the filmic career of one of the supreme stylists of the cinematic world, students will view films from each phase of Fellini’s career.

**Credit Hours:** 3  
**Prerequisites:** ITAL 2850 or ENGLSH 1810 or ENGLSH 1820; instructor’s consent

### ITAL 4070: Intensive Beginning Italian
Designed for rapid acquisition of a reading knowledge of Italian. Cannot be taken to fulfill undergraduate language requirement.

**Credit Hours:** 3  
**Prerequisites:** instructor’s consent

### ITAL 4960: Special Readings in Italian
Independent study through readings, conferences, reports.

**Credit Hour:** 1-3

---

**Japanese (JAPNSE)**

### JAPNSE 1100: Elementary Japanese I
For beginners with no prior knowledge of Japanese. Three hours of lecture instruction and three hours of practice/drill per week in small groups.
JAPNSE 1200: Elementary Japanese II
Three hours of lecture instruction and three hours of practice/drill per week in small groups.
Credit Hours: 6
Prerequisites: C- or better in JAPNSE 1100, or equivalent

JAPNSE 2001: Topics in Japanese-General
Organized study of selected topics. Subjects and credits may vary from semester to semester.
Credit Hour: 1-3

JAPNSE 2005: Topics in Japanese - Humanities
Organized study of selected topics. Subjects and credits may vary from semester to semester. No knowledge of Japanese required. No language credit.
Credit Hour: 1-3

JAPNSE 2160: Japanese Conversation and Composition
Credit Hours: 3
Prerequisites: C- or better in JAPNSE 1200, or equivalent

JAPNSE 2310: Japanese Civilization I
Survey of Japanese culture and arts before 1868. May be taken independently of JAPNSE 2320. No knowledge of Japanese required. No foreign language credit.
Credit Hours: 3

JAPNSE 2320: Japanese Civilization II
Credit Hours: 3

JAPNSE 2330: The World of Japanese Business
Designed to assist the student to achieve successful business contacts with Japanese counterparts by understanding the characteristics of Japanese business in cultural, economical, and practical contexts and by learning useful Japanese terms and expressions in business.
Credit Hours: 3
Prerequisites: sophomore standing

JAPNSE 3085: Problems in Japanese
Supervised study in Japanese language and/or culture.
Credit Hour: 1-3
Prerequisites: instructor’s consent

JAPNSE 3160: Intermediate Japanese Composition and Conversation
Further develops oral command of Japanese as well as listening comprehension and further essay writing skills.
Credit Hours: 3
Prerequisites: C- or better in JAPNSE 2160

JAPNSE 3320: Classical Japanese Literature (in translation)
Credit Hours: 3
Prerequisites: sophomore standing

JAPNSE 3360: Modern Japanese Literature (in Translation)
Surveys Japanese literature from 1868 to present. Analyzes works by such authors as Soseki, Tanizaki, Kawabata, Mishima, Oe, Murakami, and others. Readings and lectures in English.
Credit Hours: 3
Prerequisites: sophomore standing

JAPNSE 3370: Intermediate Readings in Japanese
Develops reading and speaking skills and acquisition of more Kanji, vocabulary, and complex structures.
Credit Hours: 3
Prerequisites: C- or better in JAPNSE 3160, or equivalent, or instructor’s consent

JAPNSE 3380: Intermediate Japanese II
Continues development of intermediate reading, listening, speaking, and writing skills achieved in JAPNSE 3370, with attention to vocabulary acquisition, expansion of knowledge of kanji, and understanding of complex grammatical structures. Authentic readings in Japanese literature and exercises using authentic multi-media materials also help students gain greater familiarity with Japanese culture. Encourages development of student autonomy in language learning with the introduction and use of appropriate reference materials.
Credit Hours: 3
Prerequisites: JAPNSE 3370

JAPNSE 3850: Traditional Japanese Theatre
Study of the history, scripts, and performance techniques of Japanese theatre from 14th century through late 19th century. Examines major plays (in English translations) and the culture that created them. Looks at staging and performance techniques of traditional puppet theatre. Course included stage performances and performances on campus and/or in the community.
Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent

JAPNSE 3880: Japan and its Cinema
Survey and analysis of selected Japanese films from the 1940s to present. Films will be viewed and discussed in terms of history, techniques, artistry, and social impact. English subtitles. No foreign language credit.
Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent
JAPNSE 4005: Topics in Japanese - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Suitable for students who have taken JAPNSE 3370 or equivalent.

Credit Hour: 1-3
Prerequisites: instructor’s consent, sophomore standing

JAPNSE 4005H: Topics in Japanese - Humanities - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Suitable for students who have taken JAPNSE 3370 or equivalent.

Credit Hour: 1-3
Prerequisites: instructor’s consent, sophomore standing; Honors eligibility required

JAPNSE 4160: Advanced Japanese I
Continues development of reading, listening, speaking, writing skills, with attention to vocabulary acquisition, expansion of knowledge of kanji, and understanding of complex grammatical structures. Authentic readings in Japanese literature, exercises using authentic multi-media materials. Encourages development of student autonomy in language learning with introduction and use of appropriate reference materials.

Credit Hours: 3
Prerequisites: JAPNSE 3380 or equivalent, or instructor’s consent

JAPNSE 4180: Advanced Japanese II
This course continues the development of reading, listening, speaking, and writing skills, with attention to vocabulary acquisition, expansion of knowledge of kanji, and understanding of complex grammatical structures. Authentic readings in Japanese literature and exercises using authentic multimedia materials also help students gain greater familiarity with Japanese culture. The course encourages the development of student autonomy in language learning with the introduction and use of appropriate reference materials.

Credit Hours: 3
Prerequisites: JAPNSE 4160

Journalism (JOURN)

JOURN 0900: News Practicum
Instruction in fundamentals of newswriting for students entering the graduate program without an undergraduate degree in journalism.

Credit Hours: 3

JOURN 1000: The News Media: Journalism and Advertising in a Democratic Society
This course surveys the fields of journalism and advertising and discusses their role in a democratic society.

Credit Hours: 3

JOURN 1010: Career Explorations in Journalism
Colloquium in which experts discuss their specialities and answer students’ questions on the nature and current status of their disciplines. Graded on S/U basis only.

Credit Hour: 3
Prerequisites: Open primarily to freshmen

JOURN 1010H: Career Explorations in Journalism - Honors
Colloquium in which experts discuss their specialities and answer students’ questions on the nature and current status of their disciplines. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: Open primarily to freshmen. Honors eligibility required

JOURN 1100: Principles of American Journalism
Course designed to acquaint students with concepts and functions of journalism in American society. Stresses the basic issues and problems facing journalists and the mass media.

Credit Hours: 3
Prerequisites: Restricted to first-time college students with a high school core GPA of 3.0 or higher and 15 college credits (dual, AP, IB or other), or current students with 15 completed credits and UM GPA of 2.75. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students only

JOURN 1940: Pre-Sequence Internship
Internship for Journalism students who have not yet entered their emphasis areas. Used to satisfy employer requirements. Graded on S/U basis only.

Credit Hour: 0-1
Prerequisites: journalism students only; instructor’s consent required

JOURN 2000: Cross-Cultural Journalism
Cross-Cultural Journalism provides journalistic tools for the coverage of diverse ethnic, gender, ability and ideological groups inside and outside the United States. The critical role of diverse voices in a democracy will be discussed.

Credit Hours: 3
Prerequisites: sophomore standing required; JOURN 1100 and UM GPA of 2.8. Should be taken concurrently with JOURN 2100 or JOURN 2150. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism Students Only

JOURN 2100: News
Introduction to fundamentals of news writing. Lectures, discussions and laboratory work provide training under deadline pressure in writing basic news stories. Stories cover several “live” assignments. May not be taken concurrently with JOURN 2150.

Credit Hours: 3
Prerequisites: sophomore standing; JOURN 1100 and UM GPA of 2.8. Should be taken concurrently with JOURN 2100 or JOURN 2150. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students
Corequisites: JOURN 2000

JOURN 2100H: News
Introduction to fundamentals of news writing. Lectures, discussions and laboratory work provide training under deadline pressure in writing basic news stories. Stories cover several “live” assignments. May not be taken concurrently with JOURN 2150.
Credit Hours: 3
Prerequisites: sophomore standing, JOURN 1100; grade of “B-” or higher in ENGLISH 1000 and 2.8 UM GPA. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students. Honors eligibility required
Corequisites: JOURN 2000

JOURN 2150: Fundamentals of Multimedia Journalism
This course deals with the challenges faced by journalists and other communicators working with still photos, audio, video and print. Students learn the basics and ethics of cross-platform, multimedia storytelling. May not be taken concurrently with JOURN 2100. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 1100; sophomore standing; and a UM GPA of 2.8. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students only

JOURN 3000: History of American Journalism
American mass media from colonial days to present in the context of social, economic and political change.
Credit Hours: 3

JOURN 3510: Think Global: Fundamentals of Globalization and Digital Technologies
(same as GERMAN 3510, T_A_M 2810 and PEA_ST 2810). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to all undergraduate students in all disciplines. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: sophomore standing; JOURN 1100 and a 2.75 GPA or instructor’s consent. Restricted to Journalism majors only

(same as GERMAN 3510H). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Sophomore standing; JOURN 1100 and a 2.75 GPA or instructor’s consent. Restricted to Journalism majors only. Honors eligibility required

JOURN 4000: Communications Law
Legal concepts, including prior restraint, libel, privacy, obscenity, contempt and access as they relate to print, broadcast, advertising and other areas.
Credit Hours: 3

JOURN 4050: Communications Practice
Special instruction in the school’s media as an extension of existing advanced media courses, or, in advertising, an extension of advertising creative courses.
Credit Hour: 1-3
Prerequisites: Contract must be approved by instructor and dean. Restricted to Journalism and Science and Agricultural Journalism majors only. Junior standing required

JOURN 4050H: Communications Practice - Honors
Special instruction in the school’s media as an extension of existing advanced media courses, or, in advertising, an extension of advertising creative courses.
Credit Hour: 1-3
Prerequisites: Contract must be approved by instructor and dean. Restricted to Journalism and Science and Agricultural Journalism majors only. Junior standing required. Honors eligibility required

JOURN 4056: Intersession Colloquium
Lecture portion of any course the student plans to take later during an intercession.
Credit Hour: 1
Prerequisites: Consent of Dean required. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4058: New York Program: Journalism Theory and Practice
Interdisciplinary course offering on-site study at national media venues in New York. Journalism alumni working in Manhattan provide weekly discussions on contemporary practices, job networks and work experiences.
Credit Hour: 2-3
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only. Junior standing required

JOURN 4116: Managing and Leading People
Dramatic changes in technology and in the media’s role in covering technologies requires new management and leadership techniques and paradigms based on new management theories. Students will write case studies examining these changes and applying these new theories.
Credit Hour: 1
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only. Junior standing required

JOURN 4120: New Media Basics
Students will learn how to use the Internet to communicate with others, find human and electronic sources for stories and publish on the World Wide Web.
Credit Hour: 1
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only. Junior standing required

JOURN 4122: Fundamentals of Data Reporting
Explores the importance to journalists of mining public records and data; reviews basic newsroom mathematics; teaches basic techniques for using Microsoft Excel to create and manipulate spreadsheets and to
produce graphics. This course is not to be taken by students who have already completed JOURN 4430 or JOURN 7430. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: JOURN 2100. Restricted to Journalism and Science and Agricultural Journalism Students only

JOURN 4126: Digital Audio and Visual Basics for Journalists
Introduces journalism students to audio and video tools used in converged environments. Students will create news stories, ads or promos to meet journalistic or strategic communication goals.

Credit Hour: 1
Prerequisites: Restricted to Journalism and Agricultural Journalism majors only

JOURN 4130: Account Services
(cross-leveled with JOURN 7130). Designed for advanced strategic communication students preparing for careers in account services. Section topics vary. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: Restricted to Journalism Strategic Communication and Science and Agricultural Journalism Majors

JOURN 4136: Creative Techniques
(cross-leveled with JOURN 7136). Designed for advanced strategic communication students preparing for careers in creative work. Section topics vary. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: Restricted to Journalism Strategic Communication and Science and Agricultural Journalism Majors

JOURN 4138: Public Relations Techniques
(cross-leveled with JOURN 7138). Designed for advanced strategic communication students preparing for careers in public relations. Section topics vary. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: Restricted to Journalism Strategic Communication and Science and Agricultural Journalism Majors

JOURN 4140: Interactive Techniques
(cross-leveled with JOURN 7140). Designed for advanced strategic communications students preparing for careers in interactive media. Section topics may vary. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: Restricted to Journalism Strategic Communication and Science and Agricultural Journalism Majors

JOURN 4146: Strategic Communication Techniques
(cross-leveled with JOURN 7146). Designed for advanced strategic communication students. Section topics vary. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: Restricted to Journalism Strategic Communication and Science and Agricultural Journalism Majors

JOURN 4148: Interviewing Essentials
This class allows students to focus on the journalistic interviewing process, from spot news interviews to the sort of interviews required for personality, sports and in-depth work.

Credit Hour: 1

JOURN 4150: Using Infographics
An introduction to the various types of information graphics and how each can be used effectively to help explain the news. Additional emphasis on generating graphic ideas and on the specific challenges of gathering information for graphics.

Credit Hour: 1
Prerequisites: Instructor’s consent required. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4152: Concepts in Participatory Journalism
Journalists need to know how to be in conversation with their communities rather than lecture to them. In this course, we will look at how a collaborative culture is changing journalism, and how journalists can take advantage of the new landscape. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: JOURN 2100, JOURN 2150

JOURN 4198: Area Seminar
Special lectures, readings, discussions relating to the urban journalism, state government reporting or local public affairs reporting programs.

Credit Hours: 3
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4200: Principles of Strategic Communication
(cross-leveled with JOURN 7200). Foundation course familiarizing students with an array of strategic communication tools and how they are used in the field.

Credit Hours: 3
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4204: Introduction to Strategic Writing and Design
This course will teach you about strategic writing and design, and then show you how to apply these skills to key communication platforms such as digital media, TV, radio, social media and others. Along the way, you will learn to think, write and design creatively and strategically. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Junior standing; restricted to Journalism Strategic Communication and Science and Agricultural Journalism Majors only

JOURN 4206: Strategic Writing I
(cross-leveled with JOURN 7206). Students learn strategic writing for a variety of media such as print, radio, television, outdoor, new media, news releases, pitch letters and other persuasive messages.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4202, Restricted to Strategic Communication students only

</table>
JOURN 4248: Media Strategy and Planning
(cross-leveled with JOURN 7248). Course deals with strategic planning and the selection and evaluation of appropriate media outlets. Students gain a clear understanding of the problems and issues involved in crafting effective media strategies, creative problem solving and selection of appropriate media.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204, JOURN 4952. Restricted to Strategic Communications and Science and Agricultural Journalism students only

JOURN 4250: Management of Strategic Communication
(cross-leveled with JOURN 7250). How to lead and contribute to strategically sound, highly creative and seamlessly integrated strategic communication on the agency or client side of the business. Directly relevant to agency account management and account planning, as well as career paths.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204, and JOURN 4952. Restricted to Strategic Communication and Science and Agricultural Journalism students only

JOURN 4256: Public Relations
Current methods of communicating with constituents as practiced by agencies, corporations and government/not-for-profit organizations.

Credit Hours: 3
Prerequisites: JOURN 4200. Restricted to Journalism Strategic Communication and Science and Agricultural Journalism students only

JOURN 4258: Global Communication
(cross-leveled with JOURN 7258). Understanding global communication systems with an emphasis on planning and executing strategic communication campaigns. Particular attention will be paid to cultural, political and economic differences as they affect marketing and development communication.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204, JOURN 4952. Restricted to Strategic Communication and Science and Agricultural Journalism students only

JOURN 4262: Interactive Advertising I
Course covers every step from integrating Internet efforts into the overall strategic communication plan to building a website that works. Designed for those with an interest in interactive advertising. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204, and JOURN 4952. Restricted to Strategic Communication and Science and Agricultural Journalism students only

JOURN 4263: Interactive Advertising II
Course goes in-depth on top issues in the interactive process from video advertising to social networking sites and how to increase campaign performance with web analytics. Designed for those who want a career in interactive advertising. Graded on A-F basis only.

Credit Hours: 3

JOURN 4268: Strategic Communication Practicum
(cross-leveled with JOURN 7268). Practical experience in public relations, corporate communications and strategic planning with the Missouri School of Journalism serving as client. Students from all journalism disciplines will apply knowledge and skills on a variety of platforms.

Credit Hours: 3
Prerequisites: JOURN 4204. Restricted to Strategic Communication and Science and Agricultural Journalism students only

JOURN 4270: Public Relations Writing
Develop skills and capabilities in strategic communication applications, including news releases, media advisories, pitch letters, video news releases, media relations techniques, writing for electronic and broadcast media, feature writing, brochures and speeches. Graded on A-F basis.

Credit Hours: 3
Prerequisites: JOURN 4204 and JOURN 4256. Restricted to Strategic Communication and Science and Agricultural Journalism students only

JOURN 4300: Broadcast News I
Beginning reporting and news writing for radio, television and their on-line services. Introduction to use of audio and video recorders and editing systems in production of news stories. Consideration of ethical issues, economic factors, relationships with news sources and gender and ethnic diversity in the newsroom and in news stories.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204, and JOURN 4952. Restricted to Strategic Communication and Science and Agricultural Journalism students only

JOURN 4301: Topics in Journalism
Selected current topics in journalism. Specific topics to be announced at time of registration.

Credit Hour: 1-3

JOURN 4306: Broadcast News II
Introduction to general assignment reporting skills for the newsroom environment. Instruction in time management, writing, storytelling and performance. Team skills and ethnic diversity in the newsroom are discussed. Students begin work for broadcast newsrooms.

Credit Hours: 3
Prerequisites: JOURN 4300

JOURN 4308: Broadcast News III
Intermediate reporting and news writing skills for radio and television. Advanced techniques in the use of video and sound in production of news stories.

Credit Hours: 3
Prerequisites: JOURN 4306, or instructor’s consent

JOURN 4310: News Producing
Instruction in techniques of television newscast preparation. Emphasis on role of the television news producer.
JOURN 4320: Advanced Broadcast Reporting  
(cross-leveled with JOURN 7320). In-depth reporting and editing for radio or television; advanced production techniques; emphasis on writing, interviewing, effective use of audio or videotape at KOMU-TV or KBIA. 

Credit Hours: 3  
Prerequisites: JOURN 4308

JOURN 4328: Advanced News Communication  
(cross-leveled with JOURN 7328). This course will examine and practice the components of effective interviewing and on-set and live reporting for television news. Students will anchor KOMU-TV's morning newscasts. 

Credit Hours: 1  
Prerequisites: JOURN 4306

JOURN 4330: From Murrow to Moore: What Good Journalists Read  
Introduces undergraduates to seminal works in broadcast and print Journalism that influences contemporary professional practices. Graded on A-F basis only. 

Credit Hours: 3  
Prerequisites: junior standing or instructor's consent. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4340: Viewing Journalism Films: Images of the Reporter  
(cross-leveled with JOURN 7340). This course explores the diverse images of the journalist in popular culture as expressed in films throughout the last century and the beginning of the 21st century. Whether hero, rogue, or neutral observer, the journalists in films serve as guides to journalism students about the often conflicting images of reporters in modern society. These films pose questions about the ways journalists respond to a host of issues, including the interaction between journalists and government, the legal system, public policy, the entertainment industry, and business. By analyzing the changing roles of reporters and editors in film, students increase their awareness of the problems faced by professional journalists. The chronological organization of the course offers a perspective of the critical events in each decade, from the early muckrakers to the recent digital entrepreneurs. Students will view and discuss one film each week. 

Credit Hours: 2  
Prerequisites: Sophomore standing or higher

JOURN 4350: Problems in Journalism  
Independent research arranged with individual faculty member. Contract must be approved by instructor and dean. Not accepted as a substitute for any regularly scheduled course. Some sections of the course may be offered on either A-F graded or S/U graded basis only. 

Credit Hour: 1-3  
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only. Junior Standing required

JOURN 4350H: Problems in Journalism - Honors  
Independent research arranged with individual faculty member. Contract must be approved by instructor and dean. Not accepted as a substitute

Credit Hours: 1-3  
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only. Junior Standing required

JOURN 4360: Fundamentals of Design  
(cross-leveled with JOURN 7360). This is a beginning course in editorial design. We will study design history and learn basic design principles and concepts in both print and digital platforms. You will be introduced to software programs such as InDesign, Photoshop and Illustrator, as well as basic HTML coding. 

Credit Hours: 2  
Prerequisites: JOURN 2100 or JOURN 2150. Students must submit application to enroll. Restricted to Journalism and Science and Agricultural Journalism students only

JOURN 4370: Film Studies: The Intersections of Documentary Film and Journalism  
(same as FILM_S 4370; cross-leveled with FILM_S 7370 and JOURN 7370). The popularity of documentary film in the past ten years has skyrocketed, and recent award-winning documentaries such as Inside Job (2010), Blackfish (2013), and The Invisible War (2012) are simultaneously entertaining audiences and investigating serious issues like the financial collapse, killer whale captivity, and sex crimes in the military--issues that in the past might have been covered exclusively by investigative journalism. What explains the public’s growing fascination with documentary? How is documentary film reacting to recent transformations in the media landscape? Is it filling a critical need that journalism is no longer willing or able to meet? This course will explore the intersection of these two nonfiction storytelling forms - documentary film and journalism - and examine the role played by advocacy in both modes, as well as the cultural and ethical implications of the convergence between journalism and documentary film. In that it is centered on contemporary documentary film culture, the course also takes advantage of the True/False Film Festival, and will be host to a conference during Week 6, featuring a number of major visiting filmmakers and film critics. Attendance at some sessions is required. Graded on A-F basis only. 

Credit Hours: 3

JOURN 4371: Editing for Documentaries  
(cross-leveled with JOURN 7371). Documentary and other long-form story telling methods involve a complex series of decisions made in the creation of the work that determines its style, length, direction, point of view and more. These and a thousand other editing decisions are the difference between a successful project that touches its audience and one that falls short. The focus of this course is on the craft of editing, as seen in a variety of documentary and other works and explained through the decisions made in and out of the editing room that lead to the final product. The course will introduce important concepts of editing, the work of significant editors in both documentary and narrative fiction films, and seek to apply those techniques to the conceptualization of documentary work students will do as part of their degree. Students will understand the history of documentary editing as it evolved on its own and as influenced by narrative fiction films, the language of editing, the work of important editors and directors and how it influences today’s aesthetic and how to
apply what they have learned to their own documentary projects at an advanced level. Graded on A-F basis only.

Credit Hours: 3
Corequisites: JOURN 4564
Recommended: FILM_S 1800, FILM_S 3540, and JOURN 4370

JOURN 4400: Introduction to News Editing
Introduces the fundamentals of editing stories and writing headlines for publication online and in print, including an emphasis on style and grammar. Emphasized editing for an online audience.

Credit Hour: 1-2
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism Majors only; JOURN 2100

JOURN 4406: News Editing
Laboratory work on the Columbia Missourian plus lectures on ethics, page design and news decision making.

Credit Hours: 3
Prerequisites: JOURN 4400

JOURN 4408: Magazine Editing
Review of grammar, punctuation, style rules: measuring articles, copy fitting; writing captions, titles; editing, proofreading, condensing, rewriting magazine articles.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4410: Intermediate Writing
In-depth research and writing techniques. Students produce articles for the Missourian and school-produced magazines or other publications.

Credit Hours: 3
Prerequisites: JOURN 4450 or equivalent and instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4412: Lifestyle Journalism
In-depth research and writing techniques focused on lifestyle journalism. Students produce articles for the Missourian and school-produced magazines or other publications. Substitutes for JOURN 4410. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4450 or equivalent and instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4414: Field Reporting on the Food System and Environment
(same as SCI_AG_J 4414). Field reporting on the social, political, scientific, economic and ethical dimensions of the food system and environment, with emphasis on explanatory story-telling. Includes multi-day field trip. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4415: Current Issues in Science Journalism
(same as SCI_AG_J 4415). Focuses on covering the interplay of one or more current issues of concern to journalists, scientists and society. The focus for any given semester may be biotechnology, climate change, energy, food safety, global population growth, wildlife or another issue. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 2100 or instructor’s consent

JOURN 4416: Science, Health and Environmental Writing
Advanced course in the reporting of science, health and environment. Write for publication.

Credit Hours: 3
Prerequisites: JOURN 4450 and instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4418: Critical Reviewing
A combination of theory and practice that covers the philosophy and craft of reviewing the arts, including books, movies, television, dance, painting, sculpture and architecture. Students must attempt to publish reviews and essays locally, regionally and nationally. Reviews published in VOX Magazine.

Credit Hours: 3
Prerequisites: JOURN _0900 or JOURN 2100 and instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4420: Editorial Writing

Credit Hours: 3
Prerequisites: JOURN 4450. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4422: Sports Journalism
A review of everything from “how to watch Sports” to the history of sports writing. Contact instructor for consent on this course. Priority will be given to Sports Journalism students. All other consent will be given on a first-come, first-serve basis as space allows. Course graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450; or JOURN 4804 or JOURN 7804; or JOURN 4306 or JOURN 7306 and instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism students only

JOURN 4426: Religion Reporting and Writing
(same as REL_ST 4418). Advanced seminar in religion reporting and writing. Examines the role of religion journalism in faith, public life and culture.

Credit Hours: 3
JOURN 4428: Health Reporting Skills
This course focuses on research and analysis techniques journalists use to understand and report on health policy, health-care quality, medical research and the business of health care. Graded on A-F basis only.

Credit Hours: 2-3
Prerequisites: JOURN 4450, JOURN 4306 or JOURN 4804. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4430: Computer-Assisted Reporting
How to negotiate for, transfer and process electronic information; the unique opportunities computers provide for analyzing information.

Credit Hours: 3
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4432: Advanced Data Journalism
(cross-leveled with JOURN 7432). Teaches students how to creatively solve problems in journalism using computer programming. Students will learn how to code using the Python language, and how to apply those coding skills to perform real-world tasks. Students will learn the concepts, theory and practical programming skills needed to clean data, scrape web sites and turn databases into interactive online experiences. By the end of the semester, students will have learned the skills to create interactive database presentations, and will have created a functional web app that will serve as a portfolio piece. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4430
Recommended: JOURN 4502, A working knowledge of SQL databases, Bootcamp Workshop

JOURN 4434: The Art and Mechanics of the Business Story
The purpose of this course is to give students a deep understanding of business journalism and for them to apply those skills in a real newsroom, Missouri Business Alert. The class will cover everything from audience to financials, and students will leave the class with several work samples to show potential employers.

Credit Hours: 3
Prerequisites: Journalism and Science and Agricultural Journalism majors only; JOURN 4450 or JOURN 7450, or JOURN 4306 or JOURN 7306, or JOURN 4804 or JOURN 7804, or JOURN 4556 or JOURN 7556

JOURN 4436: Investigative Reporting
Advanced course designed to acquaint reporters with public issues. Students write two in-depth projects and other shorter assignments. Students meet weekly with instructor for editorial suggestions.

Credit Hours: 3
Prerequisites: JOURN 4450 and instructor’s consent

JOURN 4438: Business and Economics Reporting
Advanced reporting course concentrating on writing and reporting about business and the economy. Emphasis on sources, records, documents and writing techniques.

Credit Hours: 3
Prerequisites: JOURN 4450 or its equivalent in professional writing experience and instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4440: Mapping for Stories and Graphics
Learn mapping software to discover information for news stories and lay the foundation for compelling news information graphics. Students will learn how to create maps for print, broadcast and online. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: JOURN 2100 and instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4444: Team-Based Mobile Device Application Development
(same as INFOTC 4500). This is a multi-disciplinary, team-based course on developing applications for mobile devices. Teams will be comprised of students who are software developers and students who are designers. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: for Journalism majors (Designers), instructor’s consent; for Computer Science or Information Technology majors (Developers), CMP_SC 2050 or permission of instructor

JOURN 4450: News Reporting
Assignments on a daily city newspaper covering community news, city, county and state affairs, sports and lifestyle issues. Experience in gathering and writing news, writing under deadline conditions.

Credit Hours: 3
Prerequisites: JOURN 2100

JOURN 4460: Advanced News Reporting
(cross-leveled with JOURN 7460). Assignments to more difficult beat areas, team reporting and some investigative reporting for community newspaper. Individual conferences and weekly class sessions on contemporary reporting problems.

Credit Hours: 3
Prerequisites: JOURN 4450

JOURN 4462: Emerging Technologies in Journalism
This course quickly responds to technology developments in journalism through a combination of theory, practice and research. Students learn to use the developing technology and also strategies to manage its impact on media organizations while expanding academic discourse. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: junior standing; restricted to Journalism and Science and Agricultural Journalism students only

JOURN 4464: Magazines Across Platforms
Students will be digital editors for Vox Magazine and will explore digital content creation, presentation, analytics, and innovation for the Web and tablets. Students will pitch and create exclusive content for the Vox website, blog, iPad app and social media. Graded on A-F basis only.

Credit Hours: 3
**Prerequisites:** JOURN 4450 and instructor's consent. Restricted to Journalism and Science Agricultural Journalism students only

**JOURN 4480: Will Write for Food (and Wine)**
(Same as SCI_AG_J 4480) Course focuses on food and wine writing in current U.S. culture. Come ready to create mouthwatering narrative and actively seek publishing your finished work. An emphasis will be placed on class participation and written critiques of peer-reviewed articles in class. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Junior standing, instructors consent and JOURN 4450. Restricted to Journalism and Science Agricultural Journalism students only

**JOURN 4482: Field Reporting: Wine Country Writing**
(same as SCI_AG_J 4482). Students will examine wine culture, agricultural issues in the vineyard, wine trends, the historical context of wine and Missouri settlement, and more. Come ready to shape articles into sharp focus and make them fresh with input from fellow student critiques. Graded on A-F basis only. Prerequisites: JOURN 2100

**Credit Hours:** 3

**JOURN 4500: Publication Design**
Intermediate design techniques and theories of editorial design. Students apply classroom teachings by designing pages for the Columbia Missourian and Vox Magazine. Students work under deadline and learn attention-to-detail through use and execution of design style guides.

**Credit Hours:** 3

**Prerequisites:** JOURN 4360 and instructor's consent. Restricted to Journalism and Science Agricultural Journalism majors only

**JOURN 4502: Multimedia Planning and Design**
Class covers the basics of web design - Storyboarding, navigation, information architecture, reader behavior, usability studies - as they relate to journalistic stories and persuasive messages.

**Credit Hours:** 3

**Prerequisites:** Completion of one of the following--JOURN 4804; JOURN 4508, JOURN 4406, JOURN 4506, JOURN 4204, JOURN 4306, JOURN 4450, JOURN 4560 or by instructor’s consent. Restricted to Journalism and Science Agricultural Journalism majors only

**JOURN 4506: Magazine Design**
Introduction to typography of magazines from manuscript markup through layout to page proof. Extensions and limitations of typography are considered in light of current practice and economic possibilities.

**Credit Hours:** 3

**Prerequisites:** Restricted to Journalism and Science Agricultural Journalism majors only

**JOURN 4508: Information Graphics**
Work as a news artist for a daily city newspaper graphically covering community news, sports and lifestyle issues. Emphasis on visual thinking and effective presentation. Experience with state-of-the-art software.

**Credit Hours:** 3

**JOURN 4510: Visual Communication**
How to communicate through pictures. Topics: visual perception, vocabulary, the role of words, picture editing, design and layout, printers, taste and judgment, camera mechanics. For journalism students who are not photographers.

**Credit Hours:** 3

**Prerequisites:** Restricted to Journalism and Science Agricultural Journalism majors only

**JOURN 4550: Basic Photography and Photo Editing**
A basic survey for non-photojournalism majors and others with no prior experience who desire a working knowledge of photojournalistic theory and practice.

**Credit Hours:** 3

**Prerequisites:** instructor’s consent. Restricted to Journalism and Science Agricultural Journalism majors only

**JOURN 4554: Visual Editing for Multimedia**
This class develops understanding of multimedia storytelling by focusing on editing, production, and business model practices for online visual journalism. It builds on a foundation of digital editing, photojournalism, photo editing, videography, and multimedia production. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** JOURN 4804 or JOURN 4550 or JOURN 4306 or JOURN 4406 or JOURN 4506 and instructor’s consent; restricted to Journalism and Science Agricultural Journalism students only

**JOURN 4556: Fundamentals of Photojournalism**
A rigorous skills course for advanced students preparing for a career in photojournalism consisting of weekly exercises in black and white and color photographic story telling and lectures that explore the philosophical, historical and ethical roots of the profession.

**Credit Hours:** 3

**Prerequisites:** instructor’s consent

**JOURN 4558: Advanced Techniques in Photojournalism**

**Credit Hours:** 3

**Prerequisites:** JOURN 4556. Restricted to Journalism and Science Agricultural Journalism majors only

**JOURN 4560: Staff Photojournalism**
(cross-leveled with JOURN 4560). A laboratory course exploring the photojournalist’s role in the news-gathering process. As staffers for the Columbia Missourian, students cover news, sports, features, food assignments and originate single pictures and stories.

**Credit Hours:** 3
Prerequisites: JOURN 4558. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4562: Photojournalism Business Practices
Discusses legal, financial, organizational and entrepreneurial issues for photojournalists. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: JOURN 4558 or JOURN 7558 and JOURN 4566 or JOURN 7566 or consent of instructor; junior standing; restricted to Journalism and Science and Agricultural Journalism students only

JOURN 4564: Micro-Documentary Photojournalism and Videography
This course extends student’s understanding and abilities to produce short-form video journalism. They will produce, from concepts to web publication, two five-minute non-fiction videos that serves the public through engaging visual sound techniques and compelling narrative. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 4558 or JOURN 7558 or JOURN 4306 or JOURN 7306 or JOURN 4804 or JOURN 7804 or instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism students only

JOURN 4566: Electronic Photojournalism
Concepts and skills to incorporate photographs, audio and video for interactive presentation, with an emphasis on project design and coding for web and mobile devices. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 4556 and instructor’s consent

JOURN 4568: History of Photojournalism
Examination of the aesthetic and technological development of photography from its invention in 1839 to the present. Primary emphasis on the evolution and impact of the picture press and the documentary tradition in America, although international developments are studied as well.
Credit Hours: 3

JOURN 4650: International Issues Reporting
An advanced professional seminar on how to recognize, report and write about the domestic influence of international political, economic and cultural problems and trends.
Credit Hours: 3
Prerequisites: JOURN 4450

JOURN 4656: International News Media Systems
A comparative survey of current news media systems and how they affect the international flow of information. Newspapers, news agencies, broadcasting and satellite networks of the world are analyzed.
Credit Hours: 3
Prerequisites: junior standing in Journalism or Science and Agricultural Journalism

JOURN 4658: International Journalism
An examination of the gathering, editing and dissemination of international news. The impact of social, economic, cultural and political structures on news media performance is evaluated.
Credit Hours: 3
Prerequisites: junior standing. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4660: Media Forces Shaping the European Union
Seminar analyzes the role of media in shaping policies and actions of the European Union member nations and their people. Open to graduate students regardless of major and to undergraduates with instructor’s consent. Course qualifies for EU Certificate Program.
Credit Hours: 3
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4662: Global News Across Platforms
Online, radio, and print production for a converged media enterprise, Global Journalist. Students report, write, plan, edit, design, and produce an international magazine, radio program, and website while working under weekly deadlines.
Credit Hours: 3
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors. Instructor’s consent required

JOURN 4700: Participatory Journalism
An examination of how information is shared outside professional journalism, and how journalists can interact with communities. Topics will include community collaboration, social media, audience outreach and understanding, and an expanding definition of "news". Students will work with the community on behalf of the Missourian. All interest areas welcome.
Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 4804 or JOURN 4306 or JOURN 4206 or JOURN 4560 or instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4706: The Community Newspaper
The role of the newspaper in the community. Handling of news categories especially applicable to smaller newspaper. Field trips giving students experience in publishing newspapers in the state.
Credit Hours: 3

JOURN 4710: Newspaper Management
Department-by-department organization, business practices, personnel, rate structures, equipment, production, laws and regulations of concern to newspaper management. Cases examine critical newspaper management issues.
Credit Hours: 3
JOURN 4716: Women and the Media
(same as WGST 4716). Focus on portrayal of women in American mass media. Other goals: historical perspective on women as journalists; exposure to issues usually not covered by mass media; research and writing skills.

Credit Hours: 2
Prerequisites: instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only. Junior standing required.

JOURN 4718: Law and the Justice System
(cross-leveled with JOURN 7718). Lectures, readings, discussions, writing assignments relating to justice system reporting from the view of attorneys, prosecutors, judges, correction and probation officers with the cooperation of the Missouri Bar.

Credit Hours: 3

JOURN 4720: Internet Law
This course will focus on how to avoid legal pitfalls while doing e-mail or e-commerce or browsing the Web and how to use the law to your benefit.

Credit Hours: 3
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only.

JOURN 4728: Confronting Controls on Information
A review of actions by government, society and the communications media calculated to limit or alter the content of information in the United States and elsewhere around the world.

Credit Hours: 3
Prerequisites: instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only.

JOURN 4730: Journalism and Conflict
(same as PEA_ST 4830). Introduction to the basic principles of conflict theory and negotiation, including the sources of conflict, why conflict escalates and what the conditions are for de-escalation, all with a special emphasis on the implications for the working journalist.

Credit Hours: 3

JOURN 4734: Journalism and Chaos: How to Understand and Cover 21st Century Business Models
The purpose of this class is to explore alternative business/journalism models that can be grown from the rib of the traditional newsroom. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Junior Standing. Restricted to Journalism and Science and Agricultural Journalism students only.

JOURN 4736: Changing Media Business Models
Analysis of the economic changes in news media industry. Explore concepts and theories of monetizing media. Hands-on experience in creating innovations in media business models.

Credit Hours: 3
Prerequisites:Restricted to Journalism and Science and Agricultural Journalism majors only.

This seminar uses the methods of science to explore and better understand the biases and limitations of language, culture, technology and other factors shaping the semantic environment as applied to the practice of journalism and mass communications studies.

Credit Hour: 1-3
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only.

JOURN 4802: Fundamentals of TV, Radio and Photojournalism
Skills, theory and ethics of broadcast news and photojournalism for non-broadcast majors. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 2100 and instructor’s consent required. Restricted to Journalism and Science and Agricultural Journalism majors only. Sophomore standing required.

JOURN 4804: Convergence Reporting
Practice and theory of reporting for converged media. Students produce multimedia reports for traditional and converged media operations. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Convergence, Print and Digital, Photojournalism, and Magazine students, and Science and Agricultural Journalism students with junior standing.

JOURN 4806: Convergence Editing and Producing
Practice and theory of editing and producing material for publication or broadcast in a converged environment. Students produce media for multiple outlets. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4804 or JOURN 4450, or by consent of instructor. Restricted to Journalism and Science and Agricultural Journalism majors only.

JOURN 4810: Advanced Global Converged News
(cross-leveled with JOURN 7810). Internet news services offers real-world newsroom experience synthesizing worldwide news coverage and revealing alternative perspectives on current events. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Instructor consent; junior or higher standing. Restricted to Journalism and Science and Agricultural Journalism majors only.

JOURN 4812: Online Audience Development
Experience in developing online audiences gained through hands-on work at an Internet site. Graded on A/F basis only.

Credit Hours: 3
Prerequisites: Junior standing; instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only.
JOURN 4814: Multimedia Sports Journalism
Assignments on a daily regional website and radio station covering sports with converged media. Experience in reporting game and feature stories under deadline conditions. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4306 or JOURN 7306, or JOURN 4450 or JOURN 7450, or JOURN 4804 or JOURN 7804, or JOURN 4556 or JOURN 7556, or JOURN 4560 or JOURN 7560. Restricted to Journalism and Science and Agricultural Journalism students only. Instructor’s consent required

JOURN 4940: Internship in Journalism
Credit for approved employment in journalism. Specifications for this course appear in the Undergraduate Catalog. Graded on S/U basis only.

Credit Hour: 1-6
Prerequisites: Journalism students only

JOURN 4950: Understanding Audiences
Focuses on the recipients of journalistic efforts by teaching students to identify, analyze and address media audiences. Students will learn a variety of research methods and gain hands-on experience with audience analysis through team-based practical projects.

Credit Hours: 3
Prerequisites: JOURN 2000 and junior standing. Strategic Communication students may not enroll in this entry level research course

JOURN 4952: Strategic Communication Research I
(cross-leveled with JOURN 7952). Introduction to techniques and practice of strategic communication research. Emphasis on research techniques and use of research results, including consumer analysis, attitude measurement and evaluation of externally supplied research.

Credit Hours: 3
Prerequisites: Restricted to Strategic Communication and Science and Agricultural Journalism students only

JOURN 4970: Strategic Campaigns
(cross-leveled with JOURN 7970). This capstone course, gives students a hands-on opportunity to use their skills and apply strategic communication learning to a real client situation. To be taken final semester. Application required for Mojo Ad section and will include additional leadership responsibilities.

Credit Hours: 3
Prerequisites: Restricted to Strategic Communication and Science and Agricultural Journalism students only

JOURN 4972: Photo and Visual Editing
An advanced visual editing course. Primary work is as a photo/multimedia editor on the Columbia Missourian photo desk. You collaborate on daily and semester projects and are assigned specific leadership roles.

Credit Hours: 3
Prerequisites: JOURN 4408 or JOURN 7408 or JOURN 4204 or JOURN 7204 or JOURN 4500 or JOURN 7500 or JOURN 4560 or JOURN 7560. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4974: Advanced Internet Applications for Radio/TV News
Integration of advanced Internet research and publishing skills with production and management of the KOMU-TV/KBIA Radio World Wide Web news service.

Credit Hours: 3
Prerequisites: JOURN 4306

JOURN 4976: Seminar in Radio/TV News
Seminar in network and local news process, in coverage of major issues and social problems, in relationships of radio-TV news and government institutions.

Credit Hours: 3
Prerequisites: JOURN 4306 and instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only with junior standing

Dramatic changes in technology and the media’s role in converging technologies require new management and leadership techniques and paradigms. Students will write case examining these changes.

Credit Hours: 3
Prerequisites: JOURN 4306 or JOURN 4804. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4980: The Picture Story and Photographic Essay
Production of photo stories/essays for newspapers, magazines and news media presentations. Research, photography, design and layout. Final portfolio will show journalistic strength and versatility in black and white, and color.

Credit Hours: 3
Prerequisites: JOURN 4560

JOURN 4984: Magazine Staff
Laboratory course exploring the role of editorial staff in the magazine editing process. As staff for school-produced magazines, students plan, edit, write display type, proofread and coordinate with writers, photographers and designers.

Credit Hours: 3
Prerequisites: JOURN 4410, JOURN 4408 and instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4986: Advanced Writing
For those who wish to emphasize writing as a career. In addition to writing assignments, students discuss writings of well-known magazine and book authors.

Credit Hours: 3
Prerequisites: JOURN 4450, JOURN 4410 and instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4988: Advanced Publication Design
(cross-leveled with JOURN 7988). Project-based capstone in which skills learned in previous courses are applied to professional-level
design challenges, such as feature, cover or iPad designs; multimedia prototypes; special editions; or other applications for Vox Magazine, Columbia Missourian, or other outlets.

**Credit Hours:** 3  
**Prerequisites:** JOURN 4500 or JOURN 4506 and instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only

---

**JOURN 4990: Journalism and Democracy**  
This course seeks to cultivate critical-thinking skills by helping students synthesize and apply knowledge gained from a journalism education to the evaluation of news media performance in a democratic society.

**Credit Hours:** 3  
**Prerequisites:** JOURN 4450 and second-semester senior standing. Undergraduates only. Restricted to Journalism and Science and Agricultural Journalism majors only

---

**JOURN 4992: Reporting, Editing and Marketing of Converged Media**  
Capstone course brings together the reporting, editing, management and marketing skills gained in previous convergence courses. Students plan, produce, promote and evaluate journalistic content and applications. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** JOURN 4804, JOURN 4806, or equivalent level of multimedia experience; senior standing and instructor’s consent. Restricted to Journalism and Science and Agricultural Journalism majors only

---

**JOURN 4994: Magazine Publishing**  
The audience, economics, job opportunities and content of the American magazine. Deals with general audience and specialized magazines, business and institutional magazines, news magazines, etc. Case histories of individual magazines, guest lecturers from various fields. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** JOURN 4408 and JOURN 4410, or JOURN 4508. Restricted to Journalism and Science and Agricultural Journalism majors only

---

**JOURN 7000: Communications Law**  
Legal concepts, including prior restraint, libel, privacy, obscenity, contempt and access as they relate to print, broadcast, advertising and other areas.

**Credit Hours:** 3

---

**JOURN 7056: Intersession Colloquium**  
Lecture portion of any course the student plans to take later during an intersession.

**Credit Hour:** 1  
**Prerequisites:** Dean’s consent

---

**JOURN 7058: New York Program: Journalism Theory and Practice**  
Interdisciplinary course offering on-site study at national media venues in New York. Journalism alumni working in Manhattan provide weekly discussions on contemporary practices, job networks and work experiences.

**Credit Hours:** 2-3

---

**JOURN 7120: New Media Basics**  
Students will learn how to use the Internet to communicate with others, find human and electronic sources for stories and publish on the World Wide Web.

**Credit Hour:** 1

---

**JOURN 7122: Fundamentals of Data Reporting**  
Explores the importance to journalists of mining public records and data; reviews basic newsroom mathematics; teaches basic techniques for using Microsoft Excel to create and manipulate spreadsheets and to produce graphics. Graded on A-F basis only.

**Credit Hour:** 1  
**Prerequisites:** JOURN 2100; This course is not to be taken by students who have already completed JOURN 4430 or JOURN 7430. Restricted to Graduate Journalism students

---

**JOURN 7126: Digital Audio and Visual Basics for Journalists**  
Introduces journalism students to audio and video tools used in converged environments. Students will create news stories, ads or promos to meet journalistic or strategic communication goals. Graded on A-F basis only.

**Credit Hour:** 1

---

**JOURN 7130: Account Services**  
(cross-leveled with JOURN 4130). Designed for advanced strategic communication students preparing for careers in account services. Section topics vary.

**Credit Hour:** 1

---

**JOURN 7136: Creative Techniques**  
Designed for advanced Strategic Communication students preparing for careers in creative work. Section topics vary.

**Credit Hour:** 1

---

**JOURN 7138: Public Relations Techniques**  
Designed for advanced strategic communication students preparing for careers in public relations. Section topics vary.

**Credit Hour:** 1

---

**JOURN 7140: Interactive Techniques**  
Designed for advanced strategic communications students preparing for careers in interactive media. Section topics may vary.
JOURN 7146: Strategic Communication Techniques
(cross-leveled with JOURN 4146). Designed for advanced strategic communication students. Section topics vary. Graded on A-F basis only.

Credit Hour: 1

JOURN 7148: Interviewing Essentials
This class allows students to focus on the journalistic interviewing process, from spot news interviews to the sort of interviews required for personality, sports and in-depth work.

Credit Hour: 1

JOURN 7150: Using Infographics
An introduction to the various types of information graphics and how each can be used effectively to help explain the news. Additional emphasis on generating graphic ideas and on the specific challenges of gathering information for graphics.

Credit Hour: 1

Prerequisites: instructor’s consent required

JOURN 7152: Concepts in Participatory Journalism
Journalists need to know how to be in conversation with their communities rather than lecture to them. In this course, we will look at how a collaborative culture is changing journalism, and how journalists can take advantage of the new landscape. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: JOURN 2100, JOURN 2150

JOURN 7198: Area Seminar
Special lectures, readings, discussions relating to the urban journalism, state government reporting or local public affairs reporting programs.

Credit Hours: 3

JOURN 7200: Principles of Strategic Communication
(cross-leveled with JOURN 4200). Foundation course familiarizing students with an array of strategic communication tools and how they are used in the field.

Credit Hours: 3

JOURN 7204: Introduction to Strategic Writing and Design
This course will teach you about strategic writing and design, and then show you how to apply these skills to key communication platforms such as digital media, TV, radio, social media and others. Along the way, you will learn to think, write and design creatively and strategically. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Journalism Strategic Communication and Science and Agriculture Journalism Majors

JOURN 7206: Strategic Writing I
(cross-leveled with JOURN 7206). Students learn strategic writing for a variety of media such as print, radio, television, outdoor, new media, news releases, pitch letters and other persuasive messages.

Credit Hours: 3

Prerequisites: core courses and JOURN 4208 or JOURN 7208

JOURN 7208: Strategic Writing II
(cross-leveled with JOURN 4208). Advanced course in the creation of strategic communication materials with an emphasis on strategic planning, developing creative concepts, producing and polishing copy and visuals, execution of finished product and refining.

Credit Hours: 3

Prerequisites: JOURN 4204 or JOURN 7204

JOURN 7212: Sports and Entertainment Promotion
Course focuses on the role that research, sponsorship, advertising, public relations, social media, positioning, target marketing, psychographics, and other strategic communication processes play in the promotion of the sports and entertainment industry. The course will critically analyze and examine how chief executive officers of sport and entertainment organizations choose, maintain, or redirect their promotion strategies and activities to help achieve organization missions, encourage tickets sales, and attract large audiences.

Credit Hours: 3

JOURN 7213: Strategic Communication Sports Productions I
(cross-leveled with JOURN 4213). This class is designed to prepare Strategic Communication students for vital new positions in the world of sports marketing with the emphasis on video productions, strategic planning, and strategic dissemination of video content via multiple media, channels and platforms. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Journalism Graduate Students

JOURN 7216: Media Sales
(cross-leveled with JOURN 4216). Focus of this course is to familiarize students with how to sell a variety of media including newspaper, radio, television, outdoor, new media, and others.

Credit Hours: 3

Prerequisites: Restricted to Journalism Strategic Communication and Science and Agricultural Journalism Majors

JOURN 7218: Mojo Ad Staff
(cross-leveled with JOURN 4218). Application of strategic communication skills in a professional services agency specializing in the youth and young adult segment. Positions include management, planning, creative, media and research. Other electives required based on position. Application required.

Credit Hours: 3

Prerequisites: JOURN 4204 or JOURN 7204

JOURN 7220: Creative Portfolio
(cross-leveled with JOURN 4220). Students will produce a free-standing collection of outstanding, polished creative work to demonstrate his/her ability to perform at a high level of creativity.

Credit Hours: 3

Prerequisites: core courses and JOURN 4208 or JOURN 7208
JOURN 7226: Strategic Design and Visuals I
Course gives students a foundation in visual communication in areas such as typography, balance, eye flow and layouts.
Credit Hours: 3

JOURN 7228: Strategic Design and Visuals II
(cross-leveled with JOURN 4228). Advanced course in strategic design and visuals. Persuasive visual principles applied to variety of integrated media including print, broadcast and on-line.
Credit Hours: 3
Prerequisites: JOURN 4204 or JOURN 7204

JOURN 7236: Psychology in Advertising
(cross-leveled with JOURN 4236). Application of psychological principles, learning, perception, motivation, attitudes to advertising. Emphasis on the increasing use of psychographics (the "lifestyle" factor) to understand consumer wants and buying behavior.
Credit Hours: 3
Prerequisites: JOURN 4200 or JOURN 7200, JOURN 4952 or JOURN 7952, JOURN 4204 or JOURN 7204

JOURN 7238: Broadcast Advertising
(cross-leveled with JOURN 4238). Broadcast advertising production. Emphasis on equipment, directing, script/storyboard preparation and commercial analysis. Students become familiar with procedures, techniques and facilities used in basic radio and television production.
Credit Hours: 3
Prerequisites: JOURN 4206 or JOURN 7206

JOURN 7248: Media Strategy and Planning
(cross-leveled with JOURN 4248). Course deals with strategic planning and the selection and evaluation of appropriate media outlets. Students gain a clear understanding of the problems and issues involved in crafting effective media strategies, creative problem solving and selection of appropriate media.
Credit Hours: 3
Prerequisites: JOURN 4200 or JOURN 7200, JOURN 4952 or JOURN 7952, JOURN 4204 or JOURN 7204. Restricted to Journalism graduate students

JOURN 7250: Management of Strategic Communication
(cross-leveled with JOURN 4250). How to lead and contribute to strategically sound, highly creative and seamlessly integrated strategic communication on the agency or client side of the business. Directly relevant to agency account management and account planning, as well as client career paths.
Credit Hours: 3
Prerequisites: JOURN 4200 or JOURN 7200, JOURN 4204 or JOURN 7204 and JOURN 4952 or JOURN 7952

JOURN 7256: Public Relations
Current methods of communicating with constituents as practiced by agencies, corporations and government/not-for-profit organizations.

JOURN 7258: Global Communication
(cross-leveled with JOURN 4258). Understanding global communication systems with an emphasis on planning and executing strategic communication campaigns. Particular attention will be paid to cultural, political and economic differences as they affect marketing and development communication.
Credit Hours: 3
Prerequisites: JOURN 4200 or JOURN 7200, JOURN 4204 or JOURN 7204, JOURN 4952 or JOURN 7952

JOURN 7262: Interactive Advertising I
(cross-leveled with JOURN 4262). Course covers every step from integrating Internet efforts into the overall strategic communication plan to building a website that works. Designed for those with an interest in interactive advertising. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 7200, JOURN 7204 and JOURN 7952

JOURN 7263: Interactive Advertising II
(cross-leveled with JOURN 4263). Course goes in-depth on top issues in the interactive process from video advertising to social networking sites and how to increase campaign performance with web analytics. Designed for those who want a career in interactive advertising. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 7202, Restricted to Journalism Graduate students

JOURN 7268: Strategic Communication Practicum
(cross-leveled with JOURN 4268) Practical experience in public relations, corporate communications and strategic planning with the Missouri School of Journalism serving as client. Students from all journalism disciplines will apply knowledge and skills on a variety of platforms.
Credit Hours: 3
Prerequisites: JOURN 4204 or JOURN 7204. Restricted to Strategic Communication and Science and Agricultural Journalism students only

JOURN 7270: Public Relations Writing
(cross-leveled with JOURN 4270). Develop skills and capabilities in strategic communication applications, including news releases, media advisories, pitch letters, video news releases, media relations techniques, writing for electronic and broadcast media, feature writing, brochures and speeches. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 4204 and JOURN 4256

JOURN 7300: Broadcast News I
Beginning reporting and news writing for radio, television and their on-line services. Introduction to use of audio and video recorders and editing systems in production of news stories. Consideration of ethical issues, economic factors, relationships with news sources and gender and ethnic diversity in the newsroom and in news stories.
Credit Hours: 3
Prerequisites: JOUR 2100

JOUR 7301: Topics in Journalism
Selected current topics in journalism. Specific topics to be announced at time of registration.
Credit Hour: 1-3

JOUR 7306: Broadcast News II
Introduction to general assignment reporting skills for the newsroom environment. Instruction in time management, writing, storytelling and performance. Team skills and ethnic diversity in the newsroom are discussed. Students begin work for broadcast newsrooms.
Credit Hours: 3
Prerequisites: JOUR 4300 or JOUR 7300

JOUR 7308: Broadcast News III
Intermediate reporting and news writing skills for radio and television. Advanced techniques in the use of video and sound in production of news stories.
Credit Hours: 3
Prerequisites: JOUR 4306 or JOUR 7306, instructor’s consent required

JOUR 7310: News Producing
Instruction in techniques of television newscast preparation. Emphasis on role of the television news producer.
Credit Hours: 3
Prerequisites: JOUR 4308 or JOUR 7308

JOUR 7320: Advanced Broadcast Reporting
(cross-leveled with JOURN 4320). In-depth reporting and editing for radio or television; advanced production techniques; emphasis on writing, interviewing, effective use of audio or videotape at KOMU-TV or KBIA.
Credit Hours: 3
Prerequisites: JOUR 4308 or JOUR 7308

JOUR 7328: Advanced News Communication
(cross-leveled with JOURN 4328). This course will examine and practice the components of effective interviewing and on-set and live reporting for television news. Students will anchor KOMU-TV’s morning newscasts.
Credit Hour: 1
Prerequisites: JOUR 4306 or JOUR 7306

JOUR 7340: Viewing Journalism Films: Images of the Reporter
(cross-leveled with JOURN 4340). This course explores the diverse images of the journalist in popular culture as expressed in films throughout the last century and the beginning of the 21st century. Whether hero, rogue, or neutral observer, the journalists in films serve as guides to journalism students about the often conflicting images of reporters in modern society. These films pose questions about the ways journalists respond to a host of issues, including the interaction between journalists and government, the legal system, public policy, the entertainment industry, and business. By analyzing the changing roles of reporters and editors in film, students increase their awareness of the problems faced by professional journalists. The chronological organization of the course offers a perspective of the critical events in each decade, from the early muckrakers to the recent digital entrepreneurs. Students will view and discuss one film each week.
Credit Hours: 2

JOUR 7350: Problems in Journalism
Independent research arranged with individual faculty member. Contract must be approved by instructor and dean. Not accepted as a substitute for any regularly scheduled course. Some sections of the course may be graded on either A-F or S/U basis only.
Credit Hour: 1-3

JOUR 7360: Fundamentals of Design
(cross-leveled with JOURN 4360). This is a beginning course in editorial design. We will study design history and learn basic design principles and concepts in both print and digital platforms. You will be introduced to software programs such as InDesign, Photoshop and Illustrator, as well as basic HTML coding.
Credit Hours: 2

JOUR 7370: The Intersections of Documentary Film and Journalism
(same as FILM_S 7370; cross-leveled with JOURN 4370). The popularity of documentary film in the past ten years has skyrocketed, and recent award-winning documentaries such as Inside Job (2010), Blackfish (2013), and The Invisible War (2012) are simultaneously entertaining audiences and investigating serious issues like the financial collapse, killer whale captivity, and sex crimes in the military-issues that in the past might have been covered exclusively by investigative journalism. What explains the public’s growing fascination with documentary? How is documentary film reacting to recent transformations in the media landscape? Is it filling a critical need that journalism is no longer willing or able to meet? This course will explore the intersection of these two nonfiction storytelling forms--documentary film and journalism--and examine the role played by advocacy in both modes, as well as the cultural and ethical implications of the convergence between journalism and documentary film. In that it is centered on contemporary documentary film culture, the course also takes advantage of the True/False Film Festival, and will be host to a conference during Week 6, featuring a number of major visiting filmmakers and film critics. Attendance at some sessions is required. Graded on A-F basis only.
Credit Hours: 3

JOUR 7371: Editing for Documentaries
(cross-leveled with JOURN 4371). Documentary and other long-form story telling methods involve a complex series of decisions made in the creation of the work that determines its style, length, direction, point of view and more. These and a thousand other editing decisions are the difference between a successful project that touches its audience and one that falls short. The focus of this course is on the craft of editing, as seen in a variety of documentary and other works and explained through the decisions made in and out of the editing room that lead to the final product. The course will introduce important concepts of editing, the work of significant editors in both documentary and narrative fiction films, and seek to apply those techniques to the conceptualization of documentary work students will do as part of their degree. Students will understand the
history of documentary editing as it evolved on its own and as influenced by narrative fiction films, the language of editing, the work of important editors and directors and how it influences today’s aesthetic and how to apply what they have learned to their own documentary projects at an advanced level. Graded on A-F basis only.

| Credit Hours: 3 |
| Corequisites: JOURN 7564 |
| Recommended: JOURN 7370 |

**JOURN 7400: Introduction to News Editing**
Introduces the fundamentals of editing of stories and writing headlines for publication online and in print, including an emphasis on style and grammar. Emphasized editing for an online audience.

| Credit Hours: 3 |
| Prerequisites: JOURN 2100 |

**JOURN 7406: News Editing**
Laboratory work on the Columbia Missourian plus lectures on ethics, page design and news decision making.

| Credit Hours: 3 |
| Prerequisites: JOURN 4400 or JOURN 7400 |

**JOURN 7408: Magazine Editing**
Review of grammar, punctuation, style rules: measuring articles copy fitting: writing captions, titles; editing, proofreading, condensing, rewriting magazine articles.

| Credit Hours: 3 |
| Prerequisites: JOURN 4450 or JOURN 7450 |

**JOURN 7410: Intermediate Writing**
In-depth research and writing techniques. Students produce articles for the Missourian and school-produced magazines or other publications.

| Credit Hours: 3 |
| Prerequisites: JOURN 4450 or JOURN 7450 or equivalent and instructor’s consent |

**JOURN 7412: Lifestyle Journalism**
In-depth research and writing techniques focused on lifestyle journalism. Students produce articles for the Missourian and school-produced magazines or other publications. Substitutes for JOURN 4410 or JOURN 7410.

| Credit Hours: 3 |
| Prerequisites: JOURN 4450 or JOURN 7450 or equivalent and instructor’s consent |

**JOURN 7414: Field Reporting on the Food System and Environment**
(same as SCI_AG_J 7414) Field reporting on the social, political, scientific, economic and ethical dimensions of the food system and environment, with emphasis on explanatory story-telling. Includes multi-day filed trip. Graded on A-F basis only.

| Credit Hours: 3 |
| Prerequisites: instructor’s consent required |

**JOURN 7416: Science, Health and Environmental Writing**
Advanced course in the reporting of science, health and environment. Write for publication.

| Credit Hours: 3 |
| Prerequisites: JOURN 4450 or JOURN 7450 and instructor’s consent |

**JOURN 7418: Critical Reviewing**
A combination of theory and practice that covers the philosophy and craft of reviewing the arts, including books, movies, television, dance, painting, sculpture and architecture. Students must attempt to publish reviews and essays locally, regionally and nationally. Reviews published in Sunday Magazine.

| Credit Hours: 3 |
| Prerequisites: JOURN _0900 or JOURN 2100 and instructor’s consent |

**JOURN 7420: Editorial Writing**

| Credit Hours: 3 |
| Prerequisites: JOURN 4450 |

**JOURN 7422: Sports Journalism**
A review of everything from "How to Watch Sports" to the history of sports writing.

| Credit Hours: 3 |
| Prerequisites: JOURN 4450 or JOURN 7450, or JOURN 4804 or JOURN 7804, or JOURN 4306 or JOURN 7306. Restricted to Journalism and Science and Agricultural Journalism students only. Instructor’s consent required. Priority will be given on first-come, first-served basis as space allows |

**JOURN 7426: Religion Reporting and Writing**
(same as REL_ST 7418). Advanced seminar in religion reporting and writing. Examines the role of religion journalism in faith, public life and culture.

| Credit Hours: 3 |
| Prerequisites: JOURN 4450 or JOURN 7450 or its equivalent in professional writing experience and instructor’s consent |

**JOURN 7428: Health Reporting Skills**
This course focuses on reporting, sourcing and analysis techniques journalists use to understand and report on health policy, health-care quality, medical research and the business of health care. Graded on A-F basis only.

| Credit Hours: 2-3 |
| Prerequisites: JOURN 4450 or JOURN 7450, JOURN 4306 or JOURN 7306, or JOURN 4804 or JOURN 7804 and instructor’s consent |

**JOURN 7430: Computer-Assisted Reporting**
How to negotiate for, transfer and process electronic information; the unique opportunities computers provide for analyzing information.

| Credit Hours: 3 |
JOURN 7432: Advanced Data Journalism
(cross-leveled with JOURN 4432). Teaches students how to creatively solve problems in journalism using computer programming. Students will learn how to code using the Python language, and how to apply those coding skills to perform real-world tasks. Students will learn the concepts, theory and practical programming skills needed to clean data, scrape web sites and turn databases into interactive online experiences. By the end of the semester, students will have learned the skills to create interactive database presentations, and will have created a functional web app that will serve as a portfolio piece.

Credit Hours: 3
Prerequisites: JOURN 4430
Recommended: JOURN 4502, A working knowledge of SQL databases, Bootcamp Workshop

JOURN 7434: The Art and Mechanics of the Business Story
The purpose of this course is to give students a deep understanding of business journalism and for them to apply those skills in a real newsroom. Missouri Business Alert. The class will cover everything from audience to financials, and students will leave the class with several work samples to show potential employers. Those classes include: JOURN 4450 or JOURN 7450; JOURN 4306 or JOURN 7306; JOURN 4804 or JOURN 7804; JOURN 4556 or JOURN 7556.

Credit Hours: 3
Prerequisites: Journalism Graduate students who have passes a newsroom reporting class (or its equivalent)

JOURN 7436: Investigative Reporting
Advanced course designed to acquaint reporters with public issues. Students write two in-depth projects and other shorter assignments. Students meet weekly with instructor for editorial suggestions.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450 and instructor’s consent

JOURN 7438: Business and Economics Reporting
Advanced reporting course concentrating on writing and reporting about business and the economy. Emphasis on sources, records, documents and writing techniques.

Credit Hours: 3
Prerequisites: JOURN 4408 or JOURN 7408 and JOURN 4410 or JOURN 7410 or JOURN 4506 or JOURN 7506

JOURN 7440: Mapping for Stories and Graphics
Learn mapping software to discover information for news stories and lay the foundations for compelling news information graphics. Students will learn how to create maps for print, broadcast and online. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: JOURN 2100 and instructor’s consent

JOURN 7450: News Reporting
Assignments on a daily city newspaper covering community news, city, county and state affairs, sports and lifestyle issues. Experience in gathering and writing news, writing under deadline conditions.

JOURN 7450: News Reporting
Assignments on a daily city newspaper covering community news, city, county and state affairs, sports and lifestyle issues. Experience in gathering and writing news, writing under deadline conditions.

Credit Hours: 3
Prerequisites: JOURN 2100 or JOURN 2100

JOURN 7460: Advanced News Reporting
(cross-leveled with JOURN 7460). Assignments to more difficult beat areas, team reporting, and some investigative reporting for community newspaper. Individual conferences and weekly class sessions on contemporary reporting problems.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450

JOURN 7462: Emerging Technologies in Journalism
This course quickly responds to technology developments in journalism through a combination of theory, practice and research. Students learn to use the developing technology and also strategies to manage its impact on media organizations while expanding academic discourse. May be repeated for credit. Graded A-F basis only.

Credit Hours: 1-3

JOURN 7464: Magazines Across Platforms
Students will be digital editors for Vox magazine and will explore digital content creation, presentation, analytics, and innovation for the Web and tablets. Students will pitch and create exclusive content for the Vox website, blog, iPad app and social media. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450. Journalism Graduate standing required. Instructor’s consent required

JOURN 7480: Will Write for Food (and Wine)
(cross-leveled with SCI_AG_J 4480). Course focuses on food and wine writing in current U.S. culture. Come ready to create mouthwatering narrative and actively seek publishing your finished work. An emphasis will be placed on class participation and written critiques of peer-reviewed articles in class. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Junior standing, instructor’s consent and JOURN 4450. Restricted to Journalism and Science Agriculture Journalism students only

JOURN 7500: Publication Design
Intermediate design techniques and theories of editorial design. Students apply classroom teachings by designing pages for the Columbia Missourian and Vox Magazine. Students work under deadline and learn attention-to-detail through use of execution of design style guides.

Credit Hours: 3
Prerequisites: JOURN 4360 and instructor’s consent. Restricted to Journalism Graduate students only

JOURN 7502: Multimedia Planning and Design
Class covers the basics of web design - Storyboarding, navigation, information architecture, reader behavior, usability studies - as they relate to journalistic stories and persuasive messages. Prerequisites: Completion of one of the following: JOURN 4804, JOURN 4508, JOURN 4406, JOURN 4506, JOURN 4204, JOURN 4306, JOURN 4450 or JOURN 4560; or by instructor’s consent.
JOURN 7506: Magazine Design
Introduction to typography of magazines from manuscript markup through layout to page proof. Extensions and limitations of typography are considered in light of current practice and economic possibilities.
Credit Hours: 3
Prerequisites: JOURN 4556 or JOURN 7556

JOURN 7508: Information Graphics
Work as a news artist for a daily city newspaper graphically covering community news, sports and lifestyle issues. Emphasis on visual thinking and effective presentation. Experience with state-of-the-art software.
Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450 or the professional equivalent, or instructor’s consent

JOURN 7510: Visual Communications
How to communicate through pictures. Topics: visual perception, vocabulary, the role of words, picture editing, design and layout, printers, taste and judgment, camera mechanics. For journalism students who are not photographers.
Credit Hour: 2-3

JOURN 7550: Basic Photography and Photo Editing
A basic survey for non-photojournalism majors and others with no prior experience who desire a working knowledge of photojournalistic theory and practice.
Credit Hours: 3
Prerequisites: instructor’s consent required

JOURN 7554: Visual Editing for Multimedia
This class develops understanding of multimedia storytelling by focusing on editing, production, and business model practices for online visual journalism. It builds on a foundation of digital editing, photojournalism, photo editing, videography, and multimedia production. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 4804 or JOURN 4550 or JOURN 4306 or JOURN 4406 or JOURN 4506 and instructor’s consent; restricted to Journalism and Science and Agriculture Journalism students only

JOURN 7556: Fundamentals of Photojournalism
A rigorous skills course for advanced students preparing for a career in photojournalism consisting of weekly exercises in black and white and color photographic story telling and lectures that explore the philosophical, historical and ethical roots of the profession.
Credit Hours: 3
Prerequisites: instructor’s consent required

JOURN 7558: Advanced Techniques in Photojournalism
Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450

JOURN 7560: Staff Photojournalism
A laboratory course exploring the photojournalist’s role in the news-gathering process. As staffers for the Columbia Missourian, students cover news, sports, features, food assignments and originate single pictures and stories.
Credit Hours: 3
Prerequisites: JOURN 4558 or JOURN 7558

JOURN 7562: Photojournalism Business Practices
Discusses legal, financial, organizational and entrepreneurial issues for photojournalists. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: JOURN 4558 or JOURN 7558 and JOURN 4566 or JOURN 7566, or instructor’s consent required. Restricted to graduate Journalism majors only

JOURN 7564: Micro-Documentary Photojournalism and Videography
This course extends students’ understanding and abilities to produce short-form video journalism. They will produce, from concept to web publication, two five-minute non-fiction videos that serves the public through engaging visual sound techniques and compelling narrative. Graded on A/F basis only.
Credit Hours: 3
Prerequisites: JOURN 4558 or JOURN 7558 or JOURN 4306 or JOURN 7306 or JOURN 4804 or JOURN 7804 or consent of instructor. Restricted to Journalism or Science and Agricultural Journalism students only

JOURN 7566: Electronic Photojournalism
Concepts and skills to incorporate photographs, audio and video for interactive presentation, with an emphasis on project design and coding for web and mobile devices. Graded on A-F basis.
Credit Hours: 3
Prerequisites: JOURN 4556 or JOURN 7556 and instructor’s consent required

JOURN 7568: History of Photojournalism
Examination of the aesthetic and technological development of photography from its invention in 1839 to the present. Primary emphasis on the evolution and impact of the picture press and the documentary tradition in America, although international developments are studied as well.
Credit Hours: 3

JOURN 7650: International Issues Reporting
An advanced professional seminar on how to recognize, report and write about the domestic influence of international political, economic and cultural problems and trends.
Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450
JOURN 7656: International News Media Systems
A comparative survey of current news media systems and how they affect the international flow of information. Newspapers, news agencies, broadcasting and satellite networks of the world are analyzed.
Credit Hours: 3

JOURN 7658: International Journalism
An examination of the gathering, editing and dissemination of international news. The impact of social, economic, cultural and political structures on news media performance is evaluated.
Credit Hours: 3

JOURN 7660: Media Forces Shaping the European Union
Seminar analyzes the role of media in shaping policies and actions of the European Union member nations and their people. Open to graduate students regardless of major and to undergraduates with instructor’s consent. Course qualifies for EU Certificate Program.
Credit Hours: 3

JOURN 7662: Global News Across Platforms
Online, radio, and print production for a converged media enterprise, Global Journalist. Students report, write, plan, edit, design, and produce an international magazine, radio program, and website while working under weekly deadlines.
Credit Hours: 3
Prerequisites: instructor’s consent required. Restricted to Journalism and Agricultural Journalism majors

JOURN 7700: Participatory Journalism
An examination of how information is shared outside professional journalism, and how journalists can interact with communities. Topics will include community collaboration, social media, audience outreach and understanding, and an expanding definition of “news.” Students will work with the community on behalf of the Missourian. All interest areas welcome.
Credit Hours: 3
Prerequisites: instructor’s consent

JOURN 7706: The Community Newspaper
The role of the newspaper in the community. Handling of news categories especially applicable to smaller newspaper. Field trips giving students experience in publishing newspapers in the state.
Credit Hours: 3
Prerequisites: JOURN _0900 and JOURN 2100

JOURN 7710: Newspaper Management
Department-by-department organization, business practices, personnel, rate structures, equipment, production, laws and regulations of concern to newspaper management. Cases examine critical newspaper management issues.
Credit Hours: 3

JOURN 7716: Women and the Media
(same as WGST 7716). Focus on portrayal of women in American mass media. Other goals: historical perspective on women as journalists; exposure to issues usually not covered by mass media; research and writing skills.
Credit Hours: 2
Prerequisites: instructor’s consent required

JOURN 7718: Law and the Justice System
(cross-leveled with JOURN 4718). Lectures, readings, discussions, writing assignments relating to justice system reporting from the view of attorneys, prosecutors, judges, correction and probation officers, with the cooperation of the Missouri Bar.
Credit Hours: 3
Prerequisites: JOURN _0900 or JOURN 2100

JOURN 7720: Internet Law
This course will focus on how to avoid legal pitfalls while doing e-mail or e-commerce or browsing the Web and how to use the law to your benefit.
Credit Hours: 3

JOURN 7728: Confronting Controls on Information
A review of actions by government, society and the communications media calculated to limit or alter the content of information in the United States and elsewhere around the world.
Credit Hours: 3
Prerequisites: instructor’s consent required

JOURN 7730: Journalism and Conflict
Introduction to the basic principles of conflict theory and negotiation, including the sources of conflict, why conflict escalates and what the conditions are for de-escalation, all with a special emphasis on the implications for the working journalist.
Credit Hours: 3

JOURN 7734: Journalism and Chaos: How to Understand and Cover 21st Century Business Models
The purpose of this class is to explore alternative business/journalism models that can be grown from the rib of the traditional newsroom.
Credit Hours: 3
Prerequisites: Restricted to Journalism and Agricultural Journalism students only

JOURN 7736: Changing Media Business Models
Analysis of the economic changes in news media. Explore concepts and theories of monetizing media. Hands-on experience in creating innovations in media business models.
Credit Hours: 3

JOURN 7738: Thought, Language and Journalism
This seminar uses the methods of science to explore and better understand the biases and limitations of language, culture, technology and other factors shaping the semantic environment as applied to the practice of journalism and mass communications studies.
JOURN 7802: Fundamentals of TV, Radio and Photojournalism
Skills, theory and ethics of broadcast news and photojournalism for non-broadcast majors. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 2100

JOURN 7804: Convergence Reporting
Practice and theory of reporting for converged media. Students produce multimedia reports for traditional and converged media operations. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 7802 or instructor’s consent

JOURN 7806: Convergence Editing and Producing
Practice and theory of editing and producing material for publication or broadcast in a converged environment. Students produce media for multiple outlets. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 4804 or JOURN 7804, instructor’s consent required

JOURN 7810: Advanced Global Converged News
(cross-leveled with JOURN 4810). Internet news services offers real-world newsroom experience synthesizing world wide news coverage and revealing alternative perspectives on current events. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: instructor’s consent required

JOURN 7812: Online Audience Development
Experience in developing online audiences gained through hands-on work at an Internet site. Graded A-F basis only.
Credit Hours: 3
Prerequisites: Instructor’s consent required

JOURN 7814: Multimedia Sports Journalism
Assignments on a daily regional website and radio station covering sports with converged media. Experience in reporting game and feature stories under deadline conditions. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 4306 or JOURN 7306, or JOURN 4450 or JOURN 7450, or JOURN 4804 or JOURN 7804, or JOURN 4556 or JOURN 7556 or JOURN 4560 or JOURN 7560. Restricted to Journalism and Science and Agricultural Journalism students only. Instructor’s consent required

JOURN 7940: Internship in Journalism
Credit for approved employment in journalism. Specifications for this course appear in the Undergraduate Catalog. Graded on S/U basis only.
Credit Hour: 1-6
Prerequisites: Restricted to Journalism students only

JOURN 7952: Strategic Communication Research I
(cross-leveled with JOURN 4952). Introduction to techniques and practice of strategic communication research. Emphasis on research techniques and use of research results, including consumer analysis, attitude measurement and evaluation of externally supplied research.
Credit Hours: 3

JOURN 7970: Strategic Campaigns
(cross-leveled with JOURN 4970). This capstone course gives students a hands-on opportunity to use their skills and apply strategic communication learning to a real client situation. To be taken final semester. Application required for Mojo Ad section and will include additional leadership responsibilities.
Credit Hours: 3
Prerequisites: JOURN 4204 or JOURN 7204

JOURN 7972: Photo and Visual Editing
An advanced visual editing course. Primary work is as a photo/multimedia editor on the Columbia Missourian photo desk. Your collaborate on daily and semester projects and are assigned specific leadership roles.
Credit Hours: 3
Prerequisites: JOURN 4408 or JOURN 7408 or JOURN 4204 or JOURN 7204 or JOURN 4500 or JOURN 7500 or JOURN 4560 or JOURN 7560

JOURN 7974: Advanced Internet Applications for Radio/TV News
Integration of advanced Internet research and publishing skills with production and management of the KOMU-TV/KBIA Radio World Wide Web news service.
Credit Hours: 3
Prerequisites: JOURN 4306 or JOURN 7306

JOURN 7976: Seminar in Radio-TV News
Seminar in network and local news process, in coverage of major issues and social problems, in relationships of radio-TV news and government institutions. Not for students who have taken JOURN 8096.
Credit Hours: 3
Prerequisites: JOURN 4306; instructor’s consent required

JOURN 7978: Media Management and Leadership
Dramatic changes in technology and the media’s role in converging technologies require new management and leadership techniques and paradigms. Students will write case examining these changes.
Credit Hours: 3
Prerequisites: JOURN 4306 or JOURN 4804

JOURN 7980: The Picture Story and Photographic Essay
Production of photo stories/essays for newspapers, magazines and news media presentations. Research, photography, design and layout. Final portfolio will show journalistic strength and versatility in black and white, and color.
Credit Hours: 3
Prerequisites: JOURN 4560 or JOURN 7560
JOURN 7984: Magazine Staff
A laboratory course exploring the role of editorial staff in the magazine editing process. As staff for school-produced magazines, students plan, edit, write display type, proofread and coordinate with writers, photographers and designers.

Credit Hours: 3
Prerequisites: JOURN 4410 or JOURN 7410, JOURN 4408 or JOURN 7408 and instructor's consent required

JOURN 7986: Advanced Writing
For those who wish to emphasize writing as a career. In addition to writing assignments, students discuss writings of well-known magazine and book authors.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450, JOURN 4410 or JOURN 7410 and instructor's consent required

JOURN 7988: Advanced Publication Design
(cross-leveled with JOURN 4988). Project-based capstone in which skills learned in previous courses are applied to professional-level design challenges, such as feature, cover or iPad designs; multimedia prototypes; special editions; or other applications for Vox Magazine, Columbia Missourian or other outlets.

Credit Hours: 3
Prerequisites: JOURN 4500 or JOURN 7500 OR JOURN 4506 or JOURN 7506 and instructor's consent

JOURN 7992: Reporting, Editing and Marketing of Converged Media
Capstone course brings together the reporting, editing, management and marketing skills gained in previous convergence courses. Students plan, produce, promote and evaluate journalistic content and applications. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4804, JOURN 4806 or equivalent level of multimedia experience; instructor's consent required

JOURN 7994: Magazine Publishing
The audience, economics, job opportunities and content of the American magazine. Deals with general audience and specialized magazines, business and institutional magazines, news magazines, etc. Case histories of individual magazines, guest lecturers from various fields.

Credit Hours: 3

JOURN 8000: Mass Media Seminar
Concepts, functions and major problems of print and electronic media in the United States. Two hours lecture and one hour of discussion lab each week.

Credit Hours: 3

JOURN 8001: Seminar on Topics in Journalism
Problems, issues and approaches to research in selected topic areas. Specific content varies by needs of faculty and students and will be announced in advance.

Credit Hours: 3
Prerequisites: Master's students only

JOURN 8006: Quantitative Research Methods in Journalism
Research methods of utility in journalism and philosophy of science. Emphasis on understanding common quantitative methods and tools.

Credit Hours: 3
Prerequisites: six hours of journalism or instructor's consent

JOURN 8008: Qualitative Research Methods in Journalism
Course is designed to introduce graduate students to common qualitative approaches applicable to the study of journalism and mass communication. Students will learn a variety of approaches, practical methodologies and tools that will help them conduct research.

Credit Hours: 3

JOURN 8010: Advanced Qualitative Methods in Journalism
Designed to familiarize doctoral students with qualitative approaches applicable to the study of journalism and mass communication. Students will be introduced to a variety of philosophical and conceptual approaches as well as to practical tools-oriented methodologies in four major areas of qualitative research.

Credit Hours: 3

JOURN 8016: Advanced Quantitative Research Methods
Experimental design, factor analysis, semantic differential and Q methodology as tools for the researcher in journalism, communication.

Credit Hours: 3

JOURN 8018: Strategic Communication Research II
Course reviews the latest principles of strategic communication with emphasis on the crucial role of research to develop informed strategy, monitor communication programs and evaluate overall campaign effectiveness.

Credit Hours: 3

JOURN 8020: Principles and Tools in Strategic Communication Planning
Introduces the latest principles of strategic communication and the importance of strategic planning in many contemporary communication fields. A significant operational component in the course introduces skills such as budgeting, scheduling objective-setting, organizing personal time, and managing people.

Credit Hours: 3

JOURN 8026: Philosophy of Journalism
Seminar deals with wide assortment of philosophical questions in journalism but concentrates on epistemology, political press theory and ethics. Such questions as "objectivity" in journalism, press responsibility, professionalism.

Credit Hours: 3

JOURN 8028: The Literature of Journalism
Reading of ten basic books about journalism. Several books are assigned to everyone; several are assigned on an individual basis, and several are electives. Oral reports, short papers, and class discussion.
JOURN 8030: History of Mass Media
American mass media from colonial days to present in the context of social, economic and political change. History research.
Credit Hours: 3

JOURN 8036: Historical Methods
Graduate seminar in research methods and theoretical approaches used by media historians, including oral history, biography, quantitative and archival research.
Credit Hours: 3

JOURN 8038: Seminar in Communications Law
A graduate-level survey of issues in media law, as well as an introduction to First Amendment theory and scholarship. The course familiarizes students with fundamental concepts of mass media law through exposure to primary materials and provides students with the opportunity to analyze the issues discussed in class through individual research projects.
Credit Hours: 3

JOURN 8042: Health News and Promotion
This is an advanced seminar that examines and critiques the literature on health communication in news about health and its impact and health promotion campaigns.
Credit Hours: 3

JOURN 8044: Strategic Conflict Management
Strategic conflict management is a cross-disciplinary study that integrated organizational behavior, crisis management, conflict resolution and image repair. This course melds theory with practice, and is for those venturing into media management, law, and strategic communication.
Credit Hours: 3

JOURN 8046: Controls of Information
A detail of actions by government, largely the federal government, calculated to limit or alter the content of information in the United States.
Credit Hours: 3

JOURN 8052: Case Studies in the Digital Globe
This course seeks to broaden students perspective about how digital technology affects the world around us. Final course in the CDiG certificate. Inter-departmental course.
Credit Hours: 3

JOURN 8054: Entrepreneurship and Media of the Future
This course will give students an intense hands-on experience in working with real entrepreneurs on complex business problems in the journalism field. Example companies are the Associated Press, Kachingle, the Chicago Sun-Times, Spot-Us and the Media Policy Center. The goal is to offer a solution or solutions to the stated problem, and to present these ideas in a competitive, symposium environment.
Credit Hours: 3

JOURN 8056: Theory of Mass Communication
Major communication theories and theorists. Interpersonal theories are included as they relate to mass communication.
Credit Hours: 3

JOURN 8058: Communication in Media Organizations
Covers key concepts in management and communication in media organizations, including print, broadcast, advertising and public relations. Topics include leadership, human resource management, managerial/employee communication, career success, financial decision-making, teambuilding and goal setting in media organizations.
Credit Hours: 3

JOURN 8068: The Mass Media and the Presidency
This seminar examines that historical triad of the free expression clauses of the First Amendment, the presidency and the American mass media through readings, class assignments and a project.
Credit Hours: 3

JOURN 8070: Proseminar in Communications
Seminar on professional and academic issues in journalism and communication. Specific discussion topics selected by faculty and students on a per class basis.
Credit Hours: 1-3

JOURN 8080: Media Ethics
An introduction to and application of ethical theory to their contemporary mass media.
Credit Hours: 3

JOURN 8085: Problems in Journalism
Individual work on chosen and specified problems not associated with the master’s thesis or project. Topic must be arranged with supervising teacher prior to registration.
Credit Hours: 1-4

JOURN 8090: Research in Journalism
Guidance for graduate students engaged in plan A for the M.A. degree and for all doctoral candidates engaged in investigations looking toward production of thesis. Graded on a S/U basis only.
Credit Hours: 1-9

JOURN 8092: Photography in Society
Social and political dimensions of still photography with emphasis on critical thinking and analysis in visual communication.
Credit Hours: 3

</tbody>
</table>
### JOURN 9026: Mass Communication and Cultural Theory
Explores the relationship between mass communication and the idea of culture as it emerges during the second half of the twentieth century in the United States.

**Credit Hours:** 3

### JOURN 9085: Problems in Journalism
Individual work on chosen and specified problems not associated with the doctoral dissertation or project. Topic must be arranged with supervising teacher prior to registration.

**Credit Hour:** 1-4  
**Prerequisites:** Doctoral students only

### JOURN 9087: Professional Development
Weekly discussion session for doctoral students. Required of all doctoral students. Graded on S/U basis only.

**Credit Hour:** 1

### JOURN 9090: Research in Journalism
Guidance for graduate students engaged in plan A for the M.A. degree and for all doctoral candidates engaged in investigations looking toward production of thesis. Graded on a S/U basis only.

**Credit Hours:** 1-9

---

### Korean (KOREAN)

#### KOREAN 1001: Topics in Korean - General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent. Graded on A-F basis only.

**Credit Hour:** 1-3  
**Prerequisites:** Instructor's consent

#### KOREAN 1005: Topics in Korean - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent. Graded on A-F basis only.

**Credit Hour:** 1-3  
**Prerequisites:** Instructor's consent

#### KOREAN 1100: Elementary Korean I
Introductory course on Korean language. Five hours classroom instruction with one hour lab weekly.

**Credit Hours:** 6

#### KOREAN 1200: Elementary Korean II
Five hours classroom instruction with one hour lab work weekly.

**Credit Hours:** 6  
**Prerequisites:** C- or better in KOREAN 1100

#### KOREAN 1830: Survey of East Asian History
(same as HIST 1830) Introductory survey of the history of East Asian countries (China, Korea, Vietnam, and Japan) in the past two thousand years, focusing on their cultural, economic, and political traditions as well as their transformations in the modern era. Graded on A-F basis only.

**Credit Hours:** 3

#### KOREAN 2001: Topics in Korean - General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent. Graded on A-F basis only.

**Credit Hour:** 1-3  
**Prerequisites:** Sophomore standing or instructor's consent

#### KOREAN 2005: Topics in Korean - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent. Graded on A-F basis only.

**Credit Hour:** 1-3  
**Prerequisites:** Sophomore standing or instructor's consent

#### KOREAN 2160: Intermediate Korean Language I
Intermediate Korean I continues to build on the skills students acquired in the first-year series with increasing work in authentic materials and situations in conversation and reading that encourage students to understand the use of language in its social and cultural context.

**Credit Hours:** 3

#### KOREAN 2310: Korean Civilization I
Focuses on understanding traditional Korean people and culture through examining social, political, economic, and belief systems. Considers literature, art, folklore, and history up to the late 19th century. May be taken independently of KOREAN 2320.

**Credit Hours:** 3

#### KOREAN 2320: Korean Civilization II
Considers the situation and culture of Korea at the end of the Chosun Kingdom, and the period of modernization beginning about 1876. Investigates how modernization has changed Korea by looking at attitudes, behaviors, values, philosophies, and trends of Korea in the 20th and 21st centuries. May be taken independently of KOREAN 2310.

**Credit Hours:** 3

#### KOREAN 2330: Study Tour of Korea
Study tour allows students to experience firsthand important cultural, historical, and education aspects of Korea. Visit key landmarks, museums, and other sites. Provides information and insight needed to cultivate greater understanding of Korea. Graded on A-F basis only.

**Credit Hours:** 3

#### KOREAN 2350: Study Tour of Korea
Study tour allows students to experience firsthand important cultural, historical, and education aspects of Korea. Visit key landmarks, museums, and other sites. Provides information and insight needed to cultivate greater understanding of Korea. Graded on A-F basis only.

**Credit Hours:** 3

#### KOREAN 3001: Topics in Korean-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent. Prerequisites: Sophomore standing and instructor's consent.

**Credit Hour:** 1-3
KOREAN 3005: Topics in Korean - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.
Credit Hours: 3
Prerequisites: sophomore standing and instructor’s consent

KOREAN 3160: Intermediate Korean Language II
Continues to build on the skills students acquire in the third semester of Korean language with increasing work in authentic materials and situations in conversation and reading. Encourages students to understand the use of language in its social and cultural context.
Credit Hours: 3
Prerequisites: KOREAN 2160, or instructor’s consent

KOREAN 3650: The Korean Peninsula in World Affairs: Political, Economic, and Cultural Forces
Designed as interdisciplinary introduction to Korean politics, public policy, economics, and society, paying special attention to the government and politics of South Korea. The Korean peninsula (South and North Korea) has important implications for U.S. foreign policy toward East Asia. Surrounded by Russia, China, and Japan, the Korean peninsula long been regarded among social scientists as one of major regional cases that informs the broader theoretical debate on political and economic issues including democratization, civil society, economic development, and security. Course aims to provide students with the information necessary to understand and analyze modern South and North Korea, and discuss the future of the two Koreas as well as of U.S. foreign policy toward Korea.
Credit Hours: 3
Prerequisites: sophomore standing

KOREAN 3800: Korean Economic Development and US-Korean Free Trade Agreement
Covers introductory theories of economic development and overviews Korean historical economic development plans. Aids with understanding how South Korean achieved high levels of economic development and what policies the South Korean Government implemented to spur growth. US -Korea Free Trade Agreement is a good example of how trade promotes the achievement of development goals.
Credit Hours: 3

KOREAN 3850: Religion and Culture in Modern Korea
Survey of religious traditions and culture in Korea within a broader context of world religions: Shamanism, Buddhism, Confucianism, and Christianity, as well as new religions that have sprouted since the late nineteenth century. Intended to help students understand how religious values, ideas and practices have been integrated into the modern contemporary Korean society and culture. Discussion of how religious traditions in Korea have interacted with each other and culture. No knowledge of Korean language or culture or history required.
Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent

KOREAN 3890: Korean Society Through Cinema
(same as FILM_S 3895). Examines the way in which Korean film reveals the cultural, political, and ideological orientation of the society in which it is created and circulated. Compares films from North and South Korea, considering modernity, gender, nation-hood, and class. Graded on A/F basis only.
Credit Hours: 3
Prerequisites: sophomore standing

KOREAN 4001: Topics in Korean-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.
Credit Hour: 1-3
Prerequisites: sophomore standing and instructor’s consent

KOREAN 4005: Topics in Korean - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.
Credit Hour: 1-3
Prerequisites: sophomore standing and instructor’s consent

KOREAN 4220: Korean Unification
Explores many different topics related to Korean Unification. Studies North Korean ideology, political system, economic system, military, and negotiating behavior. Examines Unification policies of Korea as well as past efforts toward Unification. Considers various scenarios of unification. Studies unification attitudes and values of Korean people including anti-American values, and the roles of neighboring countries.
Credit Hours: 3
Prerequisites: junior standing required

KOREAN 4260: The Korean Diaspora in the U.S., Japan and China
Interdisciplinary course related to the phenomenon of migration and settlement from Korea. Course seeks to deepen understanding of the experiences of Koreans living in the U.S., Japan and China. Through reading critical literatures, students address issues such as immigration history, race/ethnicity, racism and resistance, gender and sexuality, culture and identity, labor, migration and globalization, class, education, religion.
Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent required

KOREAN 4867: North Korea: History, Political Economy, Culture
(same as HIST 4867). The aim of this course is to survey North Korea’s history, especially in terms of political economy and culture. Through several themes, we will examine the historical situations of North Korea from its beginnings in the postliberation period to the present, as North Korea undergoes monumental changes. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: sophomore standing, or instructor’s consent
Laboratory Animal Medicine (LAB_AN)

LAB_AN 8085: Problems in Laboratory Animal Medicine
Advanced studies not expected to terminate in a thesis.
Credit Hour: 1-99

LAB_AN 8090: Research in Laboratory Animal Medicine
Research expected to terminate in a thesis. Graded on a S/U basis only.
Credit Hour: 1-99

LAB_AN 8450: Research in Laboratory Animal Medicine
Research not expected to terminate in a thesis. Graded on S/U basis only.
Credit Hour: 1-99

LAB_AN 9085: Topics in Laboratory Animal Medicine
Courses on various specialized topics in laboratory animal medicine or comparative medicine given on an as needed basis; content depends on faculty expertise and student need.
Credit Hour: 1-99
Prerequisites: instructor’s consent

LAB_AN 9087: Seminar in Laboratory Animal Medicine
Theme-oriented seminars and discussions in the field of laboratory animal medicine, comparative medicine or related areas. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: departmental consent

LAB_AN 9437: Pathology of Laboratory Animals
Pathogenesis, pathology and diagnosis of naturally occurring diseases in animals used in research.
Credit Hours: 4
Prerequisites: departmental consent

LAB_AN 9468: Laboratory Animal Biology
Anatomy, taxonomy, reproduction, genetics, nutrition, and behavior of common laboratory animals. Emphasis is placed on mice and rats, including genetically-engineered models with comparative discussions on other laboratory animals. Prerequisites: departmental consent
Credit Hours: 4

LAB_AN 9469: Laboratory Animal Resource Management
Policies, standards and regulations in the care and use of laboratory animals, including colony management, animal procurement, cost accounting, facility design, and supervisory skills.
Credit Hours: 4
Prerequisites: departmental consent

LAB_AN 9475: Methodology of Animal Experimentation
Topics include experimental design, applied biostatistics, concepts of animal modeling.
Credit Hours: 3
Prerequisites: departmental consent

LAB_AN 9476: Grant and Manuscript Writing for Biomedical Researchers
Topics include experimental design and writing effective grant proposals and scientific manuscripts. Methods include lecture, discussion and assignments including an individual grant proposal which will be reviewed by a mock study section.
Credit Hours: 3
Prerequisites: LAB_AN 9475; instructor’s consent

LAB_AN 9477: Laboratory and Project Management
This course will provide graduates with professional development skills and career guidance including instruction in laboratory and project management. Topics will include job searching, start-up considerations, equipping a lab, personnel management and budget management. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: enrollment in Comparative Medicine Area Program or approval of course coordinator

Latin (LATIN)

LATIN 1100: Elementary Latin I
Forms, grammar, syntax.
Credit Hours: 5

LATIN 1100H: Honors Elementary Latin
Beginning Latin for Honors Eligible students.
Credit Hours: 5
Prerequisites: Honors eligibility required

LATIN 1200: Elementary Latin II
Continuation of LATIN 1100.
Credit Hours: 5
Prerequisites: a grade of C or higher in LATIN 1100

LATIN 1200H: Honors Elementary Latin II
Continuation of LATIN 1100H.
Credit Hours: 5
Prerequisites: a grade of C or higher in LATIN 1100. Honors eligibility required

LATIN 2000: Latin Reading
Readings in Latin prose and poetry.
Credit Hours: 3
Prerequisites: grade of C or higher in LATIN 1200
LATIN 2000H: Latin Reading - Honors
Readings in Latin prose and poetry.
Credit Hours: 3
Prerequisites: grade of C or higher in LATIN 1200. Honors eligibility required

LATIN 4300: Latin Poetry
Readings in selections from the Latin poets.
Credit Hours: 3
Prerequisites: LATIN 2000 or equivalent

LATIN 4350: Latin Prose
Selections from various Latin prose writers; some composition at instructor’s discretion.
Credit Hours: 3
Prerequisites: LATIN 2000

LATIN 4500: Latin Stylistics
Study and writing of connected prose compositions.
Credit Hour: 1-3
Prerequisites: two years classical Latin or equivalent

LATIN 4505: Topics in Latin
Topics course involving Latin texts. May be repeated for credit.
Credit Hours: 3
Prerequisites: LATIN 4300 or equivalent

LATIN 4510: Age of the Scipios
Critical readings in and integrated analyses of the culture of the second century B.C.
Credit Hours: 3-6
Prerequisites: two years Classical Latin or equivalent

LATIN 4520: Age of Cicero
Critical readings in and integrated analyses of the culture of the last decades of the Roman Republic.
Credit Hours: 3
Prerequisites: two years Classical Latin or equivalent

LATIN 4530: Vergil
Readings, discussion, and literary analysis of Vergil Aeneid.
Credit Hours: 3
Prerequisites: two years of Classical Latin or equivalent

LATIN 4540: Augustan Literature
Critical readings in and integrated analyses of the culture of Augustan Rome.
Credit Hours: 3
Prerequisites: two years Classical Latin or equivalent

LATIN 4550: Latin Epigraphy
Introduction to the study of Latin inscriptions and their contributions to ancient culture.

LATIN 4560: Neronian Literature
Critical readings in and integrated analysis of the culture of the age of Nero.
Credit Hour: 3-6
Prerequisites: two years Classical Latin or equivalent

LATIN 4570: Age of Pliny and Tacitus
Critical readings in and integrated analyses of the ages of Domitian and Trajan.
Credit Hour: 3-6
Prerequisites: two years Classical Latin or equivalent

LATIN 4580: The Theodosian Age
A survey of major literary works of the late fourth and early fifth centuries. Readings from Augustine, Ambrose, Prudentius, Paulinus of Nola, Ammianus Marcellinus, Claudian.
Credit Hour: 3
Prerequisites: two years of Classical Latin or equivalent

LATIN 4590: Medieval Latin
Selected texts of Middle Ages and Renaissance. For students with primary interest in history, literature, philosophy, religion, Romance philology, or the classical tradition, experience with Latin sources in their field.
Credit Hours: 3
Prerequisites: two years of Classical Latin or equivalent

LATIN 4600: Survey of Latin Literature
Latin literature from origins to end of Roman Empire; emphasis on authors not covered in other courses, to provide general view of styles and genres.
Credit Hours: 3
Prerequisites: two years Classical Latin or equivalent

LATIN 4960: Special Readings in Latin
Readings in authors and texts not covered in other courses.
Credit Hour: 1-3
Prerequisites: two years Classical Latin or equivalent

LATIN 7300: Latin Poetry
Readings in selections from the Latin poets. Available to students for graduate credit in departments other than Classical Studies.
Credit Hours: 3
Prerequisites: LATIN 2000 or equivalent

LATIN 7350: Latin Prose
Selections from various Latin prose writers; some composition at instructor’s discretion. Available to students for graduate credit in departments other than Classical Studies.
Credit Hours: 3
Prerequisites: LATIN 2000

LATIN 7500: Latin Stylistics
Study and writing of connected prose compositions.
Credit Hours: 3
Prerequisites: two years classical Latin or equivalent

LATIN 7505: Topics in Latin
Topics in Latin.
Credit Hours: 3

LATIN 7510: Age of the Scipios
Critical readings in and integrated analyses of the culture of the second century B.C.
Credit Hour: 3-6
Prerequisites: two years Classical Latin or equivalent

LATIN 7520: Age of Cicero
Critical readings in and integrated analyses of the culture of the last decades of the Roman Republic.
Credit Hours: 3
Prerequisites: two years Classical Latin or equivalent

LATIN 7530: Vergil
Readings, discussion, and literary analysis of Vergil’s Aeneid.
Credit Hours: 3
Prerequisites: two years Classical Latin or equivalent

LATIN 7540: Augustan Literature
Critical readings in and integrated analyses of the culture of Augustan Rome.
Credit Hours: 3
Prerequisites: two years Classical Latin or equivalent

LATIN 7550: Latin Epigraphy
Introduction to the study of Latin inscriptions and their contributions to ancient culture.
Credit Hours: 3
Prerequisites: two years Classical Latin or equivalent

LATIN 7560: Neronian Literature
Critical readings in and integrated analysis of culture of the age of Nero.
Credit Hour: 3-6
Prerequisites: two years Classical Latin or equivalent

LATIN 7570: Age of Pliny and Tacitus
Critical readings in and integrated analyses of the ages of Domitian and Trajan.
Credit Hour: 3-6
Prerequisites: two years Classical Latin or equivalent

LATIN 7580: The Theodosian Age
A survey of major literary works of the late fourth and early fifth centuries. Readings from Augustine, Ambrose, Prudentius, Paulinus of Nola, Ammianus Marcellinus, Claudian.
Credit Hours: 3
Prerequisites: two years of Classical Latin or equivalent

LATIN 7590: Medieval Latin
Selected texts of Middle Ages and Renaissance. For students with primary interest in history, literature, philosophy, religion, Romance philology, or the classical tradition, experience with Latin sources in their field.
Credit Hours: 3
Prerequisites: instructor’s consent

LATIN 7600: Survey of Latin Literature
Latin literature from origins to end of Roman Empire; emphasis on authors not covered in other courses, to provide general view of styles and genres.
Credit Hours: 3
Prerequisites: two years Classical Latin or equivalent

LATIN 7960: Special Readings in Latin
Readings in authors and texts not covered in other courses.
Credit Hour: 2-3
Prerequisites: two years Classical Latin or equivalent

LATIN 8000: Proseminar in Latin Texts
Credit Hours: 3
Prerequisites: instructor’s consent

LATIN 8010: Latin Rough Guide
Intensive exploration of Latin literature from the Roman Republic through the Late Empire. Emphasis upon texts as both literary and cultural artifacts whose interpretation requires familiarity with the historical and archaeological legacy of antiquity as well as modern exegetical strategies.
Credit Hours: 3

LATIN 9187: Seminar in Roman Comedy
Seminar in Roman Comedy.
Credit Hours: 3

LATIN 9287: Seminar in Latin Lyric and Elegiac Poetry
Seminar in Latin Lyric and Elegiac Poetry
Credit Hours: 3

LATIN 9387: Seminar in Neronian Literature
Seminar in Neronian Literature
Credit Hours: 3

LATIN 9487: Seminar in Roman Historians
Seminar in Roman Historians.
Credit Hours: 3

LATIN 9587: Seminar in Latin Epic Poetry
Seminar in Latin Epic Poetry.

Credit Hour: 1-99

LATIN 9687: Seminar in the Augustan Age
Integrated studies in the culture of the age of Augustus-its literature, art and architecture, religion, political and social institutions.

Credit Hour: 3-6

LATIN 9787: Seminar in Late Antiquity
Integrated studies in the culture of late antiquity with interdisciplinary focus.

Credit Hours: 3
Prerequisites: consent required for non graduate students

LATIN 9887: Seminar in Special Fields
Seminar in special fields.

Credit Hours: 3

Law (LAW)

LAW 5010: Civil Procedure I
Fundamental and recurrent problems in civil actions in federal and state courts; remedies; pleading; discovery; trials; jurisdiction; appeals; joinder; preclusion.

Credit Hour: 1-3

LAW 5015: Civil Procedure II
Continuation of LAW 5010.

Credit Hour: 1-3

LAW 5020: Contracts I
Contract formation, insufficient and defective agreement, bases of promissory liability (including consideration and promissory estoppel), resolution, and abuse of bargaining process, Statutes of frauds, parole evidence rule and principles of interpretation, contract performance and risk allocation, remedies for breach.

Credit Hour: 1-3

LAW 5025: Contracts II
A continuation of Law 5020

Credit Hour: 1-3

LAW 5035: Criminal Law
The purposes of criminal law; nature of criminal responsibility; characteristics of particular crimes.

Credit Hour: 1-4

LAW 5050: Property
Classification of real and personal property; rights to found goods; bailments; possession and adverse possession; estates in land and future interests; concurrent ownership; Landlord and tenant; easements, profits and licenses; conveyants running with land and equitable servitudes; contracts for the sale of land; conveyancing.

LAW 5070: Torts
Principles and practices governing recovery of damages for injuries to person or property. Defamation invasion of privacy dignitary wrongs, products liability, fraud liability insurance, immunities and a survey of various "no fault" proposals.

Credit Hour: 1-5

LAW 5080: Legal Research and Writing
An introduction to the basics of legal research (using print materials), legal citation and legal writing. Each student writes two objective office memoranda, and a client letter.

Credit Hour: 1-2

LAW 5085: Advocacy and Research
An introduction to Computer Assisted Legal Research, written advocacy, oral advocacy, and the Missouri rules of appellate procedure. Each student writes a trial court motion and brief and then argues that motion. Each student also writes an appellate brief and presents an oral argument in the First Year Moot Court Competition directed by the Board of Advocates (BOA).

Credit Hour: 1-3

LAW 5090: Legal Reasoning
A limited enrollment course designed to assist first-year students to better understand the legal system, prepare for examinations and improve their legal analysis and reasoning skills. Graded on S/U basis only.

Credit Hour: 1-2

LAW 5095: Lawyering: Problem Solving and Dispute Resolution
This course is designed to provide students in introduction to critical lawyering skills; to give students an overview of the alternative processes that a lawyer can employ to resolve a client’s problem; and to offer students an understanding of the lawyer’s role as a problem solver. It includes an introduction to Interviewing, Counseling, Negotiation, Mediation, Arbitration, mixed dispute resolution processes and ways to choose or build dispute resolution process.

Credit Hour: 1-2

LAW 5220: Constitutional Law
Study of theories of judicial review and justicibility; sources of federal legislative power, commerce, taxing, spending, treaty, presidential, military powers; power of states to regulate and tax interstate commerce; preemption; state actions doctrine; due process, equal protection, First Amendment rights.

Credit Hour: 1-4
LAW 5240: Criminal Procedure
Constitutional and other limitations placed upon law enforcement officers and prosecutors.
Credit Hour: 1-3

LAW 5260: Evidence
The basic law of evidence; use in trials, relevancy, circumstantial proof and real proof; use of witnesses, methods of examination; presumptions and burden of proof; functions of judge and jury.
Credit Hour: 1-2

LAW 5280: Professional Responsibility
Responsibilities of lawyer to client, courts and the public. Topics include: organization of the legal profession, fees, conflicts of interest, the confidential relationship, advertising and solicitation, unauthorized practice and courtroom behavior.
Credit Hour: 1-3

LAW 5310: Administrative Law
(same as PUB_AF 8864). Administrative Law is concerned with the process government agencies used to make decisions. As such it develops the requirements for establishing rules and policies. It also covers the means by which regulations and statutory provisions are enforced by agencies, and the means for securing judicial review of rules and enforcement actions.
Credit Hour: 1-3

LAW 5311: Adoption, Assisted Reproductive Techniques and Guardianship
This course covers history of adoption, procedure in modern in-state and interstate adoptions, inter country adoption, who may adopt, confidentiality in adoption, post adoption disputes, procedure under the Indian Child Welfare Act and the Interstate Compact for Placement of Children, ARTs (assisted reproductive techniques), guardianship, and payment of money in adoption and collaborative reproduction.
Credit Hour: 1-3

LAW 5313: Collateral Consequences of Sentencing
This class will examine the collateral consequences of sentencing. In three-parts, the course will examine sentencing the consequences associated with sentencing (i.e. deprivations and disabilities that an offender encounters), and the process of restoration and reentry for offenders following their sentences. Given the scope of offenses and sentences, the courses will focus exclusively on felonies and the consequences from such convictions. Part I will provide students with a brief overview of sentencing history and its reform. Part II will focus on the plethora of deprivations and disabilities that offenders encounter upon being sentenced for a felony. And finally, Part III will discuss the various methods and processes for an ex-offender to regain their rights.
Credit Hour: 1-3

LAW 5320: Advanced Legal Research
Skill training in advanced research techniques and resources used in law practice. Designed to help students become critical legal information consumers with emphasis on developing effective, cost-efficient research strategies. Topics include advanced litigation research, legislative and regulatory history, audience research, research in transactional practice areas, and research in other practices areas including legal ethics, public interest law, and international law. In-depth practice with Lexis, Westlaw and free Internet sources, including appropriate and effective use of social networking tools to extend research.
Credit Hour: 1-3

LAW 5321: Advanced Legal Writing
This course is designed to help students to think purposefully about the process of writing and to practice writing and editing in a disciplined way. Students will do exercises involving rhetorical techniques, grammar, punctuation, and word usage. Students also will rewrite of portions of appellate briefs or judicial opinions to emphasize a particular technique, or critique briefs or opinions to do so.
Credit Hour: 1-3

LAW 5322: Advanced Torts: Dignitary and Economic Torts
The Advanced Torts: Dignitary and Economic Torts class will examine dignitary and economic torts covering but not limited to such topics as: defamation, invasion of privacy, tortious interference, misrepresentation and injurious falsehood. Unlike tortious conduct that results in an individual suffering physical harm or contact, the claims that arise from these torts represent one of two kinds of non-physical injury - independent dignitary that are similar to or include emotional harms or independent economic or commercial harms. The purpose of the course is to provide students with an opportunity to explore tortious conduct and remedies available that are omitted typically from the First Year Torts course.
Credit Hour: 1-3

LAW 5325: Advanced Trial Practice
This course will expand student knowledge of opening statements, direct/ cross examination witnesses, jury instruction, closing arguments and will focus significantly on the examination/cross examination of expert witnesses. Grading is based on student participation in examination of witness and semester-ending written trial brief. Prerequisites: Evidence; Trial Practice
Credit Hour: 1-3

LAW 5327: Advertising and Marketing Law
This course will cover the regulation of false and misleading advertising under the Lanham Act, the FTC Act and state consumer protection laws. Students will examine advertising and analyze what claims are being made and whether those claims are false or misleading under applicable law. Students will examine the procedures available for competitors, the government and consumers to challenge false or misleading advertising and the remedies available through those procedures.
Credit Hour: 1-3

LAW 5330: Advocacy, Family Violence and Public Policy
Interdisciplinary presentations examine both the state of family violence in America and the cross disciplinary issues in effective intervention, including legal procedures. The seminar is open to 2nd or 3rd year law students and other professional graduate students with permission of
the faculty. (Not available to students on probation, except for students classified as 3L students).

Credit Hour: 1-2

LAW 5332: Advocacy and Government Agencies
This course will begin with a brief review of the structure of government: what the various programmatic tools (such as different type of regulation and the delivery of services) are, when they are use, how they work, and why. It will look at how to advocate you cause before agencies, such as informal contacts, formal submittals, and the role of scientific and economic information. We will review the increasing use of the web and what it means for interacting with agencies. It will look at how agencies are managed and the reviews inside the government to ensure "quality" decisions. It will look at the ethical requirements on government employees and their effects on advocacy. It will also look at restrictions on the outside, with a brief review of the law of lobbying. A good portion of the class will be practical advocacy before agencies and how to challenge agency actin in court. We will also talk about the role of the President (or governor) and Congress (or the legislature) in achieving your goal before an agency. A general familiarity with Administrative Law is critical.

Credit Hour: 1-3
Prerequisites: LAW 5310

LAW 5335: Agricultural Law
Economic and legal aspects of agricultural problems will be analyzed, along with the implications of alternative proposals. The agricultural issues to be covered include statutory restrictions on farmland ownership.

Credit Hour: 1-3

LAW 5337: American Legal History to 1876
This is a revision of Legal History. The course covers such topics as the impact of the English common law heritage; the development of law in the American colonies; slavery, race and gender in nineteenth century America. The course ends with the conclusion of the Civil War. The course will explore the effects of historical events on the development of law, but the course does not presume prior study of American history.

Credit Hour: 1-3

LAW 5338: American Legal History from 1876
Historical study of the development of American law since the Civil War. The course will cover such topics as the Civil War amendments to the Constitution; Reconstruction and its aftermath; legal change during the rise of industrialism; race and gender in late 19th century and 20th century America; law in the Progressive Era; the growth of civil liberties and civil rights in the Supreme Court; the law during war and the Depression; jurisprudential trends; and the Civil Rights Movement of the 1960s. The course will explore the effects of historical events on the development of law, but the course does not presume prior study of American history.

Credit Hour: 1-3

LAW 5340: Antitrust Law
Introduces antitrust and economic analysis and the role of competition, with emphasis on price fixing, horizontal and vertical restraints of trade, monopoly and merger problems.

Credit Hour: 1-3

LAW 5345: Appellate Advocacy
Enhances skills training for the preservation and presentation of matters on appeal. In addition, an introductory examination of extraordinary remedies (as a complement to appeal) and other unique actions filed in the Supreme Court of Missouri.

Credit Hour: 1-3

LAW 5350: Arbitration
Law, policy and practices relating to arbitration process as it is utilized in commercial and international sectors. Topics include modern arbitration statutes (e.g., the Federal Arbitration Act), enforceability of agreements to arbitrate, public policy defenses against enforcement of arbitration agreements, arbitrators and administering institutions, components of the arbitral process, arbitral remedies and awards, and the arbitration award in the courts.

Credit Hour: 1-3

LAW 5360: Banking Law
This course will review the current banking structure in the United States. The course will focus on the regulatory framework in which banks operate, including types of charters, permitted activities, capital structure and reporting requirements. The course will integrate changes enacted in regulatory reforms mandated by the Dodd-Frank Regulatory Reform Act of 2010, as will as new capital requirements that may be imposed by international agreements (Basel III).

Credit Hour: 1-3

LAW 5365: Bankruptcy
Focuses on rights of both secured and unsecured creditors under state and federal law. State law covers collective actions and such individual actions as execution, attachment, garnishment, and the law of fraudulent conveyances. Federal law concentrates on liquidation proceedings under Chapter 7 of the Bankruptcy Code and reorganizations for wage earners under Chapter 13 of the Code. Includes, as time permits, an introduction to the business reorganization provisions of Chapter 11.

Credit Hour: 1-3

LAW 5370: Basic Business Principles for Lawyers
This course is designed for students who want to understand the language and practices of business regardless of whether they contemplate being a business lawyer or not. All lawyers, regardless of their specialty, regularly encounter the language and concepts of business. The purpose of the class is to provide law students with little or no business knowledge or background with the information they need to practice law effectively in a business environment. This class is intended to educate students to be comfortable with business concepts regardless of their prior background. So liberal arts undergraduates should feel comfortable taking this class.

Credit Hour: 1-3

LAW 5375: Basic Federal Income Taxation
Federal income tax problems of individuals taxpayers; nature of income; when and to whom income is taxable; exclusion from tax base; deduction; tax effects of exchange or other disposition of capital
assets. This course is designed to introduce students to the income tax considerations that arise in a variety of legal contexts and will benefit even those students not planning to pursue a career in tax.

Credit Hour: 1-4

LAW 5380: Bioethics Seminar
An examination of some of the legal and ethical issues presented by modern medical science, such as the redefining of death, the withholding or refusal of life-sustaining medical treatment, reproductive technology (which raises issues such as paternity, custody, safety and access), organ transfer, genetic counseling and the public health issues raised by the AIDS epidemic. (Not available to students on probation, except for students classified as 3L students).

Credit Hour: 1-3

LAW 5385: BOA Competition
This is a late summer moot court competition directed by the Board of Advocates. The competition is open to 2Ls and 3Ls, but only 2Ls can advance to the final rounds. Students receive an assignment in the spring, submit their written appellate briefs at the end of July, and participate in oral arguments at the beginning of fall semester. The top six 2L competitors present their final arguments in Jefferson City before Missouri Supreme Court judges. These finalists are invited to represent the law school during the following academic year as members of our regional teams for the National Moot Court Competition. Regional team members must enroll in Moot Court I and Moot Court II. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: LAW 5085

LAW 5395: Business Organizations
The law school’s foundation course in business law; recommended for students in all areas of interest. Course coverage includes the study of agency, partnership, limited partnerships, limited liability partnerships, limited liability companies, and corporations. This course is a prerequisite for several advanced electives in business law.

Credit Hour: 1-4

LAW 5410: Children and the Law
This course covers the status, rights and obligations of children in contemporary American law; civil proceedings and criminal prosecutions alleging child abuse or neglect; foster care; termination of parental rights; juvenile protective legislation; and delinquency. Emphasis is placed on juvenile justice doctrine, policy and practice issues and the historical and contemporary operation of juvenile and family courts.

Credit Hour: 1-3

LAW 5415: Constitutional and Civil Rights Litigation

Credit Hour: 1-3

LAW 5420: Client Interviewing and Counseling
This course covers the nature and conduct of counseling process including basic interviewing techniques, psychological factors affecting the interview process, facilitating and structuring the interview, clarification of statements and ascertaining legal issues, and dealing with client resistance and hostility. Graded on S/U basis only.

Credit Hour: 1-3

LAW 5425: Clinical Skills
Skills training for students enrolled in the criminal clinic. Lectures and simulations designed to facilitate student skills in case preparation and presentation and client representation: ethical concerns, fact investigation, interviewing and counseling, drafting legal documents, direct and cross exam, making and responding to objections. (Not available to students on probation).

Credit Hour: 1-4

LAW 5430: Commercial Real Estate Leasing
Seminar course that involves the study of selected topics involved in the negotiation, drafting, and Interpretation of commercial real estate leases. These topics will include (among others): rental provisions, defining the premises, use of the premises, condition of the premises, assignments and subleases, maintenance and repairs, casualty, insurance, default/remedies, and collateral lease documentation. The course focuses upon the various parties involved in the process of commercial real estate leasing, their respective interests, and the dynamics of the negotiation and drafting process in which these parties memorialize their respective interests in the lease document. There is heavy focus upon the careful reading, review, negotiation and revision of the lease document. Grading is based upon a series of exercises involving document review, negotiation, and drafting, and includes both individual and group work.

Credit Hour: 1-3

LAW 5435: Comparative Law
This course examines differences and similarities between the major legal systems of the world, focusing on distant areas of substantive and procedural law to demonstrate diverse methods of addressing similar legal issues. The course includes a discussion of the historical distinctions between the common and civil law traditions but also moves the analysis forward to address more recent legal innovations and the recognition of new groupings of legal systems. Students will leave the class with a solid understanding of (1) how U.S. legal principles compare to approaches used elsewhere and (2) the uses and benefits of the comparative approach. Principles taught in this course will be equally applicable to those who anticipate practicing domestic U.S. law as well as those who expect to develop an international practice. No foreign language skills are necessary for this course.

Credit Hour: 1-3

LAW 5440: Complex Litigation
Will examine principles and practical techniques relevant to complex civil cases. Building on civil procedure, the course will focus on litigation involving multiple parties and/or multiple jurisdictions. Each student will be required to complete several drafting assignments. Course may be repeated for credit. Prerequisites: Civil Procedure
LAW 5450: Conflict and Conflict Management
This course is designed to give lawyers a better understanding of the meaning and dynamics of conflict, so that they may better understand their client’s situations, as well as the mechanisms that may be most appropriate to the resolution of any particular dispute. Course draws its theoretical teachings from a variety of disciplines beyond law: psychology, sociology, anthropology and economics.

Credit Hour: 1-3

LAW 5451: Constitutional Faith
Justice Hugo Black famously described his commitment to the Constitution as a constitutional faith. The civil religion of the Constitution may well be the country’s most widely held faith. This seminar explores the many meanings - and the dilemmas - of Americans constitutional faith. We will begin by considering the Constitution’s status as a sacred text, one that performs the same sort of public functions in American life that the Bible performed for western democracies in earlier centuries: binding together the populace and giving citizens a shared sense of meaning. From there we will turn to a series of interlocking questions that the Constitution’s sacred status poses: What, precisely, is the Constitution? Is it the text - or tradition- or something else? Who has authority to interpret the Constitution (whatever it is)? Does it deserve veneration - or is it in fact flawed or inefficient or even immoral? Finally, how should one read the Constitution we have? Students will ultimately be asked to decide whether “constitutional faith” is really worth embracing. We will explore these questions together in a discussion-based format, drawing on readings from the fields of law, political science, and religion. There are no prerequisites for this seminar. Class attendance and participation is mandatory, and will account for 30 percent of the final grade. The remaining 70 percent will be based on a seminar paper, at least twenty pages in length, on a topic of the student’s choosing (with instructor approval). This class will satisfy the writing requirement.

Credit Hour: 1-3

LAW 5452: Constitutional Litigation
This course will focus on federal constitutional adjudication from the viewpoint of the litigator and the law clerk with a view towards (among other things) preparing students for federal and state clerkships. Students will consider specific substantive questions of constitutional law currently pending before the Supreme Court. They will each argue two cases taken from the Supreme Court docket; participate in oral arguments as guest judges; write one petition for certiorari from an Eighth Circuit case; and draft a Supreme Court brief. Students will have an opportunity to argue at the Missouri Supreme Court before sitting Supreme Court Judges.

Credit Hour: 1-3
Prerequisites: LAW 5220

LAW 5454: Contract Drafting
Course teaches students the principles of drafting commercial agreements. Although the course will be of particular interest to students pursuing a corporate or commercial law career, the concepts are applicable to any transactional practice. Students will learn how transactional lawyers translate business deals into contract provisions, as well as techniques for minimizing ambiguity and drafting with clarity. Through a combination of lecture, hands-on drafting exercises and extensive homework assignments, students will learn about different types of contracts, other documents used in commercial transactions, and the drafting problems that contracts and other documents present. Course will also focus on how a drafter can add value to a deal by finding, analyzing and resolving business issues. Grades will be based on the graded assignments, good faith completion of the ungraded assignments, and class participation.

Credit Hour: 1-3

LAW 5455: Copyright Law
Nature of copyright law; common law misappropriate; scope of common law copyrights; Copyright Revision Act of 1976 as amended; formalities of registration (fixation, copyright notice); copyrightable subject matter; originality; exclusive rights of copyright owner; scope of copyright protection; substantial similarity and infringement; fair use; joint and composite works; duration, renewal, termination, transfer; remedies; artists moral rights; federal preemption; international protection; copyrightability of computer software; copyright issues on the internet.

Credit Hour: 1-3

LAW 5456: Contracts in the Courts
In this course, students will analyze filings of pending cases presenting issues of the law of contracts (and, to a lesser extent should the need arise, other doctrine related to voluntary business transactions). We will examine the analyses presented in the briefing. Students will analyze the briefing and provide their independent analyses. These analyses will contribute to a public website collecting commentary on pending cases, designed to be a resource for those interested in pending issues in these subject areas.

Credit Hour: 1-3

LAW 5460: Corporate Finance
Legal principles of corporate finance, including: considerations of capital structure; characteristics of various types of corporate securities; mechanics of securities issuance; principles of contract interpretation applied to securities; application of basic principles of fiduciary obligations in issuers having outstanding multiple classes of securities and in transactions affecting finance; distributions in respect of securities; as time permits, basic principles of valuation for legal purposes. This class is not duplicative of a class in the economics of corporate finance; and prior study of the economics of corporate finance is not a prerequisite.

Credit Hour: 1-3
Prerequisites: LAW 5395 or professor’s consent. Students cannot enroll concurrently in Corporate Finance and Deal Skills. Students who have completed Deal Skills are precluded from enrolling in Corporate Finance. However, students are allowed to enroll in Deal Skills even if they have already taken Corporate Finance.
LAW 5465: Corporate Taxation
This course will provide an in-depth study of the federal income taxation of corporations and their shareholders, including the tax aspects of forming and capitalizing a corporation, corporate distributions, redemptions, and taxable and tax-free corporate liquidations. This course will be taught using the problem methods of instruction.

Credit Hour: 1-3
Prerequisites or Corequisites: Must have taken or be currently enrolled in LAW 5325
Prerequisites: LAW 5375

LAW 5470: Criminal Clinic
The Criminal Clinic is available during both the Fall and Winter semesters. It can only be taken once. Enrollment is limited to 8 students per semester. Students must also enroll in Clinical Skills and Criminal Clinic Writing Project and have completed, or be enrolled in, Professional Responsibility. (Not available to students on probation).

Credit Hour: 1-5
Prerequisites: Students must have prior permission of Professor Johnson to enroll

LAW 5475: Criminal Clinic Writing Project
This is the Writing Section accompanying course LAW 5470.

Credit Hour: 1-2

LAW 5477: Criminal Justice Administration
This course will examine the justice system's processing of formal criminal cases from the point at which a defendant is formally charged forward. In other words, it will be a "procedure" course reviewing the processing and adjudication of criminal cases. Topics might include the defendant's rights under the Sixth Amendment (including jury trial, speedy trial, confrontation clause, and compulsory process rights), Eighth Amendment issues (including bail and cruel and unusual punishment), criminal discovery (including the prosecutor's Brady obligation to provide exculpatory evidence to defendants and notice requirements for alibi and insanity defenses), expert witnesses, pretrial and trial publicity, plea bargaining, sentencing (under discretionary, guidelines, and minimum mandatory systems), criminal appeals, and post-conviction relief (habeas corpus, pardons, and commutations). The course may also review advanced topics in the substantive criminal law, including such issues as fraud, other white collar crimes, conspiracy, and the expanding federal corpus, pardons, and commutations). This course will provide an in-depth study of the federal income taxation of corporations and their shareholders, including the tax aspects of forming and capitalizing a corporation, corporate distributions, redemptions, and taxable and tax-free corporate liquidations. This course will be taught using the problem methods of instruction.

Credit Hour: 1-3
Prerequisites or Corequisites: Must have taken or be currently enrolled in LAW 5325
Prerequisites: LAW 5375

LAW 5485: Cross-Cultural Dispute Resolution
The course will focus on the impact culture can have on the private ordering of disputes. Culture affects communication, perceptions regarding conflict and methods for resolution. As the world becomes more interrelated and Missouri and the U.S. more diverse, lawyers need to be prepared to resolve problems across cultural lines. 20-25% of the grade will come from timely attendance and class participation.

Credit Hour: 1-3

LAW 5486: Deal Skills Class
Introduces students to business and legal issues common to commercial transactions. Class will emphasize the thought process involved in, and required by, the practice of transactional law, skills as interviewing, counseling and communicating with your client, understanding business issues and drafting contract provisions to reflect those issues, negotiation deals and managing a transaction closing. Simulation exercise, in-class role-play and lectures, out-of-class due diligence, negotiation and other exercises.

Credit Hour: 1-3
Prerequisites: Business Organization. Students cannot enroll concurrently in Corporate Finance and Deal Skills. Students who have completed Deal Skills are precluded from enrolling in Corporate Finance. However, students are allowed to enroll in Deal Skills even if they have already taken Corporate Finance

LAW 5497: Death Penalty Law
The primary focus of this course will be on the Supreme Court's capital punishment jurisprudence over the past 35 years, with particular attention to how it has shaped state statutory schemes and legal argumentation in capital sentencing trials.

Credit Hour: 1-3

LAW 5520: Drafting of Legal Instruments
Problems frequently encountered in general office practice (land transfers, mortgages, leases, contracts, wills, business organizations, etc.), with drafting of the related instruments. Use and adaptation of legal forms. Graded on S/U basis only.

Credit Hour: 1-2

LAW 5525: Education Law
This course examines the application of discrete doctrines from criminal law, constitutional law, juvenile law, employment law, and disability law to the legal problems facing American schools. Students will explore the ways in which the objectives of these discrete legal doctrines either promote or interfere with our educational policies. Substantive areas of concentration include state regulation of education; freedom of speech, association and religion; equal educational opportunity; employment of teachers; and discipline of students.

Credit Hour: 1-3

LAW 5526: Education Reform Law
This class will explore the many legal and policy issues raised by efforts to reform American K-12 education. We will look at legislative proposals such as No Child Left Behind, Race to the Top, alternative teacher certification rules, penalties for failure to improve the performance of subgroups, authorization of charter schools and vouchers, expanded
access to state-funded pre-K, fairer funding formulas, and expanding racial and economic integration through school attendance policies.

Credit Hour: 1-3

LAW 5530: Elder Law
This course address legal issues impacting older individuals, including discussion of government benefits (Social Security, Medicaid, Medicare, Supplemental Security Income), long-term care (types, contract issues, civil rights, and financial planning), guardianship and conservatorship, planning for incapacity, and health care decisions at the end of life. The course emphasizes planning techniques for the average client. Grade will be based on a short paper and take-home exam. The course may be taken for writing credit.

Credit Hour: 1-3

LAW 5532: Election Law
Election Law has become more important in recent years. This course will introduce students to the many theoretical and practical constitutional, statutory, common law, and policy issues that accompany the franchise, including: legislative districting, voting rights, campaign finance, political parties, interest groups, direct democracy, and alternative democratic structures. The course will emphasize federal law, but will also address Missouri state law as appropriate.

Credit Hour: 1-3

LAW 5534: Electronic Discovery
This course provides an in-depth treatment of the legal, technical, and cost management issues involving electronically stored information ("ESI") in civil litigation. Covers the 2006 FRCP ESI amendments (Rules 26 meet and confer, 34, production, and 37 sanctions), FRE 502 (privilege review and production), state e-discovery rules, the rapidly developing ESI case law, and emerging best practices from the Sedona Conference Cooperation Proclamation, the Electronic Discovery Reference Model, and other E-discovery authorities. Practice drafting litigation holds, preservation orders, and related e-discovery documents regularly used in civil litigation. Grading is based on student projects and a final examination.

Credit Hour: 1-3

LAW 5537: Emotional Intelligence in Law
Success in law requires more than substantive legal knowledge. It also requires self-awareness, or "emotional intelligence," by the lawyer in order to be able to operate effectively in a complex and nuanced legal environment. This course is designed to help students develop their emotional intelligence by cultivating such personal and social competencies as personal and social awareness, understanding of motivation, empathy and social skills.

Credit Hour: 1-3

LAW 5540: Employment Discrimination
This course examines the laws which prohibit discriminatory practices in employment. Title VII is the primary focus, but coverage is also given to the Equal Pay Act, the Americans with Disabilities Act, and the Age Discrimination in Employment Act. Additionally, the course addresses the administrative process available for dealing with employment discrimination complaints, the prima facie case requirement and burden shifting analysis fused in civil rights cases, and affirmative action requirements.

Credit Hour: 1-3

LAW 5543: Employment Law
Employment Law focuses on the legal relationship between employers and employees in the non-unionized workplace. The course will survey a variety of issues regarding the establishment, maintenance and termination of the employment relationship. For example, the course will cover the common law aspects of that relationship, particularly contracts and torts. It will examine statutory modifications of the common law in areas such as wage and hours, pensions, whistle-blower protection, unemployment insurance, workers compensation, and health and safety.

Credit Hour: 1-3

LAW 5545: Environmental Law
Federal and state regulation of the environment, including the economic and philosophical foundations of environmental regulation, the common law roots of environmental regulation, and substantive coverage of a number of environmental statutes, such as the Clean Air Act, Clean Water Act, Resource Conservation and Recovery Act, Comprehensive Environmental Response, Compensation and Liability Act, National Environmental Policy Act, and Endangered Species Act.

Credit Hour: 1-3

LAW 5555: Estate Planning and Taxation
This is a tax-oriented planning course, including discussion of federal estate and gift tax, income taxation of estates and trusts, and techniques for transferring property of a minimal tax cost both during life and at death. Grade will be based on the preparation of one or more projects.

Credit Hour: 1-4
Prerequisites: LAW 5560 and LAW 5375

LAW 5560: Estates and Trusts
Wills: probate process and will contests, intestate succession; restrictions on testation; execution, revival of wills; integration, incorporation by reference, events of independent significance; will substitutes; will construction; family protection. Trusts: elements and creations; modification and termination; beneficial interests; charitable trusts; trust construction; powers of appointment; trust administration and fiduciary duties.

Credit Hour: 1-4

LAW 5565: European Union Law
Introduction to the law of the European Union. Emphasis will be on the "constitution" of the Union: treaty structure, institutions including the European Court of Justice and its jurisdiction, relationship of EU law and institutions to those of Member States, and the role of the EU in external relations. Substantive topics include the four freedoms (free movement of goods, persons, services and capital among the Member States), competition policy, and harmonization of laws; others may include environmental protection social policy, gender equality and monetary union.

Credit Hour: 1-3
LAW 5572: Fair Housing
The goals of this course are (1) to provide students with a conceptual framework for understanding the different forms that housing discrimination can take and how such discrimination affects our society, and (2) equip students with practical tools for analyzing and litigating fair housing cases. The course will focus primarily on the Federal Fair Housing Act of 1968, and the Fair Housing Amendments Act of 1988. We will examine the Fair Housing Act, its legislative history, early case law, and the development of the basic doctrine. We will progress to the “modern” era of fair housing law, after the Fair Housing Amendments Act added disability and familial status as protected classes. We will explore the ways in which the concept of what constitutes “housing discrimination” has expanded, and how the law has developed accordingly. For example, we will discuss sexual harassment in housing, and the requirements that new multifamily housing be built so that it is accessible to persons with disabilities. In addition, the course will cover more systematic ways in which housing discrimination can manifest itself, such as through municipal land use and zoning decisions, and the mortgage lending practices of financial institutions (including discriminatory refusals to lend, reining, and predatory lending). In addition to these doctrinal issues, the course will cover the private and public enforcement mechanisms of the Act; theories of liability (including disparate treatment, disparate impact, and failure to reasonably accommodate); damages; and issues of proof (including the uses of statistical and testing evidence).
Credit Hour: 1-3

LAW 5575: Family Law
After surveying the variety of family arrangements in contemporary America and central issues concerning the practice of domestic relations law, this course covers marriage; dissolution; distribution of marital property; alimony; child custody; visitation and support; post-dissolution disputes over custody and child-rearing; non-marital families and non-marital children; private agreements in family law; and alternative dispute resolution in collaboration with other professions in client representations, and ethical and policy issues.
Credit Hour: 1-3

LAW 5579: Family Violence Clinic: Individual and Social Justice
Rule 13 certified law students represent needy abused women and children in 13 rural Missouri counties. Students obtain orders of protection in adult abuse courts, and appear in protective custody cases in juvenile courts. Weekly debriefings may include interprofessional graduate students. Law students must complete LAW 5330 before or during their clinical experience.
Credit Hour: 1-4

LAW 5582: Federal Tax Practice and Procedure
This course will focus on the administrative and judicial procedures for resolving federal tax controversies. Covered topics will include: Organization of the Internal Revenue Service; administrative procedures when handling tax examinations and appeals; statutes of limitations; summonses and privileges; the criminal referral and investigation process; Tax Court litigation; tax refund litigation; civil tax penalties; ethical responsibilities for tax practitioners; and federal tax collection procedures.
Credit Hour: 1-3
Prerequisites: LAW 5375 Basic Federal Income Tax preferred but not required

LAW 5584: Fiduciary Administration
This course will cover key issues that arise in the administration of decedent’s estates and trusts, including the necessity for probate, rights of creditors, the fiduciary obligations of trustees and personal representatives, investments, and accountings and distribution. Depending on class size, grading will be based either on an exam, a practice-oriented project, or both.
Credit Hour: 1-3
Prerequisites: LAW 5560

LAW 5588: The Fourteenth Amendment
This course will build on Constitutional Law I by focusing on the constitutional revolution achieved by the Fourteenth Amendment. The course will begin by exploring the passage of the Amendment and its early interpretation, before turning to focus on the development of modern due process and equal protection law. Topics to be covered include incorporation, substantive due process and the right to privacy, race and gender equality, fundamental rights, and state action doctrine. Students will also be introduced to Section 5 questions regarding the scope of Congress ability to enforce the Amendment.
Credit Hour: 1-3
LAW 5590: Freedom of Speech and Association
A study of the rights of speech and association under the First Amendment of the United States Constitution. Major Supreme Court decisions regarding freedom of speech, including content-based and content-neutral restrictions of speech, regulation of commercial speech, regulation of obscenity and pornography, regulation of speech in public and private fora, libel and privacy law, forced association with persons or ideas, and subsidization of speech.
Credit Hour: 1-3

LAW 5591: Food Law and Policy
This course examines the laws that govern food safety and food labeling, and considers how well this network works to protect American consumers. It also considers current issues affecting the global food system. Representative topics include recent food safety problems such as tainted meat and salmonella contamination of eggs; food labeling issues such as the use of the term "grass fed" in meat labeling and the use of GMO seed; organic standards; government efforts to address the obesity problem; urban food deserts; animal welfare concerns; the regulation of pet food, and the like. Specific topics addressed each semester will depend on current events and recent legal developments. Students will be graded on the basis of research paper and class participation. The course will often include a writing section designed to meet the upper-level writing requirement. The course may be offered from time to time as a paper-only course, designed to meet the upper-level writing requirement.
Credit Hour: 1-3

LAW 5592: Firearms Law
This class will examine the historical development and modern context of the regulation of firearms. Although emphasizing domestic law, some international and comparative perspectives will be examined. The class may be taken for writing credit.
Credit Hour: 1-3
Prerequisites: LAW 5220 Constitutional Law

LAW 5595: Gender and the Law
A study of the treatment of gender by the legal system. Topics will include a survey of writings by influential feminist legal scholars, historians and social scientists; a comparison of different theoretical frameworks; and an overview of substantive law and the latest legal developments involving gender. The primary aim of the course is to study various feminist theories to discern how gender is viewed by today's lawmakers and courts.
Credit Hour: 1-3

LAW 5615: Health Care Law: The Doctor-Patient Relationship
An examination of the law governing the interactions between patients and their health care providers (doctors, hospitals and managed care organizations). The course will focus on rules governing the duty to treat, confidentiality, informed consent, medical malpractice liability, institutional vicarious liability, managed care liability, ERISA preemption and medical malpractice reform. As time permits, the class may also cover selected elements of public health law.
Credit Hour: 1-3

LAW 5616: Health Care Organization and Finance Law
This upper-level health law course focuses on the regulation, structure and financing of the U.S. health care system. Regulatory and structural issues include the legal organization of health care institutions, accreditation, medical staff disputes, managed care, fraud and abuse, tax exemption, health care transactions, and antitrust. Access and financing issues include private health insurance and Medicare and Medicaid. The Affordable Care Act and its effect on these various issues will be addressed.
Credit Hour: 1-3

LAW 5620: Immigration Law
A study of the development of U.S. immigration and refugee law and policy, with emphasis on current immigration problems and issues. Recent changes in the immigration laws, and future trends in dealing with increasing immigrant pressure.
Credit Hour: 2-3

LAW 5630: Individual Employment Rights
This course explores the legal environment in which non-unionized employees and their employers operate.
Credit Hour: 1-3

LAW 5632: Innocence Project Clinic
This is a joint clinic among the MU and UMKC law schools, the MU School of Journalism and a non-profit group and is called The Midwestern Innocence Project. Law students will work under the supervision of the Clinic Director, a practicing lawyer, on cases of possible actual innocence from six states.
Credit Hour: 1-4
Prerequisites: Wrongful Convictions. Graded on S/U basis only

LAW 5635: Insurance Law
A basic course in the fundamentals of insurance law. Topics covered include defining insurance; risk and the nature of the insurance relationship; insurable interest; indemnity; forlorn; subrogation; coordination of benefits; interpretation; rights a variance with policy provisions; contract formation; warranties, misrepresentation and concealment; condition; agents and brokers; introduction to regulation; introduction to insurance coverage.
Credit Hour: 1-3

LAW 5640: Intellectual Property
This course is an introduction to the four broad areas of intellectual property. Students will learn about intellectual property, contract, and tort knowledge gained from the first year curriculum. The course will cover trademarks, trade secrets, patent law, and copyright law. Thus, the course will cover how one obtains the special property rights called the copyright, patent, trademark contract. Further, the course will cover how these intellectual property property rights are protected from the tortious act of infringement, as well as any defense to infringement it is important to note that this introductory class cannot be used to satisfy any of the requirements for the Intellectual Property certificate; nor is this introductory course substitute for the more in-depth coverage offered by Patent Law and Policy, Copyright Law or Trademark Law. Rather, it is...
### LAW 5641: Intellectual Property Licensing

Controversies about the laws surrounding management, use, and licensing of intellectual property frequently dominate the headlines. This course focuses on the realm of intellectual property licensing. Through theoretical discussions and practical exercises, we will examine the many facets of the licensing process, from determination of ownership to decisions on enforcement.

**Credit Hour:** 1-3

### LAW 5652: International Commercial Arbitration

This course offers a study of arbitration as a dispute resolution process for international trade and business disputes. The course reviews ad hoc and institutional arbitration, the authority of arbitral panels, enforcement of agreement to arbitrate, challenging arbitrators, procedure and choice of law in arbitral proceedings, the enforcement of international arbitral awards. Special attention will be given to the international convention on the recognition and enforcement of international arbitral agreements and awards (New York Convention) and the UNCITRAL (U.N. Commission of International Trade Law) arbitral rules and model law. The course focuses on commercial arbitration as an international practice and not on arbitration under any particular national system. Students will participate in a hypothetical arbitration matter, beginning from the development of the claim to preliminary proceedings, the arbitration hearing, and ending with the arbitrators’ award.

**Credit Hour:** 2-3

### LAW 5660: International Human Rights

The purpose of this course is not enable students to develop a basic understanding of the concept of international human rights law and the role played by international and regional organizations, states and private actors in defining and enforcing human rights. Beginning with the historical origins of human rights, the course will examine the international regional human rights instruments and institutions that form the sources of human rights law (the UN system, including the Charter and treaties, European, African and Inter-American human rights regimes). It will also examine the role of non-governmental organization, the International Criminal Court and International humanitarian law (the law of war), and the interaction between US civil rights law and International human right. Throughout the course, students will be introduced to important critical themes of human rights, including: the distinctions between public and private acts, evolving theories of statehood, sovereignty immunity, cultural relativism, and the western tradition of individual rights, and the relationship between rights and duties. Issues examined will include: political participation and democratization, religious freedom, the use of torture, corporate liability, woman’s rights, the right and status of refugees, genocide and war crimes.

**Credit Hour:** 1-3

### LAW 5665: International Law

Introduction to the international legal system, with emphasis on relations between nation-states or international entities. Topics include statehood and recognition, legislative and judicial jurisdiction, human rights and the status of the individual, treaties and international organizations.

**Credit Hour:** 1-3

### LAW 5670: International Moot Court I

The structure and jurisdiction of the International Court of Justice and the techniques and resources for research in international law. Purpose of the course is to prepare students for the Jessup International Moot Court Competition. Students are not precluded from taking International Law by taking this course. Graded on S/U basis only.

**Credit Hour:** 1

### LAW 5675: International Taxation

This course examines the federal income tax treatment of international transactions. It will focus on the principles and policies underlying the United States tax system as it relates to income earned by U.S. citizens and residents doing business and investing outside the country, as well as income derived from foreign persons doing business and investing in the United States. Topics include jurisdiction issues, source of income rules, effectively connected income, FDAP income, the foreign tax credit, the role of tax treaties in international tax, and an introduction to suparth F and other anti-deferral mechanisms.

**Credit Hour:** 1-3

### LAW 5677: Internet Law and Practice

This course will focus on preparing to advise business client dealing with electronic commerce an internet law issues. There is no technological background requirement or prerequisite to take the class. We will explore a variety of themes including the control over the internet by both government and private actors; how online activities differ from their off-line counterparts; and how the laws should react to new forms of interaction and social structures found online. Specific doctrinal topics include problems of digital authorship and publication including rights of anonymity, copyrights, trademarks, defamation and other torts; sales and licensing of products; marketing, advertising and data-mining, including privacy issues; jurisdiction over online actors; and cyber-squatting. Grades will be based on the final exam and an optional short paper.

**Credit Hour:** 1-3

### LAW 5680: Journal of Dispute Resolution

Credit for work as prescribed by the faculty for members of the Journal of Dispute Resolution. Graded on S/U basis only.

**Credit Hour:** 1-3

### LAW 5690: Jurisprudence

The major part of the course will cover classic jurisprudential questions about the nature of law - what law is and related questions regarding judicial decision-making: Under what conditions is a rule a law within a legal system? Are there moral principles that are part of the law even though a legislature has not enacted them? How do judges actually interpret statues and constitutional clauses? How should they interpret them and are there definitive right answers to disputes about what the law is? Is it possible to refrain from "legislating from the bent." or does
judicial decision-making necessarily involve making new law based on moral and political judgments? In the second part of the course, we will begin thinking about the proper function or aim of some core areas of substantive law. For example, questions might include: Does the criminal law aim to exact retributive justice, to achieve deterrence, or both? Is it legitimate for the legislature to use law to enforce morality of the community’s moral belief? Does tort law aim to achieve corrective justice? Does corrective justices require reparations to groups for long past injuries? Reading will include Hart, Fuller, Dworkin, Raz, Ely, Holmes, Scalia, Feinberg, and others.

Credit Hour: 1-3

LAW 5691: Jury Instructions
Theoretical and practical aspects of jury instructions (including general and special verdicts) at trial are presented from the perspectives of the judge, counsel, the jury, and the court of appeals. The course will involve the students in researching and drafting instructions, using pattern instructions, observing or participating in a simulated jury instruction conference, and writing an appellate court opinion that describes what the student has learned during the course.

Credit Hour: 1-3

LAW 5695: Labor Law
The regulation of relations between employers and labor unions at common law and under federal and state legislation; primary emphasis on the National Labor Relations Act, as amended.

Credit Hour: 1-3

LAW 5697: Landlord Tenant Law and Practice
This course primarily focuses on litigation under the Missouri Landlord Tenant statute and under federal administrative regulations governing public entities which provide housing and housing subsidies to low-income people including the processes for litigating against such entities. The course will address proper pleading, relevant evidentiary issues, and requisite settlement skills/strategies. This course is available to all 2L’s and 3L’s and requires Rule 13 certification. The course is required for all students enrolled in the Landlord/Tenant Practicum.

Credit Hour: 1-3

LAW 5698: Landlord/Tenant Practicum
The Landlord-Tenant Practicum serves indigent individuals in Mid Missouri. A Mid Missouri Legal Services Corporation staff attorney supervises Rule 13 certified law students representing tenants including but not limited to those who are being evicted and/or who wish to sue their landlords for habitability or security deposit non-return. Students may also represent tenants who reside in public or subsidized housing in administrative actions brought by or against a Housing Authority. The practicum is graded and enrollment is limited. Credits earned in the Landlord/Tenant Practicum count toward that 6 hour Externship limit. Graded S/U only.

Credit Hour: 1-3

Prerequisites or Corequisites: Landlord/Tenant Law and Practice

LAW 5700: Land Use Controls
This course focuses on laws governing the use and development of land. The course examines legal rules and policy considerations related to zoning, subdivision controls, building codes, historic preservation, aesthetic regulation, growth management, eminent domain, nuisance law, regional land use conflicts, development exactions, and environmental land use restrictions.

Credit Hour: 1-3

LAW 5720: Law and Literature
Examination of the relationship between law and literature, falling into two main areas: law-in-literature (law, legal institutions and lawyers as depicted in literary works) and law-as-literature (legal documents as literary texts subject to literary techniques of textual analysis and criticism), with emphasis on the former. Readings will include literary and legal texts.

Credit Hour: 1-3

LAW 5721: Law Practice Management and Technology
Managing a successful law practice requires time and project management skills, as well as knowledge about the business of practicing law. This course explores the practical and ethical challenges that confront the solo or small firm lawyer. Students will be introduced to a range of resources for the solo and small firm lawyer, and gain practical experience in preparing a business plan, client welcome package, and policies and procedure manual. Material presented in relevant to both the litigation and the transactional lawyer.

Credit Hour: 1-3

Prerequisites: Professional Responsibility

LAW 5723: The Law and Practice of Criminal Sentencing
This simulation-based course examines the substantive law and practical operation of state and federal criminal sentencing systems and seeks to provide students with entry-level competence as advocates in the sentencing phase of criminal cases. Students will participate in a series of simulated sentencing proceedings in state and federal court, acting as counsel for the government or the defendant, or as the sentencing judge. Criminal Procedure and Criminal Justice Administration are recommended, but not required.

Credit Hour: 1-4

LAW 5725: Law and Social Sciences
The course takes a social science approach to our understanding of the law, legal developments and legal institutions. Among the topics to be discussed are: historical, theoretical, and political science study of the law, courts, and the judicial process; the policy-making role and impact of the courts; the dynamics and determinants of judicial decision-making; and historical accounts of the development of private law.

Credit Hour: 1-3

LAW 5726: Law and Society
Law is a common and yet distinct element of daily life in modern societies, and not only shapes society but is also shaped by society. The creation, interpretation, and enforcement of laws occur in the context of historical changes, societal norms, and the subjective concerns and whims of those charged with its creation. Utilizing an interdisciplinary perspective, the course will explore the nature of law as a set of social systems, central actors in the system, legal reasoning, and the relationship of the legal form and reasoning to social change. By the
end of the course, students should be able to evaluate the law and legal institutions, especially in relation to equality, justice, and fairness, and understand how law is involved in the processes of social control, social conflict, and social change.

Credit Hour: 1-3

LAW 5727: The Law of Tax Exempt Organizations
This course will briefly address theories and rationale for exempt organizations and examine in some depth the Internal Revenue Services' tests for tax-exemption and the major types of 501(c)(3) organizations and related contribution deductions, as well as a collection of other 501(c) associations. Attention will be paid to state law regarding formation and operation of Missouri Nonprofit corporations and the IRS application process for recognition of tax-exemption in addition to nonprofit corporate governance matters. Focus will be on Internal Revenue Code provisions, Treasury Regulations, IRS interpretive rulings and case law.

Credit Hour: 1-3
Prerequisites: Basic Federal Income Taxation; Business Organizations helpful

LAW 5728: The Law of War
According to Colonel Wang Ziangsui of the Chinese People's Liberation Army, developing countries should recognize that "the first rule of unrestricted warfare is that there are no rules, with nothing forbidden." Is this true, or can there be Jus in Bello (Justice in War)? In the first phase of this course, we will examine the philosophy of regulating the law of war, the history of attempts to regulate warfare, and the United States' current posture on the law of war. In the second phase, we will examine laws governing the use of force during conflict (military necessity, proportionality, unnecessary suffering, and the targeting of civilians). We will conclude with a study of the laws governing post-submission opponents (the Geneva Conventions) and issues such as detention, lawful ruses, and unlawful perfidy.

Credit Hour: 1-3

LAW 5730: Law Review
Credit for work as prescribed by the faculty for members of the Missouri Law Review. Graded on S/U basis only.

Credit Hour: 1-3

LAW 5745: Legislation
Study of how statues are drafted, adopted, and interpreted. The principal focus of the course is on the interpretation of statues by courts.

Credit Hour: 1-3

LAW 5746: Legislative Practicum
This course provides students with the opportunity to work with individual lawyer legislators, or lawyer staff, at the Missouri General Assembly. The students will assist members of the General Assembly by drafting legislation, preparing materials for hearing, conducting research and analysis to respond to broad public policy issues as well as constituent concerns. On occasion students may be assigned to legislative committees, legislative staff support services, or to groups lobbying for legislation. Students will be expected to meet periodically with the professor and to maintain a journal of their activities. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: Professional Responsibility

LAW 5748: Life Skills for Lawyers
Readings and discussions will focus on how members of the class want to live their lives as a lawyer. Students will be asked to examine their law school experience and visualize their place in the legal profession. Various problems faced by lawyers (e.g. the pressure to produce billable hours and dealing with clients) will be discussed. Some of the positive aspects of being a lawyer will be identified. The emphasis will be on what the problems and opportunities mean to you personally and the importance of taking responsibility for your own personal and professional life. (not available to students on probation, except for students classified as 3L students).

Credit Hour: 1-3

LAW 5750: Local Government Law
(same as PUB_AF 8866). Structure and powers of local government units; state-local relations, including "home rule"; local government finance, including taxation and indebtedness; incorporation and annexation; eminent domain; tort liability; land use controls; labor relations.

Credit Hour: 1-3

LAW 5760: Media Law
This course focuses on practical aspects of representing parties in media law cases and in access cases. Topics to be discussed include: access to records and meetings, computerized government databases, damage control in libel, invasion of privacy, negligence and outrage and aiding and abetting, taking pictures and recording phone conversations, search warrants vs. privacy protection; FCC and FTC rules, copyrights and Internet issues, gag orders and access to court proceedings.

Credit Hour: 1-3

LAW 5765: Mediation
A study of the process in which a neutral third party assists others in resolving a dispute or planning a transaction. The course addresses the mediation movement as regards public policy, politics, professional responsibility, malpractice, and negotiation. Students develop mediation and negotiation skills through readings, demonstrations, experimental exercises, and preparation of a case study.

Credit Hour: 1-3

LAW 5770: Mediation Clinic
(same as LAW 6970). Students develop and refine mediation skills by observing and participating in simulated and real mediation cases.

Credit Hour: 1-2
Prerequisites: LAW 5765 (or concurrent enrollment), or completion of an approved training. Limited to J.D. or LL.M. students in Designated semesters. Graded on S/U basis only

LAW 5772: Medical Malpractice Reform
The course will cover the policy debate surrounding medical malpractice adjudication, including a brief review of malpractice law, a serious examination of the evidence of malpractice law’s strengths and
weaknesses, and an evaluation of the major legislative reform proposals (past and present).

Credit Hour: 1-2

LAW 5775: Journal of Environmental and Sustainability Law (JESL)
Credit for work as prescribed by the faculty for members of the Missouri Environmental Law and Policy Review. Graded on S/U basis only.

Credit Hour: 1-3

LAW 5780: Mental Disability and the Law
Forensic psychiatry and forensic psychology are burgeoning fields. The news media frequently reports sordid details of heinous crimes that the general public believe could only have been perpetrated by a madman and simultaneously, calls are made to bring these individuals to justice. Social sentiments, and thus public policy initiatives, are becoming increasingly conservative and restrictive in the management of individuals who have a mental disorders and have become entangled in the criminal justice system. This course will explore the impact and interaction of mental disability and the law with a special focus on issues related to the criminal context. Topics will include: mental disorders: comparison and contrasts between clinical and legal definitions; functional implications of mental disorders; legal and clinical issues in the process of criminal forensic evaluations; competence to stand trial; insanity and related defenses; disposition of insanity acquittees; clinical predictions of dangerousness and sexually dangerous persons; competence to be executed; involuntary hospitalization; involuntary treatment; right to treatment; right to refuse treatment; Americans with Disabilities Act; confidentially; rights of criminally committed persons; sexual predator legislation; and therapeutic jurisprudence.

Credit Hour: 1-2

LAW 5793: Missouri Administrative Law
The Missouri Administrative Law class will examine the philosophical underpinning for the creation of the Administrative Hearing Commission (AHC) and the practical realities of prosecuting and defending cases in the venue as a primer for practicing administrative law in Missouri. The course covers such topics as: the history of the AHC, statutory policy considerations, state administrative rule making process and implications, evidence, burden of proof, particular aspects of professional licensing, Department of Natural Resources permitting issues, personnel and discrimination claims, tax cases, judicial review, and attorney fees. The purpose of the course is to provide students with an opportunity to explore the rich variances in Missouri administrative law and to be knowledgeable and confident when faced with an issue in a state administrative venue.

Credit Hour: 1-3

LAW 5795: Modern Payment System
A study of the mechanisms by which credit is extended and payment is made in our society, including coverage of negotiable and quasi-negotiable instruments, letters of credit, bank card systems, and electronic funds transfer systems.

Credit Hour: 1-3

LAW 5800: Moot Court I
Required only for those students participating in the National Moot Court or ABA Moot Court Competitions. Graded on S/U basis only.

Credit Hour: 1-3

LAW 5805: Moot Court II
Required only for those students participating in the National Moot Court or ABA Moot Court Competitions. Graded on S/U basis only.

Credit Hour: 1-2

LAW 5808: Natural Resources Law
This course is a foundational survey course in the law and policy related to management of natural resources. Resources covered may include public lands, waters, submerged lands and wetlands, forests, minerals and energy, wildlife and biodiversity and ecosystems. Topics also may include organic statutes establishing certain resource management standards and procedures, generally applicable statutes governing agency behavior, judicial review of agency decisions, integrated management of multiple resources, the use of ecosystem management and conservation methods, and takings.

Credit Hour: 1-3

LAW 5810: Negotiation
Negotiation is an essential skill for most lawyers, regardless of practice area. Lawyers must negotiate with their counterparts, clients, partners, staff, courts, and many others in the course of representing a client. This course provides an in-depth understanding of the different models of negotiation, and practical skill development for meeting the many challenges that negotiation presents.

Credit Hour: 1-3

LAW 5815: Partnership Taxation
This course will study the federal income tax treatment of partnerships and other entities treated as partnerships, including limited liability companies. The course will examine partnership formations, contributions to and distributions from partnerships, partnership operations, including special allocations of income and losses among partners, transfers of partnership interests, and partnership dissolutions. This course will be taught using the problem method of instruction.

Credit Hour: 1-3

Prerequisites: Basic Federal Income Taxation

LAW 5820: Patent Law and Policy
This course will provide comprehensive coverage of the U.S. Patent Laws for those interested in obtaining general information about patents, as well as for those interested in practicing before the Patent and Trademark Office. The course will trace an invention through the application, examination, reconsideration, re-examination and litigation processes. If time permits, there may also be coverage of international treaties that affect U.S. Patent Laws as well as some comparison of U.S. Patent Laws and the Patent Laws of select countries. There are no course prerequisites and a technical background is not required because the course primarily focuses on the Patent Act, its requirements and its jurisprudence. Thus, students need only be familiar with applying statutes and cases to a fact pattern. In lieu of an examination or a paper, up to six written projects, between 3-10 pages each (approx. 40 pages overall), will
be due at the semester, giving students an intensive writing experience. The professor will review drafts of some of these projects during the semester and all of the projects will be discussed in class. These projects will allow students to help solve a client's hypothetical patent problem as we work through the Patent Act and its jurisprudence. Students may also have the opportunity to engage in client interviewing and counseling in order to complete the projects. There are no prerequisites and a technical background is not required.

Credit Hour: 1-3

LAW 5830: Pretrial Litigation
Focus on the study of the legal principles, techniques, strategies and skills which pertain to civil pretrial practice, including: Professional and Ethical Considerations, Case Selection Case Investigation, Development of a case theory, Pleading, Discovery, Pretrial Conference, Motion Practice, Settlement Processes and Alternative Dispute Resolution.

Credit Hour: 1-3

LAW 5835: Products Liability
A study of civil liability for personal injury, property damage, and economic loss caused by defective products. The study includes actions for negligence, strict liability, misrepresentation and the effect of state and federal legislation on those actions.

Credit Hour: 1-3

LAW 5840: Public Policy Dispute Resolution
Public Policy disputes*, such as those that occur in the energy, environmental, education, and health industries, are complex and challenging to manage. This course will explore the intersections of the executive, legislative, and judicial branches of both state and federal government and legal strategies for shaping public policy, whether through litigation, legislation, regulation, alternative dispute resolution or a combination of processes. We will look at two case studies and at least one current issue.

Credit Hour: 1-3

LAW 5845: Publicly Held Corporation
This course focuses on legal issues most relevant to large public corporations. Recommended for students interested in pursuing a career in corporate law or for students desiring study in corporate law beyond the Business Organizations course.

Credit Hours: 3

LAW 5855: Real Estate Transactions and Finance
Real estate mortgages and financing substitutes--theory and practice; receivers; redemption; foreclosure; priorities; the Missouri Deed of Trust; subdivision development; leasehold mortgages; shopping centers; government intervention in the mortgage market.

Credit Hours: 4

LAW 5856: Real Estate Finance
This course examines legal and transactional issues relating to the financing of real estate. The course covers mortgage documentation; the use of mortgagee prior to foreclosure; transfers of mortgaged property; transfers of mortgages and securitization; payment and discharge of mortgages; default and impact of bankruptcy on real estate transactions. The grade will be based upon a final examination.

Credit Hour: 1-3

LAW 5857: Real Estate Finance Skills Project
Students will participate in a weekly seminar class focused on the review, negotiation and drafting of mortgages, deeds of trust, assignments of rents and leases, and other collateral loan documentation (including commercial leases). The grade for the course will be based upon student performance on drafting and practice skills assignments. Projects may include the review, negotiation and drafting of a mortgage, deed of trust, or installment land contract; the review of a loan policy of title insurance; review and evaluation of commercial leases. Student projects will include both individual and group work.

Credit Hour: 1-3

Corequisites: Concurrent registration in Real Estate Finance is required

LAW 5858: Real Estate Transactions
This course examines issues relating to the transfer of real estate and the practice of transactional real estate law. The course covers conveyance documentation, the recording system, title and survey review, title insurance, purchase and sale transactions, basis entity structure and tax considerations, environmental review, commercial leasing, valuation of real estate, and project cash flow. The grade will be based on a final examination.

Credit Hour: 1-3

LAW 5859: Real Estate Transaction Skills Project
Students will participate in a weekly seminar class focused on contract drafting, negotiation, due diligence, and client management in the contest of a transactional real estate practice. The grade for the course will be based upon student performance on drafting and practice skills assignments. Projects may include the negotiation and drafting of a purchase contract; the negotiation and modification of a commitment for title insurance; survey review; review and evaluation of lease; lease drafting and negotiation. Student projects will include both individual and group work.

Credit Hour: 1

Corequisites: Concurrent registration in Real Estate Transaction is required

LAW 5861: Regulation of Drugs and Medical Devices
This course examines the U.S. Food and Drug Administration (FDA) interpretation and implementation of the federal Food, Drug, and Cosmetic Act (FDCA) and the Public Health Service Act (PHSA). FDA regulates food, drugs, animal drugs and feed, cosmetics, medical devices, tobacco products, and biological products (broadly speaking "food and drugs"). The course considers not only the substantive regulations and policies applicable to food and drugs, but also issues of administrative law (agency practice and procedure, as well as judicial review), enforcement authority (powers and priorities), the agency's place within our federal system, and the place of food and drug law in the larger legal environment. The scope of the class will vary from semester to semester, usually covering at least drugs and devices.

Credit Hour: 1-3
LAW 5865: Religious Liberty and Church-State Relations
A study of the protection of religious liberty and the structuring of church-state relations under the U.S. Constitution and selected federal statutes. Examination of how religious freedom developed and analysis of Supreme Court cases decided under the establishment, free exercise, and free speech clauses of the First Amendment.
Credit Hour: 1-3

LAW 5870: Remedies
Survey of damages, history of equity; coverage of various equitable remedies and their adequacy, practicability, defenses, procedural problems, enforcement of decrees, merger of law and equity, contempt.
Credit Hour: 1-3

LAW 5875: Research in Law
Independent Research with a faculty member is available during the Summer, Fall and Spring Semesters. Any student enrolling for Research credit must designate at the time of enrollment the professor who will supervise the research project. Credit is earned at the rate of 20 pages per credit hour. No more than three hours of Research may be taken or counted toward the law degree. Enrollment in LAW 5875 may, but need not, be structured so as to satisfy the upper-level writing requirement. Enrollment in LAW 5875 Research satisfies the Law School's writing requirement only if the project culminates in an individually authored paper of at least 20 pages, based on independent research, through a process that involves an initial draft, critique by the supervising faculty members, and rewrite.
Credit Hour: 1-3

LAW 5880: Sales and Leases of Goods
The law governing the sale and leasing of goods, primarily focusing on Articles 2 and 2A of the Uniform Commercial Code and related federal warranty legislation.
Credit Hour: 1-3

LAW 5885: Secured Transactions
The course focuses on the rights of secured creditors and debtors under Article 9 of the Uniform Commercial Code, and includes coverage of creditors with special rights (such as taxing authorities and artisans), documentary exchanges under Article 7, and bulk sales under Article 6.
Credit Hour: 1-3

LAW 5890: Securities Regulation
Financing of business through the sale of securities. Emphasis on federal securities acts, with some consideration of state statutes. Consideration of the registration process, exemptions from registration, the special antifraud rules, liabilities and criminal penalties; reporting, insider trading, and proxy solicitation problems.
Credit Hour: 1-3

LAW 5895: Selected Seminar Topics
Seminars are offered on communication law, (graded S/U), criminal law, criminal justice administration, environmental law, law and medicine, law and the aged, taxation, legal history, urban problems and other selected topics. Some sections of may be graded on S/U basis only.

LAW 5905: Sports Law
Substantive areas of concentration include sports litigation, labor law, NCAA regulations, legal relationships in professional sports, anti-trust aspects of sports activities, and collective bargaining.
Credit Hour: 1-3

LAW 5910: State Constitutional Law
Since the departure of Chief Justice Warren, the U.S. Supreme Court and other federal courts have taken a less expansive view of the rights granted by the U.S. Constitution. Congress has also taken steps to turn over both funds and authority to states. Both developments have increased the importance of state constitutional law. The course would be taught in three parts: (1) History of state constitutions; their relationship to the U.S. Constitution and the major differences among them; (2) Individual rights; instances in which state constitutional provisions that are facially similar or identical to the Bill of Rights in the U.S. Constitution, have been interpreted by state courts to extend beyond the federal rights, and instances where state constitutions guarantee individual rights that are different from or in addition to those in the U.S. Constitution; and (3) Governmental obligations and authority; Constitutional provisions allocating governmental authority, such as limitations on legislative authority, the authority of the people to act through referendum or initiative and the relative authority of independent constitutional and officers.
Credit Hour: 1-2

LAW 5913: State Securities Law and Regulation
This course is concerned with securities law and regulation for the Missouri attorney. With an emphasis on state "blue sky" law, topics covered will include securities regulations, registrations, exemptions, and regulatory enforcement actions. Topics will also include investment professional registration and compliance; broker-dealer and investment adviser regulation and compliance; an overview of causes of action in FINRA arbitrations; and an introduction to hedge funds.
Credit Hour: 1-3

LAW 5914: Tax Planning
This course will examine the application of corporate and partnership tax planning principles to accomplish common business objectives. Students will interview hypothetical clients, prepare written planning documents, present their tax plans to the class, and analyze associated substantive tax and business issues in a seminar format. The grade in this course will be based on written planning documents, a class presentation, and class participation. There will be no final exam.
Credit Hour: 1-3
Prerequisites: LAW 5375 Basic Federal Income Taxation, LAW 5395 Business Organizations (concurent enrollment will be allowed)
Recommended: Students are strongly encouraged to have taken or be concurrently enrolled in LAW 5465 Corporate Taxation or LAW 5815 Partnership Taxation

LAW 5915: Tax Research
This course provides students with an in-depth exploration of methods and sources for researching tax issues. The course provides students an
opportunity to gain experience in using tax research tools. While primarily applicable to tax research, the knowledge gained by students will be helpful in future practice, regardless of practice area. Grades will be based on written assignments to be completed throughout the semester and one final project.

**Credit Hour:** 1-2

**LAW 5916: Taxation Property Transactions**
This course will examine tax laws and policies fundamental to real estate investment. Topics include depreciation and recapture, cash and accrual methods of accounting, installment sales, non-recognition transactions, including like-kind exchanges and involuntary conversions, and discharge of indebtedness issues arising out of real estate transactions. This course is designed to provide a detailed analysis of complex tax provisions necessary for advanced tax planning and will be taught using the problem method of instruction.

**Credit Hour:** 1-3

**Prerequisites:** Basic Income Taxation

**LAW 5917: Topics in Law**
Various topics in law are explored in depth. Topics change each semester.

**Credit Hour:** 1-5

**LAW 5918: Tax Policy**
This seminar examines issues of federal tax policy and theory made critically important by the budget deficit and projected shortfalls. We will discuss the major features of the U.S. tax system, identify significant problems, and analyze current reform proposals. Topics will include income distribution, tax treatment of the family, corporate tax reform, capital gains taxation, the alternative minimum tax, the estate tax, taxation of health benefits, consumption or value-added taxes, and tax expenditures.

**Credit Hour:** 1-3

**LAW 5919: Title Insurance Practice**
This course will examine the application of corporate and partnership tax planning principles to accomplish common business objectives. Students will interview hypothetical clients, prepare written planning documents, present their tax plans to the class, and analyze associated substantive tax and business issues in a seminar format. The grade in this course will be based on written planning documents, a class presentation, and class participation. There will be no final exam. Title Insurance is integral to the real estate market in the United States. Students will be exposed to the development and need for title insurance. They will learn what is necessary to become a title insurance producer and how to run a practice that incorporates both title insurance issuance and how to work within an agency and an underwriter.

**Credit Hour:** 1-3

**LAW 5920: Trademark Law**
Nature of trademark law; common law and statutory trademarks and trade-names; Lanham Act of 1946; distinctiveness; types of marks; qualification of marks for registration (use in commerce, intent-to-use certification, secondary meaning, abandonment); registration procedures; exclusive rights of trademark owner; scope of protection; concurrent use; infringement (including “gray market” use); international protection; remedies; state trademark acts; related common law doctrines; trademark usage on the Internet; domain name issues.

**Credit Hour:** 1-3

**LAW 5925: Trial Practice**
Techniques of pleading, discovery, jury selection, opening statements, direct/cross examination of witnesses, preparing jury instructions, closing arguments. Each student participates in classroom problems selected from various phases of litigation, and in one complete trial. Some sections of this course may be offered as a graded section or graded on S/U basis only.

**Credit Hour:** 1-4

**LAW 5927: Veterans Clinic**
In this clinical program, students will help veterans in need and/or their dependents secure disability related benefits after an initial denial from the Regional VA office. This work will be done at the board of Veterans’ Appeals level or before the Court of Appeals for Veterans’ Claims, both located in Washington D.C. The BVA and CAVC are federal tribunals, specially created to handle veterans’ claims. Students will have the opportunity to work with the client, in a law firm type atmosphere, and prepare and argue appeals relating to benefits denials.

**Credit Hour:** 1-4

**Prerequisites or Corequisites:** Professional Responsibility

**LAW 5930: Voir Dire**
This course is designed to provide the students with hands-on experience in selecting a jury. Students will act as lawyers, jurors and one student presiding as judge in the concluding 2-1/2 hour courtroom simulation where a jury is selected after making challenges for cause and end exercising preemptory strikes. An actual case involving a badly injured young plaintiff and a large corporate defendant--where liability is questionable--will be the basis for this exercise. The course will outline the purpose of voir dire and the law pertaining to jury selection. Students will learn active listening skills and how to interpret non-verbal behavior. Examples from prominent, practicing lawyers will be presented. The ultimate purpose of the course is to bring recognition that jury selection is an art—not a science-- and should be tailored to the facts of the case and the witnesses the attorney expects to present. Graded on S/U basis only.

**Credit Hour:** 1-2

**LAW 5940: White Collar Crime**
Study of what are generally considered to be business or organizational crimes. General topics to be explored may include: mail and wire fraud, conspiracy, securities fraud, tax fraud, government contracting fraud (with particular emphasis on the False Claims Act), the Hobbs Act and the Racketeer Influenced and Corrupt Organizations Acts.

**Credit Hour:** 1-3

**LAW 5946: Wrongful Convictions**
This course offers students an insider’s look into the operation of the criminal justice system. It should be of particular interest to any student interested in working in a prosecutor’s office, public defender’s office or for a firm doing defense work. It is a prerequisite for any student wishing to enroll in the Innocence Project clinic. The course is designed to help
students gain insight into features of the criminal justice system that have a tendency to produce wrongful convictions. In addition to examining the causes of wrongful convictions, the course will consider systemic reforms that might minimize convicts the innocent. Finally, the course will also focus on recurring ethical issues that confront prosecutors and criminal defense lawyers.

Credit Hour: 1-4

LAW 5947: Workers’ Compensation Law and Practice
This course will cover the law and practice of Workers’ Compensation Law both in general and in Missouri. About two-thirds of the class time will be spent studying and discussing the doctrinal basis of workers’ compensation. In the balance of the time students will work on a simulation in which they will have the opportunity to work through difference steps of a workers’ compensation claim.

Credit Hour: 1-3

LAW 6500: London Program
Students enrolled in classes in London. Credit will count toward graduation requirements. Zero billing hours.

Credit Hour: 1-16

LAW 6516: Art and the Law - London Program
The goal of this course is to integrate three fields of knowledge - law, philosophy of aesthetics, and art history. The course will focus on how and why, for functional and other reasons, lawyers answer questions involving issues of art in a very different manner from the way in which philosophers and art historians answer the same questions. The course will concentrate on those areas of law implicated by a society's interest in acquiring and enjoying fine arts. Topics to be covered include, among others, The Law's Answer to the Question "What is Art?"; Artistic Freedom and its Limitations Art and the First Amendment; Rights of the Artist Santutory and Other Protections of Creative Works, including Copyright, the Visual Artists’ Rights Act of 1990, and the Moral Right of Artists; Forgery - What's So Special About an Original?; Cultural Artifacts in the International Community The Elgin Marbles; and Stolen Art - Recovering Art Looted by the Nazis. Students will study and compare British Law relating to the fine arts.

Credit Hours: 3

LAW 6520: Comparative Constitutional Law
South Africa Program
Credit Hour: 1-2

LAW 6530: Comparative Criminal Justice
South Africa Program
Credit Hour: 1-2

LAW 6905: LLM Arbitration Seminar
(same as LAW 6805). This course would cover law, policy, and practices relating to the arbitration in the U.S. under modern arbitration statutes as well as arbitration of international commercial disputes under international conventions and arbitral rules.

Credit Hours: 3
Prerequisites: instructor's consent

LAW 6910: Advanced Dispute Resolution Practice
(same as LAW 6810). This course is designed to give students experience in the practice of dispute resolution skills, primarily focusing on mediation. In simulated cases of a wide variety of types of mediated negotiations, students will act as mediators, parties, and legal representatives. Graded on S/U basis only.

Credit Hours: 2
Prerequisites: Open to LL.M. students. In extraordinary situations, J.D. students may enroll with the consent of the instructor

LAW 6915: Advanced Survey of Dispute Resolution
Study of dispute resolution processes to understand the theoretical and practical underpinnings of adjudicative (e.g., litigation and arbitration), evaluative (e.g., neutral evaluation and summary jury trials) and facilitative (e.g., negotiation and mediation) process. Emphasis on assistance to clients in choice of appropriate methods for preventing or resolving disputes and on ethical and professional responsibilities of advocates and neutrals in various processes.

Credit Hours: 3
Prerequisites: instructor's consent

LAW 6920: LL.M. Externship
Student will be placed (or secure placement) with attorney, professional mediator or arbitrator, or dispute resolution agency (government-based or private) for an externship ranging three to nine weeks. Students will observe and, to the extent possible, participate in dispute resolution activities of mentor. Journal entries form basis for credit. Externship placements will be local, national or internation. Graded on a S/U basis only.

Credit Hour: 1-99
Prerequisites: LL.M. students only

LAW 6925: LL.M. Independent Study
Substantial research project on selected topic of choice.

Credit Hour: 1-3
Prerequisites: LL.M. students only

LAW 6930: LL.M. Major Research Project
(same as LAW 6830). Development and presentation of substantial research paper on current topic in dispute resolution. Supervision of this work by appropriate faculty will be determined according to the topic selected.

Credit Hours: 3
Prerequisites: instructor's consent
LAW 6935: Dispute System Design
(same as LAW 6835). Analysis of system design principles and the management of multi-party complex disputes. Course will include overview of statutes, regulations, court rules and general policy considerations for the development of systematic approaches to the resolution of disputes as well as the consultation process inherent in system design work. An underlying theme for this course will be issues of program quality. Students will review scholarly work evaluating the ADR field and study basic research/evaluation methodologies.
Credit Hours: 3
Prerequisites: instructor’s consent

LAW 6940: Negotiation and Mediation Perspectives and Skills
Interactive training program that focuses on the role of the mediator in facilitating settlement. Topics include: theories of competitive and problem solving orientations to negotiation; strengths/weaknesses of mediation as a dispute resolution process; and overview of mediator tasks and responsibilities, such as framing issues, understanding party interest, generating options, and reaching agreement. This course is required for LL.M. students without mediation background and will be delivered in an intensive format during August before regularly scheduled courses begin. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: instructor’s consent

LAW 6945: Non-Binding Methods of Dispute Resolution
(same as LAW 6845). Negotiation and mediation of disputes, focusing on the theory, strategy, and skills, and public policy issues involved in using non-binding methods of dispute resolution. The course addresses the role of attorneys in unassisted and mediated negotiation as well as the role of mediators. The course considers the professional responsibility of advocates negotiating for clients and of mediators.
Credit Hour: 3-4
Prerequisites: instructor’s consent

LAW 6950: Practicum on Dispute Resolution Training and Education
Structured training experience through participation in the first-year curriculum project; service as judges in J.D. student competitions, such as negotiation and client counseling; and assignments to appropriate upper division courses to assist with development of dispute resolution modules. Credit is earned for work over the entire academic year. Graded on a S/U basis only.
Credit Hour: 1-2
Prerequisites: LL.M. students only

LAW 6955: Topics
Special and emerging topics in dispute resolution. Subject, content and credit varies, depending on available faculty and student interest.
Credit Hour: 1-99
Prerequisites: instructor’s consent

LAW 6960: Understanding Conflict
(same as LAW 6860). Study of the origins, nature, and functions of conflict, using perspectives from a variety of disciplines and from literature and religion. The course will include special attention to the idea of conflict as opportunity and will draw on contemplative practices, of the kind that have been developed in many religious traditions, to aid in understanding the relationship between inner and outer conflict. It will focus persistently on the connections between one’s assumptions about conflict and one’s attitudes and practices about dispute resolution and lawyering. Prerequisites: instructor’s consent.
Credit Hours: 3

LAW 6970: Mediation Clinic
(same as LAW 5770). Students develop and refine mediation skills by observing and participating in simulated and real mediation cases. Limited to J.D. or LL.M. students in Designated semesters. Graded on S/U basis only.
Credit Hour: 1-2
Prerequisites or Corequisites: LAW 5765 (or concurrent enrollment), or completion of an approved training

**Learning, Teaching, & Curriculum (LTC)**

LTC 1100: Orientation
This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options. Graded on S/U basis only.
Credit Hour: 1

LTC 1110: Orientation: Art Education
This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options, emphasizing Art Education. Graded on S/U basis only.
Credit Hour: 1

LTC 1115: Orientation: Social Studies
The course familiarizes and orients students with MU resources, College of Education programs, expectations and career options, emphasizing Social Studies education. Graded on S/U basis only.
Credit Hour: 1

LTC 1120: Orientation: Math Education
This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options, emphasizing Math Education. Graded on S/U basis only.
Credit Hour: 1

LTC 1130: Orientation: Middle School Education
This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options, emphasizing Middle School Education. Graded on S/U basis only.
Credit Hour: 1

LTC 1140: Orientation: Music Education
This course familiarizes and orients students with MU resources, College Education programs and expectations and career options, emphasizing Music Education. Graded on S/U basis only.
LTC 1150: Learning Strategies for College Students
Students' learning strategies are assessed, and their needs are given greatest emphasis. Learning through reading and listening are given major consideration as are the corollary skills of vocabulary expansion, studying and note taking.
Credit Hours: 1

LTC 1155: Orientation: Science Education
This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options, emphasizing Science Education. Graded on S/U basis only.
Credit Hour: 1

LTC 1160: Orientation: Special Education
This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options, emphasizing Special Education. Graded on S/U basis only.
Credit Hour: 1

LTC 1170: Orientation: English/Language Arts
This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options, emphasizing English/Language Arts education. Graded on S/U only.
Credit Hour: 1

LTC 1180: Orientation: Early Childhood Education
The course familiarizes and orients students with MU resources, College of Education programs, expectations and career options, emphasizing Early Childhood education. Graded on S/U basis only.
Credit Hour: 1

LTC 1190: Orientation: Elementary Education
The course familiarizes and orients students with MU resources, College of Education programs, expectations and career options, emphasizing Elementary Education. Graded on S/U basis only.
Credit Hour: 1

LTC 1200: Coordinated School Health
This course will focus on the concepts of health from the school health perspective, while also incorporating consumer trends, personal health and wellness issues. Environmental health and behavior change theory will be explored.
Credit Hours: 2

LTC 1300: First Aid
Credit Hours: 2

LTC 1320: Scuba Theory
The curriculum of the class includes bio-physics, hydrostatic pressures, physiology, fundamentals of compressed gases, environmental conditions, mechanics, first aid as it relates to diving, and planning specialty dives such as decompression, night, cave, ice, salvage and wreck diving.
Credit Hours: 3

LTC 2040: Inquiry into Schools, Community and Society I
This course focuses on schooling in American society, the school community, the school culture and students' lives and identities. Studied are the political, cultural, and economic conditions of the schools.
Credit Hours: 3

LTC 2044: Inquiry into Schools, Community and Society: Field
This field experience course supports the Inquiry into Schools, Community and Society (ISCS), component of Phase I. Graded on S/U basis only.
Credit Hour: 1

LTC 3600: Aiding: Nursery/Day Care Programs
Instructionally related duties in the preschool classroom during semesters and summer. Student works 30 hours with supervision for each credit.
Credit Hour: 1-2
Prerequisites: instructor's consent

LTC 3610: Aiding: Kindergarten
Instructionally related activities in kindergarten classroom during semesters and summers. Student works 30 hours with supervision for each credit. Graded on an S/U basis only.
Credit Hour: 1-2
Prerequisites: instructor's consent

LTC 3620: Aiding: Primary Grades
Instructionally related activities in primary grades. Student works 30 hours with supervision for each credit. Graded on an S/U basis only.
Credit Hour: 1-2
Prerequisites: instructor's consent

LTC 3630: Aiding: Intermediate Grades
Instructionally related activities in intermediate grade classrooms. Student works 30 hours with supervision for each credit. Graded on an S/U basis only.
Credit Hour: 1-2
Prerequisites: instructor's consent

LTC 3640: Aiding: Secondary Schools
Instructionally related clinical/administrative and monitorial activities in the secondary classroom during semesters and summer. Student works 30 hours with supervision for each credit. Graded on a S/U basis only.
Credit Hour: 1-2
Prerequisites: instructor's consent
LTC 4010: Student Teaching
Hours, credit must be arranged with director of student teaching. Must apply during February for following year.

**Credit Hour:** 1-99
**Prerequisites:** special methods courses in area of specialization

LTC 4030: Methods in Coordinated School Health
An examination of the Coordinated School Health (CSH) model, including best practices, methods, and assessments used in the elementary classroom to integrate school health into core content areas to support student wellness.

**Credit Hours:** 2

LTC 4085: Problems in Curriculum and Instruction
Studies professional programs and issues in health or physical education.

**Credit Hour:** 1-3
**Prerequisites:** instructor's consent

LTC 4091: Early Childhood Seminar I
Strategies for effectively observing and assessing young children and strategies for building positive family and community relationships, which support children’s development and learning.

**Credit Hours:** 2
**Prerequisites:** Admission to Phase II required

LTC 4110: Working with Infants and Toddlers
Experience working with children aged 6 weeks to 2 1/2 years and their families. Opportunity to apply theories of cognitive, language, and social development.

**Credit Hour:** 2-3
**Prerequisites:** course in child development and admission to Phase II; admittance to College of Education required

LTC 4120: Emergent and Developing Literacy in Early Childhood (cross-leveled with LTC 7120). Strategies for assessing and supporting young children’s literacy development. Graded on A-F basis only.

**Corequisites:** LTC 4210 and LTC 4124: K-3 Field Experience.

**Credit Hours:** 6
**Prerequisites:** admittance to College of Education required

LTC 4124: Emergent and Developing Literacy Early Childhood Field Experience
This field experience supports the LTC 4120 component of Phase II. Field experience expectations are delineated in the LTC 4120 course syllabi. Graded on a S/U basis only.

**Credit Hours:** 3
**Prerequisites:** Phase II admittance required
**Corequisites:** LTC 4120 and LTC 4210

LTC 4130: Teaching and Learning Math, Science and Social Studies w/ Young Children
Strategies for assessing and supporting young children's math, science and social studies learning. Must take concurrently with a K-3 field experience.

**Credit Hours:** 8
**Prerequisites:** completion of ECE Language/Literacy block; admittance to College of Education required

LTC 4134: Teaching & Learning Math, Sci & Soc Studies w/Young Children Field Experience
This field experience supports the LTC 4130 component of Phase II. Field experience expectations are delineated in the LTC 4130 course syllabi. Graded on a S/U basis only.

**Credit Hours:** 3
**Prerequisites:** Phase II admittance required

LTC 4140: Early Childhood Seminar II
Reflection on the relationship of theory and practice in ECE. Consideration of various topics including historical influences on early childhood curriculum, models of early childhood curriculum, classroom management, and individualizing curriculum.

**Credit Hours:** 3
**Prerequisites:** Completion of first two semesters of Phase II

LTC 4160: Motor Development in Young Children
For Early Childhood majors. Study of young children’s motor development. Must be taken as part of the LTC ECE Motor/Art/ Music block.

**Credit Hours:** 2
**Prerequisites:** Admission to Phase II

LTC 4170: Pre-Kindergarten Student Teaching
Application of knowledge of child development in working with children aged 2-6 and their families. Emphasis on planning and implementing developmentally appropriate practice.

**Credit Hours:** 6
**Prerequisites:** admission to Phase II and completion of Literacy Block; admittance to College of Education required

LTC 4194: Elementary Education Field Experience I
Seminars and diverse 1-5 grade classroom experience focus is on the learner and learning in the elementary school. Graded on a S/U basis only.

**Credit Hours:** 1-3
**Prerequisites:** ESC_PS 2010, ESC_PS 2014 or LTC 4085, LTC 2040, LTC 2044. Must be in Phase II. Graded on a S/U basis only

LTC 4200: Young Children's Emergent Language
For Early Childhood and Elementary Education majors. Study of young children’s language development and implications for teachers.

**Credit Hours:** 2
**Prerequisites:** admission to Phase II; admittance to College of Education required. Must take with LTC 4120, LTC 4210, and K-3 field experience

LTC 4210: Children’s Language and Literature (cross-leveled with LTC 7210). For Early Childhood Education majors. Examines children’s oral language development and surveys the field of
children’s literature for children ages birth to eight. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: admittance to Phase II; admittance to College of Education required

**LTC 4211: Literacy Assessment and Development**
Focus is on the development, assessment, and instruction of reading and writing motivations, skills, and strategies of diverse learners with emphasis on data interpretation and instruction. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Phase II College of Education admittance

**LTC 4220: Emergent Literacy**
Emergent reading. Instructional methods, diagnostic procedures, and materials appropriate for learners in elementary grades 1-3.

Credit Hours: 3
Prerequisites: completion of Phase I

**LTC 4221: Contexts and Methods for Elementary Reading Instruction**
Students will closely explore the different contexts, methods, and materials for reading instruction in diverse settings. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Phase II College of Education admittance

**LTC 4231: Advanced Applications of Literacy**
Provides pre-service teachers with information about the current reading curriculum and practices in their on-site program. Topics will include assessment, diversity, children’s literature, technology, planning and delivering instruction, professional development and management (classroom, behavior and lesson). Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Admittance to Phase II and College of Education required

**LTC 4240: Art for Children**
This course focuses on appropriate teaching methods and strategies for teaching art (studio, art history, aesthetic, and criticism), artistic development of children, and curriculum, instructional, and organization strategies for the art classroom.

Credit Hours: 2
Prerequisites: admittance to College of Education required

**LTC 4241: Inquiry into Literacy Applications**
Provides pre-service teachers with opportunities to study literacy topics from a broad perspective. Topics will enable students to integrate literacy theory with field-based practice in relevant and meaningful ways through writing, discussion and self-reflection. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Admittance to Phase II of the Elementary Education Program. Education and graduate students only

**LTC 4250: Music for Children**
Preparation of early childhood and elementary education students with the skills, knowledge, and philosophical foundations necessary to integrate music into the early childhood and elementary curricula.

Credit Hours: 2
Prerequisites: MUSIC_NM 1608, MUSIC_NM 1612, MUSIC_NM 1618 or competency test; admittance to College of Education required

**LTC 4260: Elementary Social Studies**
To develop knowledge of social studies and the skills to teach social studies in the elementary school. The course is designed to provide the student with the skills to plan, implement, and evaluate both the teaching and learning processes for the elementary social studies classroom.

Credit Hours: 3
Prerequisites: acceptance into Phase II, admittance to College of Education required

**LTC 4280: Teaching Science in Elementary Schools**
Concepts, materials, methods in the elementary school program.

Credit Hours: 3
Prerequisites: Admittance to Phase II and College of Education required

**LTC 4294: Elementary Education Field Experience II**
Seminars and diverse 1-5 grade classroom experiences focus is on the teacher and instruction in the elementary school. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: ESC_PS 2010, ESC_PS 2014; LTC 2040, LTC 2044, LTC 4194, must be enrolled in Phase II

**LTC 4300: Learning and Teaching Number and Operation in the Elementary School**
The purpose of this course is to (a) develop a deeper understanding of number and operation, (b) connect the mathematical knowledge of number as described in (a) to the learning and teaching of number in elementary school.

Credit Hours: 3
Prerequisites: acceptance into Phase II

**LTC 4310: Learning and Teaching Geometry in the Elementary School**
The purpose of this course is to (a) develop a deeper understanding of geometry and measurement, (b) critically examine content and issues of the complexities in teaching and learning fundamental concepts of geometry and measurement in elementary schools.

Credit Hours: 3
Prerequisites: acceptance into Phase II

**LTC 4320: Middle School Social Studies I**
Curriculum decision making, instructional planning, techniques and strategies, materials selection, approaches to assessment in middle level social studies, all based upon early adolescent growth and development principles.
Credit Hours: 3  
Prerequisites: admittance to the College of Education required

**LTC 4324: Middle School Social Studies Field I**  
This field experience supports the Learning, Teaching and Curriculum 4320 component of Phase II for MS students. Field experience expectations are delineated in the LTC 4320 course syllabi. Graded on S/U basis only.

Credit Hour: 1  
Prerequisites: Phase II admittance required

**LTC 4334: Middle School Social Studies Field Experience II**  
This field experience supports the LTC 4550 component of Phase II for MS students. Field experience expectations are delineated in the LTC 4550 course syllabi. Graded on a S/U basis only.

Credit Hour: 1  
Prerequisites: Phase II admittance required

**LTC 4340: Middle School Science I**  
Concepts, materials, methods in middle school program.

Credit Hours: 3  
Prerequisites: Admittance to Phase II and the College of Education required

**LTC 4344: Middle School Science Field I**  
This field experience supports the Learning, Teaching and Curriculum 4340 component of Phase II. Field experience expectations are delineated in the LTC 4340 course syllabi. Graded on a S/U basis only.

Credit Hour: 1  
Prerequisites: Phase II admittance required

**LTC 4350: Middle School Science II**  
Concepts, materials, methods in the middle school program.

Credit Hours: 3  
Prerequisites: Admittance to phase II and College of Education required

**LTC 4354: Middle School Science Field Experience**  
This field experience supports the LTC 4350 component of Phase II. Field experience expectations are delineated in the LTC 4350 course syllabi. Graded on a S/U basis only.

Credit Hour: 1  
Prerequisites: Phase II admittance required

**LTC 4360: Intro. Teaching Mathematics in Middle and Secondary Schools**  
Introduction to teaching mathematics including: professional mathematics teacher associations and journals, learning theories related to teaching mathematics, tools, and materials for teaching mathematics, curriculum and instructional strategies (middle and lower high school level), and techniques for assessing mathematical understanding.

Credit Hours: 3  
Prerequisites: professional standing, MATH 1360; admittance to College of Education required

**LTC 4364: Intro. Teaching Math in Middle and Secondary School Field Experience**  
This field experience supports the LTC 4360 component of Phase II. Field experience expectations are delineated in the LTC 4360 course syllabi. Graded on a S/U basis only.

Credit Hour: 1  
Prerequisites: Phase II admittance required

**LTC 4370: Teaching and Modeling Middle School Mathematics**  
Major issues/topics of the course include: nature of middle school students, lesson planning, developing and utilizing teaching strategies, assessment alternatives, teaching via problem solving and mathematical modeling, interdisciplinary strategies and materials, and techniques for assessing mathematical understanding.

Credit Hours: 3  
Prerequisites: LTC 4360 or LTC 7360 and at least 18 hours of required mathematics; admittance to College of Education required

**LTC 4374: Teaching and Modeling Middle School Mathematics Field Experience**  
This field experience supports the LTC 4370 component of Phase II. Field experience expectations are delineated in the LTC 4370 course syllabi. Graded on a S/U basis only.

Credit Hour: 1  
Prerequisites: Phase II admittance required

**LTC 4380: Teaching Middle School Language Arts I**  
Integrates an understanding of literacy (highlighting reading) with content area demands, literature and other media texts, evaluation and inquiry within a context of diversity.

Credit Hours: 3  
Prerequisites: Admittance to Phase II of College of Education

**LTC 4384: Teaching Middle School Language Arts I Field Experience**  
This field experience supports the LTC 4380 component of Phase II. Field experience expectations are delineated in the LTC 4380 course syllabi. Graded on a S/U basis only.

Credit Hour: 1  
Prerequisites: Phase II admittance required

**LTC 4390: Teaching Middle and Secondary English/Language Arts II**  
Prepares prospective educators with the knowledge, skills, and strategies necessary for integrating and teaching the English/Language Arts, primarily focusing on the teaching of writing and critical thinking.

Credit Hours: 3  
Prerequisites: Admittance to Phase II of College of Education

**LTC 4394: Teaching Middle School Language Arts II Field Experience**  
This field experience supports the LTC 4390 component of Phase II. Field experience expectations are delineated in the LTC 4390 course syllabi. Graded on a S/U basis only.

Credit Hour: 1  
Prerequisites: Phase II admittance required
LTC 4400: Teaching Middle and Secondary English/Language Arts III
Prepare prospective educators by focusing on the teaching of American culture and critical thinking, through literacy, mediacy, oracy, and cultural artifacts.

Credit Hours: 3
Prerequisites: LTC 4380 or LTC 7380 and LTC 4390 or LTC 7390; admittance to Phase II of College of Education

LTC 4404: Teaching Middle School Language Arts III Field Experience
This field experience supports the LTC 4400 component of Phase II. Field experience expectations are delineated in the LTC 4400 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 4410: Teaching, Engaging and Assessing Middle-Level Students
In this course students will learn about the specific and individual needs of middle-level students and develop the skills and understandings to meet these needs.

Credit Hours: 3
Prerequisites: admittance to College of Education required

LTC 4414: Teaching, Engaging & Assessing Mid-Level Students Field Experience
This field experience supports the LTC 4410 component of Phase II. Field experience expectations are delineated in the LTC 4410 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 4420: Adolescent Literacy
(cross-leveled with LTC 7420). Explores literacy implications of content areas. Topics include determining the difficulty of text, examining literature that supports content, creating alternative assessments, and evaluating reading/writing strategies as tools for learning. (Required of all students obtaining certification in middle school or concurrent certification in middle and secondary school area(s) except language arts.

Credit Hours: 3
Prerequisites: admittance to College of Education required

LTC 4424: Middle School Literacy Field Experience
This field experience supports the LTC 4420 component of Phase II. Field experience expectations are delineated in the LTC 4420 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 4460: Teaching English to Speakers of Other Languages
(Same as ENGLSH 4650 and LINGST 4650). Linguistic and pedagogical principles of teaching English to speakers of other languages. Graded A-F only.

Credit Hours: 3
Prerequisites: ENGLSH 4600 and ENGLSH 4610 or equivalent. Acceptance into Phase II of LTC

LTC 4470: Teaching Secondary English/Language Arts I
Prepares prospective educators with the knowledge, skills, and strategies necessary for integrating and teaching the English/Language Arts, primarily focusing on Young Adult Literature and critical thinking.

Credit Hours: 3
Prerequisites: Admittance to Phase II of College of Education

LTC 4474: Teaching Secondary English/Language Arts I Field Experience
This field experience supports the LTC 4470 component of Phase II. Field experience expectations are delineated in the LTC 4470 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 4480: Teaching Middle and Secondary English/Language Arts II
Prepares prospective educators with the knowledge and strategies necessary for integrating and teaching the English/Language Arts, primarily focusing on the teaching of writing and critical thinking.

Credit Hours: 3
Prerequisites: admittance to Phase II of College of Education required

LTC 4484: Teaching Secondary English/Language Arts II Field Experience
This field experience supports the LTC 4480 component of Phase II. Field experience expectations are delineated in the LTC 4480 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 4490: Teaching Middle and Secondary English/Language Arts III
Prepares prospective educators by focusing on the teaching of American culture and critical thinking, through literacy, mediacy, oracy, and cultural artifacts.

Credit Hours: 3
Prerequisites: LTC 4470 or LTC 7470 and LTC 4480 or LTC 7480; admittance to Phase II of College of Education

LTC 4494: Teaching Secondary English/Language Arts III Field Experience
This field experience supports the LTC 4490 component of Phase II. Field experience expectations are delineated in the LTC 4490 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 4500: Emergent Language in Early Childhood
Study of language learning in young children; how meaning of the environment is gained through language; implications for teachers working with children from varying language-learning environments.
LTC 4510: Assessment in Early Childhood Education
A study of formal and informal assessment instruments and procedures used to measure progress and determine developmentally appropriate curriculum for children in early childhood settings.  
Credit Hours: 3  
Prerequisites: H_D_FS 3420 or equivalent child development or child psychology course

LTC 4520: Literature in the Elementary School
Surveys the field of literature for children and adolescents, with emphasis on selected readings of various types of literature.  
Credit Hours: 3  
Prerequisites: junior standing or instructor’s consent

LTC 4530: Introduction to Social Studies
Will introduce prospective teachers to the profession of social studies teaching; to the bases for making curriculum choices in social studies and the process of choosing content; and the process of planning curriculum and instruction in social studies classrooms.  
Credit Hours: 3  
Prerequisites: acceptance into Phase II and to the College of Education required

LTC 4534: Secondary Social Studies I Field Experience
This field experience supports the Learning, Teaching and Curriculum 4530 component of Phase II. Field experience expectations are delineated in the LTC 4530 course syllabi. Graded on a S/U basis only.  
Credit Hour: 1  
Prerequisites: Phase II admittance required

LTC 4540: Teaching of Reading
Materials, methods used in teaching reading in elementary grades.  
Credit Hours: 3  
Prerequisites: ESC_PS 2400 and professional standing

LTC 4541: Teaching Social Studies
Is designed for the secondary social studies teachers to develop knowledge of social studies and the skills to teach social studies. The student will plan, implement and evaluate both the teaching and learning processes for secondary social studies classrooms. Graded on A-F basis only.  
Credit Hours: 3  
Prerequisites: acceptance into Phase II and to College of Education required

LTC 4544: Secondary Social Studies II Field Experience
This field experience supports the LTC 4550 component of Phase II. Field experience expectations are delineated in the LTC 4550 course syllabi. Graded on a S/U basis only.  
Credit Hour: 1  
Prerequisites: Phase II admittance required

LTC 4550: Assessment in Social Studies
Will address the purposes and development of social studies assessment for all levels from classroom to national assessment. Assessment will be used to reflect upon curriculum/instruction, make revisions and set goals.  
Credit Hours: 3  
Prerequisites: acceptance into Phase II and to College of Education required

LTC 4554: Secondary Social Studies III Field Experience
This field experience supports the LTC 4550 component of Phase II. Field experience expectations are delineated in the LTC 4550 course syllabi. Graded on a S/U basis only.  
Credit Hour: 1  
Prerequisites: Phase II admittance required

LTC 4560: Reading and Writing in the Content Areas
For secondary school teachers. Specific ways teachers can help students improve reading and writing skills in content areas and ways they can be taught.  
Credit Hours: 3  
Prerequisites: Phase II admittance. Restricted to College of Education Majors with 60+ credit hours

LTC 4570: Organization of Public School Art
Purposes, practices of art experiences in elementary and secondary schools. Designed for teachers, supervisors, administrators.  
Credit Hours: 2

LTC 4571: Introduction to Teaching Mathematics in Middle and Secondary Schools
Introduction to teaching mathematics including: professional mathematics teacher associations and journals, learning theories related to teaching mathematics, tools, and materials for teaching mathematics, curriculum and instructional strategies (middle and lower high school level), and techniques for assessing mathematical understanding.  
Credit Hours: 3  
Prerequisites: professional standing, MATH 2300

LTC 4574: Intro. Teaching Math in Middle and Secondary School Field Experience
Field experience supporting the LTC 4571 component of Phase II. Field experience expectations are delineated in the LTC 4571 course syllabi. Graded on a S/U basis only.  
Credit Hour: 1  
Prerequisites: Phase II admittance required

LTC 4580: Social Studies in the Elementary School
Problems in preparation, teaching of units with suitable materials, techniques.  
Credit Hours: 3  
Prerequisites: ESC_PS 2400, professional standing
LTC 4581: Teaching Mathematics in Secondary Schools: Algebra
Major issues/topics of the course are: exploration of curriculum, teaching strategies, and assessment for algebra and pre-calculus/calculus. Lesson planning, integration of appropriate models, mathematical connections, calculators and computer technology will be developed.

Credit Hours: 3
Prerequisites: LTC 4571 or LTC 7571; admittance to College of Education required

LTC 4584: Teaching Math in Secondary Schools: Algebra Field Experience
This field experience supports the Learning, Teaching and Curriculum 4581 component of Phase II. Field experience expectations are delineated in the LTC 4581 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 4587: Seminar in Curriculum and Instruction
Seminar in Curriculum and Instruction

Credit Hour: 1-3

LTC 4590: Teach.Math in Sec.Schools: Focus on Geometry, Probability and Statistics
Provides experience which advanced students’ knowledge, understanding, and facility in engaging students in learning mathematics. Major issues/topics highlighted in the course are: exploration of curriculum, teaching strategies, and assessment for geometry, probability and statistics.

Credit Hours: 3
Prerequisites: LTC 4571 or LTC 7571; admittance to College of Education required

LTC 4594: Teach Math in Sec Sch: Focus on Geometry/Probability
This field experience supports the LTC 4590 component of Phase II. Field experience expectations are delineated in the LTC 4590 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 4600: Diagnosis and Remediation of Learning Problems in Math - Middle
The study of diagnostic and remedial instructional techniques for the teaching of mathematics. Emphasis is placed on alternative teaching methods and strategies.

Credit Hours: 3

LTC 4610: Teaching Techniques and Curriculum in Elementary School Math
The mathematics program in the elementary school from viewpoint of goals, content, techniques and evaluation.

Credit Hours: 3

LTC 4620: Information Literacy in Teaching and Learning
Discusses the nature, value, and power of information as product and process; organization, retrieval, and evaluation of information; explores the Internet and information superhighway; develops skills for resource based learning for classroom instruction; policy issues.

Credit Hours: 3

LTC 4630: Health Education in the Elementary School
Defines teacher’s role in school health program; investigates health needs of school children; focuses on teaching strategies, health resources and development of elementary school health education curricula and materials.

Credit Hours: 3

An integration of the philosophy and history of science, technology, society; teaching science as inquiry; classroom management, strategies and curricula for teaching/learning science; and using technology in science learning.

Credit Hours: 3
Prerequisites: professional standing; admittance to College of Education required

LTC 4634: Teaching Middle and Secondary Science I Field Experience
This field experience supports the Learning, Teaching and Curriculum 4631 component of Phase II. Field experience expectations are delineated in the LTC 4631 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 4640: Motor Development in Early Childhood
Motor development of infants and children with emphasis on: study of interaction between biological and environmental factors affecting development, motor assessment techniques, and designing programs to enhance motor development.

Credit Hours: 3
Prerequisites: ESC_PS 2400

LTC 4644: Teaching Middle and Secondary Science II Field Experience
This field experience supports the LTC 4641 component of Phase II. Field experience expectations are delineated in the LTC 4641 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

</tbody>
</table>
LTC 4744: Inquiry into Art Education: Pre-School Through Middle School Field Experience
This field experience supports the LTC 4740 component of Phase II. Field experience expectations are delineated in the LTC 4740 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 4750: Inquiry into Art Education: Secondary
The third of a three course sequence. Student will learn about secondary art education and make application to practice with emphasis on adolescent development, curriculum design, student assessment, instruction, diversity/equity, and professionalism.

Credit Hours: 3
Prerequisites: admittance to College of Education required

LTC 4754: Inquiry into Art Education: Secondary Field Experience
This field experience supports the LTC 4750 component of Phase II. Field experience expectations are delineated in the LTC 4750 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 4960: Special Readings in Curriculum and Instruction
Directed study of literature and research reports in education.

Credit Hour: 1-3

LTC 4970: Standardized Assessments
This non-credit course will provide resources to assist with standardized assessments required to become a Missouri certified teacher. Graded on S/U basis only.

Credit Hours: 0
Prerequisites: Admittance to College of Education
Recommended: Required admittance to Phase III of the teacher education program

LTC 4971: Internship and Capstone Seminar
Internship is a full-semester experience in the public schools, including a capstone seminar addressing problems of practice (integrating subjects, reading and writing across the curriculum, meeting all students’ needs), and evaluation of the interns preparation for entering the profession. It is offered each Fall and Spring for 10-16 credit hours. Admittance to College of Education required.

Credit Hour: 1-16
Prerequisites: ED_LPA 4060 or ED_LPA 7060 and admittance into Phase III

LTC 4981: Internship I
This field experience provides preservice interns a semester-long public school experience where they simultaneously engage in a unique combination of observation and teaching. Through observation, conferencing, reading, discussion, demonstration, and participation, the preservice intern will synthesize the course concepts of the Senior Year On-Site Program (SYOSP). Graded on A-F basis only.

Credit Hour: 1-4
Prerequisites: ED_LPA 4060 or ED_LPA 7060; Admittance to College of Education; Admittance to Phase III

LTC 7010: Student Teaching
Hours, credit must be arranged with director of student teaching. Must apply during February for following year.

Credit Hour: 1-99
Prerequisites: special methods courses in area of specialization

LTC 7040: Inquiring into Schools, Community and Society I
This course focuses on schooling in American society, the school community, the school culture and students’ lives and identities. Studied are the political, cultural, and economic conditions of the schools.

Credit Hour: 2-3
Prerequisites: TDP 2020 and completion of Phase I or enrollment in a graduate level program in the College of Education

LTC 705: Problems in Curriculum and Instruction
Studies professional programs and issues in health or physical education.

Credit Hour: 1-3
Prerequisites: instructor’s consent

LTC 7091: Early Childhood Seminar I
Strategies for effectively observing and assessing young children and strategies for building positive family and community relationships, which support children’s development and learning.

Credit Hours: 2
Prerequisites: Admission to Phase II required

LTC 710: Working with Infants and Toddlers
Experience working with children aged 6 weeks to 2 1/2 years and their families. Opportunity to apply theories of cognitive, language, and social development.

Credit Hours: 3
Prerequisites: course in child development and admission to Phase II; admittance to College of Education required

LTC 7120: Emergent and Developing Literacy in Early Childhood
Strategies for assessing and supporting young children’s literacy development. Graded on A-F basis only.

Credit Hours: 6
Prerequisites: admittance to College of Education required
Corequisites: LTC 4200 and LTC 4210 and K-3 field experience

LTC 7124: Emergent & Developing Literacy Early Childhood Field Experience
This field experience supports the LTC 7120 component of Phase II. Field experience expectations are delineated in the LTC 7120 course syllabi. Graded on a S/U basis only.

Credit Hours: 2
Prerequisites: Phase II admittance required

</tbody>
</table>
LTC 7380: Teaching Middle School Language Arts I
Integrates an understanding of literacy (highlighting reading) with content area demands, literature and other media texts, evaluation and inquiry within a context of diversity.

Credit Hours: 3
Prerequisites: admittance to Phase II of College of Education

LTC 7384: Middle School Language Arts I Field Experience
This field experience supports the Learning, Teaching and Curriculum 7380 component of Phase II. Field experience expectations are delineated in the LTC 7380 course syllabi. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 7390: Teaching Middle and Secondary English/Language Arts II
Prepares prospective educators with the knowledge, skills, and strategies necessary for integrating and teaching the English/Language Arts, primarily focusing on the teaching of writing and critical thinking.

Credit Hours: 3
Prerequisites: admittance to Phase II of College of Education

LTC 7394: Middle School Language Arts II Field Experience
This field experience supports the LTC 7390 component of Phase II. Field experience expectations are delineated in the LTC 7390 course syllabi. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 7400: Teaching Middle and Secondary English/Language Arts III
Prepares prospective educators by focusing on the teaching of American culture and critical thinking, through literacy, mediacy, oracy, and cultural artifacts.

Credit Hours: 3
Prerequisites: LTC 4380 or LTC 7380 and LTC 4390 or LTC 7390; admittance to Phase II of College of Education

LTC 7404: Middle School Language Arts III Field Experience
This field experience supports the LTC 7400 component of Phase II. Field experience expectations are delineated in the LTC 7400 course syllabi. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 7410: Teaching, Engaging and Assessing Mid-Level Students
In this course students will learn about the specific and individual needs of middle-level students and develop the skills and understandings to meet these needs.

Credit Hours: 3
Prerequisites: admittance to College of Education required

LTC 7414: Teaching, Engaging & Assessing Mid-Level Students
This field experience supports the LTC 7410 component of Phase II. Field experience expectations are delineated in the LTC 7410 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 7420: Adolescent Literacy
(cross-leveled with LTC 4420). Explores literacy implications of content areas. Topics include determining the difficulty of text, examining literature that supports content, creating alternative assessments, and evaluating reading/writing strategies as tools for learning. (Required of all students obtaining certification in middle school or concurrent certification in middle and secondary school area(s) except language arts.

Credit Hours: 3
Prerequisites: admittance to College of Education required

LTC 7424: Middle School Literacy Field Experience
This field experience supports the LTC 7420 component of Phase II. Field experience expectations are delineated in the LTC 7420 course syllabi. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 7460: Teaching English to Speakers of Other Languages
(same as ENGLSH 7650). Linguistics and pedagogical principles of teaching English to speakers of other languages. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ENGLSH 7600 and ENGLSH 7610 or equivalent and acceptance into Phase II

LTC 7470: Teaching Secondary English/Language Arts I
Prepares prospective educators with the knowledge, skills, and strategies necessary for integrating and teaching the English/Language Arts, primarily focusing on Young Adult Literature and critical thinking.

Credit Hours: 3
Prerequisites: admittance to Phase II of College of Education

LTC 7474: Teaching English/Language Arts I Field Experience
This field experience supports the LTC 7470 component of Phase II. Field experience expectations are delineated in the LTC 7470 course syllabi. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: Phase II admittance required

LTC 7480: Teaching Middle and Secondary English/Language Arts II
Prepares prospective educators with the knowledge, skills, and strategies necessary for integrating and teaching the English/ Language Arts, primarily focusing on the teaching of writing and critical thinking.

Credit Hours: 3
Prerequisites: admittance to Phase II of College of Education
LTC 7484: Teaching English/Language Arts II Field Experience
This field experience supports the Learning, Teaching and Curriculum 7480 component of Phase II. Field experience expectations are delineated in the LTC 7480 course syllabi. Graded on an S/U basis only.

Credit Hour: 1  
Prerequisites: Phase II admittance required

LTC 7490: Teaching Middle and Secondary English/Language Arts III
Prepares prospective educators by focusing on the teaching of American culture and critical thinking, through literacy, mediacy, oracy, and cultural artifacts.

Credit Hours: 3  
Prerequisites: LTC 4470 or LTC 7470 and LTC 4480 or LTC 7480; admittance to Phase II of College of Education

LTC 7494: Language Arts III Field Experience
This field experience supports the LTC 7490 component of Phase II. Field experience expectations are delineated in the LTC 7490 course syllabi. Graded on a S/U basis only.

Credit Hour: 1  
Prerequisites: Phase II admittance required

LTC 7500: Emergent Language in Early Childhood
Study of language learning in young children; how meaning of the environment is gained through language; implications for teachers working with children from varying language-learning environments.

Credit Hours: 3

LTC 7510: Assessment in Early Childhood Education
A study of formal and informal assessment instruments and procedures used to measure progress and determine developmentally appropriate curriculum for children in early childhood settings.

Credit Hours: 3

LTC 7520: Literature in the Elementary School
Surveys the field of literature for children and adolescents, with emphasis on selected readings of various types of literature.

Credit Hours: 3

LTC 7540: Teaching of Reading
Materials, methods used in teaching reading in elementary grades.

Credit Hours: 3  
Prerequisites: ESC_PS 2400 and professional standing

LTC 7541: Teaching Social Studies
Is designed for the secondary social studies teachers to develop knowledge of social studies and the skills to teach social studies. The student will plan, implement, and evaluate both the teaching and learning processes for secondary social studies classroom.

Credit Hours: 3  
Prerequisites: acceptance into Phase II, admittance to College of Education required

LTC 7550: Assessment in Social Studies
Will address the purposes and development of social studies assessment for all levels from classroom to national assessment. Assessment will be used to reflect upon curriculum/instruction, make revisions and set goals.

Credit Hours: 3  
Prerequisites: acceptance into Phase II, admittance to College of Education required

LTC 7560: Reading and Writing in Content Areas
For secondary school teachers. Specific ways teachers can help students improve reading and writing skills in content areas and ways they can be taught

Credit Hours: 3  
Prerequisites: Phase II admittance required. Restricted to College of Education majors with 60+ credit hours

LTC 7570: Organization of Public School Art
Purposes, practices of art experiences in elementary and secondary schools. Designed for teachers, supervisors, administrators.

Credit Hours: 2

LTC 7571: Introduction Teaching Mathematics in Middle and Secondary
Introduction to teaching mathematics including: professional mathematics teacher associations and journals, learning theories related to teaching mathematics, tools, and materials for teaching mathematics, curriculum and instructional strategies (middle and lower high school level), and techniques for assessing mathematical understanding.

Credit Hours: 3  
Prerequisites: acceptance into Phase II, admittance to College of Education required

LTC 7577: Seminar in Curriculum and Instruction
Seminar in Curriculum and Instruction.

Credit Hours: 1-3

LTC 7580: Social Studies in the Elementary School
Problems in preparation, teaching of units with suitable materials, techniques.

Credit Hours: 3  
Prerequisites: ESC_PS 2400, professional standing

LTC 7581: Teaching Mathematics in Secondary Schools: Algebra
Major issues/topics of the course are: exploration of curriculum, teaching strategies, and assessment for algebra and pre-calculus/calculus. Lesson planning, integration of appropriate models, mathematical connections, calculators and computer technology will be developed.

Credit Hours: 3  
Prerequisites: LTC 4571 or LTC 7571; admittance to College of Education required

LTC 7587: Seminar in Curriculum and Instruction
Seminar in Curriculum and Instruction.

Credit Hour: 1-3

Provides experience which advanced students’ knowledge, understanding, and facility in engaging students in learning mathematics.
Major issues/topics highlighted in the course are: exploration of curriculum, teaching strategies, and assessment for geometry, probability and statistics.

Credit Hours: 3  
Prerequisites: LTC 4570 or LTC 7570; admittance to College of Education required

LTC 7600: Diagnosis and Remediation of Learning Problems in Math-Middle  
The study of diagnostic and remedial instructional techniques for the teaching of mathematics. Emphasis is placed on alternative teaching methods and strategies.  
Credit Hours: 3

LTC 7610: Teaching Techniques and Curriculum in Elementary School Math  
The mathematics program in the elementary school from viewpoint of goals, content, techniques and evaluation.  
Credit Hours: 3

LTC 7620: Information Literacy in Teaching and Learning  
Discusses the nature, value, and power of information as product and process; organization, retrieval, and evaluation of information; explores the Internet and information superhighway; develops skills for resource based learning for classroom instruction; policy issues.  
Credit Hours: 3

LTC 7630: Health Education in the Elementary School  
Defines teacher’s role in school health program; investigates health needs of school children; focuses on teaching strategies, health resources and development of elementary school health education curricula and materials.  
Credit Hours: 3

An integration of the philosophy and history of science, technology, society; teaching science as inquiry; classroom management, strategies and curricula for teaching/learning science; and using technology in science learning.  
Credit Hours: 3  
Prerequisites: professional standing; admittance to College of Education required

LTC 7640: Motor Development in Early Childhood  
Motor development of infants and children with emphasis on: study of interaction between biological and environmental factors affecting development, motor assessment techniques, and designing programs to enhance motor development.  
Credit Hours: 3  
Prerequisites: ESC_PS 2400

LTC 7641: Teaching Middle and Secondary Science II  
An integration of the philosophy and history of science, technology, society; teaching science as inquiry; classroom management, strategies and curricula for teaching/learning science; and using technology in science learning.  
Credit Hours: 3  
Prerequisites: professional standing and Teaching Science in the Secondary School, Part I; admittance to College of Education required

LTC 7650: Education in Human Sexuality  
The biological, psychosocial and educational aspects of human sexuality with special emphasis on instructional activities related to interpersonal communication, decision-making ability and clarification of values, course is designed for both teachers and health-care personnel.  
Credit Hours: 3

An integration of the philosophy and history of science, technology, society; teaching science as inquiry; classroom management, strategies and curricula for teaching/learning science; and using technology in science learning.  
Credit Hours: 3  
Prerequisites: professional standing and Teaching Science in the Secondary School, Parts 1 and II; admittance to College of Education required

LTC 7660: Drug Education  
The psychosocial, legal and pharmacological aspects of the recreational use of over-the-counter and street drugs are investigated with emphasis being placed on personal decision making, principles of school and community drug education, rehabilitation and community health services.  
Credit Hours: 3

LTC 7680: Teaching Legal Rights and Responsibilities of Citizenship  
An introductory course for teachers and undergraduate students dealing with the teaching of the basic legal concepts which underlie effective citizenship.  
Credit Hours: 2

LTC 7730: Overview of Art Education  
This is the first of a three course sequence and serves as the foundation for inquiries of methodological and philosophical approaches to the teaching of the visual arts at the elementary and secondary level.  
Credit Hours: 3

LTC 7740: Inquiry into Art Education: Pre-School Through Middle School  
The second of three course sequence. It will cover art education issues as they apply to the Pre-School through Middle School setting.  
Credit Hours: 3  
Prerequisites: admittance to College of Education required
LTC 7750: Inquiry into Art Education: Secondary
The third of a three course sequence. Student will learn about secondary art education and make application to practice with emphasis on adolescent development, curriculum design, student assessment, instruction, diversity/equity, and professionalism.
Credit Hour: 3
Prerequisites: admittance to College of Education required

LTC 7960: Special Readings in Curriculum and Instruction
Directed study of literature and research reports in education.
Credit Hour: 1-3

LTC 7971: Internship and Capstone Seminar
Internship is a full-semester experience in the public schools, including a capstone seminar addressing problems of practice (integrating subjects, reading and writing across the curriculum, meeting all students’ needs), and evaluation of the interns preparation for entering the profession. It is offered each Fall and Spring for 1-16 credit hours. Admittance to College of Education required.
Credit Hour: 1-16
Prerequisites: ED_LPA 4060 or ED_LPA 7060 and admittance into Phase III

LTC 8085: Problems in Curriculum and Instruction
Problems in Curriculum and Instruction.
Credit Hour: 1-99

LTC 8520: Tests and Measurements for Elementary and Secondary Schools
Educational tests, measurements from points of view of teachers, supervisors, administrators.
Credit Hours: 3

LTC 8600: Perspectives in Parent Education/Parent Involvement
Consideration of the history and the influences of social, economic, political and educational changes leading to the development of parent involvement program components in the education of children in the primary grades.
Credit Hours: 3

LTC 8610: Issues in Early Childhood Education and Curriculum Practices
Focuses on historical and contemporary societal and educational issues affecting current curriculum decisions and practices in kindergarten and primary grades.
Credit Hours: 3
Prerequisites: Classroom teaching experience or instructor's consent

LTC 8612: Advanced Early Childhood Curriculum
Study of early childhood curriculum in contemporary educational settings along with selection of appropriate materials and development of instructional strategies for children, prekindergarten through early primary grades.

LTC 8613: Advanced Assessment in Early Childhood
(same as SPC_ED 8490). Procedures and instruments used in assessment of young children, including screening, diagnosis, interpretation of diagnostic findings, and application to instructional plans. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Departmental consent required
Recommended: May be restricted to students in semester-based courses offered through Mizzou Online

LTC 8614: Language and Early Literacy Development
Investigation of the language and early literacy development of young children from birth through age 8. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Department consent required
Recommended: May be restricted to students in semester-based courses offered through Mizzou Online

LTC 8615: The Missouri Writing Project
Focus on 1) current theory and research in teaching writing; 2) development of effective practice in teaching, writing and reading; and 3) experimentation with writing and response.
Credit Hour: 3-4
Prerequisites: successful application to MWP

LTC 8616: The Teaching of Journalism
The course focuses on the learning and teaching of middle, secondary, and post-secondary journalism/mass media course. Major strands of study include the theory and practice of journalism instruction, curriculum, and assessment.
Credit Hours: 3

LTC 8617: Teaching Writing in Middle and Secondary Classroom
This course will encourage the student as a writer and as a teacher of writing, especially in the middle and high school setting. We will explore various types of writing, with emphasis in English Education, including addressing national and state standards.
Credit Hours: 3

LTC 8618: Writing, Reading and Teaching Nonfiction
Students will get more than their feet wet as they read and write a variety of nonfiction texts, explore nonfiction's value and relationship to other genres, and investigate its potential for learning.
Credit Hours: 3

LTC 8619: Media Literacy
Teachers will learn how to incorporate visual images in the classroom while helping students "read" the images of our media-rich culture. Teachers will pair media with literature; analyzed and evaluate different media; and design several assignments.
Credit Hours: 3
LTC 8620: Whole Language Curriculum
Whole Language Curriculum inquires into whole language theory, beliefs and practices. Students will explore and participate in classroom based inquiry projects, theme cycles, reflective practices, holistic assessment, and other learner-centered experiences such as literature study and writers workshop.

Credit Hours: 3

LTC 8621: Talk in the Curriculum
This survey of oracy examines talk’s essential role in learning and the connections among language, power and cultural identity.

Credit Hours: 3

LTC 8630: Teaching Reading Through Literature Response
Teaching Reading Through Literature Response focuses on 1) reading as a personal and social process and 2) multiple responses to literature. Students will examine, use and critique; personalized reading, text sets (conceptually related materials), literature groups and other reading instruction experiences.

Credit Hours: 3

LTC 8635: Literature for Children and Youth
Systematic study of selected areas of particular importance to students of literature, teachers, librarians, supervisors, and school administrators.

Credit Hours: 3
Prerequisites: instructor’s consent

LTC 8636: Teaching Literature
This course involves exploration of theory, research, and practice in the teaching and learning of literature to students in Grades 9-12. It is intended for master’s and doctoral students - experienced teachers enrolled in MU’s English Education graduate program. This course addresses selected Common Core Standards, and focuses on an integrated approach to the teaching of literature and some nonfiction. Texts include novels, short stories, poems, literary nonfiction, and plays. The teaching of critical thinking, research skills, and technology are integrated into these experiences. This course promotes the use of various teaching and learning practices. The course is divided into the following major sections: 1) Introductions of Class Members; 2) Theories of Teaching Literature in the Classroom; and 3) Trying Out Theories on Selected Literature. Graded on A-F basis only.

Credit Hours: 3
Recommended: This is a recommended course for early in a master's program

LTC 8637: Teaching Communication
This course explores the theory, research, and practice in the teaching and learning of communication. This course is intended for master’s and doctoral students - experienced teachers enrolled in MU’s English Education graduate program. This course addresses selected Common Core Standards, and focuses on the teaching of speaking, listening, and language, as they occur within the best practices of English/Language Arts classrooms. The course involves variety of texts such as short stories, poems, literary nonfiction, and plays. The teaching of critical thinking, research skills, and technology are integrated into these experiences. This course encourages the use of various teaching and learning practices. The course is divided into the following major themes: 1) Introductions of Class Members; 2) Overview of Communication: Theory, Research, Practice; and 3) Teaching Communication in Context: Speaking, Listening, Reading, Writing. Graded on A-F basis only.

Credit Hours: 3
Recommended: We recommended, but do not require, that you take this course early in your program

LTC 8640: Studies in English Education
Exploration of the theory, research, and application of topics in the teaching of English, such as Writing/Thinking, Media, Literature, Language, and Creative Nonfiction. Topics announced at time of registration. May repeat to twelve hours with department’s approval.

Credit Hours: 3

LTC 8641: Foundations of English Education
This course focuses on foundational readings in the teaching and learning of English/Language Arts. The course requires intensive reading, writing, and discussion focusing on four subcategories of English Education: writing, literature, language and critical thinking. In addition, the course situates these topics within a historical perspective of the field. An additional focus of this course is on professional networking and development. It is expected that as students develop a greater understanding of the foundations of English Studies in Language Arts, they will see where their areas of expertise and knowledge join them to the profession as a leader. Graded on A-F basis only.

Credit Hours: 3

LTC 8642: Teaching Writing and Reading in Content Areas
Theory and practice of teaching reading and writing. Specific ways teachers can help students use writing to communicate about the course content, as well as to learn course concepts. Class also focuses on how to teach reading in reading classes, how to help students improve reading skills in content areas, and how reading and writing skills can reinforce each other.

Credit Hours: 3

LTC 8643: Teaching ESL/EFL to Adult Learners
This course explores the characteristics of adult learners, theories of adult learning, and the contexts in which adults learn English as a second or foreign language. Students apply this knowledge in the design of language learning curricula and activities for adult learners. Graded on A-F basis only.

Credit Hours: 3

LTC 8644: Teaching English Grammar and Pronunciation
This course develops teachers' knowledge of the structure of the English language (its grammar and its sound system) and provides them with pedagogical skills in teaching grammar and pronunciation to second/foreign language learners. Graded on A-F basis only. Prerequisites: LTC 8645 and LTC 8648

Credit Hours: 3
LTC 8645: Second Language Acquisition
This course examines theories of how humans develop first and second languages in childhood and adulthood and how this knowledge can be used to educate language learners. Graded on A-F basis only.
Credit Hours: 3

LTC 8646: Materials for and Assessment of English Language Learners
This course will examine the appropriate classroom materials, methods, reasons, and tools for the formal and informal assessment of English Language Learners. Graded on A-F basis only.
Credit Hours: 3

LTC 8647: Language and Culture for Educators
This course will examine how to prepare educators to effectively educate students from a range of linguistic and cultural backgrounds by developing a broad understanding of the definition and nature of culture and appropriate teaching strategies and materials for diverse students. Graded on A-F basis only.
Credit Hours: 3

LTC 8648: Linguistics for Educators
This course focuses on the form, meaning, and use of language in context and applying knowledge of linguistics to the teaching of English language learners. Graded on A-F basis only.
Credit Hours: 3

LTC 8649: Methods of Teaching English Language Learners
This course will examine how to prepare teachers to develop the investigative, decision-making, and reflective teaching skills needed to work with English Language Learners. Graded on A-F basis only.
Credit Hours: 3

Prerequisites: students must hold a valid teaching certificate

LTC 8650: English to Speakers of Other Languages Practicum
This culminating course will allow students to apply the theory and practice of teaching English to non-native speakers in an educational setting. Graded on A-F basis only.
Credit Hours: 3

LTC 8651: Working with English Language Learners with Special Needs
The course will assist educators with the decision to refer or not to refer an English language learner to special education services while helping identify the general framework for considering their special needs and preparing a comprehensive continuum of services. Course graded on A-F basis only.
Credit Hours: 3

LTC 8652: Seminar: English: Its Grammar and Place in the World
The course will familiarize learners with the grammatical features of English that have contributed to its global proliferation, explore the varieties of English used around the world, and delve into the concept of English as a global means of communication. Course graded on A-F basis only.
Credit Hours: 3

LTC 8660: Reading Miscue Analysis
The process in which readers construct meaning by relating their socio-psycholinguistic backgrounds to discourse. 15 studied miscues (text deviations) are analyzed at several linguistic levels. A comprehension centered reading program is developed.
Credit Hours: 3
Prerequisites: LTC 7540 and LTC 7560, or equivalent

LTC 8664: Practicum in Child Study I
Practicum experiences in diagnosing educational problems of school children.
Credit Hour: 3-5
Prerequisites: LTC 7540 or LTC 7560 or LTC 8670

LTC 8665: Practicum in Child Study II
Practicum experiences in applying remedial procedures to children with educational problems.
Credit Hour: 3-5
Prerequisites: LTC 8664

LTC 8670: Analysis & Correction of Reading Disabilities
Diagnostic and corrective procedures in reading instruction that may be used for clinical study.
Credit Hours: 3
Prerequisites: LTC 7540 or instructor's consent

LTC 8680: Issues and Trends in Reading Instruction
Provides intensive study of significant issues and current trends in reading on all instructional levels.
Credit Hours: 3
Prerequisites: LTC 7540, LTC 7560 or equivalents or instructor's consent

LTC 8681: Making a Difference for the Struggling Reader
Will help explore ways to help readers who have been unable to achieve success in reading--will learn how to access and evaluate strategies students are currently using.
Credit Hours: 3

LTC 8682: Focus on Writing in the Classroom
The course focuses on theory, research and practices in teaching writing in the elementary classroom (K-6) while developing a critical understanding of process methods to teach writing.
Credit Hours: 3

LTC 8683: Celebrating Reading Through Good Books
Many people can read but do not. This course will explore ways to make reading a joyful, exciting experience. Assignments will include reading journal articles that will help students meet self determined goals. Sharing books will be an important part of this course.
Credit Hours: 3
LTC 8684: Integrating Literacy and Technology
This will be a seminar course in which the students explore definitions of literacy, theoretical frameworks of educational technology, and literature that investigates the effectiveness of integrating literacy and technology. The students will also examine and evaluate a range of software used to integrate literacy and technology.

Credit Hours: 3

LTC 8685: Literature Opportunities: Using Children’s and Young Adult’s Literature in the Classroom
This class examines genres in children’s and young adult literature (grades 1-9). In-depth look at the work of children’s authors and illustrators; explore issues of censorship, gender, and culture.

Credit Hours: 3

LTC 8686: Theory of Instructional Strategies
The course investigates instructional strategies in K-12 and higher education classrooms and the theories behind those strategies. Content includes large and small group strategies, inquiry-based learning, student-centered and direct instruction, and differentiated instruction.

Credit Hours: 3

LTC 8687: Literacy and the Internet (Grades K-12)
The internet offers a myriad of opportunities to engage K-12 students in meaningful, purpose-driven reading and writing. Students examine their own literacy programs, examine ways they can incorporate the internet, and create a classroom web site.

Credit Hours: 3

LTC 8688: Nature of Literacy in a Digital World
New literacies are required to successfully engage in professional, civic, and personal lives that are imbued with technology. Students examine the literacy skills required to proficiently read and write with text messages, blogs, wikis, social networks, and virtual worlds.

Credit Hours: 3

LTC 8710: Nature of Science and Science Teaching
Examines philosophical, historical and sociological views of the nature of science and implications for science education policy and science instruction.

Credit Hours: 3

LTC 8712: Inquiry and the Science Curriculum
Examines inquiry as the foundation of the science curriculum. Includes study of exemplary programs and curriculum materials, and provides models for curriculum development in science education.

Credit Hours: 3

LTC 8724: College Science Teaching
(same as BIO_SC 8724, PHYSCS 8310 and ASTRON 8310). Study of learner characteristics, teaching strategies, and research findings related to teaching science at the post-secondary level.

Credit Hours: 3

LTC 8725: Science Outreach: Public Understanding of Science
(same as BIO_SC 8725 and AN_SCI 8725). Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.
**LTC 8726: Integrating Science with Outreach**  
(same as BIO_SC 8726). This course provides an opportunity for students to earn credit for outreach activities in the community. Students will capitalize on their area of study and scientific expertise in developing, implementing, and evaluating related outreach activities. May be repeated for credit.  
**Credit Hours:** 1-2

**LTC 8730: Survey of Art Education**  
Provides survey of the development of art education and problems in the field by means of a critical inquiry.  
**Credit Hours:** 3

**LTC 8735: Visual Literacy and Visual Culture**  
This course will investigate the intersection between art and language, exploring the connections between visual media and the written word how these two areas inform and enrich each other.  
**Credit Hours:** 3

**LTC 8740: Curriculum in Art Education**  
Advanced study of art education curricula, with option for elementary or secondary emphasis. Study of exemplary art programs, standards of quality, curriculum models, curriculum design and construction, concomitant instructional methods and evaluation.  
**Credit Hours:** 3

**LTC 8745: Visual Thinking Strategies I**  
This course will introduce regular classroom and art educators to Visual Thinking Strategies theory and methodology, building practical VTS facilitation skills through structured guidance and feedback as each participant implements VTS lessons within his/her own teaching context.  
**Credit Hours:** 3

**LTC 8750: Review of Research in Art Education**  
Studies appropriate research methodologies and reviews research and selected readings in art education.  
**Credit Hours:** 3

**LTC 8760: The Secondary School Curriculum**  
For secondary school principals, teachers, superintendents. Presents trends in curricular change, methods of curricular investigation.  
**Credit Hours:** 3

**LTC 8765: Artistic Thinking: Multimedia Applications for Teaching Art**  
This course provides opportunities for in depth discussion and discovery of the changing nature of the 21st century art classroom. Balancing theory and practice, enrollees will be challenged to critically examine the development of the unique thinking processes embodied within the studio environment.  
**Credit Hours:** 3

**LTC 8770: Curriculum Construction for Secondary Schools**  
Designed for those engaged in curriculum revision work and construction of new secondary school courses.  
**Credit Hours:** 3  
**Prerequisites:** LTC 8760 or instructor's consent

**LTC 8780: Managing Classrooms for Learning**  
Theoretical assumptions, goals, and research that inform various approaches to classroom management advocated for practitioners. Includes strategies for conducting action research on classroom management.  
**Credit Hours:** 1-3  
**Prerequisites:** An educational psychology course or instructor’s consent

**Prerequisites:**  

**LTC 8790: Patterns for Instruction in Social Studies**  
Presents and evaluates strategies for planning, teaching, and evaluating social studies in elementary and secondary schools.  
**Credit Hours:** 3

**LTC 8800: Secondary Social Studies Curriculum**  
Examines current theory, trends and practices in secondary social studies curriculum with a practicum in curriculum development.  
**Credit Hours:** 3

**LTC 8805: Inquiry into K-12 History and Social Science**  
This course is designed as a directed study on a topic in social studies content for the K-12 classroom. The focus of the course is on what is taught in social studies. Graded on A-F basis only  
**Credit Hours:** 3

**LTC 8806: Issues in the Social Studies Classroom**  
This course is designed to provide an intensive study of current trends and significant issues in social studies that affect the social studies classroom.  
**Credit Hours:** 3

**LTC 8810: Elementary Social Studies Curriculum**  
An in-depth study of objectives, goals, patterns and practices in elementary social studies curriculum. Focus will be upon instructional strategies and materials and current trends influencing curriculum development.  
**Credit Hours:** 3

**LTC 8820: Advanced Techniques in Music Education-General**  
A review and evaluation of teaching/learning strategies in selected areas and levels of music instruction.  
**Credit Hours:** 2-5  
**Prerequisites:** Music methods or instructor’s consent
LTC 8823: Advanced Techniques in Music Education-Early Childhood
A review and evaluation of teaching/learning strategies in selected areas and levels of music instruction.
Credit Hours: 2-5
Prerequisites: Music methods or instructor's consent

LTC 8825: Administration and Supervision of Music Programs
A study of the organization, management, and supervision of music programs.
Credit Hours: 3
Prerequisites: instructor's consent

LTC 8830: Curriculum Materials in Music Education-General
A development of critical abilities in evaluation and selection of music education materials. Section 1: Elementary; Section 2: Secondary Vocal; Section 3: Instrumental.
Credit Hours: 2-5
Prerequisites: instructor’s consent

LTC 8831: Curriculum Materials in Music Education-Vocal
A development of critical abilities in evaluation and selection of music education materials. Section 1: Elementary; Section 2: Secondary Vocal; Section 3: Instrumental.
Credit Hours: 2-5
Prerequisites: instructor’s consent

LTC 8840: Foundations of Music Education
A study of the history, philosophy and rationale of music education.
Credit Hours: 3
Prerequisites: instructor’s consent

LTC 8845: Techniques in Instrumental Music Teaching
A practical study of the organization and instruction of class teaching, with demonstrations by instructor and class.
Credit Hours: 3
Prerequisites: instructor’s consent

LTC 8850: Teaching Vocal Music
Studies in voice development techniques and the organization of choral programs.
Credit Hours: 3

LTC 8860: Mathematics Curriculum
Evolution of the mathematics curriculum during the 20th century will be studied. Emphasis will be given to examining major factors influencing the changing mathematics curriculum and their impact.
Credit Hours: 3
Prerequisites: teaching experience or the instructor's consent

LTC 8861: Teaching, Learning & Research in Middle & Secondary School Math I
Course I for Post-Baccalaureate Majors seeking Middle and/or Secondary teacher certification. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: LTC 8861
Corequisites: LTC 8942

LTC 8863: Teaching, Learning, and Research Middle and Secondary Math III
Course III for Post-Baccalaureate Majors seeking Middle and/or Secondary teacher certification. Graded on A-F basis only. Prerequisites: LTC 8861, and LTC 8862; Co-Requisites: LTC 8942.
Credit Hours: 3

LTC 8865: Assessment in Mathematics Education
Examination of assessment practices and the accountability movement. Emphasis is placed on significant research findings in assessment and implications for planning, implementing, and evaluating mathematics instruction.
Credit Hours: 3
Prerequisites: ESC_PS 7100 and teaching experience

LTC 8866: Contemporary Curriculum Issues in Mathematics Education
Mathematics curriculum is a concern to students, parents, school districts, business leaders, and government officials. This course examines current trends in mathematics curriculum from the perspective of mathematics educators, policymakers, and the public. Factors influencing changes in mathematics curriculum are examined. Graded on an A-F basis only.
Credit Hours: 2

LTC 8870: Mathematics Teaching and Teacher Education
Recent developments and research findings in mathematics teaching and mathematics teacher education will be studied.
Credit Hours: 3
Prerequisites: Open to masters and doctoral students

LTC 8871: Teaching and Learning Number/Operations Advanced
Course will develop understanding of learning and teaching pre-number concepts, counting and cardinality, numbers and operations in base ten. Emphasis will be given to how children think about and learn these concepts and how they fit into the elementary school curriculum. Graded on A-F basis only.
Credit Hours: 3
Corequisites: LTC 8881

LTC 8872: Teaching and Learning Rational Number Advanced
The course is designed to develop an understanding of the learning and teaching of rational numbers and the ratio and proportional relationships. Emphasis will be given to how children think about and learn these
Credit Hours: 3
Corequisites: LTC 8881
LTC 8873: Teaching and Learning Geometry and Measurement Advanced
This course is designed to develop and understanding of the teaching and learning of geometry and measurement. Emphasis will be given to how children think about and learn these concepts and how they fit into an elementary mathematics curriculum. Graded on an A-F basis only.
Credit Hours: 3
Corequisites: LTC 8883

LTC 8874: Teaching and Learning Algebraic Reasoning Advanced
Course focuses on the content and complexities of teaching and assessing algebraic reasoning in grades 1-6. Includes examinations of representation, analysis of mathematical structures, patterns, functions, and the transition from arithmetic to algebra. Graded on an A-F basis only. Corequisites: LTC 8884
Credit Hours: 3

LTC 8875: Technology and Mathematics Education
This course will focus on effective uses of technology in mathematics teaching and learning. Participants will experience different electronic technologies including computers, graphing calculators, and calculator based laboratories.
Credit Hours: 3
Prerequisites: Open to masters and doctoral students

LTC 8876: Teaching Data Analysis and Mathematical Modeling
The course will develop understanding of data analysis and mathematical modeling. Emphasis will be given to how children think and learn about these concepts and how they fit into the elementary school curriculum. Graded on A-F basis only.
Credit Hours: 3

LTC 8877: Foundations of Mathematics Leadership in Elem Schools
This course provides opportunities for participants to develop knowledge and understanding of leadership principles and the process of continuous improvement as it related to the roles and responsibilities of elementary mathematics specialists. Graded on A-F basis only.
Credit Hours: 2

LTC 8878: Mathematical Leadership for Elementary Schools Advanced
This advanced leadership course focuses on research and practice related to teamwork, interaction, communication, conflict resolution, and leadership in K-5 schools. Candidates will examine effective strategies for influencing and facilitating school/district improvement. Course graded on A-F basis only.
Credit Hours: 3

LTC 8880: Advanced Survey of Theories of Learning Mathematics
This course is designed for students to explore historical and current cognitive theories that frame research in teaching and learning of mathematics.
Credit Hours: 3
Prerequisites: ESC_PS 7350 or instructor's consent

LTC 8881: Internship - Number and Operations in Elementary Schools
A supervised mathematics teaching practicum with online seminars in which the candidate acquires experience working with a range of students and adult learners (parents and teachers) on number and operations concepts. Graded on A-F basis only. Corequisites: LTC 8871
Credit Hour: 1

LTC 8882: Internship - Rational Numbers in Elementary Schools
A supervised mathematics teaching practicum with online seminars in which the candidate acquires experience working with a range of students and adult learners (teachers and parents) on rational number and proportional thinking concepts. Graded A-F basis only. Corequisites: LTC 8872
Credit Hour: 1

LTC 8883: Internship - Geometry/Measurement in Elementary Schools
A supervised mathematics teaching practicum with online seminars in which the candidate acquires experience working with students and adult learners (teachers and parents) on geometry and measurement concepts appropriate for K-5 students. Graded on A-F basis only.
Credit Hour: 1
Corequisites: LTC 8873

LTC 8884: Internship - Algebraic Reasoning in Elementary Schools
A supervised mathematics teaching practicum with online seminars in which the candidate acquires experience working with a range of students and adult learners (teachers and parents) on concepts related to algebraic reasoning appropriate for K-5 students. Course graded on A-F basis only. Corequisites: LTC 8874
Credit Hour: 1

LTC 8885: Using Manipulative Materials in Teaching Mathematics III
Mathematics laboratory is developed and integrated with experiences in setting. Emphasis on materials for primary and intermediate grades.
Credit Hour: 2-3

LTC 8886: Contemporary Equity Issues in Mathematics Education
Certain student populations (e.g., socioeconomically disadvantaged, racial minorities, English Language Learners, students with disabilities) have been traditionally underserved by the U.S. mathematics education system. This course explores the fundamental issues underlying this situation and explores mathematics teaching techniques that can be used to make students’ learning opportunities more equitable. Graded on an A-F basis only.
Credit Hours: 3
LTC 8890: Mathematics Education Research
Examination of major research efforts and significant findings on learning and teaching mathematics. Emphasis will be placed on becoming knowledgeable of research and on developing wise consumers of research in mathematics education.
Credit Hours: 3
Prerequisites: teaching experience or instructor's consent

LTC 8893: Integrating Instruction in Science and Mathematics, Grades 5-12
This course is designed to help middle and secondary mathematics and science teachers enhance student understanding of mathematics and science through integration of the disciplines.
Credit Hours: 2

LTC 8895: Advanced Methods of Teaching Secondary School Mathematics
Discussion and application of theories of learning, strategies of instruction, curriculum development, evaluation techniques and research to secondary mathematics programs.
Credit Hours: 3
Prerequisites: Mathematics Secondary School Teaching Experience or equivalent

LTC 8896: Secondary Mathematics from an Advanced Perspective
This course deepens understanding of the mathematics underlying the secondary school curriculum. It addresses high school content from the viewpoint of advanced mathematics. Connections are explored within high school content and between high school and college content. Content strands include analysis, algebra, and Euclidean and non-Euclidean geometry. Graded on an A-F basis only.
Credit Hours: 3

LTC 8900: Seminar in Curriculum and Instruction
Seminar in Curriculum and Instruction
Credit Hour: 1-3

LTC 8910: Individual Research
Independent research not leading to thesis.
Credit Hour: 1-3
Prerequisites: consent required

LTC 8915: Classroom Research-Learning, Teaching and Curriculum
Study of original classroom research and theories of instruction leading to plans for personal research and theory development.
Credit Hour: 1-3
Prerequisites: advanced graduate standing

LTC 8920: Classroom Research-Early Childhood and Elementary
Study of original classroom research and theories of instruction leading to plans for personal research and theory development.
Credit Hours: 3
Prerequisites: advanced graduate standing

LTC 8930: Ethnographic Research in Education
Investigate practical aspects, nature, and assumptions of ethnographic research in education. Pilot study required.
Credit Hours: 3
Prerequisites: ESC_PS 7170 or equivalent

LTC 8940: In-Service Course in Curriculum and Instruction
Course work adapted to current vocational needs.
Credit Hour: 1-99
Prerequisites: instructor's consent

LTC 8941: Internship in Curriculum and Instruction
Provides internship experience under supervision in advanced levels of curriculum and instruction.
Credit Hour: 1-99
Prerequisites: departmental chairman's consent

LTC 8950: Case Study Research Methods
This course introduces graduate students to the advanced qualitative techniques related to case study research, within and across case coding strategies, and theoretical/philosophical underpinnings of case study research methodology.
Credit Hours: 3
Prerequisites: Previous introductory course in qualitative research methods is required

LTC 8951: Grounded Theory and Situated Inquiry
For qualitative researchers attempting to understand social processes, Grounded Theory (GT) offers a way of developing theory empirically, 'from the bottom up.' In fact, this is what most distinguishes GT from other methods. It is explicitly emergent. It does not test a hypothesis. It provides useful tools to learn about participants' understandings and experiences of a social issue, process, or phenomena and to discover and construct theory to account for the social processes being studied. In this course, we will consider the theoretical underpinnings and practices of classic and contemporary GT methodologies. Importantly, we will conduct research and a GT analysis of data.
Credit Hours: 3
Prerequisites: ESC_PS 8957 and ESC_PS 9620

LTC 8953: Poststructural Theory and Research Methods
Poststructural perspectives call into question the universals and/or structures of society. The purpose of this course is to expose students, in various disciplines, to poststructural theory and provide space to "have a try" at thinking with theory for data analysis. This course provides space for students to read poststructural scholars' original writings. Readings for the course also allow students to read secondary sources and research studies that apply poststructural ideas. Students are encouraged to think
of ways that poststructural theory can become a methodology and/or method for research in their discipline.

Credit Hours: 3
Prerequisites: ESC_PS 8957 and ESC_PS 9620

LTC 8954: Multimodal Analysis
Multimodal analysis examines how multiple modes such as language, images, sound, symbols, gestures, body posture/position, space, and architecture are deployed for communication purposes in social science research. Students will learn about multimodal theoretical frameworks, key concepts, and procedures in order to critically engage with semiotic resources in a variety of research contexts. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ESC_PS 8957 and ESC_PS 9620

LTC 8955: Discourse Analysis in Education
(same as ED_LPA 8955). This course introduces the theories and methods of discourse analysis, including conversation, critical discourse, and multimodal. Students will analyze the role of context and ethics, as they transcribe and analyze discourse, especially from educational settings. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ESC_PS 8957 and ESC_PS 9620

LTC 8956: Collaborative Inquiry Through Photovoice
Photovoice is a participatory action research method that invites participants to explore and document their lived experiences in order to spark dialogue with others to bring about change. In this course, students experience the process of Photovoice in order to learn how to use this process in future research.

Credit Hours: 3
Prerequisites: ESC_PS 8957 and ESC_PS 9620

LTC 8957: Qualitative Methods in Educational Research I
(same as ESC_PS 8957 and ED_LPA 8957). This course provides a practical introduction to qualitative research and its applications in education and social sciences. Graded on A-F basis only.

Credit Hours: 3

LTC 8970: The Supervision of Student Teaching-Masters
Theory, knowledge and practices involved in supervision of student teaching and other professional lab experiences. Offers assistance in all major aspects of supervision of student teaching.

Credit Hours: 3

LTC 9090: Research in Curriculum and Instruction
Graded on a S/U basis only.

Credit Hour: 1-99

LTC 9620: Qualitative Methods in Educational Research II
(same as ED_LPA 9620 and ESC_PS 9620). This course constructs a conceptual and methodological bridge between the understandings of qualitative research developed in Qualitative Methods I and more advanced study of theories, designs, and methods. The focus is on theory, approaches to data analysis, and interpretation. Graded on A-F basis only.

Credit Hours: 3

LTC 9970: The Supervision of Student Teaching-Doctoral
Theory, knowledge and practices involved in supervision of student teaching and other professional lab experiences. Offers assistance in all major aspects of supervision of student teaching.

Credit Hours: 3

Learning, Teaching, & Curriculum - Vocational (LTC_V)

LTC_V 1050: Principles of Sales
Provide the student with the concepts, tools and skills to become a professional salesperson. Emphasis is placed upon participation and performance of sales skills.

Credit Hours: 3

LTC_V 1070: Keyboarding and Word Processing Concepts
Instruction in mastering the keyboard and operative parts of a microcomputer. Preparation of business communications: reports; and legal; medical; and government documents. Special emphasis on developing high standards of keyboarding speed and accuracy.

Credit Hours: 3

LTC_V 1110: Principles of Retailing
Examines problems, opportunities and trends in retailing. Problems and cases deal with store organization, budgeting, control, personnel and operation.

Credit Hours: 3

LTC_V 1210: Introduction to Microcomputers
An overview of the hardware and software components of a microcomputer system.

Credit Hour: 1

LTC_V 2050: Merchandising
Develop basic competencies essential to successful merchandising. Studies skills essential in merchandising, and analysis of merchandising functions and activities.

Credit Hours: 3

LTC_V 2110: Business and Interpersonal Communications
Study of communication theory and principles as applied to business situations and practices; development of communications skills in the area of communication such as speaking, writing, listening, and nonverbal communication.

Credit Hours: 3
LTC_V 2150: The Virtual Workplace
Encompasses the management of alternative work environments and the unique situations that arise by addressing the use of email, computerized meetings, virtual office design, web page issues for business, and other technology for virtual work.
Credit Hours: 3

LTC_V 3110: Field Experiences in PAVTE
Supervised observational and instructionally related activities within one of the PAVTE program areas at the secondary or postsecondary level. Student participates 30 clock hours for each semester hour of credit. Graded on S/U basis only.
Credit Hour: 1-4

LTC_V 3150: Directed Occupational Experience
Reports based on employment experience in selected occupations combined with related conferences and/or seminars. May repeat until four semester hours accumulated.
Credit Hour: 1-4

LTC_V 3510: Human Relations in Organizations
Principles, theory, processes and problems of effective human relations in marketing organizations
Credit Hours: 3

LTC_V 4085: Problems in Curriculum and Instruction - CTE
Study of professional programs and issues or technical problems related to the field of career and technical education.
Credit Hour: 1-99

LTC_V 4210: Foundations of Adult Workforce Education
Study of workforce education and human resource development; emphasis on the foundational concepts of adult learning theory and its application to the development and use of instructional methods, curriculum design, and procedures for adult workforce and professional education. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ESC_PS 4115; senior standing

LTC_V 4387: Seminar in Workforce Education
Seminar experiences for students in any workforce education discipline area; meets the capstone requirement for students in the Bachelor of Educational Studies program (minimum 2.0 credit hours).
Credit Hour: 1-3
Prerequisites: instructor's consent

LTC_V 4510: Coordination of Cooperative Occupational Education
Problems and procedures in the operation of cooperative occupational education programs. Especially designed for those who can qualify as coordinators of occupational education programs of a cooperative nature.
Credit Hours: 3

LTC_V 4550: Utility Software for Microcomputers
An introduction to major types of microcomputer utility programs, including desktop publishing, presentation, spreadsheet, and data base.
Credit Hours: 2
Prerequisites: LTC_V 1210 or equivalent

LTC_V 4570: Career Guidance
Problems, methods, and procedures involved in assisting individuals in choosing, preparing for, entering upon, and progressing in their career. For workforce development and human resource professionals, employment counselors, and teachers, counselors, and school administrators.
Credit Hour: 2-3

LTC_V 4610: Field Study in Occupational Education
Directed observation in a cross section of business and industry combined with reports, weekly seminars and/or conferences. May repeat until four semester hours accumulated.
Credit Hour: 1-4

LTC_V 4650: Document Planning and Design
Using the hands-on approach, students will develop skills in the planning, design layout, and creation of various business documents, as well as the ability to evaluate various types of documents.
Credit Hours: 3
Prerequisites: LTC_V 4550 or equivalent

LTC_V 4710: Business Software Applications
Advanced concepts, features, and applications central to the major types of business software--spreadsheets, database management, word processing, graphics, and communications.
Credit Hours: 3
Prerequisites: LTC_V 4550 or equivalent

LTC_V 4750: Occupational Analysis
Techniques, procedures of analyzing occupations into their basic elements. Required of trade teachers, coordinators.
Credit Hours: 2

LTC_V 4770: Methods in Vocational Education for the Disabled and Disadvantaged
(same as SPC_ED 4390). Study of legislation, interagency cooperation, curriculum, transition, evaluation/grading role of support personnel. For educators, counselors and administrators working in vocational settings with special needs students and students with disabilities.
Credit Hours: 3

LTC_V 4780: Development and Assessment of Workforce Education Curriculum
Curriculum development and assessment course focused on competencies, curriculum selection, organization, development, and assessment for instructors of workforce and professional education courses and human resource training programs.
Credit Hours: 3
Prerequisites: ESC_PS 2400 and junior standing

LTC_V 4790: Laboratory Planning and Management
This course is designed to acquaint the student with the procedures, techniques and skills necessary for proper organization, management, care, and utilization of career and technical education facilities, programs, equipment, and materials.
Credit Hours: 3
Prerequisites: LTC_V 1210 and LTC_V 4550

LTC_V 4801: Topics in Career and Technical Education
Topics in the field of career and technical education and the CTE program areas.
Credit Hour: 1-99

LTC_V 4805: Principles of Leadership in the Workplace
Course explores the foundational concepts of leadership and its impact on the organizational behavior of individuals in the workplace. Theories of leadership will be examined, and concepts will be applied to workplace situations based on differing organizational factors. Course graded on A-F basis only.
Credit Hours: 3

LTC_V 4811: Workforce Education Teaching Methods
Develops specialized organization and administration capabilities for workforce education subjects. Topics include managing activities, individualized instruction, nontraditional students, students with disabilities, and emerging technologies.
Credit Hours: 3
Prerequisites: senior standing

LTC_V 4830: Curriculum Content in Marketing Education
Curricular development process, knowledge of core area and competencies of Marketing Education Program. Selection of instructional material.
Credit Hours: 3
Prerequisites: ESC_PS 2400

LTC_V 4840: Methods of Teaching Marketing Education
Instructional materials, methods and techniques used to teach the marketing education curriculum. Includes evaluating delivery of instruction.
Credit Hours: 3
Prerequisites: LTC_V 4780 and LTC_V 4830

LTC_V 7083: Teaching Personal Finance Literacy
(same as FINPLN 7083) Principles and practices of teaching personal finance with particular emphasis on income, money management, spending and credit, and savings and investing. Course graded on A-F basis only.
Credit Hours: 3

LTC_V 7085: Problems in Curriculum and Instruction-CTE
Study of professional programs and issues or technical problems related to the field of career and technical education.
Credit Hour: 1-99

LTC_V 7387: Seminar in Career and Technical Education
Seminar experiences for students within one of the career and technical education areas.
Credit Hour: 1-3
Prerequisites: instructor’s consent

LTC_V 7510: Coordination of Cooperative Occupational Education
Problems and procedures in the operation of cooperative occupational education programs. Especially designed for those who can qualify as coordinators of occupational education programs of a cooperative nature.
Credit Hours: 3

LTC_V 7550: Utility Software for Microcomputers
An introduction to major types of microcomputer utility programs, including desktop publishing, presentation, spreadsheet, and data base.
Credit Hours: 2
Prerequisites: LTC_V 1210 or equivalent

LTC_V 7610: Field Study in Occupational Education
Directed observation in a cross section of business and industry combined with reports, weekly seminars and/or conferences. May repeat until four semester hours accumulated.
Credit Hour: 1-4

LTC_V 7750: Occupational Analysis
Techniques, procedures of analyzing occupations into their basic elements. Required of trade teachers, coordinators.
Credit Hours: 2
LTC_V 7770: Methods in Vocational Education for the Disabled & Disadvantaged
(same as SPC_ED 4390). Study of legislation, interagency cooperation, curriculum, transition, evaluation/grading role of support personnel. For educators, counselors and administrators working in vocational settings with special needs students and students with disabilities.

Credit Hours: 3

LTC_V 7780: Development & Assessment of Vocational-Technical Curriculum
Curriculum development/assessment course focused on competencies, curriculum selection, organization, development, and assessment in the context of the Missouri Vocational Instructional Management System.

Credit Hours: 3
Prerequisites: ESC_PS 2400

LTC_V 7790: Laboratory Planning and Management
This course is designed to acquaint the student with the procedures, techniques and skills necessary for proper organization, management, care, and utilization of career and technical education facilities, programs, equipment, and materials.

Credit Hours: 3
Prerequisites: LTC_V 1210 and LTC_V 7550

LTC_V 7801: Topics in Career and Technical Education
Topics in the field of career and technical education and the CTE program areas.

Credit Hour: 1-99

LTC_V 7810: Technology and Industry Education Methods
Develops specialized organization and administration capabilities for Industrial and Technology Education. Topics include managing activities, individualized instruction, nontraditional students, students with disabilities, and emerging technologies.

Credit Hours: 3
Prerequisites: professional standing

LTC_V 7830: Curriculum Content in Marketing Education
Curricular development process, knowledge of core area and competencies of Marketing Education Program. Selection of instructional material.

Credit Hours: 3
Prerequisites: ESC_PS 2400

LTC_V 7840: Methods of Teaching Marketing Education
Instructional materials, methods and techniques used to teach the marketing education curriculum. Includes evaluating delivery of instruction.

Credit Hours: 3
Prerequisites: LTC_V 7780 and LTC_V 7830

LTC_V 8085: Problems in Workforce and Professional Education
Independent, directed study on a topic in the areas of workforce, professional, or technology education.

Credit Hour: 1-99

LTC_V 8190: Research Applications for Career and Technical Education
Interpretation, evaluation, and application of research methodologies and findings in career and technical education.

Credit Hours: 3

LTC_V 8210: Foundations of Program Development in Adult Workforce Education
The adult workforce and professional education movement; characteristics of and learning principles applied to adult students; instructional materials, methods and procedures in organizing and operating adult vocational education programs.

Credit Hours: 3

LTC_V 8250: Principles of Business and Marketing Education Methods
Organization, curriculum, problems, and trends of business and marketing education in secondary schools and colleges.

Credit Hours: 3

LTC_V 8287: Seminar in Career and Technical Education
Seminar in Career and Technical Education

Credit Hour: 1-3

LTC_V 8310: Foundations of Career and Technology Education

Credit Hours: 3

LTC_V 8350: Curriculum Development for Workforce and Professional Education
In-depth investigation of curriculum development theory, research, issues, and procedures for workforce and professional education in the public and private sectors.

Credit Hours: 3

LTC_V 8410: Improvement of Instruction in Using Technology
Incorporates recent development in application of technology to methods, techniques, and materials of instruction in career and technical education classrooms and laboratories.

Credit Hours: 3
Prerequisites: LTC_V 7550 or instructor’s consent

LTC_V 8420: Improvement of Instruction in Business Skills Subjects
Developments and trends in the instructional program of business skills courses.

Credit Hours: 3
LTC_V 8501: Topics in Workforce and Professional Education
Topics in the field of workforce, professional, or technology education in the CTE program areas.
Credit Hour: 1-99

LTC_V 8510: Evaluation in Workforce and Professional Education
Development of evaluation procedures and the construction of evaluation devices for workforce and professional education. Emphasizes performance evaluation, improvement of instruction, and program review.
Credit Hours: 3

LTC_V 8520: Implementation and Administration of Career and Technical Education Program
Types of organization, approved administrative and supervisory practices, and state and federal guidelines for programs of career and technical education.
Credit Hours: 3

LTC_V 8940: In-Service Course in Vocational-Technical Education
In-Service Course in Vocational-Technical Education
Credit Hour: 1-99

Linguistics (LINGST)

LINGST 1060: Human Language
(same as ANTHRO 1060, C_S_D 1060, ENGLISH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data, with some attention to application of linguistic study to other disciplines.
Credit Hours: 3

LINGST 2001: Topics in Linguistics-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-99
Prerequisites: consent of chair

LINGST 2040: Anthropological Linguistics
(same as ANTHRO 2040). Language in relation to other aspects of human behavior. Introduction to description and analysis of the basic units of language. Emphasis on non-Indo-European and preliterate languages.
Credit Hours: 3
Recommended: sophomore standing

LINGST 2601: Languages of Africa
(same as BL_STU 2601 and ENGLISH 2601). Introduction to the diversity of the 2000+ African languages, including first-hand experience exploring a few in detail with native speakers. Features of African languages are compared with others of the world. Political and social aspects of language in Africa are discussed.
Credit Hours: 3

LINGST 2700: Elementary Logic
Credit Hours: 3
Prerequisites: grade of C or higher in MATH 1100 or MATH 1120 or equivalent

LINGST 2820: Introduction to Cognitive Science
(same as PSYCH 2820 and PHIL 2820). Cognitive science is the interdisciplinary study of the mind. After an overview of the foundations of cognitive science as a whole, we will see what particular sectors of it have to say about mental capacities such as vision, language, categorization, and social cognition.
Credit Hours: 3
Prerequisites: sophomore standing required
Recommended: PSYCH 1000

LINGST 3001: Topics in Linguistics-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-99
Prerequisites: consent of chair

LINGST 3010: American Phonetics
(same as C_S_D 3010). Analysis of production and acoustics of the sounds of speech with an emphasis on American English; practice in broad and narrow transcription using the International Phonetic Alphabet.
Credit Hours: 3

LINGST 3210: Anatomy and Physiology of the Speech Mechanism
(same as C_S_D 3210). Introduction to anatomical and functional aspects of the speech mechanism.
Credit Hours: 3
Corequisites: must be taken concurrently with C_S_D or LINGST 3220

LINGST 3220: Speech Acoustics
(same as C_S_D 3220). An introduction to the acoustic aspects of speech as they relate to the respiratory, phonatory, resonatory, and articulatory systems.
Credit Hours: 2
Corequisites: Must be taken concurrently with C_S_D 3210
LINGST 3470: Culture as Communication
(same as ANTHRO 3470, COMMUN 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction.
Credit Hours: 3
Prerequisites: sophomore standing

LINGST 3710: Survey of Minority and Creole Languages of the U.S. and the Caribbean
(same as SPAN 3710 and FRENCH 3710). Analysis of the state of the minority languages of the U.S. and the Creole languages of the Caribbean with particular attention to the social status of these languages and speakers' attitudes toward them in context of ethnic, cultural, and national identity (taught in English).
Credit Hours: 3
Prerequisites: sophomore standing

LINGST 3721: Spanish Phonetics
(same as SPAN 3721). Introductory course to the study of Spanish phonological, phonetic and spelling systems, practice of pronunciation, phonetic transcriptions, and introduction to the variation of Spanish pronunciation in the Hispanic world. The course is conducted in Spanish.
Credit Hours: 3
Prerequisites: SPAN 2160 or equivalent

LINGST 4001: Topics in Linguistics-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-99
Prerequisites: consent of chair

LINGST 4100: Philosophy of Language
(same as PHIL 4100). Examination of contemporary views of the relationship between language, minds, and the world.
Credit Hours: 3
Prerequisites: sophomore standing and PHIL 2700 and one other course in Philosophy; or instructor's consent

LINGST 4110: Advanced Logic
(same as PHIL 4110, cross-leveled with LINGST 7110). Presents the method of truth trees for sentence and predicate logic. Examines proofs concerning the decidability, soundness, and completeness of formal systems. Emphasizes the theory of formal systems.
Credit Hours: 3
Prerequisites: sophomore standing and PHIL 2700; or instructor's consent

LINGST 4200: Introduction to Old English
(same as ENGLISH 4200). A beginning study of the Old English or Anglo-Saxon language in its cultural context, with emphasis on gaining a reading knowledge.
Credit Hours: 3
Prerequisites: junior standing

LINGST 4400: Language and Culture
(same as ANTHRO 4400). Interrelations between language, thought, culture, and society; role of language in cognition; methods and concepts of linguistics in cultural analysis.
Credit Hours: 3
Prerequisites: ANTHRO 2040 or LINGST 2040 or instructor's consent

LINGST 4412: Gender, Language and Communication
(same as COMMUN 4412 and ANTHRO 4412). Relationships among gender, language, nonverbal communication, and culture.
Credit Hours: 3
Prerequisites: junior standing or departmental consent

LINGST 4415: Language and Discourse
(same as COMMUN 4415). Analysis of the rules of social interaction and the functions of language in discourse.
Credit Hours: 3

LINGST 4420: Historical Linguistics
(same as ANTHRO 4420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.
Credit Hours: 3
Prerequisites: junior/senior standing or instructor’s consent

LINGST 4600: Structure of American English
(same as ENGLISH 4600). Introduction to English linguistics. Study of the grammar and pronunciation of contemporary English, with the major focus on syntax.
Credit Hours: 3
Prerequisites: junior standing

LINGST 4610: History of the English Language
(same as ENGLISH 4610). Historical changes in the grammar and pronunciation of the English language from Old English to the present. Introduction to Indo-European origins of English.
Credit Hours: 3

LINGST 4620: Regional and Social Dialects of American English
(same as ENGLISH 4620). The study of regional and social variation in pronunciation, vocabulary, and syntax of American English.
Credit Hours: 3
Prerequisites: LINGST 4600 and LINGST 4610 or equivalent

LINGST 4630: Phonology
(same as ENGLISH 4630). Survey of the sound patterns of English, with some comparison to other languages.
Credit Hours: 3
Prerequisites: LINGST 4600 or another introductory course in linguistics or phonetics
LINGST 4640: Syntax
(same as ENGLSH 4640). Study of the properties of phrase and sentence-level grammar, emphasizing English, with some comparison to other languages.
Credit Hours: 3
Prerequisites: LINGST 4600 or another comparable linguistics course

LINGST 4650: Principles of Teaching English as a Second Language
(same as ENGLSH 4650 and LTC 4460). Linguistic and pedagogical principles of teaching English to speakers of other languages.
Credit Hours: 3
Prerequisites: LINGST 4600 and LINGST 4610 or equivalent

LINGST 4710: History of the French Language
(same as FRENCH 4710). Study of the French language from its Latin origin to the present. The course includes a survey of the external, social, political, and historical factors that have affected the development of French, followed by diachronic study of the internal structural features of the language.
Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

LINGST 4711: History of the Spanish Language
(same as SPAN 4711). Diachronic analysis of phonological morphological, and syntactical systems of Spanish, from Vulgar Latin to contemporary dialects.
Credit Hours: 3
Prerequisites: Completed with passing grade any Linguistics course 3000 or above or by consent of instructor
Recommended: SPAN 3420 and SPAN 3430

LINGST 4720: Structure of Modern French
(same as FRENCH 4720). An introductory presentation of the phonological and syntactic systems of contemporary standard French.
Credit Hours: 3
Prerequisites: FRENCH 3160 or equivalent or instructor’s consent

LINGST 4721: Structure of Modern Spanish
(same as SPAN 4721). Synchronic analysis of phonology morphology and syntax of spoken Spanish dialects.
Credit Hours: 3
Prerequisites: four 3000-level courses in Spanish

LINGST 4722: Spanish Across the Continents
(same as SPAN 4722). This course focuses on the effects of migratory movements on language change, considering the Spanish spoken in Latin America, Puerto Rico, Spain and the USA. The class sharpens awareness and recognition of the linguistic diversity of the Spanish-speaking regions of the world. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: four 3000-level courses in Spanish

LINGST 4723: Language and Society: Spanish in the U.S.
(same as SPAN 4723). This class surveys linguistic and social issues pertaining to Spanish in the U.S. (past, present and future). Topics include bilingualism, code switching (a.k.a. Spanglish), first language attrition, linguistic identity, and the role of Spanish in Education, services and media. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: four 3000-level courses in Spanish

LINGST 4730: Linguistic Theory and Language Acquisition
The goal of this class is to study the implications of current linguistic theory for contemporary research on second language acquisition. In particular, the hypothesis that second language acquisition follows some of the same principles as first language acquisition is explored. Course is taught in English.
Credit Hours: 3
Prerequisites: LINGST 4720, LINGST 4721, LINGST 4600, or LINGST 4860

LINGST 4740: Interdisciplinary Introduction to NLP
(same as CMP_SC 4740; cross-leveled with LINGST 7740). The goal of this course is to enable students to develop substantive NLP applications. Focus on current structural and statistical techniques for the parsing and interpretation of texts.
Credit Hours: 3
Prerequisites: senior standing

LINGST 4810: Psycholinguistics
(same as C_S_D 4810). Examination of the knowledge and processes that underlie the human ability to produce and understand language.
Credit Hours: 3
Prerequisites: instructor’s consent

LINGST 4820: Speech Perception
(same as C_S_D 4820). Selected topics in the perceptual processing of spoken language.
Credit Hours: 3
Prerequisites: senior standing

LINGST 4850: Practical Phonetics for Fieldwork
(same as ANTHRO 4850). Self-paced course using computer and tape recorded lessons from world’s languages. Teaches practical articulatory and transcription phonetics. Weekly meeting with instructor to monitor progress, resolve questions.
Credit Hours: 3
Prerequisites: junior standing or instructor’s consent

LINGST 4860: Techniques in Linguistic Analysis
(same as ANTHRO 4860). Problems in analyzing data from various languages.
Credit Hours: 3
Prerequisites: introductory course in Linguistics or instructor’s consent

</table>

Prerequisites:
- LINGST 4600 or LINGST 7600 and LINGST 7610 or equivalent
LINGST 7710: History of the French Language  
(same as FRENCH 7710).  
Credit Hours: 3

LINGST 7711: History of the Spanish Language  
(same as SPAN 7711). Diachronic analysis of Spanish phonology, morphology, and syntax from Vulgar Latin to modern period.  
Credit Hours: 3  
Prerequisites: completed with passing grade any Linguistics course 3000 or above or by instructor's consent

LINGST 7720: Structure of Modern French  
(same as FRENCH 7720). An introductory presentation of the phonological and syntactic systems of contemporary standard French.  
Credit Hours: 3

LINGST 7721: Structure of Modern Spanish  
(same as SPAN 7721). Synchronic analysis of phonology morphology and syntax of spoken Spanish dialects.  
Credit Hours: 3

LINGST 7730: Linguistic Theory and Language Acquisition  
(same as RM_LAN 7730). The goal of this class is to study the implications of current linguistic theory for contemporary research on second language acquisition. In particular, the hypothesis that second language acquisition follows some of the same principles as first language acquisition is explored. Course is taught in English.  
Credit Hours: 3  
Prerequisites: LINGST 7720, LINGST 7721, LINGST 7600 or LINGST 7860

LINGST 7740: Interdisciplinary Introduction to Natural Language Processing  
(same as CMP_SC 7740; cross-leveled with LINGST 4740). The goal of this course is to enable students to develop substantive NLP applications. Focus on current structural and statistical techniques for the parsing and interpretation of text.  
Credit Hours: 3

LINGST 7810: Psycholinguistics  
(same and C_S_D 7810). Examines the knowledge and processes that underlie the human ability to produce and understand language.  
Credit Hours: 3  
Prerequisites: instructor's consent

LINGST 7820: Speech Perception  
(same as C_S_D 7820). Selected topics in the perceptual processing of speech sounds and spoken language.  
Credit Hours: 3  
Prerequisites: instructor's consent

LINGST 7850: Practical Phonetics for Fieldwork  
(same as ANTHRO 7850). Self-paced course using computer and tape recorded lessons from world's languages. Teaches practical articulatory and transcription phonetics. Weekly meeting with instructor to monitor progress, resolve questions.  
Credit Hours: 3

LINGST 7860: Techniques in Linguistic Analysis  
(same as ANTHRO 7860). Problems in analyzing data from various languages. Prerequisites: introductory course in Linguistics or instructor’s consent  
Credit Hours: 3

LINGST 7870: Field Methods in Linguistics  
(same as ANTHRO 7870 and ENGLSH 7670). Intensive training in collection and analysis of data taken from a native speaker of non-Indo-European language.  
Credit Hours: 4  
Prerequisites: 9 hours in Linguistics

LINGST 8000: Problems  
Independent study through readings, analysis of special linguistic problems, reports.  
Credit Hours: 3  
Prerequisites: one Advanced Linguistics course and instructor's consent

LINGST 8100: Speech Science  
(same as C_S_D 8100). Introduction to the physiological and acoustic aspects of speech production; instrumentation for speech analysis including computer-based speech processing techniques.  
Credit Hours: 4  
Prerequisites: C_S_D 3010, C_S_D 3210, and C_S_D 3230 or equivalents

LINGST 8110: Speech Physiology  
(same as C_S_D 8110). Analysis of physiological features associated with speech subsystems; theories of encoding with special emphasis on speech motor control mechanisms.  
Credit Hours: 3

LINGST 8120: Bilingualism and Language Contact  
(same as SPAN 8120 and FRENCH 8120). Global analysis of the study of Bilingualism from a combined sociocultural, sociolinguistic and psycholinguistic perspective based on current research and examination of various phenomena of language contact (taught in Eng.).  
Credit Hours: 3

LINGST 8487: Seminar in Anthropological Linguistics  
(same as ANTHRO 8487). Topics: Ethnolinguistics, linguistic prehistory, pidgin and Creole languages, linguistic theories and cultural and cultural analysis. French structural anthropology. May be repeated for 9 hours maximum.  
Credit Hours: 3

LINGST 8600: Seminar in the English Language  
(same as ENGLSH 8600). Descriptive and historical studies of the English language. Topics (e.g., The Germanic Origins, Modern Syntactic
Analysis) announced at time of registration. May be repeated up to twelve hours with departmental approval.

Credit Hours: 3

LINGST 8615: History of the German Language
(same as GERMAN 8615).

Credit Hours: 3

LINGST 8625: Middle High German
(same as GERMAN 8625).

Credit Hours: 3

Management (MANGMT)

MANGMT 1010: Contemporary Business Practices
Course coverage includes an overview of the accountancy, finance, management and marketing majors and careers in each of these fields as well as the integrated nature of business. Graded on A-F basis only.

Credit Hour: 1

MANGMT 1030: Vasey Academy on Leadership Issues
Business seminar course restricted to Vasey Academy scholars. Focus on leadership issues and on career opportunity exploration in key areas of business. Graded on A-F basis only.

Credit Hour: 1

MANGMT 1050: Contemporary Leadership Issues in Business
Course focuses on contemporary business leadership practices and includes an overview of the accountancy, finance, management and marketing majors and careers in each of these fields.

Credit Hours: 3
Prerequisites: instructor’s consent

MANGMT 3000: Principles of Management
Introduction to the basic concepts of management and organization; their application to operations and personnel management.

Credit Hours: 3
Prerequisites: Completion of 45 semester hours

MANGMT 3000H: Principles of Management - Honors
Introduction to the basic concepts of management and organization; their application to operations and personnel management.

Credit Hours: 3
Prerequisites: Completion of 45 semester hours. Honors eligibility required

MANGMT 3100: Job Search Strategies
Provides relevant information and skills to help students interested in careers in business conduct an effective job search. Topics covered include self-assessment, company research, preparing a resume, interview skills, networking skills, and negotiation skills.

Credit Hour: 1

MANGMT 3200: Business and Society
This course emphasizes the ethical implications of managerial decisions and the relationships between businesses and stakeholder groups. Major topics include corporate governance, social responsibility, rights and obligations, and international business.

Credit Hours: 3
Prerequisites: Admission to upper level business program

MANGMT 3200H: Business and Society - Honors
his course emphasizes the ethical implications of managerial decisions and the relationships between businesses and stakeholder groups. Major topics include corporate governance, social responsibility, rights and obligations, and international business.

Credit Hours: 3
Prerequisites: Admission to upper level business program; Honors eligibility required

MANGMT 3300: Introduction to Business Processes and Technologies
Introduces students to cross-functional business processes including both transactional and decision making forms. Current and emerging technologies used to facilitate efficient and effective action in these processes are explored.

Credit Hours: 3
Prerequisites: ACCTCY 2258

MANGMT 3540: Introduction to Business Law
The legal aspects of business related to society--introduction to the legal system; constitutional, criminal, tort law; contracts and sales law cases and problems; administrative regulation of business and consumer issues.

Credit Hours: 3
Prerequisites: completion of 30 semester hours

MANGMT 3700: Diversity and Inclusion in Management
Discuss elements of diversity including race, gender, ethnicity, religion, sexual orientation, socioeconomic status, and age, among others, as these impact effective management in the workplace through a variety of workplace performance-related outcomes. Explore ways to contribute to, learn from, and benefit from a more diverse and inclusive work environment. Examine methods of optimizing human performance and potential in organizations. Create personal action plan to increase awareness, knowledge, skills and global perspective relative to diversity and inclusion. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MANGMT 3000

MANGMT 3901: Special Topics in Management
Study of a selected topic in management taken as part of an organized short-term study abroad program. Some sections of this course may be graded on either on A-F or S/U basis only.

Credit Hour: 1-3
Prerequisites: instructor’s consent
MANGMT 3901H: Special Topics in Management - Honors
Study of a selected topic in management taken as part of an organized short-term study abroad program. Some sections of this course may be graded on either on A-F or S/U basis only.

Credit Hour: 1-3
Prerequisites: instructor’s consent. Honors eligibility required

MANGMT 3910: Managing Across Cultures
Applying cultural dimensions to developing cross-cultural behavioral competencies utilizing code-switching training methods. For all persons interested in improving international person-to-person interactions.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 3920: Managing People in the Global Enterprise
Focuses on management of people in global organizations- especially for-profit enterprises. Topics include differences across countries in recruitment and selection, training and development, leadership and motivation, compensation, cross-cultural negotiation, and employment relations. The use of expatriates and host country nationals as managers is contrasted. Challenges involved in repatriating expatriates and their families after lengthy terms of service in foreign countries are explored. Graded on A-F basis only.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 3975: Current Issues in International Management
Study of current issues and practices in international management taken as part of an organized short term study abroad program. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: instructor’s consent

MANGMT 4010: Operations Management
(cross-leveled with MANGMT 7010). Managerial analysis of operating problems, with emphasis on planning and control systems. Math Reasoning Proficiency Course.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4020: Human Resource Management
(cross-leveled with MANGMT 7020) Introduction to strategies and best practices in attracting, retaining, developing, and compensating employees.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4030: Organizational Behavior
(cross-leveled with MANGMT 7030). Examines theoretical constructs and research findings on human behavior in work organizations such as businesses, especially individual differences, dyadic relations and small group behavior.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4050: Management of Service Operations
Managing services, especially the operation’s activity in service firms. Includes determining the service package, forecasting service demand, managing demand, capacity analysis and management, scheduling, cost control, service quality, and human resource management. Standardization, franchising, and service automation addressed.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4060: Project Management Fundamentals
Practical methods and techniques for managing projects with selective attention to human resource issues. Includes project breakdown analysis, task network scheduling, resource allocation, and assessment/evaluation of project performance.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4110: Total Quality Management
Introductory, comprehensive approach to quality planning, analysis, and control. Applications orientation. Integrates customer needs, product and service design and delivery, and continuous improvement into all organizational activities. Examines full range of behavioral, technical, and organizational aspects relating to quality.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4120: Human Resource Management Law
Analysis and evaluation of legal and administrative regulations of terms of employment; Fair Labor Standards, discriminatory practices, safety and health regulations, other regulations.

Credit Hours: 3

MANGMT 4130: Advanced Organizational Behavior
Based upon behavioral science concepts and research findings directed toward understanding and explaining human behavior within organizations. Case studies, individual or team projects.

Credit Hours: 3
Prerequisites: MANGMT 4030

MANGMT 4140: Business Communication
The course provides the fundamentals of business communication skills, including written, oral communication, listening, multicultural communication, and teamwork skills, with an emphasis on written communication skills as a methods to communicate with important stockholders.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4150: Problems in Management
Undergraduate students may select topics for study and investigation. Selected sections of this course may be graded either on A-F or S/U basis only.
Credit Hour: 1-9
Prerequisites: instructor's consent

MANGMT 4201: Topics in Management
(cross-leveled with MANGMT 7201). Selected current topics in management. Offered on an experimental, one-semester basis only.
Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4201H: Topics in Management
Selected current topics in management. Offered on an experimental, one-semester basis only.
Credit Hours: 3
Prerequisites: will vary with different topics. Honors eligibility required

MANGMT 4220: Compensation Theory and Practice
Examines the empirical research and theory relating to the effect of compensation administration systems upon employee satisfaction and performance. Analysis of financial compensation systems and benefit programs in use in modern organizations.
Credit Hours: 3
Prerequisites: MANGMT 4020

MANGMT 4310: Modern Manufacturing
Contemporary qualitative and quantitative analysis of automation systems for production and inventory; robotics, digital data matrix and Q/R coding, PLC overview; uncertainty, risk, and policy considerations; analysis of networks; management problems in application.
Credit Hours: 3
Prerequisites or Corequisites: MANGMT 4010

MANGMT 4320: Selected Problems in Human Resource Management
Advanced studies in selected administrative and technical policies, practices in employee relations, with individual and group project work, research. Focuses on policy issues, research findings, advanced techniques.
Credit Hours: 3
Prerequisites: MANGMT 4020

MANGMT 4330: Organization Theory
(cross-leveled with MANGMT 7330). Elements of the managerial process; emphasis on theory of organization structure and design and the impact of technology and culture on organization systems.
Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4330H: Organization Theory - Honors
Elements of the managerial process; emphasis on theory of organization structure and design and the impact of technology and culture on organization systems.
Credit Hours: 3
Prerequisites: Honors eligibility required
Corequisites: MANGMT 3000

MANGMT 4340: Crisis Management
Management strategies for media relations, image and identify building, internal communication, government relations, and crisis communication are explored through case studies, film, literature, and current popular culture.
Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4350: Leadership Development
Provides a comprehensive understanding of leadership development within the corporate environment. Examines causes and outcomes of different styles of leadership that are designed to fit the needs of individuals and/or specific situations.
Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4420: Collective Bargaining
Content, negotiation, administration of collective labor agreements and settlement of disputes.
Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4450: Management of Electronic Commerce
An introduction to electronic commerce. Topics covered include definition and scope of e-commerce, tools and technologies used, strategies, and understanding of this dynamic field.
Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4460: Electronic Commerce Security
Comprehensive introduction to the concepts, technologies, and applications of security in electronic commerce. Topics include security policy, privacy, cryptography, types of attacks, protection, detection and response strategies.
Credit Hours: 3
Prerequisites: ACCTCY 2258
Corequisites: MANGMT 3000

MANGMT 4480: Business Data Communication and Networking
Introduction to fundamental principles of technical and managerial aspects of business data communications and networks. Basic concepts and principles, protocol layers, content distribution, routing, LAN, wireless, security, network management, multimedia networking, and new developments.
Credit Hours: 3
Prerequisites: ACCTCY 2258
Corequisites: MANGMT 3000

MANGMT 4520: Change Management in Business
Provides a comprehensive understanding of the processes of change in the corporate environment. Examines antecedents of change such as acquisitions, mergers, technology and new leadership as well as approaches to managing change using tools from organization development (OD).
Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4540: Legal Aspects of Business Organization and Operation
Includes agency and employment relationships, sole proprietorships, partnerships, and corporations, also operational aspects of business associations such as administrative regulation, taxation, bankruptcy, and trade regulation.
Credit Hours: 3
Prerequisites: MANGMT 3540

MANGMT 4560: The Law of Commercial Credit Transactions
Purchase and sale of goods, services and real property—discussion includes drafts, notes, security agreements under the Uniform Commercial Code, and credit financing of real estate.
Credit Hours: 3
Prerequisites: MANGMT 3540

MANGMT 4610: Database Management
This is an introductory course on database (DB) technology. It introduces such technology and provides hands-on experience in designing and developing DBs to meet organizational goals. Topics include database concepts such as entity-relationship modeling, data modeling, relational database development, SQL, application of popular database systems software, data warehousing, and selected advanced topics in business use of DBs. Students work in groups to develop a database system project for an organization of their choice. Graded on A-F basis only.
Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4620: Web Development Fundamentals
An introduction to the fundamentals of design, technology and project management aspects of developing websites. Some web based programming languages including HTML, CSS, JavaScript and ASP/VBScript and an introduction to Adobe Photoshop and Macromedia Dreamweaver.
Credit Hours: 3
Prerequisites: ACCTCY 2258
Corequisites: MANGMT 3000

MANGMT 4700: Principles of Entrepreneurship
An introductory course designed to provide a solid foundation of the role of entrepreneurship. The focus is on the creation of new ventures, the decisions leading to their development, and the factors that lead to their success.
Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4710: The Entrepreneurial Process
This course deals with critical thinking, logic, emotional intelligence, ethics and a problem solving/decision making frame in the context of the entrepreneurial business phases: opportunity identification; launch after gathering resources; managing growth and harvesting rewards.
Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4720: Experiential Entrepreneurship
The course will engage students in experiences that develop entrepreneurial characteristics such as a passion for business, tenacity despite failure, self-determination, management of risk, self-confidence, creating opportunities, creativity, initiative, and detail orientation.
Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4730: New Business Planning and Management
Analysis of the major functional areas of the start-up firm including accounting, finance, human resources, information systems, logistics, management, marketing, production/operations, purchasing and sales. Focus is also placed on generating ideas, scanning for environmental trends, and critically evaluating opportunities.
Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4750: Entrepreneurial Innovation Management: Enterprise Conception
(same as IMSE 4750). Develop a new business and technology plan including marketing, finance, engineering, manufacturing, and production concepts in this joint College of Engineering and College of Business course.
Credit Hours: 3
Prerequisites: sophomore standing or instructor’s consent

MANGMT 4760: Entrepreneurial Innovation Management: Enterprise Design
(same as IMSE 4760). Expand on Management 4750 business/technology plan into an operations plan; advertising facilities layout, selling and distribution channels, product designs, accounting procedures, manufacturing processes, and prototypes.
Credit Hours: 3
Prerequisites: MANGMT 4750; sophomore standing or instructor’s consent

MANGMT 4770: Entrepreneurial Innovation Management: Enterprise Operation
(same as IMSE 4770). Perform the day-to-day operations for an enterprise by managing all business processes including finance, manufacturing, sales and delivery. Prerequisites: Junior Standing
Credit Hours: 3

MANGMT 4940: Professional Management Internship
Provides experience with management activities in business organizations (or, occasionally, in a governmental or not-for-profit setting). Students are required to prepare and execute a plan of study approved by the instructor and to complete written assignments detailed in the plan. Course only satisfies a professional elective requirement of the program. Graded on S/U basis only.
Credit Hours: 3
Prerequisites: COB student with a management concentration, and Internship Coordinator’s consent
MANGMT 4970: Strategic Management
Enterprise-level case studies, simulations, similar exercises to integrate business functional decisions; assessment of environmental influences on business. Development, implementation of company strategies.

Credit Hours: 3
Prerequisites: MANGMT 3000, MRKTNG 3000, FINANC 3000 and 93 credit hours earned. Open only to seniors admitted to a professional program in the CoB

MANGMT 7010: Operations Management
(cross-leveled with MANGMT 4010). Managerial analysis of operating problems, with emphasis on planning and control systems.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 7020: Human Resource Management
(cross-leveled with MANGMT 4020) Introduction to strategies and best practices in attracting, selecting, retaining developing, and compensating employees.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 7030: Organizational Behavior
(cross-leveled with MANGMT 4030). Examines theoretical constructs and research findings on human behavior in work organizations such as businesses, especially individual differences, dyadic relations and small group behavior.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 7201: Topics in Management
(cross-leveled with MANGMT 4201). Selected current topics in management. Offered on an experimental, one-semester basis only.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 7330: Organizational Theory
(cross-leveled with MANGMT 4330). Elements of the managerial process; emphasis on theory of organization structure and design and the impact of technology and culture on organization systems.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 7380: Organizational Behavior and Management: The Individual
An examination of factors influencing behavior in organizations. An analysis of research, theory, and current practices dealing with managing people in work organizations. Focus on the individual within the organizational context.

Credit Hour: 1.5

MANGMT 7390: Organizational Behavior and Management: Dyadic, Group and Organizational Processes
An examination of factors influencing behavior in organizations. An analysis of research, theory, and current practices dealing with managing people in work organizations. Focus on dyadic, group and system-wide processes. Prerequisites: MANGMT 7380

Credit Hour: 1.5

MANGMT 7410: Management Information Systems
A managerially-oriented, case-based introduction to information systems. Emphasizes how information systems technology can aid managers in improving organizational performance, group work, and personal productivity, thus providing competitive advantage.

Credit Hour: 1.5

MANGMT 7420: Managerial Statistics
Overview of statistics as an aid in decision making. Emphasis on summarizing data, statistical inference, sampling techniques, and regression based forecasting as applied to problems in business.

Credit Hour: 1.5

MANGMT 7430: Operations Strategy
Introduction to Operations Management function within an organization—the function which controls key resources necessary to produce and deliver a firm’s goods or services to customers. Surveys strategic problems common to operations within complex organization. Emphasizes planning, control, and decision making to gain competitive advantage through operations-related activities. Stresses concepts, models, and behaviors across technologies, sectors, and industries, rather than emphasizing a few specific conversion technologies.

Credit Hour: 1-3

MANGMT 7470: Data Analysis for Managers
Statistical thinking approaches to address common business data and problems. Analysis of real-world cases and unstructured data using statistical features of spreadsheet software and communication of results in managerial format. Graded A-F only.

Credit Hour: 1.5
Prerequisites: Open to Crosby MBA students ONLY
Corequisites: MANGMT 7420

MANGMT 7480: Managerial Analytics
Spreadsheet modeling procedures to address common business problems. Analysis of real-world cases and unstructured problems using basic and advanced features software and communication of results in managerial format. Graded A-F only.

Credit Hour: 1.5
Prerequisites: MANGMT 7420 and MANGMT 7470. Open to Crosby MBA students ONLY

MANGMT 7540: Legal Aspects of Business Organization and Operation
Includes agency and employment relationships, sole proprietorships, partnerships, and corporations, also operational aspects of business
associations such as administrative regulation, taxation, bankruptcy, and trade regulation.

Credit Hours: 3
Prerequisites: MANGMT 3540. Restricted to COB students

MANGMT 7970: Introduction to Strategic Management
Examines through case analysis and simulation how business-level managers overseeing a profit center in a specific industry set direction for a firm’s activities in that industry and develop policies to implement that direction. Emphasis is on aligning business strategy with overarching corporate strategy (in diversified firms) and integrating functional perspectives (marketing, operations, finance, R&D, purchasing, human resources, etc.) by effectively resolving conflicts in these perspectives when formulating effective strategy. Focus is also placed on balancing short-term efficiency in a business unit with long-term effectiveness through cultivating continuous innovation processes that redefine the business unit over time.

Credit Hour: 1.5
Prerequisites: Open to Crosby MBA students only

MANGMT 8001: Topics in Management
Selected current topics in management.

Credit Hour: 1-6

MANGMT 8054: Entrepreneurship and Media of the Future
(same as JOURN 8054). This course will give students an intense hands-on experience in working with real entrepreneurs on complex business problems in the journalism field. Example companies are the Associated Press, Kachingle, the Chicago Sun-Times, Spot-Us and the Media Policy Center. The goal is to offer a solution or solutions to the stated problem, and to present these ideas in a competitive, symposium environment. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: graduate standing in Journalism or MBA program

MANGMT 8085: Problems in Management
Graduate students may select topics for study and investigation. Selected sections of the course may be offered either on A-F or S/U basis only.

Credit Hour: 1-99

MANGMT 8100: Exploring the Digital Globe
Impacts of technological change and globalization are explored from the perspective of business, law and journalism. The first course required for the “CDiG certificate”. Issues involving electronic commerce, digitization and globalization will be analyzed through online and in-class projects, class discussion and guest lectures.

Credit Hours: 3
Prerequisites: enrollment in CDiG Graduate Certificate Program or instructor's consent

MANGMT 8200: Commercialization of Life Science Innovations
This course will provide educational content and experiences that equip course participants to navigate the main pathways for commercialization of biomedical innovations. Students will also learn how to access sources of capital for R&D and develop an understanding of the role of FDA approval and the processes for approval of different types of biomedical products. Students will become familiar with quality assurance programs required in the biomedical industry. Students will also become familiar with the most common business models for biomedical companies and the importance of product development and commercialization alliances. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: admitted to certificate program; director approval

MANGMT 8300: Business and Society
Interdependence of the business firm and its social, political, and legal environment; interrelationships with governments, interest groups, and the larger society; role of business in formulation of community, regional, national, and foreign policy.

Credit Hours: 3

MANGMT 8310: Strategic Human Resource Management
Analysis of research and practice in planning for attracting, selecting, developing, and disciplining of employees at work.

Credit Hours: 3

MANGMT 8320: Management of Labor Relations
Managerial approaches to collective bargaining. Negotiation, grievances, agreement administration; emphasis on recent developments.

Credit Hours: 3

MANGMT 8330: Current Issues in Human Resource Management
Exploration of current trends, issues, and controversies involving the managing of human resources in organizations, with an emphasis on how human resources can provide competitive advantage. Considers multiple perspectives, including that of employers, employees, and other stakeholders.

Credit Hours: 3
Prerequisites: MANGMT 8310 or MANGMT 7380 and MNGMT 7390

MANGMT 8335: Human Resource Law
The study of best HR practices from a legal point of view, including avoiding employer liability related to recruiting, interviewing, hiring, classifying, supervising and terminating employees.

Credit Hours: 3

MANGMT 8340: Organizational Design
Principles of effective organizational design contingent upon contextual factors such as an organization’s size, technology, and environment; dimensions of organizational structure; overall forms of organizational design.

Credit Hours: 1.5

MANGMT 8345: Organizational Culture
Concept of culture in an organizational context; models of organizational culture; culture’s relationships with individual behavior, organizational effectiveness, and organizational change, especially change related to strategy implementation and to mergers and acquisitions.

Credit Hours: 1.5
MANGMT 8350: Organizational Analysis and Change in the Public Sector
Investigates the social and psychological dynamics of organizational diagnosis, feedback and learning, intervention, planned change. Students study organizational life from the viewpoint of experienced organizational analysts and consultants. The predominant theoretical approach offered in this course is clinical and psychodynamic.
Credit Hours: 3

MANGMT 8360: Negotiations
A structured overview of negotiations; includes the development of improved negotiation skills. Topics include power, distributive negotiations, integrative negotiations, maneuvers, tactics, strategies, conflict, complex negotiations, mediation, and negotiation ethics.
Credit Hours: 3

MANGMT 8370: Managerial Leadership
An examination of the historical conceptions, definitions, theories, and research findings in the managerial leadership literature. The application of this literature to the development of analytical and leadership skills.
Credit Hours: 3
Prerequisites: MANGMT 7380 and MANGMT 7390

MANGMT 8400: Management Science Modeling
Application of management science modeling procedures to organizational decision making. Topics include mathematical programming, queuing, and network models. Stresses managerial point of view with analysis of problems and interpretation of computer solutions.
Credit Hour: 1.5
Prerequisites: MANGMT 7420

MANGMT 8410: Decision Making and Risk
Managerial approaches to decision making under risk and uncertainty with emphasis on decision analysis, spreadsheet simulation, and computer solutions via other management science models. Discussion of rational and behavioral decision making and procedures for assessing risk and uncertainty.
Credit Hour: 1.5
Prerequisites: MANGMT 7400 or equivalent

MANGMT 8420: Decision Support Systems
The theory, methodology and implementation of Decision Support Systems (DSS). Topics include the DSS concept, applications, organizational issues, hardware and software technology, developmental methodology, data-model-user relationships, user interfaces, implementation strategies, and evaluation procedures. Includes hands-on building of a DSS.
Credit Hours: 3

MANGMT 8430: Database Management
Data management, including database development, access, and administration. A focus on key issues and principles of managing organizational data, such as developing data models, creating relational databases, and formulating and executing queries.
Credit Hours: 3
Prerequisites: completion of or concurrent enrollment in MANGMT 7410

MANGMT 8440: Topics in Electronic Commerce
Fundamental principles of the technical and managerial aspects of business telecommunications. Basic concepts of telecommunication technology, TCP/IP architecture, LAN, WAN, QoS, client/server, security, wireless, issues related to the operational and strategic use of the technology, networked applications, and new developments in the area.
Credit Hours: 3
Prerequisites: MANGMT 7410 and one other MIS course; departmental consent

MANGMT 8450: Information Resource Management
Management issues and techniques involving information system/resource activities, with a focus on computer-based resources and IS development activities. Includes management of IS professionals and project teams, user relationships, emerging technologies, and planning processes. Prerequisites: completion of one required E-Commerce (MANGMT 8440, MANGMT 8430) or IT (MANGMT 8460, MANGMT 8001: Web Programming) MBA concentration course.
Credit Hours: 3

MANGMT 8460: Systems Approach to Business Application Development
Design and implementation of transaction-based business applications systems, utilizing structured analysis and design concepts. Course will emphasize database development and implementation and computer programming.
Credit Hours: 3
Prerequisites: completion of or concurrent enrollment in MANGMT 7410

MANGMT 8470: Business Telecommunications
Fundamental principles of the technical and managerial aspects of business telecommunication. Basic concepts of telecommunication technology, TCP/IP architecture, LAN, WAN, QoS, client/server, security, wireless, issues related to the operational and strategic use of the technology, networked applications, and new developments in the area.
Credit Hours: 3
Prerequisites: MANGMT 7410 and one other MIS course; departmental consent

MANGMT 8480: Web Development
An advanced introduction to the fundamentals of design, technology and project management aspects of developing websites. Several programming languages including HTML, CSS, JavaScript, CGI/Perl, PHP and ASP/VBScript and on introduction to Adobe Photoshop and Macromedia Dreamweaver. Requires Visual Basic knowledge.
Credit Hours: 3
Prerequisites: Visual Basic knowledge; departmental consent
MANGMT 8510: Project Management
An advanced introduction to methods and techniques for managing projects, with selective attention to human resource issues as required. Includes project breakdown analysis, task network scheduling, resource allocation, and assessment/evaluation of project performance.
Credit Hour: 1-3
Prerequisites: departmental consent

MANGMT 8540: Entrepreneurial Ventures
Analysis of management challenges facing entrepreneurial startups and alternative strategic responses to those challenges. Views issues from multiple functional perspectives to design cross-functional solutions to entrepreneurial problems.
Credit Hours: 3

MANGMT 8550: Launching a High-Growth Venture
An experiential learning course using a business plan competition to simulate planning and securing capital for high-growth ventures. Participants with management, marketing or finance interests learn skills for preparing and presenting business plans to investors.
Credit Hours: 3

MANGMT 8560: Legal Strategies for Entrepreneurs
The study of how legal decisions affect a business organization of various transitional states of development, from start up to going public. Designed for both MBA and Law students, who work together planning legal transitions of a business.
Credit Hours: 3

MANGMT 8570: Strategy and Global Competitiveness
Investigates alternative goals of business enterprises relative to internal resources and external environment; development and implementation of policies and strategies to achieve objectives. Cases, computer simulations, and/or field research may supplement published materials.
Credit Hour: 1-3
Prerequisites: MANGMT 7970 for the 1.5 credit hour version of the course. Open to MBA Students only

MANGMT 9010: Research Methods in the Organization Sciences
Identifying research questions, critiquing research ideas, planning, conducting, and communicating research using experimental, cross-sectional, survey and qualitative methods.
Credit Hours: 3
Prerequisites: PhD student or instructor’s consent

MANGMT 9020: Seminar in Micro Organizational Behavior
Examination of theory and research on individuals within an organizational context, including individual perceptions, personality, attitudes, motivation, affect and behavior, and influences on outcomes such as job satisfaction and performance.
Credit Hours: 3
Prerequisites: PhD students and instructor’s consent

MANGMT 9030: Seminar in Macro Organizational Behavior
This course is designated to introduce students to content areas within the organizational behavior literature. Topics in "macro" organizational behavior will be covered, including groups and teams, organizational culture, and national culture. We will also cover a number of topics outside of traditional organizational behavior topics, including negotiation and social conflict, creativity, empowerment, and other topics as the instructor sees fit. Readings will consist of a combination of recent and classic journal articles on the topics.
Credit Hours: 3
Prerequisites: PhD Students and instructor’s consent

MANGMT 9040: Seminar in Human Resource Management
Intensive study of current research, issues and methodology of the applied science of human resource management. Topics include recruitment and selection, training, job performance and performance feedback, and career success.
Credit Hours: 3
Prerequisites: PhD student or instructor’s consent

MANGMT 9050: Seminar in Organization Theory
Focuses on the organization as the subject of analysis with coverage of the effectiveness structure, environment, culture, and development of organizations.
Credit Hours: 3
Prerequisites: PhD student or instructor’s consent

MANGMT 9060: Seminar in Corporate Strategy
The doctoral seminar in strategy focuses on the topics of strategy content research (what strategies are used by firms, and what is their effect on performance, corporate and competitive strategy, etc.) but also considering important related research streams of strategy process and implementation.
Credit Hours: 3
Prerequisites: PhD student or instructor’s consent

MANGMT 9070: Seminar in Entrepreneurship
The doctoral seminar in Entrepreneurship is intended to provide students with a broad coverage of the literature. It focuses on the foundations and “cutting edge” research in entrepreneurship content research. Topics covered in the course include: a theoretical overview of entrepreneurship, identification of opportunities, the decision to exploit opportunities, resource assembly and new markets, founders and entrepreneurial teams, venture capital and venture capitalists, entrepreneurship and efficient governance, initial public offerings (IPOs), new ventures (strategy, growth, performance), entrepreneurial networks and alliances, and international entrepreneurship.
Credit Hours: 3
Prerequisites: PhD student or instructor’s consent

MANGMT 9080: Seminar in Management
Intensive studies of current research and issues. Readings, independent investigations, reports.
Credit Hour: 1-99
Prerequisites: open to Ph.D. students, or instructor’s consent
MANGMT 9090: Research in Management
Thesis research for Ph.D. degree. Graded on a S/U basis only.
Credit Hour: 1-99

MANGMT 9101: Topics Seminar in Management
Reading and critical evaluation of selected current management literature and research. May be repeated.
Credit Hour: 1-3
Prerequisites: Ph.D. students only

Marketing (MRKTNG)

MRKTNG 3000: Principles of Marketing
Institutions, processes, and problems involved in producing and transferring goods and services from producer to consumers; emphasis on economics and social aspects.
Credit Hours: 3
Prerequisites: 45 semester hours; ECONOM 1014, ECONOM 1024, ECONOM 1051, or AG_EC 1041

MRKTNG 3000H: Principles of Marketing - Honors
Institutions, processes, and problems involved in producing and transferring goods and services from producer to consumers; emphasis on economics and social aspects.
Credit Hours: 3
Prerequisites: 45 semester hours; ECONOM 1014, ECONOM 1024, ECONOM 1051, or AG_EC 1041; Honors eligibility required

MRKTNG 3901: Special Topics in Marketing
Study of a selected topic in Marketing in a course taken for credit as part of an organized study abroad program. May be repeated for credit. Graded on S/U basis only.
Credit Hour: 1-3

MRKTNG 3942: International Business Internship
Internship in an international setting; Marketing Independent Study Coordinator must approve internship plan. Student and mentor reports required. See Marketing website for request form, internship requirements and details. Graded on S/U basis only.
Credit Hour: 1-3
Prerequisites: departmental consent; MRKTNG 3000

MRKTNG 3975: Current Issues in International Marketing
Study of current issues and practices in international marketing in a course taken for credit as part of an organized study abroad program. May be repeated for credit. Graded on S/U basis only.
Credit Hour: 1-3

MRKTNG 3985: Problems in International Business
Independent study associated with a course taken for credit as part of an organized study abroad program. See Marketing website for request form. Graded on S/U basis only.

MRKTNG 4000: Marketing Management
Further examination of marketing issues: market analysis, market research, positioning, products, pricing, promotion, distribution, relationship management, other topics. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.
Credit Hours: 3
Prerequisites: MRKTNG 3000, and ACCTCY 2010 or ACCTCY 2026, or ACCTCY 2036 or ACCTCY 2136H

MRKTNG 4000H: Marketing Management - Honors
Further examination of marketing issues: market analysis, market research, positioning, products, pricing, promotion, distribution, relationship management, other topics.
Credit Hours: 3
Prerequisites: MRKTNG 3000 and junior standing. Honors eligibility required

MRKTNG 4050: Marketing Research
Procedures for defining marketing research problems; specifying information requirements; collecting, analyzing, interpreting, and presenting data for use in marketing decision making. Utilizes student projects and research-related computer assignments. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.
Credit Hours: 3
Prerequisites: MRKTNG 3000, STAT 3500

MRKTNG 4185: Problems in Marketing
In-depth independent study of marketing topic(s). Student must have course plan (assignments, evaluation criteria, etc.) approved by faculty sponsor. Contact Marketing Department office for details and enrollment permission. Selected sections of this course may be graded either on A-F or S/U basis only.
Credit Hour: 1-3
Prerequisites: Departmental consent, MRKTNG 3000

MRKTNG 4201: Topics in Marketing
Selected marketing-related topics. Subjects may vary across semesters. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.
Credit Hours: 3
Prerequisites: MRKTNG 3000

MRKTNG 4215: Problems in Marketing
In-depth independent study of marketing topic(s). Student must have course plan (assignments, evaluation criteria, etc.) approved by faculty sponsor. Contact Marketing Department office for details and enrollment permission. Selected sections of this course may be graded either on A-F or S/U basis only.
Credit Hour: 1-3
Prerequisites: Departmental consent, MRKTNG 3000

MRKTNG 4220: Consumer Behavior
Dimensions of the consumer market and decision-making process of consumers; analyzing economic, psychological and socio-psychological influences on consumer market and buying behavior. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.
MRKTNG 4200: Consumer Behavior - Honors
Dimensions of the consumer market and decision-making process of consumers; analyzing economic, psychological and socio-psychological influences on consumer market and buying behavior.
Credit Hours: 3
Prerequisites: MRKTNG 3000 and Honors eligibility required

MRKTNG 4250: Retail Marketing
Strategies, policies, tactics, and procedures of marketing in a retailing environment. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.
Credit Hours: 3
Prerequisites: MRKTNG 3000

MRKTNG 4350: Business-to-Business Relationships
Strategies, tactics, and challenges involved in developing, organizing, and managing interfirm relationships in business/industrial markets. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.
Credit Hours: 3
Prerequisites: MRKTNG 3000 and junior standing

MRKTNG 4380: Buying and Supply Chain Management
Strategies, tactics, challenges, and issues involved in buying, industrial purchasing, and supply chain management. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.
Credit Hours: 3
Prerequisites: MRKTNG 3000 and junior standing

MRKTNG 4410: Personal Selling
Modern selling methods that focus on solving customer problems rather than using manipulative techniques. Principles underlying the sale process. Practical methods for building long-term customer relationships in business-to-business contexts are emphasized. Graded on A-F basis only. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with an emphasis in Marketing.
Credit Hours: 3
Prerequisites: MRKTNG 3000

MRKTNG 4420: Sales Management
Methods and tools employed by salespeople and field sales managers; emphasis on underlying behavioral and quantitative theory. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with an emphasis in Marketing.
Credit Hours: 3
Prerequisites: MRKTNG 3000

MRKTNG 4440: Services Marketing
Challenges, problems, and strategies specific to marketing in service industries. Topics include the unique characteristics of services and managing service-oriented businesses; service design and service recovery; service quality and customer satisfaction service pricing issues and demand management; and management of service customers and employees. Graded on A-F basis only. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with an emphasis in Marketing.
Credit Hours: 3
Prerequisites: MRKTNG 3000

MRKTNG 4450: Marketing Channels
Development and management of the interorganizational or internal networks through which goods and services are provided to consumer and business markets. Particular emphasis on the relationship between channel activities and the implementation of market strategy. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.
Credit Hours: 3
Prerequisites: MRKTNG 3000 and junior standing

MRKTNG 4501: Topics in Marketing Strategies
Selected topics related to marketing strategy. Subjects may vary across semesters. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.
Credit Hour: 1-3
Prerequisites: MRKTNG 3000

MRKTNG 4550: Integrated Marketing Communications
Design, coordination, and management of marketing communications. Focus on the role of integrated marketing communications in the overall marketing process, with emphasis on advertising and sales promotion strategies and tactics. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.
Credit Hours: 3
Prerequisites: MRKTNG 3000

MRKTNG 4550H: Integrated Marketing Communications - Honors
Design, coordination, and management of marketing communications. Focus on the role of integrated marketing communications in the overall marketing process, with emphasis on advertising and sales promotion strategies and tactics. During early registration, some sections may be
restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.

**Credit Hours: 3**
**Prerequisites:** MRKTNG 3000 and Honors eligibility required

---

**MRKTNG 4650: e-Marketing**
Strategic and managerial challenges and issues related to use of the Internet and other electronic channels as marketing tools. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.

**Credit Hours: 3**
**Prerequisites:** MRKTNG 3000 and Honors eligibility required

---

**MRKTNG 4720: Global Marketing**
Strategic and managerial issues associated with international trade and international marketing. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.

**Credit Hours: 3**
**Prerequisites:** MRKTNG 3000

---

**MRKTNG 4720H: Global Marketing - Honors**
Strategic and managerial issues associated with international trade and international marketing.

**Credit Hours: 3**
**Prerequisites:** MRKTNG 3000 and Honors eligibility required

---

**MRKTNG 4750: Marketing, Society, and Government**
Interface between marketing, society, and government; emphasis on potential conflicts and issues such as competition, externalities, and regulation. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.

**Credit Hours: 3**
**Prerequisites:** MRKTNG 3000

---

**MRKTNG 4880: Contemporary Issues in Marketing**
Selected topical issues, their impact on marketing and marketers, and implications for firms and industries. Emphasis on scanning the external environment, projection of trends, and analysis; strategy development based on environmental analysis. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis on marketing.

**Credit Hours: 3**
**Prerequisites:** MRKTNG 3000

---

**MRKTNG 4880H: Contemporary Issues in Marketing - Honors**
Selected topical issues, their impact on marketing and marketers, and implications for firms and industries. Emphasis on scanning the external environment, projection of trends, and analysis; strategy development based on environmental analysis.

**Credit Hours: 3**
**Prerequisites:** MRKTNG 3000 and Honors eligibility required

---

**MRKTNG 4940: Marketing Practicum**
Course providing experience within ongoing business. Study plan, meeting, and written assignments required. See Marketing website for application, qualifications, requirements and details. Graded on S/U basis only.

**Credit Hours: 3**
**Prerequisites:** Instructor’s consent; Marketing and international business-marketing majors only; MRKTNG 3000 and junior standing

---

**MRKTNG 7201: Topics in Marketing**
The study of selected topics in Marketing. Subjects may vary from semester to semester.

**Credit Hour: 1-99**
**Prerequisites:** MRKTNG 3000 or instructor’s consent; departmental consent for repetition

---

**MRKTNG 7460: Managerial Marketing**
Introduces concepts and theories for marketing decision making. Provides an overview of principles and tools to analyze and understand marketing situations in order to develop and execute appropriate marketing initiatives.

**Credit Hour: 1-3**
**Prerequisites:** MBA Program consent required

---

**MRKTNG 7470: Advanced Marketing Management**
Develops knowledge and skills to manage marketing activities at the strategic and tactical levels. Course utilizes case studies, interactive class exercises, and advanced marketing readings. Students will learn to apply relevant concepts for effective marketing strategy development, marketing planning, and implementation of marketing mix decisions.

**Credit Hour: 1-3**
**Prerequisites:** MBA program consent required; MRKTNG 7460

---

**MRKTNG 8001: MBA Topics in Marketing**
Advanced study of selected marketing-related topics. Subjects vary across semesters.

**Credit Hour: 1-3**
**Prerequisites:** MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

---

**MRKTNG 8050: Marketing Strategy**
Builds on the foundations of Marketing 7460. This course focuses on how a firm can formulate a market-driven business strategy in a competitive environment and the planning and implementation of marketing programs based on this strategy.

**Credit Hour: 1-3**
**Prerequisites:** MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

---

**MRKTNG 8060: Competitive Marketing Strategy**
Builds on the foundations of Marketing 7460 and 7470. Focuses on quantitative market intelligence-based design, execution, and adaptation of a market-drive business strategy to improve a firm's financial performance over time in a competitive environment. Uses a competitive,
multi-period, marketing simulation game in which students are assigned to manage one of several firms competing in an industry. Prerequisites: MBA Program consent required: MRKTNG 7460 and MRKTNG 7470. Cannot receive credit for both MRKTNG 8050 and MRKTNG 8060. 

Credit Hour: 1-3

MRKTNG 8070: Marketing Business Models
Builds on the foundations of Marketing 4760 and 7470. Focuses on the formulation and analysis of marketing strategy and contemporary business models for creating and capturing value in different industries such as consumer goods, services, retailing, media, sports, entertainment, and online businesses. Business revenue and profit models will be evaluated in conjunction with marketing performance.

Credit Hour: 1-3
Prerequisites: MBA Program consent required, MRKTNG 7460 and MRKTNG 7470. Cannot receive credit for both MRKTNG 8050 and MRKTNG 8070

MRKTNG 8085: MBA Independent Study in Marketing
Advanced independent study of marketing topics(s). Student must have a course plan (assignments, evaluation criteria, etc.) approved by a marketing faculty member. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: departmental and MBA Program consent required; MRKTNG 7460, MRKTNG 7470

MRKTNG 8220: Customer Analysis
Concepts and approaches for understanding customer needs and wants. Emphasis is on analyzing and predicting customer responses to marketing actions.

Credit Hour: 1-3
Prerequisites: MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

MRKTNG 8280: Research for Marketing Decisions
Methods for generating and using information related to marketing decisions. The course is aimed at the manager who designs, conducts, and/or uses the research. Emphasizes the design of research studies to inform managers’ decisions and techniques for gathering and analyzing primary and secondary data.

Credit Hour: 1-3
Prerequisites: MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

MRKTNG 8350: Business-to-Business Marketing
Advanced study of the marketing of goods and services to business customers; customer relationship management, and functionally integrated approaches to solving business problems.

Credit Hour: 1-3
Prerequisites: MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

MRKTNG 8420: Sales Force Management
Basic tasks of sales management as well as the application of theories and concepts to effectively manage that function. Topics covered include salesperson effectiveness, deployment, motivation, organizational design, compensation and evaluation.

Credit Hour: 1-3
Prerequisites: MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

MRKTNG 8480: Relationship Marketing
Focuses on the development of relationship marketing strategies and programs. The course examines relevant business models, the concept of customer lifetime value and financial as well as behavioral aspects of managing customer relationships. Database marketing methods and interactive tools for profitably managing customer relationships are also discussed.

Credit Hour: 1-3
Prerequisites: MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

MRKTNG 8520: Services Marketing
Focuses on service marketing problems and strategies of goods and service organizations. Subjects covered include the nature of services, organizing for service delivery, managing demand, tailoring the customer mix and managing supply.

Credit Hour: 1-3
Prerequisites: MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

MRKTNG 8580: Product Management
Focus is on new product/service decisions and development processes. Discussion emphasized analytical approaches to new product portfolio decisions and the research needed as input to such decisions. Program strategy, opportunity creation, concept development, product testing, demand estimation, and results evaluation are stressed.

Credit Hour: 1-3
Prerequisites: MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

MRKTNG 8620: Marketing Decision Models
Quantitative tools and models used to analyze and solve marketing problems.

Credit Hour: 1-3
Prerequisites: MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

MRKTNG 8650: Digital Marketing
The use of the Internet and other electronic channels as marketing tools. Emphasis on integration of digital interactions and communication into the overall marketing strategy.

Credit Hour: 1-3
Prerequisites: MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

MRKTNG 8680: Database Marketing
A quantitatively-oriented, hands-on course regarding the use of customer data for making decisions about marketing campaigns and targeting of individual customers. Concepts and applications in this course emphasize
statistical analysis of large datasets involving customer records. The analytical and statistical programming skills learned in the course should be useful in any data-oriented business environment. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: MBA Program consent required, MRKTNG 7460, MRKTNG 7470, MANGMT 7400, MANGMT 7420, and MANGMT 7470

MRKTNG 8720: International Marketing
Strategic and managerial issues associated with international trade and international marketing. The course focuses on managerial decision making in the differing and complex environments across foreign markets, alternative methods by which firms enter foreign markets and the development and implementation of international marketing strategies.

Credit Hour: 1-3
Prerequisites: MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

MRKTNG 8750: Brand Management
Focuses on the creation and execution of profitable brand strategies. Examines the practice of branding, the key components of brand equity, and how firms can build and sustain successful brands in competitive markets.

Credit Hour: 1-3
Prerequisites: MBA Program consent required, MRKTNG 7460 and MRKTNG 7470

MRKTNG 8760: Marketing Engineering
A systematic, analytical approach to marketing decision-making. Students will be able to build their analytical skills through a combination of lectures, Excel-based software tools, and business case studies. Emphasis is on hands-on approaches for solving real-world marketing problems in domains such as segmentation, targeting, positioning, and resource allocation. The course will help students understand the financial impact of marketing expenditures including ROI assessment. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: MBA Program consent required, MRKTNG 7460, MRKTNG 7470 and MANGMT 7400

MRKTNG 8770: Marketing Databases and SQL
A user/analyst perspective to relational databases used in marketing applications. Fundamentals of relational databases, including database concepts, table design, views, normalization, and security. Hands-on training in SQL (Structured Query Language) on database tables and views to retrieve, change, join, filter, sort, group, and summarize data. Data analysis with SQL and Excel combined. Presentation of SQL results sets. Course graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: MBA program consent required, MANGMT 7410

MRKTNG 8780: Advanced Marketing Analytics
Analytical methods for solving marketing problems. Emphasis on use of multivariate statistical techniques (e.g. regression models, time series models, principal components analysis, cluster analysis, discriminant analysis, ANOVA, survival/duration models, etc.) to aid marketing tasks and decisions in areas such as customer classification, segmentation, profiling, and targeting; prospecting with archival data; customer response to marketing interventions; customer acquisition/retention tactics; customer relationship management (CRM); sales forecasting; media allocation decisions; market basket analysis; etc. Graded on an A-F basis only.

Credit Hour: 1-3
Prerequisites: MBA program consent required, MRKTNG 8680

MRKTNG 8880: Markets in Transition
Analysis of selected industries with emphasis on marketing activities and environments. Particular emphasis given to forecasting major trends or changes anticipated in markets over the next decade.

Credit Hour: 1-3
Prerequisites: MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

MRKTNG 9010: Introduction to Research Methods in Marketing
Introduces students to the research process. Examines philosophy of science, constructs and measurement issues regarding validity, and hypothesis-testing. Provides an overview of experimental and survey research methods, with introduction to qualitative research, model-building, and research using secondary data.

Credit Hour: 1-3
Prerequisites: Ph.D. students only; instructor’s consent

MRKTNG 9020: Seminar in Advanced Research Methods in Marketing
Familiarizes students with advanced research methods in marketing, emphasizing problem developmental and conceptualization, operationalization of research questions, measurement, and survey research.

Credit Hour: 1-3
Prerequisites: MRKTNG 9010 or equivalent; Ph.D. students only; instructor’s consent

MRKTNG 9030: Seminar in Applied Multivariate Analysis in Marketing
Familiarizes students with multivariate analysis of data used for research in marketing. Emphasizes application of multivariate methods, presentation of set, performing preliminary assessment of data quality and distribution, assessing measurement quality, and conducting a variety of multivariate and structural equation models, regression, logistic regression, discriminate analysis, cluster analysis, multi-way frequency analysis, and ANOVA.

Credit Hour: 1-3
Prerequisites: basic course in multivariate statistical methods; Ph.D. students only; instructor’s consent

MRKTNG 9090: Research in Marketing
Thesis research for Ph.D. degree. Graded on a S/U basis only.

Credit Hour: 1-99
Prerequisites: Ph.D. students only
Mathematics (MATH)

MATH _0110: Intermediate Algebra
MATH _0110 is a preparatory course for college algebra that carries no credit towards any baccalaureate degree. However, the grade received in MATH _0110 does count towards a student's overall GPA. The course covers operations with real numbers, graphs of functions, domain and range of functions, linear equations and inequalities, quadratic equations; operations with polynomials, rational expressions, exponents and radicals; equations of lines. Emphasis is also put on problem-solving.
Credit Hours: 3
Prerequisites: Elementary College Algebra or equivalent. Placement in MATH _0110 based on the student's ACT math score or equivalent, in addition to other criteria.

MATH 1100: College Algebra
A review of exponents, order of operations, factoring, and simplifying polynomial, rational, and radical expressions. Topics include: linear, quadratic, polynomial, rational, inverse, exponential, and logarithmic functions and their applications. Students will solve equations involving these functions, and systems of linear equations in two variables, as well as inequalities. This course is offered in both 3 day and 5 day versions. See the Math website for specific requirements. A student may receive at most 5 credit hours among MATH 1100, MATH 1120, MATH 1140, MATH 1160.
Credit Hours: 3
Prerequisites: MATH _0110 or a sufficient score on the ALEKS exam

MATH 1140: Trigonometry
A student may receive only 5 credits from among MATH 1100, MATH 1140, and MATH 1160. A student may receive at most 5.0 credit hours from MATH 1100, MATH 1120, MATH 1140, and MATH 1160.
Credit Hours: 2
Prerequisites: MATH 1100 or sufficient ALEKS score

MATH 1160: Precalculus Mathematics
Review of elementary algebra. Background material for MATH 1500, including algebraic, trigonometric, logarithmic, exponential functions. A student may receive at most 5 credits from among MATH 1100, MATH 1140, and MATH 1160.
Credit Hours: 5
Prerequisites: B+ or higher in MATH _0110 (at MU), or MATH 1100, or sufficient ALEKS score

MATH 1300: Finite Mathematics
A selection of topics in finite mathematics such as: basic financial mathematics, counting methods and basic probability and statistics, systems of linear equations and matrices. Warning: without a College Algebra exemption, a sufficient ALEKS score will not suffice unless it is a proctored exam (for MATH 1100 credit).
Credit Hours: 3
Prerequisites: MATH 1100, or MATH 1160, or both a College Algebra exemption and sufficient ALEKS score

MATH 1320: Elements of Calculus
Introductory analytic geometry, derivatives, definite integrals. Primarily for Computer Science BA candidates, Economics majors, and students preparing to enter the College of BUS. No credit for students who have completed a calculus course. A student may receive credit for MATH 1320, or MATH 1400 but not both. A student may receive at most 5 credit hours among MATH 1320 or MATH 1400 or MATH 1500.
Credit Hours: 3
Prerequisites: MATH 1100, or MATH 1160, or sufficient ALEKS score
### MATH 1360: Geometric Concepts
This course is primarily for education majors. This course covers topics of Euclidean geometry such as the study of points, lines, angles, polygons, circles, congruence, similarity, transformations, symmetry, area, surface area, arc length, and volume. Polyhedra, spheres, cones, and other solids are discussed. The course includes constructions and proofs, and uses inductive and deductive reasoning throughout. Math Reasoning Proficiency Course.

**Credit Hours:** 3  
**Prerequisites:** MATH 1100 or MATH 1160 or equivalent

### MATH 1400: Calculus for Social and Life Sciences I
The real number system, functions, analytic geometry, derivatives, integrals, maximum-minimum problems. No credit for students who have completed a calculus course. A student may receive credit for MATH 1320 or MATH 1400 but not both. A student may receive at most 5 units of credit among the MATH 1320 or MATH 1400 and MATH 1500. Math Reasoning Proficiency Course.

**Credit Hours:** 3  
**Prerequisites:** grade of C- or higher in MATH 1100, or MATH 1160, or sufficient ALEKS score

### MATH 1500: Analytic Geometry and Calculus I
Elementary analytic geometry, functions, limits, continuity, derivatives, antiderivatives, definite integrals. A student may receive at most 5 units of credit among the Mathematics courses MATH 1320 or MATH 1400 and MATH 1500. Math Reasoning Proficiency Course.

**Credit Hours:** 5  
**Prerequisites:** grade of C- or higher in MATH 1100 or C- or higher in both MATH 1100 and MATH 1140 or sufficient ALEKS score

### MATH 1500H: Analytic Geometry and Calculus I - Honors
Elementary analytic geometry, functions, limits, continuity, derivatives, antiderivatives, definite integrals. Honors eligibility required. A student may receive at most 5 units of credit among MATH 1320 or MATH 1400 and MATH 1500. Math Reasoning Proficiency course.

**Credit Hours:** 5  
**Prerequisites:** MATH 1160 or both MATH 1100 and MATH 1140 and sufficient ALEKS score

### MATH 1601: Selected Topics in Mathematics-General
The special topics covered may vary from term to term. This course may be repeated.

**Credit Hour:** 1-3  
**Prerequisites:** instructor’s consent

### MATH 1602: Selected Topics in Mathematics-Biological/Physical/Math
The special topics covered may vary from term to term. This course may be repeated.

**Credit Hour:** 1-3  
**Prerequisites:** instructor’s consent

### MATH 1700: Calculus II
Definite integrals, applications and techniques of integration, elementary transcendental functions, infinite series. Math Proficiency Reasoning course.

**Credit Hours:** 5  
**Prerequisites:** a grade of C- or better in MATH 1500

### MATH 1700H: Calculus II - Honors
Definite integrals, applications and techniques of integration, elementary transcendental functions, infinite series. Math Reasoning Proficiency course.

**Credit Hours:** 5  
**Prerequisites:** a grade of C- or better in MATH 1500. Honors eligibility required

### MATH 1800: Introduction to Analysis I
This course will cover the material taught in a traditional first semester calculus course at a more rigorous level. The focus of this course will be on proofs of basic theorems of differential and integral calculus. The topics to be covered include axioms of arithmetic, mathematical induction, functions, graphs, limits, continuous functions, derivatives and their applications, integrals, the fundamental theorem of calculus and trigonometric functions. Students in this class will be expected to learn to write clear proofs of mathematical assertions. Some previous exposure to calculus is helpful but not required. No credit for MATH 1800 and MATH 1320, MATH 1400 or MATH 1500. Graded on A-F basis only.

**Credit Hours:** 5  
**Prerequisites:** ACT mathematics score of at least 31 and ACT composite of at least 30 or instructor's consent

### MATH 1900: Introduction to Analysis II
This course is a continuation of MATH 1800. In this course we shall cover uniform convergence and uniform continuity, integration, and sequences and series. The topics will be covered in a mathematically rigorous manner. No credit for MATH 1900 and MATH 1700 or MATH 2100. Graded on A/F basis only.

**Credit Hours:** 5  
**Prerequisites:** MATH 1800 or instructor’s consent

### MATH 2100: Calculus for Social and Life Sciences II
Riemann integral, transcendental functions, techniques of integration, improper integrals and functions of several variables. No credit for students who have completed two calculus courses. Math Reasoning Proficiency course.

**Credit Hours:** 3  
**Prerequisites:** MATH 1320 or MATH 1400 or MATH 1500

### MATH 2140: Geometric Axioms and Structures
Euclidean Geometry, Axiom systems, spherical geometry, finite geometries, and explorations with technology.

**Credit Hours:** 3  
**Prerequisites:** MATH 1340 or MATH 1360

MATH 4150: History of Mathematics
This is a history course with mathematics as its subject. Includes topics in the history of mathematics from early civilizations onwards. The growth of mathematics, both as an abstract discipline and as a subject which interacts with others and with practical concerns, is explored. Pre- or Co-requisite: MATH 2300 or MATH 2340.
Credit Hours: 3

MATH 4300: Numerical Analysis
Machine arithmetic, approximation and interpolation, numerical differentiation and integration, nonlinear equations, linear systems, differential equations, error analysis. Selected algorithms will be programmed for solution on computers.
Credit Hours: 3
Prerequisites: Grade of C- or better in MATH 2300 and MATH 4100

MATH 4310: Numerical Linear Algebra
Solution of linear systems of equations by direct and iterative methods. Calculation of eigenvalues and eigenvectors of matrices. Selected algorithms programmed for solution on computers.
Credit Hours: 3
Prerequisites: MATH 2300 and familiarity with software such as Mathematica, MatLab, Maple, etc

MATH 4315: Introduction to Mathematical Statistics
(same as STAT 4710). Introduction to theory of probability and statistics using concepts and methods of calculus.
Credit Hours: 3
Prerequisites: MATH 2300 or instructor’s consent

MATH 4320: Introduction to Probability Theory
(same as STAT 4750). Probability spaces; random variables and their distributions; repeated trials; probability limit theorems.
Credit Hours: 3
Prerequisites: MATH 2300 or instructor’s consent

MATH 4325: Linear Programming
Credit Hours: 3
Prerequisites: MATH 4140 or instructor’s consent

MATH 4330: Theory of Numbers
Divisibility, factorization, arithmetic functions, means value theorems, distribution of prime numbers, congruences, primitive roots, character theory, Riemann zeta function, and Dirichlet L-functions.
Credit Hours: 3
Prerequisites: MATH 2300. Recommended MATH 2320 or MATH 2340, and MATH 4940 or MATH 7940

MATH 4335: College Geometry
Euclidean geometry from an advanced viewpoint. Synthetic and coordinate methods will be used. The Euclidean group of transformations will be studied.
Credit Hours: 3
Prerequisites: MATH 2300

MATH 4340: Projective Geometry
Basic ideas and methods of projective geometry built around the concept of geometry as the study of invariants of a group. Extensive treatment of collineations.
Credit Hours: 3
Prerequisites: MATH 2300

MATH 4345: Foundations of Geometry
Coordination of affine, projective planes by means of various kinds of algebraic structures: planar ternary rings, Veblen-Wedderburn systems, divisions rings, skew fields, and fields.
Credit Hours: 3
Prerequisites: MATH 2300

MATH 4350: Introduction to Non-Euclidean Geometry
Account of rise, development of non-Euclidean geometries. Intensive study of plane hyperbolic geometry.
Credit Hours: 3
Prerequisites: MATH 2300

MATH 4355: Introduction to Financial Derivatives and Options
(cross-leveled with MATH 7355). Long and short positions, forward contracts, exchange traded index futures, European and American call and put options, put-call parity, trading and hedging strategies, synthetic transactions, arbitrage, currency options, fixed income portfolio management, duration, convexity, interest rate and currency swaps, embedded options.
Credit Hours: 3
Prerequisites: MATH 2300 and STAT 2500; or STAT 4710 or MATH 4315 or instructor’s consent

MATH 4360: Actuarial Mathematics
(cross-leveled with MATH 7360). Basic actuarial methods, mathematical population studies and models of population growth. Compound interest and annuities certain. Values of endowment and annuities, calculation of premiums, surrender values. Stochastic models of populations growth.
Credit Hours: 3
Prerequisites: MATH 2300 and either STAT 2500 or STAT 4710 or MATH 4315 or instructor’s consent

MATH 4370: Actuarial Modeling I
This course covers the concepts underlying the theory of interest and their applications to valuation of various cash flows, annuities certain, bonds, and loan repayment. This course is designed to help students prepare for Society of Actuaries exam FM (Financial Mathematics). It is oriented towards problem solving techniques applied to real-life situations and illustrated with previous exam problems.
Credit Hours: 3
Prerequisites: grade of C-or better in MATH 2300

MATH 4371: Actuarial Modeling II
(cross-leveled with MATH 7371). The goal of this course is to teach the basic theory of life contingent actuarial models and the application of those models to insurance and other financial risks. The topics covered are part of the readings for the Society of Actuaries exam MLC (Models for Life Contingencies) and are illustrated with past exam questions.
Credit Hours: 3
Prerequisites: MATH 4320 or STAT 4750, and MATH 4370

MATH 4400: Introduction to Topology
Topics from topology of Euclidean spaces, generalizations to metric spaces and topological spaces. Fundamentals of point set topology.
Credit Hours: 3
Prerequisites: MATH 2300

MATH 4500: Applied Analysis
Solution of the standard partial differential equations (wave, heat, Laplace’s eq.) by separation of variables and transform methods; including eigenfunction expansions, Fourier and Laplace transforms. Boundary value problems, Sturm-Liouville theory, orthogonality, Fourier, Bessel, and Legendre series, spherical harmonics.
Credit Hours: 3
Prerequisites: MATH 4100

MATH 4510: Higher Algebra
Introduction to rings, integral domains, fields, groups.
Credit Hours: 3
Prerequisites: MATH 2300 or MATH 2320

MATH 4520: Statistical Inference I
(same as STAT 4760). Sampling; point estimation; sampling distribution; tests of hypotheses; regression and linear hypotheses.
Credit Hours: 3
Prerequisites: MATH 4320

MATH 4540: Mathematical Modeling I
Solution of problems from industry, physical, social and life sciences, economics, and engineering using mathematical models.
Credit Hours: 3
Recommended: 3 semesters of calculus, some exposure to ordinary differential equations (or instructor’s consent), and familiarity with software such as MATHEMATICA, MATLAB, or MAPLE

MATH 4560: Nonlinear Dynamics, Fractals and Chaos
Conceptual introduction to nonlinear dynamics, bifurcation and stability of steady states, chaos in nonlinear differential equations and maps, fractal dimension, strange attractors, and applications to physical science.
Credit Hours: 3
Prerequisites: MATH 4100 or MATH 7100, MATH 4140 or MATH 7140, and familiarity with software such as MATHEMATICA, MATLAB, or MAPLE

MATH 4570: Fluid Dynamics
Mathematical theory of fluid dynamics and applications. Prerequisites: MATH 2300
Credit Hours: 3

MATH 4580: Mathematical Modeling II
Solution of problems from industry, physical, social and life sciences, economics, and engineering using mathematical models. More general classes of problems than in Mathematics 4540 will be considered.
Credit Hours: 3
Prerequisites: 3 semesters of calculus and some exposure to ordinary differential equations or instructor’s consent. MATH 4540 is not a prerequisite

MATH 4590: Mathematics of Financial Derivatives
Binomial and Black-Scholes pricing models. Option Greeks, delta and gamma hedging, market maker profit theory. Asian, barrier, compound gap and exchange options. Lognormal and Monte Carlo price simulation. Geometric Brownian Motion and Itô’s Lemma. Interest rate models and volatility. Recommended: MATH 4355
Credit Hours: 3
Prerequisites: MATH 2300 and either STAT 2500 or STAT 4710 or MATH 4315

MATH 4700: Advanced Calculus of One Real Variable I
(cross-leveled with MATH 7700). Basic topology of the real line, numerical sequences and series, continuity, differentiability, Riemann integration, uniform convergence, power series.
Credit Hours: 3
Prerequisites: MATH 3000

MATH 4720: Introduction to Abstract Algebra I
Basic properties of integers, fundamental theorem of arithmetic, introduction to groups, rings and fields.
Credit Hours: 3
Prerequisites: MATH 3000

MATH 4800: Advanced Calculus for One Real Variable II
(cross-leveled with MATH 7800). Continuation of Advanced Calculus for functions of a single real variable. Topics include sequences and series of functions, power series and real analytic functions, Fourier series.
Credit Hours: 3
Prerequisites: MATH 4700 or MATH 7700 or permission of the instructor

MATH 4900: Advanced Multivariable Calculus
(cross-leveled with MATH 7900). This is a course in calculus in several variables. The following is core material: Basic topology of n-dimensional Euclidian space; limits and continuity of functions; the derivative as a linear transformation; Taylor’s formula with remainder; the Inverse and Implicit Function Theorems, change of coordinates; integration (including transformation of integrals under changes of coordinates); Green’s Theorem. Additional material from the calculus of several variables may be included, such as Lagrange multipliers, differential forms, etc.
Credit Hours: 3
Prerequisites: MATH 4700
MATH 4920: Introduction to Abstract Linear Algebra
Study of vector spaces over arbitrary fields: topics include linear maps on finite dimensional vector spaces, bilinear and multi-linear forms, invariant subspaces and canonical forms.
Credit Hours: 3
Prerequisites: MATH 4720

MATH 4940: Introduction to Complex Variables
Complex functions, contour integration, power series, residues and poles, conformal mapping.
Credit Hours: 3
Prerequisites: MATH 4110 or MATH 4700

MATH 4960: Special Readings in Mathematics
Credit Hour: 1-3
Prerequisites: MATH 2300 and instructor’s consent

MATH 4970: Senior Seminar in Mathematics
Seminar with student presentations, written projects, and problem solving. May be used for the capstone requirement.
Credit Hours: 3
Prerequisites: 12 hours of mathematics courses numbered 4000 or above

MATH 4980: Mathematics Problem Solving
Creative advanced problem solving bringing together methods such as integration, probability and Euclidean geometry.
Credit Hours: 3
Prerequisites: MATH 4140 and another 4000 level Mathematics course, or instructor’s consent

MATH 4996: Honors in Mathematics
Special work for senior B.A. Honors and B.S. Honors candidates.
Credit Hours: 2

MATH 7001: Topics in Mathematics-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-99
Prerequisites: graduate standing and MATH 2300 and instructor’s consent. Departmental consent for repetition

MATH 7060: Connecting Geometry to Middle and Secondary Schools
(cross-leveled with MATH 4060). Euclidian foundations, basic concepts of symbolic logic, polyhedra, Euler Characteristic, congruence, area, Picks Theorem, volume, Cavalier’s Principles, surface area, similarity, reflections, translations, rotations, symmetry, vectors, general transformations, determinants, matrices, transformations using matrices, brief introduction to spherical geometry.
Credit Hours: 3
Prerequisites: MATH 1360 or MATH 1500, enrollment is restricted to Math Education majors

MATH 7070: Connecting Algebra to Middle and Secondary Schools
A detailed study of integer and rational arithmetic and algebra. Topics include: Bionomial Theorem, induction, division algorithm, Euclid’s Algorithm, Fundamental Theorem of Arithmetic, Pythogorian triples, modular arithmetic and generalizations to polynomials, matrices and other axiomatic structures. Prerequisites: MATH 1320, enrollment is restricted to Math Education majors
Credit Hours: 3

MATH 7080: Connect Calculus to Middle and Secondary Schools
Course topics include: sequences, series functions, limits, continuity, differentiation, optimization, curve sketching, antiderivative, area of plane regions, lengths of plane curves, areas of surfaces of revolution, and volumes of solids.
Credit Hours: 3
Prerequisites: MATH 1160, enrollment is restricted to Math Education majors

MATH 7100: Differential Equations
Traditional introductory course in ordinary differential equations. Includes 1st and 2nd order linear differential equations with numerous applications; Laplace transforms; power series solutions; numerical methods, linear systems.
Credit Hours: 3
Prerequisites: graduate standing and MATH 2300

MATH 7110: Advanced Calculus With Applications
Linear mappings, Jacobi matrices and determinants, change of variables, vector fields, line and surface integrals, theorems of Green, Gauss and Stokes, sequences and series of functions, uniform convergence, special functions.
Credit Hours: 3
Prerequisites: graduate standing and MATH 2300

MATH 7140: Matrix Theory
Basic properties of matrices, determinants, vector spaces, linear transformations, eigenvalues, eigenvectors, and Jordan normal forms. Introduction to writing proofs.
Credit Hours: 3
Prerequisites: graduate standing and MATH 2300

MATH 7150: History of Mathematics
This is a history course with mathematics as its subject. Includes topics in the history of mathematics from early civilizations onwards. The growth of mathematics, both as an abstract discipline and as a subject which interacts with others and with practical concerns, is explored. Pre- or Co-requisite: MATH 2300 or MATH 2340 and graduate standing.
Credit Hours: 3

MATH 7300: Numerical Analysis
Machine arithmetic, approximation and interpolation, numerical differentiation and integration, nonlinear equations, linear systems,
differential equations, error analysis. Selected algorithms will be programmed for solution on computers.

**Credit Hours:** 3  
**Prerequisites:** graduate standing and MATH 2300 and MATH 4100 or equivalent

**MATH 7310: Numerical Linear Algebra**
Solution of linear systems of equations by direct and iterative methods. Calculation of eigenvalues and eigenvectors of matrices. Selected algorithms programmed for solution on computers.

**Credit Hours:** 3  
**Prerequisites:** MATH 2300 and prior experience writing programs in Mathematica and/or in a computer language such as Fortran, Pascal, or C  
**Recommended:** MATH 4140

**MATH 7315: Introduction to Mathematical Statistics**
(same as STAT 7710). Introduction to theory of probability and statistics using concepts and methods of calculus.

**Credit Hours:** 3  
**Prerequisites:** graduate standing and MATH 2300 or instructor’s consent

**MATH 7320: Introduction to Probability Theory**
(same as STAT 7750). Probability spaces; random variables and their distributions; repeated trials; probability limit theorems.

**Credit Hours:** 3  
**Prerequisites:** MATH 2300 or instructor’s consent

**MATH 7330: Theory of Numbers**
Divisibility, factorization, arithmetic functions, means value theorems, distribution of prime numbers, congruences, primitive roots, character theory, Riemann zeta function, and Dirichlet L-functions.

**Credit Hours:** 3  
**Prerequisites:** MATH 2300; recommended MATH 2320 or MATH 2340, and MATH 4940 or MATH 7940

**MATH 7335: College Geometry**
Euclidean geometry from an advanced viewpoint. Synthetic and coordinate methods will be used. The Euclidean group of transformations will be studied.

**Credit Hours:** 3  
**Prerequisites:** graduate standing and MATH 2300

**MATH 7340: Projective Geometry**
Basic ideas and methods of projective geometry built around the concept of geometry as the study of invariants of a group. Extensive treatment of collineations.

**Credit Hours:** 3  
**Prerequisites:** MATH 2300

**MATH 7345: Foundations of Geometry**
Coordination of affine, projective planes by means of various kinds of algebraic structures: planar ternary rings, Veblen-Wedderburn systems, divisions rings, skew fields, and fields.

**Credit Hours:** 3  
**Prerequisites:** MATH 2300

**MATH 7350: Introduction to Non-Euclidean Geometry**
Account of rise, development of non-Euclidean geometries. Intensive study of plane hyperbolic geometry.

**Credit Hours:** 3  
**Prerequisites:** MATH 2300

**MATH 7355: Introduction to Financial Derivatives and Options**
(cross-leveled with MATH 4355). Long and short positions, forward contracts, exchange traded index futures, European and American call and put options, put-call parity, trading and hedging strategies, synthetic transactions, arbitrage, currency options, fixed income portfolio management, duration, convexity, interest rate and currency swaps, embedded options.

**Credit Hours:** 3  
**Prerequisites:** MATH 2300 and STAT 2500 or STAT 4710/ MATH 4315, or instructor’s consent

**MATH 7360: Actuarial Mathematics**
(cross-leveled with MATH 4360). Basic actuarial methods, mathematical population studies and models of population growth. Compound interest and annuities certain. Values of endowment and annuities, calculation of premiums, surrender values. Stochastic models of populations growth.

**Credit Hours:** 3  
**Prerequisites:** MATH 2300 and either STAT 2500 or STAT 4710/ MATH 4315, or instructor’s consent

**MATH 7370: Actuarial Modeling I**
This course covers the main probability tools applied to financial risk modeling, and the financial mathematics concepts used in calculating present and accumulated values for various cash flows. It is a helpful tool in preparing for the Society of Actuaries exams P (Probability) and FM (Financial Mathematics), and it is oriented towards problem solving techniques illustrated with previous exam problems. Students are encouraged to take MATH 4355 prior to this course.

**Credit Hours:** 3  
**Prerequisites:** MATH 2300, MATH 4320 or STAT 4750

**MATH 7371: Actuarial Modeling II**
(cross-leveled with MATH 4371). The goal of this course is to teach the basic theory of life contingent actuarial models and the application of those models to insurance and other financial risks. The topics covered are part of the readings for the Society of Actuaries exam MLC (Models for Life Contingencies) and are illustrated with past exam questions.

**Credit Hours:** 3  
**Prerequisites:** MATH 4320 or STAT 4750, and MATH 4370

**MATH 7371: Actuarial Modeling II**
(cross-leveled with MATH 4371). The goal of this course is to teach the basic theory of life contingent actuarial models and the application of those models to insurance and other financial risks. The topics covered are part of the readings for the Society of Actuaries exam MLC (Models for Life Contingencies) and are illustrated with past exam questions.

**Credit Hours:** 3  
**Prerequisites:** MATH 4320 or STAT 4750, and MATH 4370

**MATH 7400: Introduction to Topology**
Topics from topology of Euclidean spaces, generalizations to metric spaces and topological spaces. Fundamentals of point set topology.

**Credit Hours:** 3  
**Prerequisites:** MATH 2300
MATH 7500: Applied Analysis
Solution of the standard partial differential equations (wave, heat, Laplace’s eq.) by separation of variables and transform methods; including eigenfunction expansions, Fourier and Laplace transform. Boundary value problems, Sturm-Liouville theory, orthogonality, Fourier, Bessel, and Legendre series, spherical harmonics.

Credit Hours: 3
Prerequisites: MATH 4100/ MATH 7100

MATH 7510: Higher Algebra
Introduction to rings, integral domains, fields, groups.

Credit Hours: 3
Prerequisites: MATH 2300 OR MATH 2320

MATH 7520: Statistical Inference I
(same as STAT 7760). Sampling; point estimation; sampling distribution; tests of hypotheses; regression and linear hypotheses.

Credit Hours: 3
Prerequisites: MATH 4320/ MATH 7320

MATH 7540: Mathematical Modeling I
Solution of problems from industry, physical, social and life sciences, economics, and engineering using mathematical models.

Credit Hours: 3
Prerequisites: MATH 4100/ MATH 7100, MATH 4140/ MATH 7140, and familiarity with software such as MATHEMATICA, MATLAB, or MAPLE

MATH 7550: Nonlinear Dynamics, Chaos and Fractals
Conceptual introduction to nonlinear dynamics, bifurcation and stability of steady states, chaos in nonlinear differential equations and maps, fractal dimension, strange attractors, and applications to physical science.

Credit Hours: 3
Prerequisites: graduate standing and 3 semesters of calculus and some exposure to ordinary differential equations or instructor’s consent

MATH 7560: Fluid Dynamics and Geophysical Applications
Mathematical theory of fluid dynamics and applications to meteorology and oceanography.

Credit Hours: 3
Prerequisites: MATH 2300 and instructor’s consent

MATH 7570: Mathematical Modeling II
Solution of problems from industry, physical, social and life sciences, economics, and engineering using mathematical models. More general classes of problems than in MATH 7540 will be considered.

Credit Hours: 3
Prerequisites: 3 semesters of calculus and some exposure to ordinary differential equations or instructor’s consent. MATH 7540 is not a prerequisite

MATH 7580: Mathematical Modeling III
Study of vector spaces over arbitrary fields: topics include linear maps on finite dimensional vector spaces, bilinear and multi-linear forms, invariant subspaces and canonical forms.

Credit Hours: 3
Prerequisites: MATH 4700/ MATH 7700

MATH 7590: Mathematics of Financial Derivatives
Study of vector spaces over arbitrary fields: topics include linear maps on finite dimensional vector spaces, bilinear and multi-linear forms, invariant subspaces and canonical forms.

Credit Hours: 3
Prerequisites: MATH 4700 or MATH 7700 or permission of the instructor

MATH 7620: Differential Geometry I
Metric properties of restricted portions of curves and surfaces in three-dimensional Euclidean space.

Credit Hours: 3
Prerequisites: MATH 2300

MATH 7700: Advanced Calculus of One Real Variable I
(cross-leveled with MATH 4700). Series of real numbers, limits of functions, continuity and uniform continuity, differentiability, and Riemann integration.

Credit Hours: 3
Prerequisites: MATH 4100 and one other mathematics course number above MATH 2300

MATH 7720: Mathematical Modeling II
Solution of problems from industry, physical, social and life sciences, economics, and engineering using mathematical models. More general classes of problems than in MATH 7540 will be considered.

Credit Hours: 3
Prerequisites: MATH 2300 and instructor’s consent

MATH 7740: Mathematical Modeling III
Study of vector spaces over arbitrary fields: topics include linear maps on finite dimensional vector spaces, bilinear and multi-linear forms, invariant subspaces and canonical forms.

Credit Hours: 3
Prerequisites: MATH 4700/ MATH 7700

MATH 7750: Advanced Multivariable Calculus
(cross-leveled with MATH 4900). This is a course in calculus in several variables. The following is core material: Basic topology of n-dimensional Euclidean space; limits and continuity of functions; the derivative as a linear transformation; Taylor’s formula with remainder; the Inverse and Implicit Function Theorems, change of coordinates; integration (including transformation of integrals under changes of coordinates); Green’s Theorem. Additional material from the calculus of several variables may be included, such as Lagrange multipliers, differential forms, etc.

Credit Hours: 3
Prerequisites: MATH 4700/ MATH 7700

MATH 7760: Introduction to Abstract Algebra I
Basic properties of integers, fundamental theorem of arithmetic, introduction to groups, rings and fields.

Credit Hours: 3
Prerequisites: MATH 2300

MATH 7770: Advanced Calculus of One Real Variable II
(cross-leveled with MATH 4800). Continuation of Advanced Calculus for functions of a single real variable. Topics include sequences and series of functions, power series and real analytic functions, Fourier series.

Credit Hours: 3
Prerequisites: MATH 4700 or MATH 7700 or permission of the instructor

MATH 7900: Introduction to Abstract Linear Algebra
Study of vector spaces over arbitrary fields: topics include linear maps on finite dimensional vector spaces, bilinear and multi-linear forms, invariant subspaces and canonical forms.

Credit Hours: 3
Prerequisites: MATH 4700 or MATH 7700 or permission of the instructor
Prerequisites: MATH 4720/ MATH 7720

MATH 7940: Introduction to Complex Variables
Complex functions, contour integration, power series, residues and poles, conformal mapping.
Credit Hours: 3
Prerequisites: MATH 4110/ MATH 7110 OR MATH 4700/ MATH 7700

MATH 7960: Special Readings in Mathematics
Credit Hour: 1-3
Prerequisites: MATH 2300 and instructor’s consent

MATH 7970: Senior Seminar in Mathematics
Seminar with student presentations, written projects, and problem solving. May be used for the capstone requirement.
Credit Hours: 3
Prerequisites: 12 hours of mathematics courses numbered 4000 or above

MATH 8085: Mathematics Problem Solving
Creative advanced problem solving bringing together methods such as integration, probability and Euclidean geometry.
Credit Hours: 3
Prerequisites: MATH 4140 and another 4000 level Mathematics course, or instructor’s consent

MATH 8202: Topics in Harmonic Analysis
Topics in Harmonic Analysis
Credit Hour: 3
Prerequisites: MATH 4700 or MATH 7700 and MATH 4900 or MATH 7900, or equivalent

MATH 8220: Basic Analysis
Accelerated problem-solving course in advanced calculus and complex analysis. Will prepare students for the analysis qualifying exam.
Credit Hours: 6
Prerequisites: MATH 4700, MATH 4900, MATH 4940, instructor’s consent or equivalent

MATH 8250: Basic Topology and Geometry
Credit Hours: 3
Prerequisites: MATH 4700, MATH 4900, MATH 4140, or instructor’s consent, or equivalent

MATH 8302: Topics in Harmonic Analysis
Topics in Harmonic Analysis
Credit Hours: 3

MATH 8402: Topics in Mathematical Physics
Topics in Mathematical Physics
Credit Hours: 3

MATH 8410: Algebra I
Theory of algebraic structures--groups, rings, fields, algebraic and transcendental extensions of fields.
Credit Hours: 3
Prerequisites: MATH 4720 and MATH 4920, or equivalent

MATH 8411: Algebra II
Theory of modules, Galois theory and additional topics to be selected by the instructor.
Credit Hours: 3
Prerequisites: MATH 4720 or equivalent

MATH 8420: Theory of Functions of Real Variables I
Properties of functions of one real variable. Lebesgue measure and integration on the line.
Credit Hours: 3
Prerequisites: MATH 4700 or MATH 7700 and MATH 4900 or MATH 7900, or equivalent

MATH 8421: Theory of Functions of Real Variables II
Continuation of MATH 8420. General measure and integration theory. Elements of the theory of Hilbert and Banach spaces, linear functions and linear operators.
Credit Hours: 3
Prerequisites: MATH 8420
MATH 8425: Complex Analysis I
Rigorous introduction to the theory of functions of a complex variable.
Credit Hours: 3
Prerequisites: MATH 4900 or MATH 7900 or equivalent

MATH 8426: Complex Analysis II
Analytic continuation, Riemann surfaces, entire and meromorphic functions, selected topics.
Credit Hours: 3
Prerequisites: MATH 8425

MATH 8440: Advanced Ordinary Differential Equations I
Topics from existence and uniqueness theorems, plane autonomous systems, periodicity and boundedness of solutions of second order nonlinear equations, perturbation theory, Sturm-Liouville systems, behavior of solutions at singularities.
Credit Hours: 3
Prerequisites: MATH 4700 or MATH 7700 or equivalent

MATH 8441: Advanced Ordinary Differential Equations II
Continuation of MATH 8440.
Credit Hours: 3

MATH 8442: Calculus of Variations I
Development of necessary conditions and of sufficient conditions for nonparametric and parametric problems. Hamilton’s principle, related topics.
Credit Hours: 3
Prerequisites: instructor’s consent required

MATH 8445: Partial Differential Equations I
Fourier and integral transforms, first and second order partial differential equations, methods of characteristics, Laplace’s equation, Dirichlet and Neumann problems, Green’s functions and maximum principles.
Credit Hours: 3
Prerequisites: MATH 4500 or instructor’s consent required

MATH 8450: Differential Geometry for Scientists and Engineers
Tensors and multilinear forms. Connections, covariant differentiation, geodesics and curvature on Riemannian and pseudo Riemannian manifolds. Applications to special relativity and general relativity.
Credit Hours: 3
Prerequisites: MATH 4110 and some knowledge of Matrix Theory

MATH 8460: Mathematical Finance I
Credit Hours: 3
Prerequisites: graduate standing in Mathematics. Knowledge of elementary probability or instructor’s consent

MATH 8461: Mathematical Finance II
Credit Hours: 3
Prerequisites: knowledge of advance probability/stochastic processes or instructor’s consent
Recommended: MATH 8460

MATH 8465: Mathematical Methods of Risk Theory
Credit Hours: 3
Prerequisites: knowledge of elementary probability or instructor’s consent

MATH 8470: Advanced Numerical Analysis
Analysis and implementation of numerical algorithms selected from approximation theory, splines, quadrature, nonlinear systems, ordinary differential equations, and optimization.
Credit Hours: 3
Prerequisites: MATH 4700, MATH 4300 or equivalent, and MATH 4140

MATH 8480: Advanced Probability
(same as STAT 9810). Measure theoretic probability theory. Characteristic functions; conditional probability and expectation; sums of independent random variables including strong law of large numbers and central limit problem.
Credit Hours: 3
Prerequisites: MATH 4320 or MATH 8220; or instructor’s consent

MATH 8502: Topics of Geometry
Topics of Geometry.
Credit Hours: 3
Prerequisites: instructor’s consent
MATH 8587: Topology Seminar
Topology Seminar
Credit Hours: 3

MATH 8602: Topics in Financial Mathematics and Insurance
Topics in Financial Mathematics and Insurance
Credit Hours: 3

MATH 8615: Algebraic Geometry I
Affine and projective varieties and schemes; nullstellensatz; Zariski topology, morphisms and rational maps; divisors and linear systems; topics from curves, surfaces, Grassmann varieties; commutative algebra and homological algebra as needed.
Credit Hours: 3
Prerequisites: MATH 8410

MATH 8616: Algebraic Geometry II
Continuation of MATH 8615.
Credit Hours: 3
Prerequisites: MATH 8615

MATH 8618: Introduction to Algebraic Topology
Development of singular homology theory; reference to other homology and cohomology theories. Introduction to homological algebra.
Credit Hours: 3
Prerequisites: MATH 8250

MATH 8628: Functional Analysis I
Linear topological spaces, Banach spaces, Hilbert spaces. Operator theory, including the Hahn-Banach, uniform boundedness and closed graph theorems.
Credit Hours: 3
Prerequisites: MATH 4900 and instructor's consent or MATH 8420

MATH 8629: Functional Analysis II
Topological vector spaces, duality theory, Banach algebras.
Credit Hours: 3
Prerequisites: MATH 8628

MATH 8630: Harmonic Analysis I
An introduction to Fourier Analysis in one and higher Dimensions. Topics include Fourier Series, conjugate functions, Fourier transforms, distributions, interpolation, and maximal functions.
Credit Hours: 3
Prerequisites: MATH 8420

MATH 8631: Harmonic Analysis II
Singular integrals, Littlewood-Paley theory. Hardy spaces, bounded mean oscillation, weighted norm inequalities, boundary value problems, and analysis on groups.
Credit Hours: 3
Prerequisites: MATH 8630

MATH 8642: Nonlinear Differential Equations
Existence theorems; criteria for periodic solutions; boundedness of solutions; perturbation theory. Emphasizes second order equations.
Credit Hours: 3
Prerequisites: MATH 4100 and MATH 4110 or MATH 4700

MATH 8648: Advanced Mathematics for the Physical Sciences
Credit Hours: 3
Prerequisites: instructor's consent
Recommended: MATH 4110, MATH 4700, PHYSCS 8660

MATH 8650: Differentiable Manifolds and Riemannian Geometry
Tensor product spaces and tensor fields on manifolds. Differentiation and integration of differential forms. Riemannian geometry and applications.
Credit Hours: 3
Prerequisites: MATH 4700 or MATH 4400

MATH 8655: General Topology I
Credit Hours: 3
Prerequisites: MATH 4900, MATH 4400 or instructor's consent

MATH 8660: Stochastic Processes
(same as STAT 9820). Markov processes, martingales, orthogonal sequences, processes with independent and orthogonal increments, stationary, linear prediction.
Credit Hours: 3
Prerequisites: MATH 4840

MATH 8702: Topics in Applied Mathematics
Selected topics in applied mathematics drawn from variety of areas: partial differential equations, tensor analysis, calculus of variations, asymptotic methods, integral equations, advanced theory of transforms and distributions, numerical analysis.
Credit Hours: 3

MATH 8787: Numerical Mathematics Seminar
Numerical Mathematics Seminar
Credit Hours: 3

MATH 9090: Doctoral Dissertation Research in Mathematics
Doctoral Dissertation Research in Mathematics. Graded on a S/U basis only.
Credit Hour: 1-9

MATH 9187: Algebra Seminar
Algebra Seminar
**Credit Hours: 3**

**MATH 9287: Functional Analysis Seminar**
Functional Analysis Seminar
Credit Hours: 3

**MATH 9387: Harmonic Analysis Seminar**
Harmonic Analysis Seminar
Credit Hours: 3

**MATH 9487: Mathematical Physics Seminar**
Mathematical Physics Seminar
Credit Hours: 3

**MATH 9502: Topics in Topology**
Advanced topics in topology or topological algebra.
Credit Hours: 3

**MATH 9587: Geometry Seminar**
Geometry Seminar
Credit Hours: 3

**MATH 9687: Financial Mathematics Seminar**
Financial Mathematics Seminar
Credit Hours: 3

**MAE 1000: Introduction to Mechanical Engineering**
Introduction to the mechanical engineering profession, the Mechanical and Aerospace Engineering Department and curriculum, and the core disciplines of mechanical engineering. Introduction to engineering problem solving, ethics, and design.
Credit Hour: 1
Prerequisites: Restricted to engineering students only

**MAE 1001: Experimental Course**
Experimental course. For freshmen-level students. Content and credit hours to be listed in Schedule of Courses.
Credit Hour: 1-99

**MAE 2001: Experimental Course**
Experimental course. For sophomore-level students. Content and credit hours to be listed in Schedule of Courses.
Credit Hour: 1-99

**MAE 2100: Programming and Software Tools**
Introduction to the use of computers, programming, and software. Topics include MATLAB syntax and programming techniques, algorithm design, and programming with Excel spreadsheets.
Credit Hours: 2
Prerequisites: MATH 1700. Restricted to Mechanical Aerospace Engineering Students Only

**MAE 2300: Thermodynamics**
(same as ENGINR 2300). Fluid properties, work and heat, first law, second law, entropy, applications to vapor and ideal gas processes.
Credit Hours: 3
Prerequisites: PHYSCS 2750

**MAE 2600: Dynamics**
Basic fundamentals of particle and rigid body dynamics; energy and momentum methods.
Credit Hours: 3
Prerequisites: grade of C or better in ENGINR 1200. Restricted to Mechanical and Aerospace Engineering students only

**MAE 3100: Computational Methods for Engineering Design**
Introduction to numerical methods for linear system analysis, curve-fitting, integration and differentiation, and optimization. The numerical methods are demonstrated through computer implementation and application to engineering design problems.
Credit Hours: 4
Prerequisites: MAE 2100; MATH 4100 concurrent. Restricted to Mechanical and Aerospace Engineering students only

**MAE 3200: Engineering Materials**
The nature of the structure of engineering materials. The relationship of material structure to physical properties. Mechanical behavior of engineering materials.
Credit Hours: 4
Prerequisites: Grade of C or better in ENGINR 2200 and CHEM 1320. Restricted to Mechanical and Aerospace Engineering students only

**MAE 3400: Fluid Mechanics**
A basic course in fluid mechanics. Topics include: fluid properties, hydrostatics, conservation laws, infinitesimal and finite control volume analysis, Navier-Stokes equations, dimensional analysis, internal and external flows.
Credit Hours: 3
Prerequisites: MAE 2600; ENGINR 2300 concurrent. Restricted to Mechanical and Aerospace Engineering students only

MAE 3600: Dynamic Systems and Control
Modeling and analysis of dynamic systems and introduction to feedback control. Topics include dynamic modeling and response of mechanical, electrical, fluid, and thermal systems; and feedback control systems analysis.

Credit Hours: 3
Prerequisites: MAE 2600; MAE 3100
Corequisites: ENGINR 2100. Restricted to Mechanical and Aerospace Engineering students only

MAE 3600H: Dynamic Systems and Control - Honors
Modeling and analysis of dynamic systems and introduction to feedback control. Topics include dynamic modeling and response of mechanical, electrical, fluid, and thermal systems; and feedback control systems analysis.

Credit Hours: 3
Prerequisites: MAE 2600; MAE 3100. Restricted to Mechanical and Aerospace Engineering students only. Honors eligibility required
Corequisites: ENGINR 2100

MAE 3800: Instrumentation and Measurements Laboratory
Design and reporting of experimental investigations. Topics include instrument design equations, sources of error, and calibration. Survey of instruments to measure: voltage, resistance, current, time, frequency, displacement, velocity, acceleration, strain, force, and torque.

Credit Hours: 3
Prerequisites: ENGINR 2100; ENGINR 2200
Corequisites: MAE 3600. Restricted to Mechanical and Aerospace Engineering students only

MAE 3900: Mechanism Design
Analysis of kinematics and dynamics of machinery. Topics include design and selection of various mechanisms. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Grade of C- or better in ENGINR 2200 and MAE 2600. Restricted to Mechanical and Aerospace Engineering students only

MAE 4001: Topics in Mechanical and Aerospace Engineering
Current and new technical developments in mechanical and aerospace engineering.

Credit Hours: 3
Prerequisites: instructor’s consent. Restricted to Mechanical and Aerospace Engineering students only

MAE 4085: Problems in Mechanical and Aerospace Engineering
Special design, experimental and analytical problems in mechanical and aerospace engineering.

Credit Hour: 1-99

MAE 4210: Aerospace Structures
Fundamentals of the mechanics and design issues of aerospace structures. Analysis of thin skins with stiffeners for external surfaces, bulkheads and frames for shape support, and fasteners for holding components together. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Grade of C or better in ENGINR 2200

MAE 4220: Materials Selection
Study of the physical and mechanical metallurgy of alloy systems of interest in engineering applications.

Credit Hours: 3
Prerequisites: MAE 3200. Restricted to Mechanical and Aerospace Engineering students only

MAE 4230: Nanomaterials
The primary goal of this course is to introduce students into the new field of nanostructured materials. The emphasis of the course is to introduce the students into synthesis and characterization of nanomaterials, the behavior of such materials with nanoscale structures, and their technological applications.

Credit Hours: 3
Prerequisites: MAE 3200 or equivalent

MAE 4231: Transport Phenomena in Materials Processing
(same as BIOL_EN 4231). Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Graded on A-F basis only.

Credit Hours: 3
Prerequisites or Corequisites: MAE 4300 or permission of instructor
Prerequisites: MAE 3200, MAE 3400 (or permission of instructor); and MATH 4100

MAE 4232: Ceramic Materials and Processing
(cross-leveled with MAE 7232). Treatment of ceramics materials, structure, and ceramic processing with hands-on demonstration/labs. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MAE 3200 or equivalent course

MAE 4240: Diffraction Methods in Materials Science
Introduction to crystal structure and the use of x-rays and neutrons to study materials aspects including phase analysis, structure determination, residual stress and texture.

Credit Hours: 3
Prerequisites: instructor’s consent. Restricted to Mechanical and Aerospace Engineering students only

MAE 4250: Composite Materials
A survey of composite materials used in engineering emphasizing fiber-reinforced composites but including laminate and particulate composites.

Credit Hours: 3
Prerequisites: MAE 3200. Restricted to Mechanical and Aerospace Engineering students only
MAE 4260: Experimental Stress Analysis
The course introduces basic concepts of stress and strain using elasticity theory. Single point and full-field experimental methods for stress and strain measurement, such as strain gages and photoelastcity, are discussed. Application of experimental methods in transducer development and design of structures will be covered.
Credit Hours: 3
Prerequisites: senior standing

MAE 4270: Nondestructive Evaluation of Materials
The role of nondestructive evaluation (NDE) in engineering is explored. Ultrasonic NDE is studied in detail. Labs are used to support the study of ultrasonic NDE. Other NDE techniques are surveyed.
Credit Hours: 3
Prerequisites: MAE 3200. Restricted to Mechanical and Aerospace Engineering students only

MAE 4280: Introduction to Finite Element Methods
The application of matrix operations, energy concepts and structural mechanics to the development of the finite element method. Application of finite element method to beams, frames and trusses.
Credit Hours: 3
Prerequisites: ENGINR 2200 and MAE 3100. Restricted to Mechanical and Aerospace Engineering students only

MAE 4290: Welding Engineering
Welding is the most common method of joining similar as well as dissimilar materials. This course thus introduces the basic science and engineering aspects of commonly used fusion and non-fusion welding processes. Stress analysis and failure to welded joints is also introduced to develop safe and durable welded structures.
Credit Hours: 3
Prerequisites: senior standing

MAE 4300: Heat Transfer
Credit Hours: 3
Prerequisites: MAE 3400, grade of C or better in ENGINR 2300. Restricted to Mechanical and Aerospace Engineering students only

MAE 4310: Intermediate Heat Transfer
Advanced topics in conduction, convection, and radiation. Heat exchanges and their applications will also be analyzed.
Credit Hours: 3
Prerequisites: MAE 4300. Restricted to Mechanical and Aerospace Engineering students only

MAE 4320: Design of Thermal Systems
Thermal systems are simulated by mathematical models (often on a digital computer), followed by optimization. Supporting topics include: economics, heat transfer, thermodynamics, and optimization.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 4340: Heating and Air Conditioning
General principles of thermal science applied to the design of environmental control systems. Topics covered include heating and cooling load calculations, annual operating and life cycle cost estimating, duct and pipe sizing, and equipment selection.
Credit Hours: 3
Prerequisites: MAE 3400. Restricted to Mechanical and Aerospace Engineering students only

MAE 4350: Industrial Energy Analysis
Credit Hours: 3
Corequisites: MAE 4300 or instructor's permission

MAE 4380: Intermediate Thermodynamics
Topics from classical and statistical thermodynamics.
Credit Hours: 3
Prerequisites: ENGINR 2300

MAE 4390: Aerospace Propulsion
Analysis of aircraft engines and spacecraft propulsion systems.
Credit Hours: 3
Prerequisites: MAE 3400

MAE 4420: Intermediate Fluid Mechanics
Topics in potential and viscous flow theory, and computational fluid dynamics.
Credit Hours: 3
Prerequisites: MAE 3400

MAE 4430: Introduction to Computational Fluid Dynamics and Heat Transfer
Introduction to the principles and development of the finite difference approximations to the governing differential equations of viscous and inviscid fluid flow, as well as heat transfer. Introduction to discretization methods and the calculation of flow fields, convection, diffusion and conduction.
Credit Hours: 3
Prerequisites: MAE 3400

MAE 4440: Aerodynamics
Presents fundamentals of wing and airfoil theory for incompressible flow, including fluid kinematics and dynamics, potential flow, flow about a body, thin-airfoil theory, and finite wing.
Credit Hours: 3
Prerequisites: MAE 3400

MAE 4450: Gas Dynamics
One dimensional compressible flow with and without friction and heat transfer. Inertropic flow and shock phenomenon in nozzles and diffusers.
Credit Hours: 3
MAE 4500: Manufacturing Methods
Introduction to manufacturing processes with emphasis on those aspects most relevant to methods, problems in force analysis, and practicum and experimentation in machine tool applications.

Credit Hours: 3
Prerequisites: MAE 3400

MAE 4520: Manufacturing Process Analysis
Methods and techniques used in process analysis, optimization and control. These include deterministic modeling (slab, upper bound and FEM), physical modeling techniques and statistical process control.

Credit Hours: 3
Prerequisites: MAE 4500

MAE 4550: Integrated Production Systems
(same as IMSE 4550). Product realization process from design, process planning, to manufacturing. Includes CE, DFS/DFM, CAD, CAPP, CNC, and survey of manufacturing methods.

Credit Hours: 3
Prerequisites: MAE 4500

MAE 4600: Advanced Mechanics of Materials
(same as CV_ENG 4600; cross-leveled with MAE 7600 and CV_ENG 7600). Analysis of more complicated problems in stresses, strains.

Credit Hours: 3
Prerequisites: MAE 2600, MAE 3100, MAE 3400, senior standing

MAE 4620: Aircraft Flight Performance
(cross-leveled with MAE 7620). Analysis of aircraft flight and aircraft performance metrics. Topics include airplane aerodynamics and propulsion, steady flight, range, endurance, take-off and landing, and aircraft maneuvers. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MAE 2600, MAE 3100, MAE 3400, senior standing

MAE 4630: Space Flight Mechanics
(cross-leveled with MAE 7630). Analysis of spacecraft orbits and trajectories. Topics include orbital mechanics, orbital maneuvers, interplanetary missions, and entry flight mechanics.

Credit Hours: 3
Prerequisites: MAE 2600, MAE 3100 and senior standing

MAE 4650: Synthesis of Linkages
Type, number and dimensional synthesis of linkages to produce a given input-output motion and/or force.

Credit Hours: 3
Prerequisites: MAE 3100

MAE 4660: Vibration Analysis
(same as CV_ENG 4660). Vibration theory and its application to mechanical systems. Topics include free and forced vibration analysis of single- and multi-degree of freedom systems.

Credit Hours: 3
Prerequisites: MAE 2600 and MATH 4100

MAE 4670: Vehicle Dynamics
Analysis and prediction of the dynamic behavior of ground vehicles utilizing computer simulation. Mechanics of various suspension systems, tire-roadway interaction, vehicle aerodynamics, vehicle handling and steering characteristics. Special topics including nonholonomic constraint formulation and stability of motion.

Credit Hours: 3
Prerequisites: MAE 3600

MAE 4680: Introduction to MEMS
The course will start with a survey of the widespread applications of MEMS sensors and actuators. Micro fabrication methods used in conventional semiconductor industry will be introduced. MEMS-specific process will be emphasized. Fundamental principles in electric circuits and mechanics will be reviewed. Special attention is on mechanical issues encountered in MEMS design and fabrication.

Credit Hours: 3
Prerequisites: MAE 3600

MAE 4710: Hydraulic Control System
Analysis of hydraulic control components and systems. Topics include pumps, valves, actuators, and industrial and mobile control systems. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MAE 3400 and MAE 3600

MAE 4720: Modern Control
Analysis and design of control systems using state-space methods. Topics include controllability and observability, feedback control using pole-placement, state observers, optimal linear-quadratic feedback control, and optimal estimation. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MAE 3600

MAE 4730: Mechatronics
Design of systems which require the integration of mechanical and electronic components. Topics include microcontrollers, sensors, actuators, mechanical systems, real time control system programming, and modeling of electronic and mechanical systems.

Credit Hours: 3
Prerequisites: MAE 3600

MAE 4740: Digital Control
Design and analysis of control systems using discrete-time methods. Topics include z-transforms, sampling and reconstruction, stability analysis, and digital controller design.

Credit Hours: 3
Prerequisites: MAE 3600
MAE 4750: Classical Control
Study of feedback control design based on classical continuous-time methods. Topics include performance specifications, stability analysis, root locus compensator design, and frequency domain analysis and compensator design.

Credit Hours: 3
Prerequisites: MAE 3600

MAE 4800: Thermal and Fluid Science Laboratory
Continuation of Mechanical and Aerospace Engineering [MAE] 3800 with emphasis on: instruments to measure temperature, pressure fluid flow, fluid velocity, sound, and computer data acquisition.

Credit Hours: 3
Prerequisites: Mechanical and Aerospace Engineering [MAE] 4300. Restricted to MAE students only

MAE 4820: Experimental Methods in Fluid Flow and Heat Transfer
Laboratory experiments involving fundamental mechanisms and phenomena associated with fluid flow and heat transfer. Current experimental methods and techniques employed.

Credit Hours: 3
Prerequisites: MAE 4800 and MAE 4300

MAE 4900: Machine Element Design
Application of stress and fatigue analyses to the design of machine elements such as fasteners, springs, shafts, and gears. Topics include selection of appropriate materials and machine elements.

Credit Hours: 3
Prerequisites: Grade of C- or better in MAE 3200. Restricted to Mechanical and Aerospace Engineering students only

MAE 4920: Advanced Computational Design
(cross-leveled with MAE 7920). Development and application of modern simulation-based design methodologies. Topics include structural optimization, multidisciplinary design methods, reliability-based design, non-deterministic methods, design sensitivity analysis, and finite elements in design. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MAE 3100

MAE 4930: Applied Mechanical Optimization
Introduction to mathematical programming techniques and applications to the design of mechanical systems and components.

Credit Hours: 3
Prerequisites: MAE 3100. Restricted to Mechanical and Aerospace Engineering students only

MAE 4940: Aircraft Design
Conceptual design of aircraft, from initial sizing and design layout to design analysis, optimization and trade studies. Fundamental theories for aircraft design including sizing, aerodynamic forces, airfoil selection, wing loading, configuration layout payloads, propulsion systems, landing gear, aerospace structures, and cost analysis. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MAE 3200 or equivalent

MAE 4980: Senior Capstone Design
Senior design experience. Topics include reliability, safety, manufacturability, economic, and environmental constraints; design case studies; and industrial design projects.

Credit Hours: 3
Prerequisites: MAE 3600, MAE 4500, MAE 4900; STAT 4710 or IMSE 2110. Restricted to Mechanical and Aerospace Engineering students only

MAE 4990: Undergraduate Research in Mechanical and Aerospace Engineering
Independent investigation or project in Mechanical Engineering.

Credit Hour: 0-6
Prerequisites: senior standing in Mechanical Engineering and instructor’s consent

MAE 4995: Undergraduate Honors Research Mechanical & Aerospace Engineering
Independent investigation to be presented as an undergraduate honors thesis.

Credit Hour: 1-99
Prerequisites: Honors student in Mechanical and Aerospace Engineering

MAE 7001: Topics in Mechanical and Aerospace Engineering
Current and new technical developments in mechanical and aerospace engineering.

Credit Hours: 3
Prerequisites: instructor’s consent

MAE 7210: Aerospace Structures
Fundamentals of the mechanics and design issues of aerospace structures. Analysis of thin skins with stiffeners for external surfaces, bulkheads and frames for shape support, and fasteners for holding components together. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: grade of C or better in ENGINR 2200

MAE 7220: Materials Selection
Study of the physical and mechanical metallurgy of alloy systems of interest in engineering applications.

Credit Hours: 3
Prerequisites: MAE 3200

MAE 7230: Nanomaterials
The primary goal of this course is to introduce students into the new field of nanostructured materials. The emphasis of the course is to introduce the students into synthesis and characterization of nanomaterials, the behavior of such materials with nanoscale structures, and their technological applications.

Credit Hours: 3
Prerequisites: MAE 3200 or equivalent
MAE 7231: Transport Phenomena in Materials Processing
(same as BIOL_EN 7231) Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Graded A-F basis only.
Credit Hours: 3
Prerequisites: MAE 3200, MAE 3400, MAE 4300 (or equivalent courses) and MATH 4100

MAE 7232: Ceramic Materials and Processing
(cross-leveled with MAE 4232). Treatment of ceramics materials, structure, and ceramic processing with hands-on demonstration/labs. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MAE 3200 or equivalent course

MAE 7240: Diffraction Methods in Materials Science
Introduction to crystal structure and the use of x-rays and neutrons to study materials aspects including phase analysis, structure determination, residual stress and texture.
Credit Hours: 3
Prerequisites: instructor’s consent required

MAE 7250: Composite Materials
A survey of composite materials used in engineering emphasizing fiber-reinforced composites but including laminate and particulate composites.
Credit Hours: 3
Prerequisites: MAE 3200

MAE 7260: Experimental Stress Analysis
The course introduces basic concepts of stress and strain using elasticity theory. Single point and full-field experimental methods for stress and strain measurement, such as strain gages and photoelasticity, are discussed. Application of experimental methods in transducer development and design of structures will be covered.
Credit Hours: 3

MAE 7270: Nondestructive Evaluation of Materials
The role of nondestructive evaluation (NDE) in engineering is explored. Ultrasonic NDE is studied in detail. Labs are used to support the study of ultrasonic NDE. Other NDE techniques are surveyed.
Credit Hours: 3
Prerequisites: MAE 3200

MAE 7280: Introduction to Finite Element Methods
The application of matrix operations, energy concepts and structural mechanics to the development of the finite element method. Application of finite element method to beams, frames and trusses.
Credit Hours: 3
Prerequisites: ENGINR 2200 and MAE 3100

MAE 7290: Welding Engineering
Welding is the most common method of joining similar as well as dissimilar materials. This course thus introduces the basic science and engineering aspects of commonly used fusion and non-fusion welding processes. Stress analysis and failure to welded joints is also introduced to develop safe and durable welded structures.
Credit Hours: 3
Prerequisites: senior standing or graduate level

MAE 7310: Intermediate Heat Transfer
Advanced topics in conduction, convection, and radiation. Heat exchanges and their applications will also be analyzed.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 7320: Design of Thermal Systems
Thermal systems are simulated by mathematical models (often on a digital computer), followed by optimization. Supporting topics include: economics, heat transfer, thermodynamics, and optimization.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 7330: Solar Energy Utilization
Credit Hours: 3
Prerequisites: MAE 4300

MAE 7340: Heating and Air Conditioning
General principles of thermal science applied to the design of environmental control systems. Topics covered include heating and cooling load calculations, annual operating and life cycle cost estimating, duct and pipe sizing, and equipment selection.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 7350: Power Plant System Design
Preliminary component and system design. Optimum design of boilers, steam turbines, condensers and cooling towers and their integration into a system to minimize production costs and impact on the environment.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 7355: Industrial Energy Analysis
Credit Hours: 3
Corequisites: MAE 4300 or instructor’s consent
MAE 7356: Renewable Energy
Basic principles and technical details of various renewable energy technologies (solar, biomass, wind, hydroelectric, geothermal) for a sustainable energy supply. Process design, energy analysis, and environmental assessment of renewable energy systems. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Instructor's consent and Bachelor's in Engineering

MAE 7360: Internal Combustion Engines
Gas and oil engines. Thermodynamics of ideal and actual cycles, fuels and combustion, carburetor and injection systems, performance, construction.
Credit Hours: 3
Prerequisites: MAE 3400

MAE 7370: Combustion Fundamentals
Introduction to combustion principles.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 7380: Intermediate Thermodynamics
Topics from classical and statistical thermodynamics.
Credit Hours: 3
Prerequisites: ENGINR 2300

MAE 7390: Aerospace Propulsion
Analysis of aircraft engines and spacecraft propulsion systems.
Credit Hours: 3
Prerequisites: MAE 3400

MAE 7420: Intermediate Fluid Mechanics
Topics in potential and viscous flow theory, and computational fluid dynamics.
Credit Hours: 3
Prerequisites: MAE 3400

MAE 7430: Introduction to Computational Fluid Dynamics and Heat Transfer
Introduction to the principles and development of the finite difference approximations to the governing differential equations of viscous and inviscid fluid flow, as well as heat transfer. Introduction to discretization methods and the calculation of flow fields, convection, diffusion and conduction.
Credit Hours: 3
Prerequisites: MAE 3400, MAE 4300 and MAE 4420

MAE 7440: Aerodynamics
Presents fundamentals of wing and airfoil theory for incompressible flow, including fluid kinematics and dynamics, potential flow, flow about a body, thin-airfoil theory, and finite wing.
Credit Hours: 3
Prerequisites: MAE 3100 and MAE 3400

MAE 7450: Gas Dynamics
One-dimensional compressible flow with and without friction and heat transfer. Isentropic flow and shock phenomenon in nozzles and diffusers.
Credit Hours: 3
Prerequisites: MAE 3400

MAE 7520: Manufacturing Process Analysis
Methods and techniques used in process analysis, optimization and control. These include deterministic modeling (slab, upper bound and FEM), physical modeling techniques and statistical process control.
Credit Hours: 3
Prerequisites: MAE 4500

MAE 7600: Advanced Mechanics of Materials
(same as CV_ENG 7600; cross-leveled with MAE 4600 and CV_ENG 4600). Analysis of more complicated problems in stresses, strains.
Credit Hours: 3
Prerequisites: grade of C- or better in ENGINR 2200

MAE 7610: Experimental Stress Analysis
(same as CV_ENG 7610). Photo elastic, electric strain gage, brittle lacquer methods of experimental stress analysis for static loads. Strain gage work includes strain rosettes.
Credit Hours: 3
Prerequisites: ENGINR 2200

MAE 7620: Aircraft Flight Performance
(cross-leveled with MAE 4620). Analysis of aircraft flight dynamics and aircraft performance. Topics include airplane aerodynamics and propulsion, steady flight, flight performance, aircraft maneuvers, aircraft stability, and an introduction to flight controls. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MAE 3600

MAE 7630: Space Flight Mechanics
(cross-leveled with MAE 4630). Analysis of spacecraft motion. Topics include orbital dynamics, spacecraft attitude dynamics, satellite trajectory design, and spacecraft control system design.
Credit Hours: 3
Prerequisites: MAE 3600

MAE 7640: Analysis of Mechanisms
Kinematics and dynamic (bearing force, shaking force, and time response) design analysis of mechanisms: graphical, analytical and computer assisted techniques.
Credit Hours: 3
Prerequisites: MAE 3100 and MAE 2600

MAE 7650: Synthesis of Linkages
Type, number and dimensional synthesis of linkages to produce a given input-output motion and/or force.
Credit Hours: 3
Prerequisites: MAE 3100 and MAE 2600
MAE 7660: Vibration Analysis
(same as CV_ENG 7660). Vibration theory and its application to Mechanical systems. Topics include free and forced vibration analysis of single and multi-degree of freedom systems.

Credit Hours: 3
Prerequisites: grade of C- or better in MAE 2600 and MATH 4100

MAE 7670: Vehicle Dynamics
Analysis and prediction of the dynamic behavior of ground vehicles utilizing computer simulation. Mechanics of various suspension systems, tire-roadway interaction, vehicle aerodynamics, vehicle handling and steering characteristics. Special topics including nonholonomic constraint formulation and stability of motion.

Credit Hours: 3
Prerequisites: MAE 3600

MAE 7680: Introduction to MEMS
The course will start with a survey of the widespread applications of MEMS sensors and actuators. Micro fabrication methods used in conventional semiconductor industry will be introduced. MEMS-specific processes will be emphasized. Fundamental principles in electric circuits and mechanics will be reviewed. Special attention is on mechanical issues encountered in MEMS design and fabrication. Graded on A-F basis only.

Credit Hours: 3

MAE 7710: Hydraulic Control Systems
Analysis of hydraulic control components and systems. Topics include pumps, valves, actuators, and industrial and mobile control systems.

Credit Hour: 1-3
Prerequisites: MAE 3400 and MAE 3600

MAE 7720: Modern Control
Analysis and design of control systems using state-space methods. Topics include controllability and observability, feedback control using pole-placement, state observers, optimal linear-quadratic feedback control, and optimal estimation. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MAE 3600

MAE 7730: Mechatronics
Design of systems which require the integration of mechanical and electronic components. Topics include microcontrollers, sensors, actuators, mechanical systems, real time control system programming, and modeling of electronic and mechanical systems.

Credit Hours: 3
Prerequisites: MAE 3600

MAE 7740: Digital Control
Design and analysis of control systems using discrete-time methods. Topics include Z-transformation, sampling and reconstruction, stability analysis, and digital controller design.

Credit Hours: 3
Prerequisites: MAE 3600

MAE 7750: Classical Control
Study of feedback control design based on classical continuous-time methods. Topics include performance specifications, stability analysis, root locus compensator design, and frequency domain analysis and compensator design.

Credit Hours: 3
Prerequisites: MAE 3600

MAE 7820: Experimental Methods in Fluid Flow and Heat Transfer
Laboratory experiments involving fundamental mechanisms and phenomena associated with fluid flow and heat transfer. Current experimental methods and techniques employed.

Credit Hours: 3
Prerequisites: MAE 4300 and MAE 4800

MAE 7920: Advanced Computer Design
(cross-leveled with MAE 4920). Development and application of modern simulation-based design methodologies. Topics include structural optimization, multidisciplinary design methods, reliability-based design, non-deterministic methods, design sensitivity analysis, and finite elements in design. Graded on A-F basis only. May be repeated for credit.

Credit Hours: 3
Prerequisites: MAE 3100

MAE 7930: Applied Mechanical Optimization
Introduction to mathematical programming techniques and applications to the design of mechanical systems and components.

Credit Hours: 3
Prerequisites: MAE 3100

MAE 7940: Aircraft Design
Conceptual design of aircraft, from initial sizing and design layout to design analysis, optimization, and trade studies. Fundamental theories for aircraft design, including sizing, aerodynamic forces, airfoil selection, wing loading, configuration layout, payloads, propulsion systems, landing gear, aerospace structures, and cost analysis. Graded A-F basis only.

Credit Hours: 3
Prerequisites: MAE 3400, MAE 3600, MAE 3900

MAE 8001: Advanced Topics in Mechanical and Aerospace Engineering
Advanced Topics in Mechanical and Aerospace Engineering.

Credit Hours: 3

MAE 8085: Problems in Mechanical and Aerospace Engineering
Supervised investigation in mechanical and aerospace engineering to be presented in the form of a report.

Credit Hour: 1-99
MAE 8087: Graduate Seminar in Mechanical and Aerospace Engineering
Reviews recent investigations, projects of major importance in mechanical and aerospace engineering. Graded on S/U basis only.
Credit Hours: 1

MAE 8210: Physical Metallurgy
Treatment of fundamentals of physical metallurgy, including metallurgical thermodynamics, macroscopic and atomic diffusion, interfaces, nucleation, solidification theory, and solid state transformations.
Credit Hours: 3
Prerequisites: MAE 3200

MAE 8220: Fracture Mechanics
Mechanics of flawed structure. Concepts include Griffith theory, Barenblatt’s theory, Irwin analysis, energy analysis of cracked bodies, fracture toughness testing, plane strain, plane stress, transition temperature concepts, subcritical flaw growth.
Credit Hours: 3
Prerequisites: MAE 3200 or instructor’s consent

MAE 8230: Advanced Ceramic Materials
(same as CH_ENG 8230 and BIOL_EN 8230). To provide an advanced level understanding between processing, properties, and microstructure of ceramic materials. Topics include crystallography, defect chemistry, transport properties, microstructure, and forming methods. Graded on A-F basis only.
Credit Hours: 3

MAE 8240: Mechanical Behavior of Materials
This course will cover the mechanical behavior of metallic, ceramic, polymeric, and composite materials and their relationships to the underlying microstructures. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MAE 3200 and graduate standing in engineering, or instructor’s consent

MAE 8270: Aeroelasticity
Deformations of aerospace structures under static and dynamic loads, natural mode shapes and frequencies, aerodynamic and inertial loads, flutter analysis, dynamic response phenomena, and critical speeds and frequencies.
Credit Hours: 3
Prerequisites: instructor’s consent required

MAE 8280: Finite Element Methods
(same as CV_ENG 8208). The concepts and fundamentals of the finite element method with applications to problems in solid and fluid mechanics.
Credit Hours: 3
Prerequisites: MAE 4280

MAE 8300: Microscale Heat Transfer
Review of existing models. Concept of thermal lagging and the second-law admissibility. Applications to low temperatures, thermal processing of thin-film devices; amorphous materials; advanced composites.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 8310: Thermal Management in Electronic Systems
Advanced heat transfer course focusing on the problems of cooling electronic systems such as microprocessors and other electronic devices where thermal management is needed. The advanced cooling technologies are introduced.
Credit Hours: 3
Prerequisites: Mechanical and Aerospace Engineering [MAE] 4300. Graded on A/F basis only

MAE 8311: Heat Transfer-Convection
Principles of heat transfer by convection, review of boundary layer theory, laminar and turbulent heat transfer, temperature-dependent fluid properties, high velocity heat transfer and an introduction to mass transfer.
Credit Hours: 3
Prerequisites: MAE 4300 and MAE 8410

MAE 8312: Heat Transfer-Radiation
Credit Hours: 3
Prerequisites: MAE 4300

MAE 8313: Heat Transfer-Conduction
Distribution of temperature and temperature history within solids by the four essential methods of evaluation of these temperature fields.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 8315: Multiphase Heat Transfer
Fundamentals and application of heat and mass transfer and fluid flow with phase change; melting and solidification, sublimation and vapor deposition, condensation, evaporation, nucleate and film boiling, two-phase flow. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 8320: Continuum Mechanics
(same as CV_ENG 8320). Introductory course in the mechanics of continuous media. Basic concepts of stress, strain, constitutive relationships; conservation laws are treated using Cartesian tensor notation. Examples from both solid and fluid mechanics investigated.
Credit Hours: 3
Prerequisites: MAE 3400, MATH 4100, ENGINR 2200
MAE 8330: Theory of Elasticity
Credit Hours: 3

MAE 8340: Theory of Plates and Shells
Credit Hours: 3

MAE 8350: Theory of Elastic Stability
Credit Hours: 3

MAE 8360: Theory of Plasticity
Credit Hours: 3
Prerequisites: MAE 8330 or instructor’s consent

MAE 8370: Advanced Combustion
Numerical modeling of combustion systems and advanced diagnostic techniques.
Credit Hours: 3
Prerequisites: MAE 4370

MAE 8380: Advanced Thermodynamics
Advanced topics from classical thermodynamics.
Credit Hours: 3
Prerequisites: MAE 4380

MAE 8390: Statistical Thermodynamics
Statistical methods of evaluating thermodynamic properties. Elements of quantum mechanics, statistical mechanics and kinetic theory applied to topics of engineering thermodynamics.
Credit Hours: 3
Prerequisites: MAE 4380 and STAT 4710

MAE 8392: Dynamics of Structures
(same as CV_ENG 8392). Study of the dynamic behavior of structures. Analysis of equivalent lumped parameter systems for the design of structures in a dynamic environment.
Credit Hours: 3
Prerequisites: CV_ENG 8390 or equivalent, proficiency in digital computer programming, or instructor’s consent

MAE 8410: Boundary Layer Theory
Fluid motion at high Reynolds Number. Derivation of Navier-Stokes equations and boundary layer equations. Methods of solution. Transition to turbulent flow. Completely developed turbulent flow.
Credit Hours: 3

MAE 8420: Computational Heat Transfer and Fluid Dynamics
Introduction to numeric analysis techniques applied to heat transfer and fluid dynamics problems. Coverage will include, the development of discretization equations for the control volume approach and solution strategies of those equations. Results from numeric simulations will be compared with close form analytic solutions and commercial numeric code output.
Credit Hours: 3

MAE 8430: Introduction to Two Phase Flow
An introduction to the analysis of the mechanics and transport processes in two phase flows.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 8440: Physical Gas Dynamics
Study of the flow of chemically reacting gases of interest in mechanical and aerospace engineering.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 8450: Introduction to Turbulence
An introduction to the physical phenomena of turbulence, supported by mathematical and statistical descriptions. Especially appropriate for engineers involved in research of momentum, heat, and mass transport.
Credit Hours: 3
Prerequisites: MAE 4420

MAE 8510: Manufacturing Design
Design for manufacture methods, their capabilities and applications. Design of intelligent manufacturing systems using sensory systems and artificial intelligence techniques.
Credit Hours: 3
Prerequisites: MAE 3100 and MAE 4500

MAE 8520: Computer Integrated Manufacturing
Modeling and simulation of manufacturing processes and advanced computer applications in manufacturing systems and machining processes, NC-programming.
Credit Hours: 3
Prerequisites: MAE 4500 and MAE 4750

MAE 8620: Advanced Dynamics
(same as CV_ENG 8620). Fundamental principles of advanced rigid body dynamics with applications. Special mathematical techniques including Lagrangian and Hamiltonian methods.
Credit Hours: 3
Prerequisites: MAE 2600

MAE 8630: Vibrations of Distributed Parameter Systems
(same as CV_ENG 8630). Vibration analysis of strings, cables, bars, rods, shafts, beams, membranes, plates, circular rings, frames; free and forced oscillation; miscellaneous loading; various boundary conditions; effect of damping; energy methods; method of difference equations.

Credit Hours: 3
Prerequisites: MAE 4660

MAE 8660: Advanced Vibration Analysis
Advanced topics in vibration theory and its application to Mechanical Systems. Topics include vibration analysis of multi-degree of freedom, distributed and nonlinear systems, random vibration analysis, and vibration control.

Credit Hours: 3
Prerequisites: MAE 4660 or instructor's consent

MAE 8670: Advanced Vehicle Dynamics
Applications of advanced dynamics, sensitivity analysis, and stability methods to analysis of complex vehicle dynamic systems. Modeling of pneumatic tire behavior, development and experimental validation of advanced vehicle computer simulations.

Credit Hours: 3
Prerequisites: MAE 4670

MAE 8740: Robust Control
Definition of the robust performance problem with the goal of achieving specified signal levels in the face of plant uncertainty; uncertainty and robustness, stabilization, design constraints, loopshaping, model matching and design for robust performance.

Credit Hours: 3
Prerequisites: MAE 4750, and MAE 8780 or instructor's consent

MAE 8750: Nonlinear Control
Nonlinear systems analysis techniques including phase plane analysis, Lyapunov theory. Control design including feedback linearization, sliding control, and adaptive control.

Credit Hours: 3
Prerequisites: MAE 4750 and MAE 8780

MAE 8780: State Variable Methods in Automatic Control
(same as CH_ENG 8780, ECE 8780, NU_ENG 8408). State variables for continuous and discrete-time dynamic control systems; controllability and observability; optimal control of linear systems.

Credit Hours: 3
Prerequisites: MAE 4700

MAE 8910: Modular Machine Tool Design
This course introduces necessary concepts and tools for modular machine tool design. Students will learn how to apply mechanical design knowledge and commercially available subassemblies and parts to design modular machine tools for mass production application.

Credit Hours: 3

Prerequisites: MAE 4980 or instructor's consent

MAE 8920: Reliability-Based Design of Engineering Systems
Introduction to the methods that identify the ability of a system to perform its required functions for a specified period of time. Topics include failure mode and effects analysis, reliability prediction, Weibull distribution analysis, reliability testing, and accelerated life testing.

Credit Hours: 3
Prerequisites: Graduate standing in Engineering

MAE 8930: Advanced Mechanical System Modeling and Optimization
Calculus of variations is introduced as a basic tool. Hamilton's Principle is used for system modeling. Numerical solution methods are used for dynamic simulation. Genetic algorithm and other algorithms are applied for system optimization. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MAE 3600 and MAE 4980. Seniors will require consent

MAE 8990: Research-Masters Thesis in Mechanical and Aerospace Engineering
Independent investigation in field of mechanical and aerospace engineering to be presented as a thesis. Graded on a S/U basis only.

Credit Hour: 1-99

MAE 9990: Research-Doctoral Dissertation Mechanical & Aerospace Engineering
Independent investigation in field of mechanical and aerospace engineering to be presented as a thesis. Graded on a S/U basis only.

Credit Hour: 1-99

Medical Pharmacology and Physiology (MPP)

MPP 2010: The Science of Sex, Drugs and Rock'n'Roll
This course will examine the data and theories for how drugs affect the body, for the physiology of reproduction and, for how sound affects the body. These topics will be used to motivate an understanding, and provide training in applying, the key scientific principles. Graded on A-F basis only.

Credit Hour: 1

In this course, the students will explore toxins. We will discuss how toxins are formed, the "value" of the toxin to the organism that makes it, how the toxin is delivered, the effect of the toxin on the target animal and on humans. In addition, we will discuss how toxins have led to new therapies and drugs. We will also analyze some famous cases of apparent toxin poisoning. In all cases, the students will be urged to critically evaluate the data and the theories and encouraged to think of novel uses of toxins and of experiments that would provide important new information about the toxins and their effects.

Credit Hours: 3
MPP 2020: Bodily Fluids and Functions
In this course, the students will study body fluids. We will learn about how the fluids are formed and the functions of the fluids. We will also critically evaluate some theories about the formation and function of the fluids.
Credit Hours: 3

MPP 3202: Elements of Physiology
Beginning course for sophomore and above designed to cover the basic functional aspects of major organ systems of the body.
Credit Hours: 5
Prerequisites: sophomore standing

MPP 3290: Undergraduate Research
Laboratory experience and opportunity to explore research in medical pharmacology and physiology.
Credit Hour: 1-3

MPP 3333: Fundamentals of Human Physiology
This course presents the basic concepts of physiology using a problem based approach. The major organs systems are discussed with the relevance to everyday physiology as well as clinical and animal applications discussed.
Credit Hours: 3

MPP 3337: Human Physiology Laboratory
This lab course will involve experiments to illustrate basic physiology concepts.
Credit Hours: 2

MPP 4001: Undergraduate Topics in Medical Pharmacology and Physiology
Selected topics not in regularly offered courses.
Credit Hour: 1-3
Prerequisites: instructor’s consent

MPP 4085: Undergraduate Problems in Medical Pharmacology and Physiology
This course is designed to provide well-qualified undergraduate students the opportunity to engage in advanced study in topics in pharmacology or physiology with individual faculty members. Topics will be drawn from recent primary literature. Graded on A-F basis only.
Credit Hour: 1-3
Prerequisites: instructor’s consent

MPP 4202: Medical Physiology
Medical Physiology is intended for health scientists. Fat, bone, digestion, nutrition, appetite and brain health will be emphasized for health reform and updates for nervous, muscle, heart, vasculature, liver, renal, lung and endocrine systems with analysis for preventative medicine. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: Nutrition or Biochemistry

MPP 4204: Medical Pharmacology
Medical pharmacology teaches the science of drug actions in medicine today, and principles of pharmacokinetics/dynamics. Future health professionals will learn prescription judgment and quality/cost improvements for patient safety. An online laboratory will teach drug database information technology.
Credit Hours: 5
Prerequisites: BIO_SC 3700 or MPP 3202

MPP 4204H: Medical Pharmacology-Honors
Medical pharmacology teaches the science of drug actions in medicine today, and principles of pharmacokinetics/dynamics. Future health professionals will learn prescription judgment and quality/cost improvements for patient safety. An online laboratory will teach drug database information technology.
Credit Hours: 5
Prerequisites: MPP 4202. Honors eligibility required

MPP 4310: Mammalian Cell Function
An overview of the structure and function of mammalian cells including topics in membrane physiology and transport, cell signaling, compartmentalization and metabolism, cell proliferation and differentiation and the structure and function of certain specialized cells (e.g. muscle cells, epithelial cells and neurons). Laboratory and/or discussion sessions will be included as part of the course with laboratory topics to be determined. We will devote approximately 75% of the lecture to generalized cell functions, and 25% to deal with topics concerning specialized cells. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: instructor’s consent. For graduate credit, students will be required to participate in laboratory exercises

**Notes:**
- Prerequisites for MPP 7310 include instructor’s consent as a substitute for existing prerequisites.
- MPP 8001 can be repeated for credit.
- MPP 8090 can be repeated for credit.
- MPP 8410 and MPP 8411 are instructed by the department's seminar series.
MPP 8415: Ethics Education by Engagement, Entactment and Empowerment
The emphasis is on the scientific research ethics problems in interdisciplinary work. Student involvement can include designing mock misconduct trials or writing advocacy letters to change current policy.

Credit Hours: 2
Prerequisites: instructor’s consent

MPP 8417: Scientific Communication
A course to foster and improve students ability to communicate orally and in writing. Student enrolled in the course will be expected to write a report and present a seminar on a topic related to one of the lab rotation projects to the mentor of the rotation and other interested faculty members and students. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: instructor’s consent

MPP 8420: Skills in Biomedical Research
This course focuses on introducing graduate students to the basics of biomedical research. Course objectives are to provide new graduate students with a basic understanding of laboratory safety issues and fundamental skills that are integral to research including principles of experimental design, theory and practical application of modern research techniques, written and oral communication of research information, and scientific record keeping standards. Graded on S/U basis only.

Credit Hours: 2

MPP 9090: Thesis Research in Medical Pharmacology and Physiology
Research in physiology or pharmacology, leading to dissertation. Graded on a S/U basis only.

Credit Hour: 1-99
Prerequisites: instructor’s consent

MPP 9421: Neural Pharmacology
Biochemical and behavioral actions of drugs affecting the nervous system. Effects of drugs on synaptic mechanism including neurotransmitter metabolism and receptor interactions. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: instructor’s consent

MPP 9422: Medical Pharmacology and Physiology Journal Club
On a weekly basis, individual students are assigned current high profile journal articles to present to their fellow students and faculty in a journal club setting. Each student in the course is required to read the paper in advance and participate in discussions of the figures and general topics that is being presented. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: enrolled in MPP PhD graduate program

MPP 9423: Oncological Pharmacology
An in-depth study of the causes and treatments of cancers including discussions of mutagenesis and carcinogenesis, principles of cancer chemotherapy and recent developments with targeted therapeutics. The basis for genetic differences in cancer drug responsiveness including genetics predisposition’s to disease and drug toxicity (pharmacogenetics) and genetic polymorphism’s associated with disease susceptibility, adverse drug responses and drug resistance (pharmacogenomics) will also be discussed.

Credit Hour: 1-3
Prerequisites: MPP 8411

MPP 9425: Receptor Pharmacology
The goal of this course is to facilitate the student’s efforts to obtain a solid working knowledge of receptor pharmacology, physiology and molecular biology that can be of benefit in the future. The course will explore a variety of receptor issues, primarily in a discussion format organized by the faculty members involved in the course. The course is divided into two related components. The first component will cover general principles of quantifying ligand - receptor interactions and subsequent responses, summarize some of the methods of receptor identification and characterization and evaluate the various schemes of receptor typing and subtyping. The second component will explore specific characteristics of receptors from some of the major receptor families with an emphasis on understanding mechanisms of receptor activation and regulation as well as exploring concepts about the structural basis for discrete receptor functions. A typical list of receptors to be covered in the course may include the tyrosine kinase receptors, G protein-coupled receptors, cytokine receptors, ligand activated transcription factors (nuclear receptors), adhesion receptors such as integrins, and ligand activated ion channels.

Credit Hour: 1-2

MPP 9426: Transmembrane Signaling
This course is for advanced level graduate students. The course is designed to develop state of the art knowledge and understanding of current research issues in the cell signaling. The major emphasis is on receptor and non-receptor mediated transmembrane signaling events underlying physiological and pharmacological responses of the cells. Students are also involved in class presentations, and the development and critical review of new research proposals, all focused on cellular signaling.

Credit Hours: 4
Prerequisites: basic courses in biochemistry and or cell and molecular biology or equivalent

MPP 9427: Drug Metabolism
(same as V_BSCI 9427). The course is concerned with the absorption, distribution, metabolism and elimination of drugs using a comparative approach. The pharmacokinetic aspects of elimination are stressed.

Credit Hour: 1-3

MPP 9428: Clinical Biodetection
Interdisciplinary approach to clinical translational applications of physiology and pharmacology and related life, physical, chemical, and engineering sciences.
MPP 9429: Principles and Frontiers of Molecular Pharmacology
An in-depth examination of pharmacodynamics, structure-activity relationships, pharmacokinetics/drug metabolism, and toxicology, followed by a consideration of emerging concepts regarding membrane receptors and channels and their role in biology and medicine.

Credit Hours: 2
Prerequisites: instructor’s consent

MPP 9430: Cardiovascular Physiology
This course is designed to provide the student with in-depth knowledge of specific aspects of cardiovascular physiology with major emphasis on cardiac structure and function. Topics are covered in 1, 3-4 hour session per week and are based on reading assignments from the literature. The following topics have been addressed in previous offerings but the specific topics may vary from year to year: Heart muscle structure related to function; Contractile proteins structures and function; Regulation of protein synthesis; Regulation of myocardial hypertrophy; Regulation of myocardial metabolism; Myocardial mechanics systolic and diastolic function; Mechanisms of length dependent contraction; Control of electrical-mechanical coupling processes; Mechanisms for adrenergic regulation of myocardial function.

Credit Hours: 3
Prerequisites: Students must have completed a physiology, biochemistry or cell biology course

MPP 9431: Control of Energy Metabolism
(same as V_BSCI 9431). This advanced elective is in a lecture/discussion format using primary literature to explore how cells organize and regulate metabolism to meet energy demands.

Credit Hours: 3
Prerequisites: MMP 4310 and MMP 8411 or the equivalent (e.g., UM first year medical school curriculum, V_BSCI 8421, or BIO_SC 3700 with supporting courses)

MPP 9432: Mammalian Membrane Physiology
This course is designed to stimulate active learning of the concepts of modern membrane physiology. Throughout the course, a balance will be maintained between examining classic papers in the field and current literature, including not only theories that have held up over time, but areas in which there is current dispute as the best model that describes the observations.

Credit Hours: 1-3
Prerequisites: instructor’s consent

MPP 9433: Skeletal Muscle
(same as V_BSCI 9435). Skeletal muscle mechanics, contractions theories, transgenic models, development, gene expression regulation, adaptation to exercise, aging, metabolic functions, and inactivity induced chronic diseases.

Credit Hour: 1-3
Prerequisites: course director’s consent required for enrollment

MPP 9435: Renal Physiology
Mechanisms in mammalian renal physiology presented with particular emphasis on current techniques and concepts.

Credit Hour: 1-3
Prerequisites: V_BSCI 8420 and V_BSCI 8421 or equivalent and instructor’s consent

MPP 9437: Neural Control of the Circulation
(same as V_BSCI 9467). Course objectives include developing a general understanding of CNS mechanisms in the regulation of the cardiovascular system, including autonomic, neurohumoral and body fluid homeostatic mechanisms, gaining knowledge of the major advances and topics in the field and becoming familiar with some of the methods used to study CNS cardiovascular regulation. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: instructor’s consent

Medicine-Interdisciplinary (MED_ID)

MED_ID 5041: Structure and Function of the Human Body I
Biochemical principles, cell biology, human development, histology and gross anatomy with clinical correlates utilizing patient examples and non-invasive techniques.

Credit Hours: 6

MED_ID 5042: Interviewing
Development of skills needed to obtain a history of the patient’s present illness, past medical history and other pertinent background information. Vital to medical practice, these skills are role modeled, practiced and evaluated with detailed feedback. Additional emphasis is placed on the doctor-patient relationship, ethics and the role of the physician as a therapeutic agent.

Credit Hours: 3

MED_ID 5043: Structure and Function of the Human Body II
Study of the structure and function of the body’s metabolic, nervous and muscular systems.

Credit Hours: 6

MED_ID 5044: Physical Examination
Introduction to the doctor-patient relationship and systematic physical examination of the patient. Certification in basic life support is also included.

Credit Hours: 3
MED_ID 5045: Structure and Function of the Human Body III
Study of the structure and function of the body's cardiovascular, gastrointestinal, and urinary systems.
Credit Hours: 6

MED_ID 5046: Psychosocial Aspects of Medicine
A brief study of the history of medicine and the impact of key events on current medical practice. Study of the biophysosocial model, biomedical ethics and specific psychosocial problems encountered by physicians such as compliance, problems based in human sexuality, substance abuse and death and dying.
Credit Hours: 3

MED_ID 5047: Structure and Functions of the Human Body IV
Study of the structure and function of the endocrine, reproductive, vascular systems. The classification of pathogenic and non-pathogenic organisms, mechanisms of infection, the immune response and the interaction between pharmacologic agents and exogenous organisms.
Credit Hours: 6

MED_ID 5048: Clinical Epidemiology and Preventive Medicine
Application of clinical epidemiology to understanding measurement of population characteristics and to the critical analysis of the literature through analysis of study designs and interpretation of the results and causal relationships. Study of prevention, screening and health maintenance as important aspects of health care.

Credit Hour: 1

MED_ID 5551: Pathophysiology I
Pathophysiologic mechanisms of cell injury, inflammation and repair, hemodynamic disturbances, genetic disorders, autoimmune response, immune deficiency and hypersensitivity reactions.
Credit Hours: 6

MED_ID 5552: Diagnostic Tests and Medical Decisions
Assessment of the appropriate use and interpretation of common diagnostic tests and their contribution to medical decisions and the care of patients. Includes emphasis on the review of systems, interactive hypothesis testing, differential diagnosis probability, sensitivity and specificity, and cost benefit and cost effectiveness analysis.
Credit Hours: 3

MED_ID 5553: Pathophysiology II
Pathophysiologic mechanisms of cardiovascular disease, diseases of the respiratory system, disorders of the blood, and nutritional diseases.
Credit Hours: 6

MED_ID 5554: Psychopathology and Behavioral Medicine
Presentation and discussion of the U.S. health care system and health care reform, financing and resource allocation, and the impact of change on individuals, communities, employers and the government. Included are analyses of the ethical and legal implications of health care and health care reform.
Credit Hours: 3

MED_ID 5555: Pathophysiology III
Pathophysiologic mechanisms of the digestive, endocrine and urogenital systems.
Credit Hours: 6

MED_ID 5556: Clinical Practicum
A continuation of Block 6 objectives and a clinical practicum and review comprise this block.
Credit Hours: 3

MED_ID 5557: Pathophysiology IV
Pathophysiologic mechanisms of cardiovascular disease, diseases of the respiratory system, disorders of the blood, and nutritional diseases.
Credit Hours: 6

MED_ID 5558: Physician as a Person
Exploration of the physician as a person, the balance between professional and personal demands, family life, membership in a community, the stresses and rewards of the medical profession, professional ethics and the doctor-patient relationship. A four week clinical review completes this block.
Credit Hours: 3

**MED_ID 6244: ABS Quality Improvement and Patient Safety Elective**
The 4th year student will work with leaders in the Office of Clinical Effectiveness to identify an improvement project to be conducted during the elective. Students will have self-paced readings/didactic expectations, and will be expected to review and report on medical literature relevant to the care process(es) targeted for improvement. To complete their project, the student will present the improvement work to patient safety and quality improvement leaders, as well as stakeholders in the care process(es) identified for improvement efforts.  
Credit Hours: 5

**MED_ID 6390: ABS Individualized Study in Medicine-M1**
Goals/Objectives: Participate in PBL as a tutor under the guidance of an experienced faculty tutor. Review the literature appropriate to each case. Update one PBL case that is used in the course of the block OR update a problem solving exam OR write a new problem solving exam. Students must submit the case or exam electronically to the course coordinator. Evaluation: Student’s performance as tutor will be evaluated by the supervising faculty member and the tutor group members. Notes: During a four-week block, the fourth year student will tutor an M-1 PBL group (Monday, Wednesday, & Friday mornings) under the supervision of a senior faculty member. Contact course coordinator for case update details. Submission date for case update is set two weeks after the tutoring session ends. The student will attend all tutor preparation meetings and prepare for PBL through reading, self-directed study and discussions with faculty. Complete student mid-block and end-of-block evaluation as directed.

MED_ID 6693: Simulation Preparation for Internship
This course is meant to increase the medical students' knowledge and skillbase in preparation for the first year of internship. In order to accomplish this, the students will be exposed to a variety situations common to first year residents through activities created with simulation. Throughout the course, students will demonstrate how to provide effective and efficient patient-centered care, while improving their communication skills and professionalism with patients and other healthcare providers. Students will understand the role of simulation in medical education and develop skills in debriefing of scenarios throughout the course. At the end of the course, students will be expected to complete a simulation capstone project. Prerequisites: Class level: 4th year medical student. Approval by Simulation Director and Completion of all Core Clerkship Requirements.
Credit Hours: 5

MED_ID 6890: Computer Applications in Medicine
Computer Applications in Medicine
Credit Hours: 5

Microbiology (MICROB)

MICROB 2800: Microbiology for Nursing and Health Professions
This course will provide basic principles for understanding microbial growth, function, and control. This includes a survey of microbial cellular structure/functions, immunology concepts, epidemiology, specimen handling, and causes of microbial disease (bacterial, viral, and parasitic). Material is presented in lecture and corresponding laboratory exercises that will allow students to explore the microbial world around them.
Credit Hours: 4
Prerequisites: The overall content is "restricted to Freshman and sophomore Nursing and Health Related Professional students only". Other inquires contact department

MICROB 3200: Medical Microbiology and Immunology
Focus on medically important viruses, bacteria, fungi and parasites with emphasis on their disease causing potential and mechanisms. Introduction to cells and molecules of the immune system with emphasis on their role in fighting infectious diseases. Discussion of treatment and prevention strategies. Lecture material will be reinforced with laboratory demonstrations and hands-on exercises. The course is intended for preprofessional students.
Credit Hours: 4

MICROB 4300: Bacterial Pathogenesis
(cross-leveled with MICROB 7404). This team taught course covers the biology and virulence mechanisms of bacterial pathogens, with emphasis on those causing human and zoonotic diseases. Topics covered include bacterial structure, genetics, physiology, and metabolism; antibiotic resistance; host-pathogen interactions; microbiomes and emerging pathogens.
Credit Hours: 4

Prerequisites: MICROB 3200 or equivalent. Consent from Course Director is required to insure academic readiness
MICROB 4303: Fundamental Virology
Classification of viruses, life cycles, genome organization and expression, host-virus interactions, oncogenes and cellular transformation, viral pathogenesis, viral gene therapy approaches, strategies for anti viral therapy.
Credit Hours: 2
Prerequisites: undergraduates require instructor’s consent. This course will include evaluation of current literature and require paper presentations

MICROB 4304: Immunology
This is a comprehensive team-taught, basic immunology course covering cells and organs of the immune system, lymphocyte development, innate immunity, antibody production, antibody-antigen presentation, CD4+ and CD8+ T lymphocyte responses, cytokines, autoimmunity and immunodeficiency among other immunologically relevant topics. Completion of a biochemistry, genetics, or molecular biology course would be helpful.
Credit Hours: 2
Recommended: MICROB 3200 or BIOCHM 4270

MICROB 4305H: Honors Bacterial Pathogenesis
This team taught course covers the biology and virulence mechanisms of bacterial pathogens, with emphasis on those causing human and zoonotic diseases. Topics covered include bacterial structure, genetics, physiology, and metabolism; antibiotic resistance; host-pathogen interactions; microbiomes and emerging pathogens.
Credit Hours: 2
Prerequisites: MICROB 3200 or equivalent; Honors eligibility required. Consent from Course Director required to insure academic readiness

MICROB 6291: ABS Microbiology Mechanism of Disease
ABS Microbiology Mechanism of Disease
Credit Hour: 5-10

MICROB 6293: ABS Microbiology Research
ABS Microbiology Research
Credit Hour: 5-10

MICROB 6295: ABS Microbiology Research and Review
ABS Microbiology Research and Review
Credit Hour: 5-10

MICROB 7101: Structure and Synthesis of Macro Molecules
This multiple-instructor course is designed to provide students with a detailed understanding of the structure, function, and biophysical properties of bio-molecules. Principles and techniques of molecular biology related to the study of recombinant DNA and genetic analysis, protein structure, function and basic immunological principles will be covered. Admission is dependent on approval by course director.
Credit Hours: 2
Prerequisites: consent required

MICROB 7303: Fundamental Virology
Classification of viruses, life cycles, genome organization and expression, host-virus interactions, oncogenes and cellular transformation, viral pathogenesis, viral gene therapy approaches, strategies for anti viral therapy.
Credit Hours: 2
Prerequisites: Undergraduates require instructor’s consent. This course will include evaluation of current literature and require paper presentations

MICROB 7304: Immunology
Covers innate immunity, antibodies, antigens, MHC, antigen presentation, lymphocyte development, antigen specific receptors, lymphocyte activation and differentiation, immune effector mechanisms, hypersensitivities, tolerance, autoimmunity, immunodeficiencies.
Credit Hours: 2
Recommended: MICROB 3200 or BIOCHM 4270 or BIOCHM 4272 or instructor’s consent

MICROB 7404: Bacterial Pathogenesis (cross-leveled with MICROB 4300). This team taught course covers the biology and virulence mechanisms of bacterial pathogens, with emphasis on those causing human and zoonotic disease. Topics covered include bacterial structure, genetics, physiology, and metabolism; antibiotic resistance; host-pathogen interactions; microbiomes and emerging pathogens.
Credit Hours: 2

MICROB 8050: Graduate Student Survival Skills
This course is an introduction to inform new graduate students about the Microbiology program and provide them with the knowledge to access resources and information needed for a successful transition into their course work and research. The course will also focus on guidelines in selecting mentors and their relationships, time management, good notebook practices, presentation and posters, comprehensive exams, and computer skills needed. Graded on S/U basis only.
Credit Hour: 1

MICROB 9001: Topics in Microbiology
Current topics, highly specialized topics taught infrequently, or courses taught by visiting professors.
Credit Hour: 1-99
Prerequisites: instructor’s consent

MICROB 9085: Problems in Microbiology
Students assigned individual problems in microbiology for library or lab investigation. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor’s consent

MICROB 9087: Seminar in Microbiology
Presentation and critical discussion of student and staff research, current literature, and guest lectures on subjects in various areas of microbiology. Graded on S/U basis only.
Credit Hour: 1
MICROB 9090: Research in Microbiology
Original investigations in various areas of microbiology related to bacteria, fungi, rickettsia, viruses, and animal parasites, or immunology relating to antigens and antibodies of infectious and noninfectious nature designed for graduate thesis research. Graded on a S/U basis only.

Credit Hour: 1-99
Prerequisites: instructor’s consent

MICROB 9403: Advanced Medical Microbiology
Similar to MICROB 4300 but treats medical microbiology and immunology in a more advanced manner. Methods of preparation and instruction stressed. Graded on S/U basis only.

Credit Hours: 2
Prerequisites: instructor’s consent

MICROB 9407: Advanced Immunology
Literature based lectures and discussions covering current issues in molecular and cellular immunology. Topics include innate immunity; lymphocyte development; inflammation; tolerance, infection, and autoimmunity; mucosal immunity; asthma and allergy and tumor immunology.

Credit Hours: 4
Prerequisites: MICROB 4304 or MICROB 7304, or instructor’s consent

MICROB 9411: Responsible Conduct of Research
Ethical, legal and sociological ramifications of research including data management, authorship, human and animal use, conflict of interest and misconduct. Round table discussions and interactive forums. Grading based on participation in discussions and assignments. Graded on S/U basis only.

Credit Hour: 1

MICROB 9430: Molecular Biology I
(same as BIOCHM 9430). Detailed examination of current fundamental concepts of molecular genetics of bacteria, bacteriophages and yeast. Experimental approaches to analysis of the physical structures of genomic nucleic acids, the biochemistry and genetics of mutations, replications, gene transfer and gene expression will be examined in depth from reports in the current literature.

Credit Hours: 4
Prerequisites: Biochemistry, genetics

MICROB 9432: Molecular Biology II
(same as BIOCHM 9432 and BIO_SC 9432). Detailed experimental analysis of eukaryotic cellular and molecular biology relevant to cellular and viral gene expression, post-transcriptional and post-translational modifications and genome replication. Models for developmental genetic analysis and genetic determinants controlling developmental processes utilizing the current literature will be examined.

Credit Hours: 4
Prerequisites: MICROB 9430

MICROB 9449: Infection and Immunity
Writing, discussion, literature driven course, covering topics that focus on the interface between infectious diseases, cancer and the immune system. May be repeated for credit. Graded A-F basis only.

Credit Hours: 4
Prerequisites: 2nd year Graduate student with bacteriology, virology, microbial pathogenesis and immunology background only. 1st year graduate students require instructor approval

Military Science (MIL_SC)

MIL_SC 1100: Foundations of Officership
Introduces students to issues and competencies that are central to a commissioned officer’s responsibilities. Establish framework for understanding officership, leadership, and Army values followed and "life skills" such as physical fitness and time management.

Credit Hour: 1

MIL_SC 1110: Introductory Military Science Laboratory I
Field application of skills taught in MIL_SC 1100, to include leadership, land navigation, tactical skills and basic soldier skills.

Credit Hour: 1
Prerequisites: MIL_SC 1100

MIL_SC 1120: Basic Leadership
Establishes foundation of basic leadership fundamentals such as problem solving, communication, briefings and effective writing, goal setting, techniques for improving listening and speaking skills and an introduction to counseling.

Credit Hour: 1

MIL_SC 1130: Introductory Military Science Laboratory II
Field application of skills taught in MIL_SC 1120, to include leadership, land navigation, tactical skills and basic soldier skills.

Credit Hour: 1
Prerequisites: MIL_SC 1120

MIL_SC 1130: Introductory Military Science Laboratory II
Field application of skills taught in MIL_SC 1120, to include leadership, land navigation, tactical skills and basic soldier skills.

Credit Hour: 1
Prerequisites: MIL_SC 1120

MIL_SC 2200: Individual Leadership Studies
Students identify successful leadership characteristics through observation of others and self through experimental learning exercises. Students record observed traits (good and bad) in a dimensional leadership journal and discuss observations in small group settings.

Credit Hours: 2

MIL_SC 2210: Intermediate Military Science Laboratory I
Progressively more challenging leadership scenarios presented in a field and classroom environment. Students practice basic military skills such as squad-level offensive and defensive operations. First aid topics and drill and ceremony are also taught.

Credit Hour: 1
Prerequisites: MIL_SC 2200
MIL_SC 2220: Leadership and Teamwork
Study examines how to build successful teams, various methods for influencing action, effective communication in selling and achieving goals, the importance of timing the decision, creativity in the problem solving process, and obtaining team buy-in through immediate feedback.

Credit Hours: 2

MIL_SC 2230: Intermediate Military Science Laboratory II
Progressively more challenging leadership scenarios presented in a field and classroom environment. Students practice basic military skills such as platoon-level offensive and defensive operations. Practical application of night land navigation.

Credit Hour: 1
Prerequisites: MIL_SC 2220

MIL_SC 3160: Death by a Thousand Cuts: Counterinsurgency/Insurgency the American Experience
This course explores the problem of insurgency and counterinsurgency in terms of what we can learn from these conflicts. It examines counterinsurgency theory and practice, the Philippine Insurrection, Banana Wars, Vietnam War, Afghanistan, and Iraq.

Credit Hours: 3

MIL_SC 3161: The American Experience in Vietnam
This course was developed to provide students the opportunity to examine the American experience in the Vietnam War, to search for meanings in this experience, and to arrive at their own conclusions concerning the impact of the war upon the nation. Moreover, it challenges the students to think critically about war and the use of military power to settle differences between nations. May be repeated for credit.

Credit Hours: 3

MIL_SC 3162: Counterinsurgency in Asia
This course explores the problem of insurgency and counterinsurgency in Asia in terms of what we can learn from these conflicts. The course examines the insurgency in the Philippine Insurrection 1899-1902, the Vietnam War, the Soviet-Afghan War, in Thailand, Sri Lanka and Malayan Emergency. May be repeated for credit.

Credit Hours: 3

MIL_SC 3163: U.S. Military History in the Western Tradition
Analysis of United States military history from the Colonial period to the present, (1609-2012). It is a comprehensive look into the evolution of warfare in America, military traditions and heritage, and technology. This course analyzes the following: American Revolution, War of 1812, Mexican American War, Civil War, Indian Wars, Spanish American War, World War I, Inter War Period, World War II, Korean War, Vietnam War, Gulf War, Afghanistan and Iraq. All cadets are required to take this course for commissioning. May be repeated for credit.

Credit Hours: 3

MIL_SC 3164: Nation Building through a Barrel of a Gun
(same as POL_SC 3164). This course was developed to provide students the opportunity to examine the dilemmas of military intervention, nation-building/peacekeeping operations and exit strategies. This course is designed to challenge students to think critically and arrive at their own conclusions about the use of military power to settle differences between nations, and use of military forces to conduct nation building.

Credit Hours: 3

MIL_SC 3165: Chasing Ghosts, The History of Irregular Warfare
(same as POL_SC 3165). This course explores the history of Irregular Warfare from the guerrilla perspective. The course examines the works of Mao Tse-Tung, Che Guevara, T.E. Lawrence and several other Guerrilla Leaders. You will analyze the evolution of Irregular Warfare through history and understand the complexities associated with the difficulties of countering and defeating Irregular Warfare. Graded on A-F basis only.

Credit Hours: 3

MIL_SC 3220: Leadership and Problem Solving
Students conduct self-assessment of leadership style, develop personal fitness regimen, and learn to plan and conduct individual/small unit tactical training while testing reasoning and problem-solving techniques. Students receive direct feedback on leadership abilities.

Credit Hours: 3
Prerequisites: departmental consent

MIL_SC 3230: Leadership and Management
Develops student proficiency in planning and executing complex operations, functioning as a member of a staff, and mentoring subordinates. Students explore training management, methods of effective staff collaboration, and developmental counseling techniques.

Credit Hours: 3
Prerequisites: MIL_SC 3240

MIL_SC 3240: Leadership and Ethics
Examines the role communications, values, and ethics play in effective leadership. Topics include ethical decision-making, considerations of others, spirituality in the military, and survey Army leadership doctrine. Emphasis on improving oral and written communication ability.

Credit Hours: 3

MIL_SC 3250: Leadership and Teamwork
Study examines how to build successful teams, various methods for influencing action, effective communication in selling and achieving goals, the importance of timing the decision, creativity in the problem solving process, and obtaining team buy-in through immediate feedback.

Credit Hours: 2

MIL_SC 3250: Leadership and Management
Develops student proficiency in planning and executing complex operations, functioning as a member of a staff, and mentoring subordinates. Students explore training management, methods of effective staff collaboration, and developmental counseling techniques.

Credit Hours: 3
Prerequisites: MIL_SC 3240

MIL_SC 3260: Officering
Study includes case study analysis of military law and practical exercises on establishing an ethical command climate, service as an officer; capstone exercise. Leadership lab Students must complete a semester long Senior Leadership Project that requires them to plan, organize, collaborate, analyze, and demonstrate their leadership skills.

Credit Hours: 3

MIL_SC 3270: Advanced Transition to Lieutenant I
Independent research, analysis and monthly discussion on related military topics. Personal, academic and professional goals and objectives, development and maintenance of an officer evaluation report support form.

Credit Hours: 3
Prerequisites: MIL_SC 1100, MIL_SC 2200, MIL_SC 3230, and MIL_SC 3250 or department head permission
MIL_SC 3280: Advanced Transition to Lieutenant II
Independent research, analysis and monthly discussion on related military topics. Personal academic and professional goals and objectives, development and maintenance of an officer evaluation report support form.

Credit Hours: 3
Prerequisites: MIL_SC 1100, MIL_SC 2200, MIL_SC 3230, and MIL_SC 3250 or department head permission

MU Informatics Institute (INFOINST)

INFOINST 7001: Topics in Informatics
This course provides the overview to the informatics foundations as well as introduces topics regarding the current informatics-driven areas of science. Graded on A-F basis only.

Credit Hours: 3

INFOINST 7002: Introduction to Informatics
This course provides an overview to informatics foundations in addition to introducing topics regarding the current informatics-driven areas of science. Topics to include: recent trends in informatics; database management and Big Data analytics; data visualization, bioinformatics, health informatics, geoinformatics, nursing informatics, social informatics, and legal informatics. Graded on A-F only.

Credit Hours: 3
Prerequisites: Instructor’s consent

INFOINST 7010: Computational Methods in Bioinformatics (same as CMP_SC 7010). Fundamental concepts and basic computational techniques for mainstream bioinformatics problems. Emphasis placed on computational aspect of bioinformatics including formulation of a biological problem, design of algorithms, confidence assessment of software development. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 4050 and STAT 4710

INFOINST 7430: Introduction to Health Informatics (same as HMI 7430). Introduction to the use of clinical information systems in healthcare. Topics include clinical data, standards, electronic medical records, computerized provider order entry, decision support, telemedicine, and consumer applications. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: departmental consent required

INFOINST 8001: Topics in Informatics
Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department. Graded A-F basis only.

Credit Hours: 3

INFOINST 8005: Applications of Bioinformatics Tools in Biological Research
This service course is designed for bioinformatics non-major students from life sciences, biological sciences, plant sciences, animal sciences, biochemistry, medicine fields and others. This course will provide an introduction to the current state of the art topics in bioinformatics and the computational tools available to the research community for application to biological research questions. Students will learn how to effectively utilize the tools and software packages to analyze data and visualize the results. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Instructor’s consent
Recommended: Graduate students are expected to have basic knowledge in algorithms, databases, and molecular biology

INFOINST 8010: Problem Solving in Bioinformatics (same as CMP_SC 8110). The course covers a variety of bioinformatics research topics such as biological sequence comparison, protein structure prediction, protein and gene function prediction, and inference and modeling of biological networks. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: INFOINST 7010 or CMP_SC 7010

INFOINST 8085: Problems in Informatics
Independent, directed study on a topic in the area of informatics. Some sections may be graded A-F or S/U.

Credit Hour: 1-6
Prerequisites: Instructor’s consent required

INFOINST 8087: Seminar in Informatics
Students attend and/or present at informatics seminars approved by the institute. Graded on S/U basis only.

Credit Hour: 0.5-1
Prerequisites: instructor’s consent required

INFOINST 8088: Lab Rotations in Informatics
This course is designed to train students in both computational/informatics and life science/hospital laboratories to foster critical research collaborations in biomedical informatics. Students are expected to write reports with their advisors and the mentor of the rotation. Graded on S/U basis only.

Credit Hour: 1-3

INFOINST 8090: Dissertation (pre-candidacy) Research in Informatics
Research leading to dissertation before comprehensive examination. Graded on S/U basis only.

Credit Hour: 1-99

INFOINST 8150: Integrative Methods in Bioinformatics (same as CMP_SC 8150). Introduces the most popular experimental methods from the point of view of the information sources that can be used. Students will use data obtained directly from biological experiments and learn how to suggest new experiments to improve results. Graded on A-F basis only.
INFOINST 8180: Machine Learning Methods for Biomedical Informatics
(same as CMP_SC 8180). Teaches statistical machine learning methods and applications in biomedical informatics. Covers theories of advanced statistical machine learning methods and how to develop machine learning methods to solve biomedical problems. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: INFOINST 7010 or CMP_SC 7010

INFOINST 8190: Computational Systems Biology
(same as CMP_SC 8390). This course covers current theories and methods in the modeling and analysis of high-throughput experiments such as microarrays, proteomics, and metabolomics. Topics include the inference of causal relations from experimental data and reverse engineering of cellular systems. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CMP_SC 7050 and INFOINST 7010 or CMP_SC 7010 or INFOINST 7005

INFOINST 8210: Structural Bioinformatics of Proteins, Complexes, System
(same as CMP_SC 8120). Main course objective is to provide an introduction to the state-of-the-art methods in structural bioinformatics. The course will cover the methods that are applied to a wide range of biomolecular objects from protein domains and small proteins to large biological systems. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: INFOINST 7010 or CMP_SC 7010
Recommended: CMP_SC 4050 or CMP_SC 7050

INFOINST 8310: Computational Genomics
(same as CMP_SC 8130). This course introduces computational concepts and methods of genomics to students. The course covers genome structure, database, sequencing, assembly, annotation, gene and RNA finding, motif and repeats identification, single nucleotide polymorphism, and epigenomics. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: INFOINST 7010 or CMP_SC 7010

INFOINST 8350: Integrative Methods in Bioinformatics
Course objective is to introduce the most popular experimental methods from the point of view of the information sources that can be used in. Students will learn to use data obtained directly from biological experiments and how to suggest new experiments to improve results. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: INFOINST 7010 or CMP_SC 7010

INFOINST 8390: Computational Systems Biology
This course covers current theories and methods in the modeling and analysis of high-throughput experiments such as microarrays, proteomics, and metabolomics. Topics include the inference of causal relations from experimental data and reverse engineering of cellular systems. Graded A-F basis only.
Credit Hours: 3
Prerequisites: INFOINST 7010 or CMP_SC 7010; INFOINST 8010 or instructors consent

INFOINST 8810: Research Methods in Informatics
(same as HMI 8810). Research Methods in Health and Bioinformatics is a writing intensive course that provides students with an understanding of research proposal development, literature searching, research synthesis, research designs, evaluation methods, and ethics. Graded A-F basis only.
Credit Hours: 3
Prerequisites: STAT 7450 or STAT 7510, second semester or later in PHD program or instructors consent

INFOINST 8860: Content Management in Biomedical Informatics
(same as CMP_SC 8160). This course introduces theory and techniques for content extraction, indexing, and retrieval of biomedical media databases. Topics include biomedical media databases, feature extraction methods, advanced database indexing structures, query methods, and result visualization. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CMP_SC 7380 and INFOINST 7010

INFOINST 8870: Knowledge Representation in Biology and Medicine
(same as HMI 8870) The main topics presented in the course are: logic systems, knowledge representation methods, production systems and representation of statistical and uncertain knowledge. Graded A-F basis only.
Credit Hours: 3
Prerequisites: HMI 7430 and HMI 7440

INFOINST 8880: Machine Learning Methods for Biomedical Informatics
(same as CMP_SC 8180) This course teaches statistical machine learning methods and their applications in biomedical informatics. The course covers theories of advanced statistical machine learning methods and teaches how to develop machine learning methods to solve biomedical problems. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CMP_SC 7050 and INFOINST 7010 or CMP_SC 7010 or INFOINST 7005

INFOINST 9090: Dissertation (post-candidacy) Research in Informatics
Research leading to Ph.D. dissertation after comprehensive examination. Graded on S/U basis only.
Credit Hour: 1-99

Music-Applied Music
(MUS_APMS)
MUS_APMS 1435: Studio Instruction for Majors
Acceptable as a secondary applied subject on B.S. in music education and B.M. degrees. Materials varies according to educational purpose. May be repeated for credit.

Credit Hour: 1
Prerequisites: instructor’s consent

MUS_APMS 2455: Studio Instruction
Credit accepted toward all undergraduate music and music education degrees. May be repeated for credit.

Credit Hour: 1-5
Prerequisites: instructor’s consent

MUS_APMS 3455: Studio Instruction
Accepted as upperclass credit only in Music Education, music theory, history, or composition. May be repeated for credit.

Credit Hour: 1-3
Prerequisites: 8 hours and 4 semesters of MUS_APMS 2455 or equivalent; audition by committee, and instructor’s consent

MUS_APMS 3970: Junior Recital
Preparation and presentation of Junior Recital. Appropriate applied music course to be taken concurrently. May be repeated for credit. Each recital must be approved by a committee at least two weeks before the recital.

Credit Hour: 1

MUS_APMS 4455: Studio Instruction
For B.M. degrees in performance. Study of pedagogy in studio class. May be repeated for credit.

Credit Hour: 1-5
Prerequisites: 8 hours and 4 semesters of MUS_APMS 2455; audition; instructor’s consent

MUS_APMS 4970: Senior Recital
Preparation and presentation of Senior Recital. Appropriate applied music course to be taken concurrently. May be repeated for credit. Each recital must be approved by a committee at least two weeks before the recital.

Credit Hour: 1

MUS_APMS 8455: Studio Instruction
Required for graduate credit as major applied study on M.M. degree. Acceptable for graduate credit on M.A., M.Ed., Ed.D., and Ph.D. degrees. May be repeated for credit.

Credit Hour: 1-5
Prerequisites: audition by committee and instructor’s consent

MUS_APMS 8970: Graduate Recital
Preparation and presentation of Graduate Recital. Appropriate applied music course to be taken concurrently. May be repeated for credit. Each recital must be approved by a committee at least two weeks before the recital.

Credit Hour: 1

Music-Courses for Non-Majors (MUSIC_NM)

MUSIC_NM 1005: Topics in Music-Humanities
Organized study of selected topics. Subjects vary from semester to semester. May be repeated once for additional credit with departmental consent.

Credit Hour: 1-3

MUSIC_NM 1029: Music Travel Course
Study tour designed to broaden perspective of persons interested in music. Stresses relationship of music to art and ideas in a variety of social and cultural contexts. Participant bears cost of course.

Credit Hour: 1-4
Prerequisites: instructor’s consent

MUSIC_NM 1085: Problems in Music
Independent investigation leading to a paper project. Sections are: Music Theory, Music Composition, Music History, Music Performance/Pedagogy. May be repeated for credit.

Credit Hour: 1-99
Prerequisites: instructor’s consent

MUSIC_NM 1211: Fundamentals of Music I
Introduction to rhythmic, melodic, harmonic, and structural elements of music. Designed for non-music majors. No credit for music majors or minors.

Credit Hours: 2

MUSIC_NM 1212: Fundamentals of Music II
Continuation of MUSIC_NM 1211. No credit for music majors or minors.

Credit Hours: 2
Prerequisites: Grade of C- or better in MUSIC_NM 1211 or instructor’s consent

MUSIC_NM 1300: Experiencing Music Through Concert Attendance
Development of music listening skills through concert attendance, reading and class attendance.

Credit Hour: 1
**MUSIC_NM 1310: Masterpieces of Western Music**
Introduction to the Western fine-art tradition through the study of representative masterworks, emphasis on developing listening skills; directed to non-majors.

**Credit Hours:** 3

**MUSIC_NM 1311: Jazz, Pop, and Rock**
Historical introduction to jazz (to approximately 1970) and the American popular song, including rock and roll (to approximately 1980); directed to non-majors.

**Credit Hours:** 3

**MUSIC_NM 1312: History of Jazz**
Historical survey of American jazz from its origin to the present. No credit for students who have taken MUSIC_NM 1311.

**Credit Hours:** 2

**MUSIC_NM 1313: Introduction to World Music**
Introduction to the musical traditions of selected non-Western societies; emphasis on developing listening skills; directed to non-majors, but music majors may enroll.

**Credit Hours:** 3

**MUSIC_NM 1314: Orchestral Masterpieces**
In-depth study of selected symphonic works of masters from Joseph Haydn to Aaron Copland. Students develop critical listening skills to identify orchestral instruments and perceive the structure and character of selected orchestral works. Directed to non-music majors. Graded on A-F basis only.

**Credit Hours:** 3

**MUSIC_NM 1315: Musical Profile-Bach**
Systematic study of the music of J.S. Bach directed to the general student. Graded on A-F basis only.

**Credit Hour:** 1

**MUSIC_NM 1316: Music Profile--Wolfgang A. Mozart**
A systematic introduction to the music of Wolfgang Amadeus Mozart. Graded on A-F basis only.

**Credit Hour:** 1

**MUSIC_NM 1317: Musical Profile-Beethoven**
Systematic study of the music of Ludwig van Beethoven directed to the general student. Graded on A-F basis only.

**Credit Hour:** 1

**MUSIC_NM 1318: Music Profile--Claude Debussy**
A systematic introduction to the music of Claude Debussy. Graded on A-F basis only.

**Credit Hour:** 1

**MUSIC_NM 1319: Music Profile--Igor Stravinsky**
A systematic introduction to the music of Igor Stravinsky. Graded on A-F basis only.

**Credit Hour:** 1

**MUSIC_NM 1320: Musical Profile-Copland**
Systematic study of the music of Aaron Copland directed to the general student. Graded on A-F basis only.

**Credit Hour:** 1

**MUSIC_NM 1330: Introduction to African-American Music**
Introduction to the history and scholarship of African American music from eighteenth through twentieth centuries. Focus on African legacies and retentions, slave culture, the black church, minstrelsy, folk traditions, spirituals, ragtime, blues, jazz, soul, R&B, and hip hop.

**Credit Hours:** 3

**MUSIC_NM 1335: Introduction to Soul and Country**
(same as BL_STU 1335). Examination of musical cultures signified by "soul" and "country". Study of the evolution and aesthetics of these genres and how they deal with concepts like identity, class, race, and ethnicity; gender and sexuality; politics and patriotism.

**Credit Hours:** 3

**MUSIC_NM 1340: Music of Love and Death**
Exploration of musical expression surrounding love and death in specific works of diverse styles and sociological contexts. Students will learn to listen to and appreciate music with informed ears and minds, develop strong perceptual skills, and cultivate a musical vocabulary.

**Credit Hours:** 3

**MUSIC_NM 1341: Drama Through Western Music**
Introduction to the musical culture of the theater through the ages by examining specific works of diverse styles and sociological contexts. Students learn to listen to and appreciate music with informed ears and minds, develop perceptual skills, and cultivate musical vocabulary.

**Credit Hours:** 3

**MUSIC_NM 1445: Studio Instruction**
Acceptable for non-majors and majors requiring a half-hour lesson with instructor’s consent. May be repeated for credit.

**Credit Hour:** 1

**MUSIC_NM 1608: Beginning Piano Class**
For non-music majors only.

**Credit Hour:** 1

**MUSIC_NM 1609: Intermediate Piano Class**
For non-music majors only. Continuation of MUSIC_NM 1608.

**Credit Hour:** 1
MUSIC_NM 1612: Elementary Folk Guitar Class
Teaching correct hand position, strum patterns, and chords needed for accompaniment of popular and folk songs.
Credit Hour: 1

MUSIC_NM 1615: Beginning Classical Guitar Class
Beginning Classical Guitar Class
Credit Hour: 1

MUSIC_NM 1617: Beginning Drumset
Fundamentals of the drumset, including an historical survey and biographical sketch of several performers. Also can be used as a pedagogical outline for future music teachers.
Credit Hour: 1

MUSIC_NM 1618: Basic Music Skills
Development of music reading and performance skills, including study of pitch, rhythm, notation, structure and interpretation of music. Emphasis on performance. No credit for music majors or minors or students who have completed MUSIC_NM 1211 or MUSIC_NM 1212.
Credit Hours: 2

MUSIC_NM 1651: Voice Class I
Fundamentals of singing: posture, breath support, control, vocalization, concepts of tone quality, placement and resonance. Literature selected for students with no previous vocal training. Adapted to needs of drama and other interdisciplinary students.
Credit Hour: 1

MUSIC_NM 1652: Voice Class II
Continuation of MUSIC_NM 1651.
Credit Hour: 1
Prerequisites: MUSIC_NM 1651

MUSIC_NM 2306: Perceiving Musical Traditions and Styles
An introduction to music from the late Baroque to the present day, including fine art, folk, and popular music. Designed to serve as a foundation for developing knowledge and skills of musical perception that will eventually lead to thoughtful written commentary on musical performances. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: open only to Journalism majors with sophomore standing or higher

MUSIC_NM 2306H: Perceiving Musical Traditions and Styles - Honors
An introduction to music from the late Baroque to the present day, including fine art, folk, and popular music. Designed to serve as a foundation for developing knowledge and skills of musical perception that will eventually lead to thoughtful written commentary on musical performances. Graded on A/F basis only.
Credit Hours: 3
Prerequisites: open only to Journalism majors with sophomore standing or higher. Honors eligibility required

MUSIC_NM 2445: Studio Instruction for Non-Majors
Acceptable for non-majors only. May be repeated for credit.
Credit Hour: 1-2
Prerequisites: audition by examining committee and instructor's consent

MUSIC_NM 4445: Studio Instruction for Non-Majors
Acceptable for non-majors only. May be repeated for credit.
Credit Hour: 1-2
Prerequisites: audition by examining committee and instructor's consent

MUSIC_NM 7029: Travel Seminar
Selected topics for directed study in music undertaken in context of the tour. Emphasis on subjects with cross-disciplinary implications. Participant bears cost of course.
Credit Hour: 1-4
Prerequisites: instructor's consent

MUSIC_NM 7445: Studio Instruction for Non-Majors
Acceptable for graduate s credit for non-majors only. May be repeated for credit.
Credit Hour: 1-2
Prerequisites: instructor's consent

Music-Ensemble Courses
(MUS_ENS)

MUS_ENS 1841: Instrumental Ensemble
Provides experience in instrumental performance and repertory. Open to all MU students by audition. May be repeated for credit. Enrollment in Marching Band is limited to a maximum of five semesters. Sections are: Philharmonic Orchestra, Chamber Orchestra, Symphonic Band, Wind Ensemble, Concert Band, Varsity Band, Studio Jazz Ensemble, Jazz Lab Band, Marching Band. Some sections may be graded on an S/U or A-F basis only.
Credit Hour: 0-1
Prerequisites: Audition

MUS_ENS 1842: Choral Ensemble
Provides experience in choral performance and repertory. Open to all MU students. May be repeated for credit. Sections are University Singers, Chamber Singers, Choral Union, Vocal Jazz Ensemble, Concert Chorale, Men's Chorus, Women's Chorus. Some sections may be graded on an S/ U or A-F basis only.
Credit Hour: 0-1
Prerequisites: Audition

MUS_ENS 1842: Choral Ensemble
Provides experience in choral performance and repertory. Open to all MU students. May be repeated for credit. Sections are University Singers, Chamber Singers, Choral Union, Vocal Jazz Ensemble, Concert Chorale, Men's Chorus, Women's Chorus. Some sections may be graded on an S/ U or A-F basis only.
Credit Hour: 0-1
Prerequisites: Audition

MUS_ENS 1846: Chamber Music
Preparation and performance of chamber music. May be repeated for credit. Sections are: String Ensemble, Woodwind Ensemble, Brass Ensemble, Percussion Ensemble, Jazz Combo. Some sections may be graded on an S/U or A-F basis only.
Credit Hour: 0-1
MUS_ENS 1865: Opera Workshop
Study, preparation and performance of selected operatic or musical theatre work in staged or concert versions. Open to all MU students by audition. Credit arranged; may be repeated for credit. Some sections may be graded on an S/U or A-F basis only.

Credit Hour: 0-1
Prerequisites: audition and instructor's consent

MUS_ENS 2843: Piano Ensemble
Study, preparation, and performance of ensemble literature for piano. May be repeated for credit.

Credit Hour: 1
Prerequisites: instructor's consent

MUS_ENS 4866: Musical Theatre Performance
(same as THEATR 4460). A practical study for the actor of theatrical songs through character analysis, lyric interpretation, and movement. A performance course.

Credit Hours: 3
Prerequisites: instructor's consent

MUS_ENS 8841: Instrumental Ensemble
Research, preparation and performance of instrumental compositions. May be repeated for credit. Sections and credit hours are: Philharmonic Orchestra, Chamber Orchestra, Symphonic Band, Wind Ensemble, Concert Band, Studio Jazz Ensemble, Jazz Lab Band, Marching Band. Some sections may be graded on an S/U or A-F basis only.

Credit Hour: 0-1
Prerequisites: audition and instructor's consent

MUS_ENS 8842: Choral Ensemble
Research, preparation and performance of choral compositions. May be repeated for credit. Sections are: University Singers, Chamber Singers, Choral Union, Vocal Jazz Ensemble, Concert Choral, Men's Chorus, Women's Chorus. Some sections may be graded on an S/U or A-F basis only.

Credit Hour: 0-1
Prerequisites: audition and instructor's consent

MUS_ENS 8843: Advanced Piano Ensemble
Study, preparation and performance of standard piano literature for four hands. May be repeated for credit.

Credit Hour: 1
Prerequisites: instructor's consent

MUS_ENS 8846: Advanced Chamber Ensemble
Study, preparation and performance of chamber music. May be repeated for credit. Sections are: String Ensemble, Woodwind Ensemble, Brass Ensemble, Percussion Ensemble, Jazz Combo. Some sections may be graded on an S/U or A-F basis only.

Credit Hour: 0-1
Prerequisites: audition and instructor's consent

MUS_ENS 8865: Advanced Opera Workshop
Study, preparation and performance of selected operatic or musical theatre works in staged or concert versions. Credit arranged; may be repeated for credit. Some sections may be graded on an S/U or A-F basis only.

Credit Hour: 0-2
Prerequisites: audition and instructor's consent

Music-General (MUS_GENL)

MUS_GENL 1091: Recital Attendance for Undergraduate Music Majors
Required attendance of eleven music events from the Music Department listing. 0 credit, and may be repeated until the total degree requirement is satisfactorily met. No tuition charged. Graded on S/U basis only.

Credit Hours: 0
Prerequisites: Undergraduate music majors only

MUS_GENL 3005: Topics in Music-Humanities
Organized study of selected topics in music. Subjects and credit variable. May be repeated for additional credit with departmental consent.

Credit Hour: 1-99
Prerequisites: junior standing in Music and instructor's consent

MUS_GENL 3005H: Topics in Music-Humanities - Honors
Organized study of selected topics in music. Subjects and credit variable. May be repeated for additional credit with departmental consent. Honors eligibility required

MUS_GENL 3085: Problems in Music
Independent investigation leading to a paper or project. May be repeated for credit. Sections are: Music Theory, Music Composition, Music History, Music Performance/Pedagogy.

Credit Hour: 1-99
Prerequisites: instructor's consent

MUS_GENL 4005: Topics in Music-Humanities
Organized study of selected topics in music. Subjects and credit variable. May be repeated for additional credit with departmental consent.

Credit Hour: 1-99
Prerequisites: instructor's consent

MUS_GENL 4005H: Topics in Music-Humanities - Honors
Organized study of selected topics in music. Subjects and credit variable. May be repeated for additional credit with departmental consent. Honors eligibility required

<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
<th>Credit Hours</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUS_GENL 4029</td>
<td>Music Travel Course (cross-leveled with MUS_GENL 7029)</td>
<td>Experience designed to broaden music students’ perspectives on music in different social and/or cultural context(s). Participant bears cost of the course.</td>
<td>1-3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>MUS_GENL 4510</td>
<td>Career Development for Musicians</td>
<td>Examination of professional opportunities available in the Creative Economy; development of a framework for career planning, professional portfolio, and personal business plan.</td>
<td>2</td>
<td>sophomore standing and instructor’s consent</td>
</tr>
<tr>
<td>MUS_GENL 4512</td>
<td>Principles of Entrepreneurship for Musicians</td>
<td>Provisions of a solid foundation of the core principles of entrepreneurial practice: creation of new ventures, the decisions leading to their development, and the factors that lead to their success. Students identify a career objective and develop a framework for achieving it.</td>
<td>1</td>
<td>MUS_GENL 4510; sophomore standing or instructor’s consent</td>
</tr>
<tr>
<td>MUS_GENL 4514</td>
<td>Arts Marketing for Musicians</td>
<td>Exploration of marketing the arts in the 21st Century. Students formulate a marketing plan for a project or career goal, including establishing a competitive advantage, identifying target markets, formulating marketing strategy, and measuring outcomes.</td>
<td>1</td>
<td>MUS_GENL 4510; Sophomore standing or instructor’s consent</td>
</tr>
<tr>
<td>MUS_GENL 4516</td>
<td>Grant Writing for Musicians (cross-leveled with MUS_GENL 7516)</td>
<td>Exploration of the nuts and bolts of grant writing, including resources for freelance performers and teachers, and alternative fundraising strategies for individual venture ideas. Students identify a grant opportunity and draft a funding proposal for a real or imagined project.</td>
<td>1</td>
<td>MUS_GENL 4510; sophomore standing or instructor’s consent</td>
</tr>
<tr>
<td>MUS_GENL 4518</td>
<td>Music Industry Survey</td>
<td>In-depth survey of the commercial Music industry world, with emphasis on career opportunities within the recording, performing, music retail, and music management sectors.</td>
<td>1</td>
<td>MUS_GENL 4510, sophomore standing, or instructor’s consent</td>
</tr>
<tr>
<td>MUS_GENL 4520</td>
<td>Non-Profit Management in the Arts</td>
<td>Introduction to management strategy and its application within the not-for-profit arts sector.</td>
<td>1</td>
<td>MUS_GENL 4510, sophomore standing, or instructor’s consent</td>
</tr>
<tr>
<td>MUS_GENL 4522</td>
<td>Community Engagement in the Arts</td>
<td>Introduction to community-based arts and their relationship to personal branding in the non-profit arts sector.</td>
<td>1</td>
<td>MUS_GENL 4510, sophomore standing, or instructor’s consent</td>
</tr>
<tr>
<td>MUS_GENL 4530</td>
<td>Entrepreneurship, Leadership and Advocacy in the Arts</td>
<td>Seminar investigating advocacy methods, the application of leadership within non-profit arts organizations, arts policy and implications for artists in the 21st century. Writing and research-based work is a heavy component.</td>
<td>2</td>
<td>MUS_GENL 4510, sophomore standing, or instructor’s consent</td>
</tr>
<tr>
<td>MUS_GENL 4540</td>
<td>Music Entrepreneurship Practicum (cross-leveled with MUS_GENL 7540)</td>
<td>Students either A) design and execute an entrepreneurial music leadership project in the community, or B) complete an internship (and accompanying report) with an approved partner organization, supervised by the instructor.</td>
<td>2</td>
<td>MUS_GENL 4510, sophomore standing or instructor’s consent</td>
</tr>
<tr>
<td>MUS_GENL 4550</td>
<td>Movement and Wellness for Musicians (cross-leveled with MUS_GENL 7550)</td>
<td>Students will actively engage with various somatic practices with the goal of holistically improving musical performance.</td>
<td>1</td>
<td>MUS_GENL 4510, sophomore standing or instructor’s consent</td>
</tr>
<tr>
<td>MUS_GENL 7005</td>
<td>Topics in Music</td>
<td>Organized study of selected topics in music. Subjects and credit variable. May be repeated with departmental consent.</td>
<td>1-99</td>
<td>departmental consent</td>
</tr>
<tr>
<td>MUS_GENL 7029</td>
<td>Music Travel Course (cross-leveled with MUS_GENL 4029)</td>
<td>Experience designed to broaden music students’ perspectives on music in different social and/or cultural context(s). Participant bears cost of the course.</td>
<td>1-3</td>
<td>instructor’s consent</td>
</tr>
<tr>
<td>MUS_GENL 7510</td>
<td>Career Development for Musicians</td>
<td>Examination of professional opportunities available in the Creative Economy; development of a framework for career planning, professional portfolio, and personal business plan.</td>
<td>2</td>
<td>MUS_GENL 4510, sophomore standing, or instructor’s consent</td>
</tr>
</tbody>
</table>
Prerequisites: instructor’s consent

MUS_GENL 7512: Principles of Entrepreneurship for Musicians
Provision of a solid foundation of the core principles of entrepreneurial practice: creation of new ventures, the decisions leading to their development, and the factors that lead to their success. Students identify a career objective and develop a framework for achieving it.

Credit Hour: 1
Prerequisites: MUS_GENL 7510 and instructor’s consent

MUS_GENL 7514: Arts Marketing for Musicians
Exploration of marketing the arts in the 21st Century. Students formulate a marketing plan for a project or career goal, including establishing a competitive advantage, identifying target markets, formulating marketing strategy, and measuring outcomes.

Credit Hour: 1
Prerequisites: MUS_GENL 7510 and instructor’s consent

MUS_GENL 7516: Grant Writing for Musicians
(cross-leveled with MUS_GENL 4516). Explorations of the nuts and bolts of grant writing, including resources for freelance performers and teachers, and alternative fundraising strategies for individual venture ideas. Students identify a grant opportunity and draft a funding proposal for a real or imagined project.

Credit Hour: 1
Prerequisites: MUS_GENL 7510; instructor’s consent

MUS_GENL 7518: Music Industry Survey
In-depth survey of the commercial music industry world, with emphasis on career opportunities within the recording, performing, music retail, and music management sectors.

Credit Hour: 1
Prerequisites: MUS_GENL 7510 or instructor’s consent

MUS_GENL 7520: Non-Profit Management in the Arts
Introduction to management strategy and its application within the not-for-profit arts sector.

Credit Hour: 1
Prerequisites: MUS_GENL 7510 or instructor’s consent

MUS_GENL 7522: Community Engagement in the Arts
Introduction to community-based arts and their relationship to personal branding in the non-profit arts sector.

Credit Hour: 1
Prerequisites: MUS_GENL 7510 or instructor’s consent

MUS_GENL 7530: Entrepreneurship, Leadership and Advocacy in the Arts
Seminar investigating advocacy methods, the application of leadership within non-profit arts organizations, arts policy and implications for artists in the 21st century. Writing and research-based work is a heavy component.

Credit Hours: 2
Prerequisites: MUS_GENL 7510 or instructor’s consent

MUS_GENL 7540: Music Entrepreneurship Practicum
Students either A) design and execute an entrepreneurial music leadership project in the community, or B) complete an internship (and accompanying report) with an approved partner organization, supervised by the instructor.

Credit Hours: 2
Prerequisites: MUS_GENL 7510 or instructor’s consent

MUS_GENL 7550: Movement and Wellness for Musicians
(cross-leveled with MUS_GENL 4550). Students will actively engage with various somatic practices with the goal of holistically improving musical performance.

Credit Hour: 1
Prerequisites: Instructor’s consent

MUS_GENL 8085: Problems in Music
Independent investigation leading to a paper or project. May be repeated for credit. Sections are: Music Theory, Music Composition, Music History, Music Performance/Pedagogy.

Credit Hour: 1-99
Prerequisites: instructor’s consent

MUS_GENL 8090: Research in Music
Thesis course. May be repeated for additional credit. Sections are: Music Theory, Music Composition, Music History. Performance/Pedagogy. Graded on S/U basis only.

Credit Hour: 1-99

Music-Instrumental And Vocal Repertory (MUS_I_VR)

MUS_I_VR 3753: Piano Literature I
Survey of keyboard music from ca. 1600 to ca. 1800.

Credit Hours: 2
Prerequisites: junior standing and instructor’s consent

MUS_I_VR 3754: Piano Literature II
Survey of keyboard music from Beethoven’s time to the present.

Credit Hours: 2
Prerequisites: MUS_I_VR 3753 or instructor’s consent

MUS_I_VR 4767: Vocal Literature I
Introduction to and study of song literature with emphasis on style and interpretation.

Credit Hours: 2
Prerequisites: junior standing or instructor’s consent

MUS_I_VR 4768: Vocal Literature II
Continuation of MUS_I_VR 4767.

Credit Hours: 2
Prerequisites: MUS_I_VR 4767 or instructor’s consent
MUS I VR 4776: Orchestral Excerpts
Study and preparation of selected excerpts from the standard audition repertoire, culminating in a mock audition. May be repeated for credit.
Credit Hour: 1
Prerequisites: Instructor’s consent required

MUS I VR 4780: Classical Guitar Repertory I
Survey of guitar repertory and history from 1400 to present.
Credit Hour: 1
Prerequisites: Instructor’s consent

MUS I VR 4781: Classical Guitar Repertory II
Continued study of guitar repertory from 1400 to present, with emphasis on organological development of the guitar and performance practice.
Credit Hour: 1
Prerequisites: MUS I VR 4780; instructor’s consent

MUS I VR 7767: Advanced Vocal Literature I
Study of specific aspects of vocal repertory. Individual projects in research, analysis and performance.
Credit Hours: 3
Prerequisites: MUS I VR 7455 or instructor’s consent

MUS I VR 7768: Advanced Vocal Literature II
Continuation of MUS I VR 7767.
Credit Hours: 3
Prerequisites: MUS I VR 7767 or instructor’s consent

MUS I VR 7776: Orchestral Excerpts
Study and preparation of selected excerpts from the standard audition repertoire, culminating in a mock audition. May be repeated for credit.
Credit Hour: 1
Prerequisites: Instructor’s consent required

MUS I VR 7780: Graduate Classical Guitar Repertory I
Survey of guitar repertory and history from 1400 to present.
Credit Hour: 1
Prerequisites: Instructor’s consent required

MUS I VR 7781: Graduate Classical Guitar Repertory II
Continued study of guitar repertory from 1400 to present, with emphasis on organological development of the guitar and performance practice.
Credit Hour: 1
Prerequisites: MUS I VR 7780. Instructor’s consent required

MUS I VR 8753: Piano Repertory I
Credit Hours: 2
Prerequisites: MUS I VR 7455 or instructor’s consent

MUS I VR 8754: Piano Repertory II
Credit Hours: 2
Prerequisites: MUS I VR 8753 or instructor’s consent

MUS I VR 8765: Choral Repertory
Survey of choral works from selected periods with an emphasis on various aspects of choral performance. May be repeated once for additional credit.
Credit Hours: 2
Prerequisites: Instructor’s consent

MUS I VR 8770: Band Repertory
To survey band and wind ensemble repertoire with emphasis on various aspects of performance practice in order to prepare the student for a career which includes conducting advanced high school and college bands and wind ensembles.
Credit Hours: 3

MUS I VR 8773: String Instrument Repertory I
Credit Hour: 1
Prerequisites: MUS I VR 7455 or instructor’s consent

MUS I VR 8774: String Instrument Repertory II
Continuation of MUS I VR 8773.
Credit Hour: 1
Prerequisites: MUS I VR 8773

MUS I VR 8775: Orchestral Repertory
A survey of orchestral repertory, emphasizing various aspects of performance practice. Appropriate for graduate music conducting majors who wish to pursue a career which includes conducting orchestras at the advanced high school, college, and professional levels. May be repeated.
Credit Hours: 2
Prerequisites: Conducting experience at the high school or college level and instructor’s consent

Music-Instrumental And Vocal Techniques (MUS I _VT)

MUS I VT 1610: Group Piano for Music Majors I
Beginning piano for music majors and concentrations only.
Credit Hour: 1
Prerequisites: Instructor’s consent

MUS I VT 1611: Group Piano for Music Majors II
Continuation of MUS I VT 1610.
Credit Hour: 1
Prerequisites: MUS I VT 1610 with a minimum grade of C- or instructor’s consent

<td>MUS_I_VT 2661</td>
<td>Keyboard Skills for Piano Majors I</td>
<td>Study of sightreading, harmonization, transposition, figured bass realization, and duet skills.</td>
<td>2</td>
<td>Prerequisites: grade of C- or better in MUS_THRY 1221 and MUS_THRY 1231; instructor's consent</td>
</tr>
</tbody>
</table>
MUS_I_VT 2662: Keyboard Skills for Piano Majors II
Study of score reading, duet performance, and collaborative experiences with voice and instruments.

Credit Hours: 2
Prerequisites: grade of C- or better in MUS_I_VT 2661; instructor's consent

MUS_I_VT 3640: Undergraduate Seminar in Vocal Techniques
Discusses accepted techniques of singing, practical application to posture, breath support, tone placement, musicianship, diction, interpretation, stage deportment. Recognizing and solving specific vocal problems. May be repeated once for credit.

Credit Hour: 1
Prerequisites: instructor's consent

MUS_I_VT 3642: Seminar in String Techniques
In-depth study of publications, philosophies, repertory, grading, specific problems for the string player. May be repeated once for credit.

Credit Hour: 1
Prerequisites: MUS_I_VT 2640 and MUS_I_VT 2641, or instructor's consent

MUS_I_VT 3643: Symposium in Instrumental Music
Study of procedures, techniques and literature for variable combinations of wind, string, and percussion classes and the administration of instrumental music programs.

Credit Hours: 2
Prerequisites: junior standing in Music or Music Education or instructor's consent

MUS_I_VT 3644: Jazz Methods and Materials
Training and supervised practice in conducting Jazz Ensembles; study of administration, methods, and materials pertinent to teaching Jazz, Rock, and Commercial Music in high school and college.

Credit Hour: 1
Prerequisites: junior standing or instructor's consent

MUS_I_VT 3646: Marching Band Techniques
Study of techniques and procedures used in the development of field and street marching.

Credit Hours: 2
Prerequisites: junior standing in Music or Music Education

MUS_I_VT 3670: Diction in Singing: Italian
Study of the correct principles and application of Italian diction in singing the solo vocal, operatic and choral literature; the International phonetic alphabet; spoken language drill, study and recitation of representative literature.

Credit Hour: 1
Prerequisites: sophomore standing

MUS_I_VT 3671: Diction in Singing: German
Study of the correct principles and application of German diction in singing the solo vocal, operatic and choral literature; the International phonetic alphabet spoken language drill, study and recitation of representative literature.

Credit Hour: 1
Prerequisites: sophomore standing

MUS_I_VT 3672: Diction in Singing: French
Study of the correct principles and application of French diction in singing the solo vocal, operatic, and choral literature; the International Phonetic Alphabet spoken language drill, study and recitation of representative literature. Prerequisites: sophomore standing

Credit Hour: 1

MUS_I_VT 3673: Diction in Singing: Latin
Study of the correct principles and application of Latin diction in singing the solo vocal, operatic, and choral literature; the International Phonetic Alphabet spoken language drill, study and recitation of representative literature.

Credit Hour: 1
Prerequisites: sophomore standing

MUS_I_VT 4645: Jazz Methods and Materials
Creation of a melodic vocabulary for jazz improvisation through study and application of jazz chord-scale theory, solo transcription, and careful listening to the vanguard of jazz.

Credit Hours: 2
Prerequisites: MUSIC_NM 1211 or MUS_THRY 1220, instructor's consent

MUS_I_VT 4661: Piano Pedagogy Survey I
Study of approaches for teaching young beginning and intermediate student; survey of materials and resources.

Credit Hours: 2
Prerequisites: instructor's consent

MUS_I_VT 4662: Piano Pedagogy Survey II
Study of approaches for teaching older, more advanced and class piano students; survey of materials and resources.

Credit Hours: 2
Prerequisites: instructor's consent

MUS_I_VT 4663: Piano Pedagogy Laboratory
Supervised instruction in private and class piano. May be repeated once for additional credit.

Credit Hour: 1
Prerequisites: MUS_I_VT 4661 and MUS_I_VT 4662

MUS_I_VT 4680: Classical Guitar Pedagogy
Basic anatomical and physiological aspects of guitar performance, setting technical and musical goals for students, repertoire development in relation to age, level, and musical style. Career goals (building a private studio, lesson planning, organizational skills) are addressed.

Credit Hour: 1
Prerequisites: Audition required and instructor's consent

MUS_I_VT 7645: Graduate Jazz Improvisation
Creation of a melodic vocabulary for jazz improvisation through study and application of jazz chord-scale theory, solo transcription, and careful listening to the vanguard of jazz.

Credit Hours: 2
Prerequisites: instructor's consent
MUS_I_VT 7680: Graduate Classical Guitar Pedagogy
Basic anatomical and physiological aspects of guitar performance, setting technical and musical goals for students, repertoire development in relation to age, level and musical style. Career goals (building a private studio, lesson planning, organizational skills) are addressed.

Credit Hour: 1
Prerequisites: Audition and approval of instructor

MUS_I_VT 8646: Jazz Pedagogy I
Study of historical and current trends in jazz education and pedagogy, including administration and curriculum, through assigned readings, supervised teaching, classroom discussion, survey of materials, and formation of an annotated bibliography. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: instructor's consent required

MUS_I_VT 8647: Jazz Pedagogy II
Continuation of MUS_I_VT 8646; formulation of an extensive philosophy of jazz education. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MUS_I_VT 8646 and instructor's consent

MUS_I_VT 8671: Principles of Singing I

Credit Hours: 2
Prerequisites: instructor's consent

MUS_I_VT 8673: Advanced Choral Conducting
Advanced conducting techniques in the interpretation of choral literature; score analysis. May be repeated for additional credit.

Credit Hours: 2
Prerequisites: MUS_I_VT 2633 or instructor's consent

MUS_I_VT 8674: Advanced Instrumental Conducting
Advanced conducting techniques in the interpretation of band and orchestral literature; score analysis. May be repeated for additional credit.

Credit Hours: 2
Prerequisites: MUS_I_VT 2634 or instructor's consent

MUS_I_VT 8681: Advanced Piano Pedagogy I
A survey of materials and techniques of instruction for teaching the young beginner and the intermediate piano student.

Credit Hours: 2
Prerequisites: instructor's consent

MUS_I_VT 8682: Advanced Piano Pedagogy II
A survey of materials and techniques of instruction for teaching class piano, the older beginner, and the advanced student.

Credit Hours: 2
Prerequisites: instructor's consent

MUS_I_VT 8683: Piano Pedagogy Internship
Supervised teaching of individual and group lessons. May be repeated once for credit.

Credit Hour: 1
Prerequisites: MUS_I_VT 8681 and MUS_I_VT 8682 and instructor's consent

MUS_I_VT 8684: Group Piano Pedagogy
Preparation of graduate students to teach group piano to both college level music majors and adult beginners.

Credit Hours: 2
Prerequisites: instructor's consent

MUS_I_VT 8686: Choral Techniques
Study of techniques for developing choral singing and musical interpretation.

Credit Hours: 3
Prerequisites: instructor's consent

MUS_I_VT 8689: Band Techniques
To develop individual conducting techniques as well as instrumental ensemble techniques. Emphasis is placed on the learning process to give the student a perspective to improve the techniques of others.

Credit Hours: 3
Prerequisites: instructor's consent

Music-Music History And Literature (MUS_H_LI)

MUS_H_LI 1322: Introduction to Music in the United States
Historical overview of American folk, popular, and fine-art music; emphasis on listening skills.

Credit Hours: 2

MUS_H_LI 2307: History of Western Music I
Historical survey of selected European practices up to 1700 following a consideration of the major fine-art traditions of the world.

Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_H_LI 1322

MUS_H_LI 2308: History of Western Music II
Historical survey of Western fine-art music from approximately 1700 to the present.

Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_H_LI 2307

MUS_H_LI 4311: Historical Studies in Art Song
Historical survey of works for solo voice and instruments.

Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor’s consent

MUS_H_LI 4312: Historical Studies in Choral Music
Historical survey of works featuring choral ensembles.

Credit Hours: 3

<tr>
<td>MUS_H_LI 7318: Studies in World Music</td>
<td>Advanced systematic study of musical activities in selected world cultures, with emphasis on developing listening skills and understanding the role of music in a culture.</td>
<td>Credit Hours: 3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>MUS_H_LI 7320: Historical Studies in African-American Music</td>
<td>Exploration of history and current scholarship in African-American music from the eighteenth to the twenty-first centuries. Genres include folk music, religious music, blues, ragtime, jazz, musical theater, art music, R&amp;B, funk, soul, disco, house, hip-hop and rap.</td>
<td>Credit Hours: 3</td>
<td></td>
<td>Prerequisites: instructor's consent</td>
</tr>
</tbody>
</table>
MUS_H_LI 7335: Music of the Middle Ages and the Renaissance  
Advanced systematic study of European musical practice before 1600.  
Credit Hours: 3  
Prerequisites: instructor’s consent

MUS_H_LI 7336: Music in the Baroque Era  
Advanced systematic study of European musical practice from approximately 1600 to 1750.  
Credit Hours: 3  
Prerequisites: instructor’s consent

MUS_H_LI 7337: Music of the Classic Era  
Advanced systematic study of European musical practice from approximately 1750 to 1800.  
Credit Hours: 3  
Prerequisites: instructor’s consent

MUS_H_LI 7338: Music of the Romantic Era  
Advanced systematic study of European musical practice from approximately 1800 to 1900.  
Credit Hours: 3  
Prerequisites: instructor’s consent

MUS_H_LI 7339: Music of the Modern Era  
Advanced systematic study of fine-art musical practice from approximately 1900 to the present.  
Credit Hours: 3  
Prerequisites: instructor’s consent

MUS_H_LI 7340: Focal Composers  
Advanced systematic study of the works of landmark composers: J.S. Bach, Mozart, Beethoven, Verdi/Wagner, Debussy, or Stravinsky, studied in rotation. Repeatable for up to 6 hours or credit.  
Credit Hours: 3  
Prerequisites: instructor’s consent

MUS_H_LI 7341: Advanced Studies in American Music  
(cross-leveled with MUS_H_LI 4341). Advanced systematic study of the diverse streams of musical practice in the United States from the colonial time to the present.  
Credit Hours: 3  
Prerequisites: instructor’s consent

MUS_H_LI 7342: Contemporary Issues in Musicology  
Advanced systematic study of single musicological problem of contemporary relevance.  
Credit Hours: 3  
Prerequisites: instructor’s consent

MUS_H_LI 7350: Introduction to Ethnomusicology  
Study of theories, historical development, research methodologies, and practice of ethnomusicology, in an interdisciplinary approach. Topics include ethnographic research, oral and literate sources, transcription and analysis, critical analysis, and interpretative techniques.  
Credit Hours: 2  
Prerequisites: consent required. Placement by exam

MUS_H_LI 7352: Historical Studies in African Music  
Ethnomusicological introduction to the music and culture of countries and ethnic groups in Africa. Traditional and contemporary popular styles are explored, and influences of Islamic invasions, missionary arrivals, colonial conquests, neo-colonial trends, and globalization.  
Credit Hours: 3  
Prerequisites: instructor’s consent

MUS_H_LI 8313: Introduction to Graduate Study  
Introduction to library procedures, basic sources of information in music and techniques for research.  
Credit Hours: 2  
Prerequisites: instructor’s consent

MUS_H_LI 8314: Introduction to Graduate Studies in Music II  
The application of basic music bibliography, research techniques, and conventions of music scholarship.  
Credit Hour: 1  
Prerequisites: MUS_H_LI 8313 or instructor’s consent

Music-Music Theory (MUS_THRY)

MUS_THRY 1210: Introduction to Computer Technology and Music  
Introduces Finale, music engraving and playback software, and introduces sequencing and other software applications that may impact students while they are in school and as professional musicians.  
Credit Hours: 2

MUS_THRY 1213: Introduction to Music Theory  
Introduction to music notation and to rhythmic, melodic, harmonic, and structural elements of music. Emphasis on written skills, but ear training, sight singing, and keyboard components included as well. Graded on A/F basis only.  
Credit Hours: 2  
Prerequisites: consent required. Placement by exam

MUS_THRY 1220: Syntax, Structure and Style of Music I  
Review of fundamentals. Study of rhythm, melody, harmonic, structure and stylistic characteristics of various periods. Application through original composition projects. Prerequisites: none for Music majors; others: instructor’s consent.  
Credit Hours: 2

MUS_THRY 1221: Syntax, Structure and Style of Music II  
Continuation of MUS_THRY 1220. Study of smaller forms and introduction to chromatic harmony.  
Credit Hours: 2  
Prerequisites: Grade of C- or better in MUS_THRY 1220 or instructor’s consent
MUS_THRY 1230: Aural Training and Sight Singing I
Development of aural and sight singing skills.
Credit Hours: 2
Prerequisites: MUS_THRY 1220 or concurrent enrollment

MUS_THRY 1231: Aural Training and Sight Singing II
Continuation of MUS_THRY 1230.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 1230 and MUS_THRY 1221 or MUS_THRY 1221 concurrently

MUS_THRY 2215: Composition I
Fundamentals of composition and writing in small forms.
Credit Hours: 2
Prerequisites: grade of B- or better in MUS_THRY 1220, MUS_THRY 1221, MUS_THRY 1230, MUS_THRY 1231, and instructor's consent

MUS_THRY 2216: Composition II
Continuation of MUS_THRY 2215.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2215

MUS_THRY 2220: Syntax, Structure and Style of Music III
Chromatic harmony, variation techniques and contrapuntal genres. Study of traditional forms in instrumental, vocal and choral compositions. Applications through original composition projects.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 1221

MUS_THRY 2221: Syntax, Structure and Style of Music IV
Continued study of chromatic harmony and compositions in larger forms. Application through original composition projects.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2220

MUS_THRY 2230: Aural Training and Sight Singing III
Continuation of MUS_THRY 1231. Further development of aural and sight singing skills with an emphasis on chromatic harmony and decorative pitches. Introduction of structural perception.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 1231 and MUS_THRY 2220 or MUS_THRY 2220 concurrently

MUS_THRY 2231: Aural Training and Sight Singing IV
Continuation MUS_THRY 2230.
Credit Hours: 2
Prerequisites or Corequisites: MUS_THRY 2221
Prerequisites: Grade of C- or better in MUS_THRY 2230

MUS_THRY 3215: Composition III
Further development of creative writing in traditional forms.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2216

MUS_THRY 3216: Composition IV
Continuation of MUS_THRY 3215.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 3215

MUS_THRY 4210: Jazz Harmony and Arranging I
(cross-leveled with MUS_THRY 7210). Study of basic melodic and harmonic materials commonly used in jazz. Application through arranging projects for small jazz groups.
Credit Hours: 2
Prerequisites: MUS_THRY 4210; instructor's consent required

MUS_THRY 4211: Jazz Harmony and Arranging II
(cross-leveled with MUS_THRY 7211). Continuation of MUS_THRY 4210. Study of advanced melodic and harmonic materials commonly used in jazz. Application through arranging projects for small and large jazz groups.
Credit Hours: 2
Prerequisites: MUS_THRY 4211; instructor's consent

MUS_THRY 4215: Composition V
Writing of works in larger forms for a solo instrument or chamber ensemble.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 3216

MUS_THRY 4216: Composition VI
Continuation of MUS_THRY 4215. May be repeated for additional credit.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 4215

MUS_THRY 4220: 20th Century Composition Techniques
(cross-leveled with MUS_THRY 7220). The study and application of analytical procedures to 20th century music literature. Special readings; individual projects.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2221 or instructor's consent

MUS_THRY 4221: Analysis of Music
An analytical study of rhythmic, melodic, harmonic and structural aspects of 18th-, 19th- and 20th-century music.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2221 or equivalent

MUS_THRY 4222: Computer Technology and Music
The introduction of music software for educational and professional use. Music notation software will be learned. Sequencing software will be studied in depth. Hands-on experience with Macintosh computers, multi-timbral synthesizers and various CD-ROMS.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 4220 or instructor’s consent

MUS_THRY 4223: Eighteenth-Century Counterpoint
(cross-leveled with MUS_THRY 7223). Study of contrapuntal procedures and representative works of the eighteenth century. Emphasis on compositions and style of Johann Sebastian Bach. Original composition projects: canon, invention, and fugue. Prerequisites: Grade of C- or better in MUS_THRY 2221 or instructor’s consent
Credit Hours: 3

MUS_THRY 4225: Sixteenth-Century Counterpoint
(cross-leveled with MUS_THRY 7225). Analysis of contrapuntal procedures and representative compositions of 16th century. Emphasis on styles of Palestrina, Lassus and Victoria. Stylistic writing in two, three or more voices.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4227: Orchestration
(cross-leveled with MUS_THRY 7227). Study of orchestral instruments and the process of scoring for various orchestral combinations.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4229: Band Arranging
Transcription, scoring of solo and ensemble literature for band instrument combinations of varying sizes up to and including concert band.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4230: Choral Arranging
Transcription and arrangement of music suitable for performance by various vocal ensembles.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4231: Schenkerian Analysis
Techniques of musical analysis developed by Heinrich Schenker.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4232: Rhythmic Analysis of Tonal Music
Introduction to rhythmic analysis, including context of current thinking, basic concepts, various approaches, selected topics, performance issues, and particular problems.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4233: Acoustics of Music
(cross-leveled with MUS_THRY 7233). The study of tuning systems and the properties, production and reception of musical sound.
Credit Hours: 2
Prerequisites: instructor’s consent
MUS_THRY 4284: Contemporary Analytical Techniques
Study and application of various analytical systems for 20th century compositions. Analysis of music employing contemporary theories.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4299: Graduate Theory Review
Review of music theory for graduate students in music. Does not fulfill graduate degree requirements. Graded on S/U basis only.
Credit Hours: 2
Prerequisites: instructor’s consent

MUS_THRY 7210: Advanced Jazz Harmony and Arranging I
(cross-leveled with MUS_THRY 4210). Study of basic melodic and harmonic materials commonly used in jazz. Application through arranging projects for small jazz groups.
Credit Hours: 2
Prerequisites: instructor’s consent

MUS_THRY 7211: Advanced Jazz Harmony and Arranging II
(cross-leveled with MUS_THRY 4211). Continuation of MUS_THRY 7210. Study of advanced melodic and harmonic materials commonly used in jazz. Application through arranging projects for small and large groups.
Credit Hours: 2
Prerequisites: instructor’s consent

MUS_THRY 7215: Composition I
Fundamentals of Composition: Writing in small forms. For non-composition graduate students in music.
Credit Hours: 2
Prerequisites: instructor’s consent

MUS_THRY 7216: Composition II
Continuation of MUS_THRY 7215.
Credit Hours: 2
Prerequisites: MUS_THRY 7215

MUS_THRY 7220: 20th Century Composition Techniques
(cross-leveled with MUS_THRY 4220). Graduate review in the study and application of analytical procedures to 20th century music literature. Special readings; individual projects.
Credit Hours: 2
Prerequisites: instructor’s consent

MUS_THRY 7221: Analysis of Music
Graduate review in the analytical study of rhythmic, melodic, harmonic and structural aspects of 18th-, 19th- and 20th-century music.
Credit Hours: 2
Prerequisites: instructor’s consent

MUS_THRY 7222: Computer Technology and Music
Graduate-level introduction of music software for educational and professional use. Music notation software will be learned. Sequencing software will be studied in depth. Hands-on experience with Macintosh computers, multi-timbral synthesizers and various CD-ROMS.
Credit Hours: 2
Prerequisites: instructor’s consent

MUS_THRY 7223: Eighteenth-Century Counterpoint
(cross-leveled with MUS_THRY 4223). Advanced study of contrapuntal procedures and representative works of the eighteenth century. Emphasis on compositions and style of Johann Sebastian Bach. Original composition projects: canon, invention, and fugue. Prerequisites: instructor’s consent
Credit Hours: 3

MUS_THRY 7225: Sixteenth-Century Counterpoint
(cross-leveled with MUS_THRY 4225). Advanced analysis of contrapuntal procedures and representative compositions of 16th century. Emphasis on styles of Palestrina, Lassus and Victoria. Stylistic writing in two, three or more voices.
Credit Hours: 3
Prerequisites: instructor’s consent

MUS_THRY 7227: Advanced Orchestration
(cross-leveled with MUS_THRY 4227). Study of orchestral instruments and the process of scoring for various orchestral combinations.
Credit Hours: 2
Prerequisites: instructor’s consent

MUS_THRY 7229: Band Arranging
Advanced transcription, scoring of solo and ensemble literature for band instrument combinations of varying sizes up to and including concert band.
Credit Hours: 2
Prerequisites: instructor’s consent

MUS_THRY 7230: Choral Arranging
Advanced transcription and arrangement of music suitable for performance by various vocal ensembles.
Credit Hours: 2
Prerequisites: instructor’s consent

MUS_THRY 7231: Schenkerian Analysis
Advanced techniques of musical analysis developed by Heinrich Schenker.
Credit Hours: 3
Prerequisites: instructor’s consent

MUS_THRY 7232: Rhythmic Analysis of Tonal Music
Advanced study of rhythmic analysis, including context of current thinking, basic concepts, various approaches, selected topics, performance issues, and particular problems.
Credit Hours: 3
Prerequisites: instructor’s consent
MUS_THRY 7233: Acoustics of Music
(cross-leveled with MUS_THRY 4233). Advanced study of tuning systems and the properties, production and reception of musical sound.
Credit Hours: 2
Prerequisites: instructor’s consent

MUS_THRY 7245: Introduction to Electronic Music
Advanced techniques used in the creation of music with tape recorders, voltage-controlled synthesizers and electronics.
Credit Hours: 2
Prerequisites: instructor’s consent

MUS_THRY 7247: Introduction to Digital Synthesis
Graduate-level introduction to the techniques of digital synthesis, including the study of programming, and Musical Instrument Digital Interfacing.
Credit Hours: 2
Prerequisites: instructor’s consent

MUS_THRY 7250: Analysis of Musical Styles
Advanced analytical study of specific rhythmic, melodic, harmonic, and structural factors which constitute the stylistic practices of a specific period or composer. May be repeated for credit with departmental consent.
Credit Hours: 2
Prerequisites: instructor’s consent

MUS_THRY 7252: Keyboard Harmony and Score Reading
Study of idiomatic chord progressions and harmonization strategies at the keyboard, including figured bass, score reading, and score playing. Skills are reinforce by analysis, both at sight and prepared.
Credit Hours: 3
Prerequisites: demonstrable keyboard proficiency at level of Bach invention; instructor's consent

MUS_THRY 7267: Advanced Orchestration I
(cross-leveled with MUS_THRY 4267). Advanced transcription for full orchestra of large works from different style periods. Scoring of original works for orchestra. Seminar, private lessons.
Credit Hours: 2
Prerequisites: MUS_THRY 7227 or instructor’s consent

MUS_THRY 7268: Advanced Orchestration II
(cross-leveled with MUS_THRY 4268). Survey of original works for orchestra.
Credit Hours: 2

MUS_THRY 7271: Pedagogy of Music Theory I
Advanced techniques and materials for teaching basic music theory courses for high schools and colleges.
Credit Hours: 2
Prerequisites: instructor’s consent

MUS_THRY 7272: Pedagogy of Music Theory II
Advance techniques and materials for advanced college courses in music theory.
Credit Hours: 2
Prerequisites: MUS_THRY 7271

MUS_THRY 7284: Contemporary Analytical Techniques
Advanced study and application of various analytical systems for 20th century compositions. Analysis of music employing contemporary theories.
Credit Hours: 2
Prerequisites: instructor’s consent

Natural Resources (NAT_R)

NAT_R 1040: Conservation Studies
A one-week field experience in natural resource management issues—soil and water conservation, air pollution, fish and wildlife habitat requirements, importance of forest ecosystems. Limited to high school students who have completed their junior year and taken the PSAT or equivalent. Graded on S/U basis only.
Credit Hour: 1

NAT_R 1060: Ecology and Conservation of Living Resources
Introduction to the principles of resource and conservation describing the foundation of the variety of living resources and conservation practices used to protect and maintain these resources.
Credit Hours: 3

NAT_R 1070: Ecology and Renewable Resource Management
Introduction to ecological principles and their relationship to resource use and management.
Credit Hours: 3

NAT_R 2002: Topics in Natural Resources - Biological/Physical/Mathematical
Organized study of selected topics. Subjects and credit may vary from semester to semester.
Credit Hour: 1-99

NAT_R 2004: Topics in Natural Resources - Social Science
Organized study of selected topics. Subjects and credit may vary from semester to semester.
Credit Hour: 1-99
NAT_R 2080: Outdoor Recreation Consortium
Outdoor Recreation Consortium is a collaborative course taught by MU, North Carolina State University, Penn State University, East Carolina University, Texas A&M University and Western Illinois University. The course uses Great Smoky Mountains National Park as a case study for understanding the relationship between ecosystem management, natural resource management, tourism, and outdoor recreation. This course is based around a one week trip to the Smokies. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: NAT_R 1070 or P_R_TR 2111 or ENV_SC 1100 and permission of instructor

NAT_R 2160: Issues in Natural Resources and the Environment
This course provides an introduction to ecological and environmental challenges in natural resource management in our rapidly changing world. Topical discussions will provide students with informed perspectives of several contemporary issues that affect the sustainability of our natural resources.

Credit Hours: 3
Recommended: This course is recommended as an introductory course for non-science majors

NAT_R 3001: Topics in Natural Resources
Organized study of selected topics. Subjects may vary from semester to semester.

Credit Hour: 1-99

NAT_R 3110: Natural Resource Biometrics
Sampling methods and analysis as applied to a variety of natural resources, including fisheries, range, recreation, forests, water and wildlife.

Credit Hours: 3
Prerequisites: a course in Statistics or instructor's consent

NAT_R 3220: Public Relations for Natural Resource Managers
Introduction to the practical nature of public relations for those entering natural resources careers, emphasis on communication with target audiences through news media, publications and exhibits.

Credit Hours: 3

NAT_R 3290: Hydrologic Measurement Techniques
Students will be introduced to field methods and tools used by water resource and environmental science professionals. Students will sample and measure hydrologic and environmental variables, learn about data storage systems, and access and analyze data. Course may be repeated for credit. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: MATH 1100 or permission of instructor

NAT_R 4000: Problems in Natural Resources
Problems in Natural Resources

Credit Hour: 1-99

NAT_R 4001: Topics in Natural Resources
Organized study of selected topics. Subjects may vary from semester to semester.

Credit Hour: 1-99

NAT_R 4320: Hydrologic and Water Quality Modeling
(same as ENV_SC 4320). Introduction to models for simulating hydrologic and water quality processes. Emphasis is placed on watersheds to provide experience with the use of simulation models for natural resource decision making.

Credit Hours: 3
Prerequisites: ENV_SC 1100 or SOIL 2100 or equivalent

NAT_R 4325: Introduction to Geographic Information Systems
The course will cover basic theoretical and technical issues in GIS, discuss processing geographic information for research and application, emphasis on the nature of spatial information, data models, input, manipulation and storage, and spatial analytic techniques.

Credit Hours: 3
Prerequisites: NAT_R 1070 or GEOG 2840; NAT_R 1080 and NAT_R 1090; instructor’s consent

NAT_R 4330: Natural Resource Policy/Administration
Principles of policy formation and analysis; relationship of organizational goals to structure, planning and budgeting. Historical background of present natural resource policies; examines current policy issues.

Credit Hours: 3
Prerequisites: senior standing or instructor’s consent

NAT_R 4353: Natural Resource Policy/Administration
Principles of policy formation and analysis; relationship of organizational goals to structure, planning and budgeting. Historical background of present natural resource policies; examines current policy issues.

Credit Hours: 3
Prerequisites: school of Natural Resources majors only, instructor’s consent

NAT_R 4365: GIS Applications
Introduces logical thinking and techniques in applying GIS to practical problems. Covers general GIS functionalities, Arc View Spatial Analyst including georeference, terrain analysis, hydrological analysis, grid, and remote sensing image processing.

Credit Hours: 3
Prerequisites: GEOG 3040, NAT_R 1080 and NAT_R 1090, or instructor’s consent

NAT_R 4385: Landscape Ecology and GIS Analysis I
(same as GEOG 4810). Examination of the landscape-scale approach to biodiversity, ecosystem dynamics, and habitat management. Particular emphasis on the use of Geographic Information Systems to analyze the spatial dimension of ecological patterns and processes.

Credit Hours: 3
Prerequisites: GEOG 3040, or instructor’s consent

NAT_R 4940: Natural Resources Internship
Supervised professional experience with an approved public or private organization. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1-12
Prerequisites: School of Natural Resources majors only, instructor’s consent
NAT_R 4970: Resource Practicum in Natural Resources
Multidisciplinary planning of a natural resource management program.
Credit Hours: 3
Prerequisites: School of Natural Resources majors only; senior standing or instructor's consent

NAT_R 7001: Topics in Natural Resources
Organized study of selected topics. Subjects may vary from semester to semester.
Credit Hour: 1-99

NAT_R 7320: Hydrologic and Water Quality Modeling
(same as ENV_SC 7320). Introduction to models for simulating hydrologic and water quality processes. Emphasis is placed on Missouri watersheds to provide experience with the use of simulation models for natural resource decision making.
Credit Hours: 3
Prerequisites: NAT_R 1080 and NAT_R 1090 and SOIL 2100 or equivalent

NAT_R 7325: Introduction to Geographic Information Systems
The course will cover basic theoretical and technical issues in GIS, discuss processing geographic information for research and application, emphasis on the nature of spatial information, data models, input, manipulation and storage, and spatial analytic techniques.
Credit Hours: 3
Prerequisites: NAT_R 1070 or GEOG 2840; NAT_R 1080 and NAT_R 1090; instructor's consent

NAT_R 7353: Natural Resource Policy/Administration
Principles of policy formation and analysis, relationship of organizational goals to structure, planning and budgeting. Historical background of present natural resource policies; examines current policy issues.
Credit Hours: 3
Prerequisites: instructor's consent

NAT_R 7365: GIS Applications
Introduces logical thinking and techniques in applying GIS to practical problems. Cover general GIS functionalities, Arc View Spatial Analyst including georeference, terrain analysis, hydrological analysis, grid, and remote sensing image processing.
Credit Hours: 3
Prerequisites: GEOF 3040, NAT_R 1080 and NAT_R 1090, or instructor’s consent

NAT_R 7365: Landscape Ecology and GIS Analysis I
(same as GEOF 7810). Examination of the landscape-scale approach to biodiversity, ecosystem dynamics, and habitat management. Particular emphasis on the use of Geographic Information Systems to analyze the spatial dimension of ecological patterns and processes.
Credit Hours: 3
Prerequisites: GEOF 3040, or instructor’s consent

NAT_R 8001: Topics in Natural Resources
Organized study of selected topics. Subjects may vary from semester to semester.
Credit Hour: 1-99

NAT_R 8050: Masters Non-Thesis Research in Natural Resources
Research credits associated with a non-thesis M.S. project. May be repeated for credit. Graded on S/U basis only.
Credit Hour: 1-10
Prerequisites: restricted to Masters students in the School of Natural Resources

NAT_R 8090: Master Thesis Research in Natural Resources
Research credits leading to M.Sc. thesis. May be repeated for credit. Graded on S/U basis only.
Credit Hour: 1-10
Prerequisites: Restricted to Masters students in the School of Natural Resources

NAT_R 8290: Hydrologic Measurement and Synthesis
Students are introduced to methods fundamental to measuring hydrologic processes, and assessing physical data, including field measurement, and data logging and acquisition information systems. Students will gain experience analyzing and synthesizing hydrologic data using tools commonly used by water resource professionals. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: MATH 1100, STAT 2530, PHYSCS 1210. If deficient in prerequisite courses, or unsure of qualification, contact instructor for consent

NAT_R 8395: Landscape Ecology and GIS Analysis II
(same as GEOF 8815). Provide students with principles and applications of landscape ecology and firm understandings of spatial analysis techniques using GIS. Discuss metrics for spatial pattern and models for landscape-scale dynamics.
Credit Hours: 3
Prerequisites: NAT_R 4365; FOREST 4320 or equivalent; basic statistics; instructor’s consent
Recommended: GEOF 4810 or GEOF 7810

NAT_R 8416: Applied Research Methodology
Interrelated roles or logic, observation experiment in scientific method, research components, ethical aspects, scientific publication and communication, and research direction.
Credit Hours: 2
Prerequisites: instructor’s consent

NAT_R 8448: Society and Ecosystems Research Seminar
(same as AG_EC 8448 and RU_SOC 8448). This seminar, capstone for the Graduate Certificate Program in Society and Ecosystems, exposes students to interdisciplinary research on interactions between social, economic and ecological systems.
Credit Hours: 3
NAT_R 9001: Topics in Natural Resources
Organized study of selected topics. Subjects and topics may vary from semester to semester. Graded on S/U basis only.

Credit Hours: 1-10
Prerequisites: instructor’s consent. Restricted to School of Natural Resources Graduate Students

NAT_R 9087: Graduate Seminar in Natural Resources
Graduate seminar in Natural Resources. May be repeated for credit. Graded on S/U basis only. Prerequisites: restricted to PhD students in the School of Natural Resources

Credit Hour: 1-10

NAT_R 9090: Dissertation Research in Natural Resources
Research leading to a dissertation and Ph.D. in the School of Natural Resources. Graded on S/U basis only.

Credit Hour: 1-10
Prerequisites: Restricted to PhD students in the School of Natural Resources

NAT_R 9490: Ecohydrology: Contemporary Topics
A series of discussions centered on primary literature within disciplines relevant to the participants. All Natural Resources disciplines are encouraged to participate (e.g., ecology, wildlife, fisheries, recreation/tourism, hydrology, atmospheric sciences, soils, etc.) with emphasis on interdisciplinary research (i.e. integrated natural, social and/or physical scientific research). May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1

Naval Science (NAVY)

NAVY 1100: Introduction to Naval Science
This course serves as an introduction to the organization of the Naval Service, the varied career opportunities available, the long held customs and traditions of the service, and the duties of a Junior Officer.

Credit Hours: 3

NAVY 1200: Seapower and Maritime Affairs
Seminars examine the application of seapower as an instrument of foreign policy by the major nations of the world. Emphasis placed on role of the Navy.

Credit Hours: 3

NAVY 2110: Naval Ship Systems I
Ship construction, stability and damage control, basic thermodynamics, the steam cycle and engineering plant, including introduction to gas turbine, diesel and nuclear powered systems.

Credit Hours: 3

NAVY 2130: Evolution of Warfare
Evolution of strategy, tactics, weapons and leadership from earliest beginning through the Vietnam period. Development of military policy, the impact of warfare on the political, social and economic structure of nations.

Credit Hours: 3

NAVY 2210: Naval Ship Systems II
Naval weapons systems, their employment and control, including the basic fire control problem, with emphasis on new systems.

Credit Hours: 3

NAVY 3120: Marine Navigation
Theoretical and practical application of the principles of marine navigation. Includes fundamentals of dead reckoning, piloting, tides and current, celestial navigation, electronic navigation.

Credit Hours: 3

NAVY 3130: Amphibious Warfare
History and development of amphibious warfare, principles of amphibious warfare techniques; their application in selected examples from modern.

Credit Hours: 3

NAVY 3140: Leadership and Management
This course will provide a basic understanding of the interrelationship between authority, responsibility and accountability within a task oriented organization. Students will learn to apply leadership and management skills to prioritize competing demands and to attain mission objectives; the importance of planning and follow-up; and develop a basic understanding of communication and counseling as it pertains to personnel management.

Credit Hours: 3
Prerequisites: sophomore standing or by consent of Professor of Naval Science

NAVY 3220: Naval Operations
Principles and concepts of naval operations: rules of the road, command and control in naval operations, communications, ASW warfare, international maritime law, and practical solution of relative motion problems.

Credit Hours: 3

NAVY 4940: Leadership and Ethics
(same as PEA_ST 4940). The curriculum provides a foundation in leadership, ethical decision making, the Law of Armed Conflict and the military justice system. Course explores ethical theories and helps students to build an ethical framework for decision making. Topic areas include: Kant, Utilitarianism, Stoicism, Constitutional Pardigm, Uniform Code of Military Justice and Law of Armed Conflict. Designed as a capstone course for juniors and seniors enrolled in NROTC it is open to all MU students.

Credit Hours: 3
Prerequisites: junior standing required
## Neurology (NEUROL)

**NEUROL 6003: Neurology Clerkship**  
Neurology Clerkship  
*Credit Hour: 2-3*

**NEUROL 6013: Rural Neurology Clerkship**  
Rural Neurology Clerkship  
*Credit Hours: 2*

**NEUROL 6103: Remediation 6003 Neurology Clerkship**  
Neurology Clerkship Remediation.  
*Credit Hours: 2*  
**Prerequisites:** NEUROL 6003 Neurology Clerkship, received unsatisfactory grade

**NEUROL 6301: ABS Neurology Mech of Disease**  
ABS Neurology Mech of Disease  
*Credit Hour: 5-10*

**NEUROL 6303: ABS Neurology Research**  
ABS Neurology Research  
*Credit Hours: 5*

**NEUROL 6305: ABS Neurology Research and Review**  
ABS Neurology Research and Review  
*Credit Hours: 5*

**NEUROL 6755: Adult Neurology - Rural**  
Adult Neurology - Rural  
*Credit Hours: 5*

**NEUROL 6756: Neurology - Rural**  
Rural Neurology general elective.  
*Credit Hours: 5*  
**Prerequisites:** NEUROL 6003. Restricted to fourth year medical students

**NEUROL 6829: PEDIATRIC NEUROLOGY**  
Pediatric Neurology  
*Credit Hours: 5*

**NEUROL 6845: Neurology**  
Neurology  
*Credit Hours: 5*

**NEUROL 6850: Advanced Neurology**  
Advanced Neurology  
*Credit Hours: 5*

### Nuclear Engineering (NU_ENG)

**NU_ENG 2201: Topics in Nuclear Engineering**  
Current and new developments in nuclear engineering.  
*Credit Hours: 3*  
**Prerequisites:** sophomore standing; PHYSCS 1210 and PHYSCS 1220 and MATH 1100 or MATH 1120 or instructor’s consent

**NU_ENG 2303: Harnessing the Atoms in Everyday Life: Fulfill M Curie’s Dream**  
Introduction to applications of nuclear science and technology, utilizing web-based learning scenarios.  
*Credit Hours: 3*

**NU_ENG 4001: Topics in Nuclear Engineering**  
Current and new developments in nuclear engineering. May be repeated for credit.  
*Credit Hour: 2-5*  
**Prerequisites:** instructor’s consent

**NU_ENG 4302: Safe Handling of Radioisotopes**  
Introduction of methods and procedures for safe handling of radioisotopes in the research laboratory. Intensive lecture and laboratory training sessions designed for persons planning to use radioisotopes at the University.  
*Credit Hour: 1*  
**Prerequisites:** instructor’s consent

**NU_ENG 4303: Radiation Safety**  
(same as RA_SCI 4303) Types and origins of radiation; radiation detection and measurement; radiation interactions; shielding; dose calculations; federal, state and local regulations; and procedures for safe uses of radiation. Laboratory experiments in radiation measurements and protection.  
*Credit Hours: 3*  
**Prerequisites:** college physics, calculus based

**NU_ENG 4305: Survey of Nuclear Engineering**  
Introductory topics in nuclear engineering. Atomic and nuclear physics; nuclear reactor principles under steady-state and transient conditions; heat removal; shielding; instrumentation; power generation; fusion.  
*Credit Hours: 3*  
**Prerequisites:** concurrent with MATH 4100

**NU_ENG 4306: Advanced Engineering Math**  
(same as CH_ENG 4306; cross-leveled with NU_ENG 7306). Applies ordinary and partial differential equations to engineering problems; Fourier’s series; determinants and matrices; Laplace transforms; analog computer techniques.  
*Credit Hours: 3*  
**Prerequisites:** MATH 4100
NU_ENG 4315: Energy Systems and Resources
(same as ECE 4020). Analysis of present energy usage in Missouri, USA and the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies.
Credit Hours: 3
Prerequisites: ENGINR 2300 or equivalent

NU_ENG 4319: Physics and Chemistry of Materials
(same as PHYCS 4190, BIOL_EN 4480 and CHEM 4490). Undergraduate/graduate level course offered every winter semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid term and one final exam. Graduate students will submit a term paper.
Credit Hours: 3
Prerequisites: PHYSCS 2760 and CHEM 1320 or equivalent and instructor’s consent

NU_ENG 4320: Natural Resources and Nuclear Energy
Not for engineering students. Lecture, demonstration; describes physical environment, energy, power plants, nuclear reactors; radioactivity, its biological effects; health physics measures, rad-waste disposal; nuclear safeguards, nuclear explosives, societal implications.
Credit Hours: 3
Prerequisites: high school algebra

NU_ENG 4328: Introductory Radiation Biology
(same as BIO_SC 4328, RADIOL 4328, and V_M_S 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.
Credit Hours: 3
Prerequisites: junior standing, Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor’s consent

NU_ENG 4330: Science and Technology of Terrorism and Counter Terrorism
(same as PEA_ST 4330). Terrorism has been a familiar tool of political conflict, and it has assumed greater importance during the past twenty years. This subject has been treated by political scientists in various forms, but the scientific and technological aspects of different forms of terrorism cannot be found in a single place. It is important for persons who propose counter measures to understand the basics of different types of terrorism such as for instance the nature of chemical agents, their properties such as toxicity, etc. in order to build better defense systems.
Credit Hours: 3

NU_ENG 4331: Nonproliferation Issues for Weapons of Mass Destruction
Nonproliferation and impact on technology and world events.
Credit Hours: 3
Prerequisites: junior/senior standing or instructor’s consent. May be repeated for credit

NU_ENG 4341: Nuclear Chemical Engineering
Principles and processes of importance in the field of nuclear technology.
Credit Hours: 3

NU_ENG 4346: Introduction to Nuclear Reactor Engineering I
(same as ECE 4030). Engineering principles of nuclear power systems, primarily for the production of electrical energy.
Credit Hours: 3
Prerequisites: ENGINR 1200, ENGINR 2300 or equivalent

NU_ENG 4349: Nuclear Engineering Materials
Properties of materials for reactor components; radiation damage and corrosion; metallurgy of reactor materials.
Credit Hours: 3
Prerequisites: upper division or graduate standing in Physical Sciences or Engineering, or instructor’s consent

NU_ENG 4350: Nuclear Forensic Analysis
Credit Hours: 3
Prerequisites: senior standing or instructor’s consent

NU_ENG 4353: Introduction to Fusion
Basic plasma physics, principles of thermonuclear fusion, plasma confinement and heating, and devices.
Credit Hours: 3
Prerequisites: senior standing in Engineering or Science or instructor’s consent

NU_ENG 4357: Nuclear Heat Transport
Credit Hours: 2
Prerequisites: NU_ENG 4050, NU_ENG 4346 or instructor’s consent

NU_ENG 4365: Nuclear Power Engineering
Nuclear reactor heat generation and removal; nuclear reactor coolants; analysis of nuclear reactor power plants.
Credit Hours: 3
Prerequisites: ENGINR 2300

NU_ENG 4369: Principles of Direct Energy Conversion
Principles and utilization of thermoelectric, thermionic, photovoltaic, magnetohydrodynamic generators and fuel cells.
Credit Hours: 3
Prerequisites: ENGINR 2300, MAE 3400, or equivalent
NU_ENG 4375: Introduction to Plasmas
(same as ECE 4550). Equations of plasma physics, interaction of waves and plasmas; plasma sheaths and oscillations; measurements and applications.

Credit Hours: 3
Prerequisites: ECE 4930 or instructor’s consent

NU_ENG 4379: Particulate Systems Engineering
An introduction to natural and engineered particulate systems.

Credit Hours: 3
Prerequisites: CH_ENG 3234 or MAE 4300 or equivalent

NU_ENG 4382: Lasers and Their Applications
(same as ECE 4570). Introduction to lasers, from both a conceptual viewpoint and from the application of Maxwell’s equation, to develop the optical theory for lasers.

Credit Hours: 3
Prerequisites: PHYSICS 2760, and MATH 4100

NU_ENG 4391: Nuclear Radiation Detection
(same as CHEM 4600). Principles and application of radiation detectors and analyzers: ionization, Geiger-Muller, proportional, liquid and solid scintillation, semiconductor, pulse height analyzers, coincidence circuits, data reduction, tracer applications, activation analysis. Lectures, laboratory.

Credit Hours: 3
Prerequisites: senior standing or instructor’s consent

NU_ENG 7001: Topics in Nuclear Science and Engineering
Current and new developments in nuclear engineering.

Credit Hour: 2-5
Prerequisites: instructor’s consent

NU_ENG 7080: Medical Ethics for Medical Physics
This course will start with an introduction into medical ethics then transitions into research procedures with humans and animals. This course will cover research ethics, professional conduct, authorship, publishing, and plagiarism.

Credit Hour: 1

NU_ENG 7085: Special Problems in Nuclear Science and Engineering
Special Problems in Nuclear Science and Engineering.

Credit Hour: 1-5

NU_ENG 7087: Seminar in Nuclear Science and Engineering
Reviews of investigations and projects of importance in nuclear engineering.

Credit Hour: 1

NU_ENG 7302: Safe Handling of Radioisotopes
Introduction of methods and procedures for safe handling of radioisotopes in the research laboratory. Intensive lecture and laboratory training sessions designed for persons planning to use radioisotopes at the University.

Credit Hour: 1
Prerequisites: instructor’s consent

NU_ENG 7303: Radiation Safety
(same as RA_SCI 7303). Types and origins of radiation; radiation detection and measurement; radiation interactions; shielding; dose calculations; federal, state and local regulations; and procedures for safe uses of radiation. Laboratory experiments in radiation measurements and protection.

Credit Hours: 3
Prerequisites: college physics, calculus based

NU_ENG 7305: Survey of Nuclear Engineering
Introductory topics in nuclear engineering. Atomic and nuclear physics; nuclear reactor principles under steady-state and transient conditions; heat removal; shielding; instrumentation; power generation; fusion.

Credit Hours: 3
Prerequisites: concurrent with MATH 4100

NU_ENG 7306: Advanced Engineering Math
(cross-leveled with NU_ENG 7306). Applies ordinary and partial differential equations to engineering problems; Fourier’s series; determinants and matrices; Laplace transforms; analog computer techniques.

Credit Hours: 3
Prerequisites: MATH 4100

NU_ENG 7313: Nuclear Science for Engineering for Secondary Science Teachers
This one-week course is for high school science and math teachers, and provides basic of nuclear scheme concepts and their applications, types of radiation (including radiation detection and protection), and industrial, medical and nuclear power generation application.

Credit Hours: 3
Prerequisites: instructor’s consent; actively engaged in STEM teaching at the secondary level

NU_ENG 7315: Energy Systems and Resources
(same as ECE 7020). Analysis of present energy usage in Missouri, USA and the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies.

Credit Hours: 3
Prerequisites: ENGINR 2300 or equivalent

NU_ENG 7319: Physics and Chemistry of Materials
(same as PHYSCS 7190, BIOL_EN 7480 and CHEM 7490). Undergraduate/graduate level course offered every winter semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures or laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper.

Credit Hours: 3
Prerequisites: PHYSCS 2760 and CHEM 1320 or equivalent and instructor’s consent

NU_ENG 7320: Natural Resources and Nuclear Energy
Not for engineering students. Lecture, demonstration; describes physical environment, energy, power plants, nuclear reactors; radioactivity, its biological effects; health physics measures, rad-waste disposal; nuclear safeguards, nuclear explosives, societal implications.
Credit Hours: 3
Prerequisites: high school algebra

NU_ENG 7328: Introductory Radiation Biology
(same as BIO_SC 7328, RADIOL 7328, and V_M_S 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.
Credit Hours: 3
Prerequisites: Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor’s consent

NU_ENG 7330: Science and Technology of Terrorism and Counter Terrorism
Terrorism has been a familiar tool of political conflict, and it has assumed greater importance during the past twenty years. This subject has been treated by political scientists in various forms, but the scientific and technological aspects of different forms of terrorism cannot be found in a single place. It is important for persons who propose counter measures to understand the basics of different types of terrorism such as for instance the nature of chemical agents, their properties such as toxicity, etc. in order to build better defense systems.
Credit Hours: 3

NU_ENG 7331: Nonproliferation Issues for Weapons of Mass Destruction
Nonproliferation and impact on technology and world events.
Credit Hours: 3
Prerequisites: junior or senior standing or instructor’s consent

NU_ENG 7335: Nuclear Safeguards Science and Technology
(same as ECE 7335). This course provides an overview of nuclear materials management and safeguards, including physical protection issues, material accounting and control, monitoring, and regulatory issues.
Credit Hours: 3
Prerequisites: NU_ENG 4303 or NU_ENG 7303

NU_ENG 7341: Nuclear Chemical Engineering
Principles and processes of importance in the field of nuclear technology.
Credit Hours: 3

NU_ENG 7346: Introduction to Nuclear Reactor Engineering I
(same as ECE 7030). Engineering principles of nuclear power systems, primarily for the production of electrical energy.
Credit Hours: 3
Prerequisites: ENGINR 1200, ENGINR 2300 or equivalent

NU_ENG 7349: Nuclear Engineering Materials
Properties of materials for reactor components; radiation damage and corrosion; metallurgy of reactor materials.
Credit Hours: 3
Prerequisites: upper division or graduate standing in Physical Sciences or Engineering, or instructor’s consent

NU_ENG 7350: Nuclear Forensic Analysis
Credit Hours: 3
Prerequisites: NU_ENG 7303, instructor’s consent

NU_ENG 7353: Introduction to Fusion
Basic plasma physics, principles of thermonuclear fusion, plasma confinement and heating, and devices.
Credit Hours: 3
Prerequisites: NU_ENG 4305, NU_ENG 4346 or instructor’s consent

NU_ENG 7357: Nuclear Heat Transport
Credit Hours: 3
Prerequisites: NU_ENG 4305, NU_ENG 4346 or instructor’s consent

NU_ENG 7365: Nuclear Power Engineering
Nuclear reactor heat generation and removal; nuclear reactor coolants; analysis of nuclear reactor power plants.
Credit Hours: 3
Prerequisites: ENGINR 2300

NU_ENG 7369: Principles of Direct Energy Conversion
Principles and utilization of thermoelectric, thermonic, photovoltaic, magnetohydrodynamic generators and fuel cells.
Credit Hours: 3
Prerequisites: ENGINR 2300, MAE 3400, or equivalent

NU_ENG 7375: Introduction to Plasmas
(same as ECE 7550). Equations of plasma physics, interaction of waves and plasmas; plasma sheaths and oscillations; measurements and applications.
Credit Hours: 3
Prerequisites: ECE 4930 or instructor’s consent

NU_ENG 7379: Particulate Systems Engineering
An introduction to natural and engineered particulate systems.
Credit Hours: 3
Prerequisites: CH_ENG 3234 or MAE 4300 or equivalent

</thead>
<tbody>
<tr>
<td>NU_ENG 7382</td>
<td>Lasers and Their Applications (same as ECE 7570)</td>
<td>An introductory course in lasers. The course treats the subject from both a conceptual viewpoint and from the application of Maxwell's equations, to develop the optical theory for lasers. The course includes approximately 10 class-room hours of laboratory work with lasers.</td>
<td>3</td>
<td>PHYSCS 2760 and MATH 4100</td>
</tr>
<tr>
<td>NU_ENG 7391</td>
<td>Nuclear Radiation Detection</td>
<td>Principles and application of radiation detectors and analyzers: ionization, Geiger-Muller, proportional, liquid and solid scintillation, semiconductor, pulse height analyzers, coincidence circuits, data reduction, tracer applications, activation analysis. Lectures, laboratory.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>NU_ENG 7422</td>
<td>Radiation Shielding</td>
<td>Fundamentals of radiation interactions stressing neutron and gamma radiation transport; ray theory, removal theory, multi-group transport shield design principles.</td>
<td>3</td>
<td>NU_ENG 8409 or instructor's consent</td>
</tr>
<tr>
<td>NU_ENG 7470</td>
<td>Fast Reactor Analysis</td>
<td>Analytical methods for designing fast breeder reactor systems. Graded on a S/U basis only.</td>
<td>3</td>
<td>NU_ENG 8412, NU_ENG 8432, NU_ENG 8451 or instructor's consent</td>
</tr>
<tr>
<td>NU_ENG 8001</td>
<td>Advanced Topics in Nuclear Science and Engineering</td>
<td>Advanced developments in nuclear engineering.</td>
<td>3</td>
<td>instructor's consent</td>
</tr>
<tr>
<td>NU_ENG 8085</td>
<td>Problems in Nuclear Science and Engineering</td>
<td>Supervised investigation in nuclear engineering to be presented in the form of a report.</td>
<td>1-6</td>
<td></td>
</tr>
<tr>
<td>NU_ENG 8090</td>
<td>Research in Nuclear Science and Engineering</td>
<td>Independent investigation in nuclear engineering to be presented as a thesis. Graded on an S/U basis only.</td>
<td>1-99</td>
<td></td>
</tr>
<tr>
<td>NU_ENG 8402</td>
<td>Nuclear Fuel Cycle</td>
<td>Covers the nuclear fuel cycle from mine through enrichment, fuel element burn-up reactor physics, chemical reprocessing, waste disposal, with special emphasis on the newer proliferation-resistant fuel cycles.</td>
<td>3</td>
<td>NU_ENG 4346 or NU_ENG 4305 and instructor's consent</td>
</tr>
<tr>
<td>NU_ENG 8403</td>
<td>Applied Topics in Medical Physics and Health Physics</td>
<td>Directed observations and experience in scientific aspects of daily operations in nuclear medicine, diagnostic radiology, radiotherapy and health physics.</td>
<td>1-6</td>
<td>departmental consent</td>
</tr>
<tr>
<td>NU_ENG 8404</td>
<td>Nuclear Reactor Laboratory I</td>
<td>Application of reactor physics principals to operation of and experiments with the University of Missouri Research Reactor. Neutron activation analysis, instrumentation, reactivity evaluation.</td>
<td>3</td>
<td>NU_ENG 4346 or NU_ENG 8411</td>
</tr>
<tr>
<td>NU_ENG 8405</td>
<td>Nuclear Reactor Laboratory II</td>
<td>Advanced experiments to measure diffusion length, Fermi age, material buckling, transfer function, neutron spectrum and other reactor characteristics. Reactor simulation with an analog computer.</td>
<td>3</td>
<td>NU_ENG 8411 or instructor's consent</td>
</tr>
<tr>
<td>NU_ENG 8406</td>
<td>Clinical and Research Application in Medical and Health Physics</td>
<td>To give students an understanding of the range of clinical practice and medical research involving the practice and nuclear physics/engineering.</td>
<td>1</td>
<td>NU_ENG 4309 and NU_ENG 4303, college calculus or equivalent and calculus based physics</td>
</tr>
<tr>
<td>NU_ENG 8408</td>
<td>State Variable Methods in Automatic Control (same as CH_ENG 8780, ECE 8780, and MAE 8780)</td>
<td>State variables for continuous and discrete-time dynamic control systems; controllability and observability; optimal control of linear systems.</td>
<td>3</td>
<td>CH_ENG 4370, ECE 4310, MAE 4730 or instructor's consent</td>
</tr>
<tr>
<td>NU_ENG 8409</td>
<td>Interaction of Radiation with Matter</td>
<td>Theory/applications of radiation interaction processes. Reviews nuclear physics concepts; radioactive decay; sources/ spectra of ionizing radiation; collision mechanisms for charged particles, electromagnetic radiation, neutrons for interaction with matter.</td>
<td>3</td>
<td>Entrance requirements</td>
</tr>
<tr>
<td>NU_ENG 8411</td>
<td>Nuclear Reactor Theory I</td>
<td>Nuclear reactions; nuclear fission; introduces neutron transport; diffusion and slowing down of neutrons; steady-state homogeneous and heterogeneous reactor theory.</td>
<td>3</td>
<td>instructor's consent</td>
</tr>
</tbody>
</table>
NU_ENG 8412: Nuclear Reactor Theory II
Linear and non-linear reactor kinetics; perturbation theory; temperature and fission product effects; control rod theory; transport theory.
Credit Hours: 3
Prerequisites: NU_ENG 8411 or NU_ENG 4346

NU_ENG 8421: Advanced Radiation Detection Electronics
Principles of radiation pulse analysis with emphasis on applications. Radiation detection devices; amplifying, shaping and discrimination circuits; nuclear pulse analysis; automated data analysis systems. Lectures and lab.
Credit Hours: 3
Prerequisites: NU_ENG 4346, NU_ENG 4391 or instructor's consent

NU_ENG 8422: Radiation Shielding
Fundamentals of radiation interactions stressing neutron and gamma radiation transport; ray theory, removal theory, multi-group transport shield design principles.
Credit Hours: 3
Prerequisites: NU_ENG 8409 or instructor's consent

NU_ENG 8429: Radiation Dosimetry
Basis and applications of conventional and microscopic radiation dosimetry. Dose concepts and quantities; biological dose-response models; dose measurement principles; photon, charged particle, and neutron dosimetry.
Credit Hours: 3
Prerequisites: NU_ENG 8409
Recommended: NU_ENG 4328

NU_ENG 8432: Nuclear Thermal Hydraulics and Safety
Engineering topics from reactor heat transfer and thermal stresses, fuel cycle analysis, power plant thermodynamics, shielding, and reactor safety analysis.
Credit Hours: 3
Prerequisites: NU_ENG 8411 or NU_ENG 4346, or instructor's consent

NU_ENG 8434: Fracture Mechanics I
(same as MAE 8220). Mechanics of flawed structure. Concepts include Griffith theory, Barenblatt's theory, Irwin analysis, energy analysis of cracked bodies, fracture toughness testing, plane strain, plane stress, transition temperature concepts, subcritical flaw growth.
Credit Hours: 3
Prerequisites: MAE 3200 or instructor's consent

NU_ENG 8435: Physics of Diagnostic Radiology
Principles and applications of X-ray production and interactions. Images production concepts including X-ray film, intensifying screens, grids, fluoroscopy, image intensification and television monitors. Image quality analysis and assessment.
Credit Hours: 3
Prerequisites: NU_ENG 8409 or equivalent or instructor's consent

NU_ENG 8439: Clinical Physics in Radiotherapy
Principles and applications of radiation producing units, exposure and dose measurements, and calibration. External beam physics parameters and application to fixed field and rotational field treatment planning.
Credit Hours: 3
Prerequisites: NU_ENG 8409 or equivalent or instructor's consent

NU_ENG 8444: Fracture and Fatigue Prevention in Engineering Practice
Practical design problems. Introduction to retrofit design, maintenance, product improvement and new design from a fatigue and fracture prevention philosophy. Fail safe and safe life designs are presented.
Credit Hours: 3
Prerequisites: NU_ENG 8434

NU_ENG 8450: Superconductivity and Its Applications
(same as ECE 8020). Phenomenology and theory of superconductivity; cryogenic practice; metallurgy of superconducting elements, alloys and compounds. Applications, present and prospective. Graded on an S/U basis only.
Credit Hours: 3

NU_ENG 8451: Computational Methods of Reactor Analysis
Applies numerical analysis and digital computation to topics from multi-group diffusion theory, transport theory, reactor kinetics, reactor thermal hydraulics, radiation shielding, reactor safety.
Credit Hours: 3
Prerequisites: NU_ENG 8411 and MATH 4300

NU_ENG 8452: Ultrasound and Magnetic Resonance Imaging
The physical principles of MRI and ultrasound including clinical instrumentation, artifacts in images, biological effects and quality control. Images obtained with both techniques will be presented.
Credit Hours: 3
Prerequisites: NU_ENG 4391, NU_ENG 8409, NU_ENG 4306 or equivalent

NU_ENG 8453: Advanced Fusion Theory
Plasma stability theory, charged particle diffusion, slowing down of charged particles, interaction of radiation with matter, direct energy conversion using charged particles, and engineering considerations.
Credit Hours: 3
Prerequisites: NU_ENG 4353 and NU_ENG 4375 or PHYSCS 8450 or instructor's consent

NU_ENG 8454: Clinical Physics of Nuclear Medicine
Physical principles, statistics of radionuclide decay and highlights into the most current instrumentation to utilize invivo radionuclides for both diagnostic imaging and therapy. Also includes brachy therapy.
Credit Hours: 3
Prerequisites: NU_ENG 4306, NU_ENG 8409 or equivalent
NU_ENG 8455: Growth, Characterization and Appl. of Diamond and Related Materials
This course explores the development of diamond films. Discussion of other wide band-gap materials are covered. Topics include Chemistry of Diamond Growth, Thermodynamics, Nucleation, Methods of Growth, Methods of Impurity Control, Characterization and Modification, Doping, and Applications.
Credit Hours: 3

NU_ENG 8461: Neutron Transport Theory
The Boltzmann equation; general properties and solution; numerical methods of solving the transport equation; neutron thermalization and neutron spectra.
Credit Hours: 3
Prerequisites: NU_ENG 8412; MATH 4940, MATH 4300, or instructor’s consent

NU_ENG 8470: Fast Reactor Analysis
Analytical methods for designing fast breeder reactor systems. Graded on a S/U basis only.
Credit Hours: 3
Prerequisites: NU_ENG 8412, NU_ENG 8432, NU_ENG 8451 or instructor’s consent

NU_ENG 8471: Radiation Protection
Theory and applications of radiation protection and health physics. Radiation dosimetry methods and calculations, shielding evaluations, equipment surveys and inspection, environmental monitoring, radiation standards and regulations and administration presented.
Credit Hours: 3
Prerequisites: NU_ENG 4303 and NU_ENG 4328

NU_ENG 9090: Research in Nuclear Science and Engineering
Independent investigation in nuclear engineering to be presented as a thesis. Graded on an S/U basis only.
Credit Hour: 1-99

Nuclear Medicine (NUCMED)

NUCMED 1000: Orientation to Nuclear Medicine
An overview using a series of short rotations through local nuclear medicine departments and a self-directed review of a current text. Clinical rotations for this course are arranged on an individual basis. Graded on S/U basis only.
Credit Hour: 1

NUCMED 3255: Orientation to Clinical Practice
This course provides an introductory experience to clinical practice. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: Must be accepted into Nuclear Medicine Program, restricted to Radiologic Sciences students, junior standing required

NUCMED 3256: Clinical Nuclear Medicine I
Introductory clinical course for senior level students. Introduces instrumentation, administration, procedures, and laboratory techniques. Includes supervised clinical participation.
Credit Hours: 2
Prerequisites: NUCMED 3263 and restricted to Radiologic Sciences students only

NUCMED 3263: Morphological Correlations in Nuclear Medicine I
Anatomy, physiology, and pathology of the human body as assessed using medicine techniques. The first of two courses that address current clinical applications of nuclear medicine.
Credit Hours: 3
Prerequisites: NU_ENG 4303; restricted to Radiologic Sciences students only

NUCMED 3268: Clinical Nuclear Medicine II
Continuation of clinical series taught in conjunction with NUCMED 3256 and NUCMED 4232. Addresses advanced therapeutic and diagnostic procedures, computer applications, and quality assurance procedures.
Credit Hours: 3
Prerequisites: NUCMED 3256. Restricted to Radiologic Science students only

NUCMED 4269: Clinical Nuclear Medicine III
Final course in clinical series. Seminar discussion of the areas of professional ethics, current medical-legal considerations, and future nuclear medicine applications.
Credit Hour: 1
Prerequisites: NUCMED 3256. Restricted to Radiologic Science students only

NUCMED 4232: Clinical In Vitro
Detailed review of current regulations and procedures governing the use of open sources of radioactivity in a nuclear medicine setting.
Credit Hours: 3
Prerequisites: Restricted to Radiologic Sciences students only
NUCMED 4299: Morphological Correlations in Nuclear Medicine II
Anatomy, physiology, and pathology of the human body as assessed using nuclear medicine techniques. The second of two courses that address current clinical applications of nuclear medicine.

Credit Hours: 3
Prerequisites: NUCMED 3263, restricted to Radiologic Sciences students

NUCMED 4327: Nuclear Medicine Instrumentation
Radionuclide imaging systems and the use of computers. Topics include Anger camera systems, emission tomography, ultrasound, nuclear magnetic resonance, and bone absorptionmetry.

Credit Hours: 3
Prerequisites: PHYSCS 1220 and MATH 1400, restricted to Radiologic Sciences students

NUCMED 4329: Radiopharmaceuticals in Nuclear Medicine
Introduces concepts of radiopharmacy, generator systems, labeling of materials, quality control procedures and FDA regulations concerning radiopharmaceuticals.

Credit Hours: 3
Prerequisites: CHEM 1320 and instructor’s consent

NUCMED 4330: PET in Nuclear Medicine
Overview of special isotope production techniques for positron emitting agents; instrumentation concerns beyond standard Anger imaging; and image critique and analysis with morphologic correlation. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PHYSCS 1210 and NUCMED 4327 or instructor’s consent

Nursing (NURSE)

NURSE 1000: Advisory Seminar for Nursing
Orientation to the undergraduate nursing program, professional role development, and introduction to the professional milieu. Graded on an S/U basis only.

Credit Hour: 1

NURSE 2000: Nursing as a Profession
Introduces the structure of nursing knowledge and explores professional nursing role characteristics from historical, ethical, legal, economic, professional, occupational and social perspectives. Examines nursing as subsystem of the health care system.

Credit Hours: 3
Prerequisites: sophomore standing. Restricted to pre-nursing majors with a GPA of 2.8 or higher

NURSE 2100: Psychosocial and Communication Issues in Nursing
Reviews psychosocial and communication issues. Focuses on improving interpersonal communication skills and learning how to provide therapeutic interventions to people with selected mental health issues. An experiential model emphasizes personal skill development strategies.

Credit Hour: 2-3
Prerequisites: Sophomore Standing. Restricted to pre-nursing majors only

NURSE 2100H: Psychosocial and Communication Issues in Nursing - Honors
Reviews psychosocial and communication issues. Focuses on improving interpersonal communication skills and learning how to provide therapeutic interventions to people with selected mental health issues. An experiential model emphasizes personal skill development strategies.

Credit Hour: 2-3
Prerequisites: Sophomore Standing. Restricted to pre-nursing majors only. Honors eligibility required

NURSE 3002: Topics in Nursing - Biological, Physical, Mathematical
Specialized topics in nursing not available through regularly offered courses. Sections may be offered either on S/U or A-F basis.

Credit Hour: 1-4

<td>NURSE 3260, NURSE 3270, admission to accelerated BSN option</td>
</tr>
</tbody>
</table>
NURSE 3870: Gerontological Nursing Care
Emphasis on normal aging processes, health promotion, disease prevention, and management of acute and chronic health problems in the older adult.

Credit Hours: 3  
Prerequisites: NURSE 3270

NURSE 3900: Introduction to Nursing Science
Introduces nursing as a science from the perspective of knowledge development. Structures nursing knowledge from a self-care deficit nursing theory perspective. Presents nursing research as a method of knowledge development and validation.

Credit Hours: 3  
Prerequisites or Corequisites: Statistics. Must be a clinical nursing major

NURSE 4200: Nursing Ethics and Law
Analyzes clinical nursing situations using ethical principles and decision-making models. Examines the basic doctrines and principles foundational for providing legally sound nursing practice.

Credit Hour: 3-4  
Prerequisites or Corequisites: NURSE 3080  
Prerequisites: Senior Clinical Major

NURSE 4201: Legal Concepts in Nursing
This course examines fundamental legal guidelines for professional nursing practice using content gleaned from nursing and medicine. The student will analyze and apply legal principles pertaining to nursing practice. Enrollment requires a prerequisite of a medical ethics, healthcare ethics or a bioethics course which is subject to instructor approval. Graded on A-F basis only.

Credit Hour: 1  
Prerequisites: PHIL 2440 or PHIL 1150 or HLTH_SCI 4480

NURSE 4270: Nursing of Children
Nursing of children with acute and chronic health and developmental deviations. Self-care and dependent care abilities are emphasized. Content includes health promotion for infants and children.

Credit Hours: 5  
Prerequisites: NURSE 3670 and NURSE 4470

NURSE 4300: Nursing Issues/Leadership and Management
Examines leadership and organizational theories in relation to resource management and effective delivery of nursing to sets of clients. Analyzes societal/political issues and trends related to nursing and contemporary health care.

Credit Hours: 2  
Prerequisites or Corequisites: NURSE 3670 or NURSE 3180 or instructor’s consent

NURSE 4380: Health Assessment and Pathophysiology
Examines biologic basis for selected commonly occurring diseases throughout the life-span. Study and performance of health assessments with application of findings to adults and children.

Credit Hours: 4

NURSE 4400: Nursing Leadership and Management
Examines leadership, management, and organizational theories in relation to resource management and effective delivery of nursing to sets of clients. Analyzes societal and political issues and trends related to nursing and contemporary health care. Graded on A-F basis only.  
Prerequisites: NURSE 3080;

Credit Hours: 2  
Prerequisites or Corequisites: NURSE 3180

NURSE 4470: Nursing of Women and Newborns
Focuses on newborn care, women’s reproductive and postreproductive health, and health deviation concerns of women and newborns. Emphasizes development, implementation, and evaluation of nursing systems for families and their members.

Credit Hours: 5  
Prerequisites: NURSE 3270

NURSE 4600: Women’s Health
A survey of international and domestic women’s health issues; considers historical antecedents and specific effects of socio-cultural variables and economic development on women’s health in developing and developed nations.

Credit Hours: 3

NURSE 4870: Nursing of Adults II
Application of nursing process to care for adults with acute physiological health deviations. Leadership and management principles are integrated in delivering care for sets of clients.

Credit Hours: 7  
Prerequisites or Corequisites: NURSE 4300  
Prerequisites: NURSE 4270, NURSE 3470

NURSE 4875: Principles of Public Health Nursing: Population-Based Practice
Focuses on population-based concepts of public health nursing and application to practice through completion of a major project. Designed for practicing public health nurses employed in local public health agencies in Missouri. Course may be repeated for credit. Graded on A-F basis only.

Credit Hours: 4  
Prerequisites: RN license and employed in Public Health in Missouri

NURSE 4930: Evidence-Based Nursing Practice
Concepts of evidence-based nursing practice are applied to clinical nursing questions, emphasizing use of research findings in practice settings to generate best nursing practices and optimal patient care outcomes.

Credit Hours: 5  
Prerequisites: NURSE 4950
NURSE 4950: Nursing Theory and Research
Addresses nursing research as means of acquiring and refining knowledge. Research utilization to impact nursing addressed. Examines development and utilization of nursing theory, primarily Self-Care Deficit Nursing Theory.

Credit Hours: 3
Prerequisites or Corequisites: NURSE 3080

NURSE 4970: Nursing in Communities
Examines roles and functions of nurses within community with emphasis on application of community/public health concepts and design and implementation of nursing systems of care for individuals, families, and populations.

Credit Hour: 4-5
Prerequisites: NURSE 4270 and NURSE 3470; or NURSE 3760 or NURSE 4930

NURSE 4975: The Capstone Experience
Community project-based course that integrates and applies principles previously learned in the RN-BSN curriculum. Open to students who have previously completed Nursing 4875. Course may be repeated for credit. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: NURSE 4875; RN license and employed in Public Health in Missouri

NURSE 7001: Special Topics in Nursing
Specialized topics in advanced nursing not available through regularly offered courses.

Credit Hour: 1-3

NURSE 7005: Problems in Nursing
Guided readings, special study, and/or a practicum in an area of the student’s interest or an area which the student needs to strengthen.

Credit Hour: 1-3
Prerequisites: instructor’s consent

NURSE 7087: Leadership and Technology Institute
Introduction to knowledge and skills essential to support research and practice doctorates. May be repeated for credit.

Credit Hour: 1
Prerequisites: Admission to DNP or PhD program

NURSE 7100: Theoretical Basis for Advanced Nursing
Analysis, application and evaluation of a variety of nursing and non nursing theories used in advanced nursing practice and research.

Credit Hours: 3

NURSE 7110: Advanced Nursing Role Acquisition
An overview of the advanced nursing practice role and professional issues. Provides foundational knowledge on which other advanced nursing courses will build.

Credit Hours: 3
Prerequisites: Admission to the graduate program or faculty consent

NURSE 7111: Trends and Issues in Nursing
Issues and trends involving professional nursing practice are examined from socioeconomic, organizational, legal and ethical perspectives. Past, present and future roles and practice of nurses are examined.

Credit Hours: 3

NURSE 7120: Advanced Physiology and Pathophysiology
Focus on the normal and altered physiological functioning of body systems. Provides essential knowledge of human health and disease across the lifespan necessary for advanced nursing practice.

Credit Hours: 3

NURSE 7130: Advanced Pharmacology and Pharmacotherapeutics
Advanced practice nurse drug therapy management for health maintenance and treatment of acute episodic and chronic health problems in various populations over the life span.

Credit Hours: 3
Prerequisites: BSN or instructor’s consent

NURSE 7140: Advanced Health Assessment and Promotion
Expands history and physical assessment techniques across lifespan. Addresses diagnostic reasoning, differential diagnosis, selection of common diagnostic test, disease risk factors, and health promotion strategies.

Credit Hours: 3.5
Prerequisites: BSN or instructor’s consent

NURSE 7150: Research Basis for Advanced Nursing
Examines fundamentals of scientific inquiry. Addresses research design issues. Focuses on interpreting, critiquing, and synthesizing research findings.

Credit Hours: 3
Prerequisites: NURSE 7100

NURSE 7160: Stress Management

Credit Hours: 3

NURSE 7170: Legal Parameters of Nursing
This course provides the basic doctrines and principles of the law foundational to legally sound nursing practice. Included among significant topics are tort law, nurse practice act, licensure, effect of contract law.

Credit Hours: 3

NURSE 7180: Advanced Health Assessment for Pediatric Nursing Practice
Comprehensive assessment of children through adolescence including those with significant health and/or developmental deviations using advanced diagnostic reasoning process. Emphasis on health history, cultural diversity, differentiation, interpretation and documentation of findings.

Credit Hours: 3
NURSE 7330: Pediatric Pharmacology for Advanced Nursing Practice
Clinical pharmacotherapeutics course that builds on prior pharmacology knowledge. Major focus is pharmacotherapeutics for primary care management of children to age eighteen. Emphasis on clinical critical thinking used to prescribe drugs.
Credit Hours: 3

NURSE 7600: Women’s Health
A survey of international and domestic women’s health issues; considers historical antecedents and specific effects of socio-cultural variables and economic development on women’s health in developing and developed nations.
Credit Hours: 3

NURSE 7750: Physical Function and Older Adults
(Same as F_C_MD 7750, ARCHST 7640, HMI 7750, H_D_FS 7750, P_HLTH 7750, and SOC_WK 7752). This course takes an interdisciplinary approach to understanding and improving the physical function and independence of older adults and explores approaches to alleviate disabling conditions that interfere with physical function and quality of life in old age. Graded A-F only.
Credit Hours: 3

NURSE 7751: Psychosocial Function and Older Adults
(same as ARCHST 7650, F_C_MD 7751, HMI 7751, H_D_FS 7751, P_HLTH 7751 and SOC_WK 7751). This course takes an Interdisciplinary approach to understanding the psychosocial function of older adults and explores approaches to alleviate disabling conditions that interfere with psychosocial function and quality of life in old age. Graded on A-F basis only.
Credit Hours: 3

NURSE 7854: Preparing Nurse Educators
Explores the role of the nurse educator. Emphasis will be on the development, evaluation, differences and implementation of the nurse educator in the functional roles.
Credit Hours: 3
Prerequisites: Admission to the Master Science in Nursing Program or instructor’s consent

NURSE 8001: Topics in Advanced Clinical Nursing
Specialized topics in advanced clinical nursing not available through regularly offered courses.
Credit Hours: 3

NURSE 8010: Family Dynamics and Intervention
(same as H_D_FS 8012). Theories of family function and dysfunction; techniques of assessment; models of family intervention. Practicum with selected families.
Credit Hours: 3
Prerequisites: NURSE 7100 (Nursing students)

NURSE 8020: Advanced Statistical Methods in the Health Sciences
Primary topics include a review of hypothesis testing, estimation and confidence intervals, general linear models, multiple logistic regression, and multilevel modeling. There will be an emphasis on application to the health sciences.
Credit Hours: 3
Prerequisites: STAT 7020 or equivalent

NURSE 8030: Interpreting Statistical Evidence in the Health Sciences
Students learn to critically evaluate statistical designs and data analysis methods used in health sciences research and scientific evidence for health care decision making. May be repeated for credit.
Credit Hours: 3
Prerequisites: Graduate level statistics course

NURSE 8085: Problems in Nursing
Guided readings, special study and/or a practicum in an area of the student’s interest or in an area which the student needs to strengthen. Selected sections of the course may be offered on A-F or S/U basis only.
Credit Hour: 1-4
Prerequisites: instructor’s consent

NURSE 8090: Research in Nursing
Original investigation for presentation as thesis or dissertation. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: graduate statistics, instructor’s consent

NURSE 8100: Principles of Epidemiology
Explores key concepts of epidemiology and epidemiologic methods for studying the distribution and determinants of health and disease in populations. Application to public health and population-based practice addressed.
Credit Hours: 3
Prerequisites: NURSE 7150 or faculty consent

NURSE 8110: Concepts for Specialization in Public Health Nursing
Key concepts fundamental to specialization in public health nursing, including core public health functions. Emphasis upon integrating public health science, nursing theory, and methodological/leadership skills.
Credit Hours: 3
Prerequisites or Corequisites: NURSE 7100

NURSE 8120: Community-Based Public Health Interventions
Assessing and Diagnosing health-related needs of at-risk and vulnerable populations. Evaluating outcome-based research. Clinical practice implementing a public health intervention. Prerequisites: NURSE 8100, NURSE 8110, graduate level Statistics course;
Credit Hour: 3-4.5
Prerequisites or Corequisites: NURSE 7150

<td>NURSE 7100 or concurrent</td>
</tr>
</tbody>
</table>
Credit Hour: 3.5-4
Prerequisites: NURSE 8620 or consent of instructor

NURSE 8680: Pediatric Mental Health Assessment and Treatment
Develops advanced skills in psychiatric assessment and follow-up evaluation of children and adolescents experiencing mental health problems. Explores diagnosis, treatment, and management of child and adolescent mental health disorders. Graded on A-F basis only.
Credit Hour: 3.5-4
Prerequisites: NURSE 8610 or faculty consent

NURSE 8710: Clinical Management of Acute and Critical Care Problems
Advanced practice nurse management of selected clinical problems across the lifespan commonly encountered in the acute and/or critical care settings. Patient safety, technology, and product selection addressed. Integrated clinical practicum with selected population and setting. May be repeated for credit.
Credit Hour: 3.5-5
Prerequisites: NURSE 7140

NURSE 8720: Symptom Management in Acute and Chronic Illness
Clinical management of symptoms of acute and chronic illness across the lifespan. Preparation for teaching patient self-management strategies. Integrated clinical practicum with selected population and setting.
Credit Hour: 3-4
Prerequisites: NURSE 7140 and NURSE 7150 or faculty consent

NURSE 8800: Leadership and Management in Healthcare Systems
Prepares nurse leaders who facilitate and integrate complex structures and processes in health care systems. Understanding of partnerships, accountability, continuum-defined health care systems, self-managed teams, and value-based organizations.
Credit Hours: 4
Prerequisites: NURSE 7100

NURSE 8810: Management of Patient Care Services
Prepares nurses to effectively manage personnel, clinical operations, and quality improvement initiatives. Emphasizes techniques that facilitate sound nursing management across the care continuum. Multiple dimensions of managing patient care operations are considered.
Credit Hours: 4
Prerequisites: NURSE 7100

NURSE 8820: Health Care Financial Management
Prepares nurses to use the techniques that facilitate financial analysis and decision-making for patient care programs across the healthcare continuum. Focuses on efficient, effective management of resources for delivery of quality healthcare services. Prerequisites: NURSE 7100
Credit Hours: 4

NURSE 8830: Informatics Applications and Innovations in Health Care Systems
This course explores informatics from the perspective of health related fields through technology assessment and evaluation, and research and development in technological innovations. The impact of technology on patient privacy will also be examined. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: NURSE 7087 or instructor’s consent

NURSE 8840: Nursing Leadership, Innovation, and Entrepreneurship
This course will provide an overview of leadership theories and strategies for managing individuals, groups, or systems within rapidly changing healthcare environments. Innovative and cutting edge phenomena in healthcare will be explored as well as entrepreneurship. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: NURSE 7087 or instructor’s consent

NURSE 8850: Teaching Nursing
Principles and methods of teaching, evaluation, and curriculum construction in undergraduate nursing education.
Credit Hours: 3
Prerequisites: ESC_PS 4100 or equivalent

NURSE 8854: Teaching Strategies in Nursing
Examines principles, issues, techniques, and evaluation methods in teaching nursing. Focuses on the development of a variety of teaching strategies and evaluation methods for didactic and clinical settings.
Credit Hours: 3
Prerequisites: NURSE 7100 and NURSE 7110 or instructor’s consent

NURSE 8860: Organizations & Human Resource Management in Nursing
This course will examine various organizational theories, organizational behavior, and the impact of change within organizations. Participants will apply and analyze workforce management principles in regard to employee rights, resources, and responsibilities. May be repeated for credit. Graded on an A-F basis only.
Credit Hours: 3
Prerequisites: NURSE 7087 or instructor’s consent

NURSE 8864: Curriculum Development in Nursing
Examines theoretical foundations, principles, and issues in curriculum design. Explores systematic evaluation of curriculum at all levels.
Credit Hours: 3
Prerequisites: NURSE 7100 and NURSE 7110 or instructor’s consent

NURSE 8890: Clinical/Scholarly Project
Design, implement and evaluate nursing projects derived from theory, including written report with explanation or justification to support the empirical and/or theoretical basis for the project. Graded on a S/U basis only.
Credit Hour: 1-3
Prerequisites: NURSE 7100, NURSE 7150, graduate statistics

NURSE 8900: Research Practicum in Nursing
Selected independent research activities in conjunction with ongoing research programs of faculty. Graded on S/U basis only.
NURSE 8910: Translational Evidence-Based Nursing Practice
Provides essential skills for utilizing research to support practice change: assessing practice based problems, analyzing current evidence, proposing practice changes, and developing plans for implementing evidence-based practice concepts.
Credit Hours: 3
Prerequisites: NURSE 8100 or faculty consent

NURSE 8920: Quality, Safety, and Performance Outcomes
Uses information systems to identify and analyze patient safety and other clinical issues and recommend system-wide actions and measurement plans that result in safe, effective, efficient, equitable, patient-centered outcomes.
Credit Hours: 3
Prerequisites: NURSE 8910

NURSE 8930: Health Program Design and Management
Designing, implementing and evaluating effective health programs. Addresses leadership and organizational change issues.
Credit Hours: 3
Prerequisites: NURSE 8920 or instructor’s consent

NURSE 8940: Nursing and Health Policy
Designed to explore and critically evaluate the role of nursing and nurse leaders/scholars in health policy development and the organization and financing of health care in response to the health and social needs of the public.
Credit Hours: 3
Prerequisites: NURSE 8930

NURSE 8950: Teaching Nursing Practicum
Participation in application of principles and methods of teaching, learning, and evaluation to the education of nursing students. Graded on S/U basis only.
Credit Hours: 4
Prerequisites: NURSE 8854 and NURSE 8864

NURSE 8954: Distance-Mediated Teaching Nursing Practicum
Faculty-guided application of distance mediated teaching, learning, and evaluation methods with graduate &/or undergraduate nursing students. Course graded on S/U basis only.
Credit Hours: 4
Prerequisites: NURSE 8854 and NURSE 8864 or equivalents

NURSE 8960: Leadership in Nursing and Healthcare Systems Practicum
Participation in application of principles and methods of leadership, management, and evaluation to facilitate patient care operations in various settings. Graded on an S/U basis only.
Credit Hours: 5
Prerequisites: NURSE 8800, NURSE 8810, NURSE 8820

NURSE 8970: APN Role Transition Course
Focus on refinement of knowledge and skills required for successful transition into an Advanced Practice Nursing career. Corequisites: NURSE 8980
Credit Hour: 1
Prerequisites: NURSE 7100, NURSE 7150, NURSE 7110, and instructor’s consent

NURSE 8980: Advanced Clinical Nursing Practicum
Intensive preceptor or faculty-guided clinical experience that synthesizes previous theory and clinical coursework. Refines knowledge and skills required to transition to an autonomous advanced nursing practice role. Graded on S/U basis only.
Credit Hour: 2-7
Prerequisites: NURSE 8910 or faculty consent

NURSE 8990: Research in Nursing
Original investigation for presentation as thesis or dissertation. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites or Corequisites: graduate statistics, instructor’s consent

NURSE 9070: DNP Clinical Residency
Intensive clinical experience. Prepare experts in advanced nursing practice and leadership to effectively evaluate practice problems, translate evidence into practice, monitor outcomes, and implement innovative models of care. May be repeated for credit. Some sections may be graded on either an A-F or S/U basis only.
Credit Hour: 1-5
Prerequisites: NURSE 8930 and NURSE 8450 or NURSE 8610

NURSE 9080: DNP Residency Project
Final synthesis of DNP coursework culminating in an in-depth practice change project or case analysis impacting a rural or other undeserved population or critical healthcare system need. May be repeated for credit. Some sections may be offered on an A-F or S/U graded basis only. Prerequisites or
Credit Hour: 1-3
Corequisites: NURSE 8930 and NURSE 9070

NURSE 9087: Leadership and Transformational Role Institute
Synthesis of advanced nursing practice knowledge and leadership skills. Prepares DNP graduate to implement an advanced nursing practice role that will result in practice and/or policy change at the local, state, or national levels. May be repeated for credit.
Credit Hours: 2
Prerequisites or Corequisites: NURSE 9080 and NURSE 9070

NURSE 9090: Research in Nursing
Original investigation for presentation as thesis or dissertation. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: graduate statistics, instructor’s consent

NURSE 9100: State of the Science
The existing body of research literature is the foundation upon which new scientific knowledge is built. This course will guide the student through the purpose and processes of scholarly writing. Students will conduct a systematic review of the scientific literature on a selected focus area in the health sciences. Students will work with course faculty, with input from the student’s advisor, to develop and implement strategies
to search, evaluate, and synthesize the literature in the selected area. Scholarly writing will be emphasized in this course. Graded on an A-F basis only.

Credit Hours: 3
Prerequisites: Admission to a doctoral program or permission of instructor

NURSE 9110: Conceptual Structure of Nursing
Conceptualization and theoretical analysis of nursing phenomena; critical evaluation of nursing theories.

Credit Hours: 3
Prerequisites: NURSE 7100

NURSE 9120: Philosophical and Theoretical Basis for Research
Based on an understanding of the philosophy of science, critically appraise and adapt conceptual models and theoretical frameworks for use in research.

Credit Hours: 3
Prerequisites: NURSE 7100 or faculty consent

NURSE 9130: Philosophy of Science in Nursing
Overview of foundational concepts of philosophy-history of science; development and evolution of science and philosophical perspectives of nature of science including logical, empiricism, historicism, post-structuralism as related to nursing science/nursing research.

Credit Hours: 3

NURSE 9131: Responsible Conduct of Research in the Health and Social Sciences
(same as H_D_FS 9131) This course examines professional research ethics including the rights of human subjects. Graded on S/U basis only.

Credit Hours: 1
Prerequisites: Instructor’s permission required

NURSE 9132: Writing Research Proposals: Skill Building
(same as H_D_FS 9130) This course teaches the components of writing a research proposal for external funding. Graded on S/U basis only.

Credit Hours: 3
Prerequisites: Instructor's permission required

NURSE 9400: Macro Social Theory
(Same as SOC_WK 9400) Building on the foundation laid in Social Work 9100, in depth examination of human development and social environment theories appropriate to scientific examination of social welfare practice with formal organizations, interorganizational combinations, communities and larger political entities. May be repeated for credit.

Credit Hours: 3
Prerequisites: Consent required

NURSE 9410: Advanced Quantitative Methods
(same as H_D_FS 9200). Study of explanatory and predictive quantitative designs in health-related research, including nested, double-blind, time series, casual models, retrospective cohort; secondary database use will be explored.

Credit Hours: 3
Prerequisites: NURSE 9131, Advanced Statistics Course

NURSE 9420: Qualitative Methods
(same as H_D_FS 9420) Examines the following selected qualitative research approaches appropriate for the study of nursing phenomena and the extension or modification of scientific knowledge so as to be relevant to nursing: case study research methods, verbal qualitative approaches, and nonverbal qualitative approaches. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: NURSE 7150 and doctoral status (or permission of faculty)

NURSE 9430: Measurement Issues
Examines techniques used to estimate the various types reliability and validity of psychological and biological measures of nursing phenomena as well as the appropriate use of existing measures. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: NURSE 7150, NURSE 9420

NURSE 9440: Doctoral Seminar: Social Determinants of Health
Doctoral seminar on defining, measuring and conducting research on social determinants of health. May be repeated for credit.

Credit Hours: 3
Prerequisites: NURSE 9120 and NURSE 9410

NURSE 9450: Doctoral Seminar: Social Determinants of Health
Doctoral seminar on defining, measuring and conducting research on social determinants of health. May be repeated for credit.

Credit Hours: 3
Prerequisites: NURSE 9120, or faculty consent

NURSE 9460: Technology Evaluation in Health Care Systems Research
(same as HMI 9440). Examines technology applications and evaluation methods used to determine outcomes, efficiencies, effectiveness, satisfaction, and cost of using technology. Prerequisites: 6 credit hours of graduate statistics;

Credit Hours: 3
Prerequisites or Corequisites: NURSE 9410 or faculty consent

NURSE 9510: Advances in Health Care Systems
Guided in-depth exploration, analysis, and evaluation of selected nursing and other current literature in health care systems.

Credit Hours: 3
Prerequisites: NURSE 9110, doctoral standing or instructor's consent
NURSE 9520: Advances in Health Restoration and Support
Guided in-depth exploration, analysis, and evaluation of selected nursing and other current literature in health restoration and support.

Credit Hours: 3
Prerequisites: NURSE 9110, doctoral standing or instructor’s consent

NURSE 9530: Advances in Health Promotion and Protection
Guided in-depth exploration, analysis, and evaluation of selected nursing and other current literature in health promotion and protection.

Credit Hours: 3
Prerequisites: NURSE 9110, doctoral standing or instructor’s consent

NURSE 9540: Seminar in Nursing
Course content varies. May be repeated to a maximum of six hours.

Credit Hour: 1-99

NURSE 9550: Meta-Analysis Research
(Same as H_D_FS 9550). Examines quantitative synthesis including research questions, search strategies, coding issues, meta-analysis statistical procedures, and interpretation of findings. Emphasizes conceptual understanding and practical methods.

Credit Hours: 3
Prerequisites: 6 credit hours of graduate statistics courses, NURSE 9410 or graduate level quantitative methods course

NURSE 9560: Qualitative Systematic Reviews
(Same as SOC_WK 9560 and H_D_FS 9560) Examine and carry out elements of qualitative systematic reviews: topic/problem identification, data collection, and analysis. Understand how to limit threats to validity and maximize generalizability.

Credit Hours: 3
Prerequisites: NURSE 9420 or equivalent

NURSE 9700: Social Welfare Policy Seminar
(Same as SOC_WK 9700) Critical examination of comparative models of social policy development.; preparation of a professional social work policy analysis in the student's area of interest/specialization that is suitable for submission to an appropriate referred journal. May be repeated for credit.

Credit Hours: 3
Prerequisites: instructor’s consent

NURSE 9710: Advanced Research Practicum
Mentored research experience designed by student, mentor, and program committee based on student’s substantive areas of interest and program of research. Graded on S/U basis only.

Credit Hour: 1-6
Prerequisites or Corequisites: NURSE 9120; advisor consent

NUTRIT 7020: Monogastric Nutrition
(same as AN_SCI 7312 and NEP 7020; cross-leveled with AN_SCI 4312 and NEP 4020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 3212 and BIOCHM 3630

NUTRIT 7085: Problems in Nutrition
Problems in Nutrition.

Credit Hour: 1-6

NUTRIT 7087: Masters Seminar in Nutrition
Masters Seminar in Nutrition.

Credit Hour: 1

NUTRIT 7150: Readings in Nutrition
Readings in current nutrition research. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: 15 hours work in field and instructor’s consent

NUTRIT 7350: Nutrition During the Life Cycle
Nutritional, physiological and environmental influences on the aging process of man from conception through senescence.

Credit Hours: 3

NUTRIT 7390: Medical Dietetics
Medical dietetics.

Credit Hour: 3-12

NUTRIT 7650: Amino Acid and Protein Metabolism
Amino acid and protein metabolism.

Credit Hour: 2

NUTRIT 8060: Comparative Nutrition and Metabolism
Comparative Nutrition and Metabolism.

Credit Hours: 2

NUTRIT 8090: Masters Research in Nutrition
Investigation in any area of experimental nutrition. Thesis required. Graded on a S/U basis only.

Credit Hour: 1-99

NUTRIT 8310: Nutritional Biochemistry of Lipids
(same as NEP 8310 and AN_SCI 8431). Current concepts in the nutritional regulations of lipid metabolism. Emphasis on integrating information and interpreting current research data.

Credit Hours: 3
Prerequisites: BIOCHM 4270 and BIOCHM 4272
NUTRIT 8320: Ruminant Nutrition  
(same as AN_SCI 9432). Physiology, chemistry, microbiology, pathology of ruminants. Emphasizes digestion, absorption, metabolism, utilization of nutrients. Lecture, laboratory, assigned readings.  
Credit Hours: 3

NUTRIT 8340: Nutrition in Human Health  
(same as NEP 8340.) Nutritional aspects of maintaining human health with emphasis on chronic disease prevention. Grades based on classroom participation and four exams.  
Credit Hours: 3  
Prerequisites: BIOCHM 4270 and BIOCHM 4272; 4000-level nutrition course

NUTRIT 8360: Nutritional Biochemistry of Carbohydrates  
(same as BIOCHM 8360 and NEP 8360). Current concepts with in-depth coverage of selected examples of key regulatory steps controlling carbohydrate metabolism; emphasizing molecular mechanisms. Based entirely on research literature and taught in a tutorial format.  
Credit Hours: 3  
Prerequisites: BIOCHM 4270 and BIOCHM 4272 and 4000-level nutrition course and departmental consent

NUTRIT 8390: Molecular Biology of Mineral Nutrition  
(same as BIOCHM 8390 and NEP 8390). Current concepts of metal ion transport, intracellular metal trafficking and metal-dependent regulation of gene expression. Based entirely on research literature and taught in a tutorial format.  
Credit Hours: 3  
Prerequisites: BIOCHM 4270 and BIOCHM 4272; 4000-level nutrition course

NUTRIT 8400: Bioenergetics  
(same as AN_SCI 9441) . Bioenergetics.  
Credit Hours: 3

NUTRIT 8438: Nutrient Regulation of Gene Expression  
(same as AN_SCI 8438, BIOCHM 8438 and NEP 8438). Current concepts with in-depth coverage of several minerals that illustrate themes in molecular mineral nutrition. Based entirely on research literature and taught in a tutorial format.  
Credit Hours: 3  
Prerequisites: BIOCHM 4270 and BIOCHM 4272; 4000-level nutrition course

NUTRIT 8500: Investigations in Experimental Nutrition  
Written report required.  
Credit Hour: 1-6

NUTRIT 9087: Doctorate Seminar in Nutrition  
Doctorate seminar in nutrition.  
Credit Hour: 1

NUTRIT 9090: Doctorate Research in Nutrition  
Investigation in any area of experimental nutrition. Thesis required. Graded on a S/U basis only.  
Credit Hour: 1-99

Nutritional and Exercise Physiology (NEP)

NEP 1001: Topics in Nutritional Sciences  
Supervised study in specialized topic of nutritional sciences.  
Credit Hour: 1-99

NEP 1034: Nutrition, Current Concepts and Controversies  
Basic nutrition principles and current controversies are presented. Emphasis on role of nutrition in maintaining health as well as exploring the scientific validity of popular nutrition beliefs. No credit if taken after NEP 2340.  
Credit Hours: 3

NEP 1034H: Nutrition, Current Concepts and Controversies-Honors  
Basic nutrition principles and current controversies are presented. Emphasis on role of nutrition in maintaining health as well as exploring the scientific validity of popular nutrition beliefs. No credit if taken after NEP 2340.  
Credit Hours: 3  
Prerequisites: Honors eligibility required

NEP 1310: Food and Cultures of the World  
Trans-disciplinary approach to nutrition, considering anthropological, physiological, geographical, socioeconomic and psychological elements in world nutrition. These ideas will be explored in the context of cuisines and cultures that are found in the US, but originate elsewhere.  
Credit Hours: 3

NEP 1340: Introduction to Exercise and Fitness  
Provides students with practical information about exercise and physical fitness. After taking this class, students will be prepared to be physically active, understand the "Do's and Don'ts" of exercise, and know how to live a healthy way of life. As part of the course, students will assess their current level of activity/fitness, develop a plan for improvement, and put that plan into action.  
Credit Hours: 3

NEP 1995: Nutritional Food Science  
The study of components of food systems and how they are affected by processing, preservation, preparation and by techniques that improve taste, texture, flavor, appearance and nutrient retention. This course is 100% online and includes a virtual lab. Graded on A-F basis only.  
Credit Hours: 3

NEP 2001: Topics in Nutritional Sciences  
Supervised study in a specialized topic of Nutritional Sciences.  
Credit Hour: 1-99
NEP 2085: Problems in Nutritional Sciences
Supervised study in a specialized phase of nutritional sciences.

Credit Hours: 1-99
Prerequisites: consent required

NEP 2222: Landscape of Obesity
The societal, economic, medical, behavioral, and psychological causes and results of the obesity epidemic and potential modes of treatment and prevention. Lecture course. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: sophomore standing required

NEP 2340: Human Nutrition I
Basic concepts of normal nutrition related to physiological/chemical processes; changing nutrient needs during human life cycle, emphasis on adult; some social/psychological influences on dietary habits.

Credit Hours: 3
Prerequisites: CHEM 2030 or CHEM 2100 or CHEM 2160H or instructor's consent

NEP 2420: Biology of Healthy Living
(same as PH_THR 2420 and BIOMED 2420). Biology of inactivity as a causal factor in chronic disease.

Credit Hours: 2

NEP 2450: Nutrition Throughout the Life Span
Nutritional requirements, challenges, community nutrition programs, and eating patterns throughout the life span with emphasis on health promotion and disease prevention; Role of beliefs, culture, sociopsychological influences, and economic resources in food selection and nutrition/health status. Lecture/discussion course.

Credit Hours: 3
Prerequisites: NEP 1034 or NEP 2340 or NEP 2380 or equivalent

NEP 2460: Eating Disorders
Definition, etiology, treatment, and research related to eating disorders: anorexia nervosa, bulimia nervosa and binge eating disorder/obesity. Graded on A-F basis only.

<td>NEP 4360</td>
</tr>
</tbody>
</table>
and multi-system organ failure; emphasis on nutrition support (enteral
and parenteral nutrition). Lecture course.

Credit Hours: 2
Prerequisites: NEP 4370

NEP 4381: Nutrition Therapy II: Supervised Practice Experience
Practice in the nutrition care of complex health disorders with emphasis
on nutrition support. 16 hours of supervised practice per week.

Credit Hours: 4
Prerequisites: concurrent enrollment in NEP 4380; Open to students
admitted to Dietetics program only

NEP 4390: Issues in Dietetic Practice
Lectures and discussions focus on issues and trends in dietetics.
Discussions are used to encourage the development of skills and
attitudes which foster life-long professional learning. Lecture/discussion
course.

Credit Hour: 1
Prerequisites: NEP 4950 and NEP 4380; or instructor’s consent

NEP 4590: Community Nutrition
(cross-leveled with NEP 7590). Public health nutrition and chronic
disease prevention, food security, nutrition programs and food access,
public policy, sustainable agriculture and food production systems,
cultural food practices, needs assessment. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Nutrition course or instructor’s consent

NEP 4850: Physiology of Exercise
Effects of exercise on the human organism; physiologic capacity and
limitation for activity; role of exercise in health and fitness.

Credit Hours: 3
Prerequisites: MPP 3202
Recommended: PTH_AS 2201

NEP 4860: Exercise Prescription
Course investigates theory and methods of testing and prescribing
exercise for circulatory fitness, body composition, muscle strength, joint
and muscle ranges in motion, and posture. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MPP 3202 or MPP 3333 and MPP 3337, PTH_AS 2201
and NEP 4850 or concurrent. Restricted from Pre-Nutrition and Fitness
majors

NEP 4940: Internship in Nutritional Science and Exercise Physiology
Combines study, observation and employment in an area of exercise
physiology and/or nutrition. Written reports, faculty evaluation.

Credit Hour: 1-6
Prerequisites: GPA >3.0; 90 hours including four core courses in
nutrition and exercise physiology and NEP 4850; instructor’s consent

NEP 4950: Capstone: Research in Nutritional Sciences
Introduction to research, including the types of basic, clinical, and
outcomes-based research. Defining research problems related to nutrition
and exercise sciences, developing hypotheses, reviewing scientific
literature, writing research protocols, analyzing data. Lecture course.

Credit Hours: 2
Prerequisites: NEP 2340, statistics course, and senior standing or
instructor’s consent

NEP 4951: Nutrition Research Communication
Analyze and interpret data; present results of a research study in
manuscript and seminar presentation formats. Emphasis on effective
communication of nutrition research to scientific and lay audiences.
Graded on A-F basis only.

Credit Hour: 1
Prerequisites: NEP 4950 or instructor’s consent

NEP 4960: Readings in Nutritional Sciences
Credit Hour: 1-99
Prerequisites: 8 hours of course work in field of subject and instructor’s
consent

NEP 4970: Nutrition Capstone: Sports Nutrition
Integration of research literature with knowledge from previous
coursework, emphasis on sports nutrition research, nutrient requirements
of athletes, critical evaluation of ergogenic aids. Graded on A-F basis
only.

Credit Hours: 2
Prerequisites: Statistics, NEP 2340, Physiology, Senior Standing, open
to Nutrition and Fitness majors only

NEP 4975: Practice of Dietetics Supervised Practice Experience
Supervised practice in providing quality nutrition services in clinical,
community, management and specialty settings. 40 hours of supervised
practice per week.

Credit Hours: 10
Prerequisites: NEP 3590, NEP 4280, NEP 4290, NEP 4380, NEP 4381,
and NEP 4590; Open to students admitted to the Dietetics Program only

NEP 7001: Topics in Nutritional Science and Exercise Physiology
Instruction in specific subject matter areas in the field of food science and
nutrition.

Credit Hour: 1-99

NEP 7020: Monogastric Nutrition
(same as AN_SCI 7312 and NUTRIT 7020; cross-leveled with NEP 4020
and AN_SCI 4312). Principles of nutrition, feed formulation and recent
research in poultry feeding. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 3212 and BIOCHM 3630

NEP 7085: Problems in Nutritional Sciences and Exercise Physiolog
Advanced problems in a selected field of food science and nutrition.

Credit Hour: 1-99
NEP 7150: Readings in Nutritional Sciences and Exercise Physiology
In this course students will have the opportunity to read the literature in the area of nutrition and exercise physiology, allowing them to get more in-depth knowledge in a specific area or areas.

Credit Hour: 1-99
Prerequisites: 15 hours course work in field of subject and instructor’s consent

NEP 7200: Sports Performance and Conditioning
(cross-leveled with NEP 4200). Course utilizes scientific theory and applied instruction to teach procedures, techniques, and modalities used to improve physical sports performance. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Physiology and Anatomy, Kinesiology; junior/senior standing

NEP 7330: Human Nutrition II Laboratory
(cross-leveled with NEP 4330). A techniques course in nutrition, usually taken concurrently with NEP 4340.

Credit Hours: 2
Prerequisites: NEP 2340, Biochemistry and instructor’s consent

NEP 7340: Human Nutrition II Lecture
(cross-leveled with NEP 4340). Physiological and biochemical aspects of nutrition; functions of methods of measuring nutritional status; various aspects of applied nutrition. Continuation of NEP 2340.

Credit Hours: 3
Prerequisites: NEP 2340, Biochemistry or instructor’s consent

NEP 7360: Nutritional Assessment
(cross-leveled with NEP 4360). Introduction to the nutrition assessment process. The identification of dietary, anthropometric, laboratory, clinical and sociocultural parameters used to assess nutritional status of individuals. Lecture course.

Credit Hours: 3
Prerequisites: PSYCH 1000, NEP 2340

NEP 7370: Nutritional Therapy I
(cross-leveled with NEP 4370). In-depth study of physiological/biochemical changes in selected disease states (cardiovascular disease, rehabilitation, diabetes and cancer); development of principles underlying nutrition therapy. Lecture course.

Credit Hours: 3
Prerequisites: NEP 4360

NEP 7380: Nutritional Therapy II
(cross-leveled with NEP 4380). Evaluation, design and monitoring of the nutrition care of complex health disorders such as renal disease, trauma, and multi-system organ failure; emphasis on nutrition support (enteral and parenteral nutrition). Lecture course.

Credit Hours: 2
Prerequisites: NEP 4370

NEP 7500: Research in Nutritional Sciences and Exercise Physiology
Original investigations, usually in connection with one of the research projects of Agricultural Experiment Station. Written report required.

Credit Hour: 1-99

NEP 7590: Community Nutrition
(cross-leveled with NEP 4590). Public health nutrition and chronic disease prevention, food security, nutrition programs and food access, public policy, sustainable agriculture and food production systems, cultural food practices, needs assessment. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Nutrition course or instructor’s consent

NEP 7840: Cardiovascular Health and Fitness
Physiology underlying best methods for obtaining and maintaining cardiovascular health and fitness. Includes exercise and weight control, plasma lipids, energy metabolism, cardiovascular dynamics, and recent research findings.

Credit Hours: 3

NEP 7950: Research in Dietetics
(cross-leveled with NEP 4950). Introduction to research, including the relationship of basic, clinical, and outcomes-based research to dietetics practice. Defining research problems in a dietetics practice setting, developing hypotheses, reviewing scientific literature, writing research protocols, analyzing data. Lecture course.

Credit Hours: 2
Prerequisites: statistics course

NEP 7970: Sports Nutrition
(cross-leveled with NEP 4970). Integration of research literature with knowledge from previous coursework, emphasis on sports nutrition research, nutrient requirements of athletes, critical evaluation of ergogenic aids. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Statistics, NEP 2340, Physiology; instructor’s consent. Not open to Pre-Nutrition and Fitness students

NEP 8001: Topics in Nutritional Sciences and Exercise Physiology
Instruction in specific subject matter areas in the field of nutrition science and exercise physiology. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3

NEP 8030: Etiology of Obesity
This course is designed to provide an understanding of the cause and implications of human obesity. General topic areas covered will include: methodologies of obesity research, physiology of obesity, behavioral and environmental factors influencing obesity, obesity and disease, therapeutic approaches to obesity, and emerging topics in obesity. The structure of this course will be mixture of lectures and interactive discussions/reviews of primary research articles in these areas. Students will be expected to present and critically evaluate research papers relevant to the field of obesity.

<tbody>
<tr>
<td>Credit Hours: 3</td>
<td>The nervous system and the endocrine system integrate to regulate the functions of the body. These systems are tightly linked and frequently one system cannot be considered without consideration of the other system. This course integrates endocrine physiology and the impact that exercise has on the endocrine response. This class will focus on the glands producing hormones, the target organs, mechanisms and how both acute and chronic exercise impacts hormone action. This is an advanced exercise physiology course designed for graduate students in Exercise Physiology or the life sciences and will consist of lectures, readings and discussion. Graded on A-F basis only.</td>

OB_GYN 6766: Gynecology Rural Elective
Students will build upon their gynecologic examinations skills and their knowledge of both the common and more unusual gynecologic conditions that they obtain during other clerkships.
Credit Hours: 5
Prerequisites: OB_GYN 6004, SURGRY 6006

OB_GYN 6865: Maternal-Fetal Medicine Selective
Goals/Objectives: To expose the student to high-risk obstetrical experiences in the Maternal Fetal Medicine division. All obstetrical electives are done at Women’s and Children’s Hospital.
Credit Hours: 5
Prerequisites: Ob-Gyn Clerkship

OB_GYN 6866: Obstetrical
Goals/Objectives: To provide the student with additional obstetrical experience in the Labor and delivery suite. All obstetrical electives are done at the Missouri Ob/Gyn Associates Clinic and Women’s and Children’s Hospital. Evaluations: The student will be graded on their ward
performance. An evaluation for this rotation will be completed by the appropriate faculty and resident physicians. Notes: While on this rotation students will have exposure to various faculty members, residents, and fellow medical students. Students will participate in the evaluation of patients on labor and delivery including those presenting for evaluation of first trimester problems and labor evaluations. Some participation in operative procedures and labor management is expected. Students will have exposure to antenatal testing and ultrasonography including the interpretation of ultrasounds and limited participation in genetic counseling and invasive ante-partum diagnostic procedures is expected. Night call will be required and can be worked into the core rotation’s student call schedule. Teaching will be on an ongoing bases with Dr. Floyd keeping daily routine with the students expected to participate in management decisions.

Credit Hours: 5  
Prerequisites: Ob-Gyn Clerkship. Core reading for this rotation will include Obstetrics, Normal and Problem Pregnancies, latest edition, edited by Gabbe, Niebyl and Simpson

**OB_GYN 6676: Obstetrical/Gynecological Outpatient**  
Obstetrical/Gynecological Outpatient

Credit Hours: 5

**OB_GYN 6960: Gynecologic/Oncology Surgery**  
Goals/Objectives: To provide the student with additional surgical and gynecological clinical experience. All gynecologic surgical electives are performed at Ellis Fischel Cancer Center and the University Hospital. Evaluations: An evaluation for this rotation will be completed by the elective chairman and appropriate resident physicians. The students will be graded on their clinic, ward, and operating room performance. Notes: While on this rotation, students will have exposure to faculty members, three residents, and other fellow medical students. They will have the opportunity to assist in gynecologic oncology surgical cases, attend tumor clinics where they will encounter various procedures such as colposcopies, cryotherapy, and cervical and endometrial biopsies. A copy of a representative weekly schedule is available from the department student coordinator. In addition, students will be required to make two ten minute presentations with audio-visual aids on assigned topics. The students will not take night call, but are expected to attend patient rounds on weekdays and weekends with the residents. The department also holds conferences on Tuesdays and Thursdays which are to be attended. Core reading for this rotation will include Clinical Gynecologic Oncology by DiSaia and Creasman.*

Credit Hours: 5  
Prerequisites: Ob-Gyn Clerkship

**OB_GYN 6964: Obstetrics/Gynecology Offsite Advanced Selective**  
Obstetrics/Gynecology Offsite Advanced Selective

Credit Hours: 5

**Occupational Therapy (OC_THR)**

**OC_THR 1000: Introduction to Occupational Therapy**  
Introductory course to provide students information about the occupational therapy profession. Registered therapists lecture on clinical aspects. Students participate in discussions on program requirements, placement, and trends in the profession.

Credit Hour: 1

**OC_THR 2001: Topics in Occupational Therapy**  
Organized study of selective topics in occupational therapy. Particular topics and credit hours may vary from semester to semester. Repeatable upon consent of department.

Credit Hour: 1-99  
Prerequisites: freshman or sophomore standing; instructor’s consent

**OC_THR 2085: Problems in Occupational Therapy**  
Independent investigation leading to the completion of a project or paper.

Credit Hour: 1-99  
Prerequisites: freshman or sophomore standing; instructor’s consent

**OC_THR 4001: Topics in Occupational Therapy**  
Organized study of selective topics in occupational therapy. Particular topics and credit hours may vary from semester to semester. Repeatable upon consent of department.

Credit Hour: 1-99  
Prerequisites: junior standing; instructor’s consent

**OC_THR 4060: Professional Issues**  
Introduction to the structures of the profession including professional association, philosophical and ethical perspectives and preparation for client contact. Includes experiential instruction in infection control.

Credit Hour: 1  
Prerequisites: acceptance into the occupational therapy program. Graded on A-F basis only

**OC_THR 4085: Problems in Occupational Therapy**  
Independent investigation leading to the completion of a project or paper. Repeatable upon consent of department.

Credit Hour: 1-99  
Prerequisites: junior standing; instructor’s consent

**OC_THR 4220: Clinical Kinesiology**  
(same as PH_THR 4250). This course for occupational therapy students examines the musculoskeletal system with special emphasis in body movements and the application of laws and biomechanical principles that govern movement in order to select and perform effective occupation-based treatment. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: acceptance into the occupational therapy program

**OC_THR 4240: Applied Neurophysiology for Allied Health Students**  
(same as C_S_D 4430 and PH_THR 4240). Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system. Graded on A-F basis only.

Credit Hours: 3
OC_THR 4270: Clinical Pathophysiology
(same as PH_THR 4270). Interdisciplinary and case-based examination of the pathophysiology, prevention and general health management of disease/injury across the lifespan encountered in occupational and physical therapy practice. Graded on A-F only basis.
Credit Hours: 3
Prerequisites: successful completion of prior professional coursework

OC_THR 4310: Foundations of Occupational Therapy
History, contemporary practice, conceptual foundations, professional organizations and official documents of the OT profession are presented. Activity analysis, adaptation, and assistive technology are introduced in the context of promoting health and occupational participation. Graded on A-F only basis.
Credit Hours: 4
Prerequisites: PTH_AS 4222 with a grade of “C” or better. Admission to the Occupational Therapy professional program required

OC_THR 4350: Rehabilitation Practice
Analysis of major disability areas from an occupational perspective. Administration and interpretation of assessments and application of treatment theories and approaches for deficits in movement, sensation, cognition and perception. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: Must be admitted to the Occupational Therapy Professional Program

OC_THR 4390: Lifespan Assessment
Introduction to occupational therapy evaluation: interviewing, screening, assessment, and documentation. Overview of the characteristics of instruments and interpretation of data. Basic evaluation skills in occupational therapy across the lifespan are introduced. Graded on A-F basis only.
Credit Hours: 3

OC_THR 4420: Lifespan Occupations I
Overview of typical development from infancy through adolescence from an occupational perspective. Emphasis on the impact of personal and contextual factors on occupational development in children and adolescents. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: Admission to Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (C or better for undergraduate; B or better for graduate)

OC_THR 4422: Fieldwork I - Children
Development of clinical observation skills via on-site observation of children with typical and atypical development. Opportunities to gather and organize data, plan and implement activities, and develop therapeutic relationships with children and their care providers. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: Admission to Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (C or better for undergraduates)

OC_THR 4450: Pediatric Practice
Lecture and laboratory course designed which addresses Occupational Therapy pediatic frames of reference and theories. Common conditions seen in Occupational Therapy practice as well as interventions such as feeding, positioning, facilitation of movement and sensory strategies are also addressed. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: Admission to the Occupational Therapy professional program

OC_THR 4520: Fundamentals of Occupational Therapy
This course will provide an overview of disability across the lifespan, including personal and professional interactions. Professional values, ethics and advocacy are also emphasized. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: Restricted to students currently enrolled in the Occupational Therapy Program

OC_THR 4620: Lifespan Occupations II
Overview of biopsychosocial development and the aging process from young adulthood through older adulthood from an occupational perspective. Emphasis on the impact of client and contextual factors on occupational development and loss of occupations throughout the adult lifespan. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: Admission to the Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (C or better for undergraduate; B or better for graduate)

OC_THR 4622: Fieldwork I Older Adults
Development of evaluation and intervention skills via on-site interaction with older adults in a residential facility. Opportunities to gather data, plan/implement activities, document client performance, and develop therapeutic relationships with older adults and care providers. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: Admission to the Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (C or better for undergraduate; B or better for graduate)

OC_THR 4650: Rehabilitation Practice
This course provides a foundational overview of common treatment theories and frames of reference that guide intervention planning across the lifespan. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: OC_THR 4310 and OC_THR 4520. Restricted to students who are currently enrolled in the Occupational Therapy Program

OC_THR 4670: Hand and Upper Extremity Intervention
To gain entry level skills needed to evaluate and treat common upper extremity conditions, including acute injuries and cumulative trauma disorders. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: PTH_AS 4222 or PTH_AS 7222, OC_THR 4220 or OC_THR 7220, OC_THR 4390 or OC_THR 7390

**OC_THR 4740: Neurophysiology II**
This course provides an introduction to basic concepts in neurophysiology and neuropsychology that are needed to understand disorders of cognition and psychopathology encountered by occupational therapists. Graded on S/U basis only.

**Credit Hours:** 1

**Prerequisites:** Restricted to Occupational Therapy students only

**OC_THR 4750: Cognition Across the Lifespan**
This course introduces students to theoretical models, assessment, and treatment in cognitive rehabilitation. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Restricted to Occupational Therapy Majors

**OC_THR 4770: Community-Based Practice**
Focus on role of occupational therapy in prevention, health and wellness. Program development and evaluation completed through community needs assessment and completion of health promotion project. Graded on A-F only basis.

**Credit Hours:** 3

**Prerequisites:** acceptance into major and completion of program year 1

**OC_THR 4920: Clinical Documentation**
Development of observation and assessment skills related to effective documentation of occupational therapy services. Emphasizes exposure to various clinical settings, and third party payers, and legislative policies impacting documentation. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Restricted to students admitted to the professional program

**OC_THR 4943: Fieldwork: Clinical**
Clinical experience in occupational therapy settings. Emphasis on classroom to clinical transition. Exposure to the occupational therapy process; assessment, planning, implementation. Emphasis on professional communication and observational skills. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** completion of 1st semester in major in professional curriculum; junior standing

**OC_THR 4960: Readings in Occupational Therapy**
Directed readings of the literature and research in occupational therapy. Repeatable upon consent of department.

**Credit Hours:** 1-99

**Prerequisites:** junior standing, instructor's consent

**OC_THR 4970: Research Methods**
This course will use writing to explore basic concepts in research design and analysis. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Occupational Therapy Majors

**OC_THR 7000: Research Project**
Supervised experience in scientific investigation. In this course students will develop hypotheses, establish protocols/procedures, collect/analyze data, and interpret results.

**Credit Hours:** 2

**OC_THR 7001: Topics in Occupational Therapy**
Organized study of selected topics in occupational therapy. Particular topics and credit hours may vary from semester to semester. Repeatable upon consent of department. Course may be offered on S/U or A-F basis.

**Credit Hour:** 1-99

**OC_THR 7005: Research Project-Mentor Hours**
Hours spent working with research mentor on research proposal. Emphasis on understanding project, designing project and collecting data for project. May be repeated for credit. Graded on S/U basis only.

**Credit Hour:** 1

**Corequisites:** OC_THR 7000

**OC_THR 7006: Professional Issues**
Introduction to the structures of the profession including professional associations, philosophical and ethical perspectives, the meaning of occupation and preparation for client contact. Includes experiential instruction in surface anatomy and infection control. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** Acceptance into the occupational therapy program

**OC_THR 7085: Problems in Occupational Therapy**
Independent investigation leading to the completion of a project or paper. Repeatable upon consent of department. May be offered on S/U or A-F basis.

**Credit Hour:** 1-99

**OC_THR 7220: Clinical Kinesiology**
(same as PH_THR 7250). This course for occupational therapy students examines the musculoskeletal system with special emphasis in body movement and the application of laws and biomechanical principles that govern movement in order to select and perform effective occupation-based treatment. Acceptance into the occupational therapy program. Graded on A-F basis only.

**Credit Hours:** 3

**OC_THR 7240: Applied Neurophysiology for the Allied Health Student**
(same as PH_THR 7240). Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system. Graded on A-F basis only

**Credit Hours:** 3
OC_THR 7270: Clinical Pathophysiology
(same as PH_THR 7270). Interdisciplinary and case-based examination of the pathophysiology, prevention and general health management of disease/injury across the lifespan encountered in occupational and physical therapy practice. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Admission to the Occupational Therapy Professional Program required

OC_THR 7310: Foundations of Occupational Therapy
History, contemporary practice, conceptual foundations, professional organizations and official documents of the OT profession are presented. Activity analysis, adaptation, and assistive technology are introduced in the context of promoting health and occupational participation. Graded on A-F only basis.

Credit Hours: 4
Prerequisites: PTH_AS 4222 with a grade of “C” or better. Admission to the Occupational Therapy professional program required

OC_THR 7350: Rehabilitation Practice
Analysis of major disability areas from an occupational perspective. Administration and interpretation of assessments and application of treatment theories and approaches for deficits in movement, sensation, cognition, and perception. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Admission to the Occupational Therapy professional program

OC_THR 7390: Lifespan Assessment
Introduction to occupational therapy evaluation: interviewing, screening, assessment, and documentation. Overview of the characteristics of instruments and interpretation of data. Basic evaluation skills in occupational therapy across the lifespan are introduced. Graded on A-F basis only.

Credit Hours: 3

OC_THR 7420: Lifespan Occupations I
Overview of typical development from infancy through adolescence from an occupational perspective. Emphasis on the impact of personal and contextual factors on occupational development in children and adolescents. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Admission to Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (B or better for graduate students)

OC_THR 7450: Pediatric Practice
Lecture and laboratory course designed which addresses Occupational Therapy pediatric frames of reference and theories. Common conditions seen in Occupational Therapy practice as well as interventions such as feeding, positioning, facilitation of movement and sensory strategies are also addressed. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Admission to the Occupational Therapy professional program required

OC_THR 7470: Pediatric Practice (continued)

OC_THR 7510: Professional Perspectives
The course will provide an understanding of personal and professional communication through experiential activities and team learning. The focus will be on the formation of professional and therapeutic relationships and development of leadership skills. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Admission to the Occupational Therapy Professional Program required

OC_THR 7520: Fundamentals of Occupational Therapy
This course will provide an overview of disability across the lifespan, including personal and professional interactions. Professional values, ethics and advocacy are also emphasized. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Restricted to students who are currently enrolled in to the Occupational Therapy program

OC_THR 7590: Disability In Context
Community experiences are provided for observation, interview, assessment, and relational skills with persons experiencing disabilities throughout the lifespan. Professional and therapeutic relationships encompassing holism are discussed. Seminar weekly. Graded on A-F basis only.

Credit Hours: 2

OC_THR 7620: Lifespan Occupations II
Overview of biopsychosocial development and the aging process from young adulthood through older adulthood from an occupational perspective. Emphasis on the impact of client and contextual factors on occupational development and loss of occupations throughout the adult lifespan. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Admission to the Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (C or better for undergraduate; B or better for graduate)

OC_THR 7622: Fieldwork I Older Adults
Development of evaluation and intervention skills via on-site interaction with older adults in a residential facility. Opportunities to gather data, plan/implement activities, document client performance, and develop therapeutic relationships with older adults and care providers. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: Admission to Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (C or better for undergrad; B or better for graduates)

OC_THR 7622: Fieldwork I - Children
Development of clinical observation skills via on-site observation of children with typical and atypical development. Opportunities to gather and organize data, plan and implement activities, and develop therapeutic relationships with children and their care providers. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: Admission to the Occupational Therapy professional program and satisfactory completion of all previous professional program coursework (C or better for undergraduate; B or better for graduate)

OC_THR 7650: Lifespan Interventions
This course provides a foundational overview of common treatment theories and frames of reference that guide intervention planning across the lifespan. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: OC_THR 4310 or OC_THR 7310 and OC_THR 4520 or OC_THR 7520. Restricted to students who are currently enrolled in the Occupational Therapy Program

OC_THR 7670: Hand and Upper Extremity Intervention
To gain entry level skills needed to evaluate and treat common upper extremity conditions, including acute injuries and cumulative trauma disorders. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: PTH_AS 4222 or PTH_AS 7222, OC_THR 4220 or OC_THR 7220, OC_THR 4390 or OC_THR 7390

OC_THR 7740: Neurophysiology II
This course provides an introduction to basic concepts in neurophysiology and neuropsychology that are needed to understand disorders of cognition and psychopathology encountered by occupational therapists. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: Restricted to Occupational Therapy students only

OC_THR 7750: Cognition Across the Lifespan
This course introduces students to theoretical models, assessment, and treatment in cognitive rehabilitation. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: restricted to Occupational Therapy Majors

OC_THR 7770: Community-Based Practice
Focus on role of occupational therapy in prevention, health and wellness. Program development and evaluation completed through community needs assessment and completion of health promotion project. Graded on A-F only basis.
Credit Hours: 3
Prerequisites: Admission to the Occupational Therapy Professional Program

OC_THR 7920: Fieldwork I Application of Clinical Skills
Application of clinical reasoning. Integration of theory into clinical practice. Emphasis on treatment planning and implementation, outcome based intervention and professional communication. Includes lecture, seminar, and field experience. Graded on S/U basis only.
Credit Hours: 2

OC_THR 7921: Clinical Documentation
Development of observation and assessment skills related to effective documentation of occupational therapy services. Emphasizes exposure to various clinical settings, third party payers, and legislative policies impacting documentation. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: Admission to the professional program

OC_THR 7960: Readings in Occupational Therapy
Directed readings and critical evaluation of the literature and research in occupational therapy. Repeatable upon consent of department. May be offered on A-F or S/U basis.
Credit Hour: 1-99

OC_THR 7970: Research Methods
This course will use writing to explore basic concepts in research design and analysis. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Occupational Therapy Majors

OC_THR 7983: Fieldwork Level II-A
Advanced practicum in rehabilitation and various community settings for application of more specialized practice in community based settings. Emphasis on critical analysis of human occupation, clinical reasoning, synthesis, and evidence based practice. Graded on S/U basis only.
Credit Hour: 3-9

OC_THR 7983: Fieldwork Level II-B
Advanced practicum in rehabilitation and various community settings for application of more specialized practice in community based settings. Emphasis on critical analysis of human occupation, clinical reasoning, synthesis, and evidence based practice. Graded on S/U basis only.
Credit Hour: 3-9

OC_THR 8000: Field Work 1 - Mental Health Practice
Fieldwork experience in a mental health setting requiring integration of learned concepts in mental health practice as evidenced thru observation and intervention in individual and group psychosocial treatments. Course may be repeated. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: Restricted to Occupational Therapy students
Corequisites: OC_THR 8003

OC_THR 8002: Leadership, Management and Policy
Management perspectives and organizational structure of occupational therapy programs and the profession. Includes inter- and intra departmental relationships, management and supervision, standards, regulations, and ethical guidelines are emphasized.
Credit Hour: 2-3

OC_THR 8003: Mental Health Practice
This graduate course will examine the practice of occupational therapy in treating emotional and mental illnesses and related psychosocial dysfunction in the context of a variety of mental health treatment settings. The course will cover advanced frames of reference, treatment strategies, assessments, service delivery, program planning and group facilitation. In conjunction with didactic content students will actively explore these
areas through hands-on and practical learning experiences such as planning and leading groups, selecting and administering assessments, and developing a service delivery plan. The student will be required to complete an assigned field experience and write a reflection paper to insight and new perspectives on mental illness.

**Credit Hours: 3**

**OC_THR 8005: Advanced Adult Strategies**
Analysis of major disability areas from an occupational perspective, focusing on advanced rehabilitative practice techniques. Facilitates critical thinking and clinical reasoning skills utilizing a student-centered model.

**Credit Hours: 3**

**Prerequisites:** OC_THR 4320 or OC_THR 7420 and OC_THR 4450 or OC_THR 7450; Restricted to students in the Department of Occupational Therapy

**OC_THR 8006: Advanced Pediatric Strategies**
Explore topics related to occupational therapy pediatric practice in medical and educational settings and advanced topics such as assistive technology, working with special populations and evidence-based practice. Course graded on A-F basis only.

**Credit Hours: 3**

**Prerequisites:** OC_THR 4420 or OC_THR 7420 and OC_THR 4450 or OC_THR 7450; Restricted to students in the Department of Occupational Therapy

**OC_THR 8087: Problem-Based Cases**
Synthesizes occupational therapy approaches to clinical scenarios across the lifespan and practice domains. Integrates clinical reasoning, patient values and evidence-based decision making into the occupational therapy process. Problem-based methodology emphasizes small group learning, problem solving, self/peer evaluation, and self-directed learning.

**Credit Hours: 4**

**OC_THR 8090: Synthesis Project**
Write up scholarly manuscript for publication based on research conducted with research mentor. Emphasis on writing: introduction, literature review, analysis and interpretation of findings, and implication for field. Presentation and dissemination of acquired information through poster session and manuscript. Graded on A-F basis only.

**Credit Hours: 2**

**Prerequisites:** OC_THR 8090. Graded on S/U basis only

**OC_THR 8095: Synthesis Project - Mentor Hours**
Hours spent working with research mentor. Emphasis on data collection and analysis to complete synthesis project. Must be taken in conjunction with Synthesis Project course.

**Credit Hour: 1**

**Prerequisites:** OC_THR 8090

**OC_THR 8900: Adult Clinical Practice**
This is a clinical course in which the student will engage in the occupational therapy process with an adult client from evaluation through discharge under the direct supervision of a licensed occupational therapist. Seminars will be used for clinical discussion. Course may be repeated. Graded on S/U basis only.

**Credit Hour: 1**

**Prerequisites:** OC_THR 4350 and OC_THR 4390 or OC_THR 7390 and OC_THR 7650; Students must be enrolled in the Department of Occupational Therapy

**OC_THR 8950: Pediatric Clinical Practice**
Clinical course providing students with opportunities to provide assessment, treatment planning and other aspects of client care in a supervised setting. Course may be repeated. Graded on S/U basis only.

**Credit Hour: 1**

**Prerequisites:** OC_THR 4450 and OC_THR 4650 or OC_THR 7650; students must be enrolled in the Department of Occupational Therapy

**OPHTH 6321: ABS Age-Related Mechanism of Degeneration**
ABS Age-Related Mechanism of Degeneration

**Credit Hour: 5-10**

**OPHTH 6323: ABS Ophthalmology Research**
ABS Ophthalmology Research

**Credit Hour: 5-10**

**OPHTH 6325: ABS Ophthalmology Research and Review**
ABS Ophthalmology Research and Review

**Credit Hours: 5**

**OPHTH 6585: Ophthalmology**

**Credit Hours: 5**

**Parks, Recreation, and Tourism (P_R_TR)**

**P_R_TR 1010: Introduction to Leisure Studies**
History of recreation and leisure movement; theories and philosophies of play, recreation and leisure. Developmental stages of leisure services to contemporary status.

**Credit Hours: 3**
P_R_TR 1011: Academic Planning and Career Orientation in Parks, Recreation and Tourism
Orientation to the field and analysis of career opportunities in leisure services. Academic planning leading to B.S. in parks, recreation and tourism. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: Parks, Recreation and Tourism major. Must be taken in first semester as a major

P_R_TR 1080: Introduction to Sport Management
This course will examine the meaning of sport management in terms of its history, scope, principles, issues and future trends. In addition, this course examines the job responsibilities and competencies required of sport managers in a variety of sport organizations. Graded on A-F basis only.

Credit Hours: 3
Prerequisites or Corequisites: P_R_TR 1011

P_R_TR 1081: Sport Facility Design
This course will investigate the functions of management in terms of design, implementation, operating and financing public assembly facilities in order to help sell the sport product. Venues such as public and private arenas, coliseums and stadiums will be studied. Graded on A-F basis only. Prerequisites or Corequisites: P_R_TR 1080

Credit Hour: 1
Prerequisites: May be restricted to Parks, Recreation, and Tourism majors
Corequisites: P_R_TR 2082, P_R_TR 2083

P_R_TR 1084: Recreational Shooting Sports
This course provides introductory instruction and hands-on shooting with an introduction to shooting range management. Graded on A-F basis only.

Credit Hour: 1
Prerequisites or Corequisites: P_R_TR 1011
Prerequisites: instructor's consent

P_R_TR 1085: The Sports Page
This course is offered to introduce students to Sport Management by discussing the variety of sports, issues, perspectives and people that make the daily sport page worth reading. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: P_R_TR 1080
Corequisites: Instructor consent required if P_R_TR 1080 is taken concurrently

P_R_TR 1091: Research and Descriptive Statistics for Parks, Recreation and Tourism
An introduction to research methods and techniques and descriptive statistics and their application in the field of recreation and park administration. Math Reasoning Proficiency Course.

Credit Hours: 3
Prerequisites or Corequisites: P_R_TR 1011

P_R_TR 2080: Global Sport Environments
This course will provide an overview of organization and management of domestic and international sport, including the Olympic movement and examination of the globalization of U.S. professional sports. The course will also look into facility design and technology used in sports environment. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: P_R_TR 1011

P_R_TR 2082: Domestic and International Sports Environment
This course will provide an overview of organization and management of domestic and international sport, including the Olympic movement and examination of the globalization of U.S. profession sports. Graded on A-F basis only.

Credit Hour: 1
Prerequisites or Corequisites: P_R_TR 1080. May be restricted to Parks, Recreation and Tourism majors
Corequisites: P_R_TR 1081, P_R_TR 2083

P_R_TR 2083: Technological Advancement in Sport
This course will teach students how to solve sports technology problems they will face in their future career, plus develop computer aided design and manufacturing skills. They will also gain skills in team work, communication and presentation, IT, research and project management. Graded on A-F basis only.

Credit Hour: 1
Prerequisites or Corequisites: P_R_TR 1080
Prerequisites: May be restricted to Parks, Recreation, and Tourism majors
Corequisites: P_R_TR 1081, P_R_TR 2082

P_R_TR 2101: Topics in Park, Recreation and Tourism
Specialized topic content in parks, recreation and tourism programs, management and/or development. Subject content and credit may vary by semester based on faculty resources and student needs. Offered periodically.

Credit Hour: 1-3
Prerequisites or Corequisites: P_R_TR 1011

P_R_TR 2103: Topics in Park, Recreation and Tourism - Behavioral Science
Specialized topic content in parks, recreation and tourism programs, management and/or development. Subject content and credit may vary by semester based on faculty resources and student needs. Offered periodically.

Credit Hour: 1-3
Prerequisites or Corequisites: P_R_TR 1011

P_R_TR 2104: Topics in Park, Recreation and Tourism - Social Science
Specialized topic content in parks, recreation and tourism programs, management and/or development. Subject content and credit may vary by semester based on faculty resources and student needs. Offered periodically.

Credit Hour: 1-3
Prerequisites or Corequisites: P_R_TR 1011
**P_R_TR 2107: Aquatics Science**  
A scientific perspective on water chemistry, preventive maintenance of aquatic facilities with an emphasis on the newest safety and engineering design information and construction techniques.  
**Credit Hours:** 3  
**Prerequisites or Corequisites:** P_R_TR 1011

**P_R_TR 2111: Introduction to Planning and Evaluating Leisure Environments**  
Presentation of basic planning principles. Evaluation of existing areas and facilities based upon planning guidelines. Consideration of park plans, standards, terminology, map preparation and evaluation.  
**Credit Hours:** 3  
**Prerequisites or Corequisites:** P_R_TR 1011

**P_R_TR 2115: Consortium Field Experience**  
An organized undergraduate experiential learning opportunity.  
**Credit Hours:** 1-3  
**Prerequisites or Corequisites:** P_R_TR 1011  
**Prerequisites:** instructor's consent

**P_R_TR 2140: Camp Leadership and Management**  
Organization and administration of camps; program planning; selection and training of staff; camp site selection and development; health and safety; camp history, standards, trends; practical application of camp craft skills.  
**Credit Hours:** 3  
**Prerequisites or Corequisites:** P_R_TR 1011  
**Prerequisites:** instructor's consent

**P_R_TR 2142: Leadership of Social Recreation**  
Study and practice in techniques of leading social activities suitable for various social settings. Offered periodically.  
**Credit Hours:** 2  
**Prerequisites or Corequisites:** P_R_TR 1011

**P_R_TR 2143: Organization and Conduct of Recreation Centers**  
Problems of operation, management of playgrounds, recreation centers.  
**Credit Hours:** 2  
**Prerequisites or Corequisites:** P_R_TR 1011

**P_R_TR 2182: Ethics and Current Issues in Sports**  
The ethical strategies of sport management will be emphasized in all management decisions and current issues that today's sport business professional faces will be studied. Graded on A-F basis only.  
**Credit Hour:** 1  
**Prerequisites or Corequisites:** P_R_TR 1011  
**Prerequisites:** instructor's consent

**P_R_TR 2206: Introduction to Leisure Service Management**  
An introduction to public recreation in local government.  
**Credit Hours:** 3

**P_R_TR 2281: The Business of Sport**  
The course focuses on the business side of sport management, considering issues of marketing, sponsorship, and sales. Students will also be presented with actual models relevant to working in sales in the competitive sport environment. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites or Corequisites:** Some sections may require P_R_TR 1011  
**Prerequisites:** some sections may be restricted to Parks, Recreation, and Tourism majors with Sport Management emphasis or instructor consent

**P_R_TR 2355: Private and Commercial Recreation Principles and Practice**  
Considers principles, practices, influences in public/private leisure services; influence of tourism/travel on public/private recreation services.  
**Credit Hours:** 3  
**Prerequisites:** P_R_TR 1011

**P_R_TR 2711: Experience Internship**  
This course is designed as an independent study for students to gain professional experience. Graded on A-F basis only.  
**Credit Hours:** 1-3  
**Prerequisites or Corequisites:** P_R_TR 1011 and P_R_TR 1010

**P_R_TR 2750: Methods in Research and Evaluation**  
An overview of social research methods, including terms, human and scientific inquiry, ethical behavior, literature review, sampling questionnaire construction, types of data collection, statistical analysis, and reporting of results. Graded on A-F basis only. Prerequisites or Corequisites: P_R_TR 1011  
**Credit Hours:** 3  
**Prerequisites:** May be restricted to Parks, Recreation and Tourism Majors

**P_R_TR 3185: Sports Economics and Finance**  
The course focuses on the economic and financial issues within the sport industry. The class will help students understand basic and complex concepts within economics and finance in a sport context, and to grasp the importance of financial and economic decision making. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** P_R_TR 1011; Restricted to Parks, Recreation, and Tourism majors with Sport Management emphasis or instructor consent

**P_R_TR 3185H: Sports Economics and Finance - Honors**  
The course focuses on the economic and financial issues within the sport industry. The class will help students understand basic and complex concepts within economics and finance in a sport context, and to grasp the importance of financial and economic decision making. Graded on A-F basis only.  
**Credit Hours:** 3
Prerequisites: P_R_TR 1011; Restricted to Parks, Recreation, and Tourism majors with Sport Management emphasis or instructor consent. Honors eligibility required.

P_R_TR 3189: Pre-Internship Seminar in Parks, Recreation and Tourism
The course is designed to prepare students for P_R_TR 4940. Emphasis is placed on students’ responsibilities prior to enrollment in P_R_TR 4940, selecting internship sites and completing internship requirements.
Credit Hours: 1
Prerequisites: P_R_TR 1011; restricted to Parks, Recreation and Tourism students only

P_R_TR 3210: Personnel Management and Leadership in Leisure Services
Considers theories and practices of leadership and management in leisure services employment. Topic presentation in relationships, attitudes, supervision, motivation and group functioning.
Credit Hours: 3
Prerequisites: P_R_TR 1011; restricted to Parks, Recreation and Tourism majors

P_R_TR 3215: Program Development in Leisure Services
Fundamental principles and techniques of program development; seasonal, year round, specialty areas and total agency program planning.
Prerequisites: P_R_TR 1011, or instructor’s consent; restricted to Parks, Recreation and Tourism majors
Credit Hours: 3

P_R_TR 3220: Introduction to Recreation for Individuals with Disabilities
Principles, concepts and historical development of recreation for individuals with disabilities. Explanation of attitudes, issues, practice and barriers related to recreation participation. Graded on A-F basis only.
Credit Hours: 3

P_R_TR 3227: Introduction to Therapeutic Recreation
An investigation of therapeutic recreation service delivery models of the P_R_TR 2111 and disabled in both institutional and community settings. Particular emphasis will be placed on advanced leadership and therapeutic interactional skills and dynamics.
Prerequisites: P_R_TR 1011
Credit Hours: 3

P_R_TR 3230: Introduction to Parks and Outdoor Recreation Services
An overview of parks and outdoor recreation, natural environment, supply-demand-need relationships, interpretative programming, management philosophies/practices will be studied.
Credit Hours: 3
Prerequisites: P_R_TR 1011 or instructor’s consent

P_R_TR 3231: Principles of Interpretive Outdoor Recreation
Interpretive principles and techniques employed to communicate values, natural history and cultural features to the recreation user.

P_R_TR 3282: Governance and Policy in Sport and Leisure
This course serves as a comprehensive study in examining how leisure organizations address fundamental issues of governance and policy. Through careful use of policy and understanding of governance, organizations often form strategies in their attempts to gain an advantage. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: P_R_TR 1011; Restricted to Parks, Recreation, and Tourism majors with Sport Management emphasis or instructor consent

P_R_TR 4208: Administration of Leisure Services
(cross-leveled with P_R_TR 7208). Theoretical foundations of the organization and administration of leisure services in both community and institutional settings. Emphasis on the roles of the administrator.
Credit Hours: 3
Prerequisites: P_R_TR 1011; Restricted to Parks, Recreation and Tourism majors

P_R_TR 4312: Planning Recreation and Leisure Environments
Practical application of basic planning principles and design. Layout and design of various leisure-oriented areas and facilities. Site planning and analysis.
Credit Hours: 3
Prerequisites: P_R_TR 1011

P_R_TR 4315: Senior Seminar in Leisure Services
Presentation of professional principles and issues in leisure services. Seminar study resulting in presentations and discussions.
Credit Hours: 3
Prerequisites: Parks, Recreation and Tourism majors, professional core or instructor’s consent

P_R_TR 4327: Operation of Therapeutic Recreation: Procedures and Principles
Theories and principles of leadership and programming as they apply to recreation services for the ill, handicapped, and aged.
Credit Hours: 3
Prerequisites: P_R_TR 1011

P_R_TR 4328: Leisure and Aging
Basic understanding of problems/needs of later maturity in relation to recreation. Characteristics/capabilities of aged, program settings, financial support, planning guidelines emphasized. Objectives: provide fundamentals for recreation planning with aged individuals/groups. Offered periodically.
Credit Hours: 3
Prerequisites: P_R_TR 1011
P_R_TR 4329: Therapeutic Recreation Education/Counseling Techniques
Techniques and models of leisure facilitation for use within a variety of clinical, residential and Institutional models. Theories of positive/negative leisure engagement reviewed.
Credit Hours: 3
Prerequisites: P_R_TR 1011

P_R_TR 4330: Therapeutic Recreation Assessment/Evaluation Procedures
Reviews accepted clinical protocols for determining a client's physical, emotional, social and cognitive levels of functioning. Competencies in administering, scoring and interpreting multiple tools included.
Credit Hours: 3
Prerequisites: P_R_TR 1011

P_R_TR 4331: Administration of Outdoor Recreation - Education Programs
(cross-leveled with P_R_TR 7331). Philosophies, essential principles, methods, techniques, resources, administrative and program practices for outdoor recreation and education. Offered periodically. Prerequisites: P_R_TR 1011
Credit Hours: 3
Prerequisites: P_R_TR 1011

P_R_TR 4333: Park Management
Basic principles, practices and problems involved in managing public park systems. Consideration given to local, district, county, state, federal and foreign park systems.
Credit Hours: 3
Prerequisites: P_R_TR 1011; Restricted to Parks, Recreation and Tourism majors

P_R_TR 4340: Advanced Recreation Land Management
(cross-leveled with P_R_TR 7340). Advanced study of problems facing forest recreation managers. Topics include rivers recreation, wilderness management and citizen participation in decision making. Offered periodically.
Credit Hours: 3
Prerequisites: P_R_TR 1011 or instructor’s consent

P_R_TR 4350: Problems in Parks, Recreation and Tourism
Credit Hour: 1-3
Prerequisites: P_R_TR 1011; departmental consent

P_R_TR 4356: Tourism Management
Introduction to the scope and scale of the tourism industry. Focus on the industry components, concepts, structures, relationships, and issues with regard to accommodation, transportation, travel, regional development, political system, and the economic, social and environmental effects of tourism.
Credit Hours: 3
Prerequisites: P_R_TR 1011

P_R_TR 4357: Tourism Planning and Development
Nature and scope of tourism planning at the local, regional, and national levels; economic, social, environmental, and policy considerations. Comparative study of initiating, planning and implementing tourism and the organization of community resources for developing and controlling a tourism industry.
Credit Hours: 3
Prerequisites: P_R_TR 1011 and P_R_TR 4356

P_R_TR 4385: Legal Aspects of Sport
This course studies the U.S. legal system, its structure and terminology. Legal aspects of contract law, statutory law, constitutional law, intellectual property, torts, negligence, and risk management in sport will be examined. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: P_R_TR 1011; Restricted to Parks, Recreation, and Tourism majors with Sports Management emphasis or instructor consent

P_R_TR 4940: Parks, Recreation and Tourism Internship
Supervised professional experience with an approved organization. Course entails weekly reports, case studies, agency evaluations and a special project related to the student’s curricular emphasis. Graded on A-F basis only.
Credit Hours: 12
Prerequisites: P_R_TR 1011 and P_R_TR 3189, P_R_TR majors only, instructor’s consent

P_R_TR 4949: Western Canada Study Abroad
This course provides students an educational opportunity to explore Western Canada. Students analyze natural resource management, customer and visitor relations, community relations, cultural entrepreneurship, and transportation networks with US and Canadian Management methods.
Credit Hours: 3
Prerequisites: P_R_TR 1011; instructor’s consent

P_R_TR 4950: Independent Research in Parks, Recreation and Tourism
Independent research project in parks, recreation and tourism. Graded on A-F basis only.
Credit Hour: 1-3
Prerequisites: P_R_TR 1011; instructor’s consent

P_R_TR 7208: Administration of Leisure Services
(cross-leveled with P_R_TR 4208). Theoretical foundations of the organization and administration of leisure services in both community and institutional settings. Emphasis on the roles of the administrator.
Credit Hours: 3

P_R_TR 7312: Planning Recreation and Leisure Environments
Practical application of basic planning principles and design. Layout and design of various leisure-oriented areas and facilities. Site planning and analysis.
Credit Hours: 3
P_R_TR 7328: Leisure and Aging
Basic understanding of problems/needs of later maturity in relation to recreation. Characteristics/capabilities of aged, program settings, financial support, planning guidelines emphasized. Objectives: provide fundamentals for recreation planning with aged individuals/groups. Offered periodically.
Credit Hours: 3

P_R_TR 7331: Administration of Outdoor Recreation - Education Programs
(cross-leveled with P_R_TR 4331). Philosophies, essential principles, methods, techniques, resources, administrative and program practices for outdoor recreation and education. Offered periodically.
Credit Hours: 3

P_R_TR 7333: Park Management
Basic principles, practices and problems involved in managing public park systems. Consideration given to local, district, county, state, federal and foreign park systems.
Credit Hours: 3

P_R_TR 7340: Advanced Recreation Land Management
(cross-leveled with P_R_TR 4340). Advanced study of problems facing forest recreation managers. Topics include rivers recreation, wilderness management and citizen participation in decision making. Offered periodically.
Credit Hours: 3

P_R_TR 7355: Private and Commercial Recreation Principles and Practice
Considers principles, practices, influences in public/private leisure services; influence of tourism/travel on public/private recreation services.
Credit Hours: 3

P_R_TR 7356: Tourism Management
Introduction to the scope and scale of the tourism industry. Focus on the industry components, concepts, structures, relationships, and issues with regard to accommodation, transportation, travel, regional development, political system, and the economic, social and environmental effects of tourism.
Credit Hours: 3

P_R_TR 7357: Tourism Planning and Development
Nature and scope of tourism planning at the local, regional, and national levels; economic social, environmental, and policy considerations. Comparative study of initiating, planning and implementing tourism and the organization of community resources for developing and controlling a tourism industry.
Credit Hours: 3
Prerequisites: P_R_TR 7356

P_R_TR 7960: Guided Reading in Parks, Recreation and Tourism
Selected reading in parks, recreation and tourism identified to fulfill a graduate student’s academic needs or specialized interests.
Credit Hour: 1-3
Prerequisites: instructor’s consent

P_R_TR 8080: Foundations of Sport
This course focuses on the business side of sport management, primarily considering issues of marketing, sponsorship, and sales. In this, students will not only supplement knowledge of these concepts, but also be presented with actual models relevant to working in sales in the competitive sport environment. Graded on A-F basis only.
Credit Hours: 3

P_R_TR 8085: Problems in Parks, Recreation and Tourism
Independent research on special projects.
Credit Hour: 1-6
Prerequisites: instructor’s consent

P_R_TR 8087: Masters Level Graduate Seminar in Parks, Recreation and Tourism
In this course, students and faculty will discuss and critically analyze contemporary issues on social concerns relating to leisure services. Graded on S/U basis only.
Credit Hours: 2

P_R_TR 8088: Sport and Leisure Economics
This course focuses on the business side of sport management, primarily considering issues of marketing, sponsorship, and sales. In this, students will not only supplement knowledge of these concepts, but also be presented with actual models relevant to working in sales in the competitive sport environment. Graded on A-F basis only.
Credit Hours: 3

P_R_TR 8089: Research Project
Individual research on approved project. Involves creativity and scholarly inquiry where product does not adhere to the traditional thesis format. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: Parks, Recreation and Tourism graduate major

P_R_TR 8090: Thesis Research in Parks, Recreation and Tourism
Research leading to thesis in field of parks, recreation and tourism. Graded on S/U basis only.
Credit Hour: 1-6
Prerequisites: Parks, Recreation and Tourism graduate major

P_R_TR 8400: Constructs of Leisure
Review analysis and implications of fundamental psycho-social determinants of leisure behavior. Application theories of determinants to existing and proposed leisure service systems.
Credit Hours: 3
P_R_TR 8401: Topics in Recreation and Park Administration
Specialized topics in recreation and park administration dynamics. Subjects and credits vary by semester based on available faculty resources and expertise. Course content announced in advance.
Credit Hour: 1-3
Prerequisites: instructor’s consent

P_R_TR 8411: Independent Work in Parks, Recreation and Tourism
Independent research or special projects in parks, recreation and tourism.
Credit Hour: 1-3
Prerequisites: instructor’s consent

P_R_TR 8420: Leisure, Technology and Human Values
Study of the developmental patterns of leisure services in society with emphasis to the dynamics of technology and leisure on individual and social values.
Credit Hours: 3

P_R_TR 8427: Contemporary Issues in Therapeutic Recreation
The course will include new issues and ideas in the field of therapeutic recreation, such as registration, insurance, liability, licensure, assessment, etc., and how they relate to practitioners and services to clients.
Credit Hours: 3

P_R_TR 8430: Research Methods in Parks, Recreation and Tourism
Analysis of basic research methodology. Review and analysis of research work completed in recreation, park and leisure field.
Credit Hours: 3

P_R_TR 8436: Visitor Behavior and Policy
Course presents issues, concerns and policies dealing with multi-management/planning/operations of outdoor resource based recreation. Such issues as energy, economics, social/political, pollution and user characteristics will be studied.
Credit Hours: 3

P_R_TR 8440: Philosophical Perspectives of Leisure
Study of the theoretical and philosophical perspective of leisure in society with emphasis on integration and development of the student’s personal and professional viewpoint.
Credit Hours: 3

P_R_TR 8450: Administration in Leisure Service Delivery
Review, analysis and synthesis of administrative functions as related to public and private recreation and leisure service enterprises.
Credit Hours: 3

P_R_TR 8460: Financial Operations in Leisure Service Delivery
Review and critical analysis of financial functions, strategies and methodology as related to public and private recreation and leisure service enterprises.
Credit Hours: 3

P_R_TR 8940: Internship in Parks, Recreation and Tourism
Supervised student practice in recreation, park or related settings under qualified instructor.
Credit Hour: 1-6
Prerequisites: Parks, Recreation and Tourism graduate major

Pathology & Anatomical Science (PTH_AS)

PTH_AS 2000: Basic Pathology
Provides nonmedical students with a general understanding of the essential nature of disease, including mechanisms of its development and cause/effect relationships.
Credit Hours: 2
Prerequisites: 5 hours Biological Science or equivalent and 5 hours Chemistry or PTH_AS 2201

PTH_AS 2201: Human Anatomy Lecture
A systems-based survey of human gross anatomy including structure, function and history. Internet access required: lectures and assignments will be online. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Minimum cumulative MU GPA of 2.5 required

PTH_AS 2203: Human Anatomy Laboratory
A systems-based survey of human gross anatomy. Internet access required: most materials will be online. One on-campus laboratory meeting per week. Graded A-F only.
Credit Hours: 2
Prerequisites or Corequisites: PTH_AS 2201
Prerequisites: Minimum cumulative MU GPA of 2.5

PTH_AS 2600: Cytology Female Genital Tract
A definitive study of normal and abnormal cellular changes occurring within the organ system by means of light microscopy with histologic correlation.
Credit Hours: 10
Prerequisites: instructor’s consent

PTH_AS 2610: Respiratory Cytology
A definitive study of the normal and abnormal cellular changes occurring within the system by means of light microscopy, with histologic correlation.
Credit Hours: 4
Prerequisites: instructor’s consent

PTH_AS 2615: Cytology of Body Fluids
Normal and abnormal cellular changes within pleural, peritoneal, pericardial and cerebrospinal fluids by means of light microscopy, with histologic correlation.
Credit Hours: 4
Prerequisites: instructor’s consent
PTH_AS 2620: Gastrointestinal Cytology
A definitive study of the normal and abnormal cellular changes occurring within the system by means of light microscopy, with histologic correlation.

Credit Hours: 4
Prerequisites: instructor's consent

PTH_AS 2625: Oral Cytology
Studies normal and abnormal cellular changes within the oral cavity and oropharynx by means of light microscopy, with histologic correlation.

Credit Hours: 2
Prerequisites: instructor's consent

PTH_AS 2630: Urinary Cytology
Studies normal and abnormal cellular morphology from kidney, ureter and bladder samples, with histologic correlation.

Credit Hours: 4
Prerequisites: instructor's consent

PTH_AS 2685: Special Problems in Cytology
Relating hematologic morphologic findings in conventional body fluid cytology; also review of techniques used in chromosome cultures and karyotyping, with emphasis on sex-related abnormalities.

Credit Hours: 2

PTH_AS 3400: Fundamentals of Medical Technology I
Emphasizes diseases and basic laboratory methods used in clinical laboratory areas: microbiology, hematology, immunology, virology, tissue typing, blood banking and chemistry.

Credit Hours: 3

PTH_AS 3410: Fundamentals of Medical Technology II
Continuation of PTH_AS 3400.

Credit Hours: 3

PTH_AS 3415: Fundamentals of Medical Technology III
Continuation of PTH_AS 3400 and PTH_AS 3410.

Credit Hours: 3

PTH_AS 3420: Clinical Practicum
Presentation and application of concepts and laboratory method used in areas of immunochemistry, toxicology, mycology, uranalysis and cytogenetics.

Credit Hours: 3

PTH_AS 3425: Hemostasis
Lectures and laboratory exercises in basic theory and techniques of hemostasis including platelet function and disorders, plasma coagulation system, acquired and inherited thermostatic disorders.

Credit Hours: 2
Prerequisites: PTH_AS 3400, PTH_AS 3410, PTH_AS 3415

PTH_AS 3430: Clinical Immunology
Antigen-antibody reactions and their role in determining infectious, auto-allergic and inflammatory disease states.

Credit Hours: 3

PTH_AS 3435: Blood Banking
Principles and techniques of transfusion practices related through lectures and experience in the blood bank laboratory.

Credit Hours: 3

PTH_AS 3440: Clinical Hematology
Lectures and laboratory regarding procedures for diagnosing hematologic disorders. Experience in collection of specimens from patients; staining, counting and identifying blood and bone marrow cells.

Credit Hours: 6

PTH_AS 3445: Clinical Microbiology
Diagnostic procedures related to the isolation and identification to infectious microorganisms; bacteria and parasites. Emphasis on human pathogens and their sensitivity patterns with commonly used antibiotics.

Credit Hours: 6

PTH_AS 3450: Clinical Chemistry
Principles of quantitative analysis applied to the measurement of substances in biological fluids. Significance of these findings in the diagnosis and treatment of disease.

Credit Hours: 6

PTH_AS 3455: Principles of Management and Education
Lectures and discussion of management techniques and theories used in supervising laboratory personnel. Analysis of educational objectives and exam questions.

Credit Hour: 1

PTH_AS 3460: Research and Instructional Techniques
Involves library and laboratory research. Includes development of oral and written communications skills.

Credit Hours: 3

PTH_AS 3485: Problems in Medical Technology
Individual supervised work in an area of interest in medical technology.

Credit Hour: 1-3
Prerequisites: instructor's consent

PTH_AS 3500: Cytology of the Female Genital Tract
A definitive study by means of light microscopy of normal and abnormal cellular changes occurring within the female genital tract along with histologic correlation.

Credit Hours: 8
Prerequisites: senior standing and instructor's consent
**PTH_AS 3510: Cytology of Respiratory Tract**
A definitive study by means of light microscopy of normal and abnormal cellular changes occurring with the respiratory tract along with immunohistologic correlation. Prerequisite: senior standing and instructor’s consent.

**Credit Hours:** 4

**Prerequisites:** senior standing and instructor’s consent

**PTH_AS 3515: Cytology of Urinary Tract**
A definitive study by means of light microscopy of normal and abnormal cellular changes occurring within the urinary tract along with histologic correlation.

**Credit Hours:** 4

**Prerequisites:** senior standing and instructor’s consent

**PTH_AS 3520: Cytology of Gastrointestinal Tract**
A definitive study by means of light microscopy of normal and abnormal cellular changes occurring within the gastrointestinal tract along with histologic correlation.

**Credit Hours:** 5

**Prerequisites:** senior standing and instructor’s consent

**PTH_AS 3525: Cytology of Body Fluids**
A definitive study of light microscopy of normal and abnormal cellular changes occurring within body fluid along with histologic correlation.

**Credit Hours:** 4

**Prerequisites:** senior standing and instructor’s consent

**PTH_AS 3530: Cytology of Breast**
A definitive study by means of light microscopy of normal and abnormal cellular changes occurring within the breast with histologic correlation.

**Credit Hours:** 2

**Prerequisites:** senior standing and instructor’s consent

**PTH_AS 3535: Fine Needle Aspiration Cytology**
A definitive study by means of light microscopy of normal and abnormal cellular changes occurring within the fine needle aspirations from various body sites along with histologic correlation.

**Credit Hours:** 2

**Prerequisites:** senior standing and instructor’s consent

**PTH_AS 3540: Special Procedures in Cytology**
Study of hematologic findings in body fluid cytology; chromosome cultures and karyotyping. Emphasizing sex-related abnormalities; hormonal evaluation of smears from the female genital tract and their clinical significance.

**Credit Hours:** 2

**Prerequisites:** senior standing and instructor’s consent

**PTH_AS 3545: Clinical Management**
Procedures and processes helpful in operating in cytology laboratory, especially at the supervisory level.

**Credit Hour:** 1

**Prerequisites:** senior standing and instructor’s consent

**PTH_AS 3550: Technical Application with Research in Cytotechnology**
Research is an area of interest in cytology resulting in a written and oral presentation.

**Credit Hours:** 2

**Prerequisites:** senior standing and instructor’s consent

**PTH_AS 3555: Cytologic Preparation**
Independent applications of techniques used to prepare cytologic material.

**Credit Hours:** 2

**Prerequisites:** senior standing and instructor’s consent

**PTH_AS 3560: Practical Cytotechnology**
Independent application of techniques used to examine cytology material an manage a cytology laboratory.

**Credit Hours:** 6

**Prerequisites:** senior standing and instructor’s consent

**PTH_AS 3585: Problems in Cytotechnology**
Individual supervised work in an area of interest in cytology.

**Credit Hour:** 1-3

**Prerequisites:** instructor’s consent

**PTH_AS 3600: Elementary Histology**
Simplified gross and microscopic anatomy of normal organs and tissues commonly found in the routine histopathology laboratory.

**Credit Hours:** 3

**PTH_AS 3610: Basic Histotechnology**
Theories and technical application of procedures used in the preparation of tissue sections and slides of microscopic examination; including instrumentation, fixation, dehydration, clearing infiltration, embedding, mirotomy, H&E staining and coverslipping.

**Credit Hours:** 6

**PTH_AS 3615: Special Staining Techniques**
Principles and procedures for special staining techniques for carbohydrates, connective tissues, blood, fat and lipids, pigments and minerals, bacteria and fungi, nerve, and other special cell stains.

**Credit Hours:** 6

**PTH_AS 3620: Applied Histotechnology**
Application of basic histological techniques in the preparation of histologic sections and slides in a clinical setting.

**Credit Hours:** 9

**PTH_AS 3625: Research and Instructional Techniques**
Involves library and laboratory search. Includes development of oral and written communications skills.

**Credit Hours:** 3

**Prerequisites:** senior students admitted to Histotechnology Curriculum
**PTH_AS 3630: Clinical Management**
Supervisory techniques and procedures helpful in operating a histopathology laboratory; including laboratory safety, workload recording, and personnel management in a laboratory situation.

**Credit Hours:** 2

---

**PTH_AS 3635: Basic Disease Processes**
Special readings and discussions of basic disease processes of interest to the anatomic pathology laboratory.

**Credit Hours:** 2

---

**PTH_AS 3680: Advances Histotechnology**
Advanced and specialized techniques used in the preparation and processing of muscle, nerve and rectal biopsies; special techniques in cytology; electron microscopy; enzyme and immunohistochemistry; plastic embedding and neuropathologic techniques.

**Credit Hours:** 6

---

**PTH_AS 3685: Problems in Histotechnology**
Individual supervised work in a specialized area of histotechnology.

**Credit Hour:** 1-3

**Prerequisites:** instructor’s consent

---

**PTH_AS 4200: General Pathology**
Basic pathological mechanisms of human disease. Introductory principles of clinical laboratory measurements of altered organ system function studied.

**Credit Hours:** 5

**Prerequisites:** PTH_AS 7200, PTH_AS 7220, PTH_AS 7310; and instructor’s consent

---

**PTH_AS 4205: General Pathology Laboratory**
Gross and microscopic applied study of basic pathological disease mechanisms. Laboratory assessment of these basic disease mechanisms.

**Credit Hours:** 3

**Prerequisites:** PTH_AS 7200, PTH_AS 7220, PTH_AS 7310; or the equivalents; and instructor’s consent

---

**PTH_AS 4210: Seminar in Pathology and Anatomical Sciences**
Presentation and discussion of original investigations and current literature.

**Credit Hour:** 1

---

**PTH_AS 4220: Forensic Pathology and Death Investigation**
Forensic Pathology and Death Investigation.

**Credit Hours:** 2

---

**PTH_AS 4222: Gross Human Anatomy (The Health Professions)**
Gross structure and neuroanatomy of the human body; dissection of extremities, back, head, neck abdomen and thorax.

**Credit Hours:** 7

**Prerequisites:** instructor’s consent

---

**PTH_AS 4250: Interpretations of Lab Procedures in Primary Health Care**
Discussion and analysis of selected laboratory test procedures used in office and clinic settings involved with primary health care.

**Credit Hour:** 1

**Prerequisites:** graduate level Physiology course and departmental consent

---

**PTH_AS 6331: ABS Advanced Medical Neurosciences**
ABS Advanced Medical Neurosciences

**Credit Hour:** 5-10

---

**PTH_AS 6333: ABS Pathology/Anatomical Science Research**
ABS Pathology/Anatomical Science Research

**Credit Hours:** 5

---

**PTH_AS 6335: ABS Pathology/Anatomical Science Research and Review**
ABS Pathology/Anatomical Science Research and Review

**Credit Hours:** 5

---

**PTH_AS 6341: ABS Science Anatomical Science Teaching**
ABS Science Anatomical Science Teaching

**Credit Hours:** 5

---

**PTH_AS 6343: ABS Surgical Anatomy**
ABS Surgical Anatomy

**Credit Hours:** 5

---

**PTH_AS 6345: ABS Surgical Anatomy of the Head and Neck**
ABS Surgical Anatomy of the Head and Neck

**Credit Hours:** 5

---

**PTH_AS 6347: ABS Surgical Anatomy of the Back and Limbs**
ABS Surgical Anatomy of the Back and Limbs

**Credit Hours:** 5

---

**PTH_AS 6349: ABS Surgical Anatomy of the Pelvis and Perinium**
ABS Surgical Anatomy of the Pelvis and Perinium

**Credit Hour:** 5-10

---

**PTH_AS 6600: Anatomic Pathology**
Anatomic Pathology

**Credit Hours:** 5

---

**PTH_AS 6602: Clinical Pathology**
Clinical Pathology

**Credit Hours:** 5
PTH_AS 6604: Forensic Pathology
Forensic Pathology
Credit Hours: 5

PTH_AS 6606: Anatomic/Clinical Pathology
Anatomic/Clinical Pathology
Credit Hours: 5

PTH_AS 6608: Anatomy Elective
Anatomy Elective
Credit Hours: 5

PTH_AS 7020: Forensic Pathology and Death Investigation
Summary of Forensic Death Investigation from beginning to end. Will include some of the current laboratory techniques seen on "CSI" Team taught by experts in the fields including medical examiners, death investigators, forensic anthropologists, police CSI teams, lawyers and others.
Credit Hours: 2
Prerequisites: Basic Biology

PTH_AS 7220: Human Histology and Organology
Detailed study of cytology, histology and microscopic anatomy.
Credit Hours: 4
Prerequisites: 10 hours of Biological Sciences and instructor's consent

PTH_AS 7222: Gross Human Anatomy (The Health Professions)
Gross/human structure through dissection. Graded on A-F basis only.
Credit Hours: 7
Prerequisites: Acceptance into Physical Therapy Programs or instructor's consent

PTH_AS 7230: Mammalian Reproduction
Reproduction in mammals, with emphasis on the neuroendocrine control of the hormones involved in reproductive process: biosyntheses, biologic actions, role.
Credit Hours: 3
Prerequisites: graduate standing in one of Animal, Biologic, Medical, or Veterinary Sciences, instructor's consent

PTH_AS 7300: Advanced Pathology
Demonstration and simulation study of gross, microscopic and clinical laboratory pathology of major human organ systems.
Credit Hours: 5
Prerequisites: PTH_AS 4200 and PTH_AS 4205 or equivalent and instructor's consent

PTH_AS 7320: Autonomic Nervous System
A comprehensive consideration of the autonomic nervous system in man, with emphasis on morphology.
Credit Hours: 2
Prerequisites: PTH_AS 2201, Comparative Anatomy or equivalent, and instructor's consent

PTH_AS 7330: Hematopoietic Organs
Morphological and functional relationships of the blood-forming organs.
Credit Hours: 2
Prerequisites: Basic Histology and instructor's consent

PTH_AS 7350: Advanced Pathology Laboratory
Demonstration and simulation and character of work depend upon needs, qualifications, and of major human organ systems.
Credit Hours: 3
Prerequisites: PTH_AS 4200 and PTH_AS 4205 or equivalent and instructor's consent

PTH_AS 7400: Seminars in Translational Medicine
Students participate in regular seminars and discussion groups with other students interested in clinical and translational sciences. Students, working together with faculty in biomedical sciences and those working in clinical and translational fields, identify seminar topics. Learning objectives and written assignments are arranged on an individual basis. The course is open to all graduate level students and students enrolled in professional schools, for 0-5 credit hours, with instructor's approval. Graded on S/U basis only.
Credit Hour: 0-5

PTH_AS 8000: Comparative Pathology
(same as V_PBIO 8430). Biochemical and morphologic lesions related to the mechanism of disease expression in plants and animals.
Credit Hours: 3

PTH_AS 8010: Current Issues in Anatomical Sciences
Survey of the recent literature in integrative anatomy, including functional, evolutionary, developmental and translational anatomy, conducted through readings and discussion. Grade determined by participation and presentation of weekly readings. May be repeated for a maximum of 10 hours. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: instructor's consent

PTH_AS 8090: Advanced Pathology
Open only to properly qualified graduate students, with counsel of faculty. Focus of MS-related research in evolutionary morphology, genomics, neuroscience, pathobiology or laboratory sciences. Graded on S/U basis only.
Credit Hour: 1-99

PTH_AS 8100: Fundamentals of Evolutionary Biology
Principles of modern evolutionary biology. Topics include: phylogeny, paleobiology, developmental processes, genetic and phenotypic variation, form and function, speculation, macroevolution, and molecular mechanisms.
Credit Hours: 3
Prerequisites: instructor's consent
PTH_A5 8150: Fundamentals of Evolutionary Morphology
This course is a survey of the fundamentals of modern evolutionary morphology. Topics will include: patterns of vertebrate evolution, comparative methods, development and ontogeny, constraint, functional morphology, evolutionary innovations, and experimental methods. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: instructor’s consent required

PTH_A5 8201: Human Anatomy: Back and Upper Limb
Developmental, gross, and clinical anatomy of the human back and upper limb, including skeletal, muscular, nervous, and vascular tissues. Graded on an A-F basis only.

Credit Hours: 2
Prerequisites: instructor’s consent required

PTH_A5 8202: Human Anatomy: Thorax and Abdomen
Developmental, gross, and clinical anatomy of the human thorax and abdomen. Graded on an A-F basis only.

Credit Hours: 2
Prerequisites: instructor’s consent required

PTH_A5 8203: Human Anatomy: Head, Neck and Neuroanatomy
Developmental, gross and clinical anatomy of the human head, neck and neuroanatomy. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: instructor’s consent required

PTH_A5 8204: Human Anatomy: Pelvis and Lower Limb
Developmental, gross and clinical anatomy of the human pelvis and lower limb. Graded A-F basis only.

Credit Hours: 2
Prerequisites: instructor’s consent required

PTH_A5 8205: Problems in Pathology and Anatomical Sciences
Regions or systems which may include developmental, microscopic, and gross anatomy.

Credit Hour: 1-99
Prerequisites: instructor’s consent

PTH_A5 8290: Research in Pathology and Anatomical Sciences
Research unrelated to thesis work in evolutionary morphology, genomics, neuroscience or pathobiology. Graded on S/U basis only.

Credit Hour: 1-99
Prerequisites: instructor’s consent

PTH_A5 8500: Seminar in Translational Neuroscience
Students participate in seminars and discussion groups. Masters students identify seminar topics and present existing data with findings. PhD students identify seminar topics, conduct research and present findings. Learning objective and written assignments are arranged individually. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1-5

PTH_A5 8900: Research in Pathology and Anatomical Sciences
Open only to properly qualified graduate students, with counsel of faculty. Focus of PhD-related research in evolutionary morphology, genomics, neuroscience or pathobiology. Graded on S/U basis only.

Credit Hour: 1-99

Peace Studies (PEA_ST)

PEA_ST 1001: Topics in Peace Studies
Underclass topics. Subjects may vary from semester to semester. May be repeated to 6 hours maximum. Graded on A-F basis only.

Credit Hours: 3

PEA_ST 1003: Topics in Peace Studies - Behavioral Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

Credit Hour: 2-3

PEA_ST 1004: Topics in Peace Studies
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

Credit Hour: 2-3

PEA_ST 1005: Topics in Peace Studies - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

Credit Hour: 2-3

PEA_ST 1050: Introduction to Peace Studies
Interdisciplinary overview including theories on the nature of aggression and war, case studies of contemporary conflicts, consideration of various peace proposals, conditions making war or peace likely.

Credit Hours: 3
Prerequisites: ENGLSH 1000, sophomore standing
PEA_ST 1120: Population and Ecology
(same as RU_SOC 1120 and SOCIOL 1120). Changes in the structure and characteristics of population groups and their relationship to both human and non-human aspects of the biophysical environment.

Credit Hours: 3

PEA_ST 1150: The Amish Community
(same as RU_SOC 1150). Examines historical antecedents and contemporary culture and social structure of the Amish. Topics include cultural symbols, life ceremonies, the family, counter cultural pressures, stresses and social change.

Credit Hours: 3
Prerequisites: RU_SOC 1000, SOCIOL 1000, or ANTHRO 1000

PEA_ST 1195: Service Learning in Peace Studies
Students will perform significant and long term community service while exploring issues central to peace studies.

Credit Hour: 1

PEA_ST 1610: Russia in Modern Times
(same as HIST 1610). Survey of Russian History from 1801 to present.

Credit Hours: 3

PEA_ST 2000: Exploration in Social and Economic Justice
(same as SOC_WK 2000). This course explores issues of fairness and equality in economic, political and social systems, and applies social justice principles to major social problems. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ENGLSH 1000

PEA_ST 2003: Topics in Peace Studies: Behavioral Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

Credit Hour: 2-3
Prerequisites: Sophomore standing or instructors consent

PEA_ST 2004: Topics in Peace Studies - Social Sciences
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

Credit Hour: 2-3
Prerequisites: sophomore standing or instructor's consent

PEA_ST 2005: Topics in Peace Studies - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

Credit Hour: 2-3
Prerequisites: sophomore standing or instructor's consent

PEA_ST 2100: The Vietnam and Iraq Wars: Lessons for the Future
An interdisciplinary analysis of the Vietnam War and the America-led war with Iraq. Course focuses on the reasons that America lost in Vietnam, the reasons it won in Iraq, and the lessons these conflicts provided for America’s future. Graded on A-F basis only.

Credit Hours: 3

PEA_ST 2110: Perspectives on Peace in the Middle East
This course examines conflict theories, international relation theories and Middle Eastern politics. It is intended as a comprehensive applied study of these theories. The initial weeks will cover the major conflict theories including social learning theory, social identity theory, relative deprivation theory, human needs theory, and rational choice theory. The focus of this course will primarily be on conflicts and peace efforts of the Middle East including but not limited to: the Arab Spring, the Israeli-Palestinian conflict, Jordanian-Palestinian identity issue, peace efforts in the Middle East. Ultimately, students should explore ways to bridge the theories learned and apply them to conflicts, negotiation and peace efforts in the Middle East.

Credit Hours: 3

PEA_ST 2180: Undergraduate Seminar I in Peace Studies
Conflict Resolution in Theory and Practice. Conflicts are studied in the light of the social and behavioral sciences.

Credit Hours: 3
Prerequisites: PEA_ST 1050 or instructor's consent

PEA_ST 2181: Undergraduate Seminar II in Peace Studies
Contemporary International Conflict: A readings and research seminar in which students will address such problems as global conflicts, the Arms Race and disarmament, global development.

Credit Hours: 3
Prerequisites: PEA_ST 1050 or instructor’s consent

PEA_ST 2182: Critical Dialogues: Nonviolence in Peace/Democracy Movements
(same as SOCIOL 2182). History and theory of movements for peace, justice, and democracy. Development of violent and nonviolent tactics and factions in movements; relationship to state authority. Cases such as Gandhi’s Independence, American Civil Rights, Arab Spring, and Occupy movements.

Credit Hours: 3
Prerequisites: PEA_ST 1050 or instructor’s consent

PEA_ST 2183: Undergraduate Seminar IV in Peace Studies
Images of War and Peace. Study of war and peace in philosophical and religious systems, film, poetry, art, fiction, and the media.

Credit Hours: 3
Prerequisites: PEA_ST 1050 or instructor’s consent

PEA_ST 2200: Nuclear Weapons: Environmental, Health and Social Effects
(same as HLTH_SCI 2200 and SOCIOL 2281). Environmental consequences of the nuclear arms race, "regional" nuclear war, and...
PEA_ST 2201: Topics in Peace Studies-General
Organized study of selected topics in Peace Studies. Subjects and credit hours may vary from semester to semester.
Credit Hours: 2-3
Prerequisites: sophomore standing

PEA_ST 2220: America in the 1960's
(same as HIST 2220). Examines the political and cultural main currents of the 1960s. Emphasizes the challenges mounted by protest groups and the responses of America’s political leadership to the ferment of the period.
Credit Hours: 3
Prerequisites: sophomore standing

PEA_ST 2280: Race, Democracy, and Violence in Cuba and Haiti
(same as SOCIOL 2280). A sociological approach to understand race/ethnicity, identity, citizenship, human rights, violence, and political and economic systems in the Caribbean. Comparisons of the culture, politics, and historical trajectories of Cuba and Haiti using Post-Colonial and Feminist theories. Graded on A-F basis only.
Credit Hours: 3

PEA_ST 2284: Critical Dialogs: Global Environmental Policy Conflicts
