

Certificate in Equine Science and Management

The Certificate in Equine Science & Management will provide students with knowledge and skills in preparation for employment in the equine industry. Coursework applies topics covered in lecture format directly to hands-on care and management of horses by utilizing the Division of Animal Sciences' Equine Teaching Facility herd. This includes basic equine handling as well as breeding, foaling, training, and sales. This certificate is available to all majors including non-degree seeking students.

Requirements

Completed courses must add up to a minimum of 15 credit hours.

Introductory Level Equine Component - Complete one of the following:		3-4
AN_SCI 1174	Biology of Animal Production II
