Veterinary Pathobiology

V_PBIO 3551: Introduction to Immunology I
Comprehensive introduction to the basic principles of immunology. The course is designed for undergraduates majoring in biology, biochemistry or health professions. Introduction to cells and organs of the immune system, innate and adaptive immunity, development, activation and effector functions of lymphocytes, hypersensitivity, host response to infection and vaccination, autoimmunity and tumor immunology. Introduction to Immunology 1. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BIO_SC 2300
Recommended: BIO_SC 2200

V_PBIO 3554: Introduction to Virology
Comprehensive introduction to the basic principles of virology. The course is designed for undergraduates majoring in biology, biochemistry, or health professions. The course covers general virology including the molecular structure of viruses, the multiplication strategies of the major virus families, and viral latency, persistence, and oncology. The major families of the bacterial, plant, and animal viruses are discussed. Human viruses and infectious diseases are emphasized. Viral immunology, viral defenses, viral vaccines and antiviral compounds will also be addressed. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BIO_SC 2300
Recommended: BIO_SC 3750

V_PBIO 3557: Microbial Pathogenesis I
This course is the first of two courses that examine the relationships between microbes and their hosts that lead to human disease. Emphasis is placed on bacterial and fungal infection, and the basic mechanisms of pathogenesis that lead to disease. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BIO_SCI 2200; BIO_SC 3750

V_PBIO 3650: Applied Microbiology and Biotechnology
Introduction to the basic principles of molecular microbiology in relation to the industrial applicability. The course will focus on microorganisms commonly used in industrial microbiology and biotechnology with an emphasis on the biological and molecular basis of productivity. We will also focus on nutrition of industrial organisms and metabolic pathways for the biosynthesis of industrial microbiology products such as engineered or designer proteins, antibiotics and products of medical importance. Manipulation of the genome of industrial organisms will be discussed in the context of making beneficial products. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BIO_SC 3750
Recommended: BIO_SC 2200

V_PBIO 4787: Historical, Societal and Ethical Topics in Medicine and Biomedical Research
(cross-leveled with V_PBIO 7787). Advances in medicine, genetics, reproduction and technologies underpinning biomedical research can have profound implications not only scientifically but in terms of societal and ethical impact. Using several historical events such as the establishment of the first immortal cell line, the Tuskegee syphilis study, the eugenics movement in the United States and the cloning of Dolly the sheep as starting points, we will explore the historical, societal and ethical context and issues surrounding these events and relate them to current ethical and moral questions that have been generated by recent scientific and medical progress. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: B or better in BIO_SC 2300 and BIO_SC 2200

V_PBIO 5511: Veterinary Immunology
(same as V_PBIO 8451). Basic immunology techniques. Topics include innate and adaptive immunity, development of the immune system, induction and expression of the immune response, structure and function of antibodies, antigen-antibody reactions, the major histocompatibility complex, aspects of immunology in disease.
Credit Hour: 1.5

V_PBIO 5512: Veterinary Immunology
(same as V_PBIO 8451). Continuation of V_PBIO 5511.
Credit Hour: 1.5

V_PBIO 5552: Veterinary Bacteriology with Laboratory
Classification and properties of pathogenic bacteria and fungi of animals; relationship to public health; considers pathogenesis, immunology of infection. Instructional period 5.
Credit Hours: 3
Prerequisites: enrollment in the College of Veterinary Medicine

V_PBIO 5553: Veterinary Bacteriology II
Continuation of V_PBIO 5552. Instructional period 6.
Credit Hours: 2.5

V_PBIO 5554: Veterinary Virology
(same as V_PBIO 8454). Classification and properties of viruses. Considers the etiologic, pathologic and immunologic aspects of viral diseases of animals. Instructional periods 6 and 7.
Credit Hours: 2.5
Prerequisites: enrollment in the College of Veterinary Medicine

V_PBIO 5555: Epidemiology and Biostatistics with Laboratory
(same as V_PBIO 8455). This course introduces students to methods of determining the influence of disease on populations and how this information is applied to individual animals. Biostatistics and evidence based medicine are also discussed in this course. The knowledge gained in this course is applied to reading professional literature during the course. Instructional period 4.
Credit Hours: 2
V_PBIO 5557: Veterinary Parasitology with Laboratory
(same as V_PBIO 8457). Parasites and parasitic diseases of ruminants, horses, swine, dogs, cats, poultry and other animals. Includes classification, morphology, and bionomics of protozoa, helminths, and arthropods. Instructional period 6.

Credit Hours: 3

V_PBIO 5558: Veterinary Public Health
(same as V_PBIO 8458). In this course students are introduced to the wide range of veterinary involvement in maintaining and assuring human health, nationally and globally. Topics discussed include: agencies such as USDA, FDA, CDC, food safety and meat inspection, veterinary responsibility in identifying diseases, legal issues of drug use, and zoonotic diseases. Instructional period 7.

Credit Hours: 2

V_PBIO 5575: Veterinary Pathology with Laboratory
General Pathology. Tissue reactions to various disease agents in domestic animals. Instructional period 5.

Credit Hours: 3

V_PBIO 5576: Veterinary Systemic and Special Pathology with Laboratories
Special and systemic pathology. Tissue reactions to disease in special systems in domestic animals. Instructional period 6.

Credit Hours: 3

V_PBIO 5577: Veterinary Systemic and Special Pathology II with
Follows the general pathology and continues the systemic pathology taught in V_PBIO 5576. The course, consisting of daily lectures and weekly laboratories, covers disease, mainly in domestic animals, of the following systems or organs: cardiovascular, respiratory, lymphoid, cutaneous, mammary, ophthalmic, and otic. Instructional period 7.

Credit Hours: 3

V_PBIO 5578: Veterinary Clinical Pathology with Laboratory
Physiologic basis, interpretation and clinical application of laboratory assays in hematology, chemistry, cytology, and urinalysis, utilization of laboratory methods to define pathological states and to diagnose disorders of domestic animals. Instructional period 8.

Credit Hours: 3
Prerequisites: enrollment in College of Veterinary Medicine

V_PBIO 5579: Veterinary Genomics
Study of genomes, an organism's entire set of the genetic information. Used for detection of pathogen genomes, and markers for mutation causing inherited disease. Instructional period 5.

Credit Hour: 1
Prerequisites: V_PBIO 5558 or instructor's consent

V_PBIO 5601: Animals in Emergencies & Basic Emergency Response Training for Vet Students
This course will enable veterinary and graduate students to understand their role in society during disasters and credential as responders. Graded on A-F basis only.

Credit Hour: 1-6
V_PBIO 7110: Veterinary Cytology
(cross-leveled with BIOMED 4110). This course of Veterinary Cytology is designed to hone the skills of the practicing Veterinary Technician, Veterinary Student, or Veterinarian and assumes some basic knowledge of microscope usage and normal hematology. The review of normal cells will be minimal and emphasis will be placed on findings associated with inflammatory and neoplastic diseases. The graduate level course will include discussion of ancillary tests, special stains and treatment alternatives. The focus will be on canine and feline diseases but some common equine and bovine disease.

Credit Hours: 2
Prerequisites: DVM or equivalent degree or instructor's consent

V_PBIO 7120: Principles of Toxicology
(cross-leveled with BIOMED 4120). This course will provide an introduction to the general principles of toxicology, including the history and scope of the field; risk assessment and management; mechanisms of toxicology; the disposition of toxicants; non-target organ-directed toxicity; toxic responses of specific target organs; and various toxicological application, such as environmental toxicology.

Credit Hours: 3
Prerequisites: BS in Biology, Biochemistry, or equivalent, or permission of instructor

V_PBIO 7210: Animal Issues in Disasters
(cross-leveled BIOMED 4210). Animal Issues in Disasters describes the various aspects of responding to disasters that involve animals. Government involvement, legal requirements, effects on the human-animal bond, preparation for disasters of different kinds, and impacts on animal-related businesses will be discussed.

Credit Hour: 1
Prerequisites: a bachelor's degree in a biological science or veterinary technology, or DVM degree, or instructor's consent

V_PBIO 7787: Historical, Societal and Ethical Topics in Medicine and Biomedical Research
(cross-leveled with V_PBIO 4787). Advances in medicine, genetics, reproduction and technologies underpinning biomedical research can have profound implications not only scientifically but in terms of societal and ethical impact. Using several historical events such as the establishment of the first immortal cell line, the Tuskegee syphilis study, the eugenics movement in the United States and the cloning of Dolly the sheep as starting points, we will explore the historical, societal and ethical context and issues surrounding these events and relate them to current ethical and moral questions that have been generated by recent scientific and medical progress. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Consent of Instructor

V_PBIO 8090: Thesis Research in Veterinary Pathobiology
Open to graduate students with requisite preparation. Research on specific animal diseases, prevention and treatment. Graded on a S/U basis only.

Credit Hour: 1-99

V_PBIO 8401: Topics in Veterinary Pathobiology
Courses with lectures in various topics in veterinary pathobiology will be given on a trial basis, depending on faculty expertise and student demand. Credit hours are usually 1 or 3. Specialized topics will be covered.

Credit Hour: 1-99
Prerequisites: instructor's consent

V_PBIO 8410: Seminar in Veterinary Pathobiology
Discussion of current research methods in veterinary pathobiology.

Credit Hour: 1

V_PBIO 8431: Research Methods and Data Analysis
Specific assignments on diagnostic methods including surgical pathology, necropises, toxicology.

Credit Hour: 2-4
Prerequisites: departmental consent

V_PBIO 8432: Advanced Histopathology
Advanced microscopic study of pathological tissues.

Credit Hours: 5
Prerequisites: departmental consent

V_PBIO 8434: Advanced Clinical Pathology
Lecture/tutorial teaching; pathogenesis of clinical laboratory abnormalities in the common domesticated species. Emphasis is placed on mechanisms of disease and pathophysiology of the changes seen in each organ system.

Credit Hours: 3
Prerequisites: departmental consent

V_PBIO 8435: Advanced Microscopy in Veterinary Clinical Pathology
Recognition and pathogenesis of abnormalities found via microscopic analysis of blood smears or cytology.

Credit Hour: 1
Prerequisites: V_PBIO 5578 and departmental consent; DVM or current enrollment in veterinary curriculum

V_PBIO 8436: Pathogenic Mechanisms in Veterinary Pathobiology
This course will include disease mechanisms, described at the cellular and molecular level, which result in tissue morphologic (gross and microscopic) and clinical abnormalities. Examples of discussion topics include soluble mediators of inflammatory processes, host-agent interactions, and host defense mechanisms.

Credit Hours: 3
Prerequisites: instructor's consent

V_PBIO 8448: Molecular Methods in Nucleic Acids
The course will focus on the most recent developments in technology related to eukaryotic and prokaryotic molecular biology and as analysis a manipulation of nucleic acids and their application to define structure, function and biosynthesis of macromolecules.

Credit Hours: 3
**Prerequisites:** instructor's consent

**V_PBIO 8450: Non-Thesis Research in Veterinary Pathobiology**
Research not expected to terminate in dissertation.

**Credit Hour:** 1-99

**V_PBIO 8451: Introduction to Immunology**
(same as V_PBIO 5511 and V_PBIO 5512). Fundaments of immunology as applied to domestic animals.

**Credit Hours:** 3

**V_PBIO 8452: Cell and Molecular Electron Microscopy**
Lecture class that describes the use of electron microscopy (transmission and scanning) in biomedical research. Students receive hands-on experience by completing a laboratory project.

**Credit Hours:** 4

**V_PBIO 8454: Domestic Animal Virology**

**Credit Hours:** 2.5

**V_PBIO 8455: Epidemiology and Biostatistics**
Graduate level introduction to veterinary epidemiology and bio-statistics.

**Credit Hour:** 2-3

**V_PBIO 8457: Animal Parasitology**
(same as V_PBIO 5557).

**Credit Hour:** 3-5

**V_PBIO 8458: Veterinary Public Health**
(same as V_PBIO 5558).

**Credit Hours:** 2

**V_PBIO 8552: Veterinary Pathogenic Bacteriology and Mycology I**
This course deals with the bacterial pathogens of animals emphasizing the pathogenesis and pathology of the diseases, diagnostic problems, appropriate treatments and prevention measures. Course graded A-F only.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

**V_PBIO 8553: Veterinary Pathogenic Bacteriology and Mycology II**
This course deals with the bacterial pathogens of animals emphasizing the pathogenesis and pathology of the diseases, diagnostic procedures, appropriate treatments and prevention measures. Graded on A-F basis only.

**Credit Hours:** 2.5

**Prerequisites:** V_PBIO 5552 or V_PBIO 8552 and instructor's consent

**V_PBIO 8601: Animals in Emergencies & Basic Emergency Response Training for Vet Students**
This course will enable veterinary and graduate students to understand their role in society during disasters and credential as responders. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** Students must be enrolled in the College of Veterinary Medicine and pursuing a DVM degree or be a student pursuing an MPH degree. Instructor consent required for non-veterinary graduate students seeking MPH degrees

**V_PBIO 8641: Introduction to Research Ethics**
This course provides students with a brief overview of many of the ethical issues that confront today's scientist. It is important that scientist think about and develop their abilities to make well-reasoned responses to ethical problems.

**Credit Hour:** 1

**V_PBIO 9090: Area Veterinary Pathobiology Dissertation Research**
Dissertation Research for PhD students. May be repeated for credit. Graded on S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** departmental consent
