The Educational Psychology program is committed to the dissemination
and development of knowledge and skills in human learning and
cognition, development, and motivation. We use quantitative and
qualitative methods to study how people’s thinking, motivation, and
behavior change across time. We study how different social settings
like classroom, family, work, and peers affect people’s well-being,
learning, and behavior. The study of educational psychology is relevant
to teachers, coaches, athletes, nurses, counselors, software developers,
trainers, social workers, program evaluators, and administrators.

Educational psychologists attempt to understand how:

• to improve learning, academic achievement, and motivation to
  improve human performance
• development influences learning and well-being
• society influences learning and behavior
• school influences students’ development in other settings

The master’s degree program requires at least 33 credit hours. Students
enrolled in the MA do a thesis or research manuscript that demonstrates
research competence and includes an oral defense of the paper. The MA
is the preferred degree for students who intend to pursue a PhD.

Master’s students must have completed or plan to complete 15 hours of
prerequisite course work as listed below. The prerequisite coursework
is over and above that required for the master’s degree itself, and
thus cannot be counted on the Program of Study for the master’s
degree. Many students will have completed these prerequisites in their
undergraduate programs.

1. Statistics: A course in statistics covering descriptive statistics,
correlation, t-tests, and chi-square. If undergraduate coursework
does not include an introductory level course in statistics,
ESC_PS 4170/ESC_PS 7170 must be taken to satisfy this
prerequisite, but it then cannot count on the Program of Study.
2. Psychological Theory: Two courses in psychological theory (not including the introductory course in psychology), for example, personality, social, developmental, or learning.

3. Additional courses: Two additional courses in education, psychology, or sociology.

For MA with thesis or manuscript, 6 hours of these courses must be ESC_PS 8090. Elective courses can be taken from Educational, School, & Counseling Psychology or from other departments such as Human Development and Family Studies, Psychological Sciences, or Information Science and Learning Technology.

Sample Plan of Study

The plan of study will depend on the student's career goals and research interests and should be completed in consultation with the advisor.

Thesis/Non-Thesis Requirements

After working with the academic advisor on developing a thesis proposal, the student meets with the thesis committee to obtain approval. This happens before data collection begins. After the project is completed, the student submits a written thesis and defends the thesis to the committee. The defense can occur only when MU is officially in session.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Educational, School, and Counseling Psychology program (https://gradstudies.missouri.edu/gradecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

MA in Educational, School, and Counseling Psychology with Emphasis in Health Education and Promotion

Degree Requirements

Health Education is a strong graduate program within the Department of Educational and Counseling Psychology. The graduate program serves bachelors and masters degreed students from the state of Missouri as well as from other states. Many of our graduate students are professionals practicing in the field and come to MU for graduate training. A number of our graduate students cross train in health related fields like athletics, nursing, nutrition, physical training, physical therapy, occupational therapy, and psychology.

Students who earned a bachelor's degree in a health-related program of study are qualified to enter the masters program in health education. A minimum of 30 credit hours are required for the M.A. M.A. students are required to write a thesis. Students who earn a master's degree are encouraged to take the CHES (Certified Health Education Specialist) examination for certification.

Total Credits: 18

Thesis/Non-Thesis Requirements

All MA students are required to complete a Thesis in the last semester of the program.

Admissions

This program is not accepting applications at this time.
MA in Educational, School, and Counseling Psychology with Emphasis in School Psychology

Degree Requirements

The Masters of Arts (M.A.) program in School Psychology is completed concurrently with the Doctoral (Ph.D.) program in School Psychology. The M.A. program itself is not a terminal degree program. Students admitted to the Doctoral program in School Psychology (Ph.D.) who have already completed an advanced degree in School Psychology or a related field, including completion of a data-based graduate level research project, may not be required to complete a Masters of Education (M.A.) program in School Psychology. Students admitted to the Ph.D. degree program typically complete degree requirements (coursework and comprehensive examination) for the Masters of Arts by the end of their second year in the program. Students admitted to the M.A./Ph.D. programs in School Psychology are prepared to support the learning, behavior, and mental health of youth and their families as well as support the enhancement of the educational and mental health systems that serve those children and families. Through coursework as well as research, clinical, and teaching experiences, graduates are prepared to serve as leaders in clinical settings as well as researcher/scholars in higher education settings. Completion of the M.A. program alone does not lead to licensure as a Psychologist nor state certification as a School Psychologist, however graduates of both the M.A. and Ph.D. programs are eligible for licensure as a Psychologist and state certification as a School Psychologist, pending completion of additional examinations specified in their intended jurisdiction.

Thesis/Non-Thesis Requirements

Students are required to complete a data-based research project in order to earn their M.A. in School Psychology. Students have two options, the master’s thesis or the master’s manuscript, both requiring similar scholarly and scientific rigor to their project. The thesis option requires that students comply with the graduate school expectations for committee membership and formatting, while the manuscript option does not. Students taking the latter option often format their manuscript for publication in professional journals.

Admissions

Students are admitted concurrently to the M.A. and Ph.D. programs in School Psychology based on the admissions criteria identified below in the Doctoral program.

MA in Educational, School, and Counseling Psychology with Emphasis in Statistics, Measurement, and Evaluation in Education

Degree Requirements

The Statistics, Measurement, and Evaluation in Education program offers courses in applied statistics, from the quantitative foundations of educational research to advanced methods such as multivariate statistics, multilevel modeling, and latent variable modeling. We also offer a number of courses in educational measurement, covering topics such as classical test theory, item response theory, and generalizability theory. In addition, our students have the opportunity to take a wide range of advanced statistics and quantitative methods courses, from probability, sampling methodology, and categorical data analysis to stochastic theory, time series analysis, Bayesian statistics, and other cutting-edge quantitative
techniques. We train our students in various statistical software programs including SPSS, SAS, R, Mplus, Amos, HLM, and BILOG-MG. Our students also take courses in learning theories, aspects of human development, and program evaluation.

Selected graduate level courses in the Psychology Department with advisor approval (e.g., latent variable models in statistical analyses, categorical data analysis)

Selected graduate level courses from the Statistics Department with advisor approval (e.g., Bayesian statistics, nonparametric statistics), NOTE: MA with thesis or manuscript, 6 hours of these courses must be ESC_PS 8090.

Sample Plan of Study

The plan of study will depend on the student’s career goals and research interests and should be completed in consultation with the Master’s Committee.

Thesis/Comprehensive Exam Requirements

The student will consult with the academic advisor about whether to complete a thesis or comprehensive exam.

If choosing a thesis, students work with the academic advisor on developing a thesis proposal, and the student then meets with the Master’s program committee to obtain approval of the written thesis proposal. This happens before data collection begins. After the project is completed, the student submits a written thesis and defends the thesis to the Master’s program committee. The defense can occur only when MU is officially in session.

If choosing a comprehensive exam, the student must complete: 1) Demonstration of Knowledge via a written exam; and 2) Oral Exam on the Demonstration of Knowledge exam.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Educational, School, and Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies. Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of the Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Apply online by submitting the following documents using the MU Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/apply) application form by January 15th for the next Fall cohort.

- Three letters of recommendation
- Curriculum Vita
- Official academic transcripts of all previous undergraduate and graduate work
- Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, statistics, or a related major.
- Statement of purpose addressing the following:
  - Describe (1) your research interests that you hope to pursue in graduate school, (2) your career objectives, and (3) how being accepted into MU’s program will benefit your career aspirations.
  - Describe interests or experience in designing empirical studies and/or analyzing empirical data. (500 words max.)
  - Describe interest or experiences that demonstrate your potential in applied, theoretical, and/or computational statistics that you believe distinguish you as a candidate for graduate study. (250 words max.)
- Official Graduate Record Examination (GRE) scores (preferred Verbal score > 151 and Quantitative score > 155)
- TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher)

MEd in Educational, School, and Counseling Psychology

Admission Contact Information

Christina Edholm (EdholmC@missouri.edu)
16 Hill Hall; Columbia, MO 65211
573-882-7738

Admission Criteria

- Minimum GPA: 3.0
- Minimum TOEFL scores:
  - Internet-based test (IBT) 92
  - Paper-based test (PBT) 580

- Recommended GRE scores:
When did you take the GRE? | Verbal + Quantitative | Analytical |
--- | --- | ---
On or after August 1, 2014 | 305 | 4.0

Recommended Analytic Writing score = 4

Application Deadlines
- Fall deadline: December 1st for most programs except Educational Psychology and Statistics, Measurement, and Evaluation in Education (SMEE), which is January 15th
- M Ed, EdSp in Mental Health Practices in Schools (online degrees) - rolling admission
- M Ed in Positive Coaching (online degree) - rolling admission

Note: If an applicant is admitted but does not hold a bachelor’s degree in a related discipline or does not have relevant background course work, the applicant must complete prerequisite courses as specified by the faculty of the department.

Required Application Materials
To the Office of Graduate Studies: (https://applygrad.missouri.edu/apply)
- All required Graduate Studies documents
- Official transcripts
- GRE scores
- TOEFL scores
- 3 letters of recommendation via the online application
- Personal statement and vitae via online application per departmental requirements

Note: Online programs do NOT require GRE scores. Check individual online programs for required application materials.

MEd in Educational, School, and Counseling Psychology with Emphasis in Career Counseling Psychology

Degree Requirements
Career Psychology provides the theoretical basis for this program. It prepares one to practice in a variety of settings, most notably college career or advising centers, other student affairs settings, or business settings where there may be opportunity for defining or developing career roles for students or employees. MU’s Career Center is where students practice what is learned in classes making this a strong scientific-practitioner model of training. This program was designed to move one toward qualifying a student to meet most but not all of the State of Missouri’s curricular requirements for Licensure as a Professional Counselor (LPC). In addition to completing course work beyond what is required for this degree, the graduate must also complete 3000 hours of supervised counseling and pass a licensure examination.

General Psychology Core

Thesis/Non-Thesis Requirements
Students are required to pass the National Counselor Examination in Fall or Spring semester of the second year to demonstrate they have gained the requisite knowledge for the profession.

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://
Apply online by submitting the following documents using the MU Office of Graduate Studies (https://applygrad.missouri.edu/apply) application form by December 1st for the next Fall cohort.

1. Three letters of recommendation
2. Curriculum Vita
3. Official academic transcripts of all previous undergraduate and graduate work
   a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
4. Statement of purpose addressing the following:
   a. Describe interests and experiences working with people from diverse backgrounds (e.g. ethnic, cultural, socio-economic, religious, ability status, sexual orientation). How have these experiences influenced you? (250 word maximum).
   b. Describe experiences that demonstrate your potential for leadership that you believe distinguish you as a candidate for graduate study. (250 word maximum)
   c. Describe (1) your previous experience serving in a helping or counseling role, (2) your interests and career objectives, (3) how these interests and career objectives have developed, (4) how these interests match those of specific program faculty, and (5) how being accepted into the program of your choice will benefit your career aspirations and help you act upon your beliefs, goals, and philosophy. (Please limit to 1000 words)
5. Official Graduate Record Examination (GRE) scores for tests taken on or after August 1, 2012 should have a combined Verbal and Quantitative score of 305.
6. TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher)

Applicants with a bachelor’s degree in a field not related to psychology will be required to complete 15 hours of prerequisite courses in the behavioral sciences (including an introductory statistics course) either prior to, or concurrently with, coursework in the program. This prerequisite coursework is over and above that required for the master’s degree itself and is not counted on the Program of Study for the master’s degree.

MEd in Educational, School, and Counseling Psychology with Emphasis in Counseling Psychology

Degree Requirements
The MU Masters program in Counseling Psychology provides students training and education in the scientist-practitioner philosophy that is consistent with most Counseling Psychology Ph.D. programs, including the one at MU. Students will complete core coursework in counseling psychology and receive clinical training in the form of practicum experience and research training through faculty labs, research teams, and other research projects. They will also be required to complete an independent research manuscript during their second year in the program. This program has more of a research focus than most counseling masters programs. The program is not designed for students interested exclusively in practicing at the masters level, and students who graduate from this program will not yet be license-eligible for a LPC in the state of Missouri (this would require additional coursework and training).

Thesis/Non-Thesis Requirements

Students are required to pass the National Counselor Examination in Fall or Spring semesters of the second year to demonstrate they have gained the requisite knowledge for the profession.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

Apply online by submitting the following documents using the MU Office of Graduate Studies (https://applygrad.missouri.edu/apply) application form by December 1st for the next Fall cohort.

1. Three letters of recommendation
2. Curriculum Vita
3. Official academic transcripts of all previous undergraduate and graduate work
   a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
4. Statement of purpose addressing the following:
   a. Describe interests and experiences working with people from diverse backgrounds (e.g. ethnic, cultural, socio-economic, religious, ability status, sexual orientation). How have these experiences influenced you? (250 word maximum).
   b. Describe experiences that demonstrate your potential for leadership that you believe distinguish you as a candidate for graduate study. (250 word maximum)
   c. Describe (1) your previous experience serving in a helping or counseling role, (2) your interests and career objectives, (3) how these interests and career objectives have developed, (4) how these interests match those of specific program faculty, and (5) how being accepted into the program of your choice will benefit your career aspirations and help you act upon your beliefs, goals, and philosophy. (Please limit to 1000 words)
5. Official Graduate Record Examination (GRE) scores for tests taken on or after August 1, 2012 should have a combined Verbal and Quantitative score of 305.
6. TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher)

Applicants with a bachelor’s degree in a field not related to psychology will be required to complete 15 hours of prerequisite courses in the behavioral sciences (including an introductory statistics course) either prior to, or concurrently with, coursework in the program. This prerequisite coursework is over and above that required for the master’s degree itself and is not counted on the Program of Study for the master’s degree.

MEd in Educational, School, and Counseling Psychology with Emphasis in Educational Psychology

Degree Requirements

The Educational Psychology program is committed to the dissemination and development of knowledge and skills in human learning and cognition, development, and motivation. We use quantitative and qualitative methods to study how people’s thinking, motivation, and behavior change across time. We study how different social settings like classroom, family, work, and peers affect people’s well-being, learning and behavior. The study of educational psychology is relevant to teachers, coaches, athletes, nurses, counselors, software developers, trainers, social workers, program evaluators, and administrators.

Educational psychologists attempt to understand how:

• to improve learning, academic achievement, and motivation
• development influences learning and well-being
• society influences learning and behavior
• school influences students’ development in other settings

The master’s degree program requires at least 33 credit hours. Students enrolled in the MEd take a 4 hour comprehensive exam at the end of the program unless in the online program. Master’s students must have completed or plan to complete 15 hours of prerequisite coursework as listed below. The prerequisite coursework is over and above that required for the master’s degree itself, and thus cannot be counted on the Program of Study for the master’s degree. Many students will have completed these prerequisites in their undergraduate programs.

1. Statistics: A course in statistics covering descriptive statistics, correlation, t-tests, and chi-square. If undergraduate coursework does not include an introductory level course in statistics, ESC_PS 4170/ESC_PS 7170 must be taken to satisfy this prerequisite, but it then cannot count on the Program of Study.
2. Psychological Theory: Two courses in psychological theory (not including the introductory course in psychology), for example, personality, social, developmental, or learning.
3. Additional courses: Two additional courses in education, psychology, or sociology.

For MA with thesis or manuscript, 6 hours of these courses must be 8090. Elective courses can be taken from Educational, School, & Counseling Psychology or from other departments such as Human Development and Family Science, Psychological Sciences, or Information Science and Learning Technology.

Student Learning and Well-being (online)
An online master's degree with a student learning and well-being focus is also available. The 33-hour program was developed with the working K-12 classroom teacher in mind. Course work is completely online and provides practical applications of learning theory, motivation, assessment of student well-being, mental health, issues of bullying, positive psychology, and the development of a safe and supportive school environment.

No GRE is required.

Complete program details (e.g., how to apply, course planner) are available at the Student Learning and Well-being website.

Sample Plan of Study
The plan of study will depend on the student's career goals and research interests and should be completed in consultation with the advisor.

Thesis/Non-Thesis Requirements
After working with the academic advisor on developing a thesis or project proposal, the student meets with his or her committee to obtain approval. This happens before data collection begins. After the project is completed, the student submits a written thesis and defends the thesis to the committee. The defense can occur only when MU is officially in session.

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/ degreecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

Apply online by submitting the following documents using the MU Office of Graduate Studies (https://applygrad.missouri.edu/apply) application form by January 15th for the next Fall cohort.

1. The three letters of recommendation
2. Curriculum Vita
3. Official academic transcripts of all previous undergraduate and graduate work
   a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
4. Statement of purpose addressing the following:
   a. Describe experiences teaching, designing instruction, and engaging in research and how these experiences have prepared you for graduate study. (500 word maximum)
   b. Describe (1) your research interests that you hope to pursue in graduate school (2) how these interests match those of specific faculty (3) your career objectives, and (4) how being accepted into MU’s program will benefit your career aspirations. (Please limit to 500 words)
5. Official Graduate Record Examination (GRE) scores for tests taken on or after August 1, 2012 should have a combined Verbal and Quantitative score of 305.
6. TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher)

Applicants with a bachelor's degree in a field not related to psychology will be required to complete 15 hours of prerequisite courses in the behavioral sciences (including an introductory statistics course) either prior to, or concurrently with, coursework in the program. This prerequisite coursework is over and above that required for the master's degree itself and is not counted on the Program of Study for the master's degree.

MEd in Educational, School, and Counseling Psychology with Emphasis in Health Education and Promotion

Degree Requirements
Health Education is a strong graduate program within the Department of Educational and Counseling Psychology. The graduate program serves bachelors and masters degreeed students from the state of Missouri as well as from other states. Many of our graduate students are professionals practicing in the field and come to MU for graduate training. A number of our graduate students cross train in health related fields like athletics, nursing, nutrition, physical training, physical therapy, occupational therapy, and psychology.

Students who earned a bachelor's degree in a health-related program of study are qualified to enter the masters program in health education. A minimum of 30 credit hours are required for the MEd Students who earn a master's degree are encouraged to take the CHES (Certified Health Education Specialist) examination for certification.

Sample Plan of Study
A student’s plan of study will vary depending on her/his program track and career goals and should be completed in consultation with her/his academic advisor.

Thesis/Non-Thesis Requirements
The M.Ed. student is required to take a comprehensive examination during the last semester in the program.
Admissions
This program is not accepting applications at this time.

MEd in Educational, School, and Counseling Psychology with Emphasis in Mental Health Practices in Schools

The online Mental Health Practices in Schools (http://online.missouri.edu/degreeprograms/education/mental-health-practices-in-schools/masters) program is intended for school personnel, educators and other community mental health professionals who work with children and adolescents in schools and community agencies. This includes elementary and secondary teachers, special education professionals, school counselors, school nurses, administrators, at-risk coordinators and resource officers, safety coordinators, substance abuse coordinators, speech/language pathologists, itinerant and migrant educators, and private practitioners.

Courses are designed to offer practical applications of psychological concepts and are taught by experts in the field. The program identifies and deals with issues that promote positive mental health of children and adolescents. Courses in the program provide a solid base to increase awareness, knowledge, and skills in areas such as:

- Identifying and assessing evidence-based prevention and intervention strategies and programs
- Communicating effectively with parents, children and school personnel
- Building resiliency and optimism in children and adolescents
- Increasing awareness of multicultural and diversity issues
- Understanding mental, emotional, and behavioral factors in youth
- Managing crisis interventions
- Applying wellness management for self and others
- Implementing positive behavior support and strategies in the classroom
- Collaborating with families and other school personnel

Note: This program does not provide school counselor certification, nor any professional counseling licensure.

Website: Mental Health Practices in Schools (http://online.missouri.edu/degreeprograms/education/mental-health-practices-in-schools/masters).

Degree Requirements
This is a 34 credit hour program. Students take 25 hours of required course work and 9 hours of electives.

Additional Electives are available through the other ESCP online programs (http://online.missouri.edu/degreeprograms/escp.aspx) with advisor approval.

Thesis/Non-Thesis Requirements

Capstone paper
The program requires a capstone integrative paper allowing students to demonstrate the knowledge, skills, and competencies acquired through the program's course work.

Admissions
Applications are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational, School, and Counseling Psychology program (below) and the minimum requirements of the Office of Graduate Studies (https://gradstudies.missouri.edu/admissions/eligibility-process). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission criteria (M Ed)
1. Successful completion of the baccalaureate degree at an accredited college/university.
2. 3.0 or better grade point average in the last 60 hours of baccalaureate coursework
3. TOEFL score: Minimum 580 (paper) or 92 (ibt). Applies to non-native English speaking applicants only. If the non-native English-speaking applicant has successfully completed one year of full-time post-secondary (college-level) study in a country where English is the native language within the past two years, then the TOEFL is waived.
4. GRE scores are NOT required.

Application Process:
1. Complete the online Graduate Admissions application (https://gradstudies.missouri.edu/admissions/apply).

2. As part of the submission process, applicants are required to upload UNOFFICIAL copies of all transcripts to the online application. 
   
   **NOTE:** If you are accepted by our academic program, you will then be asked to provide official copies of all transcripts to: Office of Graduate Studies, University of Missouri, 210 Jesse Hall, Columbia, Missouri 65211.

3. Three letters of recommendation will need to be submitted via the online application. Each recommender will receive directions on how to submit the recommendation once you have entered their contact information in the application system.

4. You must also provide the following supplementary materials:
   
   Personal Statement and Vita/Résumé via the online online Graduate Admissions application (https://gradstudies.missouri.edu/admissions/apply). In your statement describe:
   
   a. Your previous/current experience serving in a teaching, helping or counseling role,
   
   b. Your interests and career objectives,
   
   c. How these interests and career objectives have developed, and
   
   d. How being accepted into the program will benefit your career aspirations and help you act upon your beliefs, goals, and philosophy. Include interests and experiences working with diverse groups (e.g. ethnic, cultural, socio-economic, religious, ability status, sexual orientation, grade levels, ages), leadership roles, or other skills or experiences (not previously mentioned) that you believe distinguish you as a candidate for graduate study. (Please limit to 1000 words).

5. If your native language is other than English, the Test of English as a Foreign Language (TOEFL [http://www.toefl.org]) is required. Please send this to the Office of Graduate Studies using school code 6875.

   - Please be sure to upload all supplemental materials BEFORE you submit the application.

For applicants currently enrolled as graduate students at MU:

1. Complete the Change of Degree (http://gradstudies.missouri.edu/forms-downloads/repository/change-degree.pdf) form.

2. Provide unofficial copies of your University of Missouri transcripts.

3. Provide 3 letters of recommendation.

Send application materials to Sandy Sites (SitesS@missouri.edu) or mail to the ESCP Dept., 16 Hill Hall, Columbia, MO 65211

**Application deadline: None - rolling admission.**

## MEd in Educational, School, and Counseling Psychology with Emphasis in Positive Coaching

The online Positive Coaching program (http://online.missouri.edu/degreetopics/education/positive-coaching/masters) is intended for all athletic coaches and sports coordinators who have completed a bachelor's degree program, and now wish to pursue their master's degree. The program is well-suited for athletic coaches at all levels of sport participation, as well as any individuals in educational or other settings, who provide instructional, leadership or counseling services to students or to others.

The required core courses focus on identifying and applying the most pertinent and impactful aspects of sport, coaching and positive psychology. The core courses also focus on leading individuals, teams and groups to experience the fulfillment and happiness associated with striving for and achieving excellence. Emphasis is on the understanding, skills and strategies of highly effective teaching, learning and leading.

The electives emphasize the development of professional knowledge and awareness of key topical issues and areas pertinent to preparing to serve as competent, caring and committed coaches for others. Course topics include:

- Administration of athletics programs
- Ethical and legal aspects of athletics
- Athlete training and conditioning
- Gender and multicultural issues in sports
- Positive coaching
- Positive interventions contributing to coordinated school health programs
- Healthier total school or organizational environments

**Website:** Positive Coaching. (http://online.missouri.edu/degreetopics/education/positive-coaching/masters)

## Degree Requirements

This is a 30 credit hour program. Students take 12 hours of required core course work and 18 hours of electives.

Thesis/Non-Thesis Requirements

Students complete a project in the capstone course ESC_PS 8300
Positive Leadership in Sport

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational and Counseling Psychology program (below) and the minimum requirements of the Office of Graduate Studies (https://gradstudies.missouri.edu/admissions/eligibility-process). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission criteria (M Ed)

1. Successful completion of the baccalaureate degree at an accredited college/university.
2. 3.0 or better grade point average in the last 60 hours of baccalaureate coursework.
3. TOEFL score: Minimum 580 (paper) or 92 (ibt). Applies to non-native English speaking applicants only. If the non-native English-speaking applicant has successfully completed one year of full-time post-secondary (college-level) study in a country where English is the native language within the past two years, then the TOEFL is waived.
4. GRE scores are NOT required.

Application Process:

1. Complete the online Application to the Office of Graduate Studies (https://applygrad.missouri.edu/apply).
2. As part of the submission process, applicants are required to upload UNOFFICIAL copies of all transcripts to the online application.
   NOTE: If you are accepted by our academic program, you will then be asked to provide official copies of all transcripts to: Office of Graduate Studies, University of Missouri, 210 Jesse Hall, Columbia, Missouri 65211.
3. One letter of recommendation will need to be submitted via the online application. The recommender will receive directions on how to submit the recommendation once you have entered their contact information in the application system.
4. If your native language is other than English, the Test of English as a Foreign Language (TOEFL (http://www.toefl.org)) is required. Please send this to the Office of Graduate Studies using school code 6875.

Note: If your undergraduate GPA (last 60 hours) is below 3.0 additional information will be required.

Please be sure to upload all supplemental materials BEFORE you submit the application.

For applicants currently enrolled as graduate students at MU:

1. Complete the Change of Degree (http://gradstudies.missouri.edu/forms-downloads/repository/change-degree.pdf) form.
2. Provide unofficial copies of your University of Missouri transcripts.
3. Provide one letter of recommendation.

Send application materials to Sandy Sites (SitesS@missouri.edu) or mail to the ESCP Dept., 16 Hill Hall, Columbia, MO 65211

Application deadline: None - rolling admission.

MEd in Educational, School, and Counseling Psychology with Emphasis in School Counselor, Elementary, Certification

Degree Requirements

Students who select this specialty have an interest in working as elementary school, middle school, or high school counselors. The curriculum of this specialty is based on the scientist-practitioner model of training as well as the comprehensive school guidance and counseling program model, both of which emphasize the best in counseling psychology theory, research, and practice. The missions of the MU School Counseling Masters and Specialist degree programs are to prepare individuals to practice successfully as entry-level multiculturally sensitive professional school counselors in socially and economically diverse work settings.

The specific courses that meet these requirements are as follows:

I. General Psychology Core

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 8060</td>
<td>Lifespan Development</td>

</table>

III. Practicum

Secondary school counseling students must complete two practicums in a secondary school setting for a total of 9 semester hours. Elementary school counseling students must complete two practicums in an elementary school setting for a total of 9 semester hours. Students wishing all level certification are required to complete an additional 3 hours of practicum in the setting in which they did not previously complete a practicum plus complete all of the other coursework in both elementary and secondary school counseling.

### Thesis/Non-Thesis Requirements

Students will be required to complete state requirements for licensure, including the Missouri State Performance Task Assessment for School Counselors and the state licensure exam for school counselors.

### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational and Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

### MEd in Educational, School, and Counseling Psychology with Emphasis in School Counselor, Elementary and Secondary, Certification

### Degree Requirements

Students who select this specialty have an interest in working as elementary school, middle school, or high school counselors. The curriculum of this specialty is based on the scientist-practitioner model of training as well as the comprehensive school guidance and counseling program model, both of which emphasize the best in counseling psychology theory, research, and practice. The missions of the MU School Counseling Masters and Specialist degree programs are to prepare individuals to practice successfully as entry-level multiculturally sensitive professional school counselors in socially and economically diverse work settings.

The specific courses that meet these requirements are as follows (42 credit hours):

<table>
<thead>
<tr>
<th>I. General Psychology Core</th>
<th>6</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 8060</td>
<td>Lifespan Development</td>
</tr>
</tbody>
</table>
The courses in this planner are designed to meet the requirements of the Department of Educational, School, and Counseling Psychology (42 hours), the College of Education, and the University of Missouri Graduate School. They also fulfill state certification requirements to become entry-level professional school counselors, but do not fulfill requirements for state licensure as a psychologist or counselor, for certification as a marriage and family therapist, alcoholism counselor or other specialties, or certification by the National Board of Certified Counselors. If you wish to fulfill the requirements for licensure, certification or registry, you will need to inform yourself accordingly and add to your M.Ed. degree planner the additional coursework necessary. Information about psychologist and counselor licensure, certification, and registry in Missouri is available in Room 16 Hill Hall.

VIII. Prerequisites to Master’s Programs

In order to apply for any master’s degree program in the Department of Educational, School, & Counseling Psychology, an applicant either must have completed or plan to complete 15 hours of prerequisite course work as indicated below:

- **Statistics.** A course in statistics covering descriptive statistics, correlation, t-tests and Chi-square.
- **Psychological Theory.** Two courses in psychological theory (not including the introductory course in psychology) for example: personality, social, developmental or learning.
- **Additional Courses.** Two additional courses in education, psychology and/or sociology.

If you are deficient in one or more of these areas, you may still be admitted with the provision that you make up any prerequisites during your graduate enrollment. Such make-up work will not count toward the hours required for any degree.

IV. Policy on Non-degree Graduate Students (NGS) for School Counseling

If admitted to an ESCP program, a NGS may apply up to 12 hours. The ONLY courses a NGS may take to apply to the Elementary and Secondary School Counseling program are:

- **ESC_PS 8060** Lifespan Development
- **ESC_PS 8135** Foundations of Career Psychology
- **ESC_PS 8020** Overview of Research Methods
- **ESC_PS 8410** School Guidance Programs

<tr>
<td>ESC_PS 8040</td>
</tr>
<tr>
<td>ESC_PS 8140</td>
</tr>
<tr>
<td>ESC_PS 8145</td>
</tr>
</tbody>
</table>

III. Practicum

Secondary school counseling students must complete two practicums in a secondary school setting for a total of 9 semester hours. Elementary school counseling students must complete two practicums in an elementary school setting for a total of 9 semester hours.

Students wishing all level certification are required to complete an additional 3 hours of practicum in the setting in which they did not previously complete a practicum plus complete all of the other coursework in both elementary and secondary school counseling.

</tr>
</tbody>
</table>

VI. Credential Preparation

Candidates must apply for an official evaluation of their credentials in the Office of Certification, 102 Hill Hall prior to the completion of the last 15 hours of required course work.

VIII. Licensure, Certification and Registry

The courses in this planner are designed to meet the requirements of the Department of Educational, School, and Counseling Psychology (42 hours), the College of Education, and the University of Missouri Graduate School. They also fulfill state certification requirements to become entry-level professional school counselors, but do not fulfill requirements for state licensure as a psychologist or counselor, for certification as a marriage and family therapist, alcoholism counselor or other specialties, or certification by the National Board of Certified Counselors. If you wish to fulfill the requirements for licensure, certification or registry, you will need to inform yourself accordingly and add to your M.Ed. degree planner the additional coursework necessary. Information about psychologist and counselor licensure, certification, and registry in Missouri is available in Room 16 Hill Hall.

IX. Prerequisites to Master’s Programs

In order to apply for any master’s degree program in the Department of Educational, School, & Counseling Psychology, an applicant either must have completed or plan to complete 15 hours of prerequisite course work as indicated below:

- Statistics. A course in statistics covering descriptive statistics, correlation, t-tests and Chi-square.
- Psychological Theory. Two courses in psychological theory (not including the introductory course in psychology) for example: personality, social, developmental or learning.
- Additional Courses. Two additional courses in education, psychology and/or sociology.
If you are deficient in one or more of these areas, you may still be admitted with the provision that you make up any prerequisites during your graduate enrollment. Such make-up work will not count toward the hours required for any degree.

X. Policy on Non-degree Graduate Students (NGS) for School Counseling

If admitted to an ESCP program, a NGS may apply up to 12 hours. The ONLY courses a NGS may take to apply to the Elementary and Secondary School Counseling program are:

- ESC_PS 8060  Lifespan Development
- ESC_PS 8082  Foundations of Educational and Psychological Measurement
- ESC_PS 8135  Foundations of Career Psychology
- ESC_PS 8410  School Guidance Programs

15 12

Total Credits: 60

Thesis/Non-Thesis Requirements

Students will required to complete state requirements for licensure, including the Missouri State Performance Task Assessment for School counselors and the state licensure exam for school counselors.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational and Counseling Psychology program (https://gradstudies.missouri.edu/ degreecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

MEd in Educational, School, and Counseling Psychology with Emphasis in School Psychology

Degree Requirements

The Masters of Education (M.Ed.) program in School Psychology is completed concurrently with the Educational Specialist (Ed.S.) program in School Psychology. The M.Ed. program itself is not a terminal degree program. Students admitted to the Educational Specialist degree program will complete degree requirements (coursework and comprehensive examination) for the Masters in Education by the end of the Winter semester of their second year in the program. Students admitted to the M.Ed./Ed.S. programs in School Psychology are prepared to work with children, youth, families, and educators to promote effective functioning in the areas of learning, behavior, and mental health in schools. Operating from a problem solving framework, our focus is on preparing data-based decision makers capable of intervening to address both individual- and systems-level challenges. Students develop professional competencies in assessment, intervention, consultation, and research/evaluation. Completion of the M.Ed. program alone does not lead to state certification as a School Psychologist, however graduates of both the M.Ed. and Ed.S. programs are eligible for state certification as a School Psychologist in Missouri and in most other states, though additional requirements may need to be fulfilled per each state’s certification rules.

General Core

- ESC_PS 8125  Professional Iss. in Sch. Psych. I.Hist., Trends & Ethical Pract.

Thesis/Non-Thesis Requirements

No thesis is required from the Masters of Education program in school psychology.

Admissions

Students are admitted concurrently to the M.Ed. and Ed.S. programs in School Psychology based on the admissions criteria identified below in the Educational Specialist program.

MEd in Educational, School, and Counseling Psychology with Emphasis in Sport Psychology

Degree Requirements

This degree program provides a strong, fortified (51 credit hours) Masters Degree that blends the two fields of Sport Psychology and Career Counseling. Students who choose this specialty area have an interest in working with the careers of individuals in the world of sports (sport coaches, strength and conditioning coaches, athletic trainers, athletic academic counselors, Life Skills coordinators, athletic administrators, career coaches, life coaches, and the like). The curriculum is based on a scientist-practitioner model of training as well as a holistic view of how sport, career choice, and personal adjustment provide one with both an engaging and rewarding career and personal life. There is a strong emphasis on learning through experience, where the experiences derived in and with athletic teams and with a college career center.

The Counseling Sport Psychology program was designed to move one toward qualifying a student to meet most but not all of the State of Missouri’s curricular requirements for Licensure as a Professional Counselor (LPC). In addition to required course work, the graduate must also complete 3000 hours of supervised counseling and pass a licensure examination. The Counseling Sport Psychology program was also designed to qualify a student to meet some of the Association for the Advancement of Applied Sport Psychology’s (AAASP) curricular requirements to become a Certified AAASP Consultant. Additional courses/experiences necessary for AAASP Certification are included in a separate Sport Psychology electives section.

Thesis/Non-Thesis Requirements

Students are required to pass the National Counselor Examination in Fall or Spring semesters of the second year to demonstrate they have gained the requisite knowledge for the profession.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational and Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-
MEd in Educational, School, and Counseling Psychology with Emphasis in Statistics, Measurement, and Evaluation in Education

Degree Requirements

The Statistics, Measurement, and Evaluation in Education program offers courses in applied statistics, from the quantitative foundations of educational research to advanced methods such as multivariate statistics, multilevel modeling, and latent variable modeling. We also offer a number of courses in educational measurement covering topics such as classical test theory, item response theory, and generalizability theory. In addition, our students have the opportunity to take a wide range of advanced statistics and quantitative methods courses, from probability, sampling methodology, and categorical data analysis to stochastic theory, time series analysis, Bayesian statistics, and other cutting-edge quantitative techniques. We train our students in various statistical software programs including SPSS, SAS, R, Mplus, Amos, HLM, and BILOG-MG. Our students also take courses in learning theories, aspects of human development, and program evaluation.

Sample Plan of Study

The plan of study will depend on the student’s career goals and research interests and should be completed in consultation with the Master’s Committee.

Thesis/Comprehensive Exam Requirements

The student must complete: 1) Demonstration of Knowledge via a written exam; and 2) Oral Exam on the Demonstration of Knowledge.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degrecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

1. Apply online by submitting the following documents using the MU Office of Graduate Studies (https://applygrad.missouri.edu/apply) application form by January 15th for the next Fall cohort.
2. The three letters of recommendation
3. Curriculum Vita
4. Official academic transcripts of all previous undergraduate and graduate work
   a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
5. Statement of purpose addressing the following:
   a. Describe (1) your research interests that you hope to pursue in graduate school, (2) your career objectives, and (3) how being accepted into MU’s program will benefit your career aspirations.
   b. Describe interests or experience in designing empirical studies and/or analyzing empirical data. (500 words max.)
   c. Describe interest or experiences that demonstrate your potential in applied, theoretical, and/or computational statistics that you believe distinguish you as a candidate for graduate study. (250 words max.)
6. Official Graduate Record Examination (GRE) scores (preferred Verbal score > 151 and Quantitative score > 155)
7. TOEFL for international students (preferred score of 580 for paper test, 92 IBT, IELTS 6.5 or higher)

EdSp in Educational, School, and Counseling Psychology

Admission Contact Information

Christina Edholm (EdholmC@missouri.edu)
16 Hill Hall; Columbia, MO 65211
573-882-7738

Admission Criteria

- Minimum GPA: 3.0
- Minimum TOEFL score:
  - Internet-based test (iBT) 92
  - Paper-based test (PBT) 580
- Recommended GRE Score:
  - Verbal + Quantitative 305
  - Analytical 4.0

Application Deadlines

- Fall deadline: December 1st for most programs except Educational Psychology and Statistics, Measurement, and Evaluation in Education (SMEE), which is January 15th
- M Ed, EdSp track in Mental Health Practices in Schools (online degrees) - rolling deadline Deadlines

Note: If an applicant is admitted but does not hold a bachelor’s degree in a related discipline or does not have relevant background course work, the applicant must complete prerequisite courses as specified by the faculty of the department.

Required Application Materials

To the Office of Graduate Studies:

- All required Graduate Studies documents
- Official transcripts
- GRE scores
- TOEFL scores
- 3 letters of recommendation via the online application
- Personal statement and vitae via online application per departmental requirements

EdSp in Educational, School, and Counseling Psychology with Emphasis in Counseling Psychology

Degree Requirements

The program of study outlined for the degree must contain a minimum of 30 semester hours of approved graduate credit beyond the master’s degree. No more than 12 semester hours of non-degree seeking (NGS) course work may be used in a program. Evidence of proficiency in the areas of educational statistics and research methodology must be shown prior to the candidates’ taking the final comprehensive examination. This will normally be provided through satisfactory completion of ESC_PS 7170 Introduction to Applied Statistics and ESC_PS 8020 Overview of Research Methods or equivalent. If not completed as part of the master’s degree, the program must include a course in the behavioral, social, historical, or philosophic foundations of education. The program may consist entirely of courses in education or may be made up, in part, of courses from other disciplines selected to fit the candidate’s professional needs. A minimum of 15 semester hours of the program must be courses offered in the College of Education. A minimum of 15 semester hours of the program must also be courses numbered 8000 or above. To adhere to the concept of a planned program, at least eight semester hours of the program must be completed after the Program of Study has been filed with the Office of Graduate Studies.

Sample Plan of Study

The plan of study will depend on the student’s career goals and research interests, and should be completed in consultation with the student’s advisor.

Comprehensive Examination Process

The Comprehensive Exam is administered once a year in July or August. The Comprehensive Exam is administered as a take-home exam and follows an essay/long answer response format. It is expected that responses will not exceed 10 pages (double-spaced; not including references) in length and will adequately provide both breadth and depth on the topic. Appropriate citations are expected. Attention should also be paid to grammar, APA style, and overall professional writing conventions. Students will have two consecutive weekends to complete the exam. Students schedule an oral exam after successfully passing the written portion of the comprehensive exam.

The Comprehensive Exam is designed as an integrative, culminating assessment of foundational knowledge of (1) counseling theories, assessment and practice, (2) research design, measurement, and statistics, (3) multicultural and professional issues, and (4) career development. Thus, the exam is designed to assess students’ ability to (a) use counseling theories and appropriate assessment strategies to conceptualize clinical cases and to identify appropriate intervention strategies in clinical practice; (b) design research studies, including developing appropriate research questions, addressing issues related to a study’s internal and external validity, applying appropriate methods for the research methodology, and identifying appropriate statistical analyses; (c) understand multicultural, ethical and professional issues related to counseling psychology; and (d) apply appropriate vocational theories and assessment in practice.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degerecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (https://gradstudies.missouri.edu/admissions/eligibility-process). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.
EdSp in Educational, School, and Counseling Psychology with Emphasis in Mental Health Practices in Schools

The online Mental Health Practices in Schools (http://online.missouri.edu/degreeprograms/education/mental-health-practices-in-schools/education-specialist) program is intended for school personnel, educators and other community mental health professionals who work with children and adolescents in schools and community agencies. This includes elementary and secondary teachers, special education professionals, school counselors, school nurses, administrators, at-risk coordinators and resource officers, safety coordinators, substance abuse coordinators, speech/language pathologists, itinerant and migrant educators, and private practitioners.

Courses are designed to offer practical applications of psychological concepts and are taught by experts in the field. The program identifies and deals with issues that promote positive mental health of children and adolescents. Courses in the program provide a solid base to increase awareness, knowledge and skills in areas such as:

- Identifying and assessing evidence-based prevention and intervention strategies and programs
- Communicating effectively with parents, children and school personnel
- Building resiliency and optimism in children and adolescents
- Increasing awareness of multicultural and diversity issues
- Understanding mental, emotional, and behavioral factors in youth
- Managing crisis interventions
- Applying wellness management for self and others
- Implementing positive behavior support and strategies in the classroom
- Collaborating with families and other school personnel

Note: This program does not provide school counselor certification, nor any professional counseling licensure.

Website: Mental Health Practices in Schools (http://online.missouri.edu/degreeprograms/education/mental-health-practices-in-schools/education-specialist).

**Degree Requirements**

The educational specialist degree is a 31-hour program of specialization built upon the master’s degree. To earn the Mental Health Practices in Schools educational specialist degree, students complete 31 credit hours from among the courses listed below. The only required courses are the research methods (ESC_PS 8020) and capstone (ESC_PS 8490). At least 5 courses must be at the 8000 level. Students can select the remaining courses that best fit their educational and professional experience and interests.

**Additional Electives** are available through the other ESCP online programs (http://online.missouri.edu/degreeprograms/escp.aspx) with advisor approval.

**Comprehensive Examination Process**

**Capstone paper**

The program requires a capstone integrative paper allowing students to demonstrate the knowledge, skills, and competencies acquired through the program's course work.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Educational and Counseling Psychology (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology) program and the minimum requirements of the Office of Graduate Studies (https://gradstudies.missouri.edu/admissions/eligibility-process). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

**Admission criteria (EdSp)**

1. Successful completion of the baccalaureate and master's degree at an accredited college/university.
2. 3.0 or better grade point average in the last 60 hours of baccalaureate coursework
3. TOEFL score: Minimum 580 (paper) or 92 (ibt). Applies to non-native English speaking applicants only. If the non-native English-speaking applicant has successfully completed one year of full-time
post-secondary (college-level) study in a country where English is the native language within the past two years, then the TOEFL is waived.

4. GRE scores are NOT required.

**Application Process:**

1. Complete the online Application to the Graduate School (https://gradstudies.missouri.edu/admissions/apply).

2. As part of the submission process, applicants are required to upload UNOFFICIAL copies of all transcripts to the online application.

    **NOTE:** If you are accepted by our academic program, you will then be asked to provide official copies of all transcripts to: Office of Graduate Studies, University of Missouri, 210 Jesse Hall, Columbia, Missouri 65211.

3. Three letters of recommendation will need to be submitted via the online application. Each recommender will receive directions on how to submit the recommendation once you have entered their contact information in the application system.

4. You must also provide the following supplementary materials:

   - Personal Statement and Vita/Résumé via the online Application to the Office of Graduate Studies (https://gradstudies.missouri.edu/admissions/apply). In your statement describe:
     a. Your previous/current experience serving in a teaching, helping or counseling role,
     b. Your interests and career objectives,
     c. How these interests and career objectives have developed, and
     d. How being accepted into the program will benefit your career aspirations and help you act upon your beliefs, goals and philosophy. Include interests and experiences working with diverse groups (e.g. ethnic, cultural, socio-economic, religious, ability status, sexual orientation, grade levels, ages), leadership roles, or other skills or experiences (not previously mentioned) that you believe distinguish you as a candidate for graduate study. (Please limit to 1000 words).

5. If your native language is other than English, the Test of English as a Foreign Language (TOEFL (http://www.toefl.org)) is required. Please send your score to the Office of Graduate Studies using school code 6875.

6. Please be sure to upload all supplemental materials BEFORE you submit the application.

**For applicants currently enrolled as graduate students at MU:**

1. Complete the Change of Degree (http://gradstudies.missouri.edu/forms-downloads/repository/change-degree.pdf) form.

2. Provide unofficial copies of your University of Missouri transcripts.

3. Provide 3 letters of recommendation.

Send application materials to Sandy Sites (SitesS@missouri.edu) or mail to the ESCP Dept., 16 Hill Hall, Columbia, MO 65211.

**Application deadline: None - rolling admission.**

**Admissions Contact**

---

**EdSp in Educational, School, and Counseling Psychology with Emphasis in School Psychology, Certification**

**Degree Requirements**

Graduates of the Ed.S. program in School Psychology are prepared to work with children, youth, families, and educators to promote effective functioning in the areas of learning, behavior, and mental health in schools. Operating from a problem solving framework, our focus is on preparing data-based decision makers capable of intervening to address both individual - and systems-level challenges. Students develop professional competencies in assessment, intervention, consultation, and research/evaluation. Graduates of the Ed.S. program are eligible for state certification as a School Psychologist in Missouri and in most other states, though additional requirements may need to be fulfilled per each state's certification rules.

**Sample Plan of Study**

Below is a sample plan of study for completion of the coursework requirements for the Ed.S. in school psychology, however each individual student’s plan of study varies depending on their pace in the program and individual choices when options are available. The Educational Specialist program in School Psychology is completed concurrently with the Masters in Education (M.Ed.) program in School Psychology. As a result, the first year after admission to the program is predominately focused on the M.Ed. coursework.
Comprehensive Examination Process

The comprehensive examination for the Ed.S. in School Psychology includes two components: a portfolio documenting specific clinical experiences completed during the internship year and the Praxis II national School Psychology exam (administered by the Educational Testing Service).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degrecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

PhD in Educational, School, and Counseling Psychology

Admission Contact Information

Christina Edholm (EdholmC@missouri.edu)
16 Hill Hall
Columbia, MO 65211
(573) 882-7738

Admission Criteria

- Fall deadline: December 1st for most programs except Educational Psychology and Statistics, Measurement, and Evaluation in Education (SMEE), which is January 15th
- Minimum TOEFL scores:
  - Internet-based test (iBT): 92
  - Paper-based test (PBT): 580
- Recommended GRE scores:
  - When did you take the GRE?
    - On or After August 1, 2014: Verbal + Quantitative 305, Analytical 4.0

Sample Plan of Study

A student’s plan of study will vary depending on her/his program track and career goals and should be completed in consultation with her/his academic advisor.

Qualifying Process

The Graduate School requires that students pass a qualifying examination as a condition of official admittance to the PhD program. Acceptable performance on the Departmental Qualifying Examination is defined as achieving a grade of “B” or better in each of the courses comprising the “core” courses for each of four emphasis areas. These courses are:

- ESC_PS 7120 Theories and Techniques of Counseling
- ESC_PS 8040 Counseling Methods and Practices
- ESC_PS 8135 Foundations of Career Psychology

Comprehensive Examination Process

The Comprehensive Exam is administered once a year in July or August. The Comprehensive Exam is administered as a take-home exam and follows an essay/long answer response format. It is expected that responses will not exceed 10 pages (double-spaced; not including...
references) in length and will adequately provide both breadth and depth on the topic. Appropriate citations are expected. Attention should also be paid to grammar, APA style, and overall professional writing conventions. Students will have two consecutive weekends to complete the exam. Students schedule an oral exam after successfully passing the written portion of the comprehensive exam.

The Comprehensive Exam is designed as an integrative, culminating assessment of foundational knowledge of (1) counseling theories, assessment and practice, (2) research design, measurement, and statistics, (3) multicultural and professional issues, and (4) career development. Thus, the exam is designed to assess students’ ability to (a) use counseling theories and appropriate assessment strategies to conceptualize clinical cases and to identify appropriate intervention strategies in clinical practice; (b) design research studies, including developing appropriate research questions, addressing issues related to a study’s internal and external validity, applying appropriate methods for the research methodology, and identifying appropriate statistical analyses; (c) understand multicultural, ethical and professional issues related to counseling psychology; and (d) apply appropriate vocational theories and assessment in practice.

**Dissertation Requirements**

After working with the academic advisor on developing a dissertation proposal, the student meets with her/his doctoral program committee to obtain approval of the written dissertation proposal. This happens before data collection begins. After the project is completed, the student submits a written dissertation and defends her/his dissertation project to the doctoral program committee.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Apply online by submitting the following documents using the MU Office of Graduate Studies (https://applygrad.missouri.edu/apply) application form by December 1st for the next Fall cohort.

- Three letters of recommendation
- Curriculum Vita
- Official academic transcripts of all previous undergraduate and graduate work
  - Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
- Statement of purpose addressing the following:
  - Describe interests and experiences working with people from diverse backgrounds (e.g. ethnic, cultural, socio-economic, religious, ability status, sexual orientation). How have these experiences influenced you? (250 word maximum)
  - Describe experiences that demonstrate your potential for leadership that you believe distinguish you as a candidate for graduate study. (250 word maximum)
  - Describe (1) your previous experience serving in a helping or counseling role, (2) your interests and career objectives, (3) how these interests and career objectives have developed, (4) how these interests match those of specific program faculty, and (5) how being accepted into the program of your choice will benefit your career aspirations and help you act upon your beliefs, goals, and philosophy. (1000 word maximum)
- Official Graduate Record Examination (GRE) scores for tests taken on or after August 1, 2014 should have a combined Verbal and Quantitative score of 305.
- TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher)

Applicants with a bachelor’s degree in a field not related to psychology will be required to complete 15 hours of prerequisite courses in the behavioral sciences (including an introductory statistics course) either prior to, or concurrently with, coursework in the program.

**PhD in Educational, School, and Counseling Psychology with Emphasis in Educational Psychology**

**Degree Requirements**

The Educational Psychology program is committed to the dissemination and development of knowledge and skills in human learning and cognition, development, and motivation. We use quantitative and qualitative methods to study how people’s thinking, motivation, and behavior change across time. We study how different social settings like classroom, family, work, and peers affect people’s well-being, learning, and behavior. The study of educational psychology is relevant to teachers, coaches, athletes, nurses, counselors, software developers, trainers, social workers, program evaluators, and administrators.

Educational psychologists attempt to understand:

- how to improve learning, academic achievement, and motivation
- developmental influences on learning and well-being
- how society influences learning and behavior
- school influences on students’ development in other settings
- improving human performance

The Ph.D. program focuses on generating original research and consists of a minimum of 72 semester hours of graduate credit beyond the bachelor’s degree. The plan of study provides additional details about requirements. The following is a synopsis.

Sample Plan of Study

The plan of study will depend on the student’s career goals and research interests, and should be completed in consultation with the Doctoral Dissertation Committee.

Qualifying Process

The Graduate School requires that students pass a qualifying examination as a condition of official admittance to the PhD program. Acceptable performance on the Departmental Qualifying Examination is defined as achieving a grade of “B” or better in each of the courses comprising the “core” courses. For educational psychology, these courses are the following:

- ESC_PS 8060 Lifespan Development
- ESC_PS 8082 Foundations of Educational and Psychological Measurement
- ESC_PS 8355 Cognition and Emotion

Comprehensive Examination Process

To complete the comprehensive exam, students must complete evidence of professional activity, evidence of teaching, two assigned papers, and an oral exam. The two papers are administered as a take-home exam with one week for completion of each paper. The procedure is described in a separate document. The papers can be written during any semester. They must be scored as passing before the oral exam can be conducted. The oral exam must be scheduled during fall or spring semesters.

Dissertation Requirements

After working with the academic advisor on developing a dissertation proposal, the student meets with the doctoral program committee to obtain approval of the written dissertation proposal. This happens before data collection begins. After the project is completed, the student submits a written dissertation and defends the dissertation to the doctoral program committee. The defense can occur only when MU is officially in session.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Educational, School, & Counseling Psychology program (https://gradstudies.missouri.edu/degerecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Apply online by submitting the following documents using the MU Office of Graduate Studies (https://applygrad.missouri.edu/apply) application form by January 15th for the next Fall cohort.

1. The three letters of recommendation
2. Curriculum Vita
3. Official academic transcripts of all previous undergraduate and graduate work
   a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
4. Statement of purpose addressing the following:
   a. Describe experiences teaching, designing instruction, and engaging in research and how these experiences have prepared you for graduate study. (500 word maximum)
   b. Describe (1) your research interests that you hope to pursue in graduate school (2) how these interests match those of specific faculty (3) your career objectives, and (4) how being accepted into MU’s program will benefit your career aspirations. (Please limit to 500 words)
5. Official Graduate Record Examination (GRE) scores for tests taken on or after August 1, 2012 should have a combined Verbal and Quantitative score of 305.
6. TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher)

Admissions

This program is not accepting admissions at this time.

PhD in Educational, School, and Counseling Psychology with Emphasis in School Psychology, Certification

The doctoral program in School Psychology is focused on training the next generation of research, teaching, clinical, and policy leaders who are singularly focused on solving significant societal problems in education and psychology. We utilize an integrated systems approach to address academic and behavioral evidence-based practice with world-class research lines in prevention science, assessment, and intervention. Our graduates are prepared to work in higher education and research settings as well as clinical settings, such as schools, community health agencies, and hospitals. The PhD program is accredited by the American Psychological Association and approved by the National Association of School Psychologists. The Doctoral (PhD) program in School Psychology is completed concurrently with the Masters in Arts (MA) program in School Psychology. As a result, the first year after admission to the program is predominately focused on the M.Ed. coursework.

Total Credits: 76-87

Qualifying Process

The qualifying examination for the Ph.D. in School Psychology includes a take-home written examination. It is typically completed at the start of the Fall semester of year 2 in the program, presuming successful completion of ESC_PS 8125, ESC_PS 9125, and ESC_PS 8082

Comprehensive Examination Process

The comprehensive examination for the Ph.D. in School Psychology includes a take-home written examination followed by an oral examination with the doctoral committee. This examination process is typically completed at the beginning of the winter semester in year 3 or the start of the fall semester in year 4. Students jointly enrolled in the Masters of Arts program in School Psychology must have completed their master’s thesis/manuscript prior to sitting for their Doctoral Comprehensive exams.
Dissertation Requirements

After working with the academic advisor on developing a dissertation proposal, the student meets with her/his doctoral program committee to obtain approval of the written dissertation proposal. This happens before data collection begins. After the project is completed, the student submits a written dissertation and defends her/his dissertation project to the doctoral program committee. The dissertation proposal must be approved by committee prior to applying for terminal internships.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degrecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

Apply online by submitting the following documents using the MU Office of Graduate Studies (https://applygrad.missouri.edu/apply) application form by December 1 for the next Fall cohort.

1. Three letters of recommendation
2. Curriculum Vita
3. Official academic transcripts of all previous undergraduate and graduate work
   a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
4. Statement of purpose addressing the following:
   a. Describe interests and experiences with working with people from diverse backgrounds (e.g. ethnic, cultural, socio-economic, religious, ability status, sexual orientation). How have these experiences influenced you? (250 word maximum)
   b. Describe experiences that demonstrate your potential for leadership that you believe distinguish you as a candidate for graduate study. (250 word maximum)
   c. Describe (1) your research interests that you hope to pursue in graduate school (2) how these interests match those of specific faculty. (Please limit to 500 words)
   d. Describe (1) your career objectives (2) how these career objectives have developed, and (3) how being accepted into MU’s program will benefit your career aspirations and help you act upon your beliefs, goals, and philosophy. (Please limit to 500 words)
5. Official Graduate Record Examination (GRE) scores for tests taken on or after August 1, 2012 should have a combined Verbal and Quantitative score of 305.
6. TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher)

PhD in Educational, School, and Counseling Psychology with Emphasis in Statistics, Measurement, and Evaluation in Education

The Statistics, Measurement, and Evaluation in Education program offers courses in applied statistics, from the quantitative foundations of educational research to advanced methods such as multivariate statistics, multilevel modeling, and latent variable modeling. We also offer a number of courses in educational measurement covering topics such as classical test theory, item response theory, and generalizability theory. In addition, our students have the opportunity to take a wide range of advanced statistics and quantitative methods courses from probability, sampling methodology, and categorical data analysis to stochastic theory, time series analysis, Bayesian statistics, and other cutting-edge quantitative techniques. We train our students in various statistical software programs including SPSS, SAS, R, Mplus, HLM, and BILOG-MG. Our students also take courses in learning theories, aspects of human development, and program evaluation.

Sample Plan of Study

The plan of study will depend on the student’s career goals and research interests, and it should be completed in consultation with the doctoral dissertation committee.

Qualifying Process

Acceptable performance on the departmental qualifying examination is defined as achieving a grade of "B" or better in each of the courses comprising the selected courses. If a student receives lower than a "B" on a course, the student must retake the course. Failure to receive the appropriate grade a second time could result in dismissal from the program. For Statistics, Measurement, and Evaluation in Education, these courses are the following:

- ESC_PS 8082 Foundations of Educational and Psychological Measurement
- ESC_PS 8020 Overview of Research Methods
- ESC_PS 8850 Quantitative Foundations in Educational Research

Comprehensive Examination Process

To complete the comprehensive exam, students must complete: 1) Curriculum Vitae including teaching experience, 2) Demonstration of knowledge via written exam, 3) Demonstration of research via published work, submitted manuscript, conference paper presentation, or a literature review created specifically to meet this requirement; 4) Oral exam on both the demonstration of knowledge and demonstration of research items from above.

Dissertation Requirements

The student works with an academic advisor to develop a dissertation proposal. The student meets with the doctoral program committee to obtain approval of the written dissertation proposal. Upon study completion, the student defends the dissertation to the doctoral program committee. The defense can occur only when MU is officially in session.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

Apply online by submitting the following documents using the MU Office of Graduate Studies application form by January 15th for the next Fall cohort.

1. The three letters of recommendation
2. Curriculum Vitae
3. Unofficial academic transcripts of all previous undergraduate and graduate work
   a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
4. Statement of purpose addressing the following:
   a. Describe (1) your research interests that you hope to pursue in graduate school, (2) your career objectives, and (3) how being accepted into MU’s program will benefit your career aspirations (500 words max).
   b. Describe your experiences in educational measurement, assessment, or evaluation (250 words max).
   c. Describe interests and experience in analyzing empirical data. Briefly describe why you have chosen particular statistical models to answer the research questions (250 words max).
   d. Describe experiences that demonstrate your potential in applied, theoretical, and/or computational statistics that you believe distinguish you as a candidate for graduate study (250 words max).

5. Official Graduate Record Examination (GRE) scores for tests taken on or after August 1, 2014 should have a combined Verbal and Quantitative score of 305.
6. TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher).

Educational Leadership & Policy Analysis

ELPA - Our mission is to create knowledge while preparing leaders to critically shape and transform educational issues, policies, and practices.

Consider ELPA if you:

- Want to improve your organizational leadership skills and knowledge in elementary, secondary, or postsecondary settings
- Are interested in principal or superintendent certification
- Want to work in student affairs or higher education administration
- Want to become a scholar or researcher in an academic setting
- Desire to shape policy through legislative or research activity

Faculty

Professor J. Hart**, S. Graham**
Associate Teaching Professor G. Malfatti
Assistant Teaching Professor C. Belcher*, J. Fellabaum-Toston*, B. Whitaker*
Distinguished Adjunct Professor T. Whitaker*
About ELPA's Graduate Programs

The graduate programs in the Department of Educational Leadership and Policy Analysis are designed to meet the specific educational needs of the student in a particular area of emphasis. Graduates find employment in a wide range of settings including colleges and universities, public schools, policy agencies, professional associations, government and business and industry.

The PhD Program in ELPA requires a minimum of 60 hours beyond the master's degree. The goal of the PhD program is the preparation of professional researchers and scholars who have high levels of competence in conducting research that adds to the knowledge base.

The program also has a goal of meeting the student's individual career goals and interests through the development of an appropriate plan of study. Each emphasis area has slightly different requirements and areas of focus; however, all 3 emphasis areas require a department-wide core; emphasis area coursework; electives; a research core; and the completion of a minimum of 6 hours for the dissertation.

The Statewide Cooperative EdD Program in Educational Leadership is a cohort program designed for practicing educational leaders to enhance their knowledge and competencies so they provide optimal leadership in organizations that educate a wide range of learners from youth to adult. The program’s curriculum is designed to prepare leaders who are inquiring, reflective practitioners who are competent in defining and solving complex problems in education.

The Educational Specialist (EdSp) Program is designed to enhance the knowledge and competencies of K-12 educational administrators and to lead to advanced principal certification and/or superintendent certification. The program has a thematic, integrated, problem-based curriculum intended to prepare school and district leaders who are inquiring, reflective practitioners. The curriculum is aligned with state standards for certification.

The department’s Master’s Programs are intended to provide initial preparation for leaders in a variety of educational contexts, including higher education and PK-12 schools. Programs vary according to emphasis area and are designed to meet student’s individual career goals and interests — e.g., student affairs administration, initial principal certification and higher education administration.

A minimum of 33 credit hours is required for the M Ed or MA in Higher Education and a minimum of 30 hours is required for the M Ed in Educational Leadership.

Note: Per ELPA policy, students have 5 years to complete their MA or M Ed degree.

Graduate Certificates:

- Education Policy
- Higher and Continuing Education Administration

Satisfactory Rate of Progress

All ELPA students are expected to make satisfactory progress toward their degrees. Satisfactory progress of students will be determined through an annual review by the director of graduate studies, graduate faculty membership is a prerequisite for Doctoral faculty membership.
students’ academic advisors and their committees. Judgments about satisfactory progress will include consideration of the following:

- University-wide time limits for degree completion
- GPA for departmental courses
- Continuous enrollment and active engagement in course work or research (EdD and PhD)
- Student performance in research credits
- Timely resolution of incomplete grades

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

MA in Educational Leadership and Policy Analysis

Contact Information

Educational Leadership and Policy Analysis
202 Hill Hall
573-882-8221
573-884-5714 (fax)
ELPA website: https://education.missouri.edu/educational-leadership-policy-analysis/

The MA in Educational Leadership and Policy Analysis has emphasis areas in Higher Education (p. 424). Please see the individual emphasis area page for degree requirements and admissions information.

MA in Educational Leadership and Policy Analysis with Emphasis in Higher Education

Admissions

Contact Information:
College of Education
202 Hill Hall
573-882-8221
573-884-5714 (fax)
ELPA website: https://education.missouri.edu/educational-leadership-policy-analysis/

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Educational Leadership and Policy Analysis (https://gradstudies.missouri.edu/degreecategory/educational-leadership-policy-analysis) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

In addition to 33 hours of coursework, to complete a Master of Arts (MA), students must complete a thesis.

Total Credits: 33

Thesis/Non-Thesis Requirements

In addition to 33 hours of coursework, to complete a Master of Education (MEd), students must write a reflective capstone paper, drawing on knowledge gained throughout the program.
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational Leadership and Policy Analysis (https://gradstudies.missouri.edu/degreecategory/educational-leadership-policy-analysis) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

For application instructions, see: https://education.missouri.edu/degree/higher-education-med/#apply

MEd in Educational Leadership and Policy Analysis with Emphasis in PK-12 Educational Leadership and Administration, Elementary Principal, Certification

At this time we are not offering an MEd in Educational Leadership and Policy Analysis with Emphasis in PK-12 Educational Leadership and Administration, Elementary Principal, Certification.

You do have the option of getting both certifications – Elementary and Secondary. Please refer to MEd in Educational Leadership and Policy Analysis with Emphasis in PK-12 Educational Leadership and Administration, Elementary and Secondary Principal, Certification (p. 426).

Thesis/Non-Thesis Requirements

Upon completion of course work and during the semester of graduation, all students must participate in and pass a capstone exam.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational Leadership and Policy Analysis (https://gradstudies.missouri.edu/degreecategory/educational-leadership-policy-analysis) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

For application instructions, see: https://education.missouri.edu/educational-leadership-policy-analysis/degrees-programs/pk-12-administration/

Internship Requirement

Students may become eligible for both elementary and secondary level principal certifications by completing two internships. This is gained over three semesters and two hours of coursework per semester (a total of 6 graduate hours). To be eligible for PK-12 building level certifications, 600 internship hours must be completed. Specific activities and expectations are provided to students by their internship advisor.

A new cohort begins every summer.

MEd in Educational Leadership and Policy Analysis with Emphasis in PK-12 Educational Leadership and Administration, Secondary Principal, Certification

At this time we are not offering an MEd in Educational Leadership and Policy Analysis with Emphasis in PK-12 Educational Leadership and Administration, Secondary Principal, Certification.

You do have the option of getting both certifications — Elementary and Secondary. Please refer to MEd in Educational Leadership and Policy Analysis with Emphasis in PK-12 Educational Leadership and Administration, Elementary and Secondary Principal, Certification (p. 426).

EdD in Educational Leadership

The University of Missouri Statewide Cooperative EdD Program (https://education.missouri.edu/degree/educational-leadership-edd) is an innovative, cohort-based program in educational leadership. This professional doctorate enhances knowledge and competencies of leaders in PK-20+ educational organizations. The emphasis of the doctor of education program is on developing effective, thoughtful and reflective practitioners who are competent in identifying and solving complex problems of practice in educational settings.

Locations

We work with four partner institutions to deliver the program at locations throughout the state of Missouri:

- Missouri State University
- Northwest Missouri State University
- Southeast Missouri State University
- University of Central Missouri

Students are employed full time as educational leaders while in the program, and many remain in their current positions following graduation, often receiving a pay raise for completing an advanced degree. Several of our students have also received promotions while in the program or soon after graduating, and some have even transitioned into higher level positions within other educational organizations.

Admission Contact Information

Educational Leadership & Policy Analysis
202 Hill Hall
573-884-2163
573-884-5714 (fax)
http://edd.missouri.edu/

Admission Criteria

- Competitive GRE score
- GPA of 3.0 (4.0 scale) in the last 60 hours of undergraduate education
- GPA of 3.5 (4.0 scale) in Graduate School (Master's Degree)
- Competitive TOEFL or IELTS scores
  - Internet-based test (iBT)
  - 80 (minimum score of 17 necessary in each subcategory)
  - 550 (minimum score of 52 necessary in each subcategory)
  - IELTS minimum score of 6.5 (score of at least 6 necessary in each subcategory)

EdD Application Information

This cohort program accepts applicants only during even-numbered years with a deadline of December 1. (Starting in 2020, this deadline will move to October 15.)

http://edd.missouri.edu/

Candidates who are selected during the initial screening are invited to the MU campus to participate in an interview and a problem-solving and writing activity.

Note: Admissions screening and decisions for all graduate programs are not made until all required materials have been submitted. Admissions recommendations are based on a profile developed from data that include undergraduate (last 60 hours) and graduate grade point averages, scores on the Graduate Record Examinations (GRE), recommendations, evidence of consistency between candidate and program goals, and relevant organizational or educational leadership experience.

Degree Requirements

This educational doctorate program is known as The Statewide Cooperative EdD Program.

The EdD program requires a minimum of 76 credit hours beyond the baccalaureate degree. The program, offered in a cohort format, includes 34 hours of course work in 6 contiguous semesters, beginning in the summer of odd years and concluding in the spring semester 2 years later. In addition to course work credit, 12 credit hours of dissertation-in-practice research are required.

Internship Requirement

Students may become eligible for both elementary and secondary level principal certifications by completing two internships, but in three semesters (a total of 6 graduate hours). To be eligible for PK-12 building level certifications, 600 internship hours must be completed. Specific activities and expectations are provided to students by their internship advisor.

Students may become eligible for central office/superintendent certification by completing the internship experience required by ELPA for graduation and recommendation to the MO DESE for central office/superintendent certification. This is gained over three semesters and two hours of coursework per semester (a total of 6 graduate hours). To be eligible for central office/superintendent certification, 300 internship hours must be completed. Specific activities and expectations are provided to students by their internship advisor.

All internships may be completed simultaneously, if the student's workday and class schedule allows. (For two building level internships and one central office internship, however, it is unlikely that a student would be able to complete all requirements.) The total number of graduate hours required for both elementary principal and central office/superintendent certifications is 12. NOTE: DESE requires two years of building-level administration before they will issue a superintendent certificate.

Internship Requirement

Students may become eligible for both elementary and secondary level principal certifications by completing two internships. This is gained over three semesters and two hours of coursework per semester (a total of 6 graduate hours). To be eligible for PK-12 building level certifications, 600 internship hours must be completed. Specific activities and expectations are provided to students by their internship advisor.

Internship Requirement

The internship experience required by ELPA for graduation and recommendation to the MO DESE for elementary principal certification is gained over two semesters and two hours of coursework per semester (a total of 4 graduate hours). To be eligible for elementary principal certification, 300 internship hours must be completed. Specific activities and expectations are provided to students by their internship advisor.

Students may become eligible for central office/superintendent certification by completing the internship experience required by ELPA for graduation and recommendation to the MO DESE for central office/superintendent certification. This is gained over three semesters and two
hours of coursework per semester (a total of 6 graduate hours). To be eligible for central office/superintendent certification, 300 internship hours must be completed. Specific activities and expectations are provided to students by their internship advisor.

The internships may be completed simultaneously, if the student's workday and class schedule allows. The total number of graduate hours required for both elementary principal and central office/superintendent certifications is 10. NOTE: DESE requires two years of building-level administration before they will issue a superintendent certificate.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Educational Leadership and Policy Analysis (https://gradstudies.missouri.edu/degreecategory/educational-leadership-policy-analysis) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

For application instructions, see: https://education.missouri.edu/degree/educational-administration-phd/#apply

## Educational Studies

Dr. Casandra Harper Morris  
Department of Educational Leadership and Policy Analysis  
202 Hill Hall  
573-882-2818  
harpercas@missouri.edu  

The Bachelor of Educational Studies (BES) is for students with interests in the scientific and scholarly study of education and/or education-related careers in non-school settings. Specific areas of interest may include learning theory, technology in education (including game design), educational and community leadership, organizational change, and policies that shape learning environments. BES coursework provides a foundation in educational theory, research, and practice that engages students in settings where they can influence change (e.g., schools; international contexts; student affairs; churches; sports, non-profit, and private organizations).
Major Program Requirements
Candidates for the BES degree must complete a total of at least 120 semester hours of college credit applicable to the Bachelor of Educational Studies degree.

The remaining degree program graduation requirements are as follows:
1. The candidate for the Bachelor of Educational Studies degree must meet the general education requirements of MU.
2. The candidate must complete at least 24 semester hours of course work offered by the College of Education in accordance with the candidate’s educational and career objectives.
3. The candidate must complete at least one area of concentration totaling 24 or more semester hours (exclusive of 2 above) in accordance with the candidate’s educational and career objectives.
4. The candidate must have a cumulative GPA of at least 2.500 based upon all MU coursework as well as an overall GPA of 2.500 based upon all college coursework completed.
5. The candidate must meet the residence requirement of MU.
6. Candidates shall have a professional practicum or field experience for academic credit appropriate to their degree program. This credit shall be for a minimum of 2 credit hours. The instructor of record for this experience will be a faculty member within the College of Education.
7. The candidate must be recommended for the degree by the faculty of the College of Education.
8. At 60 credit hours of completed coursework, students will be required to complete a Graduation Plan that will serve as a preliminary graduation check.
9. Degree candidates must earn 30 of their last 36 semester hours of credit through the University of Missouri-Columbia in order to obtain the degree of Bachelor of Educational Studies.

Semester Plan
This degree does not currently have a sample semester plan. Please schedule an appointment with an academic advisor to discuss courses.

BES in Educational Studies with Emphasis in Interdepartmental

Degree Program Description
The Bachelor of Educational Studies is for students with interests in the scientific and scholarly study of education and education-related careers in non-school settings, without the requirement of preparing to teach in PK-12 schools. This is not for students pursuing certification to teach in the public schools. The program may be completed on campus or online. Students will be able to develop an individualized major course of study.

Major Program Requirements
The Bachelor of Educational Studies (BES) degree prepares students for education-related careers. The College of Education will not recommend certification to teach in the public schools on the basis of the BES degree. This degree may be completed on campus or online. Students interested in the BES degree on campus may complete an individualized major course of study developed with an advisor from Advising Services. Students interested in the online BES degree may complete an individualized major course of study in collaboration with the
general education program. Students transferring from other institutions are required to fulfill the equivalencies of these courses.

Graduate
The Elementary Education Program at the University of Missouri includes degree programs that focus on preparing graduates to teach in grades 1-6. We currently offer a Master’s and Doctoral (PhD or EdD) in Learning, Teaching and Curriculum with an emphasis in Elementary Education. You can find out more about these programs at http://education.missouri.edu/LTC/elementary/.

You might also browse the complete list of degree options (p. 18) at the University of Missouri.

BSEd in Elementary Education

Degree Program Description
The Elementary Education program leads to a Bachelor of Science in Education in Elementary Education, grades one through six. Coursework focuses on development of the knowledge, skills, and dispositions needed to support teaching and learning in a variety of diverse settings, and includes elementary methods courses designed to support elementary school teaching and learning in all subject areas. Each semester includes extensive experiences in elementary classrooms working with teachers and children, with immediate opportunities to put course ideas into practice. Placements are carefully chosen to represent schools that represent diverse demographics and populations. The culminating Senior Year On-Site Program (SYOSP) is a unique yearlong internship that gives interns the opportunity to experience all facets of the teaching profession. SYOSP is designed to immerse the interns in the life and culture of a school community, and begins with teacher back-to-school meetings and assisting with classroom set-up. Interns are regarded as full-time members of the school faculty and participate in all school events and experiences such as teacher workdays, professional learning communities, and data team meetings. Students will spend a minimum of three full days per week in the schools during the first semester while also completing a full course load that complements the internship. During the second semester, the internship extends to five full days in a single classroom where the SYOSP intern completes the student teaching experience.

Major Program Requirements
Students must complete all university (p. 33), general education (p. 34), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

As Mizzou Ed continues to implement the new Missouri Standards for the Preparation of Educators mandated by the Department of Elementary and Secondary Education (DESE), curriculum changes will be required that must be met in order to complete your degree and earn teacher certification. Those changes may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

Semester Plan
Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices and where options are available.

Faculty

Associate Professor D. Adkins**, J. Bossaller**, I. Jahnke**, H. Moulaion-Sandy**
Assistant Professor S. Buchanan**, T. Gibson**, X. Xu**
Teaching Professor J. Howland*
Associate Teaching Professor A. Klimczak*
Associate Clinical Professor Z. March
Assistant Teaching Professor B. Brendler*, K. Robinson*,
* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in information science and learning technologies, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Education, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• PhD in Information Science and Learning Technologies (p. 439)

About Information Science & Learning Technologies

In January 1997, the School of Information Science & Learning Technologies became the home for MU’s graduate programs in Library and Information Science and Educational Technologies as well as a new,
interdisciplinary doctoral program in Information Science & Learning Technologies.

SISLT faculty are internationally renowned for their research and development accomplishments. Faculty and students are committed to a collaborative, interdisciplinary approach – both within MU and among other research-extensive universities. Nowhere is this more evident than in the Allen Institute (http://alleninstitute.missouri.edu), a 10,000 square foot facility dedicated to supporting collaborative R&D at the intersection of Information & Learning.

PhD in Information Science and Learning Technologies

About the Program

The PhD program prepares professionals to understand and influence learning, information and performance in diverse settings, especially through the use of interactive technologies. We seek individuals who are committed to conducting research that integrates theory and practice.

You will gain the competencies required to:

• Analyze specific informational organization and retrieval, learning and performance needs and evaluate systems to meet these needs.
• Design, develop and implement technologies and technological interventions to improve information organization and retrieval, learning and performance.
• Conduct systematic research, which contributes to the knowledge base of learning, information organization and retrieval, performance and/or technology.

Degree Requirements

1-3 master's level conceptual courses in Educational Technology or Library Science (if entering doctoral program without Master's in Educational Technology, Library Science, or a related field)

Doctoral Seminar Courses (9 credit hours)

</tr>
</tbody>
</table>

Research Methodologies (minimum of 9 credit hours)

9 credit hours minimum includes: at least one course in qualitative research design and one course in quantitative research design. You should choose research methods courses that will support your dissertation. You may choose them from the College of Education's research method courses, or you may look outside the College of Education if your Program of Study committee thinks it is appropriate.

</tr>
</tbody>
</table>

Support Field (9 or more credit hours)

Coordinated coursework related to an area of emphasis outside IS_LT and research courses selected in consultation with your program committee

Dissertation

Course work, internships and independent study projects support the achievement of these competencies, and your program centers on producing a portfolio of achievements indicating that the competencies have been attained. While course work supports production of the portfolio, we encourage students to develop products that cut across several courses, resulting in products that are personally satisfying, solve real problems and represent high quality work. We are particularly interested in products developed in collaboration with other students, faculty, practicing professionals and others beyond our program and campus.

The program culminates with a significant research effort - the dissertation - that contributes to the knowledge base of learning, information organization and retrieval, performance and/or technology. Whether one major study or a series of smaller studies, the research is designed to position our graduates alongside the leading theorists, researchers and practitioners in the field. There is no minimum number of 9090 research hours.

Sample Plan of Study

During your first two academic semesters, you will work with your assigned advisor to select courses and identify Professional Immersion activities that will successfully lead toward the completion of your degree. During this same time period, you should work to establish professional relationships with faculty in SISLT and your supporting field who you would like to include on your Program Committee. Prior to the beginning of your second academic year of study, you must have identified your Program Committee and conducted a Program of Study meeting with your Program Committee. Early approval of your Program of Study will enhance your academic experience in SISLT. This is a very important part of the degree planning process; failure to receive approval of your Program of Study prior to the second academic year may mean that courses or activities completed afterward may not count toward your degree.

Qualifying Examination

Approximately one to two semesters after you have had your Program of Study and Residency plan approved by your committee, AND BEFORE you may complete your portfolio and take comprehensive exams, you will be required to complete a qualifying examination. The exam task will require you to complete a task that academic professionals would be required to perform. For example, we might have you provide a scholarly review of a journal or conference paper submission. Your advisor will provide more details.

Comprehensive Examination Process

The comprehensive examination is an assessment of your comprehensive knowledge of information science and learning technologies. It is your responsibility to inform your committee members of your intent to complete your comprehensive exam prior to the beginning of the semester in which you plan to complete the exam.

The IS&LT examination consists of three parts:

• Portfolio
Dissertation Requirements

You should become involved in research throughout your program so that, by the time the comprehensive examination is completed, you have a well-formulated topic for research. Research may include required coursework activities, collaborations with faculty, or an independent effort. Earlier research can serve to explore a dissertation topic, serve as a pilot study, or become part of a dissertation prospectus. However, formal approval of a dissertation prospectus by your Committee must precede the serious pursuit of the study.

Dissertation Committee

Following the completion of the comprehensive examination, the responsibility of the Program Committee is completed. You will then form a committee to direct your dissertation. This committee may, but does not have to, consist of the same members as the Program Committee. You are encouraged to include those faculty members who can best support your line of research as members of your Dissertation Committee. During your academic program, your interests may change and should be reflected in the Dissertation Committee membership. The Dissertation Committee must consist of a minimum of three SISLT faculty members. The Dissertation Committee chair must be a member of the MU doctoral faculty. A faculty member or practitioner holding a terminal degree from outside of SISLT who has expertise in your research may be added as a special Committee member with program approval. At least one member must be from a program other than IS&LT, typically from your minor or supporting field.

Dissertation Proposal Meeting

You will be required to schedule a dissertation proposal meeting prior to beginning your research. Your Dissertation Committee must approve your conceptualization and methodology prior to beginning any data collection. The proposal meeting is open to all faculty and students in the School. The proposal should include the first three chapters (Chapter 1: Rationale for the Study, Chapter 2: Literature Review, Chapter 3: Description of Methodology) of the dissertation unless your Committee has approved an alternative form.

Dissertation Defense

After receiving your Dissertation Chair’s approval, you may schedule your dissertation defense. A copy of your dissertation must be sent to each committee member at least three weeks prior to the defense meeting. Other faculty, students, and staff may also attend your oral defense. It will be announced to the entire program at least one week prior to the scheduled examination time. These people will be excused while the Committee evaluates your performance.

Admissions

Email: sislt@missouri.edu
SISLT Student Services Coordinator
304 Townsend Hall
Columbia, MO 65211
Phone: 573-882-4546 or toll free 877-747-5868

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Information Science and Learning Technologies program (http://sislt.missouri.edu/islt) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Learning, Teaching and Curriculum

Professionals interested in advancing their careers in education can specialize in a variety of disciplines in MU’s Department of Learning, Teaching and Curriculum. LTC specializes in teacher preparation and in graduate programming for professionals in education. Students find challenging, yet rewarding, opportunities through MU's dynamic research centers and projects and are supported by faculty who are subject matter experts.

Consider LTC if you:

- want to advance as a professional in education through a field specialization
- enjoy exercising independent judgment, and
- desire to help all learners achieve success and strengthen the future through education.

About the M.Ed.

The M.Ed. program requires a minimum of 30 hours in Learning, Teaching, Curriculum coursework. The following emphasis areas are currently offered: Art Education; Early Childhood Education; English Education; Literacy Education; Mathematics Education; Music Education; Science Education; Social Studies Education; and Teaching English to Speakers of Other Languages (TESOL).

Admissions Deadlines

Applicants are encouraged to submit their applications as early in the process as possible. Applications can take 6-8 weeks to complete through the procedures and processing system. Every reasonable effort will be made to process the application for the semester requested.

Admission Requirements

- Completion of an appropriate baccalaureate degree with a GPA of 3.0 or better
- Evidence of at least 2 years of successful experience in an appropriate field
- Minimum TOEFL scores for most areas:
  - Internet-based test (iBT): 80
  - Paper-based test (PBT): 550
- Minimum GRE score* required for following emphasis areas only: Early Childhood Education, English Education, Mathematics Education, Science Education, and TESOL.

When did you take the GRE?

Verbal + Quantitative

On or After August 1, 2011 291 = (V150,Q141)

*Clarification: Not all LTC programs require the GRE exam - only those listed above.

Required Application Materials to the Office of Graduate Studies

- Official transcripts
- GRE scores required for Early Childhood Education, English Education, Mathematics Education, Science Education, and TESOL.
- TOEFL scores (international applicants)

Required Application Materials to the Learning, Teaching, & Curriculum Program

- Personal data sheet form (complete through the online application system)
- Statement of purpose
- GRE scores (a copy may be sent to the department too; minimum, an official result needs to be sent to Office of Graduate Studies)
- Letters of recommendation; a minimum of 2 letters of recommendation. ALL LETTERS MUST BE CONFIDENTIAL AND SUBMITTED ACCORDINGLY THROUGH THE OFFICE OF GRADUATE STUDIES APPLICATION SYSTEM.

MEd in Learning, Teaching and Curriculum with Emphasis in Art Education

Degree Requirements

The master's degree in Art Education is designed to allow elementary teachers or secondary teachers to pursue a program of study to increase competence in curriculum planning, techniques of teaching art, and the subject matter of studio art and art history.

The MEd degree in Art Education comprises 32 semester hours of graduate work that meets the professional needs of the students. The courses include 16 hours of classes at the 8000-9000 level and 16 hours of work in education at the 7000-9000 level or above, which includes a course that enables the student to read, interpret and evaluate research.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (http://online.missouri.edu/degreeprograms/education/art/masters) for the Master's program.
- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- A minimum of two letters of recommendation; three letters, if your undergraduate GPA (last 60 hours) is below a 3.0.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
- For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

MEd in Learning, Teaching and Curriculum with Emphasis in Art Education, Certification

Degree Requirements

The master's degree in Art Education with certification is designed to allow non-certified students to pursue a program of study to increase competence in curriculum planning, techniques of teaching art, and the subject matter of studio art and art history and lead to certification to teach art.

The MEd degree in Art Education comprises 32 semester hours of graduate work that meets the professional needs of the students. The courses include 16 hours of classes at the 8000-9000 level and 16 hours of work in education at the 7000-9000 level or above, which includes a course that enables the student to read, interpret and evaluate research.

Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements for the Master's program.
• Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
• A minimum of two letters of recommendation; three letters, if your undergraduate GPA (last 60 hours) is below a 3.0.
• Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
• For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

MEd in Learning, Teaching and Curriculum with Emphasis in Early Childhood Education

Overview

In the early childhood education emphasis, students will gain increased knowledge and skills in the design, delivery and evaluation of educational services to children from birth through age 8. The program addresses the essential problems of practice with special emphasis given to effective teaching approaches for children who are at risk for school failure: children with special needs, children who are English-language learners and children who have challenging behaviors.

The program is designed for early childhood practitioners, Head Start teachers, early childhood special education teachers, child-care center staff and others who work with children from birth through age 8.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

More information about the Early Childhood Education M.Ed. program (http://online.missouri.edu/degreeprograms/education/early-childhood/masters) can be found at the Mizzou Online website.

Admission requirements will be based upon the following criteria. Complete admission requirements for the Master's program.

• Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
• A minimum of two letters of recommendation; three letters, if your undergraduate GPA (last 60 hours) is below a 3.0.
• Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
• GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q141, A3.5 or higher)
• For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

MEd in Learning, Teaching and Curriculum with Emphasis in Early Childhood Education, Certification

Overview

In the early childhood education emphasis, students will gain increased knowledge and skills in the design, delivery and evaluation of educational services to children from birth through age 8. The program addresses the essential problems of practice with special emphasis given to effective teaching approaches for children who are at risk for school failure: children with special needs, children who are English-language learners and children who have challenging behaviors. Students may pursue initial certification with this degree.

Those students seeking certification have to meet all Early Childhood Education requirements (at least two years of coursework in Phase II) and then take additional courses for an M.Ed.

The program is designed for early childhood practitioners, Head Start teachers, early childhood special education teachers, child-care center staff and others who work with children from birth through age 8.

MEd in Learning, Teaching and Curriculum with Emphasis in Literacy Education

Overview

Do you want to improve your literacy instruction (K-12)? Do you want to be certified as a Special Reading teacher (K-12) in the state of Missouri? Do you want to become a literacy education researcher?

The nationally-recognized Literacy Faculty at the University of Missouri-Columbia are prepared to help you accomplish your professional goals.

This degree program is a completely online masters of education degree in Literacy Education. More information specific to this program can be found here: http://online.missouri.edu/degreeprograms/education/literacy/masters/

Teachers with this certification are qualified for such positions as: Remedial Reading, Title I Reading, Reading Development, Special Education, and Language Arts. Depending on your initial certification experience (BA/BS), this certification may require as few as 6 courses.

Degree Requirements

The MEd degree in Literacy Education comprises a minimum of 32 semester hours of graduate work that meets the professional needs of the students. The courses include 16 hours of classes at the 8000-9000 level and 16 hours of work in education at the 7000-9000 level or above, which includes a course that enables the student to read, interpret and evaluate research.

Sample Plan of Study

- **Prerequisites** (0-9 semester hours)
- **Psychological or Philosophical Foundations of Education** (3 semester hours)
- **Educational Research** (3 semester hours)
- **Foundations of Literacy Education** (12-15 hours)
- **Area of Specialization** (0-9 semester hours)
  - Children's Literature
  - Media and Technology
  - Special Reading Certification (K-12)
  - Teaching Literacy to Diverse Learners
  - Writing Instruction
- **Electives** (0-9 semester hours)

Thesis/Non-Thesis Requirements

To complete the masters programs, students are required to pass “comprehensive exams” or equivalent. Please speak with your advisor what this exam/project may entail.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements for the Master's program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- A minimum of two letters of recommendation; three letters, if your undergraduate GPA (last 60 hours) is below a 3.0.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
- For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

MEd in Learning, Teaching and Curriculum with Emphasis in Mathematics Education

The Master of Education degree in Mathematics Education is intended for those who wish to improve their mathematics teaching practice and to gain a broader understanding of issues related to teaching and learning mathematics, K-12.

This degree program is a completely online masters of education degree in Mathematics Education for certified teachers. More information specific to this program can be found here: http://online.missouri.edu/degreeprograms/education/mathematics/masters/.
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching, and Curriculum program (https://gradstudies.missouri.edu/degeregcategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria.

Complete admission requirements (https://education.missouri.edu/admissions) for the Master’s program.

- Completion of an appropriate Bachelor’s degree with a GPA of 3.0 or better.
- A minimum of two letters of recommendation; three letters, if your undergraduate GPA (last 60 hours) is below a 3.0.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150,Q141,A3.5 or higher)
- For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

MEd in Learning, Teaching and Curriculum with Emphasis in Mathematics Education, Certification

Overview

Program currently suspended due to limited budget and departmental resources.

This degree combines both the masters degree and initial certification in K-12 mathematics education into a 36+ hour program.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program and the minimum requirements of the Office of Graduate Studies. Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

MEd in Learning, Teaching and Curriculum with Emphasis in Science Education

The MU Master’s Program in Science Education is intended for classroom teachers who want to become reflective and inquiring professionals by:

- Enhancing their knowledge and skills about science teaching and learning,
- Inquiring into and improving their practice and
- Building leadership skills in science education.

Degree Requirements

The MEd program requires a minimum of 32 semester hours beyond the Bachelor’s degree program, planned in agreement with the student’s Advisory Committee. Listed below are the requirements for a Master’s degree in Science Education.

- **Science Education** (9 or more semester hours)
- **Science Content** (9 or more semester hours)
- **Educational Foundations** (1 course in sociology, philosophy, or history of education--e.g., ED_LPA 9462, or educational psychology--e.g., ESC_PS 8320)
- **Research Methods** (1 course in research methods: LTC 8714 or Action Research)
- **Comprehensive Exam** (Written comps, either in exam or project format, are individually designed for each student by committee members.)

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program and the minimum requirements of the Office of Graduate Studies. Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Completion of an appropriate Bachelor’s degree with a GPA of 3.0 or better.
- A minimum of two letters of recommendation; three letters, if your undergraduate GPA (last 60 hours) is below a 3.0.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant’s professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q141, A3.5 or higher)
- For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related
Overview

This degree program is currently suspended due to limited budget and departmental resources. (This program was known as the SMAR2T program.) We are not taking applications for this program at this time.

The MU Master’s Program in Science Education is intended for students who have a BA or BS in a science field and want to become classroom teachers by:

- Enhancing their knowledge and skills about science teaching and learning,
- Inquiring into and improving their practice and
- Building leadership skills in science education.

Sample Plan of Study

The M Ed program requires a minimum of 32 semester hours beyond the Bachelor’s (16 hours at the 8000 or 9000 level), planned in agreement with the student’s Advisory Committee. Listed below are the requirements for a Master’s degree in Science Education.

- **Science Education** (9 or more semester hours)
- **Science Content** (9 or more semester hours)
- **Educational Foundations** (1 course in sociology, philosophy, or history of education—e.g., ED_LPA 9460, ED_LPA 9462, ED_LPA 9464; or educational psychology—e.g., ESC_PS 7100, ESC_PS 8320 or ED_LPA 9441)
- **Research Methods** (1 course in research methods: LTC 8714 or Action Research)

Thesis/Non-Thesis Requirements

- **Comprehensive Exam** (Written comps, either in exam or project format, are individually designed for each student by committee members.)

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements for the Master's program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- A minimum of two letters of recommendation; three letters, if your undergraduate GPA (last 60 hours) is below a 3.0.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q141, A3.5 or higher)
- For students whose native language is not English, a score of 550 or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

MEd in Learning, Teaching and Curriculum with Emphasis in Teaching English to Speakers of Other Languages

The University of Missouri’s Teaching English to Speakers of Other Languages (TESOL) program is designed to meet the challenges of a diverse student body in a variety of education settings. Given the use of English as a global lingua franca, learning the unique methodology and theories associated with second language teaching is crucial to effectively meeting the challenges of a multilingual global society.

The TESOL program at MU can meet the needs of teachers seeking ESOL certification in the state of Missouri, those seeking advanced education in ESL/EFL teaching and learning, as well as those who seek further education in TESOL. Currently, many of our students begin the ESOL certification courses but find the topic so intriguing that they go on to pursue advanced education in the field (all TESOL courses taken at the graduate level are fully transferable to the M.Ed. degree).

The student body in the TESOL program at MU is incredibly diverse with students from a variety of ethnicities, cultures, and linguistic and educational backgrounds. We welcome traditional and nontraditional students as the program is designed to meet the needs of a variety of learners in a variety of academic settings.

The TESOL program at MU is informed by the second language acquisition theories and pedagogy unique to students who speak English in addition to their native language(s). The courses in the TESOL program are taught by faculty with expertise and knowledge in the field of English language learning including applied linguistics, sociolinguistics, intercultural communication, and English language education. By focusing on the interplay of theory and methods, as well as the cultural and linguistic diversity of English Language Learners, this program focuses on developing effective, responsive scholars and practitioners who use theory and research to enhance their work in a global, diverse, and technological society.

Degree Requirements

The M Ed program in TESOL requires 33 semester hours beyond the Bachelor’s (16 hours at the 8000 or 9000 level), planned in agreement with the student’s Advisory Committee.

Sample Plan of Study

**Thesis/Non-Thesis Requirements**

To complete the masters programs, students are required to pass *comprehensive exams* or equivalent. Please speak with your advisor what this exam/project may entail.

**Admission**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degrecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria.

Complete admission requirements for the Master’s program.

- Completion of an appropriate Bachelor’s degree with a GPA of 3.0 or better.
- A minimum of two letters of recommendation; three letters, if your undergraduate GPA (last 60 hours) is below a 3.0.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150,Q145,A3.5 or higher). The verbal must meet the 150 minimum in order to be considered for the program.
For students whose native language is not English, a score of 550 or better on the TOEFL or a 6.5 on the IELTS taken within the past two years.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

EdD in Learning, Teaching and Curriculum

Admission Contact Information
Caitlin Rosbach
rosbachc@missouri.edu
303 Townsend Hall
Columbia, MO 65211
573-882-3742

About the Ed.D.
The LTC department offers the doctorate of education with emphasis in General LTC studies, Elementary Education, or Reading Education.

Application Deadline
Applicants are encouraged to submit their applications as early in the process as possible. Applications can take 6-8 weeks to expedite completely. Every reasonable effort will be made to process the application for the semester requested.

Admission Requirements
• Completion of an appropriate preliminary degree with a GPA of 3.0 or better
• Evidence of at least 2 years of successful experience in an appropriate field
• Minimum TOEFL scores for most areas:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

Minimum GRE score* (varies by program area). Generally:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal + Quantitative</th>
</tr>
</thead>
<tbody>
<tr>
<td>On or After August 1, 2011</td>
<td>291= (V150,Q141)</td>
</tr>
</tbody>
</table>

*Note: Minimum GRE score varies by program area. All LTC doctoral programs require the GRE exam in order to be considered for the program.

Required Application Materials to the Office of Graduate Studies:
• All required Graduate Studies documents
• Official transcripts
• Official GRE Scores
• Official TOEFL scores

Required Application Materials to the Learning, Teaching, & Curriculum Program
• Personal data sheet form
• Statement of purpose
• GRE scores (a copy may be sent to the department too; minimum, an official result needs to be sent to Graduate School)
• 3 letters of recommendation are required for all doctoral applicants. ALL LETTERS MUST BE CONFIDENTIAL AND SUBMITTED ACCORDINGLY THROUGH THE GRADUATE STUDIES APPLICATION SYSTEM.

Financial Aid from the Program
Internal assistantships, fellowships or other funding packages require a departmental application, starting Fall 2010, and must be completed every year in order to have funding renewed. Completion of the application does not guarantee renewal. Check the program Web site or ask the program contact for details.

EdD in Learning, Teaching and Curriculum with Emphasis in Elementary Education

This emphasis is currently suspended within the Learning, Teaching, and Curriculum program due to budget constraints and limited resources. We are not taking applicants at this time.

Would you like to become a district coordinator for Elementary Education or a professor of Elementary Education? You can participate in advanced research-based courses in literacy/reading, mathematics education, science education, and social studies education. In addition, you will be mentored to teach at the university level and to conduct publishable research. The majority of Ed.D. students in elementary education move into administrative roles at the district or state level. The majority of Ph.D. students in elementary education move on to take positions at universities or colleges. This program offers 72-hours beyond the bachelor’s degree.

Goals of the Doctoral Programs
Prepares students to:
• Understand the depth and breadth of the fields of literacy, mathematics education, social studies education, and science education in terms of research, curriculum, policy, teacher development and student learning;
• Develop, carry out, and report independent research in some area of elementary education;
• Become outstanding teachers/advisors of college students;
• Understand the role of service in the university setting and begin those memberships in organizations that can lead to a service agenda.

These goals are achieved through a combination of course-work, internships, and authentic experiences with research, development, and teacher education.

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdD in Learning, Teaching
and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements for the Master's program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 7.0 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

### EdD in Learning, Teaching and Curriculum with Emphasis in Reading Education

The EdD in Reading Education is a 72-hour program above the bachelor's. Students can expect to:

- Understand the depth and breadth of literacy education in terms of research, curriculum, policy, teacher development and student learning;
- Develop, carry out, and report independent research in literacy education;
- Become outstanding teachers/advisors of college students;
- Understand the role of service in the university setting and begin those memberships in organizations that can lead to a service agenda.

These goals are achieved through a combination of course-work, internships, and authentic experiences with research, development, and teacher education.

### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (https://gradstudies.missouri.edu/current-students/doctoral). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements for the Master's program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

### EdD in Learning, Teaching and Curriculum with Emphasis in General

This emphasis is **currently suspended** within the Learning, Teaching, and Curriculum program due to budget constraints and limited resources. We are not taking applicants at this time.

### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (https://gradstudies.missouri.edu/current-students/doctoral). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

About the Ed.S.
This post-master Educational Specialist degree is offered with the following emphasis areas: Literacy Education; Mathematics Education; Music Education; and Science Education.

Admissions Deadlines
Applicants are encouraged to submit their applications as early in the process as possible. Applications can take 6-8 weeks to complete through the procedures and processing system. Every reasonable effort will be made to process the application for the semester requested.

Admission Requirements
• Completion of an appropriate baccalaureate degree with a GPA of 3.0 or better
• Evidence of at least 2 years of successful experience in an appropriate field
• Minimum TOEFL scores for most areas:
<table>
<thead>
<tr>
<th>Internet-based test (IBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

Minimum GRE score is required for all applicants of the Ed.S. program.

When did you take the GRE?
Verbal + Quantitative
On or After August 1, 2011 291+ (V150, Q141)

Required Application Materials to the Office of Graduate Studies:
• All required Graduate Studies documents
• Official transcripts
• GRE scores
• TOEFL scores

Required Application Materials to the Learning, Teaching, & Curriculum Program
• Personal data sheet form (complete through online application)
• Statement of purpose
• GRE scores (a copy may be sent to the department too; minimum, an official result needs to be sent to Graduate School)
• 3 letters of recommendation. ALL LETTERS MUST BE CONFIDENTIAL AND SUBMITTED ACCORDINGLY THROUGH THE GRADUATE STUDIES APPLICATION SYSTEM.

Degree Requirements
The EdSp is a 30-hour program of specialization built on the master's degree. The program requires course work in core, research, and electives. The program is directed by an advisory committee (3 members) and supervised by the major advisor.

Sample Plan of Study
Please consult with an advisor to inquire what a sample program of study may look like. Coursework will generally comprise upper-level graduate work in literacy education, tailored to the student's needs and career objectives.

• Prerequisites
  • Foundations of Educational Psychology (or equivalent)
  • Introduction to Statistics (or equivalent)
• English Education or Literacy Education Core
  • To be negotiated with advisor to meet your professional goals
• Education Core (3+ semester hours)
  • If not completed as a part of the master's degree, one or more graduate courses in the behavioral, social, philosophical, or historical foundations of education
• Research Courses (6+ semester hours)
  • Introduction to Educational Statistics
  • Overview of Educational Research
• Electives
  • May be taken to deepen specialization or to advance the student's career goals

Comprehensive Examination Process
A thesis or seminar paper and final examination are required.

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria.
Complete admission requirements (https://education.missouri.edu/degree/literacy-education-eds) for the EdSp program.

• Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
• Completion of an appropriate master's degree with a GPA of 3.0 or better.
• A minimum of three letters of recommendation.
• Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
• GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q141, A3.5 or higher)
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degree/mathematics-educations-eds) for the Ed.S. program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed Ed.S. degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q141, A3.5 or higher)
- For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program.

Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

Program of Study

The program of study for the Educational Specialist degree in Mathematics Education is comprised of three key areas:

1.) 14+ hours of Mathematics Education curriculum
2.) Up to 9 hours of general electives
3.) 7 hours of research core: ESC_PS 7170 (3), ESC_PS 8020 (3), and LTC 8910 (1)

More information about the courses available that comprise the program can be found at the MizzouOnline website: http://online.missouri.edu/degreeprograms/education/mathematics/education-specialist/admissions.aspx

EdSp in Learning, Teaching and Curriculum with Emphasis in Mathematics Education

The Educational Specialist degree in Mathematics Education is intended for teachers who have already completed a masters degree and are seeking additional work related to leadership, curriculum development, research and/or improving their own teaching skills. The Ed.S. is a 30-hour program beyond a master's degree. Coursework is comprised of at least 15 hours at the 8000 level or higher; and at least half the coursework in education. The program of study is approved by the student's advisor and two committee members.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degree/mathematics-educations-eds) for the Ed.S. program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed Ed.S. degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q141, A3.5 or higher)
- For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program.

Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

Program of Study

The program of study for the Educational Specialist degree in Mathematics Education is comprised of three key areas:

1.) 14+ hours of Mathematics Education curriculum
2.) Up to 9 hours of general electives
3.) 7 hours of research core: ESC_PS 7170 (3), ESC_PS 8020 (3), and LTC 8910 (1)

EdSp in Learning, Teaching and Curriculum with Emphasis in Music Education

The Educational Specialist Degree (EdS) in Learning, Teaching, & Curriculum with an emphasis in Music Education, is offered by the College of Education in close collaboration with the School of Music. The Ed.S. represents a planned program of approved graduate course work beyond the master’s degree, organized to meet the specific needs of the student. The program is one of specialization and is designed to build upon the foundation represented by previous coursework and teaching experience.

The Ed.S. is a 30-hour program beyond a master’s degree. Coursework is comprised of at least 15 hours at the 8000 level or higher; and at least half the coursework in education. The program of study is approved by the student's advisor and two committee members.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degreeprograms/graduate-degrees) for the Ed.S. program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
• Completion of an appropriate master's degree with a GPA of 3.0 or better.
• A minimum of three letters of recommendation.
• Statement of purpose clearly indicating that the proposed Ed.S. degree is appropriate to the applicant's professional aspirations.
• GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q141, A3.5 or higher)
• For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

EdSp in Learning, Teaching and Curriculum with Emphasis in Science Education

The Educational Specialist (EdS) Program in Science Education is designed for individuals holding a Master's in Science Education who desire further education. The EdS in Science Education is typically considered a terminal degree, not a stepping stone to the PhD.

The Ed.S. is a 30-hour program beyond a master's degree. Coursework is comprised of at least 15 hours at the 8000 level or higher; and at least half the coursework in education. The program of study is approved by the student's advisor and two committee members.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degerecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degree/science-education-eds) for the Ed.S. program.

• Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
• Completion of an appropriate master's degree with a GPA of 3.0 or better.
• A minimum of three letters of recommendation.
• Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.

• GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q141, A3.5 or higher)
• For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

About the Ph.D.

The LTC Department offers the Doctorate of Philosophy (Ph.D.) with emphasis options in General LTC; Art Education; Early Childhood Education; Elementary Education; Mathematics Education; Music Education; Reading Education; Science Education; or Social Studies Education.

Application Deadlines

Applicants are encouraged to submit their applications as early in the process as possible. Applications can take 6-8 weeks to complete through the procedures and processing system. Every reasonable effort will be made to process the application for the semester requested.

Admission Requirements

• Completion of an appropriate preliminary degree with a GPA of 3.0 or better
• Evidence of at least 2 years of successful experience in an appropriate field
• Minimum TOEFL scores for most areas:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

• Minimum GRE score* (varies by program area). Generally:

When did you take the GRE? Verbal + Quantitative
On or After August 1, 2011 V153,Q144=297+

Note: Minimum GRE score varies by program area. All LTC doctoral programs require the GRE exam in order to be considered for the program.

Required Application Materials to the Office of Graduate Studies:

• All required Graduate Studies documents
• Official transcripts
Financial Aid from the Program

Internal assistantships, fellowships or other funding packages require a departmental application and must be completed every semester in order to have funding renewed. Completion of the application does not guarantee renewal. Check the program website or ask the program contact for details.

PhD in Learning, Teaching and Curriculum with Emphasis in Art Education

The MU Art Education PhD program prepares individuals for research and teacher education careers in higher education and for leadership positions in various educational settings. The program offers opportunities to expand a teaching repertoire and research current topics in art education as well as to develop expertise in conceptualizing, conducting and reporting research in the arts arena.

The individual and a faculty committee develop an individualized program of study based upon a candidate’s background, experiences, and professional goals. The majority of MU PhD graduates take positions in Colleges of Education or Fine Arts in Art and Art Education at universities or colleges. However, some graduates move into administrative and supervisory positions at art museums, and arts agencies.

Admissions

Applicants are required to meet both sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degree/art-education-phd) for the Doctoral program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Early Childhood Education

The faculty and students in early childhood education work closely together. Faculty and students share ideas and learn from one another. Your faculty advisor has the strongest interest in your professional/personal growth, but each early childhood faculty member will be a valued part of your community.

Goals of the PhD Program

These goals are achieved through a combination of course-work, internships and authentic experiences with research, development, and teacher education.

- Understand the depth and breadth of the field of early childhood education in terms of research, curriculum, policy, teacher development and student learning;
- Develop, carry out, and report independent research in some area of early childhood education;
- Become outstanding teachers/advisors of college students;
- Understand the role of service in the university setting and learn how memberships in organizations can lead to a service agenda.

Admissions

Applicants are required to meet both sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.
Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/admissions) for the Doctoral program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Elementary Education

This emphasis is currently suspended within the Learning, Teaching, and Curriculum program due to budget constraints and limited resources. We are not taking applicants at this time.

Would you like to become a district coordinator for Elementary Education or a professor of Elementary Education? You can participate in advanced research-based courses in literacy/reading, mathematics education, science education, and social studies education. In addition, you will be mentored to teach at the university level and to conduct publishable research. The majority of Ed.D. students in elementary education move into administrative roles at the district or state level. The majority of Ph.D. students in elementary education move on to take positions at universities or colleges. This program offers 72-hours beyond the bachelor's degree.

Goals of the Doctoral Programs

Prepares students to:

- Understand the depth and breadth of the fields of literacy, mathematics education, social studies education, and science education in terms of research, curriculum, policy, teacher development and student learning;
- Develop, carry out, and report independent research in some area of elementary education;
- Become outstanding teachers/advisors of college students;
- Understand the role of service in the university setting and begin those memberships in organizations that can lead to a service agenda.

These goals are achieved through a combination of course-work, internships, and authentic experiences with research, development, and teacher education.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/admissions) for the Doctoral program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in English Education

The English Education area gives students a strong background in reading and writing pedagogy, adolescent literature, and media literacy. We also emphasize lesson planning, curriculum creation and teaching, classroom management, diversity and social equity.

We prepare candidates to be English teachers and follow the guidelines of National Council of Teachers of English (NCTE), as well as those of the National Middle School Association (NMSA).

In order to earn a PhD in English Education, a minimum of 72 semester hours beyond the bachelor's degree is required.
University of Missouri

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

---

**PhD in Learning, Teaching and Curriculum with Emphasis in Foreign Language Education**

The Learning, Teaching, & Curriculum Graduate Program is no longer accepting students into the Foreign Language Education program.

**PhD in Learning, Teaching and Curriculum with Emphasis in General**

This emphasis is currently suspended within the Learning, Teaching, and Curriculum program due to budget constraints and limited resources. We are not taking applicants at this time.

**PhD in Learning, Teaching and Curriculum with Emphasis in Mathematics Education**

The MU Ph.D. program in Mathematics Education is designed to prepare individuals for careers in higher education and leadership positions in a variety of educational settings. The program aims to enhance student knowledge about the field of mathematics education and develop expertise in conceptualizing, conducting and reporting research studies. Programs of study are individually planned with a faculty committee, and are based upon candidate’s background, experiences, and professional goals. The majority of our graduates take positions in Colleges of Education or Departments of Mathematics at universities or colleges. However, some graduates move into administrative and supervisory roles at district or state levels.

Detailed information about all of the elements of the program can be found in the MU Mathematics Education Ph.D. Program: Faculty and Student Handbook (http://education.missouri.edu/LTC/mathematics/files/math_ed_handbook.pdf).

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer

Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/admissions) for the PhD program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master’s degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation; three letters.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

**PhD in Learning, Teaching and Curriculum with Emphasis in Reading Education**

The Doctoral Program in Literacy Education is designed to prepare individuals for careers in higher education and leadership positions in a variety of educational settings. Besides enhancing students’ knowledge of literacy education, students develop expertise in conceptualizing, conducting and reporting research studies.

Programs of study are individually planned with a faculty committee. Recommendations include the following:

**I. Literacy Education Core** (18+ hours)

- Foundations (9-12 hours)
  - Theoretical Foundations of Literacy
  - Whole Language Curriculum or Talk in the Curriculum
  - History of Literacy or Issues and Trends of Literacy Education
  - Linguistics, Sociolinguistics, Psycholinguistics
- Concentration (9-12 hours)

Declared area of interest or specialization selected in consultation with advisor. Possible areas of specialization include:

- Early Literacy
- Children’s Literature

- Linguistics and Literacy
- Literacy in a Digital World
- Literacy for Special Needs Children
- Other

**II. Professional Education Core**

(12 hours, 3 hours from each category)

- A. Humanistic Dimensions of Education
  - Social and Philosophical Aspects of Teaching
  - Sociology of the Classroom
  - Issues in Education and Human Development: Historical and Philosophical
- B. Psychological Foundations of Education
  - Human Learning
  - Human Cognition
  - Applications of Computer Based Systems to Educational Settings
  - Instructional Programs for Young Children
  - Parents, the School, and the Community

**III. Research Core** (12 hours of the following or equivalent courses)

- Quantitative Methods in Educational Research I
- Quantitative Methods in Educational Research II
- Qualitative Methods of Educational Research I
- Qualitative Methods of Educational Research II

**IV. Teaching and Research Internships** (0-6 hours)

To be negotiated with advisor to meet your professional goals

**V. Electives** (0-12+ hours)

Select courses within or outside the College of Education that will help focus and support your research interests (with committee approval). Or take a concentrated set of 9-12 hours as a minor

**VI. Dissertation** (12 hours)

Includes proposal approval, Institutional Review Board Approval, approval from participants, write up, and oral defense

Doctoral Regulations:

Minimum total semester hours: 72 beyond the baccalaureate degree

Minimum semester hours 8000-level or above: 15 exclusive of research, problems, and independent study experiences

**PREREQUISITES:**

- Introduction to Statistics (or equivalent)
- Foundations of Educational Psychology (or equivalent)

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer
to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degree/reading-education-phd/#degree-requirements) for the Doctoral program.

- Completion of an appropriate Bachelor’s degree with a GPA of 3.0 or better.
- Completion of an appropriate master’s degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation; three letters.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant’s professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

**PhD in Learning, Teaching and Curriculum with Emphasis in Science Education**

The doctoral program emphasizes science education research and culminates with a dissertation project completed under the supervision of a science education faculty member. The program requires coursework in science education, science content, educational foundations, and educational research.

The Science Education Ph.D. requires a minimum of 72 semester hours beyond the Bachelor's degree (the Master's degree can be counted toward this total). The Science Education Ph.D. program includes three emphasis areas:

1. Elementary Science Education
2. Middle/Secondary Science Education
3. College Science Teaching

Each emphasis area requires coursework in science education, science content, and educational research as well as teaching and research experiences.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degree/science-education-phd/#apply) for the Doctoral program.

- Completion of an appropriate Bachelor’s degree with a GPA of 3.0 or better.
- Completion of an appropriate master’s degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant’s professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

**PhD in Learning, Teaching and Curriculum with Emphasis in Social Studies Education**

The Ph.D. in Social Studies Education at the University of Missouri provides increased opportunities for its graduates to assume leadership roles in a variety of academic, knowledge-driven, and/or governmental and politically-based institutions and organizations. The core of the Ph.D. experience lies in scholarship and in the process by which graduate students transition from being knowledge-consumers to knowledge-producers. Hence, the doctoral experience involves a journey of personal growth and development, which leads the graduate student towards a deeper sense of the self and towards crafting a personal agenda for scholarship in the social studies field.

**The Culture of the Social Studies Education Doctoral Program**

Unique among graduate programs, the social studies doctoral students and faculty form a community of learners and employ democratic practices to shape the direction of the community, its scholarship, and future coursework. As a result, in dialogue with faculty members, doctoral students help co-direct the structure of their Ph.D. experience.
This occurs in two ways. First, doctoral students have flexibility in much of the design of their own coursework, research endeavors, and scholarship. Second, in community with the other doctoral students and faculty members, doctoral students vote on coursework requirements, expectations for the program, and program goals.

An important aspect of forming this community of learners involves identifying and clarifying the academic and research interests of its members. As a result, the current doctoral students have established four research clusters, or areas that describe their often overlapping research interests in the social studies education field. At this time, these clusters include the following:

- **Social Studies Teacher Education for Social Justice**: addressing issues of citizenship, diversity, and social justice in teacher education.
- **Multicultural and Global Education**: preparing teachers and students to address local, national, and global concerns of culture, environment, and the socio- and geopolitical landscape in education.
- **Social Studies Curriculum and Instruction**: Confronting persistent issues in social studies curriculum and teaching, including official and master narratives, teaching methodologies, assessment, technology, and student engagement in the classroom.
- **Educational Policy and Politics Affecting Social Studies Teaching**: Investigating the power structures, political dynamic, curriculum control, and educational policy and system structure influence social studies education and teaching.

These research clusters not only clarify and support doctoral students in team-oriented scholarship, but also inform social studies faculty on which courses to offer and what kinds of research opportunities to promote. Research clusters are reviewed and revised on a yearly basis. Because admission into the doctoral program also includes membership into our community of learners, we recommend that individuals interested in applying for the Social Studies Education doctoral program at the University of Missouri demonstrate research interests that align with one or more of these research clusters.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degree/social-studies-education-phd#apply) for the Doctoral program.

- Completion of an appropriate Bachelor’s degree with a GPA of 3.0 or better.
- Completion of an appropriate master’s degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation; three letters.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant’s professional aspirations.

- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

**Learning Technologies and Design**

School of Information Science & Learning Technologies
304 Townsend Hall
Columbia, MO 65211
phone: 877-747-5868
phone: 573-882-4546
fax: 573-884-0122
email: sislt@missouri.edu
website: http://sislt.missouri.edu/

**Faculty**

**Professor** S. Erdelez**, R. Marra**, J. Moore**, J. Strobel**
**Associate Professor** D. Adkins**, J. Bossaller**, I. Jahnke**, H. Moulaison-Sandy**
**Assistant Professor** S. Buchanan**, T. Gibson**, X. Xu**
**Teaching Professor** J. Howland*
**Associate Teaching Professor** A. Klimczak*
**Associate Clinical Professor** Z. March
**Assistant Teaching Professor** B. Brendler*, K. Robinson*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

While MU does not offer undergraduate degrees specifically in information science and learning technologies, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Education, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

**Graduate**

- MS in Learning Technologies and Design (p. 464)  
  - with emphasis in Online Educator (p. 464)  
  - with emphasis in Technology in Schools (p. 465)
to customize your course work by focusing on technology design and development or technology implementation.

Comprehensive Examination Process

In your final semester, you will develop and present a portfolio of your work to demonstrate your mastery of the competencies specific to your focus area. The portfolio contains descriptions of competencies and what they mean to you, explanations of artifacts, and reflections. You should start on your portfolio early in your coursework.

Portfolios can be submitted spring, fall, and summer semesters. Portfolios must be submitted to the assigned portfolio coach for review no later than three (3) weeks prior to the last day of classes; you will be notified by the SISLT Student Services Office of the specific date at the beginning of your final semester.

The student will work with the portfolio coach who will provide feedback and support to the student as she/he prepares the portfolio for review.

The review process asks three basic questions:

1. Does the portfolio demonstrate the student's knowledge of what the competencies mean?
2. Does the portfolio demonstrate the student's mastery of the competencies?
3. Does the portfolio present the student in a positive and professional manner?

Once a portfolio is deemed acceptable or unacceptable by the portfolio coach, the coach will notify the student and the SISLT Student Services Office. Should the portfolio be deemed unacceptable by the portfolio coach, the student may appeal this decision by petitioning the Director of SISLT and requesting that two other faculty review the portfolio.

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Learning Technologies and Design program (http://sislt.missouri.edu/edtech/online-education) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

**MS in Learning Technologies and Design with Emphasis in Technology in Schools**

The Technology in Schools emphasis area is your portal to excellence and leadership in designing, developing, and implementing technology in education, training and performance support. In the TIS focus area you will prepare to use innovative and effective technology to improve teaching and learning in a wide variety of settings. In addition to gaining a working knowledge of the underlying theories and strategies involved, you will get practical experience using technology as an effective teaching and learning tool.

Working with a faculty advisor, each student develops a customized program of study. You pick the professional goal that makes sense to you, and our faculty will help you transform your goal into reality.

Your degree will open an array of career options. Some graduates work in K-12 schools, others work in corporations, and still others apply their skills in government, healthcare, higher education, and other settings. For example, some of our recent graduates are Software Designers and Developers, Learning Strategy Managers, Adaptive Technology Specialists, Training Designers, School Technology Coordinators, and Online Instructors. Whatever the setting, you will graduate with a skill set that will serve you well in the future.

**Degree Requirements**

The MS consists of 30 graduate credit hours, with a minimum of 15 at the 9000 level or above. The Technology in Schools curriculum allows you to customize your course work by focusing on technology design and development or technology implementation.

**EdSp in Learning Technologies and Design**

Degree information for the EdSp in Learning Technologies and Design degree may be found on the degree’s emphasis pages. They are Technology in Schools (p. 466), and Online Educator (p. 466).
EdSP in Learning Technologies and Design with Emphasis in Online Educator

The Educational Specialist degree at MU is your portal to excellence and leadership in designing, developing, and implementing technology in education, training and performance support. In the Online Educator emphasis area you will develop the knowledge and skills in eLearning offerings. You will prepare for jobs in an expanding field where online education is used in schools, universities, industry, healthcare, museums, and other learning settings. Your work will culminate in an authentic capstone project that documents your learning and accomplishments.

Working with a faculty advisor, each student develops a customized program of study. You pick the professional goal that makes sense to you, and our faculty will help you transform your goal into reality.

Your degree in Online Educator will open an array of career options. Some graduates work in K-12 schools, others work in corporations, and still others apply their skills in government, healthcare, higher education, and other settings. For example, some of our recent graduates are Software Designers and Developers, Learning Strategy Managers, Adaptive Technology Specialists, Training Designers, School Technology Coordinators, and Online Instructors. Whatever the setting, you will graduate with a skill set that will serve you well in the future.

Degree Requirements

The Educational Specialist degree is a 30-hour program of specialization built upon the master’s degree. It requires 27 credit hours of coursework relevant to the Online Educator competencies plus 3 credit hours in ESC_PS 7170 Introduction to Applied Statistics. At least 15 credit hours must be at the 8000/9000 level.

Assistant Teaching Professor B. Brendler**, K. Robinson*
* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

While MU does not offer undergraduate degrees specifically in information science and learning technologies, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Education, and in the other Schools and Colleges that make
up the University. The catalog provides a complete list of these degree options (p. 18).

**Graduate**

- MLIS Master of Library and Information Science (p. 468)
  - with emphasis in Library Media Specialist, Certification (p. 468)

**About Information Science & Learning Technologies**

In January 1997, the School of Information Science & Learning Technologies became the home for MU’s graduate programs in Library and Information Science and Educational Technologies as well as a new, interdisciplinary doctoral program in Information Science & Learning Technologies.

SISLT faculty are internationally renowned for their research and development accomplishments. Faculty and students are committed to a collaborative, interdisciplinary approach – both within MU and among other research-extensive universities. Nowhere is this more evident than in the Allen Institute (http://alleninstitute.missouri.edu), a 10,000 square foot facility dedicated to supporting collaborative R&D at the intersection of Information & Learning.

Student Services Coordinator, 304 Townsend Hall
Columbia, MO 65211
573-882-4546 or toll free 877-747-5868
http://sislt.missouri.edu/

**MLIS Master of Library and Information Science**

Degree information for the Master of Library and Information Science (MLIS) degree may be found on the degree's emphasis pages. Library Media Specialist, Certification (p. 468).

**MLIS Master of Library and Information Science with Emphasis in Library Media Specialist, Certification**

In the state of Missouri, Library Media Certification is granted by the Missouri Department of Elementary and Secondary Education (DESE). The School of Information Science & Learning Technologies (SISLT) LIS Program offers many of the courses approved by DESE for this certification. Presently SISLT does not offer courses in Library Media Administration and Curriculum and the Media Center. Students are encouraged to speak with their academic advisors about completing these courses at other universities in the state of Missouri. For more information about the process of certification, please visit DESE website (http://dese.mo.gov/sites/default/files/04%20Secondary%20Education04-08.pdf).

**Middle School Education**

Dr. Laurie Kingsley, Director of Teacher Education
Department of Learning, Teaching and Curriculum
202 Townsend Hall
573-882-0560

TeacherEducation@missouri.edu

Professional education coursework is delivered by four departments within the College of Education, namely, Learning, Teaching and Curriculum; Special Education; Educational Leadership and Policy Analysis; and Educational, School and Counseling Psychology.

**Faculty**

- **Associate Professor Emeritus** L. Bennett**, C. Gilles**, M. Volkman*
- **Assistant Professor** M. Metz, C. Munter, A. Woodson, L. Zangori**, A. Zapata**
- **Emeritus Research Professor** D. A. Grouws*
- **Associate Teaching Professor** N. Ashcraft*, L. Kingsley*, L. Neier*, J. Ostrow*
- **Assistant Teaching Professor** L. Arend, R. Metro, V. Spain*

  - Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
  - Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

- BSEd in Middle School Education (p. 469)
  - with emphasis in Language Arts (p. 469)
  - with emphasis in Mathematics (p. 470)
  - with emphasis in Science (p. 470)
  - with emphasis in Social Studies (p. 471)

The requirements for the Bachelor of Science in Education are specified in three areas: University general education, professional education and a teaching major. All students preparing to be teachers in early childhood, elementary, special education, middle or secondary schools, regardless of the major field, are required to complete the University general education program. Students transferring from other institutions are required to fulfill the equivalencies of these courses.

**Graduate**

The Middle School Education Program at the University of Missouri includes degree programs that focus on preparing graduates to teach in grades 5-9. The College of Education does not currently offer a graduate degree specifically in Middle School Education. However, we do offer Masters (M.Ed.) and doctorates (Ph.D) in the following areas.

- Math
- English/Language Arts
- Science
- Social Studies
- Art
- Music
We also offer a graduate degree in "Reading/Literacy Education" at the M.Ed., Ed.S., Ed.D, and Ph.D. levels.

You can find out more about the programs by going to http://education.missouri.edu/academics/graduate_studies/index.php.

BSEd in Middle School Education

Degree Program Description

The Bachelor of Science in Education in Middle School Education prepares students to work with children from fifth through ninth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers' roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence. Coursework will help you learn about general teaching and learning strategies as well as those specific to your discipline.

Major Program Requirements

The BSEd in Middle School Education is offered in four emphasis areas: Language Arts (p. 469), Mathematics (p. 470), Science (p. 470), and Social Studies (p. 471). Students must complete one of the emphasis areas to earn the BSEd. Students must complete all university (p. 33), general education (p. 34), and content requirements in addition to the degree requirements. Please meet with a Mizzou Ed Academic Advisor to discuss degree requirements and to create a semester plan.

As Mizzou Ed continues to implement the new Missouri Standards for the Preparation of Educators mandated by the Department of Elementary and Secondary Education (DESE), curriculum changes will be required that must be met in order to complete your degree and earn teacher certification. Those changes may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

Semester Plan

The BSEd in Middle School Education has emphasis areas in Language Arts (p. 469), Mathematics (p. 470), Science (p. 470), and Social Studies (p. 471). Please see the individual emphasis area pages for semester plans specific to the emphasis area.

Secondary Education

Dr. Laurie Kingsley, Director of Teacher Education
Department of Learning, Teaching and Curriculum
202 Townsend Hall
573-882-0560
TeacherEducation@missouri.edu

Professional education coursework is delivered by four departments within the College of Education, namely, Learning, Teaching and Curriculum; Special Education; Educational Leadership and Policy Analysis; and Educational, School and Counseling Psychology.

Faculty

**Associate Professor Emeritus** L. Bennett**, C. Gilles**, M. Volkmann**

**Assistant Professor** M. Metz, C. Munter, A. Woodson, L. Zangori**, A. Zapata**

**Emeritus Research Professor** D. A. Grouws

**Associate Teaching Professor** N. Ashcroft*, L. Kingsley*, L. Neier*, J. Ostrow*

**Assistant Teaching Professor** L. Arend, R. Metro, V. Spain

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BSEd in Secondary Education (p. 473)
  - with emphasis in Art Education (p. 473)
  - with emphasis in Biology (p. 473)
  - with emphasis in Chemistry (p. 474)
  - with emphasis in Earth Science (p. 475)
  - with emphasis in General Science (p. 475)
  - with emphasis in Language Arts (p. 475)
  - with emphasis in Mathematics Education (p. 476)
  - with emphasis in Physics (p. 477)
  - with emphasis in Social Studies (p. 478)

The requirements for the Bachelor of Science in Education are specified in three areas: University general education (p. 34), professional education and a teaching major. All students preparing to be teachers in early childhood, elementary, special education, middle or secondary schools, regardless of the major field, are required to complete the University general education (p. 34) program. Students transferring from other institutions are required to fulfill the equivalencies of these courses.

Graduate

The Secondary Education Program at the University of Missouri includes degree programs that focus on preparing graduates to teach in grades 9-12. The College of Education does not currently offer a graduate degree specifically to Secondary Education. However, we do offer Masters (M.Ed.) and doctorates (Ph.D) in the following areas.

- Math
- English/Language Arts
- Science
- Social Studies
- Art
- Music

We also offer a graduate degree in "Reading/Literacy Education" at the M.Ed., Ed.S., Ed.D, and Ph.D levels.

You can find out more about the programs by going to http://education.missouri.edu/academics/graduate_studies/index.php.
BSEd in Secondary Education

Degree Program Description

The Bachelor of Science in Education in Secondary Education prepares students to work with children from ninth through twelfth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers’ roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence.

Major Program Requirements

The BSEd in Secondary Education is offered in nine emphasis areas: Art Education (p. 473), Biology (p. 473), Chemistry (p. 474), Earth Science (p. 475), General Science (p. 475), Language Arts (p. 475), Mathematics Education (p. 476), Physics (p. 477), and Social Studies (p. 478). Students must choose one of the emphasis areas to earn the BSEd. Students must complete all university (p. 33), general education (p. 34), and content requirements, in addition to the degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

As Mizzou Ed continues to implement the new Missouri Standards for the Preparation of Educators mandated by the Department of Elementary and Secondary Education (DESE), curriculum changes will be required that must be met in order to complete your degree and earn teacher certification. Those changes may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

Semester Plan

This degree does not currently have a sample semester plan. Please schedule an appointment with an academic advisor to discuss courses.

BSEd in Secondary Education with Emphasis in Biology

Degree Program Description

The Bachelor of Science in Education in Secondary Education prepares students to work with children from ninth through twelfth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers’ roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence. Coursework within Secondary Biology provides you with experience in the methods of teaching biology in supporting learners in the development of scientific literacy. This includes consideration of the nature of science, methods for teaching science, strategies for assessing science learning, and pathways for developing into a professional biology educator.

Major Program Requirements

Students must complete all university (p. 33), general education (p. 34), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

As Mizzou Ed continues to implement the new Missouri Standards for the Preparation of Educators mandated by the Department of Elementary and Secondary Education (DESE), curriculum changes will be required that must be met in order to complete your degree and earn teacher certification. BSEd in Secondary Education with Emphasis in General Science

Degree Program Description

The College of Education is no longer accepting applications to the BSED in Secondary Education with emphasis in General Science. Please see our science emphasis areas (Biology (p. 473), Chemistry (p. 474), Earth Science (p. 475), Physics (p. 477)).

Major Program Requirements

There are currently not any major program requirements for this program.

Semester Plan

There is currently not a semester plan available for this program.

BSEd in Secondary Education with Emphasis in Language Arts

Degree Program Description

The Bachelor of Science in Education in Secondary Education prepares students to work with children from ninth through twelfth grade in public,
private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers’ roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Upon successfully completing the initial teacher certification process, the state grants you certification in secondary language arts. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence. Coursework within Secondary language arts provides you with experience in the methods of teaching language arts. Education courses include an introduction to language arts education, and three teaching language arts methods and assessment courses focused on literature, writing, and mass media.

**Major Program Requirements**

Students must complete all university (p. 33), general education (p. 34), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

BSEd in Secondary Education with Emphasis in Social Studies

Degree Program Description

The Bachelor of Science in Education in Secondary Education prepares students to work with children from ninth through twelfth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers’ roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Upon successfully completing the initial teacher certification process, the state grants you certification in secondary social studies. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence. Coursework within Secondary social studies provides you with experience in the methods of teaching social studies. Education courses include an introduction to social studies education, methodology for teaching science and assessment within the field. Inquiry courses focus on how issues related to schools, family, community and society affect educators, classroom management, and special needs learners.

Major Program Requirements

Students must complete all university (p. 33), general education (p. 34), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

As Mizzou Ed continues to implement the new Missouri Standards for the Preparation of Educators mandated by the Department of Elementary and Secondary Education (DESE), curriculum changes will be required that must be met in order to complete your degree and earn teacher certification. Those changes may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

Semester Plan

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices and where options are available.

Special Education

Our mission is to prepare educators to work with children, youth and adults with disabilities to be academically and socially successful lifelong learners. The department offers comprehensive degree programs that blend pedagogy and practices across developmental, specific content, and exceptionality to prepare educators to work with individuals at-risk and those with disabilities. In addition, the department offers comprehensive programs within exceptionality, curriculum development for learners with disabilities, policy, and research across the lifespan.

Areas of Study

Students pursuing a master's degree may pursue course work in autism, behavior disorders, early-childhood special education, general special education (cross categorical), gifted education, or learning disabilities.

Doctoral student may study in areas such as behavior disorders, early-childhood special education, general special education, learning disabilities or developmental disabilities (cognitive impairments).

Careers

Undergraduate and graduate programs prepare teachers and leadership personnel in the field of special education. Program graduates assume roles as teachers in a variety of educational settings, as consulting teachers, college professors, researchers, school administrators and leaders in state and federal governmental agencies. Programs meet students’ needs and interests within the framework of the requirements of each specific degree and state certification guidelines.

BSEd in Special Education

Degree Program Description

The Bachelor of Science in Education in Special Education prepares students to work with children from kindergarten through twelfth grade in
public, private, and alternative school systems. Students should consider a
degree in special education if they enjoy working with children and/
or adolescents who are struggling or who have special needs, want
to help these students develop into strong citizens, and are excellent
collaborators. MU Students work closely with mentors, practicing
teachers, administrators, and university faculty to develop the knowledge
and skills to enhance learning outcomes for children and youth with
and at risk for disabilities. The coursework through the College of
Education focuses on teachers’ roles in facilitating learning at all levels of
development and considers the influences of cultural, political, historical,
and economic factors on students, teachers, and schools. Students must
choose the emphasis area.

Major Program Requirements

Students are required to select the emphasis area in Cross Categorical
Special Education (p. 480) for this degree. Refer to the emphasis are for
degree requirements.

Semester Plan

For a sample plan of study refer to the semester plan designed for the
emphasis in Cross Categorical Special Education (p. 480).

MA in Special Education

Caitlin Rosbach (sped@missouri.edu)
303 Townsend Hall, Columbia, MO 65211
573-882-3742
About Special Education's Master's Degrees

The Master of Arts program emphasizes research and requires 33 hours. MA candidates must follow graduate school guidelines with respect to timeliness and committee formation.

The Master of Education program requires a comprehensive examination and project or thesis.

Admission Criteria

Application Submission/Completion Deadline:
Fall deadline: May 1
Spring deadline: October 1
Summer deadline: March 1

Minimum GPA: 3.0/4.0
Minimum TOEFL scores:
- Internet-based test (iBT) 80
- Paper-based test (PBT) 550

Minimum preferred GRE scores:
- When did you take the GRE? On or After August 1, 2011
- Verbal + Quantitative 291+ (V 150 + Q 141) / Analytic Writing 3.5

Faculty selection committees review applications for admission into the various graduate programs. Factors considered in the graduate student review process include previous academic course work and performance, GRE scores, letters of recommendation from professors or professional supervisors and relevant professional work experiences. The letter of intent is evaluated for advising purposes and is an indication of the applicant's motivation, professionalism and writing competencies. Interviews with faculty are often arranged as part of the admissions review process.

Required Application Materials

To the Office of Graduate Studies:
- All required Graduate Studies documents

To the Special Education Program:
- Departmental application
- Letter of intent and professional goals
- 2 letters of recommendation (submitted electronically and confidentially through the online graduate application)
- GRE score report

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Degree Completion

The MA program emphasizes research and requires 33 hours. MA candidates must follow the guidelines of the Office of Graduate Studies with respect to timeliness and committee formations and complete a thesis.

Retention

To remain in good standing in the master's program and earn a master's degree, each student must earn and maintain an overall grade point of 3.0 or higher in all required and elective course work each semester. If student's GPA falls below 3.0 for any semester, they will be dropped from the degree program. If students receive a grade of “C” in any core or required course, remedial activities will be required. Students must also complete course work assigned a grade of “I” prior to the end of the following semester.

Satisfactory Progress

For information on general progress guidelines and the dismissal policy, see the Special Education site.

MEd in Special Education with Emphasis in Autism

Degree Requirements

This program prepares personnel to effectively implement evidenced based practices for students along the full continuum of autism spectrum disorders (ASD). The MU Autism Master’s program prepares personnel to effectively implement evidenced based practices for students along the full continuum of autism spectrum disorders (ASD). The program enables special educators to integrate all areas of curriculum to effectively assess
and develop social competence benchmarks for students with ASD. The College of Education’s Special Education program delivers curriculum and practica in collaboration with the Thompson Center for Autism and Neurodevelopmental Disorders (https://mizzougivedirect.missouri.edu/Division.aspx?division=C905). A minimum of 30 semester credit hours must be completed in fulfillment of degree requirements.

The MEd in Autism is also available online through Mizzou Online.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

1. A completed baccalaureate degree.
2. Graduate grade point average above 3.0 (on a 4.0 scale) or higher in the last 60 hours of undergraduate coursework.
3. GRE scores taken within the last five years. For GRE scores taken on or after August 1, 2011, they should reflect a preferred combined score of 291 or better on the Verbal Reasoning and Quantitative Reasoning sections and Analytical Writing score of 3.5 or better.
4. A minimum of two letters of recommendation, which on the whole, clearly reflect professional success and predict academic success at the graduate level.
5. Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
6. For students whose native language is not English, a score of 100 of better on the TOEFL or a grade band score of 7 or better on the IELTS taken within the past two years. Ideally, the TOEFL or IELTS will be taken 6-9 months prior to the term in which the student wishes to start their program. International students who have completed within the last two years, one year of college-level full-time study in a country where English is the native language may waive the TOEFL requirement if they meet all the conditions.
7. Students may be required to complete an interview with special education faculty.
8. Students must complete all graduate school and program application materials by the deadline posted each term.

**MEd in Special Education with Emphasis in Behavior Disorders**

**Degree Requirements**

Coursework and practica in MU’s Behavioral Disorders Program focus on the preparation of high quality teachers for students with behavioral disorders. MU prepares teachers for a variety of delivery settings, including general education classrooms as well as resource and self-contained classes from kindergarten through 12th grade.

The program is grounded in the MOSTEP Quality Indicators, the DESE Cross-Categorical Competencies, the standards of the Council for Exceptional Children, relevant research pertaining to best practice, significant field work and a problems-based approach to content.

The MEd in Behavior Disorders emphasizes applied knowledge to prepare special educators to work directly with children and youth across a variety of settings.

A minimum of 30 semester credit hours must be completed in fulfillment of degree requirements.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. MEd in Special Education with Emphasis in Cross Categorical, Certification

Degree Requirements

MU's cross-categorical disabilities program is tailored to graduate students who are receiving initial and secondary certification in cross-categorical special education. Upon completion of the degree, graduates are certified to teach students with mild disabilities (i.e., learning disabilities, emotional/behavior disorders, mental retardation) and are certified to teach all grades K-12.

In addition to enrolling in courses to fulfill general certification requirements, students are required to take graduate coursework (30 hours) in the area of cross-categorical disabilities.

The coursework represents a broad scope of content including language development, assessment, advanced behavior management, vocational education, collaboration and consultation, literacy instruction, mathematics instruction, research, and trends and issues in special education. In addition to the above requirements, students in the cross-categorical program also need to take a 3-hour characteristics of students with cross-categorical disabilities course and a 4-hour strategies for students with cross-categorical disabilities course.

To enhance the generalization of critical skills and knowledge to the classroom setting, students are also required to take two practica concurrent with the characteristics and methods courses that include field experiences and applications of key concepts. Students are required to have their practica represent the range of grade levels for which they will be responsible. More specifically, if their first practicum was in an elementary setting, then their second will be in a middle school, junior high or high school setting or vice versa.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (https://gradstudies.missouri.edu/degrecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). 2. Graduate grade point average above 3.0 (on a 4.0 scale) or higher in the last 60 hours of undergraduate coursework.
3. GRE scores taken within the last five years. For GRE scores taken on or after August 1, 2011, they should reflect a preferred combined score of 291 or better on the Verbal Reasoning and Quantitative Reasoning sections and Analytical Writing score of 3.5 or better.
4. A minimum of two letters of recommendation, which on the whole, clearly reflect professional success and predict academic success at the graduate level.
5. Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
6. For students whose native language is not English, a score of 100 of better on the TOEFL or a grade band score of 7 or better on the IELTS taken within the past two years. Ideally, the TOEFL or IELTS will be taken 6-9 months prior to the term in which the student wishes to start their program. International students who have completed within the last two years, one year of college-level full-time study in a country where English is the native language may waive the TOEFL requirement if they meet all the conditions.
7. Students may be required to complete an interview with special education faculty.
8. Students must complete all graduate school and program application materials by the deadline posted each term.

MEd in Special Education with Emphasis in Early Childhood Special Education

The Early Childhood Special Education (ECSE) Program is a graduate program that provides students with the necessary experiences and information to work with young children, both typically developing and those with disabilities, and their families in a variety of settings, including both home and school. The program also focuses on working effectively with families and children from a variety of cultures and how to provide intervention in a culturally consistent manner.

The Masters program in ECSE is 30 credit hours. In the campus program there are six required courses. Additional coursework is negotiated with the advisor. The online program coursework is set and can be found at MizzouOnline (http://online.missouri.edu/degreeprograms/education/early-childhood-special-education/masters).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

1. A completed baccalaureate degree.
2. Graduate grade point average above 3.0 (on a 4.0 scale) or higher in the last 60 hours of undergraduate coursework.
3. GRE scores taken within the last five years. For GRE scores taken on or after August 1 2011, they should reflect a preferred combined score of 291 or better on the Verbal Reasoning and Quantitative Reasoning sections and Analytical Writing score of 3.5 or better.

MEd in Special Education with Emphasis in Gifted Education

Degree Requirements

Online Degree Only

The Gifted Education Master’s Program (MEd) is a graduate level program designed to provide candidates with advanced preparation in gifted education methodology and practices. Candidates become equipped with the knowledge and skills necessary to work with children and youth in the field of gifted education. The program meets Missouri Department of Education (DESE) academic requirements for Missouri Gifted Certification. This program is offered through Mizzou Online (http://online.missouri.edu/degreeprograms/education/gifted/masters).

Applicants who are accepted into the master’s program will participate in a 30-hour online degree program with 15 hours of gifted education courses and 15 hours of core course work. Courses are selected to provide educators with skills and knowledge in current learning theory and to translate this knowledge into practical strategies and techniques for use in the classroom.

The 15 hours of gifted focus courses include content covering, nature and needs of gifted students, curriculum methods, differentiated curriculum, assessment and evaluation, and gifted practicum. The 15 hours of core course work in this program include study in learning theory, research with exceptional children, instructional technology, instructional leadership, and instructional strategies.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

1. A completed baccalaureate degree.
2. Graduate grade point average above 3.0 (on a 4.0 scale) or higher in the last 60 hours of undergraduate coursework.

**MEd in Special Education with Emphasis in Learning Disabilities**

**Degree Requirements**

A Master's degree with an emphasis in Learning Disabilities may be earned in conjunction with certification to teach in the state of Missouri. Although the state no longer offers certification in the area of learning disabilities, certification in cross-categorical special education can be obtained, along with a Master's degree in Learning Disabilities, through supplemental coursework. Coursework and practica in the LD program focus on the preparation of high quality teachers for students with a range of learning and behavioral needs. Graduates may work in a variety of service delivery settings, including general education classes as well as resource and self-contained classes from kindergarten through 12th grade. A minimum of 30 semester credit hours must be completed in fulfillment of degree requirements.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

1. A completed baccalaureate degree.

2. Graduate grade point average above 3.0 (on a 4.0 scale) or higher in the last 60 hours of undergraduate coursework.

Admission Criteria
Fall deadline: January 15
Spring deadline: August 15
Minimum GPA: 3.5/4.0
Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

Minimum preferred GRE scores:
When did you take the GRE?
On or After August 1, 2011
297+ (V153 +Q144) / Analytic Writing 4.0

Faculty selection committees review applications for admission into the various graduate programs. Factors considered in the graduate student review process include previous academic course work and performance, GRE scores, letters of recommendation from professors or professional supervisors and relevant professional work experiences. The letter of intent is evaluated for advising purposes and is an indication of the applicant’s motivation, professionalism and writing competencies. Interviews with faculty are often arranged as part of the admissions review process.

Required Application Materials
To the Office of Graduate Studies:
All required Graduate Studies documents

To the Special Education Program:
Departmental application
Letter of intent and professional goals
3 letters of recommendation (submitted confidentially and electronically through our online application system)
GRE score report

Financial Aid from the Program
Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Emphasis Areas
For the doctorate’s specializations, see Degrees Offered.

Plan of Study
The PhD program requires 72 hours beyond the requirements of the master’s degree.

Qualifying Exam
Doctoral students must successfully pass a qualifying exam. This is given to assess the student’s current knowledge of the field, their ability to synthesize professional literature, engage in professional writing practices, and orally present/discuss key issues within the field. This process is conducted by three faculty members and may be used to help define the student’s plan of study.

Comprehensive Exam and Dissertation
Doctoral students must complete comprehensive exams, which have a written and oral component, which is constructed and evaluated by the student’s doctoral committee in order to advance to “candidacy” status. A minimum of six hours of 9090 Research is required for the doctoral program in completion of the dissertation.

Satisfactory Progress
For information on general progress guidelines and the dismissal policy, see the Special Education site.

PhD in Special Education with Emphasis in Administration and Supervision of Special Education

This emphasis is currently suspended within the Special Education Department due to budget constraints and limited resources. We are not taking applicants at this time.

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied.

PhD in Special Education with Emphasis in Behavior Disorders

Degree Overview and Requirements
The Doctorate of Philosophy program in Behavior Disorders supports advanced instruction and research in Behavior Disorders. Candidates complete individualized programs of study to meet their learning objectives and prepare for further research in the field. The candidate will build on prior graduate coursework through special education doctoral coursework, specified behavior disorders coursework, and dissertation preparation and defense. Students meeting entrance criteria will be conditionally admitted to the program, assigned an advisor, and expected to enroll in designated requisite coursework.

1. After completion of 9 credit hours, including 3 credits of quantitative methods plus 6 credits of special education doctoral core coursework, students must pass a qualifying examination to be fully admitted into the department.

2. Upon successful completion of the qualifying examination, students form a program committee and develop a program plan. The
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Special Education program (https://gradstudies.missouri.edu/degerecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied.

Admissions to Doctoral programs in Special Education will be based upon the following criteria:

1. Graduate grade point average above 3.5 and a preferred combined score of 297 or better on the Verbal Reasoning and Quantitative Reasoning sections and Analytical Writing score of 4.0 or better on the GRE taken within the last 5 years.
2. A minimum of three years full-time appropriate teaching or professional experience in pre K-12 or other direct services with persons with disabilities.
3. A minimum of three letters of recommendation, which on the whole, clearly reflect professional success and predict academic success at the advanced graduate level.
4. Statement of purpose indicating clearly that the proposed doctorate is appropriate to the applicant’s professional aspirations.
5. For students whose native language is not English, a score of 100 of better on the TOEFL or a grade band score of 7 or better on the IELTS taken within the past two years. Ideally, the TOEFL or IELTS will be taken 6-9 months prior to the term in which the student wishes to start their program.
6. An interview may be required by the admissions committee.
7. Confer or correspond with one of the special education faculty members in the proposed area of concentration prior to submitting an application. This contact is ultimately a requirement for admission.

All requirements implicit in the above statement must be completed before consideration of an applicant for admission. The department cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of all applicants. It is the responsibility of this committee to exercise professional judgment related to the criteria which applicants must meet in order to be considered for admission to the program. The committee frequently must use its judgment to discern from among a number of applicants those individuals who are judged to have the greatest potential for program success and ultimate contribution to the profession. Membership in under-represented groups will be a special consideration with regards to admission by the committee.

PhD in Special Education with Emphasis in Early Childhood Special Education

Degree Overview and Requirements

The Doctorate of Philosophy program in ECSE supports advanced instruction in Early Childhood Special Education. Candidates will develop a program to meet their learning and research goals in the field of Early Childhood Special Education.

1. After completion of 9 credit hours, including 3 credits of quantitative methods plus 6 credits of special education doctoral core coursework, students must pass a qualifying examination to be fully admitted into the department.
2. Upon successful completion of the qualifying examination, students form a program committee and develop a program plan. The committee shall consist of four or more graduate faculty members (at least three from within the department and at least one from outside the department). The program plan will delineate coursework and competency activities to meet department requirements.
3. Once the majority of course-work and competencies are completed (80-90%), students will be required to pass a comprehensive examination to advance to candidacy.
4. Upon successful completion of the comprehensive examination, students will form a dissertation committee and develop a research proposal. The dissertation committee may be the same as the program committee or may change based on the need to include faculty members with specific areas of expertise. Once all committee members approve the proposal, students can begin implementation of the dissertation study.
5. Upon completion of the study, students must submit a written draft to the dissertation committee and orally defend their work.
6. Students will graduate only after all dissertation committee members approve the written dissertation and oral defense.
7. Students must also comply with all College of Education and Office of Graduate Studies guidelines.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Special Education program (https://gradstudies.missouri.edu/degerecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://

Department of Educational Leadership and Policy Analysis
202 Hill Hall
573-882-8221
https://online.missouri.edu/degreeprograms/education/college-teaching/grad-cert/

The Graduate Certificate in College Teaching requires the completion of a total of 4 courses (12 credit hours) of which two courses are required and the remaining two courses can be chosen from the list of approved electives in consultation with the certificate advisor.

Courses for this program are 100 percent online: no campus visits are required.

The University reserves the right to change or cancel courses as needed.
program structure includes coursework in two categories: The graduate certificate requires 12 graduate credit hours. The overall Library & Information Science, or Journalism). The other advisor will be Romance Languages, Classics, History, Sociology, Computer Science, the humanities, social sciences, or professional school (e.g., English, the supervisor will typically be from the student's home discipline in will form a committee of two professors who will supervise their program. Students who register for the Graduate Certificate in Digital Humanities” (DH) is a rapidly growing “bridge discipline” spanning various subject areas: liberal arts, library and information science, communication arts, media studies, education, journalism, cultural studies, history and philosophy of science and technology, computer science, and informatics. Also, the contexts of the academy, libraries, archives, museums, media, and industry are important for understanding Digital Humanities. A DH scholar uses new computational and statistical tools and methods to address research problems in arts and humanities subject areas, and they apply humanistic modes of inquiry and interpretation to information, “big data,” new electronic media, and computer science.

Committee

Students who register for the Graduate Certificate in Digital Humanities will form a committee of two professors who will supervise their program. The supervisor will typically be from the student’s home discipline in the humanities, social sciences, or professional school (e.g., English, Romance Languages, Classics, History, Sociology, Computer Science, Library & Information Science, or Journalism). The other advisor will be from the iSchool.

The Graduate Certificate in Digital Humanities certifies that students are equipped with skills in interdisciplinary research using new digital technologies- skills that university researchers and public and private sector employers recognize as essential in the 21st Century. The Certificate requires completion of a major paper or digital project that integrates specialized disciplinary knowledge and digital media. The Certificate can be completed in two semesters; there is no mandatory time frame for finishing.

573-882-8221
[https://education.missouri.edu/degrees-programs/certificates-minors/education-policy/](https://education.missouri.edu/degrees-programs/certificates-minors/education-policy/)

Through an interdisciplinary partnership among Education, Law, and Public Policy scholars, our Education Policy Graduate Certificate serves
to develop critical leaders, policymakers, and scholars who demonstrate excellence in implementing and analyzing policy. A carefully planned set of courses will provide students with the knowledge, skills, and tools to answer tough policy questions facing our society, for instance: How do we address the rising costs of higher education? Segregated schooling? Undocumented immigrant students? Families who speak languages other than English?

The Education Policy Graduate Certificate will provide students with:

• Knowledge that they can apply to the study of education policy within their major discipline or their work in policy settings;
• Skills in analyzing education policy issues, i.e., understanding differing values, political and economic arguments, costs/benefits, and policy processes;
• Conceptual tools to use in understanding and resolving issues faced in educational policy development and implementation.

Foundations - Students choose 1 of the following:

<table>

After coursework is complete, students will develop a mini-portfolio to demonstrate their learning.

Applications accepted anytime. For more information about this graduate certificate, contact the ELPA Department by phone at 573-882-8221 or by e-mail at elpagrad@missouri.edu

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/13.0401-Gedt-Elementary_Math.html.

Graduate Certificate in Elementary Mathematics Specialist

The EMS graduate certificate program includes five integrated mathematics content/pedagogy courses, each with an attached internship and two leadership development courses (total of 24 credits). The program is designed for inservice K-6 teachers interested in pursuing advanced learning experiences and training to increase their knowledge and skill to teach or lead others in teaching mathematics in elementary classrooms. That is, the program is designed for teachers currently working full time. The courses will be offered over a 2-year cycle beginning in the Fall semester (6 semesters of part-time student effort).

For information about certificate, contact Dr. Barbara Reys:
Phone: 573-882-4406
Address: 121 F Townsend
e-mail: reysb@missouri.edu

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/13.1311-Gedt-Elementary_Math.html.

Graduate Certificate in Higher Education Administration

Contact Information
Department of Educational Leadership and Policy Analysis
202 Hill Hall

https://education.missouri.edu/degrees-programs/certificates-minors/higher-education-administration/

Due to multiple and growing demands upon the academy for quality control, accountability, and productivity, administration of higher education has become increasingly complex. The Graduate Certificate in Higher Education Administration is designed to address the need for enhanced understanding of the higher education institutional context and for improved skills in areas required for effective administration of the higher education enterprise.

The Graduate Certificate in Higher Education Administration is designed to provide students with an overview of higher education administration and governance, and with some technical knowledge about various aspects of administration (e.g., finance, law, policy).

Required Courses
Six semester hours/two 3-credit courses

Graduate Certificate in Multicultural Education

This certificate will provide the requisite awareness, knowledge and skill to effectively work with students and families from diverse cultural backgrounds and is ideal for teachers, counselors and administrators in P-12 school settings. By creating this online certificate, Mizzou is working to increase the number of qualified teachers and other school personnel who can serve diverse populations and prepare all students to function more effectively in society. The 12 hour certificate can be completed entirely online, but some students may choose electives that are offered on campus.

Certificate web site: Multicultural Education Graduate Certificate. (http://online.missouri.edu/degreeprograms/education/multicultural/grad-cert)

Certificate Details

Core Courses

The foundation of the certificate starts with the following two courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 8450</td>
<td>Diversity Issues in School Mental Health</td>
<td>3</td>
</tr>
<tr>
<td>ESC_PS 8550</td>
<td>Diversity and Multiculturalism II - Practical Application</td>
<td>3</td>
</tr>
</tbody>
</table>

Electives

Students complete two courses (6 credit hours):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 8555</td>
<td>African American Education - Historic and Current Issues</td>
<td>3</td>
</tr>
<tr>
<td>ESC_PS 8565</td>
<td>Gay, Lesbian and Bisexual Issues in the Schools</td>
<td>3</td>
</tr>
<tr>
<td>ESC_PS 8560</td>
<td>Immigrant Issues in Education</td>
<td>3</td>
</tr>
</tbody>
</table>

How To Apply

Certificate program admission requirements will be the same as those for the Office of Graduate Studies. (https://gradstudies.missouri.edu/fged/13.0202-Gedt-Multicultural_Ed.html)

• Grade point average of B or better in the last 60 hours of undergraduate education for applicants with less than a master's degree.
• Submit the Office of Graduate Studies online application (https://applygrad.missouri.edu/apply).
• Upload unofficial transcripts when using the Office of Graduate Studies online application system.
• Two letters of recommendation.
• GRE scores are NOT required.

Application Deadline

None. Rolling admission.

Financial Aid

To receive financial aid, students must be admitted to the graduate certificate program. Financial aid is generally available to eligible students who are fully accepted into the program and who carry a course load of at least four credit hours per semester.

Contact Information

• Dr. Francisco Sanchez (SanchezF@missouri.edu) - Multicultural Education Faculty Coordinator

Graduate Certificate in Online Educator

The Online Educator Graduate Certificate Program will equip individuals with the knowledge and skills needed to design and provide effective online learning experiences including:

• Designing online learning activities and assessments for meaningful learning
• Designing, facilitating, and evaluating online discussions
• Promoting student engagement and motivation in online learning environments
• Understanding unique characteristics of online learning environments
• Selecting appropriate technology tools and learning objects to support online learners
• Using Learning Management Systems to support and deliver online learning
• Seeking for and evaluating Internet-based information and resources that can be used to enhance online learning
• Organizing course materials in an online format

Graduate Certificate in Positive Psychology

This online 15-credit hour graduate certificate in positive psychology from Mizzou's Department of Educational, School, and Counseling Psychology (ESCP) is designed for individuals seeking a program that emphasizes applied interventions and theory in building thriving individuals, families, communities and organizations. Combining 21st century psychology and several ancient philosophies, contemporary positive psychology is focused on advancement of individuals and their collective well-being.

The program will provide you with a thorough understanding of the science of well-being and flourishing that will allow you to be more effective in your professional and personal life. Individuals may use this graduate certificate for personal enrichment or to increase their professional marketability across many career paths such as life/career coaching, teaching, managing, and organizational consulting.

Note: This graduate certificate does not provide counselor certification.
Certificate web site: Positive Psychology Graduate Certificate (http://online.missouri.edu/degreeprograms/education/positive-psychology/grad-cert)

Certificate Details

Core Course
ESC_PS 7200 Positive Psychology 3

Electives (Select twelve hours from the list below.)
ESC_PS 7087 Seminar in Educational, School, and Counseling Psychology (Creativity and Innovation: Scientific Foundations & Everyday Applications) 3
ESC_PS 8200 Applied Positive Psychology 3
ESC_PS 8700 Life/Career Coaching and Development 3
ESC_PS 8710 Meaning In Work 3
ESC_PS 8720 Community and Stewardship 3
ESC_PS 8730 Positive Organizational Psychology 3

How To Apply
Certificate program admission requirements will be the same as those for the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/degree-certificate-seeking-applicants/admission-process.php).

- Grade point average of B or better in the last 60 hours of undergraduate education for applicants with less than a master's degree.
- Submit the Office of Graduate Studies online application (https://applygrad.missouri.edu/apply).
- Upload unofficial transcripts when using the Office of Graduate Studies online application system.
- Statement of interest: Briefly describe how this program will benefit your career aspirations and help you act upon your personal beliefs, goals, and philosophy. (Maximum of 500 words)
- Two letters of recommendation.
- Résumé or curriculum vitae.
- GRE scores are NOT required.

Application Deadline
None. Rolling admission.

Financial Aid
To receive financial aid, students must be admitted to the graduate certificate program. Financial aid is generally available to eligible students who are fully accepted into the program and who carry a course load of at least four credit hours per semester.

Contact Information
- Dr. Patrick Rottinghaus (RottinghausP@missouri.edu) - Positive Psychology Faculty Coordinator
- Sandy Sites (SItess@missouri.edu) - ESCP Online Program Coordinator

Graduate Certificate in Qualitative Research

Prerequisites
Open to all MU doctoral students. Students must have taken LTC 8957 Qualitative Methods in Educational Research I* or a comparable course outside the College of Education, as approved by the certificate committee. LTC 8957 will not count towards the 18 hours required for the certificate. *Note: LTC 8957 is cross-listed as ED_LPA 8957 and ESC_PS 8957.

Required Courses

| Qualitative Research Methods II | 3 |
| Qualitative Methods in Educational Research II (or comparable course outside the College of Education as approved by the certificate committee; sometimes listed as ED_LPA or LTC) |

| Qualitative III (Combination of advanced courses in qualitative research) | 12 |
| Methodologies |
| Theories |
| Methods of data production and analysis |

| Qualitative Research Internship | 3 |
| Qualitative Research Internship with a Faculty Member |

Total Credits 18

Courses outside of the College of Education may be accepted upon approval.

For additional information about the CQR, visit: https://education.missouri.edu/degrees-programs/certificates-minors/qualitative-research/ or email: qualcertificate@missouri.edu.

Graduate Certificate in Quantitative Research

The 18-hour Quantitative Research Certificate (QRC) is designed to prepare researchers and scholars to be users and critical consumers of quantitative research. Certificate holders are trained to conduct rigorous, scientific quantitative research.

Students completing the QRC (depending on the chosen track) will be able to:

- Design effective experimental and quasi-experimental studies
- Manage and use large scale datasets
- Analyze various types of datasets (e.g., nested data, longitudinal data) with the appropriate modeling techniques
- Apply advanced statistical methods (e.g., structural equation modeling, multilevel modeling) in their own research
- Critically review studies that make use of a diverse set of statistical methods
- Conduct measurement-related studies using techniques such as factor analysis or item response theory
Requirements

Earning the Quantitative Research Certificate (QRC) requires students to complete 18 hours of approved coursework with a grade of at least a B in all courses. A plan of study must be approved by the QRC committee and may include the following courses:

- **ESC_PS 7170** Introduction to Applied Statistics 3
  (prerequisite coursework not counted towards the 18 hour completion)

- **ESC_PS 8082** Foundations of Educational and Psychological Measurement 3

- **ESC_PS 8850** Quantitative Foundations in Educational Research 3

- **ESC_PS 9650** Application of Multivariate Analysis in Educational Research 3

- **ESC_PS 9710** Structural Equation Modeling 3
  or

- **ESC_PS 9720** Hierarchical Linear Modeling 3

Elective courses (see QRC Initial Plan of Study form) 6

For additional information including the Initial Plan of Study, visit: https://education.missouri.edu/degrees-programs/certificates-minors/quantitative-research/

Contact

For more information about the quantitative research certificate, email quantcertificate@missouri.edu.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/13.0601-Gedt-Quantitative_Research.html

Graduate Certificate in User Experience and Usability

The User Experience and Usability (UXU) Certificate, offered by the School of Information Science & Learning Technologies (https://sislt.missouri.edu), prepares students to design and evaluate technology tools and information systems. The multi-faceted human-centered lens for design and evaluation is a systematic process supported by research and best practices.

Our UXU certificate is uniquely positioned in the area of usability because our Information Experience Laboratory (IE Lab) performs extensive usability and user experience research with internal and external clients. You will prepare for jobs in an expanding field where UXU competencies are used in education, industry, healthcare, museums and other learning and performance settings.

The certificate curriculum consists of 12 graduate credit hours that may be transferred into SISLT’s M.S. or Ed.Sp. programs. The 12 graduate credit hours apply toward any of the emphasis areas: Online Education, Technology in Schools.

**Required Courses**

Graduate Minor in Multicultural Psychology

As we enter the new millennium, the U.S. population is becoming more multiracial, multiethnic, and multilingual. Some estimate that by the year 2020, racial and ethnic minorities will become the numerical majority. This demographic shift has already occurred in specific contexts, such
as K-12 schools in Los Angeles. Applied psychologists and educators have begun to develop competency standards for professionals to provide culturally relevant and effective services to our ever-changing population. In fact, multiculturalism has been identified as the fourth focus in counseling psychology. The purpose of the graduate minor in multicultural psychology and education would be to (a) expose graduate students to the growing theoretical and empirical research completed in the fields of multicultural psychology and education, (b) help graduate students develop multicultural competencies in research and practice, and (c) provide graduate students with training necessary to meet the psychological and educational demands of diverse populations.

**The requirements for the minor are listed below.**

- A minimum of 12 credit hours
- 9 credit hours must be taken as a graduate student at the University of Missouri
- No more than 6 credit hours should be listed in the masters or doctoral planner. That is, a maximum of 6 hours can overlap between the courses applied to the Minor in Multicultural Psychology and the courses applied toward a masters or doctoral degree.
- A minimum of 9 credit hours must be 8000 or above (graduate level)
- 6 credit hours must be taken within the core area with a focus on racial and ethnic minorities (see listing below)
- 3 credit hours must be taken in the auxiliary area (see listing below)
- 3 credit hours must be taken in the skills area (see listing below)

**Core Courses**

Must complete at least 6 credit hours from the following courses with a main emphasis on race/ethnicity in psychology and/or education:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 8590</td>
<td>Multicultural Counseling Competencies: Theory and Research</td>
<td>3</td>
</tr>
<tr>
<td>ESC_PS 9000</td>
<td>Multicultural Issues in Counseling</td>
<td>3</td>
</tr>
</tbody>
</table>

Other racial/ethnic-focused graduate level courses in other departments, with pre-approval.

**Auxiliary Courses**

Must complete 3 credit hours from the following courses emphasizing a wide range of diversity and social change issues:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 8990</td>
<td>Career Development Theory for Women</td>
<td>3</td>
</tr>
<tr>
<td>ESC_PS 9020</td>
<td>Psychology of Crossing Cultural Borders</td>
<td>3</td>
</tr>
</tbody>
</table>

Other diversity issues and inequality in social systems graduate level courses in other departments, with pre-approval.

**Skill Courses**

Must complete 3 credit hours from one of the options below.

**I. Research Skills**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 8090</td>
<td>Master's Thesis in Educational, School, and Counseling Psychology</td>
<td>3</td>
</tr>
<tr>
<td>ESC_PS 9090</td>
<td>Doctoral Dissertation Educational School &amp; Counseling Psychology</td>
<td>3</td>
</tr>
</tbody>
</table>

**II. Applied Multicultural Skills**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 8943</td>
<td>Practicum in Multicultural Counseling Interventions</td>
<td>3</td>
</tr>
</tbody>
</table>

Pre-approved Multiculturally-designated applied course (e.g. counseling practica, teaching practica, group counseling practica)  
Applied experience via community outreach programs, work placements in agencies, or extended volunteer experiences in community agencies.  
Multicultural Competency Portfolio to demonstrate awareness, knowledge and skill competencies, as approved by a Center Director.

Consultation courses in organization or systemic changes including applied consultation activities, as pre-approved by a Center Director.

* The scope and quality of the research project is expected to be of such a caliber that it could be submitted to a refereed journal in the student's discipline. The research project must be on a multicultural-related topic (i.e. issues related to race, sexual orientation, gender, and international concerns). Successful completion of this requirement will consist of approval of the project from a Director of the Center for Multicultural Research, Training and Consultation, or have an ESCP faculty affiliated with the Center on the committee with at least one committee member having expertise in multicultural issues.

^ The person must demonstrate competencies in working with diverse populations (with an emphasis on racial and ethnic minority populations).
College of Engineering

Administration

Elizabeth Loboa, Dean
W1024 Lafferre Hall
(573) 882 4378
loboa@missouri.edu

When engineering classes at the University of Missouri began in 1849, a strong tradition was born that continues to grow. At the University of Missouri College of Engineering, we believe that with every innovation we make and every new development we bring to light, we do more than solve the problems of today. Here, we ready the leaders who will blaze forward with a revolution that defines the world for tomorrow. At Mizzou Engineering, collaboration, creativity and research surge together. Where others may see problems, disease and inefficiencies, we see opportunities, potential and infinite possibilities. We teach, we learn, and we analyze — and we demand innovation, inclusion and integrity as we create smarter, safer, more efficient ways of living.

The College of Engineering has a vision for becoming the college of choice for faculty and students in four Pillars of Pursuit: Educating Engineering Leaders, Big Data Analytics, Biomedical Innovations and Sustainability in FEWSed (Food, Energy, Water, Smart Cities). These pillars represent the College’s areas of strength and greatest potential growth as we seek to recruit faculty and train students who will solve the next generation of global challenges.

The college offers fully accredited degree programs in biological, chemical, civil, computer, electrical, industrial and mechanical engineering, along with computer science. All of programs offer both undergraduate and graduate degrees. The college also offers a bachelor’s degree in Information Technology. Naval Science is under the academic administration of the college as well. The hallmark of the College of Engineering is excellence in teaching and scholarly pursuits.

Mission

The mission of the University of Missouri College of Engineering is to educate engineers, create leaders and develop entrepreneurs in a research and interdisciplinary environment.

We do this by:

• Supporting engineering educational programs with extracurricular student activities and research experience.
• Encouraging faculty to be entrepreneurial and interdisciplinary.
• Conducting world class research that produces new knowledge and new researchers for the future.

...resulting in economic development, job creation and an improved standard of living for our state and country.

Undergraduate

• Admissions (p. 497)
• Graduation Requirements (p. 499)
• Academic Regulations (p. 499)
• Student Services (p. 500)

The MU College of Engineering is committed to a longstanding tradition of educating future engineering leaders. Here, students are inspired and challenged. Students work, learn, research and create in an atmosphere where innovation, collaboration and finding ways to rise above challenges are more than aspirations — they are simply how we operate.

Admissions

Direct Freshman Admission to Engineering

Entering freshmen are expected to have completed 17 units of approved high school course work (in grades 9-12), including 4 units in English, 4 in mathematics and 3 in science with laboratory. Mathematics should include 2 units of algebra, 1 unit of plane and solid geometry (combination course), and 1/2 unit of trigonometry. Additional senior mathematics is recommended.

The College of Engineering has three levels of admissions. Direct department admits, Undeclared Engineering admits, and Pre-Engineering admits. The three levels are explained further below.

Direct Departmental Admit

For direct admission to one of the College of Engineering degree programs, the applicant must meet the qualifications listed below (these numbers are subject to change).

For the Bachelor of Science in Biological Engineering and the Bachelor of Science in Biomedical Engineering:

• ACT-Math of at least 31 AND
• ACT-Composite of at least 31 AND
• High school class rank in the top 10 percent

For the other Engineering degree programs:

• ACT-Math of at least 32 AND
• ACT-Composite of at least 32 AND
• High school class rank in the top 10 percent*

The average ACT scores for first-time freshmen admitted to the College of Engineering for Fall 2016 were ACT-Composite 28.03 and ACT-Math 28.74.

Pre-Engineering Program (PEP)

Freshmen who do not meet the criteria for Direct department admit or Undeclared Engineering are admitted into the Pre-Engineering Program. Since these students are in the College of Engineering, each PEP student has access to the Engineering Advising Office.

Most first-semester PEP students enroll in one preparatory math course and three courses in the College of Arts and Science, which count in both the engineering and arts and science degree programs. The prime objective is to strengthen math preparation sufficiently for success in engineering.

PEP students are eligible to transfer to Undeclared Engineering when they meet the following requirements:

• Satisfactory completion of 24 credits
• GPA of 2.0 or higher both Cumulative and last graded term
• A grade of C- or better in MATH 1500 Analytic Geometry and Calculus I or
• Academic good standing
• Students with 60 credits or more must be admitted to their Department of choice prior to being admitted to Engineering
• For admission to Information Technology, students must have GPA of 2.0 or higher in both Cumulative and last graded term
Declared and Undeclared Status

Freshmen engineering students will start in an undeclared status unless they meet criteria for direct departmental admission (see criteria below). Students admitted to the College of Engineering in undeclared status will work to complete a foundational curriculum consisting of math, science, and engineering courses. Upon completion of the foundational curriculum students will apply for entrance to available degree programs. The specific standards and capacity vary among the degree programs as necessary to align enrollments with educational resources.

Freshman and Transfer Admission Requirement

Bioengineering Department
Courses required before consideration for admission into Bioengineering
- MATH 1500 Analytic Geometry and Calculus I
- MATH 1700 Calculus II
- CHEM 1320 College Chemistry I
- PHYSICS 2750 University Physics I
- BIO_SC 1500 Introduction to Biological Systems with Laboratory (recommended)

Chemical Engineering Department
Courses required before consideration for admission into Chemical Engineering
- MATH 1500 Analytic Geometry and Calculus I
- MATH 1700 Calculus II
- CHEM 1320 College Chemistry I
- CHEM 1330 College Chemistry II
- PHYSICS 2750 University Physics I
- CH_ENG 1000 Introduction to Chemical Engineering

Civil and Environmental Engineering Department
Courses required before consideration for admission into Civil and Environmental Engineering
- MATH 1500 Analytic Geometry and Calculus I
- MATH 1700 Calculus II
- CHEM 1320 College Chemistry I
- PHYSICS 2750 University Physics I
- ENGLISH 1000 Exposition and Argumentation

Computer Science Department
Courses required before consideration for admission into Computer Science
- MATH 1500 Analytic Geometry and Calculus I
- MATH 1700 Calculus II
- CMP_SC 1050 Algorithm Design and Programming I
- CMP_SC 2050 Algorithm Design and Programming II

Information Technology Department
Admittance to Information Technology follows the standard MU admissions requirements

Electrical and Computer Engineering Department
Courses required before consideration for admission into Electrical and Computer Engineering
- MATH 1500 Analytic Geometry and Calculus I
- MATH 1700 Calculus II
- CHEM 1320 College Chemistry I
- CMP_SC 1050 Algorithm Design and Programming I
- ECE 2210 Introduction to Logic Systems

Industrial and Manufacturing Systems Engineering Department
Courses required before consideration for admission into Industrial and Manufacturing Systems Engineering
- MATH 1500 Analytic Geometry and Calculus I
- MATH 1700 Calculus II
- CHEM 1320 College Chemistry I
- PHYSICS 2750 University Physics I
- ENGLISH 1000 Exposition and Argumentation

Mechanical and Aerospace Engineering Department
Courses required before consideration for admission into Mechanical and Aerospace Engineering
- MATH 1500 Analytic Geometry and Calculus I
- MATH 1700 Calculus II
- CHEM 1320 College Chemistry I
- PHYSICS 2750 University Physics I
- ENGLISH 1000 Exposition and Argumentation

Undeclared students should discuss course selection with the academic advisor each semester to keep options open among departmental curricula.

To transfer from one department to another, students must submit an application to the new department. Admittance to the new department will be based upon the student’s academic performance and departmental capacity. Students who transfer must satisfy the specific degree requirements of the new department.

Engineering Dean’s Scholars Program

The purpose of the Engineering Dean’s Scholars Program is to recognize, mentor and train the highest-achieving students in scholarship and leadership. Engineering Dean’s Scholars participate in the Engineering Scholars Freshman Interest Group (FIG) which will be housed in Hudson or Gillett Residence Hall. A faculty-scholar lunch is held during the semester to allow the scholars to meet with engineering faculty and to learn about the engineering profession and undergraduate research opportunities.

Scholars participate in leadership or mentoring activities during their sophomore, junior and senior years. Examples of such activities include serving as engineering ambassadors or peer advisors for an engineering FIG, and participating in Undergraduate Research. Students chosen for peer advisor positions have their room and board covered in exchange for their services.

Students who have ACT math and composite scores of 32 and a high school rank in the top 10 percent of their class may submit an application for consideration of admission to the program.

University of Missouri
Columbia, MO 65211
(573) 882-4765

Transfer Students

Students wishing to transfer to MU from an accredited college or university are subject to University regulations described in this catalog.

The MU College of Engineering cooperates with many colleges through articulation agreements that help pre-engineering students transfer to MU with maximum ease and minimum loss of credits. A student may take the first two years at the participating school and then transfer to MU for the
junior and senior years in engineering. After the program is completed, the student is awarded a BS degree in the chosen engineering field.

Transfer students may be admitted to the College as undeclared or may start with a departmental affiliation. Eligibility to enter the College with a departmental affiliation is based upon the student’s previous academic performance and department capacity.

Transfer students who enter the College as undeclared, are required to submit an application to enter a degree program. Admittance to the degree program is based upon previous academic performance and department capacity.

To be recommended for the BS degree from the College of Engineering, a student transferring from an accredited institution must complete at least 30 upper-level credits in the degree program at a UM System campus. At least 21 of the 30 credits must be upper-level engineering courses approved by the department awarding the degree.

A student transferring with senior standing from another UM System campus must complete the last 15 credits in residence on the campus where the degree program is located. Twelve of these 15 credits must be in engineering and approved by the department awarding the degree.

Any student whose enrollment in any college-level academic program resulted in dismissal, departure or who are on probation will not be admitted to the College of Engineering.

International Admission

Admission of international students is determined on an individual basis by a committee of representatives from the Admissions Office and the College of Engineering.

Before registering for classes at the University, international students must take the MU English Language Test, developed for international students. Students passing the test are eligible to take ENGLSH 1000 and any other required English courses.

International students whose test scores indicate that additional English training is needed, including those with transferred English credit, are required to register for an English-language support class. The course, developed for international students, should be taken during the first semester of enrollment. This course does not count toward graduation credit, but regular attendance is required and failure to attend will result in dismissal. The English-language support class taken must be satisfactorily completed before the student can enroll in ENGLSH 1000. Students not satisfactorily completing the class in the first semester of enrollment must re-enroll in the second semester. If the student does not satisfactorily complete the English-language support class in the second term of enrollment, the student will not be permitted to re-enroll in the College of Engineering.

60 Credit Hour Rule

To remain in the College of Engineering, students must be admitted to an Engineering degree program by the end of the semester when their total credit hours earned are equal to or greater than 60. Students not admitted by 60 credit hours will become ineligible to remain in the College of Engineering and must transfer to another MU school or college in order to remain a student at the University of Missouri. Transfer students who enter the College of Engineering with 60 or greater credit hours will be given one semester to gain admittance to a degree program. If not admitted to a degree program after one semester, they will become ineligible to remain in the College of Engineering. If more than one semester is needed to complete the courses required to enter a degree program, a waiver may be granted at the discretion of the college. If students are pre-enrolled for the following term at the time they become ineligible to remain in the College of Engineering, all Engineering courses will be administratively dropped.

Graduation Requirements

The curriculum provides a solid foundation of mathematics and physical sciences followed by the application of these sciences in engineering specialties. The balance of the curriculum encompasses communication skills, English, social sciences and humanities courses.

Many freshmen are eligible to start with calculus. However, some can profit from additional pre-calculus preparation, which is an addition to the undergraduate curricula.

Students should access the engineering web site (http://engineering.missouri.edu) for details regarding social and behavioral sciences and humanities and fine arts requirements.

In addition to the University’s general education and graduation requirements, the departments in the College of Engineering may require further specific courses to better equip students to perform in their chosen fields of study.

While many students complete the BS degree program in four years, some may find it advisable to extend the curriculum in order to carry lighter semester loads, add preparatory courses or compensate for part-time work.

GPA Requirements for Graduation from the College of Engineering

- GPA of record of at least 2.0
- GPA of at least 2.0 in all engineering courses offered by one of the four campuses of the UM System. “Engineering courses” include all courses that are offered through the College of Engineering or its equivalent on the four campuses, or that have “Engineering” in the curricular designator. Only the last grade in a repeated course will be used in the calculation.

Academic Regulations

Degree with Honors Requirements

Latin Honors are granted to students who meet the following cumulative GPA requirements:

<table>
<thead>
<tr>
<th>Latin Honor</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>summa cum laude</td>
<td>3.9</td>
</tr>
<tr>
<td>magna cum laude</td>
<td>3.7</td>
</tr>
<tr>
<td>cum laude</td>
<td>3.5</td>
</tr>
</tbody>
</table>

Departmental Honors

The college maintains an undergraduate honors program to further challenge those who have established a minimum GPA of 3.0 at the beginning of the junior year. A comparable grade point average is required of transfer students. The program leads to an undergraduate honors thesis on a research or advanced design project, provides for additional curricula flexibility and contains features that ease the transition to graduate school.

Opportunities available to honors students include:

- More personal attention from an honors advisor
• Independent study or undergraduate research with a senior faculty member whose specialty interests the honors candidate

A student who successfully completes the engineering honors program, including the independent project, will be designated an “Honors Scholar in Engineering.” Interested students should contact their departmental office.

Qualified engineering students are also welcome to join the programs of the Honors College and may enroll in various honors courses and honors sections of regular courses.

Courses in Basic Skills

No basic skills courses may be taken to fulfill graduation requirements.

Curriculum of Record

The curriculum of record is the curriculum a student must satisfy to meet graduation requirements. For students who maintain continuous, full-time enrollment, the curriculum of record is the one approved by the College of Engineering at the time the student achieves upper-division status in the discipline of choice. For others, the curriculum of record is decided by the department faculty.

Academic Probation and Dismissal

1. A student whose term and cumulative UM GPA are 2.0 or higher is in good academic standing. A “term” is defined as a semester or summer session.

2. A student will be placed on academic probation if while in good academic standing the student has a term GPA less than 2.0 but equal to or greater than 1.0.
   • While on academic probation, a student must enroll in and complete each semester at MU at least 12 credits of course work necessary for the degree. Courses taken through MU’s Mizzou Online (self-paced) count as part of these 12 credits. Part-time students must enroll in at least as many credits each semester as the college rules governing part time enrollment.
   • A student will be removed from probation at the end of the term when the term and cumulative GPA are 2.0 or higher, provided the student completed 12 or more hours applicable toward the degree.
   • A student will be continued on probation if while on probation the student has a term GPA greater than or equal to 2.0, but whose cumulative GPA is below 2.0.

3. A student will be dismissed from the College of Engineering if the student:
   • Receives a term GPA of less than 1.0.
   • Receives a term GPA of less than 2.0 while on probation.
   • Fails to complete at least 12 credit hours toward their Engineering degree program while on academic probation.

4. Readmission:
   • Students who are dismissed from the College of Engineering and who wish to appeal their case for continuation must write an appeal letter and submit it to the academic appeals committee.
   • If the appeals committee allows a student to re-enroll on final probation, it may set conditions such as courses to be taken, minimum grades, total hours, etc to which the student must adhere.

• A student who has been dismissed for academic reasons may be readmitted upon a successful appeal to the academic appeals committee of the College of Engineering.

• Similarly, students who wish to re-enroll in the college of Engineering after having been out of school as a result of a dismissal must write a letter of appeal to the College of Engineering academic appeals committee requesting readmission.

• Letter of appeal may be addressed to: Engineering Academic Appeals Committee, W1002 Lafferre Hall, University of Missouri, Columbia, MO 65211. A personal visit with the director of undergraduate studies of the students’ department and advisor before appealing by letter is recommended and often helpful, both to the student and to the committee.

• One of the primary objectives of the appeals committee is to evaluate indicators of the likelihood of future success of the student. Accordingly, any appeal letter should include an explanation for past poor performance and reason for expecting better outcomes in the future.

5. A student who is dismissed while on final probation will normally be ineligible for readmission.

Satisfactory/Unsatisfactory Grading Option

Under Satisfactory/Unsatisfactory (S/U) grading, an S is assigned for a grade in the A, B or C range, and a U is assigned for a grade in the D range or for an F. Neither an S nor a U will be calculated into a student’s grade point average. A student enrolled in the College of Engineering may not take any math, science or engineering course that counts toward degree requirements under the S/U grading option, unless the course is only offered S/U. In addition, any course specifically required (by course number) in the curriculum may not be taken S/U. This includes ENGLSH 1000 or ENGLSH 1000H. The 18 credits taken to fulfill the University general education distribution requirement may be taken S/U.

Restrictions

• First-semester freshmen are ineligible to take any course S/U unless it is only offered S/U.
• Only one course per semester may be taken S/U.
• Students on academic probation are not allowed to take any course S/U.
• To be eligible for the Dean’s List each term, a student must complete 12 graded credits (S/U courses are not considered “graded”).

Student Services

Advising

Each student in the College of Engineering is assigned an advisor from the College of Engineering Advising Office who assists the student in reaching academic and professional goals, as well as assist students with time management and academic success strategies. Students are encouraged to meet with their advisors as often as needed. Engineering students have advising holds placed on their accounts each semester and will work with their advisor to verify enrollment and degree progress before enrolling for the following semester. In addition, students have access to work with a faculty mentor in their degree program who can assist with career planning and selection of technical elective coursework.
Diversity and Outreach Initiatives

At Mizzou Engineering we honor our values by insuring a diverse and inclusive college. The College of Engineering Office of Diversity and Outreach Initiatives facilitates the outreach, recruitment, retention, and overall success of all members of our community, especially those from backgrounds traditionally underrepresented in engineering. The Office of Diversity and Outreach Initiatives provides professional development programming surrounding inclusion, equity, and diversity for all of our undergraduate and graduate students, staff, and faculty. The Office houses many programs including:

- The Inclusivity Center which provides a physical space where everyone is welcome as well as a venue for our events and activities.
- The Women in Engineering Program which focuses on all activities that support and recruit women students.
- The Minority Engineering Program which fosters a support network between students, faculty, and staff to ensure academic success by providing structured progress checks, professional development trainings, early research experience, counseling, academic enrichment, mentoring and information about graduate study for the Engineering Diversity Scholarship recipients.
- The Office of Diversity and Outreach Initiatives serves as a resource for the College of Engineering student organizations to further engage them in diversity and inclusion efforts.

Study Abroad

College of Engineering and STEM students have opportunities to pursue academic, leadership, and service opportunities around the world. Students can participate in short-term study abroad programs in Europe, Asia, and Latin America and earn college credit towards general education requirements, core engineering requirements, and engineering technical electives to complete graduation requirements. Students can also participate in semester long programs.

Learning Communities

The college cosponsors several living/learning options for engineering students. The college believes that an environment conducive to the formation of networks, with aspects of social and academic interaction, enhances the retention and ultimate success of students in the engineering curriculum. Students selecting these options generally earn higher grades and are more likely to graduate than the average engineering student.

The Engineering Learning Community (ELC) is a special co-ed environment that offers engineering majors a full range of academic support and activities. ELC allows engineering students to live together, study together and have fun together. Freshman Interest Groups (FIGs) support incoming freshmen. Members of a FIG are co-enrolled in three courses during the first semester of the freshman year with a group of up to 20 students. Each community has its own computer lab, peer tutors, study groups and quiet hours.

Professional Engineering Registration

The revised statutes of Missouri (Section 327.221) require that each applicant for registration as a professional engineer in Missouri must be a graduate of and hold a degree in engineering in a curriculum accredited by the Accreditation Board for Engineering and Technology. The MU undergraduate programs in bioengineering, chemical, civil, computer engineering, electrical, industrial and mechanical engineering, and computer science at MU are so accredited.

Senior students are strongly encouraged to take the Fundamentals of Engineering Exam leading to the Fundamentals in Engineering (FE) status as a first step toward registration.

The MU undergraduate programs in bioengineering, chemical, civil, computer engineering, electrical, industrial and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET and computer science is accredited by the Computing Accreditation Commission of ABET www.abet.org (http://www.abet.org).

Naval Reserve Officers Training Corps (NROTC)

NROTC was established in 1926 to offer college students the necessary naval science courses to qualify for commissions in the Navy or Marine Corps Reserve. Today, NROTC is one of the primary accession sources of officers for the Navy and Marine Corps.

Scholarship NROTC midshipmen incur no military obligation during their freshman year. This allows students to get a better understanding and appreciation of the life of a Navy or Marine Corps officer. Navy NROTC graduates incur a minimum five years military obligation. Marine NROTC graduates incur a minimum four year military obligation. The two-year NROTC program is designed for transfer students and for MU students who did not participate in NROTC during the first two years. MU also offers a Minor in Naval Science (p. 567).

Navy students should major in a technical course of study while marine students may major in any course of study leading to a baccalaureate degree. Academic credit for naval science courses is accepted toward a baccalaureate degree by most MU schools and colleges. Midshipmen take one naval science course for credit each semester, which provides education and training in various aspects of the Navy or Marine Corps. Associated with each course is a leadership laboratory. NROTC activities include water survival, self-defense, physical fitness, orienteering, aviation, nuclear power indoctrination, pistol/rifle marksmanship and a variety of field trips. Upon graduation, midshipmen are commissioned as Ensigns in the Navy or Second Lieutenants in the Marine Corps.

For additional information, contact:

Department of Naval Science
105 Crowder Hall
(573) 882-6693 or 888-MU-NROTC
NROTCMU@missouri.edu
http://nrotc.missouri.edu/

Graduate

Graduate students have many opportunities to develop special skills in the career paths they choose. Students interested in pursuing a career in academia can participate in the Preparing Future Faculty Fellowship Program, where they can choose courses from the College of Education and have the opportunity to co-teach engineering courses and write proposals.

Additionally, MU promotes technology, innovation and entrepreneurship. Mizzou Engineering sustains a variety of research centers, programs, groups and facilities along with other departmental groups that are designated as areas of exemplary expertise and success. The college contributes significantly to MU's overall annual research and development
spending. The College also offers exceptional business opportunities to corporations, small businesses and start-ups.

MU graduate students have gone on to become faculty at world-class academic institutions in the U.S. and around the world, have created start-up companies as successful entrepreneurs and have secured jobs with leading companies, including Oak Ridge National Laboratory, PepsiCo, Amazon, Google and more.

Graduate engineering programs include

- Bioengineering
- Chemical Engineering
- Civil & Environmental Engineering
- Computer Science
- Electrical & Computer Engineering
- Industrial Manufacturing & Systems Engineering
- Mechanical & Aerospace Engineering
- MU Informatics Institute

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

Biological engineering is a science-based engineering discipline that integrates engineering and biological sciences in one curriculum. The MU biological engineering program is a broadly-based curriculum that prepares students for careers in three areas:

- Biomedical engineering (including pre-medicine)
- Bioprocess engineering
- Bioenvironmental engineering

Biological engineering graduates are hired by biotechnology, medical, pharmaceutical, food and agricultural companies, and by government agencies. Some attend graduate and medical schools. Graduates are well prepared to take the Fundamentals of Engineering exam during their senior year, which is the first step toward obtaining a Professional Engineer license.

The Bachelor of Science with a major in Biological Engineering (BS BE) program at MU is accredited by the Engineering Accreditation Commission of ABET, www.abet.org. The biological engineering curriculum was developed to meet the mission, program objectives and student outcomes described below.

Mission and Objectives

The department mission is to educate biological engineers to integrate engineering and biological sciences in the contexts of health, sustainability and environmental stewardship, thus preparing them for productive careers characterized by continual professional growth.

Program Educational Objectives

The undergraduate program leads to a Bachelor of Science degree in Biological Engineering, producing graduates who will, within 3-5 years:

1. Show proficiency in quantitative analysis, engineering design and development.
2. Interact effectively with life science and other professionals.
3. Leverage principles of biological and engineering sciences for the design and development of innovative systems.
4. Demonstrate leadership and professionalism as they continually add value to their chosen field of endeavor.
5. Succeed in advanced study in engineering, medicine or other fields, if pursued.

**Student Outcomes**

By the time of graduation, Biological Engineering students will possess:

a. An ability to apply knowledge of mathematics, science and engineering;
b. An ability to design and conduct experiments, as well as to analyze and interpret data;
c. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
d. An ability to function on multi-disciplinary teams;
e. An ability to identify, formulate and solve engineering problems;
f. An understanding of professional and ethical responsibility;
g. An ability to communicate effectively;
h. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
i. A recognition of the need for, and an ability to engage in, life-long learning;
j. A knowledge of contemporary issues;
k. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice;
l. An ability to integrate engineering and biological sciences to develop systems and processes for improved health, bio-resource utilization, and environmental protection.

**Graduate**

- MS in Biological Engineering (p. 505)
- PhD in Biological Engineering (p. 506)

Department of Bioengineering
254 Agricultural Engineering Building
Columbia, MO 65211-5160
(573) 882-7044
http://bioengineering.missouri.edu/

**Director of Graduate Studies:** Gang (Gary) Yao

**About Biological Engineering**

Recognizing the immense promise of bioengineering and the unique position of MU for a strong bioengineering program, the College of Agriculture, Food and Natural Resources (CAFNR) and the College of Engineering (CoE) joined forces to form the Department of Bioengineering (BE). BE unites existing faculty and infrastructure from both colleges. CoE contributes biomedical engineering capabilities while CAFNR brings strengths in bioprocess and bioenvironmental engineering. The Department confers both masters and doctoral degrees to students who satisfy the general requirements of the Graduate School and the specific requirements for the masters degree and the doctoral degree of the Department of Bioengineering.

**Thesis Research and Funding**

Research assistantships are available to qualified graduate students. Thesis research may emphasize bioprocessing, biomedical engineering, environmental engineering or precision agriculture. Laboratories are well equipped for research in biomaterials, biomedical optics, bioprocessing, biosensors, computer vision, electrophysiology, food extrusion, properties of biological and food materials, process control, GIS, precision agriculture, water quality, wetlands, chemical application technology, soil physics, hydrology and renewable energy.

**BSBE in Biological Engineering**

**Degree Program Description**

Biological Engineering is a science-based engineering curriculum that integrates engineering and biological sciences in the areas of health, sustainability and environmental stewardship. Students are prepared in three engineering areas: biomedical, bioprocess, and bioenvironmental. In addition to the core program courses, the program includes courses in basic sciences; social, behavioral and engineering sciences; and humanities and fine arts. In a capstone design course, each student completes a design project under the direction of a faculty advisor. Graduates are hired by biotechnology, medical, pharmaceutical, food and agricultural companies and government agencies, or opt to further their education in graduate, medical or veterinary medical school. Graduates are well prepared to take the Fundamentals of Engineering exam during their senior year, which is the first step toward obtaining a Professional Engineer license. The BSBE in biological engineering is accredited by the Engineering Accreditation Commission of ABET.

**Major Program Requirements**

The curriculum encompasses basic sciences, social and behavioral sciences, humanities and fine arts, engineering sciences and topics, and program core courses. The core courses cover topics of biological engineering principles and design. In a capstone design course, each student completes a design project under the direction of a faculty advisor. Technical electives allow students to place emphasis on biomedical, bioprocess or bioenvironmental engineering. The requirements listed below are in addition to University general education (p. 34) requirements. All pre-requisites required for Basic Engineering, Biological Engineering, and Technical Elective courses must be completed with a grade of C- or better.

Total Credits: 126

### MS in Biological Engineering

**Admission Contact Information**

Jean Gruenewald  
W1041C Lafferre Hall  
Columbia, MO 65211-5200  
573-882-4659

**Admission Criteria**

- Fall deadline: June 1st  
- Minimum GPA: 3.0 in the last 60 hours  
- BS in engineering from an accredited university or equivalent experience  
- Minimum English Proficiency Requirements (for International Applicants):

<table>
<thead>
<tr>
<th>Item</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>IELTS</td>
<td>6.5</td>
</tr>
<tr>
<td>TOEFL (Internet-based)</td>
<td>80</td>
</tr>
<tr>
<td>TOEFL (Paper-based)</td>
<td>550</td>
</tr>
</tbody>
</table>

**Required Application Materials**

Prospective students should submit graduate applications online: https://applygrad.missouri.edu/apply/. The following materials are required:

**To the Office of Graduate Studies:**

- All required Graduate Admissions documents  
- Official transcripts  
- TOEFL scores (for International Applicants)

**To the Bioengineering Master’s Program:**

- Résumé or CV
• Statement of Purpose
• Three Recommendation Letters
• GRE scores

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Graduation Requirements: Master of Science (MS) and Master of Engineering (ME) in Biological Engineering

Students without a BS in engineering will be required to complete additional courses in mathematics, basic sciences and engineering science. Students with engineering degrees other than biological engineering should meet certain proficiency requirements.

The Biological Engineering Program requires a minimum of 30 semester hours beyond the baccalaureate degree for the MS thesis (MST) degree and a minimum of 36 semester hours for the MS non-thesis (MSNT) degrees. A student may also choose to complete a Master of Engineering (ME) degree with a focus in Biological Engineering. The ME degree requires a minimum of 36 semester hours. See the Master of Engineering page for general requirements.

If approved by the student’s Master’s Program Committee, the program of study may include up to six hours of graduate credit transferred from another university or from another campus of the MU system. In general, the Graduate School does not accept correspondence or extension course credit earned at any other campus. However, a student may take up to eight hours of correspondence courses that are authorized for graduate credit and offered through Mizzou Online. Courses to be taken for graduate credit must be approved by the Graduate Dean, and the enrollment form has a place designated for the Graduate Dean’s signature. See online.missouri.edu for more information on distance education opportunities.

As a minimum, the Program of Study for MST and MSNT should include the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL_EN 8402</td>
<td>Research Methods</td>
<td>2</td>
</tr>
<tr>
<td>BIOL_EN 8087</td>
<td>Seminar in Biological Engineering</td>
<td>1</td>
</tr>
<tr>
<td>BIOL_EN 8180</td>
<td>Numerical Methods in Engineering</td>
<td>3</td>
</tr>
<tr>
<td>BIOL_EN 8990</td>
<td>Masters Thesis Research in Biological Engineering</td>
<td>1-12</td>
</tr>
</tbody>
</table>

A graduate level Statistics course

Additional Bioengineering 8000 level courses (excluding Readings or Problems or Research): two for MST, three for MSNT

As a minimum, the Program of Study for ME should include the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL_EN 8087</td>
<td>Seminar in Biological Engineering</td>
<td>1</td>
</tr>
<tr>
<td>BIOL_EN 8000</td>
<td>Scientific Discovery Leading to Life Science Innovations</td>
<td>3</td>
</tr>
<tr>
<td>BIOL_EN 8180</td>
<td>Numerical Methods in Engineering</td>
<td>3</td>
</tr>
</tbody>
</table>

A graduate level Statistics course

PhD in Biological Engineering

Admission Contact Information

Jean Gruenewald
W1041C Lafferre Hall
Columbia, MO 65211-5200
573-882-4659

Admission Criteria

• Fall deadline: June 1
• Minimum GPA: 3.2
• BS and MS in engineering from an accredited university or equivalent experience. In rare instances, an exceptional student will be allowed to study for the PhD without first completing an MS degree.
• Minimum English Proficiency Requirements (for International Applicants):

<table>
<thead>
<tr>
<th>Item</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>IELTS</td>
<td>6.5</td>
</tr>
<tr>
<td>TOEFL (Internet-based)</td>
<td>80</td>
</tr>
<tr>
<td>TOEFL (Paper-based)</td>
<td>550</td>
</tr>
</tbody>
</table>

Required BE Doctoral Degree Application Materials

Prospective students should submit graduate applications online: https://applygrad.missouri.edu/apply/. The following materials are required:

To the Office of Graduate Studies:

• All required Graduate Admissions documents
• Official transcripts
• TOEFL scores (for International Applicants)

To the BE Program:

• Résumé or CV
• Statement of Purpose
• Three Recommendation Letters
• GRE scores

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.
Degree Requirements

Within the first year in the program, each PhD student must pass a qualifying examination before continuing enrollment. The exam is designed to test the student’s ability to undertake advanced learning and carry out independent research.

A doctoral candidate must complete a minimum of 72 credit hours of course work beyond the BS degree with a minimum of fifteen hours (exclusive of research, problems or independent study courses) at the 8000 (graduate) level, including at least three BE courses. In addition, there will be a minimum of one hour of Seminar (BIOL_EN 8087) and research (BIOL_EN 9990) may not exceed 28 hours of the total 72 hours required in the PhD Program of Study. The courses and research plan must be approved by the doctoral program committee.

The student is required to pass a comprehensive examination, which includes both written and oral components. The student must demonstrate his or her ability for in-depth research by presenting and successfully defending a dissertation embodying the results of original research. A foreign language is not required.

Biomedical Engineering

J. Tan, Chair
College of Engineering
College of Agriculture, Food and Natural Resources
215 Agricultural Engineering Building
(573) 882-7044
TanJ@missouri.edu

The Department of Bioengineering, which is home to the undergraduate biomedical and biological engineering degree programs, seeks to educate the next generation of bioengineering leaders who integrate engineering and biological sciences in the contexts of health, sustainability, and environmental stewardship, thus preparing them for productive careers characterized by continual professional growth. Our undergraduates are part of a diverse and vibrant department with over one hundred years of excellence in engineering education. We provide a supportive and stimulating environment that combines talented students, a diverse faculty body, and excellent teaching and research facilities. Bioengineering uniquely positions graduates to pursue careers in traditional engineering as well as medicine, veterinary medicine, law, health care, policy, and academics. We provide a supportive and stimulating environment that combines talented students, a diverse faculty body, and excellent teaching and research facilities. Bioengineering uniquely positions graduates to pursue careers in traditional engineering as well as medicine, veterinary medicine, law, health care, policy, and academics.

Our award-winning faculty offer exceptional classes and research experiences for our students, and our flexible, tracked curriculum integrates easily with the pre-medicine and Honors Certificate programs, as well as a number of integrated, 5-year, bachelor plus master degree programs at MU.

Faculty

Assistant Professors N. Aloysius*, I. Ozden*, F. M. Pfeiffer*, R. Thomen*, C. Wan
Professor Emeritus F. H. Hsieh
Assistant Professors L. A. Martinez-Lemus**, L. Polo-Parada**, R. A. White*, J. Zulovich*
Adjunct Professors T. Rahhal, E. J. Sadler*, K. A. Sudduth**, E. Vories

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination and dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BS in Biomedical Engineering (p. 508)

Advising and Scholarship Contact

gruenewaldj@missouri.edu

Biomedical engineering is a science-based engineering discipline that integrates engineering and biological sciences in one curriculum. The MU biomedical engineering program is a broad-based curriculum that prepares students for careers in traditional engineering as well as medicine, veterinary medicine, law, health care, policy, and academics. Biomedical engineering graduates are hired by biotechnology, medical, and pharmaceutical companies, as well as by government agencies and major research laboratories. Many of our undergraduate students attend graduate, medical, or law schools post-graduation. Graduates are well-prepared to take the Fundamentals of Engineering exam during their senior year, which is the first step toward obtaining a Professional Engineer license; many additionally take the MCAT, the LSAT, and the GRE in preparation for their graduate or professional studies.

The Bachelor of Science with a major in Biomedical Engineering (B.S. B.M.E.) program at MU was developed to meet the mission, program objectives and student outcomes described below.

Program Educational Objectives

The structure of the curriculum provides both breadth and depth across the range of engineering and science topics consistent with the program educational objectives and student outcomes. The undergraduate program leads to a Bachelor of Science degree in Biomedical Engineering, producing graduates who will, within 3-5 years:

1. Applying principles of engineering, biology, human physiology, chemistry, calculus-based physics, mathematics (through differential equations) and statistics;
2. Solving bio/biomedical engineering problems, including those associated with the interaction between living and non-living systems;
3. Analyzing, modeling, designing, and realizing bio/biomedical engineering devices, systems, components, or processes; and
4. Making measurements and interpreting data from living systems.

Student Outcomes

1. Applying principles of engineering, biology, human physiology, chemistry, calculus-based physics, mathematics (through differential equations) and statistics;
2. Solving bio/biomedical engineering problems, including those associated with the interaction between living and non-living systems;
3. Analyzing, modeling, designing, and realizing bio/biomedical engineering devices, systems, components, or processes; and
4. Making measurements and interpreting data from living systems.

University of Missouri 507
The bioengineering program should produce graduates that have:

1. an ability to apply knowledge of mathematics, science and engineering;
2. an ability to design and conduct experiments, as well as to analyze and interpret data;
3. an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
4. an ability to function on multi-disciplinary teams;
5. an ability to identify, formulate and solve engineering problems;
6. an understanding of professional and ethical responsibility;
7. an ability to communicate effectively;
8. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
9. a recognition of the need for, and an ability to engage in, life-long learning;
10. a knowledge of contemporary issues;
11. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice; and
12. an ability to integrate engineering and biological sciences to develop systems and processes for improved health, bio-resource utilization, and environmental protection

**Graduate**

A graduate degree in Biomedical Engineering is not currently offered. Please see Biological Engineering (p. 502) for similar graduate degree programs.

**BS in Biomedical Engineering**

**Degree Program Description**

The Biomedical Engineering undergraduate degree program offers four tracks from which our students can develop their primary expertise: biomaterials, biomechanics, biomedical imaging and instrumentation, and bioinformatics. In collaboration with colleagues from the School of Medicine, the College of Veterinary Medicine, the School of Health Professions, the Sinclair School of Nursing, the Honors College, and the College of Engineering, we develop students into engineering leaders with skills in creative and critical thinking, problem-solving, innovation, engineering design, communication, entrepreneurship, and team-building. Our award-winning faculty offer exceptional classes and research experiences for our students, and our flexible, tracked curriculum integrates easily with the pre-medicine and Honors Certificate programs, as well as a number of integrated, 5-year, bachelor plus master degree programs at MU.

Biomedical engineering is a science-based engineering discipline that integrates engineering and biological sciences in one curriculum. Graduates are well-prepared to take the Fundamentals of Engineering exam during their senior year, which is the first step toward obtaining a Professional Engineer license; many additionally take the MCAT, the LSAT, and the GRE in preparation for their graduate or professional studies.

**Major Program Requirements**

The curriculum encompasses basic sciences, social and behavioral sciences, humanities and fine arts, engineering sciences and topics, and program core courses. The core courses cover topics of biomedical engineering principles and design. In a capstone design course sequence, each student completes a design project under the direction of a faculty mentor. Technical electives allow students to place emphasis on biomaterials, biomechanics, bioinformatics, and biomedical imaging and instrumentation.

Students earning a Bachelor of Science in Biomedical Engineering are required to complete all University general education (p. 34), University undergraduate requirements (p. 33), degree, and major requirements, including selected foundational courses, which may fulfill some University general education requirements. All prerequisites required for Basic Engineering, Biological Engineering, and Technical Elective courses must be completed with a grade of C- or better. Courses designated a core biomedical engineering course must be completed with a grade of C or better.

**Semester Plan**

A sample plan of study has not been designed for this major. Students should contact the academic department for assistance with academic planning.

**Chemical Engineering**

Patrick Pinhero, Interim Chair
College of Engineering
W2033 Lafferre Hall
(573) 882-4877
pinherop@missouri.edu
http://engineering.missouri.edu/chemical/

Chemical Engineering at the University of Missouri focuses on education and research involving industrial chemicals, materials, environmental, and life-science processes. We aim to be a reservoir of talent for the research, design, and management of complex process challenges. The Department strives to provide its faculty and students with an environment for research, learning, and professional growth.

The faculty of the MU Department of Chemical Engineering prepares its students for careers in a broad range of fields and to assume leadership roles in society through a well-rounded general and rigorous technical education. The technical curriculum challenges students with a broad education in Chemical Engineering theory and practice, and to improve their skills in problem solving, critical thinking, and appreciation of the relationship between technology and society. Innovative development and use of technology facilitates both research and teaching, creating a diverse, learning environment.

MU Chemical Engineering program aims to develop versatile professionals who can excel in a variety of career environments. Our curriculum is focused on the basic sciences, engineering topics, and problem solving and design. A flexible program offering environmental, material, and biochemical options allows our graduates to move into non-traditional careers as well as traditional chemical engineering.
Additionally, we build teamwork and design skills by integrating team design projects, laboratories, and reports into our curriculum.

**Faculty**

**Professor** T. K. Ghosh**, P. J. Pinheiro**, Y. Xing**

**Associate Professor** D. G. Retzloff*

**Assistant Professor** K. D. Hammond**, B. D. Ulery**

**Associate Teaching Professor** M. A. Myers*

**Assistant Teaching Professor** V. K. Gupta, A. Hacioglu*

**Adjunct Professor** H. M. Gahl**, S. J. Lombardo**, Q. Yu

**Adjunct Assistant Professor** S. Baker**, C. Wan**

**Adjunct Associate Professor** H. K. Hunt, W. A. Jacoby**

**Chancellor's Professor** P. C. H. Chan*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

- BSChE in Chemical Engineering (p. 509)
  - with emphasis in Biochemical (p. 510)
  - with emphasis in Environmental (p. 511)
  - with emphasis in Materials (p. 512)

The educational objectives of the Chemical Engineering program at the University of Missouri are:

- Graduates will meet the expectations of employers of chemical engineers.
- Graduates will pursue advanced study if desired.
- Graduates will pursue leadership positions in their profession and/or communities.

**Exploratory Course**

A student wanting to explore chemical engineering as a major should take CH_ENG 1000 Introduction to Chemical Engineering.

**Graduate**

- MS in Chemical Engineering (p. 512)
- PhD in Chemical Engineering (p. 513)

**Director of Graduate Studies:** David G. Retzloff

**About Chemical Engineering**

Established in 1906, MU Chemical Engineering has a long standing commitment to provide quality undergraduate and graduate education. Our department serves the discipline well by providing state of the art research in many cutting edge fields including batteries, biochemical engineering, biomaterials, carbon, ceramics, catalysis, corrosion, electrochemistry, environmental sciences, ionic liquids, materials science, computational modeling & simulation, nanomaterials, nuclear materials, polymers, separations, solar energy, and surface science.

**Faculty Research**

Currently active research areas include batteries, biochemical engineering, biomaterials, carbon, ceramics, catalysis, corrosion, electrochemistry, environmental sciences, ionic liquids, materials science, computational modeling and simulation, nanomaterials, nuclear materials, polymers, separations, solar energy, and surface science.

**Facilities and Resources**

There are excellent facilities for research students, including electron microscopy, ultra-high vacuum (UHV surface science, atomic force microscopy, a heterogeneous catalysis and reaction kinetics laboratory, a heat and mass transport laboratory, an air pollution monitoring and control laboratory, a biochemical engineering laboratory, a computational laboratory, and a transport properties phenomena laboratory. Excellent library facilities provide the latest domestic and international journals specific to chemical engineering and physical sciences research.

**Internal Funding**

Research and teaching assistantships are available to qualified students for the entire year. The yearly stipend for graduate students ranges from $17,500 to $20,000, depending on the student’s terminal degree. Assistantships also include a tuition waiver and health insurance. Academically qualified students may receive additional scholarship awards. Grant research assistantships and some industrial and Graduate School fellowships may also be available. Extremely well-qualified students may be eligible for the Robert and Dorcas Holtzsmith Graduate Fellowship.

RA and TA appointments allow for 12 credit hours of advanced study each semester. The applicant’s academic record and research potential determine the financial assistance offered. Students who receive financial assistance are expected to continue their appointment during the summer session as well, as these appointments are year long positions.

**BSChE in Chemical Engineering**

**Degree Program Description**

The curriculum provides a well-rounded general and rigorous technical education in order to hone an appreciation of the relationship between technology and society. The technical curriculum focuses on the basic sciences, as well as Chemical Engineering theory and practice. Throughout the curriculum, problem solving, design, critical thinking and teamwork skills are built by integrating team-based design projects, laboratories, and reports. Our graduates work in traditional chemical engineering areas such as the petroleum and chemical industries, as well
as microelectronics, pharmaceuticals, materials, polymers, environmental protection, consumer products and engineering consulting. Our graduates also pursue careers in business management or government as well as advanced studies in medicine, law, business, basic sciences and other engineering disciplines.

**Major Program Requirements**

Each graduate must complete the required curriculum designed to demonstrate knowledge and integration of chemical engineering science and practice using analytical, computational and experimental techniques. In addition, each graduate must have a comprehensive background in advanced chemistry. Graduates have a detailed working knowledge of the entire spectrum of chemical engineering activities.

All requirements listed below are in addition to University graduation requirements, including University general education (p. 34), and College of Engineering requirements. Students are also required to complete emphasis area requirements.

**Major core requirements**

**BSChE in Chemical Engineering with Emphasis in Environmental**
BSChE in Chemical Engineering with Emphasis in Materials

Degree Program Description

The curriculum provides a well-rounded general and rigorous technical education in order to hone an appreciation of the relationship between technology and society. The technical curriculum focuses on the basic sciences, as well as Chemical Engineering theory and practice. Throughout the curriculum, problem solving, design, critical thinking and teamwork skills are built by integrating team-based design projects, laboratories, and reports. Our graduates work in traditional chemical engineering areas such as the petroleum and chemical industries, as well as microelectronics, pharmaceuticals, materials, polymers, environmental protection, consumer products and engineering consulting. Our graduates also pursue careers in business management or government as well as advanced studies in medicine, law, business, basic sciences and other engineering disciplines.

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), and the BSChE requirements (p. 509), in addition to the emphasis requirements below.

Second Year

| Fall       | CR Spring | CR 
|------------|-----------|------

| Approved Materials Elective | 3 Approved Materials Elective | 3 
| ECE 4550 | 3 Humanities and Social Science | 3 

Total Credits: 127

If these classes are not available, any 4000 level ChE elective that is related to materials science and engineering may be used to replace ECE 4550, ChE 4319 and/or MAE 4232 but only with Advisor consent.

Materials elective choices: Any approved course related to materials. Choices include (but are not limited to): ECE 3510, ECE 4650, ECE 3510, ECE 4650, ECE 4670, MAE 4250, MAE 4270, MAE 4600, Geol 3250, NE 4349, Phy 3150, or anything listed under item 5.

MS in Chemical Engineering

Minimum Graduate School Requirements

- The student's program must include a minimum of 30 hours of graduate credit beyond the bachelor's degree (or its equivalent).
- At least 3 credits must be in 8000+ level courses, not including special readings, seminar, or research; and no more than 4-% of the total can be research-based.
- The candidate must have completed all graduate work attempted at MU with a GPA of 3.0 or better.
- Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of Chemical Engineering.
- Students must present a thesis.
- Students must be enrolled.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission consideration: the requirements of the M.S. in Chemical Engineering program (https://gradstudies.missouri.edu/degreecategory/chemical-engineering) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/apply). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

Application Deadlines

• Fall Deadline: March 15
• With change of degree within MU: May 15
• Spring Deadline: October 15
• With change of degree within MU: November 1

Required Application Materials

Chemical Engineering Program

• Résumé
• Transcript
• Statement of Purpose
• 3 Letters of Reference
• GRE scores (School Code: 6875; Dept. Code: 1001)
• TOEFL (if you are an international student)
• Any additional documents requested by the Office of Graduate Studies

PhD in Chemical Engineering

Minimum Graduate Admissions Requirements

• The student's program must include a minimum of 72 hours of graduate credit beyond the bachelor's degree (or its equivalent).
• At least 15 credits must be in 8000+ level courses, not including special readings, seminar, or research; and no more than 4-% of the total can be research-based.
• The candidate must have completed all graduate work attempted at MU with a GPA of 3.0 or better.
• Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of Chemical Engineering.
• Students must present a dissertation
• Students must be enrolled.

Civil Engineering

Zhiqiang Hu, Interim Chair
Department of Civil & Environmental Engineering  
E2509 Lafferre Hall  
(573) 882-6084  
http://engineering.missouri.edu/civil/

Civil engineers are responsible for planning, design, construction, and operation of public and private facilities essential to modern life; including infrastructure for transportation of people and goods, water supply and water treatment, waste disposal, communications, and energy. Civil engineers are problem solvers, meeting the challenges of infrastructure, pollution, traffic congestion, drinking water supply, energy, national security, communications, urban redevelopment, and sustainable community planning.

Faculty

Assistant Teaching Professor E. C. Inniss**

Adjunct Faculty A. Boeckmann, P.E., H. Brown*, P.E., C. J. Nemmers*, P.E.

Professor Emeritus T. E. Clevenger*, S. A. Kiger*, M. R. Virkler*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BSCiE in Civil Engineering (p. 515)

The Department of Civil and Environmental Engineering offers a Bachelor of Science in Civil Engineering (BSCiE). Most graduates take the Fundamentals of Engineering Exam. Graduates are encouraged to become registered professional engineers and to continue their education throughout their careers.

Departmental Honors

Students who will graduate with a 3.0 GPA or higher are eligible for the College of Engineering honors program. Interested students should ask their advisor for details about this highly rewarding program that can include earning a salary for research performed under the guidance of a faculty member, and eligibility for dual enrollment in graduate classes.

Educational Mission

The educational objectives of the Bachelor of Science in Civil Engineering describe the expected accomplishments of graduates after graduation. It is expected that nearly all students completing the requirements of the Bachelor of Science in Civil Engineering will engage in the life-long learning necessary to advance professionally in the field of civil engineering and contribute to society and the profession through involvement in professional or other service activities.

It is expected that most graduates will

1. Enter the profession of civil engineering with proficiency in environmental engineering, geotechnical engineering, structural engineering, transportation engineering and water resources engineering. In doing so, these students will
   a. Take and pass the Fundamentals of Engineering exam
   b. Gain employment as an engineer-in-training
   c. Take and pass the Professional Engineers Exam, and
   d. Be licensed to practice engineering in one or more states

It is expected that some graduates will

1. Begin careers in civil engineering-related industries, especially construction and other careers not requiring professional licensure
2. Begin and complete graduate study in civil engineering at MU or other Carnegie doctoral extensive universities, and
3. Begin and complete graduate/professional study in other associated fields

The following list of outcomes describes what graduates are expected to know and to be able to do when they complete the program. At graduation, graduates will have:

• Ability to apply knowledge of mathematics through differential equations, calculus-based physics, chemistry and at least one additional area of basic science
• Ability to conduct laboratory experiments and to critically analyze and interpret experimental data
• Ability to perform civil engineering design by means of design experiences integrated throughout the professional component of the curriculum
• Ability to function on teams that must integrate contributions from different areas of civil engineering toward the solution of multidisciplinary projects
• Ability to identify, formulate and solve civil engineering problems
• Understanding of professional practice issues in civil engineering including professional and ethical responsibility
• Ability to communicate effectively
• The broad education necessary to understand the impact of civil engineering solutions in a global economic, environmental, and societal context
• Recognition of the need for, and an ability to engage in, life-long learning
• Knowledge of contemporary issues as they relate to civil engineering problems and solutions
• Ability to use the techniques, skills and modern engineering tools necessary for civil engineering practice, particularly in areas of environmental/water resources, geotechnical, structural and transportation engineering

Graduate

• MS in Civil Engineering (p. 517)
• PhD in Civil Engineering (p. 517)

http://engineering.missouri.edu/civil/

Director of Graduate Studies: Praveen Edara

About the Program

Civil engineering education at MU began in 1856. Graduate programs offered by the department prepare students for leadership positions in
academia, research and advanced practice engineering careers. Major program areas include: structural mechanics, structural engineering and materials, transportation engineering, geotechnical and geoenviro

tional engineering, environmental engineering, hydrology and water resources engineering.

**Areas of Study**

**Structural Mechanics, Structural Engineering and Materials.** Study areas: fracture and failure of composites, model-based simulation, inelastic response of materials and structures, bridge engineering, linear and nonlinear structural dynamics, explosion resistant structural design, timber engineering, microstructure of porous materials, concrete and aggregate durability, advanced fiber reinforced composites for construction and nondestructive structural health evaluation

**Environmental Engineering.** Study areas: water and air pollution control, water purification, wastewater treatment, environmental remediation, hazardous and solid waste treatment and management, membrane processes, implication and application of environmental nanotechnology and renewable energy issues. Other areas of research include the application of physical, chemical and biological principles to design of water supply systems, pollution control facilities and fate and transport of contaminants in soils and groundwater.

**Geotechnical and Geoenvironmental.** Study areas: strength, deformation and flow properties of earthen materials and application of this understanding to foundation engineering, slope stability analyses, earth structures design, pavement design and performance, and geoenviro

tional challenges. Research areas include: unsaturated soil mechanics, soil improvement techniques, geosynthetics, landfills and waste containment, stabilization and maintenance of earth slopes, in situ soil cleanup technologies, geotechnical earthquake engineering, nondestructive geophysical technologies for subsurface applications, satellite – and ground-based remote sensing risk analysis and reliability-based design.

**Transportation Engineering.** Study areas: traffic engineering, intelligent transportation systems, highway safety, network modeling and simulation, geographic information systems, security and evacuations, transportation planning, traffic flow theory, highway design, intersection operations, bicycle and pedestrian facilities, infrastructure management, driver behavior, airport engineering, transportation legal issues, artificial intelligence and advanced computing applications in transportation.

**Hydrology and Water Resources.** Study areas: hydrologic, hydraulic, regulatory/public policy and geographic information system applications for transportation, surface water quality and storm water management and decision making.

**Facilities and Resources**

The department has laboratories for experimental research in structural engineering, materials, geotechnical and geoenvironmental engineering, environmental engineering, and transportation engineering.

**Structural Testing.** Several computer-controlled electrohydraulic testing machines and associated instrumentation are available in the high-bay structural engineering and materials engineering laboratories. The laboratories are serviced by a 5-ton overhead crane. An additional structural testing facility located south of the campus houses a 100-foot by 20-foot structural floor with anchor points on a 4-foot-square grid. This high-bay facility is serviced by a 10-ton overhead crane. There is also a materials laboratory for concrete mix design and evaluation.

**Geotechnical Testing.** The laboratories house state-of-the-art permeability, consolidation, triaxial, geosynthetics, soil dynamics and unsaturated soil mechanics testing equipment and is home to the Missouri Soil Characterization Laboratory. Additional laboratories include facilities and equipment for large-scale model testing of slopes, piles and other geotechnical systems, including a 10-acre geotechnical experiment site.

**Environmental Labs.** The laboratories are supplied with analytical equipment for the complete physical, chemical and microbiological analysis of environmental samples. Additional capacities include membrane fabrication and characterization facilities, and chemical reactors and bioreactors for contaminant removal and/or degradation.

**Transportation Laboratory.** The laboratories include capabilities in advanced surveillance and video image processing, transportation modeling and simulation, Geographical Information Systems, traffic management and control, driver behavior, and safety, and ZouSim (bicycle, wheelchair, and driving simulator).

**Missouri Asphalt Pavement and Innovation Laboratory (MAPIL).** Advanced asphalt binder and mixture tests, including bending beam rheometer, dynamic shear rheometers (2), extraction and recovery apparatus, mixture creep, fatigue, rutting and fracture tests, compaction and fabrication equipment, advanced numerical modeling workstations and software, and an innovation center focusing on sustainable and resilient infrastructure development and intelligent infrastructure sensing and data analytics.

**Funding**

In addition to assistantships sponsored by the National Science Foundation (NSF), the US Environmental Protection Agency, Federal Highway Administration and other governmental agencies, several graduate assistantships are available each year. The assistantships are primarily research appointments; however, the Department does make a limited number of teaching assistantship appointments. Most assistantships offer tuition waivers and health insurance.

**BSciE in Civil Engineering**

**Degree Program Description**

Engineers are responsible for design, construction, and operation of our public and private infrastructure, for protecting our natural resources, and for preserving the health and safety of the general public. Civil engineers are vital to our nation’s economic vitality as they provide infrastructure for safe, efficient, and sustainable transportation of people and goods. The curriculum includes fundamental coursework in math and basic sciences, specialized coursework covering the subdisciplines of structural engineering, transportation engineering, geotechnical engineering, environmental engineering, and water resources engineering, as well as general education courses in the humanities and social sciences. Graduates are well prepared to become licensed Professional Engineers. The BS degree in civil engineering is accredited by the Engineering Commission of ABET. Graduates are commonly employed by private firms that provide design and consulting services, by construction contractors that build our infrastructure, and by government agencies responsible for specific components of the nation’s infrastructure. Some graduates opt to further specialize within the civil engineering profession by pursuing graduate degrees.
Major Program Requirements

Engineering topics start with basic computer and graphics courses. These are followed by basic engineering science courses, which ground the students in the fundamentals necessary for future course work and a more comprehensive design experience.

Engineering topics courses in the junior year provide students with the basic fundamentals in the areas of environmental engineering, geotechnical engineering, hydrology/water resources, structural engineering, and transportation/traffic engineering. Many of these courses contain elements of civil engineering design. Elective courses in the senior year enable students to either begin to specialize within or to maintain a broad educational background across the civil engineering discipline.

Design and communication skills are integrated throughout the curriculum culminating in a capstone design project, which is usually supplied by consultants or governmental agencies. This "final" course requires working in teams, making oral and written presentations, and completing a final design report. Oversight, interaction, and evaluation are provided by practicing engineers from industry and governmental organizations.

Students earning a Bachelor of Science in Civil Engineering are required to complete all University general education (http://catalog.missouri.edu/academicdegreerequirements/generaleducationrequirements), University undergraduate requirements (http://catalog.missouri.edu/academicdegreerequirements/universityrequirements), degree, and major requirements, including selected foundational courses, which may fulfill some University general education requirements. Approximately one-third of the course work for the degree is completed in engineering or professionally related courses.

Dr. Praveen Edara
Director of Graduate Studies
http://engineering.missouri.edu/civil/

Degree Requirements
A student’s program must include a minimum of 30 hours (transportation area) or 31 hours of graduate credit beyond the bachelor’s degree (or its equivalent). A total of 15 hours of the 30-hour minimum must be selected from courses at the 8000 or 9000 level. No more than 40 percent of the 30-hour credit requirement can be satisfied by a combination of special investigations, research (CV_ENG 8990), readings and/or problems courses. The student's GPA must be 3.0 or greater. Students should consult with their academic advisor to ensure all requirements are satisfied.

Sample Plan of Study
• 8 or more courses (3 credit hours each) at the appropriate level
• Up to 6 hours of research (CV_ENG 8990)
• One or more 1-hour seminars associated with your specialty area (seminar is not required in all areas; see your academic advisor for details).

Thesis/Non-Thesis Requirements
All candidates for the Master of Science degree are required to complete a substantial independent effort reflecting some measure of creativity and/or originality and to produce evidence of such effort. A final oral examination is required of all master’s candidates. Approximately two weeks before this examination, a candidate must submit to an examining committee a thesis, a formal report or a design of professional quality applying the knowledge gained in course work to the solution of an engineering problem. Students who receive research appointments or traineeships are required to submit a thesis. Formal or design report is at the discretion of the advisor.

Academic credit allowed for this portion of a student's program of study shall be for 3 credit hours for a report and 6 credit hours for a thesis.

Admissions
Priority admission and funding consideration are given to applications received by February 15/September 15. Applications submitted after February 15/September 15 will be considered, with preference going to those received by May 1/December 1. Prospective students applying after May 1/December 1 will be considered for fall/spring admission on a case by case basis.

Admission Criteria
• Minimum GPA: 3.0 in last 2 years of coursework. Note: Lower than 3.0 GPA requires special action and substantiation such as good test scores on the GRE or other recognized examinations.
• BS in engineering. Applicants with BS degrees in related fields may be considered for admission. If admitted, non-engineers are required to complete remedial courses as determined by their advisor and advisory committee.
• GRE test is required but no minimum score set. Typical acceptance scores: around 300 for Verbal + Quantitative and between 3.0 and 5.0 for Analytical.
• Minimum TOEFL and IELTS scores for international students: See language requirements by the Office of Graduate Studies.

Required Application Materials
Upload to the Office of Graduate Studies:
• All required Graduate Admissions documents
• 3 Letters of Recommendation (at least two from faculty members who have taught or advised you)
• GRE scores
• Résumé
• Statement of Purpose

Financial Aid from the Program
If you wish to be considered for financial aid, please complete the financial aid section of the departmental application.

PhD in Civil Engineering

Dr. Praveen Edara
Director of Graduate Studies
https://engineering.missouri.edu/departments/civil-environmental-engineering/

Degree Requirements
PhD programs are committee administered and tailored to fit the needs of each individual student. A minimum of 72 credit hours, including the credit hours taken during the MS program beyond the bachelor’s degree, are required. Students who received the MS degree from other than MU may transfer up to 30 hours of credit from their MS degree. The candidate must pass a comprehensive examination and submit and defend a dissertation at a final oral examination.

Residency Requirement
A student must complete at least two nine-hour semesters or three six-hour semesters in an 18-month period at MU. All courses taken to satisfy the residency requirement must be approved by the student’s doctoral program committee. Correspondence and off-campus courses may not be counted toward the residency requirements.

Qualifying for Candidacy
Students are accepted for advisement upon CE Graduate Admissions Committee review. Formal acceptance to the PhD program is based on a qualifying examination during the first year of post-master’s work.

The Qualifying Examination is required to determine the formal acceptance to candidacy for the PhD. degree and is based on a written
and/or oral examination administered by faculty members in the student's area of concentration. The student, upon passing this examination, will be advised on the program of coursework that should be taken to prepare for the PhD degree.

Comprehensive Examination Process

Candidacy for a doctoral degree is established by passing the comprehensive examination. The comprehensive examination includes written and oral sections and is completed as the candidate is completing the prescribed coursework to determine if the PhD candidate is adequately prepared to conduct the doctoral research. This examination will focus on the coursework and/or research/proposal writing. The student may be advised to take some additional coursework. A written proposal of the research must be distributed to the student's doctoral committee for review after which an oral presentation and examination on the proposed work will be administrated.

Dissertation Requirements

The third examination, called the Defense of the Doctoral Dissertation, is required to determine if the PhD degree should be awarded on the basis of the research that is presented. The student must submit the written dissertation to the committee members at least two weeks prior to the exam. This is an oral examination that is administered by the Doctoral Committee.

Graduate students are required to submit one copy of their dissertation or thesis to the Office of Graduate Studies, 210 Jesse Hall on a CD.

Admissions

Application Deadlines

Priority admission and funding consideration are given to applications received by February 15/September 15. Applications submitted after February 15/September 15 will be considered, with preference going to those received by May 1/December 1. Prospective students applying after May 1/December 1 will be considered for fall/spring admission on a case by case basis.

Admission Criteria

- Minimum GPA: 3.0 in last 2 years of coursework. Note: Lower than 3.0 GPA requires special action and substantiation such as good test scores on the GRE or other recognized examinations.
- BS in engineering. Applicants with BS degrees in related fields may be considered for admission. If admitted, non-engineers are required to complete remedial courses as determined by their advisor and advisory committee.
- GRE test is required but no minimum score set. Typical acceptance scores: around 300 for Verbal + Quantitative and between 3.0 and 4.0 for Analytical.
- Minimum TOEFL and IELTS scores for international students: See language requirements by the Office of Graduate Studies.

Required Application Materials

- All required Graduate Admissions documents (https://applygrad.missouri.edu/apply)
- 3 Letters of Recommendations (at least two from faculty members who have taught or advised you)
- GRE scores
- Résumé

Financial Aid from the Program

If you wish to be considered for financial aid, please complete the financial section of the departmental application.

NairS@missouri.edu

Introduction

The Department of Electrical Engineering & Computer Science is one of the academic departments within the College of Engineering at the University of Missouri. It manages two sets of Programs: the Computer Science Program (CSP) and the Electrical & Computer Engineering Program (ECEP). At the undergraduate level, the EECS Department grants three distinct BS degrees including Computer Science (CS), Computer Engineering (CoE) and Electrical Engineering (EE). The CS undergraduate program is accredited by the Computing Accreditation Commission of ABET, while the CoE and EE undergraduate programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. At the graduate level, the EECS Department offers MS and ME degrees in CS, CoE and EE, and PhD degrees in CS and Electrical & Computer Engineering (ECE). EECS is undergoing a new wave of innovation broadly referred to as Internet of Things (IoT) or Internet of Everything (IoE) and cyber-physical systems from wearable biocompatible sensors, low power flexible integrated circuits, hybrid multicore computer architectures and hardware level security to new cryptographic protocols, mobile apps, cloud computing, deep learning, robotics, autonomous systems and smart cities. The four year undergraduate degree program prepares students for rewarding careers in hardware and software systems and lays the foundation for graduate study in the next wave of technological innovation.

The department was established in 1885 (http://missouri.edu/about/history/engineering.php) as the first Electrical Engineering department in the nation, after Thomas Edison helped generate interest in electrical engineering by presenting an electrical dynamo and some incandescent lamps to the University of Missouri in 1882. The EECS department is now home to more than 600 undergraduate students and over 300 graduate students in CS, CoE, EE and ECE, with 40+ faculty members, not including instructors, teaching professors, and emeriti.

About Electrical and Computer Engineering Program

The Electrical and Computer Engineering Program (ECEP) in the Electrical Engineering and Computer Science (EECS) Department is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over $5 million in externally funded research. The ECE Program offers a comprehensive undergraduate curriculum culminating in a capstone project that provides a solid foundation for undergraduate students to pursue rewarding careers in computer and electrical engineering. Students seeking either one of the two undergraduate degrees offered -- Bachelor of Science in Computer Engineering
is often multidisciplinary in nature, spanning interdepartmental and funded by the federal government, state government and industry, that strong innovation component with faculty initiated research projects of undergraduate and graduate education. Graduate education has a The faculty members in the ECE Program participate in the full spectrum hands-on knowledge in specialized areas through undergraduate research experiences working with faculty. The faculty research areas covers both well established and emerging fields including mobile video communication; wireless and digital communications; satellite remote sensing; geospatial image and video processing; computational neuroscience; systems biology; eldercare technology; computational intelligence, machine learning, pattern recognition, deep networks, fuzzy systems; computer vision; robotic vision; robotic assistive technology; human/robot interaction; landmine detection; pulsed power and plasmatechnology; nuclear and renewable energy systems; semiconductor devices; photonics; accelerators and beams; antennas and radar systems; nano and microelectromechanical systems; bioMEMS; heterostructures, microfabrication; feedback and control systems; parallel processing; computer architecture; autonomous systems; real-time embedded architectures; high performance computing; sensor networks; and human-computer interfaces.

The ECEP in EECS also offers a Dual Bachelor of Science in Electrical Engineering & Physics (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/dual-bachelor-science-electrical-engineering-physics). At the MS and PhD levels, the ECEP offers the following graduate degrees:

- Master of Science in Computer Engineering (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-computer-engineering)
- Master of Science in Electrical Engineering (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-electrical-engineering)
- Doctoral Degree in Electrical and Computer Engineering (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/phd-electrical-computer-engineering)

with options for dual masters and Masters in Engineering (ME) -- i.e. coursework only, without thesis. The graduate degree programs prepare graduates of four-year BS degrees in Computer Engineering, Electrical Engineering, Computer Science or closely related areas for further study at the doctoral level or for successful careers as specialized CoE and EE professionals in emerging fields. The PhD program is a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well as research and development in industrial, government, and nonprofit organizations. Specialized training, state-of-the-art technology, innovation and entrepreneurship experience is available through close interaction with the faculty in their respective fields of research expertise.

The faculty members in the ECE Program participate in the full spectrum of undergraduate and graduate education. Graduate education has a strong innovation component with faculty initiated research projects funded by the federal government, state government and industry, that is often multidisciplinary in nature, spanning interdepartmental and cross-college research. The aim is to produce professionals who can function well as part of interdisciplinary research and development as well as product teams. Close integration of research with education is a constant goal in the department’s graduate programs. It emphasizes in-depth studies that can also be tailored to fit graduate students’ individual interests. Additionally, members of the ECEP are among the leading faculty in University’s Research Revenue, with major research projects funded by both federal agencies and industry including the National Science Foundation (NSF), National Institute of Health (NIH), National Geospatial-Intelligence Agency (NGA), Department of Energy (DoE), and Department of Defense (DoD) as well as Microsoft, Honeywell and Monsanto, to cite just a few.

Research facilities are well established around faculty expertise in the broad emphasis areas of Communications and Signal Processing (SP), Intelligent Systems and Robotics (ISR), Physical and Power Electronics (PPE), Applied Physics (AP), Systems Modeling and Control (SMC), Computer Architecture and Systems (CAS), Nano/Micro Technology (NMT). Faculty in the Electrical and Computer Engineering Program work closely with faculty in the Computer Science Program within the EECS Department.

For highly motivated undergraduate students a fast-track five year program of study leading to the BS plus MS degrees in CoE or EE is available.

Teaching assistantships with the EECS Department and research assistantships with faculty are available to fund graduate study especially at the PhD level.

Summary

The ECE Program offers undergrad degrees:

- Bachelor of Science in Computer Engineering (BS CoE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-computer-engineering-bs)
- Bachelor of Science in Electrical Engineering (BS EE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-electrical-engineering)
- Dual Bachelor of Science in Electrical Engineering & Physics (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/dual-bachelor-science-electrical-engineering-physics)

with many more options for dual degrees within the EECS department and outside.

Graduates with BS degrees in CoE, EE, CS or closely related areas can choose to pursue advanced study towards the following degrees:

- Master of Science in Computer Engineering (MS) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-computer-engineering)
- Master of Science in Electrical Engineering (MS) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-electrical-engineering)
- Doctoral Degree in Electrical and Computer Engineering (PhD) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/phd-electrical-computer-engineering)

The MS and PhD are professional research degrees designed to prepare students for advanced professional careers, including teaching and
research at university level, as well as research and development in industrial, government, and nonprofit organizations.

The ECE Program offers learning and research opportunities for both undergraduate and graduate students in the areas of:

- mobile video communication;
- wireless and digital communications;
- satellite remote sensing;
- geospatial image and video processing;
- computational neuroscience;
- systems biology;
- eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep networks, fuzzy systems;
- computer vision;
- robotic vision;
- robotic assistive technology;
- human/robot interaction;
- landmine detection;
- pulsed power and plasmatechnology;
- nuclear and renewable energy systems;
- semiconductor devices;
- photonics;
- accelerators and beams;
- antennas and radar systems;
- nano and microelectromechanical systems;
- bioMEMS;
- heterostructure and microfabrication;
- feedback and control systems;
- parallel processing;
- computer architecture;
- autonomous systems;
- real-time embedded architectures;
- high performance computing;
- sensor networks; and
- human-computer interfaces.

Research

The ECEP in EECS is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over $5 million in externally funded research with faculty conducting research in the broad emphasis areas of:

- Communications and Signal Processing (CSP)
- Intelligent Systems and Robotics (ISR)
- Physical and Power Electronics (PPE)
- Applied Physics (AP)
- Systems Modeling and Control (SMC)
- Computer Architecture and Systems (CAS)
- Nano/Micro Technology (NMT)

Faculty

Associate Professor M. Almasri**, G. DeSouza**, T. G. Engel***, T. Han**, J. J. Legarsky**
Assistant Research Professor G. Scott**
Assistant Teaching Professor R. Druke*, L. Rivera*
Associate Professor Emeritus R. W. Leavene Jr.*
Adjunct M. Becchi**, D. Heise, G. K. Hubler*, V. Korampally*, G. Triplett**, A. Zare**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

(573) 882-2648
beattyt@missouri.edu

The Department of Electrical Engineering and Computer Science (EECS) offers both the Bachelor of Science with a major in Electrical Engineering and the Bachelor of Science with a major in Computer Engineering. The undergraduate program in both degrees at the University of Missouri provides students with the requisite fundamentals in either discipline and prepares them for beginning practice in both the traditional and emerging fields of these disciplines. The degree programs are flexible 126-credit structures that provide the fundamentals of engineering, in addition to a thorough coverage of the major specialties within their respective fields. In addition, technical electives allow concentration in selected areas.

The EECS department emphasizes close interaction with industry. Industry engineers visit regularly and industry-sponsored student projects are provided to give extra dimension to the program.

Many students in the EECS department combine the electrical engineering major with the computer engineering major in a special 138-credit program. These students receive both the BS EE and BS CpE degrees.

Students interested in interdisciplinary studies may use some electives to study business, premedicine, prelaw, and other areas. Students are able to choose from a wide variety of courses offered by other departments in the College of Engineering, as well as from other MU colleges, taking advantage of the multidisciplinary nature of the campus.

The current educational objectives of the electrical engineering program are:

- Graduates will meet or exceed the expectations of their employers
- Qualified graduates will pursue advanced study if desired
Graduates will pursue leadership positions in their profession and/or communities

The current educational objectives of the computer engineering program are:

- Graduates will meet or exceed the expectations of their employers
- Qualified graduates will pursue advanced study if desired
- Graduates will pursue leadership positions in their profession and/or communities

Both the Bachelor of Science in Electrical Engineering (BS EE) and the Bachelor of Science in Computer Engineering (BS CoE) require that students earn a 2.0 GPA or better in all courses that have an MU engineering prefix. All ECE courses require a grade of C or better in ECE prerequisites.

Engineering design in both the electrical engineering and computer engineering programs is provided through an integrated laboratory structure. Beginning with the first laboratory course in the fourth semester of each program, students have a significant design and laboratory experience in each semester of their respective programs.

In addition to the major core requirements, students must complete all University graduation requirements (p. 33) including University general education (p. 34), as well as all degree and college or school requirements.

Electrical and Computer Engineering (ECE) Honors Program

The ECE Honors Program follows the general rules and philosophy of the College of Engineering Honors Program. Students may enter the program from the beginning of the junior year and must have a GPA of 3.0/4.0 at the start. Eligible students participate in the program by enrolling in ECE 4995 Undergraduate Honors Research in Electrical Computer Engineering for one to three credit hours, which replaces an equivalent number of hours of ECE technical electives.

The heart of the program is a research or advanced design project culminating in an undergraduate honors thesis. The project is conducted under the supervision of the honors advisor, who is an ECE faculty member selected by mutual agreement between the student and the professor. Satisfactory completion of the project requires approval (signatures) of the honors thesis by both the honors advisor and an additional faculty member, who serves as second reader of the thesis. Students who complete the program and graduate with a GPA of a least 3.0 receive the designation “Honors Scholar in Engineering” at graduation and on their diploma.

Another valuable feature of the Honors Program is that participants may reduce the number of credit hours required for degree completion to the University minimum of 120 by substituting up to six hours of credit from graduate courses through dual (undergraduate/graduate) enrollment during the last four semesters of the undergraduate program and after completion of the honors project.

Graduate

- MS in Computer Engineering (p. 525)

Columbia, MO 65211
Phone: (573) 882-5579
Email: DeSouzaG@missouri.edu
http://engineering.missouri.edu/ece/

The Department also offers a PhD in Electrical and Computer Engineering (p. 536), and the College of Engineering offers an interdepartmental ME in Engineering with a focus in Computer or Electrical Engineering (p. 548).

Research Areas

The ECE Program in EECS is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over $5 million in expenditures with faculty conducting research in the broad emphasis areas of:

- Communications and Signal Processing (CSP)
- Intelligent Systems and Robotics (ISR)
- Physical and Power Electronics (PPE)
- Applied Physics (AP)
- Systems Modeling and Control (SMC)
- Computer Architecture and Systems (CAS)
- Nano/Micro Technology (NMT)

Specific Topics of Study

- mobile video communication;
- wireless and digital communications;
- satellite remote sensing;
- geospatial image and video processing;
- computational neuroscience;
- systems biology;
- eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep learning, fuzzy systems;
- computer vision;
- robotic vision;
- robotic assistive technology;
- human/robot interaction;
- landmine detection;
- pulsed power and plasma technology;
- nuclear and renewable energy systems;
- semiconductor devices;
- photonics;
- accelerators and beams;
- antennas and radar systems;
- nano and microelectromechanical systems;
- bioMEMS;
- heterostructure and microfabrication;
- feedback and control systems;
- parallel processing;
- computer architecture;
• autonomous systems;
• real-time embedded architectures;
• high performance computing;
• sensor networks; and
• human-computer interfaces.

Admission Requirements for the MS and ME Programs in EE or CE

• GPA from BS program
• GRE: Quantitative, Verbal and Analytic scores.
• International students:
  • Computer-based TOEFL, or
  • Paper-based TOEFL, or
  • Internet-based TOEFL, or
  • IELTS exam
• 3 letters of recommendation
• Statement of purpose
• Transcripts

(When registering for the GRE and TOEFL exams, be sure to designate the University of Missouri-Columbia and your program of interest as locations to receive the scores. MU’s Institutional Code for the GRE and TOEFL is: 6875.)

In addition to the Graduate School requirements, the ECE programs have the following additional requirements:

The three letters of recommendation should be from persons familiar with the applicant's engineering or related work. It is required that the recommendation letter use the institutional letterhead or be sent directly from the recommender's institutional e-mail address (not gmail, hotmail, etc.). Similarly, each provided reference must include the person's institutional e-mail address. Any letters of recommendation or listed reference that does not comply with the above or otherwise look 'unofficial' will be disregarded.

To be accepted outright by the Director of Graduate Studies in ECE (DGS-ECE), the student needs to have a BS degree in either Electrical Engineering or Computer Engineering in addition to meeting the above requirements.

Students who meet the academic requirements but have degrees in other Engineering or Science disciplines can be accepted directly into the MS/ME programs by the Graduate Program Committee in ECE (GPC-ECE).

Such students are strongly encouraged to consult with the DGS-ECE or their advisor about appropriate bridge courses. Based on individual circumstances, students may be advised to register as an undeclared graduate student to fill in background coursework prior to admission into the department.

Students who don't meet the above requirements may still be admitted on Probation by the GPC if there are mitigating factors. Students admitted on Probation must receive at least a 3.0 GPA for the first 12 hours of graded graduate coursework completed in their first two semesters. Failure to achieve this GPA will result in expulsion from the ECE MS/ME program.

Fast Tracking

In an effort to streamline and accelerate the acquisition of MU graduate degree(s) we establish fast tracking options for our current undergraduate students and our 3+2 students. For MU undergraduate students, the fast track option allows them to become integrated into the research environment of the EECS department early in their career and to earn between 6 and 12 hours of graduate credit as their schedules allow. For these qualified graduate school bound students, we will waive the GRE requirement and give them preference in TA and RA positions. For the 3+2 students who demonstrate excellence in their first semester of ECE course work at MU, we will waive the GRE and provide up to 12 hours of graduate credit prior to entry into one of the ECE graduate programs. The summary follows.

MU BS students (all relevant majors)

• GPA > 3.0 after junior year
• Waive GRE requirement for admission to ECE graduate programs
• Use 6 hours of 126 for graduate credit (after 90 credit hours have been earned)
• Earn 6 additional hours of graduate credit as schedule allows (after 90 credit hours have been earned)
• Participate in Undergraduate Research at least one semester
• Participate in Honors Scholars' Program

International or Domestic 3 + 2 students

• GPA from Home institution (last 60 hours) > 3.2
• MU GPA in at least 12 hours of ECE courses >= 3.5
• Waive GRE requirement for admission
• Take up to 12 hours as dual enrolled student (second semester of first year)

Internal Funding

Teaching Assistantships

Teaching assistantships are normally awarded to qualified graduate students with appropriate communication skills who assist faculty members in various phases of instruction. International students may not be appointed to teaching assistantships in their first semester on campus. International students must pass a language screening test at a proper level to be eligible for the TA positions available.

Research Assistantships

Research assistantships are granted to students qualified for working with professors on particular research projects. The research assistants are selected by faculty members who have research funds to support graduate students. Therefore, students should contact the faculty members directly for the RA possibility.

Fellowships

The department faculty actively pursue funding for selected research fellowships. Available fellowship opportunities can be found by contacting the ECE Graduate Office. Additionally, a limited number of "Teaching Fellows" are awarded annually to outstanding PhD students, particularly for those preparing for academic careers. Details can obtained from the ECE Graduate Office.

BSCoE in Computer Engineering
Degree Program Description

The computer engineering degree offers a balanced approach to both hardware and software, as well as other areas of engineering. Focused areas of work in additional hardware or software, communications, discrete and integrated electronics, and robotics are offered by the department.

Major Program Requirements

The computer engineering degree offers a balanced approach to both hardware and software, as well as other areas of engineering. Focused areas of work in additional hardware or software, communications, discrete and integrated electronics, and robotics are offered by the department. (Focus areas are not listed on transcripts or diplomas.) Students must complete all university requirements, including general education (p. 34), and Department Level Requirements (p. 520), in addition to the degree requirements below.

Total Credits: 126
Double Major

Electrical Engineering and Computer Engineering

Many students in the EECS department combine the BS in Electrical Engineering with the BS in Computer Engineering in a special 138-credit program. These students receive both the BS EE and BS CoE degrees.

MS in Computer Engineering

Admission

349 Engineering Building West, Columbia, MO 65211
Phone: (573) 882-4436
Email: umcengrecegradoff@missouri.edu
http://engineering.missouri.edu/ece/

Admission Criteria

Fall deadline: February 15
Spring deadline: September 1
Note: Applications received after these deadlines will be evaluated as time allows.

- Minimum GPA: 3.0 for the last 60 hours
- Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal</th>
<th>Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>80th percentile</td>
<td>will be considered</td>
<td>will be considered</td>
<td></td>
</tr>
<tr>
<td>On or After August 1, 2011</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>80th percentile</td>
<td>will be considered</td>
<td>will be considered</td>
<td></td>
</tr>
</tbody>
</table>

International applicants only:

- Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

- Minimum Academic IELTS scores:

<table>
<thead>
<tr>
<th>Item</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Listening</td>
<td>5.5</td>
</tr>
<tr>
<td>Reading</td>
<td>5.5</td>
</tr>
<tr>
<td>Writing</td>
<td>5.5</td>
</tr>
<tr>
<td>Speaking</td>
<td>5.5</td>
</tr>
</tbody>
</table>

Required Application Materials:

- Statement of Purpose (upload to the Supplemental information section of the application)
- Copies of your official transcripts (upload to the Educational History section of the application)
- Copies of your GRE scores (upload to the Test Information section of the application)
- Copies of your TOEFL or IELTS Scores (for non-native English speakers only) (upload to the Test Information section of the application)
- 3 letters of Recommendation (the department accepts electronic recommendations – in the recommendation section of the online application, enter the information for three recommenders. Each recommender will receive an email with instructions on how to complete the recommendation). The department does also accept hard copy letters of recommendation. The letters may be mailed to: The Office of Graduate Studies, 210 Jesse Hall, Columbia, MO 65211.

To the Office of Graduate Studies: Official Transcripts. The mailing address is: Office of Graduate Studies, 210 Jesse Hall, Columbia, MO 65211.

Note: when registering for GRE or TOEFL exams, be sure to designate your program of interest at the University of Missouri – Columbia. MU’s Institutional Code is 6875 (no departmental code is necessary).

Admissions Criteria for the MS in Electrical or Computer Engineering

To be accepted outright by the director of graduate studies (DGS), the student needs to have a BS degree in either Electrical Engineering or Computer Engineering in addition to meeting the above requirements. Students who meet the academic requirements but have degrees in other engineering or science disciplines can be accepted directly into the MS program by the graduate program committee (GPC). Such students are strongly encouraged to consult with the DGS or their advisor about appropriate bridge courses. Based on individual circumstances, students may be advised to register as an undeclared graduate student to fill in background course work prior to admission into the department.

Students who do not meet the above requirements may still be admitted on probation by the GPC if there are mitigating factors. Students admitted on probation must receive at least a 3.0 GPA for the first 12 hours of graded graduate coursework completed in their first two semesters. Failure to achieve this GPA will result in expulsion from the ECE MS program.

Appeal Process

All students have the right to a timely formal appeal to the GPC. Upon receipt of an admission decision or disciplinary action, the student has 10 working days in which to request a formal appeal. The DGS will convene a meeting of the GPC, the student, and the student’s advocate (if appropriate) within 10 working days of receiving the request. The decision of the GPC at the hearing is final.

Degree Requirements

To fulfill the requirements for the MS degree, the following rules apply:

- A candidate must complete 30 hours, including at least 12 hours of 8000-level graded course work (exclusive of ECE 8990 or ECE 8085 or ECE 8010 hours).
- At least six of these graded 8000 level course hours need to come from ECE.
- At least 15 hours of graded course work (total combination of 7000 and 8000 level courses, exclusive of ECE 8990, ECE 8085, or ECE 8010 hours) must be taken from the Electrical and Computer Engineering Department course offerings.
- A maximum of six hours of graduate credit may be transferred from another campus in the University of Missouri System or other university, while a maximum of eight hours of graduate credit may be used from a previous MU master’s degree.
- At most, three hours of course work in supervised study (ECE 8010) may be taken during the MS program and they will be graded on an S/U basis.
- At least one course from each of three different emphasis areas must be taken; a minimum of two of the emphasis areas must be in
Electrical and Computer Engineering. (Each ECE graduate course is designated to an emphasis area. Contact the ECE graduate office for a current list).

- A minimum of 3 hours to a maximum of 6 hours of research (ECE 8990) or problems (ECE 8085) are required, based on whether the student writes a master’s thesis or a master’s Report.
- The student’s cumulative GPA must be at least 3.0 to graduate.

The requirements for the MS degree must be met within an eight-year period. Each candidate must pass a final oral examination to demonstrate mastery of the work included in the thesis or in a substantial independent project. These MS requirements apply to ECE graduate students first enrolled in MU ECE in the Fall semester 2007 or later. UM ECE graduate students enrolled prior to Fall semester 2007 may choose to follow the MU ECE MS requirements that were in effect for their MU ECE graduate admission semester.

Academic Probation

A student whose GPA drops below 3.0 is automatically placed on academic probation. In such a case, the student has one semester to raise his or her cumulative GPA to 3.0. Failure to do so will result in expulsion from the program. Additionally, a student who receives the grade of “C” in 9 hours of coursework will be expelled. As with acceptance, students here also have a right to the same formal appeal process described above.

Selection of an Advisor

Students must choose an academic advisor who will then provide guidance for the selection of coursework, and in the choice and execution of a research question. The student’s academic advisor and the Director of Graduate Studies must approve all coursework used to satisfy the credit hour requirements for this degree. After performing satisfactorily for a minimum of one semester, the student, with the advisor’s assistance, completes the Program of Study form that outlines the plan of study for the student’s graduate program. M1 - Program of Study form.

The form is forwarded through the DGS to the Office of Graduate Studies for approval. In the event that an advisor retires or leaves MU, he/she may continue to serve as the student’s main advisor unless there is written academic program policy prohibiting such an arrangement. If an advisor is unable or unwilling to continue to serve, the academic program, with the leadership of the DGS, will assist the student to ensure that a replacement is found.

The Program of Study form must be filed with the Office of Graduate Studies by the end of the student’s second semester of enrollment. Upon approval of the form by the Graduate School, the student is a candidate for the degree. If changes must be made on a student’s Program of Study form, a Program of Study Substitution form is used.

Thesis Option

For students under the thesis option of the MS degree, i.e., students enrolling for ECE 8990, an M-2 Request for Thesis Committee form is required to be submitted for approval by the department DGS and the Office of Graduate Studies by the end of the student’s second semester.

A thesis committee is composed of three members of the MU faculty: a major advisor from the academic program, a second reader from the academic program, and an outside reader who is a member of the graduate faculty from a different MU graduate program. Upon approval of the department DGS, the student may petition the Office of Graduate Studies to allow a person who is not a member of the MU graduate faculty to serve as the third reader. The petition should include a written justification for such a request and a copy of the person’s curriculum vitae. The Office of Graduate Studies maintains copies of curriculum vitae previously received and approved, and if such a request is anticipated, the student should contact the Graduate School to see if the curriculum vita of a particular person is already on file. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date.

Information about submitting the thesis can be found in the Thesis and Dissertation Guidelines.

Non-Thesis Option

For students who enroll in ECE 8085 (Problems), a problem report rather than a thesis is required. The student is not required to submit the M-2 form (request for a thesis committee). Instead, the student must have the report approved by his or her advisor and two other members of the graduate faculty, forming the student’s Problem Committee. It is not required that a member outside of ECE be included, although it is permissible for such a member of the MU graduate faculty to be appointed. At least one of the three members must have a primary academic appointment in ECE. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date. At that time, an announcement is to be made to the department faculty and graduate students to allow them to attend the defense. The student must defend the problem report to the committee, and make any needed adjustments in format and corrections/clarifications based on input from the committee. A final copy of the problem report must be filed with the ECE graduate office.

Report of the Master’s Examining Committee

The purpose of the M-3 Report of the Master’s Examining Committee Form is to have an official record of the final examining process, whether it is a thesis defense or presentation of a report. The student’s committee will indicate on this form if the student has passed the final exam. This form must be submitted to the Office of Graduate Studies by a deadline for the semester in which the students plan to graduate. For a report option, the 3rd reader of the committee may be from the student’s department. The form is due in the Office of Graduate Studies two weeks prior to graduation.

Computer Science

Introduction

The Department of Electrical Engineering & Computer Science is one of the academic departments within the College of Engineering at the University of Missouri. It manages two sets of Programs: the Computer Science Program (CSP) and the Electrical & Computer Engineering
About Computer Science Programs

The Computer Science Program (CSP) in the Electrical Engineering and Computer Science (EECS) Department continues to be a dynamic, rapidly evolving and research-active unit at the University of Missouri. The Computer Science Program offers a comprehensive curriculum culminating in a capstone project that provides a solid foundation for undergraduate students to pursue rewarding careers in computing and information technology. Students are able to pursue dual degrees in related fields including information technology, computer engineering and electrical engineering as well as minors in other colleges. Students have opportunities to gain in-depth hands-on knowledge in specialized areas through undergraduate research experiences working with faculty. The faculty lead computer science activities on campus and their research covers both well established and emerging fields including big data analytics, machine learning, cloud computing, cyber-physical, Internet of Things, artificial intelligence, computer vision, robotics, autonomous systems, embedded architectures, high performance computing, computational biology and bioinformatics, biomedical and geospatial informatics, cyber-security, distributed and mobile computing, learning systems, multimedia communications, data visualization, information fusion, sensor networks, spoken language processing, human-computer interfaces, virtual and augmented reality.

The CSP offers graduate programs in masters, dual masters, and doctoral degrees. The graduate degree programs prepare graduates of four-year BS degrees in Computer Science or closely related areas for further study at the doctoral level or for successful careers as specialized computer professionals in emerging fields. The PhD program is a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well as research and development in industrial, government, and nonprofit organizations. Specialized training, state-of-the-art technology, innovation and entrepreneurship experience is available through close interaction with the faculty in their respective fields of research expertise.

The faculty members in the Computer Science Program participate in the full spectrum of undergraduate and graduate education. Graduate education, has a strong innovation component with faculty initiated research projects funded by the federal government, state government and industry, and is often multidisciplinary in nature spanning interdepartmental and cross-college research. The aim is to produce computer scientists who can function well as part of interdisciplinary research teams. Close integration of research with education is a constant goal in the department’s graduate programs. It emphasizes in-depth studies that can also be tailored to fit graduate students’ individual interests. Additionally, members of the CSP lead the University’s institutional efforts in developing infrastructure for bioinformatics, computational biology, and high-performance computing and networking. Our major research projects are funded by both federal agencies and industry including the National Science Foundation (NSF), National Institute of Health (NIH), National Geospatial-Intelligence Agency (NGA), Department of Energy (DoE), and Department of Defense (DoD) which are examples of federal funding, Microsoft, Honeywell and Monsanto are representative of industrial funding.

Research facilities are well established around faculty expertise in cloud computing, bioinformatics and computational biology, biological and biomedical image analysis, graphics, visualization and virtual reality, mobile computing, artificial intelligence, multimedia, networking, human-computer interaction, information services and networking, computer science foundations. These facilities are clustered in core laboratories for bioinformatics, multimedia and visualization, video processing, spoken-language processing, mobile networking and communications, wireless sensor networks, high-performance computing, cyber security, and medical informatics. Faculty in the Computer Science Program work closely with faculty in the Computer Engineering and Electrical Engineering Programs within the EECS Department.

Careers and Graduate study

The Computer Science curriculum prepares graduates of four-year B.S. degrees in Computer Science for successful careers as computer and information technology professionals in industry as part of the rapidly expanding and pervasive information economy. Graduates with B.S. degrees in Computer Science or closely related areas can choose to pursue advanced study at the masters and doctoral level under the mentorship of a faculty in specialized research fields within the broad discipline of computing with engaging opportunities in multidisciplinary collaborative research across departments and colleges.

The M.S. and Ph.D. programs are a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well as research and development in industrial, government, and nonprofit organizations. Specialized training is available through close interaction with faculty mentors in their active research fields. For highly motivated undergraduate students a fast-track five year program of study leading to the BS plus MS degrees in Computer Science is available. Teaching assistantships with the EECS Department and research assistantships with faculty are available to fund graduate study especially at the PhD level.
With foundations in undergraduate courses covering algorithms, compilers, software engineering, web technologies, database, networking, operating systems, programming languages, artificial intelligence and computational complexity, the graduate programs are integrated over many application areas and multidisciplinary fields such as:

- cyber-security
- social multimedia and databases
- big data analytics
- web services and content delivery networks
- wearable and embedded devices, architectures and systems
- smartphone applications
- video games, film and entertainment
- mobile and sensor networks
- personalized learning systems
- high performance computing and networking
- information search, discovery and retrieval systems
- smart communities and smart grid energy systems
- robotics and industrial automation systems
- bioinformatics and computational biology
- biomedical image analysis
- medical informatics and healthcare
- human and animal medicine
- space, defense and security imaging systems
- precision agriculture and food security
- management information systems and business analytics
- journalism and the media of the future

Research

This CSP is the hub of computer science research activities on campus that involve theoretical, experimental, computational and applied research areas in:

- cloud computing and high performance computing
- big data science and machine learning
- bioinformatics and computational biology
- bioimaging and phenomics
- graphics, visualization, virtual and augmented reality
- computer vision and image processing
- geospatial information mining and retrieval
- biomedical image analysis
- satellite and aerial imaging
- information fusion & filtering
- cyber-security and cryptography
- cyber-physical and IoT
- multimedia communications and databases
- ambient intelligence and sensor networks
- mobile, distributed and pervasive computing
- spoken language processing
- gesture and human-computer interfaces, etc.

Additionally, members of the CSP lead the University’s institutional efforts in developing infrastructure for cloud computing, bioinformatics, computational biology, visualization and high-performance computing and networking.

Faculty

**Assistant Professor** P. Calyam**, R. Chadha**, K. Anuarul Hoque

**Assistant Research Professor** H. Aliakbarpour*, F. Bunyak**, S. Prasath*, T. Joshi*

**Associate Teaching Professor** D. Musser*

**Assistant Teaching Professor** F. Wang*

**Associate Professor Emeritus** G. K. Springer**

**Adjunct** F. Esposito, D. Korkin**, G. Seetharaman*, W. Zeng**, Y. S. Zeng

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

- Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BS in Computer Science (p. 529)
- Minor in Computer Science (p. 532)

The Computer Science Program (CSP) in the Electrical Engineering and Computer Science (EECS) Department offers a broad curriculum that spans the theory, design and applications of computing. The Bachelor of Science degree in Computer Science includes a strong component of mathematics and sciences along with more theoretical courses in computer science. A Computer Science minor is available.

Graduate

- MS in Computer Science (p. 532)
- PhD in Computer Science (p. 532)

Introduction

The EECS graduate programs lead to the degrees of Master of Science in Computer Science (MS CS), Computer Engineering (MS CE) and Electrical Engineering (MS EE), Master of Engineering (ME), and Doctor of Philosophy in Computer Science (PhD CS) and Doctor of Philosophy in Electrical and Computer Engineering (PhD ECE). The EECS graduate degree programs prepare prior recipients of four-year BS degrees in Computer Science, Computer Engineering, Electrical Engineering or closely related areas for further study at the doctoral level or for successful careers as specialized computer professionals. The Ph.D. program is a research degree designed to prepare students for various advanced professional careers, including college teaching and research, as well as research and development in leading industrial and government R&D facilities.

The ME degree is designed for entering master students interested in a terminal master’s degree, who have a demonstrated need for a professional, non-research degree in engineering, and have an academic interest in the department.

Application Procedures for CS MS and PhD Programs

In order to be considered for admission in a particular semester we must receive all required paperwork by these deadlines:

Fall admission: Applications and all paperwork must be received by March 1st. NOTE: If applying for financial assistance in the department, applications and all paperwork must be received by January 15th.

Spring admission: Applications and all paperwork must be received by October 1st.

Application for admission involves submitting a formal application through the online application system. An application must be accompanied by an application fee. In addition, the applicant must have the following original paperwork sent directly from the originating institutions to the Office of Graduate Studies:

- Official transcripts from ALL institutions attended
- Official GRE score report from Educational Testing Service in New Jersey (and TOEFL or IELTS scores for international applicants)

The following supplemental materials must be uploaded in the online application:

- Your résumé
- A personal goal statement indicating why you feel prepared to pursue the degree program and why you want to pursue this degree
- Three letters of recommendation from professors who know your abilities that must address your ability and readiness to pursue a graduate program in computer science (submitted by your references directly to your online application)
- Copies (unofficial) of all transcripts
- Copies of GRE results (and TOEFL or IELTS, if applicable).

Current/Former MU students: All current and former MU students must meet the same requirements as external students and file one of the following forms (in lieu of an MU Application Form):

- Current Non-Degree Graduate Students: Change of Division, Degree, Program, Emphasis, or Advisor form,
- Current graduate students in another department: Change of Division, Degree, Program, Emphasis, or Advisor form (same as 1)
- Previous graduate students returning to same program: Re-Activation form.

Degree Completion Requirements

Use the links at the top of the page to direct you to details on the requirements that must be completed in order to earn the respective graduate degrees. The Master of Science degree program has both a thesis and a non-thesis option, which can be chosen by the student after consultation with their selected advisor.

Credit toward a Second Master’s Degree

A student who has completed one Master’s degree at MU or elsewhere may present, upon the recommendation of the student’s advisor and approval by the Director of Graduate Studies and the Graduate School, a maximum of six hours of credit earned in the previous program toward a second Master’s degree.

Master of Engineering Degree

A student may also choose to complete a Master of Engineering (p. 548) degree. The requirements for the ME degree are the same as the MS CS with the following exceptions: 1) the student must complete at least 36 hours of graduate courses, 2) a minimum of 30 credit hours must be earned from UM System institutions, 3) at least 21 hours must be courses offered by the CS Department, 4) at least 15 hours must be 8000 level courses offered by CS Department (excluding CMP_SC 8085 ), 5) CMP_SC 8980 , CMP_SC 8990 and CMP_SC 9990 may not be taken, 6) at most 3 hours of CMP_SC 8085 may be taken, 7) No final examination is required. Only the M1 Program of Study is submitted for this program. Master of Engineering, not Computer Science, is noted on the student’s transcripts. The degree completion letter is tied to meeting the seminar attendance requirement (see M.S. Degree above). Entrance requirements for ME and MS degree are the same.

Financial Aid

Teaching and research assistantships are available on a competitive basis for qualified students in the graduate programs.

Teaching assistantships and research assistantships are available with tuition waivers in the Department. Requests for financial aid are examined at the same time as those for graduate admission, which are due before January 15 for fall semester and October 1 for spring semester.

BS in Computer Science

Degree Program Description

Computer Science emphasizes the study of algorithms, programming methodology, software systems, computational theories and algorithms, computer organization, networking, computer graphics, cyber-security, machine learning, artificial intelligence, high performance computing, and database. In the two-semester capstone design courses, students
complete design projects that serve as a culminating academic experience. Internships with companies for real-world experience and undergraduate research opportunities with faculty are abundant and encouraged. The BS CS degree is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org. Students who complete the BS in Computer Science can work for government agencies, academic institutions, or private industry creating and applying new technologies to solve complex problems, or attend graduate schools.

**Major Program Requirements**

The Bachelor of Science with a major in Computer Science emphasizes the study of software systems, computational theories and algorithms, computer organization, networking, and programming methodology. Students who complete the BS in Computer Science can work for government agencies, academic institutions, or private industry creating and applying new technologies to solve complex problems.

The BS degree requires the completion of the three-semester calculus sequence plus discrete math and statistics. A student who selects an appropriate additional math course as a technical elective and has at least 9 credits in math with appropriate grades at MU can earn a math minor.

The BS degree requires the completion of 126 credits. To graduate, a student must earn a 2.0 GPA or better in all CMP SC/IT courses.

The Engineering Leadership, Engagement & Career Development Academy, W1025 Lafferre Hall, can assist students in searching for employment opportunities upon graduation and for internship/co-op positions.

Course requirements listed here apply to students beginning as regular college freshmen in Fall 2018 or after. A student who started college before Fall 2018 and who has been continuously enrolled as a full-time student may be pursuing the previous program and should contact the department for information on these degree requirements.

In addition to the major core requirements, students must complete all University graduation requirements including University general education (p. 34), as well as all degree and college or school requirements.

**Major Core Requirements**

</tbody>
</table>

Any science sequence courses outside the student's selected sequence.

Any biology, biochemistry, chemistry, geology, or physics courses beyond the levels listed above.

Other science courses pre-approved by the advisor.

### Non-Science Electives

Students must complete 8 hours of non-science electives which include courses in business, education, or additional social, behavioral or humanities courses beyond what is required in those categories.

1 At least 15 credit hours of computer science electives must be numbered above 4000; one of the 4000-level courses must be CMP_SC 4410 or CMP_SC 4450. A maximum of 6 hours of IT courses can be taken as CS electives with the following stipulations: One 3000/4000 level INFOTC course (excluding INFOTC 4400 and INFOTC 4500) can be taken as a CMP_SC elective but it is counted as a lower level (below 4000) CMP_SC course. INFOTC 4400 and INFOTC 4500 are counted as CS 4000 level courses. Students may also take six hours of problems or research courses. ECE 3220 Software Design in C and C++ can count as a lower level CS elective.

2 2000-level or above CMP_SC course or 4000-level MATH course, 2000-level or above engineering courses, MANGMT 3000, FINANC 3000 or other courses that meet prior approval of Computer Science advisor. An INFOTC course at the 2000 level or above can be taken. Students cannot take INFOTC 2810 or INFOTC 2910 as a technical elective if they have already taken CMP_SC 4850.

3 Including one of the two-semester sequences below. At least one of the courses must include a lab. Labs listed separately are not considered a second science course (for example, BIO_SC 1010 and BIO_SC 1020 equal one science course).

### Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

<table>

**Minor in Computer Science**

A minor in computer science is offered through the College of Engineering. To obtain a minor, a student must complete 20 hours of courses approved by the Department of Electrical Engineering and Computer Science. The student must earn a grade of C- or better in each course counting toward the minor (except when the prerequisite for the course is C) and have a 2.0 GPA in all courses counting toward the minor. At least 9 hours must be taken in residence. The following courses are required.

<td></td>
</tr>
</tbody>
</table>

Total Credits 20

---

**MS in Computer Science**

All students completing a master's degree must fulfill the following minimum requirements:

1. The student must earn a minimum of 30 credit hours of computer science (CS) course work approved by the EECS Department. This course work must include at least 15 credit hours of computer science course work numbered 8000 or above (CMP_SC 8990 Research-Masters Thesis Computer Science credit is counted in the required 15 credit hours, but CMP_SC 8980 is not).
2. The overall GPA of course work taken as an enrolled graduate student must be at least 3.0 (out of 4.0).
3. Up to 6 credit hours from courses taken in other departments or from non-CS courses in the EECS Department will be considered for approval as part of a student’s MS program. Written approval from faculty advisors or the Computer Science Director of Graduate Studies is required prior to the student undertaking the coursework. Selected non-CS courses, such as IS_LT 7360 and IS_LT 7370, Intro and Intermediate Web Development, and IS_LT 7310 Seminar in Mobile App Development will not be counted.
4. Non-Thesis Option: In order to complete the non-thesis option, the student must complete an independent project under a faculty advisor approved by the department. This project is carried out by enrolling in CMP_SC 8980 (Non-Thesis Research) for at least one hour of credit. This project is documented and presented to a faculty committee of at least three graduate faculty members and defended in a public defense as part of a final oral examination. The CMP_SC 8980 course grade(s) is/are assigned by the student’s faculty advisor upon the conclusion of the oral examination.
5. Thesis Option: In order to complete the thesis option, the student must complete an independent project under a faculty advisor approved by the department. This project is carried out by enrolling in CMP_SC 8990 (Thesis Research) for at least three hours of credit. A maximum of six credit hours of CMP_SC 8990 can be counted toward the required 30 credit hours for the MS degree program. The thesis project is documented in a formal thesis, presented to a faculty committee of at least three graduate faculty members (one of whom is a faculty member from another department) and defended in a public defense as part of a final oral examination. The CMP_SC 8990 course grade(s) is/are assigned by the student’s faculty advisor upon the conclusion of the oral examination. CMP_SC 8990 is graded on an S/U basis and cannot be used to increase the student’s overall GPA in graduate work. In this option, at most 9 credit hours of Research, Reading, and/or Problem courses (such as CMP_SC 8980, CMP_SC 8990, CMP_SC 8085) can be counted toward the 30-hour MS graduate requirements.

---

**PhD in Computer Science**

All students completing a PhD degree must fulfill the following minimum requirements:

1. Complete all of the computer science (CS) course work requirements of the Master’s degree in CS or have an MS degree in CS from another institution. The required 15 hours at the 8000-level must be regular CS courses, excluding Research or Problems courses. The student must maintain an overall GPA of at least 3.4/4.0 in their graduate level course work (excluding Research and Problems courses).
2. Pass a qualifying examination* to be admitted to candidacy in the CS PhD program within three years of program enrollment.
3. Earn a minimum of 72 credit hours of course work and research past the student’s Bachelor's degree.
4. Pass a comprehensive examination covering their areas of expertise within five years of program enrollment.
5. Complete a doctoral dissertation on a topic approved by the candidate’s advisory committee.
6. Defend the dissertation in a final oral examination.
7. Have at least one journal paper submitted, accepted or published, as approved by the advisor.
8. Present on a research topic as part of the CS Seminar Series at some point between passing the qualifying exam and the dissertation defense. This policy is effective for entering PhD students in Spring 2013 and after.

9. Seminar Attendance: The approval of the D4 form is tied to the attendance records for the department's seminar series. PhD students are required to attend a total of at least twenty EECS Seminar Series presentations. Master's students who add the PhD program can apply their seminar attendance as part of their Master's program toward the attendance requirement for doctoral students.

10. D Forms: After the successful completion of the Qualifying Examination, the D1 Qualifying Exam Results and Doctoral Committee Approval form should be submitted to the Graduate School, followed by the D2 Plan of Study for the Doctoral Degree form. The D3 form Doctoral Comprehensive Examination Results is submitted when the student has completed the Comprehensive Exam. Graduate School policy requires the completion of the Comprehensive Exam within five years of starting the PhD program. At least seven months must pass between the Comp Exam and the dissertation defense, which is followed by submission of the D4 Dissertation Defense form.

11. Annual Review Requirement of the Graduate School: All graduate students are required to complete the Annual Review Requirement by updating their information in the Graduate Student Progress System. The Department requires that this report be approved online by the student’s faculty advisor and a printed copy attached to each D form before being signed by the CS Director of Graduate Studies.

*Students cannot take CMP_SC 9990 before passing the PhD qualifying exam. Pre-Qual students should take CMP_SC 8990 for Research credit.

Electrical and Computer Engineering

Dong Xu and Satish Nair, Interim Chairs EECS

XuDong@missouri.edu
NairS@missouri.edu

Introduction

The Department of Electrical Engineering & Computer Science is one of the academic departments within the College of Engineering at the University of Missouri. It manages two sets of Programs: the Computer Science Program (CSP) and the Electrical & Computer Engineering Program (ECEP). At the undergraduate level, the EECS Department grants three distinct BS degrees including Computer Science (CS), Computer Engineering (CoE) and Electrical Engineering (EE). The CS undergraduate program is accredited by the Computing Accreditation Commission of ABET, while the CoE and EE undergraduate programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. At the graduate level, the EECS Department offers MS degrees in CS, CoE and EE, and PhD degrees in CS and Electrical & Computer Engineering (ECE). EECS is undergoing a new wave of innovation broadly referred to as Internet of Things (IoT) or Internet of Everything (IoE) and cyber-physical systems from wearable biocompatible sensors, low power flexible integrated circuits, hybrid multicore computer architectures and hardware level security to new cryptographic protocols, mobile apps, cloud computing, deep learning, robotics, autonomous systems and smart cities. The four year undergraduate degree program prepares students for rewarding careers in hardware and software systems and lays the foundation for graduate study in the next wave of technological innovation.

The department was established in 1885 (http://missouri.edu/about/history/engineering.php) as the first Electrical Engineering department in the nation, after Thomas Edison helped generate interest in electrical engineering by presenting an electrical dynamo and some incandescent lamps to the University of Missouri in 1882. The EECS department is now home to more than 600 undergraduate students and over 300 graduate students in CS, CoE, EE and ECE, with 40+ faculty members, not including instructors, teaching professors, and emeriti.

About Electrical and Computer Engineering Program

The Electrical and Computer Engineering Program (ECEP) in the Electrical Engineering and Computer Science (EECS) Department is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over $5 million in externally funded research. The ECE Program offers a comprehensive undergraduate curriculum culminating in a capstone project that provides a solid foundation for undergraduate students to pursue rewarding careers in computer and electrical engineering. Students seeking either one of the two undergraduate degrees offered -- Bachelor of Science in Computer Engineering (BS CoE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-computer-engineering-bs) and Bachelor of Science in Electrical Engineering (BS EE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-electrical-engineering) -- are able to pursue dual degrees in related fields including information technology and computer science, as well as in the other degree of the ECEP, i.e. BS EE and BS CoE, respectively. Not to mention majors and minors in other colleges. Students have opportunities to gain in-depth hands-on knowledge in specialized areas through undergraduate research experiences working with faculty. The faculty research areas covers both well established and emerging fields including mobile video communication; wireless and digital communications; satellite remote sensing; geospatial image and video processing; computational neuroscience; systems biology; eldercare technology; computational intelligence, machine learning, pattern recognition, deep networks, fuzzy systems; computer vision; robotic vision; robotic assistive technology; human/robot interaction; landmine detection; pulsed power and plasmatechnology; nuclear and renewable energy systems; semiconductor devices; photonics; accelerators and beams; antennas and radar systems; nano and microelectromechanical systems; bioMEMS; heterostructures, microfabrication; feedback and control systems; parallel processing; computer architecture; autonomous systems; real-time embedded architectures; high performance computing; sensor networks; and human-computer interfaces.

The ECEP in EECS also offers a Dual Bachelor of Science in Electrical Engineering & Physics (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/dual-bachelor-science-electrical-engineering-physics).

At the MS and PhD levels, the ECEP offers the following graduate degrees:
The ECE Program offers undergraduate degrees at the PhD level. Assistantships with faculty are available to fund graduate study especially teaching assistantships with the EECS Department and research available.

A program of study leading to the BS plus MS degrees in CoE or EE is available. For highly motivated undergraduate students a fast-track five-year program within the EECS Department.

Program work closely with faculty in the Computer Science Program of undergraduate and graduate students in the areas of:

- nuclear and renewable energy systems;
- landmine detection;
- human/robot interaction;
- robotic assistive technology;
- human/robot interaction;
- landmine detection;
- pulsed power and plasma technology;
- nuclear and renewable energy systems;
- semiconductor devices;
- photonics;
- accelerators and beams;
- antennas and radar systems;
- nano and microelectromechanical systems;
- bioMEMS;
- heterostructure and microfabrication;

with many more options for dual degrees within the EECS department and outside.

Graduates with BS degrees in CE, EE, CS or closely related areas can choose to pursue advanced study towards the following degrees:

- Master of Science in Computer Engineering (MS) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-computer-engineering)
- Master of Science in Electrical Engineering (MS) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-electrical-engineering)
- Doctoral Degree in Electrical and Computer Engineering (PhD) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/phd-electrical-computer-engineering)

The MS and PhD are professional research degrees designed to prepare students for advanced professional careers, including teaching and research at university level, as well as research and development in industrial, government, and nonprofit organizations.

The ECE Program offers learning and research opportunities for both undergraduate and graduate students in the areas of:

- mobile video communication;
- wireless and digital communications;
- satellite remote sensing;
- geospatial image and video processing;
- computational neuroscience;
- systems biology;
- eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep learning, fuzzy systems;
- computer vision;
- robotic vision;
- robotic assistive technology;
- human/robot interaction;
- landmine detection;
- pulsed power and plasma technology;
- nuclear and renewable energy systems;
- semiconductor devices;
- photonics;
- accelerators and beams;
- antennas and radar systems;
- nano and microelectromechanical systems;
- bioMEMS;
- heterostructure and microfabrication;

with many more options for dual degrees within the EECS department and outside.

Graduates with BS degrees in CE, EE, CS or closely related areas can choose to pursue advanced study towards the following degrees:

- Master of Science in Computer Engineering (MS) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-computer-engineering)
- Master of Science in Electrical Engineering (MS) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-electrical-engineering)
- Doctoral Degree in Electrical and Computer Engineering (PhD) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/phd-electrical-computer-engineering)

The MS and PhD are professional research degrees designed to prepare students for advanced professional careers, including teaching and research at university level, as well as research and development in industrial, government, and nonprofit organizations.

The ECE Program offers learning and research opportunities for both undergraduate and graduate students in the areas of:

- mobile video communication;
- wireless and digital communications;
- satellite remote sensing;
- geospatial image and video processing;
- computational neuroscience;
- systems biology;
- eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep learning, fuzzy systems;
- computer vision;
- robotic vision;
- robotic assistive technology;
- human/robot interaction;
- landmine detection;
- pulsed power and plasma technology;
- nuclear and renewable energy systems;
- semiconductor devices;
- photonics;
- accelerators and beams;
- antennas and radar systems;
- nano and microelectromechanical systems;
- bioMEMS;
- heterostructure and microfabrication;

with many more options for dual degrees within the EECS department and outside.

Graduates with BS degrees in CE, EE, CS or closely related areas can choose to pursue advanced study towards the following degrees:

- Master of Science in Computer Engineering (MS) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-computer-engineering)
- Master of Science in Electrical Engineering (MS) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-electrical-engineering)
- Doctoral Degree in Electrical and Computer Engineering (PhD) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/phd-electrical-computer-engineering)

The MS and PhD are professional research degrees designed to prepare students for advanced professional careers, including teaching and research at university level, as well as research and development in industrial, government, and nonprofit organizations.

The ECE Program offers learning and research opportunities for both undergraduate and graduate students in the areas of:

- mobile video communication;
- wireless and digital communications;
- satellite remote sensing;
- geospatial image and video processing;
- computational neuroscience;
- systems biology;
- eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep learning, fuzzy systems;
- computer vision;
- robotic vision;
- robotic assistive technology;
- human/robot interaction;

- nuclear and renewable energy systems;
- semiconductor devices;
- photonics;
- accelerators and beams;
- antennas and radar systems;
- nano and microelectromechanical systems;
- bioMEMS;
- heterostructure and microfabrication;
• feedback and control systems;
• parallel processing;
• computer architecture;
• autonomous systems;
• real-time embedded architectures;
• high performance computing;
• sensor networks; and
• human-computer interfaces.

Research
The ECEP in EECS is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over $5 million in externally funded research with faculty conducting research in the broad emphasis areas of:

- Communications and Signal Processing (CSP)
- Intelligent Systems and Robotics (ISR)
- Physical and Power Electronics (PPE)
- Applied Physics (AP)
- Systems Modeling and Control (SMC)
- Computer Architecture and Systems (CAS)
- Nano/Micro Technology (NMT)

Faculty
Associate Professor M. Almasri**, G. DeSouza**, T. G. Engel**, T. Han**, J. J. Legarsky**
Assistant Research Professor G. Scott**
Assistant Teaching Professor R. Druce*, L. Rivera*
Associate Professor Emeritus R. W. Leavene Jr.*
Adjunct M. Becchi**, D. Heise, G. K. Hubler*, V. Korampally*, G. Triplett***, A. Zare**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

The Department of Electrical Engineering and Computer Science (EECS) offers both the Bachelor of Science with a major in Electrical Engineering and the Bachelor of Science with a major in Computer Engineering. The undergraduate program in both degrees at the University of Missouri provides students with the requisite fundamentals in either discipline and prepares them for beginning practice in both the traditional and emerging fields of these disciplines. The degree programs are flexible 126-credit structures that provide the fundamentals of engineering, in addition to a thorough coverage of the major specialties within their respective fields. In addition, technical electives allow concentration in selected areas.

See Electrical Engineering (p. 541) and Computer Engineering (p. 520) for details on the undergraduate degree programs.

Graduate
- PhD in Electrical and Computer Engineering (p. 536)

Email: DeSouzaG@missouri.edu
http://engineering.missouri.edu/ece/

The Department also offers an MS in Computer Engineering (p. 525), an MS in Electrical Engineering (p. 546), and the College offers an interdepartmental ME in Engineering with a focus in Computer and Electrical Engineering (p. 548).

Research Areas
The ECE Program in EECS is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over $5 million in expenditures with faculty conducting research in the broad emphasis areas of:

- Communications and Signal Processing (CSP)
- Intelligent Systems and Robotics (ISR)
- Physical and Power Electronics (PPE)
- Applied Physics (AP)
- Systems Modeling and Control (SMC)
- Computer Architecture and Systems (CAS)
- Nano/Micro Technology (NMT)

Specific Topics of Study
- mobile video communication;
- wireless and digital communications;
- satellite remote sensing;
- geospatial image and video processing;
- computational neuroscience;
- systems biology;
- eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep learning, fuzzy systems;
- computer vision;
- robotic vision;
- robotic assistive technology;
- human/robot interaction;
- landmine detection;
• pulsed power and plasma technology;
• nuclear and renewable energy systems;
• semiconductor devices;
• photonics;
• accelerators and beams;
• antennas and radar systems;
• nano and microelectromechanical systems;
• bioMEMS;
• heterostructure and microfabrication;
• feedback and control systems;
• parallel processing;
• computer architecture;
• autonomous systems;
• real-time embedded architectures;
• high performance computing;
• sensor networks; and
• human-computer interfaces.

**Admission Requirements for the PhD Program in ECE**

- GPA from BS or MS
- GRE: Quantitative, Verbal and Analytic scores.
- International students:
  - Computer-based TOEFL, or
  - Paper-based TOEFL, or
  - Internet-based TOEFL, or
  - IELTS exam
- 3 letters of recommendation
- Statement of purpose
- Transcripts

(When registering for the GRE and TOEFL exams, be sure to designate the University of Missouri-Columbia and your program of interest as locations to receive the scores. MU’s Institutional Code for the GRE and TOEFL is: 6875.)

The three letters of recommendation should be from persons familiar with the applicant's engineering or related work. It is required that the recommendation letter use the institutional letterhead or be sent directly from the recommender's institutional e-mail address (not gmail, hotmail, etc.). Similarly, each provided reference must include the person’s institutional e-mail address. Any letters of recommendation or listed reference that does not comply with the above or otherwise look “unofficial” will be disregarded.

Students who don’t meet the above requirements may still be admitted by the GPC if there are mitigating factors. Consideration in doctoral program admissions is given to the applicant's grade trends, experience and maturity, and to the availability of expertise in areas of the applicant's technical interest.

**Outstanding BS students** who meet the following requirements may be accepted directly for advisement in the department's doctoral program:

- Holds the equivalent of a BS degree in electrical or computer engineering
- GRE quantitative score of at least the 90th percentile. The Graduate Committee will also consider the Verbal and Analytic scores.
- For international students, a minimum score of 550 on the paper-based TOEFL, 213 on the computer-based TOEFL, 80 on the internet-based TOEFL, or 5.5 on the IELTS exam
- A 3.5 or better grad point average (A=4.0) in their undergraduate studies
- Submission of three letters of recommendation from persons familiar with the applicant’s engineering or related work
- Submission of a written statement of research interests

Additional information can be obtained from the Graduate Division of the Department of Electrical Engineering and Computer Science, 201 Naka Building, Columbia, MO 65211, or via email: UMCengrECEgradoff@missouri.edu

**Internal Funding**

**Teaching Assistantships**

Teaching assistantships are normally awarded to qualified graduate students with appropriate communication skills who assist faculty members in various phases of instruction. International students may not be appointed to teaching assistantships in their first semester on campus. International students must pass a language screening test at a proper level to be eligible for the TA positions available.

**Research Assistantships**

Research assistantships are granted to students qualified for working with professors on particular research projects. The research assistants are selected by faculty members who have research funds to support graduate students. Therefore, students should contact the faculty members directly for the RA possibility.

**Fellowships**

The department faculty actively pursue funding for selected research fellowships. Available fellowship opportunities can be found by contacting the ECE Graduate Office. Additionally, a limited number of “Teaching Fellows” are awarded annually to outstanding PhD students, particularly for those preparing for academic careers. Details can obtained from the ECE Graduate Office.

**PhD in Electrical and Computer Engineering**

**Admission Contact Information**

349 Engineering Building West
Columbia, MO 65211
(573) 882-4436
Email: umcengrECEgradoff@missouri.edu

The ECE department offers the Doctor of Philosophy in Electrical and Computer Engineering.

**Admission Criteria for the PhD Electrical or Computer Engineering**

Deadline for Fall entrance: February 15
Deadline for Spring entrance: September 1
Students who meet the academic requirements but have degrees in other engineering or science disciplines can be accepted into the PhD program by the Graduate Program Committee (GPC).

Students who don’t meet the above requirements may still be admitted by the GPC if there are mitigating factors. Consideration in doctoral program admissions is given to the applicant’s grade trends, experience and maturity, and to the availability of expertise in areas of the applicant’s technical interest.

Outstanding BS students who meet the following requirements may be accepted directly for advisement in the department’s doctoral program:

• Holds the equivalent of a BS degree in electrical or computer engineering
• GRE quantitative score of at least the 90th percentile
• TOEFL score of at least 550 paper-based. IELTS score: 5.5
• A 3.5 or better grad point average (A=4.0) in their undergraduate studies
• Submission of three letters of recommendation from persons familiar with the applicant’s engineering or related work
• Submission of a statement of research interests

Additional information can be obtained from the Graduate Division of the Department of Electrical and Computer Engineering, 349 Engineering Building West, Columbia, MO 65211, or via email: umcengregradoff@missouri.edu

**Appeal Process**

All students have the right to a timely formal appeal to the GPC. Upon receipt of an admission decision or disciplinary action, the student has 10 working days in which to request a formal appeal. The DGS will convene a meeting of the GPC, the student, and the student’s advocate (if appropriate) within 10 working days of receiving the request. The decision of the GPC at the hearing is final.

**Transfer of Credit**

The doctoral committee may recommend up to 30 hours of post-baccalaureate graduate credit from an accredited university be transferred toward the total hours required for the doctoral degree. It is the responsibility of the doctoral committee to determine the appropriateness of coursework for transfer credit. All requests for exceptions to this policy must be approved by the Office of Graduate Studies. This policy applies to students who begin their enrollment during the Fall term 2006 and subsequent semesters.

(Note: The preceding represents a change in policy and becomes effective for graduate students beginning their doctoral programs during the Fall semester 2006. For students who began their doctoral programs prior to the fall 2006 semester, consult the appropriate catalog or the Office of Graduate Studies for policies pertaining to transfer of credit.)

The committee may recommend that courses taken through MU’s Extension division be counted toward the credit hour requirement. Extension or correspondence course work from institutions other than MU may not be used to meet the total hours required for the doctoral degree.

**Time Limits on Transfer Credits**

All courses to be applied to the plan of study must be completed within 8 years of filing the plan.
Requirements to obtain the PhD degree in Electrical Engineering and Computer Engineering

1. The student must be qualified to be a PhD candidate. Students admitted with an MS degree must prove competency in a written qualifying examination conducted by a PhD qualifying committee within 3 semesters of admission.

Students admitted directly from a BS degree program must complete the 24 hours of graded coursework requirements of the MS degree during the first two years of their program. This will prepare them for the PhD qualifying examination process, to be passed within 4 semesters after this requirement is satisfied, and will allow them to obtain an MS degree if a thesis or project report is completed and defended, consistent with MS requirements, or to obtain an ME degree once the course work requirement has been satisfied. A student may petition the faculty for an extension of the two year requirement.

2. A minimum of 72 semester hours beyond the BS are required by the Graduate School; the student's doctoral program committee sets the total number of credit hours and specific courses to be completed as part of his/her PhD program. However, the Graduate School requires a minimum of 15 hours of 8000/9000 level classes to be taken at MU exclusive of research, problems, and supervised study.

3. The candidate must pass a written and oral comprehensive examination.

4. The student must complete a doctoral dissertation on a topic approved by his or her Doctoral Advisory Committee and defend the dissertation in an oral final examination.

These PhD requirements apply to ECE graduate students first enrolled in MU ECE in the Fall semester 2007 or later. UM ECE graduate students enrolled prior to Fall semester 2007 may choose to follow the MU ECE PhD requirements that were in effect for their MU ECE graduate admission semester.

Selection of an Advisor

The student selects an advisor or co-advisors, by mutual consent, from doctoral faculty members who are dissertation supervisors in the department or area program in which the major work is planned. In the event that an advisor retires or leaves MU, he/she may continue to serve as a student’s advisor unless there is written academic program policy prohibiting such an arrangement. If an advisor is unable or unwilling to continue to serve, the academic program, with the leadership of the director of graduate studies, will assist to ensure that a replacement is found.

Doctoral Degree Forms

By the end of the second semester of study at MU, a student should begin submitting degree program forms which will aid the academic program and the Graduate School in tracking the student's progress toward degree completion. These forms include the following:

- D1 Qualifying Exam Results & Doctoral Committee Approval (http://gradstudies.missouri.edu/forms-downloads/repository/d1.pdf)
  Submitted after passing qualifying exams

- D2 Plan of Study Form (http://gradstudies.missouri.edu/forms-downloads/repository/d2.pdf)
  Submitted no later than the end of the student’s third semester.

- D3 Result of the Comprehensive Examination (http://gradstudies.missouri.edu/forms-downloads/repository/d3.pdf)
  Submitted to the Graduate School within one month of exam completion

  Submitted by the Graduate School deadline for the semester in which the students plan to graduate.

- Change of Committee (http://gradstudies.missouri.edu/forms-downloads/repository/cocform.pdf)
- Plan of Study Course Substitution Form (http://gradstudies.missouri.edu/forms-downloads/repository/subform.pdf)

More information is available at: http://gradstudies.missouri.edu/academics/graduation-requirements/doctoral-grad-requirements.php

Qualifying Examination/Process

To be officially admitted to the PhD program, the student must pass a qualifying examination/process. The student is given two opportunities to pass the Qualifying Examination with a score of 70% or above.

Qualifying Exam Rules

1. To be eligible to take the Qualifying Examination, graduate students must be accepted for advisement in the Ph.D. program. The examination must be passed before the end of his or her second year of advisement as a Ph.D. student. Each student may take the exam twice. Students who have been accepted into the PhD program with a BS degree must complete the 24 hours of graded coursework requirements of the MS degree during the first two years of their program. This will prepare them for the PhD qualifying examination process, to be passed within two years after the requirement is satisfied, and will allow them to obtain an MS degree if a thesis or project report is completed and defended, consistent with the MS requirements, or to obtain an ME degree once the course work requirement has been satisfied. A student may petition the faculty for an extension of the two year requirement.

2. All eligible students who intend to take the exam must complete the REQUEST FOR QUALIFYING EXAMINATION form and submit it to the ECE Graduate Office within four weeks after the start of the semester. At this time the student will be asked to select two of the seven topic areas over which he or she wishes to be examined. Only students on the approved lists will be allowed to take the exam. When a student submits the REQUEST FOR QUALIFYING EXAMINATION form, the Graduate Office will provide:
   a. The date, time and place of the examination;
   b. A reminder to bring their ID card to the exam.
   c. A copy of the Qualifying Examination Rules.
   d. A copy of the Guidelines For Qualifying Exam Committee.

3. The examination shall be prepared and administered during the 12th week of both the fall and winter semesters by the Qualifying Examination (QE) Committee. The ECE Graduate Committee currently serves as the QE Committee since it contains a representative from each of the 6 focus areas in the department. The Graduate Director will select the specific date, time and place of the exam at the beginning of each semester.
4. It shall be a written examination taken by all students desiring to qualify during the given semester.

5. The exam will contain five questions from each of the two areas selected by the student. Each student must select and answer five questions from this set, with no more than three questions from one area. The exam will be closed book, with two standard pages of notes, front and back, allowed. A book of mathematical tables will be provided by the department. The exam will last four hours.

6. The QE committee shall administer the examination and identify passing candidates. The ECE faculty as a whole have the responsibility to approve that action.

Qualifying Examination Guidelines

These guidelines have been prepared to help maintain consistency in the form and difficulty of the Department’s qualifying examination.

1. The QE Committee shall consist of one faculty representative from each of the following topic areas, except Foundations:
   a. Communications and Signal Processing Area;
   b. Intelligent Systems Area;
   c. Physical and Power Electronics Area;
   d. System Modeling and Control;
   e. Micro/Nano Electronics;
   f. Digital/Computer Systems; and
   g. Applied Physics
   h. Foundations

2. The ECE graduate Committee serves as the QE Committee since it contains a representative from each research area. The ECE department chair appoints the Graduate Committee with input from the Graduate Director.

3. The faculty from each topic area will be responsible for maintaining a list of topics which constitute the core material an MS graduate should be expected to have mastered. The members of each group will be responsible for preparing questions for the exam covering topics from the list. For the major core focus area, questions will come from 4000/7000 – 8000 level courses. Questions for the topics in the Foundation area will be from a set of required 3000 level courses.

4. The QE Committee will solicit questions from the faculty group, but the Committee will have the responsibility of combining these questions into a fair, comprehensive exam. The QE Committee member for each group will be responsible for coordinating his or her group. The representatives of each topic group shall call a meeting of all faculty from that group for the purpose of reviewing the exam questions to be submitted to the Qualifying Exam Committee. The group’s submission must be approved by a majority vote of those present.

5. Solutions will be graded by faculty members who prepared the questions. The grading must be completed within two weeks after the exam. A guideline is that each question should be doable by a strong MS graduate in 40 to 45 minutes.

6. Solutions will be graded on a 100 point scale with 70 points as a minimum passing grade.

7. Each student’s performance will be reviewed by the QE Committee and a majority vote of the QE Committee is required for passing.

8. The QE Committee must report the results of the exam to the ECE Faculty within four weeks of the exam.

Introduction

The Department of Electrical Engineering & Computer Science is one of the academic departments within the College of Engineering at the University of Missouri. It manages two sets of Programs: the Computer Science Program (CSP) and the Electrical & Computer Engineering Program (ECEP). At the undergraduate level, the EECS Department grants three distinct BS degrees including Computer Science (CS), Computer Engineering (CoE) and Electrical Engineering (EE). The CS undergraduate program is accredited by the Computing Accreditation Commission of ABET, while the CoE and EE undergraduate programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. At the graduate level, the EECS Department offers MS degrees in CS, CoE and EE, and PhD degrees in CS and Electrical & Computer Engineering (ECE). EECS is undergoing a new wave of innovation broadly referred to as Internet of Things (IoT) or Internet of Everything (IoE) and cyber-physical systems from wearable biocompatible sensors, low power flexible integrated circuits, hybrid multicore computer architectures, and hardware level security to new cryptographic protocols, mobile apps, cloud computing, deep learning, robotics, autonomous systems and smart cities. The four year undergraduate degree program prepares students for rewarding careers in hardware and software systems and lays the foundation for graduate study in the next wave of technological innovation.

The department was established in 1885 (http://missouri.edu/about/history/engineering.php) as the first Electrical Engineering department in the nation, after Thomas Edison helped generate interest in electrical engineering by presenting an electrical dynamo and some incandescent lamps to the University of Missouri in 1882. The EECS department is now home to more than 600 undergraduate students and over 300 graduate students in CS, CoE, EE and ECE, with 35 faculty members (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/eecs-faculty), not including instructors, teaching professors, and emeriti.

About the Electrical and Computer Engineering Program

The Electrical and Computer Engineering Program (ECEP) in the Electrical Engineering and Computer Science (EECS) Department is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over $5 million in externally funded research. The ECE Program offers a comprehensive undergraduate curriculum culminating in a capstone project that provides a solid foundation for undergraduate students to pursue rewarding careers in electrical and computer engineering. Students seeking either one of the two undergraduate
degrees offered -- Bachelor of Science in Computer Engineering (BS CoE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-computer-engineering-bs) and Bachelor of Science in Electrical Engineering (BS EE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-electrical-engineering) -- are able to pursue dual degrees in related fields including information technology and computer science, as well as in the other degree of the ECEP, i.e. BS EE and BS CoE, respectively, along with majors and minors in other Colleges. Students have opportunities to gain in-depth hands-on knowledge in specialized areas through undergraduate research experience working with faculty. Faculty research areas cover both well established and emerging fields including mobile video communication; wireless and digital communications; satellite remote sensing; geospatial image and video processing; computational neuroscience; systems biology; eldercare technology; computational intelligence, machine learning, pattern recognition, deep learning, fuzzy systems; computer vision; robotic vision; robotic assistive technology; human/robot interaction; landmine detection; pulsed power and plasma technology; nuclear and renewable energy systems; semiconductor devices; photonics; accelerators and beams; antennas and radar systems; nano and microelectromechanical systems; bioMEMS; heterostructures, microfabrication; feedback and control systems; parallel processing; computer architecture; autonomous systems; real-time embedded architectures; high performance computing; sensor networks; and human-computer interfaces.

The ECEP in EECS also offers a Dual Bachelor of Science in Electrical Engineering & Physics (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/dual-bachelor-science-electrical-engineering-physics).

At the MS and PhD levels, the ECEP offers the following graduate degrees:

- Master of Science in Computer Engineering (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-computer-engineering)
- Master of Science in Electrical Engineering (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-electrical-engineering)
- Doctoral Degree in Electrical and Computer Engineering (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/phd-electrical-computer-engineering)

with options for dual Masters and the Masters in Engineering (ME) which is coursework only, without thesis. The graduate degree programs prepare graduates of four-year BS degrees in Electrical Engineering, Computer Engineering, and Computer Science or closely allied fields for further study at the doctoral level or for successful careers as specialized EE and CoE professionals in emerging fields. The PhD program is a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well as research and development in industrial, government, and nonprofit organizations. Specialized training, state-of-the-art technology, innovation and entrepreneurship experience is available through close interaction with faculty in their respective fields of research expertise.

The faculty members in the ECE Program participate in the full spectrum of undergraduate and graduate education. Graduate education, has a strong innovation component with faculty initiated research projects funded by the federal government, state government and industry, and is often interdisciplinary in nature spanning interdepartmental and cross-college research. The aim is to produce professionals who can function well as part of interdisciplinary research teams. Close integration of research with education is a constant goal in the department’s graduate programs. It emphasizes in-depth studies that can also be tailored to fit graduate students’ individual interests. Additionally, members of the ECEP are among the leading faculty in University’s Research Revenue, with major research projects funded by both federal agencies and industry including the National Science Foundation (NSF), National Institute of Health (NIH), National Geospatial-Intelligence Agency (NGA), Department of Energy (DoE), and Department of Defense (DoD) as well as Microsoft, Honeywell and Monsanto, to cite just a few.

Research facilities are well established around faculty expertise in the broad emphasis areas of Communications and Signal Processing (SP), Intelligent Systems and Robotics (ISR), Physical and Power Electronics (PPE), Applied Physics (AP), Systems Modeling and Control (SMC), Computer Architecture and Systems (CAS), Nano/Micro Technology (NMT). Faculty in the Electrical and Computer Engineering Program work closely with faculty in the Computer Science Program within the EECS Department.

For highly motivated undergraduate students a fast-track five year program of study leading to the BS plus MS degrees in CoE or EE is available.

Teaching assistantships with the EECS Department and research assistantships with faculty are available to fund graduate study especially at the PhD level.

**Summary**

The ECE Program offers undergrad degrees:

- Bachelor of Science in Computer Engineering (BS CoE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-computer-engineering-bs)
- Bachelor of Science in Electrical Engineering (BS EE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-electrical-engineering)
- Dual Bachelor of Science in Electrical Engineering & Physics (http://engineering.missouri.edu/eece/degree-programs/bs-eep)

with many more options for dual degrees within the EECS department and outside.

Graduates with BS degrees in CoE, EE, CS or closely related areas can choose to pursue advanced study towards the following degrees:

- Master of Science in Computer Engineering (MS) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-computer-engineering)
- Master of Science in Electrical Engineering (MS) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-electrical-engineering)
- Doctoral Degree in Electrical and Computer Engineering (PhD) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/phd-electrical-computer-engineering)

The MS and PhD are professional research degrees designed to prepare students for advanced professional careers, including teaching and research at university level, as well as research and development in industrial, government, and nonprofit organizations.
The ECE Program offers learning and research opportunities for both undergraduate and graduate students in the areas of:

- mobile video communication;
- wireless and digital communications;
- satellite remote sensing;
- geospatial image and video processing;
- computational neuroscience;
- systems biology;
- eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep learning, fuzzy systems;
- computer vision;
- robotic vision;
- robotic assistive technology;
- human/robot interaction;
- landmine detection;
- pulsed power and plasma technology;
- nuclear and renewable energy systems;
- semiconductor devices;
- photonics;
- accelerators and beams;
- antennas and radar systems;
- nano and microelectromechanical systems;
- bioMEMS;
- heterostructure and microfabrication;
- feedback and control systems;
- parallel processing;
- computer architecture;
- autonomous systems;
- real-time embedded architectures;
- high performance computing;
- sensor networks; and
- human-computer interfaces.

Research

The ECEP in EECS is the most research-active program among all programs and units in the College of Engineering at the University of Missouri, with over $5 million in expenditures with faculty conducting research in the broad emphasis areas of:

- Communications and Signal Processing (CSP)
- Intelligent Systems and Robotics (ISR)
- Physical and Power Electronics (PPE)
- Applied Physics (AP)
- Systems Modeling and Control (SMC)
- Computer Architecture and Systems (CAS)
- Nano/Micro Technology (NMT)

Faculty

Assistant Professor M. Almasri**, G. DeSouza**, T. G. Engel**, T. Han**, J. J. Legarsky**

Assistant Research Professor G. Scott**

Assistant Teaching Professor R. Druce*, L. Rivera*

Associate Professor Emeritus R. W. Leavene Jr.*

Adjunct M. Becchi**, D. Heise, G. K. Hubler*, V. Korampally*, G. Triplett**, A. Zare**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

beattyt@missouri.edu

The Department of Electrical Engineering and Computer Science (EECS) offers both the Bachelor of Science with a major in Electrical Engineering and the Bachelor of Science with a major in Computer Engineering. The undergraduate program in both degrees at the University of Missouri provides students with the requisite fundamentals in either discipline and prepares them for beginning practice in both the traditional and emerging fields of these disciplines. The degree programs are flexible 126-credit structures that provide the fundamentals of engineering, in addition to a thorough coverage of the major specialties within their respective fields. In addition, technical electives allow concentration in selected areas.

The EECS department emphasizes close interaction with industry. Industry engineers visit regularly and industry-sponsored student projects are provided to give extra dimension to the program.

Many students in the EECS department combine the electrical engineering major with the computer engineering major in a special 138-credit program. These students receive both the BS EE and BS CoE degrees.

Students interested in interdisciplinary studies may use some electives to study business, premedicine, prelaw, and other areas. Students are able to choose from a wide variety of courses offered by other departments in the College of Engineering, as well as from other MU colleges, taking advantage of the multidisciplinary nature of the campus.

The current educational objectives of the electrical engineering program are:

- Graduates will meet or exceed the expectations of their employers
- Qualified graduates will pursue advanced study if desired
- Graduates will pursue leadership positions in their profession and/or communities

The current educational objectives of the computer engineering program are:
Both the Bachelor of Science in Electrical Engineering (BS EE) and the Bachelor of Science in Computer Engineering (BS CoE) require that students earn a 2.0 GPA or better in all courses that have an MU engineering prefix. All ECE courses require a grade of C or better in ECE prerequisites.

Engineering design in both the electrical engineering and computer engineering programs is provided through an integrated laboratory structure. Beginning with the first laboratory course in the fourth semester of each program, students have a significant design and laboratory experience in each semester of their respective programs.

In addition to the major core requirements, students must complete all University graduation requirements including University general education, as well as all degree and college or school requirements.

**Electrical and Computer Engineering (ECE) Honors Program**

The ECE Honors Program follows the general rules and philosophy of the College of Engineering Honors Program. Students may enter the program from the beginning of the junior year and must have a GPA of 3.0/4.0 at the start. Eligible students participate in the program by enrolling in ECE 4995 Undergraduate Honors Research in Electrical Computer Engineering for one to three credit hours, which replaces an equivalent number of hours of ECE technical electives.

The heart of the program is a research or advanced design project culminating in an undergraduate honors thesis. The project is conducted under the supervision of the honors advisor, who is an ECE faculty member selected by mutual agreement between the student and the professor. Satisfactory completion of the project requires approval (signatures) of the honors thesis by both the honors advisor and an additional faculty member, who serves as second reader of the thesis. Students who complete the program and graduate with a GPA of at least 3.0 receive the designation “Honors Scholar in Engineering” at graduation and on their diploma.

Another valuable feature of the Honors Program is that participants may reduce the number of credit hours required for degree completion to the University minimum of 120 by substituting up to six hours of credit from graduate courses through dual (undergraduate/graduate) enrollment during the last four semesters of the undergraduate program and after completion of the honors project.

**Graduate**

Phone: (573) 882-5579

Email: DeSouzaG@missouri.edu
http://engineering.missouri.edu/ece/

The Department also offers a PhD in Electrical and Computer Engineering (p. 536), and the College of Engineering offers an interdepartmental ME in Engineering with a focus in Computer or Electrical Engineering (p. 548).

**Research Areas**

The ECE Program in EECS is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over $5 million in expenditures with faculty conducting research in the broad emphasis areas of:

- Communications and Signal Processing (CSP)
- Intelligent Systems and Robotics (ISR)
- Physical and Power Electronics (PPE)
- Applied Physics (AP)
- Systems Modeling and Control (SMC)
- Computer Architecture and Systems (CAS)
- Nano/Micro Technology (NMT)

**Specific Topics of Study**

- mobile video communication;
- wireless and digital communications;
- satellite remote sensing;
- geospatial image and video processing;
- computational neuroscience;
- systems biology;
- eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep networks, fuzzy systems;
- computer vision;
- robotic vision;
- robotic assistive technology;
- human/robot interaction;
- landmine detection;
- pulsed power and plasma technology;
- nuclear and renewable energy systems;
- semiconductor devices;
- photonics;
- accelerators and beams;
- antennas and radar systems;
- nano and microelectromechanical systems;
- bioMEMS;
- heterostructure and microfabrication;
- feedback and control systems;
- parallel processing;
- computer architecture;
- autonomous systems;
- real-time embedded architectures;
- high performance computing;
- sensor networks; and
- human-computer interfaces.
Admission Requirements for the MS and ME Programs in EE or CE

- GPA from BS program
- GRE: Quantitative, Verbal and Analytic scores.
- International students:
  - Computer-based TOEFL, or
  - Paper-based TOEFL, or
  - Internet-based TOEFL, or
  - IELTS exam
- 3 letters of recommendation
- Statement of purpose
- Transcripts

(When registering for the GRE and TOEFL exams, be sure to designate the University of Missouri-Columbia and your program of interest as locations to receive the scores. MU’s Institutional Code for the GRE and TOEFL is: 6875.)

In addition to the Graduate School requirements, the ECE programs have the following additional requirements:

The three letters of recommendation should be from persons familiar with the applicant’s engineering or related work. It is required that the recommendation letter use the institutional letterhead or be sent directly from the recommender’s institutional e-mail address (not gmail, hotmail, etc.). Similarly, each provided reference must include the person’s institutional e-mail address. Any letters of recommendation or listed reference that does not comply with the above or otherwise look ‘unofficial’ will be disregarded.

To be accepted outright by the Director of Graduate Studies in ECE (DGS-ECE), the student needs to have a BS degree in either Electrical Engineering or Computer Engineering in addition to meeting the above requirements.

Students who meet the academic requirements but have degrees in other Engineering or Science disciplines can be accepted directly into the MS/ME programs by the Graduate Program Committee in ECE (GPC-ECE).

Such students are strongly encouraged to consult with the DGS-ECE or their advisor about appropriate bridge courses. Based on individual circumstances, students may be advised to register as an undeclared graduate student to fill in background course work prior to admission into the department.

Students who don’t meet the above requirements may still be admitted on Probation by the GPC if there are mitigating factors. Students admitted on Probation must receive at least a 3.0 GPA for the first 12 hours of graded graduate coursework completed in their first two semesters.

Failure to achieve this GPA will result in expulsion from the ECE MS/ME program.

Fast Tracking

In an effort to streamline and accelerate the acquisition of MU graduate degree(s) we establish fast tracking options for our current undergraduate students and our 3+2 students. For MU undergraduate students, the fast track option allows them to become integrated into the research environment of the EECS department early in their career and to earn between 6 and 12 hours of graduate credit as their schedules allow. For these qualified graduate school bound students, we will waive the GRE requirement and give them preference in TA and RA positions. For the 3+2 students who demonstrate excellence in their first semester of ECE course work at MU, we will waive the GRE and provide up to 12 hours of graduate credit prior to entry into one of the ECE graduate programs. The summary follows.

MU BS students (all relevant majors)

- GPA > 3.0 after junior year
- Waive GRE requirement for admission to ECE graduate programs
- Use 6 hours of 126 for graduate credit (after 90 credit hours have been earned)
- Earn 6 additional hours of graduate credit as schedule allows (after 90 credit hours have been earned)
- Participate in Undergraduate Research at least one semester
- Participate in Honors Scholars’ Program

International or Domestic 3 + 2 students

- GPA from Home institution (last 60 hours) > 3.2
- MU GPA in at least 12 hours of ECE courses >= 3.5
- Waive GRE requirement for admission
- Take up to 12 hours as dual enrolled student (second semester of first year)

Internal Funding

Teaching Assistantships

Teaching assistantships are normally awarded to qualified graduate students with appropriate communication skills who assist faculty members in various phases of instruction. International students may not be appointed to teaching assistantships in their first semester on campus. International students must pass a language screening test at a proper level to be eligible for the TA positions available.

Research Assistantships

Research assistantships are granted to students qualified for working with professors on particular research projects. The research assistants are selected by faculty members who have research funds to support graduate students. Therefore, students should contact the faculty members directly for the RA possibility.

Fellowships

The department faculty actively pursue funding for selected research fellowships. Available fellowship opportunities can be found by contacting the ECE Graduate Office. Additionally, a limited number of “Teaching Fellows” are awarded annually to outstanding PhD students, particularly for those preparing for academic careers. Details can be obtained from the ECE Graduate Office.

BSEE in Electrical Engineering

Degree Program Description

The Bachelor of Science in Electrical Engineering allows student to learn about electrical power generation, communication systems, instrumentation, circuit design and microprocessor design. Students have the opportunity to gain hands on experience as well as research experience and the opportunity to develop new products.
Major Program Requirements

The electrical engineering degree offers course work in all traditional areas of the electrical engineering field. Focused areas of work are offered in the areas of communications, digital systems, discrete and integrated electronics, electromagnetics, energy systems and power electronics, robotics and system control. (Focus areas are not listed on transcripts or diplomas).

Students must complete all university requirements (p. 33), including general education (p. 34), and degree requirements below.

Total Credits: 126
Double Major
Electrical Engineering and Computer Engineering

Many students in the EECS department combine the BS in Electrical Engineering with the BS in Computer Engineering in a special 138-credit program. These students receive both the BS EE and BS CoE degrees.

MS in Electrical Engineering

Master of Science in Electrical or Computer Engineering (MS)

Admission

349 Engineering Building West, Columbia, MO 65211
Phone: (573) 882-4436
Email: umcengrecegradoff@missouri.edu
http://engineering.missouri.edu/ece/

Admission Criteria

Fall deadline: February 15
Spring deadline: September 1
Note: Applications received after these deadlines will be evaluated as
• Minimum GPA: 3.0 for the last 60 hours
• Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>

Required Application Materials:
• Statement of Purpose (upload to the Supplemental information section of the application)
• Copies of your official transcripts (upload to the Educational History section of the application)
• Copies of your GRE scores (upload to the Test Information section of the application)
• Copies of your TOEFL or IELTS Scores (for non-native English speakers only) (upload to the Test Information section of the application)
• 3 letters of Recommendation (the department accepts electronic recommendations – in the recommendation section of the online application, enter the information for three recommenders. Each recommender will receive an email with instructions on how to complete the recommendation). The department does also accept hard copy letters of recommendation. The letters may be mailed to: Office of Graduate Studies, 210 Jesse Hall, Columbia, MO 65211.

To the Office of Graduate Studies:
Official Transcripts. The mailing address is: Office of Graduate Studies, 210 Jesse Hall, Columbia, MO 65211.

Note: when registering for GRE or TOEFL exams, be sure to designate your program of interest at the University of Missouri – Columbia. MU’s Institutional Code is 6875 (no departmental code is necessary).

Admissions Criteria for the MS in Electrical or Computer Engineering

To be accepted outright by the director of graduate studies (DGS), the student needs to have a BS degree in either Electrical Engineering or Computer Engineering in addition to meeting the above requirements. Students who meet the academic requirements but have degrees in other engineering or science disciplines can be accepted directly into the MS program by the graduate program committee (GPC). Such students are strongly encouraged to consult with the DGS or their advisor about appropriate bridge courses. Based on individual circumstances, students may be advised to register as an undeclared graduate student to fill in background course work prior to admission into the department.

Students who do not meet the above requirements may still be admitted on probation by the GPC if there are mitigating factors. Students admitted on probation must receive at least a 3.0 GPA for the first 12 hours of graded graduate coursework completed in their first two semesters. Failure to achieve this GPA will result in expulsion from the ECE MS program.

Appeal Process

All students have the right to a timely formal appeal to the GPC. Upon receipt of an admission decision or disciplinary action, the student has 10 working days in which to request a formal appeal. The DGS will convene a meeting of the GPC, the student, and the student’s advocate (if appropriate) within 10 working days of receiving the request. The decision of the GPC at the hearing is final.

Degree Requirements

To fulfill the requirements for the MS degree, the following rules apply:
• A candidate must complete 30 hours, including at least 12 hours of 8000-level graded course work (exclusive of ECE 8990 or ECE 8085 or ECE 8010 hours).
• At least six of these graded 8000 level course hours need to come from ECE.
• At least 15 hours of graded course work (total combination of 7000 and 8000 level courses, exclusive of ECE 8990, ECE 8085, or ECE 8010 hours) must be taken from the Electrical and Computer Engineering Department course offerings.
• A maximum of six hours of graduate credit may be transferred from another campus in the University of Missouri System or other university, while a maximum of eight hours of graduate credit may be used from a previous MU master’s degree.
• At most, three hours of course work in supervised study (ECE 8010) may be taken during the MS program and they will be graded on an S/U basis.
• At least one course from each of three different emphasis areas must be taken; a minimum of two of the emphasis areas must be in Electrical and Computer Engineering. (Each ECE graduate course is designated to an emphasis area. Contact the ECE graduate office for a current list).
• A minimum of 3 hours to a maximum of 6 hours of research (ECE 8990) or problems (ECE 8085) are required, based on whether the student writes a master’s thesis or a master’s Report.
• The student’s cumulative GPA must be at least 3.0 to graduate.

The requirements for the MS degree must be met within an eight year period. Each candidate must pass a final oral examination to demonstrate mastery of the work included in the thesis or in a substantial independent project. These MS requirements apply to ECE graduate students first enrolled in MU ECE in the Fall semester 2007 or later. UM ECE graduate students enrolled prior to Fall semester 2007 may choose to follow the MU ECE MS requirements that were in effect for their MU ECE graduate admission semester.

Academic Probation

A student whose GPA drops below 3.0 is automatically placed on academic probation. In such a case, the student has one semester to raise his or her cumulative GPA to 3.0. Failure to do so will result in expulsion from the program. Additionally, a student who receives the grade of “C” in 9 hours of coursework will be expelled. As with acceptance, students here also have a right to the same formal appeal process described above.

Selection of an Advisor

Students must choose an academic advisor who will then provide guidance for the selection of coursework, and in the choice and execution of a research question. The student’s academic advisor and the Director of Graduate Studies must approve all coursework used to satisfy the credit hour requirements for this degree. After performing satisfactorily for a minimum of one semester, the student, with the advisor’s assistance, completes the Program of Study form that outlines the plan of study for the student’s graduate program. M1 - Program of Study form

The form is forwarded through the DGS to the Office of Graduate Studies for approval. In the event that an advisor retires or leaves MU, he/she may continue to serve as the student’s main advisor unless there is written academic program policy prohibiting such an arrangement. If an advisor is unable or unwilling to continue to serve, the academic program, with the leadership of the DGS, will assist the student to ensure that a replacement is found.

The Program of Study form must be filed with the Office of Graduate Studies by the end of the student’s second semester of enrollment. Upon approval of the program by the Office of Graduate Studies, the student is a candidate for the degree. If changes must be made on a student’s Program of Study form, a Program of Study Substitution form is used.

Thesis Option

For students under the thesis option of the MS degree, i.e., students enrolling for ECE 8990, an M-2 Request for Thesis Committee form is required to be submitted for approval by the department DGS and the Office of Graduate Studies by the end of the student’s second semester. A thesis committee is composed of three members of the MU faculty; a major advisor from the academic program, a second reader from the academic program, and an outside reader who is a member of the graduate faculty from a different MU graduate program. Upon approval of the department DGS, the student may petition the Office of Graduate Studies to allow a person who is not a member of the MU graduate faculty to serve as the third reader. The petition should include a written justification for such a request and a copy of the person’s curriculum vitae. The Office of Graduate Studies maintains copies of curriculum vitae previously received and approved, and if such a request is anticipated, the student should contact the Office of Graduate Studies to see if the curriculum vita of a particular person is already on file. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date.

Information about submitting the thesis can be found in the Thesis and Dissertation Guidelines.

Non-Thesis Option

For students who enroll in ECE 8085 (Problems), a problem report rather than a thesis is required. The student is not required to submit the M-2 form (request for a thesis committee). Instead, the student must have the report approved by his or her advisor and two other members of the graduate faculty, forming the student’s Problem Committee. It is not required that a member outside of ECE be included, although it is permissible for such a member of the MU graduate faculty to be appointed. At least one of the three members must have a primary academic appointment in ECE. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date. At that time, an announcement is to be made to the department faculty and graduate students to allow them to attend the defense. The student must defend the problem report to the committee, and make any needed adjustments in format and corrections/clarifications based on input from the committee. A final copy of the problem report must be filed with the ECE graduate office.

Report of the Master’s Examining Committee

The purpose of the M-3 Report of the Master’s Examining Committee Form is to have an official record of the final examining process, whether it is a thesis defense or presentation of a report. The student’s committee will indicate on this form if the student has passed the final exam. This form must be submitted to the Office of Graduate Studies by a deadline for the semester in which the students plan to graduate. For a report option, the 3rd reader of the committee may be from the student’s department. The form is due in the Office of Graduate Studies two weeks prior to graduation.

Engineering

Programs in Engineering are multi-department programs, and administered by the College of Engineering. Requirements are determined based on the specific area of interest. Options include a minor at the undergraduate level, and a master’s degree at the graduate level.

College of Engineering
W1024 Lafferre Hall
Columbia, MO 65211
http://engineering.missouri.edu
Faculty

Please see the appropriate degree program pages for faculty information.

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• Minor in Engineering (p. 548)

Graduate

• ME in Engineering (p. 548)

The College of Engineering offers the Master of Engineering degree for graduate students interested in a terminal master's degree, who have demonstrated need for a professional, non-research degree in engineering, and have an academic interest in a specific focus area within engineering.

Several departments in the College of Engineering administer an ME degree focusing in that area.

Note: A focus area is not listed on the MU transcript. Hence the transcript and the diploma for any student completing an ME degree will only indicate Master of Engineering, without designation of any specific department.

Minor in Engineering

The minor in engineering is designed for students majoring in disciplines such as physics, math, chemistry and computer science, but it is available to students in all disciplines. It consists of 18 or 19 hours of engineering courses as listed below.

Required Courses

ME in Engineering

NOTE: Focus areas do not appear on diplomas or transcripts.

ME with a focus in Biological Engineering

Recognizing the immense promise of bioengineering and the unique position of MU for a strong bioengineering program, the College of Agriculture, Food and Natural Resources (CAFNR) and the College of Engineering (CoE) joined forces to form the Department of Biological Engineering (BE). BE unites existing faculty and infrastructure from both colleges. CoE contributes biomedical engineering capabilities while CAFNR brings strengths in bioprocess and bioenvironmental engineering. Biological Engineering confers both masters and doctoral degrees to students who satisfy the general requirements of the Graduate School and the specific requirements for the masters degree and the doctoral degree of the Department of Biological Engineering.

ME with a focus in either Electrical or Computer Engineering

The ME degree is designed for entering master students interested in a terminal master’s degree, who have demonstrated need for a professional, non research degree in engineering, and have an academic interest in the department. Please note that the official University transcript and diploma will only indicate Master of Engineering, with no designation of any specific area. The entrance requirements for the ME degree/Electrical and Computer Engineering Focus are the same as for the MS in Electrical Engineering and MS in Computer Engineering. Note: When registering for the GRE and TOEFL exams, be sure to designate the University of Missouri-Columbia and your program of interest as locations to receive the scores. MU’s Institutional Code for the GRE and TOEFL is: 6875.

ME with a focus in Industrial and Manufacturing Systems Engineering

The Master of Engineering (ME) degree is a non-research thirty-six-credit-hour program for U.S. students designed to be a terminal degree. Of these 36 credits, 21 must be at the 8000 level and the rest at 7000 or above level.

ME Entrance requirements

• GPA of 3.0 on 4.0 scale in the last 60 hours of the BS program
• Minimum GRE scores may vary according to area.

Industrial and Manufacturing Systems Engineering builds on a foundation of science, mathematics, computing and data analytics in order to address a wide range of issues in the socio-technical system (complex combinations of people and technology) and environmental (sustainability) domains. With this unique blend of skills, industrial engineering bring optimization-based approaches to a variety of problems in manufacturing, healthcare, supply chain / logistics, sustainability and service organizations.

Industrial engineers working in manufacturing organizations address many issues including designing workplaces, considering both the capabilities of machines and humans. They may design computer-integrated manufacturing systems that include automation and robotics. They may also control production, optimize inventory, design quality systems, evaluate new product proposals and build new or improved production facilities.

Industrial engineers working in the supply chain / logistics domain address issues ranging from supplier selection, demand forecasting, inventory systems, facility location, distribution network design, and transportation.

Industrial engineers are also involved in sustainable systems design where they seek to minimize environmental impact while cost-effectively delivering the goods and services demanded by humanity. Issues addressed range from optimizing the environmental performance of an individual product to quantitatively assessing the performance of energy systems.

Industrial engineering skills are used to design better healthcare delivery where they increase the efficiency of the healthcare system. They also work to reduce errors in a wide range of human-centered systems with expertise from data-driven science and ergonomics.

Finally, industrial engineering skills can help facilitate the judicial process, provide faster and more accurate mail distribution, and optimize airline routing and reservation methods. In summary, the industrial engineer may be involved in the design and operation of a range of systems that provide services at a cost that society can afford at the quality that is required.

The MU IMSE department offers the ABET-accredited Bachelor of Science degree with a major in Industrial Engineering (BSIE), and 5 year Industrial Engineering BSIE/MS and BSIE/MBA programs. At the graduate level, the department offers the Master of Science in Industrial Engineering (MSIE) and the Doctor of Philosophy in Industrial Engineering (PhD IE) degrees. The department also offers students the opportunity to obtain Lean Six Sigma Green Belt certification or Global Supply Chain Management certification.

**Faculty**

**Professor** C. M. Klein**, J. S. Noble**, B. Wu**
**Associate Professor** L. G. Occeña**

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

- BSIE in Industrial Engineering (p. 551)

**Advising Contact**
James S. Noble, Director of Undergraduate Studies

**Scholarship Information Contact**
Luis G. Occeña

Industrial engineering undergraduates complete a core engineering curriculum during the first two years. The objective of this curriculum is to give the student a rigorous foundation in mathematics, natural sciences, basic engineering sciences, applied probability, and computer science, as well as a complementary and meaningful exposure to the humanities and social sciences.

Building on the core courses, students gain knowledge of optimization methodologies, human factors, data analytics and systems modeling.
They also learn to model and evaluate integrated systems of people, technology and information in the areas of production and service system design, supply chain design and management, control systems, quality systems, sustainability, data engineering, product and process design.

These fundamental skills provide the foundation from which students learn to develop systematic, integrated, and optimal solution approaches to large-scale enterprise problems. In order to be successful as they begin their careers (or graduate study) students learn to communicate effectively in both oral and written forms, and become proficient in working in diverse teams of individuals. Lastly, the curriculum introduces the student to ethical and professional issues in engineering practice.

Industrial engineering design experiences are integrated throughout the curriculum, most often in a team-based environment. Industrial engineering design is the process of developing and improving integrated systems that include people, materials, information, equipment and energy.

**Program Educational Objectives**

The IE Program educational objectives have been developed to address the needs of our constituencies and to be consistent with the University of Missouri mission. Within 3-5 years of graduation from the industrial engineering program in the Industrial and Manufacturing Systems Engineering Department at the University of Missouri:

- Graduates will create value for their employers, demonstrating entrepreneurial initiative, and make contributions that benefit society.
- Graduates will expand their capabilities through professional development and advanced education.
- Graduates will provide leadership and be agents of change in their profession and/or communities.

The objectives are based on a few key concepts: value, entrepreneurial initiative, expanding capability, leadership, and being agents of change. “Value” creation is defined as what a graduate's employer requires in order to achieve its stated objectives. The IMSE graduate adds value to the organization by taking entrepreneurial initiative that contributes to the greater good of society. Graduates face an environment where technology is advancing at an ever increasing pace, therefore, they will need to expand their knowledge and capabilities through professional development and advanced education. Due to their systems view of the enterprise, industrial engineers are often called upon to provide leadership within an enterprise and, as such, are required to manage the change that is inherent in today's dynamic environment.

**Student Outcomes**

Student outcomes (SO) are defined as the abilities the department’s BSIE graduates will have upon graduation that will enable them to achieve the program’s educational objectives. The student objectives reflect the assimilation of what has been taught in the curriculum upon completion of the undergraduate education.

All MU BSIE graduates should have:

(a) an ability to apply knowledge of mathematics, science and engineering

(b) an ability to design and conduct experiments, as well as to analyze and interpret data

(c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability

(d) an ability to function on multidisciplinary teams

(e) an ability to identify, formulate, and solve engineering problems

(f) an understanding of professional and ethical responsibility

(g) an ability to communicate effectively

(h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context

(i) a recognition of the need for, and an ability to engage in life-long learning

(j) a knowledge of contemporary issues

(k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

In summary, graduates of the Department of Industrial and Manufacturing Systems Engineering (IMSE) will possess a strong foundation upon which they can grow professionally, and continue to build a focused set of fundamental and engineering knowledge and skills that are integrated and applicable to real-world problems in any enterprise setting.

**Accreditation**

The University of Missouri program in industrial engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET.

**IMSE Honors Program**

The IMSE Honors Program follows the regulations and philosophy of the College of Engineering Honors Program, and as such is intended to encourage, facilitate and reward independent study by high-ability undergraduate students.

The heart of the program is an undergraduate honors project, undertaken and completed by the time of graduation while enrolling in 3 to 6 credits of IMSE 4995 Undergraduate Research Industrial Engineering - Honors. The academic credit for the honors project (3-6 credits in IMSE 4995 replaces an equivalent number of credits of IMSE or Technical electives. The project is conducted under the direction of an IMSE professor (honors advisor) who is selected by the student, with agreement by the professor. The project culminates in an honors thesis, which is read and approved by the honors advisor and a second reader. A finished copy of the honors thesis, signed by the honors advisor and second reader, is required for satisfactory completion of the project.

**Academic Qualifications for the Honors Program**

Honors students must maintain and graduate with a 3.0 overall GPA. In the case of a transfer student, their transferred credit plus their MU credit will average 3.0/4.0. Students must have a minimum of 60 credit hours.

**Lean Six Sigma Green Belt Certification**

IMSE students have the opportunity to obtain a Lean Six Sigma Green Belt certification either during their degree program or after. Certification requires students to obtain a GPA average of 2.5 or better in IMSE 4110, IMSE 4310, and IMSE 4610, then they must successfully complete IMSE 4385 - Lean Six Sigma Green Belt Project (a 1 credit hour course where DMAIC is used to improve a process within an organization).

http://engineering.missouri.edu/imse/

Interim Director of Graduate Studies: Luis G. Oceña

About IMSE

The graduate program in industrial engineering provides a scholarly environment in which highly qualified, creative students may obtain the knowledge and develop the skills necessary to solve complex industrial, governmental and societal system design problems. These systems are required to operate within increasingly complex constraints, thus requiring the use of sophisticated and creative designs. The industrial engineer responsible for such designs must be capable of applying a broad spectrum of scientific tools if the most effective systems are to be obtained.

Our master of science program is designed to provide a basic understanding of these tools and experience in the application of these tools in the design process. The doctor of philosophy program is designed to provide the specialized knowledge and skills necessary to develop new tools or methods for solving complex systems design problems. Information on engineering licensure is detailed under Professional Engineering Registration.

General Admission Guidelines

Acceptance for advisement in the department’s graduate programs is available to students with an ABET accredited undergraduate engineering degree. Engineering graduates who have not taken linear programming, linear algebra, statistical quality control or engineering economic analysis must complete 12 hours of additional course work before graduation.

Students with baccalaureate degrees in mathematics, physics, chemistry or computer science may be accepted if they have completed 13 hours of calculus, three hours of differential equations and six hours of calculus-based probability and statistics. Several factors are considered in evaluating an applicant’s capability, such as overall GPA, grade trends and major area grades. In addition, each applicant is required to take the general test of the GRE and international students must take the TOEFL or IELTS.

Facilities and Resources

Laboratory facilities in several major application areas, both within the department and in the college, support the academic program. Neighboring industries, city, county and state government agencies, local hospitals and nearby large metropolitan centers provide a reservoir of research and design opportunities.

Computing and Reference Materials

The department has access to the University of Missouri System computing network and maintains its own computing facilities for student use. Besides Ellis Library facilities, an excellent collection of mathematical, statistical and engineering books and reference materials are housed in the engineering library and the industrial and manufacturing systems engineering departmental library.

Funding

Fellowships, scholarships and teaching and research assistantships are available to qualified graduate students. These forms of financial assistance are supported by funds made available through state, federal and industrial graduate support programs and through research grants from various industrial and governmental agencies.

BSIE in Industrial Engineering

Degree Program Description

The Bachelor of Science in Industrial Engineering has a core engineering curriculum during the first two years. The objective of this curriculum is to give the student a rigorous foundation in mathematics, natural sciences, basic engineering sciences, applied probability, and computer science, as well as a complementary and meaningful exposure to the humanities and social sciences.

Building on the core courses, students gain knowledge of optimization methodologies, human factors, data analytics and systems modeling. They also learn to model and evaluate integrated systems of people, technology and information in the areas of production and service system design, supply chain design and management, control systems, quality systems, sustainability, data engineering, product and process design.

Major Program Requirements

Students earning a Bachelor of Science in Industrial Engineering are required to complete all University general education requirements, University undergraduate requirements, degree, and major requirements, including selected foundational courses, which may fulfill some University general education requirements. Over half of the course work for the degree is completed in ENGR/IMSE or professionally related courses.

### Total Credits: 126

---

**MS in Industrial Engineering**

### Admission Contact Information

Luis G. Occeña, Interim Director of Graduate Studies  
E3437 Thomas and Nell Lafferre Hall  
Columbia, MO 65211  
(573) 882-2691

The Master of Science in Industrial Engineering (MS) degree consists of two options: a 30-credit hour research oriented program requiring a thesis or a 30-credit hour application oriented program requiring a project report.
The MS Industrial Engineering thesis option curriculum is built upon the choice of a concentration area around which students can mold their overall academic effort including six hours of research. The three current focus areas are Operations Research and Statistics, Manufacturing/Production/Service Systems and Human and Enterprise Systems. Other focus areas are in development. The MS Industrial Engineering project option requires three hours of an approved project advised by a faculty member in lieu of a thesis, and one more course.

**Master of Engineering**

The Master of Engineering (ME) degree is a non-research thirty-six-credit-hour program designed to be a terminal degree. The Master of Engineering (ME) degree is a non-research thirty-six-credit-hour program for U.S. students designed to be a terminal degree. The ME curriculum is based upon a seven-course core with the remaining 15 hours made up of courses appropriate to the student’s concentration area.

**Dual Master’s Degree Programs: Master of Science and MBA**

The Department of Industrial and Manufacturing Systems Engineering, in cooperation with the College of Business, offers a dual master's degree program for those students who wish to combine the specialized skills of the industrial engineer with the general knowledge of the professional manager. The program was developed in recognition of the fact that solutions to organization problems often require that the engineer’s analytical abilities be applied simultaneously with the manager’s integrative perspective. This dual program has been carefully structured to provide the necessary academic background to obtain an MS in industrial engineering and an MBA simultaneously, in a minimum amount of time, usually two academic years.

**Master of Science and MHA**

The Department of Industrial and Manufacturing Systems Engineering, in cooperation with the health services management program of the School of Medicine, offers a dual master’s degree program to prepare its graduates for careers in the design and administration of health-care delivery systems and organizations. The program was developed in recognition of the highly complex nature of health-care organizations. The program’s basic objective is to fuse competencies in health-service management and in health-systems design. The required courses in the industrial engineering program serve as the area of specialization in the health services management program, and the required courses in the health-services management program are used as electives in the industrial engineering program. As a result, it is possible for the student to earn an MHA in health-services management and an MS in industrial engineering simultaneously.

**Application Deadlines**

Applications accepted throughout the year.
- Fall application deadline: March 1 (Priority deadline: January 1)  
- Spring application deadline: September 15

**Minimum Admission Criteria**

- Minimum GPA: 3.0/4.0
- Test of Written English: (TWE) of 4.0 (international applicants only)
- Minimum Academic IELTS OVERALL score: 6.0; or Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

**Minimum GRE scores:**

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal</th>
<th>Quantitative</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>
<td>350</td>
<td>700</td>
</tr>
<tr>
<td>On or After August 1, 2011</td>
<td>143</td>
<td>155</td>
</tr>
</tbody>
</table>

**Required Application Materials**

To the Office of Graduate Studies:

- All required Office of Graduate Studies documents

To the IMSE Graduate Program:

- 3 letters of recommendation
- Statement of Purpose
- Curriculum Vitae (CV)
- GRE scores

**TA/RA Hiring**

This academic department does not have any function of financial Aid. Rather, IMSE hires TA/RA automatically based on the department needs. No separate application or contacts are necessary; all top ranked applicants will be considered.

**Degree Completion Requirements**

The Master of Science in Industrial Engineering (MS) degree consists of two options: a 30-credit hour research oriented program requiring a thesis or a 30-credit hour application oriented program requiring a project report. The MS Industrial Engineering thesis option curriculum is built upon the choice of a concentration area around which students can mold their overall academic effort including six hours of research. The three current focus areas are Operations Research and Statistics, Manufacturing/Production/Service Systems and Human and Enterprise Systems. Other focus areas are in development. The MS Industrial Engineering project option requires three hours of an approved project advised by a faculty member in lieu of a thesis, and one more course.

**PhD in Industrial Engineering**

**Admission Contact Information**

Luis G. Occeña, Interim Director of Graduate Studies  
E3437 Thomas and Nell Lafterre Hall  
Columbia, MO 65211  
(573) 882-2691

**About the Doctoral Degree**

Programs are individually tailored to meet students’ objectives and to culminate in an original research dissertation. The PhD builds upon the graduate MS and fundamental BS programmatic areas. The three current focus areas are Operations Research and Statistics, Manufacturing/Production/Service Systems and Human/Enterprise Systems. Other focus areas are in development. Fundamental IE knowledge in each is expected. The basic goals of the PhD program are to provide students with a solid understanding of the theoretical bases for the latest tools and techniques of systems analysis and design, an extensive experience in applying these analyses and design tools and techniques, and research experience in the development of new tools or applications of existing techniques to design or analyze problems.
Application Deadlines
Applications accepted throughout the year.
Fall application deadlines: March 1 (Priority deadline: January 1)
Spring application deadline: September 15

Minimum Criteria to be Considered for Admission
• Minimum GPA: 3.5/4.0
• Demonstrated research experience
• Compatible research interests or capabilities with a member of the faculty
• Minimum OVERALL IELTS scores: 6.5; or Minimum TOEFL scores:
  Internet-based test (iBT)
  Paper-based test (PBT)
  80
  550
• Minimum GRE scores

When did you take the GRE?
Verbal
Quantitative
Prior to August 1, 2011 350 700
On or After August 1, 2011 143 155

Note: Only highly qualified students are accepted for advisement in the PhD program. The faculty looks for excellence in undergraduate and graduate work, high GRE scores, thesis training, and strong indications of research potential.

Notification
This department does not use “rolling admission.” Applicants will be notified within a month after the application deadline.

Required Application Materials
To the Office of Graduate Studies (https://applygrad.missouri.edu/apply):
• All required Graduate Studies documents
To the IMSE Graduate Program:
• 3 letters of recommendation
• Writing sample demonstrating research experience
• Statement of Purpose
• Curriculum Vitae (CV)
• GRE scores

TA/RA Hiring
This academic department does not have any function of financial aid. Rather, IMSE hires TA/RA automatically based on the department needs. No separate application or contacts are necessary; all top ranked applicants will be considered.

Degree Completion Requirements
The granting of a PhD requires completion of five major requirements:
1. A qualifying examination (D1 form).
2. A course of study (Study Plan, D2 form).
3. Comprehensive examination, and
5. Final defense and submission of completed dissertation (D4 form).

Information Technology
Dong Xu, Director
College of Engineering
201 Naka Building
(573) 882-2299
https://engineering.missouri.edu/departments/information-technology/bachelor-science-information-technology/
The information technology (IT) degree program was launched in 2005 with a gift from AT&T/SBC. IT students collaborate with students from other disciplines to create software applications, produce videos and films and use technology to solve a wide range of complex information technology, systems integration, social network and societal problems. The program is attractive to students because of its distinguished faculty and state-of-the-art facilities many of which are shared with the Computer Science Program (CSP) (p. 526) in the Electrical Engineering & Computer Science Department that greatly exceeds what is available at competing institutions. Application areas in IT include mobile computing, game design, information systems, software engineering, cybersecurity, systems administration, and audio/video multimedia technology.

Faculty
Assistant Professor of Practice C. Gubera, B. Maurer, N. Wergeles
Associate Teaching Professor D. Musser*
Assistant Teaching Professor F. Wang

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate
• BS in Information Technology (p. 555)
• Minor in Information Technology (p. 556)

Advising Contact

brownsan@missouri.edu

Scholarship Information Contact
Heather Ralph
(573) 882-4765
ralphhm@missouri.edu

This degree program is offered by the College of Engineering. Career opportunities include database administration, web design, cybersecurity, game development, film production, and more.

Graduate
While the College of Engineering does not offer a graduate degree specifically in Information Technology, it does offer a number of graduate degrees in closely related areas such as Computer Science (p. 528), and Computer Engineering (p. 521). There is a Master of Engineering degree through the department. The University also offers a number of information technology degrees in its other Colleges, and through interdisciplinary programs such as Health Informatics (p. 726), Health
Administration (p. 723), Informatics (p. 729), or Information Science and Learning Technology (p. 438).

A joint degree program administered through the School of Engineering and the Crosby MBA Program is available for students who wish to earn a Bachelor of Science in Information Technology (BS IT) and a Master of Business Administration (MBA) (p. 361). Individuals interested in pursuing engineering and business will find that this program provides them with a valuable set of skills to excel in this rapidly growing field. If earned separately, the BS IT degree would take four years and the MBA degree would take two years. The dual degrees may be completed in five years assuming normal progress toward each degree.

Or you may browse a complete list of degree options (p. 18) at the University of Missouri.

**BS in Information Technology**

**Degree Program Description**

Information Technology (IT) students collaborate with other disciplines to create software applications, design and manage technology-based infrastructures, manage database systems, produce videos and films, and use technology to solve a wide range of complex problems. In the one-semester capstone design course, students complete design projects that serve as a culminating academic experience. Internships with companies for real-world experience and undergraduate research opportunities with faculty are abundant and encouraged. Some students opt to participate in the joint degree program with the Crosby MBA, earning a BS Information Technology and a Master of Business Administration. Students are prepared to pursue a variety of IT related careers such as programmer analysts, software engineers, database and system administrators, web developers, IT implementation specialists, and business analysts in both the public and private sectors.

**Major Program Requirements**

To receive the Bachelor of Science Degree in Information Technology, the candidate must successfully complete 126 semester hours of credit including the following distribution: Computer Science (CMP_SC) course requirements - 54 hours of CMP_SC/INFO TC core courses, 12 hours of related math and business courses, 9-10 hours of science, 15-22 hours of courses in a possible minor and any remaining hours for elective courses. General education courses include ENGLISH 1000, 9 hours of Social/Behavioral Sciences and 9 hours of Humanities/Fine Arts, with at least one course from Social/Behavioral/ Humanities at the 2000 level or higher.

Information Technology students must earn a C-range grade or better in all INFO TC/CMP_SC courses that are prerequisites for other INFO TC/ CMP_SC courses that the student takes. To graduate, a student must earn a cumulative UM grade point average of 2.0 or better and a 2.0 grade point average or better in all CMP_SC/INFO TC courses.

The MU Engineering Leadership, Engagement and Career Development Academy, W1025 Lafferre Hall, can assist students in searching for employment opportunities and for internship/co-op positions.

These course requirements apply to students beginning full-time Fall 2018 or after.

In addition to the major core requirements, students must complete all University graduation requirements including University general education, as well as all degree and college or school requirements. See course descriptions for prerequisites.

Total Credits: 126

Minor in Information Technology

A minor in Information Technology is offered through the College of Engineering. To obtain a minor, a student must complete courses in a sequence approved by Information Technology. The student must earn a 2.0 GPA in all courses counting toward the minor. At least 9 hours must be taken in residence at MU. At least 9 hours must be at the 2000 level or above. A total of 15 credit hours are required.

The following courses are required for sequence one.

<table>
<thead>
<tr>

Mechanical and Aerospace Engineering

Noah D. Manring, Interim Chair and Glen A. Barton Professor
College of Engineering
E3421 Lafferre Hall
(573) 882-0693
ManringN@missouri.edu

The Department of Mechanical and Aerospace Engineering is an academic department within the College of Engineering at the University of Missouri. Established in 1891, this ABET accredited program is home to many undergraduate and graduate students and faculty.

Faculty

See web site for faculty listing: https://engineering.missouri.edu/departments/mechanical-aerospace-engineering/mae-faculty/
Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

** Undergraduate **

- BSME in Mechanical Engineering (p. 559)
  - with emphasis in Aerospace Engineering (p. 560)

Additional minors and certificates (p. 566) are offered through the College of Engineering, including the Aerospace Minor and the Energy Engineering Minor.

** Advising Contact **

Justin Rich
573-884-6961
RichJ@missouri.edu

** Scholarship Contact **

Gary L. Solbrekken, Undergraduate Director
solbrekken@missouri.edu

The Department of Mechanical and Aerospace Engineering prepares students for productive careers in mechanical engineering related disciplines. The program focuses on instruction in the thermal and mechanical systems areas as defined by the Accreditation Board for Engineering and Technology (ABET). To support that mission, the Department has been divided into the focus areas of Design and Manufacturing, Dynamics and Controls, Materials, and Thermal and Fluid Sciences. (NOTE: Focus areas are not listed on transcripts or diplomas.)

The department endeavors to present a strong experimental program through laboratory experiences to expose undergraduate students to modern instrumentation and measurement methodologies. Students work in well-equipped laboratories in design optimization, engineering computation, fluid power dynamics and control, materials, structural dynamics, measurement and instrumentation, laser processing, heat transfer and fluid dynamics, stress measurement and nondestructive evaluation.

The MU Mechanical Engineering program offers a Bachelor of Science in Mechanical Engineering (BSME) and prepares students for practice of the profession in industry or government or for further study toward other degrees such as the JD, MD, MS and PhD.

** Mission Statement **

The mission of the Mechanical and Aerospace Engineering Department is to:

Prepare our students for successful careers in the mechanical engineering profession, conduct high quality and innovative research, and serve the community and industry providing educational and research resources.

** Program Educational Objectives **

The educational objectives of the undergraduate program in Mechanical Engineering are to produce graduates who (within a few years of graduation):

1. successfully practice the mechanical engineering disciplines;
2. contribute to society and the profession;
3. engage in life-long learning to advance professionally through continuing education and training;
4. succeed in graduate studies in mechanical engineering or a related field if pursued.

** ABET Definition for Program Educational Objectives:** Program Education Objectives are broad statements that describe what graduates are expected to attain within a few years of graduation. Program Educational Objectives are based on the needs of the program’s constituencies.

** Program Outcomes **

Students from the Mechanical Engineering program will attain (by the time of graduation):

- an ability to apply knowledge of engineering, science, and mathematics (including multivariate calculus and differential equations);
- an ability to design and conduct experiments, as well as to analyze a
- an ability to design thermal, fluid, and mechanical systems, components, or processes to meet desired needs within realistic constraints
- an ability to function on multi-disciplinary teams;
- an ability to identify, formulate, and solve mechanical engineering problems;
- an understanding of professional and ethical responsibility;
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
- a recognition of the need for, and an ability to engage in, life-long learning;
- a knowledge of contemporary issues in mechanical engineering;
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

** Double Majors and Dual Degrees **

Dual majors and dual degrees are possible at the undergraduate level. These could lead to degrees in the College of Engineering and the College of Arts and Sciences or the College of Agriculture. Dual enrollments could also lead to two engineering majors within the College of Engineering. Any of these dual enrollments would add to the traditional 126-credit undergraduate degree program. Consult with the directors of undergraduate studies of the departments involved for further information.

** MAE Honors Program **

The MAE Honors Program follows the general rules, regulations and philosophy of the College of Engineering Honors Program, and as such is intended to encourage, facilitate and reward independent study by high-ability undergraduate students.

The heart of the program is an undergraduate honors project, undertaken and completed by the time of graduation while enrolling in 1 to 6 credits of MAE 4995 Undergraduate Honors Research Mechanical & Aerospace
Engineering. The academic credit for the honors project (1-6 credits in MAE 4995 replaces an equivalent number of credits of technical or MAE elective. The project is conducted under the direction of an MAE professor (honors advisor) who is selected by the student, with agreement by the professor. The project culminates in an honors thesis, which is read and approved by the honors advisor and then approved by the chair of the MAE honors committee. A finished copy of the honors thesis, signed by the honors advisor and second reader, is required for satisfactory completion of the project.

**Academic Qualifications for the Honors Program**

In the case of a transfer student, transferred credit plus MU credit must average 3.0/4.0. A student is typically eligible for the honors program at the junior year of their undergraduate program.

The successful honors scholar is given a degree of flexibility in the program of study. Additionally, honors scholars may reduce the credits required for degree completion to the University minimum (i.e., 120 credits) by substituting graduate course credits through dual enrollment (undergraduate/graduate at MU) during the last two semesters of the undergraduate program.

Honors students must maintain and graduate with a 3.0 overall GPA.

In the case of a transfer student, transferred credit plus MU credit must average 3.0/4.0. A student is typically eligible for the honors program at the junior year of their undergraduate program.

The successful honors scholar is given a degree of flexibility in the program of study. Additionally, honors scholars may reduce the credits required for degree completion to the University minimum (i.e., 120 credits) by substituting graduate course credits through dual enrollment (undergraduate/graduate at MU) during the last two semesters of the undergraduate program.

Graduate

- MS in Mechanical and Aerospace Engineering (p. 560)

**Director of Graduate Studies:** Frank Feng

**About Mechanical & Aerospace Engineering**

Like markets merging together to create a global economy, this decade has approached the exciting frontier of joint research. The marriage of Mechanical Engineering to related fields has contributed to a new “Interdisciplinary Era”. In meeting the challenges brought on by this co-operative approach to engineering, the Department of Mechanical & Aerospace Engineering (MAE) at the University of Missouri has broadened its scope in both education and research while maintaining strengths in the fundamental disciplines: Dynamics & Control, Design & Manufacturing, Materials & Solids and Thermal & Fluid Science Engineering. Such well-established academic traditions in the undergraduate and graduate curriculum as well as nationally renowned research programs are the basis for MAE having become the largest department in the College of Engineering at MU. An equally important aspect contributing to the quality of the MAE department is the aggressive pursuit of funding, by our faculty, to establish nationally recognized research programs. Well-earned support through sizable funding from both federal agencies and industry are valuable resources in the promotion of our graduate research and undergraduate teaching.

**Career Opportunities**

Graduate programs are planned to prepare students for advanced professional engineering careers. In recognition of the broad nature of the field of mechanical and aerospace engineering, considerable latitude in programs is encouraged so students may prepare for employment in industry, education and government. The usual purpose of a PhD program is to prepare a person for a career in research or teaching. The program is oriented toward research culminating in a dissertation suitable for publication.

**Areas of Study**

A student may pursue an area of concentration selected from AI/expert systems, automation, bioengineering, combustion, control, creep and plasticity, design optimization, numerical methods, computational fluid dynamics, fracture mechanics, heat transfer, interactive computer graphics, laser diagnostics, manufacturing systems, materials science, mechanical syntheses, mechatronics, mechanics, parallel computation, residual stress, robotics, thermal systems design and management and ultrasonic nondestructive evaluation.

**Licensure**

Information on degree requirements for engineering licensure is detailed under Professional Engineering Registration.

**Facilities and Equipment**

The department has several specialized laboratories in aerosol mechanics, combustion, computer control, creep and fracture mechanics, fluid mechanics and heat transfer, manufacturing, materials science and structural dynamics.

Besides the modern instrumentation and equipment normally found in well-equipped mechanical and aerospace engineering laboratories, the department has, or has access to, such specialty items as MTS and Instron material and structural test equipment, wind tunnels, X-ray and a scanning electron microscope facility, computer control systems, a scanning laser vibrometer, a microscale heat transfer and electronic coding laboratory, an experimental stress laboratory, a fluid power laboratory and the university research reactor.

**Information Technology and Computing**

A combination of the campus Division of Information Technology and the Engineering Technical Services (ETS) provided advanced engineering computation for College of Engineering faculty and students. CAD/CAM and graphics are the primary emphasis, although artificial intelligence, multiple high-level programming languages and computational and simulation libraries also are available.

The College of Engineering operates one high performance enterprise server, two super minicomputers and 17 HP workstations. The ETS also provides hardware/software support, locally, to nine College of Engineering departments and their affiliated research centers. These units are networked via Ethernet to the superminicomputers operated by the College of Engineering.

The Division of IT operates two remote terminal sites in the Engineering Buildings East. The University also supports an extensive computer
system consisting of IBM mainframe computers, remote terminal sites, and PC and Macintosh labs throughout the campus.

Financial Aid from the Program

Admission decisions to the graduate program are made without considerations of a student's financial need. Once admitted, a student may be considered for fellowships, research assistantships (RAs) and teaching assistantships (TAs). Awarding of fellowships is initiated by the department. RAs are awarded by individual faculty members. A student may apply by contacting faculty members directly. Application forms for TAs are available in the department office. International students are not eligible for TAs in their first semester of study. For specific departmental requirements, please refer to the MAE Graduate Handbook. Please see the department website for information on how to contact the professors individually about research assistantships offered.

BSME in Mechanical Engineering

Degree Program Description

Mechanical Engineering focuses on thermal and mechanical systems areas. The curriculum presents a strong experimental program through laboratory experiences to expose undergraduate students to modern instrumentation and measurement methodologies. Students work in well-equipped laboratories in design optimization, engineering computation, fluid power dynamics and control, materials, structural dynamics, measurement and instrumentation, laser processing, heat transfer and fluid dynamics, stress measurement and nondestructive evaluation. Bachelor of Science in Mechanical Engineering prepares students for employment in industry or government or for further study toward other degrees such as the JD, MD, MS and PhD.

Major Program Requirements

The MAE curriculum allows students to transfer among departments during the first two years. Students concentrate on departmental requirements during the junior year. The senior year includes three MAE electives that allow students to develop individual study programs. This enables students to complete a traditional program or create their own with special emphasis on system design, materials, manufacturing, energy systems, controls, or aerospace.

Experience in design is integrated throughout the required courses in the curriculum and culminates in the capstone design sequence. The capstone design experience integrates earlier technical work with economic, safety and environmental considerations. The projects are primarily obtained from industrial or private business clients. The presentations of project results are made to a review panel consisting of members of the faculty, the MAE Industrial Advisory Council and representatives of the client firms.

Major Core Requirements

In addition to the University general education (p. 34) and graduation requirements, the Department of Mechanical and Aerospace Engineering requires the following courses:

BSME in Mechanical Engineering with Emphasis in Aerospace Engineering

Degree Program Description

Mechanical Engineering focuses on thermal and mechanical systems areas. The curriculum presents a strong experimental program through laboratory experiences to expose undergraduate students to modern instrumentation and measurement methodologies. Students work in well-equipped laboratories in design optimization, engineering computation, fluid power dynamics and control, materials, structural dynamics, measurement and instrumentation, laser processing, heat transfer and fluid dynamics, stress measurement and nondestructive evaluation. Bachelor of Science in Mechanical Engineering prepares students for employment in industry or government or for further study toward other degrees such as the JD, MD, MS and PhD.

Major Program Requirements

The MAE curriculum allows students to transfer among departments during the first two years. Students concentrate on departmental requirements during the junior year. The senior year includes three MAE electives that allow students to develop individual study programs. This enables students to complete a traditional program or create their own program with special emphasis on system design, materials, manufacturing, energy systems or controls.

Experience in design is integrated throughout the required courses in the curriculum and culminates in the capstone design sequence. The capstone design experience integrates earlier technical work with economic, safety and environmental considerations. The projects are primarily obtained from industrial or private business clients. The presentations of project results are made to a review panel consisting of members of the faculty, the MAE Industrial Advisory Council and representatives of the client firms.

Options

The senior year includes three MAE electives and one technical elective that allow students to develop individual study programs. This enables students to complete a traditional program or create their own program with special emphasis on system design, materials, manufacturing, energy systems or controls.

An Aerospace Emphasis area is available to students wanting to pursue careers in the aerospace industry. Completing the aerospace emphasis requires taking at least four senior level MAE 4000+ electives from a selection of available courses. These can be chosen from the broad areas of structures/materials, thermal/propulsion, aerodynamics/fluids, flight mechanics/dynamics/controls, and design. Upon completion of the appropriate coursework, an Aerospace Emphasis is shown on the students transcript.

Semester Plan

A sample plan of study has not been designed for this major. Students should either refer to the plan designed for the BSME in Mechanical Engineering (p. 559) or contact the academic department for assistance with academic planning.

MS in Mechanical and Aerospace Engineering

Admission Contact Information
muengrgraduatesup1@missouri.edu

Application Deadline for all applicants
Fall deadline: May 31 (priority deadline Jan. 1)
Spring deadline: October 31 (priority deadline Oct 1)
Summer deadline: April 30

Admission Criteria

• BS in same or closely related field
• Minimum GPA: 3.0 during last 2 years
• Minimum GRE Score: 298 combined score on Verbal and Quantitative sections
• Minimum TOEFL score: 80
• Minimum academic IELTS overall score: 6.5
• Resume

Note: Lower GPAs require special action and substantiation, such as good test scores on the GRE or other recognized examinations.

How to apply to the MAE master’s program:

Step 1: All documents should be uploaded directly at https://applygrad.missouri.edu/apply.

Step 2: Required documents:
• Unofficial Transcripts (all Universities and Colleges attended) Uploaded in S (http://gradstudies.missouri.edu/admissions/apply)late
• TOEFL/IELTS score - sent electronically to the University by ETS (Institution Code 6875 Department Code 1502)
• 3 letters of recommendation - uploaded in Slate by the recommenders. Letters must come from a school e-mail address, not personal accounts (like yahoo, gmail, etc).
• GRE score - sent electronically by ETS (Institution Code 6875 Department Code 1502)
• Statement of Objectives - one page letter telling about yourself and the area you will study if accepted (uploaded in Slate)
• CV/Résumé (Uploaded in Slate)

Contact:
Mechanical & Aerospace Engineering, Graduate Admissions
muenggr graduatesup1@missouri.edu

Plan of Study

A plan of study is developed by the student and the advisor, subject to approval. The minimum degree requirement is 30 hours with a minimum of 18 hours at the 8000 level. Included within the 30 hours must be a special project report or thesis. A special project consists of three to five hours of MAE problems.

Alternatively, programs directed toward a thesis shall include three to eight hours of MAE 8990 (Research). A thesis or a report is approved by designated faculty committees and is deposited in the department libraries.

Passing the MS final committee fulfills the degree requirements.

PhD in Mechanical and Aerospace Engineering

Admission Contact Information
muenggr graduatesup1@missouri.edu

Application Deadlines for all Applicants

Fall deadline: May 31 (priority deadline Jan 1)
Spring deadline: October 31 (priority deadline Oct 1)
Summer deadline: April 30

Admission Criteria

• Minimum GPA: 3.0
• Strong record in the MS program
• Minimum GRE score: 298 combined score on Verbal and Quantitative sections
• Minimum TOEFL score: 80
• Minimum Academic IELTS Overall score: 6.5

Note: Doctoral degree program applicants are closely and individually reviewed.

How to apply to the MAE doctoral program:

Step 1: All documents should be uploaded directly in Slate: https://gradstudies.missouri.edu/admissions/apply/
Step 2: Required documents:

• Unofficial Transcripts (all Universities and Colleges attended)
  Uploaded in S (https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=umc-grad)
• TOEFL/IELTS score - sent electronically to the University by ETS (Institution Code 6875 Department Code 1502)
• 3 letters of recommendation (preferably from MS advisor and 2 other letters) - uploaded in S (https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=umc-grad) by the recommenders. Letters must come from a school e-mail address, not personal accounts (like yahoo, gmail, etc).
• GRE score - sent electronically by ETS (Institution Code 6875 Department Code 1502)
• Statement of Objectives - one page letter telling about yourself and the area you will study if accepted
• CV/Résumé

Contact:
Mechanical & Aerospace Engineering, Graduate Admissions
muenggr graduatesup1@missouri.edu

Degree Requirements

A minimum of 72 semester hours are required including the credit hours taken during the MS program. Students who received the MS degree from other than MU may transfer a maximum of 30 hours from their MS course work.

A doctoral student must satisfy a special requirement, either proficiency in foreign languages or a collateral field. The collateral field requires a minimum of nine hours of course work in one area other than MAE.

Plan of Study

The PhD candidate plans a plan of study and research under the immediate supervision of an advisor and in close cooperation with the doctoral program committee approved by the dean of the Graduate School upon the department’s recommendation.

Qualifying Examination

A qualifying examination is given soon after the student begins doctoral study. Successful completion of this examination is a prerequisite to formal acceptance into the PhD program.

Students with an MS from MU or another accredited U.S. engineering program will be exempt from the qualifying examination if their MS GPA and total GRE scores satisfy a departmental exemption rule. See https://engineering.missouri.edu/departments/mechanical-aerospace-engineering/ for more information.

Comprehensive Examination & Dissertation

A comprehensive examination is given after all course work and language or collateral requirements have been satisfied. Upon completion of the plan of study and research a final examination, essentially a defense of the dissertation, is administered.
Nuclear Engineering

About the Nuclear Engineering Program

The Nuclear Engineering Program at University of Missouri was established in 1964 and conferred its first Master of Science degree in that same year.

Undergraduate students may pursue an academic minor in nuclear engineering (a baccalaureate degree is not offered at this time).

The master's program is designed for those entering students with a B.S. degree in engineering or in chemistry or physics. Students from other fields will be considered on an individual basis. Those students who have attained a B.S. degree in nuclear engineering may be given revised curricula depending on their backgrounds and the requirements of the specific program in which they are enrolled.

The Ph.D. program is typically tailored to fit the academic needs and research goals of our students. The graduate certificates provide students and working professionals with the opportunity to develop unique skills and expertise for jobs in the areas of nuclear material protection, control and accountability.

Faculty

Associate Professor S. Kovaleski, J. Kwon, K. Trauth*, R. Winholz

Assistant Professor M. Bernards

Associate Teaching Professor G. Solbrekken

Assistant Teaching Professor S. Naz

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• Minor in Nuclear Engineering (p. 562)

While MU does not offer undergraduate degrees specifically in nuclear engineering, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Engineering, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• MS in Nuclear Engineering (p. 563)
  • with emphasis in Environmental and Regulatory Compliance (p. 563)
  • with emphasis in Health Physics (p. 563)
  • with emphasis in Materials (p. 564)
  • with emphasis in Medical Physics (p. 564)
  • with emphasis in Thermal Hydraulics (p. 564)

• PhD in Nuclear Engineering (p. 564)
  • with emphasis in Environmental and Regulatory Compliance (p. 565)

• with emphasis in Materials (p. 565)
• with emphasis in Thermal Hydraulics (p. 565)

• Graduate Certificate in Nuclear Safeguards Science and Technology (p. 565)

About the Nuclear Science Engineering Program

The Nuclear Engineering Program at University of Missouri was established in 1964 and conferred its first Master of Science degree in that same year. Educational programs are closely connected with the research foci of participating faculty members. The master's program is designed for those entering students with a B.S. degree in engineering or in chemistry or physics. Students from other fields will be considered on an individual basis. Those students who have attained a B.S. degree in nuclear engineering may be given revised curricula depending on their backgrounds and the requirements of the specific program in which they are enrolled. The Ph.D. program is typically tailored to fit the academic needs and research goals of our students. The graduate certificates provide students and working professionals with the opportunity to develop unique skills and expertise for jobs in the areas of nuclear material protection, control and accountability.

Illustrative Areas of Study

Course topics include nuclear materials management, aerosol mechanics, reactor safety analysis, nuclear energy conversion, reactor physics, reactor design, nondestructive testing and measurement, radiative heat transfer, neutron spectrometry, neutron and gamma ray transport, neutron activation analysis, nuclear waste management, nuclear plasma research, health physics, magnetic resonance imaging, radiation therapy and alternative and renewable energy concepts.

Students Admitted in 2012 and Earlier

Minor in Nuclear Engineering

The Minor in Nuclear Engineering is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related disciplines who are interested in nuclear power.
The minor requires a minimum of 15 credits of course work. As background preparation, the minor requires math through differential equations and two semesters of calculus-based physics.

**Required courses:**

- ENGINR 2300  
  Engineering Thermodynamics  
  3

- NU_ENG 4315  
  Energy Systems and Resources  
  3

- NU_ENG 4346  
  Introduction to Nuclear Reactor Engineering I  
  3

- NU_ENG 4391  
  Nuclear Radiation Detection  
  3

  or CHEM 4600  
  Introduction to Radiochemistry with Lab  
  3

**Select one additional course from the list below:**

- NU_ENG 2201  
  Topics in Nuclear Engineering  
  3

- NU_ENG 4303  
  Radiation Safety  
  3

- NU_ENG 4330  
  Science and Technology of Terrorism and Counter Terrorism  
  3

- ECE 7550  
  Introduction to Plasmas  
  3

**MS in Nuclear Engineering**

**Contact for prospective students (those intending to apply):**

Dr. Naz Islam, Director of Graduate Studies  
319 Engineering Building West  
Columbia, MO 65211  
(573) 882-7570 or islamn@missouri.edu

**Nuclear Engineering Program**

Dr. John M. Gahl, Director  
207 Engineering Building West  
Columbia, MO 65211  
(573) 882-5345 or gahlj@missouri.edu  
https://engineering.missouri.edu/

**Preparation for the Program**

Students with degrees in physics or chemistry are generally adequately prepared for the nuclear engineering graduate program. Those from other backgrounds may be required to complete engineering undergraduate courses in thermodynamics, advanced engineering mathematics and the full complement of calculus-based physics, based on the student's particular experience.

**Application Deadlines**

Fall deadline: March 1  
Spring deadline for International students: September 1  
Spring deadline for Domestic Students: October 1  
Applications received after those time frames will be reviewed for acceptance only as time permits.

**Admission Criteria**

- Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>61 Effective July 1, 2015 must have score of 80</td>
<td>500 Effective July 1, 2015 must have score of 80</td>
</tr>
</tbody>
</table>

- Minimum GRE score: none set  
- Minimum GPA: 3.0 during last 2 years

- Undergraduate degree (with a strong math and physics background) in an engineering field, physics, biology, chemistry or mathematics from an accredited institution.

**Required Application Materials**

**To the Graduate School**

All required Graduate School documents

- 3 letters of recommendation and the online recommendation form from previous instructors or technical employers who are familiar with the student’s qualifications for graduate study, submitted directly online through the application. (If the student is applying to the PhD program, one of these letters must be from the MS advisor.)

- Statement of Purpose (uploaded via online application)

**To the Nuclear Engineering Program**

- Official GRE score report (Use Department Code 1609)

**Degree Completion Requirements**

The nuclear engineering master's degree program requires 31 hours, including a research project or thesis. The requirements are based on the assumption that the student is entering graduate study with a bachelor's degree in engineering from an ABET-accredited school. An original research project is required either in the form of a three-credit master's project or a six-credit master's thesis. Typical time-to-degree completion for the master's degree is 18 months.

**MS in Nuclear Engineering with Emphasis in Environmental and Regulatory Compliance**

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nuclear Engineering program (https://gradstudies.missouri.edu/degrecategory/nuclear-engineering) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

**MS in Nuclear Engineering with Emphasis in Health Physics**

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in the Nuclear Engineering program (https://gradstudies.missouri.edu/degreecategory/nuclear-engineering) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in the Nuclear Engineering program (https://gradstudies.missouri.edu/degreecategory/nuclear-engineering) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

MS in Nuclear Engineering with Emphasis in Medical Physics

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Admissions

Application Deadlines

Fall deadline: March 1
Spring deadline for International students: September 1
Spring deadline for Domestic Students: October 1
Applications received after those time frames will be reviewed for acceptance only as time permits.

Admission Criteria

• Minimum TOEFL scores:
  Internet-based test (iBT)  Paper-based test (PBT)
  61                       500
• Minimum GRE score: none set
• Minimum GPA: 3.0 during last 2 years
• Undergraduate degree (with a strong math and physics background) in an engineering field, physics, biology, chemistry or mathematics from an accredited institution.

Required Application Materials

To the Graduate School

• All required Graduate School documents
Qualifying Examination
The PhD program is a research program and is tailored to meet specific educational needs. To qualify for the research phase of the PhD program, the student must pass a comprehensive, multi-part qualifying examination, usually administered during the first semester of study for the PhD.

PhD Plan of Study
If the student is entering the PhD program, the planned course of study will be individually evaluated by the nuclear engineering faculty. A comprehensive examination covering the student's dissertation topic is required at least seven months before anticipated graduation. The PhD degree is a research degree, with a suitable dissertation topic to be chosen in the respective field and usually requires 24 classroom credits of advanced courses beyond the MS degree and 18 credits of research. Typical time-to-degree completion for the PhD degree is three years past the MS degree.

PhD in Nuclear Engineering with Emphasis in Environmental and Regulatory Compliance

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in the Nuclear Engineering program (https://gradschool.missouri.edu/degreecategory/nuclear-engineering) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

Graduate Certificate in Nuclear Safeguards Science and Technology

For additional information about this certificate, contact:
Dr. John Gahl, professor of Electrical Engineering
(573) 884-7414
GahlJ@missouri.edu

Certificate Objectives and Requirements
The objective of offering the Graduate Certificate in Nuclear Safeguards is to provide graduate students and professional, non-degree-seeking students in various engineering disciplines with an opportunity to develop unique skills and expertise that will enhance their performance in jobs requiring knowledge of nuclear material protection, control and accountability.

The graduate certificate program serves degree-seeking graduate students and also functions as a stand-alone graduate certificate program for professional, non-degree-seeking students. Both degree-seeking and non-degree-seeking students will be required to take four specific classes (12 credit hours) involving nuclear science, policy and safeguards. The student must complete a Change of Academic Program form to enter the program. The student must also complete the “Course of Study for Graduate Certificate” form, which must be approved by NSEI.
before taking any courses. Without this prior approval, the NSEI has the authority to deny the certificate.

For MU students, a maximum of 6 credit hours may be counted for both degree course credit within their department and the Graduate Certificate in Nuclear Safeguards. However, total credit hours needed to complete their degrees need not exceed departmental or Graduate School requirements (see the Graduate School catalog for additional information contact Dr. Gahl)

**Nuclear Safeguards Science and Technology Certificate Plan of Study**

Four specific classes, comprising 12 hours of course credit, are required for a student to receive this graduate certificate in nuclear safeguards:

- **NU_ENG 7335** Nuclear Safeguards Science and Technology (3)
- **NU_ENG 7331** Nonproliferation Issues for Weapons of Mass Destruction (3)
- **NU_ENG 7303** Radiation Safety (3)
- **NU_ENG 7391** Nuclear Radiation Detection (3)

Total Credits 12

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/14.2301-Gedt-Nuclear_Sci_Tech.html.

**Required Course Work**

- **Nu_ENG 7335** Nuclear Safeguards Science and Technology (3)
- **Nu_ENG 7331** Nonproliferation Issues for Weapons of Mass Destruction (3)
- **Nu_ENG 7303** Radiation Safety (3)
- **Nu_ENG 7391** Nuclear Radiation Detection (3)

Total Credits 12

Additional Minors and Certificates - Engineering

**Undergraduate Minors**

- Minor in Aerospace (p. 566)
- Minor in Computational Neuroscience (p. 566)
- Minor in Construction Management (http://catalog.missouri.edu/undergraduate/college_of_engineering/additional_minors_and_certificates/minor-construction-management)
- Minor in Energy Engineering (p. 567)
- Minor in Medical/Health Physics (p. 567)
- Minor in Naval Science (p. 567)
- Minor in Radioenvironmental Sciences (p. 567)

**Graduate Certificates**

- Certificate in Energy Efficiency (p. 569)
- Certificate in Sustainable Energy and Policy (p. 569)

**Minor in Aerospace**

**Purpose**

- To provide a fundamental grounding in aerospace engineering
- To prepare students to be competitive for positions in aerospace-oriented industries

Students will take courses from the 4 fundamental areas of aerospace engineering:

- aerodynamics
- aerospace structures
- flight mechanics

**To Apply**

- Meet with your advisor sophomore/junior year to plan minor courses into your schedule.
- Complete the necessary course work (at least 18 credit hours).
- Submit the application below in the semester before you are graduating.
- It will then appear on your diploma.

**Required Course Work**

- **MAE 3400** Fluid Mechanics (3)
- **MAE 3800** Dynamic Systems and Control (3)

Select at least 2 from:

- **MAE 4210** Aerospace Structures (3)
- **MAE 4390** Aerospace Propulsion (3)
- **MAE 4420** Intermediate Fluid Mechanics (3)
- **MAE 4430** Introduction to Computational Fluid Dynamics and Heat Transfer (3)
- **MAE 4440** Aerodynamics (3)
- **MAE 4450** Gas Dynamics (3)
- **MAE 4620** Aircraft Flight Performance (3)
- **MAE 4630** Space Flight Mechanics (3)
- **MAE 4940** Aircraft Design (3)

**Auxiliary Courses**

A maximum of 6 credit hours can be counted toward the minor

- **MAE 4001** Topics in Mechanical and Aerospace Engineering (When taken as topics title “Applied Finite Element Analysis”) (3)
- **MAE 4280** Introduction to Finite Element Methods (3)
- **MAE 4320** Design of Thermal Systems (3)
- **MAE 4380** Intermediate Thermodynamics (3)
- **MAE 4600** Advanced Mechanics of Materials (3)
- **MAE 4720** Modern Control (3)

**Contact**

Mechanical & Aerospace Engineering (https://engineering.missouri.edu/departments/mechanical-aerospace-engineering)

phone: 573-882-2684

**Minor in Computational Neuroscience**

Computational neuroscience is becoming an important tool for neuroscientists to understand how complex brain circuits work, for example, what causes post-traumatic stress disorder. This intersection of engineering and neuroscience is allowing great advances in health care, manufacturing and communication.

**Required for all students:**

- **ECE/BIO_SC 4590** Computational Neuroscience (4)

Select 2 courses from the following list:

- **BIO_SC 3700** Animal Physiology
- **BIO_SC 4500** Neurobiology
- **BIO_SC 4560** Sensory Physiology and Behavior
Minor in Energy Engineering

Energy engineering requires many different types of engineers, and this minor lets you choose from several different tracks to fit your career interests. The minor requires completion of 18 credit hours between the core and the tracks.

**Required Core Courses:**
- ENGINR 2100 Circuit Theory for Engineers 3
- or ECE 2100 Circuit Theory I 3
- MAE 2300 Thermodynamics 3
- or CH_ENG 3261 Chemical Engineering Thermodynamics I 3
- ECE 4470 Sustainable Electrical Energy Resources 3
- IMSE 2710 Engineering Economic Analysis 3

**Electric Utility Generation Track**
- ECE 4460 Energy and Machines 3
- ECE 3510 Electromagnetic Fields 3
- MAE 4320 Design of Thermal Systems 3
- MAE 4660 Vibration Analysis 3
- ECE 4410 Power Electronics I 4
- CV_ENG 4250 Environmental Regulatory Compliance 3

**Electric Utility Transmission & Distribution Track**
- ECE 3510 Electromagnetic Fields 3
- ECE 4410 Power Electronics I 4
- CV_ENG 4250 Environmental Regulatory Compliance 3

**Energy Infrastructure and Efficiency Track**
- MAE 4320 Design of Thermal Systems 3
- MAE 4340 Heating and Air Conditioning 3
- MAE 4660 Vibration Analysis 3
- MAE 4380 Intermediate Thermodynamics 3
- CV_ENG 4250 Environmental Regulatory Compliance 3

**Energy Storage Track**
- ECE 4001 Topics in Electrical and Computer Engineering 3
- ECE 4440 Power Systems Analysis 3
- ECE 4410 Power Electronics I 4

**Minor in Medical/Health Physics**

The Minor in Medical/Health Physics is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in the nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related discipline who are interested in the biological effects of radiation in medical utilization and in occupational health and safety.

The minor requires a minimum of 15 credits of course work. As background preparation, the student must have had the prerequisites of a minimum of college algebra and two semesters of college physics.

**Required courses:**
- NU_ENG 4303 Radiation Safety 3
- NU_ENG 4328 Introductory Radiation Biology 3
- NU_ENG 4391 Nuclear Radiation Detection 3
- or CHEM 4600 Introduction to Radiochemistry with Lab

**Select additional courses from the below options:**
- NU_ENG 2201 Topics in Nuclear Engineering 3
- NUCMED 3256 Clinical Nuclear Medicine I 2
- CHEM 4170 Medicinal Chemistry 3
- NU_ENG 4319 Physics and Chemistry of Materials 3
- NUCMED 4329 Radiopharmaceuticals in Nuclear Medicine 3
- BIOL_EN 4570 Fluorescent Imaging 3
- BIOCHM 3630 General Biochemistry 3

**Minor in Naval Science**

A minor in Naval Science is available upon the completion of 20 semester hours to include 11 hours of the lower level (1000 or 2000 level) and 9 hours of the upper level (3000 or 4000 level) Naval Science curriculum.

**Minor in Radioenvironmental Sciences**

The Minor in Radioenvironmental Sciences is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in the nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related discipline who are interested in the environmental aspects of radiation and radioactive materials.

The minor requires a minimum of 15 credits of course work. As background preparation, the student must have had the prerequisites of a minimum of college algebra and two semesters of college physics.

**Required courses:**
- NU_ENG 4303 Radiation Safety 3
- NU_ENG 4328 Introductory Radiation Biology 3
- NU_ENG 4391 Nuclear Radiation Detection 3
- or CHEM 4600 Introduction to Radiochemistry with Lab

**Select two additional courses form the list below:**

Other courses may be in development for this certificate program

* Students may not use MAE 7355 to fulfill both the Graduate Certificate in Energy Efficiency and the Graduate Certificate in Sustainable Energy and Policy (p. 569).

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/degreecategory/energy-efficiency.

Graduate Certificate in Sustainable Energy and Policy

To achieve the goal of reliable and sustainable energy, we need to educate engineers in basics of energy with emphasis on renewable energy, sustainable practices in manufacturing that are informed by new technology, and impact of energy usage on society, economy and the environment. The Graduate Certificate in Sustainable Energy and Policy will give students a broad view of energy engineering, energy economics and policy, and sustainability. The certificate is a stand-alone certificate open to both degree seeking and non-degree seeking students.

mushpadvising@missouri.edu

The School of Health Professions is Missouri’s only state-supported health professions school on a campus with an academic health center. It is uniquely positioned to educate highly qualified health care professionals committed to fulfilling the mission of improving the health and well-being of individuals and communities. Its six departments and eleven accredited academic programs have long and distinguished histories. Graduates of the School of Health Professions are nationally recognized leaders in their fields.

The school offers undergraduate degrees with majors in Athletic Training, Communication Science and Disorders, Diagnostic Medical Ultrasound, Health Sciences, Public Health, Respiratory Therapy, Radiologic Sciences with emphasis in Radiography or Nuclear Medicine Technology, and Clinical Laboratory Sciences with an emphasis in Medical Technology. The school offers graduate degrees in Applied Behavior Analysis, Communication Science and Disorders with an emphasis in Speech-Language Pathology, Diagnostic Medical Ultrasound, Occupational Therapy, Physical Therapy and Public Health. While the current degree offered for Athletic Training is a Bachelor of Health Science, the program is in the process of changing the degree to a Master’s in Athletic Training in order to meet changing requirements established for professional practice. Students are strongly encouraged to check the program's web site (https://healthprofessions.missouri.edu/athletic-training) for updates and changes.

Students gain valuable experience by participating in nationally recognized service centers including PhysZou, Tiger OT, The Adult Day Connection, the MU Speech and Hearing Clinic, Robert G. Comb’s Language Preschool, MU Thompson Center for Autism and Neurodevelopmental Disorders, and more than eight hundred fieldwork sites.

Undergraduate
- Admissions (p. 570)
- Exploratory Courses (p. 570)
- Required Entry Level Courses (p. 570)
- International Admissions (p. 571)
- Academic Regulations (p. 571)
- Enrolling in Other Institutions Simultaneously (p. 571)
- Advising (p. 571)
- Career Development (p. 571)

Admissions
Undergraduate students enrolled in the School of Health Professions work with a professional academic advisor to ensure timely completion of degree program requirements, as well as developing a personalized plan for achieving academic success. Students admitted to a clinical program will be advised by faculty in that department.

Admission to the University and to the School of Health Professions as a pre-health professions student does not guarantee admission for most Bachelor of Health Science degree programs. Application deadlines and requirements vary for each program (the health science major does not require an application). Students are strongly encouraged to seek advising to ensure they are making satisfactory progress towards prerequisites, MU General Education (p. 34), and program requirements.

Exploratory Courses
The School of Health Professions offers introductory courses and experiences to provide information about career opportunities in these areas. These courses are listed below:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

Required Entry-level Courses
All students in the School of Health Professions must complete College Algebra (MATH 1100 or equivalent) and Exposition and Argumentation (ENGLSH 1000) upon completing 60 university-level credit hours, including transfer and MU credit. In addition, the School of Health Professions requires students who are declaring a “pre-Health Professions” or “Undeclared” major to meet the minimum GPA requirement for that program of interest. All undergraduate students are required to declare a plan upon completion of 60 university-level credit hours.

In addition to academic record, attributes such as interpersonal skills, motivation, attitude, interest, commitment and knowledge of the field are considered in selecting students to participate in the professional phase of any program. Applicants may also be evaluated on school and college aptitude tests, pattern of academic achievement, verbal expression, extracurricular activities and motivation demonstrated by employment and volunteer activities.

The application deadlines for the professional component of each program are shown below.

International Admissions

Students whose native language is not English should contact the School of Health Professions for requirements.

Prerequisite Curriculum Requirements

See the degree requirements in the following pages for specific course requirements in the various programs. The student is responsible for meeting graduation requirements for the program and the University. Academic advisors in the School of Health Professions assist students with understanding degree requirements and progress towards degree completion.

Graduation Requirements

In addition to degree and major requirements, students must complete university graduation requirements (p. 33), which include university general education (p. 34) requirements.

Degree Core Requirements

The Bachelor of Health Science degree is granted to candidates who have successfully fulfilled all didactic and clinical requirements of the program as described for each area, in addition to all University requirements (p. 33), including University general education (p. 34) requirements.

In addition to the academic and clinical education requirements of a program, students must possess and exhibit those personal qualities and characteristics that are associated with patient welfare and professional trust. These elements are a part of the overall evaluation process for the professional phase of each program. Should it be determined that these qualities are not present in sufficient degree or that a student does not demonstrate satisfactory growth and progress in these areas, the student is subject to dismissal from the program.

Degree with Honors Requirements

To earn Latin Honors in the School of Health Professions, a student must meet the following requirements:

- 50 graded MU undergraduate credits
- At least a 3.0 MU cumulative GPA
- MU cumulative GPA equal to or greater than 3.5 or
- last 50 graded credits at MU equal to or greater than 3.5
- GPA for each level

Academic Regulations

Time Limits on Credits Earned

Contact each department for information on time limits.

Credits by Examination

Students with previous training or experience may be allowed to earn advanced-standing credit through challenge or equivalency evaluation in certain programs. Contact the Health Professions advising office for information pertaining to the awarding of credit for these exams.

Maximum Credits Enrolled

A student may not enroll for more than 18 credits in a fall or spring term and 9 in a summer term without permission from the advising office; students should contact their advisor for more information.

Independent Study

Students must receive prior approval before enrolling in independent study courses.

Satisfactory/Unsatisfactory Grades

A student wishing to enroll in a course on an S/U basis must receive permission from the advising office.

Enrolling in Other Institutions Simultaneously

Students should consult with their advisor before enrolling in another institution while being enrolled at the University of Missouri.

Advising

Students who are pre-Health Professions, Health Science majors or undeclared Health Professions students will be assigned an advisor in the SHP Advising office. Students who are in a professional program may be advised by a faculty member or a professional advisor.

Career Development

The Office of Career Services in the School of Health Professions offers career advising, résumé, cover letter and personal statement review, mock interviews, LinkedIn consultation, job search strategies, and workshops to enhance students' career development. In addition, the SHP Office of Career Services offers a bi-annual Career and Opportunities Fair, which allows SHP students to connect with employers, graduate and professional programs, internships, and experiential learning opportunities. All Health Science majors are required to take Health Science 2100, a career and professional development seminar course, and experiential learning is an integral component of the School of Health Professions. Students are encouraged to seek out and use SHP Career Services early in their undergraduate career to connect with shadowing opportunities, find part-time employment, and explore clinical and non-clinical career paths.

Graduate

The School of Health Professions offers a wide variety of programs of study for students interested in careers in healthcare. At the graduate level, we offer degrees in

- Applied Behavior Analysis and graduate certificate in Applied Behavior Analysis
Clinical and Diagnostic Sciences, with an emphasis in Diagnostic Medical Ultrasound
Communication Science and Disorders, with an emphasis in Speech-Language Pathology
Occupational Therapy
Physical Therapy
Public Health, with a dual degree option with Social Work, emphasis in Health Promotion and Policy and Veterinary Public Health, and graduate certificates in Public Health, Global Public Health, and Epidemiology

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

Applied Behavior Analysis

The Master of Science in Applied Behavior Analysis (ABA) program is designed to help address the state-wide and national shortage of health care providers by training practitioners to affect meaningful change. ABA is a discipline that relies upon evidenced-based behavioral interventions to improve socially significant behaviors. It has been used as an intervention to improve the quality of life for a variety of populations including, but limited to, individuals with autism spectrum disorder (ASD). The goal of our master's program is to become a leading, accredited professional program that will train highly-skilled Behavior Analysts who apply behavioral science to address the behavioral challenges of individuals in need.

Faculty

Associate Professor: S.W. Kahng
Assistant Visiting Professor: C. Clay

Undergraduate

While MU does not offer undergraduate degrees specifically in Applied Behavior Analysis, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

- MS in Applied Behavior Analysis (p. 572)
- Certificate in Applied Behavior Analysis (p. 572)

The Master of Science in Applied Behavior Analysis (ABA) program will train you to be an exceptional behavior analyst who has the skills to improve quality of life for people with behavioral challenges, including children and adults with developmental needs. You will also gain experience, and knowledge, in cutting edge research in the field of ABA. Behavior analysts successfully use ABA techniques across a variety of populations and settings to bring about meaningful and positive change in behavior. Behavior analysts are employed in numerous fields, including general and special education, mental health, disability, business, and institutions of higher learning. There is a high demand for individuals who finish their degree and obtain certification who then can practice as independent educational specialists or clinicians. The Behavior Analyst Certification Board, Inc. (http://bacb.com) has approved the course sequence as meeting the coursework requirements for eligibility to take the Board Certified Behavior Analyst Examination. Applicants will have to meet additional requirements to qualify.

MS in Applied Behavior Analysis

The course sequence can be completed in two years on campus. The following is a sample program:

</tbody>
</table>

Total Credits: 39

In addition to the coursework requirement, you will need to meet experience standards (http://bacb.com/page/69). The BACB has three experience categories: (a) supervised independent fieldwork (1500 hrs), (b) practicum (1000 hrs), or (c) intensive practicum (750 hrs). Students in the Master’s program will be required to complete intensive practicum at the MU Thompson Center for Autism and Neurodevelopmental Disorders for credit (6 credits) under the supervision of a BCBA.

Graduate Certificate in Applied Behavior Analysis

For information about the Graduate Certificate in Applied Behavior Analysis including a program description go to: https://gradstudies.missouri.edu/degreecategory/applied-behavior-analysis

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/51.2212-Gedt-ABA.html.
Program Director:

David Colt, EdD, LAT, ATC

The Department of Physical Therapy, Athletic Training Program offers a Bachelor of Health Science degree in Athletic Training. The University of Missouri’s Athletic Training Program is currently accredited by the Commission on Accreditation of Athletic Training Education (CAATE), 6850 Austin Center Blvd., Suite 100, Austin, TX 78731-3101. The undergraduate program is currently in the process of transitioning to a master’s degree and will apply to the CAATE for a change in level of degree pending institutional, state, and regional accreditor approval. The Athletic Training program anticipates notifying the CAATE for a level of degree change in late 2018 or early 2019.

The Athletic Training program is no longer accepting students to the undergraduate athletic training program following the 2017-18 academic year. Pending graduate program approval, program updates will be announced, along with requirements, application procedures and timeline on the Athletic Training program web site.

Athletic training is a health care profession in which the Athletic Trainer assumes responsibility for the overall health care of the athletic population, particularly having an integral role in the prevention, recognition, care and rehabilitation of athletic injuries. Athletic Trainers have been employed in traditional settings including high schools, colleges, universities, professional sports teams, hospitals, and rehabilitation clinics. The practice of athletic training also includes, but is not limited to, physicians’ offices, corporate and industrial institutions, the military and the performing arts. Regardless of the practice setting, Athletic Trainers practice athletic training (or provide athletic training services) according to educational preparation and state practice act.

The Athletic Training Program at the University of Missouri is accredited by the Commission on Accreditation of Athletic Training Education (CAATE (http://www.caate.net)). Only graduates of CAATE accredited programs are eligible to sit for the Board of Certification exam.

Faculty

Associate Teaching Professor: D. Colt
Assistant Teaching Professor: D. Belmore, K. Belmore
Adjunct Faculty: M. McElhinney, N. Philpot

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BHS in Athletic Training (p. 573)

Graduate

While MU does not offer graduate degrees specifically in athletic training, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

BHS in Athletic Training

Degree Program Description

Athletic training is a health care profession in which the Athletic Trainer assumes responsibility for the overall health care of the athletic population, particularly having an integral role in the prevention, recognition, care and rehabilitation of athletic injuries. Athletic Trainers have been employed in traditional settings including high schools, colleges, universities, professional sports teams, hospitals, and rehabilitation clinics. The practice of athletic training also includes, but is not limited to, physicians’ offices, corporate and industrial institutions, the military and the performing arts. Regardless of the practice setting, Athletic Trainers practice athletic training (or provide athletic training services) according to educational preparation and state practice act. The Athletic Training Program consists of a one-year pre-professional phase followed by a three-year professional phase. Athletic Training is a professional program requiring secondary admission and a clinical education component. Clinical education experiences are completed at locations on and off campus during the three-year professional phase.

Major Program Requirements

The University of Missouri’s Athletic Training Program is currently accredited by the Commission on Accreditation of Athletic Training Education (CAATE), 6850 Austin Center Blvd., Suite 100, Austin, TX 78731-3101. The undergraduate program is currently in the process of transitioning to a master’s degree and will apply to the CAATE for a change in level of degree pending institutional, state, and regional accreditor approval. The Athletic Training program anticipates notifying the CAATE for a level of degree change in late 2018 or early 2019.

The Athletic Training program is no longer accepting students to the undergraduate athletic training program following the 2017-18 academic year. Pending graduate program approval, program updates will be announced, along with requirements, application procedures and timeline on the Athletic Training program web site.

Total Credits: 120

*The Freshman year is considered pre-professional. Students apply into the professional portion of the program during the Freshman year. All students applying into the professional portion of the program must meet the minimum requirements for application into the BHS in Athletic Training degree program.

Click here (https://healthprofessions.missouri.edu/athletic-training/bhs-in-athletic-training/application) for ATP Application Requirements and Forms.

Clinical and Diagnostic Sciences

The Clinical and Diagnostic Sciences BHS is made up of five programs: Clinical Laboratory Sciences, Diagnostic Medical Ultrasound, Nuclear Medicine, Radiological Science, and Respiratory Therapy.

Clinical Laboratory Science Program
School of Health Professions
605 Lewis Hall
(573) 882-8011 and (573) 884-1847
Director: Steven Starr

Clinical laboratory scientists are skilled, certified professionals trained in the theoretical and practical aspects of clinical laboratory medicine – chemistry, hematology, microbiology, immunology, molecular pathology, and blood banking. Clinical Laboratory Scientists have various levels of responsibility - as staff technologists, research technologists, supervisors, managers, or educators – and can work in a variety of settings, including hospitals, clinics, laboratories, and research centers. Approximately 60 to 70 percent of all medical decisions regarding a patient’s diagnosis and treatment, as well as their hospital admission and discharge, are based upon laboratory test results obtained by Clinical Laboratory Scientists.

The Clinical Laboratory Science (CLS) program at MU is a unique collaboration with the University of Nebraska Medical Center in Omaha. The CLS program includes three years of prerequisite coursework, requiring 16 hours of both Biology and Chemistry, and 11 months in the clinical phase of the CLS program. The clinical year begins during the third week of May, with 11 weeks of coursework and clinical lab rotations in a dedicated summer student lab facility at the University of Nebraska’s Medical Center in Omaha. After the initial 11 weeks in the
program, CLS students return to Columbia and complete their clinical laboratory rotations at one of three clinical sites, which include the University of Missouri Hospital and Clinics, Boyce and Bynum Pathology Laboratories, and Harry S. Truman Memorial Veteran’s Hospital. Students graduate with a Bachelor of Health Science degree in Clinical and Diagnostic Sciences with emphasis in Clinical Laboratory Science from the University of Missouri with a Certificate in Medical Technology from the University of Nebraska Medical Center.

**Diagnostic Medical Ultrasound Program**
School of Health Professions  
406 Lewis Hall  
(573) 884-2994  
Director: Moses Hdeib

The Diagnostic Medical Ultrasound (DMU) Program in the School of Health Professions (http://shp.missouri.edu) at the University of Missouri (http://www.missouri.edu) offers a Bachelor of Health Science (BHS) in Diagnostic Medical Ultrasound. The DMU Program is a 35-40 hours per week, 52 weeks per year Clinical Education Program. The DMU program has over 25 clinical sites through the state of Missouri in which students are placed during their clinical training.

**Nuclear Medicine Program**
School of Health Professions  
605 Lewis Hall  
(573) 884-7843  
Director: Glen Heggie

The nuclear medicine technologist is concerned with the use of radioactivity for patient diagnosis, monitoring of treatment and in some cases the treatment itself. The nuclear medicine technologist uses radioactive compounds to perform body function studies, produce images of internal organs and analyze biological specimens.

Nuclear Medicine uses extremely small amounts of radioactive compounds in order to image and assess the function and state of health of many of the body’s internal organs, and to treat some forms of cancer. It is a multidisciplinary field dependent upon contributions from Physics, Chemistry and Medicine. This highly sophisticated discipline is at the forefront of discovering and understanding the complex physiologic processes of our bodies. This discipline is of enormous importance to medical specialties such as Cardiology (heart), Neurology (nervous system), Oncology (cancer), Orthopedics (bone), Endocrinology (hormone system), Hematology (blood), Nephrology (kidney), and Pulmonology (lung).

**Radiological Science Program**
School of Health Professions  
607 Lewis Hall  
(573) 884-2623  
Director: Patricia Tew

Radiographers are highly skilled health professionals who work closely with physicians and specialize in the use of x-rays. They provide patient services using a variety of imaging modalities. In addition to conventional x-ray procedures, the radiographer also works with computerized axial tomography (CT), magnetic resonance imaging (MRI), cardiovascular-interventional technology, mammography, bone densitometry, and quality management.

Established in 1960, the Radiography Program is the only baccalaureate level program at a public institution of higher education in Missouri. This discipline provides preparation for leaders in the field by offering a Bachelor of Health Science degree. Graduates have demonstrated their superior achievement through their performance on national certifying examinations with a 100% overall pass rate. After graduating from the program, students may choose to do an additional clinical externship in computerized tomography or magnetic resonance imaging, which will lead to a certificate of completion and eligibility to take the national certifying examination in that area.

**Mission Statement:**

The primary mission of the radiography program is to prepare highly competent, registry eligible professionals in the medical imaging sciences. Our program and curriculum are designed to provide an educational foundation for the advancement into leadership and managerial positions within medical imaging, as well as providing an environment where scholarly activity, professional development, and service are expectations. Our curriculum enables successful graduates to readily interact with a variety of health care and science related fields.

**Respiratory Therapy Program**
School of Health Professions  
617 Lewis Hall  
(573) 882-9722  
Program Director: Monica Schibig

The University of Missouri Respiratory Therapy Program was established in 1967. The program is credited to be among the country’s first baccalaureate degree programs in Respiratory Therapy. The University of Missouri's Respiratory Therapy program prepares graduates for the Advanced Practitioner level, Registered Respiratory Therapist (RRT) and students graduate with a Bachelor of Health Science in Respiratory Therapy.

The Mission of the University of Missouri Respiratory Therapy Program is to coordinate superior classroom, laboratory, and clinical experiences to prepare advanced Respiratory Care Practitioners, develop learners who will effectively engage in professional leadership roles, and provide an environment where research and service are expectations.

**Faculty**

**Clinical Laboratory Science Program**
Clinical Professor G. D. Heggie*  
Clinical Instructor S. Starr

**Diagnostic Medical Ultrasound Program**
Clinical Professor M. M. Hdeib*

**Radiological Sciences Program**
Clinical Associate Professor C. Allen  
Clinical Assistant Professor M. Sebacher, P. Tew

**Respiratory Therapy**
Clinical Professor G. D. Heggie*  
Associate Clinical Professor K. S. Moss*, M. A. Schibig  
Assistant Clinical Professor L. M. Lair, J. L. Keely, S. W. Parker
Degree Program Description

For this degree program, students must choose an emphasis area: Clinical Laboratory Science, Diagnostic Medical Ultrasound, Nuclear Medicine, Radiography, and Respiratory Therapy. Each emphasis area prepares graduates for critical diagnostic and disease management roles that are highly technical and primarily situated in acute care environments. These nationally accredited entry-to-professional practice programs emphasize experiential learning in a wide variety of clinical sites that are highly relevant to current workforce demands. Refer to the degree program descriptions for the emphasis areas for more details.

Major Program Requirements

Please refer to the emphasis area pages for degree requirements: Clinical Laboratory Science (p. 576), Diagnostic Medical Ultrasound (p. 577), Nuclear Medicine (p. 579), Radiography (p. 580), Respiratory Therapy (p. 581).

Semester Plan

Please refer to the emphasis area pages for semester plans: Clinical Laboratory Science (p. 576), Diagnostic Medical Ultrasound (p. 577), Nuclear Medicine (p. 579), Radiography (p. 580), Respiratory Therapy (p. 581).

BHS in Clinical and Diagnostic Sciences with Emphasis in Clinical Laboratory Science

Degree Program Description

Clinical laboratory scientists are skilled, certified professionals trained in the theoretical and practical aspects of clinical laboratory medicine - chemistry, hematology, microbiology, immunology, molecular pathology, and blood banking. Clinical Laboratory Scientists have various levels of responsibility - as staff technologists, research technologists, supervisors, managers, or educators - and can work in a variety of settings, including hospitals, clinics, laboratories, and research centers. Approximately 60 to 70 percent of all medical decisions regarding a patient's diagnosis and treatment, as well as their hospital admission and discharge, are based upon laboratory test results obtained by Clinical Laboratory Scientists. The Clinical Laboratory Science (CLS) program at MU is a unique collaboration with the University of Nebraska Medical Center in Omaha. The CLS program includes three years of prerequisite coursework, and 11 months in the clinical phase of the CLS program. The clinical year begins during the third week of May, with 13 weeks of coursework and clinical lab rotations in a dedicated summer student lab facility at the University of Nebraska's Medical Center in Omaha. After the initial 13 weeks in the program, CLS students return to Columbia and complete their clinical laboratory rotations at one of three clinical sites, which include the University of Missouri Hospital and Clinics, Boyce and Bynum Pathology Laboratories, and Harry S. Truman Memorial Veteran's Hospital. Students graduate with a Bachelor of Health Science degree in Clinical and Diagnostic Sciences with emphasis in Clinical Laboratory Science from the University of Missouri with a Certificate in Medical Technology from the University of Nebraska Medical Center. Upon completion of the program, students are eligible to take the Medical Technology Licensure examination given by the American Society for Clinical Pathology (ASCP).

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34). All courses listed below require a grade of C- or better for the CLS program. In addition to the degree requirements below, the CLS program requires an application, including an interview, and students are encouraged to work with an advisor in order to best structure the prerequisites and prepare for the program application. The application process is competitive, and meeting minimum criteria does not guarantee admission. There are a limited number of clinical positions...
are available. A minimum 2.5 cumulative in addition to a math/science course G.P.A. are required to be considered for acceptance.

**NOTE:** Third Year - Summer to be completed in Omaha.
Degree Program Description

Ultrasoundography, commonly called sonography, is a diagnostic medical procedure that uses high-frequency sound waves to produce dynamic visual images of organs, tissues, or blood flow inside the body. This type of procedure is often referred to as a sonogram or ultrasound scan. Ultrasoundography can be used to examine many parts of the body, such as the abdomen, breasts, female reproductive system, superficial structures, prostate, heart, and blood vessels. Ultrasoundography can record capture size, function, structure, and any pathological lesions with real-time tomographic images in 2D, 3D. The professionals who perform these procedures are known as sonographers or ultrasound technologists. There are several areas of specialization in the field of ultrasound: Abdomen, Obstetrics/Gynecology, Echocardiography, and Vascular technology. The Diagnostic Medical Sonographer performs an essential role in the process of data gathering and synthesis required to reach a diagnosis. Ultrasound is a profession requiring a high degree of independence, skill, judgment, and knowledge. Sonographers work in hospitals, clinics, private physician offices, and other medical facilities performing examinations in their areas of specialization. The Diagnostic Medical Ultrasound (DMU) Program offers multiple educational options.

Major Program Requirements

The Diagnostic Medical Ultrasound (DMU) Program offers multiple educational options.

Students must complete the courses below with a grade of C or higher to earn the BHS in Clinical and Diagnostic Science with an emphasis in Diagnostic Medical Ultrasound, in addition to degree and University requirements (p. 33), including University general education (p. 34) requirements. In addition to the degree requirements below, the Diagnostic Medical Ultrasound program requires an application, including an interview, and students are encouraged to work with an advisor in order to best structure the prerequisites and prepare for the program application.

** DMU 1000 Introduction to Diagnostic Medical Ultrasound is required for application to the DMU Program. Prospective students may enroll in the fall semester or the spring semester.

BHS in Clinical and Diagnostic Sciences with Emphasis in Nuclear Medicine

Degree Program Description

The nuclear medicine technologist is concerned with the use of radioactivity for patient diagnosis, monitoring of treatment and in some cases the treatment itself. The nuclear medicine technologist uses radioactive compounds to produce images, treat diseases and to analyze biologic specimens. The curriculum incorporates the fundamentals needed for specialization as a nuclear medicine professional. Accreditation of the program is granted by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology.

Major Program Requirements

Students must complete the courses below with a grade of C or higher to earn the BHS in Clinical and Diagnostic Science with an emphasis in Nuclear Medicine, in addition to degree and University requirements (p. 33), including University general education (p. 34) requirements. In addition to the degree requirements below, the Nuclear Medicine program requires an application, including an interview, and students are encouraged to work with an advisor in order to best structure the prerequisites and prepare for the program application.

</table>
Radiologic technologists are highly skilled medical imaging professionals who work closely with physicians to perform procedures used to diagnose, monitor, and treat disease. They provide patient services using a variety of imaging modalities such as general x-ray, magnetic resonance imaging (MRI), computerized axial tomography (CT-scan), cardiovascular-interventional technology, mammography, bone densitometry, and quality management. Students finish their general education requirements and program prerequisites (biology, chemistry, anatomy, physiology, medical terminology, and statistics) during their freshman and sophomore years. The professional phase of the program begins summer semester between years two and three of undergraduate study, and consists of six consecutive semesters of classroom courses integrated with clinical experiences at several facilities in Columbia, MO. The program places an emphasis on active learning and provides many opportunities to develop skills needed for future education and career advancement. Upon graduation students are well-prepared to sit for the national registry exam in general diagnostic imaging. An advanced imaging clinical externship is available to students who wish to gain competency and become registered in MRI or CT. Graduates may work in a variety of settings including hospitals, clinics, imaging centers, mobile services, research centers, and industry as staff technologists, specialty technologists, supervisors, managers, applications specialists, researchers, or educators. Hospital settings give technologists an opportunity to choose working hours around the clock, throughout the entire 7-day week and may require on-call hours.

### Major Program Requirements

Accreditation of the program is granted by:

The Joint Review Committee on Education in Radiologic Technology
20 North Wacker Drive, Suite 2850
Chicago, Illinois 60606-3182
(312) 704-5300
mail@jrcert.org

Students transferring from other institutions should contact the program director to identify appropriate pre-requisite courses for admission. All pre-requisite courses require a grade of C- or higher, and students must make a separate application to begin the professional phase and earn a BHS in Clinical and Diagnostic Science with an emphasis in Radiography. Students must complete pre-requisite courses in addition to major, degree and University requirements (p. 33), including University general education requirements (p. 34).

Course is taught solely on the internet.

BHS in Clinical and Diagnostic Sciences with Emphasis in Respiratory Therapy

Degree Program Description

Respiratory care is a diverse, growing, health profession with extensive patient contact, often with the critically ill. Respiratory therapists administer prescribed respiratory care and life support to patients with deficiencies and abnormalities of the cardiopulmonary system. They work in many settings requiring a considerable degree of independent clinical judgment under the direct or indirect supervision of a physician. The two-year, professional phase of the program begins the summer semester of the junior year. Students complete lecture and laboratory courses designed to develop knowledge and skills necessary for application to the clinical settings. Required courses in management, research, respiratory physiology and pharmacology, pathology and cardiology are integrated with the respiratory therapy curriculum. The final semester of the program consists entirely of clinical externships and online coursework. Students may select affiliated hospitals outside the Columbia area for this clinical experience or remain in Columbia. The MU RT program has a satellite campus at Mercy Hospital in St. Louis, Missouri. Accreditation of the program is granted by the Commission on Accreditation for Respiratory Care (CoARC) www.coarc.com (http://www.coarc.com). Published outcomes for all CoARC accredited programs are listed by state at: www.coarc.com/Students/Programmatic-Outcome-Data.aspx

Major Program Requirements

Students must complete the courses below with a minimum grade of C- or higher for admission to the program, and a separate application is required for the professional phase of the program. Students transferring from other institutions should contact the program director to identify appropriate courses for admission. Students must complete the courses listed below in addition to degree and University requirements to earn the BHS in Clinical and Diagnostic Science with an emphasis in Respiratory Therapy.

MHS in Clinical and Diagnostic Sciences

Degree Requirements

Graduate students must maintain a 3.0 grade point average in all courses required for the degree. Failure to achieve a semester cumulative grade point average of 3.0 in required courses will result in delay of graduation or dismissal from the program. Students are expected to maintain full-time enrollment in the sequenced curriculum and complete the degree requirements as outlined in the course of study.

Admission Contact Information
Dr. Moses Hdeib hdeibm@health.missouri.edu
406 Lewis Hall
Columbia, MO 65211
(573) 884-2994
Admission Criteria

Deadline for spring entrance: December 1

- Minimum TOEFL scores:
  The minimum TOEFL score for the Diagnostic Medical Ultrasound Program is 100 in the new scoring model. This is equivalent to a paper-based score of 600. Test of Written English (TWE) - 4.5
- Minimum GRE score: check with Program Director of Graduate Studies
- Undergraduate GPA minimum: 3.00 (A=4.0) for the last 60 hours of college work

Potential applicants who have all the prerequisites for admission to the program should submit their application early (before November) in the fall of the academic year in order to be considered for early acceptance with start in the following spring semester. Please contact the director of graduate studies.

Required Application Materials

To the Graduate School:

- All required Graduate School documents
- GRE scores

To the Diagnostic Medical Ultrasound Program:

- Departmental Application
- Transcripts

mucsd@health.missouri.edu

Advising Contact

Jill S. Diener or Lindsey Hagglund
(573) 882-8011

Communication Science and Disorders includes the study of normal language, speech, and hearing across the life span, as well as communication disorders that result from biological, environmental, and behavioral factors. Communication Science and Disorders includes the professions of speech-language pathology and audiology.

Speech-language pathologists evaluate the speech and language of children and adults to determine whether problems exist in such areas as voice, articulation, fluency, and receptive or expressive language. They also plan and carry out programs for the treatment of these problems. Audiologists evaluate hearing, identify hearing loss, and participate in the rehabilitation of persons with hearing impairments.

The professions of speech-language pathology and audiology require master's or doctoral degrees. Acceptance to an undergraduate program does not guarantee acceptance to a graduate program. Refer to the Graduate Catalog for information about the MHS degree (p. 585).

Faculty

Associate Professor J. C. Goodman**, S. A. Wagovich**
Assistant Professor R. Botezatu*, M. Dietrich**, E. S. Kelley**, M. Kuruvilla**
Associate Clinical Professor D. R. Fritz*, L. B. Lawrence*, B. A. McLay*
Assistant Clinical Professor C. Baker, G. Hull, G. Nolan
Clinical Instructor L. M. Frye
Research Associate Professor Emerita L. S. Day*

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BHS in Communication Science and Disorders (p. 584)

Graduate

- MHS in Communication Science and Disorders (p. 585)
  - with emphasis in Speech-Language Pathology (p. 586)

About Communication Science and Disorders

The field of Communication Science and Disorders, or CSD, encompasses the related but distinct disciplines of speech-language pathology (SLP), audiology, and speech, language, and hearing sciences (SLHS). Speech-language pathologists and audiologists are professionals educated in human communication and its disorders. Speech-language pathologists diagnose and treat disorders such as delayed language development, stuttering, articulation, and voice problems. Audiologists specialize in the prevention, identification, assessment, and rehabilitation of hearing disorders. Speech, language, and hearing scientists are professionals concerned with exploring trends in the communication sciences, as well as developing strategies for improving or adding to the knowledge base within the fields of speech-language pathology and audiology.

MU established its first independent master's and doctoral programs in speech-language pathology and audiology in the 1940s. The MU master's degree program in speech-language pathology has been continuously accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology since 1966. An active local chapter of the National Student Speech Language Hearing Association is sponsored by the program.

The master's degree prepares students for national certification in speech-language pathology and for professional clinical practice in both...
health care and educational settings. The doctoral degree involves a program of research and advanced study beyond the clinical master’s degree in preparation for a career in research and college teaching or administration.

**Career Opportunities**

A wide variety of work settings are available to speech-language pathologists and audiologists. Possibilities range from hospitals, clinics, and rehabilitation centers to schools, colleges and universities, government agencies, and private practice. Speech, language, and hearing scientists work primarily in colleges and universities, research labs and government agencies. Professional certification in speech-language pathology and audiology is awarded by the American Speech-Language-Hearing Association (ASHA). The master’s degree, which is the entry-level degree for speech-language pathologists, typically takes two years beyond the undergraduate degree. Additional prerequisite coursework is required for students with undergraduate degrees outside the field. Students wishing to pursue a career in audiology will need to attend a program that offers a clinical doctorate in audiology (AuD), the entry-level degree for audiologists.

**Facilities and Resources**

The department uses many cooperative facilities in Columbia, both on and off the MU campus, as clinical and scientific resources. Among these are the University Hospitals and Clinics, Rusk Rehabilitation Center, Ellis Fischel Cancer Center, Truman Memorial Veterans Hospital, Adult Day Connection, Assistive Technology Evaluation Center, Thompson Center for Autism and Neurodevelopmental Disorders, and Columbia Public Schools.

Other cooperative facilities are available both within and outside the State. The department operates the MU Speech and Hearing Clinic, a diagnostic and treatment center serving individuals with communication disorders from the campus and the community, the MU Robert G. Combs Language Preschool, and the Accent Modification and Pronunciation Program. In addition, there are many research opportunities for students in the laboratories of individual faculty where they may gain experience with sophisticated equipment for research and clinical evaluation in normal and disordered speech, language, and hearing. A master’s thesis option is available to students interested in conducting research.

**Funding**

All graduate students are considered for available scholarships, fellowships, work-study grants, traineeships and graduate teaching and research assistantships.

**BHS in Communication Science and Disorders**

**Degree Program Description**

Communication Science and Disorders (CSD) includes the study of normal language, speech and hearing across the life span, as well as communication disorders that result from biological, environmental, and behavioral factors. The CSD major is the first step in preparing for careers in the professions of speech-language pathology and audiology. Speech-language pathologists evaluate the speech and language of children and adults to determine whether problems exist in such areas as voice, articulation, fluency, and receptive or expressive language, and they plan and carry out the treatment of these problems. Audiologists evaluate hearing, identify hearing loss, and participate in the rehabilitation of persons with hearing impairments.

The CSD undergraduate curriculum fully prepares students for graduate study in either of these fields. (The professions of speech-language pathology and audiology require masters or doctoral degrees.) The CSD undergraduate coursework provides students with a broad understanding of the scientific bases of speech, language, and hearing, the different types of communication disorders, and the types of diagnostic and therapeutic methods utilized in the field. Undergraduate students in the CSD department at MU benefit from a low student-faculty ratio, practical clinical experience in our language preschool, our accent modification program, and our research labs led by outstanding faculty, and a well-established student organization.

**Major Program Requirements**

Students are required to apply to the Communication Science and Disorders major. Applications for admission into the BHS program are considered once a year, and they must be submitted by February 1 of the student’s sophomore year. (Note: Later applications will be considered if open seats remain in the upcoming junior class.) In most cases, applicants will have completed at least 42 hours of college credit before applying, and students who are admitted will have completed 60 hours of college credit before beginning coursework as Communication Science and Disorders majors. A minimum GPA of 2.75 on a four-point scale and a composite score of 22 or above on the ACT are strongly recommended. However, meeting the minimum criteria and declaring a major of pre-Communication Science and Disorders do not guarantee acceptance into the program. A grade of C- or higher is required in the program and major core requirements.

Students must complete the following course requirements, as well as university (p. 33) and general education requirements for graduation with a bachelor’s degree from the School of Health Professions and the University of Missouri:

**Program Requirements**

<table>

**Total Credits: 120**

**MHS in Communication Science and Disorders**

**Plan of Study**

MHS candidates are required to complete a minimum of 48 semester credit hours in graduate-level courses with grades of B- or higher. No fewer than 24 credit hours must be earned in 8000/9000-level course work offered by the program. A maximum of 9 credit hours in clinical practicum courses may be counted toward the 48-hour requirement. Additional credit hours are required to meet clinical practicum requirements for certification and licensure in the field.

**Thesis Option**

The student may choose the thesis option for the master's degree; work toward the thesis may count for up to six semester hours of credit.

**Prerequisite Coursework**

All applicants to the MHS program in Communication Science and Disorders with an emphasis in Speech-Language Pathology must have completed, or be in the process of completing, standard prerequisite course work in CSD. Any prospective applicant with an undergraduate degree in a major field other than Communication Science and Disorders should contact the Department prior to submitting an application to the MHS program. Prerequisite course work must be approved by the CSD Director of Graduate Studies prior to application. Many options exist for completing prerequisite course work nationwide. Please contact the Department for more information.

**Examination**

During the final semester of course work, we expect master’s degree candidates to achieve a passing score on the PRAXIS II Examination in Speech-Language Pathology. This exam serves as the comprehensive examination for the degree. See the program’s online Graduate Student Handbook for additional information.

**Admission Contact Information**

Nick Anagnostis mucsd@missouri.edu
301 Lewis Hall; Columbia, MO 65211
(573) 884-6085

**Admission Criteria**

Deadline for Summer entrance (required for all applicants): February 1

- Minimum Undergraduate GPA: 3.0 (on last 60 credit hours of course work)
University of Missouri

• Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>100*</td>
<td>600</td>
</tr>
</tbody>
</table>

• Minimum TOEFL (iBT) score of 100, with minimum score of 28 on speaking

• Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal + Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>
<td>1000 (preferred)</td>
<td></td>
</tr>
<tr>
<td>On or After August 1, 2011</td>
<td>300 (preferred)</td>
<td></td>
</tr>
</tbody>
</table>

Required Application Materials

All applicants to the MHS program in Communication Science and Disorders with an emphasis in Speech-Language Pathology must apply through the Communication Sciences and Disorders Centralized Application Service (CSDCAS) Application (https://csdcas.liaisoncas.com/applicant-ux/#/login). The CSDCAS Applicant Portal Link will open on August 2, 2018 to begin accepting applications for the 2019-20 academic year. Additional information about the application process may be found on the Communication Science and Disorders MHS Application (https://healthprofessions.missouri.edu/communication-science-and-disorders/degrees/master-of-health-science-csd/#application-process) webpage, which includes the correct institution code for submitting GRE scores to CSDCAS.

Personal interviews may be requested.

Students who are accepted into the MHS program and commit to attending the University of Missouri will be required to complete the MU Graduate School’s online application which includes an additional fee. Information will be provided when admission is offered.

Admission Process

The current graduate admission process in Speech-Language Pathology is highly competitive nationwide. All MHS admission decisions are made by the Departmental Graduate Admissions Committee.

Financial Aid from the Program

All applicants accepted for admission to the MHS program will be considered for departmental financial aid.

MHS in Communication Science and Disorders with Emphasis in Speech-Language Pathology

The Master of Health Science (MHS) degree program prepares students for professional practice in speech-language pathology. Students in this program receive a strong academic and clinical background in current theory and application in the field of communication disorders from faculty who are committed to excellence in teaching and who are involved in clinical and basic research. Candidates for the MHS degree must complete a minimum of 48 credit hours of graduate coursework plus at least 375 hours of clinical practicum that is supervised by certified clinical faculty. In addition to the MU Speech and Hearing Clinic, the city of Columbia and surrounding communities in mid-Missouri provide for a wide range of clinical practicum opportunities as well as a diverse client population. Students who wish to also may pursue clinical practicum experiences in other geographical locations during their final semester in the program. A thesis option also is available for students interested in research and/or further study toward the Doctor of Philosophy degree.

The MHS degree in CSD typically takes students two full years to complete if their baccalaureate degree is in communication science and disorders. If their undergraduate study was in another field, the degree program requires at a minimum 30 additional credit/semester hours of prerequisite coursework. This coursework may be completed through any college or university that offers an undergraduate degree in CSD and must include courses in both basic communication sciences and some communication disorders. It is recommended that the student have their prerequisite coursework approved by the Department’s graduate program director prior to application to the MHS degree program. Applicants do not have to complete all prerequisite coursework before applying to, or beginning, the MHS program; however, they must be, at a minimum, in the process of doing so. All students must have successfully completed a baccalaureate degree (in some field) before beginning the MHS program in Communication Science and Disorders. For more information, contact the Department at mucsd@health.missouri.edu.

MHS graduates are required to meet all academic and clinical requirements for the Certificate of Clinical Competence (CCC) awarded by the American Speech-Language Hearing Association (ASHA). A passing score of 162 on the PRAXIS II Speech-Language Pathology examination is required for graduation from the MHS program in CSD. In addition to serving as the comprehensive examination for masters candidates in CSD, the PRAXIS II also is required for the Certificate of Clinical Competence, for Missouri professional licensure, and for Missouri school certification as a speech language specialist. For well over 20 years, 100% of all graduates from MU’s CSD program have passed this national exam and our mean and median scores are significantly higher than the national averages. In addition, graduates of the program have enjoyed excellent job opportunities upon graduation, with many having more than one job offer before finishing their masters program.

The CSD MHS program at MU is relatively small and selective. Students benefit from a low student-faculty ratio, close supervision in the MU Speech and Hearing Clinic, and a challenging yet supportive learning environment. Faculty in CSD are easily accessible, and strong student-faculty relationships are easily developed.

The CSD department welcomes all visitors interested in meeting our faculty and students and touring our facilities. If you would like to visit, we recommend that you schedule an appointment by e-mailing us at mucsd@health.missouri.edu.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MHS in Communication Science and Disorders (https://gradstudies.missouri.edu/degreetcategory/communication-science-and-disorders) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.
Health Science

R. Hogan, Chair
School of Health Professions
501 Clark Hall
(573) 882-8422
hogan@health.missouri.edu

The Department of Health Sciences (DHS) is part of the School of Health Professions (SHP), which serves the citizens of Missouri through its outstanding research, community service clinics, and the education of students in the areas of health literacy and health promotion. Faculty in DHS teach courses for the health science program and are actively involved in a wide range of interdisciplinary research. Our faculty provide expertise in several domains including public health, psychology, sociology, medical anthropology, education, and social work. Faculty research covers a wide range of topics including health promotion, health communication, decision support, health disparities for disadvantaged groups, and access to healthcare. Our research also spans a number of substantive areas including Autism Spectrum Disorders, breast cancer, HIV/AIDS, aging, and adolescent health.

Students can only earn the BHS in Health Science concurrently with the Doctor of Physical Therapy (p. 777) if they have been admitted through the Department of Physical Therapy’s early admission program option. Students who choose to pursue this option are strongly encouraged to work with their advisor to ensure completion of degree requirements.

Faculty

**Associate Professor** A. Frech, E. Schatz*, M. Telt*, N. Cheak-Zamora*

**Associate Clinical Professor** R. Hogan

**Associate Teaching Professor** B. Blackburn, K. Flynn Peters, M. Kuhnert, C. Orbann, D. Ruggeri, L. Saffran

**Assistant Professor** C. Altman, H. Choi, W. Majee

**Assistant Teaching Professor** R. Bowman, M. Vetter-Smith, J. Wintemberg

**Instructor** D. Hume*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BHS in Health Science (p. 588)
  - with emphasis in Health & Wellness Services (p. 589)
  - with emphasis in Leadership & Policy (p. 590)
  - with emphasis in Pre-Professional (p. 591)
  - with emphasis in Rehabilitation Sciences (p. 592)

The Department of Health Sciences’ BHS in Health Science degree program is for students who wish to enter non-clinical health careers such as medical case management, corporate wellness, human services, medical sales, pharmaceutical manufacturing and distribution, and more. Graduates of the Health Science degree program may also be qualified to enter either graduate or professional health science programs such as Occupational Therapy, Physical Therapy, Health Administration and Public Health. The Health Science program requires physical, biological, behavioral and social sciences to provide students with an education in foundational sciences, human function, health research, service and policy.

The department offers the Bachelor of Health Science in Health Science (BHS). Students who start at the University of Missouri or declare the health science degree in Fall 2016 or later must declare an emphasis area upon declaring the major. Students in the Mizzou Online program will not be required to declare an emphasis area, though declaring an emphasis area may be an option depending on the student's interests and background.

Departmental Requirements

Courses may be delivered using traditional or distance delivery methods. The Health Science degree program credits must include a minimum of 120 university-level credit hours, including: general education (p. 34) coursework, core required courses that comprise a minimum of 20 credit hours, professional emphasis requirements, 18 hours of approved, required electives that complement the student's intended pathway.

Students are required to file a graduation plan for the Health Science degree by the time they have completed 60 university-level credit hours, including all MU and transfer credits. Students should meet with their academic advisor to discuss the graduation plan, and then file their plan prior to early registration for the fall and spring semesters. Students who transfer from another institution or another school/college at MU with 60 or more hours must file their graduation plan within the first semester of enrollment in the Health Science program.

Residency Requirement

There is a residency requirement for Health Science majors. Students must complete, at minimum, their last 30 hours of coursework for the degree as declared Health Science majors in the School of Health Professions. The 30 hour residency requirement applies to students who wish to declare an emphasis area, as well. Students must be in the Health Science major at the beginning of a semester to include the hours in the residency requirement. Residency requirement hours for students transferring into the major during the semester will begin the following semester.

Admission to the BHS in Health Science

The BHS in Health Science Program does not require an application. Students may declare the major, and emphasis area, by indicating it on the MU admission application (for new students), completing a transfer of division form (for current MU students), or notifying their academic advisor of their intention to declare a Health Science major (for current SHP students). There is a 2.0 MU, cumulative and term GPA requirement to declare a major in Health Science. The cumulative GPA is calculated using all MU and transfer coursework. Students must maintain the 2.0 GPA, term and cumulative, to remain in the Health Science program. Students who do not maintain the required 2.0 term and cumulative GPA will receive communication regarding probation or ineligible to re-enroll status. Students who fail to achieve the GPA requirement may continue in the program for two probationary semesters.

Graduate

While MU does not offer graduate degrees specifically in health sciences, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the
other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

**BHS in Health Science**

**Degree Program Description**

A Health Science major is for students who are interested in non-clinical health careers and for those interested in graduate or professional health science programs. Non-clinical health career options include medical case management, corporate wellness, human services, medical sales, pharmaceutical manufacturing and distribution, and more. Graduates holding the BHS in Health Sciences may also be qualified to enter either graduate or professional health science programs, such as physical therapy, public health, chiropractic medicine, health informatics and hospital administration. On-campus, Health Science majors choose one of four sub-plans. These sub-plans include: Rehabilitation Sciences, for students pursuing physical therapy, occupational therapy, chiropractic, orthotics/prosthetics, and similar degrees; Pre-Professional, for students who are pre-medicine, dentistry, pharmacy, physician assistant studies, optometry and related graduate/professional programs that require an undergraduate degree; Leadership and Policy, for students who are interested in pursuing non-clinical pathways after graduation, through graduate programs in health administration or working in areas such as health informatics, sales, program coordination and support areas in healthcare; and Health and Wellness Services, for students who wish to pursue health promotion, wellness programming, non-profit work, applied behavioral analysis, as well as students who wish to pursue accelerated nursing after graduation with the health science degree. The health sciences curriculum includes courses in public health, health literacy, healthcare leadership and management, healthcare policy and funding, and clinical ethics. The capstone course sequence includes a required internship experience appropriate for the chosen sub-plan. Students may choose a health sciences study abroad experience approved by the Office of Experiential Learning to meet the internship requirement.

**Major Program Requirements**

- Students must have a 2.0 GPA, most recent fall or spring term, cumulative including all transfer credit, and MU GPA to declare the Health Science major.
- All required core and elective coursework for the BHS in Health Science program, including emphasis and approved health science elective courses, must be completed with a grade of C- or higher.
- If a student earns a deficient grade in a core required course for the Health Science major, they may repeat a core required course one time. If the second attempt is not a C- or higher, students are required to transition out of the major.
- Students must complete all university requirements, including general education (p. 34), and Departmental Requirements (p. 587), in addition the degree requirements below.

**Capstone Requirement**

The BHS in Health Science capstone is comprised of two courses: HLTH_SCI 4975 and HLTH_SCI 4985. HLTH_SCI 4975 is an internship that is approved by the Department of Health Sciences' Office of Experiential Learning. Students may find their own internship experience or work with the course instructor/internship advisor to identify an appropriate placement given interests and goals.

Students may choose from:

- an internship at an agency, company, or corporation of their choice.
- service learning project which allows a student to serve approximately 50 clock hours in an organization. This can be arranged with the Internship advisor or through the Office of Service Learning on campus, and
- an approved study abroad program

In addition to University of Missouri requirements, including University general education, the Health Science degree requires the following, each of which must be completed with a grade of C- or higher:

**Health Science Electives**

Students must complete 18 hours of approved elective coursework. At least 9 credit hours must be from 3000/4000 level courses. Students must complete coursework in at least two out of the following three thematic areas: Social/Behavioral; Medical/Biological; Administrative/Leadership.
**Semester Plan**

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

Total Credits: 120

**BHS in Health Science with Emphasis in Health & Wellness Services**

**Degree Program Description**

The health and wellness services emphasis will prepare students for application to clinical or graduate programs in fields such as accelerated nursing, applied behavior analysis, or health education and promotion. The health and wellness services emphasis may also prepare students who have appropriate work experience as an undergraduate to work in fields such as health and human services, non-profit organizations, and corporate health promotion, and wellness programming. The health and wellness emphasis services area includes 20 hours of core required courses, professional emphasis requirements and required health science electives that complement the student's pathway. In addition, the health science program requires an internship that is appropriate for a student's career goals. Examples of internships for the health and wellness emphasis services include: approved study abroad, health promotion, physical fitness and nutritional services through WELLAWARE at Boone Hospital Center, Safe Kids Columbia, and Case Management at Lutheran Family and Children's Services.

**Major Program Requirements**

In addition to University of Missouri requirements, including University general education, the Health Science degree with a Health and Wellness Services emphasis requires the following, each of which must be completed with a grade of C- or higher:

**Program Requirements**

### Degree Program Description

The leadership and policy emphasis in the health science major prepares students to enter careers in health administration, informatics, or sales. The leadership and policy emphasis may also prepare students for graduate studies in health administration, informatics, public health, policy or law. The leadership and policy emphasis area includes at least 20 hours of core required courses, general education, professional emphasis requirements and required electives that complement the student’s pathway. In addition, the health science program requires an internship that is appropriate for a student’s career goals. Examples of internships include health administration, health consultant, clinical analysis and strategic planning at RehabCare, Health Literacy Missouri, Institute for People, Place and Possibility, Tiger Institute and Cerner Corporation.

### Major Program Requirements

In addition to University of Missouri requirements, including University general education, the Health Science degree with a Leadership and Policy emphasis requires the following, each of which must be completed with a grade of C- or higher:

#### Program Requirements

<table>

- **BHS in Health Science with Emphasis in Pre-Professional**

## Degree Program Requirements

The pre-professional emphasis in the health science major prepares students to apply for graduate and professional programs in medicine, dentistry, pharmacy, physician assistant studies, optometry and related areas. The pre-professional emphasis may also prepare students who have appropriate work experience as an undergraduate to work for clinical research companies, medical or pharmaceutical sales or other non-clinical health careers that require a background in science and knowledge of health care. The pre-professional emphasis area includes 20 hours of core required courses, general education, professional emphasis requirements and required electives that complement the student's pathway. In addition, the health science program requires an internship that is appropriate for a student's career goals. Examples of internships for the pre-professional emphasis include: Missouri Telehealth Network, MedZou Community Health Center, PhysAssist, and Scribe America.

## Major Program Requirements

In addition to University of Missouri requirements, including University general education, the Health Science degree with a Pre-Professional emphasis requires the following, each of which must be completed with a grade of C- or higher:

<table>

## BHS in Health Science with Emphasis in Rehabilitation Sciences

### Degree Program Description

The rehabilitation science emphasis prepares students for application to graduate programs in fields such as occupational therapy, physical therapy, chiropractic, orthotics/prosthetics and similar degrees. The rehabilitation science emphasis may also prepare students who have appropriate work experience as an undergraduate to work as coaches for alternative community training organizations. The rehabilitation science emphasis area includes 20 hours of core required courses, general education, professional emphasis requirements and required electives that complement the student’s pathway. In addition, the health science program requires an internship that is appropriate for a student’s career goals. Examples of internships for the rehabilitation science emphasis include: Therapeutic Equine Center, MU Adaptive Gymnastics, MU Thompson Center for Autism and Neurodevelopmental Disorders, Mizzou Therapy Services, Wonderland Camp.
Major Program Requirements

In addition to University of Missouri requirements, including University general education, the Health Science degree with a Rehabilitation Sciences emphasis requires the following, each of which must be completed with a grade of C- or higher:

**Program Requirements**

**Health Science Electives**

18

**Students must complete 18 hours of approved elective coursework. At least 9 credit hours must be from 3000/4000 level courses.**

**Semester Plan**

Students should meet with an academic advisor in the School of Health Professions to discuss an individualized 8-semester plan based on their career goals, strengths and interests.

**Occupational Therapy**

Department of Occupational Therapy
School of Health Professions
801B Clark Hall
Columbia, Missouri 65211
(573) 882-3988

**Advising Contact**
MUOT@health.missouri.edu

Scholarship Information Contact
https://healthprofessions.missouri.edu/student-services/scholarships/

Occupational therapists are skilled health professionals who provide services to individuals across the lifespan to maximize their independence in meaningful everyday activities. Occupational therapists use research, scientific evidence, and a holistic perspective to incorporate an individual's valued occupations into the intervention process.

The mission of the Department of Occupational Therapy is to improve the health and well-being of society by assisting people to optimize their participation in everyday life occupations.

We achieve this mission through the integration of our:

- Professional education of clinically innovative occupational therapists prepared to meet the dynamic occupational needs of people and communities across the lifespan;
- Steadfast commitment to service to our community and our profession;
- Evidence-based practice; and
- Commitment to scholarship, discovery and clinical research to advance our profession.

To become a registered occupational therapist, an entry-level master's degree is required.

All applicants must complete a bachelor's degree (in any major), along with necessary program prerequisites, prior to beginning professional coursework in the Department of Occupational Therapy.

The Accreditation Council for Occupational Therapy Education (ACOTE) has mandated that the entry-level degree will move to the doctoral (OTD) level by 2027. The Department of Occupational Therapy is working with campus and state officials to plan for the transition to an OTD degree program. An exact date for the transition has not been approved.

Department accreditation is granted by the Accreditation Council for Occupational Therapy Education of the American Occupational Therapy Association, 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449, (301) 652-2682.

Faculty

Assistant Clinical Professor  T. Bolton*, W. Henderson*, W. Janes**, G. Pifer*

Assistant Professor  R. Proffitt**

Associate Clinical Professor  L. Lowery**

Associate Professor  T. Wolf**

Associate Teaching Professor  C. Gateley**

Distinguished Professor  W. Dunn**

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BHS in Pre-Occupational Therapy (p. 594)

The last cohort for BHS in Pre-OT will be graduating in 2019. No further cohorts will be accepted for a combined Master's program. Applicants will need to have a bachelor's degree by the start of the Summer semester that they would begin coursework.

Graduate

The Department of Occupational Therapy does not offer any graduate degrees. We do offer an accredited Masters of Occupational Therapy (MOT) at the professional level. Please see the Professional Occupational Therapy section (p. 775) in the catalog for more information.

BHS in Pre-Occupational Therapy

The Department of Occupational Therapy no longer offers an undergraduate degree program. The final cohort of students accepted into the previously combined bachelor's / master's program began coursework in Summer 2016 and completed undergraduate coursework in Fall 2017.

All applicants must complete a bachelor's degree (in any major), along with necessary program prerequisites, prior to beginning professional coursework in the Department of Occupational Therapy.

Physical Therapy

K. Gibson, Chair
Department of Physical Therapy
School of Health Professions
801 Clark Hall
(573) 882-7103
Fax: (573) 884-8369
https://healthprofessions.missouri.edu/physical-therapy/

Physical Therapy involves the evaluation and treatment of physical disability and pain that may result from injury, disease or developmental disability. Prevention of disability and public education are also roles of the physical therapist. Physical therapists use tests and measurements to assess body system dysfunction and determine diagnosis and treatment. Daily living skills, including work, are also addressed.

Faculty

Emeritus Professor  M. Brown*, M. A. Minor*

Teaching Professor  K. Gibson*

Clinical Professor  C. C. Abbott*

Associate Professor  E. A. Dannecker**, T. M. Guess, S. P. Sayers**

Associate Teaching Professor  T. Briedwell*, K. Gibson*, M. S. Hargrove*, J. Krug*, D.E. Martin*

Assistant Professor  J. Craggs

Assistant Teaching Professor  J. Bridges*, A. Campbell*, E. Prost*, K. Stephens*, B. Willis*

Assistant Clinical Professor  J. B. Mann

Instructor  C. A. Blow*, A. C. Connell*, N. J. Dietz**

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.
Undergraduate

- BHS in Pre-Professional Physical Therapy (p. 595)

Graduate

The Department of Physical Therapy does not offer any graduate-level degrees. We do offer Doctor of Physical Therapy at the professional level. Please see the Professional Physical Therapy section (p. 777) in the catalog for more information.

BHS in Pre-Professional Physical Therapy

Degree Program Description

Physical Therapy involves the evaluation and treatment of physical disability and pain that may result from injury, disease or developmental disability. Prevention of disability and public education are also roles of the physical therapist. Physical therapists use tests and measurements to assess body system dysfunction and determine diagnosis and treatment. Daily living skills, including work, are also addressed. The University of Missouri offers a Doctor of Physical Therapy degree. This degree is granted to some students who gain Advanced Admission to the Doctor of Physical Therapy program. Students may not major in the BHS in Preprofessional Physical Therapy unless they have applied and been accepted for Advanced Admission to the Doctor of Physical Therapy program.

Major Program Requirements

Advanced Admission grants students the opportunity to apply to the DPT program during the junior year and enter the DPT program after completing 90 credit hours of college level coursework. Students who seek to gain early admission to the DPT program must complete a minimum of three years (six fall/spring semesters or 12 quarters of full-time enrollment) of residential coursework on a college campus prior to starting the DPT program. To be eligible for advanced admission, students must have a 3.5 cumulative GPA. Students accepted for the early admission program must complete 90 credit hours, including University of Missouri requirements, University general education, and pre-requisite coursework prior to beginning the professional phase of the program. At the time of application, students may have up to three of the following courses to be completed, with no more than two planned for the spring semester: Statistics, Chemistry, Physics 1, Physics 2, Biology, Physiology, Medical Terminology and Anatomy.*

Pre-requisite Courses

Public Health

Public health is an exciting field of work dedicated to protecting and improving the health and well-being of communities, particularly those seen as the most vulnerable. While a doctor treats people who are sick, public health practitioners try to prevent people from getting sick or hurt in the first place, and promote wellness by encouraging healthy behaviors. Examples of public health and an effective public health system surround us every day. Public Health graduates will contribute to an increasingly needed skilled public health workforce that will work on protecting our current and future public health. Public Health graduates can work in numerous sub-disciplines such as epidemiology or disease tracking, biostatistics, health education, environmental health, health policy, or disaster preparedness. For example, graduates may develop health education materials or health education curricula for communities, hospitals or health agencies. In positions at local health departments graduates may work in teams to track emerging diseases, develop and administer HIV testing programs, or identify and address health disparities. They also may work in industry or academia researching public health problems and solutions. Graduates also may help develop policy briefs for public health agencies, assist in the development and implementation of disaster management policies and plans, or track and address environmental public health concerns. The opportunities for rewarding careers in public health are as diverse as public health itself.

Faculty

Professor B. Beernsten*, M. Hosokawa*

Associate Professor T. Evans**, B. Houston*, J. McElroy*, P. Pithua**, J. Stemmle*, M. Yu**

Assistant Professor W. Majee*, S. Potochnick**

Associate Teaching Professor S. Lee*, L. Safrran*, L. Schultz*

Associate Teaching Professor L. Phillips*, M. Vetter-Smith*

Associate Research Professor L. Tenkku-Lepper*

Assistant Adjunct Professor T. Rose*

Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

BHS in Public Health (p. 597)

The mission of the Bachelor of Health Science in Public Health is to teach students to advance public health knowledge, promote healthy behaviors and environments, address and eliminate health disparities, and prevent disease. We value:

• Health as a right, and strive to reduce or eliminate inequity and injustice that affects the health and dignity of all people;
• Diversity as a strength in our education, research, and work as the right thing to do and the best strategy to engage and help the communities we care about;
• Interdisciplinary collaboration as the key to creatively solving today's challenging health issues;
• Critical thinking to forge new solutions.

Admission to the BHS in Public Health program requires:

• Successful completion of 60 hours (junior standing)
• Minimum of 2.75 GPA in first 60 hours
• Grade of B- or better in HLTH_SCI 3300
• Grade of C or better in Statistics courses
• Completed application packet
• Two recommendations (names and contact only)
• Commitment to the program’s mission and core values
For more information please email DHSPublicHealth@health.missouri.edu or contact Program Director, Dr. Michelle Teti (tetim@health.missouri.edu), with questions.

Graduate

• MPH in Public Health (p. 598)
  • with emphasis in Health Promotion and Policy (p. 599)
  • with emphasis in Veterinary Public Health (p. 599)
• Graduate Certificate in Public Health (p. 599)

Program Director: Lise Saffran

The MPH Program has two emphasis areas, Health Promotion and Policy or Veterinary Public Health; dual degrees with Public Affairs, Journalism, Social Work, and Veterinary Medicine; and graduate certificates in Public Health, Global Health, and Epidemiology. This public health coursework reflects the University of Missouri’s strength in the health professions, social work, nursing, medicine, veterinary medicine, and arts and sciences. The MPH is appropriate for students with a wide variety of undergraduate degrees including social work, political science, biology, communication, and related fields.

**BHS in Public Health**

Degree Program Description

Public health includes activities needed to promote and protect the health of people and the communities where they live. While doctors treat people who are sick, the field of public health is organized around trying to prevent illness and injuries in the first place; and promote healthy behavior. People in the field of public health work to assure the conditions in which people can be healthy by tracking disease and outbreaks, preventing injuries, and studying how and why some people are more likely to suffer from poor health and health inequities than others. The many facets of public health include speaking out for laws or policies that promote smoke-free indoor air, school nutrition, and seat belts; collecting and disseminating education about how to stay healthy, and offering science-based solutions to health problems - among others.

The Bachelor of Health Science in Public Health degree prepares students for introductory careers in all core areas of public health, such as health education, epidemiology, health policy, and environmental health. The courses introduce students to key concepts, theories, problems, and solutions in public health, and also focus on the links between public health and social justice and human rights.

Major Program Requirements

Students are required to apply to the Bachelor of Health Science in Public Health major. Admission to the program requires: successful completion of 60 hours (junior standing), minimum of 2.75 GPA in first 60 hours, grade of B- or better in HLTH_SCI 3300, grade C or better in the required statistics course, completed application packet, two recommendations, and commitment to the program’s mission and core values. Meeting the minimum criteria and declaring a major of pre-Public Health does not guarantee acceptance into the program.

Note: The Bachelor of Health Science in Public Health program is interested in applicants with a wide range of life experiences and skills. If you do not meet or only barely meet the set program eligibility (such as GPA) but are interested in the program, an optional statement of eligibility essay may be submitted. This optional essay must be submitted with your application materials and does not guarantee acceptance into the program. Please see the application materials for more details.

In addition to University of Missouri requirements, including University general education, the Bachelor of Health Science in Public Health degree requires the following:

MPH in Public Health

MPH Application and Admission Information

Admission Contact Information
MPH Program (mumphprogram@missouri.edu)
802 Lewis Hall
Columbia, MO 65211
573-884-6844

https://healthprofessions.missouri.edu/mph/

The Master of Public Health (MPH) is the standard professional degree recognized throughout the world for public health practice. The MPH program at the University of Missouri trains practitioners, teachers, researchers, and administrators to plan, implement, and evaluate programs aimed at enhancing health in human populations through organized effort on the local, state, and national level.

All public health students are educated in the core domains of public health and participate in a supervised internship in a public health agency. The combination of course work and practical experience produces individuals who are highly qualified to enter the public health workforce.

The MPH curriculum is drawn from a variety of collaborating academic programs and units. Public health coursework reflects the University of Missouri's strength in the health professions, social work, journalism, public affairs, nursing, medicine, veterinary medicine, and arts and sciences.

Degrees

The MPH is available in two emphasis areas:

- Health Promotion and Policy (http://publichealth.missouri.edu/programs_health_promo_pol.php)
- Veterinary Public Health (http://publichealth.missouri.edu/programs_vet_pub_health.php)

Four dual degrees are also offered:

- MPH/Doctor of Veterinary Medicine (http://publichealth.missouri.edu/programs_mphdvm.php)
- MPH/Master of Public Affairs (http://publichealth.missouri.edu/programs_mphmpa.php)
- MPH/Master of Arts, Journalism (http://publichealth.missouri.edu/programs_mphma.php)
- MPH/Master of Social Work (http://ssw.missouri.edu/msw_dual.html)

Application Deadlines

- Fall semester: June 1
- Spring semester: October 1
- Summer semester: April 1
- International students*: May 1 (fall semester)

* International applicants will only be accepted for Fall Semester admission, unless the applicant is currently a University of Missouri (MU) student enrolled in another full-time program.
Admission Criteria

• Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

• Minimum Academic IELTS overall score: 6.0
• Minimum GRE score: not set
• Minimum GPA: 3.0 in last 60 hours of undergraduate coursework

Required Application Materials

For more information to apply click here (https://healthprofessions.missouri.edu/mph/about/admission).

MPH in Public Health with Emphasis in Health Promotion and Policy

This program combines a thorough knowledge of behavior change theory and program planning and evaluation with valuable knowledge of how policy decisions are influenced and made. Particularly attractive to students with undergraduate degrees in psychology, social work, political science, communications and other related fields. For more information about this program, please visit: http://healthprofessions.missouri.edu/mph/mph-degree/emphasis-areas/

Required Courses

P_HLTH 7150  Principles of Public Health  3
P_HLTH 7160  Interdisciplinary Perspectives in Global Health  3
P_HLTH 8420  Principles of Epidemiology  3
STAT 7020  Statistical Methods in the Health Sciences  3
P_HLTH 7952  Research Methods in Public Health  3
P_HLTH 8150  Human Health and the Environment  3
P_HLTH 8920  Social and Behavioral Sciences in Public Health  3
P_HLTH 8980  Public Health Internship  1-99
PUB_AF 8170  Public Policy Processes and Strategies  3
P_HLTH 8300  Health Care in the United States  3
P_HLTH 8001  Topics in Public Health  1-3
NURSE 8930  Health Program Design and Management  3
P_HLTH 8953  Evaluating Global Public Health Programs  3
P_HLTH 8970  Public Health Capstone  3

For admission requirements, refer to the Office of Graduate Studies website for the minimum qualifications for the degree program (http://gradschool.missouri.edu/academics/programs) and the Office of Graduate Studies (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied.

MPH in Public Health with Emphasis in Veterinary Public Health

Students in this emphasis area receive training in zoonotic disease prevention, food safety and other emerging issues in animal and human health. An ideal complement for an undergraduate degree in animal science, biology or related fields. For more information about this program please visit: https://healthprofessions.missouri.edu/mph/mph-degree/emphasis-areas/

For admission requirements, refer to the Office of Graduate Studies website for the minimum qualifications for the degree program (http://gradschool.missouri.edu/academics/programs) and the Office of Graduate Studies (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied.

Graduate Certificate in Public Health

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.
Admission

Students wishing to pursue a Graduate Certificate in Public Health should complete the Office of Graduate Studies’ online application (standardized test scores are not required). Certificate candidates must provide the MPH Program’s Personal Data Sheet and official transcripts to the MPH Program.

About the Certificate

This 12-credit-hour program provides students with the core public health education that they need to enhance their professional knowledge. The certificate program includes the following courses:

- P_HLTH 7150 Principles of Public Health
- P_HLTH 8150 Human Health and the Environment, P_HLTH 8920 Social and Behavioral Sciences in Public Health, or P_HLTH 8420 Principles of Epidemiology
- STAT 7020 Statistical Methods in Health Sciences
- One approved elective

Applying to the Graduate Certificate Program

Students who complete the Graduate Certificate in Public Health with a minimum grade of B in each of the four courses will be recommended for admission to the Master of Public Health (MPH) program should they wish to continue their studies. The course credits earned for the graduate certificate will be credited toward the MPH degree. To apply click here (https://healthprofessions.missouri.edu/mph/about/admission).

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/51.2201-Gedt-Public_Health.html.

Additional Minors and Certificates

- Health Professions

There are no additional certificates or minors for the School of Health Professions at this time.

Mission
The College of Human Environmental Sciences addresses human needs and enhances individual and family life in a diverse and global society by conducting advanced research, preparing professionals and providing outreach.

History
A department of household economics was founded at MU in 1900 within the College of Agriculture. The initial one-year program was designed for young women who wished to learn proper management of the home. In 1906, the program expanded and a Bachelor of Science degree in Home Economics was added. The mission of the new program was to correlate work in art and physical, biological and social sciences with studies of home economics. Home Economics became a school within the College of Agriculture in 1960 and in 1973, the program became an independent college. The School of Social Work joined the college in 1988.

The college is unique among its peers in its comprehensive use of professional advisory boards, whose members are leaders in business, government, education and the social services. These experts provide guidance and support from their specialized fields to students and faculty and contribute powerful perspectives to curriculum development. Every department provides experiential learning opportunities where students apply their knowledge in real-world situations.

College Level Requirements
All freshmen and transfer students entering the College of Human Environmental Sciences enroll in GN_HES 1100 Introduction to Human Environmental Sciences, or SOC_WK 1110 Introduction to the Social Work Major. These courses emphasize career decision-making, provide an orientation to the campus and the college, and bring into focus the role of a professional in the improvement of the quality of life for individuals, families, and communities.

Academic Standing
A student whose term and cumulative grade point averages are 2.0 or higher is considered to be in Good Standing. (Note: The word "term" in these Regulations applies to semester, summer session, or intersession.) A student in Good Standing whose term grade point average falls below 2.0 is placed on scholastic probation. Any beginning student admitted to the University of Missouri who does not meet the minimum entrance standards as specified in Article II, Admissions, Advanced Standing, and Classification will enter on Scholastic Probation. A student on Scholastic Probation must establish a 2.0 cumulative grade point average within two successive terms: otherwise, he/she is Ineligible to Enroll. A student whose term grade point average falls below 1.0 is Ineligible to Enroll. A student who has been Ineligible to Enroll for a period of one year may apply to be readmitted by writing a letter to the HES Status and Appeals Committee.

Programs

The College of Human Environmental Sciences (HES) addresses human needs and enhances individual and family life in a diverse and global society by conducting advanced research. HES faculty have earned national and international research reputations while building programs that are valued by private citizens, government, business and industry, and human services agencies. The College has more than 400 graduate students enrolled in a variety of master's and doctoral degrees. Graduate certificates and online study are other academic options in several disciplinary areas.

- Architectural Studies
- Human Development & Family Science
- Nutrition & Exercise Physiology
- Personal Financial Planning
- Textile & Apparel Management
- Social Work

The School of Social Work (http://ssw.missouri.edu), housed within the College, offers a CSWE accredited Master of Social Work (MSW) Program that prepares competent, effective and ethical social work professional leaders for social change. The PhD program prepares students as educators and researchers with knowledge and skills to inform policy making, program development and evaluation, and research on clinical practice issues.

Note: Prospective graduate students must apply to both the degree program of interest and to the Office of Graduate Studies. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column. For a look at the College’s online graduate degree programs, see Mizzou Online (http://online.missouri.edu).

- Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BS in Architectural Studies (p. 604)
  - with emphasis in Architectural Studies (p. 604)
  - with emphasis in Interior Design (p. 606)
- Minor in Architectural Studies (p. 607)

The Program

Connecting people and place / interior design and architecture

Our mission is to advance scholarship in making connections between people and place, and between interior design and architecture. Our work prepares graduates to become lifelong, problem-solving designers of the built environment.

Through teaching, research, and service, faculty and students conduct systematic inquiry into 1) the design process, 2) sustainable products and practices, 3) the interaction between people and the built environment, and 4) the implications of digital technologies for the above. The program highlights the interdisciplinary interaction between interior design, architecture, the human sciences and aesthetics to improve quality of life for the public good.

For professional development and career information see Careers in Interior Design (http://arch.missouri.edu/resources_pd.html) and Careers in Architectural Studies (http://arch.missouri.edu/resources_arch.html).

Coursework

Coursework includes studios and coursework centering on the synthesis of functional, technological, aesthetic and symbolic attributes of interior design and architecture emphasizing physical environments that support human needs and aspirations.

Minor

Architectural Studies students may receive a minor in Entrepreneurship with required courses in Architectural Studies, an internship, and an additional 4 credits of specified coursework. See Undergraduate Minor in Entrepreneurship (p. 751) for more information.

Students who are non-majors may receive a Minor in Architectural Studies with 15 credits.

Online Study

See the Department's web sites for online study: Online Study for Undergraduates (http://arch.missouri.edu/academics_online.html).
Admission to Professional Program

Studio Sequence

Students apply for admission to the professional program studio sequence for undergraduate majors. Portfolio review and applications are submitted in May of each year. In order to submit a portfolio for review, students must complete ARCHST 1100, ARCHST 1200, and ART_DRAW 1050. More information about portfolio review and the application process can be found at the department website (http://arch.missouri.edu/academics_ugadmit.html).

Laptop Computer Requirements

A laptop computer is required when admitted to the professional program studio sequence. See department website (http://arch.missouri.edu/resources_computing.html) for recommended specifications.

Graduate

- MA in Architectural Studies (p. 608)
  - with emphasis in Design with Digital Media (p. 608)
  - with emphasis in Environment and Behavior (p. 609)
- MS in Architectural Studies (p. 609)
  - with emphasis in Design with Digital Media (p. 610)
  - with emphasis in Environment and Behavior (p. 610)

The College offers a PhD in Human Environmental Sciences with an emphasis in Architectural Studies (p. 630).

Program Contact

Dr. Bimal Balakrishnan (balakrishnanb@missouri.edu)
142A Stanley Hall
Columbia, MO 65211
573-882-3169
http://arch.missouri.edu/index.html

The Program

For both the MA and MS, the student’s program of study must include a minimum of 30 hours of graduate credit beyond the bachelor’s degree (or its equivalent). Fifteen of the 30-hour minimum must be selected from courses numbered at 8000 or 9000 level; no more than 40% of the 30-hour credit requirement can be satisfied by Research, Readings and Problems coursework.

The MA is a non-thesis option culminating in a creative project. The MS culminates in a thesis meeting University thesis requirements (http://gradstudies.missouri.edu/academics/thesis-dissertation/process).

In consultation with one’s graduate advisor, each student is required to enroll in selected “core” courses appropriate to her/his degree program. The academic program should be established in consultation with one’s advisor.

Professional Opportunities

Career opportunities for master’s and doctoral graduates of the Department and College include leadership positions in design and consulting practices in industry, government, and education; and academic and administrative positions in higher education and research.

The MA degree leads to career opportunities in design firms, computer graphic enterprises, retail establishments, corporate institutions and consultancy. Graduates contribute their skill to design of commercial, institutional, corporate and health care facilities, as well as residential settings. They collaborate with related design professionals providing solutions to social and environmental problems.

Graduates of the MS and PhD degree programs pursue academic and professional careers integrating design theory with their research skills.

See Career Information for Graduate Students (http://arch.missouri.edu/resources_careers.html) and Spotlight on Alumni (http://arch.missouri.edu/alumni.html).

Online Study

On-campus and distance-learners are taught by the same accomplished professors. This is a fully integrated model of online instruction with established quality. The Department of Architectural Studies offers 100% online graduate education:

- Master of Arts (http://arch.missouri.edu/academics_masters.html#page_MA) in the emphasis areas of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html) and Design with Digital Media (http://arch.missouri.edu/academics_ddm.html).
- Master of Science (http://arch.missouri.edu/academics_masters.html#page_MS) in the emphasis areas of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html) and Design with Digital Media (http://arch.missouri.edu/academics_ddm.html).
- Doctor of Philosophy (http://arch.missouri.edu/academics_phd.html) in HES and in the concentration* areas of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html) and Design with Digital Media (http://arch.missouri.edu/academics_ddm.html).
- Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html)* as stand-alone coursework or as part of a masters or doctorate.
- Stand-alone courses for non-degree (http://gradschool.missouri.edu/admissions/eligibility-process/non-degree-applicants) graduate students. Students select online courses from an extensive menu for professional advancement. Up to 12 credit hours of graduate credit taken as a non-degree graduate student may be applied to a graduate degree program upon approval of the academic program if the student is accepted.

* concentrations will not appear on diplomas or transcripts

Graduate courses are delivered as:

- Asynchronous or Synchronous. Asynchronous coursework is completed independently according to the provided schedule. Synchronous courses will include real-time discussion during arranged weekly class periods.
- Semester-based or self-paced online.

See MizzouOnline (http://online.missouri.edu/course-search) for online offerings open for registration.

Architectural Studies Graduate Degrees

Graduate students select one of two areas of emphasis: 1) Environment and Behavior studies with a creative project leading to an MA degree and with research leading to the MS and PhD degrees OR 2) Design with Digital Media studies leading to the MA, MS and PhD degrees. The graduate program builds on Architectural Studies course work and a core of courses in design theory, research methods, graduate seminars, research and readings in digital media and environment and behavior.
Design Research Concentration
The Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) is developed for
- Designers engaged in architecture, interior design, graphic, or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry -- Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

Graduate Program Requirements
The academic program should be developed in consultation with an advisor. See MU Graduate Studies (http://gradstudies.missouri.edu) website for guidelines and requirements regarding course work and role of committee. Students are required to self-report academic performance, degree program milestones and related achievements in scholarship, research and creative work on an annual basis. Students complete an annual review. See department Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf) for details.

Financial Aid from the Program
Limited teaching and/or research assistantships and scholarships are available to graduate students. GTA appointments are available to resident graduate students and are based on the match between the department’s needs and candidate’s background. See Financial FAQs (http://arch.missouri.edu/academics_faqgrad.html) on department website.

BS in Architectural Studies

Degree Program Description
Architectural Studies promotes connections between people and place, and between interior design and architecture with the intention of preparing graduates to become lifelong designers of the built environment. Students in this program conduct systematic inquiry into the design process, sustainable products and practices, the interaction between people and the built environment, and digital technologies. The program highlights research as it advances the interdisciplinary interaction between interior design, architecture, the human sciences and aesthetics to improve quality of life for the public good. Following the freshman year students must submit a portfolio of their work for acceptance into the professional phase of the program.

Major Program Requirements
The BS in Architectural Studies connects interior design, architecture, the human sciences and aesthetics to improve quality of life. Students are engaged in the processes, procedures, observations, and techniques of design.

The BS is offered with two emphasis area options: Interior Design and Architectural Studies. Both emphasis areas focus on the development of environmental designs for human living, work, and leisure. The Interior Design emphasis results in a terminal bachelor’s degree accredited by the Council of Interior Design Accreditation (CIDA). The Architectural Studies emphasis is a pre-architecture bachelor’s degree or pre-professional option and students continue their education with the M Arch to become practicing architects.

Some courses in the Professional Program area double count for General Education (p. 34) requirements. See degree information at the emphasis level.

Semester Plan
The BS in Architectural Studies has emphasis areas in Architectural Studies (p. 604), and Interior Design (p. 606). Please see the individual emphasis area pages for degree requirements and admissions information.

Major and Career Exploration
The University of Missouri has many resources to assist you in exploring majors and career possibilities. For guidance, visit the Majors and Careers (https://career.missouri.edu/majors-careers) website or view specific resources below.

- If you are considering a change of major or are exploring multiple majors, schedule an appointment with an advisor in Academic Exploration and Advising Services (AEAS) (http://aeas.missouri.edu) by calling (573)884-9700.
- If you would like to learn more about your career interests, abilities, values and talents, visit the MU Career Center (http://career.missouri.edu) in the lower level of the Student Success Center. No appointment is necessary to explore career options with one of our staff members.
- If you would like information about MU majors and degree programs, visit:
  - the Degrees, Majors (Degree Programs), Emphasis Areas, Minors and Certificates (p. 18) page in the catalog,
  - the MU Majors (https://majors.missouri.edu) website.

For additional major and career exploration resources, visit Major & Career Exploration (p. 32) in the catalog.

BS in Architectural Studies with Emphasis in Architectural Studies

Missouri residents may benefit from the Reciprocity Agreement with the University of Kansas. Out-of-State tuition can be waived for Missouri residents when enrolled in the M Arch program as a first professional architecture degree.

Degree Program Description
The Architectural Studies emphasis is a four-year, professional baccalaureate program often referred to as a Pre-Architecture program. The architectural studies emphasis mission is to prepare students for success in entry-level jobs in the design and construction industry and also to prepare students for advanced study in architecture M Arch (Masters of Architecture) programs. See Opportunity for Employment (http://arch.missouri.edu/academics_arch.html), Careers in Architectural Studies (http://arch.missouri.edu/resources_arch.html), and Spotlight on Alumni (http://arch.missouri.edu/alumni.html). Students benefit from the enriched academic research environment and the emphasis on the thinking and making of physical environments that address the needs and aspirations of people. The program strives to blur the boundaries between architecture and interior design by
stressing the inside experience of people in buildings. Students interested in becoming a licensed architect continue their education by completing in other architectural programs. Alumni are admitted to many highly ranked graduate programs throughout the U.S. With coursework being part of a CIDA (http://accredit-id.org) Accredited Interior Design Program, pre-architecture students may be eligible for the NCIDQ (https://www.cidq.org) examination upon graduation. For more information see Careers in Interior Design (http://arch.missouri.edu/resources_pd.html) with links to professional organizations and regulations. See Architectural Studies web page for more highlights (http://arch.missouri.edu/home_welcome.html) of program.

Major Program Requirements

Coursework

Students complete University of Missouri general education coursework that includes physics and calculus. Professional design coursework is in the following content areas: basic creative development, design planning and analysis, design communication, technical knowledge, history of art/architecture/interiors, business, and design theory.

Studio Description

It is the design studio setting where learning by doing is experienced and realized. The studio is a collaborative and cooperative learning environment emphasizing personal intellectual development as well as content learning. Course work includes studios and coursework centering on the synthesis of functional, technological, social, aesthetic and symbolic attributes architecture that support human needs and their aspirations. See Studio Description (http://arch.missouri.edu/academics_arch.html) on the department website for more information.

Application for the Professional Program

After completing three required classes of Drafting (ARCHST 1200), Visual Design (ARCHST 1100), and Drawing (ART_DRAW 1050) during the first year, students apply for admission to the studio sequence. Applications are made at the end of the spring semester of the first year granting permission to enroll in Studio I. The application form is available at the department's web site. (http://arch.missouri.edu/academics_ugadmit.html)

Degree Requirements

Basic Creative Development 9
ARCHST 1100 Visual Design 3
ARCHST 2315 Introduction to Building Systems 1
ARCHST 2316 Advanced Building Systems Lab 2

BS in Architectural Studies with Emphasis in Interior Design

Degree Program Description

The Interior Design emphasis is a four-year, professional baccalaureate program accredited by the Council for Interior Design Accreditation (CIDA). The interior design program’s mission is to prepare students for success in entry-level interior design practice and advanced study. Core competencies protect human health, safety, and welfare through the design of interior environments. Our educational philosophy is grounded in the values of creating sustainable and meaningful interior spaces to integrate aesthetic quality and compassion for the human condition. The NCIDQ definition (https://www.cidq.org) clarifies the scope of the services and tasks of the profession. Curriculum incorporates signature characteristics of interior design such as furniture, fixtures, and equipment, color, and interior materiality. The program benefits from its enriched academic research environment with outstanding faculty. Emphasizing the thinking and making of spaces, our interior design program stresses the inside of buildings and those experiences that help to create peoples’ individual meaning in life. For more information on professional advancement and examples of opportunities see Careers in Interior Design (http://arch.missouri.edu/resources_pd.html) with links to professional organizations and regulations. Also see post-graduate placements at Spotlight on Alumni (http://arch.missouri.edu/alumni.html). See Architectural Studies web page for highlights (http://arch.missouri.edu/home_welcome.html) of program.

For exceptional students, with consent of instructor and department approval, additional course work in the department may be selected.
Online Minor in Architectural Studies
Complete the Apply for HES Minor form (http://hes.missouri.edu/students_minorapp.php). See Online Study and Degrees (http://arch.missouri.edu/academics_online.html) in Architectural Studies for a listing of online courses currently open for registration.

Online and Resident General Education Courses
Courses meeting MU General Education (http://generaleducation.missouri.edu/courses) requirements (e.g., Humanities, Behavioral Science, and Social Science) are indicated.

MA in Architectural Studies

Program Contact
Dr. Bimal Balakrishnan (balakrishnanb@missouri.edu)
137 Stanley Hall
Columbia, MO 65211
573-882-3169
http://arch.missouri.edu

Master of Art
The creative, project-based MA plan of study is preparation for advanced careers in the design professions and higher education. The non-thesis project is conducted in one or two areas: (1) environment and behavior or (2) design with digital media. The MA project is an in-depth investigation of a design problem culminating in a design solution or visual research presentation.

Also see the Department web site for additional information: Masters Programs (http://arch.missouri.edu/academics_masters.html), Emphasis Areas (http://arch.missouri.edu/graduate.html), Online Study (http://arch.missouri.edu/academics_online2.html), Architectural Studies Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf), and Spotlight on Alumni (http://arch.missouri.edu/alumni.html).

Design Research Concentration
A Design Research concentration is offered for:

- Designers engaged in interior design, architecture, graphic or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry -- Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

The course work for the concentration is applied to the program of study. For specifics, see Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) on department web site. Concentrations do not appear on diplomas or transcripts.

Admission Contact
Dr. Bimal Balakrishnan (balakrishnanb@missouri.edu)
137 Stanley Hall; Columbia, MO 65211
(573) 882-7224

Admission Criteria
Fall deadline: January 15

Minimum GPA: 3.0
Minimum TOEFL scores: The Department adopts minimum campus language requirements (http://gradstudies.missouri.edu/admissions/eligibility-process/international/language-requirements.php#English) as described by the Office of Graduate Studies.

Internet-based test (iBT) Paper-based test (PBT)
Effective July 1, 2015 must have score of 80 Effective July 1, 2015 must have score of 550

Required Application Materials
See Application and Admission (http://arch.missouri.edu/academics_gradadmit.html) for Department's graduate admission requirements.

Apply online to the Office of Graduate Studies (http://gradstudies.missouri.edu).

MA in Architectural Studies with Emphasis in Design with Digital Media

Program Contact
Dr. Bimal Balakrishnan (http://arch.missouri.edu/faculty_balakrishnan.html)
137 Stanley Hall
Columbia, MO 65211
573-882-3169
http://arch.missouri.edu

The Design with Digital Media program attracts a diverse group of talented, intellectually engaged graduate students for interdisciplinary and trans-disciplinary exploration in the digital arts. The curriculum enables students to investigate innovative approaches to contemporary theory and practice, and fosters both individual inquiry and high-level collaboration. The primary objective of the program is to prepare creative critical thinkers to become leaders in their fields.

Structured to promote thought and work that crosses traditional lines between disciplines, the digital media curriculum challenges students to consider non-standard approaches to the computer as a creative and expressive medium. Study of technology, art and design is balanced with inquiry grounded in conceptual, critical, social, cultural and historical considerations.

Design with Digital Media, as an integral part of the design process, focuses on graphic ideation and the application of computer technology for architecture, interior and related disciplines. This program of study has an emphasis on design with digital media leading to the MA degree.

Current study areas in the digital media program include:

- Design computing and cognition
- Design process using digital media and creativity research
- Virtual reality (VR) and augmented reality (AR) technologies for design visualization
- Advanced visualization technologies for environment-behavior simulation
- Building Information Modeling (BIM)
- Building Simulation
• Human-computer interaction aspects of digital tools for design

See resources in our immersive visualization lab, the ilab (http://arch.missouri.edu/resources_ilab.html), and the ilab web site. (http://arch.missouri.edu/ilab)

The culmination of the degree is a written and/or visual project employing computer applications for design methods. Applicants interested in the Design with Digital Media option should contact the coordinator of Design with Digital Media, Dr. Bimal Balakrishnan (http://arch.missouri.edu/faculty_balakrishnan.html), for course content and research proposals. Also see the Department's website (http://arch.missouri.edu) and the Architectural Studies Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf).

Admissions

Applicants are required to meet the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

MS in Architectural Studies

Admissions Contact
Dr. Bimal Balakrishnan (balakrishnanb@missouri.edu)
137 Stanley Hall
Columbia, MO 65211
573-882-3169
http://arch.missouri.edu

Master of Science

The MS may be a research-based study or a design and research-based professional review design project. The MS culminates in a thesis meeting University thesis requirements. The MS plan of study is in preparation for advanced professional practice or preparation for the doctoral degree.

Research is conducted in one of two emphasis areas: (1) environment and behavior or (2) design with digital media. Within each of these emphasis areas, specific course work is chosen on the basis of subject matter and the type of research method selected: quantitative, qualitative or a combination of both.

Also see the Department web site for additional information: Masters Programs (http://arch.missouri.edu/academics_masters.html), Emphasis Areas (http://arch.missouri.edu/graduate.html), Online Study (http://arch.missouri.edu/academics_online2.html), Architectural Studies Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf), and Spotlight on Alumni (http://arch.missouri.edu/alumni.html).

Design Research Concentration

The Design Research Concentration can be applied toward the program of study. The concentration is of interest to:

• Designers engaged in interior design, architecture, graphic or interaction design who require applied research skills from companies/organizations.

• Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry -- Healthcare IT companies, Engineering etc.

• Business and market professionals to advance understanding of design research for marketing.
For more information, see Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) on the department's web site.

MS in Architectural Studies with Emphasis in Environment and Behavior

Program Contact  
Dr. Bimal Balakrishnan (balakrishnanb@missouri.edu)  
137 Stanley Hall  
Columbia, MO 65211  
573-882-3169  
http://arch.missouri.edu

The Environment and Behavior focus is on the multifaceted relationships between people and their physical, social and cultural environments. Environment-behavior research explores a variety of environments, linking them to a range of behavioral concerns. This program is suitable for persons who seek careers in research, consulting, and/or teaching in architecture, interior design, and other environmental design disciplines.

A design project leads to the MS and PhD degrees.

Current study areas in environment and behavior include:

- Health and Well-Being
- Sustainable Design
- Design Education
- Social and Cultural Bases of Design
- Place Attachment
- Environments for Learning
- History of the Designed Environment
- Design Planning and Analysis
- Analysis of Building Types
- Aesthetics of Design
- Inclusive Design/Accessibility
Admissions

Applicants are required to meet the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, please refer to the degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied.

Dietetics

The department of Nutrition and Exercise Physiology offers a bachelors degree in BS in Nutrition and Exercise Physiology with Emphasis in Nutrition and Foods (p. 636). Only students who successfully complete prerequisites, have been admitted to the Coordinated Program and completed all undergraduate requirements for the Coordinated Program will receive this emphasis area for the bachelor's degree. The completion of this bachelor's degree only does not allow the student to be eligible to take the national Registration Examination for Dietitians. Furthermore, it is not a didactic program in dietetics. No verification statement is given after completion of only the bachelor's degree. Students who receive this degree emphasis and are in good academic standing will transition seamlessly to the Coordinated Program's fifth year master's program.

Application requirements to the CP are posted each year on the department's webpage at http://ns.missouri.edu/. Applications are due in January. To be eligible to apply, the applicants must have a minimum 3.2 GPA and have completed or be able to complete the first four semesters of courses listed under the course requirements for nutrition and foods (http://nep.missouri.edu/dietetics.html). The student must be enrolled in or already have completed NEP 2340 and BIOCHM 3630 at the time the CP application is submitted. Students must achieve a final course grade of B- or better in both, or equivalent transfer course approved by faulty. Failure to meet the criteria may result in forfeiture of a space in the Coordinated Program. Accepted Students must also successfully pass background checks, a drug screen and submit the required health records prior to starting the program.

Graduate

• MS in Dietetics (p. 612)

This degree is a non-thesis Master of Science Coordinated Program in Dietetics which offers a concentration in Medical Nutrition Therapy. In our coordinated program both the didactic coursework and field work/ supervised practice experience are conducted simultaneously. It is a combined BS/MS program with application and acceptance occurring at the undergraduate level. It is not a stand-alone master's program, nor does it offer a didactic only program.

The master's degree is only for students who have been accepted into the Coordinated Program in Dietetics. See BS in Nutrition and Exercise Physiology with Emphasis in Nutrition and Foods (p. 636) for application information and criteria to apply.
After acceptance to the program, students must successfully complete 2 years of coursework at the undergraduate level, at that time they will receive their bachelor's degree in Nutritional Science with an emphasis in Nutrition and Foods. If all requirements for the program are met, the student will transition seamlessly into the graduate program.

Requirements for continuation during the master's year will be posted on the Nutrition and Exercise Physiology website (http://ns.missouri.edu).

Upon completion of their final year in the program, students will receive a Masters in Dietetics. At that time, they will have completed all coursework and supervised practice within the Coordinated Program. Both are needed in order to receive the verification statement. This statement is required for students to be eligible to take the National Registration Examination for Dietitians.

### MS in Dietetics

#### Degree Requirements

The Coordinated Program in Dietetics requires a minimum of 30 hours of graduate courses in the program. Students must maintain a 3.0 GPA.

#### Sample Plan of Study

The following courses are required for this degree. Changes in course requirements may occur, as the program is required to meet the accreditation standards.

##### First Year

Total Credits: 152

### Thesis/Non-Thesis Requirements

This is a professional program and will not require a Thesis, but will require a comprehensive exam.

### Admissions

This degree is only for students accepted into the Coordinated Program in Dietetics and who have completed their first two years in the program. These students will have earned a bachelors degree in Nutritional Sciences with an emphasis in Nutrition and Foods. Application information and criteria on how to apply can be found at http://nep.missouri.edu/nutrition_foods.html for application information and criteria.

Requirements for program continuation during the master's year will be posted on the Nutrition and Exercise Physiology website (http://ns.missouri.edu).

### Exercise Physiology

#### Department Chair:

Fax: (573) 884-4885
grant writing. Graduate studies at the University of Missouri offer the advantage of interdisciplinary exercise research that is facilitated by numerous collaborations at the many research centers at MU. In addition, the Exercise Physiology research program collaborates closely with other units on campus including the Department of Biomedical Sciences in the Vet School, and the Departments of Internal Medicine and Medical Pharmacology and Physiology in the School of Medicine among others. The curriculum has a scientific basis with core courses in exercise physiology, nutrition, biochemistry, and physiology. Teaching and research assistantship's are available on a competitive basis. This degree prepares students for careers in academia, industry or the public sector.

At this time, the program does not accept students into the doctoral program without a master's degree. A student without a master's degree who would like to pursue a doctoral degree must apply to the master's graduate program. Once accepted into the master's program it is possible to apply and transfer to the doctoral program after the first year of graduate study. Specified criteria must be met for the transfer to be approved by the Nutritional Sciences Graduate Admissions Committee. Please contact the department for more information on this subject.

**PhD in Exercise Physiology**

**Degree Requirements**

Students previous coursework must include biology, chemistry, anatomy, physiology and exercise physiology to be considered. It is also advantageous to have organic chemistry, biochemistry and some nutrition.

The PhD program in Exercise Physiology requires 85 hours beyond the bachelor's degree. A committee of 4 faculty members must approve all graduate courses, including those from other universities. The graduate course work includes 15 hours in exercise physiology, plus coursework in nutrition and physiology. Research requirements include NEP 7500 (9 hours of research projects) and NEP 9090 (12 hours dissertation). One semester of teaching experience is required, as is participation on an external grant proposal and co-authoring two manuscripts. NEP 8850 Advanced Exercise Physiology is used as your competency course a grade of B or better is required. If the student has a similar course in their transfer courses from a masters, then another course will be used - this must be approved by the graduate director and committee.

Note: Masters courses may be transferred from other institutions (30 hours maximum) may count toward the doctoral program at the discretion of the student's committee (3 members in dept., 1 member outside).

**Sample Plan of Study**

Because students in the PhD program are from a wide variety of disciplines, and pursue the PhD at different paces, a sample plan of study is not easily produced. Students are encouraged to work out their plan of study with their advisor.

**Exercise Science (Major Field)**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>NEP 7001</td>

<td>1-99</td>
</tr>
<tr>
<td>NEP 7500</td>
<td>Research in Nutritional Sciences and Exercise Physiology (*)</td>
<td>1-99</td>
</tr>
</tbody>
</table>
**Qualifying Process**

NEP 8850 Advanced Exercise Physiology is used as your competency course and the student must pass with the grade of B or better. If the student comes in with a master’s course similar to NEP 8850, then another course can be used as the competency course and will be approved by the committee and graduate director (e.g. NEP 8870 Exercise Endocrinology). **Comprehensive Examination Process**

Candidacy for a doctoral degree is established by passing the comprehensive examination. The comprehensive examination includes written and oral sections and is completed as the candidate is completing the prescribed coursework.

**Dissertation Requirements**

The dissertation must be written on a subject approved by the candidates doctoral program committee, must embody the results of original and significant investigation and must be the candidates own work. All dissertation defenses shall be open to the general faculty. For the dissertation to be successfully defended, the student’s doctoral committee must vote to pass the student on the defense with no more than one dissenting or abstaining vote.

**Admissions**

*Deadline for Fall entrance: Dec 30*

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Exercise Physiology (http://nep.missouri.edu/grad_admission.html) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you applied.

**Exercise and Physiology Program Applicants** must have a 3.00 undergraduate GPA, a 3.5 graduate GPA and meet the minimum GRE scores to be admitted (GRE scores must be within the last 5 years). TOEFL scores are required from international applicants. Specific information can be found on the department website:http://ns.missouri.edu/grad_admission.html

At this time, the program does not accept students into the doctoral program without a master's degree. A student without a master’s degree who would like to pursue a doctoral degree must apply to the master’s graduate program. Once accepted into the master’s program it is possible to apply and transfer to the doctoral program after the first year of graduate study. Specific criteria must be met for the transfer to be approved by the Nutritional Sciences Graduate Admissions Committee. Please contact the department for more information on this subject.

**Deadline for Applications is December 30th.** While applications received after that date will still be considered, they will not be eligible for all fellowships.

Complete instructions for applying to the program can be found on the programs website: http://ns.missouri.edu/graduate_apply.html

**Human Development and Family Science**

Lawrence Ganong, Chair
405 Gentry Hall
Undergraduate

• BS in Human Development and Family Science (p. 615)
  • with emphasis in Child Development and Education (p. 616)
  • with emphasis in Child Life Specialist (p. 617)
  • with emphasis in Early Childhood Education in a Mobile Society (p. 618)
  • with emphasis in Family and Consumer Sciences Education (p. 619)
  • with emphasis in Family and Lifespan Development (p. 619)

The Department of Human Development and Family Science (HDFS) offers a BS in Human Development and Family Studies, which combines basic understanding of human development with preparation for professional service to individuals and families. Career opportunities are primarily found in human service agencies serving children, adolescents, older adults, parents and families. The human development and family studies major also prepares the student for graduate study in HDFS and related fields. Students in the HDFS major must select one of the emphasis areas listed above. (Note: Emphasis areas appear on transcripts but not on diplomas.)

Graduate

While MU does not offer graduate degrees specifically in human development and family science, the University does offer graduate degrees in human development and family studies, as well as opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

BS in Human Development and Family Science

Degree Program Description

The Human Development and Family Science program is developed from a base of human development and family science courses. It is essential for the student working with children, adolescents or adults to understand and to be able to maximize the resources offered by the family. It is equally important for the student concerned with the quality of family life to recognize the intricate spiral of changing needs in the growing individual. Students must choose an emphasis area.

Major Program Requirements

Majors in all of the emphasis areas in HDFS must complete the core courses below. Requirements for each emphasis area are on the page for that emphasis area.

Grade of 2.0 (C) or better required in these core classes:

<table>
<thead>
<tr>

schools, child care centers, infant-care programs, after-school programs, and other educational and social service facilities for children. Additional job opportunities include group homes, shelters, child care and provider training agencies, Parents as Teachers, and YMCA/YWCA.

**Major Program Requirements**

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below. Students must achieve a grade of C (2.0) in all HDFS courses in order to graduate with an HDFS major.

# Major Program Requirements

This academic emphasis requires that students successfully complete child life volunteer, practicum, and clinical internship experiences to attain this degree, as well as be eligible to take the Child Life Professional Certification Examination to obtain the CCLS credential. Clinical education sites require that students provide proof of health insurance, up-to-date immunizations, and student professional liability insurance. Students must also pass mandatory drug screens, criminal background checks, and any other required qualification checks prior to beginning any clinical education experience in child life.

Failure to provide appropriate documentation, or pass drug screens and criminal background checks prior to the beginning of these experiences may result in dismissal from the child life degree program in HDFS.

The student is responsible for all costs incurred with these qualification checks.

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below. All courses in sections A-B below are required. Students must achieve a grade of C (2.0) in all HDFS courses in order to graduate with an HDFS degree, as well as be eligible to take the Child Life Professional Certification Exam presented by the Child Life Certification Committee.

## Degree Program Description

The Child Life Specialist emphasis area prepares graduates to provide for the socioemotional needs, and support the optimum growth and development of children and their families in a variety of healthcare settings. Child life specialists use therapeutic play, psychological preparation, and coping skills interventions to help reduce the anxiety and stress related to illness, disability, hospitalization and medical procedures. Through a family-centered care approach, they provide parents and other family members reasurance and emotional support, help them understand psychosocial needs, and provide tools to help them minimize psychological trauma. Courses focus on understanding normal and exceptional child and family development, effective methods of working with children and families, as well as integration of theory and research into hands-on clinical practice experiences. In addition to a 100-hour practicum experience (selection is on a competitive, space-available basis) at MU’s Children’s Hospital, the student’s last semester is spent off-campus completing a 14 to 16 week clinical internship in a pediatric hospital setting. Students who successfully complete the degree program are prepared to take the Child Life Professional Certification Exam presented by the Child Life Certification Committee.

BS in Human Development and Family Science with Emphasis in Early Childhood Education in a Mobile Society

Degree Program Description

This online bachelor’s of science degree prepares students to work in the field of early childhood education. This program emphasizes the following areas: Child development, growth, and learning; Early education curricula and frameworks; Learning activities, technology use, and other experiences for young children; Family and community influences on children; Challenges facing families in today’s world; Assessment of children and environments; Professional and ethical standards; Hands-on experiences and clinical practice. Upon completion of the program, students are qualified to work in various early education and care settings serving children from birth through eight years in a wide variety of community and military settings, including early education centers and preschools, family and home care settings, Head Start and Early Head Start programs, and before/after school programs.

Major Program Requirements

The program is offered by Human Development and Family Science faculty in conjunction with other university partners as part of the Great Plains IDEA. Interested applicants will apply for admission to this program through the undergraduate admissions office at the University of Missouri and to the Department of Human Development and Family Science. Courses will be taught by University of Missouri faculty and by scholars from other Great Plains IDEA institutions, including Iowa State University, Michigan State University, Oklahoma State University, South Dakota State University, Texas Tech University, and University of Nebraska-Lincoln. Your degree will be awarded by the University of Missouri.

Applying

To be admitted, you must already have completed at least 30 credits general education requirements earning at least a 2.5 grade point average (GPA). These hours must include a Human Lifespan Development course or equivalent. For information about applying to this program, visit Mizzou Online (http://online.missouri.edu/degereprograms/human-environmental-sciences/early-childhood-in-mobile-society/bachelors).

Contact Information

Please contact the Human Environmental Sciences Student Services office at HESstudentserVICES@missouri.edu or Ehren Oncken, the undergraduate enrollment counselor at Mizzou Online, at (800) 609-3727, with questions about this program.

Total Credits: 117

1. Course requires a C or higher per department policy
2. Course requires a C- or higher per university policy

### Degree Program Description

Family and Consumer Sciences Education emphasis prepares students to teach family and consumer sciences from birth to grade 12 in public schools. Students take required coursework in nutrition, child development, interpersonal relationships, personal finance, interior design, consumer behavior and courses from the College of Education required to become a certified teacher for middle school or high school.

#### Major Program Requirements

This academic emphasis requires that students successfully complete field experiences and a student teaching internship. Public schools require that students provide proof of up-to-date immunizations and professional liability insurance. Criminal background checks and other qualifications may be required depending on the school.

Due to changes from the Missouri Department of Elementary and Secondary Education (DESE) that affect certification beginning in 2017, new students are not being accepted into this program at this time.

#### Semester Plan

There is not a semester plan built for this emphasis area.

### BS in Human Development and Family Science with Emphasis in Family and Lifespan Development

#### Degree Program Description

In the Family and Lifespan Development emphasis, students become familiar with theory and research about families and individuals across the lifespan. Coursework focuses on bio-psycho-social development, family functioning, and interpersonal relationships in relevant settings such as at home, in child care, at school, and in the work place. Diversity is emphasized through examining multicultural families and diverse family structures and processes, and variations in individual development and relationships associated with such factors as gender, race, ethnicity, social class and health status. Opportunities are available for the practical application of theory and research in working with individuals, families, schools, and communities.

#### Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

**Semester Plan**

In addition, students may select up to 6 hours of advisor-approved courses from related disciplines such as Anthropology, Black Studies, Communication Studies, Educational, School and Counseling Psychology, Psychology, Sociology, and Women’s and Gender Studies. (0-6 credits). The student must obtain academic advisor approval prior to enrolling in these courses.

Students may plan a program of study which will help prepare them for earning the **Certified Family Life Educator (CFLE)** credential from the National Council on Family Relations. Consultation with the student’s academic advisor is recommended to determine the current requirements for this credential.

1. H_D_FS 1600 must be taken before H_D_FS 2300 or any 3000/4000-level H_D_FS course.
2. Cannot be completed until successful completion of H_D_FS core courses and H_D_FS 3430, H_D_FS 3440 and 12 credit hours from H_D_FS 4610, H_D_FS 4620, H_D_FS 4630, H_D_FS 4640 and H_D_FS 4700 or consent of instructor. 3 credit hours of these 3000/4000-level courses can be concurrent with H_D_FS 4970.

**Semester Plan**

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.
The University of Missouri has many resources to assist you in exploring majors and career possibilities. For guidance, visit the Majors and Careers (https://career.missouri.edu/majors-careers) website or view specific resources below.

- If you are considering a change of major or are exploring multiple majors, schedule an appointment with an advisor in Academic Exploration and Advising Services (AEAS) (http://aeas.missouri.edu) by calling (573)884-9700.
- If you would like to learn more about your career interests, abilities, values and talents, visit the MU Career Center (http://career.missouri.edu) in the lower level of the Student Success Center. No appointment is necessary to explore career options with one of our staff members.
- If you would like information about MU majors and degree programs, visit:
  - the Degrees, Majors (Degree Programs), Emphasis Areas, Minors and Certificates (p. 18) page in the catalog,
  - the MU Majors (https://majors.missouri.edu) website.

For additional major and career exploration resources, visit Major & Career Exploration (p. 32) in the catalog.

Adjunct Affiliated Faculty A. Ball, L. Driskal-Hawxby, R. Feistman*, M. Herzog*, C. Hollestelle, R. Horstmeier, R. Johnson, M. Lehman, K. Wallace, S. Wright, L. Waint
Curators Professor Emerita M. Coleman**
Professor Emerita J.M. Ispa**, K. Thornburg*
Professor Emeritus L. Ganong**, S.R. Jorgensen*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- Minor in Human Development and Family Studies (p. 622)

While MU does not offer undergraduate degrees specifically in human development and family studies, the University does offer undergraduate degrees in human development and family science (p. 615), as well as opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

- MA in Human Development and Family Studies (p. 623)
  - with emphasis in Early Childhood Development (p. 624)
  - with emphasis in Family and Community Services (Great Plains IDEA) (p. 625)
  - with emphasis in Family Studies (p. 625)
  - with emphasis in Gerontology (p. 626)
  - with emphasis in Lifespan Development (p. 626)
  - with emphasis in Youth Development (p. 627)

- MS in Human Development and Family Studies (p. 627)
  - with emphasis in Early Childhood Development (p. 628)
  - with emphasis in Family and Community Services (Great Plains IDEA) (p. 629)
The College of Human Environmental Sciences also offer a PhD in Human and Environmental Sciences with emphasis in Human Development and Family Studies (p. 631). They also offer Graduate Certificates in the following related areas: Youth Development Specialist (p. 663), Youth Development Program Management and Evaluation (p. 663) and Gerontology (p. 663).

The Department of Human Development and Family Science offers Master of Arts (applied emphasis) and Master of Science (research emphasis; on-campus only) degrees. The MA and MS degrees prepare students for positions in junior college or college teaching and leadership in public and private human service institutions. The MS degree also provides research training toward the PhD degree.

Selected in 2002 and again in 2007 as the Most Outstanding Graduate Department on campus, we have a nationally recognized faculty whose research productivity consistently has been ranked in the top 5% of the 235 family studies programs across the country. Our department houses former journal editors as well as a past president of the National Council of Family Relations.

We have a well-established mentoring program, which begins as soon as the student is accepted into HDFS. We actively prepare our students to become successful academic scholars both in terms of research and teaching. The range of careers for which we prepare our students is unparalleled. Since 2000, our program has placed more faculty into research extensive family studies departments than any other program in the U.S. We also prepare PhDs and master’s students for applied careers in administration, program evaluation, and program development. Our alumni have positions with universities and colleges in the United States, Canada, and Korea. We have developed an outstanding reputation as a place to study individual and family diversity and multiculturalism across the life course. Because we define diversity and multiculturalism broadly, our focus is on the multitude of ways that individuals and families may differ, including, but not limited to race, ethnicity, socioeconomic status, age, family structure, nationality, geographic location, and sexual orientation.

Financial Aid from the Department

All applicants for the on-campus program are automatically considered for assistantships, fellowships, and other funding packages. Check the HDFS website or ask the program contact for additional details.

About the Master’s Degrees

The Department of Human Development and Family Science offers Master of Arts (http://catalog.missouri.edu/undergraduategraduate/collegeofhumanenvironmentalsciences/humandevelopmentandfamilystudies/ma-human-development-family-studies) (applied emphasis) and Master of Science (http://catalog.missouri.edu/undergraduategraduate/collegeofhumanenvironmentalsciences/humandevelopmentandfamilystudies/ms-human-development-family-studies) (research emphasis; on-campus only) degrees. The MA and MS degrees prepare students for positions in junior college or college teaching and leadership in public and private human service institutions. The MS degree also provides research training toward the PhD degree.

Areas of Study

On-campus students selecting the MA or MS degree may specialize in family studies, child life, early childhood development, life span development, or a dual-degree program in HDFS and the School of Law. Online students may select an MA specializing in gerontology, youth development, or family and community services.

Master’s Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master’s degree is as follows:

- Family Studies: 36 hours
- Child Life: 30 (fast track) or 36 hours
- Early Childhood: 36 hours
- Life Span: 36 hours
- Gerontology: 36 hours
- Youth Development: 36 hours
- Family and Community Services: 36 hours
- Dual MS/MA/JD: approximately 113 hours

About the Online Certificate Programs

The Department of Human Development and Family Science offers three online graduate certificates with specialization in youth development, youth development program management and evaluation and gerontology.

Note: Courses taken for any of the above certificate programs may be applied toward the related online MA degrees in youth development and gerontology. Up to 12 credits of coursework from the courses taken for any of the certificate programs may be applied toward their related online MA degrees described above.

For more information please follow the link to the certificate of interest (p. 660).

Minor in Human Development and Family Studies

Undergraduate students interested in obtaining a minor in HDFS should fill out the online application, located on the College of Human Environmental Sciences website.

Students must meet the minor requirements in place at the time of application, thus the application should be submitted when they begin taking courses for the minor in HDFS, and before all of the required courses are complete.

To earn a minor in HDFS, an undergraduate student must successfully complete 15-16 credit hours of coursework, as indicated in the two groups listed below.

REQUIRED COURSES

Students must successfully complete all 3 of the following courses:

H_D_FS 1600 Foundations of Family Science
CHOOSE TWO COURSES FROM THE LIST BELOW

Students must choose and successfully complete 2 courses from the list below: 

- H_D_FS 1610 Intimate Relationships and Marriage 3
- H_D_FS 3050 Child Development: Birth to 3 (Infant/Toddler) 3
- H_D_FS 3150W Child Development 4-8 (Early Childhood) - Writing Intensive 3
- H_D_FS 3430 Adolescence and Young Adulthood 3
- H_D_FS 3440 Adulthood and Aging 3
- H_D_FS 4610 Stress and Resilience in Families 3
- H_D_FS 4620 Family Interaction 3
- H_D_FS 4630 The Process of Divorce 3
- H_D_FS 4640 Interpersonal Relationships 3
- H_D_FS 4700 Children and Families in Poverty 3
- H_D_FS 4740 Parent-Child Relations Over the Life Course 3

Total Credits 6

TOTAL CREDITS FOR MINOR IN HDFS: 15-16

Students seeking to earn a minor in HDFS must earn the minimum of a C (2.0) grade in each course selected for the minor – no exceptions. Pass/ fail graded courses will not be accepted.

1 HDFS 2400 is offered in two different formats - writing intensive (4 credits), and non-writing intensive (3 credits); either format will fulfill the requirements of the Minor in HDFS.

2 Some courses on this list may require specific pre-requisites and/or instructor consent. Please see the Enrollment Information and Course Description in myZou for more information.

A total of 6 hours of transfer credit from other colleges or universities outside of the University of Missouri – Columbia will be accepted for the minor in HDFS, provided the transfer courses are a direct equivalent to MU HDFS courses.

A minor must be completed and awarded at the same time as the MU undergraduate degree (i.e., minors cannot be claimed after graduation). Once an HDFS minor is awarded, a student cannot return to MU to complete a second undergraduate major in HDFS.

Students cannot earn a major and a minor in HDFS.

Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master’s degree is as follows:

- Family Studies: 36 hours
- Child Life: 30 (fast track) or 36 hours
- Early Childhood: 36 hours
MA in Human Development and Family Studies with Emphasis in Early Childhood Development

The Early Childhood Development program is planned for students who wish to focus their professional preparation on children as they develop, influence, and are influenced by a variety of environments.

1. Statistics and research methods (6 hours)
   - H_D_FS 8200: Research Methods in Human Development and Family Science

2. Core content (24 hours)
   a. Family functioning and human development (12 hours)
      - H_D_FS 8640: Family Interaction
      - H_D_FS 8012: and Family Dynamics and Intervention
      - H_D_FS 8210: Theories of Human Development
      - H_D_FS 8420: Cognitive Development
      - H_D_FS 8440: Social and Emotional Development
   b. Electives* (12 hours)
      - H_D_FS 7257: Aging and the Family
      - H_D_FS 7300: Black Families
      - H_D_FS 7610: Stress and Resilience in Families
      - H_D_FS 7630: The Process of Divorce
      - H_D_FS 7640: Interpersonal Relationships
      - H_D_FS 8220: Family Theories
      - H_D_FS 8235: Administration and Program Management
      - H_D_FS 8300: Advanced Seminar on Multicultural Families
      - H_D_FS 8460: Life Course Perspective
      - H_D_FS 8610: Remarriage & Stepfamilies: Development, Dynamics, & Intervention
      - H_D_FS 8630: Gendered Relations in Families
      - H_D_FS 8770: Poverty
      - H_D_FS 8710: Children, Families and Public Policy
      - LTC 8600: Home-School Partnerships: Working with Families
      - LTC 8612 & SPC_ED 8495: Advanced Early Childhood Curriculum and Introduction and Methods of Early Childhood Special Education ((courses must be taken concurrently))
      - LTC 8900: Seminar in Curriculum and Instruction
      * Or any advisor approved graduate level course

3. Independent effort (3-6 hours)
   - Or H_D_FS 8972: Internship in Human Development and Family Science
   - Or MISC 8999: Graduate Examination*

   * No credit offered for the exam.

For admission requirements, refer to the Office of Graduate Studies website for the minimum qualifications for the degree program (https://gradstudies.missouri.edu/degrecategory/human-development-family-studies) and Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate.
admission page to learn about specific admission criteria, application
deadlines, eligibility, and application process. Before official admissions
to the University of Missouri, your application materials will be reviewed
by both the Office of Graduate Studies and the degree program to which
you’ve applied.

MA in Human Development and
Family Studies with Emphasis in
Family and Community Services
(Great Plains IDEA)

The mission of the Human Development and Family Studies Master’s
degree emphasis in Family and Community Sciences may be summed
up in three words – Understand, Deliver, Manage. The goal of the
new Family and Community Services online MA option in Human
Development and Family Studies is to create alumni capable of
Understanding family, interpersonal, and community dynamics in
order to help individuals and their families through education, resource
management, and effective service delivery. In addition, graduates
of this degree option will acquire knowledge and skills in program and
agency management.

The Family and Community Services MA emphasis consists of 36 credit
hours, including the 10 core courses shown below. For the remaining
6 credits students may choose from: (a) 6 credits of electives and a
capstone examination, (b) 3 credits of electives and a 3 credit internship,
or (c) 6 credits of an internship. Elective courses will be offered annually.
Exams and internships will include an independently produced paper and
an oral examination by the student’s MA committee.

For admission requirements, refer to the Office of Graduate Studies
website for the minimum qualifications for the degree program (https://
gradstudies.missouri.edu/degreecategory/human-development-
family-studies) and Graduate Studies (http://gradstudies.missouri.edu/
admissions/eligibility-process/minimum-requirements.php). Because
requirements vary, you must refer to a degree program’s graduate
admission page to learn about specific admission criteria, application
deadlines, eligibility, and application process. Before official admissions
to the University of Missouri, your application materials will be reviewed
by both Office of Graduate Studies and the degree program to which
you’ve applied.

### MA in Human Development and Family Studies with Emphasis in Gerontology

The Master’s program (MA only) is designed to prepare professionals who are either working directly with older people or are involved in education and research related to the elderly. Professionals offering direct services often are involved in health promotion programs; directing intergenerational activities; managing senior centers or retirement communities; counseling older people and their families; and helping people plan for retirement.

MA in Human Development and Family Studies with Emphasis in Youth Development

An estimated 17,000 organizations (e.g., 4-H, Boys and Girls Clubs, Boys Scouts and Girls Scouts) currently serve more than 30 million young people, and national trends are moving away from focusing on problems and behavior correction, instead favoring a positive approach that focuses on developing the strengths of youth. The 36 credit master's degree program (MA) consists of 9 required core courses (25 credits), 5-11 credits of electives, and either a comprehensive exam or an internship experience totaling 2-6 credits. Core courses offered within the program include eight 3-credit courses and a 1-credit professional-development seminar.

**Required:**

Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master's degree is as follows:

• Family Studies: 36 hours
• Child Life: 30 (fast track) or 36 hours
• Early Childhood: 36 hours
• Life Span: 36 hours
• Gerontology: 36 hours
• Youth Development: 36 hours
• Family and Community Services: 36 hours
• Dual MSorMA/JD: approximately 113 hours Research

Master's of Science students must complete a thesis (H_D_FS 9090). Students who wish to pursue the thesis must petition the department's graduate faculty for approval. The thesis requires testing a hypothesis or exploring a research question. Student will submit and orally defend the thesis to their committee. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Research

Based on their chosen degree option and whether they are pursuing the MS or MA degree, master’s students may write a thesis (H_D_FS 9090), complete a project (H_D_FS 8900), or do an internship (H_D_FS 8972) for up to six credit hours. The thesis requires testing a hypothesis or exploring a research question. The project option is no less scholarly than a thesis, but usually has an applied focus. For instance, a project may involve designing a program and developing curriculum materials (e.g., instructional videotapes, websites, resource manuals). Internships are often conducted off-campus and must be negotiated with the student’s advisor and approved by the student's faculty committee. Students who wish to pursue the thesis option must petition the department's graduate faculty for approval. Students completing a thesis earn a Master of Science degree. Those completing a project or internship earn the Master of Arts. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student’s program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department’s description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Time Limits for Masters’ Degree Completion

Students working toward the master’s degree have 5 years from the semester the first course is taken in which to complete all degree requirements. Extensions for one additional year to complete the degree may be granted with submission of a detailed plan for completion, including a timetable. Students must be making progress toward completion when they apply for the extension. A maximum of two extensions may be granted.
by both the Office of Graduate Studies and the degree program to which you’ve applied.

**MS in Human Development and Family Studies with Emphasis in Family Studies**

1. Statistics and research methods (6 hours)
   - H_D_FS 8200 Research Methods in Human Development and Family Science
   - Any advisor-approved statistics course 7000 level or above

2. Core content (21 hours)
   a. Family interaction and functioning (6 hours)
      - H_D_FS 8640 Family Interaction
      - or H_D_FS 8012 Family Dynamics and Intervention
      - H_D_FS 7640 Interpersonal Relationships
   b. Family structures, forms, and variations (9 hours)
      - H_D_FS 7300 Black Families
      - H_D_FS 7630 The Process of Divorce
      - H_D_FS 8770 Poverty
      - H_D_FS 8610 Remarriage & Stepfamilies: Development, Dynamics, & Intervention
   c. Family theory (3 hours)
      - H_D_FS 8220 Family Theories
   d. Electives* (3 hours)
      - H_D_FS 7257 Aging and the Family
      - H_D_FS 7610 Stress and Resilience in Families
      - H_D_FS 8300 Advanced Seminar on Multicultural Families
      - H_D_FS 8420 Cognitive Development
      - H_D_FS 8630 Gendered Relations in Families
      - H_D_FS 8710 Children, Families and Public Policy
      - *Or any advisor approved graduate level course

3. Human development (3 hours)
   - H_D_FS 8440 Social and Emotional Development
   - H_D_FS 8460 Life Course Perspective
   - H_D_FS 8210 Theories of Human Development
   - H_D_FS 8450 Adolescence and Emerging Adulthood
   - H_D_FS 8510 Parenting Education

4. Legal issues (3 hours)
   - LAW 5575 Family Law

5. Thesis (3-6 hours)
   - H_D_FS 9090 Research in Human Development and Family Science
   - *Or any advisor approved graduate level course

For admission requirements, refer to the Office of Graduate Studies website for the minimum qualifications for the degree program (https://gradstudies.missouri.edu/degreecategory/human-development-family-studies) and Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied.

**MS in Human Development and Family Studies with Emphasis in Family and Community Services (Great Plains IDEA)**

The department is no longer accepting applications to this program.

**MS in Human Development and Family Studies with Emphasis in Lifespan Development**

The Master’s-level Lifespan Development program is designed for students who have an interest in human development over the life course. Course work focuses on the principles of development, with special emphasis on the importance of context.

1. Statistics and research methods (6 hours)
   - H_D_FS 8200 Research Methods in Human Development and Family Science
   - Any advisor-approved statistics course 7000 level or above

2. Human development (3 hours)
   - H_D_FS 8210 Theories of Human Development

3. Core content (15 hours)
   a. Lifespan development (12 hours)
      - H_D_FS 7257 Aging and the Family
      - H_D_FS 8440 Social and Emotional Development
      - H_D_FS 8420 Cognitive Development
      - H_D_FS 8460 Life Course Perspective
      - H_D_FS 8450 Adolescence and Emerging Adulthood
   b. Family interaction and functioning (3 hours)
      - H_D_FS 8640 Family Interaction
      - H_D_FS 8012 Family Dynamics and Intervention
      - H_D_FS 8220 Family Theories
      - H_D_FS 7610 Stress and Resilience in Families
      - H_D_FS 7640 Interpersonal Relationships
   c. Family structures, forms, and variations (3 hours)
      - H_D_FS 8420 Cognitive Development
      - H_D_FS 8630 Gendered Relations in Families
      - H_D_FS 8710 Children, Families and Public Policy
      - *Or any advisor approved graduate level course

4. Electives* (6-9 hours)
   - H_D_FS 8300 Advanced Seminar on Multicultural Families
   - H_D_FS 8610 Remarriage & Stepfamilies: Development, Dynamics, & Intervention
   - H_D_FS 8630 Gendered Relations in Families
   - H_D_FS 8710 Children, Families and Public Policy
   - H_D_FS 8770 Poverty
   - *Or any advisor approved graduate level course

5. Thesis (3-6 hours)
   - H_D_FS 9090 Research in Human Development and Family Science
   - *Or any advisor approved graduate level course

For admission requirements, refer to the Office of Graduate Studies website for the minimum qualifications for the degree program (https://gradstudies.missouri.edu/degreecategory/human-development-family-studies) and the Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied.
deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

Human Environmental Sciences

Human Environmental Sciences Extension Specialist

A student who plans to be an extension specialist may choose a subject-matter area of interest. In addition, a master's degree in a subject-matter area generally is required in Missouri.

The student must fulfill the requirements for the chosen major while pursuing the extension objective. Additional electives can be chosen from such areas as adult education, communications and the social sciences.

Faculty

Professor L. Ganong**, J. Ispa**, B. Schwarz**, R. B Tofle**
Millisap Professor G. Carlo**
Associate Professor D. Rudy**, D. L. Sharpe**
Assistant Teaching Professor M. Goldschmidt*, S. L. Green-Ivey, F. Palermo*
Assistant Research Professor M. Herzog*
Associate State Personal Finance Specialist B. Procter, L. Schrader, A. Zumwalt

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in human environmental sciences, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

- PhD in Human Environmental Sciences (p. 630)
  - with emphasis in Architectural Studies (p. 630)
  - with emphasis in Human Development and Family Studies (p. 631)
  - with emphasis in Personal Financial Planning (p. 632)
  - with emphasis in Textile and Apparel Management (p. 633)

Director of Graduate Studies: Jung Ha-Brookshire

137 Stanley Hall
(573) 882-7224

PhD in Human Environmental Sciences

Students are required to pick an emphasis area to obtain the PhD in Human Environmental Sciences. Please see the individual emphasis degree requirement pages (p. 630) for more information.

PhD in Human Environmental Sciences with Emphasis in Architectural Studies

The Program

The Doctor of Philosophy (PhD) degree is designed for individuals who are interested in acquiring the knowledge and skills needed to conduct substantive, innovative, and original research that contributes to the theoretical and methodological foundation of architecture and interior design, and the dissemination of this research through teaching, publication, and practice. To this end, the curriculum is structured so students move gradually from overview of architectural research to the identification and pursuit of major and minor areas of specialization and, finally, to highly specialized original dissertation research. This framework promotes stimulating intellectual discourse among individuals with varying research philosophies and interests.

Both faculty and students interact within this framework to develop an enhanced understanding of how specialized research contributes to the definition and evolution of an improved theoretical and methodological basis for architectural studies.

Doctoral study in Architectural Studies, College of Human Environmental Sciences, is research-based and expands knowledge in the “major” areas of either environment and behavior or design with digital media. The major area is defined as that area of specialization in the doctoral program within which the student is expected to write his/her dissertation.

Students will choose a “supportive cognate area” which is intended to reinforce the development of an understanding of the discipline. Supporting cognate area courses are selected from a broad spectrum of disciplines providing students with the opportunity to design an individualized program of study that capitalizes on their unique interests and talents.

A Design Research concentration is offered for:

- Designers engaged in interior design, architecture, graphic or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry -- Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

The course work for the concentration is applied to the program of study. For specifics, see Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) on Department website.

Also see the Department website for additional information: Master Programs (http://arch.missouri.edu/academics_masters.html),
Environment and Behavior (http://arch.missouri.edu/academics_ebs.html), Design with Digital Media (http://arch.missouri.edu/academics_ddm.html), Online Study (http://arch.missouri.edu/academics_online2.html), Architectural Studies Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf) and Spotlight on Alumni (http://arch.missouri.edu/alumni.html).

Degree Requirements

The University of Missouri requires a minimum of 72 semester hours beyond the baccalaureate degree for the PhD. Coursework from the Design Research concentration can be applied to the program of study. The doctoral program committee provides departmental approval of the student’s plan of study (Form D-2), a list of the courses and the credit to be earned in each of them, which will, when completed:

- Prepare the student for research or scholarly investigation in the chosen field of study.
- Satisfy the credit-hour and residency requirement of the department.
- Satisfy any special requirements (collateral field, other special research skills) imposed by the department.
- Satisfy the Graduate School's requirement for a minimum of 15 hours of course work at the 8000/9000 level (exclusive of research, problems and independent study experiences).

The committee also recommends to the vice provost/dean, as part of the plan of study, any request for transfer of graduate credit. The student must substantially complete the course work outlined in the plan of study to the satisfaction of the doctoral program committee and the Graduate School before being declared ready for the comprehensive examination.

The research-based plan of study leads to the written doctoral dissertation. The dissertation is distinctive because it demonstrates the ability to conceive of and execute scholarly research, and it makes a contribution of new knowledge to the discipline. Research is conducted in one of the two interest areas — Environment and Behavioral studies (http://arch.missouri.edu/academics_ebs.html) or Design with Digital Media (http://arch.missouri.edu/academics_ddm.html). Specific course work is chosen based on subject matter and the type of research method selected— quantitative, qualitative or a combination of both.

PhD students must complete a final oral examination by an approved faculty committee.

In order to pass the examination, and thus qualify as the basis for the award of the PhD degree, the dissertation should have the following attributes:

- It demonstrates authority in the candidate’s field and shows evidence of command of knowledge in relevant fields;
- It shows that the candidate has a thorough grasp of the appropriate methodological techniques and an awareness of limitations;
- It makes a distinct contribution to knowledge because of the originality of the approach and/or interpretation of the findings and, in some cases, the discovery of new facts;
- It demonstrates an ability to communicate research findings effectively in the professional arena and in an international context;
- It is a careful, rigorous and sustained piece of work demonstrating that a research “apprenticeship” is complete and the holder should be admitted to the community of scholars in the discipline.

Admissions

<td>50th percentile</td>
<td>50th percentile</td>
</tr>
</tbody>
</table>

- Some exceptions are made.

- Minimum GPA: 3.0 for last 60 hours
Plan of Study

Students selecting the doctoral degree work with members of their doctoral committee to create an individualized plan of study tailored to their specific research interests. Over the course of their degree program all doctoral students are required to enroll in six credit hours of research practicum, three credit hours of teaching practicum, and complete coursework in theory, research methods, statistics, and their collateral area. In addition, all doctoral students complete a minimum of 12 credit hours of research for their dissertation. A sample plan of study can be found on the HDFS website (http://hdfs.missouri.edu/).

Qualifying Process for Doctoral Students

To be officially admitted to the HDFS doctoral program, students generally must have completed a master’s degree in HDFS or a related field, although exceptions are granted.

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student’s program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department’s description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

PHD Comprehensive Matriculation Exam

The comprehensive exam consists of two parts. Part I involves an in-house written and oral examination over

1. theory, methods, and statistics,
2. the student’s area of specialization and core content, and
3. the student’s collateral area.

The advisor is responsible for collecting questions from all five committee members, constructing the exam, and getting approval for the final version of the exam from available committee members. It is expected that the written exam will take the student no longer than 8 hours (e.g., two half-days or one full day) to complete. The written exam will be assessed by the committee and the student will meet with the committee for an oral defense of the written exam. If this part of the exam is passed the student moves to Part II of the comprehensive exam, which involves writing a grant pre-proposal and, if approved, a full grant proposal as outlined in the HDFS Graduate Handbook. For a detailed description of the comprehensive exam timeline please refer to the Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Admission to Candidacy

After students pass Parts I and II of the comprehensive examination, they complete the D3 form to apply to the Division of Graduate Studies for admission to doctoral candidacy. Following admission to candidacy, students complete a prospectus for the dissertation project. The prospectus includes a pertinent review of the literature, statement of the problem, the purpose of the proposed study, description of the research design, and discussion of the specific means by which the data will be analyzed. Subsequently, the dissertation committee will meet to evaluate, request revisions to, and approve the student’s dissertation prospectus.

Time Limits on Degree Completion

A graduate degree represents current knowledge of the field as of the date the degree is granted. Limitations have therefore been set regarding the number of years to finish the degree. Doctoral students have 6 years in which to complete degree requirements. The clock starts the semester that the first class beyond the master’s degree is taken. The comprehensive exam must be completed no later than by the end of the fourth year of study. HDFS doctoral students have only three years after passing the comprehensive examination to complete the doctoral degree.

Petitions for Extension

On petition of the candidate, an extension of 1 year may be granted by the HDFS graduate faculty. The student may petition for no more than two one-year extensions. Therefore, a doctoral student may have no more than 5 years, including two one-year extensions, to complete the doctoral degree after passing the comprehensive exam. On petition of the candidate and the candidate’s department, an extension of this time limit may be granted by the Graduate School.

PhD in Human Environmental Sciences with Emphasis in Personal Financial Planning

College of Human Environmental Sciences
239 Stanley Hall
573-882-9343
http://pfp.missouri.edu/

The doctoral program is designed to develop skill in the evaluation and generation of research that advances the disciplines engaged in Personal Financial Planning, such as Personal Finance, Family Economics, Consumer Economics, Corporate Finance, Law, among others. This program prepares students for careers in university research and teaching, government, Extension, or public policy evaluation.

Application Deadlines

Fall deadline: February 1
Spring deadline: October 1

Admission Criteria

- Minimum TOEFL scores (for ESL applicants only):
  - Internet-based test (iBT) 80
  - Paper-based test (PBT) 550

We also accept IELTS scores
Item | Score
--- | ---
International English Language Testing System (IELTS) | 6.5

- Minimum GPA: 3.0 in last 60 hours

**Required Application Materials**

*To the Graduate School:*

- All required Graduate School documents
- 3 letters of recommendation
- GRE or GMAT scores
- Statement of Purpose
- Official transcripts

**PhD in Human Environmental Sciences with Emphasis in Textile and Apparel Management**

</tbody>
</table>

**Required Application Materials**

*To the Graduate School (https://applygrad.missouri.edu/apply):*

- All required Graduate School documents
- Statement of professional objectives (upload to application)
- Departmental application (upload through the Graduate School application or send directly to department)
- Three letters of recommendation (upload preferred, or send directly to department)
- Official transcripts from every college or university you have attended

- GRE Scores
- Latest vitae or résumé
- TOEFL scores if international student
- A digital design portfolio if pursuing design research

**Financial Aid from the Program**

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BS in Nutrition and Exercise Physiology (p. 634)
  • with emphasis in Human Physiology and Translational Sciences (p. 635)
  • with emphasis in Nutrition and Foods (p. 636)
  • with emphasis in Physical Activity, Nutrition and Human Performance (p. 637)

The mission of the Department of Nutrition and Exercise Physiology at the University of Missouri is to improve the health of Missourians and the larger population through research, teaching, and outreach related to nutrition and physical activity. We strive to be a diverse set of leaders, innovators, and educators who promote improved human health through our focus on nutrition and physical activity.

The department has a long tradition of education excellence and is the only department on campus that spans three colleges (School of Medicine, College of Human Environmental Sciences, and College of Agriculture, Food, and Natural Resources). This unique configuration poises and challenges us to be a model of interdisciplinary research and education on campus. We hold the honor of being the longest standing Coordinated Programs in Dietetics in the country and the only one in the state of Missouri; it also holds the designation of the first combined 5 year bachelor’s program. We have recently been recognized as a partner with Exercise is Medicine® on Campus (EIM-OC), a global health initiative managed by the American College of Sports Medicine (ACSM).

Our faculty is nationally-recognized for their contributions to the fields of nutrition and exercise. Students in our programs are prepared for a wide variety of career paths in the healthcare/medical fields, corporate and commercial industries, government and non-profit sectors, and graduate programs. Typical areas our students are found in are: Medicine (allopathic and osteopathic), Dentistry and Pharmacy, Physicians Assistants, Registered Dietitian Nutritionists, Exercise Physiologist, Physical Therapy, Occupational Therapy, cardia rehab, wellness resource centers, and community health programs. Students who major in Nutrition and Exercise Physiology may choose from three emphasis areas:

• Human Physiology and Translational Sciences (previously Nutritional Sciences)
• Nutrition and Foods/Master's in Dietetics
• Physical Activity, Nutrition and Human Performance (previously Nutrition and Fitness)

Students majoring in NEP are exposed to a strong science base including biology, chemistry, biochemistry, physics, anatomy, physiology, kinesiology, exercise science/exercise physiology, and human nutrition. In addition, they must take a set of core courses for each emphasis area and complete the required general education requirements for the University of Missouri. Specific GPA requirements and/or grades are required in each area. This information can be found on our department website: http://nep.missouri.edu

Students who want to explore the major can take

• NEP 1034 Introduction to Human Nutrition
• NEP 1340 Introduction to Exercise and Fitness
• NEP 1485 Career Exploration in Exercise Science
• NEP 2380 Diet Therapy for Health Professionals.

Two minors are available:

• Nutritional Sciences (http://ns.missouri.edu/minors.html) (intended for students majoring in food science, biological sciences, biochemistry, health sciences, or related fields)
• Wellness (http://ns.missouri.edu/minors.html) (intended for both non-science and science students interested in coursework focused on empowering them to make informed decisions related to lifelong personal nutrition and exercise choices)

Graduate

• MS in Nutrition and Exercise Physiology (p. 639)
  • with emphasis in Exercise Physiology (p. 639)
  • with emphasis in Nutritional Sciences (p. 640)

BS in Nutrition and Exercise Physiology

Degree Program Description
The BS in Nutrition and Exercise Physiology offers three different paths, each with a different focus. All three areas use a science based approach; integrating human physiology, chemistry, biology, biochemistry, and social/psychological sciences to study the influences of nutrition and physical activity on human health and disease. All students within these areas are exposed to significant opportunities for undergraduate research, student organizations, study abroad, hands on internships and field work as well as interaction with nationally recognized faculty in their chosen fields. Students majoring in our emphasis areas will be well prepared for health-related careers in numerous fields such as: Registered Dietitian Nutritionist (RDN), medicine, dentistry, pharmacy, physician’s assistant, physical therapy, occupational therapy, or for employment in fitness assessment, lifestyle intervention, cardia rehab, education, health and wellness, exercise supervision and program administration and several different certifications. They are also prepared for graduate study in biomedical/translational sciences, exercise physiology and numerous other fields.

Major Program Requirements
The BS in Nutrition and Exercise Physiology is offered with three emphasis options: Human Physiology and Translational Sciences (p. 635), Nutrition and Foods (p. 636), and Physical Activity, Nutrition
and Human Performance (p. 637). All degree requirements are listed at the emphasis level. A student must choose an emphasis area for this degree.

**Semester Plan**

The BS in Nutrition and Exercise Physiology is offered with three emphasis options: Human Physiology and Translational Sciences (p. 635), Nutrition and Foods (p. 636), and Physical Activity, Nutrition and Human Performance (p. 637). Please refer to the emphasis area for semester plans. A student must choose an emphasis area for this degree.

**BS in Nutrition and Exercise Physiology with Emphasis in Human Physiology and Translational Sciences**

---

**Degree Program Description**

This degree program is highly multidisciplinary, integrating human physiology, nutrition, pathophysiology, pharmacology, biochemistry, organic chemistry, biology, sociology/psychology, and related areas to gain both a broad and a deep understanding of the determinants of human health and disease. Due to the department's unique configuration (only department on campus that spans three colleges - School of Medicine, College of Human Environmental Sciences, and College of Agriculture, Food, and Natural Resources), students in this program have access to many researchers and resources represented from each unit. Students selecting this area of study will be well-prepared for health-related careers such as Medicine (allopathic and osteopathic), Dentistry, Pharmacy, Physician's Assistant, as well as for graduate study in Biomedical/Translational Sciences.

The department also offers significant opportunities for undergraduate research, including an opportunity to apply for paid undergraduate research internship (http://ns.missouri.edu/ug_summerintern.html) opportunities that span the academic year.

**Major Program Requirements**

To transfer into the nutrition and exercise physiology program after their first semester on campus, students are required to have a minimum overall GPA of 2.65 and be enrolled in at least one required biology, chemistry, physics, or biochemistry course or one required NEP course. All NEP courses require a grade of C or higher.

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

Additional courses may be required to meet college requirements or career objectives. On-campus research internships are available and highly recommended.

---
BS in Nutrition and Exercise Physiology with Emphasis in Nutrition and Foods

Degree Program Description

The emphasis in Nutrition and Foods prepares students to integrate and apply the principles of the biomedical sciences and food and nutrition sciences to design and manage effective nutrition programs in a variety of settings. Nutrition and Exercise Physiology with emphasis in Nutrition and Foods is a five-year BS-MS program. Nutrition and Foods is the first step to acceptance into the Professional Coordinated Program in Dietetics.

The Coordinated Program in Dietetics (http://nep.missouri.edu/dietetics.html) (CP) at the University of Missouri has a rich tradition. Established in 1972, it is the only coordinated program in the state of Missouri and is among the oldest accredited coordinated programs in the United States. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics and is approved for accreditation through 2024.

The Coordinated Program in Dietetics prepares students to become Registered Dietitian/Nutritionists (RD/N). RDNs specialize in applied nutrition and work in a variety of practice settings, such as hospitals and clinics, schools, business and industry, private practice, and public health clinics. Upon completion of the program, students are eligible to take the national Registered Examination for Dietitians (RD Exam). The four-year pass rate for first-time test takers is 98%.

During the first two years of the curriculum, students develop a foundation in science and general education. This is followed by a three-year course of study devoted to professional courses and supervised practice (fieldwork). The Dietetics program is a five-year program where students complete:

- A Bachelor of Science (Nutrition and Foods)
- A Master of Science (Dietetics)
- All supervised practice (fieldwork) necessary to meet the requirements to take the Registration Examination for Dietitians (RD Exam)
- A verification statement providing proof of completion will be provided after the graduate degree is awarded

Admission Requirements:

- Students must have applied and be admitted to the University of Missouri
- A CUM GPA of 3.2 or higher is required to apply (MU and transfer courses will be considered)
- Completed or enrolled in courses listed on the 1st 4 semesters of the sample plan
- Completed or enrolled in NEP 2340 and BIOCHM 3630 (or approved equivalent course) at time of application. Grade of B- or higher is required or slot may be forfeited
- If admitted, student must successfully pass all background checks, drug screening, and required health records prior to start of program
- Submit an application (due in January), required application materials are posted each year on the department's webpage (http://ns.missouri.edu).
- Participate in an interview with admissions committee

BS in Nutrition and Exercise Physiology with Emphasis in Physical Activity, Nutrition and Human Performance

Degree Program Description

**This emphasis has recently undergone a name change to better describe the focus; it was previously known as Nutrition and Fitness. This program is for students with a passion for health and wellness, evidence-based science, helping other people, and learning how and...**
why physical activity and nutrition impact human performance. Students earning this degree are well-prepared for employment opportunities that include fitness assessment, lifestyle intervention education, health and wellness, exercise supervision and program administration in schools, businesses and hospitals, health education, and promotion and entry-level positions in cardiac and pulmonary or spine rehab. This is a rapidly expanding area with opportunities in corporate and commercial industries, government, and non-profit sectors.

Graduates of this program are qualified to sit for the following certifications without any additional courses or education beyond our core requirements: ACSM Certified Exercise Physiologist (ACSM EP-C), ACSM Certified Personal Trainer (ACSM CPT), ACSM Certified Group Exercise Instructor (ACSM GEI), NSCA Certified Personal Trainer, NSCA Certified Strength & Conditioning Coach, ACE Certified Personal Trainer.

In addition to the job opportunities listed above, past graduates of this area have continued their studies in a variety of areas such as graduate school for Exercise Science/Physiology, Kinesiology, Physical Therapy, Occupational Therapy, Physician's Assistant, Chiropractic, Nursing, or applied to Medical, Dental, and Pharmacy school.

**Major Program Requirements**

Nutrition and Exercise Physiology with emphasis in Physical Activity, Nutrition, and Human Performance does not require an application or have a pre-program status. Students may declare the major and emphasis area by indicating it when they apply to MU and transition directly into the program. After the first semester at MU, students must have a minimum of a 2.0 GPA (term and CUM) to declare the program. The student will need to complete a transfer of division form or if a current student in another program within the department or college of HES, notify their advisor and/or HES Student Services of their wishes. There are specific grade requirements for most courses within the emphasis, these are outlined on the degree requirement sheet and noted on the degree audit.

C- or higher: CHEM 1320, CHEM 2030 or CHEM 2100, NEP 3850W or BIO_SC 3700, PTH_AS 2201( or the equivalent). All NEP courses (unless noted below)

C- or higher: CHEM 1320, CHEM 2030 or CHEM 2100, NEP 3850W

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

## MS in Nutrition and Exercise Physiology

The MS in Nutrition and Exercise Physiology has two emphasis areas. Please see the emphasis area pages in Nutritional Sciences (p. 640) and in Exercise Physiology (p. 639) for degree information.

## MS in Nutrition and Exercise Physiology with Emphasis in Exercise Physiology

### About the Program

The graduate program in Nutrition and Exercise Physiology is designed to provide advanced training in both the basic and applied aspects of exercise, physical activity and physical inactivity. Currently, the research focus is to examine the mechanisms by which physical activity levels and/or exercise modulate risk and development of obesity, type 2 diabetes, and overall metabolic and cardiovascular diseases using both animal models and human subjects, and to be able to translate the findings into the clinical or applied setting. Graduate students will receive training in laboratory research, seminar preparation, scientific writing, problem solving and grant writing. Graduate studies at the University of Missouri offer the advantage of interdisciplinary exercise research that is facilitated by numerous collaborations at the many research centers at MU. In addition, the Exercise Physiology research program collaborates closely with other units on campus including the Department of Biomedical Sciences in the Vet School, and the Departments of Internal Medicine and Medical Pharmacology and Physiology in the School of Medicine among others.

Exercise physiology faculty seek to develop new knowledge in the area of exercise training, exercise metabolism, and obesity. The current focus of the program is physical inactivity, exercise and nutrition strategies for weight management and the prevention of lifestyle related diseases. The mission of the Exercise Physiology Graduate Program is to train graduate students who will provide professional leadership and research developments in areas of human health and sports conditioning.

The curriculum has a scientific basis with core courses in exercise physiology, nutrition, biochemistry, and physiology. Exercise physiology research emphasizes human studies, but other exercise models are available on campus, including the pig (Vet. Biomedical Sci.) and the rat (Medical School and VA).

### Degree Requirements

Students in Nutrition and Exercise Physiology emphasis will choose between two options for final completion: thesis or internship. Students should indicate their preference on their application to the program. The course curriculum will be the same for both options. Students will complete a minimum of 36 credits of graduate coursework beyond the bachelor's degree. For a full explanation of the thesis/non-thesis options, see section below on Thesis/Non-Thesis Requirements (p. 639) or view the information on the programs website: http://ns.missouri.edu/expzyma.html.

Prerequisites courses for the program are a B or better in General Chemistry, Physiology, Human Anatomy and Physiology of Exercise, Biochemistry, Organic Chemistry and Nutrition are recommended.

### Thesis/Non-Thesis Requirements

#### 1. Internship Option

This option is oriented toward improving a practitioner's professional proficiency in the applied aspects of exercise physiology. The program of study will include courses and learning experiences that will develop the student's knowledge in the theoretical aspects of exercise physiology. They will be required to complete an approved internship (300 hours minimum) which will provide them with experience in an applied or clinical setting. The student is responsible for identifying and securing the internship. Students selecting this option will graduate with the some
preparation for credentialing from organizations including the American College of Sports Medicine (ASCM) and the National Strength and Conditioning Association (NSCA). Completion of this degree as well as obtaining certification will prepare students for careers such as registered clinical exercise physiologists, strength and conditioning coaching, personal trainer or wellness coach, health/fitness instructor, as well as in other health professions. The program of study can be complimented with a certificate of public health: https://healthprofessions.missouri.edu/ mph/mph-degree/certificates/graduate-certificate-public-health/

2. Thesis Option

This option is research-oriented, focusing on designing and conducting research in exercise physiology. The program of study will include courses and learning experiences that will maximize a student’s progress in developing lab skills and critical thinking that will enable the student to continue his/her education in a research-oriented area. The thesis option requires a minimum of 36 hours of graduate credit. A written thesis, based upon original research, that is the student’s own work and that demonstrates a capacity for research and independent thought is required. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

Admissions

Exercise Physiology Program Applicants must have a 3.0 undergraduate GPA and competitive GRE scores to apply. GRE scores are required to be within the last 5 years. TOEFL scores are required from international applicants. Entering MS students are expected to have a B or better in undergraduate training in biology, chemistry, anatomy/physiology, and exercise physiology. It is also advantageous to have nutrition, biochemistry and organic chemistry, but not required. Courses should be taken at an accredited institution.

Applications to our graduate programs should be submitted by December 30th. While applications received after that date will still be considered, there is no guarantee that we will have space for additional students. Admission at the beginning of spring semester is possible, but limited.

MS in Nutrition and Exercise Physiology with Emphasis in Nutritional Sciences

About the Program

The Nutritional Sciences Graduate Program provides training in the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition: general research skills; structure and biochemical and metabolic functions of nutrients and other dietary constituents; food, diets, and supplements; nutritional status assessment; nutrition and disease; nutrition interventions and policies; and, analytical skills. Graduate students also receive training in laboratory research, seminar preparation and delivery, scientific writing, problem solving and research grant writing. Graduate study in Nutritional Sciences at the University of Missouri offers the advantage of interdisciplinary nutrition research that is facilitated via the many research centers at MU, including Food for the 21st Century (F21C), the Botanical Center, the Life Sciences Center and MU Nutritional Center for Health (MUNCH). The graduate program is administered by the Department of Nutrition and Exercise Physiology in association with the College of Human Environmental Sciences, the College of Agriculture, Food and Natural Resources, and the School of Medicine.

Degree Requirements

The program consists of a total of 30 hours of credit beyond the bachelor’s degree, of which 15 credits must be at the 8000 or 9000 level; no more than 40 percent of the 30-hour credit requirement can be satisfied by a combination of special investigations, Research, Readings and/or Problems courses. The master of science degree is awarded in part for the completion of a thesis. The thesis is based upon original research, that is student’s own work and that demonstrates a capacity for research and independent thought is required. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

The minimum department course requirements for the master of science degree are:

Thesis/Non-Thesis Requirements

The M.S. program in Nutritional Sciences only offers a thesis option. Students earning this degree must provide a written thesis, based upon original research, that is student’s own work and that demonstrates a capacity for research and independent thought. In addition, the graduate
student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

The Department of Personal Financial Planning is nationally and internationally recognized for its premier education and research programs. Not only does the department have one of only four PhD financial planning degrees in the U.S., it offers undergraduate, graduate, and certificate CFP Board-Registered Programs that prepare students to meet the education requirement to sit for the CFP® certification examination. The award-winning faculty provide an ideal environment for student success. Students have excellent opportunities to intern at leading financial planning firms, to participate in peer financial advising in our Office for Financial Success, and to conduct research with a purpose.

**Faculty**

Professor F. Lawrence**
Associate Professor D. L. Sharpe**, R. Yao**
Assistant Professor L. Fan*, A. Rabanni*
Teaching Assistant Professor S. Ivey
Extension Assistant Professor G. McCaulley, A. Zumwalt
Extension Professor C. Crawford

**Emeritus Professor** P. Lieurance, R. O. Weagley
- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

- BS in Personal Financial Planning (p. 642)
  - with emphasis in Financial Counseling (p. 643)
  - with emphasis in Personal Financial Management Services (p. 644)
  - with emphasis in Personal Financial Planning (p. 645)
- Certificate in Personal Financial Planning (p. 646)
- Minor in Personal Financial Management Services (p. 646)

The program leading to the BS in Personal Financial Planning offers designated emphasis areas in personal financial planning, personal financial management services, and financial counseling.

**PERSONAL FINANCIAL PLANNING**

PFP allows graduates to sit for the comprehensive CFP® examination to earn the right to use the CFP® designation. Coursework includes principles of personal financial planning, investments, insurance, taxation, retirement planning, and estate planning, complemented by courses that develop an understanding of the economic and social contexts within which clients make financial decisions. Graduates excel in providing client-centered financial management advice.

To be admitted to the Personal Financial Planning emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.5, based on at least 50 credits attempted. Students who wish to pursue a Personal Financial Planning emphasis must earn a grade of B- (2.7) or better, in FINPLN 2183 and a grade of C (2.0) or better in FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program (unless otherwise noted), regardless of emphasis area.

**PERSONAL FINANCIAL MANAGEMENT SERVICES**

PFMS is a degree option that prepares students to work with individuals and families in a wide range of financial service occupations, from insurance, investments, or banking to financial counseling, education, retirement planning, and estate planning, complemented by courses that develop an understanding of the economic and social contexts within which clients make financial decisions. Graduates excel in providing client-centered financial management advice.

To be admitted to the Personal Financial Management Services emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.0, based on at least 50 credits attempted. Students who wish to pursue a Personal Financial Management Services emphasis must earn at least a grade of C (2.0) or better in FINPLN 2183 and FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program (unless otherwise noted), regardless of emphasis area.

**FINANCIAL COUNSELING**

Financial Counseling brings together a sound knowledge of personal finance with a solid background in counseling, utilizing the expertise of our colleagues in the School of Social Work and the Department
of Human Development and Family Science. Besides preparing students to work with individuals and families in a wide range of financial service occupations, this emphasis area develops the tools a financial professional needs to help address the human issues often accompanying financial problems. In addition, graduates may take the exam that leads to earning the Accredited Financial Counselor (AFC) designation, which is offered through the Association for Financial Counseling and Planning Education (AFCEP) (http://www.afcep.org).

To be admitted to the Financial Counseling emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.25, based on at least 50 credits attempted. Students who wish to pursue a Financial Counseling emphasis must earn at least a grade of C (2.0) or better in FINPLN 2183 and FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program (unless otherwise noted), regardless of emphasis area.

MINOR
The Minor in Personal Financial Management Services is intended for students interested in course work focused on empowering them to make more informed decisions related to lifelong personal finance choices.

UNDERGRADUATE CERTIFICATE PROGRAM
An undergraduate certificate in Personal Financial Planning was approved by the Missouri Coordinating Board for Higher Education and the Certified Financial Planner Board of Standards, Inc. Those who complete the certificate are eligible to sit for the CERTIFIED FINANCIAL PLANNER™ certification exam, upon graduation with a bachelor’s degree. This program must have a University of Missouri cumulative GPA of at least a 2.5 upon application.

Students who want to explore the major can take FINPLN 2083 Financial Planning Careers and FINPLN 2183 Personal and Family Finance.

Graduate
• MS in Personal Financial Planning (p. 647)
  • with emphasis in Consumer and Family Economics (p. 647)
  • with emphasis in Personal Financial Planning (p. 648)
• Certificate in Personal Financial Planning (p. 648)

The College also offers a PhD in Human Environmental Sciences with an emphasis in Personal Financial Planning (p. 632).

Program Information
Individuals and families today bear an ever-growing responsibility for achieving and sustaining financial and economic success across their life span. Never has there been a greater need for well-trained professionals who can help individuals and families make informed and effective financial and economic decisions. In addition, research that helps to evaluate and recommend public policies that influence the economic opportunities and futures of individuals and families is in high demand.

Graduate course work in Personal Financial Planning at the University of Missouri analyzes household and consumer economic conditions and behavior, evaluating the interrelationships between households and markets with a focus on improving social policy. Students’ programs are designed to develop professional competencies and interests. A resident doctoral and two masters programs are available. Online graduate offerings may be viewed at http://pfp.missouri.edu/graduate_distance.html.

Certification Information
Degrees registered with the Certified Financial Planner Board of Standards Inc. include: a graduate Certificate in Personal Financial Planning and an Applied Master’s Degree.

Financial planning course work could also be completed as a doctoral program that is registered with the Certified Financial Planner Board of Standards Inc.

Financial Aid
If you wish to be considered for internal assistantships, fellowships or other funding packages, check the program website (http://pfp.missouri.edu) or contact the director of graduates studies, Rui Yao (http://pfp.missouri.edu/faculty_yao.html) for details.

Faculty Areas of Study
We conduct research pertaining to financial issues of individuals, families and households. Our research is highly applied and provides practical implications to researchers, financial planning professionals and policy makers on helping individuals, families and households make better financial decisions, improve their financial well-being, and reach their financial goals. Specifically, our research focuses on the following areas:

• Behavioral finance
• Risk management
• Investment
• Retirement and later-life financial issues
• Financial literacy and education

BS in Personal Financial Planning

Degree Program Description
The Department of Personal Financial Planning is nationally and internationally recognized for its premier education and research programs. Not only does the department have one of only four PhD financial planning degrees in the U.S., it offers undergraduate, graduate, and certificate CFP Board-Registered Programs that prepare students to meet the education requirement to sit for the CFP® certification examination. The award-winning faculty provide an ideal environment for student success. Students have excellent opportunities to intern at leading financial planning firms, to participate in peer financial advising in our Office for Financial Success, and to conduct research with a purpose.

Major Program Requirements
The BS in Personal Financial Planning offers three emphasis areas:
Personal Financial Planning, Financial Counseling, and Personal
Financial Management Services. Professional program requirements are listed at the emphasis level.

**Semester Plan**

The BS in Personal Financial Planning has emphasis areas in Financial Counseling (p. 643), Personal Financial Management Services (p. 644), and Personal Financial Planning (p. 645). Please see the individual emphasis area pages for degree requirements and admissions information.

**BS in Personal Financial Planning with Emphasis in Financial Counseling**

**Degree Program Description**

The Financial Counseling emphasis brings together a sound knowledge of personal finance with a solid background in counseling. Courses cover personal finance, social work, and human development and family science. In addition to preparing students to work with individuals and families in a wide range of financial service occupations, this emphasis area develops tools needed to help address the human issues often accompanying financial problems. Students may prepare for the Certified Retirement Counselor’s® (CRC®) or Certified Retirement Administrator’s® (CRA®) designation, or take the exam that leads to earning the Accredited Financial Counselor (http://afcpe.org)® (AFC®) designation.

**Major Program Requirements**

**Professional Program**

The Professional Program is comprised of three areas listed below: departmental core requirements, supporting coursework, and professional specialization courses. To be admitted to the Financial Counseling emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.25, based on at least 50 credits attempted. Students who wish to pursue a Financial Counseling emphasis area must earn at least a grade of C (2.0) or better in attempted. Students who wish to pursue a Financial Counseling emphasis area must earn at least a grade of C (2.0) or better in attempted. Students who wish to pursue a Financial Counseling emphasis area must earn at least a grade of C (2.0) or better in attempted. Students who wish to pursue a Financial Counseling emphasis area must earn at least a grade of C (2.0) or better in attempted. Students who wish to pursue a Financial Counseling emphasis area must earn at least a grade of C (2.0) or better in attempted. Students who wish to pursue a Financial Counseling emphasis area must earn at least a grade of C (2.0) or better in attempted. Students who wish to pursue a Financial Counseling emphasis area must earn at least a grade of C (2.0) or better in attempted.

BS in Personal Financial Planning with Emphasis in Personal Financial Management Services

Degree Program Description

Personal Financial Management Services prepares students to work with individuals and families in a wide range of financial service occupations from insurance, investments, or banking, to financial counseling, education, or a social change occupation. This program gives graduates a broad understanding of household financial management. Many students choose to complement this degree with a minor in business, economics, social work, or other related program. Students may prepare for the Certified Retirement Counselor® (CRC®) or Certified Retirement Administrator® (CRA®) designation, or take the exam that leads to earning the Accredited Financial Counselor (http://afcpe.org)® (AFC®) designation.

Major Program Requirements

Professional Program

The Professional Program is comprised of three areas listed below: departmental core requirements, supporting coursework, and professional specialization courses. To be admitted to the Personal Financial Management Services emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.0, based on at least 50 credits attempted. Students who wish to pursue a Personal Financial Management Services emphasis area must earn at least a 50 credits attempted. Students who wish to pursue a Professional Specialization in a specific area. (NOTE: Tracks will not appear on diploma or transcript.)

Professional Specialization Requirements

These courses are selected by students from a list of approved courses to complement their degree (courses can be found on our departmental website http://pfp.missouri.edu or your specific degree audit). Track suggestions are provided below based on student interests (but are not required). At least nine hours of the Professional Specialization Electives must be at the 3000 level or higher. Contact the Student Services Office of the College of Human Environmental Sciences or your departmental advisor to focus your additional credits in a specific area. (NOTE: Tracks will not appear on diploma or transcript.)

### Major and Career Exploration

The University of Missouri has many resources to assist you in exploring majors and career possibilities. For guidance, visit the Majors and Careers (https://career.missouri.edu/majors-careers) website or view specific resources below.

- If you are considering a change of major or are exploring multiple majors, schedule an appointment with an advisor in Academic Exploration and Advising Services (AEAS) (http://aeas.missouri.edu) by calling (573)884-9700.
- If you would like to learn more about your career interests, abilities, values and talents, visit the MU Career Center (http://career.missouri.edu) in the lower level of the Student Success Center. No appointment is necessary to explore career options with one of our staff members.
- If you would like information about MU majors and degree programs, visit:
  - the Degrees, Majors (Degree Programs), Emphasis Areas, Minors and Certificates (p. 18) page in the catalog,
  - the MU Majors (https://majors.missouri.edu) website.

For additional major and career exploration resources, visit Major & Career Exploration (p. 32) in the catalog.

### BS in Personal Financial Planning with Emphasis in Personal Financial Planning

#### Degree Program Description

The Personal Financial Planning degree program is registered with the Certified Financial Planner Board of Standards, Inc. (https://www.cfp.net) allowing graduates to sit for the comprehensive CFP® examination to earn the right to use the CFP® designation. Coursework includes principles of personal financial planning, investments, insurance, taxation, retirement planning, and estate planning, complemented by courses that develop an understanding of the economic and social contexts within which clients make financial decisions. Graduates excel in providing client-centered financial management advice. Students may prepare for the Certified Retirement Counselor® (CRC®) designation, or Certified Retirement Administrator (http://afcpe.org)® (CRA®) designation, or take the exam that leads to earning the Accredited Financial Counselor® (AFC®) designation. Graduates are employed as financial planners, private wealth manager, investment strategist, employee benefits advisor, retirement benefits administrator, insurance specialist, financial counselor, compliance officer, client service manager, trust & estate administrator, Extension agents, and consultants or counselors in financial, social, educational, legal, and government agencies.

Graduates must complete education requirements, pass a national professional exam, obtain professional experience, and agree to adhere to the professional code of ethics before being able to use the CFP® marks.

### Major Program Requirements

#### Professional Program

The Professional Program is comprised of three areas listed below: departmental core requirements, supporting coursework, and professional specialization courses. To be admitted to the Personal Financial Planning emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.5, based on at least 50 credits attempted. Students who wish to pursue a Personal Financial Planning emphasis must earn a grade of B- (2.7) or better, in FINPLN 2183 and a grade of C (2.0) or better in FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program (unless otherwise noted), regardless of emphasis area.

Certificate in Personal Financial Planning

- **FINPLN 2083** Financial Planning Careers  
  - Requires a grade of B- (2.7) or higher.
- **FINPLN 2183** Personal and Family Finance (Optional)  
  - Requires a grade of C (2.0) or higher.
- **FINPLN 4187** Tax Planning  
  - Requires a grade of C (2.0) or higher.
- **FINPLN 4382** Financial Planning: Risk Management  
  - Requires a grade of C (2.0) or higher.
- **FINPLN 4383** Financial Planning: Investment Management  
  - Requires a grade of C (2.0) or higher.
- **FINPLN 4386** Financial Planning: Employee Benefits and Retirement Planning  
  - Requires a grade of B- (2.7) or higher.
- **FINPLN 4389** Financial Planning: Estate and Gift Planning  
  - Requires a grade of C (2.0) or higher.
- **FINPLN 4393** Financial Planning: Capstone Planning  
  - Requires a grade of C (2.0) or higher.

**Total hours: 19-22**

The undergraduate certificate in Personal Financial Planning has been approved by both the Missouri Coordinating Board for Higher Education and the Certified Financial Planner Board of Standards, Inc. Those who complete the certificate are eligible to sit for the CERTIFIED FINANCIAL PLANNER™ certification examination upon graduation with a bachelor's degree. Students must have a University of Missouri cumulative GPA of at least a 2.5 upon application.

This certificate completes the education requirement to allow one to take the CFP® examination. For more information on the CFP® examination, please see [http://www.cfp.net/become-a-cfp-professional/cfp-certification-requirements/cfp-exam-requirement/about-cfp-exam](http://www.cfp.net/become-a-cfp-professional/cfp-certification-requirements/cfp-exam-requirement/about-cfp-exam).

Minor in Personal Financial Management Services

**Required Courses:**
- **FINPLN 2083** Financial Planning Careers  
  - Requires a grade of C (2.0) or higher.
- **FINPLN 2183** Personal and Family Finance  
  - Requires a grade of C (2.0) or higher.
- **FINPLN 3282** Financial Counseling  
  - Requires a grade of C (2.0) or higher.
- **FINPLN 3283** Financial Planning: Computer Applications  
  - Requires a grade of C (2.0) or higher.
- **FINPLN 4387** Consumer and Household Economics  
  - Requires a grade of C (2.0) or higher.
- **FINPLN 4187** Tax Planning  
  - Requires a grade of C (2.0) or higher.
- **FINPLN 4380** Assessing the American Dream  
  - Requires a grade of C (2.0) or higher.
- **FINPLN 4382** Financial Planning: Risk Management  
  - Requires a grade of C (2.0) or higher.
- **FINPLN 4383** Financial Planning: Investment Management  
  - Requires a grade of C (2.0) or higher.

**Total Required Credits: 16**

The Personal Financial Management Services minor is available to undergraduate students from any other college at Mizzou. Students earning a BS in any Personal Financial Planning emphasis areas are not eligible for the Personal Financial Management Services minor. At least 7 of the 16 hours must be taken from the MU Personal Financial Planning department. FINPLN 2183 must be taken for Math Reasoning Proficiency credit.
MS in Personal Financial Planning

Degree Information

Resident Master of Science (thesis option)

The thesis-based Master of Science program requires a minimum of 30 hours. Course work focuses on critical analysis of the interaction of the household sector with the markets for labor, consumer goods and financial products. Emphasis is placed on developing analytical skills. Course work culminates in a master’s thesis.

Five-Year Bachelor of Science/Master of Science Option

The curriculum of this 150-Hour Program provides students with a comprehensive background in financial planning procedures and practice, meeting the Certified Financial Planner Board of Standards’ education requirement, allowing a student to sit for the CERTIFIED FINANCIAL PLANNER™ exam. Coursework encompasses root disciplines of economics, mathematics, and statistics and focuses on the interaction between the household and the financial sector. Students will acquire a broad background in business related courses, as well as skills in communication, professional practice, and use of computer information systems.

Applied Master of Science (non-thesis option)

The Applied Master of Science is a 36-hour program. Course work is designed to complete the education required to sit for the national CERTIFIED FINANCIAL PLANNER™ exam and to broaden the practitioner’s understanding of the various factors that can affect and enhance a client’s financial security and economic well-being. Coursework culminates in a creative component, providing students an opportunity to integrate theory and practice in exploring or resolving issues related to personal financial planning.

• This degree is also available via distance education through the Great Plains IDEA group. Note, the Great Plains IDEA (https://www.gpidea.org) degree option also requires 36 hours to complete. Please see http://pfp.missouri.edu/graduate_distance.html for more information.

Application Deadlines

Fall deadline: February 1
Spring deadline: October 1
*Exceptions will be considered on a case by case basis

• Statement of Purpose
• Official transcripts
• Résumé

MS in Personal Financial Planning with Emphasis in Consumer and Family Economics

Degree Requirements

Please review the Resident Research and Policy Master’s Degree Program Handbook or the Resident Applied Master’s Degree Program Handbook. (http://pfp.missouri.edu/documents/graduate/Applied_MS_handbook.pdf)

Sample Plan of Study

Each student’s plan of study will vary to some degree, depending on the specific program and the student’s background, needs, and career plans. Please review the Resident Research and Policy Master’s Degree Program Handbook or the Resident Applied Master’s Degree Program Handbook.

Thesis/Non-Thesis Track

The resident Research and Policy Master of Science track prepares students for college teaching, consumer research positions, social service agencies, extension or other adult education programs, financial services institutions, consumer journalism and other positions in business, the public sector and not-for-profit institutions. Studies culminate in a research-based thesis that may either have a theoretical or applied focus. This masters degree also prepares students for subsequent work on a doctoral degree.

Acceptance to this program requires GRE or GMAT scores that meet department standards. This program requires a minimum of 30 hours to complete.

Download the Resident Research and Policy Master’s Degree Program Handbook.

The resident Applied Master of Science is for students who view the MS as their terminal degree and plan to work as a financial services professional following graduation. The Applied MS focuses on understanding issues and solving practical problems in the financial services industry. An industry-relevant capstone research project, rather than a thesis, is required for graduation.

Acceptance to this program requires GRE or GMAT scores that meet department standards. The Applied Master’s program is a non-thesis 36-hour program. This program is registered with the Certified Financial Planner Board of Standards, Inc. and is designed to prepare students to sit for the CFP® exam.

Download the Resident Applied Master’s Degree Program Handbook.
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Personal Financial Planning program (https://gradstudies.missouri.edu/degreecategory/personal-financial-planning) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

MS in Personal Financial Planning

With Emphasis in Personal Financial Planning

Degree Requirements

Sample Plan of Study

Each student’s plan of study will vary to some degree, depending on the specific program and the student’s background, needs, and career plans. Graduate Certificate in Personal Financial Planning

Director of Graduate Studies
Rui Yao (yaor@missouri.edu), PhD, CFP®
239 Stanley Hall
Columbia, MO 65211
573-882-9343
http://pfp.missouri.edu/

The Personal Financial Planning Certificate is an 18 hour non-degree, post-baccalaureate program designed to prepare students to sit for the national CERTIFIED FINANCIAL PLANNER™ exam.

Program applicants must have completed a bachelor’s degree. Completing the Personal Financial Planning Certificate satisfies the Certified Financial Planner Board of Standard’s education requirement, which is one of four requirements leading to approval to use the CFP® designation. The other three requirements are passing the national exam, meeting an experience requirement and agreeing to adhere to the CFP® code of ethics. The CERTIFIED FINANCIAL PLANNER™ designation is widely recognized as the premier professional designation in the personal financial management services industry. (This certificate is also available via distance education through the Great Plains IDEA group. Please see http://pfp.missouri.edu/graduate_distance.html for more information.)

Faculty

Associate Professor D. Fitch**, C. Peters**, A. Thompson**, D. Yoon**, M. Yu**
Graduation Requirements

A minimum of 120 credits with a GPA of 2.5 is required for graduation. The requirements include liberal arts foundation courses, professional BSW core courses and general electives. Students are allowed only two grades of a C+ in the professional program.

The professional BSW core consists of 46 credits. BSW core courses are offered only once each year in sequence and require three semesters to complete. In the third semester of the BSW core, each student will complete a practicum in a social service agency that includes 400 hours of supervised field instruction.

Admission to the School of Social Work

Students in good academic standing with fewer than 55 hours may declare a social work major. Students are required to complete a range of courses in liberal arts as foundation to the BSW professional program and as electives.

Admission to the BSW professional program is competitive. In the spring, students may apply for fall admission to the BSW professional program if they meet the following criteria:

1. Completion of at least 42 credits (second semester sophomore status) by the application deadline and
2. Completion of at least 55 credits completed before the beginning of the first semester (fall) of the BSW foundation curriculum
3. Minimum 2.5 cumulative GPA required
4. Completion of required liberal arts prerequisite courses with minimum grades in "C" range or higher.
   • Anthropology (ANTHRO 1300, ANTHRO 1350, ANTHRO 2030 recommended)
   • BIO_SC 1010
   • College Algebra
   • COMMUN 1200
   • Economics (macro or micro)
   • ENGLSH 1000
   • History (HIST 1100, HIST 1200, HIST 1400, HIST 2440, HIST 2210, HIST 4220, HIST 4230 HIST 4000) OR Political Science (POL_SC 1100, POL_SC 2100)
   • Philosophy (PHIL 1000, PHIL 1100, or PHIL 1200 recommended)
   • PSYCH 1000
   • SOCIOLOGY 1000 or RU_SOC 1000
5. Submission of BSW professional program application, including personal statement response to provided questions and 3 professional references (academic and work-related) is necessary for consideration by early deadline of February 15 or rolling admission deadline of May 15.

Students wanting to explore social work as a major may take the following exploratory courses:

About the School of Social Work

For over ninety years, social work education has been offered to students at Missouri's premier public institution. The school is proud of its grass roots history: an early pioneer of social work education in 1906, a founding member of the original accrediting body for social work education in 1919, an institution advancing research and scholarship throughout the 20th century, and finally, to its role as an innovator in doctoral education, with a nationally distinctive PhD program emphasizing state social policy.

The mission of the MU School of Social Work is to promote leadership for social and economic justice by preparing students for professional excellence and leadership in practice, research, and policy. Within the context of a land grant institution, the mission of the School of Social Work reflects the University of Missouri’s tightly interlocked missions of teaching, research, outreach, and economic development.

Careers

The nation faces a critical shortage of qualified personnel who possess the rigorous research skills needed to develop, plan, and evaluate social work interventions and the structure of social services. The Master of Social Work (MSW) Program prepares graduates for leadership in professional social work practice within the areas of Advanced Clinical Social Work Practice or Policy, Planning and Administration in Human Services. Doctoral programs in social work are the major resource for social work researchers and scholars. The rapid growth and development in new social work undergraduate and graduate programs throughout the country has also increased the demand for doctoral social work faculty. In recent years, there have been 400-500 doctoral faculty vacancies advertised annually in schools of social work, while the number of graduates has remained at 250-300 per year, with one hundred of those graduates seeking non-academic positions.

BSW in Social Work

Degree Program Description

The Bachelor of Social Work (BSW) Program is a professional program that prepares students for immediate entry into direct human service professional positions, graduate-level education, and life-long learning. BSW-level social workers assist individuals, families, small groups, organizations, and communities to effectively resolve problems, deal with their relationships, and function optimally within their environment. Graduates are employed in many different settings, including nursing homes, hospices, hospitals, home care agencies, family service agencies, children and youth services, aging services, residential...
treatment programs, domestic violence shelters, criminal justice agencies, schools, and legal services agencies.

**Major Program Requirements**

Required Entry-Level Courses: Specific liberal arts requirements for graduation are listed below (* denotes a prerequisite course to the BSW professional program that must be completed before beginning social work core courses).

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

<th>Credits</th>
</tr>
</thead>
</table>

**Total Credits**

120

1. SOC_WK 2220W, SOC_WK 2000W, SOC_WK 4951W, SOC_WK 4952W, SOC_WK 4770W are all required courses.
   No additional courses are required for the Writing Intensive (WI) requirement toward graduation.

2. Humanities include art and music history and appreciation classes, classical studies courses, foreign civilization courses, literature courses in English or other languages and religious studies courses. Applied art and music performance courses do not count toward the humanities requirement. Students are urged to check with their advisor before selecting courses.

3. One course in humanities or biological, physical or mathematical sciences must be at the 2000 level or higher.
Exploration of Power, Privilege & Oppression: Social Work BSW majors are required to take SOC_WK 2000W to count for three (3) credit hours of the six (6) credit hours requirement. Students should select one additional course that reflect the cultural diversity of our society; often selected from social work, sociology, anthropology, peace studies, English, religious studies, human development and family science, black studies, and women and gender studies. Students are urged to check with their advisor before selecting courses.

In addition to the above liberal arts requirements and the 50-credit Professional BSW Core (inclusive of SOC_WK 2220W), students select electives to reach the total credit requirement. SOC_WK 1115 Social Welfare and Social Work is strongly recommended.

Capstone Requirements

All students accepted into the professional BSW program must take SOC_WK 4971 Undergraduate Field Practicum and SOC_WK 4970 Senior Professional Seminar to complete their capstone requirement. Please note: As a student, if you have acquired any criminal background history which includes misdemeanors or felony charges your choices of placements may be affected. In an effort to assist you we strongly encourage you to make an appointment with the Director of the Undergraduate Program to assist in facilitating options for your completion of educational requirements.

Basic Skills Credit Limitations

No more than 4 credits may be taken from “skills” courses to count toward the required 120 credits. More skill classes may be taken, but will be in excess of the 120 credits. Examples of skills courses are applied art and music performance classes, computer skills, self-defense and first aid.

Minor in Social Work-Gerontology

The Undergraduate Gerontology Minor is designed to provide students with entry level knowledge about older adults, the aging process, and applied skills for aging-related practice. The minor will give participants expanded knowledge in providing services to older adults and their families. Students who complete the Gerontology Minor will come from a variety of undergraduate programs, in order to augment their studies and fields of study. The Gerontology Minor complements diversity by offering coursework from several academic units on campus.

Students who apply and complete the Gerontology Minor will

- Build a firm understanding of the aging process, including biological, cognitive, psychological, and social processes that occur across the human life span.
- Become critically able to analyze social problems that exist, which affect older adults in today’s society.
- Gain knowledge of the U.S. health care system, with emphasis on issues affecting older adults.
- Develop assessment and intervention skills to work with older adults and their families in the interdisciplinary settings.

Students who complete the Gerontology Minor are uniquely positioned for employment opportunities in the aging field after graduation.

University of Missouri
Admission Requirements:
A student must be admitted to the University of Missouri with a declared academic major. To obtain the Gerontology Minor he/she must complete the minimum 15 credit hours as outlined above from the two designated areas.

Students must have a 2.5 minimum GPA to apply for and earn the minor. A minimum grade of “C-” in “required” or “optional” coursework is needed to qualify for the minor.

MSW in Social Work

Admission Contact Information
Crystal Null (nullc@missouri.edu)
725 Clark Hall; Columbia, MO 65211
573-884-9385
http://ssw.missouri.edu/msw.html

The University of Missouri’s Master of Social Work (MSW) Program prepares competent, effective and ethical social work professional leaders for social change. The MSW Program emphasizes a commitment to enhancing human well-being by alleviating social problems, embracing diversity and promoting social and economic justice with systems of all sizes through advanced clinical social work practice and policy planning and administration in human services. The MSW program prepares students to promote social and economic justice that responds to the broad economic, social, and cultural needs of the public and private. The MSW Program is fully accredited by the Council on Social Work Education, of which the School of Social Work is a charter member.

Financial Aid from the Program

Scholarship opportunities are available for full-time and part-time program applicants who meet the early application deadline. A separate Scholarship Application is available on the department website. Submission of the Scholarship Application is due by early application deadline.

Application Deadlines

Fall deadline: January 15
Spring deadline: September 15

Admission Criteria

- Minimum GPA: 3.0.
- Bachelor’s degree from an accredited college or university with the applicant’s undergraduate transcript reflecting a sound liberal arts foundation, including courses in the humanities, as well as in the social and behavioral sciences.
- All International students must submit Internet-based (IBT) TOEFL scores or IELTS scores. No waivers will be given.

Minimum iBT TOEFL scores:

Prerequisites

All MSW applicants must complete an approved college level statistics course with a grade of C- or higher before they will be accepted to enroll in the MSW program. SOC_WK 4310 is the recommended course for University of Missouri students. The following University of Missouri courses are also approved and may be taken in lieu of SOC_WK 4310: STAT 1200, STAT 1400, STAT 2500, and ESC_PS 4170. Statistics courses completed at other academic institutions may substitute for University of Missouri statistic courses, pending submission of official transcript and approval by the MSW Program Director. Completion of the statistics course prior to application submission is preferred and strongly recommended. If an applicant is enrolled in a statistics course at the time of application and accepted into the MSW Program, the acceptance will be “pending successful completion of the approved statistics class”.

Note: Priority admission deadline for On-campus and Online, Regular Standing Applicants and Online, Advanced Standing Applicants: January 15. A student qualifies for Regular Standing Admission if s/he has an undergraduate degree in any field other than Social Work. An applicant qualifies for Advanced Standing admission if they have a bachelor’s degree in Social Work earned within the last seven (7) years. Any applicant who applies after the priority deadline will be considered on the rolling admission cycle until April 15.

Note: Priority admission deadline for On-campus, Advanced Standing applicants: September 15. An applicant qualifies for Advanced Standing admission if they have a bachelor’s degree in Social Work earned within the last seven (7) years. Any Advanced Standing applicant that applies after the priority deadline of September 15 for spring admission will be considered on a rolling admission cycle until November 15.

Read more about Regular vs. Advanced Standing below.

Required Application Materials

To the Office of Graduate Studies:

- All required Graduate Studies documents

To the MSW Program:

- Personal statement (see department instruction)
- Résumé/CV
- Three letters of reference from persons who can address the applicant’s intellectual ability and interpersonal skills, potential for graduate education, and potential for professional social work practice through observation in an educational or work (paid or volunteer) setting. Letters of reference should not be submitted from friends or family
- Unofficial transcripts
- Advanced standing students only: the most recent copy of your field evaluation (see department instruction)
Plans of Study
Preparation for professional leadership encompasses two major components:

Foundation
Develops knowledge and skills related to social interaction, human development, community dynamics, social policy and societal values applicable to generalist social work practice.

Concentrations
The MSW program offers two concentrations: Advanced Clinical Practice and Policy, Planning and Administration (PP&A). Within these concentrations, students have the opportunity to create a plan of study based on their individual interests and professional goals. Decisions regarding their chosen concentration are made by students in consultation with faculty advisors. A brief description of the two concentrations is as follows:

Advanced Clinical Social Work Practice: includes strategies of clinical intervention with socially and economically disadvantaged individuals, families, and small groups in a variety of health, mental health, family and children services, and senior citizen agencies.

Concentration Courses: Clinical

Course Format

On Campus MSW Program courses are primarily offered in-person. A few foundation, concentration and elective courses are offered online through Canvas, a learning management system licensed to the University of Missouri for online courses.

The Online MSW program is designed for part-time study with two courses, typically 6 credit hours of course work, per semester. All courses are offered online through Canvas with the exception of the practicum, which requires 880 hours of supervised work at an approved agency.

Regular Standing: Non-Social-Work Bachelor’s

The regular 60-credit hour degree is appropriate for students who have undergraduate degrees other than accredited social work degrees. The school admits full-time and part-time students to the regular 60-credit hour program at the beginning of the fall semester only.

Advanced Standing: Bachelor’s in Social Work (BSW)

Students who have graduated within the past seven years from a baccalaureate social work program accredited by the Council on Social Work Education may be eligible for the Advanced Standing Program, which is an accelerated 39-credit hour degree.

Starting Dates

On-campus students admitted to the Regular Standing Program are admitted in fall semester (full-time or part-time study). On-campus students admitted to the Advanced Standing Program are admitted in the spring session. Online students admitted to the Regular and Advanced Standing Programs are admitted for fall semester (part-time).

Length of Study & Satisfactory Progress

Full-time Regular Standing students take 15 credits each semester and graduate in two years (4 semesters of study). Full-time Advanced Standing students take 3-5 classes each semester (9-15 credits) and graduate in 12-17 months (3 semesters of study). Part-time Regular
Standing students take 2-3 classes (6-9 credits) every semester, including summer, and graduate in three years (9 semesters of study). Part-time Advanced Standing students take 2-3 classes (6-9 credits) every semester, including summer, and graduate in two years (6 semesters of study). All students are full-time during their last semester while completing block placement. All students must complete at least eight hours per academic year to maintain a satisfactory rate of progress.

PhD in Social Work

Admission Contact Information
Program Contact: Shannon Mezzanotte (mezzanottes@missouri.edu)
724 Clark Hall; Columbia, MO 65211
573-884-1438
PhD Program Director: Dr. Mansoo Yu (yuma@missouri.edu)
720 Clark Hall; Columbia, MO 65211
573-882-4363
PhD Program Website: http://ssw.missouri.edu/phd.html

About the Program
The Doctor of Philosophy (PhD) program in social work focuses on research that informs social welfare policy and practice. It is designed to prepare scholars for research, teaching and program development positions in academic and professional social work practice and policy settings.

Financial Aid from the Program
Scholarship opportunities are available for full-time program applicants who meet the application deadline. Graduate teaching and research assistantships are also often available. Some forms of support require additional forms from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Admission Criteria
Admission deadline: Midnight January 15
- Minimum GPA: 3.0; 3.5 in graduate study
- Minimum TOEFL scores:
<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

- An MSW or related master’s is required. Applicants without the MSW must take a minimum of 12 credit hours of MSW course work. This requirement may be waived for applicants with additional graduate work.
- Minimum of two years post-master’s practice experience encouraged.

Note: These criteria are used flexibly to assess the applicant’s potential for study and research in this program.

Required Application Materials
To the Office of Graduate Studies:
- All required Office of Graduate Studies documents

To the Director of the Doctoral Program in Social Work (via the office of graduate studies online application system):
- Cover letter
- Three letters of recommendation
- CV
- Writing proficiency sample
- Personal statement
- A personal interview is required, and if possible, will be arranged at MU. A Skype interview may be utilized in some cases.

Plan of Study
The PhD program is available to both persons with a Masters of Social Work (MSW) degree and those with other master’s degrees. The curriculum consists of a minimum of 55 post-MSW semester credit hours, or, for applicants without an MSW, 67 hours. The curriculum is divided among three distinct but highly interrelated elements designed to complement one another in assisting students to achieve the competencies expected of a graduate of this program. A core of social work courses provides the foundation in the traditions and knowledge in the profession and exposure to state-of-the-art research and techniques for the 21st century. Electives from the broad spectrum of social and behavioral sciences offering available through MU departments provide students with the opportunity to design an individualized plan of study that capitalizes on their unique interests and talents. A strong regimen of research methodology, theory, and policy analysis are designed to prepare students for use of both current and emerging methods of scientific inquiry.

Graduate Certificate in Gerontological Social Work

The Graduate Certificate in Gerontological Social Work at the University of Missouri is designed to expand the pool of professionals who are qualified to work in settings with older adults and their families. The certificate focuses on practice strategies of social work intervention from micro, mezzo, and macro perspectives.

This certificate will be available to students enrolled in the MU School of Social Work master’s program as part of their graduate training as well as a stand-alone certificate to graduate level clinical MSW practitioners and graduate level policy and administration MSW practitioners who wish to augment their knowledge and skills in this area. Approval of the MSW Program Director and Committee, and Director of the Graduate certificate in Gerontological Social Work is required for admission to the certificate program.

Participants in the Gerontological Social Work Certificate program build awareness and expertise for work in settings that serve older adults and their families. Participants are trained in micro, mezzo, macro and clinical strategies known to be effective in work with older adults and their families. An interdisciplinary, multi-level emphasis will be provided in the program since a large component of elder care is the coordination and management of services provided by various disciplines. Course work will utilize a bio-psycho-social-cultural perspective emphasizing the ecological perspective, Lawton’s theory of environmental press, resiliency, and the functional age model of family work. In addition, students will build awareness of aging policies and services, and policies that impact persons with disabilities and women.

As a result of earning the Gerontological Social Work Graduate Certificate, practicing MSW’s or Post-MSW degree practitioners can expect enhanced employability due to the development of new skills that
respond to growing societal need. Current MSW students benefit from the graduate certificate by completing a concentrated course of study on a population group and obtaining specialty training with population/services needing graduate level social workers.

A current MSW student can conveniently earn the Gerontological Social Work Graduate Certificate while completing their MSW. Because all of the Gerontological Social Work Graduate Certificate courses fulfill other requirements for regular standing students in the clinical track, no additional coursework is required for these students. Regular standing students in the PP&A track and advanced standing students in the clinical track will be taking one additional course which will increase their credit hour requirement by 3 hours and advanced standing students in the PP&A track will be taking two additional courses which will increase their credit hour requirement by 6 hours.

The Gerontological SW Grad Certificate consists of 12 credit hours.

Students will choose from a variety of acceptable interdisciplinary courses for fourth class 3

During the final semester of the MSW Program, the full-time block practicum experience 40 hours/week (680 total hours) is arranged at a setting where students will gain skills practicing with older adults. The Director of Field in conjunction with the Director of the Graduate Certificate in Gerontological Social Work works with students to choose a practicum setting that fits SSW requirements and student interests. Practicing MSWs only complete 12 hours of coursework and are not required to complete an additional practicum experience.

For additional information about the Graduate Certificate in Gerontological Social Work, please contact Dr. Erin Robinson at robinsonel@missouri.edu (galambosc@missouri.edu).

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/44.0701-Gedt-Gerontological_SW.html.

Graduate Certificate in Military Social Work

"The Military Social Work Graduate certificate is not accepting applications at this time"

The School of Social Work offers graduate certificates in Military Social Work and in Gerontological Social Work.

The Graduate Certificate in Military Social Work is designed to expand the pool of professionals who are qualified to work in settings with military personnel, veterans, and their families. The Certificate focuses on clinical practice strategies of social work intervention with military personnel and their families to improve the mental health and health of this population.

This certificate is available both to students enrolled in the MU School of Social Work Masters of Social Work (MSW) Program as part of their graduate training as well as a stand-alone entity to civilian graduate level clinical social work practitioners who wish to augment their knowledge and skills in this area. Only Clinical MSWs and MSW Clinical students will be accepted to the Military SW Graduate Certificate Program. Approval of the MSW Program Director is required for admission into the graduate certificate program.

Because all of the Military Social Work Graduate Certificate courses fulfill other requirements of our MSW program, a student can conveniently earn the Military SW Graduate Certificate while completing their MSW. No additional coursework is required.

The Military SW Grad Certificate consists of 12 credit hours.

Required courses

</tbody>
</table>

During the final semester of the MSW Program, the full-time block practicum experience 40 hours/week (680 total hours) is arranged at a setting where students will gain skills practicing with military personnel, veterans or their families. The Director of Field in conjunction with the Director of the Graduate Certificate in Military Social Work works with students to choose a practicum setting that fits SSW requirements and student interests. Practicing MSWs only complete 12 hours of coursework and are not required to complete an additional practicum experience. For additional information about the Graduate Certificate in Military Social Work, please contact Dr. Carol Snively at snivelyc@missouri.edu.

The College also offers a PhD in Human Environmental Sciences with an emphasis Textile and Apparel Management. The Department of Textile and Apparel Management is a global leader focusing on the apparel and textile supply chain. TAM’s award-winning faculty is internationally recognized. TAM prepares students for a wide variety of career options such as merchandising, buying, sourcing, product development, technical design, e-retailing or retail operations. The curriculum focuses on leadership, the global supply chain, sustainability, creativity/innovation and technology. Through coursework, field study experiences, internships, leadership conferences and student organizations, TAM students develop the marketing and management skills they need to excel in the global textile and apparel industry. Students majoring in TAM may not take departmental courses using the Pass/Fail grading option. In addition to college and department requirements, students must meet all University graduation requirements.

Undergraduate

- **BS in Textile and Apparel Management** (p. 657)
- **Minor in Textile and Apparel Management** (p. 659)

The Department of Textile and Apparel Management is a global leader focusing on the apparel and textile supply chain. TAM’s award-winning faculty is internationally recognized. TAM prepares students for a wide variety of career options such as merchandising, buying, sourcing, product development, technical design, e-retailing or retail operations. The curriculum focuses on leadership, the global supply chain, sustainability, creativity/innovation and technology. Through coursework, field study experiences, internships, leadership conferences and student organizations, TAM students develop the marketing and management skills they need to excel in the global textile and apparel industry. Students majoring in TAM may not take departmental courses using the Pass/Fail grading option. In addition to college and department requirements, students must meet all University graduation requirements (p. 33) including University general education (p. 34).

Students who major in Textile and Apparel Management may choose from the following tracks:

- Apparel Marketing and Merchandising
- Apparel Product Development

These tracks are designed to provide students with knowledge and skills necessary to function in the global textile and apparel industry. (Note: Tracks do not appear on transcripts or diplomas). Students majoring in Textile and Apparel Management are required to take a set of core courses. Students may not take departmental courses using the Pass/Fail grading option. In addition to college and department requirements, students must meet all University graduation requirements (p. 33) including University general education (p. 34).

Students who want to explore Textile and Apparel Management may take the following classes:

**Professor Emeritus L. E. Wilson**
**Associate Professor Emeritus B. Dillard**, **J. H. Pry**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Financial Aid from the Program**

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

**BS in Textile and Apparel Management**

**Degree Program Description**

Textile & Apparel Management (TAM) is a program which focuses on the apparel and textile supply chain. The curriculum emphasizes leadership, the global supply chain, sustainability, creativity/innovation and technology. Students have access to state-of-the-art design and apparel technology labs. The Apparel Marketing and Merchandising track prepares students for careers in marketing, buying, e-retailing, and retail management. The Apparel Product Development track prepares students for careers in technical and creative design, sourcing, and product development. Through coursework, field study experiences, internships, leadership conferences and student organizations, TAM students develop the skills they need for top industry positions.

**Major Program Requirements**

There are two tracks available in Textile and Apparel Management: Apparel Marketing and Merchandising, and Apparel Product Development. These tracks are designed to provide students with knowledge and skills necessary to excel in the global textile and apparel industry. Students majoring in TAM may not take departmental courses using the Pass/Fail grading option. In addition to college requirements, students must meet all University graduation requirements (p. 33) including University general education. Some courses in the Professional Program are allowed to double count for General Education requirements (p. 34). This program can be completed in 120 hours. The following courses are required of all students majoring in Textile and Apparel Management (TAM). (NOTE: Tracks do not appear on transcripts or diplomas.)

Minor in Textile and Apparel Management

An undergraduate minor in Textile and Apparel Management is available for students pursuing a major in another department. Students who wish to complete a minor should declare the minor by completing the form at http://hes.missouri.edu/students_minorapp.html. A minimum of 18 credit hours is required with at least six hours at the 2000 level or above. At least 15 of the 18 total hours must be taken in residence at the University of Missouri. Prerequisites for all courses must be met, or the student must have the permission of the instructor.

Required Courses:

- T_A_M 1200 Basic Concepts of Apparel Design and Production
- or T_A_M 1300 Softgoods Retailing
- T_A_M 2200 Science of Textiles

Select 12 hours from list below in consultation with a TAM Advisor:

- Apparel Industry Studies:
  - T_A_M 2400 Global Consumers
  - T_A_M 3200 Softgoods Quality Evaluation
  - T_A_M 4110 Global Sourcing

**Additional Minors and Certificates - HES**

**Undergraduate Minors**
• Minor in Criminology/Criminal and Juvenile Justice (p. 660)
• Minor in Financial Literacy for Helping Professionals (p. 661)
• Minor in Nutritional Sciences (p. 661)
• Minor in Social Justice (p. 662)
• Minor in Wellness (p. 662)

**Graduate Certificates**
• Certificate in Financial and Housing Counseling (p. 662)
• Certificate in Geriatric Care Management (p. 662)
• Certificate in Gerontology (p. 663)
• Certificate in Youth Development Program Management and Evaluation (p. 663)
• Certificate in Youth Development Specialist (p. 663)

**Minor in Criminology/Criminal and Juvenile Justice**

Minor Available To Obtain Beginning Fall 2018:

The Criminology/Criminal and Juvenile Justice minor is available for ALL students, regardless of major. The courses aim to have students develop an understanding of the criminal and juvenile justice system and criminal behaviors through a social justice lens. This lens allows students to recognize the impact of the justice system on vulnerable and marginalized populations and offers a critical reflection of the ways in which evidence-based intervention and sensible social policy can reduce criminal justice involvement. The School of Social Work and Arts and Science will offer experiential learning opportunities to apply skills within criminal and juvenile justice settings, with adviser approval, which will count towards the minor requirements.

A minimum of 18 hours, comprised of the courses below, is required to complete the minor. Students must have a 2.5 minimum GPA to apply for and earn the minor. Note that students must earn a grade of C- or higher in all courses and a maximum of 6 credit hours from transfer institutions may be applied toward the minor.

**Required Courses**
Minor Requirements

FINPLN 2183  Personal and Family Finance  3
FINPLN 3282  Financial Counseling  3
FINPLN 4188  Community Agencies and Volunteering  3
                   (taught in spring semester only; students will need to attend a workshop in order to certify for IRS compliance)
SOC_WK 4750  Interaction Skills Workshop  3

Select one of the following:

SOC_WK 2000  Exploration in Social and Economic Justice  3
or SOC_WK 2000W  Exploration in Social and Economic Justice - Writing Intensive  3

FINPLN 4370  Delinquency, Corrections and Social Treatment  3
SOC_WK 4400  Domestic Violence  3
SOC_WK 4410  Law and Social Work Practice  3
SOCIO 1650  Social Deviance  3
POL 2100  State Government  3
POL 2200  The Judicial Process  3
SOC_WK 1200  Criminal Justice  3
BL_STU 4303  Race, Class, Gender and U.S. Social Policy  3
SOCIO 2200  Social Inequalities  3
HIST 4415  African Americans and American Justice  3
PSYCH 3860  Law and Psychological Science  3
WGST 3260  Themes in Gender, Law and Justice  3
PTH_AS 4220  Forensic Pathology and Death Investigation  2

Total Credits 15

or SOC_WK 4710  Social Justice and Social Policy

* Completion of these two courses, as well as the proposed curriculum for the minor, will allow the student to sit for the Accredited Financial Counselor Exam.

Note: Satisfactory completion (as defined by C range grade or above) of Microeconomics and College Algebra is required. Satisfactory completion (as defined by C range grade or above) of each required course is necessary in order to attain this minor. This minor is available to students regardless of major.

The student must have an overall GPA requirement of 2.5 to apply for the minor.

This minor is available to students regardless of academic major. A student must complete the application minor information and submit to Student Service Coordinator (http://ssw.missouri.edu/faculty_freelin.html) in Clark Hall for approval. The student must be graduating from a distinct discipline to be eligible for the minor. The minor will be added to the student's myZou record upon completion to be given simultaneously with the degree.

Support Process: The student may meet with the Director of Undergraduate Studies and the Student Service Coordinator (http://ssw.missouri.edu/faculty_freelin.html) for advising regarding the Financial Literacy for Helping Professionals minor.

Application for the Financial Literacy for Helping Professionals Minor

Minor in Nutritional Sciences

The minor in nutritional sciences is intended for students majoring in food science, biological sciences, biochemistry, health and exercise sciences or related fields. This minor would be a good choice for students looking at pre-med, pre-dental or Physician's Assistant programs.

Minor core requirements consist of a minimum of 15 hours of nutrition (not exercise/fitness) courses, including NEP 2340: Human Nutrition I, plus 12 hours from the list of approved nutrition courses. Prerequisites apply to some classes and will be enforced.

To apply for the nutrition minor, use the online application form (http://hes.missouri.edu/students_minorapp.php) available on the Human Environmental Sciences Student Services website: http://hes.missouri.edu/students_minorapp.php

Minor core requirements

NEP 2340  Human Nutrition I (spring only)  3
Plus 1 course from the following list of approved nutrition courses:  3
NEP 1310  Food and Cultures of the World
NEP 2222  Landscape of Obesity (spring only)
NEP 4360  Nutritional Assessment (fall only)
Plus 2 courses selected from the following list of approved nutrition courses:  6
NEP 2380  Diet Therapy for Health Professionals
NEP 4340  Human Nutrition II Lecture (fall only)
NEP 4370  Nutrition Therapy I (spring only)
Plus 1 course selected from the following list of approved nutrition courses:  3
NEP 2450  Nutrition Throughout the Life Span (spring, summer)
Minor in Social Justice

The social justice minor is designed to give non-social work majors the opportunity to develop knowledge and understanding about social justice in the person-environment context. Social justice involves the idea that in a perfect world all citizens would have identical social benefits, protections and opportunities regardless of their backgrounds and membership in diverse groups. Recognizing that the world is not perfect, the primary goals for the minor in social justice are to enhance sensitivity to vulnerable and at-risk populations, to provide opportunity for critical review of social policies and the allocation of societal resources and to stimulate interest in advocacy and the planned change process.

Students who complete the social justice minor may not refer to themselves as BSW-level social workers upon graduation.

A minimum of 15 hours, comprised of the courses below, is required to complete the Social Justice minor. Students must have a 2.5 minimum GPA to apply for and earn the minor. Note that students must earn a grade of C- or higher in all courses and a maximum of 6 credit hours from transfer institutions may be applied toward the Social Justice minor.

Graduate Certificate in Financial and Housing Counseling

The purpose of the Financial and Housing Counseling Certificate is to develop a student’s financial and housing counseling skills and to prepare a student to sit for the Accredited Financial Counselor and Certified Housing Counselor exam offered through the National Association for Financial Planning and Counseling Education. Students with this background would be equipped to provide professional assistance in debt counseling, financial management, and housing finance to those in need. Typical clients would include those with low levels of income and resources, disaster recovery, and military personnel dealing with financial and housing issues related to deployment, relocation.

This certificate is offered as part of the Family Financial Planning programs in the Great Plains Interactive Distance Education Alliance. More information is available at http://www.gpidea.org/index.html?page=majorsDegreesCourses.html&anchor=programAnchor1.

Graduate Certificate in Geriatric Care Management

The Geriatric Care Management certificate is a web-based, four course certificate designed for those who provide independent case management services to elder Americans or who wish to do so in the future. The certificate provides an educational credential in addition to preparing students to sit for certification examinations given by national credentialing organizations.

For more information about certificate, contact:
Dr. Cynthia S. Reeser
Department of Human Development and Family Studies
College of Human Environmental Sciences
Graduate Certificate in Youth Development Specialist

A certificate in youth development is ideal for professionals in a variety of youth-related fields. Areas include youth-serving organizations like 4-H; Boys and Girls Club; non-profit organizations; faith-based groups; community recreation facilities; correctional professions; elementary, middle and high school educators; and extension educators.

About the School
The world’s first School of Journalism was established in 1908 at the University of Missouri to strengthen the effectiveness of public communication in a democratic society. The school’s first dean, Walter Williams (who went on to become president of the University in 1930) wrote the Journalist’s Creed, which stresses the profession’s rights and responsibilities as a public trust.

The faculty is committed to educating students in the responsibilities and skills of the professional journalist. It also has a broader commitment to advance the profession of journalism through scholarly research, analysis and criticism and through special programs to serve practitioners. The school also prepares students for careers in corporate communication through its strategic communication emphasis area. Students in that area typically pursue careers in advertising or public relations or in strategic communication, a combination of those fields.

The Missouri Method assures a journalism student will graduate with a broad, liberal education essential for a journalist whose work may span many segments of today’s complex society. In addition to a liberal arts education, students complete practical laboratory work in a variety of settings, including a public radio station, a commercial daily newspaper and a network-affiliated television station. The school offers the Bachelor of Journalism, Master of Arts and Doctor of Philosophy degrees, along with cooperative programs with other divisions in the University. It was the first school in the world to offer all three of those degrees.

The Accrediting Council on Education in Journalism and Mass Communication has accredited the undergraduate program and a professional master’s degree.

Undergraduate
- Admissions (p. 664)
- Special Programs (p. 664)
- Academic Regulations (p. 665)
- Advising (p. 666)

Admissions
Students admitted to the University of Missouri are eligible to pursue the Bachelor of Journalism degree. As students are nearing completion of pre-interest area requirements they will apply for admission to a Journalism interest area. This typically occurs during the third semester to begin the interest area in the fifth semester.

Admission to Upper-Division Interest Area
Students who complete 60 credits, maintain a minimum UM GPA of 3.0 and complete the necessary coursework are admitted to an interest area. Students who meet the course requirements, but do not meet the minimum cumulative UM GPA of record of 3.0 must appeal for admission to an interest area. A Faculty Appeal Committee in each emphasis area will review applications for admission based on several criteria. Students in this situation will receive detailed instructions for submitting an appeal.

Transfer Credit
The Office of Undergraduate Admissions, 230 Jesse Hall, determines transfer equivalencies for the University, including the School of Journalism. Transfer students from other accredited schools and colleges in Missouri should check the MU website to see how coursework will transfer to MU or contact the Office of Admissions. Students should also contact an advisor to see how these courses would apply toward a degree at MU. The School of Journalism can accept up to six journalism credit hours from other accredited journalism programs or from Missouri colleges with which the School of Journalism has working agreements.

Current Missouri journalism students may not transfer journalism courses from other institutions. Many communications courses are also prohibited.

International Students
In addition to meeting the standards for admission to the university, students must meet the following English-language proficiency standards: Minimum Test of English as a Foreign Language (TOEFL) paper-based score of 550 or minimum TOEFL electronic score of 80 or International English Language Testing System (IELTS) band score of 6.5 with minimum section scores of 6.

Special Programs
The School of Journalism attracts some of the best students at MU. The School encourages high-ability students to enroll in the MU Honors College (http://honors.missouri.edu) and take honors courses whenever possible. Such courses are taught by some of MU’s best professors. The School recognizes incoming high-ability students with two special designations and the following benefits:

The Walter Williams Scholars Program
The highest-achieving applicants to the Missouri School of Journalism are designated Walter Williams Scholars. The Walter Williams Scholars program is named in honor of the school’s founding dean, a Missouri newspaper publisher who went on to become president of the University of Missouri.
Qualifications: Incoming freshmen must earn an ACT composite score of 33 or higher (1440 or higher on the SAT). They also must rank in the top 20 percent of their high school class (if the school ranks) or must have maintained a high school GPA of at least 3.25 on a 4.0 scale. Admission is by invitation only.

Benefits:
- Direct admission to the Missouri School of Journalism
- Placement in a special Freshman Interest Group, space permitting
- Assigned individual faculty mentor
- A $1,000 scholarship for Missouri School of Journalism global programs (includes New York or Washington, D.C.) The scholarship can be used at any time before graduation
- Recognition at graduation
- Automatic admission to the accelerated BJ/MA program at the School of Journalism, which allows students to complete their graduate degree in one year rather than two. Admitted students can earn up to X credits that count toward both the BJ and MA programs. Admission is contingent upon the following criteria:
  - Maintenance of a 3.50 GPA in your journalism coursework and for your cumulative average, throughout you undergraduate career
  - Submission of a complete MA application at the completion of 75 credits, including payment of the application fee, and two (out of three) letters of recommendation from journalism faculty. You do not need to take the GRE. Details can be found on the Master's Application Checklist: http://journalism.missouri.edu/programs/masters/admissions/

To make the most of the program, the School encourages high-ability students to apply to the MU Honors College (http://honors.missouri.edu) and take honors courses whenever possible.

Academic Regulations

Dual-Degrees
To receive two bachelor's degrees, a student must complete a minimum of 132 credits and complete all of the specific requirements for both degrees. Normally, a minimum of one additional semester is required for both degrees. Each candidate for a dual degree is assigned an advisor in the School of Journalism and in the additional academic unit.

Credit Restrictions
Students may enroll in a maximum of 10 journalism credits each semester without permission from the associate dean for undergraduate studies.

Capstone Course
All students must complete a capstone course during their last 45 hours of study. Each interest area provides a course(s) to fulfill this university requirement.

Independent Study
Mizzou Online offers a variety of online courses that can be taken self-paced. Many of the courses can be used to satisfy degree requirements. Students may enroll themselves for as many as 4 hours per semester of online self-paced courses. Enrolling in more than 4 hours per semester requires approval from an academic advisor.

Standards for Academic Performance
The School of Journalism is a challenging and rigorous environment in which students are expected to maintain high standards of academic achievement. In general, the faculty expects each student to maintain a GPA of 3.0 or higher to be considered in good standing. The academic standing guidelines are categorized by completed credit hours. Each category has a specific requirement to ensure students are making progress to achieving a 3.0 GPA and progressing toward timely degree completion. The credit hour classifications include University of Missouri courses, transfer courses, advanced placement credit and other credits by examination. While the credit hours from all of these sources are included in the following categories, only the grades in courses completed in the University of Missouri system will be computed for GPA purposes.

Probation
Probation indicates a student is struggling to meet expectations. Students placed on probation are required to meet with their advisor frequently during the upcoming semester. During these meetings students will be assessed to determine which types of intervention are needed to return to good academic standing.

Dismissal
Students who are dismissed are having significant challenges in meeting expectations. Students are encouraged to seek admission to another academic college at the University at Missouri to regain eligibility for course enrollment. Students can appeal to return to the School of Journalism when their GPA returns to a minimum of 3.0.

First Time Freshmen
Probation: GPA is between 0.50 – 1.99
First semester freshman journalism students are placed on final probation when their first term GPA is between 0.50 and 1.99. They regain good standing when their term and cumulative GPAs are 2.0 or higher.

Dismissal: GPA is below 0.50
First semester freshman journalism students are dismissed and become ineligible to enroll for a minimum of one semester when their first term GPA is below 0.50.

All Students
Academic Progress
Students who have completed one semester at MU who do not meet the following standards will be dismissed from the School of Journalism and will not be permitted to re-enroll in a minimum of one semester:

- 0-29 credit hours
  - Students must maintain a cumulative MU GPA of at least 2.5.

- 30-69 credit hours
  - Students must maintain a cumulative MU GPA of at least 2.75.

- 70 credit hours
Students with 70 or more credit hours who have not been admitted to their interest area.

Readmission
A student who has been dismissed and declared ineligible to enroll may be readmitted only on the approval of the dean of the school or college in which the student desires to enroll. As a condition of readmission, the dean may set forth stipulations with regard to minimum standards of academic work that must be maintained by the student. If the student, after readmission, again becomes ineligible to re-enroll, their ineligibility normally is considered permanent.

Minimum Grade in Journalism Courses
Students must repeat any required journalism course in which they do not earn a grade of C- or higher. A student who fails to achieve a C- or better during the second attempt will be permanently dismissed from the School of Journalism for lack of acceptable progress.

Students may be readmitted only with the consent of the faculty chair of the student’s interest area and the associate dean for undergraduate studies. Before recommending approval for the student to re-enroll, the faculty chair will consult with the instructor or instructors of record in the required course to determine the likelihood of that student passing the course on the third attempt. The faculty chair will make a recommendation to the associate dean, who shall make the final decision to readmit or deny admission to the School of Journalism.

Satisfactory/Unsatisfactory Courses
Students have the option to enroll in courses on a satisfactory/un satisfactory basis instead of a traditional letter grade basis. A maximum of one non-journalism course per semester may be taken on a satisfactory/unsatisfactory basis. A satisfactory grade is defined as equivalent to the letter grade of C- or higher.

Journalism courses are not usually graded on a satisfactory/unsatisfactory basis. If a required course, or a course being used to satisfy a specific requirement, is taken in this manner the School of Journalism will compute it in the GPA as a “C.”

Excessive Incomplete Grades
A student may be placed on probation, suspended or dismissed for excessive incompletes at the discretion of the associate dean for undergraduate studies. In such cases, the associate dean shall set a time limit for successful completion of all the courses in which the student has an incomplete. The time limit will not exceed one calendar year from the scheduled completion of the course and may be of shorter duration. The associate dean also may place limitations on the number of additional credits hours in which the student may enroll until the incomplete grades are resolved. If the student fails to finish the required courses within the time limit set by the associate dean, the student is subject to dismissal.

Ethics of Journalism
The School of Journalism is committed to the highest standards of academic and professional ethics and expects its students to adhere to those standards. Students should be familiar with the Code of Ethics of the Society of Professional Journalists and adhere to its restrictions. Students are expected to observe strict honesty in academic programs and as representatives of school-related media. Should any student be guilty of plagiarism, falsification, misrepresentation or other forms of dishonesty in any assigned work, that student may be subject to a failing grade from the instructor and such disciplinary action as may be necessary under university regulations.

Non-Journalism Majors
Students from other divisions with junior or higher standing may take non-journalism courses in journalism without being admitted to the school. Permission of the journalism academic unit is required. Courses directly related to the skills in the media are usually not open to students while they are undergraduates in other disciplines. Students from other schools or colleges admitted to journalism courses are expected to meet the course prerequisites and grade point averages required of students in the School of Journalism.

Advising
Students are expected to seek the advice of an academic advisor in the selection of courses and semester planning. Students are encouraged to seek advice from the faculty for career counseling and specific journalism related issues.

The university provides degree audits for students to track completion of degree requirements. Students are responsible for enrolling in an appropriate schedule of courses each semester; however, students are encouraged to consult with their advisor when necessary. The responsibility for meeting admission and graduation requirements rests with the student.

Senior Assessment Program
In accordance with the Accrediting Council on Education in Journalism and Mass Communication (ACEJMC) and University of Missouri rules, the Missouri School of Journalism has provided continuous assessment of all graduating seniors since 1994.

The School of Journalism uses both direct and indirect measures of student learning to provide faculty and administrators with information to improve how and what students learn in their major. One key component has been the feedback of external reviewers who have substantial experience in the areas being evaluated. The professionals conduct one-on-one interviews with students, critique portfolios and evaluate other relevant evidence of student learning and preparation for their chosen fields. Assessment information is regularly used to guide curriculum decisions and inform teaching and learning practices.

The components of the senior assessment program are as follows:
Each May and December the School conducts a comprehensive exit survey of all graduating seniors. The goal is to determine student attitudes and the degree to which the program emphasizes the values and competencies defined by the School and the Accrediting Council on Education in Journalism and Mass Communication. The student exit survey is conducted in the two weeks prior to graduation. The survey also provides the School with initial data about graduates’ career placement and destination plans.

Student Outcomes Survey
The School conducts an outcomes survey of all graduating seniors.

The survey opens two-three weeks prior to graduation and gathers information for a full year, following a student’s successful completion of their degree. The survey provides the School with initial data about graduates’ career placement and destination plans.

Student Exit Exam
Students complete an exit exam to measure student knowledge related to ACEJMC core values and competencies. Students take the 26-question exam in their required capstone courses.
Emphasis Area Reviews

Each emphasis area sets its own learning objectives and a timeline for review of student work during students’ final semester. Emphasis area reviews typically require students to produce a portfolio that encompasses a sampling of their best professional work whether from journalism courses, extra-curricular activities, internships or other work experience. All emphasis area reviews rely on external reviewers and industry professionals to assess student learning and advise on methods for improving the program.

Convergence:
Graduating seniors complete a digital portfolio with a home page, resume, links to best work and evidence of proficiency in more than one area of journalism. Portfolio completion is required in students’ capstone class and portfolios are evaluated by external reviewers.

Convergence Journalism Learning Goals

• Convergence faculty endorse the ACEJMC professional values and competencies that prepare convergence students to work in a diverse global and domestic society.
• Convergence faculty provide a curriculum that embraces traditional journalistic values while employing new technology and strategies to create original multimedia content for targeted audiences. By design, the core curriculum focuses on providing students with hands-on experiences to operate in deadline-driven and collaborative environments. Through convergence interest areas and electives, students gain increased understanding and skill in one area of specialization.

Successful graduates should be able to:

• Pitch a story idea or creative concept to a supervisor, future employer, or potential investor
• Understand, articulate and employ traditional journalistic values in telling a story
• Write effectively for multiple audiences
• Demonstrate proficiency in more than one content production technique (e.g. audio, video, text, photojournalism, data visualization)
• Demonstrate mastery in one area of specialization (data visualization, reporting for radio, television, print or digital outlets, producing for traditional, online, mobile or social media platforms, photojournalism, etc)
• Use digital tools and techniques to produce targeted content for distribution on all relevant platforms
• Engage users through effective application of social media and audience analytics.

Through their capstone experience undergraduate students will:

• Demonstrate their ability to use a quantitative or qualitative research method for the purpose of studying a specific objective on a team project
• Design and deliver an effective project presentation
• Identify their personal brand and effectively present themselves to a potential employer in person and through an online portfolio.

Magazine:

Graduating seniors complete a digital portfolio that includes a resume and clips. Each portfolio is reviewed by an evaluator who completes an assessment scorecard, which is returned to the student. External reviewers include magazine industry professionals who provide individual feedback to students and overall comments to the magazine faculty as a whole.

Magazine Journalism Learning Goals

• The magazine program/emphasis area is designed for students interested in reporting, writing, editing, designing or publishing magazines, both in print and digital platforms.

As a result of their experience in the magazine emphasis area students or graduate models should know or apply:

• A context for skills development. Graduates should have a thorough appreciation for and understanding of the role of the media. Graduates must understand the history and cultural environment in which they will be applying those skills.
• A grasp of professional ethics. Graduates should understand that their choice of a career has made them beneficiaries of a public trust. They should have a sober appreciation of the power they wield and be sensitive to the influence of publicity on the lives of subjects.
• Different concepts, theories and research methods. They should be able to think critically, creatively and independently and be able to assess the work they and fellow journalists produce for quality, accuracy, fairness and tone.
• An understanding of diversity including gender, race, ethnicity, sexual orientation and other areas. Such knowledge is indispensable in serving our audiences and communities. Graduates should seek and appreciate diverse perspectives and experiences.
• Current tools and technologies appropriate for the magazine, publication or media outlet in which they work. They should also demonstrate agility in adjusting to the ever-changing nature of the industry.

Successful magazine graduates should be able to do the following:

• Report, research and gather information through primary and secondary sources as well as demonstrate solid interviewing skills and news judgment.
• Write correctly and clearly stories of varied scope, length and style.
• Excel in all aspects of editing from collaborating with members of the staff or team to story pitching and issue planning, making assignments, editing stories on both macro and micro levels, fact checking, packaging and production. Editing also includes audio, video and other multimedia.
• Understand basic design principles and the importance of layout, presentation and packaging in storytelling.
• Consider the numerous ways to present stories, including but not limited to audio, video, charts or infographics. Explore avenues for stories to find audiences, including but not limited to social media and using data from digital analytics.
• Demonstrate agility in adjusting to the ever-changing nature of the industry.

Photojournalism:

Graduating seniors submit digital portfolios containing work completed in the last two years of their course work. Portfolios contain primarily students’ visual reporting (still photography, video and multimedia) as well as reporting samples, editing samples and design samples, if the student has taken design courses. Students also participate in a 45-minute, one-on-one interview with a visiting professional.
Interviews allow for an assessment of a student’s readiness to enter the job market and provide a forum for students’ personal comments about their educational experience. Assessors use a scorecard to grade student work, with copies provided to each student and photojournalism faculty.

**Photojournalism Learning Goals**

Students in the Photojournalism undergraduate emphasis area or the graduate models should know or be able to apply:

- Advanced knowledge of photojournalism to produce story telling visual reportage and editing techniques for print and digital platforms
- Ethical and legal considerations in visual newsgathering and dissemination
- Knowledge of and ability to gather information through interviewing, records research and statistical analysis
- How journalism has influenced, and will continue to influence, the world
- The role of journalism in a multicultural democracy, and visual communication informs citizenry
- Understanding of the interplay between social media and traditional media and its uses and relevance in today’s news landscape.

In addition, photojournalism students should be able to:

- Analyze, synthesize and present information under the pressure of deadline
- Gather and disseminate news within ethical guidelines, and in the public interest
- Construct news and information in creative and original ways that avoid any hint of plagiarism
- Be transparent in all journalistic functions and develop decision-making capabilities that withstand public scrutiny
- Understand how to create news hierarchies through editing, design and presentation
- Develop visual literacy and technical skills to enhance the presentation and delivery of news across all forms of print and digital platforms
- Foster diversity and societal understanding through newsgathering and dissemination

**Print and Digital:**

Graduating seniors submit a digital portfolio that includes at least 10 samples of their work; an essay describing an ethical dilemma faced during the course of practicing journalism at a school-affiliated publication or during an internship; and a resume. The work must include one sample of multimedia. Students are then matched with outside professionals, based on their career interests. (public affairs reporting, sports, infographics, copy editing, designing, etc.) The professionals review the material and spend about a half-hour with the student by phone or video conferencing. They then complete a student assessment scorecard. The chair reviews the scorecards and sends them to the faculty along with any observations about themes or trends.

**Print and Digital News Learning Goals**

- The goals for students in the Print and Digital News group conform to the ACEJMC’s core competencies.

**Students in the Print and Digital News undergraduate emphasis area or the graduate models should be able to:**

- Analyze, synthesize and present information under the pressure of deadline
- Gather and disseminate news within ethical guidelines, and in the public interest
- Construct news and information in creative and original ways that avoid any hint of plagiarism
- Be transparent in all journalistic functions and develop decision-making capabilities that withstand public scrutiny
- Understand how to create news hierarchies through editing, design and presentation
- Understand audiences and foster conversation within and among them
- Develop visual literacy and technical skills to enhance the presentation and delivery of news across all forms of print and digital platforms
- Foster diversity and societal understanding through newsgathering and dissemination

**Radio-Television:**

Graduating seniors complete digital portfolios that include their resumes, written work and video clips. News executives from major television companies representing approximately 400 television newsrooms across the country visit campus to conduct one-on-one interviews and portfolio evaluations with each student. Evaluators provide verbal critiques to students and written assessment and commentary to faculty.

**Radio-Television Journalism Learning Goals**

Students in the Radio-Television undergraduate emphasis area or the graduate models should be able to:

- Research for story or newscast by applying internet tools, background information, and using in-person interviews
- Gather facts by using a wide range of diverse sources, established sources that lead to new sources and techniques that yield or reveal extraordinary information
- Write using conversational language, short sentences and techniques specific to video and sound
- Produce video using basic techniques of video composition such as sequences, lighting and matched action
- Tell stories using various angles and techniques to emphasize important and timely elements in a story
- Recognize ethical issues and how to avoid sensationalism
- Use news judgment to determine the relative value of stories in a digitally-driven 24-hour news cycle

**Strategic Communication:**

Students interview with at least one working professional in the field who assesses the student’s resume and portfolio, along with overall career readiness. During these one-on-one interviews of all strategic communication students, assessors ask students to describe their experiences in the School and in Strategic Communication.

**Strategic Communication Learning Goals**

- The Strategic Communication emphasis area fosters theory and practice in nine specialties and teaches the linkages among those specialties. Interest areas are Account Management, Art Direction, Copywriting, Digital Strategy, Media Planning, Public Relations, Research, Sports and Entertainment promotion, and Video
Storytelling. All specialty areas share common learning goals and competencies.

**Students in the Strategic Communication undergraduate emphasis area or the graduate models will have the knowledge and ability to:**

- Understand and conduct high level and ethically executed primary and secondary research using both qualitative and quantitative methods
- Think critically about the potential ethical implications of persuasion in media
- Communicate in ways that are respectful and inclusive with regard to people’s ethnicity, disabilities, gender, religion, country of origin, or sexual orientation
- Write and use images and video to communicate clearly, effectively, and ethically on a range of strategic communication media platforms
- Effectively use current technology in Strategic Communication and in their specialty areas
- Apply ethical and legal principles governing communication in a free society and understand the historical origins of such principles and practices
- Engage in strategic thinking in addressing opportunities and problems in strategic communication practice
- Work in effective teams in classes and for fee-paying clients (Mojo Ad and AdZou capstones)

**Students in individual specialties have additional specific goals:**

**Account Management**

Professionals in Account Management lead and manage a brand’s strategic communication planning and execution. They may have this role in agencies, not-for-profits, government, and corporations.

**Graduates will have the ability to:**

- Conduct and/or apply research to client opportunities and problems
- Manage the relationships among all of the stakeholders in a strategic communication initiative
- Manage and assist in the development and presentation of audience insights

**Art Direction**

Art directors, graphic artists, and visual designers communicate using visual elements, and deploy their work through print, digital, visual, and experiential means.

**Graduates will have the ability to:**

- Use the power of visuals to communicate quickly and effectively following principles of good design
- Understand the importance of strategy in developing visual communication
- Apply the current terminology and tools of art direction

**Copywriting**

Copywriters create persuasive messages for multiple platforms that are targeted toward specific audiences and have the power to break through cluttered media environments.

**Graduates will have the ability to:**

- Develop messages that are on strategy and creative
- Communicate benefits versus product or service features

**Digital Strategy**

Digital strategists use research, analytics, and online metrics in planning and executing campaigns and complementing larger initiatives.

**Graduates will have the ability to:**

- Use research, analytics, mobile, social, and emerging digital tools
- Develop digital promotions that synchronize with larger strategic campaign tactics and objectives
- Apply high-level technological skills to problem solving

**Research**

Researchers in strategic communication have strong expertise in understanding consumer psychology and behavior of target audiences.

**Graduates will have the ability to:**

- Apply the rules and requirements of social scientific and marketing research
- Understand and select optimal theories and methodologies for different research questions
- Properly evaluate ethical issues in conducting research on human subjects

**Media Planning**

Media planners use research and analysis in determining where, when and how often a brand will deploy strategies and tactics in communicating with target audiences.

**Graduates will have the ability to:**

- Utilize the latest analysis techniques to creating strategies and evaluative criteria
- Identify optimal combinations of media tactics to achieve best results at the lowest cost
- Identify ethical issues related to privacy, behavioral targeting, location-based marketing, etc.

**Public Relations**

Public relations practitioners utilize a range of strategies and tactics including the “PESO” approach: Paid, Earned, Shared/Social, and Owned. They not only use traditional publicity tactics through news and other media, but also DTC, social media, and other approaches.

**Graduates will have the ability to:**

- Understand the strategic mix promotions and PR’s role in that mix
- Understand and advise regarding other PR functions including events, risk and crisis communication, and internal communication
- Identify the range of stakeholders PR professionals may work with including employees, vendors, financial communities, government and policymakers, and opinion leaders

**Sports and Entertainment Promotion**

Specialists in sports and entertainment promotion work in several areas. This includes sports organizations and teams as well as music, film, theater, television, cable, and other entertainment properties.

**Graduates will have the ability to:**

- Understand the unique characteristics of different sports and entertainment brands
• Strategically deploy brand benefits through sports and entertainment venues, tie-ins, and other tactics
• Target audience segments for appropriate sports and entertainment related campaigns

Video Storytelling
Video storytellers design and create video content for a wide range of media platforms and devices. They craft such videos using strategies to increase brand visibility and sales through search, sharing, and mobile applications.

Graduates will have the ability to:
• Create brand videos that contribute to overall campaign strategies
• Plan, shoot, and edit high quality videos
• Quickly produce accurate, engaging, and informative stories aimed at target audiences

ACEJMC Learning Goals and Outcomes:
The School strongly adheres to the learning competencies and values defined by the Accrediting Council on Education in Journalism and Mass Communication which states that irrespective of a student’s particular specialization all graduates should be able to:
• understand and apply the principles and laws of freedom of speech and press for the country in which the institution that invites ACEJMC is located, as well as receive instruction in and understand the range of systems of freedom of expression around the world, including the right to dissent, to monitor and criticize power, and to assemble and petition for redress of grievances;
• demonstrate an understanding of the history and role of professionals and institutions in shaping communications;
• demonstrate an understanding of gender, race ethnicity, sexual orientation and, as appropriate, other forms of diversity in domestic society in relation to mass communications;
• demonstrate an understanding of the diversity of peoples and cultures and of the significance and impact of mass communications in a global society;
• understand concepts and apply theories in the use and presentation of images and information;
• demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity;
• think critically, creatively and independently;
• conduct research and evaluate information by methods appropriate to the communications professions in which they work;
• write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve;
• critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness;
• apply basic numerical and statistical concepts;
• apply current tools and technologies appropriate for the communications professions in which they work, and to understand the digital world.

Graduate About Our Graduate Programs
The University of Missouri's School of Journalism is the recognized leader for graduate study in journalism and strategic communication, having awarded the first master's and doctoral degrees in journalism in 1921 and 1934, respectively.

The Missouri Method is the time-honored process of journalism and strategic communication education: Graduate students gain valuable research-based, managerial experience while honing tactical skills. We operate the only network affiliate (NBC) television station in the country used to train journalism students. We publish a community daily newspaper (not a campus paper), and we operate four major web sites, a local magazine and an international magazine. Students also may train at our campus-based NPR affiliate. Our strategic communication students design media campaigns for local and national clients. Examples: Our students have created advertising and public relations campaigns for Nokia, Apple, Dr Pepper, Anheuser-Busch, Duncan Hines, DuPont, Dow Chemical, Kinko's, Eastman Kodak and many other leading international brands. Graduate studies in CAFNR are taking an innovative, high-tech approach to traditional agriculture, food and natural resources. Our students are highly engaged with expert faculty mentors who are impacting the future with findings on health breakthroughs, sustainable agriculture techniques and food safety. Prospective students are able to choose from a range of academic programs consistently recognized for excellence.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Office of Graduate Studies. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

We operate educational programs in Washington, D.C., New York, and Brussels where many of our students carry out their capstone projects or do research. We also partner with educational programs around the world.

Our 80+ faculty members have earned impressive credentials from years of working in journalism and strategic communication. School resources include an extensive journalism library and Freedom of Information Center, Center for Advanced Social Research, and the Stephenson Research Center, named for the late William Stephenson, known globally as the inventor of Q-methodology.

Opportunities for Graduate Study on MU Campus
The accelerated bachelor/master degree program was designed for students in the Missouri School of Journalism to attain a graduate education. The new program will allow students to apply and begin their master’s program in the senior year of undergraduate program. Students in the program complete requirements as outlined for the Bachelor of Journalism degree and then spend one more year (approximately 12 months) to earn a master’s degree. The program requires students to carry 9-12 credits each semester. Course work in the program builds on the undergraduate program and enhances student’s skills and understanding of the chosen area of journalism. At the present time, areas include strategic communication, newspaper design, broadcast management, computer-assisted reporting and magazine areas such as magazine writing and magazine design.

Journalism
The world’s first School of Journalism was established in 1908 at the University of Missouri to strengthen the effectiveness of public communication in a democratic society. The school’s first dean, Walter
Williams (who went on to become president of the University in 1930) wrote the Journalist’s Creed, which stresses the profession’s rights and responsibilities as a public trust.

The faculty is committed to educating students in the responsibilities and skills of the professional journalist. It also has a broader commitment to advance the profession of journalism through scholarly research, analysis and criticism and through special programs to serve practitioners. The school also prepares students for careers in corporate communication through its strategic communication emphasis area. Students in that area typically pursue careers in advertising or public relations or in strategic communication.

The Missouri Method assures a journalism student will graduate with a broad, liberal education essential for a journalist whose work may span many segments of today’s complex society. In addition to a liberal arts education, students complete practical laboratory work in a variety of settings, including a public radio station, a commercial daily newspaper and a network-affiliated television station. The school offers the Bachelor of Journalism, Master of Arts and Doctor of Philosophy degrees, along with cooperative programs with other divisions in the University. It was the first school in the world to offer all three of those degrees.

The Accrediting Council on Education in Journalism and Mass Communication has accredited the undergraduate program and a professional master’s degree.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.
Undergraduate

- BJ in Journalism (p. 673)
  - with emphasis in Convergence Journalism (p. 675)
  - with emphasis in Magazine Journalism (p. 677)
  - with emphasis in Photojournalism (p. 679)
  - with emphasis in Print and Digital News (p. 680)
  - with emphasis in Radio-Television (p. 682)
  - with emphasis in Strategic Communication (p. 683)
- Minor in Journalism (p. 685)

Undergraduate students in the School of Journalism pursue their degrees in one of six Emphasis Areas approved by the University Board of Curators and the Missouri Coordinating Board of Higher Education. These are Convergence Journalism, Magazine Journalism, Photojournalism, Print and Digital News, Radio-Television Journalism, and Strategic Communication. Degrees are awarded only in one of those six areas.

Each Emphasis Area, however, has separate tracks that permit students to prepare for employment in more specialized fields. These are called Interest Areas, and students select from more than 30 choices among these. Interest Areas do not appear on transcripts or diplomas, although the transcript coursework should provide evidence of competency in the appropriate area.

Administratively, the School of Journalism is divided into Faculties, not Departments as in most other Schools and Colleges at MU. For administrative purposes, all Interest Areas are assigned to one of those Faculties except for two International Interest Areas, which are administered by the School of Journalism’s Global Programs Office. International programs, however, merely indicate an international interest.

To ensure maximum flexibility for students, the School also offers an Individually Designed Interest Area. Working with three faculty members, and with the approval of the associate dean for undergraduate studies, a student can design his or her program by selecting from the School’s robust offerings of more than 100 courses. Students who pursue this option must do so within accrediting guidelines and within one of the six approved Emphasis Areas.

Students who desire more information on a particular program should see an Academic Advisor or seek out a member of the supervising Faculty, which is indicated following the description of the Interest Area.

Students interested in one of the international programs should seek out an advisor in the Global Programs Office. Interdisciplinary Programs, those that cross traditional media boundaries or depend on skills-based coursework from other MU divisions, are assigned to one of the School’s Faculties as indicated.

Degree with Honors Requirements

Graduation with honors is based on the grade point average during the final 60 graded credits in residence. Cum laude requires 3.5, magna cum laude 3.7, and summa cum laude 3.9. The student must have a minimum of 60 credits in residence at MU to be considered for graduation with honors. The School computes the grades to three decimal points and does not round up. A student must request consideration for graduation with honors when applying for graduation.

Kappa Tau Alpha is a journalism honorary society that accepts the top 10 percent of each graduating class. Qualifying students are sent a letter with details about the society and are recognized at the journalism graduation ceremony.

Individually Designed Interest Area

Students who cannot find a match with one of the existing Interest Areas may work with the faculty to construct a tailored Interest Area to meet their educational objectives. To do this, students work with a faculty mentor and at least two other faculty members to design a course plan using existing courses in the School of Journalism, relevant courses outside the School and no more than six credits of Problems, Topics or Communications Practice courses. The student will enroll and be granted a degree in the emphasis area that aligns with their faculty mentor. Students are not able to tailor an Interest Area in Strategic Communication due to the large volume of enrollment. Students wishing to pursue an individually designed Interest Area should start by seeing a journalism advisor in 76 Gannett Hall.

Electives to Achieve the Interest Area’s Goal

The student must complete 16 hours of elective journalism courses mutually agreed to in advance by the student and the three supervising faculty members. These courses must form a coherent plan that leads to competency in the targeted area of expertise and must fit within one of the approved Emphasis Areas of the School.

Journalism or Non-Journalism Electives (6 Non-Journalism Credits)

In consultation with the faculty mentor, the student should choose a minimum of six non-journalism credits that complement the program’s objectives. For example, if a student were to design a program in some aspect of entrepreneurial journalism, six or more credits in business courses might be desirable. In the absence of relevant courses for the targeted interest area, these credits become general electives for students.

Capstone

Students pursuing this interest area should choose from among the School’s available capstone courses to find one that best meets the model’s objectives. In the absence of a clear choice, JOURN 4990: Journalism and Democracy, is recommended. Students also are required to complete an upper-division Writing Intensive (WI) course. Some capstones carry WI designation. Others may be found in the journalism curriculum or outside the school.

Approval Procedure

Students who wish to construct a special interest area must submit a program proposal form before completing 70 total credits. After meeting with the three faculty members chosen to oversee progression through the program, the student will submit the form - complete with the signatures of the student and the three supervising faculty members - to the Associate Dean for Undergraduate Studies. The student must gain approval of the tailored program from the associate dean before beginning the program.

Total Credits for the Degree and their Breakdown

Students pursuing a tailored program must complete 120 credits to include:

- Completion of all Pre-Interest courses
- 44-48 journalism credits
- minimum of 72 non-journalism credits

Graduate

- MA in Journalism (p. 685)
• with emphasis in Health Communication (p. 687)
• with emphasis in Interactive Media (p. 687)
• with emphasis in Media Management (p. 688)
• with emphasis in Strategic Communication (p. 688)
• PhD in Journalism (p. 689)

Master's Programs

There are two options available for Master's Programs in Journalism. Students who wish to pursue a traditional on-campus experience, should refer to the MA in Journalism page (p. 685). The above emphasis areas are not available for on-campus students. Students may also wish to pursue the online Master's program. Online students have the option of obtaining an MA in Journalism with any of the emphasis areas listed above.

About Journalism's Graduate Degree Programs

The Missouri School of Journalism awarded the first master's and doctoral degrees in journalism in 1921 and 1934, respectively. The master's and doctoral programs at the School enjoy superb reputations, both among scholars and among practitioners in news, advertising, public relations and strategic communication.

For the master's program, Missouri Journalism offers a complete set of real-media experiences. We operate the only network affiliate (NBC) television station in the country used to train journalism students. We publish a community daily newspaper (not a campus paper), and we operate several major web sites, a local magazine and an international magazine. Students also may train at our campus-based NPR affiliate.

Our strategic communication students design media campaigns for local and national clients through our two student-run advertising agencies, MOJO Ad and Adzou. Our students have created advertising and public relations campaigns for Nokia, Apple, Dr Pepper, Anheuser-Busch, Duncan Hines, DuPont, Dow Chemical, Kinko’s, Eastman Kodak and many other leading international brands.

We operate educational programs in Washington, D.C., New York, Brussels and Barcelona where many of our students carry out their capstone projects or do research. We also partner with educational programs around the world.

Graduate Minor in Law and Conflict Resolution

This program is for journalism doctoral students who are interested in teaching and researching in journalism, law and conflict resolution in a school of journalism or communication department. For details, refer to the Graduate Minor in Law and Conflict Resolution (p. 690).

Facilities and Resources

A variety of special facilities and resources are available to help students meet their educational objectives. These include the Columbia Missourian, a general circulation daily newspaper with full-leased wires of The Associated Press and The New York Times Service; KOMU-TV, an NBC affiliate; KBI-A-FM, a National Public Radio station; MOJO Ad and Adzou advertising agencies; and Vox magazine, a weekly city magazine. All provide students the opportunity for hands-on learning under faculty supervision and to conduct applied research.

The Journalism Library subscribes to more than 125 newspapers and magazines worldwide and catalogs more than 40,000 volumes. Many more resources are available in electronic format.

The State Historical Society of Missouri, located on-campus, has an extensive collection of state newspapers dating from 1808.

The Freedom of Information Center maintains a day-to-day study of the actions by government, media and society affecting the movement of information.

The national headquarters of Investigative Reporters and Editors and the National Institute for Computer Assisted Reporting provide educational services to reporters, editors and others interested in investigative journalism.

The Association of Health Care Journalists is headquartered at Missouri and is dedicated to advancing public understanding of health care issues. Its mission is to improve the quality, accuracy and visibility of health care reporting, writing and editing.

The Center on Religion & the Professions works to improve religious literacy among professionals, to help them serve a diverse public. As America grows more religiously diverse, professionals need to better understand the religious traditions and beliefs of the public they serve. CORP's interdisciplinary, practical and applied work centers on that mission. Founded in 2003 with a grant from The Pew Charitable Trusts, the Center is one of Pew's 10 Centers of Excellence. CORP is affiliated with Religion Newswriters Association.

The American Society of News Editors focuses on leadership development and journalism-related issues. Founded in 1922 as a nonprofit professional organization, ASNE promotes fair, principled journalism, defends and protects First Amendment rights, and fights for freedom of information and open government.

Founded in 2003 with a generous gift from the Donald. W. Reynolds Foundation, the Reynolds Journalism Institute is committed to developing and testing new ways to improve journalism through new technology and improved processes.

Special Events

Each year the school sponsors the Missouri Honor Medal Award program, which brings contemporary leaders in mass communications to the campus. The school also directs a number of professional development and awards programs, including the international competition for the best Pictures of the Year.

Honor Society

Kappa Tau Alpha, national honor society for scholarship in journalism, founded at the university in 1910, has its headquarters in the school.

Funding

An array of competitively awarded fellowships, assistantships, scholarships and other financial aid opportunities are available.

BJ in Journalism

University of Missouri
Degree Program Description

Students can focus on journalism or strategic communication. Journalism is the study of gathering, assessing, creating, and presenting of news and information through various mediums. Strategic communication involves learning the principles and practice of all communication designed to create a desired response from a given audience in advertising, public relations, digital and social media.

Students will develop a solid foundation in the liberal arts and sciences while achieving competency in journalism or strategic communication. For this degree program, students must choose an emphasis area. Refer to the degree program descriptions for the emphasis areas for more details.

Major Program Requirements

The Bachelor of Journalism degree requires 120 credits.

To obtain the Bachelor of Journalism degree, a student must:

- Complete all Pre-Interest area requirements
- Be admitted to an interest area within the school
- Complete all interest area requirements
- Earn a cumulative GPA of at least 2.0 for all work taken while in the School of Journalism and a GPA of at least 2.0 for all Journalism courses
- Complete all University graduation requirements, including University General Education (p. 33) requirements

Pre-Interest Area General Education requirements | 47 |

Journalism interest area requirements | 25 |

Upper Level Non-Journalism Electives from the areas below: 29

(Must be numbered 3000 or above or General Honors courses numbered 2000H or above)

Area 1: 3

Students choose from one of these areas: Anthropology, Astronomy, Biology, Chemistry, Computer Science, Geology, Mathematics, Physics, Psychology, Rural Sociology, Sociology or Statistics.

Honor’s College students can also choose from: GN_HON 2243H, GN_HON 2310H, GN_HON 2430H, GN_HON 2244H, GN_HON 2450H, GN_HON 2461H, GN_HON 2462H, GN_HON 3210H, GN_HON 3241H, GN_HON 3242H, GN_HON 3450H.

Area 2: 6

Students choose from the following areas: Black Studies, Economics, Geography, History, Peace Studies, Political Science, and Women’s and Gender Studies.

Honor’s College students can also choose from: GN_HON 2230H, GN_HON 2245H, GN_HON 2246H, GN_HON 3230H.

An exception to the 3000 and 4000 level rule includes HIST 2004.

Area 3: 6

Students choose from the following areas: Architectural Studies, all Art prefixes, Classical Humanities, Classics, Communication*, English, Film Studies*, French, German, Greek, Hebrew, Italian, Japanese, Korean, Latin, all Music prefixes, Philosophy, Portuguese, Religious Studies, Russian, South Asia Studies, Spanish or Theatre.

Honor’s College students can also choose from: GN_HON 2015H, GN_HON 2111H, GN_HON 2112H, GN_HON 2113H, GN_HON 2114H, GN_HON 2117H, GN_HON 2120H, GN_HON 3112H, GN_HON 3113H, GN_HON 3120H.

An exception to the 3000 and 4000 level rule includes:

MUSIC_NM 2306 Perceiving Musical Traditions and Styles
ART_GNRL 2030 Context and Culture

Area 4: 14

Non-Journalism courses.

(Students in Strategic Communications must complete three hours of Marketing courses in addition to MRKTNG 3000.)

- Some courses are prohibited for the bachelor of journalism. See the list of course exceptions for more information. Students should consult with their assigned academic advisor if they have questions regarding courses in these areas.

Flexible Credits

Students can take up to 4 additional credits of journalism (JOURN) electives and apply them to requirements in Area 4.

General Electives

Electives necessary to complete a minimum of 72 credits of non-journalism classes and 120 total credits. Any course acceptable to the School of Journalism is allowed.

International Journalism Interest Area

The next generation of journalism students must be equipped to work in a global environment. This interest area is designed to capitalize on Missouri’s international reputation and its international resources by placing under one umbrella the school’s existing Study Abroad opportunities, its internationally focused media and multimedia projects with global partners. Students in this interest area may take courses within any of the existing or prospective areas to complement their international interests. This degree is granted in the student’s emphasis area of choice (Convergence Journalism, Magazine Journalism, Photojournalism, Print and Digital News or Radio-TV Journalism) but is administered by the School’s Global Programs Office. Interest Areas do not appear on Transcripts or Diplomas. Emphasis areas appear only on transcripts.

International Journalism Interest Area Required Journalism Classes

Select one of these:

- JOURN 4662 Global News Across Platforms | 3
- JOURN 4650 International Issues and the Media | 3
- JOURN 4656 International News Media Systems | 3
- JOURN 4658 International Journalism | 3

Select one of these:

- JOURN 4306 Broadcast News III | 3
- JOURN 4450 News Reporting | 3
JOURN 5556  Fundamentals of Photojournalism  3
JOURN 4804  Convergence Reporting  3
Capstone determined by interest area track:  3
Journalism Study Abroad  6

It is recommended that the student study abroad in the second semester of their junior year or the first semester of their senior year.

Required Journalism Electives vary by specific interest area track

Semester Electives vary by specific interest area track

Emerging Media Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

The journalism industry is constantly changing as it discovers new ways of covering the news and new technologies to deliver it. This interest area is for the student who wants to learn and work with some of the latest developments in journalism. Classes in this area provide a wide range of opportunities from content creation and Web and application development to classes working with content created by other journalists. This program of study is primarily for students interested in the intersection of journalism and digital technologies. Administered by the Convergence Faculty.

Emerging Media Interest Area Required Journalism Classes 18
JOURN 4804  Convergence Reporting  3
JOURN 4806  Convergence Editing and Producing  3
JOURN 4992  Reporting, Editing and Marketing of Converged Media  3
Select three of the following:  9
JOURN 4444  Team-Based Mobile Device Application Development
JOURN 4462  Emerging Technologies in Journalism
JOURN 4502  Multimedia Planning and Design
JOURN 4700  Participatory Journalism
JOURN 4812  Online Audience Development
JOURN 4974  Advanced Internet Applications for Radio/TV News

Journalism Electives  7

Entrepreneurial Journalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

More and more of today’s journalism students will go to work in non-traditional news organizations, start their own businesses or freelance. Students in this Interest Area will learn about current markets in traditional news organizations, start their own businesses or freelance. More and more of today’s journalism students will go to work in non-traditional news organizations, start their own businesses or freelance. Journalism Electives  10

Multimedia Producing Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

Multimedia Producing Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.
The focus of this Interest Area is planning and producing content across medium platforms. A student in this area will have the knowledge and skills to work in traditional newsrooms, Web-only newsrooms, non-traditional news organizations and other growing media areas. A student choosing this path is one who is less interested in a traditional reporting track and is more interested in working with content created by others. Administered by the Convergence Faculty.

JOURN 4554 Visual Editing for Multimedia
JOURN 4972 Photo and Visual Editing

Journalism Electives 10

Convergence Photojournalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This course of study is for those interested in communicating largely through photography and other visual mediums. Skills acquired include documentary photography, lighting and studio techniques, and photo editing with both still and moving images. Students build an appreciation for and understanding of visual communication and can expand into illustrative graphics, video and multimedia management. Students are prepared for careers as photojournalists for print and online publications and as freelancers. Administered by the Convergence Faculty.

Convergence Photojournalism Interest Area Required Journalism Classes 15
JOURN 4556 Fundamentals of Photojournalism 3
JOURN 4560 Staff Photojournalism 3

JOURN 4806 Convergence Editing and Producing 3
JOURN 4992 Reporting, Editing and Marketing of Converged Media (capstone) 3

Journalism Electives 10

Convergence Radio Reporting and Producing Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This interest area is for the student wanting to work largely in audio reporting. This area includes a wide range of reporting classes and producing/management classes, giving the student a sense of radio work both as a reporter and as a behind-the-scenes producer. Several courses offered provide the opportunity for training in media management. Administered by the Convergence Faculty.

JOURN 4804 Convergence Reporting 3
JOURN 4806 Convergence Editing and Producing 3

JOURN 4992 Reporting, Editing and Marketing of Converged Media (capstone) 3

Journalism Electives 10
Degree Program Description

Journalism is the study of gathering, assessing, creating, and presenting of news and information through various mediums. Students will develop a solid foundation in the liberal arts and sciences while achieving competency in journalism. Within the degree program, students can choose an emphasis in Magazine Journalism. Magazine Journalism focuses on the skills and strategies needed to excel in this industry. Students design, write, report, and public across multiple platforms, including tablets, the Web, print and social media. The curriculum includes focused study and hands-on experience within the interest areas of Arts and Culture, Design, International Journalism, Magazine Editing, Magazine Publishing and Management, Magazine Writing, and Science and Health Journalism. Most pursue careers as Magazine Editors, Publishers, and Writers.

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

Magazine Journalism Interest Areas

Arts and Culture Journalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This interdisciplinary interest area gives students the opportunity to expand their understanding of the arts as they develop critical thinking skills about society, culture and the media. Students are encouraged to see culture as a central part of the journalistic enterprise as they learn about art, music, theater, film, popular culture and critical reviewing. This is intended to lay the groundwork not only for careers in traditional and emerging forms of journalism but also for careers in arts organizations, museums, nonprofit agencies, cultural institutions and government programs. Administered by the Magazine Journalism Faculty.

Required Arts and Culture Journalism Interest Area Journalsm Classes

Select one of the following: 3

| JOURN 4450 | News Reporting |
| JOURN 4804 | Convergence Reporting |

Complete each of the following:

| JOURN 4408 | Magazine Editing |
| JOURN 4410 | Intermediate Writing (* or equivalent) |
| JOURN 4418 | Critical Reviewing |

Select one of the following: 3

| JOURN 4984 | Magazine Staff |

Design Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This interest area teaches students to tell stories using the tools of visual journalism. Critical thinking skills and application methods are studied and practiced in courses that cover design skills, management issues and theoretical frameworks. Through hands-on work in the Columbia Missourian and Vox Magazine newsrooms, students gain real-world experience that prepares them to organize information and be clear visual communicators. This interest area prepares students to be designers/art directors for publications in print, on the Web, and/or on other digital platforms. Administered by the Magazine Journalism and Print and Digital News Faculties.

Design Interest Area Required Journalism Classes

Select one of the following: 3

| JOURN 4450 | News Reporting |
| JOURN 4804 | Convergence Reporting |

Select one of the following: 2-3

| JOURN 4400 | Introduction to News Editing |
| JOURN 4408 | Magazine Editing |

Complete each of the following:

| JOURN 4360 | Fundamentals of Design |
| JOURN 4500 | Publication Design |
| JOURN 4502 | Multimedia Planning and Design |
| JOURN 4988 | Advanced Publication Design |

Magazine Editing Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

Students in this interest area gain hands-on experience in the skills and strategy needed to excel as part of a magazine staff: planning issues, pitching and editing stories, writing titles and sidebars, coordinating photography and art, working with designers, fact checking, proofreading and directing stories through all stages of print or online production. They also focus on the finer aspects of micro-editing: grammar, style, syntax and usage. Classes provide an analysis of the industry and study of innovative techniques and delivery platforms. This interest area is recommended for those who seek careers as editors in the magazine and book publishing industries. The lessons learned about pitching and magazine production are equally beneficial to magazine writers. Administered by the Magazine Journalism Faculty.

Magazine Editing Interest Area Required Journalism Classes

Select one of the following: 3

| JOURN 4450 | News Reporting |
| JOURN 4804 | Convergence Reporting |

Complete each of the following:

| JOURN 4408 | Magazine Editing |
| JOURN 4410 | Intermediate Writing (* or equivalent) |
This interest area is directed to students who hope to become leaders in the field of magazine publishing and management. Course requirements and electives are designed to give an overview of all aspects of magazine publishing, both print and digital. Theoretical courses in law, business and management as applied to publications complement skills classes in reporting, writing, editing and design. Administered by the Magazine Journalism Faculty.

**Magazine Writing Interest Area**

*Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.*

This interest area is for students who want to be magazine writers. The foundation of longform or literary writing is solid reporting, and students must learn the basics of information gathering, interviewing and reporting first. From there, students will explore narrative storytelling tools: character, dialogue, voice, structure, scene construction, exposition, and detail and description. This interest area emphasizes revision and the analysis of contemporary magazine writing. Administered by the Magazine Journalism Faculty.

Administered by the Photojournalism Faculty.

As photojournalists for print and online publications and as freelancers, new technologies in presentation. Students are prepared for careers in Photojournalism. Photojournalism students learn to create truly compelling visual story-telling projects. The program's essential element is understanding the power of image, and it embraces all the practices of visual editing and design for print and online. This emphasis area includes focused based study curriculum and hands-on practice within the areas of Photojournalism, International Journalism, and Visual Editing and Management. Photojournalists begin their careers working for newspapers, magazines, television stations, or freelance companies.

This Interest Area educates students in the skills and theory of picture editing and visual presentation in print and online publications. This will prepare students for careers in visual editing at newspapers, magazines and with online publications. Administered by the Photojournalism Faculty.

Visual Editing and Management Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This Interest Area educates students in the skills and theory of picture editing and visual presentation in print and online publications. This will prepare students for careers in visual editing at newspapers, magazines and with online publications. Administered by the Photojournalism Faculty.

Semester Plan

There are several interest area tracks for Photojournalism. The following semester plan is a general outline. Students should consult with their Academic Advisor to create a plan that fits their needs.

BJ in Journalism with Emphasis in Photojournalism

Degree Program Description

Journalism is the study of gathering, assessing, creating, and presenting of news and information through various mediums. Students will develop a solid foundation in the liberal arts and sciences while achieving competency in journalism. Within the degree program, students can choose an emphasis in Photojournalism. Photojournalism focuses on the history, theory and skills of photojournalism, including still and moving images as well as audio. Also, students will learn the principles and practices of visual editing and design for print and online. This emphasis area includes focused based study curriculum and hands-on practice within the areas of Photojournalism, International Journalism, and Visual Editing and Management. Photojournalists begin their careers working for newspapers, magazines, television stations, or freelance companies.

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

Photojournalism Interest Areas

Photojournalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This Interest Area educates students in the history, theory and skills of photojournalism, including still and moving images, as well as audio. Also covered are the principles and practice of visual editing and design for print and online. Photojournalism students learn to create truly integrated multimedia projects, incorporating audio, video and stills into compelling visual story-telling projects. The program's essential element remains understanding the power of image, and it embraces all the new technologies in presentation. Students are prepared for careers as photojournalists for print and online publications and as freelancers. Administered by the Photojournalism Faculty.

BJ in Journalism with Emphasis in Print and Digital News

Degree Program Description

Journalism is the study of gathering, assessing, creating, and presenting of news and information through various mediums. Students will develop a solid foundation in the liberal arts and sciences while achieving competency in journalism. Within the degree program, students can choose an emphasis in Print and Digital News. Students will learn and develop the skills and strategies needed to excel in this industry. In addition, students experience reporting and editing using text, audio, video and information graphics. This emphasis area includes focus study curriculum and hands-on experience through the interest areas of Business and Economics Journalism, Data Journalism, Design, International Journalism, Investigative Journalism, News Reporting, Science and Health Journalism, and Sports Journalism. Print and Digital News graduates pursue careers as News Reporters/Anchors, Business journalists, and Data journalists.

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

Print and Digital News Interest Areas

Business and Economics Journalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This Interest Area is for journalism students interested in learning the skills of reporting business and economics news across platforms. It allows students to add a focus on economic, business and consumer reporting and emphasizes the use of financial data analysis in reporting. Similarly, it encourages students to take basic courses in other subject areas that will give them important skills, such as basic accounting, or advanced economics and finance. Students will gain the skills to work covering Wall Street, government economics, consumer and personal finance issues, and local business. A minor in Economics or Business is suggested. Administered by the Print and Digital News Faculty.

# Investigative Journalism Interest Area

**Note:** Interest Areas do not appear on transcripts. Emphasis areas appear on transcripts.

This Interest Area is for journalism students interested in learning the skills of investigative and computer-assisted reporting across platforms. It allows students to add a strong investigative-watchdog focus and emphasizes the use of data analysis in reporting. The program encourages students to develop a specialty area, such as covering health care or religion, but that is not required. Similarly, it encourages students to take basic courses in other subject areas that will give them important skills, such as introductory accounting (though again, this is not required).

Students will gain the skills to work in computer-assisted reporting or investigative reporting. Administered by the Convergence Journalism, Magazine Journalism and Print and Digital News faculties.

# Sports Journalism Interest Area

**Note:** Interest Areas do not appear on transcripts. Emphasis areas appear on transcripts.

This Interest Area is for those interested in pursuing a career in sports journalism at any level. Covering sports today includes not only knowing the games but also knowing about the larger financial, legal and ethical issues in sports. Students in this interest area have an opportunity to work across media platforms to gain experience in covering games, finding in-depth issue and feature stories and covering breaking news in sports. Students choose a core course of study through a specific emphasis area (convergence journalism, magazine journalism, or print and digital news), then pick from a wide range of electives to round out their skills. Electives include everything from advanced reporting and editing to business journalism, to social media techniques and community outreach.

Radio-TV Faculty and control rooms of KBIA Radio and KOMU-TV.

Practice guiding a newscast to completion in the professional newsrooms of news and information through various mediums. Students will develop a solid foundation in the liberal arts and sciences while achieving competency in journalism. Within the degree program, students can choose an emphasis in Radio-Television. Radio-Television focuses on the principles and practices of broadcast-style editing, writing, reporting and videography for radio, television and online media. The curriculum includes focus study and hands-on practice in the interest areas of International Journalism, Investigative Journalism, Producing, Reporting and Anchoring, and Sports Journalism. Upon graduation, students pursue a career as Radio Personality, Reporter, Producer, or Anchor.

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

Radio-Television Producing Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This interest area teaches students how to structure, write and build a newscast. Students will receive instruction in newsroom leadership and practice guiding a newscast to completion in the professional newsrooms and control rooms of KBIA Radio and KOMU-TV. Administered by the Radio-TV Faculty.

Radio-Television Reporting and Anchoring Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This Interest Area teaches students how to gather the information to write and edit stories for radio, television and the Internet. They also will learn on-air delivery techniques and receive instruction on how to deliver their journalism. They will do so in the professional newsroom settings of KBIA Radio and KOMU-TV. Administered by the Radio-TV Faculty.

Radio-Television Sports Journalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This interest area prepares students for a career in sports journalism. Covering sports today requires not only knowing the games, but also knowing the larger financial, legal and ethical issues in sports. Students in this interest area work across media platforms in covering games, finding in-depth issue and feature stories and covering breaking news in sports. Students choose a core course of study in the radio-television journalism emphasis area. Students then pick from a wide range of electives to round out their skills and work in other media. Electives include everything from advanced reporting and editing to business journalism, to social media techniques and community outreach. Administered by the Radio-TV Faculty.
Journalism Electives

* Students who want to do sports reporting with KOMU-TV must be in or have taken JOURN 4308 Broadcast News III, after completing JOURN 4300 Broadcast News I and JOURN 4306 Broadcast News II.

Radio-Television Investigative Journalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This interest area is for journalism students interested in learning the skills of investigative and computer-assisted reporting for radio and television news. Students choose their core course of study in radio-television journalism. The interest area builds student skills in investigative reporting and using data analysis in reporting. It also encourages, but does not require students to use elective coursework to develop a specialty area such as business news, health care or religion reporting. Through this interest area, students will gain the skills to work as an investigative reporter or producer in radio or television news. Administered by the Radio-TV Faculty.

Radio-Television Documentary Journalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This interest area uses the Missouri Method to immerse students in long-form reporting efforts leading to documentary presentations of their subject matter. Students will work creating documentaries in their courses, including a year-long senior documentary project. Concepts introduced include documentary theory, editing theory, camera aesthetics, business practices, critical reviewing and public distribution. Administered by the Radio-TV Faculty.

BJ in Journalism with Emphasis in Strategic Communication

Degree Program Description

Journalism focuses on the gathering, assessing, creating, and presenting of news and information through various mediums. Students will develop a solid foundation in the liberal arts and sciences while achieving competency in journalism. Within the degree program, students can choose an emphasis in Strategic Communication.
Strategic Communication is the study of principles and practices of all communication designed to create a desired response from a given audience. The curriculum includes focused study and hands-on experience within the interest areas of Account Management, Media Planning, Public Relations, Research, Sports Entertainment and Promotion, and Video Storytelling. Upon graduation, students pursue a career as an advertising manager, marketing manager, public relations specialists, and sports information director.

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

Strategic Communication Interest Areas

Strategic Communication Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This interest area educates students in the principles and practice of all communication designed to create a desired response from a given audience. It includes focused study and hands-on practice within the interest areas of Account Management, Art Direction, Copywriting, Digital Advertising, Media Planning, Public Relations, Research, Sports Entertainment and Promotion, and Video Promotional Content and prepares students for careers in these nine areas. Crossover between these Interest Areas is permissible and encouraged. Administered by the Strategic Communication Faculty.

International Strategic Communication Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

The next generation of strategic communication students must be equipped to work in a global environment. This interest area is designed to capitalize on Missouri’s international reputation and its international resources by placing under one umbrella the school’s existing Study Abroad opportunities, its internationally focused media and multimedia projects with global partners. Students in this area take Strategic Communication courses to complement their international interests. This degree is overseen by the Strategic Communication Faculty but is administered by the school’s Global Programs office.

Total Credits: 121

**Minor in Journalism**

**Journalism Minor Policies and Procedures**

The School of Journalism's minor consists of 15 credit hours of journalism coursework. It is intended for students from other MU academic divisions who wish to broaden their understanding of the news media's role in society. Courses for the minor are similar to MU's broader liberal arts traditions and are not skills-oriented.

**Admissions**

All students are required to apply for the Journalism minor. To apply for a minor in Journalism, students must have completed 60 credit hours with a minimum UM system cumulative GPA of 3.0. An application form is available from the Minor Coordinator in the Journalism Student Services Office, 76 Gannett Hall.

Students pursuing a Journalism major are ineligible for the Journalism minor program.

Transfer students may use up to three credit hours of approved Journalism transfer credit toward a Journalism minor.

**Courses**

JOURN 1000 The News Media: Journalism and Advertising in a Democratic Society is open to any student who is a non-journalism major in good academic standing. Pre-Journalism or Undeclared Journalism students who complete either JOURN 1100 Principles of American Journalism, JOURN 2000 Cross-Cultural Journalism, JOURN 2100 News or JOURN 2150 Fundamentals of Multimedia Journalism with a C- or better and then decide to minor within the School of Journalism must maintain a minimum cumulative GPA of 3.0 to be eligible to take additional 3000 or 4000 level Journalism courses. Students who decide to pursue the minor after completing JOURN 1100 are ineligible to take JOURN 1000. Journalism minors can take a maximum of 15 credit hours from the School of Journalism.

Select any combination from the following classes:

</tbody>
</table>

* Permission number required. Submit request to the Journalism Minor Coordinator.

**Registration**

Students are permitted to self-enroll in JOURN 1000. Other courses are offered on a space-available basis and after the early registration period has ended. Students are required to submit a course preference list to the Journalism Minor Coordinator. If space is available, a permission number to enroll will be provided.

**Academic Status**

Students are subject to probationary or suspension status as determined by the student's major division. Students must earn a minimum grade of C- in Journalism courses. Journalism courses may be repeated one time. Upon repeating a course, if a student fails to earn a C- or better, the student is no longer eligible for the Journalism Minor.

The journalism minor is awarded after the student completes 15 journalism credits and maintains a 3.0 minimum UM system GPA at the time of graduation.

**Fees**

School of Journalism course fees are applied to all Journalism courses.

**Advising**

Journalism minors are not assigned a faculty advisor or academic advisor within the School of Journalism. Academic advising occurs in the division of each student's major. Students pursuing a Journalism minor are encouraged to consult with either the designated Minor Coordinator or with School of Journalism faculty on course-specific matters.

**MA in Journalism**

**Admission Contact Information**

Journalism Graduate Studies
179 Gannett Hall
Columbia, MO 65211
573-882-4852
Email: jourgraduatestudies@missouri.edu

On-Campus Master's Program: http://www.journalism.missouri.edu/graduate/masters/
Online Master's Program: http://journalism.missouri.edu/programs/online/

**About the Master of Arts**

The program leading to the MA degree is designed to accommodate several objectives, including: comprehensive professional preparation for careers in the news media, mass communications and strategic communication; expansion of previous professional preparation and experience (e.g. newspaper editing) into a new area (e.g. broadcasting reporting); comprehensive academic preparation for careers in journalism and strategic communication teaching and research; and combinations of the three.

**Degree Options**

**Program Models**

Students choose from more than 20 program models, covering the full range of skills and media of journalism and strategic communication.
Because the faculty periodically updates these models, students should visit the school’s Web site for the latest details. In addition to the course work in any model, students complete either a thesis or a professional project. Students who make progress on the degree requirements and maintain at least a B average each semester are considered to be in good standing.

**Accelerated Bachelor to Master Program**

The accelerated bachelor to master’s degree program was designed for students in the Missouri School of Journalism to attain a graduate education. The new program will allow students to apply and begin their master’s program in the senior year of undergraduate program. Students in the program complete requirements as outlined for the Bachelor of Journalism degree and then spend one more year (approximately 12 months) to earn a master’s degree. The program requires students to carry 9-12 credits each semester. Course work in the program builds on the undergraduate program and enhances student’s skills and understanding of the chosen area of journalism. At the present time, areas include strategic communication, newspaper design, broadcast management, computer-assisted reporting and magazine areas such as magazine writing and magazine design.

**Joint Journalism and Law Programs**

The School of Journalism and the School of Law have created joint programs (http://journalism.missouri.edu/programs/masters/models-and-programs/journalism-law-programs) that provide an opportunity to earn a MA in Journalism and either a JD or a LLM from Law. Students in the joint programs complete one of the journalism models and the course requirements for the law degree with a block of courses that are used for both degrees.

**Dual-degree option with Masters of Public Health**

The School of Journalism and the School of Health have created a dual-degree option (p. 598) that allows students to earn a journalism degree in reporting or strategic communication with an emphasis in public health. Students complete a block of courses in public health, as well as in journalism, and complete the dual degree with a public health internship and capstone, in which the focus is on journalism or strategic communication.

**Distance Learning**

Professional journalists or others who cannot travel to mid-Missouri to attend the on-campus program might consider doing their program in an online format. Health communication, interactive media, media management and strategic communication models are available through distance learning to applicants who have a minimum of three years professional journalism-related experience. Students in the online program are required to make two short visits, two to three days each, to campus during their program. Learn more about our online master’s programs here http://journalism.missouri.edu/graduate/online/.

**Master’s Admission Criteria**

**On-Campus program deadlines:**
Fall deadline: January 1
Spring deadline: September 1

**Online program deadlines:**
Fall deadline: July 1
Spring deadline: November 15
Summer deadline: April 15

- Accelerated Minimum GPA: 3.5 in last 45 hours

**Financial Aid from the Program**

Limited fellowships, assistantships, scholarships and other financial aid opportunities are available. All applicants for admission are considered for any available funding. No separate application form is needed. Check the program Web site or ask the program contact for details.

**Plan of Study**

Two-year on-campus and online students are required to complete a minimum of 37 hours. Accelerated BJ-MA students complete a minimum of 30 hours. For all graduate students, at least half of the credit hours must be at the 8000-level. Specific course requirements vary depending on the option selected.
Professional Project or Thesis

Students must enroll in either the Project Seminar or the Thesis Seminar in the semester prior to embarking on their professional project or thesis. These seminar courses guide students in developing proposals for their professional project or thesis. After proposal approval, students enroll in JOURN 8190, Area Problem (for projects) or JOURN 8090, Research (for thesis). Students earn nine credit hours for either the professional project or thesis research.

Students in any model may choose to complete the professional project or thesis off campus. The school operates programs in Washington D.C., New York City, Brussels, and Barcelona which is supervised by a full-time faculty member. In the Missouri state capital the school has a program focusing on public affairs reporting in any medium. Other off-campus opportunities can be arranged.

Length of Study

The degree must be earned within eight years of beginning the program.

MA in Journalism with Emphasis in Health Communication

Degree Requirements

The Health Communication emphasis area is only available in the online MA program. This area, which includes a minimum of 37 credits to graduate, includes both required and elective courses. The electives may be courses from within the same area, from another area or transferred graduate hours from another accredited institution. For students with special needs, an individualized curriculum may be designed with the student’s advisor, subject to approval of the associate dean for graduate studies.

Core Requirements

The program core is completed by all students:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>JOURN 8000</td>
<td>3</td>
</tr>
<tr>
<td>JOURN 8006</td>
<td>3</td>
</tr>
<tr>
<td>or JOURN 8008</td>
<td>3</td>
</tr>
<tr>
<td>JOURN 8070</td>
<td>1-3</td>
</tr>
<tr>
<td>JOURN 8080</td>
<td>3</td>
</tr>
</tbody>
</table>

Emphasis Area Electives

Students may select 15-17 hours of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>JOURN 7000</td>
<td>3</td>
</tr>
<tr>
<td>JOURN 7256</td>
<td>3</td>
</tr>
<tr>
<td>JOURN 7268</td>
<td>3</td>
</tr>
<tr>
<td>JOURN 7416</td>
<td>3</td>
</tr>
<tr>
<td>JOURN 8020</td>
<td>3</td>
</tr>
<tr>

<td>3</td>
</tr>
<tr>
<td>JOURN 8056</td>
<td>3</td>
</tr>
<tr>
<td>JOURN 8058</td>
<td>3</td>
</tr>
</tbody>
</table>

Thesis/Non-thesis Requirements

Students may choose from two options: thesis or professional project. The thesis is an independent research study and is appropriate for students who may intend to pursue a doctorate. The professional project is appropriate for students who wish to work as professionals in the journalism industry.

To prepare for the capstone semester students will enroll in either JOURN 8100 MA Thesis Seminar, or JOURN 8098 MA Project Seminar, in the semester prior to their capstone. During the seminar students will form their faculty committee and develop and gain approval for their thesis or project proposal. Successful completion of the seminar is one of the prerequisites to beginning the capstone semester.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Journalism program (https://gradstudies.missouri.edu/degreecategory/journalism) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MA in Journalism with Emphasis in Interactive Media

Degree Requirements

The Interactive Media emphasis area is only available in the online MA program. This area, which includes a minimum of 37 credits to graduate, includes both required and elective courses. The electives may be courses from within the same area, from another area or transferred graduate hours from another accredited institution. For students with special needs, an individualized curriculum may be designed with the student’s advisor, subject to approval of the associated dean for graduate studies.

http://www.journalism.missouri.edu/graduate/doctoral/

About the Doctorate

The objective of the doctoral program is to develop an ability to conduct independent and advanced scholarly research and to integrate this skill with a depth of scholarship in journalism and mass communication. Although it is primarily a research degree, the PhD is designed to facilitate a variety of academic aims. Students must expand their intellectual horizons, gain a theoretical framework for examining and understanding communication and refine their own communication competencies.

Doctoral Admission Criteria

Fall deadline: January 15

- Minimum Academic IELTS scores:
  - Item | Score
  - Listening
  - Reading
  - Writing
  - Speaking: 7.0
  - OVERALL Score: 7.0

- Minimum TOEFL scores:
  - Internet-based test (iBT) | Paper-based test (PBT)
  - Speaking: 25 | 25
  - 100 | 600

- Typical successful applicant GRE scores:
  - When did you take the GRE? | Verbal + Quantitative
  - Prior to August 1, 2011 | 1100
  - On or After August 1, 2011 | V: 156+; Q: 146+

- Minimum GPA: 3.0, undergraduate, 3.5, graduate

Applicants should have demonstrated interest, education or professional experience in journalism, advertising, public relations, mass communication or a related field. A degree (bachelor's or master's) in one of those fields or two years of full-time professional media experience is preferred. All required information must be received before the admission review can begin. Applicants may be required to participate in an interview with the doctoral faculty as part of the review process. Students who did not write a thesis in their master's program may be required to complete a project to demonstrate their ability to do independent research.

Deadlines for application are January 15 for fall entry. Deadlines are firm, and no applicant is considered for admission until all required information is received.

Required Application Materials

Upload the following application materials into the Graduate School's online application system:

- All required Graduate School documents
- Statement of Doctoral Objectives
- Résumé
- An abstract of your master's thesis (or thesis proposal, if your thesis is not yet complete)
- Unofficial transcripts
- 3 letters of recommendation (use the online Graduate School application system)

Financial Aid from the Program

Doctoral students are provided assistantship and scholarship support for a maximum of six terms (three years). Contact the department for details on this financial assistance.

Plan of Study

Doctoral study in journalism and mass communication is an interdisciplinary enterprise. The doctoral program is designed by the student in collaboration with the advisor and doctoral committee. Course selections are based on the intellectual requirements of the dissertation.
and the teaching areas the student wishes to pursue. No courses that focus primarily on professional skills may be counted toward the doctoral program, whether taken at the master’s or the doctoral level. Courses from journalism should compose no more than two-thirds of the total credit.

Students must develop two research tools, pass qualifying and comprehensive examinations, submit and defend a dissertation, and satisfactorily meet all other requirements of the Graduate School. Doctoral Theory and Research I (JOURN 9000), and Professional Development (JOURN 9087) are required of all PhD students.

Qualifying Examination

Students are admitted to the PhD program in journalism when they have passed Doctoral Research Portfolio (qualifying examination), which must be taken in the semester in which the student completes 18 hours. Graduate School regulations about comprehensive examinations, dissertations, plans of study, residency and other matters are specified in the Degree Requirements section of the catalog.

Research Method Requirements

Students are expected to take a minimum of four research methods courses during the course of their doctoral coursework. These courses include three research methods courses from within journalism with at least one being an advanced research methods course. Students are also required to take at least one research methods course from a department other than journalism. At the discretion of the student’s doctoral committee and the associate dean for graduate studies, students may substitute a course from outside the institution if it is deemed equivalent to a required research methods course offered within the school of journalism.

Teaching

Doctoral students who plan to teach will participate in a teaching program. Each student’s teaching skills will be evaluated in the first year of study, at which point planning for the student’s future teaching opportunities begins. Most students will serve as teaching assistants in such classes as JOURN 1100 or JOURN 2100 during their third semester in the program.

In the student’s fourth semester, he/she may have an additional teaching experience, either as a teaching assistant, co-instructor or instructor of record in a course. Depending on the student’s ability and desire, students might teach a course independently during later semesters.

Additional Minors and Certificates

- Journalism

Graduate Certificate in Interactive Media

The Graduate Certificate in Interactive Media prepares early to mid-career professionals in the journalism and strategic communication fields to work in the rapidly changing newsrooms, media organizations, corporate communications offices and non-profit organizations. The certificate prepares students in the use of interactive, digital and social media. It provides insights into how people perceive and process digital messages. Students will investigate the psychological, social, ethical and legal issues regarding the roles and effects of digital news, advertising and public relations on society.

Objectives of certificate:

- Understanding the rapidly changing technology and role of analytics in journalism and strategic communication
- An understanding of the importance of audience engagement and development
- The skills to create an interactive media plan in their given organizations

The certificate consists of 15 hours divided over three core courses and two electives.

Graduate Minor in Law and Conflict Resolution for Journalism Doctoral Students

This program is designed for doctoral students who are interested in teaching and researching in journalism and law and conflict resolution in a school of journalism or communication department. Under the program, students may receive the Minor upon completion of at least 15 credits at the Law School, including both core courses and at least 9 credits of electives. The Minor will appear on the student’s transcript.

Required Core Courses

- Certificate in Interactive Media (p. 690)

Graduate Minor in Law and Conflict Resolution for Journalism Doctoral Students (p. 690)
Students may take any available course at the Law School in satisfying this requirement. Actual course offerings and availability vary by semester, and enrollment is subject to professor approval. The following courses are ones that are expected to be generally available. They are grouped by tracks to help students more quickly identify areas of specific interest, and to develop deeper concentrations in desired areas. However, students may take any of the courses in meeting the elective requirement for the Minor. Students should consult with a member of the School of Law faculty or administration about which Law School courses or sequences may be most appropriate to the student's curricular needs.

Student Advising Office
S235 Nursing School Bldg.
(573) 882-0277

The nursing program at MU began in 1901 with the establishment of Parker Memorial Hospital Training School. Today, the Sinclair School of Nursing is committed to promoting, maintaining and improving health and health-care delivery in Missouri and worldwide through nursing education, research and service. Nursing faculty combine research and education to offer students hands-on experience in the art and science of nursing.

The MU Sinclair School of Nursing's BSN programs have the full approval of the Missouri State Board of Nursing (http://pr.mo.gov/nursing.asp). The Baccalaureate, Masters, and Doctor of Nursing Programs at the University of Missouri is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Admissions

Traditional BSN Option
The freshman and sophomore years are designated as the "pre-nursing" years. The junior and senior year are designated as the "clinical nursing major" years. Pre-nursing students apply for admission to the clinical major during the last semester of general education and prerequisite coursework. Students are admitted to the clinical nursing major on a competitive and space-available basis when prerequisite courses have been completed. Any student who is a Nursing Scholar is guaranteed admission into the clinical nursing major. Please see the Nursing and/or Honor's College websites for eligibility information and application details.

Each student's application is reviewed systematically and considered holistically for each admission period. The School values MU's Commitment to Diversity and the call of the American Nurses Association that the nursing workforce should reflect the diversity of the population. The School is also committed to rural health care and to educating nurses for practice in rural Missouri.

Clinical application and admission criteria include:
• Successful completion of all general education and prerequisite coursework prior to beginning clinical coursework;
• Satisfactory grades from biology, chemistry, and two of the three advanced lab sciences (microbiology, anatomy, physiology) to be eligible to apply for the clinical nursing major;
• Minimum cumulative grade-point average of 3.25 (on a 4.0 scale) for all college/university courses;
• Competitive grade-point average in nursing prerequisite courses;
• Minimum GPA of 3.0 for any nursing prerequisite courses;
• Evidence of capacity to uphold the practice standards and ethical codes of the nursing profession; and
• Evidence of motivation toward a nursing career

RN to BSN Option
The RN to BSN online option is for registered nurses who have earned a diploma or associate degree in nursing with a cumulative GPA of a 2.8 of higher and seek a bachelor’s degree in nursing. RN to BSN courses are offered online.

RN to BSN registered nurse applicants must meet the same admission standards described above for the Traditional BSN Option. They must be currently licensed to practice nursing (or eligible for licensure) in Missouri or another state. Completion of the program includes 120 credit hours. The length of the program varies, depending on equivalent prerequisite courses completed and choice of part-time or full-time enrollment.

RN-MS(N) Nurse Educator Option
The RN to MS(N) Nurse Educator Option allows Associate Degree in Nursing or Diploma graduates to complete the RN to Baccalaureate of Science in Nursing (BSN) degree in addition to the Masters of Science (Nurse Educator) degree in an accelerated format.

Admission Requirements: RN-MS(N) - nurse educator
1. A degree from a regionally accredited associate degree or diploma nursing program.
2. A minimum GPA of 3.0 (4.0 grading scale) for the last 60 credit hours of college coursework.
3. Current licensure as a registered nurse.
4. Successful completion of all general education requirements must be completed prior to conferral of BSN degree, with the exception of ESC_PS 4170 Introduction to Applied Statistics, which must be completed prior to taking NURSE 4950 Nursing Theory and Research.
5. A personal interview upon request.
6. International applicants must meet additional requirements as identified on the Sinclair School of Nursing web site under “Apply Today” in Master of Science – Nursing MS(N).

BSN Accelerated Option
The BSN Accelerated Option is a 15 month program designed for individuals who hold a non-nursing degree at the baccalaureate level or higher.

Students are admitted to the Accelerated BSN Option based on the following criteria:
• A baccalaureate or higher degree from an accredited college or university.
• Two letters of reference from individuals that can attest to the student’s motivation and ability to complete a course of intensive study.
• Statement of career goals.
• Description of the applicant’s view of nursing as a profession.
• A personal interview.
• Evidence of academic achievement of a 3.0 cumulative GPA or higher on a 4.0 scale on undergraduate degree.
• Completion of prerequisite courses with a minimum of a C or better.
• Evidence of potential and motivation for nursing.
• Evidence of prior work success and/or ability to handle a fast-paced academic program.

A Bachelor of Science (BSN) degree is awarded at graduation, and the graduate may be eligible to take the licensing examination to become a registered nurse (RN).

Transfer Students
Students transferring to MU from another accredited institution of higher education or other schools and colleges within the University are subject to the regulations established by the MU Faculty Council concerning transfer of credit.

For more information regarding the transfer guidelines for the School of Nursing, call (573) 882-0277. Prior to admission, transfer students must have the following:
• Appropriate GPA for credit hours attempted, 3.25 cumulative GPA or higher
• Approval from the associate dean’s office

Transfer students must apply for admission through the MU Admissions Office.

International Students
In addition to the admission criteria described above, international students must meet the following criteria:
• Test of Written English (TWE) score of 4 or higher
• Test of Spoken English (TSE) score of 50 or higher
• TOEFL score of 600 (paper-based) or 250 (computer-based) or 100 (internet-based)
• English Language Support Program Test taken with success

Advising
The academic advisor’s office is in room S235 of the School of Nursing Building, (573) 882-0277. In addition, each clinical nursing major is assigned a faculty advisor who is available for consultation about academic or professional matters.

Health Care
Nursing students participate in a variety of on- and off-campus educational experiences. The School of Nursing does not assume responsibility for health-care expenses incurred in either setting. Students assume responsibility for all health care for illness and injury, including emergency treatment. Student Health is located at University Physicians Medical Building, 1101 Hospital Drive, (573) 882-7481. For additional information, visit their web site at http://studenthealth.missouri.edu/.

Graduate
Nursing Graduate Programs
Sinclair School of Nursing
S235 Sinclair School of Nursing Building
573-882-0277
http://nursing.missouri.edu/

Masters of Science (Nursing) and Masters of Science
The Master of Science degree programs prepares nurses with post baccalaureate or post graduate degrees for roles as nurse educators, nurse leaders, and care managers. Graduates of the Masters of Science program proceed to prepare future nurses, promote health, provide care management, and nursing leadership to meet the healthcare needs of its citizens of Missouri and beyond.

Doctor of Philosophy (PhD)
Doctor of Nursing Practice
The DNP program prepares nurses to develop clinical programs based on the latest evidence. The student will choose an area of study (Adult CNS, FNP, PNP, or FMHNP) on which to focus their clinical practice. Successful completion of the program prepares nurses for an advanced clinical practice in primary care, hospital and community settings as well as leadership roles in practice settings and clinical faculty positions.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School.

All graduate programs are distance mediated, providing online coursework with minimal, short, intensive campus experiences at specific times during the program to augment learning opportunities and allow for individualized faculty evaluation of educational competencies. The PhD program also offers a residential on-campus option for International Students only.

Care Management
The Master’s of Science in Care Management program is an interdisciplinary degree with an overarching goal to educate health care professionals to improve health outcomes, enhance care quality, and reduce health care costs. Graduates will provide care coordination to diverse people across the life span using care management principles and approaches that include facilitating delivery of health care to individuals/family, engagement of individuals/family in care plan design, and implementation resulting in high quality, high value, cost effective care using a collaborative, interdisciplinary approach.

Qualified applicants may have a bachelor’s degree from any health care discipline. Enrollees will be required to successfully complete 33 graduate credits, which will include 240 hours of clinical practice, and a master’s exam. The sequencing of courses builds on the students’ unique perspectives and foundational knowledge of theory applications of care coordination, research principles, an understanding of basic physiology and pharmacology, and care management principles and skills. The clinical practica will allow students to apply these principles and skills in order to determine how care management practices are used within health care settings. Students will learn how to use the principles of quality improvement to evaluate the impact of care management on vulnerable populations of people, including those with multiple chronic conditions

This program supports preparation for national certification as a care manager through the American Nurses Credentialing Center, American Case Management Association, and the Commission for Case Manager Certification.

The Care Management Program will begin enrollment Fall 2019.
Faculty

Assistant Professor J. Chase*, L. Despins, U. Jefferson**, K. Lane**, L. Sherwin*
Teaching Professor J. Sherman*
Associate Teaching Professor G. Oliver*, S. Ulbrich*
Assistant Teaching Professor V. Bader*, S. Birk*, N. Birtley*, M. Butler*, P. Evans-Smith, R. Harris*, S. Thomas*, L. Wood
Adjunct Associate Professor R. McDaniel*,
Adjunct Assistant Professor M. Beck*, C. Crumley*, S. Revelle*, T. Rood*
Adjunct Teaching Professor J. Bostick*
Adjunct Instructor B. Hanson, C. Yonkman
Association Research Professor B. Wakefield**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in care management, the University does offer baccalaureate opportunities in nursing (p. 695) and a number of related areas, both within the School of Nursing, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• MS in Care Management (p. 694)

MS in Care Management

Degree Requirements

A minimum of 33 hours beyond the bachelor's degree is required. Students must take a minimum of 15 hours of 8000-9000 level course work. No more than forty percent of the total required credit hours may be problems, readings and research hours. For example, in a 38-hour master's degree program, 15 hours may be from problems, readings and research hours.

To satisfy requirements for the MS, a student must:

• Complete an approved plan of study with a cumulative GPA of 3.0
• Successfully complete the Master's Exam
• Complete the program within a five-year period

Because the program is distance-mediated, students are required to obtain the required computer technology for successful participation in distance-mediated courses (see Mizzou Online Computer Requirements [http://online.missouri.edu/prepare/computer.aspx]).

Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing Master's webpage [http://nursing.missouri.edu/academic-programs/msn/areas-of-study].

Thesis/Non-Thesis Requirements

Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of the work included in the course of study offered for the degree. This requirement may be fulfilled by completion of the Master's Exam (MS exam).

In the School of Nursing, the Master's Examination (MS exam) consists of a paper that should reflect the graduate student's grasp and synthesis of the clinical and theoretical knowledge gained in the course of study. The MS exam is offered on a pass/fail basis. Students are required to discuss the focus of their MS exam early in their master's program with their faculty advisor. The Critical Review of the Literature master's exam is now the only option available. Details about the Master's examination can be found on the School of Nursing Master's Student Handbook [http://nursing.missouri.edu/handbooks].

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Care Management program [http://nursing.missouri.edu/academic-programs/msn/apply] and the minimum requirements of the Office of Graduate Studies [http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php]. Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

* Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in various states/. You may find more information at this link: [http://online.missouri.edu/about/stateauthorization.aspx].

Deadline for Fall entrance: April 1

Nursing

The traditional BSN option is designed for undergraduate students who plan to complete the degree in four years after graduating high school. As freshman and sophomores, nursing students are considered pre-nursing. Students typically are admitted to the clinical major during their junior and senior years. Other BSN options include the accelerated option [http://nursing.missouri.edu/academic-programs/accelerated-bsn] for students with a college degree and RN to BSN or RN-MS(N) option [http://nursing.missouri.edu/academic-programs/rn-to-bsn] for nurses with an associate's degree.
The Master of Science degree programs prepares nurses with post baccalaureate or post graduate degrees for roles as nurse educators, nurse leaders, and care managers. Graduates of the Masters of Science program proceed to prepare future nurses, promote health, provide care management, and nursing leadership.

The Doctor of Nursing Practice Degree (or practice doctorate) prepares post baccalaureate and post graduate students in a specific advanced nursing roles (clinical nurse specialist, family nurse practitioner, and leadership) at the highest level of nursing practice.

Our doctor of philosophy in nursing (PhD) program prepares clinical scholars, educators, and researchers for leadership roles in a variety of academic, industry, and healthcare settings. Because the knowledge and skills needed to produce excellent health-related research is not discipline specific, the PhD program does not require a prior degree in nursing. Indeed, we have had PhD students with academic preparation in health administration, health education, medical ethics, nursing, occupational therapy, physical therapy, public health and social work.

Undergraduate

- BSN in Nursing (p. 697)

Academic Regulations

Credit by Examination

RN to BSN may earn advanced-standing credit in some courses by satisfactorily completing examinations. Those who elect not to take the examinations or who fail to achieve satisfactory results are required to enroll in the courses. The cumulative grade point average is not affected by examination results. A student who has a record of enrollment in a support course with a grade lower than C is not eligible later for credit on the basis of an examination covering the same subject.

The student may acquire advanced standing by taking subject CLEP examinations in university general education courses and required support courses. If no CLEP examination is offered, department examinations may be available. More information on CLEP examinations is available through MU Testing Services.

Distance Education Courses

Certain courses offered by the Mizzou Online (self-paced) may be applied toward degree requirements. Courses such as literature, advanced psychology or sociology may be taken through independent study. Students should not expect to begin nor continue work on independent study courses during the regular semester except by special permission of the associate dean and then only when carrying less than a full course load in residence.

Progression Criteria

Pre-nursing Years

- Satisfactory academic standing requires a minimum semester GPA of 2.0 and a cumulative GPA at or above the standards listed below:

<table>
<thead>
<tr>
<th>Class</th>
<th>Semester</th>
<th>Credits</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>1st semester</td>
<td>1-15 credits</td>
<td>3.0</td>
</tr>
<tr>
<td>Freshman</td>
<td>2nd semester</td>
<td>16-30 credits</td>
<td>3.25</td>
</tr>
<tr>
<td>Sophomore</td>
<td>3rd semester</td>
<td>31-45 credits</td>
<td>3.25</td>
</tr>
<tr>
<td>Sophomore</td>
<td>4th semester</td>
<td>46-60 credits</td>
<td>3.25</td>
</tr>
</tbody>
</table>

- Pre-nursing students with more than 60 credit hours must also have a minimum cumulative GPA of 3.0 or higher.

- A grade of C or better is required for anatomy, biology, chemistry, ENGLSH 1000, human development, microbiology, nutrition, physiology, nursing courses and Writing Intensive courses. A grade of “C-” or better is required in algebra or statistics. A grade of “F” is unacceptable for any course.

- Students may repeat a course in which an unsatisfactory grade was earned. If less than a C is earned on repetition of a course, students are ineligible to continue enrollment in the School of Nursing.

- Students who are in the traditional BSN option and withdraw in good standing for any reason must contact the Associate Dean for readmission.

Clinical Nursing Years

- Progression into the next semester’s nursing courses is contingent on the completion, with a grade of C or better, of all of the previous semester’s courses.

- A satisfactory academic standing for clinical students is a minimum semester GPA and cumulative GPA of 2.0.

- A grade of C or better is required for all nursing courses. One repetition of a course is permitted, but requires approval of SAP committee. Students who earn less than a C on repetition of a nursing course are ineligible to continue enrollment in the School of Nursing.

- Students in the clinical nursing phase who withdraw in good standing for any reason must contact the Associate Dean for readmission.
Probation and Academic Dismissal

The faculty of the School of Nursing has established criteria governing nursing probation and dismissal.

Pre-nursing Years

- Students who do not meet the requirements set forth in the progression criteria are placed on academic probation. They must attain the cumulative grade point average required for their classification, as outlined previously, within two semesters or they are ineligible to re-enroll in the School of Nursing, and must transfer divisions.
- A student whose semester GPA falls below 1.0 is ineligible to re-enroll at MU for the period of one year.

Clinical Nursing Years

- A student who does not meet the requirements set forth in progression criteria is placed on academic probation.
- A student on academic probation must obtain a cumulative GPA of 2.0 within two semesters or is ineligible to re-enroll in the School of Nursing.
- Students who have been dismissed may reapply through the established admissions procedure for all students and petition the Faculty Assembly Student Admissions and Progression Committee. Students who are readmitted are guided by the rules in operation for the class they join.
- A student in the clinical nursing phase who has been dismissed from the School of Nursing for a second time may not reapply for admission.

Additional Requirements

Students in the clinical phase of the degree requirements must be prepared to provide their own transportation to clinical agencies. In addition, they must meet the following requirements:

- Valid CPR certificate
- yearly TB tests
- Hepatitis B series
- School of Nursing medical form showing current immunizations
- Negative drug screen
- Criminal background check

Practicums

Clinical practicums (patient/client care) are an integral part of the curriculum. Students have the opportunity to practice in a variety of health care and related agencies, including:

- University of Missouri Health Care
- Boone Hospital Center
- Truman Veterans Hospital
- Fulton State Hospital
- Mid-Missouri Mental health Center
- Multiple county and city health departments
- Long-term care facilities
- Day-care centers
- Schools (K-12)

Licensure by the Missouri State Board of Nursing

On receipt of the Bachelor of Science in Nursing degree, students may be eligible to take the NCLEX examination for licensure as registered nurses. The Missouri State Board of Nursing grants a license to practice to persons who meet the policies and regulations contained within the Nursing Practice Act, Chapter 335.011 to 335.096.

Graduate

  - with emphasis in Nurse Educator (p. 699)
- PhD in Nursing (p. 700)
- DNP in Nursing (p. 701)
  - with emphasis in Adult-Gerontology Clinical Nurse Specialist (p. 703)
  - with emphasis in Family Nurse Practitioner (p. 704)
  - with emphasis in Family Psychiatric and Mental Health Nurse Practitioner (p. 704)
  - with emphasis in Nurse Leadership and Innovations in Health Care (p. 705)
  - with emphasis in Pediatric Clinical Nurse Specialist (p. 706)
  - with emphasis in Pediatric Nurse Practitioner (p. 706)

About the Sinclair School of Nursing

Sinclair School of Nursing
S235 Sinclair School of Nursing Building
573-882-0277
http://nursing.missouri.edu/

Nursing was an integral part of the Parker Memorial Hospital Training School, which served as the university’s first hospital in 1901. Although a nursing program was not officially established until 1920 within the School of Medicine, MU graduated its first nursing class in 1904. Sixteen years later, the Curators approved a Graduate Nursing designation. Today, the Sinclair School of Nursing provides a rich and rewarding learning environment for our students. Our faculty includes knowledgeable and skillful teachers, respected scholars and researchers in the nursing profession, and experienced, caring practitioners. The master’s and Doctor of Nursing Practice (DNP) program is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Facilities and Resources

Graduate students in the School of Nursing have access to all campus libraries and the various services they provide. The School of Nursing building is adjacent to University Hospital and Clinics, MU Psychiatric Center and Ellis Fischel Cancer Center. Women and Children’s Hospital is located nearby. A variety of learning experiences also are available at other hospital and health and social service agencies in and around Columbia.

Career Opportunities

Nursing is a professional career for those who would like to combine the following words in any number of ways: Servant leadership, challenge, advanced nursing skills, caring, science, and meaningful work. Graduates
of our program work in a variety of settings - from hospital inpatient units and hospital based clinics, to community health centers, private practices, and schools, to areas of research and teaching.

Funding

Financial assistance is available as scholarships, fellowships, assistantships and traineeships.

BSN in Nursing

Degree Program Description

The Bachelor of Science in Nursing (BSN) curriculum encompasses general, foundational and professional studies within a liberal-education perspective. The curriculum is driven by the belief that nursing theory has much to offer in the education of professional nurses and in improving the health and well-being of patient populations. Nursing knowledge is developmental in nature; each course is designed to build on knowledge and skills acquired in previous nursing and non-nursing courses. The BSN program is a four-year degree option. Freshman and sophomores are considered pre-nursing majors and are required to complete approximately 60 semester hours of general-education and prerequisite coursework. Students admitted to the clinical major must earn 60 additional credit hours to complete the degree. The school offers a diverse range of research projects that provide care to healthy and ill people of all ages. The Essig Clinical Simulation Learning Center in the school is where students practice technical skills and learn to manipulate various equipment in this simulated clinical setting.

Major Program Requirements

The completion of all requirements for graduation is the responsibility of the student. The Bachelor of Science in Nursing (BSN) is granted to candidates who have satisfactorily completed all of the following requirements:

- Completion of all foundational and clinical nursing courses
- Minimum cumulative GPA of 2.0
- No more than 30 credits through independent study or extension courses
- Minimum of 120 credit hours
- Completion of all University graduation requirements (p. 33), including University general education requirements (p. 34)

Nursing Pre-Requisites

- MICROB 2800 Microbiology for Nursing and Health Professions
- or MICROB 3200 Medical Microbiology and Immunology

* Denotes University General Education Requirements
^ Denotes Degree Program Requirements
** If taking a Foreign Language for humanities credit, you will complete the sequence of foreign language courses that could total 13 hours.

**NOTE:** Curriculum subject to change.

### Degree Requirements

A minimum of 30 hours beyond the bachelor's degree is required. Students must take a minimum of 15 hours of 8000-9000 level course work. No more than forty percent of the total required credit hours may be problems, readings and research hours. For example, in a 38-hour master's degree program, 15 hours may be from problems, readings and research hours.

To satisfy requirements for the MS, a student must:

- Complete an approved plan of study with a cumulative GPA of 3.0
- Successfully complete the Master's Exam
- Complete the program within a five-year period

Because the program is distance-mediated, students are required to obtain the required computer technology for successful participation in distance-mediated courses (see Mizzou Online Computer Requirements [http://online.missouri.edu/prepare/computer.aspx]).

### Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing Master's webpage [http://nursing.missouri.edu/academic-programs/msn/areas-of-study].

### Thesis/Non-Thesis Requirements

Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of the work included in the course of study offered for the degree. This requirement may be fulfilled by completion of the Master's Exam (MS exam).

In the School of Nursing, the Master's Examination (MS exam) consists of a paper that should reflect the graduate student's grasp and synthesis of the clinical and theoretical knowledge gained in the course of study. The MS exam is offered on a pass/fail basis. Students are required to discuss the focus of their MS exam early in their master's program with their faculty advisor. The Critical Review of the Literature master's exam is now the only option available. Details about the Master's examination can be found on the School of Nursing Master's Student Handbook [http://nursing.missouri.edu/handbooks].

### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program [http://nursing.missouri.edu/academic-programs/msn/apply] and the minimum requirements of the Office of Graduate Studies [http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php]. Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

* Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in various states/. You may find more information at this link: [http://online.missouri.edu/about/stateauthorization.aspx].

Deadline for Summer entrance: April 1

MS in Nursing with Emphasis in Leadership in Nursing and Health Care Systems

Degree Requirements
All students pursuing the MS(N) degree must complete a minimum of 33 to 41 credit hours of graduate coursework. Credit hours vary depending upon the student’s area of study. Previous graduate level coursework from another institution may be accepted toward the degree depending upon transcript review. Students must maintain a minimum cumulative Grade Point Average (GPA) of 3.0 in order to graduate.

Area of Study Information
For more information about the Leadership in Nursing and Health Care Systems emphasis, please see our website (http://nursing.missouri.edu).

Sample Plan of Study
This plan of study is for the post-baccalaureate, three-year plan. For more plans of study visit our website (http://nursing.missouri.edu).

Total Credits: 33

Thesis/Non-Thesis Requirements
In additional to the Course Requirements, all Masters Students are required to complete either a Thesis or Masters Examination. The Master's Thesis (N8090) requires independent research aimed at discovery and/or development of elements or relationships derived from a nursing theory. The Master’s Examination (MS exam) consists of a paper that should reflect the graduate student’s grasp and synthesis of the clinical and theoretical knowledge gained in the course of study.

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (https://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MS in Nursing with Emphasis in Nurse Educator

Degree Requirements
All students pursuing the MS(N) degree must complete a minimum of 33 to 41 credit hours of graduate coursework. Credit hours vary depending upon the student’s area of study. Previous graduate level coursework from another institution may be accepted toward the degree depending upon transcript review. Students must maintain a minimum cumulative Grade Point Average (GPA) of 3.0 in order to graduate.

Area of Study Information
For more information about the emphasis in Nursing Education please visit our website (http://nursing.missouri.edu).

Total Credits: 41

Total Clinical Hours: 420
Thesis/Non-Thesis Requirements

In addition to the Course Requirements, all Masters Students are required to complete either a Thesis or Masters Examination. The Master’s Thesis (N8090) requires independent research aimed at discovery and/or development of elements or relationships derived from a nursing theory. The Master’s Examination (MS exam) consists of a paper that should reflect the graduate student’s grasp and synthesis of the clinical and theoretical knowledge gained in the course of study.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (https://gradstudies.missouri.edu/gradcategory/nursing) and the minimum requirements of the Graduate School (https://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

PhD in Nursing

About the PhD Program

The doctor of philosophy in nursing (PhD) program prepares clinical scholars, educators, and researchers for leadership roles in a variety of academic, industry, and healthcare settings. Because the knowledge and skills needed to produce excellent health-related research is not discipline specific, the PhD program does not require a prior degree in nursing. Indeed, we have had PhD students with academic preparation in health administration, health education, medical ethics, nursing, occupational therapy, physical therapy, public health and social work.

The MU Sinclair School of Nursing (MUSSON) offers a challenging and yet enriching PhD program with two options. The PhD curriculum, program requirements, and program outcomes are the same whether you choose the Online PhD option or the International Residential Nursing PhD option. Only the method of course delivery varies. Additional details can be found on the Sinclair School of Nursing PhD Program Options webpage (http://nursing.missouri.edu/academic-programs/phd/program-options).

- Online PhD Program Option: PhD coursework may be accessed online through the Online PhD program option by learning over the World Wide Web using the Canvas learning management system. This option also requires a 5 Day On Campus visit (held the first week of the summer semester on the Columbia campus) the first summer of enrollment and 4 Day On Campus Intensives every April until coursework is completed (see PhD On Campus Dates (http://nursing.missouri.edu/academic-programs/phd/on-campus-dates)). Because the program is online, students are responsible for obtaining the required technology for successful participation in synchronous online courses (see Technology Requirements (http://nursing.missouri.edu/for-students/technology-requirements)). Additionally, students are responsible for all the costs associated with travel and housing for the On Campus Intensives;

- International Residential PhD Option: Through the International Residential PhD option, international students attend the MU campus hybrid classes in Columbia, Missouri. The International Residential PhD student attends the hybrid classes in person, while the Online student cohort participates virtually via videoconferencing software. International Residential PhD students may also enroll in traditional residential course offerings through the MU Sinclair School of Nursing and the rest of the MU campus. Students in the International Residential PhD option must enroll in 4 credits during their first summer and maintain full-time status by enrolling in 9 credits each fall and spring term thereafter. Of the 9 credits each term, at least 6 credits must be either traditional face-to-face or hybrid coursework in order to qualify for and retain the F-1 or J-1 student visa status. The remaining 3 credits each term may be taken 100% on-line.

Degree Requirements

MU requires a minimum of 72 credit hours, including 15 hours of 8000-9000 level coursework exclusive of readings, research, problems and independent study experiences, beyond the bachelor’s degree for the PhD. The student’s doctoral committee may recommend that up to 30 hours of post-baccalaureate graduate credit from a regionally accredited university be transferred toward the total hours required for the doctoral degree. With program approval, up to 6 hours of coursework for which professional credit was received may be counted toward the 72 credit-hour requirement. It is the responsibility of the doctoral committee to determine whether it is appropriate to transfer credit; however, the Office of Graduate Studies must make the final review of the transfer request to determine if the credit meets the minimum guidelines. Ultimately, the student’s doctoral committee, in collaboration with the student, determines the student’s plan of study and total credit hours necessary to adequately prepare the student to successfully complete their dissertation research. Typical post-baccalaureate student takes ~77 credits. Typical post-master’s student takes ~59. Typical post-clinical doctorate student takes ~48 credits. The PhD curriculum is divided into two categories:

- Foundational Core - Minimum of 26-38 credit hours (theory analysis and development, statistics and measurement, qualitative and quantitative methods courses)
- Individualized Specialty Area - Minimum of 27-39 credit hours of of research focus seminars, interdisciplinary collaborative coursework (coursework taken outside the School of Nursing that helps to support the dissertation research topic), faculty mentored research practicum experiences, specialty area applied sciences including education or leadership courses, and dissertation research.

The PhD program at the MU SSON can be completed in three to five years of full time study, depending on whether the student entered as a post-baccalaureate or a post-graduate degree student. International Residential PhD students are required to be enrolled in full-time study. Part-time study also is available for students in the Online option.

Once the plan of study is completed, you prepare for your doctoral comprehensive examination, develop your research proposal, and begin your dissertation research project. The doctoral dissertation and its defense are the program’s culmination and demonstrate your ability to identify and pursue research that meets the highest of professional standards.

Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing PhD Curriculum webpage (http://nursing.missouri.edu/academic-programs/phd/curriculum).
Qualifying Process

To be officially admitted to the PhD program, the student must pass a qualifying examination or process. Students admitted with a graduate degree have completed the qualifying process.

Students admitted with a bachelor’s degree are admitted to the PhD program on a provisional basis. Following successful completion of a qualifying process, bachelor’s prepared students will be granted admission to the PhD program. To fully qualify for the PhD program, BS-PhD students must earn at least a grade of B in the following:

- NURSE 7087 Leadership and Technology Institute
- NURSE 7101 Biostatistical Foundations for Health Researchers
- NURSE 7100 Theoretical Basis for Advanced Nursing
- NURSE 7150 Research Basis for Advanced Nursing
- Nine credits in nursing applied sciences

The student initiates the qualifying process by enrolling in three credits of NURSE 8900 Research Practicum in Nursing with a member of their BS-PhD program committee. The student is officially admitted to the PhD program following approval of the written report and oral presentation for NURSE 8900 by the BS-PhD Program Committee.

Comprehensive Examination Process

Through the PhD Comprehensive Examination process, the student demonstrates his/her ability to address the theoretical, methodological and substantive issues of his/her field of study. The examination tests the breadth and depth of knowledge and the ability to integrate ideas across research focus areas. The student must be enrolled to take this examination and it may be administered only when MU is officially in session. The student is not allowed to sit for the PhD comprehensive examination until the last semester of course work or when course work is substantially completed, all incomplete grades are satisfied, and the PhD Competencies are met.

The Comprehensive Exam, which is prepared by the student’s PhD program committee, has a written component followed by an oral section. The written component of the examination is completed at home or another site of the student’s selection during five consecutive days. The oral defense is a two-hour examination by the PhD program committee. The two sections of the examination must be completed within one month. The student is expected to complete the Comprehensive Examination within five (5) years of enrollment in the PhD program and it must be completed at least seven (7) months before the final defense of the doctoral dissertation. Additional details of the process can be found in the MU School of Nursing PhD Handbook (http://nursing.missouri.edu/wp-content/uploads/2016/07/PhD_Nursing_Handbook_2016-17.pdf).

Dissertation Requirements

The culmination of the PhD degree is the completion of a written doctoral dissertation. The dissertation must:

- Be written on a subject approved by the candidate’s doctoral dissertation committee
- Embody the results of original and significant investigation
- Be the candidate’s own work.

Within the MU Sinclair School of Nursing, the PhD Dissertation process consists of:

- Development of a dissertation proposal
- Approval of the proposal by the doctoral dissertation committee
- Approval of the research project by the Health Sciences Institutional Review Board
- Ethical conduct of the research project
- Writing the doctoral dissertation
- Public defense of the doctoral dissertation
- Approval of the dissertation by the candidate’s doctoral dissertation committee
- Submission of the written doctoral dissertation in an approved format.

Students have five (5) years from completion of the PhD Comprehensive Exam to complete the doctoral dissertation. Additional details of the process can be found in the MU Sinclair School of Nursing PhD Handbook (http://nursing.missouri.edu/wp-content/uploads/2016/07/PhD_Nursing_Handbook_2016-17.pdf).

Admissions

Students interested in the PhD program are encouraged to apply for admission as early as possible. All admitted students are required to start the PhD program during the summer semester.

Early Acceptance Deadline: January 1st Recommended for applicants desiring to be full-time students who are planning to apply for a competitive fellowship(s) and international residential PhD option applicants who need time to obtain a visa and move to Columbia, MO prior to classes starting in early June.

Regular Acceptance Deadline: March 1st

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Sinclair School of Nursing PhD program (http://nursing.missouri.edu/academic-programs/phd/apply) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

NOTE: Applicants who do not meet the minimum GPA requirements or do not have a cumulative GPA must submit acceptable scores on the Graduate Record Exam (GRE) and the exam must have been taken within the last 5 years.

DNP in Nursing

About

The DNP program at Mizzou prepares leaders in the advanced nursing practice roles of Adult-Gerontology Clinical Nurse Specialist, (http://nursing.missouri.edu/academic-programs/dnp/areas-of-study) Family Nurse Practitioner (http://nursing.missouri.edu/academic-programs/dnp/)
Degree Requirements

Upon admittance to the program, the following must be completed by the student and documentation of these items must be submitted before registering for coursework:

- Current required immunizations
- Satisfactory criminal background check
- Satisfactory drug screen
- Current CPR certification
- Proof of undisciplined nursing licensure

DNP Program Requirements include completion of required coursework, clinical hours, and the DNP Scholarly Project. The DNP in nursing requires a minimum of 72 credits beyond the baccalaureate degree. Of the 72 hours, 36.5 credits must be completed at the University of Missouri. In addition, a minimum of 1000 faculty/preceptor supervised academic clinical hours must be completed. Post-master’s students may transfer in clinical hours completed in their previous master’s degree pending approval of their academic advisor. Total number of clinical hours may vary depending upon the student’s emphasis area, proof of national certification in an advanced practice role, and previous graduate clinical coursework completed.

Ultimately, the student, in collaboration with their academic advisor, determines the student’s plan of study, total credit hours, and clinical hours necessary to adequately prepare the student for the DNP degree.

The DNP Residency project is a faculty-guided scholarly experience that provides evidence of the student’s critical thinking and ability to apply research principles through identification of a significant practice problem, systematic appraisal of relevant scientific literature and outcome data; design of cost-effective, evidence-based, therapeutic interventions or programs; successful implementation of the selected interventions or program, and comprehensive evaluation of specific, measurable, and appropriate outcomes. The project will reflect the culmination of knowledge and skills developed during the DNP program. DNP students must complete a DNP Residency Project, write a scholarly paper or executive summary, present an electronic poster to peers, committee members, and stakeholders, and defend the project results with their DNP Program Committee.

DNP students are required to spend one week on campus the first summer of enrollment and during their last semester of enrollment. Specific On-campus competency days are also required during the course of the program. For specific dates click on On Campus dates. Further explanation of program requirements can be found on the DNP Program Requirements web page.

DNP Curriculum

All students pursuing the DNP degree must complete a minimum of 72-74.5 credit hours of graduate coursework. Credit hours required vary depending upon the students’ emphasis area. Up to 38 credit hours of previous graduate level credit hours from another institution may be accepted toward the total hours required for the DNP degree depending upon transcript review and applicability to the specific area of study. Students must maintain a minimum cumulative Grade Point Average (GPA) of 3.0 in order to graduate.

DNP Clinical Hours

All DNP students must complete a minimum of 1000 faculty/preceptor supervised academic clinical hours. Post-master’s students may transfer in clinical hours completed in their previous master’s degree pending approval of their academic advisor. Total number of clinical hours may vary depending upon the student’s emphasis area, proof of national certification in an advanced practice role, and previous graduate clinical coursework completed.

DNP Scholarly Project

The DNP Residency project is a faculty-guided scholarly experience that provides evidence of the student’s critical thinking and ability to apply research principles through identification of a significant practice problem, systematic appraisal of relevant scientific literature and outcome data; design of cost-effective, evidence-based, therapeutic interventions or programs; successful implementation of the selected interventions or program, and comprehensive evaluation of specific, measurable, and appropriate outcomes. The project will reflect the culmination of knowledge and skills developed during the DNP program.

Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing DNP webpage.

Doctor of Nursing Practice Residency Project Requirements

The DNP Residency Project is an in-depth, evidence-based practice change project that will focus on a theoretically and clinically relevant problem impacting a rural or other underserved population or critical healthcare system need. Specifics of the DNP Residency Project can be found in the Sinclair School of Nursing DNP Student Handbook.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Doctor of Nursing Practice program and the minimum requirements of the Office of Graduate Studies. Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your
application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied.

*Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in several states. You may find more information at this link: http://online.missouri.edu/about/stateauthorization.aspx.

Application Deadlines: Once application materials have been processed through the online application system and after a preliminary review of academic credentials and applications materials, an interview will be arranged. The interview process will take place within weeks of the completed application being received. Student interviews may take place in person or via electronic means for distance students. Applicants will receive notification of their acceptance decision within two weeks. Students applications received after April 1 will be considered for the following academic year.

Total Credits: 77.5-80

1110-1260 Clinical Hours ***

* Preceptor required for clinical courses.

### Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the DNP in Nursing (http://nursing.missouri.edu/academic-programs/dnp/apply) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

# DNP in Nursing with Emphasis in Family Psychiatric and Mental Health Nurse Practitioner

## Area of Study Information
For more information on Area of Study Information please see the Family Psychiatric & Mental Health Nurse Practitioner page (http://nursing.missouri.edu/academic-programs/dnp/areas-of-study).

## Sample Plan of Study

There are multiple plans of study for this emphasis area. Below a Sample Plan of Study for the post-baccalaureate, four year plan. For more Plans of Study, please visit our website (http://nursing.missouri.edu/academic-programs/dnp/areas-of-study).

Graduate Certificate in Participatory Health Research

Contact Information
Sinclair School of Nursing
S235 Sinclair School of Nursing Building
http://nursing.missouri.edu/

The Graduate Certificate in Participatory Health Research confirms the completion of graduate level training in the rationale, theoretical underpinnings, methods, and applications of community based participatory health research (CBPR) and patient centered outcomes research (PCOR). Community based participatory approaches are innovative methods that intersect with patient centered outcomes. When used together, CBPR and PCOR, there is significant potential for patient empowerment, enhancement of patient care, and improved population health outcomes. A collaborative effort between the Sinclair School of Nursing, Department of Family and Community Medicine, School of Social Work, and the Masters in Public Health program, individuals completing the Graduate Certificate in Participatory Health Research will gain highly valued skills necessary to conduct clinical research in partnership with a community. Participatory Health Research methods are ideal for addressing patient-centered questions related to informed choices, health outcomes, and quality of life. This graduate certificate is open to all health-related professions. These innovative types of research skills traditionally have not been included in health-related graduate program curricula.

Requirements for the Graduate Certificate in Participatory Health Research include a graduate level statistics course, three didactic courses, and one research practicum experience.

Courses for this program are online: no campus visits are required.

For more information about this graduate certificate, contact the Sinclair School of Nursing by phone at 573-882-0200 or by e-mail at nursing@missouri.edu.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/51.3801-Gedt-Participatory_Health_Research_GE_Disclosure.html

Graduate Minor in Health System Innovations

The minor is open to graduate students in the Sinclair School of Nursing as well as all students with graduate status who are interested in health care leadership. This minor is designed for those who have a desire to understand growing innovative trends, who want to learn how to integrate innovation into health system organizations, and who want to determine which innovative practices are financially viable to support health care institutions.

Students with graduate standing may select 9-12 credit hours from the designated courses listed below to be awarded the graduate minor in Health System Innovation.

- N8820 Healthcare Financial Management (4 credits)
- N8830 Informatics, Application and Innovation in Health Care Systems (3 credits)
- N8840 Nursing Leadership, Innovation, and Entrepreneurship (3 credits)
- N8860 Organizations & Human Resource Management in Nursing (3 credits)

Graduate Minor in Nursing Education

The Graduate Minor in Nursing Education is open to graduate students in the Sinclair School of Nursing as well as nurses interested in teaching in a school of nursing who are graduate students in other departments on campus (e.g. Health Education, Public Health, Health Management and Informatics, Human Development and Family Studies, etc.).

Graduate nursing students who already have a MS in Nursing Education or a Graduate Certificate in Nursing Education will not be eligible for a graduate minor in nursing education as their prior graduate coursework is substantively identical to the required courses.

The graduate minor in nursing education consists of a minimum of 10 graduate credit hours of nursing education coursework.
Interdisciplinary Academic Programs

MU offers a number of academic degree programs that are planned, administered and taught collaborative by faculty from numerous disciplines. Those interdisciplinary programs are enumerated in this section of the catalog.

Academic Medicine

A Master of Science in Academic Medicine (post-doctorate) is offered by the Department of Family and Community Medicine in the College of Medicine. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents, and licensed to practice in a primary care specialty.

Faculty

Assistant Professor K. Craig, D. Howenstine, P. Koopman, J. McElroy*, L. Morris, A. Swenson, S. Swoford, P. Tatum III*
Research Professor D. Oliver*
Associate Research Professor K. Hoffman*, R. L. Kruse*
Professor Emeritus R. L. Blake Jr.*, J. M. Colwill"

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in Academic Medicine, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

- MS in Academic Medicine (p. 709)

School of Medicine
M224 Medical Sciences Building, DCO32.00
Columbia, MO 65212
573-884-7060
http://www.fcm.missouri.edu/

The Master of Science in Academic Medicine is offered by the Department of Family and Community Medicine in the College of Medicine. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents and licensed to practice in a primary care specialty.

MS in Academic Medicine

Plan of Study

The program has two options for study: Teaching/Administration and Research. The program requires completion of a minimum of 30 course hours with a grade of 3.0 (B) or better. Courses in the Master's degree are:

Admissions

Admission Contact Information

Juliet Bedell, Bedelljc@health.missouri.edu, 573-884-2912
University of Missouri, School of Medicine
Department of Family and Community Medicine
MA303 Medical Sciences Building
Columbia, MO 65212

The Department of Family and Community Medicine has responsibilities for teaching, research and service activities covering the spectrum from primary medical care to community medicine. This graduate degree program is designed to prepare primary care physicians to work in an academic setting as faculty members with responsibilities for patient care, teaching, research, and scholarly endeavors. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents and licensed to practice in a primary care specialty.

Application Deadline

This program accepts rolling admissions, so you can apply at any time. We recommend you submit your application at least six weeks before the beginning of the term in which you wish to start your course work.

Admission Criteria

- Board-certified or board-eligible physicians who have already received MD, DO, MBBS or equivalent degrees may apply. Typically, physicians have completed residency training in their primary specialty prior to enrollment, but current residents may apply with the permission of their program director.
- Physicians in clinical or academic fellowship programs (or both) are also welcome to apply. Prospective students with other doctoral and graduate degrees will also be considered.
About the American Law Program

This program will provide an introduction to the American legal system and U.S. legal practice for students who received their first degree in law outside the United States. It will help prepare students for a U.S. bar exam, for U.S. law practice, or to work with U.S. clients in the students' home countries or with foreign clients doing business in the U.S.

Faculty

Professor R. Gely*, J. Lande*, R. Uphoff*
Associate Professor C. Conklin*, D. Crouch*, S.I. Strong*
Adjunct Assistant Professor J. Levin*

Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in American Law. The University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options.

Graduate

- LLM in American Law (p. 710)

About the American Law Program

This program will provide an introduction to the American legal system and U.S. legal practice for students who received their first degree in law outside the United States. It will help prepare students for a U.S. bar exam, for U.S. law practice, or to work with U.S. clients in the students' home countries or with foreign clients doing business in the U.S.

Create new opportunities for both LL.M. and J.D. students.

LLM in American Law

Graduates of the LL.M. in American Law program should:

- Possesses substantial knowledge of the legal system in the United States
- Possesses substantial knowledge in legal analysis and reasoning, legal research, problem solving, and oral communication as practiced in the U.S. legal community
- Understand the goals, structure, values, rules, and responsibilities of the U.S. legal profession and conduct their legal practice in a professional and ethical manner
- Possesses the lawyering skills generally regarded as necessary for effective and responsible participation in the U.S. legal profession
- Possesses substantial knowledge in areas of the law considered to be foundational for admission to the bar, and for the practice of law in the United States

The LL.M. in American Law is a 24 credit hour program. There will be three core required courses - Overview of the U.S. Legal System, Legal Research and Writing, and Professional Responsibility. Elective courses will be selected from the existing J.D. or LL.M. curriculum. This will provide flexibility for students to customize study in any number of fields in the law school such as intellectual property, commercial law, international law, tax, environmental law, and employment law.

American Law

Contact Information

Paul Ladehoff, Director of LL.M. Programs & Director of the Campus Mediation Service
American Law - MU School of Law
206 Hulston Hall
University of Missouri
Columbia, MO 65211
Phone: (573) 882-2020; Fax: (573) 882-3343
Email: mulawcdr@missouri.edu
Web site: http://law.missouri.edu/llm

This program will provide an introduction to the American legal system and U.S. legal practice for students who received their first degree in law outside the United States. It will help prepare students for a U.S. bar exam, for U.S. law practice, or to work with U.S. clients in the students' home countries or with foreign clients doing business in the U.S.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Required Application Materials

Submit the following via the online application (https://applygrad.missouri.edu/apply):

- Transcripts of all previous college or university education. Upload unofficial transcripts in your online application. If you are accepted, you will be asked to provide official transcripts
- Two letters of recommendation. In the online application, you will need to supply names and contact details of two professionals who can attest to your critical thinking, analytical and writing skills, demonstrating your potential as a graduate student and professional
- Personal statement of research goals and interests
- Curriculum vitae or résumé
- Verification from residency program or other relevant post-graduate training
- TOEFL or IELTS score reports for applicants whose native language is not English
- A personal phone interview

Carefully follow the instructions on the Graduate Studies (https://applygrad.missouri.edu/apply) application site.

Upload the above documents in the online application site. Use the following information to complete your application:

a. Application type: Master’s Program
b. Degree/Delivery: Masters-Distance (Online/Remote Site/etc.)
c. Academic Program: Academic Medicine-Distance (MS)
d. TOEFL or IELTS scores: Institution Code 6875 (if applicable)

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Program open only to international students who have their first degree in law from an institution outside the U.S.

Biomedical Sciences

The study of biomedical sciences includes the major disciplines of:

- anatomy (gross or microscopic)
- physiology/pharmacology (molecular, cellular and integrative)
- biochemistry/molecular biology
- endocrinology
- toxicology

Specific areas of interest are exercise biology including cardiac, vascular and muscle biology; cardiovascular biology including neuroendocrine regulation; membrane transport biology including cystic fibrosis and cardiac disease; and reproductive biology including environmental estrogen toxicities and developmental processes.

All of the biomedical sciences degrees at MU are at the graduate level, and within two very distinct programs. See the Graduate tab for details on these options.

For undergraduate students interested in studying biomedical sciences, there are more than two dozen courses taught at the undergraduate level. See the Courses tab for details on these options.

Faculty

Comparative (Veterinary) Medicine

Professor C. L. Franklin
Associate Professor Y. Agca, E. C. Bryda
Clinical Associate Professor L. W. Dixon

Research Professor S. Yang**

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in biomedical sciences, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

Biomedical Sciences Area Program Degrees

- MS in Biomedical Sciences with emphasis in Biomedical Sciences (p. 712)
- PhD in Biomedical Sciences (p. 716)
Biomedical MS Degrees with Veterinary Medicine Emphasis Areas

• MS in Biomedical Sciences with emphasis in Comparative Medicine (post DVM degree only) (p. 713)
• MS in Biomedical Sciences with emphasis in Pathobiology (p. 714)
• MS in Biomedical Sciences with emphasis in Veterinary Medicine and Surgery (p. 714)
• MS in Biomedical Sciences with emphasis in Veterinary Sciences (p. 715)

An Array of Biomedical Degrees Offered

The University of Missouri offers several degree program options in Biomedical Sciences:

• The Biomedical Sciences Area Program offers a master's program in basic biomedical sciences and a PhD area program. Dual biomedical-DVM degrees are other options. Students in the Biomedical Sciences Area Program do not have to be enrolled in the College of Veterinary Medicine.

• The Graduate School also confers three MS degrees related to veterinary biomedical sciences. Available emphasis areas are (a) comparative veterinary medicine, (b) pathobiology and (c) veterinary medicine and surgery. Generally, applicants to these biomedical degree programs are concurrently enrolled in College of Veterinary Medicine or have previously earned a Doctorate in Veterinary Medicine (DVM).

Additional Program Options

Pathobiology

The Pathobiology Area Program offers a PhD in Pathobiology (p. 746).

DVM/Graduate degree in Biomedical Sciences

The Biomedical Sciences graduate programs enable veterinary medical students to pursue studies in the basic biomedical discipline of their choice for a PhD or MS degree while enrolled in the College of Veterinary Medicine. The program is designed to prepare students for advanced professional careers in universities and colleges, research institutes and industrial research.

With consent of the student’s graduate program committee, courses from the professional curriculum (which includes a major portion of the core curriculum) can be accepted toward the graduate degree.

Master of Science: The MS/DVM program enables veterinary medical students to complete a master’s degree while enrolled in the College of Veterinary Medicine. The program allows qualified students to seek in-depth involvement in the basic biomedical discipline of their choice. Six hours of 9090 Research that result in an original thesis are required. Financial support may be provided to VM2-4 students through teaching assistantships in gross anatomy laboratory (V_BSCI 5500 Veterinary Anatomy with Laboratory).

Doctor of Philosophy: The PhD/DVM program requires a minimum of 30 credit hours of 9090 Research culminating in completion of original research and defense of a written dissertation. Major biomedical disciplines include anatomy of domestic species (gross or microscopic); physiology/pharmacology (molecular, cellular and integrative); biochemistry/molecular biology; endocrinology; and toxicology. Specific areas of interest are exercise sciences; cardiovascular and neurosciences; muscle biology; membrane transport biology; reproductive biology; and developmental toxicology.

About the Program

The MS program in Basic Biomedical Sciences provides in-depth training to prepare scientists in interdisciplinary basic research (molecular, cellular, organ and integrative). Departmental faculty members represent diverse Medical-related basic science disciplines that provide a unique opportunity for biomedical research training. Core courses include physiology, cell biology and an introduction to research methodology. The multidisciplinary focus of the program is also emphasized in the candidate’s MS program committee.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission Criteria

• Fall deadline: January 15
• Spring deadline: September 15
• Summer deadline: Not Applicable
• Minimum TOEFL scores:
<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>100</td>
<td>600</td>

</tbody>
</table>
• Minimum GRE scores:
When did you take the GRE?  
<table>
<thead>
<tr>
<th>When</th>
<th>Verbal + Quantitative</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>
<td>100 3.5</td>
</tr>
<tr>
<td>On or After August 1, 2011</td>
<td>300 3.5</td>
</tr>
</tbody>
</table>

- Minimum GPA: 3.0
- Required prerequisite courses: Biology (10 hrs), Physics (3 hrs), Biochemistry (3 hrs), Chemistry (10 hrs), Calculus (3 hrs)

NOTE: The GRE requirement may be waived for applicants with an MD or DVM. Prerequisite courses may be completed during the master’s program.

### Required Application Materials

**To the Graduate School:**
- All required Graduate School documents

**To the Biomedical Sciences MS Program:**
- Program-specific application
- Letter of intent
- GRE scores
- Copy of transcripts
- 3 letters of recommendation

### MS Degree Requirements

To attain the master’s degree, 30 hours of graduate credit must be completed; 15 hours or more shall be 8000 level (exclusive of research, problems and independent study courses); and 6 to 9 hours of 8090 Research. A grade of 3.0 or better is required in all core courses and serves as the qualifying examination for the degree. In addition to the departmental core courses, students may take courses specifically planned to meet the needs and strengths of the individual.

### Evaluation

The master’s candidate is evaluated semiannually for satisfactory rate of progress as defined by timely completion of course courses and progress on research activities as stipulated by the master’s program committee. The master’s candidate must carry out original research culminating in a written thesis, present the thesis work at a departmental seminar and defend the thesis in an oral examination by the master’s program committee.

### Length of Study

The time limit for the master’s degree is five years after initiating the program.

### MS in Biomedical Sciences with Emphasis in Comparative Medicine (post DVM)

### Admission Contact Information

Director of Graduate Studies Craig Franklin, DVM, PhD

Columbia, MO 65201  
573-882-6623  
http://cmp.missouri.edu/

### About This Degree

The University of Missouri Comparative Medicine Program provides advanced graduate training to veterinarians who wish to pursue careers in comparative medicine. Trainees may combine one year of residency training in clinical, administrative and diagnostic laboratory animal medicine with two or more years of research training. Alternatively, trainees with experience in laboratory animal medicine, comparative pathology or related disciplines may begin research training at the time of admission. Training is designed to prepare individuals for a variety of careers including comparative medicine research and laboratory animal medicine/collaborative research. Students may either pursue an MS or PhD. Research opportunities are available in several areas including infectious disease, molecular biology, mouse biology, genetics, microbiota, biomedical engineering, cancer and cardiovascular physiology. Resources available include the University of Missouri Office of Animal Resources (OAR), the Laboratory of Infectious Disease Research (LIDR), Mutant Mouse, Rat and Swine Resource and Research Centers and IDEXX-Bioresearch, an internationally known research animal diagnostic laboratory.

### Programmatic Strengths

- The opportunity for comparative studies in a joint veterinary and human medical environment
- The multidisciplinary nature of the faculty participating in the training program
- The potential to couple training in research with residency training in laboratory animal medicine, comparative pathology, diagnostics, and training toward board certification
- Strong research resources including AAALAC-accredited research animal facilities, a full-service, internationally-recognized research animal diagnostic laboratory, a BSL-3 infectious disease research facility and NIH-funded research resource centers for mice, rats and swine
- A long history of successful training in comparative medicine

### Class Size & Resources

Typically there are 10-12 postdoctoral trainees in the program at a given time. Networking and sharing of experiences and cooperation among trainees is an important factor in the success of the program.

### Admission Criteria

- Fall deadline: N/A
- DVM or equivalent from an accredited college of veterinary medicine or successful completion of the foreign equivalency examination and approval by the Comparative Medicine Program faculty
- Meet standards for admission to the Graduate School

### Required Application Material

**To the Graduate School:**
- All required Graduate School documents

**To the CMP Postdoctoral MS Program:**
- For combined residency/degree positions, the CMP uses the Veterinary Internship & Residency Matching Program
**Degree Requirements**

The CMP emphasizes comparative medicine research training and includes graduate course work. Research training is performed under an established investigator in one of several life science departments on the MU campus. Recommended graduate courses include pathology of laboratory animals, methodology of animal experimentation, biology of laboratory animals, laboratory animal resource management, grant and manuscript writing for biomedical researchers, laboratory and project management, biomedical ethics and seminars. Elective courses frequently taken by trainees include basic and advanced courses in immunology, molecular biology, physiology, reproductive biology and/or disease pathogenesis. Research typically deals with the application of an animal model in the investigation of human diseases or the study of naturally occurring diseases of laboratory animals. Requirements for elective course work, residency and teaching experience are determined with the student’s advisory committee. Trainees also participate in teaching and instructional programs offered to veterinary students and research personnel.

**Written Scholarly Work**

The MS degree requires the completion of a significant first author manuscript suitable for publication in a refereed journal, or an approved equivalent scholarly effort.

**Residency**

For trainees enrolled in the combined graduate/residency program, residency rotations are performed during the first year of training and research training occurs in years two and three.

Residency rotations include:

- clinical medicine and animal resource management in the Office of Animal Resources (OAR)
- colony management, diagnostic, comparative and research pathology in the Mutant Mouse Regional Resource Center (MMRRC) and Rat Resource and Research Center (RRRC)

**Moving to a PhD Program**

Trainees desiring to change to a PhD program have the opportunity to do so in a variety of programs including the Pathobiology Area Program.

**MS in Biomedical Science with Emphasis in Pathobiology**

Director of Graduate Studies: Catherine Vogelweid

**About the Program**

The College of Veterinary Medicine offers a Master of Science degree in biomedical sciences with a specialization in veterinary pathobiology and/or laboratory animal medicine, which is administered through the Department of Veterinary Pathobiology. The degree requires 30 credit hours of work including courses, seminars, research, and problems courses. The program includes research in a particular field and defense of a thesis which embodies the results of this work. Certain areas of emphasis require submission of a formal master’s thesis while others require preparation of a publishable manuscript.

**PhD in Pathobiology**

For admission information about the doctorate of philosophy (PhD) in Pathobiology, refer to Pathobiology Area Program in this catalog.

**Admission Criteria**

- **Fall deadline:** no deadline
- **Spring deadline:** no deadline
- **Summer deadline:** no deadline
- **GRE scores required**
- **Undergraduate GPA of last 60 credits of undergraduate work:** 3.0
- **Designated faculty mentor**
- **Professional students with a DVM degree may be eligible to waive the GRE**

**International Applicants:**

Minimum TOEFL score:

http://www.cvm.missouri.edu/VMS/index.htm

Director of Graduate Studies: Leah Cohn

**About the Program**

The College of Veterinary Medicine, through the Department of Veterinary Medicine and Surgery, offers graduate work leading to the
master of science degree in veterinary biomedical sciences with an emphasis in veterinary medicine and surgery. In addition, faculty within the department offer supervision for doctoral and postdoctoral study and research. Many but not all graduate students in this area of study combine their graduate degree training with clinical residency programs leading to board certification in some specialty field within veterinary medicine.

Types of Study

The program provides advanced training in anesthesiology, comparative cardiology, equine, food animal and companion animal medicine and surgery, neurology, oncology, comparative ophthalmology, radiation oncology, radiology, nutrition, and theriogenology among other areas.

Resources and Facilities

Graduate students have ready access to clinical patients, medical records and facilities of the Veterinary Medical Teaching Hospital to aid them in clinical research. The college has its own library. More detailed information regarding the emphasis area of veterinary medicine and surgery can be found at the website http://www.cvm.missouri.edu/VMS/index.htm

Admission Criteria

Fall deadline: n/a

- Completion of a bachelor’s or professional degree
- Identification of a mentor with graduate faculty standing within the Department of Veterinary Medicine and Surgery
- Identification of funding (with advice of mentor) for the period of research and study
- Minimum TOEFL score (when appropriate):

<table>
<thead>
<tr>
<th>Internet-based test (IBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

- Minimum GRE score: 292; 146 in verbal and 146 in quantitative. Minimum scores should be considered as guidelines not a guarantee of admission.

The majority of MS students within our program are completing specialty residency training programs in some field of veterinary medicine simultaneously with the MS degree. Admission to these programs generally precedes admission to our graduate programs. The GRE requirement may be waived for exceptional students by the Veterinary Medicine and Surgery Departmental Research and Graduate Studies Committee. Applicants may be asked to strengthen any deficiencies in prerequisites to the chosen area of concentration through enrollment in a post- or non-degree graduate student program.

Required Application Materials

To the Office of Graduate Studies:
- All required Graduate Admissions documents

To the Veterinary Medicine and Surgery Emphasis Program:
- GRE scores

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Degree Requirements

Advisors and the Advisory Committee

Formulating a plan of study is the joint responsibility of the student, the advisor and the student’s advisory committee. An advisory committee of at least three faculty members should be chosen during the first semester of enrollment. The advisory committee offers guidance and is responsible for approving a definitive plan of study.

The advisory group should consist of the major advisor and appropriate faculty members from the department, and at least one other member from another department within the college or university. Members of this committee may be recommended later for appointment to the examining committee. Members of the final examination committee should be chosen in the same manner as the advisory committee.

Publications

A thesis reporting the results of original research is required of all candidates. A scientific paper based on the thesis research must be submitted to a refereed journal.

MS in Biomedical Sciences with Emphasis in Veterinary Sciences

Advising and Support Services:

Director: C.B. Chastain, DVM, MS, DACVIM, Professor
Administrative Assistant: June Kelly, Administrative Associate I
Mizzou Online Advisor: Kelly Ross, Admissions and Recruitment Advisor, Mizzou Online

Degree Requirements

- Completion of all graduate work attempted at MU with a GPA of 3.0 or better.
- A minimum of 30 semester hours of graduate course credit, including at least 15 hours of graded, 8000-level course work. No more than 40% of the 30-hour credit requirement can be satisfied be Research, Readings, and Problem Courses.
- As part of their program of study during their enrollment in the Veterinary Medicine and Surgery (VMS) graduate degree program, graduate students must receive a passing grade from an approved graduate-level experimental design or statistics course. Following a request by the student’s major advisor, this requirement may be waived by the departmental graduate studies committee for those students who have successfully completed a similar course previously.
- All VMS graduate students must submit a report of progress and plans regarding their degree program to the Departmental Graduate committee by April 30 of each year they are enrolled in the program. This report must be derived from the outcome of at least one annual meeting of their graduate degree committee and must be signed by their major advisor. The Annual Review of Graduate Student Progress will be used by students and committees to satisfy these requirements.
- The Departmental Graduate committee will review all reports and will schedule meetings with students and their advisors if deficiencies
are noted. Failure to comply may result in disqualification of the student. The major advisor will be disqualified from receiving internal discretionary grant funds during the following calendar year.

- Completion of a thesis describing original investigative research completed by the candidate. Detailed guidelines for preparation of the thesis are available through the Graduate School.
- Documentation of a passing evaluation on the defense of the thesis work by an examination committee (make-up of the committee is described in the graduate catalog) as well as demonstration of mastery of the fundamental principles of the work included in the course of study for the degree.
- The candidate must be enrolled at MU in the semester when their thesis work is defended.
- The master's degree must be completed within eight years of enrollment from the time the student is accepted into the degree program.

Admissions

PhD in Biomedical Sciences

Director of Graduate Studies Dr. Douglas Bowles
Biomedical Sciences Area Program
W111 Veterinary Medicine Building
1600 Rollins Road
Columbia, MO 65211
573-882-7305
http://biomed.missouri.edu/

About the Doctoral Degree Program

The Biomedical Sciences Area PhD is a multidisciplinary program that integrates molecular, cellular and systemic biology within the context of biomedical research. The program provides the student with the background to investigate questions relevant to the Medical sciences at the integrative, molecular or cellular level and to relate the findings to mammalian physiology. Training in both fundamental and state-of-the-art research methodologies help students develop the skills necessary for competitive biomedical research. The program is administered through the Department of Biomedical Sciences (College of Veterinary Medicine) that has research faculty representing a diversity of medical-related basic science disciplines, including anatomy, biochemistry, histology, pathology, molecular biology, physiology, pharmacology and toxicology. The program offers a rich environment for graduate study and a unique opportunity for training scientists in comprehensive interdisciplinary research.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission Criteria

- Fall deadline: December 15
- Spring deadline: September 15
- Summer deadline: Not Applicable
- Minimum TOEFL scores:
  - Internet-based test (iBT) 100
  - Paper-based test (PBT) 600
- Minimum GRE scores:
  - Prior to August 1, 2011
    - Verbal + Quantitative 1000
    - Analytical 3.5
  - On or After August 1, 2011
    - Verbal + Quantitative 300
    - Analytical 3.5
- Minimum GPA: 3.0
- Required prerequisite courses: Biology (10 hrs), Physics (3 hrs), Biochemistry (3 hrs), Chemistry (10 hrs), Calculus (3 hrs)

NOTE: The GRE requirement may be waived for applicants with an MD or DVM.

Degree Requirements

To attain the PhD degree, 72 hours of graduate credit must be completed:

15 hours or more at the 8000/9000 level (exclusive of research, problems and independent study courses)

The core curriculum includes:

- physiology (10 credit hours)
- biochemistry/cell biology or histology (4 or 5 credit hours, respectively)
- multidisciplinary approaches to biomedical research (2 credit hours)
- departmental seminar (2 credit hours)

Minimum of 1 additional 7000-level course in each of the following areas:

- molecular biology
- cellular biology
- integrative biology

Rate and Quality of PhD Progress

A grade of 3.0 or better is required in the core curriculum and serves in lieu of a qualifying examination for the degree. The choice of additional courses will be made individually by the student in consultation with his/
her advisor and doctoral program committee. Following completion of the plan of study, candidates for the PhD degree must pass a comprehensive examination designed by the doctoral program committee that reflects an understanding of the multidisciplinary approach to biomedical research. The PhD candidate is evaluated semiannually by a faculty committee to ensure a satisfactory rate of progress as defined by timely completion of core courses and productivity in research activities as stipulated by the student’s doctoral program committee. The PhD candidate must carry out original research culminating in a written dissertation, present the dissertation work at a departmental seminar and defend it in an oral examination given by the doctoral program committee. The program for the PhD degree must be completed within five years of passing the comprehensive examination.

Clinical and Translational Science

Data Science and Analytics

Data science is a rapidly blossoming field of study and career with a highly multidisciplinary characteristic. The confluence of big data, massively powerful cloud computing platforms, and need of businesses from all sectors to leverage their data repositories has created a high-growth environment and demand for data scientists. Data scientists routinely leverage tools and techniques from computer science, information systems, advanced statistics, and machine learning. To satisfy the growing need for data scientist who can transform large collections of data into actionable decision making products for their employers, we are proposing the Master of Science in Data Science and Analytics.

This multidisciplinary Data Science and Analytics (DSA) degree program will consist of 34-credit hours of learning in the online and mixed mode format in which students will visit campus one time each academic year for an intensive on site learning experience.

The academic program will consist of 19 credit hours of core, fundamental data science courses; followed by 9 credits of emphasis area specific courses and 6 credits of industry relevant case studies and capstone project courses.

Data Science is an emerging discipline that, by its nature, integrates traditional disciplines. The proposed degree program will leverage prior investments in the computing disciplines across campuses and colleges within each campus. The MU Informatics Institute will coordinate this collaborative degree program by leveraging existing courses from Computer Science, Journalism, and Information Science & Learning Technologies Departments to deliver the various core and emphasis area course. Existing courses will be adapted to the online format, and new courses that are properly focused and structured for the DSA program will be developed.

Faculty

Associate Professor S. Goggins
Assistant Research Professor G. Scott

** Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in Data Science and Analytics, the University does offer baccalaureate opportunities in a number of related areas.

A listing of current degree programs can be found here (p. 18).

Graduate

- MS in Data Science and Analytics (p. 718)
  - with emphasis in Biotechnology (p. 718)
  - with emphasis in High Performance Computing (p. 718)
  - with emphasis in Strategic Communications and Data Journalism (p. 719)
  - with emphasis in Human Centered Science Design (p. 719)

PhD in Clinical and Translational Science

This degree program is not currently accepting applications at this time.

From Particles to Populations

The University of Missouri Institute for Clinical and Translational Science transforms discoveries made in laboratories across MU into community-based products, services and practices for the state and nation. The institute (ICATS) is the focal point of MU's efforts to develop clinical and translational science programs that improve health through better research, education and public service.

Few universities share MU's potential for saving lives through research. With more than 1,000 biomedical scientists and engineers — all on one campus — MU focuses its research on the deadliest diseases, such as cancer and cardiovascular disease, and the most vulnerable patients, including children and the elderly.

Faculty

Faculty for Clinical Translational Sciences teach across multiple disciplines. A complete listing of faculty can be found here (p. 1486).

Undergraduate

While MU does not offer undergraduate degrees specifically in Clinical and Translational Science program, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).
• Graduate Certificate in Data Science and Analytics (p. 719)

**MS in Data Science and Analytics**

Graduates will be able to individually acquire and stage large data sets, design and conduct experiments, and analyze results for complex data analytical problems using their foundational and specialized data science tools and techniques; taking a problem from conceptualization stage through to the production of data-derived business intelligence.

The special skills the graduating students will acquire or possess include:

• Real-world experience in applying state-of-the-art data science tools and techniques to solve industry, academic, and/or business data and decision-making challenges.

• A clear understanding of the ethics and security mechanisms required to safeguard large-scale data collections that contain sensitive and critical information.

• A comprehensive understanding of modern data analytics, statistical analysis, and visualization tools that facilitate timely, large data analysis.

• A solid foundational understanding of database systems, database design, and information retrieval; allowing exploitation of a broad spectrum of data repositories and streaming data systems.

• A demonstrated ability to effectively communicate to a broad audience the relevant information derived from large data collections using a variety of visualization and presentation methods. Students will be able to convey the meanings behind specific data analysis techniques to audiences of various technical knowledge.

• Training in the latest data analytic methods and tools; including fundamental and advanced statistical and mathematical principles upon which advanced data analysis techniques are built (machine learning, pattern recognition, data mining, etc.).

• Specialized, advanced training in a chosen Emphasis Area, such as biotechnology, high-performance computing, strategic communications, human centered data science design, etc.

All students will take "Core Courses" that will provide a foundation of knowledge and an introduction to state-of-the-art technology in Big Data, database design, data ethics, and visualization of high dimensional and high-volume data.

To understand real-world Big Data issues in context, students will select three courses in an emphasis area. These elective courses will support in-depth analyses and training on data analytic techniques, issues, and problems students will face within a given Emphasis area. Students will take a Case Study course to gain hands-on experience with large data sets and use the relevant technology and techniques. A Capstone project will enable students to refine and demonstrate knowledge and skills learned throughout the program. Both courses will provide students with mentoring from faculty, as well as insight from industry partners.

**Total credits required for graduation: 34**

**Total Credits: 34**

**MS in Data Science and Analytics with Emphasis in Biotechnology**

In addition to the core program objectives (p. 718), graduates of the Masters of Science in Data Science and Analytics who pursue the Biotechnology emphasis area will achieve the following educational objectives:

• Possess an in-depth understanding of the data analytics needs in biotechnology industry and healthcare systems in the US and worldwide;

• Have the ability to practice their analytic skill sets to applications in agriculture, human medicine, and health information systems in genomics, proteomics, phonemics, and electronic medical records;

• Be able to present and interpret their data analytic results with actionable plans in biotech and healthcare industry.

**Emphasis area courses:**

- High-throughput Biomedical Data Analysis (course still in development) 3
- Genomics (course still in development) 3
- Biomedical Information Mining and Interpretation (course still in development) 3

**MS in Data Science and Analytics with Emphasis in High Performance Computing**

In addition to the core program objectives (p. 718), graduates of the Masters of Science in Data Science and Analytics who pursue the High Performance Computing (HPC) emphasis area will achieve the following educational objectives, in addition to the core program objectives while becoming immersed in Big Data computational ecosystems.

• Students will have an in depth understanding of the state-of-the-art technologies which enable big data analytics and high performance computing; such that they can successfully investigate the data and analytical needs, then guide the decision making process on deployments into HPC infrastructure.

• Students will acquire knowledge to exploit cloud-based computing infrastructure, including virtualization, distributed architectures, on-demand resource scaling, container technology, and other cloud-based computing concepts in support of Big Data management, processing, and analytics.

• Students will have a thorough understanding of advanced technologies and techniques in Big Data analytics, which facilitate...
the extraction of new data intelligence using state-of-the-art, leading analytical platforms.

- Students will gain a solid understanding of techniques for exploiting advanced co--processing hardware, including graphics processing units (GPU) and many-core units (e.g., Intel Phi) to achieve cost effective, massively parallel data analytics.

#### MS in Data Science and Analytics with Emphasis in Human Centered Science Design

In addition to the core program objectives (p. 718), graduates of the Masters of Science in Data Science and Analytics who pursue the Human Centered Science Design emphasis area will achieve the following educational objectives:

- Students will develop a deep understanding of the theoretical foundations and hands-on experience necessary to understand the strengths and limitations of different analytical methods.
- Combines both the technical (databases, social networking, data mining, and text mining) and social (economic, ethical, policy, and political) aspects of data analytics.
- Students will build an understanding of the complex interplay between the decisions made during the collection, curation, and transformation steps in the information lifecycle, and their impact on the analytical methods that should be employed.

Data Journalism (course under development)

### Graduate Certificate in Data Science and Analytics

The objective of the Graduate Certificate in Data Science and Analytics is to enable students from multiple difference graduate programs at the University of Missouri to receive education and training in the emerging field of Data Science. Data science skills are increasingly necessary for all fields of advanced study due to the emergence of large scale data and the incumbent challenges across academia and industry.

At the conclusion of the Graduate Certificate in Data Science and Analytics, students will:

1. Have experience in applying state-of-the-art data science tools and techniques to solve industry, academic, and/or business data and decision-making challenges.
2. Have a comprehensive understanding of modern data analytics, statistical analysis, and visualization tools that facilitate timely, large data analysis.
3. Be able to effectively communicate to a broad audience the relevant information derived from large data collections using a variety of visualization and presentation methods.
4. Understand the fundamental and advanced statistical and mathematical principles upon which advanced data analysis techniques are built.

A total of 15 credit hours of coursework is required.

Dispute Resolution Field

DR professionals work in many different areas. To illustrate, the Association for Conflict Resolution has sections dealing with commercial, community, consumer, court, criminal justice, education, environmental, family, health care, international, ombudsman, online disputes, organizational conflict management, spirituality, training, and workplace issues.

Faculty

Professor R. Gely*, J. Lande*, I. Lee*, R. Uphoff*
Associate Professor C. Conklin*, D. Crouch*, S. I. Strong*
Adjunct Assistant Professor J. Levin*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in dispute resolution, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• LLM in Dispute Resolution (p. 720)

About the Dispute Resolution Program

Students in the Master of Laws (LL.M.) dispute resolution program have a unique opportunity to gain a deeper understanding of theoretical, policy, design and ethical issues in dispute resolution. They study with leading dispute resolution scholars who generate important academic work influencing dispute resolution theory and practice around the world. Small class sizes create a close community with faculty and students.

Our program blends theoretical analysis, practitioner skills, and systems design work in courses usually limited to LL.M. students. Our diverse student body — by age, race, nationality, legal background — enriches the level of discussion, inside and outside the classroom.

The LL.M. meets the needs of those with backgrounds as advocates, neutrals, law-trained court administrators and government agency personnel, among others.

Admission Requirements

Applicants must have completed the first degree in law (JD, LLB or equivalent) required for law practice or law teaching in the country in which law studies were pursued. Note: U.S. applicants must have satisfied the JD requirements of an ABA-accredited law school. In exceptional cases, U.S. applicants may be admitted if they have satisfied the JD requirements of a non-ABA-accredited law school.

• Applicants may be admitted without a JD degree if they have a bachelor's degree and substantial experience in dispute resolution.
• Applicants must possess a minimum 2.5 (A = 4.0) grade point average in their law program, and a 3.0 GPA for work completed in any additional graduate or advanced degree program.
• Applicants must be able to start the program in the fall semester (which begins in mid-August). New students are not admitted in the spring or summer semesters.

LLM in Dispute Resolution

Program of Study

The LL.M. program requires 24 credit hours of study. A minimum of 12 credits are required in dispute resolution and the remaining 12 credits are electives. Students choose electives according to their interests. With approval of the director of the LL.M. Program, students can apply six (6) credits of graduate-level courses outside the Law School toward the LL.M. graduation requirements.

Students studying full-time can complete degree requirements within one academic year. Part-time students in a continuous course of study can complete the program within two academic years.

Tailoring the Program

In addition to the recommended electives outlined above, the MU Law School offers courses in many areas. Refer to the Courses tab above for course descriptions. Please note: Every effort is made to teach each of these courses every year, but the ability to offer them depends on faculty availability and budget constraints.

Some of the concentrated areas in the J.D. curriculum include:

- Business Planning/Corporations
- E-commerce
- Employment
- Environmental Law
- Family
- Governmental Processes
- Healthcare
- International Law
- Normative Theory and Diversity
- Tax
- Trial Practice

Genetics Area Program

The Genetics Area Program (GAP) is an interdisciplinary Ph.D. program that will prepare you for a research or teaching career in genetics. As genetic analysis is used in all aspects of biological research, our Program has integrated the efforts of approximately 60 life sciences faculty into one of the strongest training programs at MU. The curriculum provides broad, individualized training tailored to your career objectives.

About the Program

We believe that an understanding of genetics is essential in solving global problems such as famine, environmental degradation and disease. The Genetics Area Program (GAP) is an interdisciplinary PhD program that will prepare you for a research or teaching career in genetics. As genetic analysis is used in all aspects of biological research, our Program has integrated the efforts of approximately 60 life sciences faculty into one of the strongest training programs at MU. The curriculum provides broad, individualized training tailored to your career objectives.

Graduates play a major role in the research programs of our life sciences departments. Students spend approximately twelve weeks in three different laboratories during their first year. This promotes diversity in techniques learned, and it encourages students to meet and work with faculty members in the associated departments. This scientific interaction helps our students choose a lab in which to complete the degree.

As part of the degree, students will spend a semester teaching or assisting with a course in the Genetics curriculum that is relevant to their career objectives.

A genetics seminar series is organized and conducted by the graduate students to promote research interest and encourage scientific communication. Speakers include prominent researchers from universities throughout the country, as well as MU faculty. An annual retreat brings faculty and students together to share research results and techniques.

Genetics graduates leave MU with a strong scientific background, excellent laboratory skills and interpersonal communication abilities.

PhD in Genetics Area Program

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding.
packages. Check the program website or ask the program contact for details.

**Application Deadline**

Fall deadline: January 15

**Admission Criteria**

- Minimum TOEFL scores:
  - Internet-based test (iBT) 93
  - Paper-based test (PBT) 580

- Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal + Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>
<td>1100</td>
<td>4.5</td>
</tr>
<tr>
<td>On or after August 1, 2011</td>
<td>302</td>
<td>4.5</td>
</tr>
</tbody>
</table>

- Minimum GPA: 3.0 in last 60 hours
- Bachelor’s degree
- One or more courses in each of the following: organic chemistry, biochemistry, mathematics (calculus and statistics), physics, introductory genetics
- Research experience highly desirable
- Broad background in biology

Note: Deficiencies in the subjects listed can be remedied after admission.

**Required Application Materials**

To the Graduate School:

- All required Graduate School documents

To the Genetics Area Program:

Genetics Area Program application (download form from website)

- GRE scores
- TOEFL scores (international applicants)
- 3 letters of recommendation (use provided form)
- Personal statement

**Degree Completion Requirements**

The minimum requirements for the PhD degree are:

- advanced courses in genetics, biochemistry and molecular biology
- regular participation in the genetics area seminar program
- successful completion of a comprehensive examination
- at least one semester of teaching in a genetics course
- 3 seminar presentations
- research, dissertation and oral defense

These are beyond the Graduate School’s requirements. Others are determined in consultation between the student and faculty advisor.

**Department of Health Management and Informatics**

Graduate level academic programs at MU in the area of Health Administration are offered through the Department of Health Management and Informatics (HMI) in the School of Medicine. The HMI Department develops, translates, and disseminates knowledge, innovations, and evidence-based solutions to improve health management and informatics performance in complex health systems. HMI advances the health of Missouri’s communities, the nation, and international partners by:

- Creating a culture of collaborative relationships in research, education, and service to generate innovative ideas and solutions;
- Providing professional health management and informatics education and fostering lifelong learning;
- Delivering technical assistance and consultation by partnering with health, human service, and policy-making organizations; and
- Developing innovative commercial products and services for health- and education-related application

**Degrees & Certificates Offered**

The HMI Department offers the following degrees and graduate certificate programs:

- Master of Health Administration (executive and residential cohort)
- Master of Science in Health Informatics and Bioinformatics (executive and residential cohort)
- Dual Master of Health Administration and Master of Science in Health Informatics (executive and residential cohort)
- Graduate Certificate in Health Informatics (executive and residential cohort)
- Graduate Certificate in Health Ethics (100% online format available)
- Graduate Certificate in Informatics for Public Health (100% online)

Residential Master of Health Administration students may also pursue a dual MBA, MS in Industrial Engineering, MPA, or JD degree. Some students choose to complete an additional Master’s degree, such as the MPH, concurrently with the MHA degree.

**Faculty**

Professor E. J. Simoes**

Associate Professor S. A. Boren**, J. Kapp**, N. Khatri**, M. Popescu**, I. Yoo**

Assistant Professor C. Deroche*, T. Joshi**, A. Zohrabian**

Associate Professional Practice Professor W. Phillips**

Associate Teaching Professor W. Wells*

Assistant Research Professor M. S. Kim**, A. Mosa**, G. F. Petroski*, L. Sheets*, I. Zachary**
Mizzou
University of Missouri

Assistant Teaching Professor P. Alafaireet**, B. Hensel*
Clinical Instructor D. Moxley*
Adjunct Professor G. Sill*
Adjunct Associate Research Professor J. Jackson-Thompson**

Professor K. Bopp*, D. Nelson*, C. Schmaltz*
Adjunct Clinical Instructor M. Harris*
Adjunct Instructor K. Clements*, J. Kaplan*, M. Johnson Moxley*, R. Sommer*, T. Weatherford*

Professors Emeriti G. D. Brown*, L. L. Hicks**, D. Wakefield**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate
Undergraduate students who are eligible for dual enrollment may, with permission, register for Graduate-level HMI courses. For more information on dual enrollment, please see http://registrar.missouri.edu/policies-procedures/dual-enrollment.php.

While MU does not offer undergraduate degrees specifically in health administration, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

- MHA in Health Administration (p. 723)

About the Master of Health Administration

The graduate program in Health Administration prepares professionals to meet critical and complex challenges in leadership and improvement in organizations and systems throughout the health industry. The program provides recognized national and global leadership in health management education.

The program is competency-based and distinctively equips graduates for success through (a) providing solid grounding in professional and operational knowledge and skills, (b) integrating health informatics throughout the health services management curriculum, and (c) incorporating overarching complex systems context and analytical approaches.

The residential and executive master’s degrees launch and advance patient-centered, improvement-oriented, financially-responsible, and ethically-grounded careers in evidence-based health administration.

The program admits diverse cohorts of students from Missouri, other states, and other nations. During the admissions process, the program seeks learners with strong academic records, maturity, motivation, leadership capabilities, and career potential. Primary post-graduation placement organizations include health systems, hospitals, academic medical centers, physician group practices, surgery centers, information technology companies, consulting firms, government agencies, insurance entities, and other points of health services delivery.

Whereas the residential master’s degree format is a traditional on-campus residential program, the executive master’s degree is offered in a hybrid model featuring both on-campus and distance learning. In both formats, emphasis is on fostering an individualized and collaborative culture of learning, mentoring, and professional development among students, faculty, staff, alumni, and other practitioners. The intent is to prepare students to enable transformational leadership and improve patient care quality, safety, value, and overall level of population health.

Established in 1965, the program is a member of the Association of University Programs in Health Administration (AUPHA) and has been accredited since 1968 by the Commission on Accreditation of Healthcare Management Education (CAHME), formerly Accrediting Commission on Education for Health Services Administration (ACEHSA).

Both executive and residential students may pursue the MHA degree jointly with the MS in Health Informatics degree. Residential students may also pursue a dual MBA, MS in Industrial Engineering, MPA or JD degree, or complete an additional Master’s degree, such as the MPH, concurrently with the MHA program.

MHA in Health Administration

About the MHA

The HMI Department's MHA degree is designed for students from a range of educational backgrounds and provides the knowledge and skills necessary to function effectively as a healthcare executive. The curriculum includes such competency areas as health systems operations, organization theory, information management, financial management, strategic planning and marketing, human resource management, health economics, managerial epidemiology, leadership, and ethics. By combining basic and advanced course work with an internship and executive management study (an applied management study that replaces a thesis), the student may develop expertise in a focused area. Professional elective course selection is a mutual decision between the student and advisor, and in all cases, the intent is to tailor the degree program to the student's interests. The goal of the graduate program in health administration is to prepare professionals for leadership roles in health care. Students develop an excellent applied knowledge in such areas as clinical decision support systems, risk assessment and management, clinical outcomes assessment, managing interdisciplinary teams and integrated health systems.

Degree Requirements

The residential MHA degree requires a total of 54 credit hours, which includes 39 hours of core coursework, three credit hours earned for a required 12-week summer internship, a three-credit hour capstone group management project, and nine credit hours of professional electives. Students must maintain a minimum 3.0 cumulative MU graduate grade point average to earn the Master’s degree.

The professional elective requirement, which comprises three courses, allows MHA students the opportunity to concentrate in a particular area of study if they choose. They may take courses in health informatics or health ethics within the HMI Department, pursue graduate certificates in areas such as health informatics, public health, or geriatric care management, or complement their MHA coursework with classes in business administration, public administration, industrial engineering and public health, to name a few.

MHA students must complete a 12-week administrative internship at an approved integrated managed care system, group practice, hospital or other healthcare organization under the guidance of a qualified preceptor.
The internship is designed to incorporate the academic training students receive in their first year of the master’s degree with practical applications within the host site. The students receive hands-on exposure to health care management in a real-world environment and experience first-hand the dynamics of a career in health care. The intern should have the opportunity to observe their mentor and other professionals in the work environment, as well as opportunities to discuss their experiences.

Specific general skills to be developed include:
- Leadership
- Strategic decision making
- Project management
- Teamwork

HMI’s executive-in-residence works individually with students to place them at internship sites. For a list of recent internship placements, please see http://hmi.missouri.edu/prospective/educational_partners.html.

**Total Credits: 12**

### Thesis/Non-Thesis Requirement

- **Thesis Requirement:**
  - improvement of patient experience of wait times in the Orthopaedic Clinic at the Missouri Orthopaedic Institute
  - surgical site infection reduction informed by NSQIP resources for UMHC
  - system-wide urinary catheter reduction for UMHC
  - improving screening and follow-up for students with substance use and/or mood disorders at MU Student Health

### Financial Aid

Further information about costs, financial aid, and external scholarship opportunities is available on the HMI Department's website at: http://hmi.missouri.edu/prospective/financial_aid.html.

### Executive MHA Degree

In addition to the residential (on-campus) MHA, the degree is offered in an alternative format to healthcare professionals who have significant clinical or administrative experience in health care. HMI accepts an executive MHA cohort to begin in January of each year. The Executive MHA combines monthly on-campus weekend sessions, independent study, and online interaction in an innovative two-year course of study, and requires 42 credit hours of health services management coursework. Students are required to complete a substantial independent research project, which they present during their oral comprehensive examination in their final semester. For additional information about the Executive MHA, please visit http://hmi.missouri.edu/prospective/emha_description.html, or call: (573) 884-0698.

### Admissions Requirements

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MHA program (http://hmi.missouri.edu/prospective/admissions_criteria.html) and the minimum requirements of the Office of Graduate Studies (https://gradstudies.missouri.edu/admissions/eligibility-process). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admission to the University of Missouri, your application materials will be reviewed by both the degree program to which you’ve applied and the Office of Graduate Studies.

### HMI Admissions Information

**Deadline for Fall entrance:** Rolling; priority deadline is March 1

A minimum of a baccalaureate degree from an accredited institution

**Undergraduate GPA:** 3.0 during the last 60 hours of undergraduate course work and any subsequent graduate course work

Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>100</td>
<td>603</td>
</tr>
</tbody>
</table>
Minimum Academics IELTS scores:

<table>
<thead>
<tr>
<th>Item</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>OVERALL</td>
<td>7.5</td>
</tr>
</tbody>
</table>

Minimum GRE Scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal + Quantitative</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>
<td>50th percentile</td>
</tr>
<tr>
<td>On or After August 1, 2011</td>
<td>50th percentile</td>
</tr>
</tbody>
</table>

In lieu of GRE, minimum GMAT score: 50th percentile. HMI also accepts LSAT and MCAT scores.

Required Application Materials

Master’s program applicants should apply online through the Office of Graduate Studies application system (http://gradschool.missouri.edu/admissions/apply). When completing the online application, you will have an opportunity to upload/attach additional documents. Please include the following documents:

- an updated résumé or curriculum vitae;
- a personal essay that:
  - outlines your professional plans and career objectives;
  - explains how you became interested in health services management/health informatics and how your prior training and experience would help your career;
  - includes specific issues and problems in health care you consider challenging and why;
  - indicates if you intend to apply to the traditional (residential) on-campus degree program or the distance education (executive) format

Other required documents:

- Official transcripts of all coursework from all colleges, technical schools and/or universities attended
- Three letters of recommendation (submitted through the Graduate School application system (https://applygrad.missouri.edu/apply))
- Official GRE/GMAT score report (Residential Students only)

You may also be required to submit other documentation and in some cases complete prerequisite courses. Below is a checklist to help make sure your application is complete:

- Request to re-enroll form (for previously admitted students only)
- Application for Change of Degree form (for students already enrolled in a Master's degree or Graduate Certificate program)
- Letter of support from your employer (Executive Students only)
- Official TOEFL report (for international applicants only - have official results sent to us; institution code is 6875, our department code is 25 - minimum score of 100 on the Internet-based exam required)
- Prerequisites - links to information about prerequisites for each degree program are available at http://hmi.missouri.edu/prospective/rmha_description.html

Department of Health Management and Informatics

Graduate level academic programs at MU in the area of Health Informatics and Bioinformatics are offered through the Department of Health Management and Informatics (HMI) in the School of Medicine. The HMI Department develops, translates, and disseminates knowledge, innovations, and evidence-based solutions to improve health management and informatics performance in complex health systems. HMI advances the health of Missouri’s communities, the nation, and international partners by:

- Creating a culture of collaborative relationships in research, education, and service to generate innovative ideas and solutions;
- Providing professional health management and informatics education and fostering lifelong learning;
- Delivering technical assistance and consultation by partnering with health, human service, and policy-making organizations; and
- Developing innovative commercial products and services for health- and education-related application

Degrees & Certificates Offered

The HMI Department offers the following degrees and graduate certificate programs:

- Master of Health Administration (executive and residential cohort)
- Master of Science in Health Informatics and Bioinformatics (executive and residential cohort)
- Dual Master of Health Administration and Master of Science in Health Informatics (executive and residential cohort)
- Graduate Certificate in Health Informatics (executive and residential cohort)
- Graduate Certificate in Health Ethics (100% online format available)
- Graduate Certificate in Informatics for Public Health

**  Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

HMI offers two health informatics and bioinformatics courses that are cross-leveled: HMI 4420/HMI 7420 Fundamentals of Bioinformatics and HMI 4440/HMI 7440 Health Information Technology. Undergraduate students may enroll in the 4000-level sections of these classes for Undergraduate credit. Undergraduate students who are eligible for dual enrollment may, with permission, take courses through HMI for Graduate credit. For more information on dual enrollment, please see http://registrar.missouri.edu/policies-procedures/dual-enrollment.php.

While MU does not offer undergraduate degrees specifically in Health Informatics, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• MS in Health Informatics and Bioinformatics (p. 726)
  • with emphasis in Bioinformatics (p. 728)
  • with emphasis in Health Informatics (p. 728)

• Graduate Certificate in Health Informatics (p. 728)

About the Master of Science in Health Informatics and Bioinformatics

The Master of Science in Health Informatics and Bioinformatics program prepares professionals to meet critical and complex challenges in applying information technology within the health industry. It provides recognized national and global leadership in health informatics education.

The residential master's degree prepares students for careers in developing and evaluating clinical information systems, data and knowledge management, decision support, and doctoral study in health informatics. The executive master's degree advances the careers of physicians, managers, nurses, information system designers, consultants, entrepreneurs, and others committed to the application of information technology for improving the quality, safety, and efficiency of health services.

The program admits diverse cohorts of students from Missouri, other states, and other nations. During the admissions process, the program seeks learners with strong academic records, maturity, motivation, leadership capabilities, and career potential. Primary post-graduation placements include doctoral programs, health systems, hospitals, academic medical centers, physician group practices, outpatient facilities, information technology companies, consulting firms, government agencies, insurance entities, and other points of health services delivery.

Whereas the residential master’s degree format is a traditional on-campus residential program, the executive master’s degree is offered in a hybrid model featuring both on-campus and distance learning. In both formats, emphasis is on fostering an individualized and collaborative culture of learning, mentoring, and professional development among students, faculty, staff, alumni, and other practitioners. The intent is to prepare students to enable transformational leadership and improve patient care quality, safety, value, and overall level of population health.

MS in Health Informatics and Bioinformatics

Degree Requirements

The residential MS in Health Informatics (MSHI) curriculum requires 36 credit hours of course work, which include foundational coursework in health information technology as well as health administration. Prior coursework in computer science is not required. Residential MSHI students have the option to complete a 12-week internship during the summer following their first year, although it is not required for the degree. HMI's executive-in-residence will work with HI students who wish to complete an internship to find an appropriate placement. For a list of recent internship placements, please see http://hmi.missouri.edu/prospective/educational_partners.html.

The MSHI curriculum integrates learning across computer science, health informatics, and health administration, and also develops students' research interests. Those with excellent academic records are encouraged to pursue a PhD degree in Informatics. Students must maintain a minimum 3.0 cumulative MU graduate grade point average to earn the Master's degree. Individuals with three or more years of professional experience are encouraged to apply for admission to the Executive MSHI cohort (please see information below).

Financial Aid

Further information about costs, financial aid, and external scholarship opportunities is available on the HMI Department's website at: http://hmi.missouri.edu/prospective/financial_aid.html.

Executive MSHI Program

In addition to the residential (on-campus) mode, the MSHI degree is offered in an alternative format for professionals who have significant experience in health informatics. HMI accepts an Executive MSHI cohort to begin in January of each year. The executive MSHI combines three on-campus weekend sessions per semester with independent study and online interaction in an innovative two-year course of study, and requires 33 credit hours of health informatics coursework. Students must complete a substantial independent research project, which they present during their oral comprehensive examination in their final semester.

For additional information about the Executive MSHI degree, please visit http://hmi.missouri.edu/prospective/emshi_description.html or call (573) 884-0698.

Informatics PhD Program

MU also offers a PhD in Informatics with emphasis in Health Informatics through the MU Informatics Institute (http://muii.missouri.edu).

Admissions Requirements

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MSHI program (http://hmi.missouri.edu/prospective/admissions_criteria.html) and the minimum requirements of the Office of Graduate Studies (https://gradstudies.missouri.edu/admissions/eligibility-process). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the degree program to which you've applied and the Office of Graduate Studies.

HMI Admissions Information

Graduate Certificate in Health Informatics

About the Graduate Certificate in Health Informatics

The Graduate Certificate in Health Informatics offered by the Department of Health Management and Informatics provides learners with the skills necessary to participate in the selection, use, and evaluation of information technology applications throughout the health services industry. The certificate program is designed for students, physicians, nurses, managers, information system designers, consultants, and others committed to the application of information technology for improving the quality, safety, and efficiency of health services.

Students may pursue the HI Certificate in either the residential or executive format. Students who wish to pursue only the HI Certificate must apply to the HMI Department and the Office of Graduate Studies for admission to the Graduate Certificate program. Students currently enrolled in a non-HMI Graduate program also need to formally apply for the Certificate. Students enrolled in the MHA degree program may earn a HI Certificate concurrently with their Master's degree.

The HI Certificate requires the completion of four courses (12 credit hours total). All students must complete HMI 7430 Introduction to Health Informatics, and may choose any three other health informatics courses...
to fulfill the remaining nine hours. Students will choose their courses in consultation with the HMI academic advisor.

HMI 7430 Introduction to Health Informatics 3
HMI 7440 Health Information Technology 3
HMI 7566 Health Informatics Ethics 3
HMI 8435 Information Security, Evaluation and Policy 3
HMI 8437 Data Warehousing and Data/Text Mining for Health Care 3
HMI 8441 Biomedical and Health Vocabularies and Ontologies 3
HMI 8443 Enterprise Information and Solutions Architecture for Strategic Healthcare Operations 3
HMI 8478 Knowledge Management in Health Care 3
HMI 8550 Health Data Analytics 3
HMI 8571 Decision Support in Health Care Systems 3
HMI 8610 Consumer Health Informatics 3
HMI 8870 Knowledge Representation in Biology and Medicine 3

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/51.9999-Gedt-Health_Informatics.html

About the Informatics Institute (MUII)
Building on a tradition of outstanding informatics education and research at Missouri, the MU Informatics Institute is comprised of over 40 faculty from 17 different departments and 8 schools/colleges, including the Colleges of Agriculture, Food, and Natural Resources; Arts & Sciences; Education; Engineering; Veterinary Medicine; School of Health Professions; Medicine; and Nursing. The Institute offers emphasis areas in bioinformatics and health informatics, along with a concentration area in geoinformatics. Each emphasis area and concentration area stress sets and research appropriate to the subfield within the broad area of informatics. A core curriculum provides all students with a foundation of knowledge and tools in biology, computer sciences, health systems, and statistics, after which they complete further coursework in their chosen area. The integrated program assures broad exposure to the field and fosters new insights and innovative research concepts.

Faculty
Associate Research Professor J. Jackson-Thompson**
Assistant Research Professor C. Fulcher**, T. Joshi**, R. Schnabel**
Associate Teaching Professor W. Phillips**
* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate
While MU does not offer undergraduate degrees specifically in informatics, the University does offer baccalaureate opportunities in a number of related areas. Many successful informatics students have received bachelor's degrees in Geography, Computer Science, Statistics, Business, Biology, and Biochemistry before starting their doctorate.

In addition, MUII offers several service courses designed for upper-level undergraduates and master's students to expose students to the fundamentals of bioinformatics.

Graduate
* PhD in Informatics (p. 730)
  • with emphasis in Bioinformatics (p. 731)
  • with emphasis in Health Informatics (p. 732)

Emphasis Areas & Concentration Areas
MUII offers a doctoral degree (PhD) in two emphasis areas: bioinformatics and health informatics (https://muii.missouri.edu). In addition, students may also opt for a doctoral degree with a concentration area in geoinformatics.

Students with areas of interests outside of informatics may also wish to pursue a collaborative degree program between MUII and other degree programs. The purpose of the collaborative degree program is to allow students the opportunity to obtain advanced degrees in fields that complement the study of informatics and expand the student's knowledge and applicability.

MUII students may also select the collaborative degree between the Master of Public Health program and MUII PhD in Informatics program. Students must be accepted by both MUII and the MPH program to be eligible. Upon completion of the PhD requirements for the Informatics Institute and degree requirements for the MPH in Health Promotion and Policy with focus on Informatics, students will receive both the PhD in Informatics and MPH degrees. For a full list of courses for the MPH in Health Promotion and
Policy with Focus on Informatics, please visit the MPH program website (http://publichealth.missouri.edu/.html).

Resources and Facilities
To support the Big Data research and training programs of Informatics Institute, in 2014 the institute secured a National Science Foundation Major Research Instrumentation (MRI) grant to acquire high performance computing (HPC) equipment for data-intensive applications with hybrid cloud computing needs. The equipment ($880,000) is comprised of 89 nodes: (i) 56 16-core CPU nodes, each with 128 GB RAM, (ii) 2 high-memory nodes, each equipped with 4 8-core CPUs and 1TB RAM (one node)/512GB RAM (one node), (iii) 15 K20 nodes, each equipped with an Nvidia K20 (Kepler) 2,496-core GPU, 2 six-core Xeon E5 processors and 64 GB RAM, (iv) 15 Xeon Phi nodes, each equipped with an Intel Xeon Phi 5110P coprocessor, 2 six-core Xeon E5 processors and 64 GB RAM, and (v) a head node for the cluster. The basic CPU nodes allow supporting traditional MPI, MapReduce, and Spark applications; high-memory nodes are currently required by next generation sequence analyses, and hybrid (Nvidia K20 and Intel Xeon Phi) nodes accommodate existing and new informatics applications accelerated on many-core devices. Intel Phi coprocessors particularly satisfy the requirements of users that need to port existing applications written with traditional parallel programming models (such as OpenMP, MPI and Intel TBB) to many-core processors, without investing the significant development time required for implementation in environments such as CUDA and OpenCL.

Faculty Areas of Research Interest
Faculty research covers a wide range of interests including structural bioinformatics, systems biology, cancer informatics, chemical informatics, epigenomics, phenomics, text mining & understanding, electronic health records, evidence-based medicine, personalized medicine, human-computer interactions in health care, consumer informatics, patient safety, public health informatics, geospatial informatics, information retrievals, biomedical data mining & knowledge discovery, and machine learning. For a list of faculty members and their research areas, please visit our web page (https://muii.missouri.edu/people). (http://muii.missouri.edu/people/faculty.php)

Internal Funding
Fellowships and research/teaching assistantships are available for highly qualified applicants. Application information is available on the Institute's website (https://muii.missouri.edu).

PhD in Informatics

<tr>
<th>Internet-based test (IBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>90</td>
<td>577</td>
</tr>
</tbody>
</table>

Item Score
- Minimum IELTS Score

- Sufficient background and training to pursue advanced degree in informatics

All Required Documents
Students are required to send ALL required application materials through the Office of Graduate Studies on-line application system. To begin your application, please see the ApplyYourself website (http://gradschool.missouri.edu/admissions/apply).

1. Curriculum Vitae
2. Statement of Purpose, which should include a summary of why the applicant is interested in pursuing an advanced informatics degree, a brief description of your previous research experiences, the specific area of informatics you are interested in pursuing, and your future career goals and plans in the informatics field.
3. GRE/GMAT scores. Use institution code 6875. The departmental code is not required.
4. TOEFL/IELTS scores for international applicants, if required.
5. Three letters of recommendation from faculty or supervisors who can evaluate the applicant’s credentials and potential to become successful in the area of informatics.
6. Scanned copies of transcripts from each college and university attended. If accepted, applicants will be required to have official copies of their transcripts sent directly from the institution to the Office of Graduate Studies.

Optional Documents
Applicants are encouraged to submit representative publications in informatics, if available.

Informatics Doctoral Degree Requirements
The following is a brief synopsis of the general degree requirements; please see the Informatics Institute web site (https://muii.missouri.edu) or the Emphasis in Bioinformatics (p. 731) and Emphasis in Health Informatics (p. 732) for complete details:

- Students must take required and area courses
- Students must pass a qualifying examination
- Students must present at least one institutional seminar annually
- Students are required to complete a comprehensive exam, which includes written and oral elements, within a specified time frame
Exceptional Funding Opportunities - Biomedical Big Data Science Pre-doctoral Training

Funded by NIH T32 (2016-2021)

MU Informatics Institute (MUII) is recruiting SIX top-notch trainees to pursue PhD degree in Informatics through an interdisciplinary training team. Students from basic sciences, life sciences, medicine, and computing disciplines are welcome to apply. Our unique training includes: (1) personalized training modules from core courses of the MS degree in Data Science and Analytics program, Big Data courses from Computer Science, and biomedical informatics courses from MUII, which will expose trainees to the basic concepts, ethics, and working knowledge in Big Data Science; (2) a problem-based learning curriculum in pre-doctoral-level Big Data-related courses, such as Mining Massive Data Sets for Biomedical Applications, designed to foster a team science approach to problem-solving; (3) a student-driven journal club/seminar series, in which students are offered opportunities to present research, pose questions, and receive feedback from peers and mentors. Our interdisciplinary components include (1) required tri-lab rotations to introduce students to animal/veterinary medical research, human medical research, computing/statistical methodologies, and health communications; (2) development of rigorous and reproducible open-source Big Data analytics tools, which will be assessed by the One Health research community after arduous testing; and (3) creation of an Individual Development Plan based on each trainee’s background and career goal prior to joining the program. These positions are open to permanent residents and US citizens only. Women and minority students are encouraged to apply.

Please contact the project director Dr. Chi-Ren Shyu at ShyuC@missouri.edu (shyuC@missouri.edu) for inquiries.

2. Statement of Purpose, which should include a summary of why the applicant is interested in pursuing an advanced informatics degree, a brief description of your previous research experiences, the specific area of informatics you are interested in pursuing, and your future career goals and plans in the informatics field.
3. GRE/GMAT scores. Use institution code 6875. The departmental code is not required.
4. TOEFL/IELTS scores for international applicants, if required.
5. Three letters of recommendation from faculty or supervisors who can evaluate the applicant’s credentials and potential to become successful in the area of informatics.
6. Scanned copies of transcripts from each college and university attended. If accepted, applicants will be required to have official copies of their transcripts sent directly from the institution to the Office of Graduate Studies.

Optional Documents

Applicants are encouraged to submit representative publications in informatics, if available.

Informatics Doctoral Degree Requirements

The following is a brief synopsis of the general degree requirements; please see the Informatics Institute web site (https://muii.missouri.edu) for complete details:

• Students must take required and area courses.
• Students must pass a qualifying examination.
• Students must present at least one institutional seminar annually.
• Students are required to complete a comprehensive exam, which includes written and oral elements, within a specified time frame.
• Students must pass a comprehensive examination at least 7 months before their scheduled defense.
• Students must submit and defend a dissertation describing the results of successful and original research in one of the branches of informatics.
• To show research progress, students are expected to be working toward presenting at conferences and publishing in peer-reviewed journals based on their informatics research.

Coursework Requirements

All students must have at least 72 credit hours at the graduate level, of which 15 credits must be at the 8000-level not including research, problems, lab rotations, or seminar. Transferring credits will be at the recommendation of the student’s doctoral committee and the approval of the MUII Curriculum Committee.

To provide the maximum flexibility and facilitate interdisciplinary study, students will complete their program of study by selecting an additional 15 credits hours of electives from a list of Area Courses found on the MUII website (http://muii.missouri.edu/current_students/program_of_study.php).

Qualifying Exam Process

Students are expected to take the qualifying exam by the end of their third semester in the program. The exam will be based on their previous coursework, lab rotation experience, and one-page research statement. For more information on qualifying exam procedures, please see the MUII student handbook (https://muii-wh-prod.missouri.edu/wp-content/uploads/2017/05/MUII_Graduate_Student_Handbook_Fall2016.pdf).

Comprehensive Exam Process

The comprehensive exam consists of two parts - the written portion, comprised of an R01 research proposal, and the oral exam. For more information on the comprehensive exam process, please see the MUII student handbook (https://muii-wh-prod.missouri.edu/wp-content/uploads/2017/05/MUII_Graduate_Student_Handbook_Fall2016.pdf).

Dissertation Defense Process

The doctoral dissertation defense must be scheduled no sooner than seven months after successful completion of the comprehensive exam. The dissertation must be written on an informatics subject approved by the candidate’s doctoral program committee, must embody the results of original and significant investigation, and must be the candidate’s own work. Please refer to the MUII student handbook (https://muii-wh-prod.missouri.edu/wp-content/uploads/2017/05/MUII_Graduate_Student_Handbook_Fall2016.pdf) for additional information.

Exceptional Funding Opportunities - Biomedical Big Data Science Pre-doctoral Training

Funded by NIH T32 (2016-2021)

MU Informatics Institute (MUII) is recruiting SIX top-notch trainees to pursue PhD degree in Informatics through an interdisciplinary training team. Students from basic sciences, life sciences, medicine, and computing disciplines are welcome to apply. Our unique training includes: (1) personalized training modules from core courses of the MS degree in Data Science and Analytics program, Big Data courses from Computer Science, and biomedical informatics courses from MUII, which will expose trainees to the basic concepts, ethics, and working knowledge in Big Data Science; (2) a problem-based learning curriculum in pre-doctoral-level Big Data-related courses, such as Mining Massive Data Sets for Biomedical Applications, designed to foster a team science approach to problem-solving; (3) a student-driven journal club/seminar series, in which students are offered opportunities to present research, pose questions, and receive feedback from peers and mentors. Our interdisciplinary components include (1) required tri-lab rotations to introduce students to animal/veterinary medical research, human medical research, computing/statistical methodologies, and health communications; (2) development of rigorous and reproducible open-source Big Data analytics tools, which will be assessed by the One Health research community after arduous testing; and (3) creation of an Individual Development Plan based on each trainee's background and career goal prior to joining the program. These positions are open to permanent residents and US citizens only. Women and minority students are encouraged to apply.

Please contact the project director Dr. Chi-Ren Shyu at ShyuC@missouri.edu (shyuc@missouri.edu) for inquiries.

PhD in Informatics with Emphasis in Health Informatics

Admission Contact Information

MUII Staff (mailto: muiiadmissions@missouri.edu)  
241 Engineering Building West  
Columbia, MO 65211-2060  
Phone: 573-882-9007  
FAX: 573-884-8709  
Informatics Institute (MUII) website: http://muii.missouri.edu/  

Admission Criteria

Fall deadline: The deadline for Fall admission is March 1. However, to be considered for departmental and Graduate School fellowships and assistantships, applications should be submitted by January 15.

• Preferred GPA: 3.3 out of 4.0  
• Preferred GRE scores:
All Required Documents

Students are required to send ALL required application materials through the Office of Graduate Studies on-line application system. To begin your application, please see the ApplyYourself website (http://gradschool.missouri.edu/admissions/apply).

1. Curriculum Vitae
2. Statement of Purpose, which should include a summary of why the applicant is interested in pursuing an advanced informatics degree, a brief description of your previous research experiences, the specific area of informatics you are interested in pursuing, and your future career goals and plans in the informatics field.
3. GRE/GMAT scores. Use institution code 6875. The departmental code is not required.
4. TOEFL/ELTS scores for international applicants, if required.
5. Three letters of recommendation from faculty or supervisors who can evaluate the applicant’s credentials and potential to become successful in the area of informatics.
6. Scanned copies of transcripts from each college and university attended. If accepted, applicants will be required to have official copies of their transcripts sent directly from the institution to the Office of Graduate Studies.

Optional Documents

Applicants are encouraged to submit representative publications in informatics, if available.

Medical Pharmacology and Physiology

Pharmacology and Physiology
School of Medicine
MA415 Medical Sciences Building
573-882-4957
https://medicine.missouri.edu/departments/medical-pharmacology-physiology/about

The joining of these two disciplines provides a powerful way to address modern questions of biology.

The department offers MS and PhD degree programs in Pharmacology and Physiology. These programs are designed to prepare students for rewarding teaching and/or research careers in academia, government or the pharmaceutical and biotechnical industries.

Faculty

Assistant Professor C. Baines, T. Domeier*, M. Krenz**, L. Polo-Parada**, J. Smith, G. Sowa**, M. Thakkar**

* Graduated Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in medical pharmacology and physiology, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• MS in Medical Pharmacology and Physiology (p. 735)

• PhD in Medical Pharmacology and Physiology (p. 736)

Monica Elliott
School of Medicine
MA415 Medical Sciences Building
573-882-4957
https://medicine.missouri.edu/departments/medical-pharmacology-physiology/about

The joining of these two disciplines provides a powerful way to address modern questions of biology. The department offers MS and PhD degree programs in Pharmacology and Physiology. These programs are designed to prepare students for rewarding teaching and/or research careers in academia, government or the pharmaceutical and biotechnical industries.

Pharmacology

Pharmacology is a basic medical science that deals with actions of drugs, hormones and neurotransmitters on living processes. Knowledge based on the results of pharmacological research leads to increased effectiveness and safety in the treatment of diseases in man and animals. Pharmacology is different from pharmacy, which is a profession concerned with the preparation and dispensing of drugs.

Physiology

The discipline of Physiology focuses on understanding the integrative function of living organisms from the molecular to the organismal level. As such, physiological research addresses how genes, organelles, cells, tissues and organs are integrated to accomplish the complex functions of living organisms. From a medical prospective, understanding normal function is a prerequisite to understanding disease.
Areas of Study
Regardless of their final degree objectives, students admitted into the departmental graduate programs will participate in a core curriculum during the first year and choose a specific tract leading to either a degree in Pharmacology or in Physiology following successful completion of the first year. The department also offers specially designed curriculum for individuals interested in a combined MD/graduate degree or who have previous relevant medical education.

Departmental Research
The departmental faculty has expertise in a variety of mammalian systems, with emphases in cardiovascular and endocrine physiology and molecular and cellular pharmacology. Individual labs utilize a number of different experimental models ranging from the whole animal studies to cellular, subcellular, biochemical and modern molecular approaches. Human research is also emphasized.

Research problems under current investigation include microvascular control of blood flow; modulation of vascular function by the extracellular matrix; role of the microcirculation in inflammation and diabetes; mechanisms involved in angiogenesis membrane regulation and ion transport; barriers separating circulating blood and tissue; energetics and metabolism of vascular smooth and cardiac muscle; electrophysiology of isolated cardiac vascular smooth muscle and endothelial cells; exercise physiology and regulation of contractile protein functions; and hormonal induction of genetic transcription, intracellular signaling mechanisms and genetic regulation of cell proliferation, cell cycle, cell differentiation and apoptosis; and the pathogenetic mechanisms of alcohol on liver cells.

Partnerships
Cooperative interactions exist with other clinical and basic science departments in the School of Medicine as well as with the Truman Veterans Hospital, the Dalton Cardiovascular Research Center, the College of Veterinary Medicine, Nutrition and Exercise Department and various campus-wide programs in Molecular Biology and Food for the 21st Century. The cooperative research atmosphere encourages staff and students to work across departmental lines and provides a unique opportunity for interdisciplinary training of the students.

Teaching Experience
In addition to course work and research training, all graduate students are required to participate as teaching assistants in laboratory or lecture instruction offered by the department. Such experience enhances the students’ presentation and teaching skills, contributes to their professional maturity, and reinforces a sense of collegiality between students and faculty.

Financial Aid from the Program
Financial support in this program for qualified graduate students is available from several sources. Students also may be eligible for institutional teaching and research assistantships. In addition, there are a number of fellowship awards from the Graduate School and the campus-wide Life Science Program available on a competitive basis through nominations by the Department.

Deadlines for these fellowships are January to mid-February each year. Applicants do not directly apply for these fellowships. Rather the department applies on behalf of successful applicants for admission. Therefore a prospective candidate should submit an application for admission to the department in the preceding fall. Finally, some of our students are supported by research grants of individual faculty members or by predoctoral fellowships from extramural sources.

MS in Medical Pharmacology and Physiology

Admission Contact Information
Monica Elliott
MA415 Medical Sciences Bldg, DCO63.00
Columbia, MO 65211
573-882-4957

Application Deadlines
Fall deadline: January 7
Spring deadline: September 15

Admission Criteria
• Minimum TOEFL scores:
  Internet-based test (iBT)  Paper-based test (PBT)
  61 Effective July 1, 2015 must have score of 80
  500 Effective July 1, 2015 must have score of 550
• Minimum IELTS overall academic score: 5.5
• Minimum GPA: 3.0 in the last 60 hours
• Bachelor’s degree in chemistry, biology, pharmacy or related areas from an accredited college
• Background in biology and chemistry and an understanding of mathematics and physics
• Course work in biochemistry and physiology is highly recommended
• Previous lab or research experience preferred

Students are usually admitted to begin their program in the Fall semester, but applications for admission in other semesters will be considered on a space-available basis. Women and minorities are encouraged to apply.

Students with an appropriate educational background are encouraged to apply for entrance into the PhD program. A master’s degree is not a prerequisite for admission to the doctoral program. The department will consider applications for the MS degree programs from U.S. citizens but PhD degree students will be given priority consideration for financial support. Deficiencies in course work may be remedied during the first years of the graduate program.

Required Application Materials
To the Graduate School:
• All required Graduate School documents
To the Medical Pharmacology & Physiology Program:
• Departmental application
• Personal statement
• Transcripts
• 3 letters of recommendation (use form provided). The letters should be written by individuals knowledgeable of the student’s academic capability.
• Official GRE & TOEFL scores
Degree Requirements

To satisfy requirements for the MS degree, a student must complete the professional plan of study with an average grade of B or better and pass an oral examination over an acceptable master’s thesis. Candidates also must comply with other regulations governing master’s degrees.

Length of Study

MS degree students should normally complete their studies and thesis project within 2-3 years of admission to the degree program.

PhD in Medical Pharmacology and Physiology

Admission Contact Information

Deficiencies in course work may be remedied during the first years of the graduate program.

Required Application Materials

To the Graduate School:

• All required Graduate School documents

To the Medical Pharmacology & Physiology Program:

• Departmental application

• Personal statement

• Transcripts

• 3 letters of recommendation (use form provided). The letters should be written by individuals knowledgeable of the student’s academic capability.

• Official GRE & TOEFL scores

Plan of Study

The PhD plan of study includes at least two years of basic and advanced courses in physiology and/or pharmacology, as well as courses in cell and molecular biology. The students also will be trained in conducting physiological and pharmacological research in the laboratory of individual faculty members during the first year.

Qualifying Examination Policy

The department does not require a formal qualifying examination. Successful completion of the core curriculum and satisfactory performance in conducting scientific research and teaching will qualify students for continuation in the PhD program.

Choosing a Track and Mentor

The student will choose a dissertation mentor at or before the end of the first year and decide whether they wish to pursue the doctoral program in Pharmacology or Physiology.

Comprehensive Examination

All PhD program students must pass a comprehensive examination before the end of the first semester of the third year of enrollment. The usual format of the comprehensive exam includes the writing and oral defense of a research proposal outside of the student’s dissertation research area.

Dissertation

Each student must then carry out a dissertation research project, original in nature, which is expected to contribute significant new knowledge to the area of study. To facilitate this process, each student submits a dissertation research proposal within six months of passing the comprehensive examination.

Oral Defense

Finally, all PhD candidates must pass an oral defense of the dissertation and comply with all university and departmental regulations governing the PhD degree.

Length of Study

The doctoral program normally requires four to five years beyond the baccalaureate degree.

Microbiology

School of Medicine
M616 Medical Sciences Building
(573) 882-8152
https://medicine.missouri.edu/departments/molecular-microbiology-immunology/graduate-program

The Department of Molecular Microbiology and Immunology (MMI) at the University of Missouri School of Medicine has three primary missions:
to foster cutting-edge research on biomedically relevant problems in microbiology, immunology, and virology; to educate strong, independent research scientists; and to provide knowledge-based service to the state, nation and international communities.

Molecular Microbiology and Immunology has a long history of providing graduate and postgraduate education in basic principles of microbiology and immunology, as well as research training opportunities in the laboratories of established scientists with diverse research interests. Faculty expansion has provided new curricular offers with flexibility for personalized scholarly pursuits built in. The breadth of research training includes faculty laboratories in the School of Medicine (http://medicine.missouri.edu), the Bond Life Sciences Center (http://bondlsc.missouri.edu) and the College of Veterinary Medicine (http://vetmed.missouri.edu).

The Department of Molecular Microbiology & Immunology, in partnership with the faculty from the Department of Veterinary Pathobiology (VPB), offers a comprehensive graduate program, Molecular Pathogenesis and Therapeutics Graduate Program (MPT), leading to the Doctor of Philosophy (PhD) degree. Strong scientific interactions among faculty from these and other academic units across campus illustrate the importance of scientific collaborations not only in meeting the research challenges in microbiology and immunology, but also in providing a strong academic environment for the training of the next generation of scientists and educators in these disciplines. The faculty in this training program have achieved international recognition for their scientific contributions and expertise, with their research efforts published in top tier research journals and funded through stringent peer-reviewed federal grants. Many of these investigators serve on scientific review committees for these funding agencies.

This program provides individualized training that is strongly oriented toward basic research in molecular and cellular biology, microbiology, virology, pathogenesis, immunology and host-parasite interactions. MMI offers under the program name of Molecular Pathogenesis and Therapeutics Graduate Program (MPT):

- PhD in Microbiology (Medicine)
- Cooperative Degrees: MD/PhD in Microbiology (Medicine)

Faculty

**Molecular Microbiology and Immunology**

**Professor** D.H. Burke, D. Duan, M.C. Johnson, M. A. McIntosh, M. L. Misfeldt, D. J. Pintel, H. Zaghouani

**Associate Professor** M. R. Baldwin, J. F. Cannon, M. A. Daniels, A. G.Schrum, E. Teixeiro-Pernas

**Assistant Professor** H. Guo,

**Professor Emerita/Emeritus** K. L. Bennett, H. Braley-Mullen, R. A. Finkelstein, H. S. Goldberg, D. R. Lee, K. S. Wise

**Assistant Research Professor** D. Chance, Y. Lai, M.J. Lange, K. Singh

**Assistant Teaching Professor** J. L. Furrer

**Adjunct Professor** S. Sarafianos

**Veterinary Pathobiology**

**Associate Professor** D. M. Anderson, G. Zhang

**Assistant Professor** J. Amos-Landgraf, A. Franz, J. Skyberg

**Jointly appointed to Molecular Microbiology and Immunology**

**Professor** D. Cornelison

**Associate Professor** D. Gil Pagés, B. Hahn, G. Li, S. C. McKarns

**Assistant Professor** P. B. Brown

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

- Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

While the University of Missouri does not offer an undergraduate degree specifically in molecular microbiology and immunology, undergraduates are able to take basic courses offered by Molecular Microbiology and Immunology in the areas of microbiology, immunology and virology. MU does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges within, including courses offered through Biological Sciences, Biochemistry, Pre-Med, Nursing, and Health Professions. The course catalog provides a complete list of these degree options (p. 18).

**Graduate**

- MS in Microbiology (p. 738)
- PhD in Microbiology (p. 738)

School of Medicine

M616 Medical Sciences Building

(573) 882-8152

https://medicine.missouri.edu/departments/molecular-microbiology-immunology/graduate-program

The Departments of Molecular Microbiology & Immunology (MMI), in partnership with the faculty from the Department of Veterinary Pathobiology (VPB), offers a comprehensive graduate program, Molecular Pathogenesis and Therapeutics Graduate Program (MPT), leading to the Doctor of Philosophy (Ph.D.) degree. The Molecular Pathogenesis and Therapeutics Graduate Program is built around scholarly activities with three important missions: cutting-edge research programs to address relevant biomedical problems in microbiology, pathogenesis, and immunology, a graduate training program to educate strong, independent research scientists, and a commitment to provide knowledge-based service to the state, national and international communities that will improve global understanding of the microbial world, infectious diseases and host immunity to infection. Graduate (and postgraduate) education programs offer the basic principles of microbiology, pathogenesis, and immunology as well as research training opportunities in the laboratories of established scientists with diverse research interests.

**Faculty Research**

The program is equipped to support a wide range of research activities at the cutting edge of our diverse science. Faculty research activities focus on key problems in pathogenic microbiology, immunology, molecular biology, genetics, therapeutics, and virology.
Research Facilities and Resources

The research environment at MU with Colleges of Medicine, Veterinary Medicine, Agriculture, Engineering, and Arts and Sciences on one comprehensive campus fosters the development of interdisciplinary scientific interactions that enhance both research and training opportunities for faculty and students alike. The Bond Life Sciences Center represents such an interdisciplinary research enterprise and houses investigators from multiple colleges and departments, including MMI and VPB. Critical to the Molecular Pathogenesis and Therapeutics Graduate Program interests in infectious diseases, pathogenesis, therapeutics, and immunity research, the recent construction of an NIH-funded Laboratory for Infectious Disease Research provides modern BSL3/ABSL3 containment research space and animal holding facilities for the investigation of highly infectious organisms and human select agents. This resource, and the Molecular Pathogenesis and Therapeutics Graduate Program’s partnership with the Midwest Regional Center for Excellence in Biodefense and Emerging Infectious Disease Research, centered at Washington University in St. Louis, position MU in the national network of infectious disease research and training efforts. Please visit the MMI Web site (https://medicine.missouri.edu/departments/molecular-microbiology-immunology/graduate-program) for additional information on MMI’s access to state of the art facilities.

Career Opportunities

Graduates completing this training are prepared to pursue challenging and rewarding professional careers that involve research and teaching at supervisory levels in both the academic and private sectors.

Research and Teaching Assistantships

Students in the doctoral program are awarded research assistantships. Research assistants work with faculty members to obtain practical experience in carrying out a research project through the collection of research data and writing research reports. All students in the graduate program are required to participate as teaching assistants for two semesters during their studies.

If you are interested in a the Molecular Pathogenesis Graduate Program, please see the "Degrees, Majors (Degree Programs), Emphasis Areas, Minors and Certificate (p. 18)" page for the Ph.D. in Microbiology.

MS in Microbiology

Admission to the MPT program to pursue a M.S. degree is not an option, as students are accepted with the intent that they will fulfill the PhD requirements. Only under unforeseen circumstances such as illness, a change in academic interest, or other personal reason, is a student allowed to transfer to the M.S. degree. Requirements are the same as for doctoral candidates, although successful completion of a comprehensive examination is not a requirement for the Master’s candidate. Students opting for a M.S. degree, must complete a research project and write and defend a Master’s thesis in front of their Master’s committee. The Master’s Committee should consist of at least three faculty members including the mentor. At least two of the faculty members should be from the MPT Graduate Program and at least one faculty member from outside of the advisor’s primary department.

For additional graduate degree information please visit our website at: https://medicine.missouri.edu/departments/molecular-microbiology-immunology/graduate-program or Phd in Microbiology (p. 738).

PhD in Microbiology (MED)

Program Overview

The Molecular Pathogenesis and Therapeutic Graduate Program (MPT) was collaboratively designed by the Department of Molecular Microbiology & Immunology (MMI) and the Department of Veterinary Pathobiology (VPB). The MPT Program offers comprehensive graduate-level training leading to the Doctor of Philosophy (Ph.D.) degree. This program provides individualized training that is strongly oriented toward basic research in molecular and cellular biology, microbial pathogenesis, virology, immunology and host-parasite interactions.

Graduates completing this training are prepared to pursue challenging and rewarding professional careers that involve research and teaching at supervisory levels in the academic, government and private sectors.

Graduate students entering into the program should be highly motivated toward a career in research in microbiology. They must have, as a minimum, a baccalaureate degree with an undergraduate record showing superior performance in introductory and advanced coursework in prerequisite subjects (biology, chemistry, physics, and mathematics). They must have taken the Graduate Record Examination and should have superior scores. Additionally, international applicants will require demonstration of English fluency via TOEFL scores. Letters of recommendation from individuals who are qualified to judge should clearly indicate aptitude for, and dedication to, a career in science.

The MMI and VPB Departments are central components of an eminent, interdisciplinary campus program in molecular biology and life sciences, which also involves molecular biologists in Biochemistry and Biological Sciences as well as many other University departments. Campus core facilities provide cell culture and immunology services, DNA sequence analysis, transcriptional analysis, protein structural analysis, transgenic animals, protein expression, proteomics, electron microscopy and molecular cytology.

Program Degree Options

The Doctor of Philosophy (Ph.D.) Degree

The program involves (i) a course of study which includes required and elective course work, (ii) participation in programmatic seminars and journal clubs, (iii) training in teaching through participation in laboratory courses for undergraduates, (iv) a comprehensive examination designed to evaluate a student’s ability to propose and experimentally evaluate a significant scientific question, and (v) the successful completion of a creative and original scholarly research project.

Degree Options

Ph.D. Degree

On average, the graduate degree program will require four to six years of full-time effort, although this may vary depending on the ability and previous experience of the individual student. A Master of Science Degree is not a prerequisite for the Ph.D. degree.

Dual Degree

A program leading to the combined Ph.D. /M.D. degrees can be designed for students who are admitted to the Medical School and to the MPT Graduate Program. It is anticipated that these students will fulfill their first two years of Medical School academic requirements before entering the MPT Graduate Program for the research- oriented Ph.D. degree. All coursework, TA responsibilities, rotations, comprehensive
examination and research requirements are the same as for any other graduate student. Dual degree students will be encouraged to complete research rotations during the summer semesters of their two years of medical curriculum so that a dissertation research project can be initiated immediately upon entering the Ph.D. program. Typically, clinical requirements for the M.D. will be completed after fulfillment of the requirements for the Ph.D.

Degree Requirements

All students in the program are supported by a stipend (currently $25,000 per year) plus tuition costs and basic medical insurance.

Laboratory Rotations

All new graduate students admitted into the MPT Graduate program are required to complete three laboratory rotations starting in the Fall semester and concluding in mid-January before the Spring semester begins. Students will meet with the Director of Graduate Studies prior to each rotation to determine the appropriate laboratory and rotation advisor. Laboratory rotations expose graduate students to research activities within the Program and to the experimental laboratory environment in which they will evolve. Prior to finishing the third laboratory rotation the graduate student selects a mentor based on mutual agreement between the student and the mentor. Once the mentor has been selected, the student will perform his or her doctoral research under the guidance of the mentor in his/her laboratory.

Laboratory Rotation Schedule

The MPT Graduate Student Laboratory Rotation Program represents a vehicle to introduce the research laboratory to incoming students and to stimulate a direct interaction between students, faculty and other program personnel. The program is designed to expose students as quickly as possible to research activities within the Program and to the experimental laboratory environment in which they will evolve.

Laboratory rotations will approximately adhere to the following schedule*:

- **Summer Research Experience** - Start of Summer semester (usually 1st Monday June 4th) - July 27th
- 1st Rotation - August 20th - September 28th
- 2nd Rotation - October 1st - November 9th
- 3rd Rotation - November 12th - January 11th (this allows limited time off for holidays and final exams)

*These dates will change from year to year depending on the start date of the Fall semester and will be set by the Director of Graduate Studies

**With permission of Director of Graduate Studies, Executive Committee, and Department Chairs

Students who wish to enter the program early at the beginning of the summer semester preceding their first academic semester may do so, if financial resources are available.** However, this will be considered a “summer research experience” with one of the faculty members but not an official rotation. This summer research experience should begin no earlier than June 1 and no later than the first day of the Summer semester, and should end on August 15th. This student will still be required to perform three rotations with different faculty advisors, starting in the fall. The student would then be able to select one of those advisors including the “summer research experience” advisor as his or her doctoral advisor. Students engaging in the “summer research experience” will register for 4 credit hrs. of MICROB 9085 Problems (Rotations) for the summer semester and will need to be on campus by the beginning of the MU summer semester (usually first Monday in June).

Required Courses for Graduate Students in Program

- **Fall semester, 1st year (all required):**
  - MICROB 7303 Fundamental Virology (2 credit hrs.)
  - MICROB 7304 Immunology (3 credit hrs.)
  - MICROB 7404 Foundations in Bacteriology and Pathogenesis (3 credit hrs.)
  - MICROB 8050 Graduate Student Survival Skills (1 credit hr.)
- **Three of the following courses** (only one of these may be an approved elective)
  - MICROB 9404 Advanced Bacterial Pathogenesis (4 credit hrs.; offered Spring of odd years only)
  - MICROB 9407 Advanced Immunology (4 credit hrs.; offered Spring semesters of even years only)
  - MICROB 9432 Molecular Biology II (4 credit hrs.; offered every Spring semester)
  - MICROB 9449 Infection and Immunity (4 credit hrs.; offered every Fall semester)
  - MICROB 9001 Topics in Microbiology (4 credit hrs.; every other Spring semester of odd years offering as Advanced Virology)

- Approved 8/9000 current literature-based elective (3-4 credit hrs.)
- 8000/9000-level electives: The DGS and the Curriculum Committee must approve these courses. They should also be approved by the student’s doctoral committee (examples of courses still needing approval are given below):
  - V_PBIO 8436 Pathogenic Mechanisms in Veterinary Pathobiology (3 hours)
  - BIO_SC 8320 Developmental Genetics (3 hours)
  - BIO_SC 8440 Integrative Neuroscience I (3 hours)
  - BIO_SC 8442 Integrative Neuroscience II (3 hours)
  - MPP 9426 Transmembrane Signaling (4 hours)
  - MPP 9435 Molecular Exercise Biology (3 hours)
  - V_PBIO 8641 Introduction to Research Ethics (1 credit hr.; every Spring semester)
  - MICROB 9087 Seminar in Microbiology (required to take this 4 times: 2nd-5th years) (1 credit hr.; every Spring semester)
  - MICROB 9043 Advanced Medical Microbiology (credit for teaching) (2 credit hrs.; every semester)

Other duties

- Act as a teaching assistant (TA) in MICROB 2800 or MICROB 3200 for two semesters (to be completed during the first two years, but not during the Fall semester of the first year).
- Attend Program seminars (any invited speakers and student seminars) on Wednesdays at 1:15 pm usually in Monsanto Auditorium in the Bond LSC; attendance will be taken; enroll in MICROB 9087 Seminar in Microbiology for 1 credit hr. in the Spring semesters of years 2-5. **You will need to give a seminar during those years; course grade will be determined by attendance and your presentation.**
- English-Language Proficiency Requirements for International Students

Any graduate student who completed primary and secondary education (equivalent of K-12 in the U.S.) in a country where
Goals and Purpose of Qualifying and Comprehensive Exams

Qualifying Exam

The goal of this exam is to determine whether the student is qualified to enroll in advanced graduate courses as well as intellectually prepared to perform research in this program. Passage of the four fundamental required courses implemented in Fall 2013 will constitute passage of the qualifying exam. The guidelines for this process are covered in greater detail in Section VI of our MPT Graduate Student Handbook (https://medicine.missouri.edu/sites/default/files/MPT_GRADUATE_HANDBOOK_20141.pdf).

Comprehension Exam

The purpose of the comprehensive exam is to certify that the student has sufficient scientific knowledge (from the course work) and research insight to advance to candidacy for the Ph.D. This knowledge and insight are examined in this program through the student writing and orally defending an NIH-style research grant proposal. This examination will be administered at the end of the fall semester of the third year. The guidelines for this process are covered in greater detail in Section VII of the MPT Graduate Student Handbook (https://medicine.missouri.edu/sites/default/files/MPT_GRADUATE_HANDBOOK_20141.pdf).

PhD Dissertation Guidelines

The final educational requirement for the Ph.D. degree is the written and oral presentation of a novel and creative piece of scholarly research that represents new information and significantly advances knowledge in that field of research. The dissertation project must be approved by the student’s doctoral committee and should demonstrate the student’s scientific maturity and ability to write in a scholarly fashion. At the completion of the dissertation research, the student will present his/her research findings in a public seminar for program faculty and personnel and will defend the project before his/her doctoral committee. The project will be detailed in a formal written thesis that conforms to Office of Graduate Studies guidelines with respect to format. Approval of the scientific content of the thesis is the responsibility of each doctoral committee and requires the signature of each committee member, with no more than one dissenting or abstaining vote. The evaluation will consider the following guidelines with respect to thesis content.

a. Introduction – The manuscript should describe pertinent background material that establishes the foundation for the overall thesis proposed as well as the specific research questions being addressed and the significance of this project with respect to the field.

b. Materials and Methods – The thesis should describe in detail the experimental protocols used in the study; where applicable, references to published protocols should be made, but modifications to such procedures should be defined. The methods may be presented as a component of each Results chapter, or may be combined into a single, separate chapter.

c. Results – Presentation of the data accumulated during the study that is relevant to the thesis being examined and the conclusions reached. The data should be presented in chapter format, with each chapter devoted to particular questions relative to the overall thesis. Since students are encouraged to publish their work during their graduate studies, these chapters may represent those publications (however, the student must be responsible for the writing and presentation of this work in the thesis).
d. Discussion – While each chapter presenting research data may contain a discussion of those specific data, the thesis should be concluded with a summary discussion that presents the student’s overall conclusions about the study and the relevance of this work to the field as a whole. This summary provides the student an opportunity for knowledgeable speculation as to the significance of the work and its impact on the field.

Program of Study
The program involves satisfactory completion of a minimum of 72 hours of graduate study as well as completion of original research and a thesis, which demonstrates research competence. Of the 72 hours graduate credit, 15 hours must be in courses numbered 8000/9000 (excluding research and problems courses, but including up to 4 credit hours of seminar courses).

mmi@missouri.edu

The Molecular Pathogenesis and Therapeutics Graduate Program (MPT) is offered through the Departments of Microbiology and Immunology in the School of Medicine and Veterinary Pathobiology in the College of Veterinary Medicine. This graduate training program is designed to prepare students for an advanced professional career in microbiology and immunology. Emphasis is placed on developing outstanding students for productive supervisory roles in universities and colleges, industry, government and research institutes. Enrollment is limited to those students who show evidence of potential for research.

Application Deadline
Fall deadline: January 10

Admission Criteria
- Minimum TOEFL scores:
  - Internet-based test (iBT) 92
  - Paper-based test (PBT) 580
- Academic International English Language Testing System (IELTS) 6.5
- Minimum GRE scores:
  - When did you take the GRE? On or After August 1, 2011 (No more than 5 years old)
    - Verbal Quantitative Analytical
      - 300 3.0
- Minimum GPA: 3.0
- Bachelor’s degree from an accredited college or university
- Courses in the following: biology; advanced courses in biochemistry and/or molecular biology are highly desirable; chemistry (quantitative or organic); physics; mathematics

The PhD degree is offered only to students who demonstrate a high level of specialized knowledge and clear evidence of research potential.

Required Application Materials
To the Office of Graduate Studies:
- All required Office of Graduate Studies (https://gradstudies.missouri.edu/admissions) documents
- TOEFL score (if international applicant)
- 3 letters of recommendation from individuals competent to comment on the applicant’s potential for graduate research and course
- GRE scores
- Personal statement and research experience
- Copy of TOEFL scores (if international applicant)

Research and Teaching Assistantships
Students in the doctoral program are awarded research assistantships, (currently at $25,000). Research assistants work with faculty members to obtain practical experience in carrying out a research project through the collection of research data and writing research reports. All students in the graduate program are required to participate as teaching assistants for two semesters during their graduate studies.

Degree Completion Requirements
To be accepted for candidacy into the MPT PhD program, all applicants must perform satisfactorily in a core curriculum that includes advanced-level courses in the sub disciplines of immunology, molecular biology and microbial pathogenesis. Under the guidance of a doctoral program committee, a course of study is individually designed to fit each student’s academic background, experience and objectives. Interdisciplinary courses in biochemistry, molecular and cellular biology and genetics provide breadth and balance in the program and enhance the student’s research abilities. In addition, the PhD program consists of the following:
- Practical experience in teaching
- Successful completion of a comprehensive examination that tests the student’s ability to develop an original scientific hypothesis and devise a feasible research plan that will test the hypothesis.
- A demonstration of research and writing ability by completing a scholarly dissertation on an approved research problem that results in the contribution of significant new knowledge. The final examination primarily covers this dissertation research.

University of Missouri Graduate School Application:
Applications should be submitted through the University of Missouri, Office of Research and Graduate Studies (https://gradstudies.missouri.edu/admissions/eligibility-process). Applicants will not be registered with the University of Missouri, Office of Research and Graduate Studies until they have completed the graduate school application and paid the graduate school application fee.

Applicants who are in the United States and reviewed favorably by the Graduate Admissions Committee will be invited to visit the University of Missouri for an interview for which the program defrays expenses. This visit provides an excellent opportunity for the prospective student to meet
the faculty members, talk and interact with our current students, view the University of Missouri-Columbia and the Molecular Pathogenesis and Therapeutics Graduate Program, and experience Columbia, Missouri.

All application materials are filed alphabetically under the family name as indicated by the applicant on the International Student Application form. It is important that all supporting documents use the same name and spelling as the International Student Application so they can be quickly matched up to complete the application file.

Neuroscience

About the Program

One of the most exciting and dynamic fields of modern science worldwide is neuroscience, the study of how the nervous system is organized and how it functions. The field of neuroscience encompasses many disciplines, including biology, biochemistry, computer sciences, electrical engineering (neural modeling of neural networks and biomedical instrumentation), neurology, neurosurgery, pharmacology, physics, physiology, psychology, psychiatry, and radiology. Neuroscientists have advanced our understanding of nervous system development, neural function, injuries of the nervous system, and disease processes. At MU, neuroscientists investigate the molecular and cellular organization of the nervous system, the structure and function of neural systems (including vision and hearing), behaviors generated by the nervous system, and neurological diseases and disorders. For more information about the Neuroscience Program, application materials, and contact information, go to http://neuroscience.missouri.edu.

Faculty

Assistant Professor C. Hagan, T. Lever, L. Milescu, M. Milescu, N. Nichols, I. Ozden

Assistant Research Professor C. Cirstea, R. Whiting

Associate Teaching Professor C. Kuehl-Kovarik

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in neuroscience, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• MS in Neuroscience (p. 743)
• PhD in Neuroscience (p. 743)
• Graduate Certificate in Neuroscience (p. 743)

About the Program

One of the most exciting and dynamic fields of modern science worldwide is neuroscience, the study of how the nervous system is organized and how it functions. The field of neuroscience encompasses many disciplines, including biology, biochemistry, computer sciences, electrical engineering (neural modeling of neural networks and biomedical instrumentation), neurology, neurosurgery, pharmacology, physics, physiology, psychology, psychiatry, and radiology. Neuroscientists have advanced our understanding of nervous system development, neural function, injuries of the nervous system, and disease processes. At MU, neuroscientists investigate the molecular and cellular organization of the nervous system, the structure and function of neural systems (including vision and hearing), behaviors generated by the nervous system, and neurological diseases and disorders.

Students interested in the program are encouraged to contact members of the faculty directly by phone or e-mail, or visit the Interdisciplinary Neuroscience Program website: https://neuroscience.missouri.edu/faculty

Career Opportunities

MU’s Interdisciplinary Neuroscience Program offers talented graduate students a chance to train for a career in one of the most exciting fields of modern science. Most of our students pursue research and teaching careers in basic neuroscience departments at prestigious research universities. Others opt for challenging and rewarding positions in applied fields, such as drug research or neurodiagnostic technology. Whatever their ultimate goals, the graduate neuroscientists who are trained at MU gain a solid understanding of the nervous system and of the experimental methods by which this knowledge is acquired.

Plan of Study

Typical undergraduate majors that constitute preparation for graduate work in neuroscience include, but are not limited to, biochemistry, engineering, biology, computer science, chemistry, physics, neurobiology, physics and psychology.

After completing comprehensive course work in molecular, cellular, systems and behavioral neuroscience, graduate students join a research laboratory and work with other lab personnel to master the relevant technical skills and theoretical concepts in their chosen field. Students in the Interdisciplinary Neuroscience Program have the opportunity to present their findings at lab meetings, seminars, journal club sessions, and both national and international professional scientific conferences.
Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

MS in Neuroscience

Admission Criteria

Fall deadline: December 15

- Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>

- Bachelor's degree or its equivalent

Neuroscience comprises a united field that integrates across many disciplines, and students from a variety of academic backgrounds are encouraged to apply to the Interdisciplinary Neuroscience Program (INP). U.S. residents and international applicants are strongly encouraged to apply.

Required Application Materials

To the Graduate School:
- All required Graduate School documents

To the INP Program:
- Departmental application
- 3 letters of recommendation
- GRE scores
- TOEFL (if applicable)

Graduate Certificate in Neuroscience

The purpose of this certificate is to provide formal recognition to post-baccalaureate students who are taking neuroscience courses and conducting research in neuroscience laboratories. This stand-alone certificate would allow post-baccalaureate students to have a specific, formal indication of their advanced studies and would be very beneficial to students who are considering applying to graduate degree programs or health sciences programs, such as medical or dental school.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/26.1501-Gedt-Neuroscience.html

About the Program

The Nutrition Area Program provides graduate training in the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition.
Specific dietary components being studied for their role in human health in the United States today: obesity, the metabolic syndrome, diabetes, in the prevention and treatment of chronic diseases that are prevalent. The department of Nutrition and Exercise Physiology is the role of diet in psychological, sociological, and economic factors. Investigative approaches include epidemiology, clinical trials, human studies, experimental and transgenic animal models, and cultured cell models.

A total of 72 hours beyond the bachelor's degree, including but not limited to courses from the emphasis areas are required; courses from the Masters degree may be counted at the discretion of the student's committee. At least 15 of the 72 hours must be at the 8000/9000 level (exclusive of research, problems and independent study experiences). Graduate students may elect to take suggested courses from the following emphasis areas: Human/Clinical Nutrition, Public Health Nutrition, Behavioral Science, Food Science and Biochemistry/Cell Physiology. A list of possible courses that fall within these areas can be found on the department website: http://ns.missouri.edu/graduate_phd.html.

**Sample Plan of Study**

Because students in the PhD program are from a wide variety of circumstances, and pursue the PhD at different paces, a sample plan of study is not easily produced. Students are encouraged to work out their plan of study with their advisor.

**Qualifying Process**

Nutritional Sciences Program Applicants must pass a Qualifying Exam before a student is officially admitted to the doctoral program. The Qualifying Exam should be completed by the end of the second semester (D1 form should be filed with the Graduate School). The Qualifying Exam consists of a knowledge-based written exam and an oral exam.
Comprehensive Examination Process

A doctoral student must successfully complete the comprehensive examination within a period of three (3) years beginning with the first semester of enrollment as a PhD student. In addition, the program for the doctoral degree must be completed within three (3) years of passing the comprehensive examination. Time spent in the armed services will not count toward the six (6)-year limit (See Graduate School Active Duty Policy). For any extension of either of these time limitations, the student must petition their faculty advisor/mentor and the academic program’s director of graduate studies in writing during the semester prior to reaching the time limitation. The director of graduate studies will notify the advisor in writing of the decision. The two sections of the examination must be completed within one month. A report of this decision (pdf) (http://gradschool.missouri.edu/forms-downloads/repository/d3.pdf), carrying the signatures of all members of the committee, must be sent to the Graduate School and the student no later than two weeks after the comprehensive examination is completed.

Dissertation Requirements

The dissertation must be written on a subject approved by the candidate's doctoral program committee, must embody the results of original and significant investigation and must be the candidate's own work. All dissertation defenses shall be open to the general faculty. For the dissertation to be successfully defended, the student's doctoral committee must vote to pass the student on the defense with no more than one dissenting or abstaining vote.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Nutritional Sciences (http://nep.missouri.edu/graduate_phd.html) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you applied. Specific information can be found on the department website: http://ns.missouri.edu/grad_admission.html

Nutritional Area Program PhD Applicants are expected to have undergraduate training (lecture and laboratory courses) in general and organic chemistry and biology, a two-semester course in biochemistry, and an upper-level human nutrition course. They must have an average of B or better in science courses (chemistry, biology, physics, biochemistry, mathematics, etc.) taken at an accredited institution and must provide GRE scores. TOEFL scores are required for all international applicants. At this time, the program does not accept students into the doctoral program without a master's degree. A student without a master's degree who would like to pursue a doctoral degree must apply to the master’s graduate program. Once accepted into the master's program it is possible to apply and transfer to the doctoral program after the first year of graduate study. Specified criteria must be met for the transfer to be approved by the Nutritional Sciences Graduate Admissions Committee. Please contact the department for more information on this subject.

Deadline for Applications is December 30th. While applications received after that date will still be considered, they will not be eligible for all fellowships.

Pathobiology Area Program

College of Veterinary Medicine
201 Connaway Hall
Columbia, MO 65211
573-882-6550

About the Pathobiology Area Program

The Pathobiology Area Program is university-wide and staffed by faculty from the College of Veterinary Medicine (Veterinary Pathobiology, Veterinary Medicine and Surgery), School of Medicine (Pathology and Anatomical Science, Molecular Microbiology and Immunology, Biochemistry), College of Arts and Science (Biological Sciences), and College of Agriculture, Food and Natural Resources (Biochemistry, Animal Sciences).

Note: The master of science program in biomedical sciences (p. 714), with an emphasis in veterinary pathobiology, is listed separately in this catalog but shares the pathobiology doctoral courses and faculty list.

Faculty

Clinical Professor: C. Vogelweid*

Clinical Associate Professor: L. Berent*, D. Kim*, T. Reilly*, M. Whitney*

Clinical Assistant Professor: A. Royal*, F Williams III*

Research Professor: A. Ray*
Associate Research Professor: M. Lorson*, A. Stoker**
Assistant Research Professor: A. Ericsson**, H. Men*, M. Shababi*
Professor Emeritus: C.A. Carson*, S. Casteel*, W. Fales*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in pathobiology, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• PhD in Pathobiology Area Program (p. 746)

Director of Graduate Studies:

About the Program

The Pathobiology Area Program is university-wide and is staffed by faculty from the College of Veterinary Medicine (Veterinary Pathobiology, Veterinary Medicine and Surgery), School of Medicine (Pathology and Anatomical Science, Molecular Microbiology and Immunology, Biochemistry), College of Arts and Science (Biological Sciences), and College of Agriculture, Food and Natural Resources (Biochemistry, Animal Sciences).

Note: The master of science program in biomedical sciences (p. 714), with an emphasis in veterinary pathobiology, is listed separately in this catalog but shares the pathobiology doctoral courses and faculty list.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. In this program, various stipends are available, including teaching and research assistantships and postdoctoral fellowships. Check the program Web site or ask the program contact for details.

Career Preparation

Graduate training relates to the major departmental thrust — application of advanced biotechnology to solving today's most perplexing agricultural, biomedical and companion animal questions. The faculty in the Pathobiology Area Program consists of scientists engaged in a wide variety of research programs supported by grants and contracts from government, foundations and private industry.

The Pathobiology Program is designed to prepare students for advanced professional careers in universities and colleges, research institutes, public health, hospital laboratories and industrial research. The broad scope of the program and its organization across departments creates an atmosphere for meaningful interdisciplinary dialogue between graduate students and faculty. Furthermore, it increases availability of advisors, committee members, facilities and equipment for doctoral candidates.

A PhD candidate may choose a plan of research to take advantage of a wide range of interests and specialties in pathology and microbiology.

Facilities and Resources

Facilities are available that are suitable for advanced research in pathology, microbiology and molecular biology. A wide range of equipment for advanced molecular biological procedures is available. BSL-3 biocontainment facilities are available.

Areas of Study

Toxicology, environmental toxicology, comparative medicine, epidemiology and pathogenesis of avian and mammalian diseases (companion animal, food-producing animal and spontaneous disease of laboratory animals), molecular biology, ultrastructure, parasitology, DNA and RNA analysis, biomechanics, physiology, pathophysiology, oncology, bioinformatics, diagnostic anatomic pathology, veterinary neuropathology, pathology of infectious disease, quantitative pathology, molecular genetics, domestic animal genomics, bacteriology/mycology, virology, cell biology, genomics, and antimicrobial resistance.

Admission Criteria

• Fall deadline: no deadline
• Spring deadline: no deadline
• Summer deadline: no deadline
• GRE scores required
• Minimum undergraduate GPA for last 60 credits: 3.0
• Designated faculty mentor
• Professional students with a DVM degree may be eligible to waive the GRE.

International applicants:

Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

Required Application Materials

To the Graduate School:
All required Office of Graduate Studies Admissions documents

To the Pathobiology Area Program:
3 letters of recommendation
GRE scores (required)
Mentor letter of support

Plan of Study

Most of the student's program and examining committees shall be from the Area Program faculty. Under the guidance of a program committee, a course of study is individually designed to fit each student's academic background, experience and objectives. Courses may be chosen from one or more departments, as decided by the student in conjunction with the student's mentor committee, but shall constitute a definite plan of education for research or scholarly investigation in some particular aspect of microbiology, pathology, or comparative medicine. The final examination covers mainly the dissertation.

Degree Requirements

Research is the foundation of graduate and postdoctoral study and students within the Pathobiology Area Program can expect to spend 75 percent of their time engaged in research activities. The PhD degree requires 72 credit hours of work including a minimum of 15 credits of upper-level graduate course work exclusive of research credits. The student must pass a written and/or oral comprehensive examination in the area of study and write, present and defend a dissertation that embodies the results of original and significant investigation by the candidate. Up to 30 hours of post-baccalaureate credit from an accredited institution may be transferred toward the doctoral degree.

Interdisciplinary Area of Pathobiology

The Department of Veterinary Pathobiology in the College of Veterinary Medicine, along with the Department of Pathology and Anatomical Sciences in the School of Medicine and faculty from many other departments throughout the University, offer a PhD degree through the Pathobiology Area Program.

Prospective students must have a solid background in the life sciences, with advanced level experience in microbiology, immunology, genomics, molecular biology, cell biology, pathology, or/and biology.

Research experience at the undergraduate and/or master’s level is also desirable.

The Pathobiology Area Program is designed to prepare students for advanced professional careers in universities and colleges, research institutes, public health, hospital laboratories and industrial research. The broad scope of the program and its organization across departments creates an atmosphere for meaningful interdisciplinary dialogue between graduate students and faculty. A PhD candidate may choose a plan of research to take advantage of a wide range of interests and specialties in pathology and microbiology. Facilities are available that are suitable for advanced research in pathology, microbiology, and molecular biology. A wide range of equipment for advanced molecular biological procedures is available. Various stipends are available, including teaching and research assistantships and postdoctoral fellowships.

Faculty members of the Program guide the selection of coursework and the development of a dissertation project. A list of doctoral faculty eligible to supervise PhD students is available here (http://vpbio.missouri.edu/AreaProgramFaculty.html).

For additional information regarding mentorship in the Department of Pathology and Anatomical Sciences program, please contact:

About Pathology and Anatomical Sciences

The Department of Pathology and Anatomical Sciences in the School of Medicine, along with the department of Veterinary Pathobiology in the College of Veterinary Medicine, offers a PhD degree through the Pathobiology Area Program. Faculty also participate in other doctoral programs such as the Integrative Neuroscience Program, Genetics Area Program, and Molecular Pharmacology and Physiology. The MS degree is designed primarily to prepare students for supervisory roles in basic-science and clinical laboratories, and to offer greater in-depth study in pathology and anatomical sciences concurrent with studies leading to the PhD and/or MD degree.

Faculty

Professor G. E. Davis, W. J. Krause**, J. H. Miles, G. Y. Sun, C. V. Ward**
Associate Professor E. H. Adelstein*, A. A. Diaz-Arias*, E. A. Ingram, R. Mitra*
Lecturer D. L. Dufeu, R. H. Dunn, S. D. Maddux*
Clinical Instructor J. Jones, D. V. Shin
Clinical Professor D. C. Miller*, M. Petrides*
Associate Clinical Professor A. D. Havey*
Assistant Clinical Professor M. Esebua, S. R. Frazier, C. C. Stacy*, M. X. Wang*
Associate Research Professor R. R. Little
Assistant Research Professor J. Cui
Adjunct Professor M. J. Ravosa**, M. S. Stack**
Associate Professor Emeritus L. E. Spollen

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in pathology and anatomical sciences, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and
Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

**Graduate**

- MS in Pathology and Anatomical Sciences (p. 748)

<td>325</td>
<td>N/A</td>
</tr>
</tbody>
</table>

**Required Application Materials to the Graduate School:**

- All required Graduate School documents

**Degree Completion Requirements**

Each candidate for the master's degree is required to complete a minimum of 30 semester hours at the 8000 or 9000 level and maintain a B or better GPA in graduate course work, with no more than 12 hours of research, problems, seminars or special investigations.

Candidates also must satisfactorily complete a thesis. A candidate is expected to demonstrate knowledge of clinical and/or research techniques and to defend the thesis.

Faculty members advise students regarding their program of study and thesis research. A list of graduate faculty eligible to supervise MS students is available on the departmental website.

Required courses and those of special interest should complement the student's academic background and career objectives. The MS degree is designed primarily to prepare students for supervisory roles in basic-science and clinical laboratories, and to offer greater in-depth study in pathology and anatomical sciences concurrent with studies leading to the PhD and/or MD degree.

Admission to candidacy in the master's program is limited to those who hold at least a baccalaureate degree from an accredited college or university.

Preference will be given to students with a college GPA of 3.5 or higher, GRE scores (verbal + analytical) over 325, and strong letters of recommendation.

Each candidate for the master's degree is required to complete a minimum of 30 semester hours at the 8000 or 9000 level and maintain a B or better GPA in graduate course work, with no more than 12 hours of research, problems, seminars or special investigations.

Candidates also must satisfactorily complete a thesis. A candidate is expected to demonstrate knowledge of clinical and/or research techniques and to defend the thesis.

Faculty members advise students regarding their program of study and thesis research. A list of graduate faculty eligible to supervise MS students is available on the departmental website.

Required courses and those of special interest should complement the student's academic background and career objectives.

**Social Work/Public Health**

Students can earn a Master of Social Work (http://ssw.missouri.edu/msw.html) (MSW) and a Master of Public Health (http://
publichealth.missouri.edu) (MPH) with an emphasis in Health Promotion and Policy (http://publichealth.missouri.edu/programs_health_promo_pol.php). Graduates of the dual degree will be well-positioned to find employment as a health policy advocate, health agency administrator or in an integrated behavioral health setting as a care manager, health coach, patient advocate, counselor, or team leader. Students pursuing dual degrees must be independently admitted to each program. Only Regular Standing (http://ssw.missouri.edu/msw_options.html) (RS), full-time MSW students (both clinical or PP&A to each program. Only Regular Standing (http://ssw.missouri.edu/msw_options.html) (RS), full-time MSW students (both clinical or PP&A concentration) will be admitted to the program.

The dual degree reduces total student credit hours by 24-27 credits and reduces the length of study by one academic year. If completed separately, students would be required to complete 105 credit hours (60 credit hours for RS MSW; 45 credit hours for MPH) Students completing both degrees will be required to complete 78-81 credit hours, with 51-54 of those being discipline specific (18 MPH and 33 [PP&A] - 36 [Clinical] MSW) and 27 credits shared between the two programs. Students will complete the both degree programs in 7 semesters, including one summer session. Please see our sample plans of study (http://ssw.missouri.edu/msw_studyplans.html#dual).

Students will apply separately to each program and be admitted to both programs before they are accepted as a dual degree student. Students may apply at any point before beginning graduate school or during the first year of either program. MPH students applying for the MSW program (http://ssw.missouri.edu/mswapp.html) must submit their MSW application no later than April 15th (http://ssw.missouri.edu/msw_deadlines.html#dual) of their first year of study but early application submission is encouraged. MSW students applying for the MPH program must submit their MPH application (http://publichealth.missouri.edu) by December 1st of their first year. Once accepted into both programs, the student must complete the Intent to Complete MSW/MPH Dual Degree form (http://ssw.missouri.edu/docs/msw/dualDegree.pdf).

The advisor for the MSW/MPH Dual Degree program participants will be a faculty member with a joint appointment in both the MSW and MPH Programs. If a faculty member with a joint appointment is not available for advising, the student will be appointed a separate advisor for both degree programs. In cases where student difficulties are experienced that require advisory services other than that available from the advisor, the School of Social Work's formal student advisory process will be followed.

Up to eight hours of transfer credit (http://ssw.missouri.edu/msw_coursecredit.html#dual) may be applied as follows: to one of the two degree programs, or divided between the two degree programs per the advisor(s) and program directors' decision. The eight hours of transfer credit will not be applied separately to each degree program.

Credit requirements, shared hours, and curriculum focus conform to the requirements of the MU Graduate School, the national accrediting body for graduate education in public health (CEPH), and the national accrediting body for graduate education in social work (CSWE). The capstone and internship will satisfy the requirements of both programs and will focus on the intersection of subject matter between social work and public health.

Faculty
Faculty for the Social Work/Public Health dual degree are housed in other departments.

Undergraduate
While MU does not offer undergraduate degrees specifically in social work/public health, the University does offer a dual graduate degree in the subject, as well as baccalaureate, master's and doctoral degree opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate
• MSW/MPH in Social Work/Public Health with emphasis for Public Health in Health Promotion and Policy (p. 749)

The MSW/MPH in Social Work and Public Health will provide the student with solid preparation in each discipline, as well as a deeper understanding of the ways in which the two disciplines overlap through shared coursework. Graduates of the dual degree will be well-positioned to find employment as a health policy advocate, health agency administrator or in an integrated behavioral health setting as a care manager, health coach, patient advocate, counselor, or team leader.

Students will apply for admission separately to each program.

Total Credits: 59-71

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MSW in Social Work program (https://gradstudies.missouri.edu/degreecategory/social-work), the requirements of the MPH in Public Health program (https://gradstudies.missouri.edu/degreecategory/public-health) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

Additional Minors and Certificates

- Interdisciplinary Academic Programs

Undergraduate Certificates

- Certificate in Digital Global Studies (p. 750)
- Certificate in Environmental Studies (p. 751)
- Certificate in General Honors (p. 751)
- Certificate in Global Supply Chain Management (http://catalog.missouri.edu/undergraduategraduate/interdisciplinaryacademicprograms/additionalminorsandcertificates/undergrad-certificate-global-supply-chain-management)

Graduate Certificates

- Certificate in Center for the Digital Globe (p. 754)
- Certificate in Community Processes (p. 756)
- Certificate in Conservation Biology (p. 756)
- Certificate in Epidemiology (p. 757)
- Certificate in Global Public Health (p. 757)
- Certificate in Health Ethics (p. 757)
- Certificate in Informatics for Public Health (p. 757)
- Certificate in Life Science Innovation and Entrepreneurship (p. 758)
- Certificate in Society and Ecosystems (p. 759)

Graduate Minors

- Minor in Ancient Studies (p. 759)
- Minor in College Teaching (p. 760)
- Minor in Gerontology Studies (p. 761)
- Minor in International Development (p. 761)

Certificate in Digital Global Studies

This certificate is designed to prepare students in any discipline for our new global reality and equip them with the knowledge and skills needed to be successful in today's highly competitive global job market. All current MU undergraduate students in any discipline are eligible to participate.

The structure of the certificate includes two required core courses (honors eligible), two elective courses, and an experiential learning component. Below are the details on the required courses that have various cross-listed options. The core courses can be substituted with relevant courses from various disciplines. Electives can be taken from a wide variety of courses offering a digital and/or global component. For more information: http://cdig.missouri.edu/undergraduate/.

The experiential learning component varies depending on the student's field of study and interest, but there should be an emphasis on global relations, cultural awareness, or media technology. This component could be study abroad, service learning, internship, etc. with an MU Center or an outside local, national or international organization. Volunteer work, internships and mission trips not associated with MU credit work are options also.

For additional information about the certificate, contact:
Professor Monika Fischer, Certificate Director
458 Strickland Hall
Columbia, MO 65211
E-mail: globalconnect@missouri.edu

Requirements

- T_A_M/GERMAN/PEA_ST 4810/DST 4805: Case Studies in an Inter/Multicultural World 3
Certificate in Environmental Studies

School of Natural Resources
124 Anheuser-Busch Natural Resources Bldg.
(573) 882-7045
https://omd.missouri.edu/?q=env-st-cert/index

The Environmental Studies Certificate is 15 credit hours minimum of coursework focused on environmental topics. It is available to all MU majors, but because the certificate's goal is to create a complementary educational experience, it is recommended that students select coursework outside of their major.

There are two tracks for the certificate: Natural Dimensions for non-science majors and Social Dimensions for science majors. In general, students with majors in Business, Humanities, Journalism, Social or Behavioral Sciences, Mathematics, or non-science Education majors will pursue the Natural Dimensions track, while students with majors in Natural Sciences, Engineering, or science Education will pursue the Social Dimensions track.

Certificate Requirements

- 6 hours of Natural or Social Dimension courses, which are listed below.
- 3 hours of ABM 2070W or NAT_R 2160
- 6 hours of upper level 2000+ environmental-focused courses. For course options, visit https://omd.missouri.edu/?q=env-st-cert/index.
- A minimum grade of C- is required for each course taken in the certificate. A minimum cumulative GPA in all certificate coursework is 2.0.

Certificate in General Honors

Students who complete 20 or more honors credit hours and have a 3.3 MU GPA may graduate with general honors. The General Honors Certificate is noted on a student's final transcript. Up to six hours of departmental honors courses, six hours of transfer honors courses, and six hours of Learning by Contract courses may be used toward the 20 hours. In order to receive honors credit for an honors designated course, you must earn a "C" or better.

Upon completion of the 20 hours of honors course work, students must apply for their honors certificate. Graduating students must apply for their honors certificate by mid-semester to graduate with general honors and to have the notation on their transcript.

For additional information on the certificate, contact:
MU Honors College
211 Lowry Hall
Columbia, MO 65211
phone: 573-882-3893
fax: 573-884-5700
email: umchonorscollege@missouri.edu
website: http://honors.missouri.edu/contact

Minor in Entrepreneurship

The undergraduate minor in entrepreneurship is built upon three pillars: development of creativity, opportunity for innovative action, and management of entrepreneurial enterprises. It is available to students in the College of Business (BUSI); the College of Human Environmental Sciences (HES); and the School of Journalism (JOURN).

Students who wish to complete the minor are encouraged to declare their intention as soon as possible. This allows the required courses to be effectively integrated into their course schedules along with other courses required for their intended major. An advisory committee will be appointed to make administrative decisions related to the minor (course additions/deletions). The members will be recommended by deans of the participating schools and colleges. Primary responsibility for student advising falls within the home college of the student OR in the unit where students claim the minor (e.g. Arts and Sciences students).
The minor consists of 16 credit hours. Students must complete coursework in management, creativity, and innovation, as well as in a workshop series that represents a common learning experience for all MU entrepreneurship minors. Three hours of coursework is required in each area, and a one hour experiential seminar course. Students must select the final three hours to complete the minor from approved courses in one of the pillars. Each of the academic units that offer the minor recommend a set of courses, which are referred to as tracks. Details on those tracks are below.

**PLUS 1: Experiential Seminar**

| MANGMT 4185 | Problems in Management | 1 |

This seminar gives students exposure to a variety of experiences including lectures, networking with entrepreneurs, and participant observation.
A course designed to help students develop and understand the principles of entrepreneurship.

Recommended Courses:
- ABM 3283 Fundamentals of Entrepreneurship 3
- MANGMT 4700 Principles of Entrepreneurship 3

Course 2: Development of Creativity
The following sample courses are available only to upper-level journalism majors who have taken the required prerequisite coursework

Recommended Courses:
- JOURN 4418 Critical Reviewing 3
- JOURN 4420 Editorial Writing 3
- JOURN 4500 Publication Design 3
- JOURN 4502 Multimedia Planning and Design 3
- JOURN 4508 Information Graphics 3
- JOURN 4550 Basic Photography and Photo Editing 3
- JOURN 4554 Visual Editing for Multimedia 3
- JOURN 4556 Fundamentals of Photojournalism 3
- JOURN 4558 Advanced Techniques in Photojournalism 3
- JOURN 4560 Staff Photojournalism 3
- JOURN 4564 Micro-Documentary Photojournalism and Videography 3
- JOURN 4662 Global News Across Platforms 3
- JOURN 4700 Participatory Journalism 3
- MANGMT 4710 The Entrepreneurial Process 3

Course 3: Organizational & Business Fundamentals
Students must take one course to develop a background in one of the general functions of a new business.

Recommended Courses:
- JOURN 4734 Journalism and Chaos: How to Understand and Cover 21st Century Business Models 3
- ACCTCY 2010 Introduction to Accounting 3
- ABM 3224 New Products Marketing 3
- MANGMT 3000 Principles of Management 3
- MANGMT 4730 New Business Planning and Management 3
- FINANC 2000 Survey of Business Finance 3

Course 4: Opportunity for Innovative Experience and Action
Students take an internship that offers an opportunity to develop experience in innovation or students take an additional course 3 (management) or course 2 (creativity).

Recommended Courses:
- JOURN 4940 Internship in Journalism 1-6
- JOURN 4736 Changing Media Business Models 3

Course 5: Practicum Capstone
A capstone experience that requires students to synthesize entrepreneurial coursework or provides them with an opportunity for experiential learning toward an innovative outcome.

Recommended Courses:
- JOURN 4734 Journalism and Chaos: How to Understand and Cover 21st Century Business Models 3
- MANGMT 4720 Experiential Entrepreneurship (pending approval) 3
- MANGMT 4730 New Business Planning and Management 3

Recommended Courses:
- INFOTC 4500 Team-Based Mobile Device Application Development 3
- JOURN 4974 Advanced Internet Applications for Radio/TV News 3
- JOURN 4992 Reporting, Editing and Marketing of Converged Media 3
- JOURN 4994 Magazine Publishing 3

PLUS 1: Experimental Seminar
In their last year of study, students take a (1 hour) experiential seminar that involves interacting with the on-campus offices that work with start-ups, innovators and entrepreneurs.

Recommended Courses:
- MANGMT 4185 Problems in Management 1

This seminar gives students exposure to a variety of experiences including lectures, networking with entrepreneurs, and participant observation.

JOURN Strategic Communication Track

JOURN Strategic Communication Track
Course 1: Management of Entrepreneurial Organizations & Enterprises
A course designed to help students develop and understand the principles of entrepreneurship.

Recommended Courses:
- ABM 3283 Fundamentals of Entrepreneurship 3

Course 2: Development of Creativity (within the major requires pre-reqs/consent of instructor)

Recommended Courses:
- JOURN 4208 Strategic Writing II ((copywriters)) 3
- JOURN 4228 Strategic Design and Visuals II ((art directors)) 3
- JOURN 4256 Public Relations 3

Course 3: Organizational & Business Fundamentals
A course designed to develop a background in one of the general functions of a new business.

Recommended Courses:
- ACCTCY 2010 Introduction to Accounting 3

Course 4: Opportunity for Innovative Experience and Action
Students take an internship that offers an opportunity to develop experience in innovation or students take an additional course 3 (management) or course 2 (creativity).

Recommended Courses:
- JOURN 4734 Journalism and Chaos: How to Understand and Cover 21st Century Business Models 3

Course 5: Practicum Capstone
Experimental learning courses, where the student and the supervisor crate an opportunity for innovative output.

Recommended Courses:
- JOURN 4970 Strategic Campaigns 3
- MANGMT 4720 Experiential Entrepreneurship (pending approval) 3

PLUS 1: Experimental Seminar
In their last year of study, students take a (1 hour) experiential seminar that involves interacting with the on-campus offices that work with start-ups, innovators and entrepreneurs.

**Graduate Certificate in Center for the Digital Globe**

The Center for the Digital Globe graduate certificate is a 12 credit hour graduate certificate program established by the College of Business, School of Journalism, School of Law and the Department of Textile and Apparel Management in the College of Human Environmental Sciences. The Center for the Digital Globe offers two graduate certificate options. The requirements for each are outlined below.

**Stand-Alone Certificate (For non-degree graduate students and students completing professional degrees) OR Graduate-Degree-Dependent Certificate (For students completing a graduate degree)**

I. CDiG STAND-ALONE CERTIFICATE
(For non-degree graduate students and students completing professional degrees)

The Center for the Digital Globe, established by the College of Business, School of Journalism, School of Law and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers a 12 credit hour interdepartmental certificate to non-degree graduate students and professional students of the University of Missouri. The prerequisite for the stand-alone certificate is a baccalaureate degree. The certificate program supplements the students’ studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students’ successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization. Students receiving the stand-alone certificate will have demonstrated competencies in:

**Technology** - Students need not have achieved mastery of specific engineering, programming or application skills. Instead, the students must demonstrate a working understanding of how digital technologies function.

**Global Communication** - One of the primary characteristics of digital technologies, and particularly the Internet, are their function as worldwide communications media. Whether from the perspective of journalism, business or the law, the impact of these new communications channels has been substantial. Students should achieve an understanding of how new media are different from print or broadcast media and the consequences of those differences.

**Business** - Students should be well grounded in the principles, opportunities and ethical uses of electronic commerce and its impact on journalism, law and commercial practices.

**Culture and Society** - Digital media raise recurrent questions which call for political and social solutions. Students should be able to understand the broader issues raised by technological change and be prepared to take positions of leadership as such issues present themselves. Examples of such issues are questions of globalization, political boundaries, access, ownership and uses of information, marketing, etc. To achieve the goals of the certificate and assure its value to students, the University and prospective employers or donors, the certificate program enjoys certain characteristics. Perhaps most fundamental is the interdisciplinary nature of the program. While each department has the capability of offering a course emphasis, track or intra-departmental certificates to students in the area of technology and commerce, one of the fundamental concepts underlying the Center is the value and necessity of approaching these issues from the perspective of various disciplines. With these principles in mind, the program has been designed to assure that the interdisciplinary character of the course of work will be emphasized. The required course work compels students to come together for an interdisciplinary introduction to their studies and permits them to work separately and within their respective disciplines for further study. Students come together for a concluding experience that involves working collectively through a case study.

**Academic Requirements for the Stand-Alone Certificate:**

**Eligibility:**
Prerequisite for the stand-alone certificate is a baccalaureate degree.

Professional students who are pursuing the stand-alone certificate must dually enroll in the Graduate School, be admitted to the CDiG Graduate Certificate Program and receive graduate credit for their 12 semester hours of stand-alone certificate courses. Others seeking this certificate who are not professional students and have not been admitted to Graduate School must also apply and be admitted to the CDiG Graduate Certificate Program. Apply online (https://applygrad.missouri.edu/apply).

**SPECIAL NOTE FOR LAW STUDENTS:** No more than six non-Law credits may count toward the JD degree.

**Credits required for the Stand-Alone Certificate:**
At least 12 eligible credit hours, consisting of an introductory, interdisciplinary course (MANGMT 8100), 6 credit hours in two or more eligible graduate courses, and a concluding seminar/research project course (JOURN 8054). The course of work for graduate certificate students is more specifically described as:

1. 6 credits of graduate course work - The courses taken to satisfy this requirement are those that have been approved by the Center’s faculty in consultation with the academic programs that offer the courses. The approved courses are graduate level courses that address one or more of the competencies specified above. See the Center for the Digital Globe's graduate courses web page http://cdig.missouri.edu/graduate/ for a list of approved courses that meet this requirement.

2. MANGMT 8100 Exploring the Digital Globe, 3 credits (offered fall semesters). This inter-departmental course introduces students to the impacts of technological change and globalization from the perspective of business, law and journalism. Students are introduced to electronic commerce, digitization and globalization to prepare them to respond to the challenges of the digital globe. Students do not acquire specific technological skills; they acquire a working understanding of how digital technologies function. The course is taught by faculty from the journalism, business and law schools, and from the Department of Textile and Apparel Management of the College of Human Environmental Sciences. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.

3. JOURN 8054 Entrepreneurship and Media of the Future, 3 credits (offered Spring semester). This class will join graduate students in journalism and business with media entrepreneurs to develop business plans for real businesses that we expect will be launched
at some point in the Summer and Fall of 2018 (of course, the course will finish in May, but some students may have the opportunity to continue working on these business models after the course has ended). In essence, the class will build to the semester-ending symposium organized by the Center for the Digital Globe (CDiG): the CDiG Spring Symposium on Building Business Models for the Media of the Future (April 2018). At this CDiG Symposium, student groups and entrepreneurs will have a chance to present their plans to a panel of experts (and the audience) who will ask them tough questions about their plans. The CDiG Spring Symposium will be attended by MU students and faculty, will be open to all students and the general public, and will be watched around the world through the digital capabilities at RJI (Reynolds Journalism Institute). After the presentations, the judges will vote on the best student presentation. The winners (1st place, 2nd place, and 3rd place) will receive an award.

4. Grades - Students must maintain a minimum grade of 3.0 or equivalent in each course to receive credit toward completion of the certificate.

Stand-Alone Certificate Requirements Summary and Final Application for Certificate

To be eligible for the stand-alone certificate in the Center for the Digital Globe, students are required to take four courses for graduate credit: two courses offered through Center for the Digital Globe and two electives. The required courses are MANGMT 8100 Exploring the Digital Globe and JOURN 8054 Entrepreneurship and Media of the Future. The two electives should be determined in consultation with the student’s CDiG affiliated advisor. To receive the certificate upon completion of the program, students must also print and fill out the Application for a Graduate Certificate Form located on the Graduate School web site: http://gradschool.missouri.edu/forms-downloads/repository/cert-plan.pdf. The form asks for a list of courses taken by the student to fulfill the certificate requirements. The form must be signed by the student, the CDiG executive director and the graduate dean. For students completing a professional degree, a copy of the student’s approved degree program must be attached to the certificate application form when submitting it for a Graduate Certificate.

II. CDiG GRADUATE DEGREE DEPENDENT CERTIFICATE (for students completing a graduate degree)

The Center for the Digital Globe, established by the College of Business, School of Journalism, School of Law and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers a 12 credit hour interdepartmental certificate to graduate students of the University of Missouri. The certificate program supplements the students’ graduate studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students’ successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization. Students receiving the graduate degree dependent certificate will have demonstrated competencies in:

Technology - Students need not have achieved mastery of specific engineering, programming or application skills. Instead, the students must demonstrate a working understanding of how digital technologies function.

Global Communication - One of the primary characteristics of digital technologies, and particularly the Internet, are their function as worldwide communications media. Whether from the perspective of journalism, business or the law, the impact of these new communications channels has been substantial. Students should achieve an understanding of how new media are different from print or broadcast media and the consequences of those differences.

Business - Students should be well grounded in the principles, opportunities and ethical uses of electronic commerce and its impact on journalism, law and commercial practices.

Culture and Society - Digital media raise recurrent questions which call for political and social solutions. Students should be able to understand the broader issues raised by technological change and be prepared to take positions of leadership as such issues present themselves. Examples of such issues are questions of globalization, political boundaries, access, ownership and uses of information, marketing, etc.

To achieve the goals of the certificate and assure its value to students, the University and prospective employers or donors, the certificate program enjoys certain characteristics. Perhaps most fundamental is the interdisciplinary nature of the program. While each department has the capability of offering a course emphasis, track or intra-departmental certificates to students in the area of technology and commerce, one of the fundamental concepts underlying the Center is the value and necessity of approaching these issues from the perspective of various disciplines. With these principles in mind, the program has been designed to assure that the interdisciplinary character of the course of work will be emphasized. The required course work compels students to come together for an interdisciplinary introduction to their studies and permits them to work separately and within their respective disciplines for further study. Students come together for a concluding experience that involves working collectively through a case study.

Academic Requirements for the Graduate Degree Dependent Certificate

Graduate degree seeking students who want to pursue a Center for the Digital Globe Certificate must complete a Change of Program Form and be formally admitted to the certificate program. Print the Change of Program Form located on the Graduate School web site: http://gradschool.missouri.edu/forms-downloads/repository/change-degree.pdf. See your graduate faculty advisor to process the form.

SPECIAL NOTE: No more than six of the twelve credits necessary for the CDiG Graduate Degree Dependent Certificate may count toward the graduate degree.

Eligibility: Students who have completed their baccalaureate studies and are enrolled in a master’s, doctoral or professional program and working toward a graduate degree at the University of Missouri.

Credits: At least 12 eligible credit hours, consisting of an introductory, interdisciplinary course (MANGMT 8100), 6 credit hours in two or more eligible graduate courses, and a concluding seminar/research project course (JOURN 8054). The course of work for certificate students is more specifically described as:

1. 6 credits of graduate course work - The courses taken to satisfy this requirement are those that have been approved by the Center’s faculty in consultation with the academic programs that offer the courses. The approved courses are graduate level courses that address one or more of the competencies specified above. See the Center for the Digital Globe’s graduate courses page http://
cdig.missouri.edu/graduate/ for a list of approved courses to meet this requirement.

2. MANGMT 8100 Exploring the Digital Globe, 3 credits (offered fall semesters). This inter-departmental course introduces students to the impacts of technological change and globalization from the perspective of business, law and journalism. Students are introduced to electronic commerce, digitization and globalization to prepare them to respond to the challenges of the digital globe. Students do not acquire specific technological skills; they acquire a working understanding of how digital technologies function. The course is taught by faculty from the journalism, business and law schools, and from the Department of Textile and Apparel Management of the College of Human Environmental Sciences. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.

3. JOURN 8054 Entrepreneurship and Media of the Future, 3 credits (offered Spring semester). This class will join graduate students in journalism and business with media entrepreneurs to develop business plans for real businesses that we expect will be launched at some point in the Summer and Fall of 2018 (of course, the course will finish in May, but some students may have the opportunity to continue working on these business models after the course has ended). In essence, the class will build to the semester-ending symposium organized by the Center for the Digital Globe (CDiG): the CDiG Spring Symposium on Building Business Models for the Media of the Future (April 2018). At this CDiG Symposium, student groups and entrepreneurs will have a chance to present their plans to a panel of experts (and the audience) who will ask them tough questions about their plans. The CDiG Spring Symposium will be attended by MU students and faculty, will be open to all students and the general public, and will be watched around the world through the digital capabilities at RJI (Reynolds Journalism Institute). After the presentations, the judges will vote on the best student presentation. The winners (1st place, 2nd place, and 3rd place) will receive an award.

4. Grades: Students must maintain a minimum grade of 3.0 or equivalent in each course to receive credit toward completion of the certificate.

Graduate Degree Dependent Certificate Summary and Final Application for Certificate

To be eligible for the graduate degree dependent certificate in the Center for the Digital Globe, students are required to take four courses: two courses offered through Center for the Digital Globe and two electives. The required courses are MANGMT 8100 Exploring the Digital Globe and JOURN 8054 Entrepreneurship and Media of the Future. The two electives should be determined in consultation with the student’s graduate advisor. SPECIAL NOTE: No more than six of the twelve credits necessary for the CDiG Graduate Degree Dependent Certificate may count toward the graduate degree. To receive the certificate upon completion of their program, students must print and fill out the Application for a Graduate Certificate Form located on the Graduate School web site: http://gradschool.missouri.edu/forms-downloads/repository/cert-plan.pdf The form asks for a list of courses taken by the student to fulfill the certificate requirements. The form must be signed by the student, the CDiG executive director and graduate dean. A copy of the student’s approved graduate degree program must be attached to the certificate application form when submitting it for the CDiG executive director’s approval. The form then must be submitted to the Graduate School, 210 Jesse Hall.

FOR ADDITIONAL INFORMATION:

See the Center for the Digital Globe web site for further program details, including contact information, courses, affiliated faculty list, etc.: http://cdig.missouri.edu/graduate/.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/52.0208-Gedt-Center_Digital_Globe.html

Graduate Certificate in Community Processes

The Graduate Certificate in Community Processes offers graduate students and professionals a unique opportunity to develop expertise in how spatial and relational communities function in today’s society: their processes for forming, for maintaining the community and for achieving community objectives. A vital part of the certificate is acquiring applied skills in community facilitation processes or community analytical processes.

For more information please contact:
Dr. Judith Stallmann
231 Gentry Hall
phone: 573-882-6455
e-mail: stallmannj@missouri.edu

Graduate Certificate in Conservation Biology

A certificate in Conservation Biology from the University of Missouri shows that you have interdisciplinary coursework and experience not already met by any single degree program at MU. As Conservation Biology is an interdisciplinary science the curriculum for our certificate provides coursework and experience beyond what is offered in a single degree program. The interdisciplinary nature of the curriculum is designed to help you reach a higher level of competence in conservation biology.

To accomplish this goal, the program has 2 required components:

1. Interdisciplinary coursework that includes at least one course each from the categories of Natural Sciences, Techniques and Policy/Social Sciences with at least 3 credits are from outside your degree program. A list of approved courses (http://www.conservbio.missouri.edu/description.php) is available on the Conservation Biology website.
   • Ph.D. students: 15 credit hours of coursework at the 7000, 8000 or 9000 level, 12 of which may overlap with the degree course of study
   • M.S./M.A. students: 12 credit hours of coursework at the 7000, 8000 or 9000 level, all of which may overlap with the degree course of study
Coursework must include one course each from the following areas: Science, Techniques and Policy (See approved course list)

1. Practical experience through an internship that falls outside your discipline
   • 160 hours of an internship exploring an area complementary to the student's conservation career goals
   • Designed and completed under the guidance of a mentor other than your major advisor
   • Results in a tangible product (e.g. paper, publication, presentation)

### Graduate Certificate in Epidemiology

To allow prospective and current students to become competent in advanced aspects of epidemiological analysis such as assessing population groups and determining their priority health problems, empowering and mobilizing populations in a collaborative public health effort. Prerequisite courses: STAT 7020 and P_HLTH 7952.

### Graduate Certificate in Global Public Health

The Graduate Certificate in Global Public Health includes 15 credit hours of course work and a required international public health experience and may be taken independently or combined with an MPH. Course credits earned for the Graduate Certificate may also be credited toward the MPH degree. It is recommended that Graduate Certificate students start with Interdisciplinary Perspectives in Global Health.

### Graduate Certificate in Health Ethics

The Health Ethics Certificate program is ideal for both students and working professionals such as physicians, nurses, healthcare administrators, and those serving on hospital ethics committees or considering such health ethics issues in their daily employment. The certificate program will help the learner develop an understanding of the ethical issues related to health and healthcare and will foster skill in analyzing and resolving ethical problems and conflicts in the healthcare environment.

The Department of Health Management and Informatics offers the Graduate Certificate in Health Ethics in partnership with the MU Center for Health Ethics. The Certificate may be completed entirely online or through articulation with residential Graduate and professional coursework. While there are multiple educational offerings that may result in certificate acquisition, students must complete a minimum of 12 credit hours from the below approved list:

#### Required Courses

### Graduate Certificate in Informatics for Public Health

The Graduate Certificate in Informatics for Public Health offers to further and meet the growing demand for professional education and
development in the field of public health informatics. The certificate provides participants with basic knowledge of issues and application of informatics in areas of public health including surveillance, prevention, preparedness, and health promotion, and competence in evaluating and discovering solutions for the current and future public health informatics challenges.

The Graduate Certificate in Informatics for Public Health is designed to serve as a stand-alone certificate program for non-degree seeking students, public health care professionals and as an additional option for Master of Science in Health Informatics students, Master of Public Health students, and other Graduate students. Courses taken for the certificate program are not intended to fulfill the requirements of any current Graduate degree at MU.

The Certificate program will launch in Fall 2018, with the first course - HMI 7431 Foundation of Public Health Informatics - offered. Please contact the HMI Department for further information about the certificate program and plan of study options.

Graduate Certificate in Life Science Innovation and Entrepreneurship

Overview

A certificate in Life Science Innovation and Entrepreneurship at the University of Missouri will broaden the training of graduate and professional students from the fields of business, engineering and medicine, among others. A collaborative program among MU’s Trulaske College of Business, College of Engineering and School of Medicine, the program will prepare participants for a wider range of employment opportunities and provide core skills for entrepreneurial endeavors.

Interdisciplinary Curriculum

Through an interdisciplinary approach, the program will allow MU graduate and professional students to receive training to translate life science discoveries into products and services that will improve health. The program will require completion of three three-hour core curriculum courses designed to cover the life cycle of a translational science/business venture, as well as elective courses for a total of 12 hours of course credit. The three-course sequence will be augmented by elective courses that round out the educational needs of particular students.

Program Objectives

- Know and understand the life sciences industry well enough to be familiar with terms, trends, issues, and industry culture in order to be able to recognize needs that may be commercially viable.
- Know and understand the three disciplines represented by the courses such that they are able to assess the commercial viability of a life sciences technological innovation.
- Know how to commercialize new life science discoveries into products and services to improve health in humans and/or animals.

Course Content

School of Medicine
- Nature of discovery
- Protecting intellectual property
- Reimbursement models in health care
- Life science methods and research tools
- Research with industry partners

College of Engineering
- Identification of clinical needs
- Concept screening and selection
- Regulatory pathways and the FDA
- Patents and intellectual property basics
- Design and prototypes

Trulaske College of Business
- Commercialization process
- Market assessment and competitive landscape
- Technology transfer, licensing, and startups
- Sources of capital
- Business plan and market strategy

Admission Requirements

The only prerequisite for the first course in the sequence will be good standing in a graduate/professional program or the consent of the instructor on a case-by-case basis.

Graduate Certificate in Society and Ecosystems - Interdisciplinary

Contact
Sandy Rikoon, Ph.D.
Coordinator Society and Ecosystems Program
200 A Gentry Hall
University of Missouri-Columbia
Columbia, MO 65211
Telephone: 573-882-0861
Email: rikoonj@missouri.edu

Goals
Understanding the complex and dynamic interactions between human activities and natural ecosystems is essential for achieving sustainable development. Developing this understanding in the next generation of scientists, educators and resource management professionals is the primary goal of the University of Missouri's interdisciplinary graduate certificate program in Society and Ecosystems.

The Society and Ecosystems Program (SEP) is a unique interdisciplinary program that prepares students for careers with private and public organizations through advanced graduate level training and research. The certificate program is designed for students with undergraduate-graduate training in agriculture, biology, business administration, economics, engineering, fisheries and wildlife, forestry, geography, geology, rural sociology and related disciplines. Students who are in a graduate or professional program in their area of specialization take two integrated courses and complete a thesis or dissertation that applies more than one discipline. The program is designed to enhance the student's familiarity with disciplinary and interdisciplinary concepts and principles from the social and natural sciences and humanities.

The goal of the program is to develop critical thinking and analytical skills related to:

- sustainable natural resource and environmental management and planning,
- dynamic interactions between social, economic and ecological systems,
- quantitative-qualitative analysis of individual and social behavior,
- cultural interpretations of natural resource and environmental issues, and
- application of knowledge gained in the above areas to the evaluation of public policy.

Admission
Admission to the SEP is open to students who have been admitted to a graduate or professional program in the University of Missouri-Columbia, have undergraduate-graduate training in natural and social sciences, and have interest in interdisciplinary studies. Persons interested in the SEP should contact the Coordinator.

Curriculum
Students must be enrolled in a regular academic department and working toward completion of a graduate degree in a natural resource-related discipline. All students are required to take the following core courses: a) six credits from a department/unit other than the one in which the student is enrolled, b) a three-credit interdisciplinary course on the human dimensions of ecosystem management, and c) three credits of a research seminar in Society and Ecosystems.

The interdisciplinary course examines the sociocultural, economic, ethical and biophysical aspects of ecosystem management with emphasis on the human dimension. It is normally taken during the student's first year. The primary objective of this course is to develop a student's appreciation of a) major issues in the society-ecosystems nexus, b) roles of various disciplines in understanding and resolving socioeconomic-ecological issues, and c) systems analysis. A course requirement is for students to work in multidisciplinary teams to evaluate human effects on and responses to global warming, loss of biodiversity, water pollution, and other contemporary natural-environmental resource issues.

The research seminar exposes students to interdisciplinary research on the interactions between social, economic and ecological systems. Emphasis is placed on the impacts of economic activity, population growth, technology and public policy on the functioning and resilience of ecological systems, and how ecological systems support socioeconomic development at the local, regional and global scales. Speakers for the research seminar include faculty, students, visiting scholars, and private and public officials. Students are expected to present their thesis or dissertation research at the research seminar. Thesis and dissertation research must be conducted on a topic related to the interactions between society and ecosystems. Students completing the SEP receive a certificate in Society and Ecosystems. Recognition of the certificate appears on the student's transcript.

Advisory Committee
The student's plan of study and research topic are selected in collaboration with an advisory committee established in accordance with the requirements of the student's department/unit and the Graduate School. The advisory committee includes at least one faculty member affiliated with the SEP. Graduate school permission is required in cases where it is highly desirable for the three faculty members comprising a masters student's advisory committee to be from different departments/units.

Graduate Minor in Ancient Studies

Interdisciplinary Minor within the College of Arts and Science
http://ancientstudies.missouri.edu/

About the Minor
The Ancient Studies program, created in 1968, is shared among the faculty from six departments at the University of Missouri. This minor provides an opportunity for students to diversify their curriculum and to perceive their field in a broader context than is possible within a departmental program. Students in this program select about one quarter of the total courses from among a variety of courses designated by the participating departments.
A student pursuing a graduate degree in Anthropology, Art History and Archaeology, Classical Studies, History, Philosophy or Religious Studies may elect an Ancient Studies minor at either the M.A. or Ph.D. level. The Department of Classical Studies offers graduate work leading to the master of arts degree in classical languages with emphasis on Latin, Greek or both classical languages. The PhD degree in classical studies requires work in both Greek and Latin.

Contact Information
Department of Anthropology
1205 University Avenue, University Place, Room 1110

Department of Religious Studies
220 Arts & Science Building
573-882-4769

Faculty
Curators’ Professor M. Smith
Associate Professor D. Hooley, S. Langdon, R. Marks, J. McGlew, A. Mori, L. Okamura, M. Rautman, D. Schenker, D. Trout, B. Wallach
Assistant Professor N. DesRosiers, R. Foley, R. Gregory, D. Kelley
Assistant Teaching Professor M. Barnes
Professor Emeritus W. R. Biers, W. Bondeson, J. H. Kullge

Admissions
Ancient Studies Program Requirements
1. Admission into one of the following graduate departments: Anthropology, Art History and Archaeology, Classical Studies, History, Philosophy or Religious Studies.
2. Fulfillment of all the requirements of the major department. The master's degree may be completed within approximately two years; the doctorate normally requires three years of course work beyond the master's level.
3. The minor consists of additional courses to be selected from Ancient Studies courses outside the student's major department; it usually constitutes about one-quarter of the graduate course work. For recognition of the minor, students should apply formally to the current chair of the Ancient Studies Committee.
   a. For the M.A. degree, a minimum of 9 hours from at least two departments.
   b. For the Ph.D. degree, a minimum of 24 hours (including the work for the M.A.) from at least two departments outside the student's home department. These must include at least one course on the 7000-level in each of the two departments.

To the University
General admission and degree requirements for the Graduate School are determined by the Graduate Faculty Senate. However, admission to the Graduate School does not in itself entitle a student to candidacy for an advanced degree. A student must also be accepted for advisement by the faculty of a department or area. Departments and areas establish admission standards that, in many cases, exceed the minimum requirements of the Graduate School. Admission to the Graduate School is based on three considerations:
   • an official transcript showing that the applicant has earned a baccalaureate, DVM, MD or JD degree equivalent to that granted by MU,
   • a grade point average of B or better in the last 60 hours of undergraduate courses, and
   • Official GRE results.

To the Ancient Studies Program
Candidates must have earned a bachelor's degree in an appropriate field; preference is usually given to students who intend to continue their work for a PhD. An application, including a completed MU Graduate School application form, transcript and GRE scores, should be made directly to the department in which the student wishes to study. It must be accompanied by three letters of recommendation concerning the student's academic ability, a copy of a recent term paper, and a short statement from the applicant that sets out professional goals and reasons for pursuing the Ancient Studies minor. Inquiries may be addressed to the directors of graduate studies at the appropriate department.

Financial Support
The Ancient Studies Committee is able to award one fellowship (renewable for four further years) to a doctoral student entering from a University other than MU. In addition, applicants may be eligible for fellowships administered by the Graduate School, including the Gus T. Ridgel Fellowships for Minority Americans. In addition to a stipend, University fellowships include exemption from resident and non-resident educational fees. Some individual departments also offer fellowships, scholarships and other financial assistance for graduate students, including teaching and research assistantships. For information concerning financial aid, write directly to the directors of graduate studies in the department to which you are applying. Financial aid deadlines are frequently earlier than the deadline for applications for admission. In addition to the materials for admission to the Ancient Studies program, applicants for financial support must submit a separate letter to the department applying for fellowship or assistantship support.

Graduate Minor in College Teaching
Approximately 75 percent of faculty positions in the United States are at institutions where the importance of teaching and professional service is equal to or greater than the emphasis on research. The Minor in College Teaching, available to all MU graduate degree-seeking students, demonstrates your preparation as an effective teacher to potential employers.
The Minor in College Teaching (MICT) requires 9 credit hours. This includes a 3-hour core course, a teaching practicum, plus 3-6 elective hours. It is highly recommended that students enroll in ED_LPA 9456, but it is not a requirement.

Core Required Courses - students must complete one of the following:

- ED_LPA 9448 College Teaching 3
- AG_ED_LD 8350 College Teaching of Agriculture, Food and Natural Resources 3
- BIO_SC 8724 College Science Teaching 3
- LTC 8724 College Science Teaching 3

Teaching Practicum
Students must complete a teaching practicum and portfolio, but do not have to officially register for a course in order to complete the requirement. Students opting to enroll in a course can choose from the options below.

Teaching Practicum - options for enrollment

- AG_ED_LD 8995 College Teaching Practicum 3
- ED_LPA 9481 Internship in Educational Leadership and Policy Analysis 1-99
- H_D_FS 9100 Teaching Practicum 2-6
- NURSE 8950 Teaching Nursing Practicum 4
- PHIL 8210 Teaching of Philosophy I 1
- SPC_ED 9940 Internship: College Teaching in Special Education 3
- PSYCH 9910 Teaching of Psychology Practicum 1-99

Elective Courses

Teaching with Technology Elective Courses

- IS_LT 9467 Technology to Enhance Learning 3
- IS_LT 9484 Teaching Online Courses 3

Disciplinary Teaching Elective Courses

- AG_ED_LD 8330 Advanced Methods of Teaching 3
- AG_ED_LD 8350 College Teaching of Agriculture, Food and Natural Resources 3
- AN_SCI 8725 Science Outreach: Public Understanding of Science 1-2
- BIO_SC 8725 Science Outreach: Public Understanding of Science 1-2
- LTC 8712 Inquiry and the Science Curriculum 3
- LTC 8900 Seminar in Curriculum and Instruction 1-3
- CLASS 7700 Advanced Study in the Teaching of the Classics 3
- ESC_PS 7115 Human Learning 3
- ESC_PS 8320 Advanced Human Learning 3
- ESC_PS 8350 Cognition, Learning and Instruction 3
- ED_LPA 9440 Race, Gender, and Ethnicity in Higher Education 3
- ED_LPA 9442 Curriculum Philosophy and Development in Higher Education 3
- ED_LPA 9447 College Student Culture and Environment 3
- ED_LPA 9449 History of Higher Education in the United States 3
- ED_LPA 9455 The Community College 3
- ED_LPA 9456 The Professoriate 3
- ED_LPA 9459 Comparative and International Education 3

For additional information, contact:
Ashley Siebenaler, Senior Academic Advisor
Graduate School
210 Jesse Hall
Columbia, MO 65211

phone: 573-882-8006

Graduate Minor in Gerontology Studies

The graduate minor in gerontology consists of nine to 15 hours of aging-related course work approved as a graduate minor by the student’s department/discipline. The MU Interdisciplinary Center on Aging will collaborate and provide assistance to both the student and his or her advisor. Twenty-three courses in more than 10 disciplines can be supplemented by independent and topics courses. Mentoring from experienced researchers on interdisciplinary research teams contributes to the learning curve of students specializing in aging studies. More than 40 teams are located throughout the university. Students are encouraged to contact the Interdisciplinary Center on Aging for help connecting with these productive groups of scholars.

For additional information, contact:
MU Interdisciplinary Center on Aging
M245A Medical Sciences Building
Columbia, MO 65212
phone: 573-884-3337
email: aging@missouri.edu
website: http://medicine2.missouri.edu/aging/education.html

Graduate Minor in International Development

The requirements for acceptance and completion of work for the minor are as follows:

1. The student must be enrolled as a master’s or PhD candidate in good standing at MU.
2. A formal request to be included in the minor must be made in advance of taking courses, to the director, Associate Professor Corinne Valdivia, 214D Mumford Hall. This request should be approved by the student’s advisor. A copy will be sent to the Graduate School.
3. Once the student is admitted to the minor, s/he should seek advisement from the director and his/her advisor concerning which
courses to take. The plan of study must be submitted to the Graduate School no later than the semester before graduation.

4. The student must satisfactorily complete a total of twelve credit hours in courses dealing with Third World Development. At least six of the twelve hours must be taken in at least two departments outside the student’s home department.

5. Foreign language courses are not required, but students who are not fluent in a second language are strongly encouraged to take intensive language courses to develop competency. Credit for language courses does not count toward the twelve hours of credit required for the minor.

6. When the required twelve hours of credit are completed from approved courses, the student’s advisor should inform the director, who will in turn inform the policy committee which governs the operation of the minor. This should be done in advance of the student’s orals to give members of the policy committee an opportunity to sit in on the examining committee if they so desire.

7. The certificate is only awarded after all departmental and Graduate School requirements for the advanced degree have been satisfied. An overall grade point average of 3.0 is required for the twelve hours within the minor.

Honors courses offered through the Honors College include the following:

- **Honors Curriculum**
  - Students and faculty allow students to experience a small-college atmosphere within a large research university.
  - Encourages interdisciplinary and experiential learning.
  - Offers personalized advising through a team of professionally-trained advisors.
  - Gives honors students maximum flexibility to serve their individual interests.
  - Taught by many of the university's best professors, encourages close interaction between students and faculty to allow students to experience a small-college atmosphere within a large research university.

Opportunities in the Honors College are described below.

**Honors College**

The Honors College is a community of motivated and high-achieving students from all the undergraduate colleges at the University of Missouri. The Honors College offers an innovative and dynamic curriculum that encourages in-depth study in traditional fields of learning as well as other kinds of intellectual inquiry, including interdisciplinary and experiential learning. The College fosters scholarly engagement through research opportunities, study abroad, internships, and other experiences that expand learning beyond the classroom. Students receive personalized advising through a team of professionally-trained advisors.

The Honors College gives honors students maximum flexibility to serve their individual interests. Honors courses, taught by many of the university's best professors, encourage close interaction between students and faculty to allow students to experience a small-college atmosphere within a large research university.

Opportunities in the Honors College are described below.

**Honors Curriculum**

Honors courses offered through the Honors College include the following:

- **Humanities Series.** This series of historically-organized courses provides an interdisciplinary perspective on art history, literature, music, philosophy, and religion.
- **Social and Behavioral Sciences Series.** This series of thematically-based courses provides an interdisciplinary perspective on the behavioral and social sciences, including cultural geography, economics, family studies, history, psychology, and sociology.
- **Science Series.** This series of thematically-based courses provides an interdisciplinary, hands-on laboratory approach to science for non-science majors. It is designed to introduce students to the methods, range, and big ideas of science.
- **Constitutional Democracy Series.** These courses study the same texts and work through the same questions and concerns that the nation's early leaders and citizens engaged with during the years spanning from before the American Revolution through the aftermath of the War of 1812.
- **Honors Discussion Groups and Seminars.** These are small and informal courses typically focused on a special topic.
- **Career Explorations Courses.** These lower-level courses are designed to introduce students to different career choices in fields like journalism, medicine, health, nursing, and law.
- **Honors Tutorials.** These courses are informal discussion groups of 2-5 students and a faculty member. Tutorials focus on special topics that change from semester to semester, depending on which faculty members are offering them. They are based on the Oxford-style of learning, with heavy emphasis on conversation and in-depth investigation.
- **Honors Independent Study Courses.** These courses provide honors students with an opportunity to explore topics (typically of the student's choosing) with a faculty member. Credit is available for research, internships, and independent academic study.
- **Honors Colloquia.** These courses focus on interdisciplinary topics and typically adopt a more flexible and experimental approach to teaching.
- **Honors Learning-by-Contract.** This arrangement allows honors students to take a non-honors course for honors credit by completing additional or alternative work. To do an Honors Learning-by-Contract, students must enter into a contractual agreement with a professor and gain approval from the director of the Honors College. Contract forms are available on our website.
- **Honors Credit via Graduate Course Work.** Honors students may earn credit toward the Honors Certificate by taking graduate-level classes. Graduate Course Work applications can be found on our website.
- **Honors Courses offered through individual departments.** These include special topics courses and honors sections of regularly-offered courses.
- **Research and other independent-study types of courses, offered both through departments and the Honors College.** More information on honors courses can be found on the Honors College website.

**Special Programs and Services**

**Advising**

The Honors College offers one-on-one academic advising for all honors students. Through its MedOpp office, it also offers specialized advising for students planning a career in medicine (allopathic medicine, osteopathic medicine, podiatry, and physician assistant), dentistry, or optometry. MedOpp advising provides students with a comprehensive program that includes a variety of services to guide students through the academic and application process necessary to become a health professional.

**Honors Housing**

The Honors Learning Community fosters a living and learning space that enriches intellectual and social stimulation and encourages residents to succeed academically and socially during their time at the University of Missouri. Honors Freshman Interest Groups (FIGs) are available in a number of interest areas.

**Honors College Admissions**

**Incoming Freshmen**

Incoming freshmen may apply for admission and submit their application by the deadlines listed on our website. The criteria for admission are as follows:

- An ACT score of 31 (SAT 1420) AND either a top 10% class rank OR a high school Core or Enhanced Core GPA of 3.58
- An ACT score of 30 (SAT 1390) AND either a top 12% class rank OR a high school Core or Enhanced Core GPA of 3.74
• An ACT score of 29 (SAT 1350) AND either a top 5% class rank OR a high school Core or Enhanced Core GPA of 3.91

Incoming freshmen who do not meet both of the admission criteria are required to submit two essays as part of their application. Essays are evaluated on an individual basis. Specific information on the requirements for the essays can be found on the website (https://honors.missouri.edu/admission).

Transfer Students
Transfer Students are eligible to apply for admission to the Honors College if they have completed at least 12 credit hours of college credit at an accredited institution and have achieved a GPA of 3.7 or above. The cumulative GPA, for the purpose of applying to the Honors College, is the calculated average of transfer work from all institutions the student has attended. Students who meet these criteria must fill out an online application (https://honors.missouri.edu/admission) and submit a personal statement and proposed honors completion plan.

Current MU Students
Current students are eligible to apply for admission to the Honors College if they are an MU student who has completed at least 12 credit hours and achieved a cumulative MU GPA of 3.7 or higher. Students who meet these criteria must fill out an online application (https://honors.missouri.edu/admission) and submit a personal statement and proposed honors completion plan.

Program Requirements

Maintaining Honors Eligibility

GPA Requirement
To retain membership in the Honors College, students must maintain an MU cumulative GPA of 3.5 or above. Students with an MU cumulative GPA below 3.5 will receive a warning letter the first semester in which this occurs. Students with an MU cumulative GPA below 3.5 for a second consecutive semester will no longer be members of the Honors College. Students with a cumulative Mizzou GPA below 3.0 will be removed immediately.

Participation Requirement
Students are required to complete two honors courses per year for their first two years at MU. All honors courses will count toward this requirement, including honors-designated courses and Honors Learning-by-Contract.

Honors Certificate Requirements
Students who complete 24 or more hours of courses for honors credit and maintain a 3.5 cumulative GPA (as calculated after final grades are posted at the end of the semester in which the student is graduating) are eligible to graduate with an Honors Certificate. In addition to General Honors and Departmental Honors course credits, the 24 hours may include up to 6 hours of honors transfer credit, 6 hours of approved study abroad credit (form required), 8 hours of Learning-by-Contract credit, and 8 hours of approved graduate credit (form required). Students must achieve a minimum letter grade for each course: a C or better for regular honors classes or a B or better for Learning-by-Contract courses and Honors Credit via Graduate Course Work. Students must apply for the Honors Certificate by completing the application (https://honors.missouri.edu/graduating-with-honors/honors-certificate-application). In order to participate in the Honors Convocation, students must apply no later than the end of the third week of classes in their final semester. For more information, see the Application for Graduation with the Honors Certificate (https://honors.missouri.edu/graduating-with-honors/honors-certificate-application).

University Honors Designation
Students who complete the Honors Certificate and a qualified departmental honors program (https://honors.missouri.edu/graduating-with-honors) will be eligible for this designation, which will be noted on their permanent transcript. See your departmental advisor for information about departmental honor programs.

Faculty
There are faculty from all disciplines who teach Honors College courses.
Professional programs are advanced studies in a professional or vocational field. While they have theoretical foundations, the primary purpose is the attainment of knowledge to apply in a professional practice. Students typically begin and end these programs with a cohort, taking a sequence of required courses that prepare them for professional careers.

Professional programs included in this section are those where a professional accrediting body provides oversight of curriculum and sets standards that must be met. For these professional degree programs successful completion is required to sit for licensure and/or certification exam that enables individuals to practice in the profession. These academic programs are primarily focused on preparation for professional practice rather than scientific inquiry and therefore do not meet the criterion for Graduate Studies of requiring an original thesis or dissertation. The programs are included in the same “career” within the myZou system and courses are numbered 5000-6999. The post-bachelorette programs of Master of Occupational Therapy and Physical Therapy Doctorate are professional degrees are included in this section.
The University of Missouri School of Law offers a collegial environment, reinforced by a small student body and a low faculty-student ratio. The intimacy of this setting, coupled with reasonable cost, consistently high bar passage rates, a network of alumni around the globe and access to top scholars in the legal world, make the School of Law one of the best values in the nation.

**Administration**

- Lyrissa Lidsky, Dean, Judge C.A. Leedy Professor of Law
- S. David Mitchell, Associate Dean for Academic Affairs and Associate Professor of Law
- Paul Litton, Associate Dean for Faculty Research and Development and R.B. Price Professor of Law
- Elisabeth E. Key, Assistant Dean for Career Development and Student Services
- Randy J. Diamond, Director of Library and Technology Resources and Professor of Legal Research
- Rafael Gely, Director of the Center for the Study of Dispute Resolution and James E. Campbell Missouri Endowed Professor of Law
- Dennis D. Crouch, Co-Director of the Center for Intellectual Property & Entrepreneurship and Associate Professor of Law
- James Levin, Associate Director of the Center for the Study of Dispute Resolution, Co-Director of the Center for Intellectual Property & Entrepreneurship and Adjunct Professor of Law
- Alisha L. Rychnovsky, Manager of Business Administration
- Casey Baker, Director of External Relations
- Michelle L. Heck, Director of Admissions and Financial Aid
- Joseph Swanegan, Assistant Executive Director of Advancement

**Mission Statement**

The MU School of Law aspires to be the school of choice for outstanding students, both from Missouri and other states. As a national leader in the field of dispute resolution, we seek to complement a strong traditional curriculum with an orientation toward lawyering as a problem-solving endeavor. We strive to foster a diverse faculty of nationally recognized scholars who are committed to effective teaching, and to attract a student body with diverse experiences and views. We also strive to offer an intellectually rigorous and collegial environment for the study of law. Furthermore, we seek to graduate well-rounded lawyers who are sensitive to ethical issues, prepared to serve clients, and ready to be leaders in promoting justice.

**Academics**

Known worldwide for its Center for the Study of Dispute Resolution, the School of Law's curriculum combines both traditional law school classes with an appreciation of the many dispute resolution techniques in which lawyers engage and includes a certificate program in the rapidly developing area of dispute resolution.

Mizzou Law students are required to complete 89 hours of law school classes in order to graduate. Following the prescribed first year, students are required to take Constitutional Law, Evidence, Criminal Procedure and Professional Responsibility. Several clinical and externship programs are available to upper level students, along with skills training in trial practice, negotiation, interviewing and counseling. The curriculum couples courses traditionally tested on the bar examination so that the law school can continue its long tradition of success on bar examinations nationwide, with cross disciplinary dual degree and certificate programs in several other areas. As a result, the law school's curriculum is appealing not only to those who want to engage in the traditional practice of law, but also to those who want to use their law degree as a stepping stone into other disciplines.

**Faculty**

**Full Time Faculty**

**Adjunct Faculty**

**Professor Emeritus**

The catalog also has a cumulative listing of all faculty at the University of Missouri (p. 1486) that includes information on the faculty member's highest degree attained.

Detailed faculty profiles for the School of Law faculty is also available at http://law.missouri.edu/faculty/directory/.

**Academic Policies**

Below is a listing of policies that only apply to students in the School of Law. Be sure to also check the listing of the University's Academic Policies (p. 791) for policies that apply to all students.
The policies and procedures of the MU School of Law are revised on a regular basis. Provisions regarding such policies and procedures contained on our website are subject to change without notice. If you have questions or note errors or omissions, please contact the Associate Dean for Academic Affairs. All statements concerning requirements, prerequisites, conditions or other matters are for informational purposes only, and are subject to change without notice. They are not to be regarded as offers to contract.

Juris Doctor (JD)

Overview
The Juris Doctor (J.D.), or "law degree," is a three-year post-baccalaureate program. Students must complete 89 credit hours of law courses, roughly one-half of which are required courses.

Upon favorable recommendation of the Faculty of Law, the degree of Juris Doctor will be conferred upon a student who:

1. Has pursued in residence the full-time study of law for at least three academic years (or the equivalent), two of which must have been completed in this School. A full-time student is one who is registered for credit in 12 or more hours in a semester or six or more hours in a summer session. A student registered for less than 12 hours in a semester or less than six in two summer sessions, will receive proportional residence credit. The maximum number of residency credits obtainable in any one summer session shall be seven, provided that for purposes of accelerated graduation (in less than three academic years) no more than 12 residency credits may be obtained in summer sessions.

2. Has received a passing grade in all required courses, except required courses, which have been waived.

3. Has received passing grades in law courses aggregating at least 89 credits and has a numerical grade point average of at least 77.5; and

4. Has received an undergraduate degree before or concurrently with his or her graduation from law school.

[Note: The summer school residency provisions allow a student to combine two six-hour summer sessions or a seven-hour summer session with a five-hour summer session and obtain the equivalent of a full semester's residency credit.]

Completion of a Writing Requirement for students who first matriculated in or after Fall 2006

1. Every J.D. student must complete a rigorous upper-level writing experience in either the second or third year of study.

2. A "rigorous writing experience" means an experience that culminates in an individually authored paper of at least 20 pages (double-spaced), based on independent research, through a process that includes preparation of a substantial draft, review and feedback by a faculty member, and revision of the draft.

3. Any of the following activities may satisfy the upper-level writing requirement, provided that the activity meets the definition of a "rigorous writing experience" in the individual case:
   a. completion of any course designated as a writing course,
   b. completion of a writing section attached to a traditional course,
   c. completion of an independent research project under L5875 Research, or
   d. membership on one of the journals of the University of Missouri School of Law.

4. A "designated writing course" is one in which all students complete a rigorous writing experience as defined in section (2) above and in which, in lieu of a final examination, a substantial portion of the final grade for the course is based on that writing.

5. In every case, the supervising full-time faculty member must certify that the writing requirement has been satisfied before a notation will be made in the student's record.

6. As stated in the Student Handbook, "[g]rading is done anonymously in all classes where it is possible." With the exception of Independent Research, if grading is to be done other than anonymously, the syllabus shall so state.

Professional Perspectives Requirement

1. As lawyers, each of you will be required to complete a required number of Continuing Legal Education requirements each year.

2. As law students at MU, you have a similar requirement.

3. You MUST complete a certain number of Professional Perspective hours each year to be eligible to graduate from this law school.

4. Professional Perspective's hours are designed to further your legal knowledge by presenting you with information about current legal events from current practitioners, including judges, and about other legal or legally-related matters. These hours are also designed to present you with needed information about career planning, the job market, and placement.

5. Matters counting for Professional Perspectives credit are broken into two categories:
   a. Professional Perspectives are those programs that give students a new or different prospective on the law or its practice.
   b. Career Component credits are those programs that give students information about career planning and placement.
   c. Any program approved for credit will designate the category applicable to that program.

6. Matters qualifying for Professional Perspectives credit will appear on the School of Law Calendar. It is your responsibility to select the events you wish to attend within the guidelines set out below.
7. Many programs sponsored by the School of Law automatically qualify for Professional Perspectives credit. When listed on the law school calendar, qualifying programs are so designated.

8. Programs sponsored by student or other groups may qualify for Professional Perspectives credit, but ONLY if an application for credit is filed 2 full business days in advance of the event with the Associate Dean for Academic Affairs. Application forms are available in the Dean's Office.

9. Every event for which Professional Perspectives credit is offered MUST be overseen by a responsible person who agrees to maintain an attendance record for that event.

10. Because Professional Perspectives credit is required, it is an event for which attendance counts. As a result, please note that it is an offense under the Honor Code to misrepresent one's own or another's attendance or absence from such an event. This would include signing in for an event and then leaving before the conclusion of that event.

11. The Professional Perspectives requirement for each class of students is as follows:
   a. For First Year Law Students:
      i. 1 Professional Perspective program in the fall semester;
      ii. 1 Career Component program in the fall semester;
      iii. 1 Professional Perspective program in the spring semester;
      iv. 1 Career Component program in the spring semester;
   b. For Second and Third Year Law Students:
      i. 2 Programs each semester;
      ii. At least two of the programs during the year MUST be for general Professional Perspectives credit;
      iii. At least one program during the year MUST be for the Career Component credit.

Certificates & Emphasis

JD Certificates

- Graduate Certificate in Dispute Resolution (p. 769)
- Graduate Certificate in Electronic, Commercial and Intellectual Property Law (p. 770)
- Graduate Certificate in Taxation (p. 770)

JD Emphases

- Emphasis in Criminal Justice (p. 770)
- Emphasis in Tax Law (p. 770)

Experiential Opportunities

The School of Law recognizes the importance of providing students with opportunities to apply the knowledge they receive in the classroom in "real-life" situations. Over their course of study, students have the opportunity to enroll in clinical programs or practicums in a variety of different areas: criminal prosecution, family violence, mediation, the state legislature, landlord/tenant law, entrepreneurship, veterans' disability law, and the wrongly convicted. Additional details are available from the School of Law at http://law.missouri.edu/skills/.

In addition to these clinical opportunities, students can participate in our extensive externship program. In this program, students work under the supervision of a lawyer or judge in a public law office, government agency or not for profit organization or for an attorney in private practice engaged in pro bono work. Additional details are available from the School of Law at http://www.law.missouri.edu/academics/externships.html.

Graduate Certificate in Dispute Resolution

MU Certificate in Dispute Resolution

Clients and society today need and expect much more than traditional advocacy from their lawyers. Modern lawyers need to be able to address legal problems in ways that accommodate a variety of needs, goals and values, in addition to vindicating legal rights. As a result, today's lawyer must have the knowledge, skills and perspectives not only to advocate in the courtroom, but to participate in such processes as client counseling, negotiation, mediation, arbitration and creative problem-solving.

The MU Certificate in Dispute Resolution is designed to foster such learning in students by providing the opportunity to work with some of the nation's leading dispute resolution scholars and practitioners. The MU School of Law has been ranked No. 1 in dispute resolution by U.S. News and World Report since 1999, and has more full-time faculty specializing in dispute resolution than any other law school.

This certificate program will give students an advantage in addressing the complex challenges of today's legal environment.

Requirements

Students Graduating in 2016 or 2017

Students who enrolled at the law school for the first time before the Fall of 2015, can complete the Certificate in Dispute Resolution from the MU School of Law, by taking at least 10-11 credit hours of dispute resolution courses approved by the Law School. Eight of those credit hours are required core program courses and provide students with a basic understanding of the theory, skills and practice of dispute resolution.

Students must take at least 2-3 additional elective hours from among the courses approved for the Certificate program.

Students Graduating in 2018 or thereafter

To receive a Certificate in Dispute Resolution from the MU School of Law, a J.D. student must take at least 12 credit hours of dispute resolution courses approved by the Law School. Eight of those credit hours are required core program courses and provide students with a basic understanding of the theory, skills and practice of dispute resolution.

Students must take at least 2 additional elective courses from among the courses approved for the Certificate program.

Additional details and a list of courses satisfying the certificate requirements are available from the School of Law at http://www.law.missouri.edu/academics/certificates/resolution.html.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/dispute-resolution-graduate-certificate/dispute-resolution-ge/Gedt.html
Graduate Certificate in Electronic, Commercial and Intellectual Property Law

This certificate program is not currently offered. A variety of other certificates, concentrations and dual-degree programs are offered at the Law School (p. 766).

Graduate Certificate in Taxation

This certificate program is not currently offered. A variety of other certificates, concentrations and dual-degree programs are offered at the Law School. Information available at Additional Academic Programs (p. 770).

Juris Doctor with Emphasis in Criminal Justice

Criminal Justice Concentration

The Criminal Justice Concentration is designed for two groups of students: those who are considering beginning their legal careers as prosecutors or criminal defense counsel and those who may not have an express interest in criminal practice, but who are nonetheless seeking a course of study structured to provide training in the range of skills necessary to the practice of law in most substantive areas – particularly including legal analysis, factual investigation, counseling, negotiation and the persuasive arts employed in written and oral advocacy.

Additional details and a list of courses satisfying the Criminal Justice Concentration requirements are available from the School of Law here (http://www.law.missouri.edu/academics/certificates/criminal.html).

Juris Doctor with Emphasis in Tax Law

Tax Law Concentration

The Tax Law Concentration is designed to provide basic education in both general skills and subject-matter specific knowledge, and provide each participating student with an opportunity to bring the entire skill set to bear in a capstone experience designed to teach integrated legal problem-solving. Completion of a concentration should improve the overall preparedness of graduates by conferring entry-level competence to begin practicing law with appropriate supervision in the concentration’s subject matter area or practice setting.

Additional details and a list of courses satisfying the Tax Law Concentration requirements are available from the School of Law here (http://www.law.missouri.edu/academics/certificates/tax.html).

Master of Laws (LLM)

The Master of Laws degrees are offered through a joint effort of the Office of Graduate Studies and the School of Law. For detailed information on these programs, consult the Dispute Resolution (p. 720) or American Law (p. 710) pages.

Additional Academic Programs - Law

Students in the School of Law have a wide variety of additional academic options before them, including a number of other degree and certificate programs available at the University of Missouri that can make a good accompaniment to the J.D. Below is a description of some of those options.

Certificates

- Center for the Digital Globe (p. 770)

Dual/Concurrent Degrees

- Business Administration (Masters) (p. 770)
- Economics (Masters) (p. 770)
- Educational Leadership & Policy Analysis (Masters) (p. 771)
- Health Administration (Masters) (p. 771)
- Human Development & Family Studies (Masters) (p. 771)
- Journalism (Masters) (p. 771)
- Journalism (Doctorate) (p. 771)
- Library & Information Science (Masters) (p. 771)
- Public Affairs (Masters) (p. 771)

Certificates:

Center for the Digital Globe (Certificate)

The Center for the Digital Globe (http://cdig.missouri.edu) (CDiG), established by the College of Business, School of Journalism, School of Law, and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers an interdepartmental certificate to graduate students of the University of Missouri-Columbia. The certificate program supplements the students’ graduate studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students’ successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization.

Dual/Concurrent Degrees:

Business Administration (Masters)

Students completing the Law and Business course of study will be eligible to receive the JD degree from the School of Law and the MBA degree from the School of Business. This course of study may be completed in four years. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MBA degree.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mba-business.shtml.

Economics (Masters)

The Department of Economics and the School of Law offer an integrated program in which students may obtain both an MA degree in economics and a JD degree from the School of Law. Although an MA degree in economics normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.
Educational Leadership & Policy Analysis (Masters)

With and Emphasis in Higher Education

The College of Education's Department of Educational Leadership & Policy Analysis and the School of Law offer an integrated program in which students may obtain both an MA degree in higher education with a concentration in general higher education administration and a JD degree from the School of Law. Although an MA degree in higher and continuing education normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-educational.shtml.

Health Administration (Masters)

Students completing this course of study will be eligible to receive the JD degree from the School of Law and the MHA degree from the Health Management and Informatics graduate program. This course of study may be completed in four years and an additional summer session. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MHA degree.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mha-health-admin.shtml.

Human Development & Family Studies (Masters)

The Department of Human Development and Family Studies and the School of Law offer an integrated program in which students may obtain both a JD degree from the School of Law and an MS or MA degree in Human Development and Family Studies. Although a Master's degree normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mams-human-dev.shtml.

Journalism (Masters)

The School of Journalism and the School of Law offer an integrated program in which students may obtain both an MA degree in journalism and a JD degree in law. This program is especially suitable for students interested in enhancing their competencies, qualifications, and career options through the successful completion of two complementary professional programs. Although an MA degree in journalism normally requires two years of study, and a JD requires three, many students will be able to complete the full program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-journalism.shtml.

Library & Information Science (Masters)

The School of Information Science and Learning Technologies (SISLT) and the School of Law offer an integrated program in which students may obtain both an MA degree in library and information science from SISLT and a JD degree from the School of Law. Although an MA degree in Information Science and Learning Technology with an emphasis in Library and Science normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mls-library.shtml.

Public Affairs (Masters)

Students completing the required course of study will be eligible to receive the JD degree from the School of Law and the MPA degree from the Harry S Truman School of Public Affairs. The course of study may be completed in four years. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MPA degree. Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mpa-public-admin.shtml.
The MD degree is achieved after a four-year course of study. Please visit the School of Medicine website for information about the admissions process: http://medicine.missouri.edu/admissions/

The curriculum at the University of Missouri School of Medicine emphasizes clinical reasoning, self-directed learning, collaborative learning and early clinical experiences. It integrates the basic sciences and clinical reasoning. In years 1 and 2, emphasis is placed on small group learning with some lectures. Courses are not department or discipline based.

During the third year, seven core clerkships are required in family medicine, internal medicine, neurology, obstetrics and gynecology, pediatrics, psychiatry, and surgery. It is during these core clerkships that students learn the fundamentals of good patient care, and faculty assess that students are competent upon completion of the clerkship. These clinical experiences must be under the supervision of Columbia-based School of Medicine faculty or community faculty appointed through the School of Medicine. All students may take up to three core clerkships developed and approved by School of Medicine departments through the University of Missouri School of Medicine Rural Track Clerkship program.

During the fourth year, students must successfully pass a minimum of 30 weeks of elective rotations to meet graduation requirements including two four-week advanced clinical selectives, four four-week general electives, one two-week general elective and one four-week Advanced Biomedical Sciences course. A minimum of four courses must be taken under the supervision of Columbia-based School of Medicine faculty as follows:

Students must take one of the two required clinical selectives under the supervision of University of Missouri School of Medicine faculty or community faculty appointed through the School of Medicine. One of the required selectives must be a surgical selective, and one must be a medical selective. Certain clinical experiences, such as the Indian Health Service and designated rural community electives/selectives, are considered under the supervision of University of Missouri School of Medicine faculty and meet the requirements for one of the two clinical selectives. Many students will have completed the two-week elective requirement during the third year, coupled with the psychiatry clerkship. Students may have completed one of the four-week general elective requirements if they took the neurology clerkship during the third year.

General electives may be taken at sites approved by the department, the advisor and the Medical Education office. Students wishing to take courses at another medical school must comply with all application policies required by the host school.

All four-year medical students may apply to take rural electives (Bryant Scholars are required to complete one rural elective). Students wishing to take rural electives must be accepted through MU AHEC and be in good academic standing as determined by the Medical Education office.

One School, Two Campuses: The University of Missouri School of Medicine is comprised of two clinical campuses, Springfield and Columbia. Students will be assigned to either the Springfield clinical campus or the Columbia clinical campus for their third and fourth years. A lottery is held to determine assignments for the Springfield and Columbia clinical campuses. Preferences for location will be taken into consideration. Once the campus assignment is established, all of the clerkships will be completed on that campus. Electives and selectives may be taken on either campus and will be under the direction of University of Missouri School of Medicine faculty. Electives, selectives and advanced biomedical sciences courses at the Springfield campus are considered equal to those in Columbia. Students may participate in the Rural Track program regardless of campus assignment.

For more information about the School of Medicine, call (573) 882-9219. http://medicine.missouri.edu

Patient Based Learning

First and Second Years

Years one and two consist of four nine-week blocks. Each block has two components: basic science/patient-based Learning (BSci/PBL) and introduction to patient care (IPC).

BSci/PBL

In this component, students work through one authentic clinical case each week in small groups with a faculty facilitator. The facilitator is not a content expert, but rather guides the group as they work through the case seeking a diagnosis and patient care plan. BSci/PBL cases guide learning and the application of basic science concepts in clinical scenarios. A few basic lectures and laboratory experiences teach concepts that supplement the cases. BSci/PBL features about ten hours of patient-based learning with about ten hours of traditional teaching such as lectures each week.

IPC

Themes change with each block and focus on clinical skills, including history taking and physical examination, psychosocial issues and increasing the students' understanding of epidemiology, diagnostic tests and psychopathology. The primary learning strategies also emphasize small-group learning with supporting lectures and laboratory experiences.

ACE (Ambulatory Care Experience)

ACE is required during blocks two through four of the first year and is elective during the second year. During the ACE experience, each student spends a half-day twice a month with a role-model faculty or community physician-preceptor.

Advanced Physical Diagnosis (APD)

APD is required during the second year. Students are assigned to a clinician mentor for the entire academic year. Times and frequency of meetings are at the discretion of the faculty member and the students; however, it is recommended that they meet at least twice each month. The emphasis of this APD experience is on history and physical exam skills and clinical reasoning. Successful completion of APD is required for advancement to the core clerkships.

Contemplating Medicine Patients, Self and Society (COMPASS)

This is a longitudinal small group course. Faculty facilitated small group sessions occur throughout all four years; addressing topics related to professional formation.

Independent Learning

Two half days each week are protected time for independent or student-directed learning; no faculty-initiated activities may be scheduled.

Clerkships

Year three includes seven clerkships in family medicine, internal medicine, neurology, obstetrics and gynecology, pediatrics, psychiatry, and surgery. The neurology clerkship is four weeks long, the psychiatry clerkship is six weeks, and all others are eight weeks. Six of the seven core clerkships are required to be taken in the third year with one clerkship being deferred to the fourth year. During these core clerkships, students learn the fundamentals of good patient care, and faculty assesses student competencies. Clerkships must be supervised by Columbia-based School of Medicine faculty or community faculty appointed through the School of Medicine. Students may take up to three clerkships at designated community sites as part of the MU Rural Track Clerkship Program (http://www.muahec.missouri.edu/rural-track.php).

Students have the opportunity to learn about common illnesses and abnormalities in children. Emphasis also is placed on the importance of preventive and developmental aspects of child care. Lectures and case presentations correlate with the clinical experiences.

Family and Community Medicine Clerkship - F_C_MD 6001

Core learning experiences take place in ambulatory clinic settings. Students work with experienced clinicians and senior residents, spending time in University teaching practices, and in community-based practices. Students also may spend time seeing patients in emergency room, hospital, or nursing home settings, and taking call with residents and practicing physicians. A high volume of patients of all ages with a wide range of problems is encountered. Many patients will have undifferentiated problems.

Internal Medicine Clerkship - IN_MED 6002

Students spend eight weeks on the internal medicine inpatient service at University Hospital and Harry S. Truman Veterans Hospital, where they learn to care for adult patients with acute and chronic illnesses. Teaching emphasizes the principles of differential diagnosis and problem solving, as well as the integration of basic science information into the art of patient care. Students also gain clinical experience in medical interviewing and physical examination.

Obstetrics/Gynecology Clerkship - OB_GYN 6004

Students rotate on the obstetric service, the gynecology service, and the gynecologic oncology service, seeing a broad range of patients in both inpatient and outpatient settings. In addition, they attend lectures and interactive case presentations.

Neurology Clerkship - NEUROL 6003

Students see patients with neurological disorders in the outpatient clinics, in hospital settings, and on consultation services.

Psychiatry Clerkship - PSCHTY 6005

Students see patients with psychiatric disorders in the outpatient clinics, in hospital settings, and on consultation services.

Surgery Clerkship - SURGRY 6006

Emphasis is placed on the diagnosis and treatment of disorders requiring surgical intervention. Each student has a faculty mentor-advisor, attends faculty discussion sessions that cover objectives in the required textbooks, and takes call under the supervision of surgical residents. Students are assigned patients from all surgical specialties, participate in pre-operative examinations and evaluations, assist during surgical procedures, and follow the post-operative management process.

Patient-Centered Care Objective Structured Clinical Evaluation (PCC-OSCE)

A PCC-OSCE will be administered at the end of the third year to assess students’ ability to provide patient-centered care. Successful completion is required for graduation.

Contemplating Medicine Patients, Self and Society (COMPASS)

This is a longitudinal small-group course. Faculty-facilitated small-group sessions occur throughout all four years, addressing topics related to professional formation.

Electives

The fourth year consists of two one-month advanced clinical selectives (sub-internships) in the core disciplines, four one-month general electives, one two-week general elective, and a one-month advanced biomedical science (ABS) course. One of the advanced electives must be in a surgical area and one must be in a medical area. A minimum of four courses (including one advanced elective) must be taken under the supervision of Columbia-based School of Medicine faculty. Many students will have completed the two-week elective requirement during the third year, coupled with the psychiatry clerkship. Students may have completed one of the four-week general elective requirements if they took the neurology clerkship during the third year.

The fourth year consists of two groups of advanced electives and general electives.

Advanced Clinical Selectives

Two advanced clinical selectives from the core disciplines of child health, family medicine, internal medicine, neurology, obstetrics and gynecology, psychiatry and surgery are required. Each selective is four weeks long. One must be in a surgical area and one must be in a medical area. Advanced clinical selectives build on the knowledge and skills acquired...
during third-year core clerkships. Students are expected to assume more responsibility for patient care than in the core blocks.

**Advanced Biomedical Sciences Selectives**

The advanced biomedical science selectives revisit the biomedical sciences in the context of a patient, disease, diagnosis or problem. Four options are available. Students may:

- Search and analyze literature, integrate and evaluate data, produce a paper or presentation
- Conduct original research with mentors from the basic or clinical sciences
- Attend a series of graduate-level lectures and discussions of current literature
- Function as co-tutors for PBL, attend tutor preparation sessions and write a PBL case

**General Electives**

Eighteen weeks of general electives are required. Off-site experiences are available but must be approved by the appropriate department.

For more information on fourth year course offerings, please refer to the [Clinical Rotation Catalog](http://www.usmle.org). This catalog contains descriptions of all clinical rotations offered at the University of Missouri - Columbia School of Medicine, as well as information concerning enrollment for rotations.

**Contemplating Medicine Patients, Self and Society (COMPASS)**

This is a longitudinal small group course. Faculty facilitated small group sessions occur throughout all four years; addressing topics related to professional formation. Fourth year students complete a required COMPASS capstone assignment.

**USMLE**

The United States Medical Licensing Examination (USMLE) ([http://www.usmle.org](http://www.usmle.org)) is a three-step examination for medical licensure in the United States and is sponsored by the National Board of Medical Examiners® (NBME) ([http://www.nbme.org](http://www.nbme.org)) and the Federation of State Medical Boards (FSMB) ([http://www.fsmb.org](http://www.fsmb.org)). The USMLE assesses a physician’s ability to apply knowledge, concepts, and principles, and to demonstrate fundamental patient-centered skills that are important in health and disease and that constitute the basis of safe and effective patient care.

All medical students are required to take Step 1 at the end of the second year of medical school and must pass it prior to beginning the fourth year.

All medical students are also required to pass Step 2 Clinical Knowledge (CK) and Step 2 Clinical Skills (CS) prior to graduation.

Step 3 is typically taken after the first year of residency.
Occupational Therapy

Department of Occupational Therapy
School of Health Professions
801B Clark Hall
Columbia, Missouri 65211
(573) 882-3988

Advising Contact
MUOT@health.missouri.edu

Scholarship Information Contact
https://healthprofessions.missouri.edu/student-services/scholarships/

Occupational therapists are skilled health professionals who provide services to individuals across the lifespan to maximize their independence in meaningful everyday activities. Occupational therapists use research, scientific evidence, and a holistic perspective to incorporate an individual’s valued occupations into the intervention process.

The mission of the Department of Occupational Therapy is to improve the health and well-being of society by assisting people to optimize their participation in everyday life occupations.

We achieve this mission through the integration of our:

• Professional education of clinically innovative occupational therapists prepared to meet the dynamic occupational needs of people and communities across the lifespan;
• Steadfast commitment to service to our community and our profession;
• Evidence-based practice; and
• Commitment to scholarship, discovery and clinical research to advance our profession.

To become a registered occupational therapist, an entry-level master’s degree is required.

All applicants must complete a bachelor’s degree (in any major), along with necessary program prerequisites, prior to beginning professional coursework in the Department of Occupational Therapy.

The Accreditation Council for Occupational Therapy Education (ACOTE) has mandated that the entry-level degree will move to the doctoral (OTD) level by 2027. The Department of Occupational Therapy is working with campus and state officials to plan for the transition to an OTD degree program. An exact date for the transition has not been approved.

Department accreditation is granted by the Accreditation Council for Occupational Therapy Education of the American Occupational Therapy Association, 4720 Montgomery Lane, Suite 200, Bethesda, MD, 20814-3449, (301) 652-2682.

Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Occupational Therapy (MOT)

Department of Occupational Therapy
School of Health Professions
801B Clark Hall, Columbia, MO 65211
(573) 882-3988; FAX (573) 884-2610

The department will offer a 2-year post-baccalaureate entry professional program accepting applications July-January with coursework beginning the following Summer. Applicants will need to have a bachelor’s degree by the start of the Summer semester that they would begin coursework.

Professional courses are only offered to students enrolled in the program. The degree program is approved to meet accreditation requirements. Contact the Department of Occupational Therapy for more information regarding the degree.

Curriculum

https://healthprofessions.missouri.edu/occupational-therapy/degree-program/mot-curriculum/

Accreditation & Certification

The Department of Occupational Therapy is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association, 4720 Montgomery Lane, Suite 200, Bethesda, MD, 20814-3449, (301) 652-2682.

Graduates are eligible to sit for the national certification examination administered by the National Board for Certification in Occupational Therapy (NBCOT), Inc. 12 South Summit Ave., Suite 100, Gaithersburg, MD 20877-4150, telephone (301) 990-7979; Fax (301) 869-8492.

Financial Aid from the Program

Check the School of Health Professions website at https://healthprofessions.missouri.edu/student-services/scholarships/ for scholarship information.

Curriculum

Requirements for Masters Degree in Occupational Therapy

The Department of Occupational Therapy offers the Master of Occupational Therapy degree as the terminal degree of the program. All students must complete the prerequisite courses and meet the admission requirements to apply. Prospective students will apply for entry into the program during their final year of undergraduate coursework or after they have completed a baccalaureate degree. However, in either case a baccalaureate degree must be completed prior to beginning coursework during the following summer semester. The masters degree is required to become certified and licensed to practice as an Occupational Therapist.

Bethany Kendrick, Student Support Specialist II
Admission Criteria

Application window for program beginning coursework in Summer 2019 opens July 2018, with an application deadline of January 15, 2019. Applications are viewed on a rolling basis and admission offers may be made at any point during or after the application window.

- Minimum GPA: cumulative 3.0 or higher (4.0=A)
- Minimum TOEFL scores: (must have been completed in the last two years)

Minimum English Proficiency Requirements

- Completion of all prerequisites at a grade of B- or better
- 20 hours of observation with a licensed Occupational Therapist
- Completion of all required application materials
- Acceptance to program: The Department of Occupational Therapy admits a cohort of 44 students each year.

Required Application Materials

- Go to https://healthprofessions.missouri.edu/occupational-therapy/about/admissions/ for departmental application forms (available July - Jan. 15)
- All applications will be submitted through the Occupational Therapy Centralized Application System (OTCAS (https://otcas.liaisoncas.com/applicant-ux/#/login))
- Observation Forms and supplemental fee

Physical Therapy

K. Gibson, Chair
Department of Physical Therapy
School of Health Professions
801 Clark Hall
(573) 882-7103
Fax: (573) 884-8369
https://healthprofessions.missouri.edu/physical-therapy/

Physical Therapy involves the evaluation and treatment of physical disability and pain that may result from injury, disease or developmental disability. Prevention of disability and public education are also roles of the physical therapist. Physical therapists use tests and measurements to assess body system dysfunction and determine diagnosis and treatment. Daily living skills, including work, are also addressed.

The University of Missouri offers a Doctor of Physical Therapy degree. No master's degree or terminal undergraduate degree in Physical Therapy are available.

Admissions

Doctor of Physical Therapy Program, Regular Admissions

Most students admitted to the Doctor of Physical Therapy program will have a baccalaureate degree. Students who are interested in pursuing application to the Doctor of Physical Therapy program are encouraged to work on an undergraduate degree that will allow them to fulfill application requirements.

Doctor of Physical Therapy Program, Early Admissions

Admission to the Doctor of Physical Therapy program may be available to a small group of students who have completed at least 90 credit hours, completed at least six full-time semesters of residential course work, all MU general education requirements and have shown excellent academic progress. Students who gain early admission to the Doctor of Physical Therapy program will be awarded the Bachelor of Health Science in pre-professional physical therapy upon completing one year of coursework in the physical therapy program.

Physical Therapy (DPT)

Physical Therapy Doctoral Degree Program
School of Health Professions
801 Clark Hall
573-882-7103
573-884-8369 (fax)
https://healthprofessions.missouri.edu/physical-therapy/

Students who enter the MU Physical Therapy program will complete a Doctor of Physical Therapy (DPT) degree program.

Careers

The DPT degree is an entry-level clinical degree that prepares the student to enter the field of physical therapy as a general practitioner with a background in musculoskeletal, neuromuscular, cardiovascular/pulmonary and integumentary systems.

Financial Aid from the Program

Students may apply for scholarships during the professional phase of the program. Check the program website or ask the program contact for availability and details.

Curriculum

Degree Requirements

All students admitted must maintain a 3.0 grade point average with no grade below C (2.0) in courses required for the degree. Failure to achieve a semester or professional cumulative grade point average of 3.0 in required courses will result in probation or dismissal from the program. Students are expected to maintain full-time enrollment in the curriculum and complete the degree requirements as outlined in the course of study. Any exception must be approved by departmental faculty. Students must demonstrate the personal behaviors and characteristics associated with optimal patient welfare and professional trust.

Prerequisites for the Doctoral Degree

Note: The DPT program accepts students to begin the professional program only for summer terms, which begin in June.

Admission to the DPT program is available through regular admission (applicants will have a bachelor's degree prior to beginning the professional program) or through an early admission option that allows students to enter the professional program with 90 credit hours.

Regular admission applicants must have at least a 3.0 GPA in the core required courses and the cumulative GPA in the last 60+ credit hours. Students who enter without a bachelor's degree must have satisfied general education and graduation requirements, including two Writing Intensive courses. These applicants must have at least a 3.5 cumulative GPA at the time of application.

On-campus interviews are required for admission to the professional program.

Applicants are notified of the selection committee’s decision by December.
All students are strongly encouraged to contact the School of Health Professions Student Affairs Office for advisement and planning well in advance of application.

Admission to the program is selective.

Plan of Study

The professional program is offered in sequential blocks and requires full-time enrollment for three academic years (including summer sessions), beginning in the summer session following acceptance. The curriculum contains foundational and clinical sciences combining traditional lectures and course work, laboratory sessions, problem-based learning classes and clinical education. More than 200 clinical sites in Missouri and beyond are available for supervised clinical education.

A graduate must pass the National Physical Therapy Examination to receive a license to practice in the United States. The program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). Graduates are eligible for licensure anywhere in the United States.

573-884-8369 (fax)

Application and Admission Information

All applicants will apply to the Graduate Studies online admission process. Graduate School applications must be submitted and complete by September 30th.

The departmental application will be completed during the on-line admission process.

Students who are admitted without a degree will receive a bachelor's degree upon completion of the first year of the program.

To Graduate Studies:

- All required Office of Graduate Studies documents/application fee
- Departmental application/application fee
- 2 letters of recommendation as specified by the application instructions
- Curriculum Vitae (résumé) as specified by the application instructions
- Unofficial transcripts (year of application, summer grades must be recorded on transcript)
- GRE scores must be sent to MU, Institution Code R6875
College of Veterinary Medicine

The college was established in 1946. It offers a four-year professional program leading to the Doctor of Veterinary Medicine (DVM) degree. Applicants (http://cvm.missouri.edu/prospective-students) generally have a B.S. or B.A. degree but can be admitted after completing prerequisite course requirements.

The Pre-Veterinary Medical Scholars and AgScholars programs (http://cvm.missouri.edu/prospective-students/early-acceptance-programs) provide early assurance of admission to the MU College of Veterinary Medicine upon satisfactory completion of undergraduate and program requirements. Students work with advisers in the college, and they observe veterinarians at work as part of the program. Students with a minimum ACT score of 30 or an equivalent SAT score are eligible to apply for the Pre-Vet Scholars Program. The required minimum ACT score for the AgScholars Program is 27 and applicants must have demonstrated experience in livestock production and health. Once at Mizzou, scholars must meet program minimum standards, including maintaining a 3.3 cumulative GPA. For more information, call the College of Veterinary Medicine at 573-884-3341.

In addition to the professional program, on-line biomedical science courses (http://biomedonline.missouri.edu/online-programs-for-graduate-veterinary-technicians-in-veterinary-biomedical-technology) available to undergraduate and graduate students are listed in this catalog. These can be used to fulfill the requirements of a Certificate in Biomedical Science, for a licensed veterinary technician to complete a baccalaureate degree or to earn a master's degree in biomedical sciences.

The college also provides diagnostic and patient care services for animals. The CVM has a national reputation for excellent student-to-instructor ratio and state-of-the-art facilities. The college also offers post-graduate training to interns, residents in various specialties (http://www.vms.missouri.edu) and graduate students (http://cvmresearch.missouri.edu).

For more information about the College of Veterinary Medicine, call (573) 882-3768. http://cvm.missouri.edu

DVM in Veterinary Medicine

Overview

The DVM degree is achieved after a four-year course of study. Applicants generally have a B.S. or B.A. degree but can be admitted after completing prerequisite course requirements. http://cvm.missouri.edu/prospective-students/

At the University of Missouri, the first two years are largely spent in classrooms and laboratories with the second two years devoted primarily to clinical study in the Veterinary Health Center.

The curriculum at the MU College of Veterinary Medicine is designed to provide students with the knowledge and technical skills necessary to be competent entry level veterinarians. We prepare our students for general veterinary practice, for entry into graduate or specialty training programs and with the background necessary for careers in regulatory medicine.

In the first two years, all students follow the same schedule, and courses must be successfully completed in sequence. In the final two years of the professional program, the student must successfully complete the required and elective clinical rotations to fulfill graduation requirements.

To receive the DVM degree, students must pass all courses. In addition to passing examinations, attendance and participation in all lectures, laboratories and clinical exercises is required. The doctor of veterinary medicine degree is awarded after successful completion of the professional program.

Curriculum

Objectives and Summary of the Professional Curriculum

The primary objective of the CVM curriculum is to provide students with the knowledge and technical skills necessary to be competent entry level veterinarians. We prepare our students for general veterinary practice, for entry into graduate or specialty training programs, or for careers in regulatory medicine. The overall objective of the first two years of the curriculum is to provide students with a solid foundation in
basic biomedical sciences. The courses in the preclinical professional curriculum include anatomy, physiology, cell and molecular biology, pathology, pharmacology, microbiology, virology, and toxicology. The fundamentals of the clinical disciplines are also taught during this time and include anesthesiology, clinical pathology, radiology, public health, medicine and surgery.

The organizational scheme of the professional curriculum differs from that of other schools in that the first two academic years are divided into eight-week instructional periods and our academic year runs from August through June. The students have a summer break between the first and second years and second and third years of instruction that is approximately seven weeks in duration. The overall objective of the clinical curriculum is to solidify basic knowledge and practice clinical skills in the VMTH, VMDL, and external preceptorships. This portion of the curriculum is organized into 12 clinical blocks that begin in October of the third year of professional instruction. These clinical blocks are six to eight weeks in duration and may be divided into 1, 2, or 3 clinical courses. The required clinical rotations are listed below and organized by duration:

**Required Clinical Rotations**

**Full Block Rotations:** Food Animal Medicine and Surgery; Equine Medicine and Surgery; Small Animal Community Practice and Shelter Medicine; Diagnostic Pathology and Special Species Medicine.

**Third Block Rotations:** Theriogenology; Ophthalmology; Small Animal Internal Medicine; Small Animal Emergency and Critical Care; Oncology; Soft Tissue Surgery; Orthopedic Surgery; Neurology and Neurosurgery

**Half Block Rotations:** Clinical Radiology; Clinical Anesthesia

Note that students are required to complete four credit hours (four weeks) of external evaluated preceptorships as part of the required curriculum. Students also select 10 credit hours of elective rotations (cardiology, nutrition, production medicine, special imaging, etc.). In addition to required and elective blocks, students are allotted two blocks as "free time." Most students utilize their free time to study for licensing examinations, complete preceptorships at practices, or interview with prospective employers. A total of 166 semester credit hours are required for graduation. Most students accumulate a higher number of credit hours as a result of enrollments in extra didactic or clinical elective courses.

### Preceptorships

Missouri students are encouraged to use free blocks as preceptorships to increase exposure to veterinary practice and to meet the requirements of the Missouri Veterinary Medical Practice Act. The University of Missouri College of Veterinary Medicine does not have the authority to approve the use of student free block time or the veterinarians with whom they gain experience.

Available preceptorships may be found by contacting the Office for Student Affairs.

Preceptorship requirements and forms required by the Missouri State Veterinary Medical Board can be found at their website: [http://pr.mo.gov/veterinarian.asp](http://pr.mo.gov/veterinarian.asp)

The level of supervision required by preceptors is detailed at: [http://pr.mo.gov/boards/veterinary/VetSupervisionChart.pdf](http://pr.mo.gov/boards/veterinary/VetSupervisionChart.pdf)

The Missouri State Veterinary Medical Board preceptorship form may be found at: [http://pr.mo.gov/veterinarian-application-forms.asp](http://pr.mo.gov/veterinarian-application-forms.asp)

### Licensing Examination

#### Professional Licensing Information

In addition successfully completing a professional veterinary education, most states require state and national licensing examinations to meet requirements to practice. Please visit the National Board of Veterinary Examiners (NBVME [http://www.nbvme.org]) and the American Association of Veterinary State Boards (AAVSB [http://www.aavsb.org]) websites for further information.
About MU

Our mission
As the only state-supported member of the Association of American Universities, Mizzou provides Missourians the benefits of a world-class education. MU’s unique physical infrastructure and scholarly environment stimulate teaching, research, service and economic development on behalf of all citizens. Students work side by side with some of the world’s best faculty to advance arts, humanities, sciences and professions. Scholarship and teaching are driven by a sense of public service and an obligation to produce and disseminate knowledge that improves the quality of life in the state, the nation and the world.

Mizzou, Missouri’s Flagship University
We are a diverse group of students, faculty and staff who value the excitement and learning that come from interaction among people with richly different backgrounds and ideas.

We challenge talented undergraduates to stretch their minds and imaginations with the unique strengths of a major research university. Our students take advantage of various experiences in classrooms, residence hall learning communities, collaborative research opportunities and creative projects with faculty.

We develop the world leaders of tomorrow through rigorous graduate and professional programs across a broad range of disciplines.

We improve the quality of MU through a financial model that supplements taxpayer support with rational tuition and student aid, public-private partnerships and aggressive fundraising. Our responsible fiscal planning assures both excellence and access for all well-prepared students, regardless of socioeconomic status.

We live and work in a community of scholars. We treasure our core values of respect, responsibility, discovery and excellence.

As a 21st century land-grant university, we are an economic engine for Missouri. We generate businesses and jobs by creating and disseminating the knowledge that fuels the new economy.

We use our intellectual resources to improve the civic, economic and educational well-being of Missourians from all walks of life and all corners of the state. We are committed to improving the quality of life of students and their families and communities through the creative and performing arts and the application of new knowledge.

Accreditation
The University of Missouri is accredited by the Higher Learning Commission. Various schools, colleges and departments are also accredited by their respective professional associations and accrediting agencies.

Agriculture Food & Natural Resources
Society for American Foresters’ Accreditation/Forestry
Council on Accreditation Parks Recreation & Tourism (CoAPRT)
Institute for Food Technologists (IFT) Higher Education Review Board

Arts & Science

Nursing
Commission on Collegiate Nursing Education (CCNE)
The Campus

• The University of Missouri prides itself on respecting the past while embracing the future. The 1,262-acre Mizzou campus is a testament to that belief, including the six Ionic Columns adorning Francis Quadrangle, the Memorial Union Tower honoring fallen soldiers and the MU Student Center completed in 2010.

• The campus is also a living museum with hundreds of plant species from all over the world that make up the Mizzou Botanic Garden. The garden features more than 42,000 plants and invites a stroll through more than 170 years of history as MU was transformed into the global university it is today. National magazines and newspapers consistently rank Columbia among the top cities in the nation for its excellent quality of life.

Students

• Students come from all 50 states and more than 100 countries. The diversity of backgrounds, opinions and lifestyles improves the overall quality of the student experience.

• The university has more than 27,000 undergraduate students who choose courses from a broad range of academic disciplines.

• The university also has more than 7,000 graduate and professional students enrolled in more than 90 different degree programs. The professional schools include more than 1,200 students in law, medicine and veterinary medicine.

• MU is nationally recognized for its Freshman Interest Groups, in which students with shared academic interests live in the same residence hall and attend classes together. These communities provide a strong academic and social foundation for freshmen, as well as increased faculty involvement with students.

The Campus

• The University of Missouri prides itself on respecting the past while embracing the future. The 1,262-acre Mizzou campus is a testament to that belief, including the six Ionic Columns adorning Francis Quadrangle, the Memorial Union Tower honoring fallen soldiers and the MU Student Center completed in 2010.

• The campus is also a living museum with hundreds of plant species from all over the world that make up the Mizzou Botanic Garden. The garden features more than 42,000 plants and invites a stroll through more than 170 years of history as MU was transformed into the global university it is today. National magazines and newspapers consistently rank Columbia among the top cities in the nation for its excellent quality of life.

Alumni

With more than 317,000 living alumni, Mizzou’s influence spans the globe. Notable graduates include Grammy Award-winning musician Sheryl Crow, Academy Award-winning actor Chris Cooper, Emmy Award-winning actor Jon Hamm, Peabody Award-winning journalist Jim Lehrer and Cy Young Award-winning pitcher Max Scherzer. Mizzou alumni succeed after graduation: 90.4 percent of MU graduates find successful career outcomes including employment, continued education and military service.

Equity in Athletics Disclosure Act

The University of Missouri complies with the Equity in Athletics Disclosure Act of 1994, Section 360B of Pub. L. 103-382. This act and accompanying federal regulations require that certain information with regard to intercollegiate athletics, including operation expenses, revenue, salaries and participation rates, be made available to current and prospective students and the public. This report is available from the Department of Intercollegiate Athletics at (573) 882-6501.

Family Education Rights and Privacy Act (FERPA)

The University of Missouri policies and procedures adhere to this federal law. Students have the right to restrict the release of directory information. Directory information for MU is defined as: a student’s name, address, telephone listing, e-mail address, major field of study, student level, dates of attendance, degrees and awards received, enrollment status in any past and present semester (i.e. full/part-time), and the most recent previous educational agency or institution attended by the student.

To restrict this information, students should change their privacy settings in myZou or contact the Office of the University Registrar-Registration, 125 Jesse Hall. For the full policy, go to http://registrar.missouri.edu/policies/ferpa.php.

Note: University of Missouri students can grant other users direct authorized online access to their student information in myZou, which may include academic information (including, but not limited to grades), account information, directory information and financial aid. See http://registrar.missouri.edu/registration-add/drop/additional-authorized-access.php for more information. The University does not release grades to parents unless the student specifically authorizes it in writing in the Office of the University Registrar or a parent shows proof that the student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954. “Parent” means a parent of a student and includes a natural parent, a guardian, or an individual acting as a parent in the absence of a parent or guardian.

Nondiscrimination

The University of Missouri does not discriminate on the basis of race, color, religion, sex, sexual orientation, national origin, age, disability, protected veterans. Any person having inquiries concerning the University of Missouri compliance with implementing Title VI of the Civil Rights Act of 1964, Title IV of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, or other civil rights laws should contact the Assistant Vice Chancellor, Human Resources Services, University of Missouri, 130 Heinkel Building, Columbia, MO 65211, (573) 882-4256, or the Assistant Secretary for Civil Rights, US Department of Education.

Oak Ridge Associated Universities (ORAU) Consortium

Since 1981, students and faculty of the University of Missouri have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 96 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities...
for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at http://www.orau.gov/orise/educ.htm, or by calling either of the contacts below.

ORAU’s Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU’s members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact:
Robert V. Duncan
Vice Chancellor for Research
ORAU Councilor for University of Missouri
Monnie E. Champion
ORAU Corporate Secretary (865-576-3306); or Visit the ORAU Home Page (http://www.orau.org)

State of Missouri Registration for Professional Engineers

The Revised Statutes of Missouri (Section 327.221) require that “all applicants for registration as a professional engineer in the State of Missouri after Jan. 1, 1977, be a graduate of and hold a degree in engineering in a curriculum accredited by the Accreditation Board for Engineering and Technology (ABET).” All MU undergraduate engineering bachelor’s-level programs are so accredited. Applicants who receive advanced degrees in MU’s engineering programs but who do not have a bachelor’s degree in an accredited engineering program are not eligible for registration in Missouri. Candidates for a graduate degree (MS or PhD) in engineering who want to establish eligibility for registration should consult with their academic program chair about a plan of study that also will lead to a bachelor’s degree in an ABET-accredited program. Further information about professional engineering registration may also be obtained from the Missouri Board for Architects, Professional Engineers and Land Surveyors, P.O. Box 184, Jefferson City, MO 65102.

Veteran Access, Choice and Accountability Act of 2014, Section 702

The University is compliant with the requirements of PL 113-146 the Veteran Access, Choice and Accountability Act of 2014, Section 702. Section 702 targets educational assistance through ensuring in-state tuition/in-district rates to uniformed services veterans and their qualified dependents covered under this Section.

These new requirements will ensure that our Nation’s recently discharged Veterans, and their eligible family members, will not have to bear the cost of out-of-state charges while using their well-deserved education benefits.

The following individuals shall be charged the in-state/in-district rate, or otherwise considered a resident, for tuition purposes:

• A Veteran using educational assistance under either chapter 30 (Montgomery G.I. Bill – Active Duty Program) or chapter 33 (Post-9/11 G.I. Bill), of title 38, United States Code, who lives in the State of Missouri while attending a school located in the State of Missouri (regardless of his/her formal State of residence) and enrolls in the school within three years of discharge from a period of active duty service of 90 days or more.

• Anyone using transferred Post-9/11 GI Bill benefits (38 U.S.C. § 3319) who lives in the State of Missouri while attending a school located in the State of Missouri (regardless of his/her formal State of residence) and enrolls in the school within three years of the transferor’s discharge from a period of active duty service of 90 days or more.

• A spouse or child using benefits under the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. § 3311(b)(9)) who lives in the State of Missouri while attending a school located in the State of Missouri (regardless of his/her formal State of residence) and enrolls in the school within three years of the Service member’s death in the line of duty following a period of active duty service of 90 days or more.

• Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the same school. The person so described must have enrolled in the school prior to the expiration of the three year period following discharge or death described above and must be using educational benefits under either chapter 30 or chapter 33, of title 38, United States Code.

Veterans Benefits and Transition Act of 2018, Section 103

In compliance with Section 103 of the Veterans Benefits and Transition Act of 2018, the University of Missouri will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries or other institutional facilities. Further, the University of Missouri will not require that a Chapter 31 or Chapter 33 recipient borrow additional funds to cover the individual’s inability to meet his or her financial obligations due to the delayed disbursement of a payment by the U.S. Department of Veterans Affairs.

A Statement of Values

The University of Missouri, as the state’s major land-grant university, honors the public trust placed in it and accepts the associated accountability to the people of Missouri for its stewardship of that trust. Our duty is to acquire, create, transmit, and preserve knowledge, and to promote understanding.

We the students, faculty, and staff of MU hold the following values to be the foundation of our identity as a community. We pledge ourselves to act, in the totality of our life together, in accord with these values.
Respect

Respect for one’s self and for others is the foundation of honor and the basis of integrity. A hallmark of our community is respect — for the process by which we seek truths and for those who engage in that process. Such respect is essential for nurturing the free and open discourse, exploration, and creative expression that characterize a university. Respect results in dedication to individual as well as collective expressions of truth and honesty. Respect is demonstrated by a commitment to act ethically, to welcome difference, and to engage in open exchange about both ideas and decisions.

Responsibility

A sense of responsibility requires careful reflection on one’s moral obligations. Being responsible imposes the duty on us and our university to make decisions by acknowledging the context and considering consequences, both intended and unintended, of any course of action. Being responsible requires us to be thoughtful stewards of resources — accountable to ourselves, each other, and the public we serve.

Discovery

Learning requires trust in the process of discovery. Discovery often fractures existing world views and requires acceptance of uncertainty and ambiguity. Therefore, the university must support all its members in this lifelong process that is both challenging and rewarding. As we seek greater understanding and wisdom, we also recognize that knowledge itself has boundaries — what we know is not all that is.

Excellence

We aspire to an excellence that is approached through diligent effort, both individual and collective. Pursuing excellence means being satisfied with no less than the highest goals we can envision. Pursuing excellence involves being informed by regional, national, and global standards, as well as our personal expectations. We recognize and accept the sacrifices, risks, and responsibilities involved in pursuing excellence, and so we celebrate each other’s successes. We commit ourselves to this process in an ethical and moral manner.

These statements are mere words until we integrate them as values in our individual lives and reflect them in our institutional policies and practices. We pledge ourselves to make them effective in the very fabric of our lives, our community, and all our relationships with others, thereby enhancing the development of individuals and the well-being of society.

Undergraduate Academic Assessment Goals

All undergraduate students are required to participate in the University’s processes/program for assessing student learning in general education and in the major fields. The purpose of assessment at MU is to provide faculty and administrators with the information they need to ensure high levels of student learning. The key goal is to improve how and what students learn in their programs and to increase how much they learn. At the same time, the process provides documentation of student learning to help programs and the University meet external requirements, including those of accreditation organizations.

Faculty members develop assessment strategies specific to each degree program and conduct assessments at appropriate points in their students’ undergraduate careers. Each program at the University has defined learning objectives for their students that form the basis of assessments. Students participate in assessments of discipline-specific learning objectives and of learning objectives aligned with the University’s learning objectives for all students.

In order to meet the needs of the people of the State of Missouri, the nation and the global society, the University of Missouri shall provide its baccalaureate graduates with a sound intellectual foundation in the liberal arts and sciences and in the student’s chosen major fields of study. Toward that end, in addition to having every bachelor’s degree recipient fulfill appropriate course work requirements for general education and for degree programs, MU strives to have all students achieve the following goals:

Goal 1: Graduates of MU will be able to identify and evaluate new information in light of previous knowledge.

MU graduates will be able to:

• Identify issues and problems important to society, define their scope, and identify information needed to address them.
• Find existing sources of information on a topic.

• Evaluate the accuracy, validity, and reliability of information presented in a wide variety of media.
• Conduct appropriately focused library, field or laboratory research.
• Analyze and synthesize information gathered, demonstrating strategic and logical reasoning skills.
• Demonstrate understanding of costs, benefits, and/or consequences of proposed resolutions of issues and problems important to society.
• Organize information, data and ideas for further analysis and/or presentation.

Goal 2: Graduates of MU will possess the knowledge, abilities, and skills necessary to communicate effectively.

MU graduates will be able to:

• Communicate information to a variety of audiences and purposes.
• Revise and edit their presentations to improve clarity and accuracy.
• Engage in the healthy and positive exchange of ideas.
• Apply communication skills in furthering their post-MU careers.
• Use multiple formats and technologies to communicate ideas effectively.

Goal 3: Graduates of MU will possess the knowledge, abilities, and skills necessary to serve society responsibly.

MU graduates will be able to:

• Understand the duties of being a responsible citizen.
• Identify and analyze the requisite behaviors for carrying out their academic and professional lives with integrity.
• Work collaboratively with others where appropriate.

Goal 4: Graduates of MU will possess knowledge to observe and critically analyze the diverse human experience.

MU graduates will be able to:

• Engage in life-long learning.
• Appreciate fine art and literature.
• Understand the contributions of diverse groups and experiences to life at the individual, community, national, and the world levels.
• In addition, some students will be required to take standardized tests in their major field and/or for general education.

University General Education Assessment

Each year, a sample of seniors will participate in a University general education assessment examination known as the CAAP Exam, which addresses University general education competencies of MU students in the areas of mathematics, science reasoning, reading, writing and critical thinking.

Major Field Assessment

Prior to graduation, all seniors will participate in assessment of their mastery of course work in their major field. The assessment program is determined by the faculty of each department to measure the extent to which students are achieving instructional goals and outcomes for graduates in that field. The methods of assessment are appropriate to the educational goals for students in their respective major fields. Information on subject field assessment is included with the college and school sections of this catalog. Methods may include:
University Organization

The largest academic units at the University of Missouri are its colleges and schools. Each college and school may consist of smaller units called departments. Some colleges have divisions within them as well, which are a collection of departments within a college or school. By long tradition, some of the smaller units are also called schools.

The academic year is divided into two, 16-week semesters (fall and spring) and one, 8-week summer semester. The January intersession is considered part of the spring semester for registration and financial aid purposes. The May intersession is considered part of the summer session.

Academic Programs and Degree Structure

To earn a degree from the University of Missouri, students must complete all University, college and/or school, departmental and major requirements. In some cases, the major requirements may include emphasis areas and/or minors. In other cases, there may be options or tracks, which do not appear on transcripts.
Academic Policies

The academic rules and regulations of the University of Missouri are published online in the Collected Rules and Regulations of the University of Missouri and the MU Faculty Council Academic Regulations (http://facultycouncil.missouri.edu/handbook/intro.html). The following are selected policies and procedures. Many are summarized as a guide for students. Students needing additional information on academic regulations in specific colleges and schools may obtain this information from their deans' offices.

If a policy is only applicable to certain students and not all students, this is indicated with one of the following codes. Else the policy is applicable to all University of Missouri students.

- (G) policy applicable to Graduate students only
- (L) policy applicable to Law students only
- (U) policy applicable to Undergraduate students only
- (V) policy applicable to Veterinary Medicine students only
