<td>STAT 1006</td>
<td>Topics in Statistics-Mathematical Science</td>
<td>Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Repeatable with departmental consent.</td>
<td>1-5</td>
<td>Instructor's consent</td>
</tr>
<tr>
<td>STAT 1200</td>
<td>Introductory Statistical Reasoning</td>
<td>Statistical concepts for critically evaluating quantitative information. Subject may not receive credit if they have received or are concurrently receiving credit for another course offered by the Statistics Department. Math Reasoning Proficiency Course.</td>
<td>3</td>
<td>C- or higher in MATH _0110 or MyMathTest Intermediate Algebra score of 70% or higher</td>
</tr>
<tr>
<td>STAT 1300</td>
<td>Elementary Statistics</td>
<td>Collection, presentation of data; averages; dispersion; introduction to statistical inference, correlation and regression. Subject may not receive credit if they have received or are concurrently receiving credit for another course offered by the Statistics Department. Math Reasoning Proficiency Course.</td>
<td>3</td>
<td>grade in C - or higher in MATH 1100 or MATH 1120 or MATH 1160 or MATH 1180 by examination</td>
</tr>
<tr>
<td>STAT 1300H</td>
<td>Elementary Statistics - Honors</td>
<td>Collection, presentation of data; averages; dispersion; introduction to statistical inference, correlation and regression. Subject may not receive credit if they have received or are concurrently receiving credit for another course offered by the Statistics Department. Math Reasoning Proficiency course.</td>
<td>3</td>
<td>grade of C- or higher in MATH 1100 or MATH 1120 or MATH 1160 or MATH 1180</td>
</tr>
<tr>
<td>STAT 1400</td>
<td>Elementary Statistics for Life Sciences</td>
<td>Designed for students studying agriculture and other life sciences. Descriptive statistics, probability, estimation, hypothesis testing, correlation and regression. Subject may not receive credit if they have received or are concurrently receiving credit for another course offered by the Statistics Department. Math Reasoning Proficiency Course.</td>
<td>3</td>
<td>grade in C- or higher in MATH 1050 or MATH 1100 or MATH 1120 or MATH 1160 or MATH 1180 by examination</td>

</tbody>
</table>
materials to demonstrate connections between college-level statistics and content taught in middle and secondary schools. No credit toward a graduate degree in statistics.

**Credit Hours:** 3  
**Prerequisites:** STAT 1200 or STAT 1300 or STAT 1400 or STAT 2500 or STAT 4710 or ESC_PS 4170 or MATH 2320

**STAT 4085: Problems in Statistics for Undergraduates**  
Independent investigations. Reports on approved topics.  
**Credit Hour:** 1-3  
**Prerequisites:** Instructor's consent

---

**STAT 4110: Statistical Software and Data Analysis**  
(cross-leveled with STAT 7110). Programming with major statistical packages emphasizing data management techniques and statistical analysis for regression, analysis of variance, categorical data, descriptive statistics, non-parametric analyses, and other selected topics.  
**Credit Hours:** 3  
**Prerequisites:** STAT 3500 or STAT 7070 or STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760

---

**STAT 4150: Applied Categorical Data Analysis**  
(cross-leveled with STAT 7150). The study of statistical models and methods used in analyzing categorical data. The use of computing is emphasized and calculus is not required. No credit for students who have previously completed STAT 4830. No credit toward a graduate degree in statistics.  
**Credit Hours:** 3  
**Prerequisites:** STAT 3500 or STAT 7070 or STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760

---

**STAT 4210: Applied Nonparametric Methods**  
(cross-leveled with STAT 7210). Statistical methods when the functional form of the population is unknown. Applications emphasized. Comparisons with parametric procedures. Goodness of-fit, chi-square, comparison of several populations, measures of correlation.  
**Credit Hours:** 3  
**Prerequisites:** STAT 3500 or STAT 7070 or STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760

---

**STAT 4300: Sampling Techniques**  
**Credit Hours:** 3  
**Prerequisites:** STAT 3500 or STAT 7070 or STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760

---

**STAT 4320: Methods in Sports Analytics I**  
(cross-leveled with STAT 7320). Introductory course on collecting, processing, visualizing, and analyzing data in sports. Technologies used in data collection and processing will be explored, along with methods for measuring and comparing individual and team performance.  
**Credit Hours:** 3  
**Prerequisites:** STAT 4330/7330 and STAT 4510/7510

---

**STAT 4340: Methods in Sports Analytics II**  
(cross-leveled with STAT 7340). Advanced course in methods for analyzing individual and team based performance in sports and the use of data to drive strategy and tactics. Emphasis will be put on analytical methods to improve skills and optimize the performance of athletes.  
**Credit Hours:** 3  
**Prerequisites:** Both STAT 4330/7330 and STAT 4510/7510

---

**STAT 4380: Methods in Sports Analytics III**  
(cross-leveled with STAT 7380). Advanced course in methods for analyzing individual and team based performance in sports and the use of data to drive strategy and tactics. Emphasis will be put on analytical methods to improve skills and optimize the performance of athletes.  
**Credit Hours:** 3  
**Prerequisites:** Both STAT 4330/7330 and STAT 4510/7510

---

**STAT 4410: Biostatistics and Clinical Trials**  
(cross-leveled with STAT 7410). Study of statistical techniques for the design and analysis of clinical trials, laboratory studies and epidemiology. Topics include randomization, power and sample size calculation, sequential monitoring, carcinogenicity bioassay and case-cohort designs. No credit toward a graduate degree in statistics.  
**Credit Hours:** 3  
**Prerequisites:** Any one of: STAT 3500, STAT 7070, STAT 4710, STAT 7710, STAT 4760, STAT 7760, or instructor's consent

---

**STAT 4420: Applied Survival Analysis**  
(cross-leveled with STAT 7420). Parametric models; Kaplan-Meier estimator; nonparametric estimation of survival and cumulative hazard functions; log-rank test; Cox model; Stratified Cox model; additive hazards model partial likelihood; regression diagnostics; multivariate survival data.  
**Credit Hours:** 3  
**Prerequisites:** STAT 3500 or STAT 7070 or STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760

---

**STAT 4510: Applied Statistical Models I**  
(cross-leveled with STAT 7510). Introduction to applied statistical models including regression and ANOVA, logistic regression, discriminant analysis, tree-based methods, semi-parametric regression, support vector machines, and unsupervised learning through principal component and clustering. No credit toward a graduate degree in statistics.  
**Credit Hours:** 3  
**Prerequisites:** Any one of STAT 3500, STAT 7070, STAT 4710, STAT 7710 or STAT 4760 or STAT 7760

---

**STAT 4520: Applied Statistical Models II**  
(cross-leveled with STAT 7520). Advanced course in applied statistical modeling focusing on extensions of the linear model. Topics include generalized linear models, such as logistic and Poisson regression. Random effects models will also be introduced, with emphasis on linear and generalized linear mixed models, repeated measures, and longitudinal data. These methods will extend to general models for dependent data, such as spatially-referenced data and time series. Lastly, nonlinear models through neural networks and deep learning will also be discussed.  
**Credit Hours:** 3  
**Prerequisites:** STAT 4510 or 7510 or instructor's consent

</tbody>
</table>
STAT 4999: Departmental Honors in Statistics
Special work for Honors candidates in statistics. May be repeated for credit.
Credit Hour: 1-3

STAT 7006: Topics in Statistics-Mathematics
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Repeatable with departmental consent.
Credit Hour: 1-5
Prerequisites: instructor's consent

STAT 7020: Statistical Methods in the Health Sciences
Basic inference methods, both parametric and non-parametric, appropriate for answering questions arising in health sciences research. Computer exercises involving data from real experiments from health science area.
Credit Hours: 3
Prerequisites: MATH 1100 or MATH 1120 and instructor's consent

STAT 7050: Connecting Statistics to Middle and Secondary Schools
(cross-leveled with STAT 4050). Primarily for middle and secondary mathematics education majors. Uses standards-based curricular materials to demonstrate connections between college-level statistics and content taught in middle and secondary schools. No credit toward a graduate degree in statistics.
Credit Hours: 3
Prerequisites: an introductory course in statistics or MATH 2320 or instructor's consent

STAT 7070: Statistical Methods for Research
Designed for graduate students who have no previous training in statistics. Topics include descriptive statistics, probability distributions, estimation, hypothesis testing, regression, and ANOVA. No credit toward a degree in statistics.
Credit Hours: 3
Prerequisites: either MATH 1100 or MATH 1120

STAT 7085: Problems in Statistics for Non-majors
Approved reading and study, independent investigations, and reports on approved topics.
Credit Hour: 1-99
Prerequisites: instructor's consent

STAT 7110: Statistical Software and Data Analysis
(cross-leveled with STAT 4110). Programming with major statistical packages emphasizing data management techniques and statistical analysis for regression, analysis of variance, categorical data, descriptive statistics, non-parametric analyses, and other selected topics.
Credit Hours: 3
Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, STAT 4760 or STAT 7760, or instructor's consent

STAT 7150: Applied Categorical Data Analysis
(cross-leveled with STAT 4150). The study of statistical models and methods used in analyzing categorical data. The use of computing is emphasized and calculus is not required. No credit for students who have previously completed STAT 4830. No credit toward a graduate degree in statistics.
Credit Hours: 3
Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, or STAT 4760 or STAT 7760 or instructor's consent

STAT 7210: Applied Nonparametric Methods
(cross-leveled with STAT 4210). Statistical methods when the functional form of the population is unknown. Comparisons with parametric procedures. Goodness of fit, chi-square, comparison of several populations, measures of correlation.
Credit Hours: 3
Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, STAT 4760 or STAT 7760, or instructor's consent

STAT 7310: Sampling Techniques
Credit Hours: 3
Prerequisites: STAT 3500, STAT 7070, STAT 4710 or STAT 7710, STAT 4760 or STAT 7760, or instructor's consent

STAT 7330: Methods in Sports Analytics I
(cross-leveled with STAT 4330). Introductory course on collecting, processing, visualizing, and analyzing data in sports. Technologies used in data collection and processing will be explored, along with methods for measuring and comparing individual and team performance.
Credit Hours: 3
Prerequisites: Any one of STAT 3500, STAT 7020, STAT 7070, STAT 4710/7710, STAT 4760/7760, or instructor's consent

STAT 7340: Methods in Sports Analytics II
(cross-leveled with STAT 4340). Advanced course in methods for analyzing individual and team based performance in sports and the use of data to drive strategy and tactics. Emphasis will be put on analytical methods to improve skills and optimize the performance of athletes.
Credit Hours: 3
Prerequisites: Both STAT 4330 or STAT 7330 and STAT 4510 or STAT 7510

STAT 7410: Biostatistics and Clinical Trials
(cross-leveled with STAT 4410). Study of statistical techniques for the design and analysis of clinical trials, laboratory studies and epidemiology. Topics include randomization, power and sample size calculation, sequential monitoring, carcinogenicity bioassay and case-cohort designs. Prerequisites: any of the following: STAT 3500, STAT 7070, STAT 4710, STAT 7710, STAT 4760, STAT 7760, or instructor's consent.
Credit Hours: 3
## STAT 7420: Applied Survival Analysis
(cross-leveled with STAT 4420). Parametric models; Kaplan-Meier estimator; nonparametric estimation of survival and cumulative hazard functions; log-rank test; Cox model; Stratified Cox model; additive hazards model partial likelihood; regression diagnostics; multivariate survival data.

**Credit Hours:** 3  
**Prerequisites:** STAT 3500, STAT 7070, STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760 or instructor's consent

## STAT 7510: Applied Statistical Models I
(cross-leveled with STAT 4510). Introduction to applied statistical models including regression and ANOVA, logistic regression, discriminant analysis, tree-based methods, semi-parametric regression, support vector machines, and unsupervised learning through principal component and clustering. No credit toward a graduate degree in statistics.  
Prerequisites: Any one of: STAT 3500 or STAT 7070 or STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760.

**Credit Hours:** 3

## STAT 7520: Applied Statistical Models II
(cross-leveled with STAT 4520). Advanced course in applied statistical modeling focusing on extensions of the linear model. Topics include generalized linear models, such as logistic and Poisson regression. Random effects models will also be introduced, with emphasis on linear and generalized linear mixed models, repeated measures, and longitudinal data. These methods will extend to general models for dependent data, such as spatially-referenced data and time series. Lastly, nonlinear models through neural networks and deep learning will also be discussed.

**Credit Hours:** 3  
**Prerequisites:** STAT 4510 or STAT 7510 or instructor's consent

## STAT 7530: Analysis of Variance
Study of analysis of variance and related modeling techniques for cases with fixed, random, and mixed effects. Exposure to designs other than completely randomized designs including factorial arrangements, repeated measures, nested, and unequal sample size designs.

**Credit Hours:** 3  
**Prerequisites:** STAT 3500, STAT 7070, STAT 4710 or STAT 7710, STAT 4760 or STAT 7760, or instructor's consent

## STAT 7540: Experimental Design
(cross-leveled with STAT 4540). Examination and analysis of modern statistical techniques applicable to experimentation in social, physical or biological sciences.

**Credit Hours:** 3  
**Prerequisites:** STAT 3500 or STAT 4510 or STAT 7510 or STAT 4530 or STAT 7530 or instructor's consent

## STAT 7560: Applied Multivariate Data Analysis
(cross-leveled with STAT 4560). Testing mean vectors; discriminant analysis; principal components; factor analysis; cluster analysis; structural equation modeling; graphics.

**Credit Hours:** 3

## STAT 7580: Introduction to Statistical Methods for Customized Pricing
(cross-leveled with STAT 4580). Introduction to basic concepts of and statistical methods used in customized pricing. Focuses on applying statistical methods to real customized pricing problems. Students will gain an understanding of customized pricing and some hands on experience with SAS Enterprise minor.

**Credit Hours:** 3  
**Prerequisites:** STAT 3500 or STAT 4510 or STAT 7510 or instructor's consent

## STAT 7610: Applied Spatial Statistics
(cross-leveled with STAT 4610). Introduction to spatial random processes, spatial point patterns, kriging, simultaneous and conditional autoregression, and spatial data analysis.

**Credit Hours:** 3  
**Prerequisites:** STAT 4510 or STAT 7510 or instructor's consent  
**Recommended:** Basic knowledge of calculus and matrices

## STAT 7640: Introduction to Bayesian Data Analysis
(cross-leveled with STAT 4640). Bayes formulas, choices of prior, empirical Bayesian methods, hierarchical Bayesian methods, statistical computation, Bayesian estimation, model selection, predictive analysis, applications, Bayesian software.

**Credit Hours:** 3  
**Prerequisites:** STAT 3500 or STAT 4510 or STAT 7510 or instructor's consent

## STAT 7710: Introduction to Mathematical Statistics
(same as MATH 7315; cross-leveled with STAT 4410, MATH 4315). Introduction to theory of probability and statistics using concepts and methods of calculus.

**Credit Hours:** 3  
**Prerequisites:** MATH 2300 or instructor's consent. No credit MATH 7315

## STAT 7750: Introduction to Probability Theory
(same as MATH 7320; cross-leveled with STAT 4400, MATH 4320). Probability spaces; random variables and their distributions; repeated trials; probability limit theorems.

**Credit Hours:** 3  
**Prerequisites:** MATH 2300 or instructor's consent

## STAT 7760: Statistical Inference
(same as MATH 7240; cross-leveled with STAT 4760, MATH 4520). Sampling; point estimation; sampling distribution; tests of hypotheses; regression and linear hypotheses.

**Credit Hours:** 3  
**Prerequisites:** STAT 4750 or STAT 7750 or instructor's consent
STAT 7830: Categorical Data Analysis
(cross-leveled with STAT 4830). Discrete distributions, frequency data, multinomial data, chi-square and likelihood ratio tests, logistic regression, log linear models, rates, relative risks, random effects, case studies.
Credit Hours: 3
Prerequisites: STAT 4710 or STAT 7710 or instructor's consent

STAT 7850: Introduction to Stochastic Processes
(cross-leveled with STAT 4850). Study of random processes selected from: Markov chains, birth and death processes, random walks, Poisson processes, renewal theory, Brownian motion, Gaussian processes, white noise, spectral analysis, applications such as queueing theory, sequential tests.
Credit Hours: 3
Prerequisites: STAT 4750 or STAT 7750 or instructor's consent

STAT 7870: Time Series Analysis
(cross-leveled with STAT 4870). A study of univariate and multivariate time series models and techniques for their analyses. Emphasis is on methodology rather than theory. Examples are drawn from a variety of areas including business, economics and soil science.
Credit Hours: 3
Prerequisites: STAT 7710 or STAT 7760 or instructor's consent

STAT 8085: Problems in Statistics for Majors - Masters
Approved reading and study, independent investigations, and reports on approved topics.
Credit Hour: 1-99
Prerequisites: instructor's consent

STAT 8090: Master's Thesis Research in Statistics
Graded on a S/U basis only.
Credit Hour: 1-99

STAT 8100: Special Topics in Statistics
Credit Hour: 1-99
Prerequisites: instructor's consent

STAT 8310: Data Analysis I
Applications of linear models including regression (simple and multiple, subset selection, regression diagnostics), analysis of variance (fixed, random and mixed effects, contrasts, multiple comparisons) and analysis of covariance; alternative nonparametric methods.
Credit Hours: 3
Prerequisites: STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760 or instructor's consent

STAT 8320: Data Analysis II
Advanced applications including analysis of designs (e.g. repeated measures, hierarchical models, missing data), multivariate analysis (Hotelling's T2, MANOVA, discriminant analysis, principal components, factor analysis), nonlinear regression, generalized linear models, categorical data analysis.
Credit Hours: 3
Prerequisites: STAT 4710 or STAT 7710 or STAT 4760 or STAT 7760 or instructor's consent

STAT 8330: Data Analysis III
An introduction to data analysis techniques associated with supervised and unsupervised statistical learning. Resampling methods, model selection, regularization, generalized additive models, trees, support vector machines, clustering, nonlinear dimension reduction.
Credit Hours: 3
Prerequisites: STAT 8320

STAT 8370: Statistical Consulting
Credit Hours: 3
Prerequisites: STAT 7760 and STAT 8320 or instructor's consent

STAT 8410: Statistical Theory of Bioinformatics
Study of statistical theory and methods underpinning bioinformatics. Topics include statistical theory used in biotechnologies such as gene sequencing, gene alignments, microarrays, phylogenetic trees, evolutionary models, proteomics and imaging.
Credit Hours: 3
Prerequisites: STAT 4760 or STAT 7760

STAT 8640: Bayesian Analysis I
Bayes' theorem, subjective probability, non-informative priors, conjugate prior, asymptotic properties, model selection, computation, hierarchical models, hypothesis testing, inference, predication, applications.
Credit Hours: 3
Prerequisites: STAT 4760 or STAT 7760 and MATH 4140 or MATH 7140 or instructor's consent

STAT 8710: Intermediate Mathematical Statistics I
Sample spaces, probability and conditional probability, independence, random variables, expectation, distribution theory, sampling distributions, laws of large numbers and asymptotic theory, order statistics.
Credit Hours: 3
Prerequisites: STAT 4760 or STAT 7760 or instructor's consent

STAT 8720: Intermediate Mathematical Statistics II
Further development of estimation theory, including sufficiency, minimum variance principles and Bayesian estimation. Tests of hypotheses, including uniformly most powerful and likelihood ratio tests.
Credit Hours: 3
Prerequisites: STAT 8710 or instructor's consent

STAT 9085: Problems in Statistics for Majors - PhD
Approved reading and study, independent investigations, and reports on approved topics.
Credit Hour: 1-99
Prerequisites: instructor's consent

<td>Statistical Computation and Simulation</td>
<td>Random number generation, acceptance/rejection methods; Monte Carlo; Laplace approximation; the EM algorithm; importance sampling; Markov chain Monte Carlo; Metropolis-Hasting algorithm; Gibbs sampling, marginal likelihood.</td>
<td>3</td>
<td>STAT 4760 or STAT 7760 or instructor's consent</td>
</tr>
<tr>
<td>STAT 9310</td>
<td>Theory of Linear Models</td>
<td>Theory of multiple regression and analysis of variance including matrix representation of linear models, estimation, testing hypotheses, model building, contrasts, multiple comparisons and fixed and random effects.</td>
<td>3</td>
<td>STAT 4760 or STAT 7760 or MATH 4140 or MATH 7140, and instructor's consent</td>
</tr>
<tr>
<td>STAT 9340</td>
<td>Data Analysis IV</td>
<td>This course will explore advanced statistical learning methods for analyzing complex data, including statistical optimization, multi-level models, random processes, neural computing, Bayesian methods, and alternative learning strategies. The course will require significant involvement from the students in terms of highly computationally-oriented homework and project participation.</td>
<td>3</td>
<td>STAT 8330</td>
