

# MS in Dietetics

## Degree Requirements

This is not a standalone master's program. It is part of an accelerated program which allows qualified undergraduates to seamlessly transition into graduate studies, earning both degrees in an expedited timeframe. Students are admitted as undergraduates, typically in their third year, after completing an application and prerequisites for admission. Earning a Master of Science in Dietetics requires admission to the Coordinated Program in Dietetics and completion of a minimum of 30 hours of graduate courses. Students must maintain a 3.0 GPA to remain in the program. Listed below are the graduate courses to be taken for the master's degree.

All graduate level courses require a minimum grade of B.
