NEP Nutrition and Foods/Dietetics
Jennifer Bean, MS, RDN/LD; 204 Gwynn Hall; 573-882-4288;
mizzoudietetics@missouri.edu

A registered dietitian nutritionist (RDN) has completed education and training established by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). To be eligible to become an RDN, one must complete required coursework and supervised practice from an ACEND-accredited dietetics program and pass the Registration Examination for Dietitians (RD Exam). Beginning 2024, candidates must have a master's degree to be eligible to take the RD Exam. Students who complete the Coordinated Program in Dietetics at Mizzou will meet the eligibility requirement to take the RD Exam.

The Division of Food, Nutrition, and Exercise Sciences offers a Bachelor of Science in Nutrition and Exercise Physiology with an emphasis in Nutrition and Foods. If accepted, students will transition seamlessly into the Master of Science in Dietetics.

The University of Missouri's Accelerated Master's Coordinated Program in Dietetics is accredited by ACEND.

Faculty

Professor P. S. Bruzina**, C. D. Hardin**, J. A. Kanaley**, B. Mittendorf**, J. Padilla**, E. J. Parks**, R. S. Rector**
Associate Professor J. Limberg**, C.A. Peterson**, V. Vieira-Potter**
Assistant Professor J. Dhillon*, K. Anguah*
Associate Teaching Professor J. Bean*, D. Credeur*, D. Smith*
Teaching Assistant Professor S. Buckallew*, K. Rushing*
Adjunct Faculty F. W. Booth*, J. A. Ibdah**, D. Lubahn**, F. Nassir**, S. Sayers
Adjunct Instructor J. Anderson, M. Bauche, A. Bryant, B. Dirkes, L. Eaton, K. Eiffert, L. Hudson, K. Mannebach, S. Saffai, M. Stevens, K. Williams, M. Wissmann

Professor Emeritus D. E. Brigham*, R. P. Dowdy*, K. Fritsche*, L. Hillman*, L. Hudson*, P. M. Landhuis*, M. McDonald

- * Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

The Division of Food, Nutrition, and Exercise Sciences offers a BS in Nutrition and Exercise Physiology with an Emphasis in Nutrition and Foods (<http://catalog.missouri.edu/collegeofagriculturefoodandnaturalresources/nutritionexercisephysiology/bs-nutrition-exercise-physiology-emphasis-nutrition-foods/>). Only students who complete prerequisites, have been admitted to the Coordinated Program (CP), and complete all undergraduate requirements for the CP will receive this emphasis area for the bachelor's degree. Once admitted, the students are part of an accelerated program that includes both their BS and MS. Completing only the bachelor's degree does not allow students to be eligible to take the Registration Examination for Dietitians. Furthermore, it is not a didactic program in dietetics. No verification statement is given after completion of only the bachelor's degree.

Applications to the CP open each fall and are due each spring. The specific application requirements, which include completing prerequisite courses, maintaining a 3.0 GPA, and submitting application materials (e.g., resume, cover letter, shadowing verifications), are listed in the program handbook, which is posted each year on the program's website (<https://cafnr.missouri.edu/academics/degrees-programs/dietetics/>). Failure to meet the criteria will result in forfeiture of their spot. Accepted students must also complete compliance requirements prior to starting the program.

Graduate

- MS in Dietetics (<http://catalog.missouri.edu/collegeofagriculturefoodandnaturalresources/dietetics/ms-dietetics/>)

Established in 1972, the Coordinated Program in Dietetics (CP) at the University of Missouri is among the oldest accredited coordinated programs in the United States. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) and is approved for accreditation through 2026.

The CP equips students with the skills and knowledge to become Registered Dietitian/Nutritionists (RDN). RDNs specialize in applied nutrition and can be found in various practice settings, including hospitals, schools, industry, private practice, and public health clinics. Upon completion of the program, students are eligible to take the Registration Examination for Dietitians (RD Exam).

This is an accelerated program that combines both the BS and MS degrees. After acceptance to the program, students must successfully complete one final year of coursework at the undergraduate level to receive a Bachelor of Science in Nutrition and Exercise Physiology with an emphasis in Nutrition and Foods. If all requirements for the program are met, students will transition seamlessly into the graduate program. The Master of Science degree is only available to students accepted into

the CP. See the program handbook on the program website for specific application information.

Upon completion of their final year in the program, students will receive a Master of Science in Dietetics. After completion of both the BS and MS, which must be conferred as evidenced by their MU transcripts, students will receive their verification statement. This statement is required for students to be eligible to take the RD Exam.

This degree is a non-thesis Master of Science in Dietetics. In the CP, both didactic coursework and supervised practice experiences are conducted simultaneously. It is not a stand-alone master's program, nor does it offer a didactic only option.

NEP 1001: Topics in Nutritional Sciences

Supervised study in specialized topic of nutritional sciences.

Credit Hour: 1-99

NEP 1034: Introduction to Human Nutrition

Basic nutrition principles, including: nutrient functions, food sources, and needs; healthy eating tools; energy balance and weight management; nutrition and fitness; nutrition through the life cycle; food safety; and consumer topics. No credit if taken after NEP 2340.

Credit Hours: 3

NEP 1034H: Introduction to Human Nutrition - Honors

Basic nutrition principles, including: nutrient functions, food sources, and needs; healthy eating tools; energy balance and weight management; nutrition and fitness; nutrition through the life cycle; food safety; and consumer topics. No credit if taken after NEP 2340.

Credit Hours: 3

Prerequisites: Honors eligibility required

NEP 1111: Personal Health and Wellness

Provides students with practical information about the interaction of diet and physical activity on health/wellness. After taking this class, students will be able to understand how positive and negative health behaviors impact on their personal health/wellness and know how to live a healthy way of life. As part of the course, students will reflect on their current lifestyle and develop strategies to incorporate healthier behaviors into their every day. Topics will be related to healthy living and prevention of health-related complications.

Credit Hours: 3

NEP 1210: The Ethics of Eating

This introductory course for non-majors provides a general overview of the scope of ethical issues we should consider surrounding the food we eat. We explore the intersection of the science and societal issues regarding what we eat. We will discuss what we choose to eat, how related issues such as agricultural practices and food transportation

impact those choices with an emphasis on the intersection of the science and current societal considerations.

Credit Hours: 3

NEP 1310: Food and Cultures of the World

Trans-disciplinary approach to nutrition, considering anthropological, physiological, geographical, socioeconomic and psychological elements in world nutrition. These ideas will be explored in the context of cuisines and cultures that are found in the US, but originate elsewhere.

Credit Hours: 3

NEP 1310W: Food and Cultures of the World - Writing Intensive

Trans-disciplinary approach to nutrition, considering anthropological, physiological, geographical, socioeconomic and psychological elements in world nutrition. These ideas will be explored in the context of cuisines and cultures that are found in the US, but originate elsewhere.

Credit Hours: 3

NEP 1330: Introduction to Exercise and Fitness Laboratory

The main purpose of this course is to introduce students to a variety of exercises used for improving health, wellness, and fitness, especially musculoskeletal fitness. A secondary goal is to discuss with students the functional anatomy behind different body movements, as well as various theories of exercise training and programming. Graded on A-F basis only.

Credit Hours: 2

Prerequisites or Corequisites: NEP 1340

Prerequisites: Open to NEP majors only

NEP 1340: Introduction to Exercise and Fitness

Provides students with practical information about exercise and physical fitness. After taking this class, students will be prepared to be physically active, understand the "Do's and Don'ts" of exercise, and know how to live a healthy way of life. As part of the course, students will assess their current level of activity/fitness, develop a plan for improvement, and put that plan into action.

Credit Hours: 3

Prerequisites: Some sections may be restricted to NEP students only

NEP 1475: Career Exploration in Dietetics

In this course, we will define the professional roles and responsibilities of practitioners in nutrition, dietetics, and wellness. We will also explore career pathways, professional development, and conduct. Finally, we will identify strategies to achieve a career in the field of nutrition and dietetics. Graded on A-F basis only.

Credit Hour: 1

NEP 1485: Career Exploration in Exercise Science

Undergraduate course designed to provide an overview of the components important to developing an understanding and appreciation of all aspects of Exercise Science. Graded on A-F basis only.

Credit Hour: 1

NEP 1995: Nutritional Food Science

The study of components of food systems and how they are affected by processing, preservation, preparation and by techniques that improve taste, texture, flavor, appearance and nutrient retention. This course is 100% online and includes a virtual lab. Graded on A-F basis only.

Credit Hours: 3

NEP 2010: Everyday Nutrition: Principles of Fresh, Healthy, and Sustainable Cooking

This course includes basic nutrition principles focused on dietary needs for optimal human health. This course provides an application of those nutrition fundamentals into meal planning and preparation, with a focus on basic cooking principles necessary to create healthy, flavorful, and affordable meals. Successful completion of this course will involve the preparation of low-cost and sustainably-focused recipes, and thus requires an additional expense of purchasing ingredients. Graded on A-F basis only.

Credit Hours: 3

Recommended: NEP 1034 or NEP 2380

NEP 2085: Problems in Nutritional Sciences

Supervised study in a specialized phase of nutritional sciences.

Credit Hour: 1-99

Prerequisites: consent required

NEP 2140: Exercise Practicum I

(same as FPM 2140). This course provides an overview of the necessary skills and techniques for successful implementation of exercise programming. This course will help prepare the student for completion of the PANHP degree and prepare for completion of the ACSM EP-C certification.

Credit Hours: 3

Prerequisites or Corequisites: NEP 1340 and NEP 1485

NEP 2222: Socio-Cultural Perspectives on Obesity

This course focuses on the complex, multi-faceted, "landscape of obesity". Throughout the semester, students will learn about the financial and human capital costs of being overweight, the underlying causes

of its rapid development, and promising approaches to treatment and prevention. The course is organized around these three broad themes: 1) The complex interaction of behavioral, environmental and biological factors in the development of obesity; 2) the role of lifestyle behaviors, including diet, physical activity, sleep, and time spent outdoors, in achieving and maintaining health; and 3) socio-cultural approaches in the prevention of obesity. All combined, the course includes a comprehensive exploration of the behavioral and social components of one of the leading public health challenges of our time. Lecture course. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: sophomore standing required

NEP 2340: Human Nutrition I

Basic concepts of normal nutrition related to physiological/ chemical processes; changing nutrient needs during human life cycle, emphasis on adult; some social/psychological influences on dietary habits. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CHEM 2030 or CHEM 2100 or CHEM 2160H

NEP 2340H: Human Nutrition I - Honors

Basic concepts of normal nutrition related to physiological/chemical processes; changing nutrient needs during human life cycle, emphasis on adult; some social/psychological influences on dietary habits. Includes weekly discussion on controversial issues. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CHEM 2030 or CHEM 2100 or CHEM 2160H. Honors eligibility required

NEP 2380: Diet Therapy for Health Professionals

Principles underlying normal nutrition and diet for health and disease. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: sophomore standing

NEP 2450: Nutrition Throughout the Life Span

Nutritional requirements, challenges, community nutrition programs, and eating patterns throughout the life span with emphasis on health promotion and disease prevention; Role of beliefs, culture, socio-psychological influences, and economic resources in food selection and nutrition/health status. Lecture/discussion course. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 1034 or NEP 2340 or NEP 2380 or equivalent

NEP 2460: Eating Disorders

Definition, etiology, treatment, and research related to eating disorders: anorexia nervosa, bulimia nervosa and binge eating disorder/obesity. Graded on A-F basis only.

Credit Hours: 3

Recommended: NEP 1034 or NEP 2380

NEP 3001: Topics in Nutritional Science

Instruction in specific subject matter areas in the field of food science and nutrition.

Credit Hour: 1-99

NEP 3085: Problems in Nutritional Sciences

Advanced problems in a selected field of food science and nutrition.

Credit Hour: 1-99

Prerequisites: consent required

NEP 3085W: Problems in Nutritional Sciences - Writing Intensive

Advanced problems in a selected field of food science and nutrition.

Credit Hour: 1-99

Prerequisites: consent required

NEP 3290: Food Service I: Field Work/Supervised Practice Experience

A practicum designed to expose the student to concepts of quantity food production, evaluation of products and resources, personnel administration and application of food microbiological principles. 1 lecture class and 4 hours of supervised practice per week. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: Some sections may be restricted to either Nutrition and Exercise Physiology or Hospitality Management majors

NEP 3360: Nutritional Assessment Lab

Lab to develop skills in screening individuals for nutrition risk; use of dietary, anthropometric, laboratory, clinical and sociocultural criteria to assess nutritional status of individuals, 8 hours of supervised practice per week. Enrollment limited to students who have taken or are concurrently enrolled in NEP 4360; Open to Nutrition and Food majors in the Coordinated Program in Dietetics and Human Physiology and Translational Sciences.

Credit Hours: 3

Prerequisites or Corequisites: NEP 4360

Prerequisites: Open only to students accepted into the Coordinated Program in Nutrition and Foods/Dietetics and Human Physiology and Translational Science. Departmental consent required

NEP 3370: Medical Nutrition Therapy I: Supervised Practice Experience

Practice and application of principles of nutrition care for selected disease states. 12 hours of supervised practice per week. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Open to students accepted into the Coordinated Program in Nutrition and Foods/Dietetics only. Department consent required

NEP 3390: Teaching and Counseling Techniques in Nutrition

Principles and theories of learning; Resources, methods and techniques for teaching food/nutrition principles and dietary guidelines; Group dynamics and facilitation; Introduction to counseling theories and methods used in nutrition care of individuals. Lecture course. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: C or better in PSYCH 1000 and NEP 2340

NEP 3400: Teaching & Counseling Techniques in Nutr. Supervised Practice Exp

Skill development and practice in counseling individuals for health promotion and disease prevention and the teaching of food and nutrition topics to groups. 4 hours of supervised practice per week. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: Open only to students accepted into the Coordinated Program in Nutrition and Foods/Dietetics. Department consent required

NEP 3420: Role of Inactivity in Chronic Diseases

This course is designed to provide an understanding of selected topics related to physical inactivity and chronic diseases and conditions including obesity, type 2 diabetes, hypertension, vascular dysfunction, atherosclerosis, heart failure, and dementia. Specifically, this course will focus on examining the scientific evidence supporting the role of sedentarism as a causal factor in the development of chronic diseases and the role of physical activity as a mitigating factor. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 1340 and MPP 3202 or BIO_SC 3700 - NEP majors must receive a C or better in the pre-reqs

NEP 3450: Activity Throughout the Lifespan

Course is designed to develop knowledge and understanding of the value of physical activity across the lifespan. The physiology, psychology, and guidelines of exercise, along with the integration of nutrition with physical activity, will be explored from pregnancy through early development and into old age. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 1340 - NEP majors must have a C or higher; May be restricted to Nutrition and Fitness/ Physical Activity, Nutrition and Human Performance majors only during early registration

NEP 3550: Corporate, Community, and Personal Fitness

Course is designed to develop the knowledge and understanding of exercise application for corporate wellness, community programs, and personal fitness. Topics covered will include exercise prescription, behavioral and motivational theories, legality, ethics and professionalism, and how these topics relate to corporate, community, and personal fitness clients. Students should be able to understand the various needs of these populations and how to apply the science of physical activity, nutrition, and human performance to each. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 1340 and NEP 2340 or NEP 2380. NEP majors must have a C or better in these courses to enroll

NEP 3590: Community Nutrition Field Work/Supervised Practice Experience

A practicum / field work experience which explores and applies the concepts and techniques of nutrition programming in a community setting. 4 hours of field work/supervised practice per week. Enrollment limited to students who have taken NEP 4590. Open to students enrolled in the Coordinated Program in Dietetics and Nutrition and Foods majors.

Credit Hour: 1

Prerequisites or Corequisites: NEP 4590

Prerequisites: Open to Nutrition and Foods students - those accepted into the Coordinated Program in Dietetics and others in the program. Departmental consent required

NEP 3800: Prevention and Care of Athletic Injury

Theory, practice in prevention, emergency care, rehabilitation of injuries encountered in vigorous games.

Credit Hours: 3

Prerequisites: PTH_AS 2201. Restricted from Pre-Nutrition and Fitness majors

NEP 3820: Kinesiology

Study of the relationships of physical laws, mechanical principles, and structural parameters to the analysis of human motion, with emphasis on application to daily activities, sport/athletic performance, and developmental exercise.

Credit Hours: 3

Prerequisites: PTH_AS 2201

NEP 3850: Physiology of Exercise

This is the basic course in exercise physiology, which applies specific principles and concepts of human physiology to the physical work situation. This course will look at ventilation, oxygen transport, cardiovascular physiology, muscle physiology and the metabolic systems; and emphasis will be given to the adaptations to exercise and training. This course will first explore basic exercise physiology and then will explore many of the applied issues pertaining to performance and health. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PTH_AS 2201; MPP 3202 or BIO_SC 3700. Restricted from Pre-Nutritional and Fitness students

NEP 3850W: Physiology of Exercise - Writing Intensive

This is the basic course in exercise physiology, which applies specific principles and concepts of human physiology to the physical work situation. This course will look at ventilation, oxygen transport, cardiovascular physiology, muscle physiology and the metabolic systems; and emphasis will be given to the adaptations to exercise and training. This course will first explore basic exercise physiology and then will explore many of the applied issues pertaining to performance and health. Graded on A-F basis only..

Credit Hours: 3

Prerequisites: PTH_AS 2201; MPP 3202 or BIO_SC 3700. C- or better in ENGLISH 1000

NEP 4001: Topics in Nutrition and Exercise Physiology

Instruction in specific subject matter areas in the field of nutrition science and exercise physiology.

Credit Hour: 1-3

NEP 4020: Monogastric Nutrition

(same as AN_SCI 4312; cross-leveled with AN_SCI 7312, NEP 7020 and NUTRIT 7020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: AN_SCI 3242

NEP 4088: Advanced Seminar in Dietetics

Examines current applications in nutrition and dietetics, using journal articles and position and practice papers. Graded on A-F basis only.

Credit Hour: 1-5

Prerequisites: Department consent required. Must be enrolled in Coordinated Program in Dietetics

NEP 4200: Sports Performance and Conditioning

(cross-leveled with NEP 7200). Course utilizes scientific theory and applied instruction to teach procedures, techniques, and modalities used to improve physical sports performance. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PTH_AS 2201, MPP 3202 or BIO_SC 3700 - NEP majors must have a C or better in these courses. Junior or senior standing required

NEP 4280: Food Service Management

Issues related to marketing and financial control in the foodservice sector. Lecture course. Graded on A-F basis only.

Credit Hours: 3

Corequisites: MANGMT 3000 or equivalent

NEP 4290: Food Serv. II: Adv. Food Service Manage. Supervised Practice Exp

A practicum tailored to apply marketing and budgetary principles in the foodservice industry. 8 hours of supervised practice per week. Enrollment limited to students with concurrent enrollment in NEP 4280. Open to students admitted to the Dietetics program. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Open to students accepted into the Coordinated Program in Dietetics only. Departmental consent required

NEP 4330: Human Nutrition II Laboratory

(cross-leveled with NEP 7330). A techniques course in nutrition, usually taken concurrently with NEP 4340.

Credit Hours: 2

Prerequisites: NEP 2340, Biochemistry and instructor's consent

NEP 4340: Human Nutrition II Lecture

(cross-leveled with NEP 7340). Physiological and biochemical aspects of nutrition; functions of methods of measuring nutritional status; various aspects of applied nutrition. Continuation of NEP 2340. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 2340 - NEP majors must have a C or better to enroll and either BIOCHM 3630, BIOCHM 4270 or BIOCHM 4272

NEP 4360: Nutritional Assessment

(cross-leveled with NEP 7360). Introduction to the nutrition assessment process. The identification of dietary, anthropometric, laboratory, clinical and sociocultural parameters used to assess nutritional status of individuals. Lecture course. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: C or better in NEP 2340

NEP 4370: Medical Nutrition Therapy I

(cross-leveled with NEP 7370). In-depth study of physiological/biochemical changes in selected disease states (cardiovascular disease, rehabilitation, diabetes and cancer); development of principles underlying nutrition therapy. Lecture course. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: C or better in NEP 4360

NEP 4380: Medical Nutrition Therapy II

(cross-leveled with NEP 7380). Evaluation, design and monitoring of the nutrition care of complex health disorders such as advanced gastrointestinal complications, major organ transplant, and metabolic disorders with an emphasis on nutrition support. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: C or better in NEP 4370

NEP 4385: Professional Development I

(cross-leveled with NEP 7385). Course designed to provide career exploration and assessment and prepare students for the final rotations in the coordinated program in dietetics. Graded on A-F basis only. Enrollment limited to students enrolled in the coordinated program in Dietetics.

Credit Hour: 1

Prerequisites: Departmental consent required

NEP 4400: Pathophysiology of Diseases Affecting Metabolic Health

There is not a universally-accepted definition of "metabolic health", however, a similar combination of assessment criteria including measurements of body weight/composition, blood pressure, lipid profile, insulin sensitivity/resistance, and systemic inflammation are frequently used for clinical and research purposes. This course will explore the disordered physiological processes in diseases affecting these metabolic health parameters. Focus will be on the leading causes of death in the US, cardiovascular disease, stroke and cancer, as well as the related diseases of diabetes and osteoporosis, all of which are diseases of enormous burden to the US healthcare system. The common theme of modifiable factors (diet, exercise, sleep) to prevent and manage these chronic conditions will be woven throughout the course. This course may be particularly useful for students seeking careers in health care and prevention. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MPP 3202 or BIO_SC 3700 and BIOCHM 3630 or BIOCHM 4270

Recommended: NEP 2340 and PTH_AS 2201

NEP 4400H: Pathophysiology of Diseases Affecting Metabolic Health - Honors

There is not a universally-accepted definition of "metabolic health", however, a similar combination of assessment criteria including measurements of body weight/composition, blood pressure, lipid profile, insulin sensitivity/resistance, and systemic inflammation are frequently used for clinical and research purposes. This course will explore the disordered physiological processes in diseases affecting these metabolic health parameters. Focus will be on the leading causes of death in the US, cardiovascular disease, stroke and cancer, as well as the related diseases of diabetes and osteoporosis, all of which are diseases of enormous burden to the US healthcare system. The common theme of modifiable factors (diet, exercise, sleep) to prevent and manage these chronic conditions will be woven throughout the course. This course may be particularly useful for students seeking careers in health care and prevention. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MPP 3202 or BIO_SC 3700 and BIOCHM 3630 or BIOCHM 4270; Honors eligibility required

Recommended: NEP 2340 and PTH_AS 2201

NEP 4480: Pediatric Exercise Physiology

Course is designed to develop knowledge and understanding of the value of physical activity in the pediatric population. The physiology, psychology, and guidelines of exercise will be explored in the developmental process of youth. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 1340 and NEP 3850W - NEP majors must have a C or better in these courses

NEP 4550: Exercise is Medicine

Provide an overview of Exercise Is Medicine On Campus. As the designated Exercise is Medicine program on campus we will explore ways to promote the program across the MU Campus, develop student engagement, and implement the program through event planning and collaboration with key services on the MU Campus. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: NEP 3450, NEP 3850, majors only

NEP 4590: Community Nutrition

(cross-leveled with NEP 7590). Public health nutrition and chronic disease prevention, food security, nutrition programs and food access,

public policy, sustainable agriculture and food production systems, cultural food practices, needs assessment. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 2340 or NEP 2380. Restricted from Pre-Nutrition and Fitness majors

NEP 4750: Cardiopulmonary Rehabilitation - A Multifactorial Process

A guide to the practice of Cardiopulmonary Rehab in the 21st Century. We will explore the interdisciplinary aspects of a successful approach to the delivery of cardiac and pulmonary rehabilitation throughout a broad spectrum of patients. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 3450 and NEP 3850W. NEP majors must earn a C or better in these courses to enroll

NEP 4860: Exercise Prescription

Course investigates theory and methods of testing and prescribing exercise for circulatory fitness, body composition, muscle strength, joint and muscle ranges in motion, and posture. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: NEP 3850W. All NEP majors must have a C- or better in this class to enroll

Prerequisites: MPP 3202 or BIO_SC 3700 and, PTH_AS 2201. All NEP majors must have a C or better in these courses to enroll

NEP 4870: Exercise for Special Populations

The purpose of this course is to provide a detailed review of key physiological considerations for an exercise prescription in populations such as older adults, pregnant women, children, and those with physical/mental disabilities, in addition to those with pathological conditions including diabetes, heart disease, cancer, arthritis, obesity, and others. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: NEP 3850W

Prerequisites: NEP 1340, NEP 3450

NEP 4940: Internship in Nutritional Science and Exercise Physiology

Combines study, observation and employment in an area of exercise physiology and/or nutrition. Written reports, faculty evaluation.

Credit Hour: 1-6

Prerequisites: instructor's consent required

NEP 4945: Experiential Learning in Industry Internship in Nutrition and Exercise Physiology

Learning experience combining observation, application, and reflection in a discipline-based industry internship. Course appears on transcript for

zero credit and does not count toward full-time enrollment. No tuition or fees are charged. Graded on S/U basis only.

Credit Hours: 0

Prerequisites: instructor's consent

NEP 4950: Capstone: Research in Nutritional Sciences

Introduction to research, including the types of basic, clinical, and outcomes-based research. Defining research problems related to nutrition and exercise sciences, developing hypotheses, reviewing scientific literature, writing research protocols, analyzing data. Lecture course.

Credit Hours: 2

Prerequisites: NEP 2340 and either STAT 2500 or ESC_PS 4170 and senior standing. Restricted from Pre-Nutrition and Fitness majors

NEP 4951: Nutrition Research Communication

Analyze and interpret data; present results of a research study in manuscript and seminar presentation formats. Emphasis on effective communication of nutrition research to scientific and lay audiences. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: NEP 4950 or instructor's consent

NEP 4951W: Nutrition Research Communication - Writing Intensive

Analyze and interpret data; present results of a research study in manuscript and seminar presentation formats. Emphasis on effective communication of nutrition research to scientific and lay audiences. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 4950 or instructor's consent

NEP 4955: Experiential Learning in Research in Nutrition and Exercise Physiology

A supervised learning experience contributing to faculty research. Course appears on transcript for zero credit and does not count toward full-time enrollment. No tuition or fees are charged. Graded on S/U basis only.

Credit Hours: 0

Prerequisites: instructor's consent

NEP 4970: PANHP Capstone: Sports Nutrition

(cross-leveled with NEP 7970). Integration of research literature with knowledge from previous coursework, emphasis on sports nutrition research, nutrient requirements of athletes, critical evaluation of ergogenic aids. Graded on A-F basis only. Prerequisites: C or better in all pre-reqs: NEP 2340, and either MPP 3202 or BIO_SC 3700, and either STAT 1200 or ESC_PS 4170; Senior standing. Restricted to Nutrition and

Fitness or Physical Activity, Nutrition and Human Performance majors only.

Credit Hours: 3

NEP 4975: Practice of Dietetics Supervised Practice Experience

Supervised practice in providing quality nutrition services in clinical, community, management and specialty settings. 40 hours of supervised practice per week.

Credit Hours: 10

Prerequisites: NEP 3590, NEP 4280, NEP 4290, NEP 4380, NEP 4381, and NEP 4590; Open to students admitted to the Dietetics Program only

NEP 7001: Topics in Nutritional Science and Exercise Physiology

Instruction in specific subject matter areas in the field of food science and nutrition.

Credit Hour: 1-99

NEP 7020: Monogastric Nutrition

(same as AN_SCI 7312 and NUTRIT 7020; cross-leveled with NEP 4020 and AN_SCI 4312). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: AN_SCI 3242

NEP 7085: Problems in Nutritional Sciences and Exercise Physiology

Advanced problems in a selected field of food science and nutrition.

Credit Hour: 1-99

NEP 7200: Sports Performance and Conditioning

(cross-leveled with NEP 4200). Course utilizes scientific theory and applied instruction to teach procedures, techniques, and modalities used to improve physical sports performance. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PTH_AS 2201, MPP 3202 or BIO_SC 3700 - NEP majors must have a C or better in these courses

NEP 7330: Human Nutrition II Laboratory

(cross-leveled with NEP 4330). A techniques course in nutrition, usually taken concurrently with NEP 4340.

Credit Hours: 2

Prerequisites: NEP 2340, Biochemistry and instructor's consent

NEP 7340: Human Nutrition II Lecture

(cross-leveled with NEP 4340). Physiological and biochemical aspects of nutrition; functions of methods of measuring nutritional status; various aspects of applied nutrition. Continuation of NEP 2340. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 2340 - NEP majors must have a C or better to enroll and either BIOCHM 3630, BIOCHM 4270 or BIOCHM 4272

NEP 7360: Nutritional Assessment

(cross-leveled with NEP 4360). Introduction to the nutrition assessment process. The identification of dietary, anthropometric, laboratory, clinical and sociocultural parameters used to assess nutritional status of individuals. Lecture course. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 2340

NEP 7370: Medical Nutrition Therapy I

(cross-leveled with NEP 4370). In-depth study of physiological/biochemical changes in selected disease states (cardiovascular disease, rehabilitation, diabetes and cancer); development of principles underlying nutrition therapy. Lecture course. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: C or better in NEP 4360

NEP 7380: Medical Nutrition Therapy II

(cross-leveled with NEP 4380). Evaluation, design and monitoring of the nutrition care of complex health disorders such as advanced gastrointestinal complications, major organ transplant, and metabolic disorders with an emphasis on nutrition support. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: C or better in NEP 4370

NEP 7381: Medical Nutrition Therapy II: Supervised Practice Experience

Practice in the nutrition care of complex health disorders with emphasis on nutrition support. 16 hours of supervised practice per week. Enrollment limited to students with concurrent enrollment in NEP 7380. Open to students admitted to Dietetics program only. Graded A-F only.

Credit Hours: 5

Prerequisites: Only students accepted into the Masters of Dietetics Coordinated Program may take this course. Consent required

Corequisites: NEP 7380

NEP 7385: Professional Development I

(cross-leveled with NEP 4385). Course designed to provide career exploration and assessment and prepare students for the final rotations in the coordinated program in dietetics.

Credit Hour: 1

Corequisites: Concurrent enrollment in NEP 7380, NEP 7381

NEP 7390: Professional Development II

Lectures and discussions focus on issues and trends in dietetics. Discussions are used to encourage the development of skills and attitudes that foster life-long professional learning. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: NEP 7385, and in the Coordinated Program for Dietetics

NEP 7400: Pathophysiology of Diseases Affecting Metabolic Health

(cross-leveled with NEP 4400). There is not a universally-accepted definition of "metabolic health", however, a similar combination of assessment criteria including measurements of body weight/composition, blood pressure, lipid profile, insulin sensitivity/resistance, and systemic inflammation are frequently used for clinical and research purposes. This course will explore the disordered physiological processes in diseases affecting these metabolic health parameters. Focus will be on the leading causes of death in the US, including cardiovascular disease and stroke, as well as the related diseases of diabetes and osteoporosis, all of which are diseases of enormous burden to the US healthcare system. The common theme of modifiable factors (diet, exercise) to prevent and manage these chronic conditions will be woven throughout the course. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MPP 3202 or BIO_SC 3700 or MPP 4202 and BIOCHM 3630 or BIOCHM 4270

Recommended: PTH_AS 2201 and NEP 3850W

NEP 7500: Research in Nutritional Sciences and Exercise Physiology

Original investigations, usually in connection with one of the research projects of Agricultural Experiment Station. Written report required.

Credit Hour: 1-99

NEP 7590: Community Nutrition

(cross-leveled with NEP 4590). Public health nutrition and chronic disease prevention, food security, nutrition programs and food access, public policy, sustainable agriculture and food production systems, cultural food practices, needs assessment. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Nutrition course or instructor's consent

NEP 7950: Research in Dietetics

(cross-leveled with NEP 4950). Introduction to research, including the relationship of basic, clinical, and outcomes-based research to dietetics practice. Defining research problems in a dietetics practice setting, developing hypotheses, reviewing scientific literature, writing research protocols, analyzing data. Lecture course.

Credit Hours: 2

Prerequisites: statistics course

NEP 7970: PANHP Capstone: Sports Nutrition

(cross-leveled with NEP 4970). Integration of research literature with knowledge from previous coursework, emphasis on sports nutrition research, nutrient requirements of athletes, critical evaluation of ergogenic aids. Graded on A-F basis only. Prerequisites: C or better in all pre-reqs: NEP 2340, and either MPP 3202 or BIO_SC 3700, and either STAT 1200 or ESC_PS 4170; Senior standing. Restricted to Nutrition and Fitness or Physical Activity, Nutrition and Human Performance majors only.

Credit Hours: 3

NEP 8001: Topics in Nutritional Sciences and Exercise Physiology

Instruction in specific subject matter areas in the field of nutrition science and exercise physiology. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3

NEP 8030: Etiology of Obesity

This course is designed to provide an understanding of the cause and implications of human obesity. General topic areas covered will include: methodologies of obesity research, physiology of obesity, behavioral and environmental factors influencing obesity, obesity and disease, therapeutic approaches to obesity, and emerging topics in obesity. The structure of this course will be mixture of lectures and interactive discussions/reviews of primary research articles in these areas. Students will be expected to present and critically evaluate research papers relevant to the field of obesity.

Credit Hours: 3

Prerequisites: NEP 7340

NEP 8085: Problems in Nutritional Sciences and Exercise Physiology

Individual studies include a minor research problems.

Credit Hour: 1-99

NEP 8087: Masters Seminar in Nutritional Sciences and Exercise Physiology

Seminar features expert presentations of current research and issue-based applications that represent the breadth of nutritional sciences and/or exercise physiology. Graded on S/U basis only.

Credit Hour: 1

NEP 8090: Masters Research in Nutritional Sciences and Exercise Physiology

Original investigation of advanced nature, leading to thesis. Graded on a S/U basis only.

Credit Hour: 1-99

NEP 8095: Internship in Exercise Physiology

The internship experience will take place in professionally supervised settings, and allow students to complement their academic work with employment-related experiences. Organizations, companies and business that offer internships can be selected to match with student interests. This experience will offer the student meaningful learning opportunities that will complement their career goals.

Credit Hours: 4

Prerequisites: must be accepted into the Exercise Physiology graduate program, 3.0 GPA or higher, completed 50% of the coursework at the masters level

NEP 8125: Preventive and Therapeutic Exercise Physiology

Graduate level course designed to prepare Masters Candidates for a career in Clinical Exercise Physiology. Students will be provided opportunities to develop knowledge, skills, and ability to work with individuals with diverse range of chronic diseases and disabilities. Graded on A-F basis only.

Credit Hours: 3

NEP 8127: Advanced Physiological Assessment and Exercise Prescription

Graduate Level course designed to enhance the Exercise Science student's knowledge and skills in the administration of appropriate physiological assessments and the interpretation of the results from those tests. Course Objectives: 1) Understand the nature and importance of physiological assessments. 2) Understand the measurable components of physical fitness and how each of them relates to overall health. 3) Become familiar with and conduct various tests of physical and performance related parameters Body Composition - Girth measurements, skin folds, bioelectrical impedance; BODPOD, DEXA; Cardiorespiratory Fitness - Resting measurements, submaximal protocols; VO₂max testing; Musculoskeletal Fitness - Muscular strength and endurance testing; flexibility testing. 4) Interpret results of various

test batteries conducted in class. 5) Understand limitations of tests conducted in class. 6) Develop research thesis ideas for comparison of techniques. Graded on A-F basis only.

Credit Hours: 3

NEP 8220: Cardiovascular Disease and Exercise

Advanced study through readings and discussion of selected topics related to cardiovascular risk and disease development, including hypertension, endothelial dysfunction, vascular insulin resistance, arterial stiffness, atherosclerosis and heart failure, with a particular emphasis on the effects of physical activity and exercise. Special focus will also be placed on understanding the links between lack of physical activity, metabolic disorders, and increased cardiovascular risk. Graded on A-F basis only.

Credit Hours: 3

Recommended: Undergraduate level exercise physiology is highly recommended

NEP 8310: Nutritional Biochemistry of Lipids

(same as AN_SCI 8431 and NUTRIT 8310). Current concepts in the nutritional regulation of lipid metabolism. Emphasis on integrating information and interpreting current research data.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272

NEP 8340: Nutrition in Human Health

(same as NUTRIT 8340). Nutritional aspects of maintaining human health with emphasis on micronutrients, basis for dietary recommendations, and nutrition public health initiatives. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272; 4000-level nutrition course; graduate standing or current enrollment in the Masters in Dietetics Program

NEP 8360: Nutritional Biochemistry I

(same as NUTRIT 8360 and BIOCHM 8360). Provides a critical understanding of current developments in lipid metabolism in animals and humans, particularly as it relates to nutrition and health.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272; at least one 4000 level nutrition course

NEP 8380: Medical Nutrition Therapy III

In-depth study of physiological/biochemical changes in advanced selected disease states focusing on special complex clinical issues of infants, children, and the geriatric population, as well as investigation into

cutting edge treatments for these special populations. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 7380; Coordinated Program students in Masters in Dietetics only

NEP 8501: Hot Topics in Nutrition, Exercise and Disease

This course addresses various topics and examine the interaction of nutrition and exercise/physical activity on these topics. The topics and assignments will focus on a specific physiological topic and how nutrition and exercise can either prevent disease and/or possibly minimize disease progression. The topics in this course will focus on current hot topics in the literature and the format will vary by instructor, but may include didactic, seminar, journal club style, presentations, etc. Graded on A-F basis only.

Credit Hour: 1

NEP 8850: Advanced Exercise Physiology

Lectures, laboratory experiences, and readings in current literature to provide reasonable depth in selected areas of physiology as applied to activity and health.

Credit Hours: 3

Prerequisites: NEP 3850 and Chemistry

NEP 8860: Exercise Endocrinology

The nervous system and the endocrine system integrate to regulate the functions of the body. These systems are tightly linked and frequently one system cannot be considered without consideration of the other system. This course integrates endocrine physiology and the impact that exercise has on the endocrine response. This class will focus on the glands producing hormones, the target organs, mechanisms and how both acute and chronic exercise impacts hormone action. This is an advanced exercise physiology course designed for graduate students in Exercise Physiology or the life sciences and will consist of lectures, readings and discussion. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 8850, V_BSCI 8420 or graduate standing in the Life Sciences

NEP 8870: Exercise Metabolism

Review of major metabolic pathways and the effect of exercise upon them. Special topics include indirect calorimetry, EPOC, anaerobic threshold; weight control, ergogenic aids, and exercise nutrition.

Credit Hours: 3

Prerequisites: NEP 3850 and Chemistry

NEP 8975: Dietetics Supervised Practice Experience

This course provides supervised practice for students in their final semester in the Coordinated Program in Dietetics at the University of Missouri. Supervised practice is designed to provide quality nutrition experiences in clinical, community and management settings. Students are in their field sites for 40 hours/week for supervised practice for approximately 13 weeks. In addition, classblocks are held in Columbia three times throughout the semester for a total of approximately three weeks (may also include supervised practice activities). Graded on A-F basis only.

Credit Hours: 10

Prerequisites: For dietetic students in their final semester in the Coordinated Program (CP) only. Consent required

NEP 9087: Doctorate Seminar in Nutritional Sciences and Exercise Physiology

Seminar features expert presentations of current research and issue-based topics that represent the breadth of nutritional sciences and exercise physiology. Graded on S/U basis only.

Credit Hour: 1

NEP 9090: Doctorate Research in Nutritional Sciences and Exercise Physiology

Original investigation of advanced nature, leading to a dissertation. Graded on a S/U basis only.

Credit Hour: 1-99
