Respiratory Therapy (RS_THR)

RS_THR 1000: Introduction to Respiratory Therapy
Introductory course to assist students acquiring information about the respiratory therapy profession. Students observe therapists in hospitals and participate in lectures on credentialing, program requirements, placement and future trends in the profession. Graded on S/U basis only.
Credit Hour: 1

RS_THR 3000: Fundamentals of Respiratory Care
Orientation to the profession. Focus on professional attributes of communication, teamwork, licensure and safety.
Credit Hour: 1
Prerequisites: acceptance into respiratory therapy major

RS_THR 3220: Equipment and Therapeutics
Credit Hours: 3
Prerequisites: Restricted to students in the Respiratory Therapy Program
Corequisites: RS_THR 3240

RS_THR 3240: Assessment and Therapeutics Lab
Evidence-based application of assessment techniques and therapeutic management of cardiopulmonary disorders. Course content includes equipment and skills associated with physical examination, blood gas analysis, chest imaging, oxygen and aerosolized pharmaceutical delivery, airway clearance therapy, lung expansion, and airway management. Emphasis placed on competency development for clinical application. Graded on S/U basis only.
Credit Hours: 3
Prerequisites or Corequisites: RS_THR 3220, RS_THR 3941
Prerequisites: Restricted to students admitted into the Respiratory Therapy Program

RS_THR 3941: Clinical Practice I
To be taken concurrently with RS_THR 3220 for which it serves as an extension of the laboratory time and an opportunity for structured clinical experience exposures.
Credit Hours: 2

RS_THR 3942: Clinical Practice II
To be taken concurrently with RS_THR 3420, for which it serves as an extension of the laboratory time, and an opportunity for structured clinical experience exposures.
Credit Hours: 4

RS_THR 3943: Clinical Practice III
Continuation of supervised clinical experience from RS_THR 3942. Graded on A-F basis only.
Credit Hours: 2

RS_THR 3420W: Principles of Mechanical Ventilation - Writing Intensive
Continuation of RS_THR 3220. Emphasis on the principles of mechanical ventilation, including physiologic and clinical application.
Credit Hours: 3
Prerequisites: RS_THR 3220, RS_THR 3941 and RS_THR 4040

RS_THR 3440: Mechanical Ventilation Lab
Credit Hours: 3
Prerequisites: RS_THR 3220, RS_THR 3941, RS_THR 4040

RS_THR 3941: Clinical Practice I
To be taken concurrently with RS_THR 3220 for which it serves as an extension of the laboratory time and an opportunity for structured clinical experience exposures.
Credit Hours: 2

RS_THR 3942: Clinical Practice II
To be taken concurrently with RS_THR 3420, for which it serves as an extension of the laboratory time, and an opportunity for structured clinical experience exposures.
Credit Hours: 4

RS_THR 3943: Clinical Practice III
Continuation of supervised clinical experience from RS_THR 3942. Graded on A-F basis only.
Credit Hours: 2

RS_THR 4020: Perinatal/Neonatal Respiratory Care
Evaluation and management of perinatal/neonatal pulmonary, medical and surgical conditions which require respiratory care. Emphasis on resuscitation, pathophysiology, evaluation, blood gas and x-ray interpretation, treatment and mechanical ventilation.
Credit Hours: 3
Prerequisites: RS_THR 4040; Respiratory Therapy students only

RS_THR 4040: Respiratory Pathophysiology
Clinical pulmonary disease, organized around the gross structural components of the lung, airways, alveoli and pulmonary vasculature. Impact of disease on normal structure function; clinical, roentgenographic, and physiologic manifestations are described.
Credit Hours: 5

RS_THR 4085: Problems in Respiratory Therapy
Independent work on special problems related to cardiopulmonary health. Course not offered for graduate credit. Some sections of the course may be graded on either A-F or S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>RS_THR 4220</td>
<td>Community and Patient Education I</td>
<td>Design and implement materials for educational presentations for a given patient population. Graded on A-F basis only.</td>
<td>1</td>
</tr>
<tr>
<td>RS_THR 4240</td>
<td>Pulmonary Rehabilitation</td>
<td>Focus is on an interdisciplinary approach to pulmonary rehabilitation and home care of the adult cardiopulmonary patient. Graded on A-F basis only.</td>
<td>3</td>
</tr>
<tr>
<td>Prerequisites: instructor's consent required</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>RS_THR 4240</td>
<td>Pulmonary Rehabilitation (same as RA_SCI 4440 and CDS 4440)</td>
<td>Evaluates and manages pulmonary, medical and surgical conditions requiring respiratory care. Focus on pediatric resuscitation, pathophysiology, treatment and prevention of respiratory conditions, mechanical ventilation, lab interpretation.</td>
<td>2</td>
</tr>
<tr>
<td>RS_THR 4260</td>
<td>Pediatric Respiratory Care</td>
<td>Evaluation and management of pulmonary, medical and surgical pediatric conditions requiring respiratory care. Emphasis on pediatric resuscitation, pathophysiology, treatment and prevention of respiratory conditions, mechanical ventilation, lab interpretation.</td>
<td>3</td>
</tr>
<tr>
<td>RS_THR 4420</td>
<td>Organization and Administration</td>
<td>Studies design and operation of allied health services departments and educational programs, including facilities, personnel procedures, record systems, ethics, medical-legal aspects, interdepartmental relations and curriculum development.</td>
<td>3</td>
</tr>
<tr>
<td>RS_THR 4460</td>
<td>Evidence-Based Medicine in Respiratory Care</td>
<td>This course is intended to facilitate the development of the student's ability to obtain and integrate patient assessment information and key findings and to formulate clinical decisions in respiratory therapy practice as well as use an evidence-based medicine approach to define respiratory clinical practice.</td>
<td>3</td>
</tr>
<tr>
<td>RS_THR 4640</td>
<td>Evidence-Based Medicine in Respiratory Care - Writing Intensive</td>
<td>This course is intended to facilitate the development of the student's ability to obtain and integrate patient assessment information and key findings and to formulate clinical decisions in respiratory therapy practice as well as use an evidence-based medicine approach to define respiratory clinical practice.</td>
<td>3</td>
</tr>
<tr>
<td>RS_THR 4620</td>
<td>Pulmonary Function Technologies</td>
<td>This course will provide the student with a specific knowledge of the testing procedures and equipment for pulmonary function technology. The student will learn to interpret pulmonary function tests and perform quality assurance within the pulmonary function laboratory.</td>
<td>2</td>
</tr>
<tr>
<td>Prerequisites: restricted to Respiratory Therapy students only</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>RS_THR 4640</td>
<td>Teaching Practicum</td>
<td>Structured and supervised experience identifying student characteristics, methods for teaching, improving assessment, current development and instructional design.</td>
<td>3</td>
</tr>
<tr>
<td>RS_THR 4660</td>
<td>Advanced Mechanical Ventilation Theory</td>
<td>Exploration of advanced disease management via specific disease processes as well as concepts and modes of mechanical ventilation. Emphasis will be placed on mode selection for various diseases and how new modes of mechanical ventilation impact disease management.</td>
<td>3</td>
</tr>
<tr>
<td>RS_THR 4720</td>
<td>Advanced Pulmonary Function Technology</td>
<td>Topics include pulmonary function tests, exercise tests, and metabolic studies. In addition the course briefly addresses polysomnography, pulmonary rehabilitation, and home care. Graded on A-F basis only.</td>
<td>2</td>
</tr>
<tr>
<td>RS_THR 4720</td>
<td>Neonatal and Pediatric Critical Care</td>
<td>This course will facilitate the evaluation and management of pulmonary, medical and surgical neonatal and pediatric conditions requiring respiratory care. There will be an emphasis on neonatal and pediatric resuscitation, pathophysiology, blood gas and x-ray interpretation, treatment and prevention of respiratory conditions, mechanical ventilation, and laboratory interpretation. Graded on A-F basis only.</td>
<td>3</td>
</tr>
<tr>
<td>Prerequisites: restricted to Respiratory Therapy students only</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>RS_THR 4820</td>
<td>Adult Critical Care</td>
<td>This course will focus on the respiratory therapist's role in the adult critical care environment. Topics include airway management, mechanical ventilation, general adult critical care and functioning as a vital member of the critical care team.</td>
<td>3</td>
</tr>
<tr>
<td>RS_THR 4860</td>
<td>Neonatal and Pediatric Critical Care</td>
<td>This course will facilitate the evaluation and management of pulmonary, medical and surgical neonatal and pediatric conditions requiring respiratory care. There will be an emphasis on neonatal and pediatric resuscitation, pathophysiology, blood gas and x-ray interpretation, treatment and prevention of respiratory conditions, mechanical ventilation, and laboratory interpretation. Graded on A-F basis only.</td>
<td>3</td>
</tr>
<tr>
<td>Prerequisites: restricted to Respiratory Therapy students only</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>RS_THR 4930</td>
<td>Current Issues in Respiratory Care</td>
<td>Identification and analysis of current issues in Respiratory Care with practice implications. Emphasis given to identification and evaluation of nontraditional information sources (e.g., social networking, internet). Graded on A-F basis only.</td>
<td>3</td>
</tr>
<tr>
<td>Prerequisites or Corequisites: HLTH_SCI 3900 or instructor consent</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>RS_THR 4940</td>
<td>Clinical Practice IV</td>
<td>Structured and supervised clinical experience and case conferences regarding bioterrorism response and emergency/disaster planning.</td>
<td>5</td>
</tr>
</tbody>
</table>
RS_THR 4973: Clinical Practice V
An extension of the supervised practicum begun in RS_THR 4940.
Emphasis in adult critical care and special procedures including
bronchoscopies, cardiac catheterization and chest tube placement.
Credit Hours: 4

RS_THR 4983: Clinical Practice VI
An extension of the supervised practicum begun in RS_THR 4940.
Emphasis in perinatal and pediatric critical care including pediatric
pulmonary function testing and airway management.
Credit Hours: 4

RS_THR 4990: Respiratory Therapy Capstone
Integration of literature, knowledge of previous coursework and clinical
experience.
Credit Hours: 2
Prerequisites: Respiratory Therapy Majors Only

RS_THR 4993: Clinical Practice VII
An extension of the supervised practicum begun in RS_THR 4940.
Emphasis in rehabilitation and home care, inservice education, and
management. Students will participate in on-going research projects and
community service activities.
Credit Hours: 5

RS_THR 7930: Current Issues in Respiratory Care
(cross-leveled with RS_THR 4930). Identification and analysis of current
issues in Respiratory Care with practice implications. Emphasis given to
identification and evaluation of nontraditional information sources (e.g.,
social networking, internet).
Credit Hours: 3
Prerequisites: CDS 4955 or HLTH_SCI 3900 or Instructor consent
