<tbody>
<tr>
<td>MED_ID 5041</td>
<td>Structure and Function of the Human Body I</td>
<td>Biochemical principles, cell biology, human development, histology and gross anatomy with clinical correlates utilizing patient examples and non-invasive techniques.</td>
<td>6</td>
</tr>
<tr>
<td>MED_ID 5042</td>
<td>Interviewing</td>
<td>Development of skills needed to obtain a history of the patient's present illness, past medical history and other pertinent background information. Vitaly important to medical practice, these skills are role modeled, practiced and evaluate with detailed feedback. Additional emphasis is placed on the doctor-patient relationship, ethics and the role of the physician as a therapeutic agent.</td>
<td>3</td>
</tr>
<tr>
<td>MED_ID 5043</td>
<td>Structure and Function of the Human Body II</td>
<td>Study of the structure and function of the body's metabolic, nervous and muscular systems.</td>
<td>6</td>
</tr>
<tr>
<td>MED_ID 5044</td>
<td>Physical Examination</td>
<td>Introduction to the doctor-patient relationship and systematic physical examination of the patient. Certification in basic life support is also included.</td>
<td>3</td>
</tr>
<tr>
<td>MED_ID 5045</td>
<td>Structure and Function of the Human Body III</td>
<td>Study of the structure and function of the body's cardiovascular, gastrointestinal, and urinary systems.</td>
<td>6</td>
</tr>
<tr>
<td>MED_ID 5046</td>
<td>Psychosocial Aspects of Medicine</td>
<td>A brief study of the history of medicine and the impact of key events on current medical practice. Study of the biophychosocial model, biomedical ethics and specific psychosocial problems encountered by physicians such as compliance, problems based in human sexuality, substance abuse and death and dying.</td>
<td>3</td>
</tr>
<tr>
<td>MED_ID 5047</td>
<td>Structure and Functions of the Human Body IV</td>
<td>Study of the structure and function of the endocrine, reproductive, vascular systems. The classification of pathogenic and non-pathogenic organisms, mechanisms of infection, the immune response and the interaction between pharmacologic agents and exogenous organisms.</td>
<td>6</td>
</tr>
<tr>
<td>MED_ID 5048</td>
<td>Clinical Epidemiology and Preventive Medicine</td>
<td>Application of clinical epidemiology to understanding measurement of population characteristics and to the critical analysis of the literature through analysis of study designs and interpretation of the results and causal relationships. Study of prevention, screening and health maintenance as important aspects of health care.</td>
<td>3</td>
</tr>
<tr>

**MED_ID 5343: Structure/Function Human Body II - Remediation**
Structure/Function Human Body II - Remediation
Credit Hours: 6

**MED_ID 5344: Physical Exam - Remediation**
Physical Exam - Remediation
Credit Hours: 3

**MED_ID 5345: Structure/Function Human Body III**
Structure/Function Human Body III
Credit Hours: 6

**MED_ID 5346: Psychosocial Aspects Med - Remediation**
Psychosocial Aspects Med - Remediation
Credit Hours: 3

**MED_ID 5347: Structure/Function Human Body IV - Remediation**
Structure/Function Human Body IV - Remediation
Credit Hours: 6

**MED_ID 5348: Clinical Epidemiology and Preventive Medicine - Remediation**
Clinical Epidemiology and Preventive Medicine - Remediation
Credit Hours: 3

**MED_ID 5551: Pathophysiology I**
Pathophysiologic mechanisms of cell injury, inflammation and repair, hemodynamic disturbances, genetic disorders, autoimmune response, immune deficiency and hypersensitivity reactions.
Credit Hours: 6

**MED_ID 5552: Diagnostic Tests and Medical Decisions**
Assessment of the appropriate use and interpretation of common diagnostic tests and their contribution to medical decisions and the care of patients. Includes emphasis on the review of systems, interactive hypothesis testing, differential diagnosis probability, sensitivity and specificity, and cost benefit and cost effectiveness analysis.
Credit Hours: 3

**MED_ID 5553: Pathophysiology II**
Pathophysiologic mechanisms of cardiovascular disease, diseases of the respiratory system, disorders of the blood, and nutritional diseases.
Credit Hours: 6

**MED_ID 5554: Psychopathology and Behavioral Medicine**
Presentation and discussion of the U.S. health care system and health care reform, financing and resource allocation, and the impact of change on individuals, communities, employers and the government. Included are analyses of the ethical and legal implications of health care and health care reform.
Credit Hours: 3

**MED_ID 5555: Pathophysiology III**
Pathophysiologic mechanisms of the digestive, endocrine and urogenital systems.
Credit Hours: 6

**MED_ID 5556: Clinical Practicum**
A continuation of Block 6 objectives and a clinical practicum and review comprise this block.
Credit Hours: 3

**MED_ID 5557: Pathophysiology IV**
Pathophysiologic mechanisms of cardiovascular disease, diseases of the respiratory system, disorders of the blood, and nutritional diseases.
Credit Hours: 6

**MED_ID 5558: Physician as a Person**
Exploration of the physician as a person, the balance between professional and personal demands, family life, membership in a community, the stresses and rewards of the medical profession, professional ethics and the doctor-patient relationship. A four week clinical review completes this block.
Credit Hours: 3

**MED_ID 5559: Advanced Physical Diagnosis I**
Advanced Physical Diagnosis I
Credit Hour: 1

**MED_ID 5570: Advanced Clinical Skill Practicum**
This course is designed for MD/PhD students and other medical students away on research or post-sophomore fellowship leave. Approval to enroll must be obtained from the Director of the MD/PhD program or the Faculty Director of Clinical curriculum. Graded on S/U basis only.
Prerequisites: Advanced Physical Diagnosis; must have satisfactorily completed the second year of medical school

**MED_ID 5751: Pathophysiology I - Remediation**
Pathophysiology I - Remediation
Credit Hours: 6

**MED_ID 5752: Diagnosis Test/Med Decision - Remediation**
Diagnosis Test/Med Decision - Remediation
Credit Hours: 3

**MED_ID 5753: Pathophysiology II - Remediation**
Pathophysiology II - Remediation
Credit Hours: 6

**MED_ID 5755: Pathophysiology III - Remediation**
Pathophysiology III - Remediation
Credit Hours: 6
Students will enhance their knowledge, skills, and attitudes about patient-centered care through active participation in direct patient care activities while under the supervision of a faculty preceptor. Students will integrate previously acquired knowledge and concepts and apply them to the care and management of patients.

**Credit Hours:** 5

**MED_ID 6040: SCC Advanced Clinical Surgical Selective**
Students will enhance their knowledge, skills, and attitudes about patient-centered care through active participation in direct patient care activities while under the supervision of a faculty preceptor. Students will integrate previously acquired knowledge and concepts and apply them to the care and management of patients.

**Credit Hours:** 5

**Recommended:** Successful completion of 5 of 7 core clerkships, including the Surgery clerkship. Additional department specific pre-requisites may apply

**MED_ID 6244: ABS Quality Improvement and Patient Safety Elective**
The 4th year student will work with leaders in the Office of Clinical Effectiveness to identify an improvement project to be conducted during the elective. Students will have self-paced readings/didactic expectations, and will be expected to review and report on medical literature relevant to the care process(es) targeted for improvement. To complete their project, the student will present the improvement work to patient safety and quality improvement leaders, as well as stakeholders in the care process(es) identified for improvement efforts.

**Credit Hours:** 5

**MED_ID 6390: ABS Individualized Study in Medicine-M1**
Goals/Objectives: Participate in PBL as a tutor under the guidance of an experienced faculty tutor. Review the literature appropriate to each case. Update one PBL case that is used in the course of the block OR update a problem solving exam OR write a new problem solving exam. Students must submit the case or exam electronically to the course coordinator. Evaluation: Student's performance as tutor will be evaluated by the supervising faculty member and the tutor group members. Notes: During a four-week block, the fourth year student will tutor an M-1 PBL group (Monday, Wednesday, & Friday mornings) under the supervision of a senior faculty member. Contact course coordinator for case update details. Submission date for case update is set two weeks after the tutoring session ends. The student will attend all tutor preparation meetings and prepare for PBL through reading, self-directed study and discussions with faculty. Complete student mid-block and end-of-block evaluation as directed.

**Credit Hours:** 5

**Prerequisites:** M4s registering for PBL tutoring must be in good standing and not on probation. M4s must not have come before the CSP for an automatic vote for dismissal

**MED_ID 6391: ABS Individualized Study in Medicine-M2**
ABS Individualized Study in Medicine-M2

**Credit Hours:** 5

**MED_ID 6393: ABS Interdisciplinary Research**
ABS Interdisciplinary Research

**Credit Hour:** 5-10
MED_ID 6394: ABS Cross-Cultural Medicine
ABS Cross-Cultural Medicine
Credit Hours: 5

MED_ID 6396: ABS Medical Practice Organization
ABS Medical Practice Organization
Credit Hour: 5-10

MED_ID 6397: ABS Academic Tutoring for M1/M2 Students
ABS Academic Tutoring for M1/M2 Students
Credit Hours: 5

MED_ID 6398: ABS County Public Health
ABS County Public Health
Credit: 5

MED_ID 6399: ABS Case Writing
ABS Case Writing
Credit Hours: 5

MED_ID 6690: Elective Individual Study in Medicine - M1
Elective Individual Study in Medicine - M1
Credit Hours: 5

MED_ID 6691: Elective Individual Study in Medicine - M2
Goals/Objectives: Participate in PBL as a tutor under the guidance of an experienced faculty tutor. Evaluations: the student's performance as tutor will be evaluated by the supervising faculty member and the tutor group members. Notes: During the four-week block, the fourth year student will tutor a M-2 PBL group (Tuesday and Thursday afternoons) under the supervision of a senior faculty member.
Credit Hours: 5
Prerequisites: M4s registering for PBL tutoring must be in good standing and not on probation. M4s must not have come before the CSP for an automatic vote for dismissal.

MED_ID 6692: Case/Exam Writing Elective
The fourth year medical student will work as part of a team in order to develop learning materials for the first and second year students. Students will work closely with faculty advisors and clinical mentors to develop educationally sound learning materials. Under the guidance of faculty preceptors, medical students will author one original PBL case including a comprehensive tutor guide and multiple choice examination questions covering the case objectives, AND one original Clinical Reasoning Exam including an annotated key.
Credit Hours: 5
Prerequisites: fourth year medical student in good standing

MED_ID 6693: Simulation Preparation for Internship
This course is meant to increase the medical students' knowledge and skillbase in preparation for the first year of internship. In order to accomplish this, the students will be exposed to a variety situations common to first year residents through activities created with simulation. Throughout the course, students will demonstrate how to provide effective and efficient patient-centered care, while improving their communication skills and professionalism with patients and other healthcare providers. Students will understand the role of simulation in medical education and develop skills in debriefing of scenarios throughout the course. At the end of the course, students will be expected to complete a simulation capstone project. Prerequisites: Class level: 4th year medical student. Approval by Simulation Director and Completion of all Core Clerkship Requirements.
Credit Hours: 5

MED_ID 6694: Nutrition Elective
The Nutrition 4-week elective is largely a customizable elective that can be designed to match a student's interest(s) with a wide range of mentored nutrition experiences. The experience will include some fixed elements such as participation in a weekly seminar series and/or weekly journal clubs in which the student will be expected to present research papers. Focused experiences can be designed in areas including, but not limited to, Medical Nutrition Therapy, General Dietetics, Inpatient TPN/ICU and enteral feeds, Research Nutrition Studies, and Bariatric Surgery Nutrition. A wide variety of clinical environments will be available (pediatric obesity/endocrinology, failure to thrive, gastroenterology, cancer, etc.). Students will learn using a variety of experiences, evidence-based materials, patient simulations, and case studies. Students will produce a final written product of a revised or new PBL case or a paper on a specific nutrition prescription for a given diagnosis.
Credit Hours: 5
Prerequisites: Successful completion of the first two years of medical school

MED_ID 6925: Springfield Clinical Campus Elective
Students will work under the supervision of a faculty preceptor at the Springfield Clinical Campus. Students will see patients in the outpatient clinic and/or inpatient hospital setting, perform a history and exam, and develop a patient-centered assessment and plan. They will then discuss their findings, assessment and plan with the faculty preceptor and go see the patient together. The student will complete oral patient presentations and document patient encounters in the medical record as directed by the faculty preceptor.
Credit Hours: 2
Prerequisites: successful completion of the first two years of medical school
