Fisheries And Wildlife (F_W)

F_W 1012: Introduction to Captive Wild Animal Management
(same as AN_SCI 1012). General introduction to housing, husbandry, behavior, genetics, nutrition, reproduction, animal health, and disease control of native and exotic species in zoological parks and other animal conservation facilities; emphasizes the role of captive animals in wildlife conservation. Graded on A-F basis only.

Credit Hours: 3

F_W 1100: Introductory Zoology with Laboratory
(same as BIO_SC 1100). Introduces important principles and concepts of zoology. Emphasizes cell biology; evolution; genetics; ecology; structure, function, development of the organism.

Credit Hours: 5

F_W 2500: Introduction to Genetics and Evolution for Conservation
Basic principles and processes of genetics and evolution and their importance for management and conservation. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MATH 1100, F_W 1100 or BIO_SC 1500
Recommended: NAT_R 1070, CHEM 1320

F_W 2600: Ornithology
(same as BIO_SC 2600). Structure, identification, habits, importance of regional birds. Field work, lectures, lab.

Credit Hours: 5
Prerequisites: F_W 1100
Recommended: 5 hours Biological Sciences

F_W 2700: Ichthyology
(same as BIO_SC 2700). A broad introduction to the biology and ecology of fishes. Emphasis will be placed on understanding the adaptations fishes exhibit to aspects of their environment.

Credit Hours: 4
Prerequisites: F_W 1100
Recommended: 8 hours Biological Sciences

F_W 2900: Principles of Wildlife Management
Expose students to the principles of wildlife management with emphasis on current issues faced by wildlife researchers and managers in the field. Graded on A-F basis only.

Credit Hours: 4
Recommended: NAT_R 1070 and one other course in biological or environmental science; sophomore standing or higher

F_W 3085: Problems in Fisheries and Wildlife
Individual problems studies to supplement regularly organized undergraduate courses in Fisheries and Wildlife. Proposal for problems study must be arranged by student and supervising faculty member prior to registration.

Credit Hour: 1-99
Prerequisites: consent of supervising faculty member

F_W 3600: Introduction to Conservation Biology
Introduction to principles of conservation biology. Application of ecological concepts and conservation biology principles to management of endangered species, biodiversity and threatened ecosystems.

Credit Hours: 3
Prerequisites: BIO_SC 3650 or BIO_SC 3400

F_W 3660: Mammalogy
(same as BIO_SC 3660). Taxonomy, distribution, structure, habits, importance of mammals; emphasizes those of central United States.

Credit Hours: 4
Recommended: F_W 1100 and Junior standing

F_W 3700: Animal Behavior
Behavior allows animals to react promptly to environmental changes, and is how they interact with others and their surroundings. Because behaving is central to an animal's life, knowing about behavior is fundamental to understanding animal ecology and to conservation efforts. Graded on A-F basis only.

Credit Hours: 3
Recommended: F_W 1100

F_W 3900: Ecology of Fishes
This course considers fishes' interactions with their environments in relation to survival, growth and population processes. The course is for mid- to upper-level undergraduates interested in fisheries science, management and fish conservation. May be repeated once for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BIO_SC 1500 or F_W 1100; sophomore standing
Recommended: STAT 2500

F_W 4002: Topics in Fisheries and Wildlife - Biological
Organized study of selected topics intended primarily for senior-level students in Fisheries and Wildlife Sciences.

Credit Hour: 1-99

F_W 4200: Urban Wildlife Conservation
(cross-leveled with F_W 7200). Reviewing the theory and practice of applying ecological concepts to the management of wildlife species in urban areas.

Credit Hours: 3
Prerequisites: BIO_SC 3650 or FOREST 4320

F_W 4200W: Urban Wildlife Conservation - Writing Intensive
(cross-leveled with F_W 7200). Reviewing the theory and practice of applying ecological concepts to the management of wildlife species in urban areas.

Credit Hours: 3
Prerequisites: BIO_SC 3650 or FOREST 4320

<tbody>
<tr>
<td>F_W 4220</td>
<td>Human Dimensions of Fish and Wildlife Conservation</td>
<td>Overview of human dimensions approaches and methods as they are applied to issues in fish and wildlife conservation.</td>
<td>3</td>
<td>Recommended: One 3000-level or above professional Fisheries and Wildlife management or techniques course</td>
</tr>
<tr>
<td>F_W 4300</td>
<td>Fisheries Management</td>
<td>(cross-leveled with F_W 7300). Introduction to the scientific principles and techniques of fishery management. Integrates ecological principles with social, economic and legal considerations.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>F_W 4400</td>
<td>Techniques for Fisheries Management and Conservation</td>
<td>Introduction to techniques (field and analytical/quantitative) used by fisheries and conservation biologists. Fosters understanding of techniques uses, advantages, limitations, biases, and data interpretation. Extended weekly field outings require chest waders and life jackets. Graded on A-F basis only.</td>
<td>4</td>
<td>Recommended: BIO_SC 3650 and STAT 2500</td>
</tr>

<tr>
<td>F_W 4500</td>
<td>Animal Population Dynamics and Management</td>
<td>(cross-leveled with F_W7500) Quantitative modeling approach to examining principles and analysis techniques of fish and wildlife population dynamics. Emphasis on approaches useful in the management of exploited species.</td>
<td>3</td>
<td>Prerequisites: MATH 1400; STAT 2500 or NAT_R 3110; F_W 2700 or F_W 4300</td>
</tr>
<tr>
<td>F_W 4600</td>
<td>Ecosystem Management</td>
<td>(cross-leveled with F_W 7600). Explores the development and implementation of large-scale approaches to restoring and maintaining ecosystems for sustainability. Incorporates ecological, socio-economic, and institutional factors that influence natural management agencies. Graded on A-F basis only.</td>
<td>4</td>
<td>Prerequisites: BIO_SC 3650 or FOREST 4320</td>
</tr>
<tr>
<td>F_W 4600W</td>
<td>Ecosystem Management - Writing Intensive</td>
<td>Explores the development and implementation of large-scale approaches to restoring and maintaining ecosystems for sustainability. Incorporates ecological, socio-economic, and institutional factors that influence natural management agencies. Graded on A-F basis only.</td>
<td>4</td>
<td>Prerequisites: BIO_SC 3650 and STAT 2500</td>
</tr>
<tr>
<td>F_W 4650</td>
<td>Natural Resource Planning and Management</td>
<td>Students will be exposed to various natural resource planning tools. Student teams will develop natural resource management plans with strategic and operational components for current conservation issues in Missouri. Plans will be critiqued by peers and outside professionals. Graded on A-F basis only.</td>
<td>4</td>
<td>Prerequisites: FOREST 4320 or BIO_SC 3650 and senior standing</td>
</tr>
<tr>
<td>F_W 4700</td>
<td>Wildlife Ecology Methods</td>
<td>(cross-leveled with F_W 7700). Techniques for conducting wildlife research. Graded on A-F basis only.</td>
<td>4</td>
<td>Prerequisites: BIO_SC 3650 and STAT 2500</td>
</tr>
<tr>
<td>F_W 4700W</td>
<td>WILDLIFE METHODS - Writing Intensive</td>
<td>(cross-leveled with F_W 7700). Techniques for conducting wildlife research. Graded on A-F basis only.</td>
<td>4</td>
<td>Prerequisites: BIO_SC 3650 and STAT 2500</td>
</tr>
<tr>
<td>F_W 4800</td>
<td>Environmental Toxicology</td>
<td>(cross-leveled with F_W 7800). Introduction to classes of chemicals, tools, methods, and approaches used in environmental toxicology. Emphasizes fundamentals of toxicology, dose-response relationships, evaluation of contaminant issues, strategies, and exposure analysis/toxicity assessment strategies in a risk assessment.</td>
<td>3</td>
<td>Prerequisites: CHEM 1320</td>
</tr>
<tr>
<td>F_W 4810</td>
<td>Wildlife Disease Ecology</td>
<td>An introduction to the ecology of wildlife diseases. Topics include the definition of a disease, how to measure diseases, impacts on individuals and populations, and the role of disease in wildlife management and conservation.</td>
<td>3</td>
<td>Recommended: Junior standing</td>
</tr>
<tr>
<td>F_W 4880</td>
<td>Waterfowl Ecology and Management</td>
<td>Ecology and management of North American waterfowl and their habitats. Laboratory exercises focus on identification, life histories, sex and age determination, and survey methods. Lectures cover taxonomy, ecology, behavior, population dynamics, harvest management, and habitat management and conservation. Graded on A-F basis only.</td>
<td>4</td>
<td>Prerequisites: BIO_SC 3650 and STAT 2500</td>
</tr>

</table>
Fisheries and Wildlife (F_W)  Credit Hours: 3
Prerequisites: F_W 2600; BIO_SC 3650; instructor’s consent

F_W 4910: Senior Seminar in Captive Wild Animal Management
(same as AN_SCI 4910). Investigates key issues in captive wild animal management, focusing on the role of animal caretakers in addressing the issues. Students are required to formulate informed opinions regarding these topics and communicate effectively about the subject matter. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: AN_SCI 1012 or F_W 1012; junior or senior standing

F_W 4940: Fisheries and Wildlife Internship
Supervised professional experience with an approval public or private organization. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1-12
Prerequisites: Fisheries and Wildlife majors only

F_W 4950: Undergraduate Research in Fisheries and Wildlife
Individually directed field or laboratory research for students under faculty supervision. Project must be arranged by student and faculty member prior to registration.

Credit Hour: 1-99
Prerequisites: consent of supervising faculty member

F_W 7002: Graduate Topics in Fisheries and Wildlife
Organized study of selected topics intended primarily for graduate students in Fisheries and Wildlife Sciences. Graded on A-F basis only.

Credit Hour: 1-99

F_W 7200: Urban Wildlife Conservation
(cross-leveled with F_W 4200). Reviewing the theory and practice of applying ecological concepts to the management of wildlife species in urban areas.

Credit Hours: 3
Prerequisites: BIO_SC 3650 or FOREST 4320

F_W 7220: Human Dimensions of Fish and Wildlife Conservation
Overview of human dimensions approaches and methods as they are applied to issues in fish and wildlife conservation.

Credit Hours: 3
Prerequisites: One 3000-level or above professional management or techniques course or instructor consent

F_W 7300: Fisheries Management
(cross-leveled with F_W 4300). Introduction to the scientific principles and techniques of fishery management. Integrates ecological principles with social, economic and legal considerations.

Credit Hours: 3
Prerequisites: BIO_SC 3650 and STAT 2500

F_W 7500: Animal Population Dynamics and Management
(cross-leveled with F_W 7500). Quantitative modeling approach to examining principles and analysis techniques of fish and wildlife population dynamics. Emphasis on approaches useful in the management of exploited species. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MATH 1400; STAT 2500 or NAT_R 3110; BIO_SC 3650 or FOREST 4320

F_W 7600: Ecosystem Management
(cross-leveled with F_W 4600). Explores the development and implementation of large-scale approaches to restoring and maintaining ecosystems for sustainability. Incorporates ecological, social-economic, and institutional factors that influence natural resource management agencies. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: BIO_SC 3650 or FOREST 4320

F_W 7700: Wildlife Ecology Methods
(cross-leveled with F_W 4700). Techniques for conducting wildlife research. Graded on an A-F basis only.

Credit Hours: 4
Recommended: Ecology and basic statistics course

F_W 7800: Environmental Toxicology

Credit Hours: 3
Prerequisites: CHEM 1320

F_W 7810: Wildlife Disease Ecology
An introduction to the ecology of wildlife diseases. Topics include the definition of a disease, how to measure diseases, impacts on individuals and populations, and the role of disease in wildlife management and conservation.

Credit Hours: 3
Prerequisites: instructor’s consent

F_W 7880: Waterfowl Ecology and Management

Credit Hours: 3
Prerequisites: F_W 2600; BIO_SC 3650; instructor’s consent

F_W 8001: Topics in Fisheries and Wildlife
Organized study of selected topics. Subjects and credit may vary from semester to semester.

Credit Hour: 1-99
Prerequisites: instructor’s consent
