Industrial And Manufacturing Systems (IMSE)

**IMSE 1000: Introduction to Industrial Engineering**
Introduction to industrial engineering profession, the Industrial and Manufacturing Systems Engineering department, and the core topics of industrial engineering. Introduction to problem solving, ethics and industrial engineering design and analysis techniques.

**Credit Hour:** 1

**IMSE 1010: Experimental Course**
For freshman-level students. Content and credit to be listed in the Schedule of Courses.

**Credit Hour:** 1-99

**IMSE 1087: Undergraduate Seminar**
Seminars are held monthly to provide a forum for departmental communication of upcoming opportunities (jobs, speakers, deadlines, etc.), speakers from industry to provide educational context, and student interaction. Required every semester of enrollment for graduation. Graded on S/U basis only.

**Credit Hours:** 0

**IMSE 2030: Fundamentals of Systems Design and Analysis**
Develop an understanding of a systems approach to the design and operation of modern industrial organizations: systems structure and function, system specification, structured problem solving and system design methodology.

**Credit Hours:** 3

**IMSE 2110: Probability and Statistics for Engineers**
Introduction to data analysis, probability concepts, random variables, parameter estimation and hypothesis testing.

**Credit Hours:** 3

**Prerequisites:** MATH 1500. Restricted to Engineering Students who are non-IMSE majors

**IMSE 2210: Linear Algebra for Engineers**
Study of quantitative methods necessary for analysis, modeling and design of optimal industrial systems.

**Credit Hours:** 3

**Prerequisites:** MATH 1700

**IMSE 2410: Introduction to Information Technologies**
A survey of current technologies and their use. Different technologies will be reviewed. Examples: web search strategies, common application tools, searching and sorting on the WWW, upcoming trends and directions in information technologies. This is a web-based self-study course with instructor’s guidance.

**Credit Hour:** 1

**IMSE 2710: Engineering Economic Analysis**
Fundamentals of engineering economic decision making. Includes time value of money, breakeven analysis, capital budgeting, replacement, after-tax analysis, inflation, risk, sensitivity analysis and multi-attribute analysis.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

**IMSE 2810: Performance Measurement and Ergonomics**

**Credit Hours:** 3

**Prerequisites:** IMSE 2110

**IMSE 3001: Topics in Industrial and Manufacturing Systems Engineering**
Current and new technical developments in industrial engineering. May be repeated to 6 hours.

**Credit Hours:** 0-4

**Prerequisites:** instructor’s consent

**IMSE 3030: Manufacturing and Supply Systems**
Provide a structured approach for the design and optimization of a system throughout its lifecycle: techniques following the logical sequence of strategic analysis, system design, implementation, and monitoring.

**Credit Hours:** 3

**Prerequisites:** IMSE 2030

**IMSE 3110: Probability Models for Engineers**
Introduction to probability concept and theory, random variables, discrete and continuous probability distributions, joint probability distributions.

**Credit Hours:** 3

**Prerequisites:** MATH 1500. Restricted to IMSE students only

**IMSE 3810: Ergonomics and Workstation Design**
Ergonomics and human factors theories applied to the design of man-machine systems. Discussion of ergonomic methods for measurement, assessment, and evaluation, with major topics including workstation design, environmental stresses, and workplace safety. Includes lab.

**Credit Hours:** 3

**Prerequisites:** Restricted to IMSE students and ENGINR 1200

**IMSE 3810W: Ergonomics and Workstation Design - Writing Intensive**
Ergonomics and human factors theories applied to the design of man-machine systems. Discussion of ergonomic methods for measurement, assessment, and evaluation, with major topics including workstation design, environmental stresses, and workplace safety. Includes lab.

**Credit Hours:** 3

**Prerequisites:** Restricted to IMSE students and ENGINR 1200
IMSE 4001: Topics in Industrial and Manufacturing Systems Engineering
Current and new technical developments in industrial engineering.
Credit Hours: 3

IMSE 4085: Problems in Industrial Engineering
Supervised investigation in industrial engineering presented in form of an engineering report.
Credit Hour: 1-4

IMSE 4110: Engineering Statistics
Understanding and application of statistical analysis techniques. Emphasis on hypothesis testing, regression analysis, analysis of variance (ANOVA) and design of experiments (DOE).
Credit Hours: 3
Prerequisites: Restricted to IMSE students or by Departmental consent. Grade of C- or better in IMSE 3110

IMSE 4210: Linear Optimization
(cross-leveled with IMSE 7210). Theory and application of linear optimization.
Credit Hours: 3
Prerequisites: Restricted to IMSE students. Grade of C- or better in IMSE 2210

IMSE 4220: Optimization Modeling and Computational Methods
(cross-leveled with IMSE 7220). Modeling and solution techniques for mathematical optimization, including linear, nonlinear, integer, and stochastic programming. Emphasis on formulation of models for most-efficient use of solution algorithms. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: IMSE 3110, IMSE 4210

IMSE 4230: Operations Research Models
Formulates probabilistic models and determines optimal control policies for queuing and inventory systems. Introduces Markov chains and dynamic programming.
Credit Hours: 3
Prerequisites: Restricted to IMSE students or by Departmental consent. Grade of C- or better in IMSE 2210 and IMSE 3110

IMSE 4280: Systems Simulation
Discrete-event stochastic systems modeling and experimentation using simulation software. Statistical design and analysis including distribution fitting and alternative comparison methodologies.
Credit Hours: 3
Prerequisites: Restricted to IMSE students. INFOTC 1040 or CMP_SC 1050. Grade of C- or better in IMSE 4110

IMSE 4310: Integrated Production Systems Design
Design and operation of production systems, including lean six sigma concepts, just-in-time/kanban, facility layout and material flow issues.
Credit Hours: 3

IMSE 4330: Material Flow and Logistics System Design
Modeling and analysis of structural and operational issues associated with material-flow system design including facility location, warehouse/inventory systems, and distribution/transportation systems.
Credit Hours: 3
Prerequisites: IMSE 4210 and IMSE 4280

IMSE 4350: Production and Operations Analysis
Quantitative methods for forecasting, scheduling, and production control in manufacturing and service systems. Use of Enterprise Resource Planning (ERP) systems.
Credit Hours: 3
Prerequisites: Restricted to IMSE students or by Departmental consent. IMSE 4210 and IMSE 4230

IMSE 4360: Supply Chain Engineering
(cross-leveled with IMSE 7360). Modeling and analysis of supply chain network design and management issues including integration of production, inventory control, supplier selection, risk management and logistics network design. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: IMSE 4210 and IMSE 4280

IMSE 4380: Six Sigma Methodology
(cross-leveled with IMSE 7380). An overview of the Six Sigma DMAIC methodology for analyzing and improving processes. Requires completing a Six Sigma Green Belt project. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Grade of C or better in IMSE 2110 or IMSE 4110 or STAT 4710

IMSE 4385: Lean Six Sigma Green Belt Project
Application of the Lean Six Sigma methodology in an industry-based project. Prerequisites: IMSE 4310
Credit Hour: 1

IMSE 4410: Management Information Systems Design
MIS concepts and management issues, HTML for web pages and eShop (front-office operations), back-office operations using relational databases, introduction to SQL.
Credit Hours: 3
Prerequisites: Restricted to IMSE students. INFOTC 1040 or CMP_SC 1050 and junior standing required

IMSE 4420: Web-Based Information Systems
Data models, design of databases using E-R, UML (Access/Oracle), web databases, web servers and interfaces (Visual Basic, JavaScript), E-commerce infrastructure (PDM, STEP, XML), data mining for management information and services.
Credit Hours: 3
Prerequisites: IMSE 4410 and instructor’s consent

</thead>
<tbody>
<tr>
<td>IMSE 4550</td>
<td>Computer Aided Design and Manufacturing</td>
<td>Product realization process from design, process planning, to manufacturing. Includes CE, DFS/DFM, CAD, CAPP, CNC, and survey of manufacturing methods.</td>
<td>4</td>
<td>Restricted to IMSE students; Junior Standing</td>
</tr>
<tr>
<td>IMSE 4555H</td>
<td>Entrepreneurial Innovation Management: Enterprise Conception-Honors</td>
<td>Develop a new business and technology plan including marketing, finance, engineering, manufacturing, and production concepts in this joint College of Engineering and College of Business course.</td>
<td>3</td>
<td>sophomore standing. Honors eligibility required</td>
</tr>
<tr>
<td>IMSE 4560</td>
<td>Introduction to Rapid Prototyping</td>
<td>Course covers all five MU systems: FDM, SLS, SLA, Polyjet, 3DP. Students will learn fundamental rapid prototyping and related concepts, and design and produce models from each system. Graded on A-F basis only.</td>
<td>3</td>
<td>Sophomore standing or higher</td>
</tr>
<tr>
<td>IMSE 4570</td>
<td>Computer Integrated Manufacturing Control</td>
<td>Implementation of computer integrated manufacturing (CIM) and automation at the shop floor level. Covers essential components of machine sensing and actuation (including programmable robots), information representation and processing, data communication and networking.</td>
<td>3</td>
<td>Junior Standing</td>
</tr>
<tr>
<td>IMSE 4580</td>
<td>Industrial Energy Efficiency and Management</td>
<td>Introduction to the fundamentals of industrial energy efficiency and management. Covers the essential concepts, best practices, management systems and current standards to achieve and improve energy efficiency in industrial settings, and utilizes hands-on experiences involving real assessment and analysis of industrial site visits and projects.</td>
<td>3</td>
<td>IMSE 2030 or instructor's consent</td>
</tr>
<tr>
<td>IMSE 4585H</td>
<td>Entrepreneurial Innovation Management: Enterprise Design-Honors</td>
<td>Expand on IMSE 4750 business/technology plan into an operations plan; advertising facilities layout, selling and distribution channels, product designs, accounting procedures, manufacturing processes, and prototypes.</td>
<td>3</td>
<td>IMSE 4555H. Honors eligibility required</td>
</tr>
<tr>
<td>IMSE 4610</td>
<td>Engineering Quality Control</td>
<td>Analysis of quality in manufacturing including control charts, sampling plans, process capability, experimental design; introduction to system reliability. Overview of Six Sigma and DMAIC methodology.</td>
<td>3</td>
<td>Junior or senior level undergraduate students</td>
</tr>
<tr>
<td>IMSE 4770</td>
<td>Entrepreneurial Innovation Management: Enterprise Operations</td>
<td>Perform the day-to-day operations for an enterprise by managing all business processes including finance, manufacturing, sales and delivery. Prerequisites: Junior Standing</td>
<td>3</td>
<td>Junior Standing. Honors eligibility required</td>
</tr>
<tr>
<td>IMSE 4775H</td>
<td>Entrepreneurial Innovation Management: Enterprise Operations-Honors</td>
<td>Perform the day-to-day operations for an enterprise by managing all business processes including finance, manufacturing, sales and delivery. Prerequisites: Junior Standing</td>
<td>3</td>
<td>Junior Standing. Honors eligibility required</td>
</tr>
<tr>
<td>IMSE 4810</td>
<td>Cognitive Ergonomics</td>
<td>This course will cover the study of empirical research in Cognitive ergonomics and Human-Computer Interaction (HCI). Students will learn cognitive information processing, mental workload, human reliability, and empirical methods in HCI research. Graded on A-F basis only.</td>
<td>3</td>
<td>Junior or senior level undergraduate students</td>
</tr>
<tr>
<td>IMSE 4910</td>
<td>Industrial Engineering Internship</td>
<td>An industry-based learning experience that provides opportunities to apply industrial engineering skills, concepts and theories in a practical context. Requires submission of an internship plan for prior approval and a final oral presentation / written report at the completion of the internship. Graded on A-F basis only.</td>
<td>3</td>
<td>Junior Standing. Honors eligibility required</td>
</tr>

</table>

**Prerequisites:**
- IMSE 4550: Computer Aided Design and Manufacturing - Restricted to IMSE students; Junior Standing
- IMSE 4560: Introduction to Rapid Prototyping - Sophomore standing or higher
- IMSE 4570: Computer Integrated Manufacturing Control - Junior Standing
- IMSE 4580: Industrial Energy Efficiency and Management - IMSE 2030 or instructor's consent
- IMSE 4585H: Entrepreneurial Innovation Management: Enterprise Design-Honors - IMSE 4555H. Honors eligibility required
- IMSE 4610: Engineering Quality Control - Junior or senior level undergraduate students
- IMSE 4770: Entrepreneurial Innovation Management: Enterprise Operations - Junior Standing
- IMSE 4775H: Entrepreneurial Innovation Management: Enterprise Operations-Honors - Junior Standing
- IMSE 4810: Cognitive Ergonomics - Junior or senior level undergraduate students
- IMSE 4910: Industrial Engineering Internship - Junior Standing

**Credit Hours:**
- 3
- 4
- 3
- 3
**IMSE 4920: Industrial Engineering COOP**
An industry-based learning experience that provides opportunities to apply industrial engineering skills, concepts and theories in a practical context. Requires submission of a COOP plan for prior approval and a final oral presentation / written report at the completion of the COOP. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** instructor and departmental consent  
**Recommended:** junior standing

---

**IMSE 4970: Capstone Design I**
Overview of professional engineering issues such as ethics, team dynamics, communication, and project management. Includes team-based industrial assessments to develop skills in problem/opportunity identification. Graded on A-F basis only.

**Credit Hour:** 1  
**Prerequisites:** Restricted to IMSE students; Senior Standing, IMSE 2030; IMSE 2710

---

**IMSE 4970W: Capstone Design I - Writing Intensive**
Overview of professional engineering issues such as ethics, team dynamics, communication, and project management. Includes team-based industrial assessments to develop skills in problem/opportunity identification. Graded on A-F basis only.

**Credit Hour:** 1  
**Prerequisites:** Restricted to IMSE students; Senior Standing, IMSE 2030; IMSE 2710

---

**IMSE 4980: Capstone Design II**
Industry-based team design experience structured to integrate material presented throughout the Industrial and Manufacturing Systems Engineering curriculum. Must immediately follow IMSE 4970.

**Credit Hours:** 3  
**Prerequisites:** Restricted to IMSE student; IMSE 3810, IMSE 4310, and IMSE 4970

---

**IMSE 4980W: Capstone Design II - Writing Intensive**
Industry-based team design experience structured to integrate material presented throughout the Industrial and Manufacturing Systems Engineering curriculum. Must immediately follow IMSE 4970.

**Credit Hours:** 3  
**Prerequisites:** Restricted to IMSE student; IMSE 3810, IMSE 4310, and IMSE 4970

---

**IMSE 4990: Undergraduate Research in Industrial Engineering**
Independent investigation or project in industrial engineering. May be repeated to 6 hours.

**Credit Hour:** 0-6

---

**IMSE 4995: Undergraduate Research Industrial Engineering - Honors**
Independent investigation or project in industrial engineering. May be repeated to 6 hours. Enrollment limited to receiving departmental honors

**Credit Hour:** 0-6  
**Prerequisites:** Restricted to IMSE students only

---

**IMSE 7001: Topics in Industrial and Manufacturing Systems Engineering**
Current and new technical developments in industrial engineering.

**Credit Hours:** 3

---

**IMSE 7110: Engineering Statistics**
Understanding and application of statistical analysis of techniques. Emphasis on hypothesis testing, regression analysis, analysis of variance (ANOVA) and design of experiments (DOE).

**Credit Hours:** 3  
**Prerequisites:** grade of C- or better in IMSE 3110

---

**IMSE 7210: Linear Optimization**
(cross-leveled with IMSE 4210). Theory and application of linear optimization.

**Credit Hours:** 3  
**Prerequisites:** IMSE 2210

---

**IMSE 7220: Optimization Modeling and Computational Methods**
(cross-leveled with IMSE 4220). Modeling and solution techniques for mathematical optimization, including linear, nonlinear, integer, and stochastic programming. Emphasis on formulation of models for most-efficient use of solution algorithms. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** IMSE 3110, IMSE 4210

---

**IMSE 7230: Operations Research Models**
Formulates probabilistic models and determines optimal control policies for queuing and inventory systems. Introduces Markov chains and dynamic programming.

**Credit Hours:** 3

---

**IMSE 7280: Systems Simulation**
Discrete-event stochastic systems modeling and experimentation using simulation software. Statistical design and analysis including distribution fitting and alternative comparison methodologies. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** grade of C- or better in IMSE 4110, INFOTC 1040 or CMP_SC 1050

---

**IMSE 7310: Integrated Production Systems Design**
Design and operation of production systems, including lean production concepts, just-in-time / kanban, facility layout and material flow issues.

**Credit Hours:** 3  
**Prerequisites:** IMSE 4210, IMSE 4280
IMSE 7330: Material Flow and Logistics System Design
Modeling and analysis of structural and operational issues associated with material-flow system design including facility location, warehouse/inventory systems, and distribution/transportation systems.
Credit Hours: 3  
Prerequisites: IMSE 4210, IMSE 4280

IMSE 7350: Production and Operations Analysis
Quantitative methods for forecasting, scheduling, and production control in manufacturing and service systems. Use of Enterprise Resource Planning (ERP) systems.
Credit Hours: 3  
Prerequisites: IMSE 4210 and IMSE 4230

IMSE 7360: Supply Chain Engineering
(cross-leveled with IMSE 4360). Modeling and analysis of supply chain network design and management issues including integration of production, inventory control, supplier selection, risk management and logistics network design. Graded on A-F basis only.
Credit Hours: 3  
Prerequisites: IMSE 4350

IMSE 7380: Six Sigma Methodology
(cross-leveled with IMSE 4380). An overview of the Six Sigma DMAIC methodology for analyzing and improving processes. Requires completing a Six Sigma Green Belt project. Graded on A-F basis only.
Credit Hours: 3  
Prerequisites: Grade of C or better in IMSE 2110 or IMSE 4110 or STAT 4710

IMSE 7385: Lean Six Sigma Green Belt Project
Application of the Lean Six Sigma methodology in an industry-based project.
Credit Hour: 1  
Prerequisites: IMSE 4310

IMSE 7410: Management Information Systems Design
MIS concepts and management issues, HTML for web pages and eShop (front office operation), back-office operations using relational databases, introduction for SQL. Graded on A-F basis only.
Credit Hours: 3  
Prerequisites: INFOTC 1040 or CMP_SC 1050

IMSE 7420: Web-Based Information Systems
Data models, design of databases using E-R, UML (Access/Oracle), web databases, web servers and interfaces (Visual Basic, JavaScript), e-commerce infrastructure (PDM, STEP, XML), data mining for management information and services.
Credit Hours: 3  
Prerequisites: IMSE 4410 and instructor's consent

IMSE 7550: Computer Aided Design and Manufacturing
(cross-leveled with IMSE 4550). Product realization process from design, process planning, to manufacturing. Includes CE, DFS/DFM, CAD, CAPP, CNC, and survey of manufacturing methods.
Credit Hours: 4

IMSE 7560: Introduction to Rapid Prototyping
(cross-leveled with IMSE 4560). Course covers all five MU systems: FDM, SLS, SLA, Polyjet, 3DP. Students will learn fundamental rapid prototyping and related concepts, and design and produce models from each system. Graded on A-F basis only.
Credit Hours: 3

IMSE 7570: Computer Integrated Manufacturing Control
Implementation of computer integrated manufacturing (CIM) and automation at the shop floor level. Covers essential components of machine sensing and actuation (including programmable robots), information representation and processing, data communication and networking.
Credit Hours: 3

IMSE 7580: Industrial Energy Efficiency and Management
(cross-leveled with IMSE 4580). Introduction to the fundamentals of industrial energy efficiency and management. Covers the essential concepts, best practices, management systems and current standards to achieve and improve energy efficiency in industrial settings, and utilizes hands-on experiences involving real assessment and analysis of industrial site visits and projects.
Credit Hours: 3  
Prerequisites: IMSE 2030 or instructor's consent

IMSE 7610: Engineering Quality Control
Analysis of quality in manufacturing including control charts, sampling plans, process capability, experimental design; introduction to system reliability. Overview of Six Sigma and DMAIC methodology.
Credit Hours: 3  
Prerequisites: IMSE 4110 or IMSE 7110

IMSE 7750: Entrepreneurial Innovation Management: Advanced Enterprise Conception
Develop a new business and technology plan (including marketing, finance, engineering, manufacturing, and production concepts) in this joint College of Engineering/College of Business course.
Credit Hours: 3

IMSE 7760: Entrepreneurial Innovation Management: Advanced Enterprise Design
Expand on IMSE 7750 business and technology plan into a business operation plan: advertising designs, facilities layout, selling and distribution channels, product designs, accounting procedures, manufacturing processes, and product prototypes.
Credit Hours: 3  
Prerequisites: IMSE 7750
IMSE 7770: Entrepreneurial Innovation Management: Advanced Enterprise Operations
Perform the day-to-day operations for an enterprise by managing all business processes including finance, manufacturing, sales, and delivery.
Credit Hours: 3

IMSE 7810: Cognitive Ergonomics and Decision Making (cross-leveled with IMSE 4810). This course will cover the study of empirical research in cognitive ergonomics and Human-Computer Interaction (HCI). Students will learn cognitive information processing, mental workload, human reliability, decision-making, and empirical methods in HCI research. Graded on A-F basis only.
Credit Hours: 3

IMSE 8001: Advanced Topics in Industrial & Manufacturing Systems Engineering
Current and new technical developments in industrial engineering.
Credit Hours: 3

IMSE 8030: Advanced Manufacturing and Supply Systems
The design, regulation, and optimization of manufacturing and supply systems through systems analysis.
Credit Hours: 3

IMSE 8070: Research Methods in Industrial & Manufacturing System Engineering
Development of research approach. Selection of topic area including techniques of literature search with special emphasis on problem definition. Topics pertinent to planning, organizing and carrying out industrial engineering research or design project.
Credit Hour: 1

IMSE 8085: Problems in Industrial and Manufacturing Systems Engineering
Supervised investigation in industrial engineering to be presented in the form of an engineering report.
Credit Hour: 1-99

IMSE 8087: Industrial Engineering Graduate Seminar
Selected topics in industrial engineering; oral presentations and engineering reports. Graded on S/U basis only.
Credit Hours: 0

IMSE 8110: Engineering Experimentation
Application of advanced statistical methods for the analysis of engineering design and experimental problems.
Credit Hours: 3
Prerequisites: IMSE 4110 or IMSE 7110

IMSE 8210: Operations Research-Discrete Models
Applications of discrete operations research methods, including linear programming, fuzzy sets, integer programming, and meta-heuristics.
Credit Hours: 3

IMSE 8220: Nonlinear Optimization
Introduces computational non-linear mathematical programming procedures their use in solving complex industrial systems design problems.
Credit Hours: 3
Prerequisites: IMSE 4210 or IMSE 7210

IMSE 8230: Operations Research-Stochastic Models
Theory and applications of stochastic processes; includes continuous time Markov chain, Markov decision process, queueing theory, and stochastic manufacturing systems.
Credit Hours: 3
Prerequisites: IMSE 4230 or IMSE 7230

IMSE 8280: Advanced Systems Simulation
Theory and practice of dynamic modeling and statistical experimentation.
Credit Hours: 3

IMSE 8310: Advanced Integrated Production Systems
Advanced study of the design and operation of flow shop, job shop, and cell-based production systems, including scheduling, layout and material flow issues.
Credit Hours: 3
Prerequisites: IMSE 4310 or IMSE 7310

IMSE 8370: Supply Chain Modeling and Analysis
Theory and application of supply chain networks, integration of production and inventory control methods.
Credit Hours: 3
Prerequisites: IMSE 8210, IMSE 8230

IMSE 8410: Advanced Management Information Systems Design
Develops requirements for management information, staffing, cost estimating, evaluation, and the design of management communication systems; includes case studies.
Credit Hours: 3
Prerequisites: IMSE 4410

IMSE 8550: Advanced CAD/CAM
Covers the state-of-the-art in CAD/CAM and explores the latest developments, residual problems, and new direction in CAD/CAM. Includes sculptured surface modeling, rapid prototyping and manufacturing, integrated process planning, shape analysis, machine intelligence.
Credit Hours: 3
Prerequisites: IMSE 4550 or IMSE 7550

IMSE 8610: Advanced Quality Systems
Advanced process control charts, empirical model-building, fractional factorial designs and Taguchi techniques as tools for process and
product improvement, professional ethics in quality management; TQM and ISO 9000.

Credit Hours: 3
Prerequisites: IMSE 4610, IMSE 8110

---

IMSE 8730: Strategic Enterprise Management
Topics including enterprise strategies, process and content models, strategy implementation, value chain analysis, business processes, systems engineering approaches, business process reengineering, and dynamic systems modeling.

Credit Hours: 3

---

IMSE 8810: Human Factors
Human factors inputs, outputs and environment and their influence on design and evaluation of man and machine systems.

Credit Hours: 3

---

IMSE 8850: Health Care Systems Design and Analysis
Health care systems design principles and major problems, basic organization within health care system, alternative system design strategies, factors affecting design process success.

Credit Hours: 3

---

IMSE 8990: Research-Masters Thesis in Industrial Engineering
Independent investigation in field of industrial engineering to be presented as a thesis. Graded on S/U basis only.

Credit Hour: 1-99

---

IMSE 9210: Advanced Linear Optimization
Advanced study of linear programming, including optimization and its application including large-scale optimization, primal-dual methods, decomposition, interior point methods, convex analysis, and integer programming. Prerequisites: IMSE 4210 or IMSE 7210

Credit Hours: 3

---

IMSE 9230: Stochastic Service Systems
Development and application of stochastic models in the design of service systems in which either demands for service or services supplies, or both, have a probabilistic nature.

Credit Hours: 3
Prerequisites: STAT 4750, IMSE 8230

---

IMSE 9250: Dynamic Programming
Introduces theory and computational aspects of dynamic programming; its application to sequential decision problems.

Credit Hours: 3
Prerequisites: IMSE 4210 or IMSE 7210 and IMSE 4230 or IMSE 7230

---

IMSE 9260: Integer and Combinatorial Optimization
Theory, solution methodology, and application of integer and combinatorial optimization.

Credit Hours: 3
Prerequisites: IMSE 8210

---

IMSE 9990: Research-Doctoral Dissertation in Industrial Engineering
Independent investigation in field of industrial engineering to be presented as a dissertation. Graded on S/U basis only.

Credit Hour: 1-99
