Nuclear Medicine
(NUCMED)

NUCMED 1000: Orientation to Nuclear Medicine
An overview using a series of short rotations through local nuclear medicine departments and a self-directed review of a current text. Clinical rotations for this course are arranged on an individual basis. Graded on S/U basis only.

Credit Hour: 1

NUCMED 3255: Orientation to Clinical Practice
This course provides an introductory experience to clinical practice. Must be accepted into Nuclear Medicine Program. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Restricted to Nuclear Medicine students, junior standing required

NUCMED 3256: Clinical Nuclear Medicine I
Introductory clinical course for senior level students. Introduces instrumentation, administration, procedures, and laboratory techniques. Includes supervised clinical participation.

Credit Hours: 2
Prerequisites: NUCMED 3263 and restricted to Nuclear Medicine students only

NUCMED 3263: Morphological Correlations in Nuclear Medicine I
Anatomy, physiology, and pathology of the human body as assessed using medicine techniques. The first of two courses that address current clinical applications of nuclear medicine.

Credit Hours: 3
Prerequisites: NU_ENG 4303; restricted to Nuclear Medicine students only

NUCMED 3268: Clinical Nuclear Medicine II - Writing Intensive
Continuation of clinical series taught in conjunction with NUCMED 3256 and NUCMED 4232. Addresses advanced therapeutic and diagnostic procedures, computer applications, and quality assurance procedures.

Credit Hours: 3
Prerequisites: NUCMED 3256. Restricted to Nuclear Medicine students only

NUCMED 4265: Clinical Nuclear Medicine II
Continuation of clinical series taught in conjunction with NUCMED 3256 and NUCMED 4232. Addresses advanced therapeutic and diagnostic procedures, computer applications, and quality assurance procedures.

Credit Hours: 3
Prerequisites: NUCMED 3256. Restricted to Nuclear Medicine students only

NUCMED 4266W: Clinical Nuclear Medicine II - Writing Intensive
Continuation of clinical series taught in conjunction with NUCMED 3256 and NUCMED 4232. Addresses advanced therapeutic and diagnostic procedures, computer applications, and quality assurance procedures.

Credit Hours: 3
Prerequisites: NUCMED 3256. Restricted to Nuclear Medicine students only

NUCMED 4268: Clinical Nuclear Medicine III
Final course in clinical series. Seminar discussion of the areas of professional ethics, current medical-legal considerations, and future nuclear medicine applications.

Credit Hour: 1
Prerequisites: NUCMED 3256. Restricted to Nuclear Medicine students only

NUCMED 4269: Morphological Correlations in Nuclear Medicine II
Anatomy, physiology, and pathology of the human body as assessed using nuclear medicine techniques. The second of two courses that address current clinical applications of nuclear medicine.

Credit Hours: 3
Prerequisites: NUCMED 3263, restricted to Nuclear Medicine students only

NUCMED 4327: Nuclear Medicine Instrumentation
Radionuclide imaging systems and the use of computers. Topics include Anger camera systems, emission tomography, ultrasound, nuclear magnetic resonance, and bone absorptionmetry.

Credit Hours: 3
Prerequisites: PHYSCS 1220 and MATH 1400, restricted to Nuclear Medicine students

NUCMED 4329: Radiopharmaceuticals in Nuclear Medicine
Introduces concepts of radiopharmacy, generator systems, labeling of materials, quality control procedures and FDA regulations concerning radiopharmaceuticals.

Credit Hours: 3
Prerequisites: instructor's consent
Recommended: CHEM 1320

NUCMED 4330: PET in Nuclear Medicine
Overview of special isotope production techniques for positron emitting agents; instrumentation concerns beyond standard Anger imaging; and image critique and analysis with morphologic correlation. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PHYSCS 1210 and NUCMED 4327 or instructor's consent. Restricted to Nuclear Medicine students only

NUCMED 4940: Clinical In Vivo I
Practical experience in the clinical setting with imaging procedures performed in nuclear medicine.
Credit Hours: 6
Prerequisites: Restricted to Nuclear Medicine students

NUCMED 4941: Clinical In Vivo II
Practical experience in clinical setting with advanced imaging techniques and instrument quality control.
Credit Hours: 7
Prerequisites: NUCMED 4940. Restricted to undergraduate Nuclear Medicine students

NUCMED 7085: Problems in Nuclear Medicine
Supervised investigation in an aspect of nuclear medicine technology, usually culminating in a written report.
Credit Hours: 3

NUCMED 7329: Radiopharmaceuticals in Nuclear Medicine
Introduces concepts of radiopharmacy, generator systems, labeling of materials, quality control procedures and FDA regulations concerning radiopharmaceuticals.
Credit Hours: 3
Prerequisites: CHEM 1320 and instructor's consent

NUCMED 7330: PET in Nuclear Medicine
Overview of special isotope production in techniques for positron emitting agents; instrumentation concerns beyond standard Anger imaging; and image critique and analysis with morphologic correlation. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: PHYSCS 1210 and NUCMED 4327 or instructor's consent
