**Veterinary Pathobiology (V_PBIO)**

**V_PBIO 3551: Introduction to Immunology I**
Comprehensive introduction to the basic principles of immunology. The course is designed for undergraduates majoring in biology, biochemistry or health professions. Introduction to cells and organs of the immune system, innate and adaptive immunity, development, activation and effector functions of lymphocytes, hypersensitivity, host response to infection and vaccination, autoimmunity and tumor immunology. Introduction to Immunology 1. Graded on A-F basis only.

*Credit Hours: 3*
*Prerequisites: BIO_SC 2300*
*Recommended: BIO_SC 2200*

**V_PBIO 3554: Introduction to Virology**
Comprehensive introduction to the basic principles of virology. The course is designed for undergraduates majoring in biology, biochemistry or health professions. The course covers general virology including the molecular structure of viruses, the multiplication strategies of the major virus families, and viral latency, persistence, and oncology. The major families of the bacterial, plant, and animal viruses are discussed. Human viruses and infectious diseases are emphasized. Viral immunology, viral defenses, viral vaccines and antiviral compounds will also be addressed. Graded on A-F basis only.

*Credit Hours: 3*
*Prerequisites: BIO_SC 2300*
*Recommended: BIO_SC 3750*

**V_PBIO 4787: Historical, Societal and Ethical Topics in Medicine and Biomedical Research**
(cross-leveled with V_PBIO 7787). Advances in medicine, genetics, reproduction and technologies underpinning biomedical research can have profound implications not only scientifically but in terms of societal and ethical impact. Using several historical events such as the establishment of the first immortal cell line, the Tuskegee syphilis study, the eugenics movement in the United States and the cloning of Dolly the sheep as starting points, we will explore the historical, societal and ethical context and issues surrounding these events and relate them to current ethical and moral questions that have been generated by recent scientific and medical progress. Graded on A-F basis only.

*Credit Hours: 2*
*Prerequisites: B or better in BIO_SC 2300 and BIO_SC 2200*

**V_PBIO 5511: Veterinary Immunology**
(same as V_PBIO 8451). Basic immunology techniques. Topics include innate and adaptive immunity, development of the immune system, induction and expression of the immune response, structure and function of antibodies, antigen-antibody reactions, the major histocompatibility complex, aspects of immunology in disease.

*Credit Hour: 1.5*

**V_PBIO 5512: Veterinary Immunology**
(same as V_PBIO 8451). Continuation of V_PBIO 5511.

**V_PBIO 5552: Veterinary Bacteriology with Laboratory**
Classification and properties of pathogenic bacteria and fungi of animals; relationship to public health; considers pathogenesis, immunology of infection. Instructional period 5.

*Credit Hours: 3*
*Prerequisites: enrollment in the College of Veterinary Medicine*

**V_PBIO 5553: Veterinary Bacteriology II**
Continuation of V_PBIO 5552. Instructional period 6.

*Credit Hours: 2.5*

**V_PBIO 5554: Veterinary Virology**
(same as V_PBIO 8454). Classification and properties of viruses. Considers the etiologic, pathologic and immunologic aspects of viral diseases of animals. Instructional periods 6 and 7.

*Credit Hours: 2.5*
*Prerequisites: enrollment in the College of Veterinary Medicine*

**V_PBIO 5555: Epidemiology and Biostatistics with Laboratory**
(same as V_PBIO 8455). This course introduces students to methods of determining the influence of disease on populations and how this information is applied to individual animals. Biostatistics and evidence based medicine are also discussed in this course. The knowledge gained in this course is applied to reading professional literature during the course. Instructional period 4.

*Credit Hours: 2*

**V_PBIO 5557: Veterinary Parasitology with Laboratory**
(same as V_PBIO 8457). Parasites and parasitic diseases of ruminants, horses, swine, dogs, cats, poultry and other animals. Includes classification, morphology, and bionomics of protozoa, helminths, and arthropods. Instructional period 6.

*Credit Hours: 2*

**V_PBIO 5558: Veterinary Public Health**
(same as V_PBIO 8458). In this course students are introduced to the wide range of veterinary involvement in maintaining and assuring human health, nationally and globally. Topics discussed include: agencies such as USDA, FDA, CDC, food safety and meat inspection, veterinary responsibility in identifying diseases, legal issues of drug use, and zoonotic diseases. Instructional period 7.

*Credit Hours: 2*

**V_PBIO 5559: Veterinary Parasitology with Laboratory**
(same as V_PBIO 8457). Classification and properties of parasites. Considers the etiologic, pathologic and immunologic aspects of parasitic diseases of animals. Instructional periods 6 and 7.

*Credit Hours: 2.5*
*Prerequisites: enrollment in the College of Veterinary Medicine*

**V_PBIO 5560: Veterinary Public Health**
(same as V_PBIO 8458). This course introduces students to methods of determining the influence of disease on populations and how this information is applied to individual animals. Biostatistics and evidence based medicine are also discussed in this course. The knowledge gained in this course is applied to reading professional literature during the course. Instructional period 4.

*Credit Hours: 2*

**V_PBIO 5561: Veterinary Pathobiology with Laboratory**
General Pathology. Tissue reactions to various disease agents in domestic animals. Instructional period 5.

*Credit Hours: 3*

**V_PBIO 5562: Veterinary Systemic and Special Pathology with Laboratories**
Special and systemic pathology. Tissue reactions to disease in special systems in domestic animals. Instructional period 6.
### Veterinary Pathobiology (V_PBIO)

</thead>
<tbody>
<tr>
<td>V_PBIO 5577</td>
<td>Veterinary Systemic and Special Pathology II with Laboratory</td>
<td>Follows the general pathology and continues the systemic pathology taught in V_PBIO 5576. The course, consisting of daily lectures and weekly laboratories, covers disease, mainly in domestic animals, of the following systems or organs: cardiovascular, respiratory, lymphoid, cutaneous, mammary, ophthalmic, and otic. Instructional period 7.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>V_PBIO 5578</td>
<td>Veterinary Clinical Pathology with Laboratory</td>
<td>Physiologic basis, interpretation and clinical application of laboratory assays in hematology, chemistry, cytology, and urinalysis, utilization of laboratory methods to define pathological states and to diagnose disorders of domestic animals. Instructional period 8.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>V_PBIO 5579</td>
<td>Veterinary Genomics</td>
<td>Study of genomes, an organism's entire set of the genetic information. Used for detection of pathogen genomes, and markers for mutation causing inherited disease. Instructional period 5.</td>
<td>1</td>
<td></td>
</tr>
<tr>
<td>V_PBIO 5580</td>
<td>Introduction to Veterinary Informatics with Laboratory</td>
<td>Introduces concepts of veterinary informatics and development of core informatics competencies necessary for successful veterinary practice. The knowledge and skills in this course address topics such as data retrieval, information evaluation, medical records, practice management, communication skills and telemedicine. Instructional period 5.</td>
<td>1</td>

</tbody>
</table>

V_PBIO 8410: Seminar in Veterinary Pathobiology
Discussion of current research methods in veterinary pathobiology.

V_PBIO 8411: Seminar in Histopathology
Discussion of current research and/or case studies in pathology of diseases of domestic animals, laboratory animals and avian species. Team taught.

V_PBIO 8421: Advanced Epidemiology
(same as F_C_MD 8421).

V_PBIO 8430: Comparative Pathology
(same as PTH_AS 8000). Biochemical and morphologic lesions related to the mechanism of disease expression in plants and animals.

V_PBIO 8432: Advanced Histopathology
Advanced microscopic study of pathological tissues.

V_PBIO 8433: Veterinary Oncology
History and molecular biology of neoplasia; laboratory for discussion of practical aspects of diagnosis.

V_PBIO 8434: Advanced Clinical Pathology
Lecture/tutorial teaching; pathogenesis of clinical laboratory abnormalities in the common domesticated species. Emphasis is placed on mechanisms of disease and pathophysiology of the changes seen in each organ system.

V_PBIO 8435: Advanced Microscopy in Veterinary Clinical Pathology
Recognition and pathogenesis of abnormalities found via microscopic analysis of blood smears or cytology.
V_PBIO 8436: Pathogenic Mechanisms in Veterinary Pathobiology
This course will include disease mechanisms, described at the cellular and molecular level, which result in tissue morphologic (gross and microscopic) and clinical abnormalities. Examples of discussion topics include soluble mediators of inflammatory processes, host-agent interactions, and host defense mechanisms.

Credit Hours: 3
Prerequisites: instructor's consent

V_PBIO 8437: Pathology of Laboratory Animals
Gross and microscopic study of spontaneous and naturally occurring diseases in laboratory animals.

Credit Hours: 4
Prerequisites: departmental consent

V_PBIO 8438: Primatology
Disease and pathology of primates.

Credit Hours: 3

V_PBIO 8441: Topics in Veterinary Pathobiology
Subjects appropriate to veterinary pathobiology and/or epidemiology, taught on a one-time basis or infrequently. May include highly specialized topics. Specific course must be approved by departmental faculty.

Credit Hour: 1-3

V_PBIO 8442: Advanced Veterinary Pathogenic Bacteriology
Study of pathogenic bacteria causing animal disease. Pathogenic mechanisms and host-parasite relationships are emphasized. Laboratory procedures for isolation and identification of pathogens are included.

Credit Hours: 3

V_PBIO 8443: Viral Infection and Immunity
Study of virus infection at the level of the intact animal. Includes immunology of domestic animal species.

Credit Hours: 3
Prerequisites: graduate standing and instructor's consent

V_PBIO 8444: Molecular Methods in Nucleic Acids
The course will focus on the most recent developments in technology related to eukaryotic and prokaryotic molecular biology and as analysis a manipulation of nucleic acids and their application to define structure, function and biosynthesis of macromolecules.

Credit Hours: 3
Prerequisites: MICROB 4304 and instructor's consent

V_PBIO 8450: Non-Thesis Research in Veterinary Pathobiology
Research not expected to terminate in dissertation.

Credit Hour: 1-99

V_PBIO 8451: Introduction to Immunology (same as V_PBIO 5511 and V_PBIO 5512)
Fundamentals of immunology as applied to domestic animals.

Credit Hours: 3

V_PBIO 8452: Cell and Molecular Electron Microscopy
Lecture class that describes the use of electron microscopy (transmission and scanning) in biomedical research. Students receive hands-on experience by completing a laboratory project.

Credit Hours: 4

V_PBIO 8454: Domestic Animal Virology (cross-leveled with V_PBIO 5554)
Classification and properties of viruses. Considers the etiologic, pathologic and immunologic aspects of viral diseases of animals. Instructional periods 6.

Credit Hours: 2.5

V_PBIO 8455: Epidemiology and Biostatistics
Graduate level introduction to veterinary epidemiology and bio-statistics.

Credit Hour: 2-3

V_PBIO 8457: Animal Parasitology (same as V_PBIO 5557)

Credit Hour: 3-5
V_PBIO 8458: Veterinary Public Health
(same as V_PBIO 5558).
Credit Hours: 2

V_PBIO 8468: Laboratory Animal Biology
Taxonomy, anatomy, physiology, nutrition and behavior of laboratory animals including non-human primates and less common species are covered. Genetics, gnostobiology, housing and production are also presented.
Credit Hours: 4
Prerequisites: instructor's consent

V_PBIO 8552: Veterinary Pathogenic Bacteriology and Mycology I
This course deals with the bacterial pathogens of animals emphasizing the pathogenesis and pathology of the diseases, diagnostic problems, appropriate treatments and prevention measures. Course graded A-F only.
Credit Hours: 3
Prerequisites: instructor's consent

V_PBIO 8553: Veterinary Pathogenic Bacteriology and Mycology II
This course deals with the bacterial pathogens of animals emphasizing the pathogenesis and pathology of the diseases, diagnostic procedures, appropriate treatments and prevention measures. Graded on A-F basis only.
Credit Hours: 2.5
Prerequisites: V_PBIO 5552 or V_PBIO 8552 and instructor's consent

V_PBIO 8601: Animals in Emergencies & Basic Emergency Response Training for Vet Students
This course will enable veterinary and graduate students to understand their role in society during disasters and credential as responders. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: Students must be enrolled in the College of Veterinary Medicine and pursuing a DVM degree or be a student pursuing an MPH degree. Instructor consent required for non-veterinary graduate students seeking MPH degrees

V_PBIO 8641: Introduction to Research Ethics
This course provides students with a brief overview of many of the ethical issues that confront today’s scientist. It is important that scientists think about and develop their abilities to make well-reasoned responses to ethical problems.
Credit Hour: 1

V_PBIO 9090: Area Veterinary Pathobiology Dissertation Research
Dissertation Research for PhD students. May be repeated for credit. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: departmental consent
