

## Graduate Certificate in Veterinary Science

The Graduate Certificate in Veterinary Science is ideal for veterinary professionals who are seeking employment in the public sector (government or state biomedical programs), industry or education. Those who are preparing to take exams for specialty certifications, or desire employment in private referral practices that require advance training, will also benefit from this certificate. Students who successfully complete the coursework required to earn an online graduate certificate in Veterinary Science will have acquired current, advanced information within the area of veterinary medicine and closely related topics.

This certificate can stand alone or may be earned by Master's students within other approved graduate programs.

## Requirements

In order to successfully complete the certificate program, students must complete 12 hours of courses through Veterinary Online programs and 3 credit hours of graduate level statistics. Problems, Research and courses graded Satisfactory/Unsatisfactory are not applicable, and all courses must be graduate level (7000 level or above) BIOMED, V\_BSCI, V\_PBIO, or V\_M\_S courses unless approved by the student's graduate committee.

Courses required by the certificate program can be finished within 36 weeks, and must be completed within 80 weeks (five 16-week semesters) after the student is accepted into the program. Students must maintain at least a 3.0 cum GPA, and no grade lower than a C may be earned in any course offered through Veterinary Online Programs.
